PIERCE COUNTY	The timelines are ridiculous and costs entirely too high and those on fixed incomes will be much more negatively impacted. Tacoma has been treated like the red-headed step-child for far too long, light rail to Sea-Tac was needed yesterday! SoundTransit has to find ways to get costs under control, the Sounder fees are entirely too high now. For someone from Tacoma wanting to make \$15hr. in Seattle, they would have to be paid \$16.18 hr. in order to cover their \$2,268 yearly Sounder transit fees, it's outrageous!
PIERCE COUNTY	I think you need to prioritize linking Tacoma to the Airport and Seattle via light rail, been promised for too long and 17 years out is ridiculous. 405 needs commuter enhancements now, so any efforts to provide faster buss routes to get folks out of cars on 405 are critical.

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	<p>I think many people in the South Sound feel 'left out' of the ST projects to date. Though I know there have been improvements personally, many people I know feel they haven't gotten any benefit for the tax dollars paid to date. It's all gone to Seattle and Bellevue. As I remember, in ST2 services to Tacoma appeared as a dotted line - a 'maybe some day but who knows when'. With ST3, I see light rail maybe to Tacoma in 17 years, but that doesn't seem like that great of an offer to many people. The Sounder stations in the South Sound are filling up quickly with lack of parking becoming a real issue.</p> <p>On a separate note, I wish you could somehow convince more people to take the bus (everyone seems to want trains and light rail). We can get a lot more out of our tax dollars by increasing the frequency and speed of bus service instead of building more rail - I always prefer to take express buses to the airport, meetings in Seattle, Olympia, and Tukwila, etc. over driving from Tacoma, and while the train is often quieter and more pleasant, it is slower and more expensive.</p> <p>I work in a city in East Pierce County that no longer has any Pierce Transit service and only limited Sound Transit connections for the Sounder. I literally cannot commute to work via transit anymore, even if I wanted to. Trying to negotiate limited route offerings and not having to wait 45-60 minutes between express buses could help get some more folks on transit.</p>
PIERCE COUNTY	<p>Due to the fact that I may not be around to use the proposed facilities and that my area is not accessed by any of the proposals, I'm somewhat ambivalent about it. However, I see an overwhelming need to fix the traffic problems on Hwy 167 and I-5 not to mention 405. I will only travel between 10 am and 1 pm when I have to be on roads. I would prefer either bus or rapid transit to get to Seattle, Renton or Bellevue. Most parking fills up early and trains don't travel mid-day when I would be interested in riding them. Thanks.</p>
PIERCE COUNTY	<p>I would like to see time to complete connecting communities along the I-5 corridor with light rail and improved bus service vastly decreased (17 years to get light rail in Tacoma is a ridiculously long time frame). There is an immediate need to improve commuting options between Tacoma -Seattle- Everett- Bellvue. Please decrease the amount of time needed to make these projects happens. I will pay higher taxes to see this happen in a 5 year timeframe.</p>
PIERCE COUNTY	<p>I would favor an accelerated schedule and would support higher taxes to pay for it. Several times I tried to take light rail but there were no parking spaces left at Tukwila Station and I was forced to drive downtown. Also I would like a station on the Boeing Access Road because I work a few blocks away, but in 20 years I will be 77. I really wish you could accelerate that one.</p>
PIERCE COUNTY	<p>Wish it could happen sooner. We need other forms of financing besides the proposed taxes to make this happen in my lifetime.</p>
PIERCE COUNTY	<p>I would like to see the project timeline to Tacoma moved up.</p>
PIERCE COUNTY	<p>Seems like an unreasonably lengthy timetable.</p>
PIERCE COUNTY	<p>Must be done faster... Should have been done 10 years ago.</p>
PIERCE COUNTY	<p>Timeline to extend light rail from Federal Way to Tacoma is too long.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	I voted for Sound Transit to build light rail. I am not supportive of bus service. The bus service is subject to the same problems of traffic that other cars on the freeway experience. I think that the heavy rail has been a conflict with cargo rail and a costly rental of the main railroad line.
PIERCE COUNTY	Timelines should be shortened if at all possible.
PIERCE COUNTY	Anyway projects can be made a priority to decrease timelines would be great unless you're goal under promising and over delivering when these projects don't take as long as what has been estimated.
PIERCE COUNTY	Git er done! Sooner is better; as the capital costs, and wasted time/money due to auto commuter delays, will only increase with time
PIERCE COUNTY	When I first voted to fund Sound Transit projects years ago, I thought light rail from Tacoma to the airport would have been completed by now. It seems as if Tacoma and Pierce County are an afterthought when it comes to light rail, yet we are asked to support it. Extending light rail to Tacoma from the airport is more important than building a line to Tacoma Community College. A line from South King County to Tacoma might help persuade a business to locate in Tacoma because commuting would be more efficient and take some pressure off the northbound commute on I-5 to Seattle, where the vast majority of jobs are today.
PIERCE COUNTY	It makes sense to get a sounder stop at boeing access to intersect with the light rail. I would be more supportive if this was a higher priority. transferring rail lines makes the system more usable.
PIERCE COUNTY	Light rail to Tacoma (including the Tacoma extension) and to Everett, need to happen faster. I utilize transit on a daily basis to commute, and frequently utilize transit to get to events around the Puget sound. Not only will I miss out on enjoying the dream of a full Puget Sound region light rail corridor in my young adult life, my future children are at risk of being another non-transit oriented generation stuck in increasingly horrific traffic in the region.
PIERCE COUNTY	I would like to see more parking added to the Puyallup and Sumner stations earlier.
PIERCE COUNTY	The South Sound light rail improvements are vital to this plan. Traffic from Tacoma to Seattle can take 2 hours in morning traffic when it normally takes 45 minutes. With housing prices increasing in Seattle, people are moving further away and we do not have the infrastructure to support that many commuters. I am happy to see a connection to Tacoma in the current plan, and I hope it stays there for the final. I just wish I could be able to ride the light rail instead of fight traffic before I retire.

Comment(s) about project completion timelines - Pierce County

<p>PIERCE COUNTY</p>	<p>The Puget Sound transit system is a joke! Seattle wants to be a big city yet lacks what all major cities have: a highly productive and efficient rail line (Subway, BART, MARTA, etc). There should be a line from Olympia to Tacoma (with stops in DuPont and Lakewood). There should already be a rail system in place from SeaTac to Bellevue and from Tacoma to SeaTac.</p> <p>Money and problems plague this area all the time and it's all self inflicted. Look at Bertha. What a fiasco! I could have told anyone when this was decided on that it would turn into a big mess. Instead of a massive tunnel under old buildings, you should have rebuilt the viaduct. The system worked just fine, it was just old.</p> <p>You spend millions of dollars every year doing nothing. The I-5 mess by the Tacoma dome has been going on for 10 years...and what are you doing??? No one ever sees construction, you've had to build the retaining wall twice now and it's STILL not done and no one has any idea what the improvement is for.</p> <p>You implement a carpool lane on I-405 and it's a complete disaster causing more traffic and more lost money (not to mention more damage to the environment for all the idling cars.</p> <p>You really need to just suck it up and build. Expand the light rail system along the entire Puget Sound I-5 Corridor. From Olympia to Lynnwood and many many stops in between. BART in SF is VERY efficient. I rode on it as a kid and now, I can take BART from SFO into the city or south or east bay. Traffic moves because of it.</p> <p>This government continues to waste money doing NOTHING. What you do is a fiasco and wastes millions of our dollars. I always vote "no" on projects because it's all wasted all the time! You want people to ride the bus? Make the bus system easy. I would take the bus from Renton to Seattle everyday years ago because the line was almost direct. I can't do that from DuPont. From DuPont to Tacoma (at least when I looked), it would take me 1-2hrs to get there because of the several transfers. Seriously? (Maybe it's improved over the last 5-7 years, I don't work outside the home anymore).</p> <p>I would LOVE to take the train from DuPont into Rainier Stadium or into Safeco if it was possible or economic but it's not.</p> <p>JBLM traffic is absurd. You tried a minor fix last year but it was a bandaid. I know that you will be doing to some widening and reconfiguring of the off ramps next year but it's another Band-Aid. JBLM is a city in itself and to not have the infrastructure around it supporting it is absurd.</p> <p>You need to fix the roads: widen, pave, patch, expand. It's embarrassing that this country is so rich yet our roads look like third world country roads. You need to fix the street lights too. The way many of them are set up, it's a big waste of fuel (and costly to the environment due to all the idling).</p> <p>Instead of spending money on "research" all the time, FIX IT. The roads, expand the rails, STOP bandaging the problem! NO MORE TAXES.</p>
<p>PIERCE COUNTY</p>	<p>I am not in favor of the amount of the property tax assessment against residential property. This in light of the looming tax hikes to pay for schools. Extremely burdensome on a retired person.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	For a cost of \$50 Billion there is no way it should take 25 years to complete the projects. The time line is absolutely absurd. The cost would be much more justified if the total timeline for all projects would at least be cut in half. Another issue is if the population continues to grow at the current rates in western Washington then in 25 years this system would be completely outdated if it is built to withstand today's population. And what's the short term fix to accommodate the congestion issue in the mean time. With a budget of \$50 Billion there is no way the total timeline of all projects should take more than 10 years.
PIERCE COUNTY	more light rail, the sooner the better, Olympia- Tacoma- Seattle- etc...
PIERCE COUNTY	Love that there might be a glimmer of hope for the commuting nightmare...the timeline is crazy though. Taking WAY too long to get the systems in place.
PIERCE COUNTY	Light rail is not the wave of the future. It is incredibly expensive to build a relatively long rail line when it is a mere fraction of the cost to run a few buses along the same route (ie. Downtown Tacoma to TCC). And the proposed cost and time line of the plan is absurd and outrageous.
PIERCE COUNTY	More aggressive time table to get light rail to Tacoma
PIERCE COUNTY	Souder service to DuPont, light rail service to Tacoma Dome parking should be completed earlier in the project timeline to relieve increasing connection at Fife and JBLM.
PIERCE COUNTY	We are very slow as a country to come forward to transportation needs, we need to be more thinking about future plans instead of when it becomes a problem. Then we try to fix it, and we basically just hit a market that needed it 10 years before the traffic problems, we are too slow to move on great ideas to solve solutions.
PIERCE COUNTY	I think creating more parking down at the Sumner Station would be vital as there are many people who park there and the way that the population in the Sumner, Puyallup, Bonney Lake area increasing, parking is becoming very difficult and possibly annoying to those that live in Sumner and have all these cars parked in front of their homes etc.....

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	<p>This is great for commuter service, which absolutely needs to be improved. But (1) The core needs increased service as soon as possible. We should be encouraging dense development in the urban Seattle core, not encouraging fringe development. Yes, suburbs need rail connections. But the downtown core already have more people willing to use mass transit, and need rapid transit light rail sooner rather than later. Core developments should be a priority above other development of lightrail. The Ballard line will bring in far more people than far flung extensions. Do not neglect the core. The timeline for core development is way too long, and I would be inclined not to support ST3 and wait for a better thought out core system before voting on it again in the future. Look at DC, they built out to the suburbs and largely neglected their core. Now development sprawls (in no small part due to zoning laws, but core neglect helped), and they don't have enough capacity in the core. We should be planning for dense and easy to travel development. Following that should be extensions outside the core, connecting farther flung residents to Seattle. The Ballard and West Seattle lines must be the top priority. (2) When you do build out to the suburbs, don't neglect parking. The Sounder could carry more commuters out of Tacoma I am sure of it, but parking facilities are under equipped. That being said, we should strive for dense development and development around transit centers should be a priority. (And you know where dense development already exists but rapid transit doesn't? Seattle.) (2) Don't neglect maintenance with all of this expansion. Sound Transit has done phenomenally with ST2, but don't let us go down the route of DC and Chicago and let our existing systems rot while we get doe eyed with the glitz of expansion. Especially the core. That is the backbone of our transit system, and it wouldn't exist without it.</p> <p>In short, while we should focus on suburb connectivity, it shouldn't be the primary focus. It should be Downtown core = priority 1, Suburban cores = priority 2. Look at Paris. For 100 years they developed their core. Did they eventually need to connect suburbs? Yes. But most of their ridership is in their core. That's what is necessary.</p> <p>That being said, I commend the ambitious expansion plans. Don't forget your voters in downtown Seattle though.</p>
PIERCE COUNTY	<p>These improvements are needed now, not in two decades. I think it would be in the public interest to complete them as fast as possible, and would personally be willing to pay more to make that happen.</p>
PIERCE COUNTY	<p>In my observation, residents in the South Sound are much more likely to use public transit. The priority should be placed on completing the projects in areas where they are most likely to be used.</p>
PIERCE COUNTY	<p>25 years? Seriously? Denver got their extension done in half that time. this should not take this long. Why didn't you do this 30 years ago? Seattle is so beyond the times.</p>
PIERCE COUNTY	<p>Parking and Service in Puyallup and Sumner, including Sounder and Light Rail connections during Sporting Events like Seahawks, Sounders, Mariners and College. Seasonal Employees for above teams are encouraged to use all combinations to and from events.</p>
PIERCE COUNTY	<p>Timelines should be sped up!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	I would prefer to pay even more taxes per year to get these much needed services earlier. 25 years is too long to wait for transportation we need now, isn't there a way to get the funds needed to push these projects forward?
PIERCE COUNTY	I will be retired in 25 years wont help me much if it takes that long. we need something sooner
PIERCE COUNTY	1)The completion time is too long. The projects need to all be completed within 5-10 years from voter approval. If it requires more money just ask for more money, and increase the tax accordingly. We need transit solutions yesterday and shouldn't have to wait 25-30 years for a solution. Please fix it sooner. 2) The projects seem very King County Heavy. Consider giving more projects to Pierce and Snohomish County, since we have to pay the tax for features so far from home, and we may never use them regularly. 3) Please increase express bus service immediately! Why not try and develop more electric bus lines, they could even be built along major highways with dedicated lanes and right of way, dedicated park and ride stations/improve existing park and ride stations. Why not run an electric bus down I-5 in the shoulder or the median with parking at stations? The same for I-405 and sr-167. Much faster to build and develop. 4) Please consider more projects for Pierce County a) connecting LINK from Downtown Tacoma to South Hill via Parkland & Joint Base Lewis Mchord b) LINK from downtown Tacoma to Tacoma Mall, south tacoma, and University Place/Fircrest c) connect LINK from downtown Tacoma to Westgate Center, via North I & North 21st street, with stops in the North Slope neighborhood and near University of Puget Sound.
PIERCE COUNTY	Anyway to speed this up? In 25 he i'll be close to retirement...
PIERCE COUNTY	The area can not wait 25 years to make this plan happen. Clogged roads are impacting the economy, quality of life and the environment. This needs to happen in the next 10 to 15 years. The roads can not support the traffic now. I fear to think what it will be like in 15 let alone 25 years. The process needs to be fast tracked. Thanks.
PIERCE COUNTY	This needs to be done faster. The time line can be a bit long for investors who won't see anyou real outcome for 8 to 10 years, and that's not even the light rail expansion. Needs to be quicker
PIERCE COUNTY	South Sound dates seem too far in the future - we need better transit options sooner.
PIERCE COUNTY	I really like expanding to south east sound. Sumner, Orting, Puyallup area needs more reliability to get to Seattle. I would love to see sounder open on weekends.
PIERCE COUNTY	25 years!!!! and then it will be obsolete. Too much money wasted on these projects. Tighten up your belt and let's get efficient!
PIERCE COUNTY	Because Pierce County Subarea collects money at a higher rate and is more of a positivity revenue stream, you should build Tacoma Dome station, Portland Station, Fife Station and the rail system up to the county line simultaneously as you build from Seatac South to Seatac. This will speed up the opening time, and again should be able to get done because the Subarea is collecting the funds. Yes, Pierce Subarea should help fund across the county line to the FWTC but not all!
PIERCE COUNTY	We are 25 years behind Portland, 25 years is wat too long for me. All public projects are to expensive and take way too long.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	With the growth rate of the population at this time, I feel strongly that this timeline is completely inadequate. We, the population, need these plans to move forward expeditiously! Just in my community alone, over 400 HOUSEHOLDS will be added by the end of 2016. 80% of those households are already spoken for, meaning those families or individuals will be on the road each morning or using public transportation within a matter of months. This is a serious concern of mine. My time is precious and the more time I sit in traffic or wait for the next train or bus because of capacity is time away from my family and my right as an American to pursue happiness and enjoy my life with family. Please consider expediting these projects as soon as possible.
PIERCE COUNTY	Taking WAY TOO LONG!!!!!!
PIERCE COUNTY	I very very strongly oppose paying anything more in taxes. We are taxed to death in this state. Better financial practices should be able to handle the costs without taxing everyone.
PIERCE COUNTY	Personally, I would be willing to pay more to get it done faster. I don't know that I'm the only citizen that feels this way, either.
PIERCE COUNTY	Bias to development of the Tacoma area; pedestrian/bicycle access to the stations; better transit choices; FIX THE AWFUL BUS TRANSIT ROUTE FROM TACOMA DOME STATION TO I-5 WHICH TAKES IN ITSELF 15 MINUTES, etc. Thanks
PIERCE COUNTY	Would like to see more priority for South Sound. Additionally this "might" make I-5 a little bit less congested. Same for Everett/Marysville I-5. Not much growth room left in Eastern King Cty. Growth is to North & South of Inner Seattle.
PIERCE COUNTY	I would pay more for faster completion schedules.
PIERCE COUNTY	I would be willing to pay/support higher taxes and/or restructured debt service in order to complete the projects faster. I also think that local transit agencies - Pierce Transit, Metro, and the others - should have concomitant increases in funding to support the local transit users both feeding into ST and also encouraging local transit use.
PIERCE COUNTY	Should have been done 20 years ago!!!
PIERCE COUNTY	25 years seems like a long time. Will this take into consideration any major population changes and regional shifts?
PIERCE COUNTY	17 years for Tacoma line expansion seems to far out.
PIERCE COUNTY	Thank you for preparing this plan. Our regions transit infrastructure is woefully underfunded. These projects have value but much more is needed and soon. We need these investments in our economy now!  Also, I hope the focus will continue to be on finding ways to move people and goods, rather than cars.
PIERCE COUNTY	you should work on starting all the main projects at the same time so you can get it done much sooner.
PIERCE COUNTY	17 years to fix the traffic mess from Olympia to Seattle is entirely too long. Why not fix that commute first? The more people that you get off of Interstate 5 and onto a commuter train between Olympia and Seattle the better the traffic in this region will be. Why does Seattle/King County get EVERYTHING done there first???

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	We frequently commute from Tacoma to Seattle, and we would do it via light rail if the times and routes were a good option for our flexible work schedules. Instead, we get stuck in tremendous traffic, and we hear about how people would rather drive solo than carpool. I wish the construction could happen much sooner--17 years?!?!--because of the strain on our regional infrastructure, the immense pollution and reliance on fossil fuels this represents, and just the everyday wear-and-tear (loss of family time, problems with vehicles), even dangers (stress, road rage, accidents, long backups), of a daily car commute.
PIERCE COUNTY	I feel that light rail to West Seattle and to Tacoma should be completed sooner.
PIERCE COUNTY	If all goes well, could the projected timeline of light rail extensions be finished on time or even as early as one or two years than the indicated? Traffic is terrible in the region and certainly a good network of reliable, safe, and fast method of transportation is much needed here in the Puget Sound Region. More and more people are moving into the area and are commuting farther for work everyday.
PIERCE COUNTY	We need transit options in this area faster. Many other smaller metro areas than here have better transit systems than us. We need to catch up otherwise economic growth in this region will suffocate in the congested lanes of I-5 and I-405. I understand the economic reality of the timeline but I want to be able to see this done before I am in my 50's.
PIERCE COUNTY	It is political malfeasance that a comprehensive transit system as outlined is not in place today. The timeline to achieve this is far too long. Hell, if Los Angeles could finally get it's act together to build a subway system (I have no idea whether it's good, bad or indifferent), we certainly ought to be able to have an effective transit network here.
PIERCE COUNTY	Alternative transportation in our region is already behind other metro areas. For these projects to take 25 years to complete, our region will only continue to be dependent on personal vehicles. The 25 year timeline does not give me faith that the projects will actually be completed - let alone completed on time.
PIERCE COUNTY	I wish I could understand WHY it will take 17 years to extend light rail capability into the south sound area - is it funding? It seems outrageous that it would take so long to serve a community that is in desperate need for reliable consistent transportation into King County. As someone who has commuted to Seattle and/or the eastside for more than 20 years, it saddens me to learn that it will be another 17 before there are better options
PIERCE COUNTY	Projects need to be completed much quicker than they are currently being done. Accessible light rail from the south end would be highly beneficial and 17 years to completion is way too late.
PIERCE COUNTY	As a south sound resident, you should try to communicate the benefit to south sounders despite the fact that we will wait 25 years to see our portion of the work complete. Traffic from the south sound to Seattle is difficult during peak hours, and many of us see the need, but to wait 25 years is quite a long time. Is there any chance the project schedule can be expedited, or phased differently to allow the project to be complete sooner?
PIERCE COUNTY	Light rail Seattle into Tacoma should be soon than 17 years light rail from south sound into Redmond and Bellevue should also be sooner rather than later.
PIERCE COUNTY	As long as it doesn't affect current commuting and commute times while doing these extensive projects!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	I think that the most dismaying part about this plan that I've heard grumblings about is the timeline and how long it will actually take to build this structure. Many of us that are working now will be closer to retirement by the time everything is completed. I think the priorities need to go to the most congested traffic areas and where the most concentration of cars are commuting to job centers... Ft Lewis/McCord, Boeing, and I-405 commuters. It would be nice to get them out of their individual vehicles and into a mass transit situation, sooner, rather than later. Fyi, Tacoma just announced a new plan for a Town Center in Downtown Tacoma adjacent to the University Washington Tacoma - make sure in your plans that you are thinking about the commuters in Tacoma and Pierce County... don't get me wrong, I really want the light rail to expand in Tacoma, but S 19th street to TCC and back may not be the best spot, unless you are planning to expand it again from there. I don't see City of Tacoma folks taking a bus to TCC, then the light rail to town and there's nowhere to park at TCC.
PIERCE COUNTY	I think 25 years from now, traffic will be so bad we may be arguing about the money we could have spent 20 years ago.....
PIERCE COUNTY	Speed it up! We need this yesterday!
PIERCE COUNTY	The I5 corridor needs to be the focus, Everett to south of JBLM. Use transit to and from transit centers. Dedicated light rail is preferred, need transit hubs that fee communities, not parking facilities that add influx of traffic for parking.
PIERCE COUNTY	project 2 West Seattle servicesushe comes first provildng St bus service and widened the shoulders for buses north-south route after that light link in Tacoma. The time table is to long. We need it now not 15 years from now
PIERCE COUNTY	These projects and more need to be started immediately. We need transit here in Tacoma and the outskirts of Tacoma really badly. We needed to do this a decade ago. I suggest a massive coordinated regional plan that is absolutely bombarded on tv and other outlets to encourage acceptance for mass transit. Too many people die on the roads, the roads cost too much, the roads cost our environment too much. Please please please get started today although I know the government wheels grind slowly. This area needs these projects and to accept as a community that this is needed.
PIERCE COUNTY	These projects are something our city desperately needs! Even if the deadlines are not right away, the benefits of building these future projects will be immense as more and more people look for alternatives to driving on congested roads.
PIERCE COUNTY	The Link Light rail extending from Westlake to Tacoma would be extremely beneficial for commuters from Tacoma. As a commuter, I spend over 1 1/2 hours driving each way from Seattle to Tacoma. Extending this part of the light rail first would help to free up much of the north bound congestion on I-5.
PIERCE COUNTY	30 years is too far out, this should be done in 10 to 20 years.
PIERCE COUNTY	Tacoma doesn't have any light rail access so I think it should be a top priority!
PIERCE COUNTY	17 & 25 years are REALLY far out for an error that is an crisis NOW. I live in Auburn and Commute to Seattle. I'd like to move to Tacoma and commute to Seattle - I use the sounder daily. One of the MAIN issues facing my commute is parking. IT FILLS QUICKLY.
PIERCE COUNTY	Project being completed 25 years from now? I won't even be alive to benefit from that! Best to spread it around a little, and give everyone a taste. It sounds like a king county guess the spoils, Snohomish and pierce county get the scraps 25 years from now. That's a good way to sink the project.
PIERCE COUNTY	I would strongly support the 200.00 per year if it wasnt going to take 25 years for me to be able to access transit.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	Key components placed on the highest priority should be: 1). extending light rail to the Tacoma Dome transit area that will be a great hub for AmTrak, Sound Transit rail, Link, and Pierce Transit. Additional parking needs to be included. 2). Express bus service on 405.
PIERCE COUNTY	Timeline for this project is projected to far out. A shorter time frame for the conjunction from exit 122 through Dupont should be a priority.
PIERCE COUNTY	I am sure there must be a way to complete these projects sooner. The traffic relief is needed.
PIERCE COUNTY	The sounder extension from Lakewood to Dupont is extremely important because of the constant traffic jams in the JBLM corridor.
PIERCE COUNTY	Please figure out a way to delivery light rail to Tacoma and Everett; 3-5 years sooner with creative strategies. Please also work on a plan to develop more arrival and departure times Via the Sounder Train service between Lakewood and Seattle..i.e weekends, sporting events, evenings on Friday's to accommodate those wishing to have an alternate solution to drinking and driving.
PIERCE COUNTY	As a Boeing employee, I feel that there is a real need for transit to Boeing field. I would love to take public transport if it didn't involve me having to catch one of two buses to get to Boeing field from Tacoma/the Tukwila station. I feel that this would appeal to many employees at Boeing field
PIERCE COUNTY	I would like to see the completion of a line to Tacoma from SEA-TAC pushed to the top of the list. It seems the South Sound always comes last. I noted that o advertising card all the cities were listed--except Puyallup and Sumner, even though there are large populations w/o service in eastern Pierce County. Makes me feel we don't matter.
PIERCE COUNTY	Due to unpredictable traffic and TSA lines flying out of SeaTac is a nightmare for anyone from Tacoma. All i would ask is that light rail between Tacoma and SeaTac be prioritized above Bus Rapid Transit between Lynnwood, Bellevue and Renton.
PIERCE COUNTY	More priority should be placed on projects in Pierce and Snohomish County. We have been paying for projects that have primarily benefited Seattle/King County and I would like to see some of the benefit during my lifetime.
PIERCE COUNTY	Tacoma / Federal Way to Seattle line is urgently in need now! In 2008 perfect transit from Browns Point neighborhood via Hwy 99 with I5 entrance at Kent Des Moines to exit I5 at the I90 exit was 37 minutes (actually to the Rainier St exit off I90) and now with the economy back on track it's lucky to have a 60 minute trip (departure of 615am with planned arrival of 7am as 45 minutes was easily attainable when I started the commute in 2008). If I could catch a rail in Federal Way that would make the trip north to Seattle in about 20minutes it might make me switch from driving or at least clear up the roads for others to use rail and I could have my 45minute or less commute again. This needs to be done within a 5 year plan though. Nobody wants to pay now for a rail system they will not be using in 17 years when they have moved or are retired. That is not a reasonable time line.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	the project completion is too far out. By the time they are completed they will be not enough for the growth. Expand on bringing people in from the outskirts into the Seattle metro area. Seattle has enough buses & stops. I don't use mass transit living in Puyallup because the Sounder doesn't go to Seattle on a regular basis, only during peak commute times.
PIERCE COUNTY	Would love more express bus traffic from Puyallup to Federal Way
PIERCE COUNTY	We (the commuters in this state) are desperate need of relief and solutions. I support ST's plan fundamentally - however, in my opinion, 25 years for completion is ridiculous. I will be nearly retired by that point (which at 31 years old, is crazy to think about). My father was a first rider of the Sounder train when it began, and commuting options have not really evolved for Sound Sound folks and traffic just gets worse. The plan is something, but the timeline is disappointing.
PIERCE COUNTY	I would support the above question #12 more if the completion times were quicker.
PIERCE COUNTY	why does it take so long to get done and as a senior citizen and a disable veteran you are killing us with your taxes if you keep this up i will be homeless
PIERCE COUNTY	South Sound projects should finally receive a little bit of priority. As it is, I am 51 and I may not live to see regional light rail come to Tacoma. We have been paying the same RTA taxes as everyone else, all these years, and we have NOTHING in terms of light rail. I do not count the toy train you put in downtown Tacoma. I am not appeased by the tiny extension to Hilltop. We pay the money, Seattle gets the projects. My future votes on this issue will be conditioned on Tacoma getting something worthwhile. Right now I am not seeing it. I love regional transit, I have used it daily in the past, and I support it in principle very strongly. But what ST has done to us in Tacoma feels a lot like taxation without representation.
PIERCE COUNTY	Light rail should have come to Tacoma years ago. This inordinate focus on Seattle suburbs needs to come to an end. Yes I'm from Tacoma and Tacoma centric but Tacoma had been put on the back burner for too long. North-South is the Puget Sound orientation and the population corridor, the need to deal with transportation here is critical before someone hollers that we need to add more lanes to I-5.
PIERCE COUNTY	Isn't there any way to connect the Tacoma and Seattle light rail lines sooner than 17 years??
PIERCE COUNTY	I am outraged at the timeline of your Tacoma Project. SeaTac airport is a major employer and 17 years is too long to wait for service to Pierce county. I cannot believe there is a need for more transit in Ballard and Bellevue. The 574 is packed everyday.
PIERCE COUNTY	Please act fast, we need to reduce CO2 omissions, not in 17-years - NOW. Be progressive - be proactive - make sustainable transit a priority.
PIERCE COUNTY	Light rail that connects Tacoma and Seattle should be the TOP priority, completed as soon as possible.
PIERCE COUNTY	Tacoma is growing and we need RELIABLE transportation to seatac airport and seattle. Traffic is terrible and the only public transportation from tacoma to the airport is Sound Transit 574. The 574 is often late or stuck in traffic. This is frustrating, especially at \$3.75 each way. Please help us get from Tacoma to the airport effeciently.
PIERCE COUNTY	We need a more robust Europe or Asia-style train system in the Seattle-Tacoma area, and we need it much sooner than 10-25 years.
PIERCE COUNTY	We need to move forward as quickly as possible. time line should be ten years instead of 25.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	Expansion of the transit system in the Puget Sound needs to be a top priority. As more and more people move to the area the need for transit will also increase. The timelines outlined above are just too slow. We need to find a way to fast track these projects and get them done before they are needed so they can grow along with the area. Light rail to Tacoma should not take 17 years. The area is growing too fast and the transit is not keeping up.
PIERCE COUNTY	25 years is an absolutely ridiculous time frame for expansion. Traffic is absolutely horrible getting into Seattle, and there needs to be a sense of urgency to expand light rail as well as expanding parking availability at Sounder Stations. A 25 year timeline shows a disconnect to what the community needs and lack of vision to accomplish what is needed, evidenced by the severe lack of parking at all south end Sounder Stations and the extremely slow response to improve the situation.
PIERCE COUNTY	so 30 years before Bonney Lake and Orting get any service?
PIERCE COUNTY	It seems where I live I pay the RTA tax and I receive zero benefits. I live in Orting and work in Auburn. The only projects that have been planned and completed are North of the airport. It's unfair to people who live where I do.
PIERCE COUNTY	My problem with ST is your time lines....I will be dead before most of this is done. There is no sense of urgency at all as traffic get worse and worse. It took forever to complete the UW line and look at the ridership...I read they had to add cars! Your people need to find away to get true mass transit projects done faster. You want public support you better show us something quicker than 8-12-17years! My suggestion try a fast 2 year time line for construction/completion of light rail from Everett to Tacoma for starters. The project should be treated like an emergency just like they rebuild the freeways in San Fran after the earthquake in the 90's. People like me are sick and tired of our tax dollars going to all these studies and nothing getting done!
PIERCE COUNTY	This work needs to be done as fast as it can. Pierce County needs to be a priority not just a place to collect taxes from with little to no improvement in our transportation options. If Pierce County continues to be placed behind Seattle/King County I WILL NOT VOTE FOR THIS PACKAGE. I will also strongly in courage local voters to not vote for this package either.
PIERCE COUNTY	We need this all to happen FASTER!!!! 22 years is too long.
PIERCE COUNTY	I am strongly supportive of increased taxes to pay for a more complete transit system. If we had voted in the early 70s to build a good system (I remember Forward Thrust), we would not have the congestion and the costs associated with building this that is happening now. We can't just wait...
PIERCE COUNTY	I-5 from Seattle to Tacoma is getting worse by the day. We need to fast track the light rail project to the southsouth. In the meantime I don't understand why there couldn't be an express or direct sounder route from Seattle to Tacoma at least once per day. The ridership is increasing exponentially, something needs to be done as the average commute from Tacoma to Seattle round trip is over 3 hours. The riders would pay for the faster routes if they were offered!
PIERCE COUNTY	The south sound needs project completions sooner. Traffic is terrible coming out of east Pierce county. 17 year completion timeline is not soon enough.
PIERCE COUNTY	The Tacoma to Seattle should be completed sooner. Big hassle now to go to Seattle due to traffic. From East coast originally where you can ride a train to all major cities in Northeast corridor and it works out great.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	If there would be a way to expedite light rail expansion to further out communities such as Redmond, Federal Way, Tacoma, etc that should be explored.
PIERCE COUNTY	If possible, I would like to see projects completed sooner. It doesn't make sense to me that it would take 25 years to expand to Everett or 17 to west seattle.
PIERCE COUNTY	I am not willing to support a plan that does not provide any new services for the south sound for twelve years. King county gets preference and that is unfair use of our tax dollars. You will not get support in Pierce county as long as you continue to underserve us.
PIERCE COUNTY	The time line seems a bit long for the price tag. Also I think the state needs to re work their finance before any more tax money is voted on. These are hard times and an extra 200 a year is hard for most people. I even pay for my orca card once a month, so I think you should be looking at that before you ask for more money
PIERCE COUNTY	Could you use existing buses and current drivers to move commuters from Tacoma to Seatac and Seatac to Bellevue quickly and frequently? Also please consider an express bus to Olympia. If you could run express bus service along the proposed routes you could prove need and increase voter support while serving the community and saving the environment by decreasing freeway congestion.
PIERCE COUNTY	Connect Tacoma ASAP, and make the rail faster.
PIERCE COUNTY	Any way this can be sped up? That's an awfully long time to wait.
PIERCE COUNTY	I would like to see the Tacoma and Pierce County related light rail projects completed more quickly than a 17 year timeline. The SR 16 / I5 interchange project was expedited using additional funds. I would accept a higher cost if the project could be completed in 5-8 years or show major progress towards a 10 year timeline. I believe south-sound commuters have a major impact on traffic all the way from Olympia up to Everett and a Light Rail extension being completed more quickly will bring significant benefits to traffic in Pierce and King County.
PIERCE COUNTY	The time line is too long. It should be completed within 10 years. The stations should be where existing populations are and not contribute to more sprawl.
PIERCE COUNTY	I think that the timeline should be halved. Twenty five years is to long. Fifteen years to full completion.
PIERCE COUNTY	I think that the light rail and rail projects should be fast-tracked, and they are so important that more tax money should be spent immediately to move them forward.
PIERCE COUNTY	Our Metro area's inability to DECIDE, has already put this region WAY behind the ball on developing/completing a decent mass-transit system. Shameful! I would be very willing to allocate my self TWICE the proposed yearly "taxation cost" if it would mean bringing these projects on-line significantly faster. BE BOLD - get this DONE.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	<p>Let's complete the transportation corridors first, up front, but include other improvements in-stride. By this I mean, let's get the major parts of the system done - Sounder from DuPont to Everett, with more frequency of trips (not just as a commuter vehicle), Link from Tacoma to Everett and to the East side (also with frequent trips). These two paths, with the interconnecting buses are the key... Then begin to tie-in the other areas like, TCC, West Seattle, Ballard, Redmond, Issaquah, etc. In-stride with the primary corridor expansion, throw in the facility improvements and interconnecting buses. Last would be all the other bus improvements, but I understand that they can be "low-hanging fruit" that might be used to help get us out of our cars, but I'm telling you "no body" really wants to ride the bus - generally, they are too crowded, too uncomfortable, too dirty/smelly and too infrequent. Beef-up the longer, more express routes as well as the interconnecting routes by adding more frequency. This will discourage crowding, thus relieving some of the discomfort and dirty/smelly aspects.</p> <p>Once again your must increase ridership across the system, and this can only be done thru more frequency on all means, extending primary routes (Sounder, Link) to the hubs, and making neighborhood extensions a local (not Sound Transit) initiative.</p>
PIERCE COUNTY	<p>Tacoma and Pierce County have few transportation options. I think we need some of these projects accelerated. The traffic around JBLM is one big parking lot beginning at 3pm til 6:30pm. Everyone drives!</p>
PIERCE COUNTY	<p>By the time you finish this "grand" transportation plan I most likely will be dead. However I am still strongly in favor of this plan for many children and their children. And to bring our community into a modern era of current transportation. If possible add incentives for completing projects early.</p>
PIERCE COUNTY	<p>Stay committed! Hard to believe it's so many years to complete! But, it must be done, failure is not an option!</p>
PIERCE COUNTY	<p>Whether we like to admit it or not, bus service carries a stigma with certain groups of people that rail service does not, especially light rail. Light rail is readily embraced by all segments of the population, while bus service is often avoided by those above a certain income level. As such, light rail improvements should be made the priority for project initiation. With Seattle already having a strong light rail infrastructure in place, focus should be given to the next largest metro area in the region, Tacoma. This is especially true with Tacoma's projected population growth as the Seattle cost of living continues to rise and residents embrace the more affordable prices in Tacoma. Tacoma's current light rail system is very nice, but its limited footprint severely limits its use and functionality. The vast majority of the city's population cannot access Link light rail in Tacoma from their homes without taking another mode of transportation first. Its potential could truly be maximized by providing greater reach into the city. Additionally, connecting Tacoma (and the in-between cities) to SeaTac should be made the other top priority. There is not a simple way to go from SeaTac to Tacoma, especially for tourists or residents not wanting to incur the additional cost of parking while away on a trip (or a pricey cab fare). Even though BRT is the easiest to get up and running, it will be the least utilized by the broader population. It also seems extraordinarily long to have to wait 17 years to get a light rail connection from the region's second largest city to the airport that shares its name. The project should be able to be accelerated if priority is given right from the outset instead of the BRT.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	The timeline for necessary light rail is too long!
PIERCE COUNTY	I'm for voting no just to get a better deal. This is overpriced and will take too long to happen. It can be done faster and cheaper. However, how ever is planing it is trying to fleece the tax payer of puget sound.  The transcontinental railroad was built faster. I'm not going to vote for a project my newborn wouldn't be able to use until he had graduated high school. When history has proven it can be completed faster.
PIERCE COUNTY	This plan will take MUCH too long. We need better transit solutions before my (unborn) children are ready to graduate from college! Effective high speed consistent mass transit is the only hope we have to ease our regions gridlock, I don't think we can afford to wait 25 years, traffic is already a nightmare...image what it will be in 25 years.
PIERCE COUNTY	I wish the connection of light rail to Tacoma could happen more quickly.
PIERCE COUNTY	I do not claim to know about schedules for building something like this; but feel that it is being dragged out too long. The system needs to be able to be in place ASAP. The area is growing so fast that it may be too late to help establish use by people rather than cars. It also needs to go to Olympia... our state's seat of government should be a priority. I'm sure you have a lot of unwanted comments, like mine, but you did ask.
PIERCE COUNTY	25 years is too long. People would use transit and rail more often if it extended from Olympia to Everett. Students, workers, tourists, and out state would benefit from this plan being completed max within the next ten years. With all do respect, many of our senior citizens will be deaceded by the original 25 year expectation.
PIERCE COUNTY	This plan will be outdated by the time it's built. The timeline is way too long
PIERCE COUNTY	If you want to eliminate congestion, you really need to bump up the timeline of the work on the Sounder between Olympia and Tacoma. The traffic on I-5 every morning heading north to Seattle is the worst I've ever seen. THAT is where the main priority should have been. NOT UW to Seattle!!
PIERCE COUNTY	First let me say I STRONGLY support mass transit and would use it far more often if getting to my destination on mass transit didn't triple or quadruple the time required to arrive. I grew up in the Boston area and enjoyed moving about quite easily on "The T". Portland OR seems to come closest to having figured out what good transit should look like. When I need to go to Seattle I try to be on the train or bus because the state of I-5 is horrid. I would love to take mass transit from Tacoma to Bellevue on my days working there, but the 42 mile trip would take 3.5 to 4 hours each way on the bus. I can do it in 1.5 to 3 hours each way on the motorcycle in the car pool lane. When we first started talking about the Sounder program I had REALLY hoped that in my lifetime I would be able to take some form of light rail from the Tacoma Dome to SeaTac Airport...alas, according to your current proposed time lines I am beginning to wonder if I shall live to see it.
PIERCE COUNTY	The timelines are way too slow, we need big changes much much faster. Traffic is abysmal and only going to get worse. Even if the cost is higher, the projects must be completed much faster than the glacial timelines proposed.
PIERCE COUNTY	Support the direct Sound Transit is going. Waiting 12-25 years for light rail service seems way too late as these services are needed now.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	The car congestion that exists along many of these routes is extreme during rush hour, and the timelines suggested for completion of any light rail (12-25 years) seems overly long and conservative. I would support a higher level of taxes to bring services online sooner and/or to tackle multiple phases of the project concurrently.
PIERCE COUNTY	Ballard to lake Union...OH PLEASE...take the bus. These little local piddly jobs are KILLING your area wide support. I would rather support getting Marysville to Tacoma/Olympia complete AS FAST AS POSSIBLE (not like our usual road projects in this state..more like the rebuilding of the Santa Monica Freeway in Los Angles following the Northridge EArthquake). Easing overall congestion and giving us a reasonable alternative to clogging the freeway with our cars will get the most bang for the buck. LOOK AT BART...it's basically a big X, not complicated. Marysville to Olympia first, then loop Lake Washington with a leg down the kent valley, Intersect them at Tukwila and Lynwood. Down the road perhaps link them across the lake and at Federal Way. My money stays home in Tacoma because I will do anything to avoid a leisure trip to Seattle, it just isn't worth it anymore. AND WHILE WE ARE AT IT...our traffic has gotten considerably worse since cell phones became plentiful. As a passenger I have seen at least 1/4 of drivers using a phone during trips to my doctor at UW Seattle. Cell phones have GPS and can detect motion.. If this is greater than 5 MPH cell phones should be irreversibly set to disable my the manufacturer except for emergency calls. No exceptions for passengers because it would then be abused by the drivers who don't seem to get the message. I predict this will have a major impact on fewer accidents, a leading cause of our congestion problems other than volume. Look at the traffic volumes and commute times during the spring break weeks April 2016. Do schools and a few people on vacation make that big of an impact on our traffic? Pretty Amazing! People on cell phones compensate for their lack of attention to driving by driving slower and leaving longer distances between cars...adds to congestion.
PIERCE COUNTY	Complete this as quick as possible. If there is any way to accelerate this work, do it.
PIERCE COUNTY	Complete projects as soon as possible! Thank you!
PIERCE COUNTY	There is an immediate need for more parking at rail stations. How can you even begin to expand rail without first taking into consideration where these people will park and/or catch ST bus service from? If I don't leave my house by 6:00 am, I am not going to be able to take the Sounder train in to work due to these obstacles. The one bus that services my option, is OVERPACKED each and every trip, sometimes even not being able to ride due to overcrowding. Parking at the rail stations should be #1 priority. We will even PAY TO PARK! Make money to put into expanding the service. Please hear our pleas.
PIERCE COUNTY	Timeline to south sound region should be completed sooner than purposed.
PIERCE COUNTY	Projects need to come online quicker, don't cut ST Express busses, more than station improvement for the Sounder - increased trips!!! Please a northbound train later than 8:10 - like 8:45am and 9:15am as well as later southbound 7:15pm or 8:15pm
PIERCE COUNTY	Parking at the Auburn transit station should be a huge priority because it was promised but never built.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	Is it possible to make the link project in Tacoma Pierce County of greater importance and completion since Pierce Transit cut many routes it limits one capability to maintain ones professional schedule with routes cuts as far as service of operations etc. I appreciate what Sound Transit is doing and hope the community whether they utilize the transit system or not will support it for the betterment of our community.
PIERCE COUNTY	The timeline for the South sound needs to be prioritized in order to serve the increasing number of citizens displaced by Seattle's exorbitant rent
PIERCE COUNTY	I "Somewhat support" the milestone plan as I do not think it is aggressive enough. I would "Strongly support" a shorter timeline for completion.
PIERCE COUNTY	Please work on getting lightrail to Tacoma as quickly as possible to connect us to the rest of the region. Tacoma is often the forgotten stepchild in transit decisions, and it's growth is being stifled by bad traffic and lack of transit options that go where we need it to. If you work in downtown Seattle there are good transit options from Tacoma, but there are pitifully few options if you work outside of downtown Seattle, which many of us do!
PIERCE COUNTY	For taking 17 years to get light rail from Tacoma to SEATAC and/or Seattle is neglect pure and simple. I will be retired by the time I could truly benefit for my work commute. I am extremely disappointed at the timeline for this project. It's needed now versus 17-25 years to complete. By then an even greater need for public transportation will be necessary.
PIERCE COUNTY	We need to connect Seattle and Tacoma with light rail. It should have been done years ago. Most of the traffic on the freeway is between these two cities. Tacoma is growing like crazy. They need to move the timeline up for this and make it the first priority rather than wait for 17 years when many of us will be dead. The traffic on I5 is not going to get any better. There are no more lanes to be added. It is the law of diminishing returns.
PIERCE COUNTY	The 17-year timeline to connect Tacoma is WAY TOO LONG!!!!!!
PIERCE COUNTY	Needs to be completed much sooner.....
PIERCE COUNTY	These dates are too far out to be relevant to today's commuting issues. Seriously, why does it take so long??? DC's Metro system did not take nearly this long. Granted, it's extension me have tAken years but not the starter system and that one awesomely connected many area together and has only improved thru years and expansion.
PIERCE COUNTY	Please stop making your primary focus on routes above Seattle (Focusing on North of Seattle, Ballard, Bellevue). You may not believe this, but many riders (who work in Seattle) live in Pierce and South King County.
PIERCE COUNTY	Because of the unreliable nature of our bus and rail system i rarely use our current plan. Not because i dont want to, but because i simple cant be delayed by our current systems lethargy. Every large city and well developed region in the world i have been too has an amazing public transit system. The public can rely on their system and because of it are able to rely less on personal vehicles that cause more pollution andtraffic issues. The puget sound region has massive traffic issues and very poor public transport. Our public transport is unreliable at best and is a thorn in our regions development. We need a dedicated rail just for quick moving commutor trains and considerably more bus in the region. Wait time for buses is horendous and the train hours are a complete joke. Investing in our regions transit system is vital to the growth of our region and should be made a priority, and expansion needs to move considerably faster as well.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	The timeframe is so long that the plan will be obsolete long before it is finished. You should focus on projects that can be completed in 5 years or less to deal with the congestion and travel problems of today. That would mean more buses in the near term.
PIERCE COUNTY	WHY IS IT out of every MOUTH its RAISE PROTERY TAXES!!!!!! WE are taxed to DEATH! Its making me want to move out of WA
PIERCE COUNTY	It needs to happen sooner than any 25 years. The sooner the better, build it people will come to use it and some of us that have no car would appreciate it.
PIERCE COUNTY	I trust that thinking is being done about opportunities to accelerate the schedule anywhere possible. Also, I'm hoping the commuter rail to Orting concept can be nailed down and added somehow to this project. That would be very forward-looking
PIERCE COUNTY	These are urgent needs, they may help 15 yrs down the road but we need solutions today.
PIERCE COUNTY	25 years is way too long-most of the people paying into this will not get to use it or see it and that seems unreasonable
PIERCE COUNTY	I struggle with the time estimate. Other cities have built similar projects in far less time.
PIERCE COUNTY	The ST3 draft plan needs to be done in half the time. E.g. light rail to Redmond and Federal Way should be complete within 6 years, light rail to West Seattle and Tacoma should be complete within 8 years. light rail from Federal Way to Tacoma should be built in parallel with the project to Federal Way.
PIERCE COUNTY	Tacoma needs service--and sooner.
PIERCE COUNTY	I believe that expanding the Light rails should be first priority. Getting the light rail to connect more major metropolitan areas (Tacoma to Seattle, and in between) will reduce an enormous amount of highway traffic.
PIERCE COUNTY	Hopefully a smoother, quicker way from Tacoma (where I live) to Everett (where my family lives).
PIERCE COUNTY	Charge a minimal fee for parking at the Tacoma Dome Station!
PIERCE COUNTY	Tacoma and the south sound population is primarily comprised of underrepresented adults working and commuting north. Please consider giving these projects more consideration in your timeline regarding the sounder and light rail projects.
PIERCE COUNTY	These light rail lines need to be completed quicker than 25 years even if it will cost a bit more to get it done.
PIERCE COUNTY	Please research all possibilities to complete Pierce County additions earlier than 17 years!!! Seattle is out pricing middle income folks and Pierce County can provide the housing and live-ability people need ...We need to be bumped up on the priority meter! We are no longer the smelly little sister, Seattle! We are an increasingly more diverse and liberal community that will support Pierce Transit if you would seriously consider us as important players in this fantastic and overdue transit expansion !! Thank you for the opportunity to comment.
PIERCE COUNTY	Tacoma needs light rail connection to SeaTac Airport asap, not 17 years from now.
PIERCE COUNTY	My biggest concern is placing the South Sound projects on the outer end of the timeline. If anything can be done to accelerate those projects, it would be helpful for prudent growth here in the South Sound.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	The Southbound Sounder Train is huge and parking at these stations is a premium anymore after 6:30 am. If additional parking needs could be met while the rest is brought online than it would make a huge world of difference.
PIERCE COUNTY	Commuter rail expansion should be moved forward and bus expansion moved back. Buses use fossil fuels and have less impact on decreasing air pollution.
PIERCE COUNTY	You need to move up the target dates for completion of projects go with light rail get folks out of there cars buses must fight with cars for are limited access. Are freeways are all crowded and with the growing population no room for freeway expansion. And at a high cost. Light rail and sound trains less gas and cleaner air. People love the trains just look at your current expansion numbers now is the time get going. Less freeways more beautiful Washington!!!
PIERCE COUNTY	Build them now while you still can. The cost will only go up. This all should've been done 25 years ago, so let's get it done now.
PIERCE COUNTY	These plans are way too expensive, much too long and far too Seattle-centric.
PIERCE COUNTY	This project is ridiculous. The number of people who use Mass transit is miniscule. The People of Washington state have rejected tax increases to pay for these types of projects over and over, when will you listen??! Eastern Washingtonians shouldn't have to pay for Seattles messes & western Washingtonians should be able to opt out. We will continue to fight expensive projects that only seek to satisfy government ambitions
PIERCE COUNTY	It feels like the Pierce county contributions have funded a lot more density of projects up north while we still wait in Pierce county for things to connect. 17 years seems way to long to finally get Tacoma link finished!
PIERCE COUNTY	I strongly oppose a system that uses 19th century technology to solve 21st century problems. Trains/light rail once installed are there for good or if you want to support the construction trade unions, you tear them up and move them. Oh, since sound transit has not met their completion time goals for most if not all of their projects, I doubt that the proposed budget and timelines will ever be met. Please quit wasting my tax dollars.
PIERCE COUNTY	Federal way to Tacoma Dome light rail expansion should be highest priority.
PIERCE COUNTY	Need good transit solutions extending to Olympia  Solutions need to help alleviate or go around the terrible bottlenecks on i5 between Olympia ans Tacoma and north and south of downtown Seattle  Though I love the idea of light rail extending into Tacoma to the TCC, I wonder about south Tacoma. Is it underserved by this plan!
PIERCE COUNTY	tax the home builders and companies that are adding to the need for additional transit - they are the ones that are causing the increased need
PIERCE COUNTY	Need to move light rail to Tacoma up in the priority

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	In my opinion bus lines should be a sub heading and concentrated all efforts on light rail. This state failed when light rail and commuting was not taken seriously in the 60's. Starting with the monorail. This state should have been the model of rapid transit for the country. It should have been expanded in the 60's along with the BART system. Pouring state and federal money and other corporate investors that would prosper from from it into light rail projects. This state should be throwing all it has into electric train transportation and forcing the hand of the ever so greedy PSE to invest in the future of this State.
PIERCE COUNTY	With housing prices increasing so drastically in Seattle, people are being driven outside of the city. A dedicated track between Lynnwood to Seattle and Everett to Seattle should be an urgent priority.
PIERCE COUNTY	Your plan is already behind in supporting the current volumes in the major Puget Sound area, and the forecasted plans will most likely not meet the needs by the time they reach completion. I Suggest that your staff use the various methods of the current transit system for a week or more to better grasp what you're up against and to revise the planning to meet most impacting needs of our current daily commuters in the region.
PIERCE COUNTY	Light rail from Tacoma to the airport needs to be completed as soon as possible.
PIERCE COUNTY	ST3 continues the efforts of Sound Transit to ignore the changing communities that require public transportation. Rather than extending light rail (in Tacoma) to areas economically disadvantaged groups are residing or trending to reside, Sound Transit continues to place services in areas of the community that are gentrifying and can afford to pay for their commute. The Light Rail expansion to Tacoma is a perfect example of this.
PIERCE COUNTY	I only wish this could be done faster - even if it was more expensive!!
PIERCE COUNTY	Any way to make this happen faster? The transit system needs to stay ahead of the rapid population growth in the region.
PIERCE COUNTY	I wish the ST3 plan projects could be completed on a shorter timeline, especially the Tacoma light rail phase. I realize the Seattle-Everett phase is important too. Support for funding is important and \$200 per year is okay. But I think the sales tax should not be used for ST3 plan. Washington sales tax is already one of the highest in the country. 10% (Pierce County) would be too high and would be unreasonable. Increase the use taxes, excise and fuel tax, as well as other transportation funding sources.
PIERCE COUNTY	The News Tribune published the passenger loads for the various projects. The two projects that get light rail to Tacoma would, by far, have the highest ridership, in some cases 40 times the lower estimated expansions that are scheduled for earlier completion. That being the case, the light rail expansion to Tacoma should take precedence. I also believe that the less expensive route option should chosen, unless there is some good reason that has not been publicized. My cool support or opposition is based on the timing of the projects and some of the options for bus use.
PIERCE COUNTY	this should be a schedule of needs in the future, not current popularity and numbers of votes...

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	Improvements on light rail to Tacoma & West Seattle should take priority over the Bellevue project. Bellevue may be economically/capitalistically important, but commuters from Tacoma are the ones who cannot afford to lose the time & money that a lacking commuter transit system will cost them in the 17 years they are waiting. Do you want to make the rich richer and punish the lower classes? Make commuters from farther and less well-off areas a priority, it's the ethical thing to do if they are going to be paying \$17 a month anyway. Thank you.
PIERCE COUNTY	Suggest higher prioritize toon along the North South corridor to alleviate strangling traffic congestion. Lateral connections could feed later if n-s is accessible, fast and parking is there.
PIERCE COUNTY	I am a Seasonal Employee for the Washington State Fair and Our Seattle Mariners, I use ST594 during the Mariners Home Stands. If possible, expand ST578 from Puyallup to allow fans of all the Sports Venues as not all fans are close to Tacoma.
PIERCE COUNTY	Why should we pay for a career timeframe for Sound Transit employees to complete these projects. Why not use the money to hire contractors to complete the work, all the work, all the planning, etc.?
PIERCE COUNTY	Projects completed in 8-25 years? ARE YOU KIDDING ME? I would be more supportive if shorten the timeline considerably. This is typical of ST projects. You always undercommitt and your prjoect timelines are so far out whack that by the time you finish, the solution will no longer be valid. IMplement and IMPLEMENT NOW. Not 25 years from now.
PIERCE COUNTY	I don't think this timeline is acceptable. It only took seven years to get to the moon, yet somehow it takes 17 years to build a light rail line from Seatac to Tacoma? For that kind of money, it should be happening much faster. In Portland, their west side Max project from downtown to Hillsboro only took five years and that involved tunneling under the west hills.
PIERCE COUNTY	Strongly oppose question 12 because I think that the proposed timeline is too long, that mass transit needs a much faster timeline.
PIERCE COUNTY	Light rail should be a priority.
PIERCE COUNTY	This is the most expensive project for transit in the world. Cities/regions with more treacherous terrain have better transit and rail systems than us. The transit system in its current state serves fewer people than it could. Offer more rail options at greater frequency and extended hours and more people would use it. You are limiting possibilities by only having rail available for the current riders. Poor planning and poor design, exorbitant taxes and nothing to show for it.
PIERCE COUNTY	Tacoma light rail should be first project on the lisst.
PIERCE COUNTY	I only indicated 'somewhat support ' in the question above, because of the extended timeline - I would support it more if it was moving faster. I wish we could put more priority on expanding reliable mass transit, and less priority on horrible highway messes like the current tangle of I-5 near Tacoma.
PIERCE COUNTY	Get it going faster! Tacoma needs help- i need options to i5 at rush hour coming home from seattle
PIERCE COUNTY	South Sound Transit projects should be moved to the front of the list traffic is a nightmare getting from Tacoma to Seattle everyday
PIERCE COUNTY	get it done sooner and encourage businesses to adopt more work at home projects.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	Too long!! I will be retired and probably out of area by then.
PIERCE COUNTY	Connecting Tacoma to Seattle should be a priority. Having an inter- county connection would be very beneficial and connect more areas than improving within Seattle or king county in general. Tacoma first!
PIERCE COUNTY	<p>Over the past 20 years, Washington State and local political leadership have not led and have lost the confidence of the public with poor management of voter approved projects and funds and poor communication of project status. Much valuable time has been lost for our region in producing critical public transportation infrastructure while the population has grown and continues and our rankings for worst traffic congestion continue.</p> <p>The ST3 plan is a modest move in the right direction. However, it is extremely important to have a comprehensive public transportation system that links services together throughout the region. The plans for the South Puget Sound commuters seems too low on the priority list proportional to the growth and congestion along the I-167 corridor to/from the airport and Seattle and I-5 Tacoma linking to light rail through the airport and Seattle.</p> <p>Listen to our comments, plan accordingly, act expeditiously and lead with integrity and you will have our support.</p> <p>[initials]</p>
PIERCE COUNTY	ST should find numerous opportunities to deliver the program 5 - 8 years sooner through faster permitting, design and finding partners to bond more revenue sooner. ST needs to more clearly define the Sounder Commuter Rail improvements and enhancements. The South Sound needs much more frequent Commuter rail during rush hours and to expand the span of service in both directions throughout the day and late in to the day. ST Express bus service is a very important and popular service and serves a distinctly different customer than light rail and should be continued even after light rail is built out. Tacoma has been waiting a long time fore light rail service. Before other communities get multiple lines connected to central link, Tacoma should get one line connected to Central Link. Thank you. Please figure out how to deliver the program much sooner.
PIERCE COUNTY	We are so far behind the ball when it comes to the population growth and need for Transit in the region. Any and all efforts to approve and move faster must be put forward.
PIERCE COUNTY	25 years is a prison sentence. Way too long and the voters are smart enough to kill this.
PIERCE COUNTY	Too little too late for Tacoma. With no light rail extension from Tacoma to Sea-Tac airport, I would urge the South Sound to get out of regional transit.
PIERCE COUNTY	I think you can complete all of this much sooner. If you need to raise the cost a bit to do so, you should. This is long overdue and we shouldn't be voting on something that is going to take 25 more years. Completed in 10 years is more like it. I should be able to take the light rail from Tacoma to the airport next year, not 17! Do it NOW.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	<p>The time lines are way too slow. Do it in a quarter or less time.</p> <p>The A bomb was done in less than this.</p> <p>The interstate highway took far less.</p> <p>WW2 was only 4-5 years!</p> <p>WAY TOO long time frames!</p> <p>,</p> <p>,</p>
PIERCE COUNTY	<p>We need this NOW. 25 years is far too long. We need a state income tax or we will never fund two of our most hurting, and most necessary systems: education and transportation. We cannot wait 25 years. It is too expensive to live close to jobs in Seattle but am I really supposed to wait until retirement age to be able to get there using a reliably public transit method? The issue is not construction time, but if we are allowed to borrow this much money at one time. WE HAVE TO.</p>
PIERCE COUNTY	<p>I would be willing to pay more to make these projects happen faster.</p>
PIERCE COUNTY	<p>I understand the reasoning behind the timeline, but Sound Transit and light rail in general were being talked about when I was in high school. 16 Years later and we've just finally opened Cap Hill to U-District.</p> <p>It'll have been 30 years since I graduated high school by the time light rail to Tacoma is finished - and that's assuming it's completed on time.</p> <p>I won't vote NO against this. Or, I'd like to not have to, but the time frame is awful. I want to be able to ride light rail as part of my commute before I retire. As it stands now, a majority of the people who commute to and from Seattle in and out of the South Sound have almost no options besides driving or taking the bus. The Sounder's hours are too limited. I get off work at 5 and it's struggle to make it from Fremont to the King Street station before the last train departs.</p>
PIERCE COUNTY	<p>Focus on communities that carry workers into Seattle. We all know the cost of living in Seattle is pushing people out of the city and into areas like Tacoma and Lynnwood- focus on getting those workers into the city!</p>
PIERCE COUNTY	<p>The timelines seem a little long, we clearly need better transit options now.</p>
PIERCE COUNTY	<p>Fed up with continued delays in light rail to Tacoma! Cannot support this delay again!!! No!!!!</p>
PIERCE COUNTY	<p>I work for the government and can certainly understand why this will take 25 years. But really, 25 years is hard to grasp. You want me to pay taxes on something I'll never benefit from even if I did have a job where my commute was more than 8 miles. You need more public outreach. Especially to those of us who won't benefit. It would also be nice if Tacoma would start attracting employers down this way instead of pushing them north.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	This project is not cost effective. All suggestions would be acceptable if the cost were much much less. As much as the projected costs are they usually cost much more and nobody is held accountable... how about the people making these proposals loosing their pensions to pay cost over runs? I will loose my pension if this goes through as a landlord in Tacoma I will be spending \$10,000 more per year every year to pay for this. Why can't you build a system that pays for itself. Until these costs can be controlled and the planners will forfeit their pensions and other assets as I will be asked to do just table this idea. The operators are incompetent...Ever hear of Big Bertha?
PIERCE COUNTY	25 years is too long for this to be completed. Most of the people paying on it now will never get to use it as they will be retired by then. While we desperately need better transportation with parking (Sumner station is TERRIBLE!), taking this long doesn't seem like the answer as well. I think a shorter timeline is needed for this type of project.
PIERCE COUNTY	Takes too long, you should have planned this in the seventies. There is a market crash coming so the region won't be able to support the cost.
PIERCE COUNTY	Making us wait for 25 years? What have we BEEN paying into?
PIERCE COUNTY	17 years to complete light rail to Tacoma seems way too long. Development is happening very quickly and the transit options are needed sooner to ease congestion and promote efficient, equitable and sustainable business growth.
PIERCE COUNTY	This proposal is about 40 years too late as it is - is there any way to move up the timeline so we're not waiting another 25 years for the project to be completed?
PIERCE COUNTY	Timelines need to be shorter. These improvements are needed, but how relevant will they be in 25 years? We will need even more by then. We need to move quicker and work with existing tax dollars. We spend too much money in other areas and I don't appreciate that taxing us more is always the solution when our representatives do not do a good job with the money they already have.
PIERCE COUNTY	25 year time estimates for light rail to Tacoma/Everett is a disappointment... However it is better than the alternative of never building these transit capabilities. Please work towards shortening the time frames for rail delivery throughout the Puget sound since it will ultimately have the greatest impact upon regional traffic.
PIERCE COUNTY	The timetable is too far into the future--these projects should have been started years ago, not years from now! ST should use its fund-raising authority to leverage up-front financing: for example, issue Transit Bonds (or "War On Traffic" Bonds) to finance more projects faster.
PIERCE COUNTY	We need this enhancement sooner than within 25 years. I'd like to see the timeline shortened to no more than 15 years.
PIERCE COUNTY	The sooner we have a regional metro-type light rail the better. Commutes are already long enough to seriously impact productivity and the environment and getting worse every year.
PIERCE COUNTY	Timeline should be accelerated!
PIERCE COUNTY	if you are spending so much money why is it going to take so long? why can't you use the taxes already designated for sound transit to build these projects? how can those of us who use the service daily but are not taxed on it due to us living too far out help to pay for it?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	A 25 year plan makes the plan seem so far fetched as to not be viable. Voters would be more inclined to support if your timeline was halved. A 12-15 year timeline would be more readily supported.
PIERCE COUNTY	Speed up the timelines. We need this now.
PIERCE COUNTY	The timeline is too long! I realize money is probably the main issue, but there must be some way to prioritize building more faster while interest rates are low.
PIERCE COUNTY	Would actually support paying significantly more to install light rail more pervasively and faster than what is currently proposed. Driving in Tacoma / Seattle (including bus options) will only get worse as population continues to grow.
PIERCE COUNTY	Why will it take so long??
PIERCE COUNTY	Don't use property taxes. Underfunded schools already need those dollars. Focus on high traffic areas with express service.  Tacoma to Seattle and Eastside to Seattle should be the priority.
PIERCE COUNTY	This plan is amazing, but should have been done years ago. The idea of waiting 25 years to have our traffic concerns in our state improved upon is ridiculous. We need a plan that addresses these plans in a more timely manner. So many of our road projects that have been or are currently being worked on do not finish with meeting traffic needs, they seem to be a band aid to our huge traffic problems. Lets focus on getting these improvements done in a more timely fashion so real effect can be seen.
PIERCE COUNTY	The timeline is ridiculous! These projects need to nearing completion right now! How are we only thinking about these things now and solving them decades later? The gridlock this area sees is not new so why are fixing yesterday's problems way down the road? We as a region are embarrassingly behind on this!!! For such a "Green" area, we sure are archaic when it comes to mass transit!! If the systems were in place and they were clean, safe, and efficient, I think we could almost eliminate I-5 and the disaster of a gridlock it experiences multiple times a day. It's wasting a ton of taxpayer money to run (wsdot, WSP, etc), maintain, and try to fix.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	<p>As I see it, it all comes down to how the project is presented. I suggest a program on public TV stations first, detailing what this "TS3" is, so people start to think about it. Then identify the spots that are most congested, in short commercials explain how TS3 can solve the problems. Explain how much the traffic jams are casting the average person in time and money and how TS3 will make it all easier and more convenient for all. (Perhaps a fun trip from Issaquah to the waterfront in Seattle.) For the Bus riders- Buses that will be there, every day and will get you to your work or appointments-ON TIME, without taking up the whole day. ( Here in Tacoma, this is a big thing- busses take forever to get places one needs to go.) Keep fares low, people of low income tend to ride public transportation, Students, low income, people without cars. It needs to be able to replace car for the daily commuter, seniors, and disabled people. But bring it out in a way people will love TS3, want it and desire it, like a new car or video game. Show its ease, comfort, and reliability, as a daily thing, a fun thing, a needed thing, and safe thing.</p> <p>P.S. What about earth-quake safe?</p>
PIERCE COUNTY	<p>Issaquah should be a higher priority in the timeline as it and the more outlying areas it serves are growing</p>
PIERCE COUNTY	<p>this is a joke. you are seriously talking about taking the time to skip a generations worth of commuters to finish? you are talking 25 years from today. The solutions need to be implemented more rapidly. You need to push the imminent domain pieces and force this. We spent 10 years and 5 votes on the viaduct replacement-- and wasted 10 years with another 5 years of construction.</p> <p>I dont understand how you haven't pushed for another light rail across the 520 (or how that was not an integral part of the construction). I am ok with the costs- I am in the area and need to pay for use- but the timeline for this is crazy. We are looking at, in 25 years, another modality of transport- which we will have the modalities of yester year only then coming on line.</p> <p>im a simple man- run the trains north south from lakewood to everett- run one on the east side thru renton, bellevue and up north. Run the other thru Seattle. Run 2 lines east west - one across 520 and one across 90. Run the one our to issaquah (you can pull in the folks out there that want to commute). If you run the combo of high speed and light rail, and treat this like Portland- where you have integrated rail/bus systems that go out to their neighborhoods, then its a better plan. Look at Denver and what they did. Look at Toronto and how they have run their trains out to their outermost suburbs.</p> <p>Please- if we are going to invest 50B and 25 years- get what we want- and what is scalable - not a cobbling together of what we have, what we have failed to do, and what a complicated mess of this and that will do.</p>
PIERCE COUNTY	<p>I'd pay double or triple the tax to get light rail expansions to Tacoma, Everett, and Bellevue in half the proposed time. 17 years to Tacoma is unacceptable and i will vote no solely based on your proposed time lines.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	In the last 18 months I have travelled the i5 corridor from Tacoma up through Marysville and am astonished in just that period of time how much worse traffic has gotten. I feel that this plan is too long and drawn out to make the immediate improvements that need to happen to keep our communities growing and thriving.
PIERCE COUNTY	I simply do not trust Sound Transit. The agency has lied about cost projections, completion timelines, randomly reset project schedules and budgets, etc. I have -zero- confidence that Sound Transit would deliver a fraction of what is listed in ST3 within the egregious proposed budget, nor the given timeline. The high cost and limitations of light rail is foolish. The \$17 a month cost projection is a joke! Our family would pay an additional \$800 a year in car tabs alone. For the money wasted on Sound Transit projects to date, this region could have the nations most robust and ambitious public bus system that could have been free to all users (by far the best incentive for people to give up using their cars) for a fraction for what has been wasted on light rail. The ST3 taxes are structured to carry on in perpetuity. My vote is a resounding "No", and as the family patriarch, Sound Transit can count on five (5) "No" votes from our immediate family, and another 35+ "No" votes from our extended family living within the ST3 catchment area..
PIERCE COUNTY	Takes to long, we need to get rid of people in the state.
PIERCE COUNTY	I strongly support Sound Transit and most of the ideas proposed in this survey. However, these changes need to happen a lot sooner than 12-20 years from now????!!!! Traffic is absolutely horrible here and has been for so long. I support change now. Not 20 years from now, please stop delaying what is absolutely necessary.
PIERCE COUNTY	I support an accelerated timeline with higher taxes.
PIERCE COUNTY	i would happily pay more to have the projects completed significantly sooner.
PIERCE COUNTY	The timelines are far out in the future for completion. In the meantime additional buses may help.
PIERCE COUNTY	Light rail to Tacoma needs to be done yesterday!
PIERCE COUNTY	1. South Sounder needs more help now, not in the future. More trains and parking, especially in Puyallup. 2. Need to allow shoulder HOV lanes now between Tacoma and Olympia during rush hours.
PIERCE COUNTY	I think you will find more regional support if the timelines for light rail are accelerated. However, in order to keep adding commuter trains to service the South Puget Sound, more parking is critical as parking at Auburn station is non-existent after the third train (sometimes prior to the third train). The city of Auburn is rapidly growing and there are no other parking options for train users. Many riders would like to take later trains but do not have parking options. The construction of another parking facility will alleviate this issue in the long term but will most likely create additional parking issues short term due to the placement of the garage in the existing parking lot as well as construction workers parking at the station. There are no shuttle services offered other than to/from Lakeland Hills.
PIERCE COUNTY	As a 56 year old and retiring in 4.5 yrs, I feel strange taking this survey that discusses completion of projects in 25 years. I will be 81, if it is in God's plan for me to live that long, and even if I lived, I would simply be too old to travel that way. Are you telling me that I will have to pay for a benefit that I will not be here to get any benefit out of? HMMMM??? Maybe, if I get some Great Grandchildren. HMMMM??

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	I feel your timeliness are way to spread out. I say this not just because I will be retired when you finally complete this project, but because I fear you're either underestimate the growth in the region. It took 8 years after President Kennedys speech to put a man on the moon. Completing these projects will take more time? Really? We?
PIERCE COUNTY	Any possible way of finishing the work faster should be explored, could include changes to laws, preplanning, alternate funding mechanisms (employer tax), etc.
PIERCE COUNTY	You have been collecting tax dollars from citizens for years. You haven't been able to add extended rail service in the region for almost 20 years. Perhaps you should re-consider how you spend the taxes that you are collecting from the citizens of Washington State. Stop spending money to acquire property at premium prices. Put light rail along the highway right of way system.
PIERCE COUNTY	I wish all this were happening faster, and my interests are more focused south than east. But I strongly support Sound Transit.  I have become a big fan of buses!
PIERCE COUNTY	We need improvements to the train commute between Seattle and Lakewood right now. The south train stations need to accommodate longer trains. We need more parking at Sumner or better bus connections between the Bonney Lake park and ride and the Sumner train station right now. We need better bus connections between the Bonney Lake park and ride and the Sumner train station all day (non-rush hour could be a shuttle bus) to support people who need to get back home outside of what is considered typical commute hours.
PIERCE COUNTY	Focus first on what moves the most amount of people in the shortest amount of time
PIERCE COUNTY	I believe Tacoma represents more of a priority than the Seattle centric plan proposed. Not only does Tacoma represent a large transit population that should be served more quickly and significantly by ST, I believe ST expansion into Tacoma and the South Sound has been in the past (and will be) a significant catalyst for regional economic development.
PIERCE COUNTY	I'm 72 and live in Orting, I'll probably be dead before any improvements happen in my area but I would highly support increased parking at the Sumner Station so I can enjoy the Sounder.
PIERCE COUNTY	Wasn't all this supposed to have been finished by 2005? I distinctly remember voting on it in 1995.  While I am exceedingly supportive of improved mass transit, I am less than thrilled with the poor showing RTA has had in the last twenty years.
PIERCE COUNTY	I strongly do not support bus systems. I support a rail system. I can not see a projected \$200 per person per year increase. I don't even use the system.
PIERCE COUNTY	The time line is way to long. Eight years to get buses from Lynnwood to Renton is way too long. Two years is what is needed. The bus stops are already on I-405. Just buy the buses and start the service. The Great Grand Children of the planners of ST1 will never see the completion of ST3.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	This is a boondoggle. Government corruption at its finest. I have already paid thousands into SoundTransit and have never used it. Taxation without representation. Interesting too how most of the projects are in the King and Snohomish areas, and they pay as much as we do in Pierce County.
PIERCE COUNTY	I am not as familiar with King County transit, but my experience has been that it's a lot easier to get around Seattle by mass transit than it is Tacoma or Pierce County. I would like to see improvements in Pierce County take priority over King County, as I believe the need is greater. I would prefer to ride the bus/walk/cycle in Tacoma but it is nearly impossible to get where I need to go. And the experience of using transit in Pierce County has been consistently negative, I avoid it as much as possible (rude drivers, no instructions for placing bike on bus, driving taking off before you can get your bike, etc.)
PIERCE COUNTY	I hope these projects can be completed as speedily as possible to enhance our region and make travel more fluid in all areas of the region. I use transit daily, mostly local and express bus service, but I would use light rail, BRT, and Sounder if I could easily navigate the system from one mode to the others. I'll be retired within the next 10 years, so the prospect of an improved system at a time when I need to give up driving is very favorable to me. I consider most of the projects very urgent because we, as a society in America, have rejected reasonable investments in infrastructure and public transportation beyond our ability to easily catch up and still be fairly cost effective. Some projects I'm unfamiliar with and won't voice an opinion about their urgency. I hope attention is given to south of King County, though.
PIERCE COUNTY	While I strongly support the expansion of regional transit infrastructure, and I feel that the proposed projects are wise and have been carefully considered, I also feel that the proposed project delivery dates are excessively long. I feel that adequate regional transit is a need, not a luxury, much like other municipal services (water, sewer, solid waste, etc.). In light of the current problems associated with excessive vehicle traffic on the region's roadways, coupled with the projected population growth over the next 25 years, there is an urgent need for project delivery sooner rather than later.
PIERCE COUNTY	I wish this could be completed quicker. I personally, would be willing to pay for for a quicker turnaround.
PIERCE COUNTY	Ballard and Tacoma light rail projects need to be moved up. More Sounder service is also crucial.
PIERCE COUNTY	The original commitment upon which Sound Transit was created, and which was again confirmed through the passage of ST2, was to construct a mass transit "spine" extending north-south from Everett to Seattle to Tacoma and east-west from Seattle to Bellevue and Redmond. When it comes to the timing of projects for ST3, meeting that original vision of interconnecting the major metropolitan centers of the Puget Sound area should be paramount. Sound Transit is a regional service provider and its regional service should be the primary focus. For example, light rail connections to Tacoma and Everett and Redmond should absolutely be prioritized over intra-city light rail connections such as those proposed to Ballard and West Seattle.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	Things need to happen faster. Improvements to buses won't matter at all if we can't get cars off the road. Economic growth is hampered by single-occupancy vehicles clogging I-5 every day. Finally, the private businesses that are exploding development in the Seattle-King County area need to pay a lot more toward these improvements, so the public money can go toward areas of the Puget Sound region that are paying the price for that exploding development. The Boeing workers are getting hosed getting to work because the tech giants are hiring tons of people who can't afford to live in Seattle.
PIERCE COUNTY	Sooner!
PIERCE COUNTY	Why is Tacoma/Pierce County always an afterthought? Moreover, waiting 17 years for a light rail to Tacoma from King County seems like too long of a wait.
PIERCE COUNTY	Ballard light rail needs to move up the priority list!
PIERCE COUNTY	The light rail connecting Tacoma to Federal Way and beyond is vital. Tacoma always seems to be passed over in regional transit plans and the time is now to link Tacoma with areas north and stop the crazy traffic nightmare.
PIERCE COUNTY	Tacoma has taken a back seat long enough. Push the Tacoma link to the airport up the priority list.
PIERCE COUNTY	The time line is ridiculous. With the current administration running the project it will never get done. example SR167. There is so much politics involved. The majority of the people aren't dumb. Washington state is the laughing stock of the nation when it comes to the politics. There is no time line on completion of the cost to the tax payer. Your already 10 years to late with the project. The tax burden will drive out what ever industry we have.
PIERCE COUNTY	I am in favor of as much public transportation as possible in all areas and access for all people. I wish it were possible to reduce the timelines as this is such a vital and important infrastructure project especially with the present and future increasing population. At my age I may not personally benefit from the public transit extensions in my area, but I want this in place for everyone. I have appreciated the mass transit in Chicago, San Francisco and Boston, and wish for this sort of system to be available for the people in our area. Thank you for any and all improvements that can be made.
PIERCE COUNTY	Please focus your efforts more in Tacoma light rail and linking Tacoma to seattle by light rail. PLEASE.
PIERCE COUNTY	2 points, It sure seems like a long time to get it done, and in the past seattle north has had the lions share of money/projects. Just drive 1-5 or 405 north and see how many lanes, the condition of the roads etc. Now look at 1-5 south, you can barely drive on it as it is falling apart, 167 is a mess etc. I know that is not related to light rail, but consider the distribution of projects and the need, I believe the south end has a greater need. Just my 0.02
PIERCE COUNTY	I understand these things take time to build and funding isn't available all at once but it seems that these timelines are extremely long. I'll be retired before most of the projects come into being and possibly dead in the next 25 years. Short term improvements, LIKE PARKING, would be appreciated.
PIERCE COUNTY	Should be reordered to prioritize extension of light rail to Tacoma/West Seattle.
PIERCE COUNTY	I wish that the light rail to Tacoma could be accomplished more quickly than 17 years.
PIERCE COUNTY	They have not stuck to timeline that they already had with the other 2 ballots in the past.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	I really wish the proposed light rail south from the airport was going down HWy-99 instead of parallel to I-5. So one could get of the train to shop, dine etc. then get back on to continue home. It seems we are still creating a system that required you car to get to the transit centers insteado f the transit being central to where people live, shop, work. That brings more congestion to the access roads to I-5.
PIERCE COUNTY	25+ years to complete the projects, give me a break! All time given would allow for cost over runs(look at your history!) and delays. Think of the inflation that you have to deal with. Now if you are going to complete ALL the projects in a 5 year window, you would get my vote, but sofar you do not have my vote. Just think I am 61 years old, I may never get a chance to pick up the Light Rail in Federal Way, I might be dead by then. Just build it and get it done SOON.
PIERCE COUNTY	Let's get it done quicker, especially light rail from Ballard downtown and all transit improvements in Pierce County.
PIERCE COUNTY	Thank you for the good work; please move ahead! If only we'd taken action when the topic first came up--built a spine from north to south and then worked on side projects from there--we'd have spent far less and be nearly complete, with more efficient travel across the region. (But you know this.) Thanks again.
PIERCE COUNTY	Projects should be moved faster, particularly connections south of Seattle to Tacoma. I would support a more aggressive tax structure to make this happen.
PIERCE COUNTY	All of this is needed but the timeline is entirely too long
PIERCE COUNTY	It takes too long to get to regions outside of Seattle. Extension to Tacoma takes too long.
PIERCE COUNTY	Sound transit has wasted tax dollars since its inception. The timeline is to long and the costs will surely skyrocket.
PIERCE COUNTY	Any way you can speed up the light rail projects?
PIERCE COUNTY	This plan takes to long to get light rail to tacoma. This should have been done in ST1.
PIERCE COUNTY	I strongly support this development and would only advocate for the new light rail connecting Tacoma/Lakewood/JBLM to happen sooner and for greater financial incentives to be developed through employers to encourage more residents to use public transit. This may include the addition of buses shuttles from train stations to nearby employers (for example, I would need transport from the Lakewood Sounder station to American Lake VA).
PIERCE COUNTY	Should be completed sooner.
PIERCE COUNTY	Sooner rather than later
PIERCE COUNTY	Please do it faster!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	I'm frustrated with the costs and timeline of this proposal. I live in North Tacoma and rarely use public transit, but I recognize the economic and practical benefits of a well built, regional transit network. I have no information on traffic flows, volumes, etc, but I question why I should pay even more for King County residents to have an easier commute? The proposed south sound projects are years away and I'm not sure, given their high costs, that they would ultimately be of value to our community. I'm also perpetually unhappy with the high costs of these projects. We all pay a lot in taxes already...will it ever be enough? In summary, I'm not supportive because these projects don't seem very beneficial to my community, are expensive and will take a very long time to offer improved service to the south sound. Maybe a smaller proposal which identifies the specific need for individual projects and delivers projects on a tangible timeline. Tacoma residents would like our transportation taxes to benefit our neighborhoods, but ST is usually perceived as taxing us in order to subsidize King County traffic problems.
PIERCE COUNTY	since the Puget sound region is already behind the ball, a 25 year timeline is completely wrong. 24/7 is the need, these projects need to be completed in 10 years or less.
PIERCE COUNTY	Wish it could be done sooner
PIERCE COUNTY	It seems to me that there really has been no planning to this "plan". By the time you get to 8 years down the road, your plan will already be so obsolete as to be ridiculous! It seems as though the "plan" is a shot in the dark and hope something works out! The needs are now! Why would we give you more money for a plan that will not solve the problems! We are already 20 years behind in mass transit options! Whoever is doing the "planning" needs to rethink where they are getting their information. There is no trust in your plan because it is easy to see that it is not even close to sufficient.
PIERCE COUNTY	I think people really want results sooner and are willing to pay more so that we see these improvements in our lifetimes. Find ways to Speed up Timelines.
PIERCE COUNTY	Light rail transportation between Tacoma and parts of seattle should be given priority (less than 17 years) considering a greater amount of people travel between those areas for business and leisure than some of the smaller communities further away from the i5 corridor. Another reason to prioritize light rail development near i5 is to reduce the congestion that hasn't seen any measurable improvement over my entire lifetime.

Comment(s) about project completion timelines - Out of District

Subarea	Additional Feedback - Comment(s) about project completion timelines
Out of District	Way to long of a build out, needs to be done more quickly, without planning and red tape taking 10+ years before seeing any product! Agree we need to do something, but I will be dead before I see any results of our money....
Out of District	I believe this type of system should have been completed years ago. But with the ways the voters acted in the 90's it did not. As a resident of Seattle in his mid 20's I believe that we should be aiming for a faster than 25 years end completion date. of course there are certain factors that would delay this but it should be the top of this county's priorities. Regardless of the timeline I will vote yes on the ST3 package for future generations. For the Ballard line please use a different system than "At-grade".
Out of District	Everett should not be 25 years out. Finish Everett sooner!
Out of District	Paying \$10,000 and waiting 25 years to see any major improvements in Snohomish county is too long. I will be in the later portion of my career by the time it is completed. I am a major supporter of Light Rail, but will have to vote no and encourage others to do the same unless the timeline is significantly reduced. There is no need for 10 years of design and environmental impact studies and municipal bonds exists for this very purpose.
Out of District	This is a complete mess. Ballard in 2038 and at-grade? Are you joking? Paine Field? Does anyone really believe that Boeing will still be a major employer in WA in 20 years?
Out of District	The goals are great, the timelines are not. I had planned to use the ST from Mukilteo to Seattle daily. It took 6 years after I was no longer traveling that route for it to be available. The plans should be implemented much more rapidly than ST3 calls for. 25 years? A young person voting now is looking at a benefit after they retire. How is that going to motivate anyone toward a system that is desperately needed?
Out of District	Ballard light rail should be a priority and should be completed faster than 22 years from now. Also, I believe that the Seattle Subway proposal of light rail to replace the current Metro Route 8 on Denny Way should be considered. I'm also strongly supportive of having the light rail be grade-separated, and believe that wherever possible, this should be the default setting for how light rail will be implemented.
Out of District	I would like to see the Lynnwood-Everett phase of light rail sped up, especially because of Paine Field's upgrade as a commercial airport.
Out of District	Ballard is fast becoming a commuter hub for the young, who have just begun in the workforce. These are the people who will most rapidly accept and use public transportation when an acceptable system becomes available to them. You should fasttrack the Ballard-Downtown project and capture these young professionals. Once they start buying cars it will be harder to get them into public transit.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	<p>I think that an integrated transportation solution will need to include inter-regional traffic measures to enable products and freight and travelers to get through and beyond the Puget Sound area from other areas. The transit measures adopted by Sound Transit should not eliminate the need for some folks to rely on non-transit forms of transportation for some errands and other needs. I strongly support alternatives to car transportation but do not see the practicality of eliminating it entirely and it is unrealistic. The goal should be to provide options.</p> <p>This said, all of these projects proposed for ST3 have an absurdly long timeframe to completion which will only put pressure on other agencies to strengthen roads in the meantime. I also oppose making life expensively easier for bicyclists as single-occupancy biking is an unrealistic mode of mass transportation. Try and eliminate all the endless comment period. People will be more amenable to support all these promises if they think they might be alive to see them. Don't cater just to the millennial constituency for they are not looking to anyone's needs but their own and have every reason to believe they will be alive to see the fruits of their advocacy. Planning for future generations is great but current generations will always need to see some fruits of their voting and advocacy.</p>
Out of District	<p>Timeline is ridiculous, we pay out the nose for transit and the proposed solution is 20+ years out - totally unacceptable.</p>
Out of District	<p>Given the number of employees at the Boeing Everett plant, and the daily traffic jam from the 405 split south, it does not make sense to make the north end expansion wait 25 years for completion while neighborhoods in Seattle, already well served by rapid ride, get attention first. Failure to include Snohomish county in immediate mass transit upgrades, will detract from businesses desire to relocate to an area with relatively less expensive options than the downtown core, further inhibiting Snohomish county.</p>
Out of District	<p>It is unbelievable that the transit will not reach North Everett for another 25 years. Coming from Portland, Oregon, I'm shocked at the lack of public transportation, and the heavily congested highways. I will not support a project that has been repeatedly designed to leave out the population up North. In 25 years, I'll have moved to a place more bicycle, and walker friendly, and I'll be 71 years old.</p>
Out of District	<p>Please bring sounder service and ultimately light rail to Olympia!</p>
Out of District	<p>Ballard UW line is needed now.</p> <p>Dense Light rail in downtown should be the priority. I'm confused that we're using light rail over distances where other countries use normal rail. Isn't light rail too slow with too many stops?</p> <p>ST3 needs to be delivered faster, and everything needs to be grade separated so i can rely on it.</p>
Out of District	<p>25 years is absolutely unacceptable. Traffic is much worse on the north end heading into and out of Seattle. Boeing is our largest employer and we need to get rail service to Paine Field sooner not later. There is more to this region than just downtown Seattle and Bellevue.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	I would like to see multiple larger contracts let out at the same time to allow access North, South and East to grow simultaneously. I think waiting 25 years to have light rail service to Everett is unexceptable. The Puget Sound region will have 1,250,000 more people in it by then using the growth rate shown above. We need to get people out of there cars. Go Sound Transit!
Out of District	Will not vote for because the earliest improvements north are 8 years away and light rail won't arrive for a ridiculous 25 years...but until then we'd be paying for something for which our payments get no useable return.
Out of District	25 years is a joke. Run the lines in the middle of I5 like Chicago. Transit stations are central located, you have less cost. Busses meet there then expand out. This will kill traffic first but after the shock at first for the couple of years it will be worth it. 25 years is too many. 10 years is too many. We will have flying cars by 2044.
Out of District	Everett to Seattle needs to be a bigger priority, 25 years is too long
Out of District	We really need to see light rail done faster then 25 years, out... your going to lose votes if it's going to take that long :( Please speed up the North/South extensions to get more voters on board.
Out of District	Light rail to Everett needs to be the top priority, not the last area to get light rail. Please adjust the timeline so that this will be accomplished sooner. The south sound already has multi Sounder trains, less than up north. Snohomish County will be taking on a large amount of the population growth. We need light rail all the way to Everett first and foremost.
Out of District	Completion duration is way too long.....need to prioritize some of the projects for 'immediate' implementation..othewr transit agencies have done this but it does not appear to be part of the ST ethic which is slow and steady
Out of District	This will kill all support north of Seattle. I live in Lake Stevens, I will never get to take transit to work. I support it but you might as well focus on Seattle and do it faster. 2041 to Everett makes me sick. I will be over 70 by then and long retired. Speed it up or focus on Seattle and Bellevue. Everett is really getting the shaft. I don't want to pay for something that will never benefit anyone near me
Out of District	The traffic is terrible in our communities, roads and freeways. We NEED public transit solution NOW or many of us will move to another state with a good transit system.
Out of District	Completing the projects from Downtown to West Seattle and Ballard need to be the priority of the new system and need to open before any other light rail project, overall a reordering of dates would be wise in which you put extensions with the most ridership opening before the least amount of ridership in order to increase the amount of support for a ballot measure that is being levied on the people. I believe in the plan and the cost associated with it bit the schedule and rearrangement of the dates and the plans should be addressed and fixed in order to ensure a successful ballot measure passing in this region. I believe you should also make the claim that waiting for a better ballot measure will only increase the amount of times for these projects that this region already badly needs and will only get worse during the period of waiting for another ballot measure to take place.
Out of District	The Ballard to downtown Seattle light rail addition MUST be implemented much much sooner. Should be completed in 3 to 5 years.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	The time to completion of many of the projects is too far off for people to "get their heads around." Even at the risk of fewer projects, the timelines need to be moved up considerably.
Out of District	Too little, too late. I support all of it (except buses driving on shoulders), but it'll take too long. Cut out the bureaucratic crap and get it done.
Out of District	Just wish it won't take so long to get these projects completed
Out of District	These plans need to be acted on sooner rather than later. We are already 25 years behind when it comes to transit. Please increase the speed at which these projects are funded, begin and completed.
Out of District	Everett to tacoma shud be prioritized
Out of District	Nothing gets completed in a timely manner. It's highly likely it's going to cost taxpayers a lot more money than what this S3 project is projecting. Money's going to go to the higher-ups not on Transportation.
Out of District	Given the very long timelines, and zero visible progress on Seattle to Redmond light rail (I know work is starting, but most people don't), asking people to vote and tax themselves now will most likely fail.
Out of District	I live in Lake Stevens and commute to Bellevue each day. These projects won't be built in the timeframe that will improve my commute (I'm 59 and hope to retire in the next 5 years). I work in the engineering field and know how long these projects take to be designed, funded, then constructed. Unfortunately, Puget Sound is way behind on mass transit and that's why we're in this mess. Seeing this plan and realizing it's 25 years before LRT comes to Everett makes me want to relocate to a different - better transit oriented - city. God Speed Sound Transit.
Out of District	My preference is to make the Lynnwood Light Rail priority 1! It should have been ready in 2020 instead of 2036.
Out of District	Everett NEEDS to be done on a schedule way sooner than 25 years!!! Try sitting on a bus (not even a car) stuck in stop and go traffic in the HOV lane on I-5 that's going no faster than the general traffic lanes because the HOV lanes are just as jammed up as the general lanes. What's the purpose of taking the bus?? I commute from Everett to downtown Seattle and taking the bus is supposed to get me there quicker. It does not. Because of the way-overused HOV lanes, the bus moves no quicker than a car. On a good day, it can be 1 hour. On a typical day, it can be 1-1/2 hours. On a bad day, it can be 2+ hours. The only thing it saves is finding and paying for parking. And this is now! Can you imagine what the traffic situation is going to be like 5 or 10 years from now, let alone 25?!? That is ridiculous. Look at traffic studies and how many more commuters there are on I-5 from Everett to Seattle now than there were 5 years ago. And it's only going to increase with all the residential development going on from Mill Creek up to Marysville!
Out of District	25 years to get light rail to Everett is too long. The North Sounder line is too slow and has too many days without service to be the only connection from Everett to Seattle. I live in Mount Vernon and work in Everett. If there was reliable, fast options from Everett to Seattle I might go there more often. My friends would be happy to car pool to Everett and then get on a train to go the rest of the way to Seattle for events, shopping, etc .... but the last train they can catch right now leaves at 7:15 am ... not acceptable.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	<p>First, about the timelines. Twenty five years? Is that for real? The issue of transportation in the Puget Sound region is one of our most impactful issues, touching every person who has to travel to get to work. When we look at other large metropolitan areas, the Puget Sound region appears to be woefully behind them in our mass transit infrastructure. For as far as we are behind, I find it difficult to characterize 25 years as acceptable.</p> <p>Second, I live in Thurston County. It is at once perplexing and frustrating that Thurston County is not included in this plan. There are so many people who commute from Thurston to destinations in Pierce and King, that I am baffled by its exclusion from these plans. The last time I broached this subject with SoundTransit, I was told it was a tax districting issue. My response? Fix the tax districting, then submit a plan that works for the whole region. You have the numbers. You know the impact of commuters on the I-5 drive times as well as their environmental impact. Now you need to use that data to justify redefining your service area and include Thurston County in this draft plan.</p>
Out of District	I am supportive of light rail. I am even more supportive of rapid transit bus system. To the extent that there are trade offs, I would vote for buses over rail, because I think the buses will provide our best and quickest return on investment.
Out of District	Would be better if the project finished faster
Out of District	2041 is too long for light rail to Everett. This needs to be completed sooner. You will not get Snohomish County support with this time table. It will fail.
Out of District	The timeline is way too conservative.
Out of District	<p>I recently moved from Kent to Camano Island. I understand the traffic issues with West Seattle, but I have also seen first hand the traffic issues from Marysville down into Seattle. This effort needs to move way up on the priority list, as indicated by my responses on the survey. Not only should this move up on the list (to like Number 1), but the timeline for completing these projects needs to be expedited. I may not understand the complexities of going to the Boeing area, but I believe this system will be an elevated system running along I5, and the experience gained already should help in developing a more aggressive schedule to build this particular leg. ST has built 2 elevated systems already, the nonrecurring engineering for doing that should be well down the improvement curve, which would allow a more aggressive schedule. Comment times for the public need to be shortened - a lot, so that can be integrated into the schedule. Bottom line, I want to believe that this particular leg should be completed by 2028, not 2041.</p>
Out of District	It is not acceptable to spend so much money for these projects and achieve so little.
Out of District	With the strong push for density in Seattle neighborhoods such as West Seattle and Ballard, the idea that we won't have light rail to those 2 communities for 17-22 years from now is tremendously frustrating. I realize the Sound Transit isn't been responsible for the urban planning decisions that have put us in this situation, but anything ST can do to speed up those projects would be helpful.
Out of District	My only concern is that living in Lynnwood, we're basically at the very tail end. I understand it might be easier to start as an expansion from pre-existing stations/transit, but commuting in this area is horrible by both traffic and overcrowded buses. Maybe instead of working from the inside on out, geographically, start on the outskirts and start bringing it all in?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	Is there anyway to speed it up? 25 years is a long time for rapidly growing neighborhoods like Ballard to have to wait for LR.
Out of District	completion times seem so long for just the very very beginnings of a public transportation system for seattle. The current plans are not enough when they will be outgrown by completion time
Out of District	This is ABSURD. The amount of time it will take to get transit accomplished. We need to guarantee affordable housing near new transit hubs, and capitalize and tax the new buildings in the high rise and luxury housing being put near these hubs. I live in Ballard and work in west Seattle. I would like to see more people use transit and have it be more accessible to those with disabilities. I would like to see light rail speed up the process of accomplishing it. Also, this survey was poorly written and very confusing. I did not answer the last section because it is too confusing. I would recommend less paragraphs.
Out of District	I think the project timeline needs to be accelerated, even if it costs more. People will find it harder to support something if they won't be around to see the benefits. In 25 years when this is complete, I'll be retired and not relying on public transportation to get to/from work. Some might say, why pay thousands of dollars over the next 25 years if I'm not going to see the benefits?
Out of District	Would like Lynnwood and Everett light rail to be done sooner! Like in less than five years from now!
Out of District	It is disheartening that you are looking at completing this in the next 25 years. This should have been done 25 years ago and the money should have come from wherever the state found the funds to spend on the boondoggle that is Bertha.
Out of District	Parking is super important at suburban stations. I get rather frustrated trying to go into Seattle and finding the parking lot at the Tukwila station full. Anything to speed up the building process would be huge. I'm only 34 years old and it feels like many of these projects won't be complete until I'm of retirement age.
Out of District	The timelines are unacceptable, especially for the Ballard line. I understand the need to prioritize the spine, but the new lines in Seattle are fare more important than anything in East King County. I would support a timeline that would build out the spine and Ballard around the same time, and pushes off West Seattle and East King.  Ideally though, everything would be built faster, if possible. Waiting until 2041 for anything in this plan is not fast enough.
Out of District	Traffic on the north end is horrendous, I would like to see improvements to alleviating congestion from Lynwood south until the light rail extension can be built
Out of District	It's time for Snohomish County to get its fair share. Light Rail to Everett in 2041 is an absolute joke. The Snohomish County is not the purse of the King and Pierce Counties. If ST insists that Everett be last on the list, then the light rail extension to Everett should be shelved and Snohomish County residents should not be expected to foot the \$200/year property tax increase
Out of District	Let's get it done faster. I voted for this when I was in college and it isn't scheduled to be done until I am retirement age. That's crazy.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	I favor paying more in taxes if it will help us to complete these projects sooner. This is extremely important work from a civic and environmental standpoint.
Out of District	The timeline MUST be shortened considerably. Thanks!
Out of District	I would happily pay 10x more in sales and property taxes to get transit faster. Understand not everyone would and you need to get this passed, but consider the option to get additional funding on a later ballot? Private fundraising? Corporate sponsorship? In 25 years I won't be working anymore, and we might have self-driving cars. I'll pay the taxes and deal with the construction for the interest of the community, but I'd love to see a faster impact and am willing to pay for it.
Out of District	I'm very disappointed that the proposal puts Issaquah at 25 years out. I strongly support improved public transit and am happy to pay the higher taxes it would require, but neither I nor my children would ever see the bulk of the benefits in our lifetime. Would like to see that at least a decade sooner.
Out of District	I support completing the lung hit rail between Tacoma and Everett. However the timeline is outrageous, I'll be 55 by the time it's finished. There need to be a way to build it quickly.
Out of District	25 to 30 years is just way too long. Stop the "jobs program" of taking forever to build it and get moving with it. We need it now, not 30 years from now. And, the price only goes up the longer it takes. It'll cost far less to move on building it faster. Stop studying and planning and build it...now.
Out of District	Ballard and West Seattle are growing at extremely high rates. Emphasis should be placed on getting light rail connections from these neighborhoods first rather than last, perhaps with connections to the existing light rail line rather than a new tunnel.
Out of District	Timeline is WAY too long. Get it all done faster.
Out of District	This project needed to be done yesterday. ANYTHING that can be done to expedite the process should be done.
Out of District	The plan to bring light rail to Everett in 25 years is simply unacceptable. Furthermore, the light rail should run up the I5 corridor to achieve a quicker completion time, not divert to Paine Field to accommodate Boeing employees. It's cheaper and quicker to use the I5 corridor, period. This is the only option that should be considered. With ample parking at the stations, this can easily be accommodated. Snohomish County is one of the fastest growing areas and 25 years is too long to wait. I will not support a draft plan that does not prioritize the Seattle- Everett corridor. Why would I pay money for 25 years for a service I won't get to utilize? You put 25 years on the ballot and it's a no-go, period.
Out of District	25 years to include Everett is much too long. Period.
Out of District	I would like to see the completion of the lightrail to Tacoma moved up to be finished sooner.
Out of District	I feel that the priority for light rail completion should focus & complete the I-5 corridor from Tacoma to Everett.
Out of District	Light rail to Ballard should be moved up in the schedule, and should be fully grade separated. I don't live there, but it is the densest area that is on the proposed projects list; it is imperative to the success of this project to target the densest areas first, and work out from there.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	<p>The timeline is a joke!! Half the people who will be taxed will be dead before this is finished and half the people who will benefit from this plan arne't here yet and will not have any "skin" in the game!!</p> <p>Your use of the "average"home will pay XX is also a joke. Just this year between this proposal and King county wanting to raise the 1% annual increase limit, the governor's proposed carbon tax, and the various school districts that say they need additional bonding authority I estimate my RE tax to go up a minimum \$500 this year in addition to the annual sewer and water increases, etc. My wife and I have retired a couple of years ago and these increased taxes make it more difficult to stay in my home and more difficult to sell my home because the required loan/payment ratios make the new loan payments very hard for new buyers to afford.</p> <p>If you think I believe that this will only cost me \$200 /yr you must think that I have forgotten how virtually every major project that any governmental unit in this state has exceeded the budget and missed the promised timeline which has always translated into additional costs to me.</p>
Out of District	I think the order of events doesn't stress enough the delivery of mass transit to places with mass demand, and underserves Seattle within the first 15 year period.
Out of District	The plan is strong. The timeline is not. You need to be able to move faster.
Out of District	These projects are taking TOO long to implement.
Out of District	I understand ST has to have a big picture goal, but taking 25 years to complete rail service to Issaquah and Everett is laughable. Generally speaking all of these timelines are so far away it's hard to fathom how much good they'll do to the transit system. If anything, this isn't enough of a solution and the timelines are too far into the future for most people to appreciate. As someone who lives in Issaquah and takes the buses everyday to work I was excited to learn about the rail service to Issaquah...until I heard it was gonna be in 25 years at which point I'll just be starting retirement. We might have flying cars by that time ;) Fixing the transit simple is very complex, I get it, but more solutions need to be done in a faster fashion. The amount required, \$200, if rather insignificant. Can't the number be raised to make these timelines shorter? A lot of people look at these timelines and think, "great, too bad I won't be living here in 10 years when "x" is complete". Please find a way to put these solutions in fast forward mode to shorten the timeline, otherwise, the region will continue to be behind the curve.
Out of District	You need to find a way to do these quicker. There are too many cars on the road and it makes it a pain to live far from work.
Out of District	I have been paying taxes for this for decades and live in South Snohomish County, am now 70 years old and will never see light rail in my area in my lifetime.
Out of District	BUILD IT FASTER. WE NEED LIGHTRAIL EVERYWHERE.
Out of District	Traffic is horrible now and waiting 20 years for relief is too long. Use 405 toll money to expedite the building process. There are more people moving to the Seattle area so we need a quicker solution.
Out of District	Let's pool together and build our transportation infrastructure

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	Really wish that the Seattle to Tacoma light rail could be faster- traffic is horrible and air pollution is unsustainable.
Out of District	With our booming population, mass transit is going to be critical. I know we lack the density of cities like Seoul, New York and Tokyo, but the corridor-like nature of our metropolitan area lends itself nicely to a strong emphasis on mass transit, especially light rail.
Out of District	Expanded transportation options focusing on severely congested downtown sectors first would be advantageous to ease commute times and city flow. Please focus efforts centrally while expanding out to further cities in the future.
Out of District	Does nothing for the fastest growing Puget Sound regions including the east side communities of Issaquah, Snoqualmie Ridge and North Bend for 25 years. Hmmmm. Let me see. Pay \$200 (will be more let's not lie) per year and not see any return on investment for 25 years which will then only be marginal. Looks like a 50 billion dollar loser to me..... Thanks for allowing to provide comments.
Out of District	The project doesn't do enough to address regional transit and congestion, will take too long to complete, and like all other projects, will be inadequate by the time its implemented.
Out of District	I would like to see the light rail to Lynnwood be completely more quickly as it impacts me most significantly and would allow me to use it back and forth to work, whereas in 20 years I will be at retirement age so I am then really paying for future generations. While I don't mind investing in the future, I would like to be able to directly benefit from it by moving up the Lynnwood time frame.
Out of District	Having lived in Seattle since 1993 (in Magnolia and Ballard until moving to Lynnwood in 2006), I have watched transportation become increasingly challenging. My feeling is that we need the most aggressive most-coverage plan at the soonest possible date in order to even hope to get out ahead of our transportation needs. If there is a way to greatly increase the timelines for sooner use by our citizens, I would be willing to consider additional costs. When living and/or going to school in other major metropolitan areas, and certainly when traveling, I have and do use mass transit as my first option. Currently, Seattle leaves us little options to do so. Creating aggressive remedies to these problems sooner rather than later will only help us live better lives in this wonderful place we call home.
Out of District	The light rail completion dates must be accelerated for this to be a worthwhile project. Not completing projects for 20+ years is simply unacceptable and ridiculous. I have never seen such long completion dates proposed for any other light rail lines in the US, certainly not in Denver, Houston, Dallas etc.

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - Out of District

Out of District	<p>This is a Light Rail plan that SHOULD HAVE BEEN DONE OVER 30 YEARS AGO! Atlanta received Federal Funding for a plan that was to built here.....instead that officials at the time refused this funding, BIG MISTAKE!</p> <p>I have been a home owner in Mountlake Terrace for over 22 years and have always voted fro mass transit! After the 1st billion or 2 billion dollars, YES BILLIONS, where only spent on how to get a plan for mass transit, you came to the people of Washington state and said you where all out of money and needed more now to start to build it.....REALLY?? This is a great example on Government waste!!!</p> <p>This a needed plan that needs to be done now.....why should it take until the year 2035 to complete? You people that are running this plan should be ashamed of yourselves to let this go on for so long!!! GET IT DONE SOONER, Please!</p> <p>AS A HOME OWNER, I EXPECT THE GOVERMENT TO BE MORE RESPONSILBLE W/ ALL OF OUR TAX DOLLARS WE GIVE AND YOU EXPECT FROM ALL OF US! NOW GET BUSY W/ THE JOB AT TASK AND JUST GET IT DONW ASAP!!!</p>
Out of District	<p>These changes have the oppportunity to give people back time with their families, reduce carbon emissions, and increase increase tax receipts through travel and tourism trade.</p> <p>Let's get it done.</p>
Out of District	<p>it will take too long! Make a faster project</p>
Out of District	<p>Cost is too great. Result is really a subsidy for big business to locate on cheap land outside Seattle, then have us supply the transportation for them and their workers.</p>
Out of District	<p>We need a transit system now! Hurry up and build it even if it means higher taxes.</p>
Out of District	<p>Tlmeine is too slow</p>
Out of District	<p>Stop prioritizing bus and focus on rail and parking for rail</p>
Out of District	<p>I like the plan, but the timeline is too long. please shorten it.</p>
Out of District	<p>Cost 500 million per mile, takes way to long to complete and does nothing to improve my life. Under this plan I would have to take a bus to get on a train, instead I will just drive there. This is \$50,000,000 wasted.</p>
Out of District	<p>Everett should be completed at the same time as Tacoma, finish the spine first!</p>
Out of District	<p>Time line to long. Will not pay for something 25 yrs in the future. With current track record, your \$17 per month will increase into the hundreds per month and nothing to show for it. Cost over runs and delays, studies, will push project to 2050 minimum, perhaps 2060, if there is agreement. Only thing that can be counted on is ever increasing price and extended time line with all sorts of excuses.</p>
Out of District	<p>DO IT FASTER! TAX ME MORE MONEY! Sorry to scream, but I'm excited. Did I mention to DO IT FASTER!?!? :)</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	This timelines is too lomg. This city is already 25 years behind with transit. Speed up this timelines as commute times have almost doubled. Additionally increase the speed for buses and the commuter train. The train travels so slow sitting in traffic is faster. Increase speed and reliability of the train service. If people can get downtown faster it would increase ridership. Also offer additional trains or faster routes with more direct service.
Out of District	I think that the timeline for completing the Ballard to Downtown Seattle project is far too long. I favor moving its completion up at the expense of other projects.
Out of District	Light rail up and down i-5 corridor from Everett to Tacoma should be a top priority. Traffic on i-5 is ridiculous. Many residents would be more likely to spend time in Seattle for dining and entertainment. Traffic for sporting and other events would be far more managable. Commuting to and from work in either direction would be easier. I personally dread heading into Seattle or Tacoma, or trying to get to the airport, and I would definitely attend more events in Seattle and Tacoma, as well as dine out. Many residents of the area I have spoken with agree.
Out of District	We need full regional transit much sooner than 25 yrs. In 25 yrs, we will still be behind the traffic problems if we do not get solutions into place faster.
Out of District	Other than wishing the Lynnwood light rail to Seattle was sooner and wishing for a parking garage at ashway, I am good.
Out of District	25 years for light rail to Everett is totally unsatisfactory. This timeline must be accelerated with buildout within 8 to 10 years. With the Everett growth projected at 73% (Bellevue at 33% and Seattle at just 28%) by 2040, completing the spine of the regional system is a priority over spurs to Bellevue/West Seattle/Ballard/Issaquah. Further, at your projection, I will pay \$200 for 25 years, or \$5000, before I see any benefit. That's \$20,000 for a family of four Everett residents. Ridiculous. A criminal fleecing of the taxpayer.
Out of District	Projects must be speeded up. This is too slow. The economy will be dramatically impacted if this project is not accelerated.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

<p>Out of District</p>	<p>I love that you guys are working to go big with this plan as it's long overdue. My only gripe (and it's a major one) is that the timelines for extremely critical light rail projects such as the West Seattle and Ballard light rail lines are ridiculously far out there. We are effectively building this for the next generation of Seattle as opposed to realizing any kind of near-medium term gains. Worse, the ST3 plan as it is just the tip of the iceberg for what areas like West Seattle needs as the line will only get you to the Junction and we're going to need a lot more than that to be completed by 2033.</p> <p>While I realize that light rail takes longer to build, there has to be more we could do here. The timelines that you are proposing are so far out that the light rail may get completed only to be competing with flying cars soon after. FWIW, 'm not trying to be funny or dramatic there as I really believe that this kind of technology won't be that far off of by the time we hit 2033 (West Seattle) to 2038 (Ballard).</p> <p>That said, the ST3 plan is still better than nothing and so I do want to say thank you for all of the work and countless hours that you and all of the planning teams have done to get the city this far. Even if we cannot reap many of the benefits ourselves, it is critical that we as a city do the right thing for the next generation of Seattle-ites. To me, that would be approving this plan while in tandem hoping that some of the key light rail timelines can be pulled up. We need to do a lot more there.</p> <p>Thanks for listening.</p>
<p>Out of District</p>	<p>needs to be completed sooner</p>
<p>Out of District</p>	<p>We are doing this 30 years too late, so anything that could speed it up is essential. There's a huge human capital cost of not being able to get places due to congestion. I also think it's unrealistic to expect people to walk to mass transportation. You have to create parking at hubs - that's one of the problems with the rail stations now - no parking. More people would use those routes if they could drive to a station and park.</p>
<p>Out of District</p>	<p>the timelines outlines are to late to help our traffic issues. The entire system needs to happen faster and within 10 years max. Buses are a temporary solution, but with gridlock they will not be moving either within the next 10 years. traffic gridlock is current, and will be even greater without expediting mass transit options.</p>
<p>Out of District</p>	<p>The timelines are so long that few people working now will ever use the transit for commuting nor will they see property value benefit associated with being close to transit. In fact, Boeing, Microsoft, Amazon and other major employers may not even be in their current location or size in 25 years. So I think we should challenge ourselves to act with more urgency. In 25 years we should be aiming for Bellingham and Vancouver, WA. 1 million people is a lot in the next 25 years. I think much of the funding should come from fuel tax since transit is offering a substitute to car drivers and lessening traffic. The old way of getting around should fund the new way of getting around.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	The downtown improvements really seem like a day late and a dollar short while continuing to allow suburban development that will just keep more cars on the road, a 22 year timeline! Ongoing planning needs to be more forward looking and less reactive so that we don't have to wait 22 years to finally get decent east-west connectivity.
Out of District	Timeline is WAY TOO LONG. Need the busiest and most congested projects DONE in less than 5 years. How does China build whole mega cities in 10 years and we take 25 to build a few light rail links?
Out of District	Need to be faster and prioritize higher concentrated areas of Ballard and West Seattle first!
Out of District	The opinions in last few questions are very heavily influenced by the prioritization and completion timelines. If these were changed, then so would my answers on support or opposition.
Out of District	Eastside Issaquah/ Bellevue need rail now!
Out of District	Projects should be completed sooner rather than over 25 years. Traffic is horrible now, and we need solutions. Light rail takes a while to build, so we should have simultaneous lines being built out.
Out of District	I only oppose because Sound Transit leadership has shown they are incompetent of finishing a project on time or within budget. If the leaders of Sound Transit are so confident in their abilities they should publicly state all executives of Sound Transit will voluntary step down if over 50% of these project are not finished on time or are over budget.
Out of District	We are rapidly increasing in density and we are currently behind. Let's do something proactive and expand light rail!
Out of District	I oppose the plan ONLY because of its excessively long time-lines. Transit needs to be in place sooner. Sounder service is not viable because it is not currently reliable - every time it rains there is a slide and trains cant run, so nobody can depend on that! Please - I would use transit if it were dependable and here now. On your current timelines my grandkids may be able to see some benefit, but I certainly wont.
Out of District	If it's possible to get the light rail to Lynnwood faster, even at extra cost, I would still support the plan.
Out of District	This is algae too slow. There needs to be more investment to speed up this timeline
Out of District	I think it is important to focus much more on service within the city of Seattle.
Out of District	I am well aware that Light Rail Link to Tacoma would not be possible in the immediate future however it would be really great to see some speed in getting the Tacoma Link to TCC very soon.
Out of District	Commuter rail is in my opinion far more effective intracity than intercity. Rail that connects dense population centers like Ballard and West Seattle with downtown are far more likely to be used than lines that go to outlying, sprawling suburbs. Those intracity projects should be completed first to prove tha value of rail, and the outlying areas can follow.
Out of District	I would be more supportive of the plan if the timelines for the south projects were shortened.
Out of District	The light rail expansion north should be made as swift as possible.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	I think you should accelerate the planning and eventual construction of the Lynnwood to Everett LRT Line, for three reasons:  1. It's part of the regional LRT spine, meaning that it should be essential to prioritize this line to be built earlier than the others. 2. The line goes near the Boeing Everett factory, a major job center for the residents of King and Snohomish Counties. It's important to reduce traffic in order for employees to arrive to their jobs on time. 3. I live near Cascadian Way in Lynnwood, and although it would be convenient to go to Seattle from Ash Way via light rail to beat the traffic, sadly, that is a LONG time from now.
Out of District	I would like to see light rail service between Seattle and Everett completed within the next 8 yrs.
Out of District	With a deadline of 25 years, you're not going to get people excited about light rail here. You need people to support it and so you need to try and shave off years from those estimates
Out of District	I would like to see the timeline for the Lynnwood to Everett light rail option reduced (<20 yrs).
Out of District	Rapid transit service to Everett must be the number one project ahead of all others!
Out of District	Southern projects reaching into Pierce County should be moved up on the timeline. We've been waiting a long time already!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

<p>Out of District</p>	<p>There are two big concerns for me:</p> <ol style="list-style-type: none"> <li>1. The length of this project             <ul style="list-style-type: none"> <li>- This plan suggests Everett not getting light rail until 2041, 45 years after Sound Transit was created. In other words, many of the original voters for Sound Move will either be retired or deceased by the time the light rail comes to them</li> <li>- Suggestion: Look into funding from the biggest employers in the region like Microsoft, Amazon.com, The Boeing Co., etc. I'm sure between those three companies alone you could raise a few billion dollars in 15 years' time. Also look into taxing the rich, there's 68 thousand millionaires in King County, and if they were taxed \$5000 a year you could raise over 5 billion dollars in 15 years.</li> <li>- Summary: I don't think people are opposed to light rail expansion. We just want it sooner. The taxes proposed would be perfect for everyone if the timeline was 15 years instead of 25. So please, come up with a better way to get the projects funded and done faster, even if that means slightly higher taxes than proposed. Cut it down to 15, if not, 20 years.</li> </ul> </li>   <li>2. The order in which projects are being delivered             <ul style="list-style-type: none"> <li>- This plan does not prioritize enough the Ballard line. I hadn't realized this until today, but that's the project that would provide the largest ridership and I think it's important for Sound Transit to prioritize busy corridors as it will not only drastically improve ridership (and hence funds coming from the light rail), but also raise a better perception of Sound Transit and light rail.</li> <li>- Suggestion: Switch Ballard + West Seattle in your current timeline or take a look at the timeline below.</li> <li>- Proposed LRT Timeline (in 20 years instead):                 <ul style="list-style-type: none"> <li>2027 - Extension to Federal Way + Downtown Redmond</li> <li>2029 - Extension to Ballard</li> <li>2031 - Extension to Tacoma Dome</li> <li>2033 - Extension to West Seattle</li> <li>2034 - Extension to Everett</li> <li>2036 - Extension to Issaquah + to College Streetcar</li> </ul> </li> </ul> </li> </ol> <p>Side note: Having a new extension open every 1-2 years is much more exciting than new ones every 5 years because it keeps the people involved. The U Link Extension was exciting and the Angle Lake one should be somewhat but you can expect even huger celebrations for these upcoming ones and more often.</p>
<p>Out of District</p>	<p>The timeline is not aggressive enough, and the sales and property tax funding model is unstable. How are WA state businesses investing, when they stand to gain so much from this infrastructure? Why put this burden on the backs of voters and low income members of our community?</p>
<p>Out of District</p>	<p>Thank you for adding transportation options for the north leg (Shoreline to Paine Field). There is enormous opportunity to continue north into Marysville at a minimum. The use by the employees of Boeing and nearby businesses would seem to justify that. Thank you for adding much needed parking garages around the Lake Forest Park area for those using public transportation.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	All of the light rail projects should be completed within the next twelve years rather than a span of 25.
Out of District	West Seattle /Seattle center light rail second should be completed sooner ie higher priority that currently planned.
Out of District	We need it much sooner!
Out of District	Speed up the timing to get light rail to everett
Out of District	Rail lines are the answer for the puget sound area. 25 years is not acceptable. We are already behind in rail systems and need to get caught up. North and South are already a mess. Going East is slightly feasible but will change in no time. Rail lines with efficiency we can count on is what the area needs.
Out of District	I am sorry it is too late. All this should have been done 10 years ago. Now THERE IS NO MONEY. No money from the Feds (20+ Trillion in debt), no money from the State (broke), and definitely no money from your average taxpayer (broke with stagnate income). EVERYONE IS TAPPED OUT!!!!.
Out of District	This plan needs to be accelerated. 25 years for the last phase is way too far. Put it up to the voters to vote on accelerated plans at higher property tax levels to reduce congestion and reduce traffic by having mass transit available to everett at earlier timeline of 10 years.
Out of District	I realize you are already asking for a lot of money, but I'd like to see ST get more creative and find more funds and move up the timetable on this. We are already decades behind what we'll need. Find another \$25 billion and accelerate all the light rail schedules in ST3. Light rail, even with the high cost, is the only long term solution for the anticipated growth in Puget Sound, given the unique geographic challenges of the region. People love light rail and hate the bus. Leverage that sentiment.
Out of District	For the cost, this is a very slow timeline. I would use bus service as infrequently as possible. Focus on light rail and sounder improvement and integration of light rail and sounder.
Out of District	The Puget Sound area is at least 30 years behind where it should be, vis-à-vis public transit. The timelines proposed are too long. Thurston County residents would greatly benefit from Sounder expansion to DuPont (provided that an adequate parking structure is included). If the proposed timelines are to be implemented, then more adequate parking needs to be developed at existing sites. Demand at Tukwila greatly exceeds capacity. (I drive up from Olympia, park at Tukwila, and then take Link into the city, but often there is no parking available.) Also, operational hours need to be expanded for Sounder service.  Finally, Thurston Co should be incorporated into Sound Transit. We down here should be contributing financially to the development of this system.
Out of District	Too little too late. Snohomish County is always at the bottom of the list for transit improvements - especially East Snohomish County.
Out of District	Accelerate completion. Waiting more than 10 years is outrageous.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	Your time line is ridiculous. A new system between Everett & Seattle is beyond desperately needed. The 510 Bus - Well It Is CONSISTENTLY inconsistent. All other busses come & go but the 510. You need to fix the problem - 25 years is insane - do this in 5 or less - you can if you want to.
Out of District	This seems like it would take a really long time, is there any way to speed it up?
Out of District	Eight to 25 more years is too long a time to address the transportation issues in the region. The situation is already dire and with the addition of housing going at the current rate, it is only going to get worse.
Out of District	None of these projects will come on line in a timely fashion to significantly aid my commute, with the possible exception of expanded rapid bus projects on I-405 between Lynnwood and Bellevue. Unfortunately, a mindset needs to be changed about buses that will entice people out of their cars. Until that happens, the traffic on I-405 will remain horrible. I, for one, would gladly take mass transit to work, if it didn't require a minimum of three transfers and two hours one way.
Out of District	Open stations/project phases earlier than waiting for all phases of the project to complete. For example. East link project. Phase one is said to be completed 3 years before phase 3. Open the line to s Bellevue when that phase is complete.
Out of District	The south sound I-5 corridor (Lacey to Tacoma) is one of the most congested traffic spots in our state. Higher priority should be made to move up the S Sound projects in your timeline.
Out of District	25 years is far too long to wait to improve transit access to Snohomish county. The roads are already choked with traffic, and the occupancy of cities like Everett are expected to grow exponentially within the next 10-15 years. There's no reason why people should be doing 2-4 hours of commuting in their cars daily for drives that are under a hundred miles. It's embarrassing that a metropolitan region as large and prosperous as ours hasn't been able to suitably get its act together to form a working regional transit system. I've been forced to check that nobody in my household is a transit user because there are no options that are even remotely usable for our needs. This galls me after living the majority of my life in a city that has good regional transit (Chicago) - I never used my car, and now I'm in mine almost constantly. This was an issue even when I was living in Everett city limits, and had access to what little transit options there were. What exists is woefully inadequate and underutilized as a result.
Out of District	Extending the line to the far North and South should be priority #1, Everett/Marysville via Paine Field should be first and then adding service South to Lakewood and Dupont second. Lateral lines such as Redmond, Ballard, West Seattle should be only done after the line is extended North and South. Those lateral lines can be serviced by RBT's as busses are more flexible with demographic changes and development. Sounder service should be dropped when light rail is built as it is not reliable due to the on-going mud-slides and track issues with BNSF. BNSF is holding Sounder hostage with the fees they charge Sounder for use of the tracks. It is only a matter of time before a mud-slide and a Sounder train or Balken crude train are pushed into the Sound causing an environmental and human disaster. Completing the North extension to Everett by 2041 is unacceptable and goes back on the original promise of ST to complete the North section. Building lateral lines before going North and south is unacceptable and I would vote no on every measure until this is changed.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	The first rapid transit priority should be main lines from Everett to Olympia. Branches in Seattle (Ballard/West Seattle) should be funded by the city of Seattle. Express buses should move people to/from the main line to Boeing plants in Mukilteo. I will probably be dead before Everett is properly served.
Out of District	The timelines are extended out too far. The entire proposed ST3 project should be completed in 5 years or less. Please refer to the country of Singapore to see what an effective transportation system. They are roughly the same population as our Seattle metro area and are able to move almost 4 million people per day in their system. They build entire subway lines 10+ miles long with stops every 1/2 mile each year. After living in Singapore, coming home to Seattle made me feel that we live in a third world country :(
Out of District	As per the usual in this area I view the plan as too little too late. The extremely long time-line would end with many commuters still being left out in 25 years. I would only be in favor of the project if the timeline was drastically speeded up and plans were made to reach even further.
Out of District	I think the sooner the rail projects are completed the better, and would be willing to pay higher taxes to accelerate every phase of the plan. I would be even more enthused by the plan if it eliminated some of the bus improvements in order to speed rail improvements. I see rail as the future and buses as just more pollution and traffic.
Out of District	How can taking over a decade to bring most projects online be viewed as helpful to a region that is growing as quickly as the puget sound area? By having such stretched out time tables for completing projects, all that will be accomplished in the near future is traffic disruption and increased delays for commuters and tax payers who are desperate for solutions now, now 10, 12, or 25 years from now.
Out of District	25 years to Issaquah?! Get real! We'll all be in flying cars by then.
Out of District	I think the Links to Ballard and West Seattle should be top priority after rapid transit buses. Then I think Link connection to Tacoma should be next priority. Other than that, I like the plan a lot.
Out of District	Everett Light Rail needs to be moved up, 25 years is unacceptable.
Out of District	Since the folks in Kirkland took out the rails through Kirkland, you should not replace them at about ten or more times the cost of taking them out.
Out of District	I have been paying taxes for bus or train service to Snohomish County that I will never see and lucky if my kids will see. Should have run trains up the median of I-5 from the very beginning from Everett to Seattle. Why are my car tabs and taxes paying for something in the South end that I will never use?
Out of District	North-end and south-end projects our "simply" to far out I totally support transit but not at ALL in this current plan, build from the furthest point in and get people moving, anything else is just frustrating
Out of District	I'd like to see an acceleration of development to the light rail extension to Everett

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	<p>This plan takes too long to meet the needs that Seattle and the surrounding communities have now. In 25 years, we will find ourselves still trying to catch up to our regions needs and may even find ourselves working with an outdated system. I know that we are reaping the consequences of how people voted in support of transit 30 years ago, but it seems that this plan will not work to help our current problems congestion that we face every day. Especially when projects, such as adding Graham Street station TO AN EXISTING LINE will take an estimated 17 years. This seems ridiculous, especially when such a project seems inexpensive and could be done as a sign that things are moving along in some way. I'm in great support that things need to happen, and am willing to help foot the bill...it just seems crazy that the timeline is so extended.</p> <p>I also want to ensure that any new development takes into account that low-income/affordable housing should be a part of ALL transit-oriented development, and should be made a priority when selling off any surplus Sound Transit land that results from these developments.</p>
Out of District	Ridiculous amount of time, money, ridership to complete this when you haven't even completed ST1 or ST2 yet...
Out of District	Expand North and South first, the cost of living is skyrocketing in Seattle proper, access to downtown and through the city needs to be accessible to more people before you enhance currently available services.
Out of District	The priority for expanding light rail to Everett is grossly inadequate. Please look at the traffic statistics between Seattle and Everett - a 25 year wait is ludicrous.
Out of District	Being close to retirement age I would like to see the timelines come sooner, but I know this is important to proceed ASAP!
Out of District	Honestly, how many years are we behind developing light rail? How many times has it been voted on? We have a world-class city, we should not have some of the most notorious traffic in the country.
Out of District	You MUST get light rail to the Paine Field industrial area in the FIRST WAVE of expansion. If you stick to the 2041 target, we will be losing tremendous payback.
Out of District	I strongly support legal and regulatory reforms to streamline the permitting process and bond funding availability. In addition we should press Olympia to allow private public partnerships for critical transit infrastructure. I also support a flexible waiver process to the "Buy American" legal requirements for trains and other signaling equipment that are simply not made in this country and are affordably available in other countries
Out of District	Complete ST2 projects before moving on to ST3 and wasting more money.
Out of District	I would LOVE to see more light rail on the Eastside and/or heading north to Everett. The timeline scheduled for the Eastside and heading North takes too many years. Shorten the construction time for light rail and reduce the buses that are in downtown Seattle and I will vote for the plan. You guys are also getting record numbers of riding light rail...that should tell you something.
Out of District	Projects should be complied in 10 to 15 years not in 25 years.
Out of District	Light Rail to Redmond and Federal Way should be completed within 8 years.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	The mass transit is completely underdeveloped compared to city areas the same size in other countries. Facing crumbling car traffic infrastructure and massive population growth timelines should be sped up to save money long term in road maintenance and avoid total traffic collapse due to demand outgrowing road infrastructure. Making mass transport hubs accessible for both pedestrians and car driver (in form of park and ride cheap parking) will be critical for the success. E.g. I'd love to use a train from Redmond to Ballard/Seattle since it will be a predictable ride. But coming from Duvall it means I will need to be able to park my car somewhere for a reasonable amount, predictable and without hassle to make the train ride possible and worthwhile.
Out of District	Everett FIRST
Out of District	The cost and return does not add up, 25 years to build? Most people just entering the job market could be nearing or at retirement. This is a poorly designed program. I used to be on board with light rail, however I have seen the amount of time and costs to produce very little impact. ST should not be focused on W. Sea and Ballard routes, this is a highly focused area that does little to relieve commuters traffic throughout the region. Additionally, those areas are nearing their capacity, while areas like Marysville will continue to grow. The North Sound should be a priority since our Sounder rail does little good. The South line has an enormous impact as it draws people from both sides of the track. 25 years of rail construction, no. no.
Out of District	I strongly believe that the Everett to Seattle route should be prioritized. The number of people already making that commute will most likely grow at a much faster rate than the current timeline would support. More immediate plans need to be made as 8 years is too long to wait.
Out of District	i would prefer you focus on the train lines rather than the bus transit. priorities align with reducing the major highway traffic (405 and 167)
Out of District	This is great but needs to be done sooner. F**k Bertha!
Out of District	The timeline for connecting Everett is simply unacceptable. Snohomish County, which has been paying into the system for years, has seen very little of the benefits. Prioritizing other King County projects above Everett seriously jeopardizes the willingness of Snohomish County voters to continue to participate in Sound Transit. If the timeline proposed stands, I suspect that a move will be made by Snohomish County voters and leaders to pull out. And I would agree with that position, even though I am a very strong supporter of transit. That said, I would support an even higher tax, if Everett is connected in a reasonable timeframe (10 years or less). If Everett doesn't get a higher priority, I will oppose the plan, as it is simply a bad deal for Snohomish County residents.
Out of District	Eastside projects - Issaquah and Redmond should be moved up. With light rail removing express lanes on I-90 congestion is going to get worse and having to transfer from bus to rail service just to get downtown not ideal.
Out of District	Build the downtown stuff out first.
Out of District	Everett will continue to experience extraordinary growth but the project timeline does not support Everett. The completion dates for Everett light rail MUST change to receive my support.

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - Out of District

Out of District	we need lightrail up and running WITH PARKING ASAP, no more of this on ground stuff either, it has to be ELEVATED or the point is moot as we already see a trip from tukwila still take 30 mins on lightrail to get to downtown, being elevated the ENTIRE way would have saved so much time, also adding parking as no one i know takes a bus to a light rail or train station, thats unthinkable to the masses. Get the lightrail from lynnwood, to seattle to burien asap. and get the UW station to bellevue and redmond ASAP. again KEEP THEM ELEVATED! Seattle has a history of making terrible choices (see berth) its time to make some smart decisions. I would be willing to pay MORE than 300.00 a year if you would make the rest of the lightrail line elevated AND add parking garages. Hell id pay to PARK in a parking garage by it! not saying it should all be pay to park but if its elevated and SAVES me time in my commute, i dont have a problem with paying and i dont make alot of money.
Out of District	Ballard and West Seattle would seem to be by far the most important in adding new riders and creating transit friendly neighborhoods. They should be moved to the front of the project and sped up if possible. The idea of adding free parking at lightrail stations seems be out of sync with creating livable transit focused communities. Who want to live next to giant parking lots?
Out of District	I don't reuse Siubd transit or wasdot with \$1 let alone this kind of money. Finish 167 or the cross base highway at JZbLM and then at be the public will trust that transportation money isn't bring flushed done the toiket
Out of District	Ballard and West Seattle light rail projects are infinitely more important than the other light rail lines (Federal Way and Redmond? Why?), and BRT buses are a band aid over an open heart surgery incision. We'll have flying / self driving cars before the light rail gets to Ballard under the current plan!
Out of District	Learning from delays and cost overruns in prior phases, including the WSDOT SR99 tunnel project, we need to fast track these improvements. We can't wait 25-years.
Out of District	I think the light rail to Everett should be moved up in the project plan. The North end is growing rapidly including potential to have passenger flights out of Paine field. Linking Everett to the light rail system will facilitate growth and reduce traffic congestion. I would be more willing to support tax increases if the plan showed a sooner timeline for the Everett part of the plan.
Out of District	Most of us paying for this will be retired and out of the workforce by the time is fully implemented. Anything to speed up delivery should be considered.
Out of District	Add more parking at all stations. Stations are pointless if people with cars can't access them. Run trains every 4 minutes during peak rush hour times.
Out of District	The scope of transit is too narrow and the timeline is too slow. In addition to the priority of serving current dense and congested areas, a plan needs to be in place to put transit in growth markets including those north of Everett and potentially south to Olympia. Aggressive bus service can and should be put in place immediately to serve the planned markets and also to mimic the eventual rail service corridor.
Out of District	seems to slow to implement and you re ignoring Mukilteo/Whidbels. and anything north of seattle along I5

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - Out of District

Out of District	How is it that you expect me as a taxpayer to fund a project that will have no benefit to me for at least 25 years? And what assurances do I have that you will not come back in 10 years asking for more money? You have already shown to not be competent handling the monies you receive now. I live in the Lake Stevens area and travel the trestle everyday. The westbound portion is in dire need of repavement and replacement. I have only seen band aid fixes. You just crammed down an 11.9 gas tax increase against the voters will. I will take that as the government knowing what's best for its citizens. So, before you ask me for more taxpayer money, get your house in order and come back with a different plan. No New Taxes!!!!  [name and phone]
Out of District	Issaquah Light Rail needs to be completed in Phase 1 (less than 7 years)
Out of District	I am not interested in paying \$600/year for my household for transit that won't get to me for \$25 years. We will all be retired by then and hopefully not even living in this area.
Out of District	The timelines are too long. I'm a republican who drives a car to work, but I'd be willing to pay more taxes if ST finishes these initiatives much quicker than the plan. This region's future depends on reliable and convenient transportation options. Light Rail has the best chance of getting people out of their cars and onto public transportation.
Out of District	Priority should be given to areas where there is a set commuting pattern, ie affecting large number of people, and where there is limited bus services, forcing people to drive.
Out of District	We need these things now!! I don't get why we can't do bus in under eight years?
Out of District	All the timelines are too long. I can't imagine how terrible traffic will be in 7 years, when light rail opens in the north end of Seattle. Buses can't compete with cars when they're stuck in the same traffic. We need right of ways for buses or move to 3+ carpool lanes in Seattle to get people out of their cars.
Out of District	The timelines are much too long, these projects need a much faster time table.
Out of District	Everything possible should be done to shorten the schedule to increase the service and extend the Sounder and light rail lines in and to Tacoma.
Out of District	25 years is far too long to wait. We need light rail service to Snohomish County, NOW!
Out of District	Ballard access should be moved up Very pleased with current improvements on 99 from Lynnwood to Seattle - keep up the good work
Out of District	Ballard and West Seattle will attract the largest number of riders by far. If Ballard and West Seattle are not completed much sooner, I probably will vote NO on ST3!
Out of District	We need service to/from Downtown to/from West Seattle NOW. PLEASE give us back the bus service into downtown for MOST of West Seattle (which is NORTH of the Alaska Junction) that you took away when you added the C-Line, which serves mostly SOUTH Seattle, not West Seattle. Riders N of the AK Junction & West of CA Ave were ALREADY underserved BEFORE you cut our direct service to/from downtown.
Out of District	Long overdue. Infrastructure improvement is necessary TODAY

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	The north segment timeline needs to be advanced. With Boeing in everett we really need the commuter help
Out of District	Get it done quicker. We are already at crisis point! Please make sure people can take public transportation from the Capitol, Olympia, to Seattle and to the airport. That would help greatly! Thank you. I am so glad to see these plans!
Out of District	The light rail to Everett is going to take WAY too long. Snohomish County is filling in rapidly as people can't afford to live in King County and the traffic on major roads is utterly hellish (and the WSDOT attitude of "tough, take transit" would work a hell of a lot better if there were enough parking available near transit centers and/or more neighborhood buses filling in). Rail is always going to be the most popular option and one that will actually get the more car-addicted affluent users on-board -- I used it all the time in other cities I have lived in.
Out of District	I think Everett is not least important.
Out of District	The projects need to be done MUCH sooner than originally planned!
Out of District	25 years to get the light rail to Everett is absurd. We're already behind when it comes to public transit and making this improvement in 25 years will keep us behind the level of transit we need to be at.
Out of District	Everett should be completed sooner than 25 years
Out of District	You have basically ignored Snohomish county for too long and taken us for granted. I have waited for your improvements expecting wit them to arrive while I was still working. Now almost 30 years later, I am retired and you're still not here. By the time your construction arrives IF delivered even on time I will be almost 80 years old if still alive. NO MORE. You have had your chance and money and blown it. If you want more money, you need to DELIVER NOTICABLE improvements and at LESS COST, FAR QUICKER. It is almost as fast to drive to Seattle as it is to attempt to use transit., with the car being faster. Parking is almost at par for a few hours with bus fares. Worse may of the "improvements" you are considering again ignore Snohomish Co. We are not your ATM and can support you no longer.
Out of District	I think the timeline for this is crazy. I think this is a huge priority and should be expedited. If I could now, I would take rail from the eastside down to Tacoma, rather than drive every day.
Out of District	Since Everett is not a priority I am strongly opposed to this plan.
Out of District	I think with the increased number of people moving to Snohomish County and commuting to Seattle, the need for light rail is urgent and needs to be completed sooner than within the next 25 years.
Out of District	The timelines need to be advanced.
Out of District	Light rail needs to be completed MUCH sooner.
Out of District	I strongly support transit development. The project timelines for bus rapid transit should be shortened, since they mostly use existing infrastructure (except for the stations), and try to keep the buses out of traffic to make it more useful. The 25 year timeline is very long to complete the remainder of the ST3 projects, and I think that discourages a lot of people from wanting to fund transit.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	<p>The biggest corridor under consideration is Ballard to Downtown. Given the current growth of Ballard this will only become more true as time goes on. This needs to be built as quickly as possible. While I appreciate that the focus on suburban projects may help get votes, the current proposal is focusing on that so much that it is hurting the effectiveness of the system.</p> <p>And in general the timelines are very slow. It feels more like you are trying to guarantee hitting dates easily rather than estimating when we might actually be able to finish projects. You need to do whatever you can to accelerate the timelines in general.</p>
Out of District	<p>I'm not sure that projects projecting a 15 year or greater timeline will garner support you are looking for. We live a world where 5 years is considered long term planning. Considering global warming, crumbling social and economic systems and the decay of basic infrastructure, maybe this isn't the best way to tie up so much money.</p>
Out of District	<p>The timeframe for the completion is much to far off. The Seattle to Everett section is already impossible so another 25 years makes this plan VERY unattractive!!!</p>
Out of District	<p>Light rail to Ballard *must* be sooner! The City of Seattle is letting developers create dense housing yet there is no corresponding support for better transit to support it. 22 years away is ridiculous! Start with areas closer in like Ballard, West Seattle and Kenmore-Bothell. For now you should run the 15X express bus all day long. The runs are packed with people just riding from Ballard to downtown because they prefer it over the D Line.</p>
Out of District	<p>I'm strongly opposed to the timeline because it puts a huge burden on the people who have been priced out of living near Seattle. Lower income residents will be paying for years, not only for the light rail, but for their vehicles and maintenance, for more hours of child care, and for their time spent on long commutes in already crowded buses.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	<p>ST3 draft plan needs to be modified with some of its service plan being deleted segment to add proposed service to Marysville, which is just north of Everett. Consider having all of the Core Urban and some of the Suburban cities to have their own Link Light Rail line just like the City of Everett currently has its own transit agency which is Everett Transit. I believe the ST3 draft project plan was planned the horrible way that will include BRT and should should never need to be BRT, period. Instead of that, consider having alot of Link Light Rail lines (including municipal Link Light Rails) like Marysville link, Lake Stevens link, Arlington link, Everett link (a line or 2), Lynnwood link, and so much more. Express bus routes 510 and/or 512 should have a proposed expansion up to Marysville by deleting all the selected trips to Downtown Everett. Sounder North Line should have proposed stations to Seattle Waterfront, University, Northgate, Shoreline, Mountlake Terrace, Lynnwood, Mill Creek, and Marysville as well as Everett, Mukilteo, Edmonds, and King Street Stations. 4 round trips should be expanded up to 10, 4 out of 10 serving King Street, Edmonds, Mukilteo, and Everett Stations which is currently the existing Sounder North Line just need to add Seattle Waterfront, University &amp; Northgate Stations, should also expand Lake Stevens Station but thip to Lake Stevens should be limited by only 2 out of 4 trips, first &amp; third trips start at Everett Station in Everett and second &amp; fourth trips start at Lake Stevens Station (Transit Center) in Lake Stevens when going southbound. When going northbound, first &amp; third trips should end at Lake Stevens Station (Transit Center) in Lake Stevens and second &amp; fourth trips end at Everett Station in Everett. 6 out of 10 North Line trips should serve King Street, Seattle Waterfront, University, Northgate, Mountlake Terrace, Lynnwood, Ash Way, Mill Creek, Mariner, Everett, and Marysville Stations. Sounder South Line should never have a proposed expansion to DuPont because it is a pretty small city and that station project can be absolutely 100% preventable, so instead of South Line expansion to DuPont it needs to add SeaTac, Federal Way, and maybe Des Moines Stations. The reason why I need this plan to happen is that it can be a much better offer and the plan I made and wished for would make ridership a whole lot more intense. 8 round trips + 2 reverse trips should be expanded up to 12 round trips + 2 reverse trips. 6 out of 12 trips should serve in Pierce County should serve Pacific, Edgewood, Tacoma Dome, South Tacoma and Lakewood Stations and the other half should serve Sumner, Puyallup, Waller, and Tacome Dome Stations. The 2 reverse trips should delete the segment stops to Puyallup and Sumner Stations and should only serve Tacoma Dome Station in Pierce county. All South Line trips should serve all stations/stops in King County.</p>
Out of District	<p>Light rail to Everett should be given a higher priority. Also, should add to the rail schedule of the North Sounder train; there are too few options in terms of time of day and days of the week (e.g., need more daytime and evening service and on weekends)</p>
Out of District	<p>It would be good to see information about how these priorities were established. It seems like you are asking people in the south sound to pay in without the expectation of service enhancements for 20 years. There are significant traffic issues in the south sound today and the cost will only go up.</p>
Out of District	<p>We can not wait any longer to improve mass transit in the Puget Sound area. We have traveled to other countries and larger cities here in the US and were amazed how easy and fast it was to get around. It is time to bite the bullet and get this done as we cannot just keep building more roads. Our traffic problems are only going to get worse.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	improving freeway bus use is the fastest and cheapest method of improving service. Burden the front end with much more service-- service destined to end as light rail is available to take its place. You have identified the important connections needed. But we can't wait 30 years to see service needs filled
Out of District	In the my opinion, the main goals should be to help the environment and help reduce congestion on our highways which in essence, the goals are directly linked. When I heard how far over budget and late (years late) the ST projects have been, and how there is less 1% of the cars being taken off the road, I was devastated. Why wasn't all this money put into something effective, like adding and improving bus routes, (especially when I was hearing on the radio last year that bus routes were being eliminated because of budget problems, and many of those riders have no other way to work). The whole thing is terribly disgusting, and sounds like a group of people looking through a keyhole and not seeing the big picture.
Out of District	The north end work to Everett needs to be a higher priority. Failure to move that work to the front-end of the ST3 plan will spell certain doom at the polls.
Out of District	Although the cost is big dollars, like a lot of folks, biggest concern is timeline. Many of these projects are not going to be completed in a vast majority of the voting users business/career lifetimes. Which of course means they aren't going to get to use the invested tax dollars they are paying for. Altruism is a great thing, but a very important piece to this build out puzzle is exactly why, as technology for building buses and rail gets better and cheaper, would projects take longer? I would think going into this package you should be able to say that in ST2 our building time frames were x, and now we are a bigger, better and more efficient agency and ST3 build outs are going to be x-20%. Really need to change this 10 year build out paradigm to more like 6-8 years. How about a study to grasp onto those ideas? That would be an invaluable addition to future projects.
Out of District	Ballard and West Seattle connections should be completed within 10 years. Improvements serving low density communities should occur later
Out of District	Everett and Issaquah in less than 25 years would be best. Thanks!
Out of District	This is far too long to have these projects completed. No excuses. These should be realistically completed in half the time.
Out of District	I would love to vote for ST3 but as it stands right now the timelines are just completely unacceptable. 17 years for West Seattle to Downtown and 22 years for Downtown to Ballard is ludicrous. A Redditor on the Seattle Reddit page said it best "someone sprinkle my ashes on the Ballard line". Seattle is growing at an exponential rate and the time to finally connect our neighborhoods is NOW. I understand how this cities political process has worked up until this point but we absolutely cannot committee and study this thing to death. This is a once in a generation opportunity to improve the lives of everyone that lives and works in this city. Let's get it done in a timeframe that makes sense.
Out of District	Sounder southline has been a vital link for many. Expansion to Tillicum and DuPont should be done as quickly as possible, especially given the I5 corridor work that DOT will undertake in 2017.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	You spend all the money in Seattle/King County area. I see limited expansion in the pierce county area and you offer us buses where you spent a lot of money on the University link in Seattle. The Tacoma Lite rail was already here before sound transit took over so it did not cost much to do. I feel that we are paying for Seattle. We could use more lite rail in Pierce county. I would not vote to pass any spending due to the way we are being supported.
Out of District	We've been waiting seemingly forever for light rail and efficient transit, and now it's going to take another 25 years?! We give more money in new taxes every couple years that promised to bring light rail to everett in return. Where did that money go??? Portland, OR managed to figure this out in the 1990s...why has it taken us so long to make a fraction of the progress?
Out of District	We need to be doing these projects FASTER instead of slowly bringing them online over 20 years - we should be building everything at the same time and we should be funding it with additional tab fees and an excise tax on vehicles equal to their vehicles value, mileage and age.
Out of District	Light rail to Everett would be fantastic
Out of District	Construction of new homes north of Seattle is creating population increase and backups on the freeway going south. Bus service sucks because there isn't enough parking at park and rides, you sit in the same traffic so no incentive to use transit. Light rail to Everett with improved parking for commuters will help alleviate traffic.
Out of District	Study after study has already been done. All of these systems should have been built already. Also why was light rail not built alongside the new 520 bridge.....
Out of District	Connecting commuters to the Paine Field manufacturing center is critical
Out of District	please add third car to the link!!
Out of District	As Everett/Snohomish County is the #1 manufacturing center in the State, generating billions of dollars to our regional economy and employing tens of thousands, it is shocking to me that ST has elected to delay the installation of light rail to Everett/Paine Field in this plan. The priority needs to be to serve employment centers, like Everett/Paine Field. Let's get folks to work first!
Out of District	Those of us in Snohomish County STRONGLY advocate for pushing ahead the schedule to bring light rail to Everett. Figure out a better route; get it done sooner.
Out of District	I am retired and don't use public transportation. Nothing in this plan is feasible for people living in Maple Valley. If the exorbitant amount of money proposed in this proposal were instead used by the State of Washington to improve roads and highways to improve auto transportation, it would be a windfall! Why should I have to pay for your idiotic project when I receive no benefits. This is another Sound Transit fiasco! I will do all that I can to cause this plan to fail in the upcoming election!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	<p>The commitment to Snohomish County made for the initial Sound transit proposal is being abandoned by the timeline proposed for ST3. The north link from Northgate needs to be THE priority for any additional construction to the system, Period! We have been paying into the system since it's inception with no benefit to show for it in reduced traffic and travel times for those of us that commute from SW Snohomish County to Seattle. The initial investments in bus rapid transit have made travel along the north-south corridors worse, not better by removing available roadway from car commuters, roadway we have already paid for by the way. The combined with the STUPIDITY of removing car lanes and dedicating them for bikes is compounding the problems, not improving the situation. Build the North Link to Everett before anything else is done!</p>
Out of District	<p>The costs are to high, plain and simple.</p>
Out of District	<p>In over 30 years of living in Snohomish County and working at various locations in Bellevue, Everett and Seattle, I've NEVER been able to use a bus or any from of transit to get from here to there. I would have to drive over 8 miles to a park and ride, then take 2x's as long taking the bus to somewhere in Seattle, then transfer two or three more times to get where I needed to be. Total time would be 2 to 3x's even driving in the worst of traffic. I lived at the end of 128th on SR9, worked in the Paine Field area... a straight shot, 10 miles... yet a bus ride was NOT possible... it would involve 2 or 3 transfers and 4x's as long to make the drive... when I asked someone from Transit about it they had the response, well, part of that is in Everett and part in Snohomish County.... SO WHAT? I want to get from here to there, but NO ONE IN TRANSIT thinks about that... Do you people have MAPS? LOOK at them... I now live a block from a Transit station in Lake Stevens... can I get to Paine Field from here? No, well, yes, but it'll take nearly 3 hours... I can drive it in 15 to 20 minutes. Why is this so hard to figure out? Frontier Village to the largest employer in the county... you could have direct runs on the half hour from here easily... so, in over 30 years living in this area, not once on public transit... Portland has it figured out... Europe has it figured out... Chicago has it figured out...</p> <p>Look at where people live and work.... how hard can this be??? They don't expand our roads to try and force people to take public transportation, but public transportation doesn't work... I'm not going to take a bus for 2 hours when I can drive even suffering through congested traffic for 20 to 30 minutes... even if I have to deal with parking... come one... figure out where people want to go and make it work. At least get close...</p>
Out of District	<p>The new light rail to Everett should be completed ASAP in years and not in decades. People are wasting a lot of precious time on I-5 gridlock and this option would give the time back to people. It may also encourage more people to not to take cars, but commute instead. Thank you for making it happen sooner.</p>
Out of District	<p>Bump up the Issaquah light rail timeline!</p>
Out of District	<p>I would love Everett to Seattle light rail to be a priority. Not many options for North enders to travel south without driving</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	While I do not live in the area, I do watch a lot of KING 5 News. Also, I'm well aware of the traffic issues within Puget Sound. The region is way behind the times in terms transportation choices including rail. I do not agree with the timeline and it needs to be build faster. For example, within 10 years.
Out of District	The Redmond and Issaquah light rails would greatly help commuters who work in Seattle but live on the East side.
Out of District	Traffic in the Everett/Seattle/Tacoma/Olympia corridor is horrendous on a daily basis. Any attempt to alleviate the road congestion, and allow for more options of mass transit are, in my opinion, a necessity (and well overdue). I live in Lacey, and work in Seattle, and the commute is horrible. With more options for me to use mass transit, and bypass I-5, I feel that this would be alleviated.
Out of District	Rail to Everett is critical now, not in 25 years. Completely ridiculous timeframe. I have employees that commute less than 10 miles, but choose to leave employment due to the terrible traffic on our roads.
Out of District	Please consider revising the timeline for the Everett light rail connection to be completed earlier. I have lived in Snohomish County for over twenty years and I have notice that the traffic between Everett and Seattle is increasing. If a light rail connection was available from Everett, I would take the light rail. I tried to take the Sounder from Everett to Seattle but the operation times did not work with my schedule. When I travel to places such as Chicago and Washington DC, I rely on their transit system. I hope that you will consider expanding the operation times of existing routes to make it available so that more people would consider using mass transit. Thank you.
Out of District	Keep ignoring the Everett/Snohomish County area at your peril. It is the fastest-growing area in the region and ALREADY home to some of the region's largest employers, with plenty of space available for both commercial and residential development. Bring light rail, more express transit, more parking at park and rides, and EVERYTHING ELSE IN THE KITCHEN SINK - ASAP - to the area or you are inviting disaster. And thanks, but no thanks, ST and WSDOT are already engorged with taxes on everything but toilet paper. Find the money from bloated salaries or disastrous projects like Bertha.
Out of District	we need projects in everett and on i405 to be moved up on the timeline. snohomish county is losing businesses because of the transportation nightmare here.
Out of District	I believe these plans should have more aggressive timelines for quicker completion. Would really love to see a light rail going along hwy 18 from Maple Valley down to Auburn train station.
Out of District	Project timeliness are too long for our existing, and quickly increases traffic crisis
Out of District	personnally, would be more pro if getting to tacoma happened in my life time!
Out of District	Time line is lacking in a timely application of already lacking services.
Out of District	25 years is too long. We need ST 3 sooner. Roads have not keep up with development. More roads will lead to more gridlock. Only better transit will improve our quality of life. Stop all development until we solve our traffic problems. Companies will leave area's that have gridlock.
Out of District	Completion of Sounder Trains to DuPont is of highest priority for me and frequent Sounder Service south of Seattle all day long, not just during commuter times. Please make the Sounder more usable by all, with convient bus service to connect with the Sounder.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	The current proposed plan takes far too long to complete!!! A system using light rail is expensive, unflexible, outdated, and slow to bring on line. Expanded express bus service is a far better choice in all ways the currently proposed plans are not. What is it with this area that all of transportation projects need to be so grandiose ?
Out of District	I think we need to find ways whether it is through additional Federal government funding or allowing the cities to contribute money to help pull as many projects forward as possible. I do understand that revenue is an issue with getting things started but having identified incentives for cities that help contribute or identifying the road blocks that the cities could help with would help get this passed. I have read a lot about Ballard being mad there section will take so long, so provide more detail the project plan and estimated dollars to spend and what they could do to get the project sped up. OR make sure that if projects are ahead of schedule and under budget that you work to move the rest of the schedule to the right as well (Even with ST2 Projects.
Out of District	The reason why I oppose the ST3 plan in general is because it is not acceptable to put the Everett delivery date as 2041. I understand the logistical and planning and development issues, but I would like to see a greater priority put on extending light rail to Everett. LRT service into Everett should be delivered by 2033. Thank you
Out of District	Stop spending tax payers money on stupid mass transit ideas. This is not Japan, England, or some other small place. People need better roads that don't damage their cars.
Out of District	If there is any way to speed up this timeline, do it! The traffic congestion along the I5 and 405 corridors is getting steadily worse! All in favor of this plan and most associated aspects!
Out of District	I know that Sound Transit wants to present a cost effective and realistic plan. I worry that the completion dates are so far out that regional population and traffic growth will far out pace the ability of ST3 to save us from gridlock.
Out of District	We've been waiting--and PAYING--for light rail to come to Everett for 20 years. We should not have to wait 25 more!! The I-5 trunk lines, including Lynnwood to Everett, should be constructed FIRST. If this means waiting to construct the line to Paine Field, so be it. Boeing may not even stay here, for Pete's sake! Expanded parking is needed because we have such poor bus service up here that driving is often the only practical way to get to rail stations.
Out of District	The farthest distances should be completed first to get the most people with the longest travel times out of their cars.
Out of District	It is too bad the timeline is so stretched out - we need this so badly right now. This will be so overdue by the time 8 years rolls around.
Out of District	I'm not voting yes for something that won't be done for 50 years.
Out of District	There should be a major shift in focusing on building the infrastructure by extending out to Tacoma and Everett FIRST then building on this. The traffic between Seattle and Everett continues to worsen then there is the mudslides interrupting the Sounder service

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	The traffic coming from the south into Seattle is nightmarish. People have begun to drive to Portland avoiding Seatac completely to catch flights at Portland airport instead. We seldom go to Seattle for fun or events due to the traffic. The lack of a train system in the Seattle area is shocking. All support should be given to bicyclists and pedestrians to improve our situation. Our ferries are wonderful. Adequate parking at train stations is a necessity if you want this to work. Especially at the outlying stations.
Out of District	The Ballard line is by far the most important and cost-effective project (because of ridership density), and I don't even live on that side of Seattle. I understand the complications with a new downtown tunnel, but serving Ballard, new Expedia headquarters, LQA, and SLU (Google, Amazon, etc.) should be the number one priority. I'd support higher taxes for Seattle residents to complete this project sooner.
Out of District	Not necessary
Out of District	Long term parking near transit stations.
Out of District	Get the route to Everett done ASAP! I live and work in Arlingron so I wouldn't use it that often but I'd be willing to pay for it for my fellow citizens to access from Everett sooner than other projects
Out of District	Ballard and west Seattle light rail should be given top priority. To speed up construction, bounds should be sold to raise the money needed to build the entire system now and use the tax increase to pay off the bonds over the next 50 years or so.
Out of District	Ballard and West Seattle light rail should be given top priority. Bounds should be sold now to raise the money to build the entire light rail system now and use the tax money to pay off the bonds over the next 50 years.
Out of District	Sooner!!
Out of District	Considering the aging population of babyboomers, and the increased longevity of people, in general, it is incumbent on us to plan for the profound need for rapid transit, not only at present, but in the not too distant future. The year 2041 will put me into, likely, my last decade, if I don't pass away before. I seem to be in good health and continue to work full time. However, I purchased my home because it is on a bus line and I need to consider the possibility, if not likelihood, that I will want to be active long after I no longer drive.
Out of District	Light rail to Snohomish county NOW needs to be the highest priority. I will ONLY support a plan that finally addresses the transit needs of Snohomish county. It is ridiculous to shower resources on the richer East side or improve the services in Seattle when Snohomish county has nothing. I will not vote to pay taxes with some vague hope of transit 25 years in the future. Do it now.
Out of District	Light rail to Everett needs to be a Priority. The needs are great, and 25 years is just too long to wait. Snohomish County residents should not be taxed for light rail projects that will not benefit them for 25 years.
Out of District	Tacoma/DuPont should have a higher priority. I commuted for six years between Lacey and Seattle. Commute time was often 2-3 hours. I finally quit my job because of it.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	Proposed completion timelines in Question #12 are simply way too long - people have been waiting their entire lifetime for rapid transit in the Puget Sound area and will be dead before it ever happens. This needs to be addressed immediately, not 25 years from now.
Out of District	Tacoma cannot wait 17 years for this. The lack of affordable housing on the Eastside could be easily remedied with better access to the wonderful communities of the south Sound. Easier movement of commerce between the two cities would benefit both and help the area in the middle see the economic improvement of its neighbors.
Out of District	Please finish rail transport first
Out of District	Way too slow, projects need to be completed ASAP
Out of District	From the Everett Herald: "The 2008 Sound Transit 2 measure promised to extend light rail north from the University District to Northgate by 2021 and to Lynnwood by 2023. It paid for more commuter buses and for improvements to Sounder rail stations in Edmonds and Mukilteo."  What happened to this? I do not trust government with my tax dollars, ESPECIALLY over 25 years. Technology will change, circumstances will change, there will be cost overruns. So, although this region urgently needs a rapid transit system, I don't support this long term proposal.
Out of District	the plan sounds like the tunnel, expensive and benefits main corridor only. Very Seattle-centric
Out of District	I chose to somewhat strongly oppose this plan based on the timeline for the project. If the Everett/ Snohomish County spine is not completed early it is of no benefit to those of us up north to vote our tax dollars in. Also, my spouse has been commuting to Kirkland for years and there is still no reasonable solution. By the time the suggested plan happens, he will be retired, and we will be spending our retirement dollars to pay for a system we will never use.
Out of District	Lynnwood to Everett need to be more of a priority than completion in 25 years
Out of District	You are taking too long to help the people of Snohomish county get to the northern areas of the city. The UW, UWMC, Seattle Children's and South Lake Union are big employers and this timeline will not be helping any of us get to work faster from the north or north east sides. Additionally all of these employers promote comminuting to work and you don't seem to be partnering with them very well. Snohomish county is one of the few locations where people can actually afford to live and raise a family. The north end Amtrak rail sounder trains do not work because there are NO STOPS that service the UW or that area. I would use the train if you can make it reliable (landslides constant issue in north end) additionally having to travel back through downtown to access the commuter train isn't very reasonable or reliable. When I did try and take the train I would fight to get down to station only to be told no train take bus! You are not going to get any support from Snohomish county because you're asking for big \$\$\$ and providing NO rapid increase in service within a reasonable time frame! The Routes on 522 are over burdened and make too many stops to be considered express. If you created a faster way for me in the next 5 years to get from Bothell or Woodinville to the UW I would be able to support this proposal.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	Enumclaw is a great community but very difficult for location. Would be good to have an option close to Enumclaw
Out of District	I believe with the rapid growth and increasing density of the West Seattle area, the timeline for completing the Light Rail system connecting West Seattle to the rest of the Seattle and surrounding area needs to become a city priority.
Out of District	Complete it faster, even at increased cost to taxpayers
Out of District	Earlier completion of projects
Out of District	The ST3 draft plan is too long...almost TWO generations of tax payers waiting for complete regional coverage! Way too long!
Out of District	These rail projects should have been started a decade ago. Each year of delay simply increases costs to taxpayers. Get this done NOW!
Out of District	I don't use transit today because there's no parking at transit hubs (Sounder, light rail, park and ride). Parking needs to be considered for all projects.
Out of District	We needed accessible mass transportation 30 years ago. For everyone's sake as well as for our environment, we need to see this completed in our life time and waiting 25 years is too long for all of us. This needs to be a priority and I will support this with my tax dollars. People can not afford to live in many urban areas and they cannot afford to spend 4 hours every day commuting. We all can not afford to continue to drive our own cars with its impact on the environment. We can do this if we have the will. We need to do this now, not later. We can do this and we could do this if we considered it important enough. It is vitally important.
Out of District	The Lynnwood to Everett light rail should be prioritized, the 2033 timeline is unacceptable. Bring the rail up the I-5 corridor and use express buses to serve the industrial Paine Field/Boeing area.
Out of District	I would prefer to pay \$35 per month and complete the work sooner.
Out of District	I would like to see more of these projects fast tracked. I'll be otherwise dead before I see any of these accomplished
Out of District	I wonder why Everett is such a low priority area. Perhaps other areas have even worse traffic problems, but Everett's are bad enough.
Out of District	Connect Kirkland to Seattle faster!
Out of District	Under these current timelines I will never use these systems. Tax Amazon and Boeing and make them fund this!!!
Out of District	The timeline is unbelievably long, so that by the time it's completed, population growth will ensure that traffic will still be just as bad then as now. I'd be in favor of considerably more taxes to get it done sooner -- let's bite the bullet and get it done, as we should have nearly my entire life ago.
Out of District	Please place a higher emphasis on serving the East side commuters. 25 years is way too long to wait.
Out of District	Build the spine of the system first and the extensions later. Better to increase motor vehicle excise and sales taxes so that the costs are borne by all who benefit, not just real estate owners. Many nonresidents use the highways and benefit from the transportation services.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	Snohomish county is growing rapidly, with opportunities to aquire and build out rights-of-way in a sweet spot while King county and the Tacoma area are pretty well built out. The "bang for the buck" is in Snohomish county and linking Snohomish county to Seattle, and thus should occur sooner rather than later, especially given the present fiasco on I-405.
Out of District	The Everett extension needs to be prioritized to support the Boeing employees. This will help alleviate the daily commute commuters on I-5
Out of District	Ridiculously long time! It took how long to build the transcontinental railroad BY HAND? I live in Issaquah and will never, ever see any benefit from your plans--make no mistake, I'll pay for it, live through growing congestion and construction hassles, but never ever enjoy what should be built in the next 5 years. How about you push to impose a moratorium on all new real estate development on the Eastside until we have the capacity to handle the increasing transportation needs that go with such development? I used to live in Myrtle Beach, SC--they needed a bypass and instead of putting it on the 23rd Century time-frame, they eliminated all the government inspections and labor restrictions, entrusted it to the contractors, and built the bypass (HWY 22 & 31) in a very short time. That was over a decade ago and the hwy is still in great shape. Surely you can build light-rail in 5 years or less IF YOU WANT TO. The current time-frame makes it more likely I'll have a flying car before I ever get to ride light-rail from Issaquah.
Out of District	25 years? why should it take so long.... if so, development of new housing should be delayed by the same amount of time, as the flurry of new housing isn't being supported by infrastructure.
Out of District	I don't currently use public transit because I live in Snoqualmie and work in Bellevue. The public transit between those cities is so minimal that it hasn't been worth using. :( I would love to bike to work, but there aren't any safe bike routes from Snoqualmie that don't require going at least 10 miles out of my way. My only concerns with the projects are the timelines. *25 years* to add light rail between Bellevue and Issaquah?!? I don't mind paying more to get a faster timeline. In 25 years, I might be dead and I'll certainly be retired and have less use for the light rail. :(
Out of District	Hopefully these timelines can be reduced! Light rail should come first,before BRT. THANK YOU.
Out of District	I do want to mention that although I live at 98225 I work in 98204. I also believe we need a better high speed train network and bike and pedestrian centered transportation. A lot more people would walk and bike to work/ school if there were nice and safe trails separate from autotraffic. Lastly, I am concerned that the \$200 per year will frighten people. Perhaps this should be broken down by demographics. What does an average person look like?
Out of District	Seattle, our Port and NW regional center is choking on congestion. Waiting 22 years is too long. Equity in transit requires serving higher density, lower income, employment centers and building light rail there sooner. Light rail must be built outward from the CBD and regional centers first, otherwise the plan enables suburban sprawl, and isn't equitable.
Out of District	Having the sounder expanded farther south and more quickly.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	ST3's light rail delivery schedule must be shortened to the most densely populated areas and employment centers first in order for me to support such an expensive proposal. This includes expedited light rail delivery to Ballard, Everett, Redmond, and Issaquah. I would support a more expensive package if the schedule for delivery to these locations was shortened.
Out of District	Please find a way to complete these projects in a shorter time span. Our region is already suffering from congestion and our population growth will make it worse. 25 years is too long to wait for these projects to be completed.
Out of District	Longer take, more money to spend.
Out of District	I WILL BE DEAD BEFORE ANYTHING IS ACCOMPLISHED
Out of District	Get light rail to Everett sooner!
Out of District	Why is it taking so long? What are you doing with the money gained from fares on the new routes? Why isn't this money going towards extending/improving light rail?
Out of District	You need to figure out a way to do this faster....
Out of District	The commute from Issaquah and points east has grown exponentially bad in the last couple of years. On average, it will take 1-2 hours to get to Seattle in the morning, which is just as bad as driving into Seattle from Everett. Additionally, there are fewer transit options into Seattle from North Bend and Snoqualmie currently, unlike Everett, which has lots of transit options. I would argue that expansion east into Issaquah is more necessary and more urgent than in the outlined plan.
Out of District	I just wish the timelines weren't so long.
Out of District	Sound Transit has traditionally had very long implementation periods for its LRT projects compared to other communities in the US. This extended timing increases the costs of the projects and decreases support from the community. Sound Transit must find ways to significantly shorten the development period for LRT if it expects to maintain the support of the community.
Out of District	The expansion of the Light Rail between Lynnwood and Everett should be a higher priority, as rising rent and home prices are pushing more families to Snohomish County, increasing the number of commuters dramatically.
Out of District	We need service to Everett at a much accelerated timeline.
Out of District	I do not mind paying for it, however your timeline is way off for what we need in the next five years. By the time you build out the final phase in 25 years, this plan will be WAY out of date. Why is it they can build this in other cities in half the time or less? I have studied urban regional planning for years and our geographic challenges are not an excuse. My wife and I both commute to Seattle each day and WOULD support this plan and become 100% riders if done in a timely manner.
Out of District	thanks for making all this transparent, not much feedback really.
Out of District	I strongly support rapid implementation of this draft plan, especially to include the entire region, from Everett to Olympia, in an integrated system. It is urgently needed!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	Lynnwood to Everett and 25 years is just ridiculous it can be done a lot sooner considering it's the fastest growing area in the state
Out of District	<p>Light rail needs to come sooner to the Eastside. People will ride for getting to Seattle, Bellevue and Redmond. Love the plan, just want it faster.</p> <p>Just a comment that at some point we need a usable bus for commuting to/from Snoqualmie Ridge again (current community transit not flexible enough). Think about a park and ride at 90/18 where the new interchange will be built. Huge amounts of people in Snoqualmie Ridge and Maple Valley / Renton go through that intersection on their way to Seattle, Bellevue, and Redmond.</p>
Out of District	<p>I am strongly supportive of increased public transit projects in general and light rail in particular. Sadly, I'll be retired by the time you actually produce a light rail train that would be useful to me; in fact, my elementary-school aged kids will probably be mid-career professionals. Which sucks, really.</p> <p>Also, I strongly support building more parking at stations. There isn't enough as it is--by the time my kids get on the school bus, it's too late for me to find a parking spot at most park &amp; rides. I'm a single parent, and I live in Snohomish because that's where I can afford to raise my kids--but I work in Seattle, and the transit system's lack of busses and parking after 8:30 is the biggest blocker to my being able to do my job well while also parenting my kids.</p> <p>Also I'm not a huge fan of LINK as it's currently implemented. It takes a ridiculously long time to get from downtown to the airport. I'm afraid when you finally build that Everett LINK it's going to be so darned slow I wouldn't want to take it anyway.</p>
Out of District	Much too long and drawn out. We need rapid transit now - the commutes are so much longer and congested and ST is too far behind the ball now. Plan timelines must be increased or it will never catch up with the rapid growth of the areas impacted.
Out of District	<p>The 25 year wait to get light rail to Everett is unacceptable, when I originally voted for the original Sound Move, I had envisioned (and was sold) a Japan-like network of light rail that reached from Everett/Marysville to Tacoma or Olympia within my working lifetime. At this rate i will be taxed for a system that will come to fruition about the time I am 80 years of age... My sons will see it only near the end of their working careers. This after paying for it since they started working and having to deal with the ABOMINABLE traffic in the North End that DOT and the rest of the supposedly coordinated transportation authorities just cannot seem to get their heads wrapped around and build what is NEEDED even approximately when it is needed...instead its 20-25 YEARS afterwards.</p> <p>See the DOT Dupont interchange...that was done under budget, under schedule and works WELL. I fail to see why ST cannot get it together and get it built out in a timely fashion.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	Our region is filled with opportunities (employment, lifestyle, influence, culture, landscape beauty, weather) but it restrained the geography and several of the factors that make it attractive. We must enable people movement and support freight mobility to realize any of the shared goals. "The spine," the north-south primary route, is the top priority. If necessary to afford the completion of that extended route, then side routes must be a reduced priority and we will "figure out" how to reach those stations along that central route. And people will change their minds once they can see the positive effects of having a functional system, so let's show ourselves (demonstrate) positive results from the existing experiences. People ARE going between the airport and downtown, both directions; it IS reliable and fast. Substitute BRT in some of the side alignments if required to get the central spine completed.
Out of District	Speed up the timeline to maximum 15 years. We don't need another 1-90, which took 30 years and triple-quadrupled the projected price.
Out of District	I am most biased to supporting any plan that takes vehicles, including buses, off of our already overcrowded streets and highways. I am supportive of any plan to considerably increase our Sounder train and Link Light Rail options. I'm disheartened to see plans going out to 22 years, but glad that we are now thinking about these things that should have been thought about 22 years ago.
Out of District	SoundTransit needs to change its agency name from the word Sound to the word Puget, which it can be named PugetTransit, because there's already approximately 100 sounds world wide. There are 2 different sounds, which are 1 you hear the volume mass & other is consider ocean inlet in geography. ST which stands for SoundTransit needs to go from the word Transit to the word Transportation, which can make it stand for SoundTransportation. ST3 draft plan needs to be modified with some of its service plan being deleted segment to add proposed service to Marysville, which is just north of Everett. Express bus routes 510 and/or 512 should have a proposed expansion up to Marysville by deleting all the selected trips to Downtown Everett. Avoid expanding service to DuPont & Orting because they are the small municipal locations
Out of District	This takes TOO LONG. No. Get more money, do it faster. Traffic is too congested to wait an entire generation for these projects to get completed. That's NUTS. Get it done in 10 years or less.
Out of District	I support any and all efforts made by Sound Transit to get people out of their cars. That being said, I think given the rate in which the population is growing in the Puget Sound, The process needs to be excellerated.
Out of District	You continue to use 'one project fits all'; the reality is quite different. You need to have at least one LRT project that is fast tracked, way faster than you as an agency are comfortable. I also believe that some of your LRT routes are best suited in the near term, the next 15-20 years, to streetcar-like service. This is not new, it has been a transit strategy for at least 100 years (see Boston).
Out of District	Lightrail taking 25 years to come up north (Lynnwood\Everett) puts me at retirement age so my comments would be useless as I wouldn't need mass transit for work anymore.
Out of District	Do it all much faster, even if it costs more

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	Do not tax people more to get it done quicker. Take from other projects that are not currently being completed to get the #1 priority taken care of first. One project at a time. No extra money needed if you spend it wisely. Seattle Transportation is famous for spending money poorly and needing to take more from tax payers due to pathetic mistakes. Get a project done, and move to the next. Don't get ahead of yourself with all these new projects
Out of District	I have always supported any form of rapid transit and ST1 and ST2 with the assumption that it would benefit the region where I live as promised by those proposals. With the plans you have listed, I will pay for 25 years for the service to benefit our region. I will be 96. I can not see why I should pay \$200 a year for services in other parts of the northwest.
Out of District	ST should complete the light rail spine up to Snohomish County prior to building spurs in King County (i.e. Ballard) as originally discussed in the late 90's/early 2000's. The spurs can always be added at a later date. Snohomish County has been very supportive of ST's light rail program from the beginning with the understanding/agreement that light rail would reach Everett timely (and prior to new King County interests).
Out of District	First, make existing systems work to best ability. Increase speed , frequency and reliability of existing buses and trains. Then expand. Make sure all new stations are connected. Dupont is miles from JBLM main gate. How will people get on base? How long will it take to screen and clear them?
Out of District	Focus on the Eastside. It will help to expand our citizens east and will promote social plurality, while providing job and residential opportunities.
Out of District	Thank you for the major efforts to orchestrate such a massive project. I want to be supportive of the big picture of transportation for Seattle's future and the long-range timeline--even though it's unlikely the project will directly benefit my family. I encourage municipalities and politicians to work together to make ST3 happen more quickly.
Out of District	No rail to Seatac from Tacoma, no yes vote
Out of District	Plan, design and build light rail as quickly as possible. Doing everything earlier costs less when considering inflation. There are many people who need it and many capable constructors and consultants that can do it. Be sure Sound Transit can support the work by hiring enough staff to adequately manage the projects or solicit on-call services to manage it properly. Be sure Sound Transit has the proper MOUs in place long ahead of schedule, so it does not impede planning, design or construction. Be sure AHJs adhere to agreed-upon schedules to conduct their portion of the work, so it does not impede planning, design or construction.
Out of District	I believe that all the projects can be completed sooner than the timelines listed. I am a strong supporter of all rail projects. Light Rail lines should be running down the center of all of our major roadways (I5,I405,I90) with strong bus links connecting these lines to the communities all along these corridors. Chicago is a great example of this.
Out of District	Please move up the Graham Street station! There's money for this in Move Seattle that will go away if ST waits too long. This low-income community of color has waited far too long already. Pushing it off another 20 years adds insult to injury.
Out of District	It's shocking to me that implementing the bus portion of this is so far out. People will happily ride mass transit if it is efficient. Increasing service on existing routes should be a high priority. There needs to be a way to fund transit so that it is not susceptible to revenue-cutting initiatives.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	I grew up with public transport in Munich, Germany. Having to wait this long for 'some service' feels too slow. I strongly advocate for accelerating the plan.
Out of District	As housing costs continue to spiral out of control in Seattle metro and more of us are moving away to find quiet, affordable living conditions, it's no longer a question of "do we need this transit system?" It's now a matter of "How fast can we get it done?" I'd pay \$35/mo to get fast transit from Marysville/Stamwood to King County.
Out of District	25 years of taxing me before I get "transit" to Everett is [explicit]! I won't be alive in 2041.
Out of District	It would be great if it is completed before 25 years, but other than that I strongly support these projects for the better of living here in Washington/Seattle eastside area
Out of District	Need to get light rail to Everett sooner!
Out of District	25 years is far too slow, and you have received a lot of similar feedback. No excuse for delays like this, and no excuse for turning down federal funding in the past, when other cities were expanding transit options. Also, if Microsoft and Amazon are major contributors to growth (and traffic), why not get them to pony up? The rest of us are not benefitting from their presence (negative effect on housing costs, among other things). Off-subject: Where are the East-West options?
Out of District	25 years is too long of a timeline to reach the outlying areas like Everett and Issaquah. I live in Lake Stevens and I work in downtown Seattle. I used to take transit every day from the South Everett Park and Ride. I don't anymore because I want to be home with my family sooner. I also used to take the bus from Everett to the airport via transfer in Seattle. I think light rail would be great, but it needs to be high speed or more express. I certainly don't want to spend an hour to get from the airport to downtown Seattle because the light rail stops every 5 min, but I would use it if I could get to Everett in 1 hr.
Out of District	Light rail to Everett needs to be completed before anything else. We have already been paying taxes towards light rail service for years, without even being able to use it. I use the bus system every day but I will not support another dime towards transit services until you promise to start building light rail on the north end, first. To expect us to wait another 25 years (while continuing to pay even more!) is absolutely ridiculous.
Out of District	Is there any way to speed up the projects by working from both ends? It seems like a long time to get to Lynnwood and Everett.
Out of District	The time frame is too long for north lines. Many buses are already at capacity for commutes to Seattle from Everett. More choices are needed as soon as possible and not in 25 years.
Out of District	25 yrs for light rail to Issaquah is insane, needs to happen MUCH sooner, delay the extensions on Dupont, Tacoma Link Light Rail. Redmond/Issaquah expansion should happen before West Seattle/Ballard. I oppose the costs because I won't be able to benefit from this until 25yrs from now, yet will have to be contributing to the funding.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Out of District

Out of District	I strongly believe we need more light rail in Seattle now. I would recommend reversing the timeline so the densest areas are served first including building the light rail Ballard and West Seattle in the next 8 years. There is already the transit oriented development in these areas and many riders that take buses that would love a high quality light rail. I strongly support connecting Tacoma to Seattle via light rail. Tacoma is an up and coming city and its connection to Seattle will be an asset to both cities. In addition, I believe that grade separation in the more urban areas is required. The Ballard to Downtown line is going to be through very busy areas and will have very high ridership. Grade separation through Interbay is essential for reliability and safety. Delays on this line will affect Tacoma, Federal Way, SeaTac and the downtown core will be seriously affected. That would be a negative impact for the entire region.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Snohomish County

Subarea	Additional Feedback - Project(s) should be added in the ST3 final plan
SNOHOMISH COUNTY	<p>Mass transit is the only way to save our communities - electric rail systems separate from current highways are critical. The next wave of change will be a move away from individually owned vehicles to smart cars, self driving to pick up and drop passengers off on the last mile. The opportunity to recover in the future the cost of current parking facilities should be considered - while current parking must be included in the ST3.</p>
SNOHOMISH COUNTY	<p>Additional Parking facilities at the Ash Way and Ride are needed in order to serve the growing community that surrounds Ash way park and Ride. Better bus service from Ash Way Park and Ride to UW Bothell is needed. Currently you have to transfer at Canyon Park, Park and Ride and often the timing of the buses are not aligned and what should be a short bus ride can often take 15 - 25 minutes longer than it needs to be.</p>
SNOHOMISH COUNTY	<p>I spend about 30 minutes some mornings waiting for the bus to get off the I5 express lanes south bound at Stewart. There should be a bus priority lane there.</p>
SNOHOMISH COUNTY	<p>There is not enough in plan to improve traffic and transportation options between Everett and Seattle. This is very frustrating. Every bus or Sounder train I am on to/from Everett is filled past capacity. Why no more bus routes from Everett to N Seattle (that don't go downtown), or other options??</p>
SNOHOMISH COUNTY	<p>1) Add way more North Line Sounder trains, to the a.m. and p.m. commutes, and some service on nights and weekends. Why on earth is the last train north at 5:30 p.m. on weekdays? That's crazy. 2) Add another downtown station for the North Line before King St. Station. 3) Increased parking at Mountlake Terrace Transit Center. If you get there after 7:30 a.m., you have to park in nearby neighborhoods or drive in to the city.</p>
SNOHOMISH COUNTY	<p>Light rail line from Snohomish County to Seattle downtown should be a priority. ALL busses are full morning and evening and often standing room only. This seems like a critical line to move people to and from downtown-not in 25 years.</p>
SNOHOMISH COUNTY	<p>Light rail to everett and everett community college should be the number 1 priority. Traffic in the north end has gotten much much worse. I would like to see the Sounder expanded to Stanwood now that an amtrack station has been completed. If we were to expand the Sound Transit boundary to include Stanwood, then the sounder could go further, the cost of land to have bays in Stanwood would cost Sound Transit less money and would increase ridership. My number one issue is light rail needs to get to everett as a higher priority, and the northline sounder needs to be more reliable and needs to be expanded. If the sounder were to go from Stanwood, then a station should be built in Marysville which would MASSIVELY increase ridership.</p>
SNOHOMISH COUNTY	<p>Add more parking to existing light rail stations, and build in more parking for future stations. What good is a train to the airport, or wherever, if I can't park my car at the station to get on the train? I live in Edmonds and have been so disappointed not to be able to use the light rail from Seattle to SeaTac because there is no parking.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	The landslides that hinder the northern sounder line are ridiculous. Stabilize the ground so this doesn't happen. This is the fault of building next to unstable land next to the sound. Why not fix it? How much lost time and wages have come from clearing the landslides and making people commute in their cars or buses?
SNOHOMISH COUNTY	Northline Sounder adding an earlier train from like Edmonds making buses and sounder align better
SNOHOMISH COUNTY	Light rail should go all the way up 405. And this should all be accomplished MUCH faster!
SNOHOMISH COUNTY	Lynnwood Transit Center is already out of parking. It will get much worse with light rail. Where is a plan for light rail riders to park near the Lynnwood Transit Center. There just isn't enough "feeder" transit for folks in the north end to leave their cars at home. New park and rides with constant shuttle service to light rail might work.
SNOHOMISH COUNTY	Increased service into rapidly-developing areas, such as Mill Creek, Snohomish, and Bothell. Route 116 is already very busy, and the other routes through the sprawling residential areas (105, 106, 115) can't be far behind.
SNOHOMISH COUNTY	Light rail from Mountlake Terrace to Downtown Seattle is paramount!
SNOHOMISH COUNTY	Getting from communities like Edmonds to light rail would be wonderful. Right now we need to drive or hire an Uber for the planned station locations.
SNOHOMISH COUNTY	The Ballard to UW line is critical to mobility within Seattle and should be included.
SNOHOMISH COUNTY	Rail on the Eastside Rail Corridor.
SNOHOMISH COUNTY	Park and ride parking is already at capacity at all stations serving downtown by 7am or earlier. I end up driving whenever I have to drop my kids off at school because there is no parking. I AM HAPPY TO PAY FOR PARKING. Don't wait to build the parking garages until light rail comes. Build them now and you will see a huge increase in bus ridership. It takes 45 -60 minutes to take a local bus to a transit center from which I can catch a bus to work. I live 7 miles from Lynnwood TC and even closer to Ash Way. This is ridiculous. Do I really have to wait for 7 more years for a solution to this? I love public transportation. I would take it every day if it was possible. It's just not practical for me to ride my bike to transit in the rain in a business suit after dropping my kids off at school. Help me. I'm so sick of having a 3 hour daily commute. It's ruining my life. I live 22 miles from my office. HELP ME, PLEASE!!!!
SNOHOMISH COUNTY	Heavy rail needs to be extended north, Marysville, Smokey Point, My. Vernon. The current rail runs to Lakewood, grabbing huge ridership off the highways. The farther you go the more likely you are to ride. There is only one route north and it is highly congested. Why extend farther south but not north. There is little to nothing helping Snohomish County till 2041. I won't see it. If you want our support find a way to create real help. We are spending money on Ballard, West Seattle, West Tacoma, but where is the traffic coming from....farther out. I support the idea of extending to DuPont, but why not Marysville, Monroe, Snohomish. Look at those.
SNOHOMISH COUNTY	We need Bus Service from North Creek (near Northcreek High School) in Bothell to Seattle Downtown as many people go to work in Seattle everyday.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	<p>Every should be a priority</p> <p>Park and rides need dramatics updating too - more parking and better lighting being paramount.</p>
SNOHOMISH COUNTY	<p>Please bring back the 128th st park and ride transit access ramp. It's a congestion nightmare right now and the buses/carpools changing 4 lanes to turn left don't help!</p>
SNOHOMISH COUNTY	<p>I moved form Seattle to Edmonds about 4 years ago and I've been riding the North Sounder Train into Seattle for work every day. I feel the North Sounder train NEEDS AN ADDITIONAL STOP North of King Street Station. To my knowledge Sound Transit has complained about lower ridership on the North train and I believe MORE people would ride it there were more stops. I used to work in Queen Anne and it was almost impossible to backtrack 2 miles King Street station at 5pm to catch the LAST train going north at 5:30. This is because the core downtown traffic at 5pm is at a stand still so the only people the North Sounder train benefits is people who work in a 6 block radius from the station. People don't and can't back track even a mile in downtown traffic and make those trains. We can't compete with the South train because they have so many more stops. There are huge communities of people and businesses between Edmonds and King Street Station that could be served by the Sounder Rail. I feel we need a stop in lower Queen Anne that would feed the entire north side of downtown. South Lake Union, Queen Anne and Belltown are all huge neighborhoods with a ton of businesses that could benefit from the Sounder Rail. As a Seattlite who has moved north, I can tell you that people who live in Seattle have no clue what the Sounder Train is though. So along with an additional stop north of King Street Station, the North Sounder Train would need some advertising to get people connected with the Sounder and how it could benefit their commute.</p>
SNOHOMISH COUNTY	<p>Pull the trigger! Let's get it going. Bussing it from Everett to Seattle everyday is painful. Lightrail would be fantastic!!!</p>
SNOHOMISH COUNTY	<p>Increase the Sounder Train Service from Everett to Downtown Seattle. The tracks are already there but the number of commuter trains are very limited. Weekends are non-existent. Trying to get downtown, even for a Mariners game, is painful. During football season, the trains are packed. Why can't we add more trains to weekend schedules?</p>
SNOHOMISH COUNTY	<p>Add light rail to the east side going north of Bellevue/Redmond as well - north into and beyond Bothell. Put a light rail station at UW Bothell, another in Mill Creek before they build housing on all the vacant land, continue north into Everett and make it a big rail loop.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	Most transit center parking is full by 6:30am to 7:30am continueing for all day. People can not use good public transit if they can not reach it and leave their car. Urgent to DOUBLE onsite parking at all transit centers. Open parking ALL DAY should be the goal and the fact at every transit center. Every patron at any time of day should be able to ALWAYS find parking at the transit center. Otherwise, public transit habits will never be trusted for transport. It is never good for commuters to arrive at a transit center and be forced to continue driving to their destination ONLY because there was no where to park at the transit center. This re-inforces an instinct to never trust public transit as a routine. Plentiful parking is the most immediate remedy to that suspicion.
SNOHOMISH COUNTY	Add a sounder drop off/pick up station at the north end of the waterfront. We have to go all the way to king street than catch a bus up north which adds 30 minutes at minimum to our commute. Especially with Expedia coming to town.
SNOHOMISH COUNTY	It is super important to extend the corridor from Lynnwood to Everett as it will decrease the number of cars on I-5
SNOHOMISH COUNTY	Connection from Ballard north and cross town are imperative. There is no reason why people in North Seattle can't get to Ballard directly.
SNOHOMISH COUNTY	I would like to see ferry service increased from areas north of Seattle to downtown Seattle.
SNOHOMISH COUNTY	I feel that service going northbound on I5 towards Bothell/Mill Creek area is extremely important. As a commuter to downtown Seattle 4x a week and working on the off hours, I don't have the advantage of taking the bus with times that fit my schedule. Having better access to downtown would save me \$200/month parking downtown as well as gas. It's too bad that the proposed efforts for up north will be another 20-25 years away.
SNOHOMISH COUNTY	It is critical to spend money now to avoid total gridlock. It is worth MORE than \$ 200 per year. Need also more service during non-commuter hours.
SNOHOMISH COUNTY	Expanded service on the existing Sounder line from Everett to Seattle...not limited to just rush hours for commuters.
SNOHOMISH COUNTY	Parking needs to be added at the South Everett Freeway Station. More people would ride the bus if there was parking at the Park and rides.
SNOHOMISH COUNTY	look at other european and asian countries transit system ... I'm shamed of being living in seattle with such a bad public transportation system. should do ASAP. its good for everyone... earth and people. thanks
SNOHOMISH COUNTY	Rail service should be added on SR 522
SNOHOMISH COUNTY	I feel like we need to add Link Light Rail on the Eastside following the I-405 corridor. It is great that we have Rapid Bus Transit planned, but that isn't even being considered for the I-5 corridor, where Link Light Rail lines are already planned. With I-405 traffic getting worse and the growth on the Eastside outpacing what can be done to control traffic flow and congestion on 405, Light Rail would be such a wonderful addition to move people on the Eastside down the I-405 corridor.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	More parking at Lynnwood and Mountlake Terrace Transit Center. I work swing shifts 15:00 to 23:30. I take a bus at 13:30. Monday - Friday I have to be there at 13:00 to find parking. I do realize that most customers don't work that shift but my time is valuable. I also leave early because traffic is horrible. I cannot get to work on time if I catch the 13:47 512.
SNOHOMISH COUNTY	Find a way to accelerate the plan. 25 years is WAY too long!! I currently pay \$360 a month in Tolls on the i405 because there is no transit system in place - basically a tax of \$4000 a year net. I'd rather pay triple the taxes that you are suggesting to accelerate the light rail link on the i-5 so I can use it again :- ) and reduce my \$4000 a year toll bill - but it has to be built fast!
SNOHOMISH COUNTY	Please also strongly consider extending the SR-522 Rapid Ride service east to Monroe with at least one stop in the Maltby/Clearview/unincorporated Snohomish County area. If not possible, please consider creating a ped/bike system that safely connects people living in the Maltby/Clearview area to Woodinville such as via 522 or along the existing rail line.
SNOHOMISH COUNTY	Bothell is growing crazily with so many commuters driving to Redmond and Seattle. There should be direct point to point commuting options from Bothell to Redmond and Bothell to Seattle without commuters needing to taking multiple buses/rails to enable mass usage of mass transportation system. I am disappointed to notice that is not addressed in this plan. This is extremely important. Add more parking spaces in canyon park bothell location for transporters to use the mass transport system. Add more internal bus routes within bothell and connect to canyon park that will enable people to take bus and commute to canyon park and then to office in Redmond, Bellevue and Seattle location. Finally, 25 years to the proposed plan is really slow. Are we in stone age? Within 25 years, the city would have exploded 10 times more than what it is now. New projects should go in effect within 2 to 3 years and maximum by less than 5 years.
SNOHOMISH COUNTY	While I appreciate the grand vision that you have, more urgent for me, would be additional parking at the Bothell Park & Ride. This lot fills up by 7:30am and makes it unusable for me on many days for that reason.
SNOHOMISH COUNTY	Mukilteo to the area near I-90 and East of I-405 should be added to the ST3 final plan.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	<p>Please consider adding a sounder train stop in the north end of the city to serve the south lake Union area and the interbay areas. The north end of the city already has gridlock traffic with Amazon located in south lake Union. The addition of Expedia with an additional 5000 commuters to that area in 2019 will result in unprecedented traffic congestion that will grid lock the entire north end of the city. This kind of business growth, while extremely beneficial from an economic perspective to the county and city of Seattle, also brings with it a responsibility on the part of our municipal and county governments and special transportation districts to develop multifaceted transportation solutions to accommodate this growth. Multiple options must be prioritized in my mind and a potential option that should be considered is a new station in the north of the city for the sounder. This would dramatically increase north end commuters using sounder. Currently it is too inconvenient and time-consuming for commuters who work in the north end of the city to travel to the south of the city on the train and take multiple buses back across the city to work. Please consider this a priority. Already traffic through the north end to I-5 can take 50 minutes or more--just to reach the freeway. Then an additional 40-50 minutes on the freeway to reach shoreline or Edmonds. This kind of momentous change to the commuting base caused by expansion in the north end necessitates as many options as possible available to commuters. One critical option that must be prioritized is the addition of a north end sounder station. Thank you for your consideration.</p>
SNOHOMISH COUNTY	<p>Please please please add a station around sculpture park to the north end sounder. It adds about an hour to my commute to get from King street station to Belltown.</p>
SNOHOMISH COUNTY	<p>Please make an effort to improve the parking availability in the Bothell/Woodinville area</p>
SNOHOMISH COUNTY	<p>Since the N405 corridor to marysville contibies to grow faster than almost any other area... Can please for the love of Mike get light rail or commuter rail down 405?!?</p> <p>Also, I'd bet cash that if there were more commuter rail times between Everett and Seattle more people would use it. Right now, i use it to get home from the airport IF I travel during the week and IF I can get the right times. It just seems like you're not planning for regular use in the future. You're planning to cover what should have been done 20 years ago. Not that you shouldn't do that too, but as someone who has to pay totally ridiculous tolls to go to work... Throw me a bone and let me sit on a nice train instead of standing on 532 for the rest of my natural life. Maybe someday it will run in time, too.</p>
SNOHOMISH COUNTY	<p>If rail is extended to Tacoma community college, it should also be extended to Everett community college.</p>
SNOHOMISH COUNTY	<p>Please build light rail on the 405 corridor as soon as possible!</p>
SNOHOMISH COUNTY	<p>Light rail to Bothell. Bothell is the choking point of all traffics.....having lightrail there will solve a lot of problems</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	Before embarking on a vast expansion of the system, make the current system work. There is vastly inadequate parking at the bus terminals. There are adequate buses, and adequate capacity. There is a large lack of parking making the current system barely adequate. Feeder buses are too infrequent to meet the needs of anyone making more than \$10 per hour. Once there are available parking spaces at the bus terminals all day long, then there could be expansion of the system. But, as more and more companies move to telecommuting, there will be less and less demand for an expanded system. In the end the only people who will benefit will be the construction companies who build the new systems that then will be under utilized.
SNOHOMISH COUNTY	I think we need to focus on getting the light rail built and up and running. The light rail will get cars off the streets if it can get people to where they are going with no traffic and reliable train times. I also think they need to increase the parking at commuter stations such as mountlake terrace and lynnwood where they lots are already full at 8AM and will only increase with train service.
SNOHOMISH COUNTY	as long it will alleviate the madness on the highway.
SNOHOMISH COUNTY	Believe I heard we have the 3rd worst traffic in the U.S. We have to do something to help with that and we need to do it ASAP. I live in South Everett and work in North Gate. My commute is 2.15 hours each way. Hoping you expand services so the 4.50 hours I spend on the bus each day can be a more reasonable time frame.
SNOHOMISH COUNTY	I-5 Ash Way Park & Ride direct connector ramps to and from the north to avoid surface Street congestion on Ash Way and 164th St SW.
SNOHOMISH COUNTY	Still needed are improvements to the I-405 corridor (north). We need rail options there! Too much focus on south projects. Also, there should be some sort of exemption for seniors who have a limited income to support the cost of these major projects. I've lived here all my life and finally when I'm near retirement age, there will be resources to get moving quickly in our region....too little too late !!
SNOHOMISH COUNTY	The puget sound area desperately needs better mass transit solutions.
SNOHOMISH COUNTY	Currently there are insufficient parking spaces in the Ash Way and Mariner P&Rs. When is the plan to increase parking spaces in these P&Rs with the new plan?
SNOHOMISH COUNTY	There needs to be more parking available to people who want to use public transport--it is very frustrating to chase down a parking spot, only to have to drive where I was hoping to take a bus.
SNOHOMISH COUNTY	fix the Mukilteo mess as the mudslides/unstable hillsides continue to keep Sounder service inconsistent and unreliable for its customers/commuters
SNOHOMISH COUNTY	More Sounder rides than what is already in place. Need weekend service as well for Sounder trains.
SNOHOMISH COUNTY	Add more train and rail service from Mukilteo now as well as later trains, parking, and later weekend service to ease congestion SB 5 on weekends and extend to Arlington or even Mt Vernon. Thanks

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	This plan falls short of what needs to be done over 25 years. Lack of services to Marysville and Arlington to Everett connect, EVERETT TO Redmond/Bellevue Monroe to Evverett/Paine field and to Redmond, Issaquah to North Bend, Maple Valley to Renton, Renton to Bellevue, Renton to Seattle, Puyallup to Kent, Enumclaw to puyallup, Enumclaw to Maple valley. You need to look at the population projected growth. The areas mentioned all have major Population growth projected.
SNOHOMISH COUNTY	Light rail link from mill creek to uw or ash way hubs
SNOHOMISH COUNTY	1. I think implementing these plans in 15-17 years is too long. They need to be fast tracked. In 15-17 years traffic will be even worse than it is now. 2. Why does the Eastside always get ignored? Microsoft, Nintendo and other Eastside employers are here in the Redmond area. We need transit to go from Woodinville to Redmond - not Woodinville to Bellevue. It would take me more than 8 hours to catch a bus. I want to use transit but there are no options. Washington State and KC should be ashamed that Microsoft has offered commuter buses to their employees because of our lame transit system;
SNOHOMISH COUNTY	Improved commuter train or light rail from Sumner station to Seattle
SNOHOMISH COUNTY	PARKING. Always limited parking especially on weekdays at P&Rs, this NEEDS to be considered. Also, I would prioritize anything that can get off streets (buses are always unreliable because they deal with traffic).
SNOHOMISH COUNTY	All public transit improvements that help reduce the car traffic on our over-strained highways are necessary in my view. Having moved from the east coast where public transportation, via subway and bus service moves 8 million people to their jobs and home again is so much easier, more environmentally friendly than driving.
SNOHOMISH COUNTY	1/ Include special express service to SEATAC airport from points North of Seattle (Everett, Lynnwood, Bothell, Kirkland, & Bellevue). 2/ Include special express service to downtown Seattle, and Seattle Center from points North of Seattle (Everett, Lynnwood, Bothell, Kirkland, & Bellevue).
SNOHOMISH COUNTY	The Eastside Rail Line has been completely ignored by ST3. This could connect Snohomish to Bellevue as an alternative to I-405 use. Reverse Sounder Commuter Trains Seattle to Everett and back are needed, ST should revise contract with BNSF to allow for this service which could be implemented in a short period of time. The current proposals are going to take too long to implement. There should be ST Sounder train service on Sat and Sun.
SNOHOMISH COUNTY	Absolutely need UW-Ballard East/West Connection. That should be one of the highest priorities.
SNOHOMISH COUNTY	I wish existing express bus routes would increase hours. I get off of work at 7:30 pm on first hill as many other hospital workers do and the last express bus comes at 6:25. Last bus should be at least 8 pm.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	Rail service NORTH to Marysville and earlier bus service to Arlington from the South. Earlier bus service along Mukilteo Speedway going to the train station and ferry in Mukilteo. Currently there is NO way for me to catch a bus to catch the earliest train leaving Mukilteo.
SNOHOMISH COUNTY	Direct options for Snohomish County to Redmond. Microsoft employs a lot of folks indirectly, and they can't use their commuter buses.
SNOHOMISH COUNTY	We need more parking available to folks who get on the 532. Ash Way is too full. Mariner has room, but requires additional buses. Can the 532 stop at Mariner? Everett Freeway station is too full. Folks living near Paine Field do not have great options to leave their car at home or park at a park n ride nearby and get to the Eastside (Bellevue).
SNOHOMISH COUNTY	The mailer received lists many cities, but IGNORES Mill Creek area, which is NOT Bothell. The Mill Creek city area and Silver Lake area are ignored and nothing is mentioned or includes for this area. Can't see how this plan benefits us in any way. If it does then it should be spelled out. We would strongly oppose any fees, taxes, etc. for the plan as proposed. Seems to just benefit Seattle and Tacoma. Light rail to all cities is the way of the future, to all areas. Expanded bus service is old-thinking, not eco-friendly.
SNOHOMISH COUNTY	I consider extremely important to add more routes between cities. For example, Mukilteo and Everett have a gap in Airport Rd; cities should make alliances to cooperate in the massive transportation systems. Also, I consider imperative to add more safety pedestrian lights, this will reduce accidents and will educate citizens about an efficient and safe mobility culture.
SNOHOMISH COUNTY	There absolutely needs to be consideration to include light rail from Everett/Lynnwood down to Kent/Renton via Bothell, Kirkland and Bellevue. 405 is one of THE busiest freeways in our region and I'm extremely disappointed that there is no light rail planned to connect Lynnwood to Renton on the eastside. The sheer amount of new home construction in Bothell/Mill Creek is unbelievable and traffic will only continue to get worse in that area.  I would also LOVE to see an expansion of the parking lot at the Canyon Park Park-N-Ride. The current lot is extremely small and fills up by 6:30am with no other nearby parking available. I live in Mill Creek and would happily take a bus to my job in Bellevue but there are so few parking options at the Park and Ride that it's unrealistic to rely on the bus. There are no nearby street parking options so if you arrive too late and there aren't parking spots, you're out of luck and have to drive into work. Please consider these options when thinking about reducing congestion on 405. Thank you.
SNOHOMISH COUNTY	In addition to the lightrail being built in Everett, it should be extended to Everett Community College as many students have a hard time with parking. This would lighten the load, as many students could ride the lightrail.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	You fail to address the population growth in the following areas: Marysville-Arlington, Monroe, Maple Valley, Enumclaw, Puyallup. Light rail is needed from Bellevue, Redmond to N along 405 to Everett then to Smokey point. Same needs to occur from Redmond to Monroe. ENUMCLAW to MAPLE Valley to Renton,Puyallup to Kent. The areas I mentioned has the fastest population growth. You need to include these in the plan. Commuter BUS SYSTEMS do not work when they are as slow as the traffic.
SNOHOMISH COUNTY	You can't start soon enough!!!!!!
SNOHOMISH COUNTY	Please propose light rail station in Marysville, WA.
SNOHOMISH COUNTY	Community Transit needs to add service along Hwy 9 between Woodinville and Lake Stevens.
SNOHOMISH COUNTY	I am quite disappointed that you are still saying it will take 25 years to complete the ST3 to Everett, it's needs to be at the least 5 to 10 years only and no longer than that.
SNOHOMISH COUNTY	The East side should be added to the light rail plan. Specifically from Everett to Bellevue. And, why will this all take so long to build? Is it money or does construction actually take this long? By the time it's built, we may have completely different transportation needs.
SNOHOMISH COUNTY	Parking parking parking at the light rail stations. Of no use unless you can drive and park. Ex I will need to park in Lynnwood to light rail to UW. Will not bus
SNOHOMISH COUNTY	Later in the morning and evening trains to and from Everett.  More cars on the Everett trains.  Higher velocity on the Everett train.
SNOHOMISH COUNTY	I live in Edmonds. I would love to use the Sounder train to go to work in Queen Anne, but there is only one stop in the ID in Seattle. I feel that an additional stop in Ballard, near Golden Gardens, with connection to the bus (and light rail in the future) would allow more people to make use of the train.
SNOHOMISH COUNTY	Increase frequency of sounder trains, not just during rush hour
SNOHOMISH COUNTY	We need to expedite an Eastside rail from Snohomish to Renton as well. And connect the lines Ease-West.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	<p>Sound Transit is known as 'Oh, we changed our mind'. The original intent was to create a spine of the I-5 Corridor from Everett to Tacoma, and now projects are being re-prioritized pushing off the spine development and prioritizing Ballard and West Seattle. I understand the need for better service within these dense areas, but these areas are currently served by Metro where as service in Everett to Seattle is extremely lacking without the heavy use of park &amp; rides. We all know that PRs break the cardinal rule in transit planning, don't start a trip in a car.</p> <p>ST needs to loose the ego and actually work with other jurisdictions to get projects done the benefit the public, not just ST. If ST builds parking, it needs to be completed as a public project available to the public. Stating that ST had projects come in \$100million under budget just demonstrates that lack of ability to perform project cost estimation.</p>
SNOHOMISH COUNTY	<p>The best way to ease roadway congestion is for more parking to exist at key transit sites. In the north, Canyon Park, Ash Way, Lynnwood transit and even the garage at Mountlake all run out of parking well before the express routes finish. Double (or more) the parking (more parking garages!) and there will be fewer cars slowing down the busses.</p> <p>(and personally, I'd love one more 435 route in the late morning. the last route runs at 7 am. I don't need to be downtown that early)</p>
SNOHOMISH COUNTY	Tram line that links Lynnwood to shoreline, then down to Seattle. Tram line that links Bothell to Bellevue to Renton. Expansion of 405 at the same curves or mass transportation from Boeing plant to Tukwila station.
SNOHOMISH COUNTY	More parking at the various park and rides should be added. People cannot take the bus from Lynnwood to downtown because of a lack of parking
SNOHOMISH COUNTY	Build light rail to outlying areas before they are so car-centric that impact is severely diminished!
SNOHOMISH COUNTY	East Snohomish county south via SR-9 to Woodinville, Redmond and Bellevue. So under served Microsoft has to run its own bus fleet. Don't care that my fellow SE Sno county voters are too stupid to include themselves in the taxing districts. Build it and they will come.
SNOHOMISH COUNTY	Light rail to Everett via Boeing should happen much sooner!
SNOHOMISH COUNTY	<p>Add light rail Seattle-Bothell</p> <p>Add light rail across SR520 bridge Seattle-Redmond</p>
SNOHOMISH COUNTY	I strongly support expanded transit options. The reason I listed "somewhat oppose" is largely due to the timescale of the plan. It must progress faster. Also, light rail needs to be provided along the I-405 North/South corridor on the east side. Bus Rapid Transit is a suitable gap fill, but should be able to be implemented much faster than 8 years. I have a concern that there is no solid plan on the books to put light rail in along this overburdened corridor.
SNOHOMISH COUNTY	From what I have seen, all park-and-ride lots are already full, so adding more service and any of these points will not help. <b>YOU NEED MORE PARKING AT ALL TRANSIT PARK-AND-RIDES!!!</b>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	<p>There should be improvements to (or sufficient) parking for the stations and park and ride lots. I don't use transit, although I'd like to, because it isn't convenient for me. Specifically the park and ride lots near me fill up by 7 or 8am and due to scheduling I can't catch a bus until after 9am. Therefore I commute to Seattle from Mill Creek when taking the bus from the South Everett Park and Ride should be a viable alternative.</p> <p>Additionally I'm concerned that when the light link rail stations are finally constructed that there may not be enough parking so this should be carefully considered as well.</p>
SNOHOMISH COUNTY	<p>Plans to have a more comprehensive lite rail system for the whole puget sound area should be outlined. For the length of time that the proposal is outlining, it doesn't seem that there is a comprehensive plan for lite rail. The plan seems to be limited.</p>
SNOHOMISH COUNTY	<p>What is really needed is direct light rail from Everett to Seattle with Stops at Everett , 112th freeway station 164th st, Lynnwood P/R , Mountlake terrace, 175th, 130th, Northgate, then connect up with the light rail in U W</p>
SNOHOMISH COUNTY	<p>Light rail to Mountlake Terrace transit center en route to Lynnwood</p>
SNOHOMISH COUNTY	<p>Rail/subway between Bothell and Kirkland, Bellevue, and Redmond.</p>
SNOHOMISH COUNTY	<p>None of the specific proposed projects are likely to benefit me at all. Please consider improving transit along I-5 corridor north, Everett to Seattle/University of Washington.</p>
SNOHOMISH COUNTY	<p>Marysville to Seattle (I-5) needs a direct rapid transit corridor. Everett is always jammed up on I-5 both directions. Marysville and Arlington have the space for a transit station and parking for those who must travel to Seattle. This will alleviate the I-5 traffic from Everett (Hwy2) to Seattle. We are 30 years late in getting this system of non-car networks established. I believe in paying for useful non-car transportation now because it will only cost more later and ultimately it will be required.</p>
SNOHOMISH COUNTY	<p>Please add a few more buses to the 532/535 routes. I've been riding it for years, and almost daily it is standing room only during the morning and evening. I think everybody deserves a seat during their commute to work.</p>
SNOHOMISH COUNTY	<p>North end traffic needs much deeper study. Growth in the region north and east of Everett is bottlenecked and unrepresented in any of the plans for the next 25 years. Ridership via Sounder from Everett to Seattle would be much greater if there were a north (e.g. Broad St.) station in Seattle.</p>
SNOHOMISH COUNTY	<p>Unless the plan is to go to north Everett within 15 years--I will vote no, this is your problem not mind</p>
SNOHOMISH COUNTY	<p>I just want to be able to travel from Everett easier. I can get to downtown Seattle at almost any time of day with no problem. Bellevue is another story. It's hard to find a bus that will get me from Everett to Bellevue unless I'm on a very specific schedule. Often it unfortunately makes more sense to bus to Seattle, and then from Seattle to Bellevue, because that is my only option.</p>
SNOHOMISH COUNTY	<p>As a senior, that does not drive, I rely on mass tran to get around. I lived in the Bay area of San Francisco, when they were building BART... one of the smartest things a community could have done... I will not be around to see this project finished, but, I wish you well, and good luck. If a area need this, it's this one..</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	I believe that ash way freeway ramp should be extended to south Everett station or be rebuilt like Mountlake terrace station and sounder should be extremely extend from Arlington to Seattle with stops in Marysville,Lynnwood now to ease the commute from Seattle to Everett and beyond
SNOHOMISH COUNTY	Rail service between Everett and Seattle could be boosted much faster by expanding the Sounder to more than just commuters. Add a train going into and out of Seattle on Friday and Saturday evenings.
SNOHOMISH COUNTY	Everett should be the priority for light and commuter rail.
SNOHOMISH COUNTY	I would like to see if studies have been done to make sure the capacity of this system will be sufficient for the population in 25 years. I don't it to end up like the BART system and be massively overcapacity by the time it is finished. I also think that light rail should have the right of way at all times and be built whichever route is most efficient and cheap. The Lynwood to Everett line should go straight down i5 it costs too much to build it to Boeing.
SNOHOMISH COUNTY	I understand that you can't please everybody at all times. I propose that rather than trying to please all those factions, that we think strategically by focusing on building the backbone of the light rail infrastructure, rather than making it a specialized route (as mapped above). I propose that we create a capitalistic focus to this light-rail which would speed up the construction of the light-rail considerably and at a vastly lower cost. My proposal is this, create the "Triangle" from Seattle - Everett - Renton, utilizing the i5 and 405 route. Use the Park and Ride every 5 miles as the stopping point, the infrastructure already exists for that. Now, rather than making specialized off-turns into the cities, why not allow the cities to create their own "bus" system or even "light rail" system that links into the backbone of the Puget-Sound Light Rail system. Each city can invest up to as much as they want within their own location with whatever service they feel serves them the best. It's a win-win, since the cities can start building their own infrastructure and link into the main triangle, cutting down the time for the system to go fully onboard. The revenue for the main road would belong to the state, whereas the revenue for the linkages would go to the supporting service for however how much they wish. Sometimes it's the simplest approach that works the best and is the most logic. You can extend the Triangle to include cities downward of Seattle (i.e. Tacoma) and cities northward of Everett (Bellingham) or cities eastward of Renton (Kent, etc. ) as phase 2.
SNOHOMISH COUNTY	Please just get it done
SNOHOMISH COUNTY	Expand the capacity of existing park 'n ride lots. You want people to use mass transit but when lots are full before 7:00am weekdays, they are being forced NOT to use mass transit.
SNOHOMISH COUNTY	Light rail from Everett to Seattle and Everett to Bellevue.
SNOHOMISH COUNTY	North Sounder train service was reduced a year or two ago, so that some trips are made with only 2 passenger cars. As ridership has increased, the cars have become so crowded that some riders stand for the entire trip. Please restore the 3rd car.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	I'd like to see more progress in my lifetime. This timeline is too short to address traffic issues now. This plan focuses only on increasing supply. Beginning economics students know that reducing demand is not only more cost effective, but much quicker to make a difference. This plan should include Transportation Demand Management (TDM) similar to programs in cities like London. It makes an immediate difference and generates revenues immediately. What about demand?!
SNOHOMISH COUNTY	Totally support the plans as necessary. Am not entirely in agreement with the funding. Am ok with some increase in property taxes , but would actually prefer shifting more to sales taxes to spread the financial burden more fairly among ALL users.
SNOHOMISH COUNTY	Light rail all around the I-5 and I-405 corridor should be top priority. Expand shoulders and allow buses to ride on the shoulder and be done with that. No more resources on buses which are stuck in the same traffic mess as everyone else. Put all other spending on fast and dedicated light rail lines which basically follow both I-5 AND I-405. With the continued growth of Bellevue, Kirkland, Bothell, Bothell UW, Issaquah, Renton, the eastside side needs a dedicated light rail line. Of course it should also be able to connect to the I-5 line and go north to Everett and Marysville and south to the airport and beyond. And there MUST be light rail crossing over the 520 bridge into the Denny Way/Seattle Center area. Can't even believe we are paying for a new bridge and a rail line across it is not shown!
SNOHOMISH COUNTY	Where was the Lynnwood to Seattle light rail in the plan? That was on the books ages ago. Why is the Northeast side shafted again with no rail, let alone no extra lanes to accommodate something like BRT? And are P&Rs going to be expanded? Everything is at capacity past 7AM!
SNOHOMISH COUNTY	Traffic through Everett and Marysville is as bad if not worse than Seattle. It is time to extend rail service into Marysville and at least north to Smokey Point. Rail Service should also be extended south to the state capital in Olympia. Route timings also need to be coordinated so people in Everett can take trains to Tacoma or Olympia and back the same day!!!!
SNOHOMISH COUNTY	Light rail should go from Tacoma to Everett.
SNOHOMISH COUNTY	Everett, should not be 25 years it should be no more than 12.
SNOHOMISH COUNTY	There has to be parking available at stations if you want people to use the service, particularly in the suburban areas.
SNOHOMISH COUNTY	Increased access to rapid transit via buses thru neighborhoods. Pay for buses thru taxes, not individual fares.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Snohomish County

<p>SNOHOMISH COUNTY</p>	<p>Can we have a 532 bus from Everett that is truly an express? The way you have it now, we have to take the slowest lanes all the way down from south Everett until after Canyon Park and have to weave through traffic and spend long wait times at backed up stop lights and have five stops, to say nothing about standing room only and even that is packed. With the 510, once it leaves Everett it doesn't stop again until Seattle and is quite efficient. Can we have something like that to Bellevue where it doesn't stop between Everett and Bellevue? The way you have it my commute takes an hour and twenty minutes each way on the bus. If I drive it takes me 37 minutes. Your consideration of making a more efficient commute that would attract more people as it is more efficient would be much appreciated.</p> <p>If you need something that makes the milk run like the 532 does, then keep that and give us an additional route that is a true express.</p> <p>Give Everett higher priority. Make things efficient enough that we want to take the bus or train. When it takes 2-3 times longer than driving, there is no motivation to take public transit.</p> <p>Increase parking. Several parking lots (e.g., S. Everett P&amp;R, Ash Way, and Lynnwood Transit Center, and Mukilteo Train Station) all totally fill up by 6 AM - nowhere for people to park so either you have to leave super early in order to get a spot or drive or go over 20 minutes further north just to get a spot to park to bus south.</p> <p>Have busses from Everett to South Seattle like the ones do from Lynnwood.</p> <p>Have busses that run throughout the day between Bellevue and Everett.</p> <p>Have trains that are more efficient and more reliable - they are forever on a moratorium from a mudslide. I'm guaranteed over an hour ride on them whereas the 510 bus in good traffic might take me 40 minutes or so. No reason to ride the train if I have to keep taking the bus or if it takes longer.</p> <p>Give covered standing areas at places like S. Everett P &amp; R, Eastmont, Ash Way. We get drenched waiting on busses.</p> <p>Sound Transit should have real time bus tracking so we can know when our bus is on time or delayed or when another bus is right behind the first one and how long until the next one.</p> <p>Ash Way needs northbound access to/from the HOV lanes. Close to 10 minutes are lost each way every day just by having to exit on the right.</p> <p>Give HOV access to south bound 405 up in Lynnwood for busses.</p>
<p>SNOHOMISH COUNTY</p>	<p>Everett needs to be a higher priority. By the time you get to the Boeing portion it might not exist anymore. Putting a line in the next couple years might be a determining factor for their committee.</p>
<p>SNOHOMISH COUNTY</p>	<p>There is an urgent need to increase the parking capacity at Canyon Park and ride bus station at Exit 26 in Bothell. That is where the traffic congestion starts building up. if there is space to park at Park and ride, I would take the bus and avoid all the dealys or pay toll in fast lane which is sometimes moving at 10 miles / hr speed. Seattle has to improve dramatically in order for this place to be liveable.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	You leave out west side transport to south snohomish county which is the fastest growing population in the region for the past five years. 25 years for light rail projects to Everett is unrealistic.
SNOHOMISH COUNTY	<p>I have been riding on the Sounder North many times. The trains have been pretty full most of the times between Edmonds and Seattle. I can tell how many more riders have used the Sounder North in the past year, to the point that some of us had to stand the entire time. I also noticed that later trains in the AM and earlier trains in the PM tend to be way more full than the earlier trains in the AM and later trains in the PM. For this reason, additional run of train or two should be added in the later portion of the AM rush hour (7:45-9am) and earlier portion of the PM rush hour (3-4pm). Sounder North (and Sounder South) would have been much more useful if you can add two stations (around Belltown and somewhere near Ballard). Since more people get more destinations they want to go, ridership will go up significantly.</p> <p>Ballard to UW (or Seattle Children's Hospital) line must be built ASAP. It is obvious the 45th street corridor always exceed the demand (both on the road and on the # 44 buses). This is more important than the Seattle to Ballard line. Ballard residents would hardly notice any additional time if they ride the train downtown via U of W. At the same time, this line would serve many people along the way between Ballard and Seattle Children's Hospital. This is win-win situation for everyone. I know this would leave residents from Lower Queen Anne, Belltown, and South Lake Union without light rail, but this can be easily fixed if you build a line from Belltown through Capitol Hill area.</p> <p>All rail lines must be graded separated! No exception.</p>
SNOHOMISH COUNTY	Everett to Renton light rail
SNOHOMISH COUNTY	Sounder focus is on the south end. Trains from the north are packed with people standing on the trip. Why can't additional cars and trips be added to the route? Bus loading in the tunnel slows up light rail. Something needs to be done to put a time limit on loading buses. No additional money should be spent to give bicycles access until they start paying for the roads.
SNOHOMISH COUNTY	<p>Need many more Sounder trains from Everett to Seattle. 4 trains south in morning and 4 north in evenings, weekdays is too few. Increased ridership is based on a regular 7 day per week schedule that runs throughout the day. Improve Sounder right of way so mudslides do not bring system to standstill.</p> <p>Expand Mukilteo train station commuter parking.</p>
SNOHOMISH COUNTY	Lets move the region forward and add the rapid transportation of light rail and buses. The Puget Sound needs this to go well.
SNOHOMISH COUNTY	Support to South Snohomish County and Everett should not focus exclusively on Boeing, nor should it be scheduled as late as you have it in the plan.
SNOHOMISH COUNTY	It's crazy to go down the I-5 corridor. Why aren't you going down 99?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	Extra large parking facilities at the new light rail stations
SNOHOMISH COUNTY	Ballard has residents who will use increased transit options and many northend communities are accustomed to travelling to Seattle via Ballard, so additional transit means are necessary.  I am in full support of a transit station to be located at 130th and again for the same reasons as above. Transit users, drivers, bicyclists, and pedestrians are in full demand of this location and it was expected to be fully funded.
SNOHOMISH COUNTY	Rail on the Eastside Rail Corridor. Votes will be lost if the eastside sub-area doesn't have enough rail options.
SNOHOMISH COUNTY	Improvements for bicycling and pedestrians should be given immediate priority.
SNOHOMISH COUNTY	There needs to be a Light Rail connected from Mukilteo (near Harbour Pointe Speedway and Harbour Pointe Boulevard) to Downtown Seattle VIA I-5.
SNOHOMISH COUNTY	You need to work on feeder systems. Small, shuttle-like service to get people from the outlying areas to the transit hubs. Right now it would take me longer to drive to a Sounder train station than it would to just drive myself downtown, for example. That means these projects only help the people who happen to live close to the hubs.
SNOHOMISH COUNTY	Link rail should be extended to serve Bothell, Woodenville via Redmond
SNOHOMISH COUNTY	The study for extending light rail from Everett Station to EvCC should be converted to plan included in ST3. Specifically, consideration for an 'Tacoma Link-like streetcar' at grade should be installed on an earlier schedule than the extension of light rail to Everett Station. The Broadway thoroughfare is currently an important link between (2) major growth subareas of Everett with current zoning for mixed use high density retail and residential facilities and both a 2 year and 4 year university campus at the north end. Please include provisions for extension to Marysville Smokey Point.
SNOHOMISH COUNTY	I would like to see the proposed 220th street light rail station in Mountlake Terrace added to the plan
SNOHOMISH COUNTY	Need a big plan to divert the gridlock on Bothell Everett HWY and all the side streets in Bothell. We need more roads & lanes connecting Lynnwoos, Bothell, Kirkland, Woodinville & Redmond! That's the economic lifeline for Seattle Eastside!!
SNOHOMISH COUNTY	No light rail between Everett and Bellevue? You've got to be kidding me. There's a huge development going in at Totem Lake and the northeast section of the metro area will experience the most growth. The shoulder idea sounds good at first but it will still be a hassle getting OVER major intersections. Don't even think about taking us around them. Ditch the sales tax option .... make up for it by increasing the tag fees even more. Driving should be seen as a luxury.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	<p>The Snohomish County part of the ST3 plan shows that you are listening to politicians instead of doing the homework needed to understand our transportation network and the ultimate best buildout. Build the 220th Station!!!!!!!!!!!!!! NOW!!!!!!</p> <p>First, You should not spend public money on another free parking space anywhere in your system. Until you provide free housing, free medical care and free transit fares, there is absolutely no justification to spend public funds to park private vehicles for free. You can let the private market supply parking if there is demand for it. If the ST3 plan includes free parking, you will be sued for violating the executive order on environmental justice by neglecting the needs of your base riders that don't own vehicles. Snohomish County doesn't need more parking lots. We need protected bike lanes and sidewalks and better transit frequencies to connect.</p> <p>Sounder North has a captive market coming across the ferries, but only one real destination. We need a station on the North end of Downtown to eliminate out of direction travel and reduce overall travel time. You could reopen the Bond St. Station on the West side of Downtown Everett with a very small budget. BNSF is using the depot building but you don't need that. The platform is good, and the trains are going slow coming out of the tunnel, the neighborhood is redeveloping with more TOD potential. All a station would need is TVM's and an ADA ramp. This is low hanging fruit. Pick it. Next, SoundMove which passed in the 90's promised to look at Sounder stations in Ballard and Interbay. These places are scheduled to get billions of dollars in LRT investments, but you don't even stop the 4 trips passing through Ballard today to let people get on/off. If you can't do the easy things, I won't believe you're serious about doing hard things. Those stations would be cheap, could provide better attractiveness for Sounder and generate better performance, and might temporarily provide some relief to commuters in Ballard going downtown. You should also enter talks with Amtrak and BNSF and WSDOT about merging Sounder / Cascade service N of Seattle to be a regional rail system with future extensions of trips to Bellingham and/or Wenatchee.</p> <p>Other Priorities for SnoCo - You need better frequencies on regional express buses and service to Bellevue on weekends. Put the 513's through S. Everett Freeway Station. Run express buses to Boeing - Seriously, I can't believe you're talking about diverting the main rail line on I-5 to go to Boeing, but it's not even worth sending your buses there today? Come on. That's ridiculous, either there's a market or not. If there is, then start serving it today. Speaking of which, how are you building LRT from Northgate to Lynnwood but you don't even operate bus service between them. No one does. You can immediately extend the 535 to serve Mountlake Terrace, 145th and Northgate. Build the northside ramps at Ash Way. Restore the freeway station that was dismantled at Swamp Creek. Serve Mariner Park and Ride with a center station like MLT. and extend some 522's to Monroe, maybe hourly as a partnership with CT.</p>
SNOHOMISH COUNTY	I would like to see additional transportation, preferably light rail, on the cross Kirkland corridor in Kirkland!!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

Subarea	Additional Feedback - Project(s) should be added in the ST3 final plan
NORTH KING COUNTY	The area around Lakeridge, Skyway, and Bryn Mawr is poorly served by transit to downtown Seattle. A rapidride line through this area should be added in addition to a transitional light rail stop between Rainier Beach and Tukwila. Parking is also needed around the Rainier Beach light rail station. This could be a stopgap measure until the neighborhoods just south of City of Seattle limits are better served. At a minimum, there should be express lines that travel through these neighborhoods to downtown Seattle and elsewhere during rush hour periods. Increasing transit services to this more racially diverse area will also serve to increase social justice in these neighborhoods rather than treating them as drive through neighborhoods.
NORTH KING COUNTY	It is inconceivable that places people actually live NOW are not be connected in ST3. Ballard to UW is a REQUIRED project for ST3, not for study. West Seattle light rail should be extended to Burien/SeaTac Airport. The idea that Issaquah would get a light rail connection prior to connecting neighborhoods in Seattle, where people who are living environmentally responsible urban lives and who depend on transit as their only way to get around, is inappropriate for regional transit spending.
NORTH KING COUNTY	Ballard to uw!
NORTH KING COUNTY	<p>(1) A light rail line between Seattle's densest neighborhoods of South Lake Union, Capitol Hill, and the Central District should be a top priority. Traffic and transit move terribly through those areas and Seattle's transit system needs more cross town access. It would also provide light rail access to parts of First Hill and the Central District, which are not currently planned to receive light rail.</p> <p>(2) A light rail line from Ballard to University of Washington. ST3 includes a study of this project, but it should be a project. This E-W corridor is one of the most highly traveled corridors and would greatly benefit from light rail. Also, it would connect Fremont, Wallingford, Phinney, and Green Lake to the light rail system.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>As a Seattlite, I see no reason to vote for a plan like this despite our desperately urgent need for rapid mass transit. This plan is absurdly suburb-biased, connecting nearly every suburb to downtown Seattle while leaving many very dense Seattle neighborhoods stranded. The only thing this plan offers Seattle are two poor, ineffectual solutions to extremely urgent problems delivered nearly a quarter century down the line.</p> <p>At-grade through Interbay, crossing a drawbridge, for the downtown-to-Ballard line is completely unacceptable. I will not support any plan that is not completely grade-separated within the city. Ideally all lines should be tunnels in the city and elevated elsewhere.</p> <p>An east-west line connecting Ballard to the U-District (and ideally onto the U-Village/Children's Hospital area) must be included, not just as a study. It would seem best to have this line be a continuation of the downtown-Ballard line. A cross-town line is sorely lacking from ST3, and this line is the most urgent of those.</p> <p>Belltown, one of the densest residential neighborhoods in Seattle, is also mysteriously left out of ST3. I understand a choice had to be made between SLU and Belltown along the Ballard line, but leaving out Belltown of all plans is a huge oversight. This is where another east-west subway line following the metro 8 route would be extremely useful. An alternative that provides perhaps a temporary solution would be a Belltown streetcar, similar to the First Hill streetcar built as consolation when the First Hill subway station was canceled.</p> <p>Finally, the timeline for ST3 is backwards. The most urgently needed line (downtown-to-Ballard) is one of the last deliverables, 22 years down the line. This doesn't make any sense. I understand that this line poses a very complex build with a new tunnel under downtown, but that in no way accounts for 22 years! This line must be priority number 1.</p>
NORTH KING COUNTY	<p>Ballard-UW line should be added.</p> <p>Metro 8 Line (SLU-Capitol Hill) should be added.</p> <p>Speed up light rail implementation with Seattle City limits. It is the densest area in the light rail network with highest ridership opportunities (and fare collection). It should be given priority over far flung suburbs.</p>
NORTH KING COUNTY	<p>We need light rail from West Seattle Junction down 35th and connecting to White Center.</p>
NORTH KING COUNTY	<p>- timeline is terrible; one "early" win for Seattle that might improve chances are to make ship canal bridge not "rail only" but also bike and pedestrian (and maybe even BRT?) and finish it early - within 5 years (even though light rail is still decades away). At least it would give seattlites something early out of this mess....</p> <p>-I know completing the "spine" seems to be a foregone conclusion - but it really is cost ineffective. Most benefits will be seen by extension to Lynnwood and federal way...</p>
NORTH KING COUNTY	<p>Ballard to UW light rail.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	"It's time for us to build light rail ... to dense neighborhoods like Ballard and West Seattle." The survey hits it right on the head here: dense neighborhoods should be served by light rail or some form of high-capacity transit. Sound Transit needs to add the Metro 8 Subway proposal to, at a bare minimum, the same to-be-evaluated status as Ballard/UW light rail. There is a huge hole on the map of areas to be studied, the Central Area core of Seattle, and it needs to be filled.
NORTH KING COUNTY	<p>Seattle consistently has issues with mass transit getting slowed down in east-west corridors. Since there are few east-west highways, I would prefer to see as much street parking on east-west transit corridors converted to bus only lanes as possible. Ideally I would prefer light rail from Ballard to Husky Stadium, but in the absence of that, bus routes could serve a similar need if only there didn't get stuck in traffic all the time. In general, more bus only lanes will only increase the reliability of the system. More reliable routes means that service can be scheduled more frequently without buses bunching up. Ideally I would like to see most intra-city bus frequency be 7-15 minutes.</p> <p>Parking should only be built if it pays for itself. Public funds need to go to public use, and driving is already too highly subsidized. Any parking structures that are built in ST3 should be pay stalls that are priced to pay off the costs of building the structure and maintaining it. Building parking should be a priority lower than building affordable housing near transit options.</p> <p>The time lines are very disappointing. Most people voting on this will be retired or dead before some of the much needed improvements come online. I applaud Sound Transit for thinking big with regard to the lines, but having the time lines so negatively impacted by funding is disappointing. I would support more taxes, higher car tabs, and more spending authority for Sound Transit so that these improvements can be made faster.</p>
NORTH KING COUNTY	This plan punts on the city of Seattle, where transit is needed most. It's ridiculous how long it will take to get to Ballard from downtown (22 years!) and there's no plan for a "Metro 8 subway", Ballard-UW line, or inclusion of the extremely dense Belltown and First Hill neighborhoods. All of this so light rail can run through very low density suburban areas. Build a Seattle subway system, not a regional commuter light rail. Build housing densely in Seattle to use the Seattle subway system. I won't vote for subsidies to low-density suburbs.
NORTH KING COUNTY	Metro 8 Subway line
NORTH KING COUNTY	East west travel between Ballard and the UW!
NORTH KING COUNTY	Ballard-UW moved up in priority, above DT-West Seattle. Metro 8 subway studied.  NO AT GRADE OPTIONS IN SEATTLE AT ALL!
NORTH KING COUNTY	Love where ST3 is headed. Please do more of this and less concern about adding on/off ramps to interstate.
NORTH KING COUNTY	UW -> Ballard

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	I would like to see progress on light rail across the 520 bridge to decrease East-West traffic.
NORTH KING COUNTY	<p>Ballard to UW is a great option</p> <p>Metro 8 is a great option.</p> <p>Graham St station needs to be completed.</p> <p>Grade separating Ballard through Interbay is essential. A bascule bridge prone to boat disruption is unacceptable, especially if that bridge doesn't even accommodate cyclists and pedestrians.</p> <p>Ballard should come before West Seattle.</p> <p>New downtown tunnel should hit First Hill.</p> <p>Seattle proper needs more grade separated transit within itself than outlying areas need it to get into Seattle proper. Commuters use transit twice a day and then go home to their car-based suburban lifestyle. Residents of Seattle proper are stuck with the current inadequate system to handle all their needs for <u>20</u> more years?!_ for choosing to not even own a car today? That is insulting. We need the state to step up and support mass transit instead of fighting us every step of the way. We need to not be reliant on people who don't even live here telling us what we can do to improve our city. We need to figure out how to better fund and expedite the process so we're not old and dead by the time this stuff gets built.</p> <p>I can't read the options from the drop down menu for this text field.</p>
NORTH KING COUNTY	<p>Sound Transit is doing a great job, but this plan isn't nearly aggressive enough. BRT can't bypass traffic, which makes it at best a stopgap mitigation. We need to explore every opportunity to move up completion dates for grade-separated rail, and to ensure that neighborhoods that are employment centers get connected fast. The Sound Transit rail line designs seem to predate the rapid expansion of South Lake Union, and station coverage there is very weak, even in ST3. There's also a missing link between Ballard and UW that needs to get scheduled and built as quickly as possible. The situation is better on the eastside, but even then we're looking at another ten years before Overlake gets fully connected.</p> <p>Bite the bullet, spend the money, and let's have a surge of construction to finish everything sooner - it's the only way we can fix this traffic crisis and overcome 20-30 years of underinvestment in the core of Seattle. Everyone's feeling the pain, and this is the one time we might actually be able to get a package passed.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Not enough projects that address traffic problems within the city itself; where roads tend to be narrower and communities tend to be more dense (for example, the Fremont and Wallingford areas).
NORTH KING COUNTY	The Ballard to UW line is essential for ST3. North-South transit in Seattle is already fairly quick, thanks to highways and rapid ride buses. East-West travel is extremely slow and congested, and will only get worse as Ballard grows rapidly.
NORTH KING COUNTY	SOUTH LAKE UNION! BALLARD! BALLARD TO FREMONT TO WALLINGFORD TO UW
NORTH KING COUNTY	Better support for Seattle local infill stations, namely Metro 8 subway ideas. The central district has been devoid of reliable transportation options and has a high density of potential ridership.  Also, The timeline for implementation of ST3 is too long and unacceptable. Seattle needs additional infrastructure as soon as possible, but an "anything is better than nothing" plan will not be passed. Please set up a transportation system, getting it right the first time.
NORTH KING COUNTY	1) An East-West line north of the ship canal that at least includes Ballard-UW must be added as a contingency project for me to support this plan.  2) At-grade to Ballard is unacceptable. It is slower and less reliable. Again - you can expect a no vote from myself and many other Seattleites if you go forward with at-grade.  3) Other potential contingency lines that would be "nice-to-haves" are a West Seattle to Burien extension, as well as an extension of the Ballard line to 15th Ave NW and 85th St.  # 1 and #2 are dealbreakers for me if they don't happen, and I know many others who feel the same way. Waiting 20 - 25 years and spending \$50 billion, the draft plan does not provide enough to Seattle. Addressing points #1 and #2 will fix that. (And #3 would be great, if possible, but I'd vote for the plan as long as #1 and #2 are addressed.
NORTH KING COUNTY	Seattle needs a system built out much quicker than proposed. Ballard to UW needs to be included.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>520 light rail would do more good than anything proposed. We need to connect the core dense regions (downtown Bellevue and downtown Seattle). Light rail across i90 still leaves the UDistrict, Ballard, Wallingford, etc completely cut off from the rapidly densifying downtown core in Bellevue.</p> <p>Furthermore light rail as realized by ST is exceedingly mediocre. Vancouver's skytrain is better in every metric including cost. That is not going to be acceptable to suburban voters (hey! pay a lot of money for this thing that's worse than the system in Vancouver!)</p> <p>Good luck, but the timelines you're proposing and the costs are simply very difficult to defend. You have to be as good as Vancouver in <i>*some*</i> way, otherwise your plans become somewhat indefensible.</p>
NORTH KING COUNTY	<p>Having a subway tunnel for the Metro 8 route underneath Denny I think would dramatically improve East-West connections for the network, along with a Ballard to UW route. I also strongly advocate grade separated rail for the entire Downtown-Ballard route to improve consistency with that route. Finally, I think that the Belltown walkshed should be considered when placing the Denny/SLU subway stations, as Belltown has and will continue to see dramatic growth in the coming years.</p>
NORTH KING COUNTY	<p>the metro 8 line MUST at least be studied</p>
NORTH KING COUNTY	<p>Ballard to UW needs to be added to this plan. Ballard needs to be grade separated. The project timelines for Seattle are unacceptable.</p>
NORTH KING COUNTY	<p>There needs to be lightrail connecting the Eastside (Renton to Bellevue). I405 is already a bottle neck and allowing buses to use the shoulder would create additional issues if a car is disabled and would increase traffic. Because of housing a lot of people are moving to Southeast King County and utilizing Renton as a major transit hub (bus, lightrail, and regional rail) would be the most logical plan.</p>
NORTH KING COUNTY	<p>The 130th Street Station should be built as soon as possible, not "provisionally". Sound Transit should focus on where our dollars will have the most benefit and not try to spread projects around the whole region based on politics. If you threw out the subarea equity thing and just looked at ridership projections and costs, you'd have a very different list of projects proposed -- perhaps a list that would be useful!</p>
NORTH KING COUNTY	<p>East West travel from Ballard to U-District either via rail or Express Bus</p>
NORTH KING COUNTY	<p>Ballard to UW is a huge missing part of the plan. The entire north end of seattle is not served by ST3 properly.</p>
NORTH KING COUNTY	<p>Light rail should penetrate further south into West Seattle toward the Vashon Ferry, White Center and Burien, sooner rather than later.</p>
NORTH KING COUNTY	<p>Add a line that connects Ballard to the University District with stops in Fremont and Wallingford.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>Ballard to UW HCT must be in this plan. It would be a more cost effective project with higher ridership than most of the proposed projects. West Seattle to downtown as planned would require 2 extra transfers for most riders making it slower than existing bus service. That project makes no sense as planned.</p> <p>I would also like to see all day Sounder service rather than more parking garages. Transit service in most of South King County East of Link needs to vastly improve, not just for traditional commuters.</p>
NORTH KING COUNTY	<p>Ballard to UW must be a part of the plan. The 44 bus from Ballard to UW takes nearly 1 hour and is standing room only - east/west corridor between Ballard and UW was designed for horses. It's a nightmare now.</p> <p>Also, we need light rail to Ballard sooner.</p>
NORTH KING COUNTY	Move faster! We can't wait 22 years for light rail to Ballard or 17 years for West Seattle!!
NORTH KING COUNTY	Connect Ballard to UW!
NORTH KING COUNTY	I think more buses should run to Discovery Park.
NORTH KING COUNTY	Seattle generates too much revenue to the state and surrounding counties to be given very little transit very late.
NORTH KING COUNTY	We need a Ballard-UW line, possibly as an extension of the Ballard-DT and we need it sooner. I am seriously considering voting no unless the timeline is moved up to 15 years for Ballard and Ballard-UW is not considered. If that comes at the cost of West Seattle, so be it. West Seattle is less deserving of light rail than many other neighborhoods due to its low density.
NORTH KING COUNTY	More space for bicycles on light rail train cars, and on buses serving the region, please!
NORTH KING COUNTY	There is little connection between UW and Ballard, and there are many people who commute between the two. Burke-Gillman is great for many, but it also gets extremely crowded and is EXTREMELY dark at night. Also, Greenlake and Greenwood are very ignored in this plan.
NORTH KING COUNTY	Ballard to UW must be included in this plan. Seattle desperately needs these lines now, not 20+ years from now, and excluding critical cross-town corridors appears to foreclose the possibility of them being completed in our lifetimes. With such a big package, we can't leave out integral pieces.
NORTH KING COUNTY	<p>We should plan to construct UW&lt;&gt;Ballard line as part of ST3, not just study it. This important cross-town link would open so many otherwise isolated population centers up throughout the region and make Seattle into a truly transit accessible city.</p> <p>Also, light rail should be done separated grade or not at all. Mixing with car and boat traffic in the interbay/Ballard corridor is a recipe for a sub-par service and tepid adoption rates.</p>
NORTH KING COUNTY	Improvements to Rapid Ride E bus route - this route is already overloaded during peak periods

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>Light rail from Ballard to UW should be built, not studied. To me, given the time frame for Seattle rail and the cost, I am likely to vote no (and I am a big supporter of light rail having grown up in Washington, DC, where there is real transit). The only way I could vote for ST3 is if Ballard (which is way more dense than Tacoma, Everett, or West Seattle) is given light rail by ST building Ballard to UW first (like within 10-15 years). Every transit blog from Seattle Transit Blog, reddit, and the Urbanist has panned the ST3 draft on Seattle projects. There is a strong likelihood that the draft as is does not get enough North King support to pass ST3 (it may even lose in Seattle) . If you build Ballard to UW, this is more likely to pass in North King.</p> <p>To reward these other neighborhoods first which are not dense nor have a good return on investment, but politically connected, is counter intuitive. Did ST get an independent consultant to plan the light rail system proposals -- or did they just listen to the politicians? This draft suggests the latter. (e.g., Going at grade in Interbay, which is flood prone?)</p>
NORTH KING COUNTY	<p>We need complete bike connections (safe, separated) between neighborhoods like Ballard and West Seattle, downtown, and out to the east side (Bellevue, Redmond). A major deterrent for me to bicycle is getting from West Seattle to downtown Seattle without feeling like I'm risking life and limb. Sharing the road with enormous trucks and speeding cars through SODO is harrowing. You'll never get people of all ages and abilities bicycling (and leaving their cars at home) without providing complete, connected, safe bicycle routes.</p>
NORTH KING COUNTY	<p>There needs to be something to alleviate the #8 Route. This should be a metro route 8 grade separated rail line from Belltown to South Lake Union/Denny to Capitol Hill to the Central District/23rd corridor.</p>
NORTH KING COUNTY	<p>I feel it's more important to build out transit in neighborhoods where people will genuinely be able to make a choice to go car-free. This means developing a real, integrated, dense network that focuses on TOD and pedestrian and bike access, and 24 hour transit service. I think this means concentrating a system on dense areas of Seattle, instead of developing ridiculously expensive systems to serve commuters who will likely continue to live lifestyles that depend on the automobile. BRT and rail on existing heavy rail lines are better options for suburban locations. Additionally, ST has contributed very little to TOD in areas that currently have light rail, like Mt. Baker. Improvements need to be made there, or ST property needs to be sold or used as public space, instead of being surrounded by ugly chain link fences.</p>
NORTH KING COUNTY	<p>Ballard to UW (and other central East-West routes, specifically crossing the new 520 bridge) are far more important than anything mentioned here.</p>
NORTH KING COUNTY	<p>A light rail line from ballard to magnuson park is needed. A light rail line from ballard across through Northgate and out through Lake City to Kenmore and Bothell would also be good. The law controlling fund raising for transit needs to be changed so we can put all of this on a faster schedule. I want to still be alive when the system is completed.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>-We _need_ a Ballard to UW tunnel line.</p> <p>-The timeline for Ballard and West Seattle to downtown needs to be accelerated. The current plan is too focused on the suburbs. 2+ decades is far too long to wait.</p>
NORTH KING COUNTY	<p>Ballard to UW line! Not crappy buses that get stuck in traffic!</p> <p>Also, it's probably outside the scope of this, but more heavily integrating the Pronto Bike Share program for the "final mile" would be great.</p>
NORTH KING COUNTY	<p>The plan is missing the mark. Light rail should focus on the core of the city. There should be a Ballard to UDist line as well as SLU Light rail. Everett to Seattle to Tacoma should be serviced by commuter rail. It would take too long to commute to Seattle from Tacoma by light rail.</p> <p>Parking at rail stations shouldn't be a focus. We need to get people out of their cars and focus on fast buses that can easily get people to the rail stations. The eastside should have a comprehensive rail also. I like the Issaquah to Kirkland run.</p> <p>At grade rail isn't a good option either. I'm not looking forward to trying to cross MLK in Seattle when trains are coming every 6 minutes in each direction. The trains already foul up the timed lights often at every 10 to 15 minutes. Let's build it right the first time; either elevated or tunnel. I know we don't like to tunnel in the poor area though.</p> <p>Escalators in both directions at all stations should be included.</p> <p>Simple education on escalator etiquette would be nice too... stand on the right.</p> <p>It's not a bad first draft, but we can do better!!</p>
NORTH KING COUNTY	<p>A short train link or a street car, or dedicated shuttle, should be run from Capital Hill stations to the Eastlake area. If you want those commuters from other places to be able to get to work, you need to provide easy links to the South Lake Union area INCLUDING FRED HUTCH AND SCCA, and the other businesses and residents along that corridor.</p>
NORTH KING COUNTY	<p>Add the [explicit] UW to Ballard line, we need some E-W grade separated transit options within the city. Lengthening the spine ensures there will be no available room to board the trains for residents of Seattle continuing to short us on viable grade separated transit options.</p>
NORTH KING COUNTY	<p>There should be a North end rail connection between 522 and Bothell for east/west traffic.</p>
NORTH KING COUNTY	<p>We need a better system to get around Seattle. Ballard potentially will have easy access to downtown, but people in Queen Anne, who live closer to the city spend more time in traffic due to slow buses stuck on city streets.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	It seems like this whole plan neglects the immense growth of tech in the Fremont neighborhood. I light rail is not planned for this neighborhood, then the companies currently moving to Fremont may choose to relocate. Or worse, all the rich techies will drive their cars to and from Fremont causing additional congestion on Fremont Bridge, Aurora Ave, and in the neighborhoods of Ballard, Wallingford, Queen Anne, Green Lake, and South Lake Union.
NORTH KING COUNTY	In order to be socially equitable and create a truly comprehensive system, we must increase focus on bringing light rail south from West Seattle to White Center and Burien. We also need light rail service that serves the Southcenter area, the largest shopping district in the state.
NORTH KING COUNTY	At-grade rail to Ballard isn't going to solve our access issues here, particularly with Expedia coming in to turn 15th Ave NW into a parking lot every morning. Please, if I'm going to have to wait until I'm retired for rail to Ballard, at least don't halfass it and keep my kids stuck in traffic the same way I'll be for the entirety of my working life.
NORTH KING COUNTY	1) More emphasis should be placed on capital projects in Seattle and the core of the region w.r.t. light rail. Specifically, ST3 should include something like the Metro8 Subway which would service Central District, Capitol Hill, South Lake Union, Belltown and Queen Anne. ST3 should also include a solution for Ballard to UW. I would much rather see that solved than Ballard to Downtown. 2) Most of the major capital intensive projects come online far too late. I do not care if ST has to float bonds on their own or backed by the state instead of the Feds, they should be borrowing money against expected sales tax revenues to get the major projects done sooner than later. 3) Wasting money on major parking projects that could be better spent on actual infrastructure is another negative of the current design. More and better mass transit to the locations will work better than parking at the locations.
NORTH KING COUNTY	The Number 8 route subway!!! Getting across town is a nightmare. we are making it easy to get in and out of the city but the UW and capitol hill station prove how popular getting around WITHIN the city would be. Let's have a bias toward encouraging further density.
NORTH KING COUNTY	University to Ballard Light Rail must be included for my vote.
NORTH KING COUNTY	Ballard to UW Light Rail.  Expedite construction of all pieces.
NORTH KING COUNTY	Seattle to Bellevue light rail

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>I was extremely disappointed that Sound Transit ignored the advice of the Seattle Subway organization and other knowledgeable transit advocates who have suggested more urban spacing lines connecting dense areas in Seattle to the light rail system. To increase ridership and connect more people to the system, a "Metro 8 subway line" is critical. This term has been used quite a bit to discuss an underground light rail line that would connect South Lake Union along Denny/John up to 23rd&amp;Madison, and then run south along 23rd (potentially to the Judkins Park station currently planned). A great discussion of this concept can be found here: <a href="https://www.theurbanist.org/2016/01/11/ballard-spur-and-metro-8-subway-serve-seattle-better-than-interbay-light-rail/">https://www.theurbanist.org/2016/01/11/ballard-spur-and-metro-8-subway-serve-seattle-better-than-interbay-light-rail/</a> . CONSTRUCTION of the Metro 8 subway line should be part of any 25 year plan for mass transit in the region, but at a minimum, there should be funds to STUDY it! It is mind boggling that Sound Transit has not embraced the Metro 8 line. The Metro 8 line would be far more cost-effective than many of the suburban connector lines, as it would require far shorter track to reach more people. We need a truly urban subway system that allows commuters from farther communities to move about Seattle without a car for our region to get to the next level. Moreover, the historically underserved Central District of Seattle continues to be left behind without a Metro 8 subway line. This is a dense community that is getting much denser and needs a connection to light rail. Seattle is the biggest source of growth in the region, and it needs to be served accordingly. The Judkins Park stop is not the solution to bring reliable transit to the Central District community. With the current plan, there is a huge area south of Madison and north of Dearborn that is a light rail no man's land, but is an ideal candidate for light rail.</p> <p>ST3 is a rare and grand opportunity to improve our transit needs, so we need to get it right. If the Metro 8 subway line is not even funded for study as part of this \$50B package, I will vote against it and encourage everyone I know to do the same. This plan is too important to settle for an inadequate package.</p>
<p>NORTH KING COUNTY</p>	<p>I can't speak for anyone living in other neighborhoods, but living up off Aurora and having to commute by the E bus has me saving for a car. I often have to commute home at around 1:30 to 2am, and fully expect that commute to be involved in my death somehow if I keep it up. Low income people living off Aurora between about 85th and about the northern city limit really need a light rail replacement of the E bus, with more frequent service, strict fare enforcement, and more security/surveillance at stops. This could somehow be an extension of the Ballard to Downtown proposal.</p>
<p>NORTH KING COUNTY</p>	<p>I realize that there is further investigation for a connection between UW Station and Ballard, but this is a critical route that is often clogged by traffic of 40th, 45th and 50th. There is really only one route bus 44 that connects the two and this bus is not reliable as it is stuck in traffic every day.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>These plans miss connecting the different areas of Seattle with each other. It is all about bringing in people from far away locations like Everett or Tacoma. While people in Queen Anne are required to take 2 to 3 buses just to go from Queen Anne to Capital Hill Or Ballard to Madison Park is another 2 to 3 buses and 60 + minutes. So everyone drives in the heart of city to get around because we don't have any other choice. I think these plans are missing key areas - specifically Queen Anne. Currently we have bus service to down town Seattle and that is it. With all the lakes and bridges around here it would be great to be able to catch a direct bus from Queen Anne to the U District. It takes me 2 buses to get from the top of Queen Anne to South Lake Union and 60+ minutes so I just drive there instead. I think these plans are not really addressing the traffic that exists within Seattle city limits - it is all about bringing in people from King County and beyond into Seattle. Until you can solve the transit issues for the residents of Seattle to get around Seattle this city will suffer.</p>
NORTH KING COUNTY	<p>I'm disappointed in the lack of focus on transportation within the city of Seattle. The better the access WITHIN city limits, the less likely anyone will need to use a car. I understand the need for people living further out of the city to be able to get into the city for their jobs and activities, which we should not ignore, but without a robust system within the city, those folks will still need to use cars or multiple transfers to get around our geographically difficult city. Please fund more studies on light rail connections within the city, along east-west corridors.</p>
NORTH KING COUNTY	<p>Building a Ballard-UW Spur should be included in this plan. Also, interurban lines like West Seattle-Downtown and Ballard-Downtown should be the FIRST things to be built! People need to be able to move about the city without cars, and urban residents are more accustomed to using mass transit versus suburban residents who don't use it daily as part of their culture.</p>
NORTH KING COUNTY	<p>You guys REALLY need to add a Ballard to UW line. That is a serious need right now. Transit is too focused on north/south movement.</p> <p>Also, the timeline is way too long. Way way too long. Especially the timeline for the ballard line. Seattle will be an entirely different city in 22 years. It needs to be cut down.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>We need a Ballard-UW line. Seattle doesn't have enough mechanisms to move people along the east-west corridor.</p> <p>We need more intra-city, grade separated light rail (tunneled or elevated). At grade just doesn't work--the seatac link takes 45 minutes to go from Westlake to Seatac, which can be done in 20 minutes by car. That means that given the choice, I always uber. Not at all sustainable or useful.</p> <p>The timelines are way too slow. A quarter century to achieve a mediocre benefit for urban dwellers. Yes we should get cars off the road. But suburban riders will come mostly from the immediate area around stations. People far from them won't change their behavior if they're too far from a station.</p> <p>The funding is regressive: vehicle and sales/use taxes cost the poor much more. Property taxes are better.</p>
NORTH KING COUNTY	<p>I strongly support a Ballard-to-UW line.</p> <p>It doesn't feel right to extend the line to less densely populated areas that will see much less use when there are still core, dense areas that are unserved. Projects should be prioritized more by projected rider-miles per taxpayer dollar.</p> <p>Would also love to see the timeline of Ballard-to-Downtown brought in. 22 years is an awfully long time.</p>
NORTH KING COUNTY	<p>Lake City has 30k residents, a high level of economic disparity, and high growth. This plan would leave our transit issues untouched for over 20 years while we fund more affluent and stable neighborhoods like Ballard. Light rail or BRT via Lake City Way would connect our Urban Village to the rest of the city.</p>
NORTH KING COUNTY	<p>It's inexcusable to leave the Ballard-UW line out of this iteration. In addition, with the downtown-Ballard line, the crossing should be underground, rather than on the bridge. Service interruptions from passing ships and sightseeing boats should not interrupt the transit service to a critical part of this city. Also, waiting for 2038 to extend to Ballard is unacceptable. This should be a higher priority project.</p>
NORTH KING COUNTY	<p>Ballard to UW is a needed connection.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>Please consider the Metro 8 subway and Ballard to UW (connecting to the existing line for access to downtown, and the line could have an option to go further east to U. Village/Sand Point). The 8 and 44 are both slow and overcrowded without any clear way to upgrade them to BRT. They need grade-separation, probably in the form of tunnels. The Ballard-West Seattle line in ST3 can be better served by less expensive BRT, as a bonus, Ballard-UW would get Fremont connected to rail as well. I agree with <a href="http://seattletransitblog.com/2015/11/30/an-alternative-for-st3-with-something-for-everyone/">http://seattletransitblog.com/2015/11/30/an-alternative-for-st3-with-something-for-everyone/</a> .</p> <p>Building a train line that's half urban rail and half commuter rail like the north-south spine looks like just doesn't make sense. Either plan for urban stop spacings amd transit-oriented-developemnt or call it commuter rail.</p>
NORTH KING COUNTY	<p>Ballard to University District is absolutely crucial. The 44 bus is a nightmare. I have lived in New York and Washington DC and am aware that circuit systems like New York or downtown are key to increasing urban livability. The Downtown - U District - Ballard circuit will form a transit core for the entire city to build around.</p> <p>Sam</p>
NORTH KING COUNTY	<p>I know it's currently scheduled for review, but due to the current and predicted rapid growth of the Ballard area, it seems that waiting 22-years until service will arrive is too long of a timeline. Something closer to 15-years seems more palatable. Also, it would be excellent if the Ballard to Seattle light-rail route wasn't hobbled by the inclusion of another drawbridge over the ship canal. Not only does this potentially negatively impact the commercial viability of the industry in the area, but also will slow rail service. I know we can't have everything with the plan, but I'd favor a longer funding timeline (say 30 years), if that meant we could truncate the timeline of the proposed projects, and add more features to more aspects of the plan, all across the region.</p>
NORTH KING COUNTY	<p>ST3 needs to be sped up by 10 years, even if it costs me more money. It is crucial that working poor and working class persons are able to make it to their jobs. These people provide a vital role in supporting the service and manufacturing economies and deserve access to employment. Further, we should begin expanding the rail service South to Portland and East to Wenatchee, Spokane and the Tri-Cities.</p>
NORTH KING COUNTY	<p>I think running light rail through Interbay rather than below Queen Anne Hill (like it runs under Capitol Hill) is a mistake. The residents of Queen Anne would be better served with a rail station in Seattle Center (which you've already proposed) and somewhere around the vicinity of Queen Anne Ave and Boston St (or anywhere at the top of the hill). Furthermore, such a route would put rail in line with Fremont, where another station could be provided on the way to Ballard. Interbay just doesn't have the density to support light rail.</p>
NORTH KING COUNTY	<p>Please include Fremont in the plans.</p>
NORTH KING COUNTY	<p>I think the Ballard to UW line SHOULD be part of ST3, and a SLU to Cap Hill to Mt. Baker station should be added for study.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	More brt within seattle. This proposal is too focused on suburban projects at the expense of urban projects. ST should pay for true brt on the rapid ride lines.
NORTH KING COUNTY	Ballard to UW is a no-brainer! Timeline to Ballard is HORRIBLE. Everything about this plan is bad for Seattle. -Wasting money on suburbs with no density while punishing Seattle
NORTH KING COUNTY	More research needs to be completed on the 522 lake city way corridor including BRT further south past 145th.
NORTH KING COUNTY	The time tables are too long across the board, especially on the Ballard and West Seattle projects. In general, I think believe people expected timelines about about 1/2 or 1/3 the projected timelines, they are so long to the point very pro-transit advocates are considering voting no. Is there no way to increase these, and do them in parallel?  Additionally, Belltown is one of the most dense, transit friendly areas in all of Seattle, and it gets zero love from the light rail. I definitely wanted to see the a line that serviced Belltown.  Finally, Grade Separation is a must, the Ballard plan, in addition to being super long time frame, seemed to be sub-par on the grade separation front as well.
NORTH KING COUNTY	Ballard to UW
NORTH KING COUNTY	Please, please 130to Street station! The Bitter Lake/Haller Lake neighborhood deserves to be a part of the Seattle picture.
NORTH KING COUNTY	Commuter rail is much faster than light rail.. why not focus on expanding that south and north? Inner city traffic in Seattle is the WORST. This project seems too focused on reaching all over the region, rather than tackling more inner city options (east/west.. serving Fremont, Greenlake, Phinney, Greenwood. Remember, San Francisco has both BART (outer to inner) and MUNI (inner city subway). As unpopular as the Everett/Mukilteo rail corridor has been, not sure why you would spend billions to try and get from Lynnwood to Everett.. Seems that there should be a stronger inner city system.. Also, the Ballard Bridge is currently the most congested "downtown thoroughfare"- Why wouldn't you make this a priority, and hire more staff to expedite the schedule. the 22-year timeframe has been a recurring negative that I keep hearing people grumble and laugh about.. Really, that timeframe seems way too long... you should commit to cutting that in half...
NORTH KING COUNTY	Instead of kowtowing to the might automobile how about encouraging car pooling and bus use instead of all the new road projects? (such as Bertha Tunnel and 520 Bridge rebuilding. With the billions \$ being spent lets buy set up some van pools, put up a hefty toll for drive aloners, encourage employers to let people work from home full time or part time. Encourage bicycle use. Last thing to do is to build more parking at all these stations. Use walk, bike, jitney bus to get to stations.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	You should add a Ballard to UW station right away so that it can open with the UW station instead of waiting for many years.
NORTH KING COUNTY	I'd love to see a Ballard/UW line included.
NORTH KING COUNTY	Look at all the apartments and condo's currently being built in West Seattle. It's a bottle getting in and out of West Seattle. Light Rail should become a priority in West Seattle so these people can commute to work and back without congesting our highways. Also... what about another ferry for the Alki Beach route. That would help too.
NORTH KING COUNTY	Cross-town needs to be addressed. Both Belltown to Cap Hill and Ballard to UW segments need to be added.  All light rail needs to be exclusive right of way.  Need to speed this plan up. Ballard to downtown needs higher priority. Build it all faster.
NORTH KING COUNTY	We've got a great backbone now - time to extend outwards. i.e. More East-West corridors, please! Moving east-west continues to be a difficult endeavor and congestion/bottleneck pain point in this city, and a UW-Ballard light rail extension would be an amazing add-on! Especially as density continues to increase in Wallingford, Fremont, and Ballard, and given the amount of multi-family construction currently underway, this would be a boon for a good percentage of the Seattle population!
NORTH KING COUNTY	Ballard to U district should not be a study option but a definite part of the plan. Also, should work to accelerate timelines. These are simply too long. Also, Paine Field extension seems unnecessary and too expensive for benefit. Consider a shuttle or streetcar.
NORTH KING COUNTY	East-west light rail should be built within Seattle, in particular, a Ballard to UW line and a line under Denny Way.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>It seems backwards that Seattle, which leads the region in growth, takes a far far backseat to its own suburbs in this plan. Many dense Seattle neighborhoods remain stranded by this plan (Belltown, Fremont, Wallingford, etc.).</p> <p>Not only does Seattle take a backseat in terms of the breadth of the projects, but in the timeline as well. Downtown to Ballard is the most crucial and pressing of all projects in ST3, yet it is one of the last delivered projects. This line must be made the top priority.</p> <p>If the brilliant success of the beautifully done Ulink teaches us anything, it's that fully grade-separated transit is absolutely worth it and necessary for a great city. The downtown-Ballard line having at-grade rail through Interbay (and having to cross a moveable bridge!) is unacceptable. I, among many other Seattlites, will not be able to support a plan that has this line at-grade.</p> <p>I also will find it very difficult to support an ST3 plan that does not contain a Ballard-UW line. This is one of the most used east-west corridors which supports strong all-day ridership despite the 44 bus being constantly entrenched and stalled in traffic. This line must be included in ST3. At a minimum a study should be included for another east-west line following the metro 8 bus route.</p>
<p>NORTH KING COUNTY</p>	<p>Should look at replacing Bus Line 8 with light rail - going East/West in Seattle is very difficult, and the 8 is always full/delayed when I take it. Driving a few miles east/west is difficult, and Mercer/Denny etc. are consistently full. Need a more direct and reliable way to move East/West beyond the 8, so very disappointing to not even see this route considered.</p> <p>Ballard to UW should be a higher priority - transit East/West in Seattle is incredibly slow and will only get worse. See above. Also, while good that there is a study, disappointing that neither the 8 or Ballard/UW is in consideration, as the East/West travel will only get worse and this plan will take a long time before either could be implemented.</p> <p>Lastly, the timeline for this project needs to be explained. The very long timeframes are very hard to understand. If there is a good reason it will take 25+ years to complete, this needs to be explained WHY. It is not reasonable to expect people to support something where the first tangible results are still so far out. Some plans should be accelerated to the extent possible - the timeframe and lack of East/West light rail make me much less enthusiastic in supporting this measure, so they need to be addressed in some form.</p>
<p>NORTH KING COUNTY</p>	<p>We do NOT need a station at 130th in Seattle. We NEED a rapid transit bus to Olypmia from Northgate!!!!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	This plan should include a light rail line connecting Ballard to UW through fremont/wallingford. I'm very surprised it has been ignored, given the strong grassroots support it has.
NORTH KING COUNTY	<p>Why is the Ballard to DT route chosen with the least capacity? I don't understand why it is so limited.</p> <p>Why isn't there a Ballard to UW route? Is ST seriously going to put off such a route for 30 years? How many more riders would support better Ballard connections instead of one to Issaquah?</p> <p>Bad package. Vote this down and start over.</p>
NORTH KING COUNTY	Ballard/Shilshole to Childrens/Sand Point light rail by tunnel
NORTH KING COUNTY	Rail line from Ballard to UW then Redmond needs to be sped up and implemented into the plan.
NORTH KING COUNTY	Why isn't there any public transit option from Seattle to Olympia (the state capitol)? It would be great for the Sounder to go there too. There's one way: bus or train to Tacoma and then figure out how to transfer to Pierce County transit. It takes most of a day to take the 1 1/2 hour car trip.
NORTH KING COUNTY	Light rail. Give me all of the light rail. Since the Hwy 99 tunnel will have no downtown exits (I still cannot believe the absolute idiocy behind that decision, but it wasn't ST's fault), everyone who commutes downtown is going to need better options. 1st and 4th Avenues are not going to cut it. They can barely handle the traffic they have now in peak hours. The I-5 chokepoints will only get worse. Light rail is the only solution that can accommodate the number of downtown commuters--a number that will be increasing--without adding to road traffic. (Except for adding bike lanes. I don't know if ST has anything to do with bike lanes, but the lane on 2nd Ave works great and makes me more likely to bike to work in the future. I think all major thoroughfares should have those separated bike lanes.)
NORTH KING COUNTY	<p>First off, the timeline should be shorter, because I don't want to wait until I'm 40 to get from Uptown to Ballard.</p> <p>Include Ballard to UW, because route 44 is way too slow. Seattle needs transit now, and we can't wait another 30 years for the next line. I would be more than willing to pay more in taxes if it meant that there were more light rail lines at a quicker pace.</p> <p>I love U Link, and if there can be more of that then I would be over the moon. Also, Link should be separated from traffic on MLK, and there should be a study for a line from downtown through Belltown to Queen Anne, Fremont, and Greenwood, all underground (like a modified option D).</p>
NORTH KING COUNTY	Light Rail Transit is the way to go -- look at Stockholm Sweden. There is no need to own a car in Stockholm any more because the public transportation primarily the subway/light rail transit (buses included) run through the night and are reliable. Seattle has everything within an hours drive, it would be fantastic to hop onto a light rail system and live life rather than be a slave to the car and the auto-industry.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	The final plan needs to include an east-west line in Seattle (ex. Ballard to UW). We don't just have traffic north-south, we have it east-west as well. The final plan should also analyze connecting SLU to the light rail.
NORTH KING COUNTY	Link from UW to Ballard Link from UW to Bellvue via 520
NORTH KING COUNTY	I will not vote for ST3 without Ballard-UW included in the plan and the light rail projects WITHIN the city of Seattle completed on a faster timeline. I would also like to see Metro 8 Subway line studied. In short, I would like Sound Transit to follow the vision developed by Seattle Subway's ST Complete plan. I would also like to see this done faster, even if it costs more money.
NORTH KING COUNTY	Ballard to UW, "Metro 8" subway, TIMELINE NEEDS TO BE ACCELERATED!
NORTH KING COUNTY	The transportation system that is extending to Ballard should continue all the way up 15th NW then down Holman Road all the way to Northgate so it can tie into the rapid transit system just like it should have been done with the Monorail in the first place. Trains running one direction would allow more trains on the same track during heavy commute times a real design flaw of the Monorail system designed by your experts. Maybe you should pay yourself and take a trip to europe to see how rapid transit system actually work. Bring back the Monorail we voted for it and paid for it and get nothing for it.
NORTH KING COUNTY	More attention should be paid to the densest Seattle neighborhoods. Additional Seattle stations should come online prior to far flung suburban areas. I'm also disappointed to see the lack of rail connectivity to the Central District.
NORTH KING COUNTY	These projects should happen sooner than 25 years. In 25 years, population centers may change and we may need different services. There needs to be reliable, efficient, and easy access to bus transit stations. For example, if someone lives on Phinney Ridge, or Queen Anne, or Shoreline, there is, even in this plan, no reliable way to get from someone's home to the light rail transit station. It still requires someone to drive their car to take the train. There needs to be efficient, easy, and meaningful east/west access and access to popular recreation areas throughout the region.
NORTH KING COUNTY	We really need cross lake light rail - Seattle (Madison Park) to Bellevue, Seattle (I-90) to South Bellevue so that cross lake commuting isn't brought to a standstill when the bridges are packed. We have a lot of North/South options already but cross town and cross lake is impossible. Also for people in the city of Seattle who have kids using the bus system is a joke. It is only set up for work commuters - I can't catch a bus in Madison Valley to Capitol Hill without it taking 1+ hours.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Why is there no additional service to Northwest Seattle outside of Northgate and downtown Ballard? The entire area in between those two areas including Greenwood and Phinney Ridge is a dense residential area that does not have any high speed transit access to downtown. We need rail or at the very least BRT in this area. The E line and the 5 are very busy bus routes and their ridership would be much higher if times were faster. I also want to take the Microsoft Connector to Redmond but last of bus priority on I-5 means it just gets stuck in traffic with all the other vehicles.
NORTH KING COUNTY	Ballard - UW needs to be part of the plan, and Ballard - Downtown Seattle should not be on a bridge.  Parking is the worst.
NORTH KING COUNTY	Please add more counter-commute options to the Sounder service. I live in Seattle and have turned down some great job opportunities in/near Tacoma because there's not currently decent public transit that direction, unless I leave super early to catch the one southbound Sounder train. Commuter rail has the potential to create a regional backbone for our transit system, and the way the region is developing it's not just about people commuting into Seattle any more.
NORTH KING COUNTY	I am missng a reliable and frequent service to olympia. Capital of the state and part of the region. Just a few amtrak trains are by far not enough.
NORTH KING COUNTY	The Ballard to UW line should be included in ST3. The Seattle region deserves a mature light rail system within 15 years and shouldn't shy away from the challenges necessary to meet that goal.  The timetable to complete these projects should be shortened as much as possible. The need for traffic independent light rail transit is near critical now. Waiting another 22 years to complete ST3 is short sighted and honestly does not serve the greater Seattle region in its greatest time of growth and need. Please accelerate as much as is feasible.
NORTH KING COUNTY	East-West corridor between Ballard and UW needs to be improved
NORTH KING COUNTY	Please have a belltown stop! It's a major area still left a decent size walk from any planned stops. And light rail should never be at grade.
NORTH KING COUNTY	I would like to see light rail extending across 520 floating bridge to create a commuter ready plan to move north end neighborhoods via light rail into BELLEVUE and Redmond. This bypass of downtown would serve many reverse commuters from Seattle and N suburbs to get to employment centers on the east side without tying up resources downtown.
NORTH KING COUNTY	Train from Redmond-Kirkland to UW Seattle.
NORTH KING COUNTY	There aren't enough stops in the dense core of the city. There should be transit for people going East to West -- Central District, Madison, Downtown, SLU, Mercer, etc. Right now everything is focused on commuters coming in from the suburbs and not urban dwellers.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	I would like to see Ballard direct to U District.
NORTH KING COUNTY	Improving transit generally to West Seattle should be prioritized, as well as improving transit options going East/West north of Lake Union.
NORTH KING COUNTY	Get Ballard LINK finished faster!!!
NORTH KING COUNTY	Please include parking garages at light rail stations, as that will go a long way towards making light rail a much more attractive option.
NORTH KING COUNTY	More emphasis should be put on cross-town transportation. Not all travelers in the Seattle area want to go to downtown.
NORTH KING COUNTY	I support BOLD, AGGRESSIVE moves to expand light rail service. I am supportive of the expansive designs I'm seeing the community propose, and I don't want ST3 to limit us in any way. Rail is the future, bus solutions are band-aids.
NORTH KING COUNTY	I live in Seattle and visit Tacoma on a regular basis, so that's where I'd like to see the majority of the improvements, but really, we need it everywhere. I'd like to see light rail to and through Queen Anne to connect it to Ballard, University District, and Down town. Adding some east/west connections would be good, too.
NORTH KING COUNTY	East-West UW to Ballard light rail line. Commuting East/West in Seattle is still a major hassle. 45th is always backed up during rush hour and light rail would greatly reduce this.
NORTH KING COUNTY	Add Ballard to UW light rail, or a new 8-bus light rail!!
NORTH KING COUNTY	do it sooner than 25 years
NORTH KING COUNTY	Ballard to UW via grade-separated light rail Metro Route 8 replacement via grade-separated light rail  There is too much focus on major projects in suburban areas. Some of the densest parts of Seattle are not going to be served by any of these projects. A one-seat ride from Everett to Tacoma in 10+ years seems much less urgent than in-city mobility as soon as possible.
NORTH KING COUNTY	Light rail ballard to UW
NORTH KING COUNTY	Ballard to UW Light Rail Route. Ensure that local transit groups are involved with the planning. A light rail system is useless if you can't get to it from many different areas. Votes are important but the more people use the light rail system the more demand there will be for it.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>West-East grade separated rail north of the ship canal is desperately needed. I support the addition of a Ballard-University line serving Fremont and Wallingford.</p> <p>Transit projects that connect dense, walkable neighborhoods to the downtown core should have the highest priority. Projects like Downtown-Ballard through South Lake Union, Queen Anne and Interbay should be completed first, not last. I would gladly support a higher tax burden in return for light rail that promotes transit orient development and effective solutions, not freeway aligned rail that serves sparsely populated communities with ready access to bus transit.</p>
NORTH KING COUNTY	<p>A Ballard-UW subway is critical to residents and businesses north of the Ship Canal. With the Metro 44 bus packed to the gills and little room to expand the east-west arteries of 45th and 50th streets, there are few if any alternatives to an east-west grade-separated rail line. Please consider adding a Ballard-UW light rail/subway line to ST3.</p>
NORTH KING COUNTY	<p>this plan has the same traditional weakness: favoring north south connections and underestimating difficulties going east west. We need faster solutions to get from Ballard to the UW and from West Seattle to Cap Hill.</p>
NORTH KING COUNTY	<p>Seattle has been a huge supporter of Sound transit, yet the neighborhood connections to and from downtown and each other is under-represented in the build out.</p> <p>I highly support he lines to Ballard and West Seattle, but a Ballard to UW line needs to be included, and It should connect Greenwood / GreenLake and Wallingford .</p> <p>We need more E-W connections in Seattle, and this is the first and most logical.</p> <p>Likewise, we should study other corridors within Seattle City limits to establish a Seattle transit system that connects the major neighborhood and employment centers as well as major event areas not currently covered.</p>
NORTH KING COUNTY	<p>Light rail and rapid bus transit options need to be extended north of ballard up to 100th at least. This area is an urban village and is seeing rapid growth. Commuters from this area are adding congestion to the roads and the already overtaxed D express bus line. This area is in critical need of public transport services.</p>
NORTH KING COUNTY	<p>Find a way to get more money to complete ST3 faster. Shake down the local billionaires or the federal government for more cash so the 25 year plan can become a 10 year plan.</p>
NORTH KING COUNTY	<p>Please follow-through and finish building out a light rail station at Graham Street, South Seattle, and provide transportation access where it would make the greatest impact on the lives (and businesses) of SO many low-income residents who call South Seattle home, but are currently cut off. It's ready, we're ready, please finish this.</p>
NORTH KING COUNTY	<p>Ballard to UW; the 44 is way too slow and every time I have to run an errand there, I end up driving instead.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>If it's going to take a literally unbelievable 22 years to get light rail to Ballard, then why not build the UW to Ballard line in less than half that time. This will connect far denser neighborhoods and be a much better return on investment. There is nothing Sound Transit could do that would revolutionize travel in this area faster or more cheaply than build a UW to Ballard line.</p> <p>I will be voting against this package. De-prioritizing most important, most useful, most needed lines in Seattle-- lines that will improve tens of thousands of people's lives-- and having them come more than a generation later. It's honestly mind-boggling.</p>
NORTH KING COUNTY	<p>East west lines - including Ballard / UW and a 520 bridge to redmond line Additional north south line along Aurora from Downtown</p>
NORTH KING COUNTY	<p>There should be more east-west light rail! And light rail should be developed STARTING WITH service to crowded communities like Ballard and West Seattle, rather than leaving these areas to be served at the very end of the project. Why is there so much emphasis on reaching far flung suburbs first?</p>
NORTH KING COUNTY	<p>Rather than focusing on expanding the existing sparse transit network further north, south, and east into less-dense suburbs, focus on densifying the network within Seattle city limits. Encourage denser transit, commutes, and housing development within a more compact area, and all of our transit efforts will become more effective. Trying to satisfy every route from far-flung suburbs into various business centers will not be nearly as effective as densifying the urban core and allowing full-mesh travel from any point to any other point. It's already impossible to get anywhere except downtown without a downtown transfer - let's not double down on that system.</p>
NORTH KING COUNTY	<p>Ballard-UW line would be strongly preferred. Seek a higher funding authority by the state via the Legislature to increase the rate of project completion. We desperately need this ALL started now, not in phases. 22 years for a line to Ballard, 17 years for a line to Tacoma and West Seattle, and other projected completion dates is entirely too long for a region that has grown leaps and bounds over the past five years. Not completing these projects under a faster timetable will stifle further economic growth for the region.</p>
NORTH KING COUNTY	<p>You need a Ballard to UW line. Buses are not transit, they are what you have to take to get to transit - at best a stop gap. All light rail should be off-grade - even one traffic light and you have failed - e.g. the light rail to SeaTac airport is the biggest farce this area has seen in years. Takes longer than the bus (that it replaced) and drops you 10-15 minute walk from the airport proper. If you are planning on repeating that kind of stupidity I will not support this plan at all.</p>
NORTH KING COUNTY	<p>Really wish the Ballard-UW line was in the ST3 final plan!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	East-west transit in Seattle, particularly North Seattle, for example Ballard to UW.  Aurora corridor BRT improvements  Grade separated Ballard line
NORTH KING COUNTY	Extend light rail to Westwood Village in West Seattle
NORTH KING COUNTY	Why in the world isn't there light rail going from UW to Ballard? All along that 45th st corridor are students and those connected to the UW who need that. It's ridiculous to not have a way to go directly from the UW to Ballard. Suggesting that to get from Ballard to UW you need to go THROUGH Downtown Seattle is absurd! Not everyone needs to go downtown, there is a HUGE EAST-WEST problem along 45th St from the UW to Ballard.
NORTH KING COUNTY	Please consider expansion of light rail between ballard and the university district, and also neighborhoods like madison park and magnolia that are difficult to access by bus!
NORTH KING COUNTY	Would really like to see Ballard-UW link added to this plan. Also a study of the "Metro 8 Subway" line. Considering the high tax burden of this plan, these connections between densely populated neighborhoods in Seattle are essential.
NORTH KING COUNTY	Add more projects *in* the city. As traffic is focused on the city itself, the ST3 study seems focused on the suburbs. Build for 2030, not for 1960.
NORTH KING COUNTY	I currently travel between Ballard and Mukilteo every single day. It takes me 4 buses per trip, and close to 2 hours of travel each direction. So nearly four hours per day between my 8 buses. It's crazy. Light rail going north from Ballard to Northgate to Mukilteo would greatly simplify my life.
NORTH KING COUNTY	Please reconsider including the UW to Ballard line.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>My husband and I, and most of our millennial-aged friends (late 20s/early 30s) live in the Ballard-Fremont-Greenwood corridor. On average, it takes anywhere between 30 and 45 minutes for me to travel from my home to work in the University District (at UW). East-west travel in the city is a shambles. There are only 2-3 roads that facilitate direct travel from Ballard/Phinney/Fremont to the University District and points east, and congestion has only increased year-over-year as populations in the western neighborhoods boom. We do not need to study a Ballard-U District link; we need to make it happen. I would gladly pay more property taxes to do so (we are homeowners). If you really want to finish the whole system, it's shortsighted not to include better east-west connections across the city. Until then, people like me will choose to drive rather than sit on the buses, which are trapped in congestion and can't even skirt through side streets to save a few minutes (and people like me with odd hours and health issues can't always bike).</p> <p>Additionally, I would like to see an accelerated timeline for stations inside the urban core of Seattle. I would again pay more to use the system before I retire, and I think that the overall response to the U-District and Cap Hill stations indicates that many others feel the same. If this means cutting back on regional expansion because you can't get voter support in Snohomish and Pierce Counties, so be it; there should be an option for the communities who are desperate for real transit solutions to fund them, even if people outside our area don't feel similarly.</p>
NORTH KING COUNTY	West Seattle should have a bus on a continuous loop between Morgan Junction, Alaska Junction, and Admiral Junction.
NORTH KING COUNTY	Parking at stations with room for expansion so people will use it.
NORTH KING COUNTY	<p>Ballard to UW line! This will increase the impact of the whole system. I used to ride the #44 to work, but it so frequently became overcrowded that I sometimes could not get on the bus home in time to pick up my kids from daycare! This is a hugely traveled route, and will only increase as the U District is built up.</p> <p>As for the schedule, is there any possibility that federal funds might accelerate the timeline? The Puget Sound is ready for more miles of reliable high-speed public transit ASAP!!</p>
NORTH KING COUNTY	Please add lightrail going to Fremont/Wallinford as well
NORTH KING COUNTY	All of the projects are north-south. There's nothing to help with east-west transit like UW to Fremont, Ballard to Redmond/Bellevue, etc.
NORTH KING COUNTY	I strongly support adding the Ballard to UW line, as well as a 'Metro 8 subway' line. The Ballard to UW line makes more sense to prioritize over the Ballard to Downtown line, since its much hard to travel east west by car along that route and it is a route that causes the most congestion in the city currently.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	The station at 130th needs to happen. The northend has the largest population and to only have one station at 103rd is crazy. Have a station that is accessed mainly by connecting bus lines and it will increase ridership! It should be added not as provisional station but as a station that is going to happen. Not including it in the Lynnwood Link planning/permitting process just adds more to the overall cost of the station. Put it on the Lynnwood Link process and be done with it.... Eventually go to Ballard as well!
NORTH KING COUNTY	A line providing fast east-west travel in North Seattle is badly needed. Ballard-UW should be a higher priority than Ballard-downtown, because riders from Ballard could transfer at UW and use the current spine to get downtown.
NORTH KING COUNTY	Add a UW to Ballard light rail line. The 44 some days is slower than walking. I suspect that will only get worse. Also the timeline is too long. 22 years to connect Ballard to downtown is insane. Even if it costs more I rather these things get done as quickly as possible.
NORTH KING COUNTY	<p>The light rail crossings on MLK are very congested and since there are no train crossing rails, or left hand dedicated turns to get across the tracks, I have personally witnessed multiple accidents on the tracks over the past few years. It interrupts service and causes even more congestion in the south end. Please upgrade the crossings along MLK to make them safer and to make the traffic flow better for everyone involved.</p> <p>Today, I had to drive my car to work because the light rail wasn't running due to an accident on Cloverdale and MLK that occurred on the tracks. These sorts of accidents wouldn't happen if the left turners crossing MLK had a dedicated turn arrow.</p>
NORTH KING COUNTY	The South Park neighborhood is a great community hub which promotes foot traffic at the local level, but in terms of the transit system, it's fairly isolated from the rest of the city. Even to get to Georgetown, it's quicker to walk than to take the bus. There is be line that connects it and Georgetown to a light rail station (Graham St / Boeing Access Rd).
NORTH KING COUNTY	Whatever can get traffic reduced from West Seattle to downtown is the highest priority for me and I'm willing to increase my taxes to do it.
NORTH KING COUNTY	<p>Include a light Rail line to Burien and White Center. This area was destroyed economically by Southcenter in the 1970s. Light Rail would help economic development. If not Light Rail then reliable frequent and fast bus service from Burien and White Center to downtown.</p> <p>Also : Stop using phrases like " we can't build anymore freeways" and don't stigmatize cars or their owners. If this measure is going to pass it will need the support of everyone.</p>
NORTH KING COUNTY	The downtown to Ballard and Ballard to UW lines are the most important lines in the system. The Ballard-Fremont-UW areas are heavily populated and light rail is urgent there.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	It's unconscionable for a transit plan to prioritize a billion dollars of parking garages in the suburbs over any Yandi improvements for the dense population areas that badly need transit. The ST3 plan completely ignores the city. I'm not sure why anyone in the city would support this plan. I want the to be commuter trains for the suburbs, but not ii it means the city doesn't get transit expansions.
NORTH KING COUNTY	<p>I do not think this plan goes nearly far enough. There should be a rail line that runs from Ballard to UW to Kirkland via 520 or a separate bridge. Having lived in Wallingford, the corridor between Ballard and UW was heavily congested 4 years ago. Buses do not run quickly through there, and it needs a rail line. The east side needs a light rail loop as well, and not BRT. I would rather ST not waste money on buses unless they are 100% separate from traffic.</p> <p>As far as space, throw light rail on top of where the express lanes are on 405 now. The 405 freeway project is, frankly, an abject failure, and the extra space that already exists would be much better served by light rail. We need a more expansive plan. I want to see this happen faster than 25 years, and I don't care if funding needs to be doubled or whatever. I will pay for expediency, I am less excited about a project that wont be done until I am close to retirement.</p>
NORTH KING COUNTY	The NE 130th & I5 Infill station for the Lynnwood extension is a must. PLEASE add it to the ST3 ballot. This junction is very important to North Seattle neighborhoods and will serve an important purpose of avoiding bottlenecks at Northgate and 145th, which are already very congested during peak times. The station would be so cheap to build compared to other projects included in ST3 ! There is a lot of community support for this station, and now that the neighborhoods are represented by the District 5 Seattle City Council seat, it would be a mistake by Sound Transit to not include the 130th Ave NE Infill station in ST3 ballot
NORTH KING COUNTY	<p>Ballard to UW is a critical item that is only in the "study" option. The 45th and 50th street corridors are over capacity for cars and buses. I wish it were not only funded in this plan, but prioritized.</p> <p>What about funding via a bond? Wouldn't China like to invest in US dollars?</p>
NORTH KING COUNTY	<p>There are no transit options to Alki in West Seattle! We are trapped out there by one M-F only bus line that runs TO Seattle in the morning and FROM Seattle in the afternoon. Even then there are very limited trips and the bus drivers are ALWAYS shuffled around. 75% of the time drivers don't know the route or the stop.</p> <p>Especially in the winter the transit options are just TERRIBLE because there's no water taxi or water taxi shuttle during the day. It's severely hurting business and commuters that there aren't enough transit options to and from the Alki area.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>You mention density and the Ballard/West Seattle lines quite often and I believe they should definitely happen but I feel like there are two things missing;</p> <p>An east-west line running from Ballard to UW and more importantly I don't understand why there's not another north-south line running down from Greenlake/Phinney/Fremont/Queen Anne to Downtown (essentially along 99) We want to get cars off the road and we see how essential 99 is to our infrastructure so why not have a line hitting the denser areas from those neighborhoods down to Downtown. It seems like the everything north of SLU between 99 and I-5 was neglected. It's all over congested with cars and buses, light rail or subway is the solution so let's have have more options.</p>
NORTH KING COUNTY	<p>Build a station at Golden Gardens to allow riders to get on the Sounder going into downtown Seattle.</p>
NORTH KING COUNTY	<p>The proposed projects for Seattle are terrible. They needed to be built yesterday, and can't be put off for two decades. Additionally, the routing for the Downtown-Ballard Link is terrible. It should run grade-separated the entire way, needs to hit Queen Anne and South Lake Union, and needs to go beneath the canals, not on bridges that can slow down the transit.</p> <p>Additionally, a line between UW and Ballard needs to be built NOW. Currently, the bus service can take 45 - 60 minutes to go a couple of miles and has the highest ridership per mile potential of ANY line in the Sound Transit Region. Additionally, the buses are consistently packed to capacity with workers and students streaming between one of the densest neighborhoods in Seattle and the single largest employer and destination in Seattle.</p> <p>Furthermore, the heavy focus of ST3 on building Park-&amp;-Rides in the suburbs is extremely shortsighted. Park-&amp;-Rides are extremely expensive to build and maintain, pulling money from building more Light Rail lines, and they just encourage more sprawl by making it more feasible to live even farther from centers of employment.</p> <p>As it stands, I will vote against ST3 due to the short-sighted projects proposed. Sound Transit needs to decide what it is supposed to be; is it building a suburb-centered commuter line a la BART? If so, leave Seattle out of it and allow us to build our own Muni-system. Otherwise, recognize that the most pressing needs are building a reliable grade-separated system within the densest, most-populated city in the Sound Region.</p>
NORTH KING COUNTY	<p>why not have projects to improve the bus lines in more of the corridors Sound Transit has identified would perform well in their studies? I'm thinking of the current E Line or a line between the university of Washington and the Ballard area or a line on Madison street downtown Seattle. You're already wanting to put a train between ballard and west seattle, so why pour investment into something that will be replaced and the investment lost?</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	The communities of the Duwamish Valley are consistently left out of long and short term transit planning. These communities are more proportionally highly dependent on public transit for their daily needs. Transit in these areas is sparse and very unreliable, which is a major problem for hourly workers and families with limited time flexibility. Please consider providing much needed service in Delridge, White Center, Georgetown, and especially South Park.
NORTH KING COUNTY	Ballard Spur would connect Ballard population center with University of Washington and downtown more quickly and less disruptively than another downtown tunnel.
NORTH KING COUNTY	I am dissatisfied to see that the Delridge proposal has been removed from planning. I would feel more strong in my support if it were included. Also it is important to provide info about which projects are at grade vs grade vs tunnels.
NORTH KING COUNTY	I think this survey is somewhat flawed since it uses compound questions/statement with which someone might agree with one part, but not the other.  I support an ambitious ST3 proposal, but am very disappointed by the priorities set by Sound Transit (ST). ST should listen to the Seattle Subway organization and other well-informed transit advocates that have commented in support of more urban spacing through Seattle so commuters arriving in Seattle from farther out can get where they need to go without a car. This means adding the "Metro 8 subway" line that would connect South Lake Union and the Central District via Capitol Hill. A good description of this concept is here: <a href="https://www.theurbanist.org/2016/01/11/ballard-spur-and-metro-8-subway-serve-seattle-better-than-interbay-light-rail/">https://www.theurbanist.org/2016/01/11/ballard-spur-and-metro-8-subway-serve-seattle-better-than-interbay-light-rail/</a> . CONSTRUCTING the Metro 8 subway line should have been part of ST3, but at a minimum, ST must fund a STUDY for the Metro 8 subway line. Olive/John and 23rd Avenue are corridors that are too important for light rail to pass on.  Seattle accounts for the majority of growth we have seen in the Puget Sound region and these parts of Seattle are playing a large role. Bringing underground lightrail along the Metro 8 Subway line would connect more people to the light rail system at a smaller cost than many of the suburban proposals currently part of ST3. We need to get this right. While I believe in expansion of light rail, if ST3 does not at least have funding to study the Metro 8 subway line, I will vote against it and encourage others to do the same.
NORTH KING COUNTY	UW to Ballard needs a subway!
NORTH KING COUNTY	I'd love to see a light rail added between UW and Bellevue sooner rather than later.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>I've already heard feedback from friends living in West Seattle that the timeline for this is too far out. I've also heard that it's not a project-management/construction limitation, but a budget/money limitation. I think more investigation in how to push these through faster should be done.</p> <p>As a CD resident, I'd really like to see a "Metro 8" line investigated. The fact that it's not on the map at all is pretty disheartening. Considering how much of this area is outside the walkshed of the current Light Rail or streetcar, I think we need more consideration to garner voting support. Whether it's a streetcar covering the 8 route, or a real subway like was proposed in STcomplete, we need something to flesh out the east side of the city.</p> <p>Along those same lines, the Ballard/UW line should really be included, not just as investigation. So many people make that direction of commute. If that line could be completed faster than the new downtown tunnel, it would give Ballard residents LR access to the main line sooner, as well as including Wallingford, Fremont, etc. It would give those bedroom communities a strong reason to vote for the proposal (as long as it's not at-grade rail).</p>
<p>NORTH KING COUNTY</p>	<p>Building up Sounder commuter rail (which already exists!) would be much more efficient to connect suburban areas to Seattle. Light rail should be built up to connect the densest areas with a cohesive network that allows people to get where they need to go. I live in Seattle and am dying to be in a position to give up my car. But at this point I can't because transit is not reliable and much slower than driving. A "Metro 8 Subway" line (advocated by Seattle Subway, I believe) would allow me to sell my car and rely on an ORCA card exclusively. I found it baffling that ST3 did not even include a study for the Metro 8 subway line, and that omission might lead me to vote "no" on ST3 in the hopes that Sound Transit will get it right next time.</p>
<p>NORTH KING COUNTY</p>	<p>I live in the Central part of Seattle. A bus from my home to downtown Seattle where I work takes 30-40 minutes on average. Why is it that close-in neighborhoods are being completely ignored in this plan? We will pay the most into the plan and yet we will get the very least out of it. BRT or a light rail connecting the future Judkins Park station and downtown/SLU should be strongly considered! At the very least I want an explanation for why the entire swatch of central Seattle from the new Capitol Hill station east to Lake Washington and south to Judkins Park is being completely ignored.</p>
<p>NORTH KING COUNTY</p>	<p>a) light rail from downtown to Ballard should be grade-separated, MLK has shown that cars/bikes/pedestrians and light rail do not mix well</p> <p>b) light rail expansion to include linking Kirkland, with the new expanded Google campus in the area adding light rail connection would greatly impact traffic.</p>
<p>NORTH KING COUNTY</p>	<p>ballard to downtown light rail needs to be off grade than cars. build a new bridge if you have to but that is key</p> <p>also the biggest thing i see missing is ballard to udistrict light rail.. that is such a big topic it needs to happen and sooner than later</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	UW to Ballard should be on this plan. It should be finished before Ballard/Downtown because it does not require the new transit tunnel.
NORTH KING COUNTY	It really disappoints me that the projects seem to focus on serving the suburbs and not seattle residents. I am very pro-transit, but the list of projects seems to serve the larger population poorly - especially dense urban areas where people are most likely to use transit. While I wouldn't want the perfect to be the enemy of the good, I am tempted to vote against this package is at currently stands in the hopes that a better list of projects will be developed over the next 4-5 years.
NORTH KING COUNTY	There needs to be a Ballard-UW line. The East-West roads in Seattle are already our biggest issue (in my opinion) and the lack of the Ballard-UW line in ST3 means it won't be an option for... 30-40 years? That is insane. I can't imagine how bad traffic will be by then. We NEED a UW-Ballard line, and we needed it 5 years ago.  Furthermore, why are we wasting money on building out to Issaquah? There are only 33,000 residents there. Why can't we take the money for that project and use it for the UW-Ballard line? Issaquah will grow, eventually, but it is so small to waste the funds and time right now.
NORTH KING COUNTY	Go for STComplete! Expand as much as possible! It will only be more expensive to do it later.
NORTH KING COUNTY	We need to add a light rail or subway line from Ballard to UW/Mountlake. I've commuted from Ballard to Redmond or Bellevue daily and the corridor along 45th is completely unacceptable. My only option to get to Mountlake is riding the 44, which is the slowest bus line I have ever ridden. On bad days, it has taken me an hour and a half just to get from the Safeway Ballard stop to I-5. That's an hour and a half spent to travel 3 miles. It can also be just as bad on my way coming home. We need a mass transit option for this corridor that bypasses roads filled with cars stuck in traffic, and we need it ASAP, not in 22 years. This is by far the biggest missing link in the ST3 plan and a major issue for North Seattle residents.  In the meantime, I believe many people would support making 45th and 50th one way roads which would drastically improve East/West travel in North Seattle. Bus only lanes on these roads are also desperately needed.  Please consider adding a light rail or subway line from Ballard to UW/Mountlake. This is the biggest missing link in the ST3 plan and the biggest frustration I've heard from people who have seen the ST3 plan.  Thanks!
NORTH KING COUNTY	Seattle needs an east-west light rail connection from UW to Ballard!
NORTH KING COUNTY	I am most interested in a Ballard to the U-district line.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>This plan is big and ambitious. I like that. BUT... it essentially ignores the densest areas that can see the most utility from increased investment. North Seattle in general, and Ballard in particular NEED to have fast, reliable, grade-separated transit that connect it to Downtown AND the university of Washington. This is a much higher priority than many of the far-flung improvements.</p> <p>We do need to focus on larger regional improvements - but this plan strikes the WRONG balance. Have the Sounder do the heavy lifting of moving people long distance north/south and focus on higher density lateral connections within the high-population areas.</p>
NORTH KING COUNTY	<p>The Central District is under-served by public transit. Increased development in the area (e.g. 23xUnion) is adding pressure to this. A more cohesive approach to public transportation is needed (beyond big ticket items such as Light Rail and Street Cars)!</p>
NORTH KING COUNTY	<p>Please include Eastside communities like Kirkland and Renton as well!</p>
NORTH KING COUNTY	<p>More Seattle - Bellevue and Seattle - Redmond transit!</p>
NORTH KING COUNTY	<p>I would support the addition of measures that would expedite already-planned transit expansions, such as the light rail from the University District to Northgate, for additional tax cost.</p>
NORTH KING COUNTY	<p>I understand the politics between the various suburban sites and the city. However, the suburban reps need to be reminded that their constituents drive/transit in Seattle far more than vice versa and supporting in city transit plans support their constituents.</p> <p>25 years is an absurd amount of time to wait to even consider in-city east-west plans. A line from Ballard to UW and a line along Denny would both have huge ridership, relieve some of the most congested traffic in the region, and make the commutes of the suburbanites much easier.</p> <p>You are taking the Seattle vote for granted. Unless you add those routes to the ST3, I will be voting "no" on ST3 and I will be encouraging every transit conscious voter in town to do the same.</p>
NORTH KING COUNTY	<p>Very disappointed there are no light rail projects benefitting NE seattle. Was hoping to see Ballard to Children's hospital (perhaps eventually to Kirkland) line. Also, more projects focused around seattle's neighborhoods near downtown As opposed to the focus on expanding north and south</p>
NORTH KING COUNTY	<p>Please increase bus service E-W across North Seattle to fill light rail gaps. Getting from crown hill or Phinney ridge to the UD to take the light rail should be such a hassle!</p>
NORTH KING COUNTY	<p>Ballard to UW</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	We need more buses in areas that will not be included in the near future for ST3 (i.e. Central District, Leschi, Madrona, First Hill, Ravenna, Wallingford, Fremont, North Beacon Hill, White Center, West Seattle, Ballard, Lake City, etc.) Transit options that bring people to transit hubs are useless for many people if the riders can't then access other neighborhoods like the ones mentioned above quickly and efficiently. Because of the new UW light rail station, a lot of the buses have been rerouted or altered, which has added 20-30 minutes for one of my most used bus lines (the 48) from the Central District to Ravenna (neither of which are served by light rail or street car). Fill in the smaller gaps with frequent buses so that the infrastructure is in place before the bigger changes take place. In short, we need more buses and more bus stops in Seattle proper.
NORTH KING COUNTY	I have noticed that the majority of transit investments are related to linking other cities and outlying areas to Seattle. I would like to see more investment and focus on improving transit and light rail within Seattle -- this is where the most density is and where you will get the biggest bang for buck and the most increase in riders > This will help build momentum to expand and improve outside of Seattle.
NORTH KING COUNTY	Ballard to u district should be added, three aren't good options for moving between West an East North of the canal
NORTH KING COUNTY	Ballard to UW - Grade separated
NORTH KING COUNTY	Enhancing bus/lightrail West to East from Ballard to the U-District. Most of these improvements leave out those West of I-5 - There's not much connecting these neighborhoods to the Sounder or lightrail, and the buses downtown are packed!
NORTH KING COUNTY	Extend First Hill Trolley further into the Central District, closer to 23rd and/or MLK way.
NORTH KING COUNTY	<p>Downtown to Ballard must be the top priority. This project being one of the last deliverables (22 years from now...) is unacceptable.</p> <p>Downtown to Ballard being at-grade through Interbay and having to cross a moveable bridge is also unacceptable. Ulink has taught us that the reliability of full grade-separation is a must. I will not support any plan that has at-grade rail within the city.</p> <p>Ballard to UW must be included in the plan, perhaps considered as a continuation of the Downtown to Ballard line. The current plan contains no east-west lines, leaving an enormous hole in the transit system. This is one of the busiest east-west corridors. It will be very difficult to vote yes on ST3 if this line is not included.</p> <p>Belltown, the second densest neighborhood in Seattle, is completely ignored by this plan. This is an enormous oversight. A promising solution to this hole is the metro 8 subway line, connecting Belltown to SLU, Capitol Hill, First Hill, and Central District. This should be included as a contingency line, or at a bare minimum, this line should be studied.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	There really needs to be a connection east west from Ballard to UW. A grade separated segment would be great for the local economy of these neighborhoods and would allow many more people to take advantage of the ST system.
NORTH KING COUNTY	More parking at all current stations. Everyone I talk to voices that the transit options do not work for them because the park and ride stations are full all the time.
NORTH KING COUNTY	The line to West Seattle feels incomplete. The line should turn south and head towards Burien along California Ave. As it stands I don't think I can support this plan.  It needs to do more and it needs to happen faster. The timeline proposed is completely out of line with the dire transit needs we face. Go big. Go fast.
NORTH KING COUNTY	UW-Ballard Line should be required at a minimum in this proposal. Metro 8 subway line should be higher than West Seattle. We're already seeing a huge demand for URBAN stops in high-density neighborhoods. You MUST better serve the central district which is growing very rapidly and has very high density. The timeline is FAR too long. I would take higher taxes upfront to accelerate construction. The timeline and lack of Ballard-UW line are highly objectionable and make me consider voting no on this despite being a MASSIVE transit advocate. This just isn't good enough at actually addressing Seattle's problems.
NORTH KING COUNTY	Crosstown Light rail to UW via Ballard is critical.  Also, both the 30+ year timeline and overemphasis on suburban transit is discouraging.
NORTH KING COUNTY	The single most important project that would have the most ridership potential at the lowest cost is Ballard-UW. This should absolutely be part of ST3 or at the very least it should be the #1 prioritized contingency line. Please include it for more than just "studies."  It is also unacceptable that the project with the most transformative effect, Ballard to Downtown, isn't coming online until 2038. This project should be prioritized and the downtown tunnel should be built as soon as possible.
NORTH KING COUNTY	Fund construction of Ballard-UW line. Prioritize it so that service begins much sooner than the 22 years projected for the Ballard-Downtown line.
NORTH KING COUNTY	Focus on multi-modal infrastructure is most important for the majority of people. Accommodating cyclist safety and secure bike parking, better sidewalks for pedestrians not only helps those individuals but also frees up buses and light rail for those who are not as independently mobile.
NORTH KING COUNTY	It should be considered to add into the ST3 plan a Sounder Commuter Rail extension past DuPont/JBLM to Olympia/Lacey. Having a reliable form of mass transit between the state capitol could help commerce flow to and from the Capitol, and give lawmakers in the Capitol an issue that effects them directly that might make them more sympathetic to bringing mass transit to the entire region.
NORTH KING COUNTY	Ballard to Overlake Line should be part of this plan

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Ballard to UW light rail is needed for Seattle voters to support the plan. Delete suburban light rail from the plan.
NORTH KING COUNTY	Some provision needs to be made to improve accessibility of the University Link extension station(s).  The current layout provides no drop-off area, and the bus transfer areas (on NE Pacific and W Stevens Way NE) are just too far from the station. Traffic from cars picking up or dropping off light rail riders on W Stevens Way NE has already increased to the point where it is hazardous to the many pedestrians and cyclists on this road. The fact that bus stops on Stevens Way have no turn outs greatly adds to the congestion and hazard to pedestrians, and capital improvements are sorely needed there to serve the growing number of transit users on campus. Finally, reduced bus routes in the U District, Montlake, and along Sand Point Way have left us with few options for getting to the light rail. We would all love to take it, but we need to be able to get there!
NORTH KING COUNTY	There needs to be a connection between the end of the Ballard line and the Northgate station rather than having that as a dead end line. I've lived here since '96 and even then everyone would say East-West travel is THE WORST and it has only gotten worse. Why relegate Ballard to have to continue to rely on busses for that? This plan doesn't give Ballard/Crown Hill/Greenwood the level of service that the eastern side of the city has. I'm tired of seeing my property tax go up for transit resources that are of absolutely no benefit to me or any of my neighbors. I'm not willing to pay more for Redmond or Everett to have light rail when I still have to take 2 busses and 42 minutes to get from Greenwood to Shoreline for work, including an oh-so-pleasant transfer on Aurora getting harassed at the bus stop. I can drive door-to-door in 13 minutes. I know we are supposed to be thinking regionally and all that, but I'm tired of approving these things and seeing my taxes going up, but never seeing any benefit. I'll vote for this when it gives NW Seattle more service.
NORTH KING COUNTY	Ballard-UW
NORTH KING COUNTY	A link between Ballard and the University of Washington is critical. It would give light rail access to neighborhoods such as Wallingford, Phinney Ridge and Fremont which are fast growing and would add lots more ridership. I also believe having the Ballard to Downtown line completely grade separated such as in a tunnel would make the service more reliable and effective. Just continue the line from Downtown through Ballard and on to the UW. You would find a lot more support for this.  The timetable for these projects are unreasonable and way too far out. It will be hard to mobilize people to come out and vote on something that is 20+ years in the future. We need to get light rail built now and not 20 years from now. There is no technical reason that these lines cannot be built simultaneously. If the timetables are moved up, I believe it will be much more likely to pass in November.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	I think it's very important to make South Lake Union (SLU) a real part of your new plan. It's unclear to me where exactly the Ballard->SLU->downtown light rail goes in SLU. Right now transit options in SLU are very limited and very overcrowded. We need light rail that goes through the center of SLU, somewhere close to Westlake and Republican, NOT just another stop at Aurora and Denny. I feel like this is the only way employees working in SLU will be convinced to stop driving.
NORTH KING COUNTY	I think a Ballard - UW line is more critical at this point than a Ballard - Downtown line. If done right, Ballard - UW could address Ballard - Downtown and the 45th street corridor. The dense neighborhoods like Ballard, and to a lesser extent West Seattle, need light rail now. I'm not sure waiting 20 years to build it is the right thing to do.
NORTH KING COUNTY	A small station between UW and Capitol Hill stations would be really great -- that's a big distance between those two stops.  Please make sure that transit-oriented development is done in a way to ensure affordability, and prevent displacement of folks with fewer resources.
NORTH KING COUNTY	Light rail to White Center and Burien needs to be added to the plan. These low income areas need transit as well. Fares are too high discouraging ridership. Taxes used to fund the project are regressive in nature
NORTH KING COUNTY	BALLARD TO UW/ROOSEVELT IS A NECESSARY LINE. Service to Belltown, service north of Market in Ballard/NW Seattle, service to the Central District is all critical. Making Ballard wait 22 years is absurd—this should be at least as high a priority as West Seattle. Stop focusing on the suburbs, focus more on Seattle. This is where the population is, this is where the business is.
NORTH KING COUNTY	This proposal does little to improve rapid transit within Seattle, where public transit ridership is already highest and most in need of improvement. Why not focus on building bus rapid transit out to suburban neighborhoods, connecting to an inner core of light rail within Seattle, rather than the exact opposite?
NORTH KING COUNTY	Ballard to the UW should definitely be considered for ST3 because it would provide a good link to N-S bus connections all across North Seattle.
NORTH KING COUNTY	I'm a strong transit supporter, and I think this will be the first time I've ever voted against a transit funding request, but the low priority given to Ballard/Downtown and especially the complete lack of consideration of Ballard/UW make this one a nonstarter for me.
NORTH KING COUNTY	I want an Upper Queen Anne station. I imagine it's expensive, but it's a growing population center that despite being in the city is currently underserved by transit.
NORTH KING COUNTY	Belltown is one of the densest places in the state of WA. Belltown should be served with light rail as part of ST3.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>Add light rail from Ballard to UW. Likely able to be completed faster than Ballard-Downtown (tunneling more straightforward) and will provide a fast, reliable connection for much of north Seattle to downtown even if Ballard-Downtown is not built.</p> <p>The timetable for completing the Graham St station is unacceptable. Another 20 years for an infill station that residents of SE Seattle have already waited many years for? The timetable for this relatively simple project should be accelerated. Bringing it forwards will give something for SE Seattle residents to be excited about in this package, and provide a much stronger motivation for us to vote in favor.</p> <p>Do not make parking projects an early priority. I'm don't think ST should be in the business of providing free/heavily subsidized parking at all. Focus instead on improvements making TOD more likely at new station and existing stations - if a station location makes this difficult, you've probably put it in the wrong place!</p>
NORTH KING COUNTY	<p>West Seattle is really left out. I believe connecting the urban cores outside of downtown and the already highly connected areas along Link/Sounder need to take precedent. As more people move to Seattle, as is projected, they will not all fit or live downtown, nor will they be able to afford to live there. They need to be more connected to the nearby neighborhoods or you will have a C/D line that can not meet capacity AND a bridges that will become a bigger cluster of traffic at rush hour than they area are. Small changes to how traffic flows from one on/off ramp and expressway to another will alleviate a LOT of this stress. If West Seattle is not expect to get light rail for 17 (!) years, something needs to happen during the interim of that decade and a half. With the mass of multifamily living under construction in this area, there will be a large influx in commuter population to the urban core. The current model will NOT support the increase in residents. Thank you for putting together the survey. I completely understand the need for transparency and thorough results, but a shorter survey might get more replies.</p>
NORTH KING COUNTY	<p>Light rail between Ballard and UDistrict is a critical piece of infrastructure missing from this plan. I think we will regret its omission for decades if we don't include it in this plan.</p> <p>The timelines and construction order proposed by this plan do not lend priority to the regions with the densest population most likely to utilize transit.</p>
NORTH KING COUNTY	Ballard to UW
NORTH KING COUNTY	We should prioritize Ballard to UW and SLU to Capital Hill connections in ST3 over suburban connections.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>I am generally in favor of this plan. However, I am hoping that you are open to community input and innovation. Nobody knows transit like the people who use it on a regular basis.</p> <p>One thing that I would suggest that you seriously consider is that to truly induce people to switch from private cars to mass transit for their commutes, you need to accommodate the realities of increased commute times. Many people live far from where they work. For these people to give up their cars means transferring one or more times per trip. This eats into the commuters time to shop, pick-up kids from daycare, do dry cleaning, etc. Situating transit stations by crucial services like grocery stores, dry cleaners, and daycare centers (or encouraging these businesses to locate near existing transit centers) can go a long way toward making mass transit a less burdensome option.</p> <p>Also, I'm sorry to be indelicate, but this is a crucial matter for many commuters: long commutes challenge the capacity of people's bladders and bowels. If someone drives a private car, they can find a place to pull off the road to find a restroom. That is not an option on mass transit. Building public restrooms at some (if not all) major transit centers would go a long way toward increasing ridership. (If you doubt this, I suggest that you begin by adding public restrooms to one or two stations - particularly those not within a 10 minute walk to places with public restroom facilities - and track the number of riders on the lines connecting to that station over a period of months to see if the ridership doesn't increase!)</p>
<p>NORTH KING COUNTY</p>	<p>Ballard to UW should be added to ST3. The timeline must be shortened for rail to Ballard and West Seattle through whatever means necessary.</p>
<p>NORTH KING COUNTY</p>	<p>Ballard to UW has to be included. It is an utter travesty that it's not.</p> <p>Light rail to Lake City is essential, too. BRT on 522 to 145th is not going to cut it.</p> <p>Light rail to West Seattle is a gigantic waste of money. Getting it done before Ballard just rubs salt in the wound.</p> <p>Breaking subarea equity to complete the spine will be infuriating if it happens. There are much more worthwhile projects closer to the core.</p> <p>The phasing of this project is interminable. There has to be a way to expedite projects. Not having light rail to places like Ballard for another 22(!!!) years is simply unacceptable.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>I would prioritize a Ballard to U-District light rail line over a Ballard to Downtown line. East to west transit in Seattle is awful and will be impossible to significantly improve without grade separated rail. Moreover, even with a transfer at U-District station, fast, frequent service on a Ballard to U-District line combined with fast frequent service on Central/U/Northgate Link would give Ballard, Wallingford, and possibly Fremont residents an excellent connection to Downtown Seattle, Capitol Hill, and south Seattle. It also sees likely that such a line would be less expensive than a Ballard to Downtown line.</p> <p>I would also like to see consideration of a ight rail line roughly following the path of Metro's bus route 8. Such a line would considerably improve east-west travel in Seattle, and add fast, frequent service to South Lake Union and the Central District, and add to the area of Capitol Hill that is within the walkshed of a light rail station.</p> <p>The timeline for within Seattle projects also needs to be expedited. 20 years to add an at-grade infill station at Graham Street is ridiculous. Taking 18-22 years to open new light rail lines within Seattle is pathetically insufficient when traffic is already congested and our buses and trains are packed.</p>
NORTH KING COUNTY	<p>Need more park &amp; rides in the Seattle area -- not just Greenlake! EX. wonderful if some of the UW parking could be used during the week as a Park &amp; Ride.</p>
NORTH KING COUNTY	<p>The plan seem to completely ignore the Lake City neighborhood in Seattle. Given how inconvenient you've made travel from the NE part of Seattle after the opening of the UW link, I've become highly skeptical of your ability to plan and provide for this part of Seattle. I just don't feel like I can trust Sound Transit and Metro anymore. I am unlikely to vote for ST3 (after having willingly voted for the ST1 and ST2).</p>
NORTH KING COUNTY	<p>There will still be no convenient way for people in North Seattle/Northgate area to get to Redmond. With the 242 discontinued there is a huge need here that is not being met. All the Microsoft employees and others who take the bus from North Seattle to Redmond are now forced to drive as there is no reliable public transportation that can be done in less than 2 hours.</p>
NORTH KING COUNTY	<p>Increase transit oriented development in the plan. Include a rapid transit bus on Madison in Seattle. Build light rail from Ballard to Redmond via University District (Improve East-West connections).</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>For Everyone's sake, please make Ballard to downtown a priority. I worked in Ballard for 3 years and saw the over development and mass additions of cars to the old roadways of Ballard/Greenwood/Fremont. PLEASE MAKE THIS A PRIORITY. Also, I now work on Elliot Ave between downtown and Ballard. That road is a highway basically running to the 2 biggest choke points (in my opinion) in Seattle... Mercer and Denny. Total disaster. I take the D bus to and from work, they're great and are PACKED between 6:30am - 9:30 and 4pm-6:45pm. Not complaining just see the need for more and better scale at certain times. Also, more transit police checking on and off for freeloading riders would help A TON. Honestly, i see at the very least 1 person take a free ride on the D bus every.single.time I ride. Also, we have to connect Bellevue and Seattle by Lightrail. 520 is a ripoff and packed... I-90 is now terrible with people opposing the Toll on 520. Get it together, make this a 15 year plan.. not a 25 year plan.. We need this today, not 25 years from now when at by that time, we've outgrown this plan.</p>
NORTH KING COUNTY	<p>You should include all the projects are being "researched" especially the Ballard to U-District to Bellevue light rail line. There should also be more stops along the Seattle Light Rail (LINK) in North Seattle. You should also extend the south end of the track all the way down to Olympia. There should be stops at the WA State Capitol and Evergreen State College.</p> <p>Concentrate on the light rail. We already have a well developed bus system. We need dedicated light rail (especially run in tunnels) lines that follow all the major arterials.</p>
NORTH KING COUNTY	<p>Ballard to UW          Also fix the Ballard line at do not make it at grade!          This is extremely important to me and since this transit proposal will likely take up much of my working life before another one is proposed, I will strongly consider moving to a city with better transit options.          Please!!! Do not screw up this opportunity and just give us Ballard to UW. You will never hear people stop complaining about it and probably won't even pass the proposal if you don't include this option. Waiting on 45th has sucked up so much of all our time and you have a perfectly good chance to fix it!          Also please consider a metro &amp; subway line!          That is another line I would use very often if possible!          Thank you and please listen to our feedback! I love the light rail so far it has made a huge difference in how I commute!</p>
NORTH KING COUNTY	<p>Much of the traffic congestion is within Seattle. More light-rail in Seattle would be effective, for instance rail between Ballard and the University District, or to Lake City.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>Ballard/downtown light rail should be completely grade separated with a tunnel under salmon bay/ship canal. Ballard/udub line should be a priority. Moving people around Seattle needs to be easier. If we want Seattle to stay a competitive city we need excellent transit in the city</p> <p>Light rail to Everett and tacoma I believe is a waste of time and money. Instead money should be used to improve South and North sounder. Light rail SHOULD NOT be used as a substitute for commuter. These cities should be encouraged to increase busy transit within their limits</p>
NORTH KING COUNTY	<p>This proposal completely ignores the needs of people that have invested in Seattle along the Aurora/99 corridor. The e line in the morning is completely packed and this would do seemingly very little to help that.</p>
NORTH KING COUNTY	<p>Add in Ballard to UW line! Through freemont and Wallingford preferably.</p>
NORTH KING COUNTY	<ul style="list-style-type: none"> <li>-Ballard to UW Light rail</li> <li>-Grade separation of rail to Ballard</li> <li>-Extension of Spine from Tacoma Dome to Tacoma Mall</li> <li>-Research into faster modes for LINK trips from Seattle to Tacoma</li> </ul>
NORTH KING COUNTY	<p>We need more projects in Seattle where the most growth and traffic is and for those projects to be on a faster timeline and made a higher priority. Seattle trains will get more bang for their buck, they will be shorter and have way more riders. This plan would get way more support if it was more focused on Seattle instead of the suburbs. Connect the big suburbs for sure, as well at Tacoma and Everett. But the highest priority for Seattle is:</p> <ol style="list-style-type: none"> <li>1. Ballard to Fremont to Wallingford to UW</li> <li>2. West Seattle to Stadiums to Downtown</li> <li>3. Crown Hill to Ballard to Queen Anne to Seattle Center to Downtown</li> </ol>
NORTH KING COUNTY	<p>Light rail should be a given, in order to call ourselves a 'world class city'. Like other world cities, there should be restrooms, water fountains and cell charging stations in each station.</p> <p>Curious about the under 1 cent increase on the MVET-for marketing purposes, under 1 cent? If increased to 1 cent instead, how much faster would the system be done? 25 years is long time to reap the economic benefits of all of the projects.</p>
NORTH KING COUNTY	<p>Connect 23rd &amp; Jackson to First Hill Streetcar expansion</p>
NORTH KING COUNTY	<p>Please prioritize Seattle projects, which is where most of the growth and impacts will be felt over the next couple of decades. Also please include a cross-town rail segment like Ballard-UW.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	This is a lame survey. You are just asking for approval for the existing plan. It is inconceivable that we are prioritizing bringing light rail to Issaquah, when the Central District is being absolutely overlooked. We need the 23rd Ave or MLK corridors served by mass transit. The residents of these areas already opted in to dense urban living, and constantly are overlooked. Prioritize getting Seattle residents to move around, instead of places like Issaquah, where people chose to be in the middle of nowhere. The only way people will use rapid transit out there is if they have to drive and park in a park and ride. Everyone in the CD would be able to walk out of their house and walk to a train station. Which, in this current plan, they cannot. I refuse to support this plan without a consideration of the Central District.
NORTH KING COUNTY	I would be much more likely to support ST3 if it included Ballard-UW light rail. The current package focuses too much on suburban extensions and not enough on connecting the densest areas within the urban core.
NORTH KING COUNTY	Ballard to UW light rail line is missing from ST3. This line will likely serve more riders than the suburban lines and needs to be a part of the package.
NORTH KING COUNTY	Add the Ballard to UW light rail line to the ST3 proposal. As a resident of Wallingford, i would greatly utilize that line.
NORTH KING COUNTY	UW - Ballard is a great example of where light rail with dedicated right of way is strictly better than existing transportation options. The roads between these two destinations are almost always packed with traffic, which light rail (elevated or in a tunnel) could easily bypass. I see drastic reductions in travel time between these neighborhoods, yet, this line is not on the ballot.  Additionally, Seattle is seeing a huge influx of high paying jobs. Please tax those of us benefiting from these jobs (myself included) to pay for a shorter timeline for this project. 20+ years is far too long for these much needed improvements to our region.
NORTH KING COUNTY	Dense neighborhoods within Seattle are plagued by slow bus routes. It takes the Sam amount of time to get downtown from Wallingford by bus as it does from Shoreline to downtown by bus. We need to continue to develop light rail inside the city to reduce total transit times for intracity travel.
NORTH KING COUNTY	You are under serving my neighborhood so much with this plan.
NORTH KING COUNTY	U district to ballard is totally missing. Cross town has been a big miss in many big cities like manhattan. And quite frankly, folks on the eastside vote against public transit all the time. let them drown in traffic. make seattle work first.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>Despite voting for ST2, I will not support this plan in its present form. It needs the following:</p> <ul style="list-style-type: none"> <li>* Ballard-UW subway. Ballard-Downtown is already served by RR D, and can be served by a transfer to University Link via the Ballard-UW subway. West Seattle-Downtown is already served by RR C, 120, and numerous other buses, and can be served via dedicated bus lanes and highway improvements.</li> <li>* Greatly accelerated schedule. Ballard-UW should be done in no more than 10 years.</li> <li>* More capital improvements in Seattle. Forget about 145th BRT. Do BRT on Lake City Way to the 130th St Station.</li> </ul>
<p>NORTH KING COUNTY</p>	<p>This plan has a severe lack of East-West connections within the city of Seattle. A Ballard to UW light rail line is a critical omission that absolutely must be included in any transit proposals. Buses are not the future of public transit and grade separated light rail must be given absolute and complete priority over all other transit development options.</p> <p>There are not enough stops in the current light rail proposals. ST3 looks more like a regional commuter rail service and almost completely neglects the transit needs of those within the city of Seattle. Dense neighborhoods like SLU, Fremont, and Queen Anne are neglected in this proposal, and ST3 does not adequately address the commuting needs of those who live and work within the city limits of Seattle. The city must focus on density if it is to have any hope of reducing congestion, and the infrequency of light rail stops under this proposal will not sufficiently do this. Seattle's light rail network will never compete world class metro rail systems like those found in London, Tokyo, New York, and virtually any other major city. At the rate Seattle is growing, the absolute number one priority must be developing an extensive grade separated rail system that serves all major neighborhoods within the city and provides station options within reasonable distances of each other. 2-3 miles between some stations will not encourage extensive ridership for non-commuting purposes.</p> <p>The plan is implemented far too slowly. When many voters will be either dead or no longer living in Seattle by the time the project is finished, why would they be inclined to support this project? There must be a way to develop many of these improvements simultaneously and significantly cut down on the length of the total project timeline. Seattle cannot afford to wait nearly 30 years for a sub par light rail system.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>Ballard to UW should be #1 priority. Much more important than Ballard to Seattle.</p> <p>Seattle to West Seattle should not be built. Will not improve travel times as many will be required to interchange. Open BRT would be much more cost effective and remove the need for interchange.</p> <p>Please add capital improvements for Metro E Line in addition to C/D lines.</p> <p>Please study a "Metro 8" subway or other HCT option between Lower Queen Anne and Capitol Hill/Central District.</p> <p>Stop building parking. Parking is a very expensive way to gain ridership. Connector services, better bike and pedestrian access and more frequent services are much more cost effective. Local governments should be encouraged to fund parking themselves.</p>
NORTH KING COUNTY	Ballard-UW Line added
NORTH KING COUNTY	<p>The worst traffic seems to be I-405 between Renton and Bellevue, and I just don't have high hopes for BRT, because political considerations will force more stops. The existing Rapid Ride F line is no faster than the Metro Route 140 was. Rail is needed between Renton and Bellevue. Relying on "innovation" like driving on the shoulder is likely to encounter problems. Better to go with things that are known to work. Renton's got nearly 100,000 people in it. They need more than buses.</p>
NORTH KING COUNTY	What about fremont and wallingford? Fremont, especially, has been booming lately and could use light rail.
NORTH KING COUNTY	<p>1. The Ballard-Downtown line and West Seattle-Downtown lines need to be 100% grade separated, use a tunnel instead of drawbridge across the ship canal, and built on a much faster timeline. 22 years of waiting for a light rail that gets stuck in traffic and stuck waiting for a drawbridge is a terrible waste of time and funds. Grade-separated rail is a must. If trains cannot quickly and reliably get across town, drivers might as well stick with their vehicles and sit in traffic. The 22-year timeline is also egregious. Beijing, China can add five entirely new subway lines to its subway system in five years, and we have to wait 22 years for one line that isn't even grade-separated? ST3 does not sound like transit for the future.</p> <p>2. Excluding a Ballard-UW subway line from the ST3 proposal is a terrible mistake. This is one of the busiest corridors in the city, with no easy way to get across town quickly. Adding a subway line between Ballard and UW would greatly improve transit across the city as connecting the two main north-south rail lines would provide new, faster connections for getting around. Such a connection would greatly increase the appeal for people to use the light rail. This could be achieved by creating a standalone subway line between Ballard and UW, or having the Ballard-Downtown line turn at Market Street and continue on to UW. Either way, connecting the two light rail lines with a Ballard-UW line would greatly improve the quality of light rail in the region, and would be a terrible mistake to exclude from ST3.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Ballard-UW should be in the plan. As written the draft plan is way too suburban-focused to have my support. ST seems to go out of its way to avoid serving urbanized areas (130th station is at best "provisional", SR522 service avoiding Lake City, no interest in Ballard-UW which would serve riders in Ballard, Fremont, Wallingford, and U District).
NORTH KING COUNTY	Light Rail service to Magnolia, Interbay, Fremont and Wallingford
NORTH KING COUNTY	Commuter parking in Lake Forest Park is an absolute essential; with projected BRT (& KC Metro bus service) along SR 522 and most homes in the hills, we need to drive to SR 522 to access bus service. I note that the ST3 map at the start of this survey includes parking at LFP shopping center, which would be ideal, but how?
NORTH KING COUNTY	EAST TO WEST. Have you tried to get across this city during rush hour? It's maddening! ST3 has NO east-west corridors, and, quite simply, I CANNOT vote for any project which doesn't help in ALL directions.
NORTH KING COUNTY	Too little, too slow. Why 8 years for BRT on 405? that does not make sense. Build more transit but don't vilify driving. Good roads are part of the long term solution. Build more light rail, build it faster and make it go to more places.
NORTH KING COUNTY	First Hill needs a station. It has the population density and employment to support it, whereas Ballard and West Seattle are very suburban. The streetcar is not a good enough alternative.
NORTH KING COUNTY	Ballard to UW should absolutely be added. The 44 is always overcrowded and 45th is a traffic SNAFU daily. The fact that this was left off is absurd.
NORTH KING COUNTY	Close the loop around Lake Washington with Light Rail and use Rapid Bus lines to bring people along major routes to rail stops and minor bus lines to feed the Rapid Bus lines.
NORTH KING COUNTY	Subway route 8 connecting seattle center to judkins light rail stop via central district
NORTH KING COUNTY	Fremont
NORTH KING COUNTY	I could not agree more that traffic is destroying my quality of life. This region is crying out for mass transit. Our geography and the sheer influx of humanity demands it. I'll pay for it! I don't live in Seattle, by the way; taxes must come from the entire region. I think that most of us in the exurbs will pay to make it easier to get to work. Fix this. Please, oh PLEASE fix this.
NORTH KING COUNTY	You've got to be kidding me that you're not considering a light rail option for the 405 corridor, especially Renton to Bellevue? It's one of the worst congested areas every day; buses won't resolve that problem. There's a rail line that's usable - SO USE IT!
NORTH KING COUNTY	Please improve ST borrowing capacity and speed up timelines on urban Seattle projects (West Seattle and Ballard). Also I strongly support a U-District to Ballard line.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	A UW-Ballard light-rail connection is desperately needed and the potential ridership is there to justify a crosstown route to supplement the sluggish KC Metro 44 bus. Getting a new downtown transit tunnel constructed, along with connections to West Seattle and Ballard, should be accelerated. Although I support the overall ST3 network vision, it will be hard to vote for a plan that puts the needs of Seattle residents behind the needs of suburban residents.
NORTH KING COUNTY	It is a 30 min walk for me to reach the Columbia city light rail to commute to downtown. I'd love some feeder buses through the neighborhood, especially where it is hilly or higher crime.
NORTH KING COUNTY	<p>Queen Anne / Fremont / Wallingford / Magnolia pay taxes, too. How about us? Bellevue gets ENORMOUS attention. Why is that?</p> <p>Run light rail here. I pay taxes too. Importantly, I chose to pay more to live closer to the city center and my place of work (and yet have a smaller house), I feel the ST3 plans are essentially trying to reward people for choosing to live further and catering to purely suburban elitist interests instead of building smaller local lines that could be of immediate benefit for lower capital investments. 8 years for a line? Why is that? Is distance a reason, perchance?</p> <p>BUILD THE CORE FIRST, then expand out. Your plan looks like a bunch of super-long lines that don't interconnect except at certain key junctions, catering to peak commuters ONLY, and don't serve to connect core, dense neighbourhoods to make Seattle the great city it rightly deserves to be.</p> <p>This isn't a new problem. Look to other cities outside of this continent (hint: Europe) and see what works. I'll bet it doesn't look like this for phase 1.</p> <p>I'll keep supporting your initiatives because I believe Seattle needs to fight climate change, but you clearly aren't thinking of our interests in your plans.</p>
NORTH KING COUNTY	Please add UW to Ballard for the ST3 Light Rail package. There are no good east-west connections and the traffic on this route is unbearable, whether by car or by bus. Adding an underground light rail is essential to connect these two growing urban hub neighborhoods.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>UW-Ballard (with urban stop spacing, not &gt;1+ miles between stops) and beginning to look into a Metro 8 subway should be included in this plan. I strongly support transit, but I think we should prioritize lines by where people are presently living and working (and proven to be high users of transit). Building a Seattle version of BART will take a small handful morning and evening commuters out of their cars, and at great expense, but does not enable nearly as many people to live car-free as a system more like the Boston, NYC, or even our much more similar neighbor, Vancouver, BC. As the draft stands, it would be difficult for me to say that I would vote for it. UW-Ballard just has more bang for the buck, with a proven transit-friendly population, than even the line to West Seattle and adding it, as well as proposing a more ideal, fully grade-separated alignment for Ballard-Downtown that hits Belltown (again, prioritizing already dense areas where people are currently living and working) would make this much easier for me to vote for.</p>
NORTH KING COUNTY	<ol style="list-style-type: none"> <li>1. Ballard needs to be moved up much sooner</li> <li>2. Ballard-Downtown should be completely grade-separated and tunnel under the Ship Canal (no waiting for a drawbridge)</li> <li>3. Ballard-Wallingford-UW needs to be a priority</li> </ol>
NORTH KING COUNTY	<p>Living I Wallingford and working downtown this plan has zero effect on my commute as there is no access to any of it from my location</p>
NORTH KING COUNTY	<p>A light rail tunnel from Ballard to the University District needs to be in ST3. We can't wait for ST4, and it can't just be a "study". Include funding for building this line and stations in Wallingford and Fremont.</p>
NORTH KING COUNTY	<p>Please consider and prioritize Ballard to UW. It seems if this package were to go on a diet, this would be a very good compromise over the Ballard to DT via tunnel option. Plus, not scientific, but every person I have asked that lives in Ballard, if given only one option, chooses Ballard to UW over Ballard to DT. Many cities have spur lines that connect well with transfer stations. In Seattle, I think this Ballard/UW spur would be palatable as there are already multiple ways of going North/South. Save money by going Ballard/UW please.</p>
NORTH KING COUNTY	<p>We need to build Ballard and West Seattle's light rail projects much, much sooner. They must be included in the first phase of projects. Also, we should build light rail between Ballard and UW as soon as possible. Market/46th/45th between Ballard and UW is one of the most congested and critical arterials in the whole city. The 44 bus that currently serves it is unbearably slow especially during peak times. Build Light rail between Ballard and U District with stops around Fremont/Zoo and in Wallingford. BRT should connect the U District with the Eastside and the 405 BRT/East Link via the new 520 Bridge (replacing route 271). Also, the 44 should be revised and extended to continue serving 45th Street east of 15th Ave and instead terminate around Seattle Children's. This will greatly improve transit access with U-Village and Children's Hospital (two major destinations that are hard to get to with transit). This 44 revision should happen after U-District Station opens at Brooklyn &amp; 43rd St.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Number one priority is light rail system expansion. Less money needs to be spent on freeway expansion. I don't like the cost and time these projects will take. If the amount of resources dedicated to freeway expansion were dedicated to rail expansion. We could add at least 200 miles of light rail in the next 20 years. It took 20 years to build 20 miles of light rail. That's a mile per year. We need to be building light rail at a rate of 20 miles per year. We need less reliance on cars and more reliance on mass transit. Look at Japan and the rail system they have built. We need a rail system similar to there's. To get there we need less urban sprawl, less incentives to own cars, more reasons to take mass transit.
NORTH KING COUNTY	Light rail to Burien would be nice, with their city center recently redone and the area getting much nicer in general. Eight years from now I expect good things and light rail stopping near the Burien TC may be a good idea.
NORTH KING COUNTY	UW to Ballard should be added....perhaps in lieu of the Ballard-downtown route. It would be cheaper, faster to build, and perhaps eliminate the need for an additional downtown tunnel allowing the whole package to be done much earlier. The 2038 and 2041 dates were shocking. My first reaction was very stongly against the package because of the ridiculously long timelines.
NORTH KING COUNTY	Access to transit stations requires parking lots, drop-off, and additional bus service (not reduced). This region's topography, especially in Seattle, and east-to-west, limits reasonable walking times to mass transit stations.
NORTH KING COUNTY	Eastside BRT plans really should be Light Rail plans. The most effective way to build out an effective mass transit system is by getting vehicles off of the road, and this area is one of the areas with the worst traffic which will almost certainly lead to unreliable service. Buses don't build confidence in reliability the same way as trains.
NORTH KING COUNTY	There NEEDS to be a UW - Ballard light rail link. 45th is abhorrent and there are currently no good East-West routes through the city on either bus or rail. This would be an enormous improvement, and I think would be crucial in order to garner enough votes in Seattle. (Ideally there would also be a rail running from like UW to Belltown through Montlake and SLU to alleviate Mercer Mess, but I know this hasn't even been discussed.) The timelines also need to be moved way up or made more optimistic. People aren't going to vote for stuff that maybe their grandchildren will get to use, but not them. Plus, traffic is only going to get worse, and the population is only going to increase - we need these lines ASAP.
NORTH KING COUNTY	Ballard-UW
NORTH KING COUNTY	The ballard to UW to redmond across north lake washington should be funded (maybe before the investment in the second tunnel).  Why is the Graham street station so far out? I thought Move Seattle was supposed to pay for that!  There is very little investment in Seattle even though Seattle needs to work for the rest of the region to work.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>The amount of time to complete the line along the densest population path (Downtown to Ballard) is completely absurd and may make it a tough sell to Seattle voters. It's also absurd that the line is at-grade, rather than above or below and grade separated.</p> <p>The 130th street station should also be funded in this plan. It's a smaller project in an area that is already tagged for upzoning, so seems simple and an easy win to add early after ST2.</p> <p>There also should be much more effort put into planning lines East to West across the city of seattle. Examples of such lines would be the "Metro 8" and the Ballard to UW line. It may make sense to put in a Ballard to UW line with no tunneling required BEFORE doing downtown to Ballard, as travel times from downtown to ballard via the current line + new UW to Ballard line wouldn't be much more than the downtown to Ballard line but could come much faster.</p>
NORTH KING COUNTY	<p>Increased and reliable bus service is needed east of 19th Ave (Central District, Madrona, Madison Valley, Leschi) in order to serve and induce residents in those areas to use the new mass transit services. Without more frequent and reliable buses in those areas residents are less likely to use the service because any route that involves a transfer currently increases travel time by up to 30 minutes.</p>
NORTH KING COUNTY	<p>I'm disappointed to see the lack of an east/west Ballard to UW connection. While I'm a huge supporter of public transit, I feel like this plan serves the suburbs too much, when increasing bus and Sounder train service could serve that population better. Traffic within Seattle is brutal, so I'd like to see more focus there, and much sooner than 2038. From my understanding, the timeline has more to do with funding than how fast you are able to build. I can't speak for every resident but I would gladly pay more in taxes to shave a decade off that timeline.</p>
NORTH KING COUNTY	<p>Need a north Seattle East-West line from Ballard to UW</p>
NORTH KING COUNTY	<p>In addition to the changes that are listed in the blog post located here: <a href="http://seattletransitblog.com/2016/03/31/how-to-fix-st3-so-seattle-will-vote-for-it/">http://seattletransitblog.com/2016/03/31/how-to-fix-st3-so-seattle-will-vote-for-it/</a> I think it's imperative to include the Graham street station. It's been in the plans for a long time and it's unfair for the Rainier valley to wait 20 years for that station.</p>
NORTH KING COUNTY	<p>Improving access to Ballard -&gt; Greenwood/Broadview -&gt; Northgate would be very helpful, especially when Light Rail is available at Northgate. Getting from Greenwood &amp; 105th over to Northgate Transit Center in a reasonable amount of time, to then travel Southbound would be super helpful.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>We need to have a better way to move east - west in Seattle, we need to have a line from UW to Ballard/Magnolia/Interbay. It's takes longer to get to UW from ballard than downtown, we need a rail line to fix this.</p> <p>Additionally, we need to deliver value in the package sooner - BRT doesn't count. We need to fund ways to innovate and deliver light rail / commuter rail projects sooner than 12 years. Can we open individual stations sooner than an entire line? (e.g. can we open 1/2 of the west Seattle line in 8 years instead of waiting 12 years for the entire line? if not, why not?)</p> <p>Support will be significantly higher if ST3 can demonstrate that it can delivery meaningful / impactful light rail projects sooner than 12 years. we need to be innovative about how we can deliver faster!</p>
NORTH KING COUNTY	<p>Rainier Valley has been promised BRT for several years, since the 7x line was removed. While it is lovely to have ST in the Valley, not everyone lives along MLK, within walking distance to a station. The BRT is essential and needs to be added ASAP.</p>
NORTH KING COUNTY	<p>Light rail over the 520 bridge. I would prioritize this project over everything else, personally.</p>
NORTH KING COUNTY	<p>I want to emphasize the importance of pedestrian and bicycle friendly cities, please develop more paths as well as making the existing services (light rail and buses) more cycle friendly. Currently, the systems are a bit hard to use as a cyclist.</p>
NORTH KING COUNTY	<p>Ballard to UW is far more important than the majority of the N King County/Snohomish County Projects. In addition, it is a difficult sell to much of the public because of the length of time it will take to complete these projects. Any hope of projects being completed sooner, including projects already under construction (Northgate extension) will help sell people more on the projects.</p>
NORTH KING COUNTY	<p>We need more east-west transit in Seattle proper. Right now, almost all projects are north-south based. I would love to see some transit that could take me from Queen Anne to Capitol Hill or UW in under an hour, or from Fremont to Cap Hill even.</p>
NORTH KING COUNTY	<p>I wish there was more in this plan for crosstown options. 45th and 50th through Wallingford are always jammed. It would be great to connect Ballard with the U District with dedicated light rail.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>Please accelerate the timeline for downtown to Ballard, but more importantly, this section MUST be grade separated. Delays on this stretch of rail will dramatically affect ridership on the single best project in ST3. Building at-grade rail will expose the entire system to delays and capacity constraints as we have seen in the Rainier Valley stretch already. Additionally, building the Ballard line at grade jeopardizes a future Ballard-Fremont-UW line while requiring the additional facility costs for a new train depot and maintenance station.</p> <p>I strongly endorse the recommendations of the Seattle Subway organization. While I applaud the regional aspirations of Sound Transit, it is essential to prioritize transit where it is already desperately needed today.</p>
NORTH KING COUNTY	Ballard to Kirkland on SR520
NORTH KING COUNTY	A Ballard UW light rail line should be a critical component of ST3. A bus line through the 45th/50th corridor is not an effective solution for moving people between Ballard and UW and the disparate light rail lines for transfers.
NORTH KING COUNTY	We need the Ballard to UW line today. You must include full funding for a complete grade separated line or Seattle will reject this proposal.
NORTH KING COUNTY	In general this proposal seems like an attempt to force feed transit to suburban communities that are dependent on cars. It is important to support suburban commuters, but we need to focus on making the core of Seattle less dependent on cars. Currently having access to a car (including car share and taxi) is essential for living in the urban center. This plan does nothing to address improving that situation. A UW to Ballard rail extension would go a long way in connecting the system and make it possible to live their lives by using public transit as many do in cities like New York, and Paris. If we are thinking long term we have to be thinking about how to build a sustainable livable city rather than focusing on allowing people who live outside the city to spend less time in traffic.
NORTH KING COUNTY	The south/W. Seattle area is completely ignored in this plan. I ride from the Burien area all the way to Shoreline and this commute takes 90 minutes. I have a car but choose to commute. There is NO option for any kind of light rail in my neighborhood...I know the North end of W. Seattle, and Ballard are less diverse and would hate to think this is why these folks get light rail.
NORTH KING COUNTY	Projects in dense, urban Seattle benefit more people than those extending out into suburbs. Making it possible for those in the city who are inclined to give up their car is a much more efficient use of funds than giving those living in the suburbs an incentive to live far away from where they travel regularly, while continuing to drive their cars for most trips. Prioritize build out of the core city network before expanding out to the sparsely populated areas.
NORTH KING COUNTY	There needs to be a Ballard to UW line in the works. There are no good east-west routes in the northern part of Seattle and it's a pain to get between these two neighborhoods.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	It's hard to say projects should be added when already there are concerns about how much it will all cost and how long it will take, but I strongly support a Ballard-UW connection, as a continuation of Ballard-Downtown or by whatever means necessary. North-South movement throughout Seattle is easy. East-West is much trickier. Ballard-UW would be a strong connection between light rail lines which would make them even more useful and increase ridership.
NORTH KING COUNTY	Ballard to UW needs to be apart of this bill. It is strange to have two major transit tunnels that don't connect. This would also connect the whole line, eliminating the need for two service stations and giving improved ability for commuters to connect to the whole line without using buses. Seattle also has major growth in the residential areas that this route would connect.
NORTH KING COUNTY	Metro 8. It would serve the densest part of the city. Start at the core "Seattle" and work our way out.
NORTH KING COUNTY	Seems we need to extend sounder train to downtown olympia. There is no reliable way to go across the whole puget sound corridor - seattle to tacoma and state capitol related buildings in olympa.
NORTH KING COUNTY	<ol style="list-style-type: none"> <li>1. Given the timelines, Ballard-UW needs to built in ST3 instead of just studied.</li> <li>2. It's ridiculous to built at-grade rail inside Seattle.</li> <li>3. 22 years is inexcusably long to build light rail.</li> </ol>
NORTH KING COUNTY	The biggest voter support for ST3 will likely be in Seattle and those neighborhoods closest to it. An accelerated timeline for projects Seattleites can get excited about (West Seattle/Ballard) will help generate voter interest and turnout and keep us from feeling like we are paying for something we'll never get to use. I also feel strongly that ST should consider recommendations made by groups like Seattle Subway to expand the system to better meet the needs of our city.
NORTH KING COUNTY	<p>I would like to see more investment in commuter options on the west side of i5. Currently the proposed map for st3 even shows a large gap between the Sounder and light rail along i5. The current park and ride and commuter transit options (e.g. the E line) for that area are abysmal.</p> <p>My hope is that the 145th and 185th link stations help. But with the light rail to Ballard 22y out with ST3 and no Sounder stops between Edmonds and Seattle, I don't think the transportation issues for the people west of i5 and between NW 65th St and NW 205th St are being addressed</p>
NORTH KING COUNTY	Better East/West options, particularly across the lake.
NORTH KING COUNTY	A link between Ballard to University District should be ore seriously considered to allow a full network of transit within Seattle.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>ballard to UW Ballard to northgate to lake city to bothell uw to lake city to bothell</p> <p>We need to connect Seattle to make Seattle denser in neighborhoods and corridors that make sense. Making Seattle denser will help ease sprawl by connecting these neighborhoods together.</p>
NORTH KING COUNTY	<p>Lightrail more direct from downtown Seattle to Redmond. going around 90 will take waaaaay too long and then people won't use it. You also need to improve shorter trips downtown and allow for connections</p>
NORTH KING COUNTY	<p>Ballard to University of Washington. Add that project and get to Ballard sooner. The Ballard line will greatly increase transit capacity, why are you guys waiting so long to build it?</p> <p>Beyond that, why us this a 25 year plan as opposed to a thirty year one? The money raised in a thirty year plan would have made a huge difference in how much could get built. You guys just think small and the plan shows it.</p>
NORTH KING COUNTY	<p>I think the current project does great job of getting people into the city, but doesn't do enough to get people around in the city. I think ideas like the metro 8 subway, <a href="https://www.theurbanist.org/2016/01/11/ballard-spur-and-metro-8-subway-serve-seattle-better-than-interbay-light-rail/">https://www.theurbanist.org/2016/01/11/ballard-spur-and-metro-8-subway-serve-seattle-better-than-interbay-light-rail/</a> would do more for the city than the Everett or Issaquah lines. Someone from those areas isn't going to train in if once to the city they need to transfer to a bus or take a cab for the last mile. Having a well connected, dependable inner city transit system will get the most use, and have the biggest cultural impact which opens the doors for people outside the city to leave their cars at home when they enter the city.</p>
NORTH KING COUNTY	<p>Ballard to UW light rail the "8" lightrail subway from slu to mount baker via capitol hill Extend lightrail from ballard to lake city Connect light rail from west Seattle to Burien Connect light rail from Seatac to Burien sound point crossing light rail from UW to kirkland</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>You seem focused on light rail and rapid ride, but have cut bus routes that would make me want to use transit. I live in W. Seattle and would love to use transit. You have cut bus routes from admiral to downtown except early in the morning by mandating that we use the rapid rise routes only (no where to park, limited routes). There are NO routes to get to Pill Hill (aka Harborview or Swedish Hospitals) unless I take a bus to downtown and then walk a mile to my job. I would recommend keeping the West Seattle Water Taxi open all hours all year long- &gt;this year you have a larger boat, raised the rates, and then cut service for half the year. If you kept more buses during the day (that let us off at James street), kept the water taxi doing all day long until 7:45pm, that would be one thing that would allow me to use transit instead of having to drive my car 6 miles and in traffic 45 minutes both ways. Thanks for allowing me to offer my suggestions, which quite a few of medical workers at the hospitals agree with.</p>
NORTH KING COUNTY	<p>Strongly support provisional station at NE 130th Street....NE Seattle is growing and needs this station. We are diverse and lower income, this station will help our community grow and thrive in every way.</p> <p>I think best arguments in support of the plan are about the devastating impacts of current traffic impacts on our regional economy and our quality of life. We are growing and we need light rail and BRT to allow us all to continue to work and live in this region we love.</p>
NORTH KING COUNTY	<p>Sound Transit should be more pro-active and dedicate greater resources to expansions of 145th street and 125th/130th in order to support the train stations at those locations. It is essential that we provide East/West access so that working class communities in Lake City and North City can have access to the transit we have built. Also a comprehensive re-zone of areas immediately surrounding stations should be completed to increase density and add stock of affordable housing.</p>
NORTH KING COUNTY	<p>How do you support the growth in use over a 25 year period? It seems the plan has a final vision, but no details on how to get there and what can be done between now and then. More buses are needed to provide service to rail lines.</p>
NORTH KING COUNTY	<p>Absolutely, 100% light rail should cut east to west and connect UW to Ballard, with stops in Wallingford and Fremont. I stopped taking the 44 bus from Ballard to UW because my total travel time (including walking from 65th x 32nd Ave NW) was an hour. Too too too long to go six miles!</p>
NORTH KING COUNTY	<p>I would REALLY like to see a stop added at 130th St. N. As more and more people get priced out the city center (my rent in Capitol Hill doubled and I ended up moving much much farther north than I'd anticipated) additional stops will offset the gridlock caused by people who have to commute farther to work. There's limited space to add density in the core. This area is already being considered as a new urban village. There is no reason not to double that effort by adding a station here.</p>
NORTH KING COUNTY	<p>There needs to be consideration for a line from Ballard to the UW to complete the system in the City of Seattle. Also, make the system as grade-separated as possible, there should be no sharing the roadway with cars to prevent trains from getting stuck in traffic.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Ballard-UW should be a top priority Ballard-DT needs to be completely grade-separated/tunnel, no waiting for a bridge Ballard should be pushed to the front of the list, 25+ years is way too long to wait
NORTH KING COUNTY	UW-Ballard and a Lake City station are essential, far more so than the Issaquah line in terms of estimated ridership/\$. They would make living without a car absolutely possible and a great option for tens of thousands. Issaquah will still rely on private vehicles due to the car-oriented, incredibly inefficient, sprawling road design. Which means more transit money to parking lots than transit.
NORTH KING COUNTY	UW-Ballard underground light rail would be more cost effective, speed up more transit trips, and in general would promote all of your stated goals far more effectively than any project on this list. It's ridiculous that it is only included as part of a future corridor study. South Lake Union to Mt Baker via Capitol Hill also would accomplish these goals, in addition to serving the Central District, which is probably the densest area with the poorest transit service in the state. This line isn't even in the study! Completing the spine should not come at the expense of connecting the densest areas in the Puget Sound area.
NORTH KING COUNTY	UW - Ballard and West Seattle - Burien light rail lines are missing. ST3 will garner more support if the projected timeline for light rail lines such as West Seattle - Ballard were accelerated. This transit line corridor has been discussed for decades, we are tired of waiting. We have to wait an entire generation of time for this, some us won't see these projects completed in our lifetime.
NORTH KING COUNTY	Ballard to UW should be included. DT to Ballard should be number one priority. DT to Ballard should be a tunnel the whole way.
NORTH KING COUNTY	I hope the trains wouldn't be integrated with traffic. Doing this makes them slow and blocks traffic. The system should be underground as much as possible - See all major successful mass transit cities (NYC, Madrid, etc.). The system should be given priority to Seattle first, with park and rides on the outskirts. This is where lots of the congestion begins as people commute from all over. I grew up here and have lived here for 29 years and too often I choose not to go places because I don't want to deal with the traffic. Buses are great, but if they're in traffic, it's also frustrating. Priority should go to the light rail. Seattle is a terrible city for tourism because it doesn't have this easy mass transit system that other major cities have. I rarely take public transportation but would love to if we had light rail.
NORTH KING COUNTY	I think it really important that The central district get a line. Maybe something down MLK from Judkins park to 23rd and jackson, to madison, to udistrict station, and then out to magnuson area. The CD has been an essential component of this city from the beginning, and its important to me that we honor and support its growth.
NORTH KING COUNTY	Ballard to UW would deliver the quickest benefits that our region desperately needs. The densest corridors should be completed first. You brag how this will put Seattle on par with DC, but the DC area is notorious for its sprawl. Rail should not encourage sprawl as this plan does. Disappointing. I can only assume this plan is so bad now to lower expectations.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p><a href="http://seattletransitblog.com/2016/03/31/how-to-fix-st3-so-seattle-will-vote-for-it/">http://seattletransitblog.com/2016/03/31/how-to-fix-st3-so-seattle-will-vote-for-it/</a>  I agree with the Seattle Transit Blog article above. Specifically, please expedite the construction of light rail in Seattle, putting priority on the Ballard line and making it fully grade separated. Furthermore, including funding for an EIS for the Ballard to UW extension 'the Ballard spur' would further enhance this package and make it more likely that I, and many others, would vote for it.</p> <p>Thank you for your consideration!</p>
NORTH KING COUNTY	Please consider adding a Ballard > Fremont > South Lake Union light rail project.
NORTH KING COUNTY	Transit within Seattle should be improved before you focus on connecting Seattle to Tacoma or Everett. The goal should be increased density in Seattle, not sprawl to Everett and Tacoma.
NORTH KING COUNTY	While I understand the political necessity of a suburban-heavy ballot measure, I am disappointed in the lack of investments in the center city. From the lens of socioeconomic equity, cost-effectiveness, and ridership opportunity, I believe the center city deserves more investments. The implications of a suburban rail network on our region's land use is also worrisome, as sprawl worsens disparities, infrastructure burden and climate change.
NORTH KING COUNTY	Please include a Ballard to UW connection, preferably Light Rail.
NORTH KING COUNTY	Please add arrival info signs to the bus tunnel
NORTH KING COUNTY	A transit bus lane on the I5 and more dedicated bus lanes through downtown - especially now more buses have been removed from the transit tunnel. My bus, the 77, travels along the I5 and we are cut off and competing with single occupant vehicles - I think this is completely unfair for transit users and likely to become unworkable during the timeframe of the ST3 projects. It's crazy! The rapid-ride along Roosevelt in Maple Leaf should be prioritized as well. Thanks!
NORTH KING COUNTY	I live in Southpark and would love more/better bus service here. If the light rail comes to the junction but the bus service stays the same, it will still take me 50 minutes just to get to the light rail!
NORTH KING COUNTY	In terms of the Sounder train, I would like to see more frequent trains between Tacoma/South Sound and Seattle. I am not sure how much capital improvement it would require, but a regularly operating commuter rail would be terrific. Just pushing the last train out of Tacoma to 6 or 7 would have a major impact.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>A moveable bridge connecting ballard to downtown sounds like a terrible idea, if you are going to do it, do it right and don't leave a potential delay in the path.</p> <p>Quit wasting money on initiatives that don't work, additional car pool lanes do not work, digital speed limit signs do nothing!</p>
NORTH KING COUNTY	You should add a light rail from Seattle to Redmond
NORTH KING COUNTY	<p>The Ballard Line shouldn't be the last thing finished. I'd favor putting the Ballard and West Seattle lines on a faster track to completion.</p> <p>The Ballard to University line should be built ahead of the Ballard to downtown link. It would serve more people and transferring trains at the University District station wouldn't be a big deal.</p>
NORTH KING COUNTY	Possibly more busses commuting East
NORTH KING COUNTY	Selfish, I know, but I'd like to have rail, dedicated street car or BRT circling Lake Union; connecting downtown to Eastlake, UW, Wallingford, Fremont/Ballard, Westlake, Seattle Center, South Lake Union. Then I could sell my car! =) (That said, the bus is fine, just not reliably on time because of traffic).
NORTH KING COUNTY	<p>We need a station st 130th !!!</p> <p>I have lived on District 5 for 30 years and to ignore our neighborhoods is crazy !!!</p> <p>One stop in a 3 mile stretch is unacceptable.</p> <p>Thank you.</p>
NORTH KING COUNTY	East-west light rail from Ballard to University District. East-west light rail from Queen Anne to Capital Hill.
NORTH KING COUNTY	light rail to Ballard should be moved way up; 8-12 years from now. The demographics of the people living in Ballard are such that they will not vote for ST3 when the timeline for Ballard light rail is so far away.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>1) Build the 130th Street Station</p> <p>2) Move the proposed Ballard-to-UW line from a "study" to a "plan" NOW, for ST3. This line has been a known need for at least two decades; it doesn't need to be studied any more, it just needs to be built. If adding that line to ST3 drove up the cost by however many billion dollars I would support it.</p> <p>3) Study the feasibility of a line that runs from Ballard north to approx. Holman Road (or further north?) and then east to Lake City (through the 130th Street Station), then south to...OK, I don't know. But more needs to be done to integrate the Lake City area into ST3. I've been riding the 41 for several years now and it's never not crowded, not at any time of day. Lake City is easily one of the most ethnically diverse neighborhoods in Seattle and it's also growing. We have a chance now to make it truly a part of Seattle in a way that it presently is not (if not w/ this #3 I'm proposing then certainly with a 130th Street Station and frequent shuttle service between there and Lake City. Let's not blow that chance.</p> <p>4) I want Seattle to be a place where my children can live and easily get to and from home and work anywhere in the city. ST3 will be a big step toward making that city. I'm looking forward to ST4.</p>
NORTH KING COUNTY	<p>I think bay-to-lake east-west feeder buses should be routed along the following alignments- 45th, 65th, 85th, 105th/Northgate, 125th/130th and 145th. These new routes could feed commuters to light stations somewhere mid route at existing, planned and needed light rail stations. Outside of commute rush hours they could connect various SBDs along their routes to help with easier errand, shopping and appointment keeping. Whether Metro or Sound Transit is immaterial to the regional need. Similar routes could be tried on the Eastside and south of SeaTac. I also think the recent elimination of the Metro #72 route and added runs to #522 and #372 was not done well and would suggest a realignment of the #372 westward to 15th or even University Way for a better smoother connection to Lake City Way. Please forward this comment to Metro transit planners. Light rail can not eliminate all north-south routes which parallel the eventual light rail alignment and we need walk-to-able north south routes east and west of the railline to facilitate transfer to local runs as suggested above.</p>
NORTH KING COUNTY	<p>I'm disappointed that light rail wasn't included in building the new 520 floating bridge. I hope that the bridge is built in such a way to allow light rail in the future. I strongly encourage Sound Transit to consider moving up the Ballard to Bellevue "future study" project in importance and time frame.</p>
NORTH KING COUNTY	<p>Supporting transit oriented development should be a priority.</p>
NORTH KING COUNTY	<p>East-West rail routes in Seattle are a must for long-term growth.</p>
NORTH KING COUNTY	<p>Great plan I like alternate transportation</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	The rail system should run from Tacoma to Everett. Right now I commute from Shoreline to Boeing field Seattle, Seatac south and from shoreline to Paine field there is no option for me to commute using sounder or bus there is no reason that light rail shouldn't run from Tacoma north and Everett south to include stations at Boeing field Seattle and Paine field I am an aircraft technician for Alaska Airlines 14 years on grave yard and there is no option for me and several coworkers that live in shoreline it is dangerous for us ever morning driving home after a 10 hour shift we are tired and exhausted construction on rail running overhead along I-5 should have started years ago what are we awing for.
NORTH KING COUNTY	Ballard to University district
NORTH KING COUNTY	I love the 44 route east-west across town. More east-west connections. North-south is much easier.
NORTH KING COUNTY	This is all about funding Amazonians to get to work in SLU. Let's tax Amazon for all this growth and for their company prohibiting growth of housing and rentals in Seattle. They are the ones with six figure salaries with money to buy property. This city is pushing out artists and nonprofits and entrepreneurs - make this affordable for them, because they are the ones who will use mass transit. Rich people up in Sammamish and Lynnwood will still drive into downtown and on 405 making it congested. Last on the priority list is those areas. We need relief in the 405 corridor, I-90 and the I-5 corridor during peak times. One accident during peak hours makes for hours of traffic. Also, Sound Transit needs to take responsibility for the development around light rail - South Seattle is a poor example of community partnership. The Graham station would only make this worse.
NORTH KING COUNTY	One project I would love is a light rail line from Ballard to UW, stopping in Fremont and Wallingford, where I live. I'm not sure how much demand this has, but it would be immensely useful to me.
NORTH KING COUNTY	Ballard UW should be moved up in schedule
NORTH KING COUNTY	I'm not sure if this falls in the realm of Sound Transit, but I think the bus transit on I-405 would be greatly improved if there were additional stations accessible from the new express lanes (instead of having to fight to get through traffic to get to the "local exits". Additionally, expansion of the 522 lanes so that there is a bus lane that runs all the way (busses get stuck with the rest of the traffic between 145th and Lake Forest Park, and also at the light right in the middle of Lake City). I think it would also be easy to better use the shoulders in Lake City, which currently are only useful for the 2 hour block of time when cars cannot park in them.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Traffic in Seattle traveling East to West is horrible. I was astounded to see a more expensive direct Ballard to downtown light rail line rather than an east/west line connecting ballard to UW and then to downtown which would be faster to complete and less expensive. The buses on NE and N 45th are slow due to horrible traffic and are not a reasonable option. An East to West connection is mandatory. If this is not included in the final plan, ST3 will not be approved by voters. Especially with the embarrassing time line. This is needed NOW. Way too expensive and will take way too long. Also, there is no funding to improve PEDESTRIAN and CYCLING access to existing and planned light rail stations that will be built in 2021. Focus on access to the things built in the near future is more important. The current plan also encourages sprawl. Need to hire consultants from other cities with more successful mass transit.
NORTH KING COUNTY	UW to Ballard is a higher priority than most of this stuff. Light rail should be built in areas where density will support ridership. There is too much emphasis on expansion for symbolic and political reasons. Areas should not get light rail without first agreeing to change zoning to allow dramatically more density around stations. Otherwise, none of this is worth the money.
NORTH KING COUNTY	I would strongly like to see a bus stop added to the E line on Mercer and Aurora. I already take this bus every day, and this would made my daily commute much easier.
NORTH KING COUNTY	Extend the West Seattle line further south, at least to California/Fauntleroy Junction. Otherwise you are not saving much time over current bus routes.
NORTH KING COUNTY	The Ballard to UW Study should be prioritized to be included in the plan. Clearly every subarea wants the projects in their backyard "yesterday" vs. in 20 years. ST needs to up their game on explaining why it will take so long, specifically ST3 funding begins when ST2 funding ends.
NORTH KING COUNTY	Light Rail to Alaska Way Junction should continue further south to White Center or Burien to allow workers who cannot afford to live in Seattle to work in Seattle.
NORTH KING COUNTY	130th st station in seattle otherwise the northgate and 145th stations will be packed and roads arond there will be crowded.
NORTH KING COUNTY	We live by Discovery Park in Magnolia and it is hard to get anywhere by mass transit. I'm disappointed our neighborhood is not even on your 25 year plan. Right now, it is hard for us even to get to Ballard by bus. I would love to take a train to downtown, Ballard, or Northgate from our neighborhood.
NORTH KING COUNTY	Burien and the areas south of the city are about to see an explosive growth period. Getting plans in place now to move this region is paramount. Waiting for another 10 to 20 years would put us in the same situation we are facing in north Seattle.
NORTH KING COUNTY	Connect west Seattle light through Fauntleroy to whit cent and Burien.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>Light rail from Seattle (e.g. downtown, capitol hill) to Overlake (Microsoft campus) is badly needed!</p> <p>I live in Capitol Hill and attend UW and the new light rail system is fantastic. My boyfriend works for Microsoft and commuting between Capitol Hill and Redmond is currently a huge pain.</p>
NORTH KING COUNTY	<p>Expanded bus service and faster bus service needs to be the highest priority. These improvements can come online decades before much of the other proposed work.</p>
NORTH KING COUNTY	<p>Please, please, please build a light rail line from Ballard to UW/Laurelhurst as a part of ST3. We NEED at least one substantial East/West light rail line in Seattle to assist in feasible large-scale navigation of our city via light rail. Additionally, the light rail planned from DT to Ballard needs to be grade-separated to ensure speed and reliability of the line. Finally, We desperately need Ballard to UW/DT and West Seattle to DT light rail added to our system, please do everything possible to expedite these projects within the ST3 package, we cannot wait 22 years for these improvements.</p>
NORTH KING COUNTY	<p>I am glad there are mass-transit projects in the works, but this is not ambitious or inspiring enough (admittedly, I'm not sure how practical a larger plan would be but "improved bus service in 25 years" is lackluster). Especially in context. Public stadia funding makes me sick. A 2000-fold funding ratio of Peace Corps : Defense (\$400 mil : \$800 bil) is abhorrent. Does this take the time it does because of our corruptibility?</p> <p>Pardon me, I'm off on a tangent. As far as transit is concerned, I want a high speed rail line to Portland and Vancouver BC, gas taxes at &gt;\$2-3/gal, bike lanes with green roofs, public electric/pedal hybrid vehicles, far fewer roads and far more green-ways, vertical gardens and public laboratories for K-12 educational opportunities.</p> <p>I'm willing to pay higher taxes and forfeit certain privacies.</p> <p>I want to be able to ride rail along the I-90 corridor to go mushrooming.</p> <p>Sorry, thanks for the comment box.</p> <p>-[name]</p>
NORTH KING COUNTY	<p>Ballard to UW light rail.</p> <p>Ballard to downtown as subway.</p>
NORTH KING COUNTY	<p>A slow regional service is not nearly as impactful as a robust, in-city service, as witnessed by the recent opening of the UW and Capitol Hill stations. It boggles my mind that Ballard to UW is only in the study phase, as I would have that as my #1 priority, and I say that as somebody for whom that particular line wouldn't affect all that much. There is zero reliable, fast east-west transit in the most densely populated city in the region that has massive employment centers. Most suburbanites are in the suburbs because they LIKE their cars and space - transit-oriented development is not going to happen there at the pace it will closer in to the city. A 1 1/2 hour+ train ride from Everett to SeaTac will not have anywhere near the impact as a 10 minute cross-Seattle route that people would mob.</p>
NORTH KING COUNTY	<p>Ballard to UW Bothell via Greenwood and Northgate station and Lake City Way needs to be included.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Add lines traveling East-West in north Seattle/Shoreline.
NORTH KING COUNTY	I can't tell whether the downtown to East Side (Bellevue / Redmond / Kirkland) Link Light Rail is something that is already funded or not, but that would have been to me the absolute highest priority. If it's already included, it would be helpful to make it clearer what's already funded in terms of Link Light Rail extensions, and what has to be funded with a new proposal like ST3.
NORTH KING COUNTY	This all needs to be completed MUCH sooner!! We are paying way too much to have it take this long. We need rail to Ballard and West Seattle NOW! Also the Ballard to UW line NEEDS be added! THIS TIMELINE IS RIDICULOUS!! Rail NOW!
NORTH KING COUNTY	Please make the Issaquah light rail an extension of the I-90 corridor and not have to connect through Bellevue. Downtown Seattle to Issaquah via light rail is VERY IMPORTANT to me.
NORTH KING COUNTY	We need better public transportation from Burien to downtown Seattle.
NORTH KING COUNTY	More east-west transit is needed, especially in the Seattle-Bellevue area.
NORTH KING COUNTY	I'm disappointed to see no UW to Ballard light rail, linking the dense areas of the U District, Fremont, and Ballard where growing numbers of people work, live, and play. I would prioritize this over a Downtown to Ballard route because of the difficulty of getting cross-town in Seattle. Buses can easily run the Ballard to Downtown route on dedicated lanes if necessary, but there is no way to get cross town in North Seattle without getting stuck in traffic, and it's only getting worse. This would encourage even more seattleites to ditch their cars altogether, and would further focus growth and urban density in these core areas, instead of enabling more sprawl.
NORTH KING COUNTY	Light rail running east-west north of the canal is a huge need. Ballard > Fremont > Wallingford > University
NORTH KING COUNTY	I commute from near the Othello light rail station to west seattle every day, and it would be nice to see a bus line that was a little more direct than the 50, which takes way too long. While it generally make sense to have most everything run into down town, there should be an effort to address routes that skirt down town that people still regularly commute.
NORTH KING COUNTY	Why did you leave Belltown out? Amazon is here and the area is growing! 22 years? Ridiculous timeframe. Seriously.
NORTH KING COUNTY	West Seattle needs more transportation options along the Delridge corridor. Consider extending the route of the C Line to hit the Delridge corridor between the proposed light rail station there and Westwood Village. There is only one direct bus from downtown (#120) that goes down Delridge and it is congested all the time despite running every 15 minutes during peak. The C Line is a very nice option and the proposed WS light rail will be too- but only if you live near the Junction. Not everyone in WS lives in that area, and a lot of lower-income people who use public transportation everyday live along the Delridge corridor.
NORTH KING COUNTY	Transportation options for Fremont/Wallingford/Greenlane are missing. This area is plagued by overcrowded and slow buses where service has gotten worse, not better, since light rail started and changes since March 26.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Rail across 520 from University to Overlake. This corridor will continue be insufficiently served by the expansion of roadway once complete and travel from North Seattle to Overlake via bus or rail is simply FAR TOO SLOW.
NORTH KING COUNTY	The bus service to Northeast Seattle was drastically cut back when the University of Washington Link Light Rail station opened in March 2016. This is a real problem for us Northeast Seattle residents, and makes it much more difficult for me to use public transit. Please restore some of the buses to Northeast Seattle; I am having to drive more often to downtown Seattle and First Hill, due to these cuts.
NORTH KING COUNTY	Add Olympia/Lacey area to bus system so that commuting between Seattle and capital is possible
NORTH KING COUNTY	A rail line from Ballard to Bellevue through UW station would have a huge benefit. I cannot believe this is something that is only being "considered for future study". The overall plan takes far, far too long to complete for the money invested. Light rail to Ballard in 22 years? These developments are needed now. A plan that waits 22 years to address that is a complete failure, a complete waste, and isn't really a plan at all.
NORTH KING COUNTY	The light rail lines within the city and across the lake should be implemented immediately. The light rail line between Ballard and the University District should be added immediately. The time lines are entirely too conservative. Denver went from no rail transit to a fully functional system in about fifteen years; why does this take Seattle so long?. East-west travel in this region is exceptionally prohibitive and little is added with this plan to address this situation.
NORTH KING COUNTY	1. Rapid Ride from Ballard light rail station to Northgate via 15th Ave NW/Holman Rd/Northgate Way 2. Increase speed of Rapid Ride D line by removing some stops, and providing capability to control traffic signals
NORTH KING COUNTY	Ballard to University District light rail is the most important thing that needs to be in this package. Right now the commute time by bus from Ballard to UW is longer than that from Ballard to Downtown Seattle, even though the distance is shorter! The east-west transit within Seattle is horrendous and can be improved greatly by light rail. I would suggest getting rid of the additional transit tunnel downtown as well as the Ballard to Downtown light rail, and instead route the Ballard to Downtown commuters through the UW station, considering that it only takes 6 minutes to travel from UW station to downtown.  I believe that a University District to Redmond light rail route should also be added, with a crossing over Lake Washington at Sand Point and stations at University Village, Children's Hospital, Magnuson Park, Downtown Kirkland, and Rose Hill. This could then join up with the light rail to downtown Redmond. I believe ridership on this route would be considerably higher than that on a Bellevue to Issaquah light rail extension, with travel times considerably shortened going from Redmond or Kirkland to anywhere in North Seattle (when combined with the Ballard to UW proposal above) thanks to the more direct routing via Sand Point. Since many commuters in the Redmond/Kirkland area have cars, I think it would also be a good idea to add parking at the stations east of Lake Washington to increase ridership.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>We need to improve the frequency and speed of the current busses/lightrail/sounder options in the local Seattle area. This is a major deterrent to using the existing transit options--they just aren't viable to replace our car. In particular, we live in Wallingford and would love to use the light rail to get to the airport and back, but it takes forever (just the trip from Sea-tac to downtown, nevermind waiting for a connecting bus to our neighborhood.) There needs to be an express route from downtown to the airport. Also, with a family of four it doesn't make financial sense to take the transit option. It costs almost the same as taking a cab home and it takes four times as long.</p> <p>We've lived in New York and are huge fans of public transit and would love to see better transit options implemented here. But we need frequency and appropriate stops/pick-ups to make this something that will get people to adopt.</p>
NORTH KING COUNTY	East-West Ballard / UW / Redmond Corridor (North Lake Washington Study) needs priority.
NORTH KING COUNTY	More east-west connections.
NORTH KING COUNTY	A direct route Sounder link or bus link from Seattle to Olympia via Tacoma should be added to any regional plan to alleviate the I-5 problems near Tacoma. Currently there are virtually no direct routes, other than with Amtrak, from Seattle to Olympia and back on the weekends or even on the weekdays at normal and common travel times. Since King Street Station is often difficult to get to, this creates an incentive for people to drive between Olympia/Lacey and Seattle on the weekends or during common travel hours during the week. Currently changing buses in Tacoma is required and the route times and locations are often inconvenient for travelers.
NORTH KING COUNTY	Deal with South Lake union worsening traffic
NORTH KING COUNTY	bus lines needed Magnolia, W. Commodore Way and Interbay.
NORTH KING COUNTY	Connection to downtown Olympia should be prioritized as part of this plan. Additionally, with the increase in businesses moving to Seattle, these corporations should provide a percentage of funds to pay for the development of light rail and sounder services. I am highly supportive of increasing the rail system in western Washington. I would support higher taxes to get this plan accomplished in 10-15 years rather than the proposed 25. Traffic and population are increasing, the demand is high for these improvements now, let's try and get ahead of the game and create transportation for future growth, rather than catching up to meet current needs.
NORTH KING COUNTY	More transit options. More is better. Donate lanes to buses and send buses everywhere all day all the time. Give bikes right of way on all roads. Give electric cars access to lanes that gas cars can't use. Add trains to every neighborhood in the region.
NORTH KING COUNTY	Overall, I feel the system is prioritizing regional commuting as opposed to urban transit. There is too much distance between the stops, such that you are missing out a large number of potential riders and destinations. With so much urban growth in Seattle, WE NEED URBAN TRANSIT! Please consider adding a stop to the light rail line between Smith Cove and Seattle Center!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	It's a long distance between 145th and Lynnwood. There should be a light rail station at Mountlake Terrace where the great bus station already is operative.
NORTH KING COUNTY	Ballard to university district.
NORTH KING COUNTY	Add more stations and light rail track throughout Seattle instead skipping through most of the city. Look at the new light rail between UW and Capital Hill... those are great stations but skip all the residents in between and makes it worthless for them. It'd be good to add a station in the vicinity of Volunteer Park. Same thing goes for residents north of Ballard. You are just passing them up with a weak solution of having a station or two at on the other side of I-5. Why not improve that side of Seattle by having a track on/under 15th Ave NW? Same complaint can be said about Central Seattle... you are just skipping over them. Wouldn't it be better to have light rail along 23rd Ave to better serve the greater population of that area?
NORTH KING COUNTY	Leverage 520 to link downtown Seattle to Bellevue. Accelerate existing plans on I90 and the stations at 145th. The plan is good but too slow.
NORTH KING COUNTY	As always, Belltown is ignored in all of your plans. Do something about that.
NORTH KING COUNTY	Not building connection between Ballard and UW is a major negative
NORTH KING COUNTY	Madison BRT needs funding! Short term bone for city of Seattle. Study a metro 8 route funding included too.
NORTH KING COUNTY	Phase 3 of transit once again has a funny colored line in West Seattle that might get out of the junction and go through the rest of West Seattle. Of course it's only "investigation". That will make 30 years of "investigation" without any actual transit. It would make a refreshing difference if you would just admit that you're not going to cover the rest of West Seattle. I'm going to vote against this until you get the investigations done. Come back in another few decades when you actually have a plan and not the same pig in a poke.
NORTH KING COUNTY	-Ballard to UW study should be absolutely included, and ST should consider adding the completion of the line into ST3. -All portions of the Ballard-Downtown line should be grade-separated. If you're going to do light rail, do it right.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	The ST3 plan does not do enough to address transportation in the neighborhoods that border downtown Seattle. This plan skips Queen Anne, Magnolia, Wallingford, Fremont, and does not provide any light rail that addresses east-west travel within the Seattle city limits. That's insane. The light rail roadmap needs to help decrease the load on Mercer traffic corridor and anticipate the unbelievable south Lake Union, lower Queen Anne, and Elliot Bay expansion that has already doomed the Mercer road project to failure. Build from the inner city out. Look at Boston or DC as examples (or London). You can't build a manageable system if the areas in relatively close proximity can't access light rail. Running the line along Interbay is probably cheaper, but you're not really expecting upper Queen Anne and Magnolia neighborhoods to access those stations, and I bet there's no parking planned for those stations. So, they will be useless for years to come even after they're built. (Just like the UW station - totally useless). You have to commit to running a line that touches at least either Magnolia or upper Queen Anne or at least SPU. Yes, expensive. But also incredibly necessary to make the light rail actually useful. Please do not assume that people in these neighborhoods are going to use bicycles unless you adopt a model that truly isolates the bikes from traffic.
NORTH KING COUNTY	A light rail stop at the triangle in W. Seattle would be extremely wonderful to have and make my life much easier commuting to and from work.
NORTH KING COUNTY	Monorail!
NORTH KING COUNTY	None of these projects seem to serve central Seattle neighborhoods like Fremont and Wallingford. These neighborhoods have just taken a big hit with the cancellation of route 26 (non-express) making it more difficult to reach downtown from these neighborhoods. I would love to see projects that will look to combat the increased congestion on the busses from downtown to the Greenlake area.
NORTH KING COUNTY	I wish the proposed plan connected more neighborhoods within Seattle, with less of a focus on the suburbs--if there were money for both, that would be great, but I think the urgency is more on the city, given the rapid growth and high demand for housing there. Particularly, I feel strongly that (1) extension of the West Seattle line to White Center/Burien should be included in the current plan, rather than pushed off to some subsequent phase, and (2) the Ballard line should also extend east-west to connect up to U-Link and provide service to neighborhoods between the U District and Ballard.  Thank you for seeking feedback, S3 is a very exciting opportunity for our city!
NORTH KING COUNTY	cross seattle routes. ballard-fremont-UW and magnusson- northgate -aurora-west
NORTH KING COUNTY	You mention pedestrian, bicycle, and bus connections plus parking for stations but nothing is said about auto drop-offs at stations. Surely some of this action might be allowed, cheaper than building more garages.
NORTH KING COUNTY	Please consider extending the light rail from West Seattle to Burien. Thank you!
NORTH KING COUNTY	Ballard to UW Ballard to Downtown to West Seattle sooner

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	I have NO INTEREST at all in paying any additional funds for rapid transit. I have always strongly supported more money for rapid transit. Since the last voter approved initiative in Seattle was passed the 4 bus routes that served me in Eastlake have been cut to 1. Many more people live in Eastlake now than even 5 and 10 years ago during which time we always had 4 bus routes. Now that we have 1 route it is frequently filled to capacity in the morning with commuters to Amazon in South Lake Union. Twice since the service was cut on Mar 26 the 70 has bypassed my stop because it was too full. Transit in this area is run by a completely incompetent administration. Any additional funds to the people currently running rapid transit is a complete and utter waste of money as is all of the funds recently voted to improve sound transit!!!!!! While the sound desperately needs improved public transit you are absolutely the wrong people to be given any further money!
NORTH KING COUNTY	Perhaps this doesn't apply, but why can't we extend the trolley service down Westlake into Ballard? You would get a lot of people from Ballard and many people would cross the Fremont bridge to hop on.
NORTH KING COUNTY	More light rail (Ballard to UW, SeaTac to Renton to Bellevue) less non-light rail ( BRT, bike/ped, parking, sounder, stations) ... accelerated timelines. ALL new light rail lines WITHIN 12 years.
NORTH KING COUNTY	light rail downtown Seattle to downtown bellevue
NORTH KING COUNTY	You need to find a way to reduce the timeline in half. A 25 year plan shows how far behind this area is with infrastructure that is reliably for the future!
NORTH KING COUNTY	Please do whatever you can to ease traffic in the region!!!! I want to pay more taxes and have less traffic.
NORTH KING COUNTY	Please add Ballard to UW. The city has no decent east-west access and desperately needs it. Also, Ballard to downtown needs to be grade separated. And finally, please make this happen faster. 2038 for Ballard to downtown is way too long.
NORTH KING COUNTY	Light rail from U District to Ballard through Wallingford would be awesome - I see that as a survey so I understand it can't be added yet. Just putting that out there. I feel the in-Seattle proper lines are the most-needed because of the insane population growth and job market growth here.
NORTH KING COUNTY	We need more east-west transportation corridors - for example between Ballard and the U-district. The focus to date appears to be North - South commuters.  I would be more supportive of the plan if it included more oversight of timelines and budget and enforceable accountability for our tax dollars.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>It's tremendously important that these services continue to support access to community colleges and other places of education in direct ways so that those who are working and going to school have feasible means of attending via mass transit.</p> <p>I would also love to see this funded via less regressive measures (ie, not simply an increase in sales and property tax, but using taxes from the many corporations whose work force will greatly benefit from these improvements that currently pay little to no tax to the state of WA.</p>
NORTH KING COUNTY	Skip the 1900s technology and move to driverless cars and GPS/cell phone hailed vehicles.
NORTH KING COUNTY	Improve reliability of north Sounder Rail service regarding mudslides. Provide positive direct links to Ballard/downtown light rail from Upper Queen Anne and Magnolia Village.
NORTH KING COUNTY	Ballard to UW, Light Rail stations in Fremont, Light Rail from downtown Seattle to Overlake Transit center in Redmond,
NORTH KING COUNTY	I want a commitment to build the 130th St Station!
NORTH KING COUNTY	Please prioritize funding environmental studies of the Ballard to UW line and the West Seattle to Burien line.
NORTH KING COUNTY	Light rail connecting UW to Ballard via Wallingford and Fremont should be a priority. Also, light rail connecting Ballard to downtown should be constructed sooner than proposed.
NORTH KING COUNTY	<p>The Ballard - Downtown and Ballard - UW - Redmond line options are vital, and should be accelerated.</p> <ul style="list-style-type: none"> <li>&gt;The (huge) body of UW students are especially dependent on public transit</li> <li>&gt;Our regions bridges act as inherent choke points for traffic. So, any tunnel that allows people to circumvent these bridges will prove especially valuable to regional transportation.</li> <li>&gt;Ballard and all of North Seattle are largely disconnected. Extra transit in this area would see vast ridership.</li> </ul> <p>Having ridden the UW-Capitol hill line frequently since its inauguration, I am inspired at the possibilities these projects could bring to our region. The light rail has now replaced driving as the most convenient way to get to Capitol Hill, and huge numbers of people are flocking to it as a result. Wherever transit becomes the best travel option, we will see a huge benefit in reduced congestion, faster commutes, and closer communities.</p> <p>We should also be careful not to hamper future options by building large parking lots surrounding the light rail stations. This adjacent area should also include housing, shops, and the kind of public spaces that people want to visit. I applaud the design of the UW and Capitol Hill stations as fitting with the community of their neighborhood and encouraging a flourishing urban environment.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>Ballard to UDistrict line is urgently needed as well as Ballard to downtown. Build where there is critical mass for usage which will cover more of operating costs due to higher utilization--much more efficient. Add stops in dense south Seattle/central area.</p> <p>No more trolleys. All the disadvantages of a bus and disadvantages of a train with no advantages of either.</p> <p>Build dense and serve areas with lower incomes who depend on bus/train more. Prioritize transit lanes to increase benefits of using transit (faster, more reliable).</p> <p>Change timetable to put most impactful--high volume transit sites come on line first.</p> <p>Find a less regressive funding mechanism. As it is, the burden is going to fall heavily on the backs of working class, rather than the many engineer and investor class residents of the sound.</p>
NORTH KING COUNTY	Do it faster.....

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>1) I'm sure the timeline has been very carefully analyzed and considered, but at worst I think the entire timeline needs to be cut in half. Whatever it takes. Maybe it's not realistic to have around-the-clock work performed in certain areas given the noise disturbance, but every effort should be taken.</p> <p>2) Does the extension to Issaquah run through Downtown Bellevue first? That seems like a considerable travel time increase for any commuter going to Seattle. Granted, if the end destination was Redmond it would cut time. It just seems like there should be a link to South Bellevue TC here.</p> <p>3) I realize the existing Seattle monorail is not part of Sound Transit plans, but I think it should be integrated. Make it usable. The south terminus is already a major connection to light rail and bus service at Westlake. Add one station in Belltown and extend it north to either Upper Queen Anne or to Fremont. Then it's usable. That's all that it would require. There's no reason why light rail should duplicate this existing service. If the monorail ended on Fremont &amp; 46th or possibly took a turn northwest on Leary Ave there would be yet another connection to light rail.</p> <p>4) I have not seen a Sounder station planned for Ballard. This is where the proposed light rail East-West route should terminate.</p> <p>5) Speaking of Sounder stations... any plans for Georgetown?</p> <p>6) I'm sure this will never happen, but I wish there was an additional light rail station on Capitol Hill... either 15th Ave or 19th Ave. Capitol Hill, after all, has the highest population density of any neighborhood in the state.</p> <p>Thanks for your time!</p>
NORTH KING COUNTY	Ballard to UW subway should be on the ST3 project list.
NORTH KING COUNTY	Would really like to see a light rail connection from Ballard>Fremont>UW
NORTH KING COUNTY	We need to develop plans that also improve East-West travel in Seattle, which is currently abysmal (traveling the four miles between Ballard and Northgate often takes 25+ minutes). I'd consider adding more of those types of connections. I'd also like to see the work completed much faster. 22 years to get to Ballard?! That area is bursting at the seams currently and needs light rail much earlier than 22 years. Are there options that would allow this work to be done more rapidly? If so, why have they been rejected in favor of such a slow expansion rate?
NORTH KING COUNTY	Graham Street Station please!!!!
NORTH KING COUNTY	<p>A stop in the Fremont area needs to be a priority in ST3.</p> <p>Additionally, at grade light rail is not a solution. Rail needs to be below grade or above grade so that it does not interfere with the significant existing traffic problems that we currently have.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Express Buses or transit of some sort to South Lake Union and Waterfront (Elliott Ave) from the North. Elliott Ave only has direct service from Ballard and with Expedia coming in, it is only going to get worst.
NORTH KING COUNTY	Ballard to UW and adding more light rail to Seattle is much more important than expanding to the suburbs.
NORTH KING COUNTY	There absolutely needs to be a line between the University of Washington and Ballard.  Please find ways to speed up the timeline on these projects, Seattle and the surrounding area are in desperate need of these projects and the sooner the better!
NORTH KING COUNTY	There is barely enough parking at most Park and Ride stations right now. Adding more access is great, but we can't take the bus if we can't get to the stops.
NORTH KING COUNTY	I suggest adding light rail from Ballard to Bellevue into ST3. East-west travel across Seattle north of the canal is slow and difficult by car and is relatively unsupported by mass transit, compared to north-south travel north of the canal. Currently, only residential streets support east-west travel north of the canal - light rail would not only provide a faster way to traverse Seattle from east to west, it would also reduce congestion on these smaller residential streets. Thanks!
NORTH KING COUNTY	I support projects to help traffic closest to Seattle (Ballard, Fremont, West Seattle, Bellevue, etc.) first before branching out later.
NORTH KING COUNTY	Study for light rail near or along Aurora Ave N
NORTH KING COUNTY	<a href="http://www.seattlesubway.org/">http://www.seattlesubway.org/</a>  We need to do this. ^
NORTH KING COUNTY	West Seattle needs mass, light rail transit immediately. We voted 5 times for Monorail, with it only losing on the 5th vote. Given its geography, light rail to downtown is desperately needed.
NORTH KING COUNTY	More inner city lines should be created to alleviate arterial traffic congestion. A udistrict to Ballard tunnel with stops in Wallingford and Fremont should be in this plan.
NORTH KING COUNTY	An East-West light rail route from Ballard to UW was on the original ST 3 proposal I viewed. As much as I value public transit, I would find it difficult to support a plan that does not involve this route (and a loop with South Lake Union would be even better). This is particularly true given the extensions to Tacoma without addressing Seattle's problems with East-West routes.
NORTH KING COUNTY	Ballard to Downtown faster; get Ballard to UW on there!
NORTH KING COUNTY	There needs to be more connectivity to the east part of the city of Seattle. There should be a light rail station at 23rd and Madison. There is a whole part of this area who could benefit from this.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Light rails should be added from Downtown Seattle to Downtown Bellevue and then divides off to Remond (East) and Kirkland and Ballard (North).  Thank You.
NORTH KING COUNTY	1.A an under lake connection from Sandpoint to Kirkland/woodinville....we need more east west connections,,,2.Direct from Ballard to EAST SIDE. 2 3/ Direct line Everett to SEA TAC with 1 stop stop bus terminal. downtown, 4. An express line or (bus_) from Airport to downtown bus terminal with NO stops every 15 minutes. ( Even with traffic it takes me less time to get to airport in car than taking the "light rail".. too many stops,..). The light rail should have only a few prime HUB spots, BUT there should be express busses from neighborhood centers to get to them. The metro already does an OK job geting people from Ballard to Downtown, a light rail would be redundant, but at prime time two busses instead of one should stop at stops to accommodate overdlow, put rail where there is no bus line in place....like the UW to Kirkland Idea I presented.
NORTH KING COUNTY	Ballard to UW is important. If people want to continue to downtown they now have that option. The tunnel under Queen Anne can come later. X Issaquah should be removed as I think it will promote additional growth in the area and we should limit development in that area.
NORTH KING COUNTY	The fact that the lightrail currently shares tunnel with buses downtown is terrible. Buses break down all the time and even if they only broke down occasionally, this fact makes the light rail. Subway systems are reliable that is why people use them, fast and on time, always. The light rail is meant to be our version of the subway but to operate as such it needs its dedicated tunnel so it can be fast, and on time even at rush hour. Please make it a priority to free the light rail tunnel from buses. This is a big flaw of the current setup but no one seems to see it as big as the problem that it actually is. But if it were analyzed, specialists would find out how problematic this is. Thank you for the opportunity to express my opinion.
NORTH KING COUNTY	A light rail station should be added in the middle of South Lake Union. It's an area many people commute to for work as it has Amazon, Google, and is the center for biotech and research companies.
NORTH KING COUNTY	Grade-separated Light Rail everywhere feasible.
NORTH KING COUNTY	Ballard-Wallingford-U District light rail should be a priority
NORTH KING COUNTY	Ballard to Greenwood to Northgate! Make all things light-rail everywhere! Always! Faster! More!
NORTH KING COUNTY	Extensions between Ballard and the UW should be included, fund study work for future lines, change the Ballard to Downtown proposal fully grade separated, and make it happen much sooner. There is no valid reason for a \$3B project to extend for 22+ years.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	I have lived in the Puget Sound my entire life and have watch the traffic and congestion get progressively worse each year. The greater Seattle area is light years behind in sustainable transportation development and I strongly support the development of reliable, affordable and practical mass transportation. Our quality of life absolutely depends on getting people out of cars and into transit.
NORTH KING COUNTY	There is EXISTING rail corridor and right of way available (and owned by King County) running from Renton to Woodinville. I am extraordinarily disappointed that the most congested intersection in the state (the 167 and 405 near Renton) has been left out.
NORTH KING COUNTY	Access improvements are sorely needed for people who live in Seattle. It seems like we get ignored because there is an assumption that traffic is fine if you live in the city. However, the reality is that someone in Everett has a shorter commute than a person living in Seattle has, especially commuting from the East side. Even more disturbing is the fact that my 13 mile commute to Bellevue is actually SHORTER time wise and EASIER, than trying to commute the 10 miles to Interbay, the future home of my employer.
NORTH KING COUNTY	An express option from downtown to SeaTac, routed parallel to I5 or Boeing field should be priority #1 for any expansion of light rail. The current route with its huge diversion around Beacon is simply too long and too slow to be viable.
NORTH KING COUNTY	Cross town traffic within the city is absolutely ridiculous (Mercer mess, downtown to Ballard, West Seattle bridge) - erasing these issues should be priorities.
NORTH KING COUNTY	light rail that gets people from Kirkland connected into the system to cut back on traffic between Kirkland and Seattle. Also, the route in Kirkland along 108th ave is unbearably slow, figuring out how to reduce congestion in Kirkland should be a priority given the construction and expansion going on within its city center.
NORTH KING COUNTY	Thank you for helping to reduce traffic in our region. This is exciting growth and I support this progress...we are heading in the right direction!
NORTH KING COUNTY	I think the growing communities on the I90 corridor would benefit from greater access to light rail service and would encourage additional transit hubs that serve Issaquah Highlands, Snoqualmie Ridge, and North Bend.
NORTH KING COUNTY	<ol style="list-style-type: none"> <li>1. Add 2 Sounder Train stops - Richmond Beach &amp; Blue Ridge/Ballard. Expand Sounder Train Service - add trains.</li> <li>2. Let's get this done faster! Speed up time-line to 2030. Let's find some federal dollars. Taxpayers would be willing to pony up more if we can get it done faster.</li> <li>3. How about Burien? Long-range plan needs to include Burien, DesMoines, Normandy Beach, etc.</li> <li>4. I don't see much on line for the folks on SR 169. There is so much growth in the Maple Valley area. How can they be linked in?</li> </ol>
NORTH KING COUNTY	More east-west light rail is needed across Seattle immediately (10 year target) such as Ballard-to-UW line.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	as a property owner, I'm very concerned of additional burden with more taxation. I read it is about \$200/yr, \$17/month, it seems reasonable; however we have 42.7% from voters' initiative on property taxes already in King county. This information is from a postcard the county just sent out a few days ago. Good timing.
NORTH KING COUNTY	The buses should only be thought of us a short term solution. This city needs to create a real rail system, whether above or below ground, to make transportation effective.
NORTH KING COUNTY	Seattle needs to keep up with the population increasing. The plans to extend to Ballard and West Seattle need to be done earlier if possible.
NORTH KING COUNTY	I can easily get from Ballard to downtown using the bus already. On the other hand, there is NO viable public transportation connecting Ballard/Phinney/Wallingford to Redmond/Bellevue.
NORTH KING COUNTY	I've lived in another city with more rapid transit options, including light rail and saw the benefits of it. Seattle NEEDS more light rail.
NORTH KING COUNTY	Where is the Ballard to University District Link line??? We need to create an east/west network, not just a north/south spine.
NORTH KING COUNTY	grade separated light rail should be supported and priorities. Make sure as many light rail lines are included as priorities and additional for when there is additional money, support, and things are under budget (like ST2 light rail has been).
NORTH KING COUNTY	UW to Ballard Line
NORTH KING COUNTY	We need these projects completed sooner!
NORTH KING COUNTY	I realize that sound transit's job is to move people around the region, but as a former long time resident of new york city who has lived abroad in places like Paris and Kyoto, I am alarmed at the poor state of intraurban public transit in Seattle and the apparent lack of plans to deal with the city's growth and increased density. Transit is not just to bring workers from far away to work in the urban core, it is essential to the quality of life in an urban area. I've spent much of my life dodging suburban commuter cars, and I'm happy to get drivers out of them, but Seattle needs to move Seattleites and I feel that's where our tax revenues should go. Thanks!
NORTH KING COUNTY	Let's focus on light rail and BRT first and foremost. With the success of U-Link already, we need more light rail to provide reliable and clean service throughout the region and especially Seattle. We can't wait the 22 years to complete the Ballard and West Seattle lines. Also, Ballard to U-District line should be considered as this is a major artery and almost always congested.
NORTH KING COUNTY	Should do North Seattle and Burien studies first and then put these projects at top of list.
NORTH KING COUNTY	The Light Rail link to Everett should come online before the others, preferably with the first go-round.; Everett being the last is too long

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Please consider some east west options for seattle. For instance across the city at Northgate or a north end loop. Support urban living by enabling travel across the city not just north to south as we have always done with freeways. Alhtough I like the express buses they end up on the roads with everyone else!
NORTH KING COUNTY	East-West light rail between Ballard - Fremont - Wallingford - University District light rail from International district to SLU (transit tunnel should leave downtown from SLU/Mercer, not Westlake)
NORTH KING COUNTY	Ballard to UW rail - or, at the very least, funding for study of the route Burien to SeaTac rail Tacoma to Olympia Sounder rail
NORTH KING COUNTY	There need to be more light rail or direct transit options in the Seattle proper area that include all close neighborhoods in Seattle. Queen Anne, Fremont, Phinney, Greenwood, Magnolia, Madison Park--a huge portion of Seattle are being left without valid transit options or any easy options to use light rail. It is imperative that we keep our city connected and not leave great swaths of people behind. If light rail isn't an option, a bus connector (or some other plan) should be made that allows residents easy and direct access to the light rail. A bus that just goes from the neighborhood to the nearest light rail could do this easily.
NORTH KING COUNTY	I live in SoDo, and right now there are very limited transport options for us in our neighborhood. I have to walk to the International District to get anywhere. I think it would be great to have a bus that swings by as it gets off the 99 and maybe heads north on 1st, as the 16 does. I'm not really sure. Right now, I have to walk a mile to get to transportation, which I am fine doing, but it is very unsafe. I would love to have more opportunities to take advantage of our transit system. When I lived in Wallingford, I rode public transport everyday, but unfortunately, that's just not an option for me now.  Thanks!
NORTH KING COUNTY	We need a rail system fast. And parking in order to use the rail system.
NORTH KING COUNTY	Rainier Ave S can be a nightmare to drive on, and I was hoping to see light rail extended through Rainier Valley (along Rainier Ave S). I apparently was fooled into thinking this map ( <a href="http://westseattle4chas.org/wp-content/uploads/2014/04/long-range-transit-plan.png">http://westseattle4chas.org/wp-content/uploads/2014/04/long-range-transit-plan.png</a> ) was the plan for future light rail lines. I would be very excited to see something similar take shape to connect Seattle's many neighborhoods with a singular and fast system.
NORTH KING COUNTY	there needs to be more west -east light rail in north Seattle.
NORTH KING COUNTY	Might be out-of-scope for ST, but additional support for Seattle-specific density would be nice.
NORTH KING COUNTY	Add a light rail stop in South Lake Union -- it would relieve so much congestion on Mercer/Denny
NORTH KING COUNTY	you should study whether you can reach ballard easier by coming from the U district, instead of having to build a bridge over the ship canal

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	There needs to be a more robust system of light rail within the Seattle city limits. Seattle Transit/Seattle Subway blogs have the best proposed plan that I feel will reflect the growth that will occur in the Puget Sound region.
NORTH KING COUNTY	there needs to be an east west line on the light rail such as Ballard to SandPoint vis 65 or 75.
NORTH KING COUNTY	seattle to belleuve
NORTH KING COUNTY	<p>A line from Ballard to the University of Washington would serve more riders then any proposed expansion beyond the city of Seattle. Priority should be placed on building rail where the people are. Priority should be placed on completing projects in Seattle that are needed now. This timeline is too long and doesn't serve areas that need it most. Ballard to Downtown should not be the last project completed. It is needed now. Ballard to the University of Washington needs to be completed as soon as possible and this plan nothing to accomplish that goal. A stop in Fremont will service more people then all the park and rides in suburban puget sound combined. Put Rail where the people are now. Stop wasting money on park and rides in the suburbs that serve only a thousand people a day and the majority of the residents oppose any changes to their car centered life and start building stations in the city where 10's of thousands of people are stuck in traffic and are begging for a real transit system every day.</p> <p>Thank you, [name]</p>
NORTH KING COUNTY	I think Fremont has been ignored here! It's hard enough to get to downtown or the ID from Fremont with the new bus changes but a lightrail would greatly help the area.
NORTH KING COUNTY	It's incredibly hard to take public transit to downtown Bellevue from anywhere other than U-District and Downtown. It would be amazing to be able to take transit directly from Ballard and/or Fremont to downtown Bellevue.
NORTH KING COUNTY	<p>Ballard to UW extension, Belltown/SLU/Capitol Hill/CD/Mount Baker Corridor study (at least).</p> <p>The Ballard line can not be marketed as grade-separated/congestion free when there will be stoppage at the ship canal crossing. This will have a huge impact on reliability and operations for the entire system, not just Ballard.</p>
NORTH KING COUNTY	<p>Please add the Ballard to UW spur line. Without it the light rail is not very usable for Fremont, Wallingford and Greenlake residents.</p> <p>Also, 22 years for one of the fastest growing parts of the city (Ballard) is pretty bad, please move that up.</p> <p>Lastly, why keep the Ballard line at grade? It seems much more forward thinking in terms of congestion reduction to make it below grade.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Connectivity from light rail to bus at major points of transfer (east-west between Redmond, Bellevue, and Seattle), such as at Montlake Freeway Station. Ballard <-> UW light rail station Major overhaul of ID station to allow greater transit throughput. Extend underground transit to 520 bridge.
NORTH KING COUNTY	More Parking! The system needs parking (especially at light rail terminals). As it is, you expect most commuters to take a bus to a light rail terminal. Adding a bus trip to a light rail trip is both time consuming and expensive (2 fares). Most people will just drive instead. No, they won't walk or ride a bike to the terminal. Not in the dark and the rain. The fullness of the current park and ride lots shows that this is a system that works.
NORTH KING COUNTY	Need a downtown Seattle to downtown Bellevue line ASAP. If any way to speed up the process I would opt in for more property tax
NORTH KING COUNTY	I wish the whole project could be implemented on an accelerated timeframe, so we do not have to wait 25 years for completion. I also believe there needs to be light rail or other mass transit between Ballard and Northgate as well as between Ballard and the University District.
NORTH KING COUNTY	There seems to be much emphasis on transit in the suburbs, but the city core transit is far from acceptable, especially considering the growth.
NORTH KING COUNTY	First off, 22 years to get light rail to Ballard?!? Really?!? Transportation in/out of Ballard is already difficult. Waiting 22 years is just impossible.  Second, please consider including additional rail projects in the urban core that connect dense population or employment centers. Ballard and uw would be the top of my list. Have you ever ridden the metro route 44?!? Try it. You'll want the rail link.  As much as I love west Seattle, Tacoma, and Everett, none have the dense centers that exist in Ballard, cap hill, downtown, and u district. Let's focus on those.
NORTH KING COUNTY	There really needs to be more rail in Seattle and it needs to come on line faster. I would love to see a line from UW to Ballard and extensions to White Center and Crown Hill.
NORTH KING COUNTY	Light rail between ballard and UW, down 23rd, along westlake through Fremont and Wallingford and through SODO and south park to the airport should be included and prioritised. Express services from westlake to the airport via the ID and south park should be provided.
NORTH KING COUNTY	Add additional funding to improve ST Express service to quickly deliver more capacity and frequent connections to light rail stations. Growing ridership in future years, prior to delivery of light rail, can only be met with additional bus service.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	A line across the Market/45th East/West corridor would provide transit access to a huge segment of the central Seattle population: Ballard, upper Fremont, Wallingford, UW.
NORTH KING COUNTY	You are forgetting the 45th street corridor from Ballard to the UW and beyond to Kirkland in this plan. This plan is also way too far out into the future. We need rail and transit now not tomorrow.
NORTH KING COUNTY	Seattle desperately needs a light rail connection from Northwest to Northeast. This light rail would preferably go from Ballard to UW (or further north), and connect the two lines.
NORTH KING COUNTY	express bus route from fremont/wallingford to downtown seattle and downtown bellevue
NORTH KING COUNTY	Ballard To UW connection is important for east west connection in the future.
NORTH KING COUNTY	Seattle needs an east west line and it we can't wait 20 years. I'm happy to be taxed more if we have light rail going to SLU to west Seattle through downtown. We need a station serving beltown and need a line going from UDUB to Fremont, Walingford and Ballard and not have it be on grade. It's hard to justify paying taxes for 20 years when we wont be getting any additional service.
NORTH KING COUNTY	The transportation upgrade that would impact me the most, my daily commute to downtown Seattle from Burien and back, is not on the list. King County Metro has massive room for improvement regarding this route. Short buses have been substituted for what were once long buses, resulting in buses being so packed full of standing people that commuters now have to wait for additional buses and hope those are not packed by the time they get on. The buses are also untimely most of the time. Sometimes they don't even show up. It is obvious that King County Metro does not place a high priority on servicing Burien properly. Rectifying this situation would be ideal.
NORTH KING COUNTY	I want to see the light rail go across the 520 bridge from the UW station all the way to Redmond. There is not enough East-West routes for those commuting from Seattle to the East side every day for work.
NORTH KING COUNTY	It is essential that Sound Transit design transit such that customers cannot ride without paying. Currently, it is very easy for people to ride light rail without paying, whether they do so intentionally or because they have to go out of their way to pay. I, myself, have found that I have to go out of my way to remember to swipe my Orca card both before and after I ride light rail, and sometimes I have to look for a place to scan it (risking that I miss my train). I am very supportive of plans to extend light rail, but want to make sure that Sound Transit collects the funds they are due to keep it running for many years to come. One solution would be for people to be forced to swipe their Orca card before going through a turnstile (as in New York Subway) before they can ride. The solution should be incorporated in the design of new light rail stations and should eventually be added onto existing stations as well.
NORTH KING COUNTY	Extend trolley service from south South Lake Union to Fremont
NORTH KING COUNTY	1. Make it easier for people to be good citizens and pay for their rides. 2. Please use caution interpreting the results of this survey. I design surveys for a living and suspect the results will be highly skewed due to lack of a representative sample. In my opinion the people being pushed out of the city due to increasing COL need better public transit the most.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Many thanks for including 522/145th BRT parking and light rail study in the current ST3 proposal. Will do as much as possible to see these transit plans get approved by voters, we are so, so in need of this on the north end. We are really not suburbs as we are a pivotal point between Seattle and the Eastside, and with the growth and housing issues in Seattle, we will see a huge movement out here for people to find more affordable housing and good schools, so let's get going to support all that!
NORTH KING COUNTY	I grew up in Bellevue by Eastgate & now live in Northgate. Seattle is long over due for this great addition to our GREAT city. Have been to other countries/cities where it is so simple to get around & this would do the same for us. Have already taken link rail & found it so relaxing & faster = love it. Hope this will all work out & am again massively in support of this. Best of luck!!!
NORTH KING COUNTY	Please make sure each light rail station is a transit hub, i.e. easy multi-modal link transfer point. I have been trying to use the UW Link station to commute to my work in SLU. It, unfortunately, has not proven to be more efficient than the old bus system. The largest problem is the station was not designed to pull buses up to it as close as possible. I have been riding Metro's route 65 that wanders onto the UW campus, makes a couple of stops on campus to let a couple of students off of it, stop for pedestrians and bikes crossing Stevens Way (and there are lots on campus), and finally stop a couple blocks from the actual station. The other route that is near my home (Metro's route 71) takes even longer to get to the Link station because it makes a trip all the way through the University District. Essentially, both routes treat the Link station as an after-thought. The return bus is about a block from the station. Each route stops at a different location, so there is no central spot where someone could choose the best route to take them as close to their destination as possible.
NORTH KING COUNTY	More more more. Do more. Make more loops. Connect more points together. More money. More stops.  I'll be in my 60's by the time this is done, or 70's.... This is something we need NOW.
NORTH KING COUNTY	Congestion in Downtown Seattle is really bad. Are we able to have underground subway stops like so many other major cities?
NORTH KING COUNTY	More parking options at stations. Connecting to stations from homes that were not built on transit lines is still important. There is demand and it benefits the system to get these cars off the road for the majority of their trip
NORTH KING COUNTY	Really disappointed that a cross town Ballard->Fremont->Wallingford->UW->Redmond Line was left out of plan.  Time frames for light rail are ridiculously long, would probably vote against just based on that and my profound dislike of Bus Rapid Transit projects.
NORTH KING COUNTY	Ballard to UW line!
NORTH KING COUNTY	Speed it up! Planning and construction take time, but we need to move quickly! More for Seattle! Ballard to UW is ESSENTIAL! Seattle needs and deserves a subway.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Study of extending light rail from Ballard to Lake City
NORTH KING COUNTY	The 130th Street station needs to be prioritized if Seattle is to increase residential density. Delaying construction of this station will slow down Seattle's ability to respond to the obligations created under growth management.
NORTH KING COUNTY	1. 45th street corridor, Ballard to u-district, to Childrens Hospital, and to Kirkland and beyond. 2. All of these projects need to be immediately implemented-not future thoughts.
NORTH KING COUNTY	what is planned for the old 520 bridge? could it be "repurposed" for future rail use?
NORTH KING COUNTY	Extend West Seattle service
NORTH KING COUNTY	The light rail to Ballard should NOT be built at-grade or with a drawbridge--we need a grade separated route that does not need to stop for anything.  We should also have a Ballard-U District line to facilitate East-West traffic flow, which is one of Seattle's chief transportation weaknesses.
NORTH KING COUNTY	A north east/west corridor for BRT would also be useful. Light rail will connect downtown to Bellevue via I-90. Having a BRT connection between the UW station and the Bellevue Transit Center would also complete the circle (maybe a BRT station between I-405 and SR520?). I think for a good BRT system, we'll also need to keep and grow the express toll lanes on I-405 and possibly add SR520 to keep the BRT system moving.
NORTH KING COUNTY	Green lake area is completely missing ssing from st3
NORTH KING COUNTY	I don't see much thought put into transit options for North Seattle to Redmond and/or Bellevue. The 242 bus route was recently deleted leaving many commuters stranded and experiencing difficulty finding a fast and reliable route between North Seattle and Redmond. With so many people moving to North Seattle and working in Redmond tech companies, we need more solutions to combat the increase in single-occupant drivers making this commute.
NORTH KING COUNTY	Lake City Way & the surrounding area continues to develop additional housing. The bus routes along Lake City Way are already taxed, it seems the new Light Rail should somehow take this into consideration.
NORTH KING COUNTY	It would be really awesome to have rail (maybe not as frequent, but still usable beyond normal commute times) to access all along the north and south of the sound, past Everett, and past Tacoma. Places like Arlington and Mount Vernon could definitely benefit from having alternative ways to get south, just as I am sure southern communities would enjoy not having to make it all the way to Tacoma.
NORTH KING COUNTY	You have to try harder to connect east-west (Ballard to the U District).
NORTH KING COUNTY	Sounder train should run on weekends
NORTH KING COUNTY	Add Underground light rail from UW to Ballard. Build the Seattle light rail projects first.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	all rail needs to be above grade, especially anything in Seattle, having at grade to Ballard would be a waste. Accelerating these timelines or at least doing something to improve conditions, now, be it allowing shoulder access to transit, or additional dedicated lanes,(by that meaning the addition of a transit only lane, not removal of a lane for vehicles).
NORTH KING COUNTY	More bike lanes protected from cars. Thanks!
NORTH KING COUNTY	I live in Beacon Hill and transportation to large parts of the Central District is only possible on a bike or via two busses, even though it isn't terribly far.
NORTH KING COUNTY	Please consider Seattle Subways recent proposals: <a href="http://seattletransitblog.com/2016/03/31/how-to-fix-st3-so-seattle-will-vote-for-it/">http://seattletransitblog.com/2016/03/31/how-to-fix-st3-so-seattle-will-vote-for-it/</a>
NORTH KING COUNTY	More sounder trains throughout the day from Puyallup to Seattle
NORTH KING COUNTY	Please support central district and areas that depend on public transportation. Transportation options are cut, halved, and otherwise reduced.
NORTH KING COUNTY	More direct routes. In most parts of the city, especially now with light rail, you have to take two buses. For example, it takes two buses to get from Greenwood to Northgate, that's two buses for just around 4 miles of travel. We need more direct routes for use now until light rail if expanded across the City of Seattle.
NORTH KING COUNTY	The traffic is just crazy. Living here since 94', the growth of PNW is understandable it a fantastic place. But we missed the opportunity to put in the infrastructure to move folks around like a big boy City. Let's not fall into our typical MO of analysis to paralyisi. Build it get it done. Note: The answer isn't just mass transit. Car to Go. BMW Ride share. and hope driverless cars. Please go for it but be open to all means to move folks around. CL
NORTH KING COUNTY	Ballard to uw, west Seattle to burien
NORTH KING COUNTY	Light rail connection (west - east) from Ballard to Children's Hospital with a stop at University Village between.
NORTH KING COUNTY	More light rail options within Seattle proper! More east to west options (for example, UW to Ballard) would be great.
NORTH KING COUNTY	need to make getting around Seattle easier
NORTH KING COUNTY	More service from Seattle to north sound cities like edmonds. We live in the UDistrict and my husband commutes to Edmonds. I know this isn't normal, but more commuter options frown Seattle north would be great.
NORTH KING COUNTY	Ballard to UW across through Wallingford should be on this list And I think it should all be done sooner, like within 10 years max. Why the long timelines? Our city is so behind on efficient transportation. 25 years... that's forever!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Nothing has been included that addresses the challenges of traveling east-west within Seattle, namely traveling from the businesses on Elliott Ave/Lower Queen Anne/SLU to Capitol Hill/CD/Madison Valley as well as east-west routes from Ballard to the U District. Transit improvements are desperately needed, particularly ones that address the Denny mess -- a mess that will only worsen when current construction comes online and businesses like Expedia move to Seattle from the Eastside, resulting in more workers funneled onto Denny in their cars. Because of the size of our roads and our geography/built environment that constrains road expansion in these crucial corridors, Metro bus service cannot be the solution here. Instead, we need transit that runs in a tunnel or on an elevated track; hence, Sound Transit needs to champion this project.
NORTH KING COUNTY	main purpose: do whatever to reduce 1 person driving a car to commute between work and home. Seattle should develop massive public transportation plan like the cities such as Beijing, Tokyo, NY. thank you!!
NORTH KING COUNTY	Look at Seattle subways plan. Need to serve dense seattle areas better.
NORTH KING COUNTY	Top priority is UW to Ballard. Also Metro 8 subway. Connect the actual population centers .
NORTH KING COUNTY	There HAS to be light rail from Ballard across to Sand Point. Overlooking that route along with green lake and Wallingford areas is incredibly short sighted. Also, the Ballard to downtown Seattle should be prioritized highest in the plan since the seattle city is growing and more people are moving into these areas than in the surrounding cities.
NORTH KING COUNTY	I believe heavily in the expansion of all public transit.
NORTH KING COUNTY	More parking is urgently needed at bus transit points. All the Park & Ride lots I'm familiar with are full on weekdays by 9 AM. You can't make much of a dent in 60,000 daily car trips with 300 parking spots at each of half a dozen Park & Ride lots.
NORTH KING COUNTY	East/west light from Ballard to UW. The 44 bus is always crowded.
NORTH KING COUNTY	light rail station at 130th - commitment instead of provisional
NORTH KING COUNTY	MONORAIL a monorail system is about ten times cheaper than tunneling underground subways meaning you could have ten more miles per mile cost in a monorail I love monorails and think they a valuable system to consider.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>These projects are quite simply not good enough. There should be a very high emphasis on grade-separated light rail, and the fact there is barely any grade-separated light rail being added in the overall plan is unacceptable. This region needs to consider a better proposal like the one shown from Seattle Subway (<a href="http://www.seattlesubway.org/region.pdf">http://www.seattlesubway.org/region.pdf</a>). I'm incredibly disappointed with the lack of additional light rail options, let alone the lack of extra lines in ST3. Seattle Subway is truly a plan for the future, and ST3 falls incredibly short on what is truly needed.</p> <p>The timelines are also unacceptable. Light rail needs to be implemented long before BRT is brought online. People get excited about light rail and know how great and reliable it is (the new Capitol Hill and UW stations have already greatly enhanced Link). 22 years for a Ballard to Downtown line to open is absurd.</p> <p>I am a strong fan of massively expanding this region's mass transit system. It is very badly needed as the population and neighborhood density grows. That being said, the timelines and new routes shown in this proposal are unacceptable. Sound Transit has failed to capture what the citizens have been asking for and has failed in implementing light rail in a more timely fashion. There is no way I can vote for ST3 in its current state.</p>
NORTH KING COUNTY	JUDKINS PARK CONNECTOR...GETTING FOLKS FROM THE cENTRAL DISTRICT TO DOWNTOWN ON TROLLEY OR LIGHT RAIL AND ALSO TO MOUNT BAKER STATION
NORTH KING COUNTY	My only complaint is that it does not occur over a short enough time frame! 25 years is a long time to wait for light rail.
NORTH KING COUNTY	Include the Ballard to UW line and light rail across the 520!
NORTH KING COUNTY	<p>There should be a plan to connect the SLU transit with the Capitol Hill /Seattle transit. A lot of people dont use the busses because they're unreliable but a consistent link rail that did a loop around the slu, downtown, &amp; Capitol Hill areas would reduce the need for more busses on the roads. SLU transit rarely seems to be used, would be more useful if all of the transit lines connected in a more central place.</p> <p>Overall, looking forward to improved public transit in the area. Would be nice to see it sooner, 25 years is a long time for a very urgent need to reduce the traffic congestion. I hope some of the smaller projects proposed will help in the short term.</p>
NORTH KING COUNTY	We should be more aggressive in linking the entire sound area by rail/subway/bus to the point where you can just go to the station and not worry about when the next one is coming because a new option will be there within minutes if you missed it.
NORTH KING COUNTY	Ballard to UW is a critical east west link in the city, and needs to be a high priority project.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	East/West bound route from Ballard to UW is VITALLY IMPORTANT!!! This needs to be added to this phase of the plan, not delayed for future study. Development to alleviate traffic congestion in the city should take precedence over development in the suburbs. The majority of car-free Washington residents live in Seattle. Prioritizing transit in the suburbs, especially on the Eastside (Bellevue/Redmond/Issaquah), puts the needs of wealthy commuters over the needs of poor city residents who are dependent on transit. The most congested routes currently are northbound I5 from downtown and east/west routes to/from Ballard. Address this NOW and leave the transit for outlying areas in the next phase. You will get more support from Seattlites if you prioritize projects that alleviate our traffic nightmare and provide transit options to those that don't have cars.
NORTH KING COUNTY	Good luck! This is so so so important to the region. I just moved back to Seattle after being gone for 6 years, and the traffic is CRAZY. I am a bike commuter, and support all things mass transit, pedestrian friendly, and getting more people on their bikes. If there is anything more i can do to support this, please let me know: annanoel@gmail.com. Thank you!
NORTH KING COUNTY	1. You ignore E-W routes! Ballard to UW...Eastside to Westside....come on, even Jimmy Hendrix spoke on this in his song about Seattle. If I live in Ballard and want to go to UW I either take 3 buses or go on lightrail downtown and then back to UW. Most successful public transit systems are a web (e.g., DC Metro, Paris Metro, Portland). We don't have a web design. Granted the shape of Seattle is hourglass, and N-S commutes are common, but still, this system should provide better connections. 2. The timing is too long....Seattle should not have to wait this long.
NORTH KING COUNTY	Would love to see light rail in greenwood / Phinney
NORTH KING COUNTY	For helping commuters around. For those who use cycling as a means to commute, the greatest danger are the roads in and around Seattle. Would there potentially be some allocation to improving/fixing roads?
NORTH KING COUNTY	I will support as much light rail expansion as possible.
NORTH KING COUNTY	Ballard to UW light rail
NORTH KING COUNTY	Projects in study should be added. Less study. More rail faster!!!
NORTH KING COUNTY	Build all of this out asap and make the greater Seattle-Bellevue area better suited for population growth, connect more cities and areas, and help get more cars off the roads.
NORTH KING COUNTY	Very happy to see the region moving forward.
NORTH KING COUNTY	A Georgetown light rail station would be amazing!
NORTH KING COUNTY	This plan is not providing enough service to Seattle, in particular to ballard (the timeline is too long) and northwest seattle. I would like to see connection from ballard to northgate, and an east/west line so that it is possible to use the light rail to get around the city (rather than just limited use to downtown from specific locations. I would also like to see increased parking near stations. This current plan is too focused on the suburbs and not focused enough on existing highly dense areas.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Light rail across Lake Washington connecting Seattle and Bellevue should be the highest priority. Second should be more commuter parking (and security) at the light rail stations outside of downtown Seattle and Bellevue. The timeline for any project over ten years is too long. You should be able to build it all by 2026.
NORTH KING COUNTY	Add light rail from U District to Ballard.
NORTH KING COUNTY	Why is there no mention of going across the lake? Lightrail from Downtown Seattle to Bellevue and Kirkland definitely needs to happen, in addition to existing plans. Also I know adding the rapid transit buses is quicker and cheaper, and the needs are definitely real, but I would hope that we would reduce the buses on the roads once lightrail starts to really take off. Buses shouldn't be the option people turn to for much longer. And thank you for the existing lightrail trains, keep 'em comin'! :)
NORTH KING COUNTY	Missing transportation density in the north half of Seattle. Why are we waiting to connect UW to Ballard (and all the neighborhoods in between)? Seattle is *desperate* for an East/West connection.
NORTH KING COUNTY	Light rail routes should be less geared toward connecting districts and cities to downtown Seattle, and should be more geared toward connecting these districts and cities to each other. For instance, Ballard residents often want to get to Bellevue, Kirkland, Laurelhurst, Woodinville, etc. West Seattle residents often want to reach Federal way, Northgate, etc. Creating a transit map with downtown as its center fails to recognize the much broader scope of residents' needs. New York's rail system is notoriously convenient because its rail map is more comprehensive in this way.
NORTH KING COUNTY	Please also have an added extension of Light Rail to Southcenter Mall when adding LRT to Tacoma. As well as having 3 light rail cars instead of 2 to accommodate all the passengers especially during rush hours. Thank you!
NORTH KING COUNTY	I can't believe that this plan has only two light rail projects planned for Seattle and they are going to be 17-22 years away. I understand this stuff takes time, but we need more rail in Seattle and we need it quicker. Seattle is the most important employment center in the region and it's voters are the most important step to getting this passed. Normally we can be reliably counted on to pass transit measures, but I'm not sure about this one. As a huge transit supporter I question it because it gives me so little and takes so long to get it. I want to see light from West Seattle through Ballard start construction ASAP. I want to see a line from Ballard through Wallingford to the UW. I want to see a Queen Anne station. I want to see the Ballard line run all the way up to connect with Northgate. Without at least some of these and without earlier delivery it is going to be extremely hard for me to convince my friends to vote for this. At the end of the day I'll support it either way, but I'm a transit loving fool. For the general population you need to provide something to get them excited. I'm not sure this is it.
NORTH KING COUNTY	Please build the 130th Street Station in North Seattle. It's a long way between Northgate and 145th when you don't have a car.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	The current transit system and the proposed improvements seem to lack usability for the general public if we wish to use it for going to and from major retail centers and other consumer destinations, like movie theaters, sports events except for MLB and NFL events. Most major cities transit systems have both commuter capacity as well as general public usage. The current system falls very short of fulfilling the second criteria which is to me a fatal flaw in your thinking and one that will limit the use by the general public, not the commuter who seems to be taken care of now and in the future.
NORTH KING COUNTY	Would like to see light rail service to Boeing in Everett. Currently, there is 1 bus that services Boeing and goes along I-405 only, none on I-5 side. Also, would like to see more buses connecting Northgate to Lynnwood/Everett, since there will be light-rail station there in a few years.
NORTH KING COUNTY	I cannot believe this plan. The timeline is outrageous, but more egregious is going all the way to the extreme suburbs, which won't gain much ridership, before improving Link service in Seattle, which will benefit everyone, including the suburbs. Ballard to UW should be the first priority. Turning the KC Metro Route 8 into a Link line should be the second priority.
NORTH KING COUNTY	Lots of students from UW live in Ballard and Fremont. Would be nice to consider a line from the proposed Ballard station to UW. With the current layout, if I was still a student, the bus would probably be quicker than taking the light rail from Ballard to Capitol Hill then to UW.  In addition, I know its a huge project to take on, but the timeline is just so far out, it is really hard for people to conceptualize it.
NORTH KING COUNTY	There needs to be a light rail station closer to the Greenlake or Greenwood area. There are no fast buses that go through those areas, and many residents work downtown, but live north.
NORTH KING COUNTY	There need to be more park-and-ride lots built in the greater Seattle area so people who need to drive 1-5 miles to use these options can utilize them. For example, the University light rail station has no park-and-ride lot for commuters in the Laurelhurst/Windermere/Hawthorne Hills/Wedgwood/Bryant neighborhoods. A quick trip downtown from Sand Point requires a 7 minutes bus ride, a 10 minute walk and another 7 minute train ride. This isn't helping to get people to use transit. More park-and-ride lots are needed IN THE CITY.
NORTH KING COUNTY	Burien needs a light rail connection to Seattle and beyond - efforts should be made to increase express transit options to and from Burien.
NORTH KING COUNTY	Develop transportation for those who work where they live, incentives should be toward intelligent urban environments.
NORTH KING COUNTY	Ballard to University would have the greatest impact on ridership. I'm disappointed that the ST3 plan seems to be designed to build outlying support, rather than staging on the basis of where the greatest demand already exists. Focus on the core from downtown out, then do the outlying areas.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Prioritize light rail to Ballard. 22 years is ridiculous. All subareas should contribute to the downtown tunnel, which is only needed because of riders from other subareas. Eliminate Boeing Access Road station - that should NOT be funded by North King.
NORTH KING COUNTY	More! Faster!
NORTH KING COUNTY	Why do we need such massive, expensive stations; which take 5 years to build? Track miles, number of stations and decreasing time of construction are much more important to me than having large stations everywhere (like Capitol hill, baker city, u district, Roosevelt, etc.
NORTH KING COUNTY	i may have missed it in this survey, but need to increase the frequency and hours (should continue to run later so people can go out in the evening) of existing busses that connect riders to light rail like the #50.
NORTH KING COUNTY	Add light rail between Burien and Sea-Tac Airport
NORTH KING COUNTY	We need an West-East light rail line that runs from Ballard to Fremont to UW. Traffic is so bad along that stretch.
NORTH KING COUNTY	I live in North Seattle, around 85th and Aurora. I work in Fremont. From what I can tell, at this rate, I should expect meaningful improvement to my commute sometime around the year 2085.
NORTH KING COUNTY	Investment/research in below-grade rail transport through and around Seattle--Seattle needs subways!
NORTH KING COUNTY	I want to see the Ballard spur someday, connecting Ballard to Northgate.
NORTH KING COUNTY	Something should be done to improve transit within the city, especially within the city core. I would support (and be willing to pay for) more bus routes, more buses on each route, and/or light rail availability within the city. It should not take me an hour to ride the bus just 3 miles. I might as well just walk at that speed.
NORTH KING COUNTY	Transit across I-520 from Seattle to Redmond is critical.
NORTH KING COUNTY	Ballard-UW
NORTH KING COUNTY	increased access for low income and disable people to access transportation including subsidies
NORTH KING COUNTY	Ballard-UW improvements (reserved right of way LRT, which I would prefer, or RROW BRT as a short-term measure). The 44 is slow and overloaded and needs fixing.
NORTH KING COUNTY	More sense of urgency should be put on adding lines from downtown to Ballard and west Seattle for those that are already paying premium cost of living by choosing to live close to the city. Those that live outside the city are being rewarded with more affordable living expenses that a far distance but already with better mass transit opportunities (sounder, link from south to downtown).
NORTH KING COUNTY	Something that improves cross town commuting, like Ballard to UW or Sand Point, Lake City or therabouts to Capital Hill or Beacon Hill. Routes that do not require riders to go through downtown when their destinations are elsewhere.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Within downtown Seattle 'core neighborhoods' (e.g. Capitol Hill, Queen Anne, Ballard, etc.) better options for neighborhood-to-neighborhood transit options with better travel times. Today, it's typically a significant time savings when driving as opposed to transferring to 2-3 buses and walking to reach one's destination. Also, an overall a report summarizing projections for improvements in traffic, travel times/time tables, and increase in capacity for moving transit-goers would help the public understand the predicted effectiveness behind each proposed project (otherwise, it's difficult to put many of these into context).
NORTH KING COUNTY	I think the development within Seattle, particularly to west Seattle is the most important and should take priority. The 17 year time line is very long and I would support measures to make in city development happen more quickly.
NORTH KING COUNTY	It would be great to see some light rail options on the north-south corridor parallel to 99/Aurora. Either that or ensure the express bus line services the light rail in Ballard/UW simultaneous to that development.
NORTH KING COUNTY	CONNECT BALLARD AND UNIVERSITY WITH LIGHT RAIL INCLUDING WALLINGFORD AND FREMONT STOPS! Also, expedite the west Seattle and Ballard lines.
NORTH KING COUNTY	Light rail needs to be more than commuter rail. It should enable people to live with needing a car.
NORTH KING COUNTY	23rd and Jackson with the new developments would be a perfect place to connect the light rail from the beacon hill station to 23rd and Jackson to Capitol Hill or stadium
NORTH KING COUNTY	Connect UW to Ballard!!
NORTH KING COUNTY	My biggest suggestion is that there be sufficient parking at each of the stations for the surrounding neighborhoods. I live in Burien and would take the LINK in to work EVERY DAY if the parking lot wasn't full by 8:15 (I report to work at 9:00). I am super frustrated that only 600 parking spaces were put into that station, so my biggest suggestion is to include sufficient parking. I think people would be more likely to take public transportation if it didn't take an hour to get from their homes to the nearest transit station (it would take an hour for me to get from my home to the Tukwila International Transit Station using public transportation. It takes me 7 minutes to drive. I HATE mornings, so you'll see where this is an issue and why I drive to work nearly every day, though I would prefer to take public transit).
NORTH KING COUNTY	The LRT line from Ballard to UW needs to be shovel ready, if not built with ST3. Seattle needs more LRT now, not in two decades. The suburbs are not dense by design and should not be prioritized over the dense areas of Seattle.
NORTH KING COUNTY	25 years is a ridiculously long time. I'm glad that we're thinking that far out in the future, but it will obviously do nothing to improve commute options in the interim. To that end, I think Sound Transit would be wise to consider adding (and possibly removing) bus routes in our region. In particular, the mercer corridor in South Lake Union is in desperate need of bus service! There are today in the neighborhood of 25,000 people who commute daily to this region. In 3-4 years, this is going to grow to 40,000. And yet there is not a single bus that runs down Mercer Avenue? We need to fix this <u>_now_</u> .

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Ballard - UW should be considered as a project in ST3. If it is not, it should be shovel-ready in case funding is made available. Due to a lack of East - West high-capacity transit, this would be the most useful project in the region. Adding east-west high-capacity service in south Seattle is also necessary.
NORTH KING COUNTY	Extremely important to extend the planned light rail West Seattle line down to Burien, including a stop in White Center.
NORTH KING COUNTY	Bus Rapid Transit (BRT) service in the corridor from Woodinville to Shoreline; Three 300-car parking garages in the corridor, including one in Lake Forest Park; Two BRT stations in Lake Forest Park; Sidewalks on both sides of SR 522 in LFP to allow easy access to and from the stations; Completion of the unfinished segments of Business and Transit [BAT] lanes; Plans to construct these improvements by 2024, as light rail is ramped up along the north I-5 Corridor.
NORTH KING COUNTY	If you have had the opportunity (which occurs daily) to wait for a long time on NE 130th before entering I-5 any time of day, then the NE 130th station is necessary. Through the years what has always amazed me about any Seattle or regional construction projects are the inefficient use of tax dollars by the REDOs and INTERRUPTs of once completed projects because of the lack to understanding of local use and patterns. From the beginning through, comprehensive planning would provide a better impression to the taxpayer. Be wise and heed our past mistakes in this area.
NORTH KING COUNTY	There needs to eventually be a light rail replacement of the Metro E line.
NORTH KING COUNTY	A u-district to Ballard link line with a stop in Fremont would expand access to a disconnected area
NORTH KING COUNTY	A light rail service along the I-405 corridor would be ideal, or at least an express bus service from Renton thru Bothell and Renton thru Seattle would be appreciated. The east side (upper Kenndale) is always jammed up and causing residential streets to be backed up for miles. Reducing the amount of cars and offering express bus services for commuters on the east side should be a higher priority than adding light rail where corridors are already receiving working transit services. This would be something that tax-payers would extremely benefit from!
NORTH KING COUNTY	In addition to adding to the frequency of service during rush hour, as a commuter who sometimes needs to work late at night - it would be very valuable for me if there are transit options to get to various neighborhoods with more frequency during late night hours, or other steps taken to increase the safety while people wait at bus stops. I leave work at 10pm and am often waiting for 30+ minutes downtown for my next bus to come, and then there are two different busses going to West Seattle within 5 minutes of each other. I believe more people will rely on public transportation if they feel safe getting home at later hours.
NORTH KING COUNTY	Kent/Renton to seattle downtown should have a direct bus lane on I5
NORTH KING COUNTY	There needs to be much better EAST<->WEST transit in this town. Takes 3x longer than going north/south
NORTH KING COUNTY	Light rail Stop in Bryant/children's hospital
NORTH KING COUNTY	Light rail across 520 should be a high priority.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Speed up the projects. Good job on UW expansion!!
NORTH KING COUNTY	I would like to see, selfishly, more stops added to Seattle. Right now it feels like a railway, I would prefer it to be more similar to a subway. A way to get around Seattle in addition to getting outside of Seattle.
NORTH KING COUNTY	There must be a way to make this happen faster. We need a light rail system now and also in the future. Is there a way to speed up the process?
NORTH KING COUNTY	Bus system is really the weak link. Take way too long, come too infrequently. Metro seems wedded to big busses as opposed to frequent busses.
NORTH KING COUNTY	Build the 130th St. Station now, when costs are low, rather than waiting for traffic to become truly horrible and the required studies have expired making it much more expensive to do. Support it with Cooperation with Metro to quickly move buses between Lake City and Bitter Lake, where densities and populations are quickly increasing without adequate increases in transportation infrastructure.
NORTH KING COUNTY	Please put the 72 bus back. I live at lake city way 145th new new bus routes are horrible here now
NORTH KING COUNTY	Canyon park area may need more than just additional bus service as it is a business hub that is very crowded and difficult to get in and out of.
NORTH KING COUNTY	Should be building Ballard to UW.
NORTH KING COUNTY	We need the Ballard line ASAP! This should be a top priority. Buses continue to be a disappointment. We need light rail as the priority!
NORTH KING COUNTY	Extend Sounder service to Olympia, connecting the state capital to puget sound transit network.  Budget: I worry about the cost. How did you create the \$200 a year estimate? Will fares to ride change? Who will pay these increased taxes? Is it everyone in the counties served by the extended network? Or only those living in the cities?
NORTH KING COUNTY	Connect Ballard and Northgate
NORTH KING COUNTY	Ballard to UW / Bellevue line should move WAY UP in the timeline, as a near-the-top priority. There are currently NO east-west plans in Seattle except for the West Seattle to SODO line! There are already many options for going north-south, with freeways, highways, bus lanes and now upcoming rail. But there are NO plans for options, even now, for getting across town east-west in the north end. Ballard and UW are logical major stops for this east-west line, with other stops in between.
NORTH KING COUNTY	1. LIGHT RAIL along entire 405 corridor or LIGHT RAIL (ringed) around all of Lake Washington (see Oslo, Norway and how they have recently built a subway that rings around the city. 2. Additional train service for outlying areas that connect to the ends of the light rail lines.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Self-serving project, but I'd love to see BRT run from the Mt. Station up to the new U Link station (up 23rd Ave., with prioritized signaling). Also, get that new downtown tunnel going ASAP. Have a SLU stop and keep the runs from West Seattle and Ballard grade-separated.
NORTH KING COUNTY	Some kind of link to the phinney neighborhood would be great. Such in the middle between ballard lightrail and Ravenna with no east/ west public transport in-between.
NORTH KING COUNTY	Please make the South Seattle Light Rail Station not on the street. It makes it hard to get to, a bunch of accidents happen right in front of the train...  Also, please focus on Seattle - Ballard - SLU - Downtown line. We REALLY need this.
NORTH KING COUNTY	It would be really helpful to have transit available for non-commute times.
NORTH KING COUNTY	The north Seattle to downtown route (primarily the E line) also needs attention. Every bus is currently packed as early as 7am. Perhaps more buses are needed, or a lightrail option that connects north Seattle with downtown.
NORTH KING COUNTY	Our region already has or is working on multiple solutions for north-south mobility. Connecting outlying cities to the core is very helpful, but fails to address the 800-lb gorilla in our midst: East-west mobility across Lake Washington is still severely constrained. This ST3 plan does not adequately address this problem. Adding light rail service across Lake Washington would be the #1 mobility improvement for the region. I'd strongly support a serious proposal for light rail service across Lake Washington and urge ST to prioritize this ahead of most or all other proposals in ST3.
NORTH KING COUNTY	I strongly oppose the current ST3 plan and would never vote for it or pay for it. It will not solve our transit issues in the region. ST needs to focus on giving buses highway priority and bolstering the sounder to help reach Tacoma and Everett, not on building a time prohibitive light rail on the spine of i5. You really think people will take an hour and a half light rail from downtown to Tacoma? Focus light rail projects on cross city routes and leverage existing transit options for suburbs (where people drive more anyway). Also, please add in a Ballard to UW option. That would be faster and gain more ridership than a Ballard to downtown option, and would still get people from Ballard to downtown quicker than the d line, allowing for riders from Fremont, Wallingford, uw, and cap hill along the way! I hope you will take these comments to heart and that this is not just a check the box activity so you can go do whatever your suburb heavy board wants you to do vs. what the people and city need.
NORTH KING COUNTY	Light rail from Ballard to uw needs to be added to the package. I would not be opposed to additional taxes in order to fund the project. Projects need to be completed in order of most use to least use
NORTH KING COUNTY	Ballard to Greenwood Light Rail Extension
NORTH KING COUNTY	We can't wait over 25 years for a UW - Ballard line. It has to be in the final ST 3 plan! Save money by improving BRT to South King and Tacoma, don't build light rail there. Expand BRT options and Sounder service to those communities for more reliable transportation options.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	I believe that sound transit should focus on more inner city stops.
NORTH KING COUNTY	There should be Sounder service to Olympia!!! Why are we considering connecting DuPont, a city of 8,200 people, but not OUR STATE'S CAPITAL, which is only 14 miles away from DuPont and 30 miles from Tacoma, a city of 46,500 people??? Because the legislature is part time, many representatives and their staffs commute most of the year from their districts, many of which are concentrated along the I-5 corridor. Jobs with the state government have a difficult time attracting young people in large part because the commute from the Greater Seattle Metro Area to Olympia is so arduous. If we want to have the most talented people filling important state jobs, we should include better mass transit from Seattle and Tacoma to Olympia. This would be an ENORMOUS priority for me.
NORTH KING COUNTY	Light rail from west seattle to everett, going through downtown is essential for long term career family and young families to commute via mass transit for work. Extend mass transit to low housing cost area to help workers grow their travelling footprint without the use of a car.
NORTH KING COUNTY	Charge more light rail to Ballard sooner
NORTH KING COUNTY	The yellow dotted line connecting Ballard to UW to the eastside is something I would want to know more about and think should be considered, especially with Ballard and UW potentially being connected via the light rail (now or in the future).
NORTH KING COUNTY	I used to be a supporter of the light rail projects, but having experienced the reductions in service that accompanied the opening of the U district/Capitol Hill light rail stations, I now realize that Sound Transit and King County Metro have a poor grasp of how to improve transit in the Seattle metro area. The traffic and mass transit problems in and around Seattle need to be addressed in the short term as well as the long term. This plan is silent on existing services and whether those services would be preserved as new BRT and light rail projects are completed. The fact is, existing services within the city of Seattle are already inadequate in many places, and very little of the ST plan addresses that in any reasonable time frame. Please add to this plan a clear commitment to preserving AND IMPROVING existing bus service across the Seattle metro area.
NORTH KING COUNTY	LRT along Kirkland Rail Corridor
NORTH KING COUNTY	There should be a light rail connection between Bothell (e.g. UW Bothell) and the UW Seattle light rail station.  There should also be increased transportation between Ballard and UW Seattle. Although UW Seattle has a light rail station and Ballard has a planned light rail station, access to these stations is still limited for people living between the two (Fremont, Wallingford, Phinney Ridge, Greenlake). Perhaps the 44 bus route (the only one going through this area toward either light rail station) could be enhanced with increased reliability or frequency. Or perhaps another Rapid Ride line can be added between UW Seattle and Ballard. In addition to improving access to Light Rail stations, this would help many UW commuters.
NORTH KING COUNTY	Please improve the connection of West Seattle to Seattle\Bellevue.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>I strongly urge Sound Transit to move the 130th Street Station out of provisional status. The 130th Street station has long been advocated for and needed in our North Seattle community. We are transit dependent. We work downtown. We need a lightrail stop between Northgate and 145th st. We are tired of paying taxes to help transit without seeing much return. North Seattle will not vote for ST3 without seeing some local investment.</p>
NORTH KING COUNTY	<p>I understand that organizing a project like this across three counties is extremely complex, but it seems to me that Pierce county and Seattle residents are getting a pretty good deal, while East King and Snohomish residents aren't getting much value at all. I think that the limited scope and long timeline alone on the Everett and Issaquah plans make this a non starter for these communities: I don't understand why light rail would go to Issaquah, but leave out the Highlands; or why it would get to Everett, but not continue to Marysville. If anything, I think a Marysville to Payne Field connection through Everett might come first before connecting the spine like in Tacoma. I don't think the Seattle improvements are sufficient for Seattle demand over this timeframe either. In my opinion, the Ballard route needs to continue east to UW, and the West Seattle route should continue to White Center and Burien by the end of 25 years, and I would love an exploration of a new Lake Washington crossing from Sand Point to Kirkland - which would be a route I would use most.</p> <p>I am for expanding this system, for paying for it, and for waiting for it, but I am very concerned with the inflexibility of a 25 year plan. I would be more in favor of a smaller project with a shorter timeline to increase future flexibility, or a bigger project with a similar timeline to broaden reach. However, as it exists, it seems to me that this project is promising a whole lot of people that they're not getting transportation help for the next 25 years, and that this will engender more ill will among those people than good will by those who will get transportation help for their children.</p> <p>I'm also concerned that a lot can change in 25 years. Transportation logistics may be totally different in a time of self-driving electric cars, or this technology may fizzle out. New employers may spring up in unexpected locations, or they may expand in predictable places. Sound Transit has the exciting opportunity to help shape this dynamic for our region, but needs to be adaptable as the region grows and changes. In the end, whatever we build, the I fully believe the region will be better for it, I just want to make sure we do all we can to get the most long term benefit.</p> <p>Thank you for taking the time to read my comments, I hope they can be useful.</p>
NORTH KING COUNTY	<p>East-west transit in Seattle (e.g., U District to Ballard).</p> <p>Biggest issue with this plan is a 25 year completion date. This is criminally embarrassing. Make the unpopular decisions to work through the night, disregard noise abatements, and get the job done so Seattle can have a functional transit system. Using today's needs as proxy for the needs in 2041 is irresponsible and unfeasible.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	ST3 should consider a tunnel from UW to Ballard, rather than coming through InterBay. And projects involving Ballard and SR522 should be first because they by far benefit the most people, are the most economical on a per rider basis, and do the most to relieve traffic for people who are responsible enough not to buy a monstrous house in the suburbs.
NORTH KING COUNTY	Let us vote for each type of transit independently.  Let me vote for only light rail, only buss service, and only train service. Let the voters decide.  As is, I will not vote in support of ST3
NORTH KING COUNTY	We really need better east west transit. Ballard light rail to downtown is a good start, but replacing the 44 with a light rail track would be even better
NORTH KING COUNTY	Busses and trains need to be better equipped for bicycles. Bikes allow users to better "personalize" thier tranisut use, since inevitably transit cannot go everywhere. However, currently busses (particularly Express busses) often have full bike racks, and the Link train can only accomodate one bike per car. These are woefully insufficient for bicyclist needs.
NORTH KING COUNTY	Parking garage should be built at International Blvd station in Tukwila to handle more car parking.
NORTH KING COUNTY	(1) I feel EXTREMELY strongly that the Ballard<->UW corridor should be added as a provisional project in ST3 and not a "future investment study". This is an important transportation corridor that's extremely congested but difficult to fix at grade. If it is delivered before Ballard<->Downtown is completed, it has the potential to deliver some of those commuters to downtown via a transfer, and it will boost ridership on the Ballard<->Downtown line once opened (since it can draw from Phinney/Wallingford riders.  (2) Ballard<->Downtown needs to be grade separated, and tunnel either below Ship Canal, or be on a high-enough bridge that it won't need to be raised. Such a critical transit corridor should not be subject to the vagaries of ship traffic.
NORTH KING COUNTY	I'd like to see the west seattle and Ballard rails moved up to the eight year mark. Generationally it makes much more sense and would be used most often by locals, commuters, and tourists. It would also bring in a lot of capital for those neighborhoods.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	In-city light rail stations need 8-story building heights in immediate vicinity. Most important thing that can happen. 520 and 405 need light rail ASAP more than BRT. The 405 rail corridor should be trains not trails. Dumbest decision ever by King County that never should have been allowed Sounder trains need more frequency and better parking/local connections at Sounder stations There needs to be better connections from the ferry terminal MetroKC needs to be moved under Sound Transit so there is a single transit agency Sound transit needs to license coffee/food carts to operate on station premises Overall, all light rail development should focus first on alleviating traffic jams on freeways over service to cute neighborhoods like Ballard that the city can serve faster with streetcars.
NORTH KING COUNTY	A line/link/station in Fremont should be included, instead of bypassing this dense and vital neighborhood!
NORTH KING COUNTY	I think it would be better to prioritize linking UW with Ballard, with a stop in Fremont, than to prioritize linking Downtown with Ballard
NORTH KING COUNTY	The connection between Ballard and the UW should be urgently considered in ST3 and not just studied. UW/UW Medical Center is one of the largest employers in the region, not to mention there is a large number of commuter students going to the university. I am willing to bet that a large number of those commuters come from the Ballard/Wallingford/Fremont ara. There is no way to expand bus service from Ballard to UW given geographic restrictions. By providing a below or at grade light rail alternative servicing Ballard/Wallingford or Ballard/Fremont, Seattle could drastically reduce the crosstown traffic chokepoints at 45th N or 50th N and the I-5 on/off ramps. Another idea is to connect light rail through Leary Way and through Gasworks to UW Medical Center and then provide increased bus service from Wallingford/Greenlake/Ballard to get to those stations. Ignoring this crucial crosstown link for one of the largest employers in our region seems short-sighted, especially since many UW employees and students are likely to make Ballard/Wallingford/Fremont their home.
NORTH KING COUNTY	There should be a light rail stop in first hill. This will help folks commute within town and also help folks go to and from all the hospitals. We need to keep all things off the street and have them underground. Adding more buses and street car is a waste of time and money. It only adds traffics and delays.
NORTH KING COUNTY	This schedule is too slow, we need to implement these improvements and extensions of mass transit in the next ten years, not 25.
NORTH KING COUNTY	Please do Ballard to Downtown ASAP (before my toddler is out of high school!). Plus, we need Ballard to the U District as well. That project could be done first if the hold up is a new downtown tunnel.
NORTH KING COUNTY	We need more east west rapid transit in the Ballard - Univ of WA corridor, like the one proposed by the Ballard Subway.
NORTH KING COUNTY	Better support SODO and Georgetown area - additional Light Rail station further south of Existing SODO station - Georgetown area
NORTH KING COUNTY	Nothing here to alleviate crosstown movement in the north end. U district to Ballard. It's a huge bottleneck.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Light rail from Mount Baker through Central District to Cap Hill
NORTH KING COUNTY	I know that the city of Seattle is a strong proponent of social justice. The Lake City region is home to an ethnically diverse population that would benefit from light rail. I hope that this disadvantaged community is kept in mind when studying and planning future light rail stations. Also, the map of Sound Transit seems to purposely leave out areas that will NOT receive new infrastructure. This is misleading and a clearer map of Seattle with public transit overlays should be displayed!
NORTH KING COUNTY	Seattle to Ballard route should include better stops that service Queen Anne.
NORTH KING COUNTY	fully approve 130th St station to be built by 2023
NORTH KING COUNTY	The 130th station in North Seattle should be included as a fully funded project. Northeast Seattle is not being well served by the plan as it is, with BRT on 145th bypassing a major population center, and the closest connection to rail for NE Seattle residents being available only at a highly congested point of access via Northgate.
NORTH KING COUNTY	Connect Ballard light rail to the east side of Seattle (U-District stations) for easier east-west travel.
NORTH KING COUNTY	I do not understand why the station at NE 130th Street is provisional. If 98125 doesn't get that station, why should we tax ourselves so everyone else has transit???
NORTH KING COUNTY	I would love to see light rail to the Burien Transit Center, connecting to Tukwila and Seattle. Also, if there's any way to speed up the projects, we should. 22 years is too long to wait for such incremental change in a booming region on the verge of becoming a major economic powerhouse on the Pacific Rim. In 22 years, when the projects are complete, this system will be too small again.
NORTH KING COUNTY	I wish there was a plan for a light rail that extends to south seattle areas, like Georgetown, South Park, Boulevard Park, White Center, that is walkable from those neighborhoods. I live in Boulevard Park currently, and Commute to Fremont. I'm fortunate enough to have a parking spot at work, and I drive a fuel efficient car, but traffic is terrible via 99, and I don't think that the tunnel is going to improve it commute times, just force people to have to pay for it. I have tried taking the bus, but the time that it takes is far too long. These neighborhoods are chock full of affordable houses, and I think it would help the economy and spread out desirable housing in the south end of Seattle if there were easy traffic options.
NORTH KING COUNTY	Bring the link to Olympia would be awesome!
NORTH KING COUNTY	Projects to Olympia
NORTH KING COUNTY	Light rail across 520
NORTH KING COUNTY	The plan to choose Alaska junction over Delridge, and to postpone White Center/Burien privileges the demographic who already have access to transportation and higher income. At the very least, the 120 should be made a Rapid Ride. Seattle is wasting money on projects like the tunnel that should be invested in truly increasing access via light rail on a much shorter timescale.
NORTH KING COUNTY	130th st station Gould be added to the plan
NORTH KING COUNTY	The light rail station at 130th St NE should be included and funded to be built by 2022.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Prioritize connecting Ballard and West Seattle! Beyond that, we need to incentivize ridership to alleviate car-centric transportation models. Furthermore, we need more money for bicycle infrastructure and must provide adequate money to do so.
NORTH KING COUNTY	This project in no way addresses the huge number of people who rely on public transit between the W Seattle Junction and Burien. I would like to see either a proposed extension of light rail or an expansion of RT buses that would allow for north-south travel along Delridge or Ambaum. As there is no proposed expansion to parking at critical nearby stations such as Tukwila or West Seattle, there is no way for the community that needs the public transportation the most to actually access it.
NORTH KING COUNTY	I am a pragmatist, and realize that political realities exist. I want to invest heavily in long term transit, and not every part of it will ever directly benefit me or my children. But transit benefits society, and that in turn benefit everybody. Seattle is right now a boom town, flush with cash. If we can't do this now, we will never be able to. And it is indeed an investment, which will pay for itself many times in the next 100 years, long after we are all dead. And that is our shared legacy.
NORTH KING COUNTY	My biggest concern is improving timing/frequency of current bus and light rail routes. Congestion downtown, including the Westlake tunnel area, is absolutely terrible. People are not going to want to switch to mass transit if it takes three times as long as driving (especially by adding more stops to the current light rail route).
NORTH KING COUNTY	cannot vote for plan that does not include Ballard-Bothell via Lake City and Greenwood extension
NORTH KING COUNTY	As Seattle grows, I think that it's imperative that we work to develop infrastructure that focuses on people moving efficiently and easily through the city. It seems to me that expansion of our metro system as well as continued progress in developing bicycle and pedestrian access and movement around the city. I truly appreciate your taking the time to listen to citizens who are interested in this issue on either side.
NORTH KING COUNTY	I commute from Seattle to Tacoma by ST Express Bus. Nowhere in the current plan can I find anything about adding more ST Express buses between Seattle and Tacoma. Please, please, please add more southbound buses from Seattle to Tacoma in the morning. Starting at 7:15 a.m. buses run southbound only every 1/2 hour, yet the buses are jammed, even those leaving after 9:00 a.m. The Sounder south line trains don't run frequently enough to be of any use to commuters from Seattle to Tacoma in the mornings, so the Sounder improvements listed in the current plan would not improve my commute. I would be hard pressed to vote for the ST3 plan without clear improvements to bus service for Seattle to Tacoma commuters.
NORTH KING COUNTY	Ballard to UW light rail should be included. 22 years to get rail to Ballard is too slow. Ballard and West Seattle light rail should be prioritized to be delivered in the next 8 years, otherwise I would vote against the plan.
NORTH KING COUNTY	Light rail between U district and Ballard. NOW.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	ST3 should also address problems that shut down the existing services. Cross-overs in the existing downtown tunnel to keep the overall system operating when one side of one platform needs an emergency shutdown. Something to end landslides on the rail lines used by Sounder between Seattle and Everett. And operating Sounder trains from Olympia thru Tacoma thru Seattle all the way to Everett.
NORTH KING COUNTY	More light rail, less buses.
NORTH KING COUNTY	There should be more light rail planning for south King county, not just the Sounder expansion & bus expansion. We need access to the light rail in Kent, Auburn, Des Moines, Federal Way. And we need to be able to have one monetary system with transfers more seamless, if people are taking the bus to the light rail they shouldn't have to pay more for the light rail. I think these costs should be tied to renewing license tabs or something from drivers so it's not punitive for people that can't afford it or that are actually taking transit& helping us all.
NORTH KING COUNTY	Car dropoff areas at light rail stations
NORTH KING COUNTY	I believe light rail would serve Seattle better if we can have light rail station at each neighborhood center. This is because most neighborhood centers are 15 minutes walking distance from within the neighborhood. That is a very reasonable expectation of mass transit. Example, light rail should have station at market street Ballard, Queen Anne avenue on top of Queen Anne, 34th ave at Madrona.  Ballard expansion shall not end in international district, it shall connect at west lake or Capitol Hill for transfer with current uw link, then continue on to Madison park and Madrona, and final stop at leschi connect with i90 light rail station.  Do it right, connect the city. No one should walk 30 min to a light rail station, 15 min walk is reasonable. Learn from big city subway system like Hong Kong, Tokyo, and New York.
NORTH KING COUNTY	Need rail stations for transit between Shoreline and downtown Seattle and Edmonds to downtown Seattle. Would also pay more to have this completed much sooner.
NORTH KING COUNTY	Where did the light rail station at 13rd and Madison go desk earlier drafts. I'd love to see us take care of the city core before trying to get to Everett. Who really needs daily train service to travel that far they should just move.
NORTH KING COUNTY	If Point Wells in shoreline is approved, we need light rail into Richmond Beach and/or Edmonds.
NORTH KING COUNTY	Please add Renton to the light rail network! I commute daily from Capitol Hill and do not have many fast options.
NORTH KING COUNTY	Ballard to U district light rail to ease East/West transit congestion
NORTH KING COUNTY	The 130th Street station is critical and must be built.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Please restore Sound Transit bus service from West Seattle Junction to the airport. Most times that I want to travel to the airport it would be faster to walk than take the C-Line or #22 bus to Westwood Village and wait to take the ST560. It is not convenient at all for those of us not in walking distance of Westwood Village. Thank you. RE: About You: I would be a more frequent rider if it were more convenient.
NORTH KING COUNTY	A light rail station should be opened in Mercer Island.
NORTH KING COUNTY	Light rail on I-5 from Greenlake area to Seattle VA Beacon Hill
NORTH KING COUNTY	I did not see an option to help prioritize the addition of Bellevue to the link system. I would take the link from Northgate to Bellevue everyday. Currently my commute is over an hour (45 to 271).
NORTH KING COUNTY	light rail between ballard and the UDistrict needs to be added sooner. It will soon be nearly impossible to get east-west in Seattle. A study is not enough - there needs to be construction of this route sooner. Seattle is accepting huge growth and needs to have transit to support that growth.  A light rail link to Issaquah is not needed. Issaquah is a totally suburban spread-out community. It is not creating the kind of density that supports or requires light rail.
NORTH KING COUNTY	Rail service to Fremont
NORTH KING COUNTY	Light Rail from Bothell to Bellevue via Woodinville and Redmond, with a transit center close to UW Bothell. This would help reduce traffic on I-405.
NORTH KING COUNTY	It would be great to have an efficient way to cross the water by rail.
NORTH KING COUNTY	Washington State needs to invest in High Speed rail between Spokane and Seattle as well as Bellingham and Vancouver WA.
NORTH KING COUNTY	In order for this measure to pass, ST3 will need a strong majority of support in Seattle in order to make up for less transit supportive areas. As designed, ST3 is not a very attractive option for Seattle. Seattle based projects are delayed substantially. Furthermore, the project with the best value is not even considered as an option. Where is the UW to Ballard light rail line option? This option is critical for my support of ST3. Furthermore, completion of the spine will create rail trips are not time competitive with existing express bus trips. No one is going to ride from Everett to Seattle via Paine Field, and the public will demand that existing express bus service continues, which will be a huge waste of money. Build rail where rail makes sense (i.e., urban areas).
NORTH KING COUNTY	Start laying the ground work for self driving cars.
NORTH KING COUNTY	Additional parking for stations in West Seattle
NORTH KING COUNTY	U District to Ballard should be included in the plan - not just as a future study. The proposed Ballard, West Seattle, and Everett lines should be expedited by any means possible.
NORTH KING COUNTY	A Ballard to UW to Eastside light rail line via 520 should be added to ST3

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>recently you eliminated and/or rerouted bus service that no longer serves many people who used those buses. Some folks I've talked to are now driving because losing their route has made their commute too difficult. I am most distressed with the loss of #16, and the old route of the #28 (which no longer goes through downtown Fremont and has only ONE stop on Leary Way!). Cutting the #48 in half was also, to my mind, a very bad move if you care about elders who have difficulty with transfers. #40 is now the MILK TRAiN through downtown Ballard, but because of re routing it is slower, not faster, than it once was. Also, bus stops are farther apart...it's exhausting using Metro to get around the city! If you really want to grow your ridership you need to consider how pleasant the ride is. Clustering bus stops at the busiest, grimeiest street corners is also unpleasant. I am a LONG TIME regular bus rider and I believe in public transportation but I don't understand why you think building more light rail will keep people out of their cars when getting to and from the light rail stations has gotten more complicated and difficult. Please factor into your plans the folks who need to use the bus to get around this city.</p>
NORTH KING COUNTY	<p>We need to have service at other times than just commute times on heavy rail, especially Everett to Seattle so one can use the train at other times of the day for other needs, Community transit if just too slow and complicated to help much.</p>
NORTH KING COUNTY	<p>Sound Transit has an obligation to build the spine for light rail to major population centers (Tacoma-Seattle-Everett) before extending the system to smaller urban neighborhoods such as Ballard and West Seattle. Sound Transit is a REGIONAL transit agency. Bringing light rail to Everett is important for supporting Boeing and expanded commercial flight capacity at Paine Field.</p>
NORTH KING COUNTY	<p>We are in need of more transit access/options for some of the low-income areas of Burien, especially in getting quickly to Seattle and to Kent, where many of us work. At the very least, improve the speed, reliability, and sense of safety for the 132 bus line. Many of us avoid it and opt to take a longer route because of how unreliable it is, and how chaotic/stressful the rides are.</p>
NORTH KING COUNTY	<p>Finish the project at the airport with moving ramps. I live in Seattle and paid taxes for the existing system. I will not be using any of these proposed facilities and don't want tone taxed for them. Did the people on the eastside pay for the existing system? If so you need to explain the taxing system. I will be stuck for over \$500 per year for this project that I will not use!!!!</p>
NORTH KING COUNTY	<p>A Ballard to UW light rail really needs to be in this plan. As Ballard continues to grow, fast transportation from Ballard to UW which goes through Wallingford or Fremont is key. The current buses and car traffic is not sufficient to support the growing population in Ballard. As a daily bus commuter to UW, I strongly support the need for better West-East travel in Seattle.</p>
NORTH KING COUNTY	<p>Sound Transit must add UW to Ballard to make this plan viable. Also, the timelines are absurd. I wish Sound Transit would think creatively and find ways for us to make transit happen quickly rather than make excuses for why it can't. As the great Tim Gunn once, said, make it work.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	The UW to Ballard line needs to be studied, and better connections to Belltown. 522 BRT needs to be explored as light rail, not as BRT. Cross Kirkland corridor needs trains.
NORTH KING COUNTY	West Seattle to Everett and Renton without downtown stops
NORTH KING COUNTY	Please build the NE 130th Street light rail station!
NORTH KING COUNTY	Complete failure of light rail across SR520. How can we trust transit planning at all when a new bridge is built with out light rail. Severe lack of foresight. Also Sound transit should be pushing as hard as possible for a state income tax for stable financial support for not only our transportation infrastructure, but also essential state services like education. STS needs to add their voice to a progressive tax structure.
NORTH KING COUNTY	With Expedia going into Interbay and new developments for Amazon, Google, Facebook, etc., we really need BRT across 520 asap. Even though I would be served by light rail from Ballard to Downtown, I think addressing the cross-lake traffic is most urgent.
NORTH KING COUNTY	Rail along I-90 connecting Seattle & Bellevue would be a huge asset.
NORTH KING COUNTY	Ballard to UW east-west light rail connection
NORTH KING COUNTY	Why are there no plans to add light rail going up the Westwood of the northern part of Seattle? Why does the light rail stop at Ballard?
NORTH KING COUNTY	(1) I feel EXTREMELY strongly that the Ballard<->UW corridor should be added as a provisional project in ST3 and not as a "future investment study". This is an critical transportation corridor that's extremely congested but almost impossible to fix at grade. It will also help boost ridership on the Ballard<->Downtown line by encouraging Phinney/Wallingford users to transfer. Without it, the densing populated Phinney/Wallingford area is without good mass transit.  (2) Ballard<->Downtown needs to be grade separated, and it needs to tunnel either below Ship Canal or be high enough that it won't need to be raised. Such a critical transit corridor should not be subject to the vagaries of ship traffic.
NORTH KING COUNTY	Please add BRT to the Rainier Valley Corridor to serve the neighborhoods east of Rainier and the Rainier Valley north of the MT Baker Station. We miss our Route 7 Express service! Or substantially increase bus connecting service from those neighborhoods to the light rail stations.
NORTH KING COUNTY	Add light rail connecting Burien and west Seattle via Delridge.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Needs two additional projects: (1) Light rail east-west across I-520 connecting Ballard; the U.W., and Redmond, and (2) a direct bypass light rail line from downtown, past Boeing, to the airport instead of wandering on the surface all over the place and down through the Rainier Valley, so that people like me would be tempted to use the line to access the airport. Currently the train is (a) way too slow because it has to travel on the surface instead of being elevated, plus (b) it's too risky to use because of potential stops because of items which may impede the train. The latter is critical when one has spent thousands of dollars on a non-refundable airplane ticket(s).
NORTH KING COUNTY	What's the deal with Ballard / Interbay / Queen Anne & Magnolia being left out of the loop or it taking 22 years to put light rail into Ballard which is one of the most rapidly growing neighborhoods in the city. There was a plan, people voted for a monorail, and the whole thing went belly-up. Serious consideration is going to be needed for the Ballard / Interbay / Downtown Corridor as we're loosing access to the viaduct at Battery Street once the tunnel is put in place, forcing traffic to the waterfront, downtown, or up and over Mercer ... What kind of city planning is this?
NORTH KING COUNTY	UW to Ballard. I strongly support mass transit, but will oppose anything that prioritizes the suburbs over Seattle.
NORTH KING COUNTY	Ballard Light Rail should be 100% grade separated Ballard Light Rail should have an accelerated timeline where possible Ballard to UW line should be included - if not, then at least a full study of the line should be funded (Ballard - UW - Childrens - Kirkland)
NORTH KING COUNTY	Build the Metro 8 subway as well as a 45th street line. And build the Ballard line before West Seattle - it will have much higher ridership.
NORTH KING COUNTY	I'd like to see the inclusion of a light rail line from Ballard to the university district made a higher priority.
NORTH KING COUNTY	More East-West transportation! Especially across North Seattle near NE 45th street.
NORTH KING COUNTY	University District to Ballard light rail should be considered for ST3. It would significantly cut travel times between the two locations and increase commerce in Ballard as a result of the increased number of college students . A stop in Wallingford as proposed would help to combat the enormous transit dead zone that wallingford has become. Travel is effective along the SR99 and I-5 corridors, but neither corridor is close enough to wallingford to make transit an effective travel mechanism. Metro's Bus2Link connections initiative did little to ameliorate these problems.
NORTH KING COUNTY	It seems if we're investing in connecting Downtown/Capitol Hill/Ravenna and Ballard/Downtown it only makes sense to connect Ravenna/Ballard and complete the loop. That would serve more people per square mile for less development and cost than to connect more remote areas with fewer people.
NORTH KING COUNTY	Not enough Seattle city lines. Need Ballard-UW and Metro Route 8 studies added.
NORTH KING COUNTY	Express trains from Downtown Seattle to the Airport so shorten ride time.
NORTH KING COUNTY	The timeline for these projects are too long. Much of North Seattle including the densely populated areas of Phinney Ridge and Greenwood are completely neglected. Aurora need BRT or light rail badly.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Connecting Everett to Seattle should be more of a priority, there are already multiple options for tacoma to seattle, and many people commute to Paine Field from the north and south of Seattle.
NORTH KING COUNTY	More transit should be added where there is the most ridership. I live in Ballard and even providing more express busses and extended express bus hours would help. My bus at off peak times is always jammed full. Providing dedicated bus rapid transit lanes would be a decent fix in the short term. This is a dense urban neighborhood and it's hard to believe that outer ring suburbs get higher priority for transit projects with this plan. Waiting 22 years for reliable mass transit is simply unacceptable.
NORTH KING COUNTY	Need to add parking at the light rail stations.
NORTH KING COUNTY	We need better connections from Ballard across the north part of Seattle, and over 520 to Redmond and Bellevue.
NORTH KING COUNTY	Extending the time the light rail would run would be huge. Especially so that it runs after bars close after 2am. I think this is something many people want.
NORTH KING COUNTY	Greenlake
NORTH KING COUNTY	I strongly support a station at 130th. I am strongly in support of light rail but may vote against it if this station is not included. (provisional does not count)
NORTH KING COUNTY	Overall, I think the primary focus should really be developing the light rail system. That is the best way to build a scalable, and generally walkable city. The challenge with cars is that people will not get rid of their cars unless the system can address all of their needs. In that vein, using light rail systems to build out the backbone of the public transportation for the city should be a top priority. Buses should be used to support the backbone by extending further into neighborhoods, but the core focus should really be on the rail.
NORTH KING COUNTY	Add Sounder stops at Sculpture Park and Expedia in Interbay
NORTH KING COUNTY	Better drop-off areas at light rail stations. Capitol Hill station has none, making this difficult and dangerous. Drop-off stations are more important by far than parking, in my opinion, although a cellphone lot for pickups would also be nice. Are you aware that some options on this survey were not functional, especially in the big list of priorities on the second to last page?
NORTH KING COUNTY	Just do it!! Put in a complete light rail for all of us to use ASAP!!
NORTH KING COUNTY	I'd like to see an actual grade separated light rail line to Ballard sometime before the next 20 years.
NORTH KING COUNTY	Ballard to UofW rail should be added, if necessary instead of Ballard to Downtown rail Lake City rail connection should be added to the plan, and West Seattle rail replaced by full, open BRT
NORTH KING COUNTY	There is a large gap in light rail stations between 145th N and 185th N. An additional stop should be added. Perhaps at 175th.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Connections to satellite cities and engaging w/ the suburban community is very important and I support it, but I feel more emphasis needs to be put on the urban core. For example, I think it's very disappointing that there are not at least any *proposals* to create a loop connecting Ballard->UW->Kirkland->Redmond w/ Sandpoint crossing. Returning through Bellevue and Seattle via I-90. This would do the very important job of connecting East-West urban centers (both dense residential and job centers) that are difficult to transit via car/bus. I feel the current ST3 plan is not aggressive enough. I support a larger plan, costing more money, that can be completed faster and with better rail corridors (not just the logistically easy ones).
NORTH KING COUNTY	Ballard to UW extension
NORTH KING COUNTY	Ballard-Downtown needs to be fully grade separated (preferably a tunnel), in order to avoid the mistakes of the MLK Way stretch. If built on a bridge, it must be high enough to accommodate all boat traffic; the Ballard Bridge breakdown on 4/18/16 serves as a warning as to what could happen if this stretch is not done right. We should also build a tunnel from Ballard to the University District serving Fremont and Wallingford, as well as connecting that line to the Lake City BRT line. In fact, why not make the entire Lake City / Kenmore corridor into light rail instead? As a Puget Sound resident who does not currently use public transportation very much as of now (I currently take the Microsoft shuttle daily), I would be willing to pay much more in taxes in order to make all this happen.
NORTH KING COUNTY	The Seattle down town tunnel was built stupid. No rest rooms and escalator service up only and none down. Improve this in all your new projects.
NORTH KING COUNTY	UW-Ballard please. Also SLU-Cap Hill-Central District would be nice too.  Is West Seattle really worth it? No. The few areas of density aren't in enough of a line that future could serve adequately. *Actual* BRT would seem to have the geometry to be the better solution.  Additionally, can we plan for bus transfers better? Like that should be #2 priority for determining where these stations should go after "Are there things around the station that people want to go to"
NORTH KING COUNTY	Build a Ballard to UW light rail! I wish we could do these projects faster. 22 years is a long time
NORTH KING COUNTY	More rail projects. Decreased priority on bus and auto infrastructure
NORTH KING COUNTY	Ballard to uw lightrail link or lightrail system from Ballard to downtown, South lake Union should be important. The Amazon and southlake Union business employees sometimes drive 2 miles to get to the office because the buses are over crowded or the service is unreliable. One suggestion is to make a bus lane on Leary instead of allowing parking on the right lanes.
NORTH KING COUNTY	Where is the Ballard to UW light rail project? This is one of or the most important areas of need and is not addressed. What is taking so long, why do you need 25 years, get real. You need a reality check
NORTH KING COUNTY	Light rail to White Center/Burien should be included.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	To just break even with where mass transit should be in a region like this, the proposed plan should have been implemented 15 years ago. Anything to get cars off the road is critical. More bike lanes (possibly along I5), light rail should be an extensive network throughout the region like the L system is in Chicago, and the current light rail should take priority at intersections, meaning they get the right of way. Anything we can do to discourage cars and encourage mass transit is needed to support the thousands of people who continue to move here. We are 20 years behind where we need to be. Also, traffic controls and routing to I5 on ramps in Seattle are a nightmare, making the #8 bus habitually slow and unreliable. As such there should be a bus only lane on Denny.
NORTH KING COUNTY	Ballard to U of W is an absolute MUST. Please consider moving forward with these plans
NORTH KING COUNTY	Ballard to UW needs to be in ST3.
NORTH KING COUNTY	While I generally strongly support this plan. It will not at all substantially impact my transportation use on a daily basis. I live in an extremely undeserved and under-developed neighborhood (South Park) and there seems to be no plan in site to help integrate the Duwamish Valley neighborhoods into our growing transit network. It would be nice to see a plan to extend the Light Rail farther south at grade, by striking a deal with our already established rail corridor (I know personally that it's extremely difficult, but it seems like an obvious route that may be worth fighting for) in Sodo/Duwamish Valley area and establish your connection to the Boeing Access road after creating a stop for at the very least Georgetown. Or how about plan for a BRT line the goes between West Seattle and the future Graham station LRT stop?
NORTH KING COUNTY	I think we need more tunnels/trains not buses to relieve traffic.
NORTH KING COUNTY	The UW to Ballard line should be one the highest priority projects. The 45th corridor is one of the worse congested areas in Seattle. Transit within Seattle is the higher priority to me, not going far out in the suburbs. Let's starting building in the city first, then build to neighboring cities. As a lifelong transit user, it is very frustrating how long it takes to travel within the city.
NORTH KING COUNTY	East-West light rail routes are desperately needed in Seattle. Ballard to downtown is already 15 min - making it 8 would be nice, but not as a priority when Ballard to UW takes 45 min!!!  Also, the timeframe for light rail completion is unacceptable and a deal-breaker.
NORTH KING COUNTY	New Sounder station added in Ballard.
NORTH KING COUNTY	Not only added but the time frames need to be shorter - why are we waiting 36 years to get this done - traffic is already really bad between Everett and Tacoma - ST needs to get all projects completed sooner - like within 10 years and add the 130th street in the northend. People want this now not in 35 years!!!!
NORTH KING COUNTY	Not sure if this falls under Sound Transit's authority and/or the state's but simple road/ surface improvements are much needed all over the city. Being a West Seattle resident, it is very apparent that the main arterials such as California Ave SW, 35th Ave SW, and Fauntleroy Way SW, are all in dire need of resurfacing. Also, the main streets through downtown.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	We should push for as much grade-separated light rail as possible - this is a growing region and our transit needs in 25 years will be far greater than they are now.
NORTH KING COUNTY	Way too little way too late in Seattle- and no east west support
NORTH KING COUNTY	There should be a line that runs east and west. It should connect UW to Ballard! This is an area so many people live in and traffic so many would benefit from!
NORTH KING COUNTY	Downtown Seattle to Everett light rail
NORTH KING COUNTY	520 bridge light rail or rapid bus..
NORTH KING COUNTY	I really like the service to Tacoma plan. With Seattle's housing prices going crazy Tacoma is looking better every day...
NORTH KING COUNTY	Please include a station at 130th St. Our neighborhood is one that relies heavily on public transportation. Northgate to 145th is a large jump over our neighborhood. We fully support a station at 130th to serve our neighborhood and ease the congestion at Northgate and 145th. Thank you.
NORTH KING COUNTY	<p>Surveys are a great way to gauge popular opinion, but you're not getting a complete representation of the whole population. It would be much more worthwhile to contact businesses and ask for numerical data on how many employees they have and (generally, because home addresses would be personally identifiable information) what neighborhoods they live in. You could construct models to illustrate these connections and the most probable routes they would use.</p> <p>Additional factors to consider would be how often people travel these routes. People who travel a particular route 5 times a week should be given a priority to people who travel twice a week as removing them from the commuting equation would have a greater impact on traffic.</p> <p>Finding a way to create a light rail station near Boeing Field would alleviate thousands of commuters. Rather than going out of the way to go completely around and nowhere near Boeing Field, an area where thousands of commuters travel every day, the Light Rail should have traveled this route to begin with. This should be obvious to planners because the section that could have included Boeing Field in the first place (Rainier Beach through Beacon Hill) has no plans for expansion or connection to any other area.</p>
NORTH KING COUNTY	Connection from the UW to Ballard or Northgate to Greenwood. There are extremely limited options for any kind of timely public transportation east/west across the Northern parts of Seattle.
NORTH KING COUNTY	Fully fund EIS for Link Light Rail extensions from Ballard to UW and from West Seattle to Burien, so that they may be built as soon as possible. Studies for additional lines in Seattle, particularly a "Metro 8" line from Belltown to Mt. Baker via South Lake Union, the Central District, and Judkins Park, and an extension from Ballard to Bothell via Greenwood and Lake City, should also be done.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Connect Northeast Seattle better to the link light rail stations through rapid ride buses. Especially on 35th Ave NE, all the way from University Village to where it connects to Lake City Way.
NORTH KING COUNTY	This does absolutely nothing to help the east west traffic issue in Seattle even after 22 years. Needs to include connecting the east west neighborhoods not just downtown but both north and south, otherwise people will continue to drive. Why would I ever take the bus to commute at 1 hour 10 minutes one way on average when I can drive in 25 min door to door. Please bring the light rail out to the neighborhoods well before I die!
NORTH KING COUNTY	The urban villages for the city of seattle tell you where growth will be. Focus there. Far-flung connections to Issaquah or JBLM or a baby rail in Everett are a waste. The sounder links are too far for use in a day and won't help with commute traffic. 22 more years for rail in ballard and EIGHT for an extra bus on 405 is just ludicrous.
NORTH KING COUNTY	Connecting areas south of west Seattle would prove beneficial to the region west of Seattle. The bottleneck in that happens though the west Seattle bridge creates congestion and adds to the traffic problems. With light rail, less cars would drive over.
NORTH KING COUNTY	I live in South Park and use transit every day to downtown. The service here is horrible, with very few buses. We really need to be included in the plan, either through a connection ride or trolley or something. I am very disappointed to see that this amazing proposal leaves South Park residents out of the map--pretty much like everything else in Seattle. Be different, people!!
NORTH KING COUNTY	Pay attention to your own reports, add light rail from Ballard to U district Link.
NORTH KING COUNTY	I think that an east-west light rail project in Seattle should be added. Something that goes from somewhere in Ballard to UW and the east part of the city. In addition, I understand that the Ballard to Downtown project is very complicated but given the potential ridership and the current congestion, it should be prioritized. I think that ST3 will receive more support in Seattle if this project is completed sooner.
NORTH KING COUNTY	I do believe that West Seattle should be a priority to invest in. Over thousands of Californians have moved into this neighborhood, and have begun to rely on the transit system heavily. My hour commute to my work should not be difficult, especially when I can drive to work in less than 25 minutes. I do think an increase in C line buses would significantly serve as a decongestant for West Seattle. An investment for the future is an investment in West Seattle. Thank you.
NORTH KING COUNTY	What about those of us living in Magnolia? We would like to have reliable transit there, too!
NORTH KING COUNTY	There should be more prioritization on the infrastructure in the city of Seattle. We keep the sprawl going and the need for more transit to further places by not improving the central city options. Ballard and West Seattle are highly important. However, there also needs to be better East/West options. Prioritization of a line connecting Ballard to UW is VERY necessary.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>Many people are upset about the long timetable for the entire project. There is obviously a time/cost trade-off. Why not put the an optional proposal on the ballot: "Do you support the expansion of Sound Transit service" yes/no. Then give the yes voters 2 options - ST3 at the current cost and time frame, and ST3 with an expedited time frame at whatever the increased cost would be. You might be surprised at the response. I will not likely live to see the improvements proposed for the area I live in, but nonetheless, I'm willing to help pay for them, even if the bill is higher for a faster project.</p> <p>Also, Sound Transit is risking a no vote from all the new commuters who have tried to ride the train with the opening of the new stations but had to wait 20 minutes or more for room to get on. Add More Cars During Commute Hours Right Away!</p>
NORTH KING COUNTY	<p>Don't forget frequent shuttle service around West Seattle, Magnolia and Ballard to the light rail stations. They may also be needed around Lynnwood and the Eastside as housing density is low vs. major cities around the world where subway systems are successful. We have lived in Sydney, London and Hong Kong and are always let down when we come home to Seattle and are forced to sit in our cars in traffic. Seattle is a "grown up" city with extremely high growth, and a comprehensive rail system is long overdue.</p>
NORTH KING COUNTY	<p>The plans are all focus on higher income neighborhoods, South Park and White center are excluded.</p>
NORTH KING COUNTY	<p>Ballard to UW light rail.</p>
NORTH KING COUNTY	<p>Ballard to UW line needs to be included and prioritized. The downtown to Ballard line should be the first thing built. With enough resources it can come on line a lot faster than 25 years. It is the line that will have the most riders so it should be built first.</p>
NORTH KING COUNTY	<p>[explicit] South Park over yet AGAIN. Sick of these [explicit] plans disenfranchising poorer areas.</p>
NORTH KING COUNTY	<p>South Park Seattle, South Seattle in general!</p>
NORTH KING COUNTY	<p>why don't any of the rail lines meet up with the main bus station at South Center mall?</p>
NORTH KING COUNTY	<p>High speed rail to Portland, OR and Vancouver, CAN. This would add an enormous amount of mobility within the PNW, increasing the economy of the entire region.</p>
NORTH KING COUNTY	<p>Instead of going from Ballard directly to Downtown Seattle, have you thought about linking the University Station to Ballard? Not only would this dramatically cut down on congesting bus traffic from the University District to Ballard, but it also might be a bit faster to finish than something 22 years from now.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Appreciate that Sound Transit is listening to citizens & including the SR522/523 corridor in the final plan. BRT opens up the promise of light rail across to the north Lake Washington communities. Parking garages are extremely important elements of access by our community to this transit corridor. Equally important are sidewalks that will, for the first time, open safe access to this transit corridor for all citizens. An early construction schedule is a win/win for the local communities and Sound Transit, as it coincides with the ramping up and opening of the North LINK light rail stations. I agree that this is a very good plan for all.
NORTH KING COUNTY	I'd prefer better transit in the city of seattle before trying to expand outside of Tacoma and Everett. Not just Ballard and west seattle. What about First Hill? Fremont? Greenlake/Greenwood?
NORTH KING COUNTY	What still baffles me is that there isn't any light rail options across 520 bridge linking UW to Kirkland, Bellevue and Redmond. This is a thoroughly congested route for the Seattle area, yet nothing is being done to address this in any of the ST3 plans. Why not? For North Seattle residents, why do we have to go all the way downtown to Seattle to then go out I-90 and back up to Bellevue? This will unnecessarily add lots of unnecessary time to our commutes. Please address this!
NORTH KING COUNTY	I think bus/transit hubs at light rail stops needs to be increased. Disappointed with the bus options at UW station and cap hill stations
NORTH KING COUNTY	Southpark was removed from the plan and needs to be included in the light rail
NORTH KING COUNTY	I am personally disappointed that my neighborhood (South Park), a historically and presently underserved neighborhood, is not receiving any increase in transit support via this transit plan. Bus service every half hour is not cutting it. Can you explain why South Park, which I believe was set to get additional transit at one point, is no longer on the books to get more service? Very disappointed. Agree that regionally we need more transit options.
NORTH KING COUNTY	The plans aren't extensive enough. There needs to be more public transport and sooner. I'd support paying more.
NORTH KING COUNTY	Please add the 130th street station as fully operational. This is a significantly more accessible location for bikes and pedestrians from many of the surrounding neighborhoods than the already overcrowded and always busy intersections at 145th st. Access to the 145th area is generally very slow regardless of direction of travel.
NORTH KING COUNTY	I think it would be extremely useful for people to have transit access between renton and issaquah. Having lived in the renton highlands for 6 years, I often worked in issaquah but I wasn't able to get there unless I bussed to Seattle or Bellevue first. I think many people would benefit from added busses between renton and issaquah.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	We need RESTROOMS!! Please install restrooms at at least transit centers/ light rail stations and so forth. People need to use the restrooms while being on the road taking buses/trains and with no bathroom close by, it is a very BIG problem. Its hard to find a business close by which lets none customers use the bathroom, its not so easy walking far away from your station while needing to catch the next bus but yet having to find time to find a nearby restroom if there is even any around all while having to pee really really urgently. There has been many times i personally felt like i was about to burst and cried because i felt like i couldn't hold it any longer until i arrived home (walking from the transit center) and walking around aimlessly trying to find a spot, ended up in a park among bushes. That is not humane and a city who takes care of its citizens needs to find ways to give people public restrooms. At least at transit stations, the least.
NORTH KING COUNTY	Light rail station in Georgetown
NORTH KING COUNTY	I live in Delridge, which is a part of West Seattle that is often neglected by transit increases. Light rail to West Seattle would be great, but I would still rely on taking the 120 from the proposed light rail station. I would really appreciate added transit on Delridge and additional support to the 120 bus, which is always packed and doesn't run as often as some of the other bus lines that connect to other parts of West Seattle.
NORTH KING COUNTY	Light rail should extend across north Seattle west to east, or from Ballard to Ravenna or UW. There are no good alternatives to crossing across the city, and even a little bit of traffic increases travel time by a large margin.
NORTH KING COUNTY	The Ballard line should be extended way further than it is now. For me to get to Ballard takes two buses since the 17 local bus has been eliminated.
NORTH KING COUNTY	No good commuting options for Seattle to North Everett or North Everett to Seattle. Needs to be faster than cars or else people wont take it. Also good options for eastside to Seattle and Seattle to eastside are great!
NORTH KING COUNTY	prioritize light rail station at 130th
NORTH KING COUNTY	If not already part of the plan, Sounder commuter rail trips should be greatly expanded to go both ways, northward and southward, at all times of day--not just commuting in one direction in the mornings and one direction in the evenings.
NORTH KING COUNTY	Yellow Ballard to UW to the East Side investment study

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>I live in Upper Rainier Beach—a neighborhood that is rapidly attracting new residents, many of whom are moving from neighborhoods including Capitol Hill. My neighbors and I long for a better way to get to Rainier Beach station, which is two miles away. Although the 106 and 7 do pass through the neighborhood, these routes are inconveniently slow. Is there anything like a connector running east to Rainier Ave S—streetcar, bus or light rail spur?</p> <p>I share the view with many, many riders that the payment system must be integrated, so that separate payment is not required when connecting from metro to light rail. And, especially given the proposed, upfront cost to all taxpayers of \$17/month, it would be great to reduce the cost of ridership. For me, commuting to a day's work in downtown Seattle from Rainier Beach costs \$11. It's cheaper to drive and park.</p>
NORTH KING COUNTY	<p>Parking and dropoff needs to be available at light rail stations. Signage needs to be designed to meet ADA requirements, and access for individuals with disabilities needs to be assured. Walking and biking are impossible for many of us, and it seems the current models deliberately discriminate against people with disabilities, elderly, families traveling with children, and travelers with suitcases headed to the airport.</p>
NORTH KING COUNTY	<p>I live in Seattle and would like to see more public transit for Seattle residents. You also need to focus on public transit within Seattle. What about express light rail tracks so it doesn't take 45 minutes to get from downtown to the airport? You need express tracks during commuting hours like they have in other major cities with limited stops for the light rail. How can it take me 45 minutes to get from downtown to Green Lake but 15-20 to get to an east side park and ride. Don't forget about Seattle residents who's property taxes are increasing exponentially at the moment. I took the bus to downtown for 11 years but now I have a child in day care I am forced to drive because the bus system is too unreliable and takes too long to get to Green Lake from downtown. We need increased buses and/or light rails running more frequently. Coming every 20-25 min during commuter hours are not frequent enough. I understand wanting to connect Seattle to surrounding cities but what about transportation for Seattle residents. I am very frustrated the bus is no longer an option for me.</p>
NORTH KING COUNTY	<p>Would highly recommend including an East-West line connecting the Ballard station and the U District station with a stop in Fremont.</p> <p>Also given the current state of Seattle's transit system, I think the Ballard line should be prioritized. The existing lines to Ballard are overloaded and inefficient and a light rail line to Ballard would really help alleviate that. With Seattle's population growth, 22 years seems way too long to wait.</p>
NORTH KING COUNTY	<p>You must include a Ballard to U-District line! Please.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>Instead of further capital investment in increasing Sound vehicle capacity, I would like to see all-day Sounder service on South Sounder. Maybe this requires the construction of a Sounder-only track or something.</p> <p>More coordination with bus services. The planning of high capacity transit service should not be divorced from other types of service planning. I would like to see a vision of how all services work together instead of putting up for vote one project or another. Rail transit is not going to be used in isolation and so shouldn't be voted for or thought of in isolation; at the end of the day, folks just want to get where they are going.</p> <p>The Ballard to UW on Market and 45th would do a lot for access and mobility for the whole of north Seattle; it may be the single-most transformative transportation project that could be undertaken in the region because it has the potential to improve travel-times along the corridor at least two-fold no matter the mode or time of day. I find it disappointing that project isn't on the draft list given its transformative power for the entire transportation network.</p>
NORTH KING COUNTY	<p>More light rail, faster.</p> <p>Build light rail in core areas first. Go bigger, and faster, and yes, that will cost more, it's ok.</p>
NORTH KING COUNTY	Light Rail station in South Park!
NORTH KING COUNTY	I live in SE Seattle, in Skyway, and I don't see any portions of this plan addressing this area specifically. I would use mass transit daily if it were an option for me, but the current bus-light rail-bus route that I currently would need to take to get from home to work would take me upwards of 2-3 hours one-way. Skyway is a lower-income area where transit should be a priority. I'm disappointed the current plan doesn't include adding light rail to a Skyway location. Again, huge opportunity for more riders on the Renton-Rainier Beach corridor.
NORTH KING COUNTY	Ballard to UW Line. Get an east west line across Seattle on the plan!
NORTH KING COUNTY	Will help a lot of people save a lot of money special people that ride the bus
NORTH KING COUNTY	Fremont isn't that far away... no thoughts to adding that in the plan??
NORTH KING COUNTY	<p>Downtown to Ballard</p> <p>Ballard to UW</p> <p>UW to Downtown</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>You should look at the light rail plan that also serves Fremont. It has one of the quickest growing companies, tableau software, in addition to other notable companies (Facebook, Google, and the new Apple office) and having a light rail stop will keep a lot of commuters off the limited roads going into the neighborhood.</p> <p>Also, I think with the region basically blowing up you should look at speeding up the timeline as much as possible no matter the cost. A lot of people moving in here are typically making a lot of money due to the tech jobs and if you could double the cost and cut times by 50% I think lots of new voters will support it.</p> <p>Lastly, if we can somewhat keep up with demand for transit you will be heroes. If it gets finished in 20 years no one will remember all of the hard work.</p>
NORTH KING COUNTY	<p>Earlier priority for Ballard light rail. Ballard to UW light rail.</p>
NORTH KING COUNTY	<p>Without NE 130th being included, not just provisional, many of my neighbors and I may be unlikely to support the proposal. The timeline for service to Ballard is ludicrously long and will also cause opposition. Spending on service on routes which could more easily be served with bus rapid transit or low use routes in Tacoma, Kent, Issaquah will cause major opposition and is not fair. Costs of tunnels in Seattle should not be viewed as part of Seattle sub equity, since it serves the entire region. Lake City Way as well as 522 to NE 145 should have BRT service.</p>
NORTH KING COUNTY	<p>There's very little mention of projects going across Lake Washington, yet there's a lot of traffic on 520 and I-90. What about a light rail loop running from Seattle to 520 to Bellevue to I-90 to Seattle?</p>
NORTH KING COUNTY	<p>The people commuting to Mercer Island mostly work off East Mercer Way (several large child care centers and clinics). People who work in these industries often make minimum wage and must commute from off MI. If the only stop is downtown MI, how will this large work force get to work?</p>
NORTH KING COUNTY	<p>Light rail to Ballard routed through Belltown (2nd Ave or 4th Ave), as SLU has streetcar redundancy. More focus on urban expansion vs. suburban reach. I would support the package and cost, and be willing to pay 20 percent greater levy, if Ballard line was routed through Belltown (grade separated) until Market/15th. Eastside projects/far reaching suburb projects should be cut.</p>
NORTH KING COUNTY	<p>25 years for all of these projects is too long. I'm willing to pay more for faster results.</p> <p>Also, I live in Greenwood (85th St) and work in Bellevue (Bellevue Bay). I only have a bus as an option, and have to make one transfer. I would *love* a single bus option, so no transfers are needed.</p>
NORTH KING COUNTY	<p>Light rail from Seattle to Renton!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Add a direct line from downtown seattle to the airport. The current route which goes down MLK takes far too long to get to the airport both due to the distance and the train speed. A direct line would cut down on the distance and by elevating it or otherwise isolating from traffic, the allowable train speed would go way up which would reduce the travel time. If the travel time were cut down to close to what it takes to drive at close to non-peak commute times, the system would get more usage both from the airport to downtown and for commuters into downtown who could park near the Tukwila stop.
NORTH KING COUNTY	I just like taking the x554 to eastgate freeway station
NORTH KING COUNTY	More SAFE bicycling infrastructure to rival the Netherlands'
NORTH KING COUNTY	Must incorporate a light rail subway from Ballard, under Wallingford and University District, stopping at Children's Hospital and continuing under Sand Point Way to Magnusen Park. From there a environmental review will study building an extension to downtown Kirkland via a new subterranean tunnel.  The timeline is completely unacceptable. We need either more aggressive tax plan or federal funding. Furthermore, the projects we most urgently need (Ballard to Downtown to West Seattle) have been ushered to the back of the queue. This is ridiculous since that line will deliver the most revenue and covers the highest population density.
NORTH KING COUNTY	Add more locations,
NORTH KING COUNTY	You should include cross town light rail from Ballard to U district and West Seattle to Rainier valley.
NORTH KING COUNTY	Get serious about public transit. If Seattle King county really wanted excellent public transit, it would already be up and running. SO GET SERIOUS AND GET IT DONE.
NORTH KING COUNTY	Ballard to UW is the most cost-effective route you could build by a far cry. A system with light rail in the urban core and heavy commuter rail further out seems much more cost-effective and appropriate. Stations in central Seattle need to be far more numerous to make any of this system worthwhile. Compare to the most effective transit systems in the country in similarly sized cities (e.g. Boston, DC).
NORTH KING COUNTY	Greenwood/phinney ridge stop off of the Ballard line
NORTH KING COUNTY	As a resident of North Seattle, the neighborhood is expanding as people head north out of the downtown core and traffic is awful. It is also a community supportive of transit and would benefit immensely from further expansion north, including a station at 130th.
NORTH KING COUNTY	Please consider a route to include South Park
NORTH KING COUNTY	South Park should be included in this. It's an up and coming area that has already started to explode with new people moving in. Since it is somewhat of a secluded area people will need better ways to get to other parts of the city.
NORTH KING COUNTY	Link Rail to Burien

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	You simply must bring light rail to West Seattle!
NORTH KING COUNTY	more light rail stations into West Seattle
NORTH KING COUNTY	Study light rail along the "Metro 8" corridor from Belltown through South Lake Union, Capitol Hill, and the Central District, connecting with other Link lines at Westlake & Denny, Capitol Hill Station, and Mount Baker Station.
NORTH KING COUNTY	ST3 seemingly does little to connect light rail with Lake City. This is one of the most diverse North Seattle neighborhoods as well as densely populated and should be prioritized.
NORTH KING COUNTY	I strongly support fully backing the Light Rail stop on NE 130th Street; the 'provisional' status is unacceptable. The station is 'provisional' in the current plans for the Lynnwood Extension, I see no reason why ST3 shouldn't fully back the development of a station, especially as it will link the North Seattle neighborhoods of Bitter Lake and Lake City with the light-rail spine more effectively than the stops on 145th St or Northgate Transit Center.
NORTH KING COUNTY	Need more plans to build a fully connected system, rather than isolated mini-systems in various regions.
NORTH KING COUNTY	I live between Fremont and Wallingford. Why are these neighborhoods not considered? Without access to these neighborhoods, I don't know that I can support this plan. It doesn't really benefit me much. I work in the eastside and go often downtown. the commute would be very long with these improvements. I see no reason to pay.
NORTH KING COUNTY	Ballard to UW light rail and funding for a Central Seattle Subway down 23rd.
NORTH KING COUNTY	Light rail across 520 bridge is a must.
NORTH KING COUNTY	I strongly support transit solutions for West Seattle, as population is growing rapidly and the existing bridges will no longer be adequate for the added private vehicles growth will bring.
NORTH KING COUNTY	The current plan decreases the level of service to Lake City area (currently a major transportation intersection). I would support additional services to Lake City area (Lake City Way and NE 125th St).
NORTH KING COUNTY	South Park/White Center will experience exponential growth in the next 10-15 years, as a direct result of the following two factors: (1) annexation of White Center, and (2) rehabilitation of the Duwamish River. Those, coupled with population increase and housing prices pushing middle income earners to the south, will require a substantial increase in transportation options to avoid intractable problems. A West Seattle expansion of the ST3 plan is insufficient to address this inevitable growth of population in the south Seattle communities. Likewise, there will be a political cost associated with a proposal that adds a disproportionate benefit to affluent/non-diverse communities, when economically disfavored communities use public transportation (and public/private partnerships like Sound Transit) at a far greater rate.
NORTH KING COUNTY	For people who do not live in major areas such as Ballard there needs to be consideration for more busses/stops or a link light rail system through these areas. Currently I have to travel pretty far because all the bus stops were taken away during the reduction of services that happened about 3 years ago which makes it extremely inconvenient to use public transit.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	The Eastside proposed plan is inadequate for future growth. Future planning for light rail stations should include where the bridges cross, i.e. intersections of I90 & I405 and SR520 & I405. More and more families are moving out of the city because of increasing housing costs, but still need to commute into the city. This issue will only get worse.
NORTH KING COUNTY	We also need a light rail connection that transports passengers from west to east (Ballard to UW) to address a major lack of easy and quick transportation options between those neighborhoods.
NORTH KING COUNTY	In lieu of including these projects wholesale, advanced environmental planning for the UW-Ballard and West Seattle - Burien routes should be included in order to build these projects more quickly with funds outside of the ST3 package. Additionally: Each question of support would be answered "strongly support" if more high ridership urban routes (with more aggressive timelines) were included in this plan.
NORTH KING COUNTY	I think a light rail line from ballard through fremont/wallingford to u village or even to magnuson park would instantly be my top priority project above the current listed projects. It could even allow for a delay in a direct to downtown line for ballard as people travelling from ballard could use the proposed line to get to the u district and transfer at the brooklyn and 43rd station. In addition, the line would serve and connect two more dense neighborhoods to downtown (Wallingford and Fremont).  Also, regarding the long time frames mentioned above. Is there anyway to relax the debt constraints on ST to parallelize and start more projects earlier? Could municipalities like Seattle or Redmond pitch in dollars to help fund their pet projects to get started sooner?
NORTH KING COUNTY	The Ballard to Downtown Lightrail and BRT should take precedent over all over expansions and new construction. It has been documented by ST3 that the ridership from the Ballard region would exceed the cumulative ridership of the entire region. A 22 year timeline is simply too long. The build-out for the Ballard to Downtown Lightrail needs to be fast tracked and implemented as soon as possible.
NORTH KING COUNTY	We desperately need east-west bound light rail within Seattle (Ballard-U District) ASAP.
NORTH KING COUNTY	Designated bus lanes throughout the Seattle and on connecting highways should definitely be added. Bus timelines would become more reliable and, I believe many people would be more likely to use public transportation. Especially coupled with expanded service.
NORTH KING COUNTY	The 130th Street Station is essential to serve North Seattle. Also, Sounds Transit should study high-speed rail from Vancouver, BC to Seattle to Portland.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	The projected commuter rail line should extend to Olympia, as many people are commuting from there to the Seattle area regularly, and as the state capitol.  Also: question delaying a line into Ballard (22yrs); with the current growth rate, it and West Seattle need a more timely plan.
NORTH KING COUNTY	Please add Ballard/UW Link to ST3, and prioritize Ballard to downtown and Ballard to UW over West Seattle.
NORTH KING COUNTY	If NE Seattle is to be completely ignored, I'm not sure I'd support our continued sacrifice of bus service, in addition to paying more for less service to our NE community. Even the public meetings ST offers are not accessible to those of us in the Wedgwood and Meadowbrook neighborhoods. I'd love to take public transportation more than I do, but I often do not have time for long walks and multiple transfers to get where I'm going.
NORTH KING COUNTY	The NE 130th Street station should be included in this plan, not as provisional. But please keep express bus service on Lake City Way to downtown. That will always be faster than bussing to the NE 130th Street station and transferring.
NORTH KING COUNTY	Magnolia is a large community that feels largely underserved by mass transit (I don't have data computed to necessarily back this assertion up). I live on the north end, and work in Pioneer Square. It's ~6.5 miles from my house to my office... and it routinely takes over an hour to get door-to-door (I can run faster).
NORTH KING COUNTY	Projects should be added to allow better transitions for bikes and pedestrians. And all of this should be done faster, even if that means raising more in taxes each year. That additional tax should be raised by further taxing gasoline at the pump. I for one would be happy to pay an additional \$1.00/gallon of gas if I knew it would go exclusively towards improving public transit in the region.
NORTH KING COUNTY	Ballard to U-District light rail
NORTH KING COUNTY	If the train can go to dupont, why can't it go to olympia? We need better express service between olympia and seattle.
NORTH KING COUNTY	We need bus/rail service to/from South Lake Union from/to everywhere. Also, the Ballard light rail should be started immediately and completed in 3 years.
NORTH KING COUNTY	It appears as if in West Seattle the light rail project ends in the Alaska junction. Sure this is a high use area but large concentrations of people of color, low income, limited English speaking, immigrant, and refugee folks live south of the junction in Delridge, South Deleidge, Westwood and White Center. These folks rely on rapid transit to get from job to job to their children's school and home. I'm concerned about the lack of attention paid to this area with regards to light rail. Why are middle class to wealthy white people given priority with regards to transit over individuals in need and individuals who will have to continue to wait for dependable transit. This is an equity issue that I think deserves more attention.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Please add the West Seattle extension to Burien. Parking in the transfer areas is very limited and taking a bus from points South to transfer to rail in the Junction won't be time efficient enough to justify getting off the bus in the first place. It will be great for all those new apartment dwellers in the Junction, but for gaining the support of the home owners on the peninsula who largely would be paying for this, you need to serve them directly. Plus, connecting to the airport would be very helpful not just for West Seattle residents but also for Vashon, South worth, and Port Orchard.
NORTH KING COUNTY	Restrooms at the stations. I am an elder person who uses the light rail between Rainier Beach and Westlake. We need better parking and restroom facilities.
NORTH KING COUNTY	The addition of the 130th st station should not be provisional. It should be planned and funded with a projected end date. As a member of this neighborhood, I am seeing the rise in housing and influx of people. Currently, there is little to no bus service at all in the area. If you skip this station, you will just be forcing people to drive, whether to a station on 145th/Northgate or to drive altogether because the time to drive to a station further away vs just driving to the destination is comparable. If you want people to ride transit, you have to give them access to it. I believe if attention is given to the influx and building that is happening in North Seattle, it will become glaringly obvious that a station is needed at 130th St.  25 years for this to be complete? That is a very long time!
NORTH KING COUNTY	Ballard to University via Wallingford/Fremont Light Rail
NORTH KING COUNTY	Increase bus in neighborhoods deemed low income such as the central district or Leschi. More routes helps the low income and the elderly both of whom rely on the buses.
NORTH KING COUNTY	Living on vashon, I am concerned that no provision is made for water transport. Beside island connections, water transport is the shortest distance between Everett and Tacoma.
NORTH KING COUNTY	Please, please, please include the light rail station at 130th. The community has been actively championing this and we need the access to light rail between northgate and 145th. So much development is slated to happen between Lake City and Bitter Lake that it would be an absolute shame to miss the opportunity to get people out of their cars.  Thank you!
NORTH KING COUNTY	Add a station to existing Sounder Train line at Interbay. There's room there and it would easier access to bus lines from there that could serve Magnolia and Lower QA.
NORTH KING COUNTY	Ballard to UW with EIS and Record of Decision should be in this plan. It should also be a Provisional Line so that if extra funds become available work can start as soon as possible.
NORTH KING COUNTY	Tunnel in West Seattle, please.
NORTH KING COUNTY	Lightrail extension across 520 and up to Woodinville connecting tourists and locals easily to a burgeoning tourist area.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	I think it is very important to make it easy to get to light rail stations. This should include parking at stations in suburban areas, and convenient sidewalk and bike access in urban areas. The sidewalk and bike access should extend at least 1 mile from stations. Convenient access to the stations is as important as having the stations.
NORTH KING COUNTY	I wish the Puget Sound metropolitan area had adopted the fast rail transit system that was offered back in the 1970's, that was later adopted in the Bay Area and became BART. The transportation gridlock crisis is currently Seattle's biggest problem and challenge, and needs the bold planning that I see here. We should also be considering the implementation of new AI driven vehicles which could provide personal subscription-based transportation without adding more privately owned vehicles to the roads. These vehicles could potentially replace privately owned vehicles, which most of us use only 5% of the time, and supplement the proposed public transportation system.
NORTH KING COUNTY	In the north end we need the 130 st station. The project needs to be faster
NORTH KING COUNTY	There needs to be an east/west light rail between UW and Ballard. This is a short distance and going through downtown would be extremely inefficient.
NORTH KING COUNTY	Why does the Sounder North run only a few times per day, and only supporting those commuting from Everett->Seattle and back?! I live in Ballard and work at Boeing in Everett. I would love to be able to take that train to the Mukilteo station, and then maybe a Boeing shuttle. I love living in Ballard, but chose this largely to support my northbound commute and would like to live farther south. Or I'm happy to bike to the King St Station. Also, I think with autonomous cars and easier coordination of ride-sharing, these technologies will leverage our existing highway system so much more efficiently that it will remove the need for large infrastructural projects such as ST3.
NORTH KING COUNTY	Pedestrian and bicycle safety and access should be a part of the entire process. We need safe accessible bike routes in the region.  West Seattle needs to come online sooner than 17 years!! I know everyone will want their area to be first but the access is already difficult!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>Getting cars off of I-5 and our interstate corridors is critical. They've become choke points stopping movement local, regional, and international goods and services as well as impacting the quality of life for motorists who must them. Adding the 130th Street station in north Seattle and expediting the Lynnwood to Everett leg would go far to improve the quality of transportation and get cars off the road.</p> <p>North Seattle is a vibrant, vital, rapidly growing area of Seattle that I-5 runs smack in the middle of. Adding a station now will not only enable this area to grow but also removes traffic that helps to choke I-5. To add it later, at a much higher cost, is fiscally irresponsible and will negatively impact the area and transportation for years.</p> <p>It is also critical that light rail be extended to Everett as quickly as possible to reduce traffic and improve transit on the I-5 corridor as well as keep Snohomish county politically committed to light rail/transit expansion. Twenty years to get to Everett is ridiculous and if I lived in Snohomish county I wouldn't vote to spend a cent for Sound Transit. The transcontinental railroad was built in six years! Come on people, step it up!!!</p>
<p>NORTH KING COUNTY</p>	<p>Include N. 130th Street Light Rail stop, rather than making it provisional.</p>
<p>NORTH KING COUNTY</p>	<p>I would be able to use mass transit if 130th station included.</p> <p>Please build this. Otherwise I cannot walk to 145th and would continue driving. Please listen to North Seattle residents and reduce congestion on I-5 into Seattle.</p>
<p>NORTH KING COUNTY</p>	<p>A line connecting UW to Ballard (which should also serve U Village and Children's Hospital) and a station at NE 130th are more important and more cost-effective projects than all of the rest on this list and it is a shame they aren't included in the draft project list. The station at NE 145th St. in Shoreline should have been at NE 155th St. which has no conflicts with I-5 interchange traffic and greater TOD potential, but that ship has sailed in ST 2. If we are going to build light rail to West Seattle in ST 3 for political reasons despite the arguments in favor of spending those funds more effectively on UW to Ballard, then we should definitely directly serve the Junction and let the Delridge corridor be served by a high quality bus line. Light rail to Issaquah is a waste; there isn't the demand out there to justify light rail and there isn't about to be despite Issaquah's plans to upzone. It is inexcusable that Sound Transit has not made provisions for expanding the system in the previous phases, either by purchasing land for future construction staging, or by constructing stations with potential grade-separated, efficient pedestrian connections between connecting lines (e.g. at U District Station ). The Paine Field diversion in Everett is far better served by buses and a more direct, cheaper, route to Everett that is faster to construct and faster to ride is vastly preferable. If commercial air service begins in earnest at Paine Field we can consider adding a spur line at a later phase. There is too much parking in this plan. At \$80K/space or even half that it is not worth it, and more space for cars equals less space for people and other uses of the land. For \$80K per unit we could probably build cheap apartments near the light rail stations in far-flung areas. Let private industry fill the need for parking if there is a market for it.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	The Boeing Access and Graham stops are vital. You also need to get three trains running during peak times on the light rail. The trains are too crowded and every single night full trains pass through University Street stop and you can't get on the trains. Also the buses need to get out of the tunnel. It makes the train a mess.
NORTH KING COUNTY	Ballard to UW underground line
NORTH KING COUNTY	You have done nothing to make your stations,buses or light rail family friendly but just the opposite. I consider your organization staff does not understand good station planning. The lack of signage is terrible. You have no central station with good connections. It is a dismal prospect everytime I use it. Families will not use it do to your policies that are not family friendly. Your timeline is a joke. Park and Rides should not be necessary if you had a better connected system to residential neighborhoods. I am a voter and wondering why I should vote to tax myself for a system that provides me and my neighborhood with nothing. And when I do use it, it is so unfriendly. You have totally forgotten the customer.
NORTH KING COUNTY	Add light rail from Tukwila to Bellevue via Renton before the eastside rail corridor is lost to rail use. Then I would support the plan but I still would not support the funding method or the timeframe. This should have been done decades ago. Reallocate money the state is already collecting rather than raising existing property or car tab taxes. Its all about priorities. Tell the legislature to be more miserly with our money and spend (carefully) on education and transportation and instead cut the fat. Then perhaps once the fluff was removed from the budget, a gas tax increase could fill in some of the funding gaps.
NORTH KING COUNTY	Sounder station in Ballard, which was planned as a provisional station back in the 1990's, but which, obviously, never happened. It is time to revisit this project in light of the fact that, if the current schedule remains, Ballard will not get rail in my lifetime.
NORTH KING COUNTY	Add a line up Lake City/Bothell Way!
NORTH KING COUNTY	There is no east-west connection across Seattle, which is currently a huge problem. There should be a Ballard to UW connection built as part of ST3.
NORTH KING COUNTY	I think it would be cool
NORTH KING COUNTY	I strongly support all expansion of rail and would love to see rail access not only in the Seattle area but all across the state and west coast.
NORTH KING COUNTY	Ballard to U District needs to be orioritized. As does UW to Redmond across the new 520 bridge. Scratching my head at why light rail wasn't integrated into the new bridge plan.
NORTH KING COUNTY	The station at NE 130th St is critical to the development of Northeast Seattle.
NORTH KING COUNTY	There doesn't seem to be enough emphasis on connecting low income communities to transit. West Seattle and Ballard light rail is desperately needed, but what about the folks who truly depend on transit and who are being pushed further and further out of Seattle? In addition, any light rail extension to Ballard should probably hit as close to South Lake Union as possible, because that area is a nightmare.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Work on getting Sounder commuter trains to Everett and Olympia before the extensions of light rail to Everett or extension in Tacoma
NORTH KING COUNTY	we need to fund as many projects as possible.
NORTH KING COUNTY	I am extremely disappointed that central Seattle is being under-represented in ST3. It is critical to build connectivity in Seattle's densest areas, which would be the most efficient way to increase ridership and connectivity. We need a Metro 8 Subway line connecting South Lake Union to 23rd/Madison and south along 23rd. It is mind boggling that ST3 does not even include a STUDY. Funding for Construction of the Metro 8 Subway should be included, but at least a study for future investment. Sound Transit should also put up some money for the Madison BRT project. We were blind sided by its exclusion in the draft plan.
NORTH KING COUNTY	Pedestrian overpass at Northgate. I-5 blocks neighborhoods to the west.
NORTH KING COUNTY	How about some reverse commute options? To get from my home in Seattle to my job in Everett would be a ~1.5 hour bus ride. When I compare that to my <30 minute drive, public transit makes no sense.
NORTH KING COUNTY	Now is the time to capitalize on constituent interest in public transportation.
NORTH KING COUNTY	It would be great to be able to commute from Seattle to Olympia and vice versa on mass transit, and yet I don't see any plans for this. Help!
NORTH KING COUNTY	I think the study from Ballard to Redmond should be of higher priority. Ballard-UW is a huge route; then getting to the east side would absolutely open up the city. A lot of Microsoft folks live in northern Seattle, and while there will be a route for them, it will be much longer than if a 520 alignment were in use. But in general, I want to see this measure pass!
NORTH KING COUNTY	light rail from Ballard to UW.
NORTH KING COUNTY	Eastlake needs better connection services to downtown. Expand the SLUT to the University bridge
NORTH KING COUNTY	Consider building an covered elevated pedestrian walk-way North to South through downtown Seattle, possibly using current ally space. This would allow pedestrian to walk rain or shine without having to stop due to traffic.
NORTH KING COUNTY	Add a Link route between Burien and West Seattle Alaska Junction.
NORTH KING COUNTY	The provisional status of the NE 130th St Station should be lifted and the station made a mandatory element of ST3's first phase.
NORTH KING COUNTY	Travel efficiency is what makes excellent transit systems truly great. Shortening trips by building connections on single mode transit (for example, the Mt. Baker and I-90 stations are less than a mile apart, but will not directly connect) is something that should be planned for and accommodated wherever possible, even if those lines can not be imediately built. Please be forward thinking- don't lock us into the population patterns of today by building a shortsighted system.
NORTH KING COUNTY	Better connections should support the large amount of transit patrons in the 125th & LakeCity Way area. There are a lot of people who would benefit from increased opportunities for connection to rapid transit close to this location. Parking would be an added plus.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Without reliable intra-city connections (read: MORE light rail), connecting the nearby cities to Seattle will not provide the reduction in congestion that I think the area needs. The speed at which we study the ballard to U-district light rail line needs to be drastically increased, so that we can study additional east-west corridor studies within the city. I strongly support all forms of increased transit that can not be slowed down by all the single occupancy vehicles. This includes light rail as number one priority, rapid ride lines, transit only lanes for traffic, etc. I support the proposals in ST3, but my biggest issue is that ST3 could be BIGGER and FASTER. I would happily have an increase in property taxes to accommodate it! Alternatively, I support an INCOME tax to pay for this to happen faster!!!
NORTH KING COUNTY	An option to link Ballard/Fremont/UDistrict
NORTH KING COUNTY	Ballard to UW light rail should be added. Downtown to Ballard light rail should be entirely grade separated.
NORTH KING COUNTY	There should still exist subsidized fare for students and people with low income, not sure of funding options. We really do need park/ride options at some stations - ie Beacon Hill
NORTH KING COUNTY	Please focus on Seattle as well. Skipping a very useful place for a light rail station in Lake City leaves out a huge area that is rapidly growing and us zoned as an urban hub. Also, the corridor between Ballard and UW us heavily used but completely ignored. Whether the solution is light rail or BRT with its own lanes, please support those who use transition the area that is providing the most funding to these projects. Regional access is important, but it won't work well if people getting to Seattle from outlying areas can't get around Seattle because Sound Transit didn't want to spend the time and money there.
NORTH KING COUNTY	South Park neighborhood in Seattle should not be overlooked by rapid and reliable commuting options going both to and from downtown. Current bus options are not enough.
NORTH KING COUNTY	I would like to see more grade-separated light rail in north Seattle. Specifically, connecting Ballard to UW, and extending the downtown-Ballard line to Northgate.
NORTH KING COUNTY	East-west travel in Seattle is extremely slow and unreliable for both buses and cars. Existing roads have relatively low speed limits, and have poor light synchronization which impact both transit and cars. Metro Route 44 is an excellent example of this unreliability. While the existing Ballard-Downtown and West Seattle-Downtown routes are important, connecting U-District with Ballard via Wallingford and (north) Fremont links many high-density, high-ridership neighborhoods to provide truly reliable service. It is disappointing that this was not given the same priority as the Ballard-Downtown and West Seattle-Downtown routes. But it is even more disappointing that this route will not even be prioritized for preliminary study. The timeline for Ballard-Downtown is already far too slow for Seattle's needs, but the timeline for Ballard-U District does not even exist even though it is urgently needed as well. This is unacceptable. I love transit (I'm pursuing a career in transportation engineering) and we really need it. But we need it faster and more of it. At this time I don't think I can support a plan that does not include or study Ballard-UW, and delivers Ballard-Downtown much too slowly and with too many compromises in reliability (at-grade and with movable bridges)

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	I am hoping that you will add a tunnel option to the West Seattle Junction line. The tunnel wouldn't need to go under the Duwamish, but under Genessee to the Junction giving WS an opportunity for TOD as well as an improvement to quality of life.
NORTH KING COUNTY	Ballard to Kirkland/Redmond is more important then Lynwood to Everett, IMO
NORTH KING COUNTY	ST3 is great, but too focused on far reaching suburban areas that encourages sprawl. I would like to see more improvements within the greater Seattle/Bellevue area to improve transit reliability and travel times. We need REAL BRT -- exclusive BRT lanes, queue jumps, TSP, etc.
NORTH KING COUNTY	Ballard to UW ASAP
NORTH KING COUNTY	<p>I think support for ST3 in Seattle will be much stronger if 130th Street in-fill station is unequivocally added, Ballard's timeline is sped up, RapidRide E upgrades are added to go with D and C upgrades, and White Center/Burien Ext. is included as EIS, and Ballard-to-UW subway is also studied as an EIS to prepare and speed up their future completion.</p> <p>Also Everett should not build to Paine Field if they want time-competitive light rail. A simpler and more direct 99 or I-5 alignment would be cheaper and could be paired with BRT to serve the airport and industrial center.</p> <p>In Tacoma I would consider building the Tacoma Link first since it has great ridership numbers and a low cost and then building Tacoma Dome to Federal Way afterward.</p> <p>Thank you.</p>
NORTH KING COUNTY	More tunnels instead of bridges across ship canal. Subways are so much faster. These are super long term projects... Isn't subway a better investment in the long term. We are already taking 22 years for Ballard? What are we doing for the next 21 years with the new density? If we have to wait that long, let's do it right for the love of God.
NORTH KING COUNTY	Ballard to UW. Some sort of better service for the central district. I405 BRT improved with branching.
NORTH KING COUNTY	A direct an express light rail line from Wallingford/Fremont to Downtown Seattle. A light rail running on 45th Street connecting East West from Ballard to Wallingford to the University District.
NORTH KING COUNTY	Currently this plan completely bypasses the Phinney/Greenwood area where I live, which is becoming a more populated and vibrant area all the time. It seems like a no-brainer to connect the Ballard line up to Northgate to better serve this population.
NORTH KING COUNTY	light rail from downtown Seattle to Bellevue College/Eastgate Park and Ride

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>Priority for estimated completion time should be given to those areas with the greatest population density - thus greatest current traffic congestion woes. With more commuters utilizing I-522 more than ever before (due to I-520 tolling) the allocation of resources to complete projects in the vicinity of North Seattle from 105th through 145th should be weighed more heavily. Adding the more transit options in general (light rail, versus more BRT options) for north/south commuting alternatives will help to alleviate the I-5 and I-522 bottlenecks in the Northgate/Shoreline/Kenmore areas. Thanks!</p>
NORTH KING COUNTY	<p>I think the lack of an east-west link within Seattle (e.g. from Ballard to U District) is the biggest omission in the plan. In my opinion making it easier to traverse the city in this direction is more important than adding a light rail connection from Ballard to downtown, given that we have the existing RapidRide D line.</p>
NORTH KING COUNTY	<p>Ballard to UW MUST be given provisional status and be as close to shovel ready as possible when/if excess funding becomes available.</p> <p>The same should be said for a "Metro 8" Subway through the densest populated areas of Seattle. ST must finish the studies needed so that Seattle could fund such a route with additional taxes.</p> <p>Light Rail routes MUST be grade separated especially within the city of Seattle. Tying down and limiting 100 year transit investments like the Ballard to Downtown route cannot be allowed to have the same flaws in speed and reliability that currently limits the Rainer Valley portion of Central Link. As a student that takes the Link to UW everyday I can not understand why we would not build another tunnel under the ship canal to Ballard. Build it once and build it right.</p> <p>Despite my enormous desire for additional transit of the Light Rail variety, I am going to find it very difficult to support and vote for the currently proposed compromised "at-grade/opening-bridge" line to Ballard. This is projected to be the highest ridership line/extension in the ST system, please do not hamstring it with the above compromises. I believe grade separation should be prioritized even if it takes longer, or delays other projects.</p> <p>Thank you for you time and best of luck as you put together a final plan to advance the transit in our region.</p>
NORTH KING COUNTY	<p>There needs to be a 130th Station.</p>
NORTH KING COUNTY	<p>We need more rail to get us around the city! I don't care about getting to and from the suburbs, there's nothing there for me. And BTW, this survey has WAY TOO MANY WORDS. Holy crap it was complicated. And the map sucked.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Sound transit should focus on providing the right transit options for each community it serves. Grade seperated rail is critical in dense Seattle, but useless for serving low density areas (Paine Field shouldn't be considered). Especially considering Sound Transit's underwhelming history of TOD. BRT and improvements to express busses and Sounder service should be used to rapidly connect far flung, car oriented cities. Light rail in the city should have dense urban station spacing. We should not complete the spine to enable miniscule numbers of park and ride users at the expense of high performance lines in Seattle.
NORTH KING COUNTY	ALL DAY SOUNDER SOUTH service between Seattle and Tacoma.
NORTH KING COUNTY	UW to Ballard light rail should have been built already.
NORTH KING COUNTY	-Rainier Valley Bypass on Link line between SODO and Tukwila via Georgetown and South Park -Sounder North Stations at Broad Street, Interbay, Ballard, Golden Gardens Park, Carkeek Park, and/or Richmond Beach -Sounder South Stations at Georgetown and/or Boeing Access Road -Thru-service on Sounder (one-seat ride from Everett to Lakewood) and/or all-day service -A new DSTT for both buses and light rail (ample capacity for both modes--not just one or the other and not just freeway express but routes either) -Possible use of DMU's on Sounder North (instead of locomotive-hauled equipment)
NORTH KING COUNTY	As much transportation as possible! Seattle is growing at an astounding rate. Ballard alone is adding ~over 1000 new apartment units alone. We need swift action! No more Bertha-type situations. Spend money where it's necessary to get the results we so desperately need as a city! If it gets too crowded the there will be no where to park. If there is no where to park then there will be hundreds more on transit. Efficiency in projects is crucial.
NORTH KING COUNTY	Please coordinate with Seattle Subway's proposals, which make use of Seattle-only funding for Seattle-only transit components.
NORTH KING COUNTY	Ballard to u district line should at least be included. Ballard line is needed much faster and with grade separation. Kirkland also needs a station. Too much emphasis on extending the spine to places that won't even use it much. Focus on areas with heaviest usage.
NORTH KING COUNTY	The South Park community of Seattle continues to have their public transportation options decreased. After they have continually cut the buses to the area, I would expect it to be part of one of these plans above. Please reconsider. I'm not sure if the reasoning is because the lower income bracket in South Park, but I would argue, the lower income families are in greater need of public transportation options.
NORTH KING COUNTY	NE 130th Street Station to be built by 2023! HCT study NW Lake Washington study on State Route SR 522 for light rail.
NORTH KING COUNTY	Justin's park and cd service

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<ul style="list-style-type: none"> <li>-There should be no at-grade crossings for light rail anywhere on the system</li> <li>-Any provisional studies should be upgraded to a full EIS</li> <li>-Invest in RapidRide E line</li> <li>-130th St light rail station should not be provisional but mandator</li> <li>-Complete light rail in-fill stops like Graham and 130th sooner to provide early deliverables</li> <li>-Maximize transit oriented development around all stations</li> <li>-Prefer an SR99 alignment to Everett, go directly to downtown Everett (skipping Paine Field) and serve Paine Field with BRT or a spur to expedite construction, reduce costs, and speed travel times</li> <li>-Prefer SR99 alignment from Seattle to Tacoma</li> <li>-Designate extension of West Seattle line to Burien as provisional</li> <li>-Designate Ballard-UW line as provisional</li> </ul>
NORTH KING COUNTY	I think a north bound Sounder train should be added in the morning and a southbound in the evening with bus or shuttle service from Mukilteo to the Boeing Plant that would support the plant schedules. Boeing keeps reducing jobs in the south end and moving them to Everett plant which is a disaster for the workers being moved to the north and maybe a Sounder train service added out to Black Diamond area.
NORTH KING COUNTY	Ballard to UW light rail should be the number 1 project. There is no way to improve speed and reliably on this route, nor is there any other route with higher demand. Riders on light rail from Ballard to downtown via the U District would only have 6 minute penalty over a much lower demand direct route via Interbay.
NORTH KING COUNTY	running of trains later into the night to increase safety/reduce drunk driving and accommodate people who do not work 9-5 shifts. prioritizing plans that decrease driving in all aspects of commute
NORTH KING COUNTY	Contingency Funding for Ballard - UW line should be included. Ballard-Downtown should be completely grade separated, Everett line should use BRT or rail spur to Paine Field rather than a full diversion. Continue to speed up timelines where possible with Ballard line continuing to be critical due to potential ridership. These items if implemented will greatly improve chances of passage in Novemeber.
NORTH KING COUNTY	Transfer to light rail from Kent/Auburn should be available without going in to downtown seattle and back tracking.
NORTH KING COUNTY	Light rail service would be still more useful if it ran until 2:30 or 3:00 AM.
NORTH KING COUNTY	Cross-town Ballard to UW line is a puzzling omission. This is a highly traveled and congested corridor. The city has terrible east-west connections and such a line would do much to alleviate this problem.
NORTH KING COUNTY	Sounder should be extended to Olympia from Seattle... help folks to continue to work in Seattle, who no longer can afford to live here. It would help Olympia tremendously and stretch development.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	The proposal leaves service to Paine Field & Everett short handed with no improvements in bus service and a very late timeline for light rail. Rapid bus transit is needed between Seattle and Paine Field & Everett immediately until the light rail is built, even if light rail route is built sooner. Bus service is poorly supported today especially for people working near Paine Field. More could be done today under the 2015 House Bill 1842 but has not helped yet. The ST buses that serve the I-5 corridor are too infrequent and do not go near Paine Field and even do not accommodate local links between Paine Field and I-5. Community Transit provides service only into Seattle in the morning and out of Seattle in the afternoon and are unwilling to allow their deadheading buses to fill this need. I have met with ST, CT and Everett Transit with limited success so far on meeting this need and unfortunately ST3 further delays an overdue remedy.
NORTH KING COUNTY	The East-West connectivity in the current plan is limited in Seattle. Currently, most of the East-West light rail connections are present in the north and south of city, but are severely limited within the city. With the geographical layout of the city (i.e. lakes), bottleneck above and below Lake Union occur frequently and snarl traffic. Developing a line from Ballard to the University District would address many of these problems. In addition, both areas of the city are experiencing increasing density and will likely be areas absorbing much of the urban growth in the coming years.
NORTH KING COUNTY	We urgently need better bus service from Bellevue to Renton area/transit center. This bus access is very limited compared to other buses that run from Bellevue and the buses themselves are always full. It would also be helpful if articulated buses were added to this route. This would be something that could be implemented soon.
NORTH KING COUNTY	Bus from 522 & Ballinger intersection West on Ballinger to Light Rail stations along 1-5 @130th then @ the Mountlake Terrace station once completed.  Parking near the 522/Ballinger intersection for commuters.
NORTH KING COUNTY	What about light rail between U district and Ballard? I think this should be moved up for completion in 12 years.  Tunneling should be used as much as possible for all new light rail within Seattle. The new UW to downtown is fantastic mostly because of the tunnel. The light rail from Ballard to downtown should be in a tunnel not on 15th at grade.
NORTH KING COUNTY	Extend the SLT further down Eastlake.
NORTH KING COUNTY	Elevate the light rail for all the right reasons. There are no good reasons to not elevate.
NORTH KING COUNTY	Please add a park and ride facility in Lake Forest Park to the plan.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	I work near the Boeing Access Road proposed location, and feel this is a very achievable project with a large impact. This is a very difficult place to use the current transit system. Myself and a few coworkers have tried at various times to commute on the current bus routes, and we always end up back in our cars. The area is very under served, requiring transfers between multiple infrequent routes. Adding a stop here to the existing light rail route will provide the area with a clear, consistent transit choice. In our growing city this is critical to keeping an area competitive in the job market. As a resident of the city I enjoy easy transit access to nearly everywhere I want to go - except the Boeing Access Road vicinity. I would not like to see this area get left behind, especially with a rail line going right over its head.
NORTH KING COUNTY	Downtown to Ballard route should have a stop in Queen Anne--between Seattle Center and Smith Cove. We Queen Anne residents pay very high property taxes (it's my biggest yearly expense by far, eclipsing food and housing costs). You are asking us to pay a disproportionate amount towards the costs of a light rail/transit system that will not benefit our neighborhood! And I may well be dead before it is finished. To get our support, The ST3 plan should 1) add a stop in Queen Anne and 2) speed up the completion of the Downtown to Ballard line. GOING EAST TO WEST IS AS IMPORTANT AS GOING NORTH TO SOUTH!
NORTH KING COUNTY	More projects. Speedier.
NORTH KING COUNTY	We need express bus service from Northgate transit center to Everett Transit center, and we need that NOW. Then the bus should stop on Maple and Pacific near Group Health Everett, before getting back on the freeway. It is ridiculous that I cannot take public from Seattle to Everett. Even the fast bus from 145th park n ride got cancelled; now it has 5 stops which makes it not feasible.  I am highly disappointed that the 73 no longer goes all the way downtown. Tho I love light rail, to go on bus 73 to UW light rail then to downtown from Maple Leaf now takes much too long. The 77 express bus from Maple Leaf only runs during rush hour. Bus 73 in past took 30 min to downtown; now with transfer takes an hour. Thank you.
NORTH KING COUNTY	Ballard-UW as the TOP PRIORITY! And absolutely nothing at grade within seattle.
NORTH KING COUNTY	I would absolutely vote for this IF a light rail plan was added from Ballard to U District.  I'm on the fence now due to not having the Ballard to UW and the slow timing of the project.
NORTH KING COUNTY	Go to Olympia with light rail!
NORTH KING COUNTY	The I might rail station proposed for the 130th street would allow for ore parking and less glut of traffic which already exists at the 145 street intersections. Allowing for both stations to be built will be able to handle all the traffic from both sides of I-5 converging on that area. It will likely cost 5x as much to build as an afterthought than planning to add the 130th station at a later date. In my view, the 130th station is a must-have, NOT an option.
NORTH KING COUNTY	Parking at current stations, particularly Husky Stadium in Montlake area of Seattle

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	I believe that ST3 should help plan additional lines in Seattle's urban area to reduce engineering delays when cross-town urban lines become unavoidably necessary (and are perhaps funded by entities other than the full ST taxing district). I also would strongly support grade-separated travel to Ballard, given ST3's own estimates of the time differences between at-grade and grade-separated travel.
NORTH KING COUNTY	I wish light rail would expand east to the Central District. It's unfair how poorly serviced the CD is!
NORTH KING COUNTY	Bus routes can not only be created sooner than rail, but can adapt in future to new travel patterns. Please have BRT stop only once a mile at popular destination points, while serving the area between stops with small shuttles delivering passengers close to their destinations and bringing people to the bus stop. People can hail the shuttle within the area by hand or by phone. We can pay for this by eliminating the costs of stations, rail lines and parking lots. We need to make transit more convenient than the private automobile. To save lives and this planet, we need to do this now.
NORTH KING COUNTY	Consider a future study of a Burien to SeaTac extension of the light rail and then Burien to Renton from there. This gives those living in West Seattle the direct option of catching rail to the airport and other locations to the south and east without having to connect downtown.
NORTH KING COUNTY	East-West light rail from Ballard to U-District. 25 Years is TOO LONG to wait for these projects to go online, especially in the City of Seattle, where development is out of control and there seems to be NO correlation between the building of multi-unit housing (with NO parking) and the transit plan.
NORTH KING COUNTY	Strongly support improved access and decreased traffic congestion between north Seattle and south of downtown.
NORTH KING COUNTY	Ballard to crown hill Ballard to uw
NORTH KING COUNTY	We need a Rapid Ride bus on Seward Park Ave S. Also parking at all light rail stations! I live a mile from Rainier Beach station and it is not safe for me to walk down Henderson especially at night. Other neighbors say the same thing. This makes it so we do not use the station as frequently.
NORTH KING COUNTY	Ballard to UW should be included in ST3. The Ballard to downtown line needs to be delivered sooner. West Seattle to downtown needs to be delivered sooner. West Seattle to Burien should receive a full EIS and be shovel ready, as should the Metro 8 line. We should focus more on the urban lines than the suburban lines.
NORTH KING COUNTY	- Grade separation of the entire Ballard-Downtown line for overall system reliability - Study of Metro Route 8 line from downtown - SLU - Capitol Hill - CD to Judkins Park - Study of Ballard - UW line

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	Bus service, express service from south seattle to Tukwila, Renton and federal way. Better service to poor neighborhoods who also need efficient affordable transit. Let corporatons pay for their employees to get to work faster. This smells rotten, like tax payers for expensive sports stadiums that the average worker can never afford to attend.
NORTH KING COUNTY	<p>More focus on the most populous city in this area: SEATTLE. East west travel is terrible within the city - the Ballard to UW line must be considered in ST3. It cannot wait 30+ years. If necessary, include as a provisional project so it can be paid for with cost savings.</p> <p>Construction must be expedited on all Seattle light rail routes, 22 years until Ballard is connected is unacceptable.</p> <p>Routes should not be at grade - this is our chance to do it right, let's pay for it now and make our routes grade separated.</p>
NORTH KING COUNTY	Ballard to UWMC needs to be added and be light rail immediately. All projects should not be more than 10 years from completion. Light rail Ballard to downtown needs to happen in separate grade immediately. Without these on the proposal, I will vote no.
NORTH KING COUNTY	The NE 130th Street LINK Light Rail Station should be fully funded and be built as a part of ST 3. This would help decrease congestion at both the Northgate and NE 145th Street stops (given the proven success of U-LINK). To add it on later would cost 3x as much money. Also, the pedestrian and bicycle bridge connecting North Seattle College to the Northgate Station should be fully funded as well. So, many people would be able to have a faster connection going to and from Northgate area.
NORTH KING COUNTY	I really think that the Aurora corridor would be best served with a light rail line, vs a bus line. Right now, the bus is hemmed in by parking in the curb lane, and doesn't run efficiently through the corridor due to traffic on the street. If Aurora were given a rail line it would be much more efficient.
NORTH KING COUNTY	An east-west tunnel in North Seattle would be amazing. There is almost no place in the region that is as slow to drive compared to the speed a train could have - it would become the preferred way to get between Ballard, Fremont, Wallingford, and the U-district, and connect very well with Metro bus service. If it cannot fit within the budget for ST3, then please make it a provisional project so that it can be completed if funding becomes available. Thanks for listening.
NORTH KING COUNTY	Station at N. 130th is a must. Please move up the Ballard and West Seattle lines, so those are built first.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

NORTH KING COUNTY	<p>I am strongly in favor of the brt spur to Paine field. The diffuse nature of development in this area would be better served with several, flexible bus stops rather than fewer train stations. This would also speed the delivery time up to make ST3 more palatable.</p> <p>The project should also include money to improve rapid ride e so it is an actual brt line.</p> <p>I strongly oppose the amount of money being spent on parking garage in the plan. Any opportunity to remove parking garages and use that money toward other improvements should be realized.</p>
NORTH KING COUNTY	I'd like to see more Link stations between the University District and Lynnwood.
NORTH KING COUNTY	Seattle to to Bellevue train needs to run within 1 year.
NORTH KING COUNTY	<p>I can only speak from my personal commute experience, but why are you addressing the C &amp; D rapid rides but not the E? It is THE ONLY bus that goes up and down Aurora, but it is constantly late and/or full. Can we look at adding light rail up the Aurora corridor? Having a vision for a transit plan is great, but you're leaving a lot of people between 15th and I-5 stranded with the same crappy service we've had for a while now. Coming to work in the morning is fine. The bus is rarely late - but we're crammed in like sardines by the time we get to Denny. However, going home is completely hit or miss. E-line busses get bottlenecked trying to get through downtown. When I'm waiting at the last stop before it heads up Aurora, I have no idea when the next bus is - despite having the 'One bus away' app. Additionally, I don't even know if there will be any room on en E-line when it does finally arrive. I can be standing there for 1 minute or half an hour. (One night I was waiting for 55 minutes). What I'm saying is, the E-line is considered a rapid ride, but in reality, there's nothing rapid about it. Coming to work takes 15 minutes, going home takes over half an hour once I'm finally on a bus. Like I said, having a transit plan is great, but get what you already have in place working properly first.</p>
NORTH KING COUNTY	Since West Seattle will have to wait 17 years for light rail, please add a bus only lane to the West Seattle bridge to 99 North on ramp.
NORTH KING COUNTY	Seattle to Redmond Light Rail is sorely needed.
NORTH KING COUNTY	Ballard light rail should run at least to 85th Street, and preferably all the way to the Northgate TC.
NORTH KING COUNTY	There should be a larger consideration of biking/pedestrian access to mass transit.
NORTH KING COUNTY	White Center and Delridge are a commute death sentence and should be considered.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>I am a strong supporter of transit who uses it daily to commute, and often on weekends. I have volunteered to assist with previous Link segment openings. For me to be ambivalent or leaning against the ST3 plan leaves me concerned. I think the core of my ambivalence is the poor bang for the buck nature of these projects and the fact that the highest value projects (riders per amount spent and need for continuing operating subsidies) are slated for completion last. The Ballard line in particular would be the most transformational for those traveling between NW Seattle and downtown in terms of reduction in commute time v. bus.</p> <p>By contrast, the far flung north and south extensions would be slower than highway buses and would travel along existing freeways like the highway buses. So what is the purpose then? Stations near freeways with giant park and ride lots are also unlikely to support TOD. I just can't see the major benefits with such lines. If I saw that there were future downtown Bellevues or Spring Districts being planned and zoned for the future north and south extensions I would get it.</p> <p>Finally, the timeline for Ballard is just too slow. Why isn't ST proposing U-District to Ballard, which should be much faster to build and would provide Ballard residents with a quick reliable way to get to UW and NE Seattle and a route to downtown that would be nearly as quick as via Interbay? Perhaps with the money saved, a spur from downtown could help connect SLU and/or Belltown to Link as well.</p> <p>At a minimum, ST needs to find a way to offer faster timelines if local leaders cooperate on the regulatory and bureaucratic things that slow down the process. And TOD needs to be pushed to increase the value of the lines, such as is done in Vancouver, BC.</p>
<p>NORTH KING COUNTY</p>	<p>Prioritize a grade-separated light-rail line from Ballard to the University District</p>
<p>NORTH KING COUNTY</p>	<p>Queen Anne needs to be included for the link rail. It's extremely difficult to get to, hard to find parking, and a big neighborhood. The funding is too expensive for regular taxpayers. Suggest doing fundraisers/getting sponsorship from Amazon &amp; Microsoft, as they are the main drivers of increased traffic.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

Subarea	Additional Feedback - Project(s) should be added in the ST3 final plan
EAST KING COUNTY	Ballard to UW should be included if at all possible.
EAST KING COUNTY	I cannot believe NONE of the plans include utilizing the existing Eastside Rail Corridor for light rail. It is inconceivable. This should be the TOP priority in future light rail plans and it's not even being discussed.... I am an AVID cyclist and I'd rather loose the entire corridor to light rail if need be, but from what I have been told the easement is large enough for BOTH. THIS should be the FIRST thing you should be developing on the eastside. Get your heads out the the sand!!!
EAST KING COUNTY	More light rail options; it is the most efficient means of transporting large numbers of people.
EAST KING COUNTY	Ballard to UW dedicated light rail. Lynnwood to seatac light rail on I 405.
EAST KING COUNTY	Rail service to downtown Kirkland.  With the Kirkland Urban project going on, this will brings hundreds of new families as well as thousands of new workers to downtown Kirkland and there are only four ways into downtown Kirkland, 85th, Market street, Lake Washington BLVD, Houghton.
EAST KING COUNTY	Kirkland should get light rail regardless of what a minor vocal group of homeowners think. This package takes too long for too much cost. I won't vote for this package as proposed. These projects need to be online in under 15 years, not 25.
EAST KING COUNTY	We need really good connections from EastSide to downtown Seattle. Places like Redmond, Sammamish, Issaquah should be connected very well with Seattle. All the light rail options shows multiple transfers. Can we think of some plan to make it a max of 2 connections
EAST KING COUNTY	ADD: Light rail across I-90 to connect Seattle and Bellevue. ADD: Light rail from airport to Bellevue.
EAST KING COUNTY	Just freaking build it so a person can get from Redmond to Paine Field or the Renton Boeing Plant to Tacoma or from Tacoma to downtown Seattle in 45 minutes! Make it so they can drive to it, park and be on a train/bus in 5 minutes. Make it so you can get out the same parking lot in 5 minutes. make it freaking convenient so a person who doesn't want to live in a high density apartment/condo will use it.
EAST KING COUNTY	Please add light rail along the 405 from Bellevue to Bothell. It is obviously missing, and happens to be my commute!
EAST KING COUNTY	Light rail from tukwila, through Renton to Bellevue
EAST KING COUNTY	I think it's shameful that Kirkland would refuse light rail support. I realise there isn't much you can do if they reject the work, but I think it's worth hammering them some more.
EAST KING COUNTY	Get light rail on 522 corridor....

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	Ballard to UW grade separated. East-West rail options in general. Many of the city's east-west corridors are jam packed with traffic. Grade separated rail development in general. If rail has to share lanes with cars within the city, then rail's reliability advantages over busses will be eroded.
EAST KING COUNTY	More P&R's need to be added. As much as I don't like to see big garage structures, the fact is that unless people can drive to a P&R they're often forced to drive to work.
EAST KING COUNTY	I have commented on this before, there needs to be better and faster transit system, between Bothell and the ever growing south of Lake Union, currently bus 309 does not do enough runs and 522 and 312 both goes through messy downtown traffic. Need to improve the traffic congestion on Mercer exit by Fred Hutch, Amazon, and Google soon to be there too.
EAST KING COUNTY	Issaquah to Seattle light rail
EAST KING COUNTY	Would love to see I-405 light rail as opposed to BRT.
EAST KING COUNTY	Light link rail should extend from Redmond, through Kirkland and Bothell to Lynnwood or Mount Lake Terrace, with Stations in Kirkland and Bothell.
EAST KING COUNTY	Build more road capacity. Use existing right of way or eminent domain laws to improve road capacity. Almost everywhere else in the country the traffic problem is solved that way. Stop forcing expensive light rail on us, where you can put bus instead.
EAST KING COUNTY	Bellevue to Issaquah light rail should come here sooner! Maybe construction crew can work on that segment while other construction workers work on other segments. Traffic in Issaquah is starting to be pretty bad
EAST KING COUNTY	The timeline given here is depressingly slow. 20 years to get a train to Lynnwood? Really??? It seems Seattle has missed many opportunities to secure funding for public transit in the past, so I hope none will be passed up in future.  Increased taxation to fund public transit is regressive, and should be a last resort. An added gasoline tax or a tax on vehicles by weight would be much less regressive than a sales tax and/or residential property tax. Highway tolls are not the answer to anything, and have been a disaster as implemented.  The number one priority should be some E-W connectivity, from Ballard to Seattle Center, and finishing the northbound line to Northgate, Shoreline, and Lynnwood.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	<p>Mass transit PARKING PARKING PARKING!... if the resource is 2-3 miles away people won't walk to it.. they will get in their car and if they can't park... they DRIVE. Get real and build Parking Structures (Big multi-story Ones) into the plan. People need to do errands on their way to or from home, let them drive to light rail parking and do their errands too... it will save time and driving. Hey, you know you'll charge for the parking so just be real and plan for it and make the whole system more usable. PLEASE! Your current light rail parking is way way under sized, under available, un-thought out and just stupid... add parking to current stations also.</p>
EAST KING COUNTY	<p>I think a Ballard &lt;-&gt; UW line would be incredibly helpful.</p>
EAST KING COUNTY	<p>In part because of tolling of 520 bridge and significant increases in population density, traffic on Bothell/Lake City Way and connectors has become unmanageable. There should be a light rail line plan extending from Northgate through Lake City and up Bothell Way</p>
EAST KING COUNTY	<p>Need light rail from Redmond -&gt; Seattle. It's hard to afford to live in Seattle and the buses are over-full and turn people away everyday at rush hour.</p>
EAST KING COUNTY	<p>Sounder Train Service should extend to Olympia ASAP.</p>
EAST KING COUNTY	<p>Add Kirkland light rail option back in!</p>
EAST KING COUNTY	<p>I'm opposed to wasting time with rapid buses in Kirkland. I would be willing to pay much more than the tax amount listed above if we went straight to a light rail plan on the CKC. Buses aren't going to help many, and I doubt many are eager for those. Rapid transit is the key, and we shouldn't waste time (spending more) doing it later.</p>
EAST KING COUNTY	<p>Thank you excluding most of the Eastside Rail Corridor, particularly the Cross Kirkland Corridor from your transit expansion. We're looking forward to BRT on I-405, and the NE 85th freeway station. I would like to see a world-class paved trail on the ERC, which would be a relatively low-cost, high return feature of the bicycle and pedestrian access component. Perhaps you could use some of the \$20 million earmarked for 'environmental study'. A high quality pathway would attract hundreds, if not thousands, of low-environmental-impact commuters to the system. High quality, covered, secure bicycle parking at stations is a must for attracting bike riders. Check out the facilities for cyclists in Europe.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	<p>Bus Rapid Transit is a poor substitute for... well, Rapid Transit, and a distinctly mediocre one even for Light Rail. I do believe that BRT will help to alleviate the problems in the short run, and Light Rail does not have the same capacity as a true Rapid Transit system. This region's population is growing rapidly; if Rapid Transit is not appropriate for its current size (and I would argue that it is), it will soon be. The conversion of high-use Light Rail lines to Rapid Transit should begin within the time period set out, twenty-five years; the conversion of BRT to Light Rail should begin around the same time.</p> <p>In conclusion: I object to the timeline (I believe that Light Rail construction should be moved up at the expense of BRT), and I object to the modesty of the current plan (in its limited planning for future scale, that is).</p>
EAST KING COUNTY	<p>Bus route from Bellevue to the South Lake Union.</p>
EAST KING COUNTY	<p>Light rail should replace rapid bus on upper Eastside within this same timeframe (Renton up to Bothell &amp; Canyon Park) because traffic on 405 is just as important as 1-5. More people live north of the Bellevue-Redmond corridor (where the light rail ends), than live in Ballard--so why do they get lightrail and northern Eastsiders just gets buses???</p>
EAST KING COUNTY	<p>The UW to Ballard light rail line should be included in the ST3 final plan based on the merits identified in the ST3 corridor studies and as an alternative to the Ballard to Downtown line. The Ballard to Downtown line makes sense as a part of the plan given that the City of Seattle highlighted it as one of the corridors it was interested in pursuing high-capacity transit in its Transit Master Plan. However, Seattle chose to pursue this project before the studies were done in the aforementioned corridors revealing they were comparable in travel time from Ballard to Downtown while the Ballard to UW line cost less. Ballard to UW would enable a restructuring of the surrounding transit network that would make transit much more relevant to a large swath of Seattle as well as people in the region wishing to reach northwest Seattle.</p> <p>It seems that the technical and network benefits of the Ballard to UW line are clear from Sound Transit's own studies are clear, yet the project does not appear on the draft list which looks at projects to be implemented over the next 25 years. It's not clear why this is the case. Is there somewhere that makes clear why Sound Transit selected the projects it has? I'm sure it has something to do with how the Board feels the package will poll with voters but there must be some technical aspects as well.</p> <p>Thank you for your time in processing all of these answers and working to make our transportation system the best it can be!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	<p>Hi, Please add a direct Lightrail connection from Redmond to the new UW Lightrail station!!!! Please add the additional tracks on the floating bridge while it is being build. Using the lightrail via I90 is adding 1 hour more travel time - only the people going to the south are ever going to use the Redmond lightrail.</p> <p>The Lightrail would compare more to a trolley car in European cities. We need a REAL train system with dedicated tracks and higher speed. Please plan for the next 50 years when the amount of people will be 10 times as from today.</p>
EAST KING COUNTY	<p>As a commuter from Woodinville to Seattle, I would be interested in seeing anything reduce my lengthy commute time. A few ideas:</p> <ol style="list-style-type: none"> <li>1) The Bus Rapid Transit on Highway 522 could begin in Woodinville rather than Bothell.</li> <li>2) An extension of the light rail from downtown Redmond northwards towards Woodinville.</li> </ol>
EAST KING COUNTY	<p>The light rail line from Bellevue (to Lynnwood/Woodinville) north through Kirkland needs to be built. We just don't have enough north/south traffic options along the 405 corridor. I am sorry for my neighbors with their beautiful view homes, and I love the CKC walking trail. I really hate to see light rail go in and to loose the tranquility of our new walking trail and the sense of community it brings us --- but we MUST HAVE Light Rail.</p> <p>My neighbors don't know that there will still be a walking trail along side the light rail. If we could see some examples of this working, it might help dampen the opposition a little. I expect the opposition to be fierce.</p>
EAST KING COUNTY	<p>As a Renton resident, once again, I get NOTHING from ST; nothing from ST1, 2, or ST 3, except a bill!</p> <p>I very much want to support transit in our area, and I'd be thrilled to pay my fair share, but for the third time, such is not the option presented to me. I sucked it up for ST 1 and 2 and voted in support for the better common good, BUT no longer.</p> <p>I look forward to being a vocal opponent. Rich Wagner</p>
EAST KING COUNTY	<p>I-405 is one of most congested freeways in the area, yet there is no plan to put in light rail to Kirkland and Bothell. The tolling on 405 isn't working and there would have to be better on and off ramps for buses to use to make that an acceptable solution.</p>
EAST KING COUNTY	<p>Eliminate carpool lanes. There is a lot of excess capacity there that is going to waste. Don't reserve it for the privileged few who can afford , or use it.</p>
EAST KING COUNTY	<p>Parking at existing P&amp;R facilities is woefully inadequate. Some parts of the 405 corridor have decent bus service already, but there's no P&amp;R at NE 195th, and the Canyon Park P&amp;R is 100% full before 7am. Any bus that runs later than that is a waste - nobody can park to ride those buses anyway.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	We have an existing railroad tracks and right-of-way between Bellevue to Renton, Light Rail would be the least expensive since the foundation of the right-of-way and railroad bed already exist. I'm new to this area but have used both Boston's, San Francisco, Portland, and San Diego light rail, please reconsider light rail Bellevue to Renton.
EAST KING COUNTY	I was first very excited by this plan. But, I noticed something. This adds almost no access to the Sea-Tac International Airport for Eastside residents. The I-405 Bus Rapid Transit doesn't go all the way to Sea-Tac, but something that I would really like to see is a light rail south from Bellevue, through Renton, Tukwila, and connecting to the current Light Rail to Sea-Tac. Not only will this add more access for Eastside businesses, but it will provide unrivaled access to the airport, for the thousands of people living in Redmond, Bellevue, Renton (and possible Issaquah with other ST3 expansions). The population of those 4 cities combined is over 300 thousand people, and that number will only increase in the years to come. Thank you for considering this, and good luck in November!
EAST KING COUNTY	Ballard Light Rail needs to extend through Fremont to (near) UW to connect to the North line, and potentially run further up along 522 and out to Kenmore / Bothell / Woodinville. East/West traffic through Wallingford and Fremont is absolutely horrible, and bus service can't alleviate the problem due to the narrow, limited capacity of the streets. BRT along the 522 corridor will likewise be similarly hampered by narrow roads, and even with signal priority will likely be slowed down by the ever-present traffic along 522. Grade separated rail along this corridor will prevent that from happening (if the buses can be grade-separated as well, that'd be a fine alternative).
EAST KING COUNTY	Screw the BRT - there needs to be light rail along ALL of 405 and 522. The buses are a stupid idea otherwise and I won't support this plan.
EAST KING COUNTY	A direct bus line from the I-5/405 split, Bothell, Woodinville, south Lynnwood area, direct to downtown Redmond/Overlake transit center and possibly Issaquah.
EAST KING COUNTY	I don't like the current ST3 plan because 1. It will not be completed until after I am dead 2. It virtually ignores the eastside. There is an existing right-of-way from Renton to Bothell that could be used for light rail at minimum cost. This is inexplicably totally ignored by ST3. Use it. 3. It is a huge tax increase that benefits only the west side of Lake Washington.
EAST KING COUNTY	Light Rail line to Totem lake/KIRKLAND!!! It is about time we got something for our millions of dollars. And we have real growth issues/ urban growth center that should rank our rail leg very high!! We have higher density than any other Eastside city and are pushing that even higher! WE MUST HAVE RAIL!!!
EAST KING COUNTY	Light Rail from Woodinville to Bellevue on the Cross Kirkland Corridor is definitely needed. Possibly from Woodinville to Seattle onver 520 bridge or a new bridge made just for transit.
EAST KING COUNTY	There is no rail service for the Renton area, so I am against it. Seattle is not the only city there is in Washington.
EAST KING COUNTY	The 405 is consistently one of the most congested stretch of highway. It is inane that you are not planning light rail for the full length of 405.
EAST KING COUNTY	Light rail extension to Issaquah should include a station in Issaquah Highland.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	I'm curious to know of the feasibility of having light rails from Tukwila and Renton to Bellevue (TC). I-405 in that area is congested most of the time, wouldn't it be better to have the reliability of light rail than bus (BRT) that shares the same road?
EAST KING COUNTY	The timeframe for completing these expansions is far too long. We need a much more rapid development plan. Also, I can't support the proposed light rail developments without any service to the Renton area. It is unacceptable that Renton is completely bypassed by the light rail when the residents of that city and surrounding communities are in greater need of affordable, reliable, and less carbon intensive means of transportation than the wealthier residents of Issaquah or Redmond. And the rapid bus line expansion that serves Renton seems to miss a critical route, service from Renton to Seattle via I-90 or via I-5. Honestly, it feels like Renton is being ignored in most of the proposed planning and that seems shortsighted and irresponsible.
EAST KING COUNTY	Light rail to google and Kirkland. Cut And cover or tunnel as needed to preserve ckc, but Kirkland needs to be part of the 20 year light rail picture. Without it, I vote no.
EAST KING COUNTY	We need rail on the Eastside, particularly from Bellevue to Everett. \$10 tolls on the 405 are ridiculous. And no, otherwise than on the CKC--unless you're also putting them on the Burke-Gilman and tolling the 90.
EAST KING COUNTY	Projects should be prioritized to the most densely populated neighborhoods. A UW-to-Ballard line through Fremont is an example of this. Issaquah should not have light rail before Fremont or Wallingford.
EAST KING COUNTY	There is no BRT, ST Express, light rail or anything planned for East Kent, Covington, Maple Valley, etc. There is huge amounts of growth being planned for this area no sound transit has completely ignored this area. Petrovitsky or Kent-Kangley Rd could provide an excellent path of high capacity transit. A Maple Valley to Downtown bus?
EAST KING COUNTY	Your continue to give a finger to the SE quarter of the area. you will not even hold a hearing in Bellevue or Renton. Putting a new stop in Renton and telling everyone else in the area to go away is a good way to ensure that you get less votes. Maybe it takes a few decades but you still won't even PLAN to serve the area of S Bellevue to Tukwila. Don't expect us to give you any support. We would love to have transit, but have given up on anyone ever even planning to provide it - and we live in a relatively dense (and getting denser) area.
EAST KING COUNTY	Not sure if it's already in the plans, but the lightrail up to Lynnwood should make a stop at the MLT park and ride. Lynnwood park and Ride is over crowded and full by 7am. Many people, including myself, have moved over to other park and rides due to lack of parking.
EAST KING COUNTY	I will vote NO on this unless the BNF rail corridor is used. It already exists and it is being left out. This is a no brainer. Also, stop using the word MASS transit. We need RAPID transit.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	<p>Downtown to Ballard with any at-grade components would not only be a disappointment as a transit modality (especially given drawbridge-imposed delays), it could very possibly doom ST3 among Seattle voters.</p> <p>UW-Ballard would not only fill a need for East-West connections, plenty of studies suggest it would add more riders to the system, for cheaper.</p> <p>The Paine Field routing is unpopular with Snohomish county voters, and will require too much time to encourage otherwise rural areas to sacrifice their cars to use the train. Given the success other cities have found with bimodal rail options (that is, heavy rail for inter-city service, and light rail/subway within cities), attempts to solve both suburban and urban transit with one type of rail will require sacrificing stops for speed, or vice-versa.</p> <p>In short, having a continuous "spine" is over-emphasized.</p>
EAST KING COUNTY	<p>We should have the best mass transit system in the country - we are a much newer city than those on the east coast, yet their systems put ours to shame.</p>
EAST KING COUNTY	<p>Our existing park and rides fill up already - why should we add more capacity that people can't even use? You could vastly increase your ridership just by building more parking!</p> <p>If you want me to vote for ST3, you need to put some serious emphasis on PARKING and how I will actually be able to find a spot to take these new light rail trains once they are built!</p>
EAST KING COUNTY	<p>East / West light rail needs to be added across Lake Washington via 520. The current options planned for ST3 do not adequately improve travel times from Kirkland / Eastside to the UW, Ballard, and Fremont neighborhoods. I will continue to choose to drive if the only options are via Bellevue or around the northern end of Lake Washington.</p>
EAST KING COUNTY	<p>Do not listen to the Kirkland City Council. It would be terribly short sighted to leave light rail out of Kirkland</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	<p>1) What is the possible explanation for a delay of 8 years to implement BUS SERVICE??</p> <p>2) Why is the region relying so heavily on bus service in its plan, rather than additional light rail?</p> <p>3) One of the most congested areas on the east side is the 405/522 intersection, which moves an enormous number of commuters every day. Why does light rail not extend from Redmond through Woodinville to Bothell, then either follow 522 into the city or meet up with the Kirkland branch to enable commuters and UW Bothell students to take light rail into the city? This would also allow people in Seattle and surroundings to do their wine tasting in Woodinville without the current ongoing issue of drinking and driving in the area. (This may seem like a minor issue but I would imagine the Seattle powers that be would want to emphasize the tourist attraction of over 100 wineries and distilleries within a short train ride from downtown.)</p> <p>4) While parking at the stations is necessary, it is also expensive. Can this not be bid out to private contractors who will pay to build it for the ability to run it? And thus free up funds for additional light rail?</p> <p>Before moving to the Seattle area I lived in Boston, Chicago, and San Francisco. I have never lived in a city with such underdeveloped rail transit as I see here. I appreciate that Seattle is working to cure that, but please learn from the mistakes of areas that did this first. The SF bay area is seriously hampered by the decision not to extend BART onto the peninsula and into Marin, as well as the minimal route of BART within SF. People who live in the area love BART, but hate its limited reach. Meanwhile, Boston and Chicago have robust rail systems both throughout the cities and extending well out to the suburbs which dramatically reshaped the commutes of people in the area.</p>
EAST KING COUNTY	Light rail should get emphasized as the ultimate final goal for a complete light rail system covering the entire area.
EAST KING COUNTY	Is it more preferable to have rapid bus in the Renton and surrounding areas over light rail? I want to know why Sound Transit has decided on that in the ST3 plan.
EAST KING COUNTY	<p>The complete exclusion of light rail on the east side north of Bellevue in what amounts to a 30-year plan is unacceptable. Bus Rapid Transit represents the investment of millions of dollars for nominal gain. In reality, it is unlikely to provide any benefit at all to those who travel at peak times and already take the 532/535 lines that serve most of this corridor. It is actually likely that the commute will be made longer due to the addition of more stops.</p> <p>In addition, buses traveling on the highway shoulder is such a laughable solution that Sound Transit should be ashamed to be pitching it in a formal document.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	<p>I feel that the entire Newcastle / Renton area is being completely shafted. Bus service is non-existent to horrible, and density is rapidly increasing. Along the Coal-Creek corridor, over 1,000 residential units are going to come online within the next year, and the Renton Landing area is poorly served as well.</p> <p>ST should seriously consider extending light rail down the Coal Creek corridor, (rather than unreliable busses on I-405), connect through the Landing, over to Southcenter, and hook into the existing system at Tukwila.</p>
EAST KING COUNTY	<p>There needs to be rail, either light or heavy, around the southeast side of Lake Washington!</p> <p>It seems like a tremendous oversight to place rail E-W across the lake on I90 and WA520 (hopefully!) to the Eastside, but then not serve some of the worst-congested areas in the whole system. I spend the bulk of my commute time from Renton to Redmond stuck on the Renton S-Curves, up and down the Kennydale Hill, and through Factoria. There are a whole hell of a lot of us that can't afford to live closer to our work in Redmond or Bellevue but live down south, and we shouldn't have to route into Seattle and across the Lake to get to work (all roads leading through Seattle to get anywhere sounds like a fantastic way to make commute times longer for those on the periphery (eroding their interest in using transit at all) and needlessly add congestion to the core, where its already crowded enough without more people from throughout the region commuting through it).</p> <p>I don't think adding BRT to this corridor is going to work in the long run--you might get a few thousand cars off the road over time, but our congestion is going to get worse in this area the more people move into the region but can't afford the cost of living in the wealthier parts of the Eastside where they work. Buses, will only add to this congestion; we need to get people into entirely different infrastructure if we want to make a dent, and rail is going to be the answer.</p> <p>There are already heavy rail lines along this route that are unused--perhaps work the Sounder through it, or rip it up and convert it to light rail? Stop thinking with buses and make REAL changes.</p> <p>On a side note, I still think you should have gone with suspended rail over light rail--lower footprint, cheaper cost, and surprisingly earthquake resistant. Check out how well suspended rail fared in the 1993 Kobe, Japan earthquake.</p>
EAST KING COUNTY	<p>I haven't appreciated the ST process leading to these projects. BRT on the CKC should be added to the ballot. You have given the Save Our Trail folks fuel to fight all transit on the CKC -- which now is a huge disservice for the entire community and region.</p> <p>Kirkland is not getting enough service. Where did \$200 per year come from? I don't believe this is for the typical homeowner. What does it cost property owners?</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	<p>In my opinion, there are two major problems with ST3 as it stands--time frame and suburban-vs-urban provision.</p> <p>The projects described above are of the highest urgency and necessity. At this point, congestion in the Sound Transit authority jurisdiction is unsustainable and untenable. The areas with the highest density in this plan, West Seattle and Ballard, are receiving too low a priority in terms of build order. Ballard simply can't wait until the 2030s for functional rail connections to downtown. By this point transit connections in the urban core of Seattle will be so poor that I fear we will see another urban flight from the area back into the suburban regions of King and Pierce County, and possibly out of the state altogether.</p> <p>Having density and serving density should be the primary goals of ST3's mandate--it's where we'll get the best bang for the buck as tax payers, and also will provide the most benefit to the most people in need. Scaling density in central, urban cores like Ballard and West Seattle will bring significant knock-on effects to even the furthest suburban reaches of King, Snohomish and Pierce County, by removing the most possible cars from roads.</p> <p>That's why I believe this plan too-heavily emphasizes expansion to suburban locales. I'm not advocating for the removal of these plans--merely that Ballard and West Seattle Link should be the absolute priority to be down within the 2020s if possible.</p> <p>The most important thing that I believe can be added is proper planning and construction of a light rail connection between already-planned UW stations and Ballard. Whether or not this line would connect to the Eastside via Sand Point or 520 as you suggest can perhaps be delayed until a later date. The 45th ave corridor is one of the worst commuter corridors in the state, and one of the most important. This seems more important, and would serve more riders, than connections to Issaquah, and probably will even at the time of roll-out for Issaquah link in 2041. I plead that you move more forcefully and urgently towards proper connection of these lines to allow for better density scaling, less congestion, and hopefully more livable, walkable, and affordable close-in North End neighborhoods.</p> <p>And this is all coming from an Eastside suburbanite! I hope my concerns will be heard, because as it stands I would most likely vote no to ST3. It is too little, too late, and focuses too heavily on suburban reaches when we really need to connect urban cores comprehensively to properly see the benefits of such a system.</p>
EAST KING COUNTY	<p>the Renton to Lynwood 405 Corridor is a mess. BRT does not solve the problems with growth and congestion. Express lanes have helped those willing to pay but it's a short term solution. Instead of BRT, there should be more emphasis placed on extending Link both north and south on the 405 corridor with infrastructure for parking at each station.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	I understand the need to connect the suburbs and downtown Seattle via transit (in fact, I think this is very important), but it seems to me like the system to use for those branches would be trains like the Sounder, and have a different system that efficient, complete, and traffic-separated for inter-Seattle connections. I think the MTA in New York would be a good example of this idea--express, heavy rail to suburbs and then, once in the city you can ride a quick but complete rail system. After all, who wants to ride the light rail from Everett to Tacoma?
EAST KING COUNTY	Seattle to Issaquah direct rather than diverting through Bellevue. The amount of growth on the I-90 corridor is significant and the connection of workers and jobs in downtown Seattle is significant and worth reviewing.
EAST KING COUNTY	Should be a Ballard to UW line. Extending the spine is a terrible idea and BRT on 405 seems farfetched. It would require new lanes or changing a carpool lane. Should focus on making the dense areas connected first rather than focusing on the outlying areas.
EAST KING COUNTY	I lived in New York for a year and lived without a car. It was wonderful. I'd love to be able to do it again, but at the rate Puget Sound has moved I'll be dead before there is any improvement.  I'd like to see a shuttle between the Houghton Park and Ride and the South Kirkland Park and Ride so I could easily get to Seattle. The use of that Park and Ride is (Houghton) is way down. I know it is probably a Metro thing but it is silly to have that Parking lot with no good service anywhere from it. Why not build something there?
EAST KING COUNTY	If lightrail will be going to Redmond and Issaquah, why can't we open a light rail station in Renton?
EAST KING COUNTY	Include more services for Renton in the plan! Especially consider light rail that goes up the Eastside.
EAST KING COUNTY	Why is there no Light Rail or Sounder planned for the 405 corridor south of Factoria to Tukwila?! That area is a nightmare and there is no significant relief in sight. It is a major transportation link and yet it is as if it didn't exist.
EAST KING COUNTY	Kirkland needs Light Rail! We were promised that the Cross-Kirkland Corridor would be used for that!
EAST KING COUNTY	Light rail along 405 from Bellevue to bothel. This will allow more dense development on the east side.  Also 2033 is too long! We need it sooner than 25 yrs.
EAST KING COUNTY	We need to extend carpool lanes on 167 and widen it. Light rail should be offered sooner for residents in Issaquah area sooner than later.
EAST KING COUNTY	As an Eastside resident, the biggest problem I see with public transit is the ability to get to it. The light rail project will open up many possibilities, but picture the person that has to take a 20 minute walk to a bus that runs once every half-hour to get to that light rail station. Either he won't take the transit at all, or he will look for a way to park at the light rail stop. He needs either more frequent or more convenient buses near his home, or he needs ample transit center parking.
EAST KING COUNTY	I know my city (Kirkland) opposed, but please, please, please keep on them! With the expansion of the Google campus, Evergreen medical parks, all of the waterfront corporations and the waterfront tourist and nightlife traffic, we need the light rail!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	Reevaluate the success of current lines running from the eastside along I-90. The 554 is my major source of transportation over the summer but for the amount of people reliant on it, it is not dependable. The 554 left 8 minutes early from the Issaquah Highlands P&R at one point forcing me to pay \$25 to park for the day in downtown Seattle. The busses would consistently be overpacked during peak hours. In other cases, inexperienced driver would be given the route and would get on the freeway too soon forcing us to get off at the next exit, turn around, and go back to the next stop. In a commute that takes 45 minutes, I spent over an hour on that bus that day because of missing one stop due to the lack of knowledge regarding the route.
EAST KING COUNTY	If you do not include a light rail line to Totem Lake (yes, I'm aware of the Kirkland NIMBYs but they should be ignored) my wife and I will not support ST3. Alternatively, light rail along 522 would earn our support. Look at the ST3 map: NE King County is getting less than any other quadrant under this plan.
EAST KING COUNTY	Add light rail or express busses to the Sammamish Plateau including Issaquah Highlands, along 228th Street, Klahanie Blvd, and Express from Sammamish to Redmond via Highway 202.
EAST KING COUNTY	<p>Bullet trains. Now. That's the only way this expense is justifiable. Us from the international world find it pathetic to see so much money spent on such underwhelming transportation systems.</p> <p>"There simply is no more room on our roads. The best way to add more capacity to our transportation system is with transit, like light rail and commuter rail, that never gets stuck in traffic." poor wording, try instead:</p> <p>"The best way to add more capacity to our transportation system is with transit, like light rail and commuter rail, that never gets stuck in traffic."</p> <p>"Mass transit is critical to the economy. If businesses know their employees can get to work and products can get to market, they will choose to locate and expand here. "</p> <p>No. If businesses know that they're being touted as a motive for passing bills that raise their taxes, then they are insulted, and will be encouraged to leave.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	<p>Living on the Eastside in Issaquah, it's virtually impossible to commute downtown in under an hour, and parking is incredibly expensive. It's also really difficult to get to Bellevue or Redmond due to 405 and 520 (and feeder roads) being so backed up. Many commuters from North Bend and Maple Valley come through Issaquah to get both places - I think Issaquah should be much higher on the priority and done sooner. Transit is already heavily used at both Issaquah park and rides, so the people are ready for it. Bottom line, my friends and I make job decisions based on the horrific I-90, 520 and 405 traffic. It would take a lot to get us to work in downtown Seattle, much less Bellevue anymore. I'm sure you've done studies as to which regions would have the most usage of light rail. I'm just surprised Issaquah to downtown / Issaquah to Bellevue is 25 years away. The Seattle region is getting almost unlivable because of traffic - and for professionals like myself and my friends, traffic is THE most important issue for the city and for our general work/life balance. Being on the road an hour each way (minimum) wastes two+ valuable hours a day that just seems completely unreasonable and really eats into the quality of life. I know every region wants light rail first, but I think prioritizing Issaquah will have a ripple effect for the entire Eastside, north bend and maple valley. REI just announced its moving its headquarters to Bellevue (from Kent) - my guess is b/c they can't attract talent (two friends turned down offers b/c of the commute to Kent. And, it's hard to even fathom considering offers from even Amazon, Google and Expedia (when they move) b/c the commute times from the Eastside are so bad. Thanks for soliciting input - really appreciate it. I would pay more to accelerate the plan.</p>
EAST KING COUNTY	Please do more with Bothell.
EAST KING COUNTY	North/South light rail along I-405. Nothing is being done to relieve traffic on I405.
EAST KING COUNTY	More should be done to address congestion in the I-405 corridor. I am not convinced that BRT on I-405 is enough.
EAST KING COUNTY	Light rail to Kirkland and other communities
EAST KING COUNTY	The light rail should between Renton and Bellevue. I-405 traffic is getting worse every year.
EAST KING COUNTY	<p>We need light rail the length of I405... You had the opportunity after the dinner train left... Or putting it in the middle of 405 (like Portland). I think focusing on Bellevue to Redmond no doubt would help some people, would not help as much as focusing on taking pressure off of 405 which in turn would take pressure off of back streets/neighborhoods!</p>
EAST KING COUNTY	Add Ballard to UW via a subway.
EAST KING COUNTY	<p>It's stupid that areas such as Bellevue have staunch opponents to light rail. However easy forks in the existing system and right ways that the county and transit. It appears that preference are being given to the eastside rather than Renton for transit that is out of band. I quit using the busses because the 101 takes an hour or more during commute hours and then it takes 1-2 additional connections to get anywhere. A unified light rail system would allow someone to get quickly downtown.</p> <p>Also it would be nice if Sound Transit would build Park and Ride Garages at Rail stops because as you've admitted stations like Sounder Tukwilla and Light Rail Tukwilla often fill up which rules out two of the truly rapid connections to Seattle where I work.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	South east king county is horribly represented in the plan above. I support rail and mass transit expansion but I am confused that we are expanding light rail to communities already served by rail and ignoring light rail to south east king county areas such as Bonny Lake, Covington and Renton. These are where people can afford to live and currently we are providing the best transit to people who are more likely to remain in their cars.
EAST KING COUNTY	<p>Light Rail between Ballard and UW is essential it is the biggest bang for the buck project in the package.</p> <p>Light Rail from Bellevue to Downtown Kirkland is also important for mobility on the eastside.</p> <p>All rail, especially Ballard to Downtown Seattle, must be completely grade separated.</p>
EAST KING COUNTY	<p>Three topics:</p> <p>One: Seattle to Ballard ought to be the highest quality, fully grade separated rail possible. This Seattle artery has the worst traffic imaginable and needs to be able to carry tens of thousands, even hundreds of thousands, of people daily without delays. We cannot afford a sub-par, at grade, link between downtown and Ballard. It also needs to be done much quicker. The timetable is unacceptably slow.</p> <p>Two: The future expansions for Seattle should be laid out. Even with ST3 there isn't enough connection within the most dense part of the Puget Sound, Seattle. There needs to be a light rail eventually connecting Fremont, Wallingford, Queen Anne, Greenwood, Wedgewood, Laurelhurst, Eastlake, First Hill, Madrona, and Madison Park. It would be nice to see a plan in place for a more comprehensive project.</p> <p>Three: The proposed plan for BRT going from Lynwood, down 405 to Renton is not acceptable. This needs to be a light rail system serving the densest parts of the Eastside. Hundreds of thousands of people on the Eastside commute to Seattle daily and the addition of bus routes is not enough.</p> <p>I am proposing a light rail link beginning at Northgate and stopping at Lake City, Kenmore, Bothell, Woodinville, Totem Lake, Kirkland, Bellevue, Factoria, Renton, and finally Sea-Tac. Residents on the Eastside need a simple connection to Seattle via light rail, not BRT. 520 has become a parking lot and anything less than a light rail system connecting the aforementioned cities in lieu of the BRT system proposed in ST3 will not get my vote.</p>
EAST KING COUNTY	There should be an express service to the airport on light rail.
EAST KING COUNTY	SR 522 corridor plan should be part of the ST3 Final plan with BRT plan implementation right now to feed the Link Light Rail at North Gate. Creative approach should be taken for funding such as utilizing new 520 bridge to have tracks put in even if the use by light rail would take place in the future. Adding tracks to I-405 while adding/or resurfacing the roadways...best to utilize on-going projects instead of starting from scratch every project.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	The cross-Kirkland corridor is being wasted as a transit resource. Freight trains traveled that route for nearly 100 years. As a local resident, I was not bothered by the sound of nearby passing trains. The nimby's selfish obstructive influence should be overruled and transit should be incorporated into plans for the corridor. This is an ideal, established, prepared right of way that is wasted on just recreational walkers and bicyclists. With Google and other greater employment opportunities are adding revenue and traffic to Kirkland, Totem Lake and Bothell/Woodinville. To ignore this valuable route is insane.
EAST KING COUNTY	Light rail should be added through Renton in addition to the BRT. Figure out a way to make Rainier AVE more useful.
EAST KING COUNTY	I think a Woodinville/Bothell expansion should be added to the Bellevue/Redmond line, it's all above ground and would serve a quickly growing and high traffic area. Woodinville is a large tourist district and Bothell is one of the fastest growing areas on the eastside with a large student population at the UW Bothell Campus.
EAST KING COUNTY	We need more 255 buses between Seattle and Kirkland during peak periods. Buses during these times are full and people sometimes need to wait up to three buses before they get on a Seattle to Kirkland bus around 5pm.
EAST KING COUNTY	228 Ave Sammamish expansion
EAST KING COUNTY	Expanded bus service from Renton Highlands to Bellevue.
EAST KING COUNTY	I think it's embarrassing that the city/area of Seattle/Tacoma/Everett/etc. is so far behind in mass transportation, given the size of the area AND the year-over-year increase in the population. I really think the plan never catches up to the needs of the area, and a more aggressive approach, plan, etc. needs to be considered.
EAST KING COUNTY	I feel that people should have a light rail line in Issaquah so that people can have efficient ways to get to and from where they need to be. I also believe that people need to start caring about the environment in order to help reduce greenhouse emissions!
EAST KING COUNTY	Don't go to war with people in their cars. Become a useful government agency by actually providing reliable service that is truly responsive to the needs of commuters. This means more 550 service, real BRT for the 522, 554, 560, and other routes, and a commitment to working with WSDOT to truly solve traffic congestion, not make it worse.
EAST KING COUNTY	Why do you even need this input. It's clear we need to move now. I think the length of time to implement is unacceptable. All of this should be done in 10 yrs
EAST KING COUNTY	Please consider extension of the Issaquah-Bellevue LRT line to the South Kirkland Park & Ride, in order to enable some point-of-access to the rail system for those who live north of 520 (e.g. under the current plan, a resident of Kirkland must go all the way into Bellevue by bus or car to access Link -- the excessive time associated with this trip diminishes the utility of rapid transit to the point where it provides no marginal benefit for trips to Seattle). Do be aware that the vocal minority that argued against rail/HCT on the ERC through Kirkland is just that: a minority. The lion's share of Kirklanders support transit, many use it regularly (witness 255 ridership to downtown), and many of these would utilize Link if accessible at S.K. P&R. Thanks.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	<p>You have left Kirkland out of the plan for any grade-separated rail or BRT services, I find it unacceptable that ST is not planning on bringing any traffic-independent transit options to this entire city, instead offering us BRT on I-405. I am a transit geek who studied it extensively in grad school and I always love riding trains whenever I travel, but I am struggling to see how paying \$400 per year for my household for 25 years (\$10,000!) makes sense when you are only planning on studying a route in Kirkland. I both live and work in Kirkland, so there is no point for me using your proposed BRT, and even if I got a new job in a different city the BRT would only take me to Bellevue without a transfer so it wouldn't even help me get to Seattle. You have to do something to address grade-separated transit in Kirkland - please see Toby Nixon's proposal to connect the Redmond Eastlink with the Totem Lake (Kirkland's designated urban growth center) along Willows Road. Perhaps an extension of the Eastlink from Redmond to Totem Lake could continue on to Woodinville wine country and UW Bothell as well. I am the kind of person that you need to convince to vote for this - deliver some real value on shorter timelines to every corner of ST's taxable area and you will get this passed. Studies and 20+ year timelines for key lines (Ballard should take 12 years, not 22!) aren't going to get this thing past the voters.</p>
EAST KING COUNTY	<p>The generic plan provided looks like it avoids expansion to all of the metropolitan area's poorest neighborhoods. Those neighborhoods tend to have the oldest, most, busiest and most unreliable bus service. And this plan does nothing to make transit service more equitable for those people.</p> <p>More parking must be added to existing and all future transit centers. A lot of people, too many, have to drive to the transit center to park because of a lack of bus service to their home/neighborhood. Yet, there isn't enough parking at any of the park and rides or transit centers. Cars will never be completely off the road, and to continue not providing parking for people is inequitable.</p>
EAST KING COUNTY	<p>I don't currently use transit because, where I live (Bothell), I can't easily/quickly get where I need/would like to go. My husband commutes on the bus to work in Seattle, and spends about two hours each day in transit, which is far from ideal. The bus routes in the Bothell/Kenmore/Woodinville area wind all over the place, which is great for picking up as many passengers as possible but does not help the passengers get where they're going in a timely manner. Although bus rapid transit would certainly be an improvement over the current bus service to the Bothell/Woodinville area, there is a big light-rail hole on the northeast side of Lake Washington, which should be filled. There's no reason Kirkland/Bothell/Woodinville/Kenmore residents should have to go to Bellevue or Shoreline to use light rail. Also, there <i>*must*</i> be parking at the light rail stations; people can't leave their cars unless they have a place to leave their cars.</p>
EAST KING COUNTY	<p>Light rail needs to be added from Renton to Bellevue.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	This plan does nothing to improve service between Kirkland and Redmond. Also, by using BRT on 405, it does not provide easy access to the new transit. Access to 405 for pedestrians and bicyclists (and parking for cars for people who will be catching these new buses) is virtually nonexistent. 405 is, for all intents and purposes, a tunnel through Kirkland and doesn't allow easy access from downtown Kirkland as well as most neighborhoods. For this reason, using the right-of-way on the cross Kirkland corridor (old rail lines) would be a much more effective way to move people through and allow local residents access to the transit.
EAST KING COUNTY	Kirkland light rail is needed. All that traffic on the 405 corridor through Kirkland. People need more options than just to Bellevue... I will vote no to this project because light rail isn't coming to Kirkland, yet you want it to go to Issaquah?!?!?! The bottle neck that helps the area more is Kirkland
EAST KING COUNTY	Renton to Bellevue is the worst and light rail would help
EAST KING COUNTY	More light rail, less buses. Let's join the rest of the world using subway and rail systems and forego bus expansion. Explore using our waterways like Sydney, Australia. They make it work. Too much overthinking, keep it simple and stop dragging out the planning process. Light rail is way overdue especially crossing Lake Washington.
EAST KING COUNTY	<p>I'm frustrated that once again Renton and SE King County gets ignored for the most part in this proposal. I'd love to be able to take transit, but it takes me more than twice as long to take the bus that stops within 1/4 mile of my home, than it does for me to drive to downtown Bellevue. I generally support transit, but will not support a measure which leaves me paying for service that primarily serves the western portion of the county. Bus Rapid Transit is great, but the infrastructure also has to be put in place to support it. This means that you actually have to build parking (unlike the current light rail line, where parking wasn't even considered as a necessary component), and plan for people using their cars for a portion of their commute. As it is, I have resigned myself to being a single-occupancy vehicle commuting from Renton to Bellevue every day for the foreseeable future, since transit doesn't make sense where I live.</p> <p>Bellevue is a major employment hub, and the transit options to get from other locations on the Eastside to downtown Bellevue are bad. In many cases, feeder routes to transit centers are so sporadically scheduled that the connections don't work between Metro and Sound Transit routes. When I did ride the bus, I would wait in the cold for 30 minutes to catch a connection from Sound Transit to Metro in order to get the final 3 miles to my home. I'd rather spend that time with my kids, and as such will continue to drive.</p> <p>I voted for the first two Sound Transit measures, but don't see myself voting for this one due to the serious gaps in light rail coverage between Bellevue and Renton.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	Why is Renton the red-headed step-child of the entire region? We have more traffic than all of the other areas this proposal serves, yet we get BUSSES. Why? Why? Why? I will never personally support adding bus lines on 405 as any kind of solution for our traffic problems. In the first place, to avoid traffic problems, STOP putting busses on 405 - they have to come on the freeway on the right, cross ALL of the lanes of traffic to the HOV lanes, then almost immediately cross all lanes of traffic AGAIN to exit. They cause more problems than they solve. The proposal does not convince me that any of this is understood or considered.
EAST KING COUNTY	We need light rail on the east side. Buses are nice, but light rail is what we should be investing in. The east side corridor (north to south) is only serviced by buses. These buses can get too full during peak commutes, they can get bogged down in traffic, and they can just plain take too long to get from point A to B. I have tried bus commuting in the past and it is extremely frustrating. Missed connections, nowhere to sit, slow traffic. Instead of investing in bus transit on the east side I would like to see investment in light rail. I live in Bothell and commute to Bellevue everyday and it is just plain frustrating.
EAST KING COUNTY	Reliable mass transit from the Eastside to Seattle, and along the I-405 corridor, ie light rail or other transit minimally impacted by traffic.
EAST KING COUNTY	More Parking at these places that access mass transit ! For instance at the new First Hill/ Seattle Streetcar (no park and rides nearby). I know it sounds counter intuitive to have people drive to some of these place and then take mass transit into town. But my opinion it is what is needed, saves a lot of commuting time and parking cost if park and rides available close to town. If I drive to work from Renton to First Hill in the morning it takes me 40 minutes to get in, about 50 minutes to get home (and I have to pay \$9.50 per day to park). If I take the King County 101 bus it easily takes over an hour each way (and feels unsafe at times based on passenger mix).
EAST KING COUNTY	There is nothing for Maple Valley
EAST KING COUNTY	Very disappointed that light rail is not coming to the Kirkland corridor. That should have been a no brainer, except for the loud voices of the wealthy "save my trail" folks whose homes line the old rail route that would be an ideal route for light rail. I've talked to Kirkland residents. Many are misinformed regarding what light rail would look like.
EAST KING COUNTY	Bellevue light rail across 520 bridge to Seattle should be moved up from "future investment" to this plan. Would greatly alleviate Microsoft commuter traffic from Seattle.
EAST KING COUNTY	I live in Kirkland. ST3 does nothing for Kirkland and does nothing to improve my commute. I don't even have a bus stop within a mile of my house.  Also, your timeline is WAY too long. Speed it up.
EAST KING COUNTY	Adding rapid transit in the I-405 corridor won't help much unless frequency and breadth of normal bus coverage is improved along the corridor to make it easier and faster to catch local buses to the places the rapid transit buses will run.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	Would love to see this implemented sooner than 25 years, so that people of this and upcoming generation can benefit. Also, by the time 25 years comes around, there might be a different or bigger need. Also, willing to pay for it also.
EAST KING COUNTY	The project NEEDS an express train from Sodo to the airport. One that does not go through Rainier Valley. An alternative would be an express bus from downtown to the airport, using the express lanes. Without that, I will not vote for the plan.
EAST KING COUNTY	This transit system takes you to Seattle and provides limited resources to areas on the east side. Saying we need a study to determine what the next for this area while Issaquah gets lite rail seems like an oversight. We should be running light rail down entire I 405 corridor and using buses to connect to the outlying areas.
EAST KING COUNTY	Lynnwood has more walkers than sidewalks, I often see children basicly walking in the road for want of a safer place. It would be nice if we could get more of them!
EAST KING COUNTY	Kirkland light rail on the Kirkland connector
EAST KING COUNTY	Light rail to be substituted for I405 bus service at earliest opportunity. Permitting bus to use shoulders is not a safe option.
EAST KING COUNTY	The ST3 is greatly needed in this region as the Puget Sound Region is rapidly growing year after year. I am in full support for this initiative.
EAST KING COUNTY	add light rail from Lynnwood to Renton, along I-405, following the freeway and adding stops at existing P&R locations and UW Bothell. That's where the traffic is, that's where the development is, that's the foreseeable future of the communities along I-405. So build light rail along I-405, as BRT is just a stop-gap that won't last 25 years until ST4. So plan ahead - please!!!! - and don't repeat the mistakes of the 1960s.
EAST KING COUNTY	what is killing us is that stations are not easily accessible from places like Fairwood, Maple Valley or Covington. Takes forever to get to a transit station served by fast lines, so we have to continue to drive :(
EAST KING COUNTY	There is no plan to relieve congestion from Renton out to the Southeast. The current ST plan does not help without increased services which run later into the evening. Using sound transit light rail does not work as there is no parking, no service after 6:30 pm and weekends. Waiting for 15 years is redundant. Until there is sufficient product now I cannot give details.
EAST KING COUNTY	Please consider addition of light rail from Bellevue up to Kirkland.
EAST KING COUNTY	There should be light rail on the east side north end from Bothell through Kirkland. This light rail should use the old rail road ( now trail) through Kirkland. BRT on 405 will clog up 405 and be too slow.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	Kirkland to Bellevue to Seattle should be a light rail instead of the BRT. These are world class wealth creating cities deserving high frequency light rail similar to Cal Train/BART in Bay Area. If BRT, the parking stations and terminals should be world class and buses high-end with high frequency commutes. Residents of Kirkland are among the highest property tax payers in King county and the services proposed in ST3 are not proportionate to those payments. Also, more connecting points needed within Kirkland that connect to these BRT or light rail. Kirkland has a convoluted geography due to the lake which increases commute times considerably and connect points need to be accessible and well designed.
EAST KING COUNTY	Figure out how to do Light Rail on the length of the Eastside Rail Corridor, despite a very small number of vocal Kirkland residents ("Save Our Trail"). If you query their petition's signers, you'll see that the vast majority are property owners along the ERC through Kirkland.
EAST KING COUNTY	I know it's hard to build light rail in this topography, but it seems like the light rail construction schedules are very long. A Seattle-to-Issaquah line along the entirety of I-90 seems like a logical choice to add in tandem with the Bellevue-to-Issaquah line.
EAST KING COUNTY	Rail in Kirkland please
EAST KING COUNTY	Kirkland Light Rail Service
EAST KING COUNTY	Light Rail on 522.
EAST KING COUNTY	While this is under construction, I would like to see improved bus service with more buses with active reliable bus tracking at major centers. I use 'one bus away', but it needs work to be reliable.
EAST KING COUNTY	More parking and wider spaces at S Bellevue Park & Ride. The parking lot for light rail will be packed full within the first week after opening, and nobody will be able to use the light rail after 7:00 AM. That parking lot will serve Microsoft, downtown Bellevue, downtown Seattle, and UW. People should be able to arrive at 10:00 AM and still find a spot. I would recommend 5000 spaces and direct freeway on/of ramps. Or at least build it so that it can be expanded later, because it will need it I'm sure.  Also need direct carpool lane access for buses to the Newport Hills P&R.
EAST KING COUNTY	The Eastside needs access to mass transit. Bus service in Sammamish is limited at best. East/West commuters need services, not just North/South commuters. We all pay for the services, so we should all have access.
EAST KING COUNTY	Would love transit in the South Lake Sammamish Community. The drawings include Lakemont, which is close to us however we are right off I-90.
EAST KING COUNTY	Investigate BRT on Cross Kirkland Corridor
EAST KING COUNTY	Add light rail from downtown Seattle, or Northgate to Bothell, along 522. Traffic along 522 has really increased since tolling began on 520. Residents of Kenmore are penalized in time travelling through the city by the traffic on 522.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	The project looks great at first but there needs to be more done. The completion time frame needs to be shorten up because most people in this region need the transit now. Having been to other major cities around the world we look slow and behind even though we have all these technology juggernauts. Why can't they invest a bit to get this done faster? I'm sure their employees would appreciate a station near the work campus. I'm not pro bus unless these buses are fully electric and aren't in traffic. To me there needs to be more emphasis on the light rail system. The buses on the eastside is a "band-aid". You guys may not think light rail is needed, but it needs to be done there too. You are skipping Renton, Bothell, and Kirkland on the eastside. I took the bus from Renton to uw Bothell for years and it was horrible, especially at night having to wait an hour for a bus to show up. It would be best to include these large growing cities. The sounder train is nice but it doesn't stop frequently enough or run during the day enough to seem very viable. Having light rail also go to kent and auburn would be needed in my opinion. I like what I see, but I'm also disappointed greatly that it isn't as vast by hitting important areas in our region and will be taking too long to complete.
EAST KING COUNTY	Bring back neighborhood bus routes especially for commuters. I have no choice but to rely on my car currently.
EAST KING COUNTY	Have any of you people driven 405 between Bellevue and Alderwood? What's needed is light rail along that corridor, yet there's no mention of any light rail. I live in Bellevue and work in everett and for me to take rail to work under the current plan isn't going to happen because (1) I will be retired by then and (2) I'd have to take a train to downtown Seattle and transfer. Stupid!
EAST KING COUNTY	There should be a light rail station at Kenmore where currently has a huge traffic bottleneck because of I-405 toll.
EAST KING COUNTY	The area north of a line from Issaquah to North Bend are not being served at all. Perhaps a plan for service to included Issaquah to Preston/Fall City/Carnation/Snoqualmie/North Bend needs to be inserted.
EAST KING COUNTY	A BRT line needs to be added connecting Auburn Kent and Renton.
EAST KING COUNTY	The sooner the better -- our population density is growing immensely, and transportation hasn't grown to meet that demand. Let's do this!
EAST KING COUNTY	The I-405 corridor is the busiest other than the I-5 in Seattle. It already has the path or corridor built years ago by the BN. Why then is it not considered as a better chance for light rail or even a Eastside Sound Transit route, other than a improved motor bus route. My guess is the Renton is unimportant to Sound Transit and the politics coming out of Bellevue.
EAST KING COUNTY	I believe that all Eastside residents would also greatly benefit from light rail across the 250 bridge. I live in Redmond and work at the University of Washington. While I support a rapid bus between the two, I prefer rail infrastructure.
EAST KING COUNTY	There are very few transit options from my address in Redmond/Woodinville Area. As a near 30 resident of the area I simply have no way to get around, despite living just a mile from services in Kirkland, Woodinville, and Redmond. No way to get to the airport, Amtrak, or anywhere! And it looks as though this plan will leave me with still no transportation even in 2040. Just special occasions with a need to use a P&R that is usually full. It's truly sad.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	Some light rail should be placed serving the Kirkland Woodinville area, connecting either through Bellevue or to Lake Forest Park and onto Northgate. Kirkland is underserved by light rail, this needs to be improved. Since tolling on 520 began the increase in traffic around the north end of Lake WASHINGTON (particularly Juanita drive) has increased on the small streets by a reported 30%, these streets are not equipped for the traffic density tolling created. Light rail could ease that, as bussing has not.
EAST KING COUNTY	Light rail should be included from Everett down I-405 to 522!
EAST KING COUNTY	Looking forward to a Sammamish-Redmond-Bellevue-Seattle-Seatac light-rail line!
EAST KING COUNTY	Additional parking or reserved parking for Mercer Island residents at the station there. The current parking lot is filled up before 7:00 a.m. by people coming from further east so there is no room for residents of the Island. Also, the Bellevue at I-90 lot is currently completely full. I know they are planning to close the Bellevue lot to enlarge it. I don't know how they plan to manage the traffic during the construction period.
EAST KING COUNTY	Why no light rail along the whole I-405 corridor? Very disappointing that the eastside is being ignored with regards to light rail, especially north of Bellevue. People will only use public transit if its convenient, safe/clean/user friendly/comfortable experience (even today this is not the case and there are many complaints I hear from my fellow co-workers that use it and it very sad to hear what they say...basically its very sad!
EAST KING COUNTY	I didn't see a plan to increase parking at the Lynnwood Transit Center. This is already a problem, even without the light rail, I strongly urge the creation of additional parking at that location.
EAST KING COUNTY	Improvements in mass transit opportunities from Issaquah to Seattle, not just Issaquah to Bellevue.
EAST KING COUNTY	Include transit improvement to Maple Valley via HW 169.
EAST KING COUNTY	Need more buses and transit to and from Renton, more accommodations for pedestrians and bicyclists in general, and better train maintenance. Older Metro busses often break down, Light Rails trains often smell like vomit.
EAST KING COUNTY	Light rail or bike access across 520 from the Eastside to Seattle. The cost (monetary, time and convenience) to drive over to Seattle is lower than taking the bus, right now.
EAST KING COUNTY	Light rail on 405. That's what I was hoping for not just rapid transit. Buses are no the only solution that should be added to the dreadful congestion on 405. And we are talking about plans in 8, 25 years. How slow is that for a solution? We need something sooner, very soon. This timeline is unacceptable and too little too late.
EAST KING COUNTY	There should be light rail access closer to downtown Bothell. This area seems to be largely ignored.
EAST KING COUNTY	light rail to Factoria Bellevue
EAST KING COUNTY	Since my bus stop was cancelled several years ago, I have no access to public transportation. I would like to be able to take a bus to doctor's appointments, shopping, etc.
EAST KING COUNTY	Keep adding protected bike trails so we can safely get around on bikes, especially on the Eastside around Bellevue. Now that we have bike access to the new 520 bridge, a parking lot near the East entrance to the 520 bridge would be great, so we can park and ride into Seattle from the Eastside.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	Not using the Eastside Rail Corridor for Light Rail service is the biggest fault of these proposed projects, Sound Transit already owns the easements for this stretch. Don't let the Kirkland City Council and the NIMBY neighbors along the corridor pull this project from the list. The biggest argument for not building the light rail is that the trail will go away but the trail has always been included in the Sound Transit plans. This would link in perfectly with the Bellevue Station and the proposed Issaquah light rail project. Keeping this project off the list will cost many votes in the Woodinville/Bothell/Kirkland area. And I'm sure you are hearing this from everyone, but the speed of these projects being delivered needs to be sped up.
EAST KING COUNTY	Cross Kirkland Trail should be used for future light rail!
EAST KING COUNTY	Kirkland BRT on Eastside Rail Corridor
EAST KING COUNTY	Fix the bottle neck between Coal Creek exit to Hwy I-405& I-5. Adding, the shoulder/opportunity lane would help, but it would also be best providing a light rail from Renton to Seattle.  This goes the same between Northgate to Seattle.
EAST KING COUNTY	Light rail loop around all of Lake Washington. And project timetables are too slow.
EAST KING COUNTY	The I-405 corridor has some of the worst traffic in the entire state of Washington, and yet the ST3 plan refuses to acknowledge opportunities for light rail transit on this corridor. Instead, the planners have decided to continue to fund some busing improvements that exclude large swaths of the I405 transit problems. This issue is almost important enough -- and I'm so frustrated by ST3's lack of planning for light rail to this area, that I am tempted to vote "no" on the bill. I think this is one of the most important (and yet most neglected!) part of the entire ST3 plan, which is highly unfortunate.
EAST KING COUNTY	Kirkland light rail is imperative to my support. There is a small, vocal minority that is attempting to hijack the rail corridor to keep transportation off of it. I will oppose any plan that doesn't include light rail to Kirkland using the existing right of way.
EAST KING COUNTY	Is light rail along the length of I-405 a consideration? It seems a separate dedicated lane/rail is needed. Given the growth on the eastside it seems there needs to be additional dedicated transit lane/rail available very soon. 25 years from now is 24 years too late.
EAST KING COUNTY	I don't see anything in the ST3 plan that provides better transit service to the densely populated Soos Creek Plateau area consisting of SE Renton, E Kent, E Auburn and Covington. As a resident of this area I am reluctant to vote for taxes that provide transit services for a lot of other areas but nothing for the area where I live.
EAST KING COUNTY	build parking garages along 522, study light rail for this corridor, in the meantime make sure there are improvements made to allow for most/best rapid transit. Traffic is deadlocking along 522; we need to encourage people to use mass transit.
EAST KING COUNTY	Rail between Tukwila and Bellevue PLEASE.
EAST KING COUNTY	Light rail across new 520 bridge should be completed as well to get from Redmond to Downtown Seattle faster

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	You should consider using the existing rail line that runs up the Eastside for light rail. I-405 is congested and I do not think adding bus service will entice enough folks out of their cars. Public transportation on the Eastside is the pits. Something like light rail that would run from Federal Way via Airport, Renton, New Castle, Bellevue, Kirkland and Redmond and to the North, would give more choices. Unfortunately, folks in the past do not want to abandon their cars as public transportation has always been poor with a lack of alternatives.
EAST KING COUNTY	Kirkland stop on the Redmond light rail line, or a separate Kirkland line.
EAST KING COUNTY	Please make a route that goes to the airport from the East Side along with accompanying Park-N-Rides! Maybe something that runs hourly along the 405 corridor. Boulder County, Colorado, has one and it is very frequently used. Getting to the airport requires drop offs/pick ups right now, causing many excess miles to be driven on 405. Please please please.
EAST KING COUNTY	Bellevue to Seattle transit is quite heavy and likely to get heavier due to growing industry in Bellevue. Within Bellevue transit is sparse and uncoordinated to say the least. Bellevue needs better connections by link and bus to Seattle as well as much better within Bellevue connections that are better coordinated and monitored.
EAST KING COUNTY	Additional service on Sounder South so that the last train leaving Tacoma in the evening is after 5 p.m., not before. Extend service, if possible, to include Olympia. Improve service between Bellevue and Tukwila so that light rail is accessible without having to drive.
EAST KING COUNTY	Remove carpool lanes on I-405, I-5, I-90, 520 and replace with light rail. This would build out the spine of light rail almost immediately, cheaply, and would accomplish the *exact same objectives* that the carpool lanes have in a MUCH better fashion. If done intelligently and carefully, I'm certain that you could utilize 1/2 the space for light rail/local and the other 1/2 the space for high-speed rail. This might not all be Sound Transit's arena (e.g. WSDOT for the carpool lanes and who knows which organization is in-charge of high-speed rail) but doing this, in conjunction with 50B spent on other mass transit projects would provide the most benefit in the quickest fashion for the lowest cost.
EAST KING COUNTY	Renton is a major hub for Boeing workers and suppliers. Wit aircraft build rates expected to rise more business needs to be completed in the renton area. Plus Renton is building a new corporate center with hotels near gene coulou beach. As a renton resident the traffic and side street traffic has grown a lot around this areas and the S curves on 405 and it would be great to have a light rail option to come through renton to connect us with the larger grid with access to the whole seattle metro area. At homeowners association meetings this topic often arises and I think there would be great interest to have renton apart of the rail system.
EAST KING COUNTY	old rail corridor along Lake Washington between Renton and Redmond should be used for autonomous pods feeding light rail stations,
EAST KING COUNTY	Make samammish and Issaquah Part of it.
EAST KING COUNTY	Light rail along I-405, Lynwood -> Bellevue -> Tukwilla instead of bus service.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	I think the stretch of 405 between Renton and Bellevue needs to be addressed. The congestion there has not improved at all in years and is only getting worse. I don't feel as if improvements in bus routes is the answer. Alternative driving routes or modification to existing roads is imperative.
EAST KING COUNTY	Put in light rail on State Route 522. 522 is one of only a few ways over/around Lake Washington so it should get priority for light rail service. Light rail is far superior to more unreliable buses.
EAST KING COUNTY	don't lose this opportunity to improve commutes!
EAST KING COUNTY	Bothell area needs plans and land purchases for light rail before current development and expansion limits it's location.
EAST KING COUNTY	I feel aggressive investment is critical for our quality of life and environmental conservation.
EAST KING COUNTY	Rail service to Bothell to enable faster commute to Seattle downtown
EAST KING COUNTY	More options between Eastside and Seattle downtown. Especially as the Eastside (Bellevue, Redmond, Kirkland) continues to be ideal residential areas, but with increasing job opportunities on the westside. Eg. Expedia moving westside, from Bellevue, Google expanding office space in Seattle downtown, and ofcourse Amazon being in Seattle.
EAST KING COUNTY	It seems like we are proposing old technology solutions (e.g. rail). Why not explore new tech. Hyperloop is one idea that comes to mind - if impractical or not ideal for short distances, let's explore other ideas instead of laying rail or bus lines.
EAST KING COUNTY	Still really wish we had light rail over 520 bridge.
EAST KING COUNTY	Need to add express light rail (or bus) from downtown Redmond, Kirkland, Bellevue and Sammamish to SeaTac. Need to add light rail in downtown Sammamish along 228th Ave Would like a bus line along E. Lake Sammamish -- light rail would be better but I don't think there's room. Needs for more Park & Ride or Transit Centers between Redmond Transit Center and the South Sammamish Park and Ride
EAST KING COUNTY	How is there not a transit line going along 405? This line should connect to the west line (line west of Lake Washington) in tacoma and in lynnwood. Bus rapid transit sounds like it won't help much of anything (unless using the shoulder will really work and significantly cut down on total drive) I just don't believe it right now. Become a real city and build some metro lines.
EAST KING COUNTY	Plan needs to include express light rail from SeaTac to the Eastside -- Redmond; light rail across SR520 to connect the Eastside to UW. Consider a modified model like the London Heathrow Express -- one express train that runs in a loop in both directions from SeaTac, downtown Seattle and the Redmond Overlake Transit center.
EAST KING COUNTY	Greatly expand overcrowded park & ride lots such as Bear Creek. Access to transit is limited by park & ride space (local bus service simple can't cover enough suburban neighborhoods or be fast enough). Failure to expand P&Rs will greatly limit the ability ot benefit from transit improvements.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	Start studying future transit projects now. We can't delay the next big light rail projects if Ballard and West Seattle are going to take 22 years.
EAST KING COUNTY	One of the areas that attracting more and more residents in the recent years is South of Bellevue (from Somerset to New Castle), with heavy traffic route such as Coal Creek Park Way and Forest Drive. But currently there is no regular public transit available on those routes. There are many seniors and new immigrates living in these area who are not able to drive. Without public transportation service, their life become so much miserable. It is unfair for them to pay higher tax but not get benefits. Please consider adding a regular bus route onto Coal Creek Park Way or Forest Drive. Thank you for considering all the seniors and disabled residents!
EAST KING COUNTY	I live in Sammamish where transit service is limited and basically terrible. Limited routes, and nothing at all on weekends. Sammamish is not even mentioned in these proposals. There are lots and lots of people in Sammamish who take the bus and more who would do so if there were options---but the options are so very limited. Add some more buses and new routes for Sammamish--expand daily service and add something for weekends, please.
EAST KING COUNTY	good connectivity options from Central Issaquah to Issaquah Highlands and even Sammamish
EAST KING COUNTY	Suburban and outlying areas with heavy traffic flows into and out of Seattle and Bellevue should be serviced by routine buses to highspeed bus transit stations via vans, high speed buses service to light rail, light rail to passenger trains between city centers across the state. I should be able to walk from my house to the closest arterial, catch a van to the high-speed bus to whichever light rail center is closest to where I want to go and then take that area's van to my destination, or light rail to passenger train to city and their transit network -- no CARs!
EAST KING COUNTY	The project should extend rail to the Samammish Plateau and it should be completed in 5 years. Anything that does not include both issues will not be supported.
EAST KING COUNTY	There is so much growth in Issaquah/Sammamish that needs to be addressed. Don't forget the suburbs! We need to invest so much more in light rail and other mass transit to even come close to the transportation options that already exist in other areas such as the Bay Area, Portland, DC, Boston, etc. Good transportation options would help solve so many issues such as commute time, quality of life, pollution, housing costs, etc.
EAST KING COUNTY	We need more rapid transit and we need it faster. The economy of the region will suffer significantly without more transportation. Quality of life for puget sound residents will suffer significantly without more efficient transportation.
EAST KING COUNTY	We need a better public transit system! It's important because of climate change. We use fossil fuels much more heavily than we need to because of our limited transit system.
EAST KING COUNTY	What's the logic of not building the light rail in the eastside (from Everett to Bothell to Bellevue to Renton to South Seattle) making a complete light rail loop around Lake Washington? The biggest problem I have right now is if I were to take a job in Seattle, it'd take me forever and multiple bus connections to get to Seattle departing from Bothell Canyon Park area. Having rapid bus in the eastside is better than none, but it doesn't solve the problem long term.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	The East side (Bellevue, Kirkland, Redmond, Issaquah and Sammamish) are a large source of traffic feeding into Microsoft and Seattle. Traffic is a large issue due to lack of bus services that feed into the system from further out, even as far as Fall City and Snoqualmie. The population is pushing further east as rent and home values rise. NOW is the time to plan and at least reserve spaces for infrastructure and plan for the FUTURE.
EAST KING COUNTY	Add a Sounder station to Elliott Ave. West. This would serve employees working at Holland America, Amazon, Expedia (coming in 2019), F5, and Zulilly. Traffic from Elliott Ave to King Street makes shuttles and the bus unreliable connections.
EAST KING COUNTY	Link light rail should run along the entire east side, from Bothell to Kirkland to Bellevue.
EAST KING COUNTY	With the growth that you are seeing in the north end eastside, (Bothell, Woodinville, Kenmore), possibly adding a rail station out there might be a great idea. and allow it to comedown the 522 corridor, since that road has become a major highway since the toll on 520.
EAST KING COUNTY	Light rail over the new 520 bridge should be added.
EAST KING COUNTY	There needs to be better transit between the Eastside suburbs. Redmond is home to large employers but the only rail/rapid bus service goes to Bellevue. I work in Redmond and a LOT of my coworkers live in Northeast King or Southeast Snohomish Counties (Bothell, Mill Creek, South Everett, Monroe). This plan would still double an 8-mile commute from Downtown Bothell to Redmond (I'm purchasing a home in downtown Bothell so this will be my future commute). Even with the amazing ST3 improvements, I'll still end up driving from Bothell to Redmond rather than bus/rail all the way to Bellevue, and then on to Redmond because transit will extend my commute time so much.  RE: project completion timelines - is there any way to speed up light rail to the Eastside? We need it yesterday, so 10-15 years is a frustratingly long time.
EAST KING COUNTY	Concentrate on the core first. When South Bellevue, Newcastle and Renton are completely forgotten there is a problem. Renton is the 8th largest city in our state and is growing rapidly. It is also the 4th largest city in King County and all we are going to receive in 25 years of paying \$220 each is one bus stop?!?!? There is no way I can support this cause. There is rail going all the way to Everett which only has 4000 more people than Renton. Maple Valley, Black Diamond and most of Kent come through Renton to get to work everyday too. Let's rethink the priorities first. I have sent letters to our legislators Bergquist, Hudgkins and Hasegawa and they all have responded in not supporting ST3 due to this oversight. Please rethink your study.
EAST KING COUNTY	Light rail connection between Redmond and Seattle.
EAST KING COUNTY	It is critical to provide parking that is abundant and that costs next to nothing to encourage people to access buses and light rail. I would never have started to take the bus (12 years ago) regularly if I could not park for free at a transit station in Redmond. We want the cars off the main roads, but we do need somewhere to put them while we are on transit. Not everyone is comfortable or able to walk 1 mile to or from a transit stop. I don't see provisions for this in the plans.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	On the map it looks like there is a plan to run light rail across the 90 but that wasn't listed. I think having light rail from Bellevue to Seattle and additionally to the airport would go a long way in relieving the traffic on the 405 and the 90
EAST KING COUNTY	We should add a light rail around Lake Washington and include Kirkland and Woodinville. It should come out of the tax dollars we already pay. 25 years is too long. Make it a priority and get it done quicker.
EAST KING COUNTY	Even if it takes longer, rapid transit/light rail is always preferred to bus systems. Majority of the general public will not use bus systems. The 405 corridor between Everett and Renton/SeaTac should be #1 priority for this. Other major metropolitan areas rely heavily in train/light rail with bus systems as a supporting service.
EAST KING COUNTY	additional parking at all Park & Ride locations
EAST KING COUNTY	I would like to see this plan include light rail that is accessible to all major cities around Lake Washington. The current plan doesn't show light rail being available between Renton and Bellevue. It's crucial to connect light rail between these cities due to only having 3 lanes on I-405 between exit 4 and exit 10. This is a major bottleneck that needs rapid improvements beyond increased bus service.
EAST KING COUNTY	Light rail near 405 to alleviate traffic. If traffic is bad enough to mandate tolling, why would you add more buses instead of adding light rail? The 8-year timeline for the rapid line buses is ridiculously long. If it takes that long, forget it and build light rail. The area north of Bellevue and south of SR 522 is left with very little improvements compared to everywhere else but we are expected to help fund light rail while not getting any benefit for our neighborhoods.
EAST KING COUNTY	We need mass transit from the Eastside to the stadium area. On a gameday on a weekday, we left our house in Bothell at 5 for a Seahawks game at 7 and arrived at the stadium at 8. I would love to be able to drive to Bellevue or take a link light across one of the bridges that drops up off at the stadiums
EAST KING COUNTY	I'm curious why Renton seems to have the least proposed changes. Unless I missed something in the proposals, it seems that there are only one or 2 projects included in the scope for Renton. I believe a light rail station should be added in Renton. We currently have to drive south to catch the light rail to go north, which is inefficient, and doesn't help traffic in the corridor between Renton and Tukwila. Our buses are consistently late and standing room only. Please add some more projects to aid the congestion in Renton.
EAST KING COUNTY	no comments
EAST KING COUNTY	Light rail from Kenmore/Bothell 522 corridor
EAST KING COUNTY	Light rail should be extended to Snoqualmie, including adding a stop at Issaquah Highlands, to support extensive current and projected population growth along the I-90 corridor. Parking at both the Issaquah Highlands P&R and the Issaquah P&R should be expanded to further encourage commuting. No P&R use fees should be collected for a select number of P&R spaces as this dis-incentives the success of increased P&R use and increased commuting.
EAST KING COUNTY	It's too bad there is no plan to include Kirkland and Bothell in the light rail system. I assume this is a cost-prohibitive item. BRT seems like a decent alternative but will suffer from congestion, like everyone else on the I-405 corridor.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	Closing the loop to include light rail from existing Tukwila rail station, through Renton to Bellevue needs to be looked at, so to benefit these communities and create accessible seamless light rail coverage instead of planning bus as a long term solution to support these areas.
EAST KING COUNTY	Connect the newer communities in Bothell, Woodinville, Mill Creek and Snohomish to rail
EAST KING COUNTY	The plan is short sighted. We are doing nothing about transit commuting from Eastside to Seattle and vice-versa. Where is the light rail across I-90 for Renton residents? For Bellevue residents? We're not even considering serious investments in rail, subway or underground options across the lakes. Are they impossible? cost prohibitive? Even if we increase greater Seattle population 50%? 100%?
EAST KING COUNTY	1) These questions are mostly about the priority of the order in which routes will get added. This survey should accept much more feedback about the overall plan, not just the priority of the proposed items in the plan.  2) The proposed transit solution for Kirkland is a DISGRACE. I know this is also the fault of the City of Kirkland, but in the long term the plan is TERRIBLE for Kirkland residents. WE NEED LIGHT RAIL IN KIRKLAND on the Kirkland Corridor! It is a shame that a vocal minority of land owners across the corridor threaten to leave Kirkland in the Dark Ages of Transit.
EAST KING COUNTY	Add light rail service to Kirkland!
EAST KING COUNTY	We must include a light rail connection from Bellevue to Everett in order to keep things balanced. I don't mind paying for the ST3 draft plan but I'd like to make sure that it will serve the areas where I live (light rail).
EAST KING COUNTY	I would like to see the link light rail extend up 405 through Kirkland. I would use it often if I could get from the Totem Lake Transit Station (or thereabouts) to SeaTac airport. My big concern is the increased taxes, of course. Our taxes are already incredibly high and increasing them puts an additional burden on already strained resources. Surely there must be another way to raise the money--or reduce other taxes. The suggested reduction in taxes when completed is something that I have never seen happen in the 35 years I have lived here. It's an empty promise.
EAST KING COUNTY	Where does Sammamosh fit in all this. Sammamish taxpayers pay a huge burden and see nothing. It's extremely difficult to get to Seattle by bus/transit from Sammamish.
EAST KING COUNTY	Light Rail from Bellevue to Totem Lake should be included.
EAST KING COUNTY	I'm extremely disappointed in the lack of light rail through Kirkland. I commute by bike daily on the Cross Kirkland Corridor and expanding that trail to include light rail would be a huge boon to the Kirkland area. With business continuing to expand in downtown Kirkland traffic problems will only get worse. I don't see BRT solving the problem with the lack of grade separated lanes that could service downtown Kirkland without getting caught in peak commute time traffic.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	<p>Kenmore is choked with traffic</p> <ol style="list-style-type: none"> <li>1. on Juanita Drive by vehicles avoiding the too-high fees on the Evergreen Point Bridge. Those fees need to be lowered to get vehicles off neighborhood arterials such as J. Drive.</li> <li>2. on SR522. BRT will not provide enough relief on this major connector. Look at the Light Rail plan. Which quadrant has been completely ignored for the future? the northeast quadrant, of course. Boo!!!</li> </ol>
EAST KING COUNTY	<p>I would love to see better East&lt;-&gt;West connection options from Kirkland to Seattle. As it stands, every time I visit friends there, I end up driving because I know that the bus stops before midnight. I understand that this is an outlier in the grand scheme of ST3, but with the city continuing to sprawl and expand, I think it is important to consider access from the suburbs into the city at all times of day. It would certainly get me off the road on a weekly basis.</p>
EAST KING COUNTY	<p>I see no emphasis on direct, rapid transit to/from South Lake Union, but extreme building is continuing without adequate transit in place or planned. People come to this rapidly growing business center from many communities not highlighted/supported in the ST3 plan. Most current transit routes are oversubscribed, such that riders have to wait for multiple buses to get a seat, and/or require transfers. Thus, many of us who would use public transit instead drive a personal vehicle. And, the streets that feed into Mercer have poorly timed traffic lights; many are further impeded by the SLU tram. If the city is going to allow/encourage the tax base in this area to continue rapidly growing, more and better public transit access should be prioritized.</p>
EAST KING COUNTY	<p>Light rail should go down the 522 corridor.</p>
EAST KING COUNTY	<p>Leaving Renton out of the plan is unacceptable.</p>
EAST KING COUNTY	<p>There should be light rail from Redmond to downtown Seattle over 90 and 520</p>
EAST KING COUNTY	<p>Should be bring the light from Everett to Bellevue as it is highly likely the GMA in South Snohomish County will be pushing East so planning now for the growth in the Clearview Woodinville area is import.</p> <p>It is also silly not to include BRT to Woodinville to capture those using the HWY 9 corridor.</p>
EAST KING COUNTY	<p>Light rail to Kirkland &amp; Bothell seems vital, despite the local councils' initial objections. Don't leave those towns behind.</p>
EAST KING COUNTY	<p>Light rail should be added to the entire 405 corridor instead of simply adding busses, which will only slightly help the worst traffic in the entire Puget Sound region. The 405 corridor is simply growing too fast for this to be the only "help" that is planned at this point and adding light rail should be a much higher priority.</p>
EAST KING COUNTY	<p>I-405 Transit stops at Exit 17. More transportation from Houghton Park and Ride, or Houghton Freeway stop, direct to Seattle.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	After reading the plan. I think at you need to add North South Rail solution for the Eastside from Lynnwood to Renton via Woodinville, Kirkland and Bellevue. The growth in the Bothell is outstripping the infrastructure of a road and buses. We already have the trail pathway in place and it would all allow access to the cities, business and to have three separate trains running north and south. Sounder to the west, I-5 light Rail, and Finally the rail line that runs from Woodinville to Renton. A solution that allows East west connection and North South connection.
EAST KING COUNTY	gimme dem trains (please don't throw out my survey, I think that easy access to light rail is essential to healthy growth of the city as a whole)
EAST KING COUNTY	Light rail down the I-90 corridor
EAST KING COUNTY	These questions are too broad to answer. Sometimes, it is so much interconnected. For example, I live in 98028 and the light rail to Tacoma and Rapid bus line on 522 appear in the same question, How should I answer?  But, It is a great effort by all organizers to improve the transportation in Puget sound. I truly admire these plans and initiations.
EAST KING COUNTY	We need light rail to Kirkland! The traffic through the Kirkland corridor is horrendous!!! Either that or buld a new parking structure at the Kingsgate Park & Ride, as that P&R fills up by 7 am. That's how many people rely on the express buses going downtown; speaking of which, the buses end WAY too early in the morning. We could use express buses from Kirkland to downtown all day.
EAST KING COUNTY	Sammamish is a large and still-growing area. Mass transit options are very limited here. This plan would be quite costly (likely considerably more than the \$220/yr. average mentioned above - on top of the current taxes) for Sammamish residents, without adding service here. In fact, I have read that it would make mass transit commuting more difficult by requiring people to change from bus to train in Bellevue en route to Seattle.
EAST KING COUNTY	There are still a lot of areas, like by my house along HWY 202 between Redmond and Fall City that don't have access to basic bus service but have roads that are increasingly filling with traffic due to development in areas all around us. We even have a high school close by and students are unable to use mass transit. It would be great to include bus service in these areas to the ST3 plan, especially where you have rural corridors like ours that King County would like to protect. Bus service would really reduce traffic in these areas and improve environmental conditions. Everyone in our household would use the bus to commute if we had bus service close by. Instead we all drive separate vehicles.
EAST KING COUNTY	Renton to Bellevue light rail
EAST KING COUNTY	Please bring light rail to Renton.
EAST KING COUNTY	I travel the world over and always discourage to return home to the worst mass transit system: buses! Build the ST3!!! Seattle has had this opportunity for decades... get on with it!!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	<p>As development begins to ramp up in Kirkland and east side of King County, I believe that light rail should expand further north on the East Side from Bellevue to Totem Lake as originally planned. Totem Lake Mall is currently in the process of redevelopment and is due for reopening by late 2018. The City of Bothell is also currently undergoing major redevelopment. The East Side as a whole is growing at a rapid rate as Puget Sound Energy is also undergoing major upgrades to its infrastructure to serve surges in population and business. North of East Side needs light rail and access to transit. UW Bothell is a growing educational force in the region.</p>
EAST KING COUNTY	<p>I and all of my Kirkland neighbors that I have spoken with are extremely disappointed to have seen the Cross-Kirkland Corridor light rail line removed from the ST3 plan. Transit north and south on the Eastside is nearly as imperative as in Seattle, yet the voices of a few that live adjacent to the corridor who oppose transit on the corridor with their NIMBY attitudes somehow convinced the city council that Kirkland as a whole was opposed. This is not the case and is a huge mistake. It would be extremely interesting to see a poll taken by all Kirkland residents as to whether or not we support light rail on the corridor. Just last year our city council recently misjudged Kirkland residents' desires and tried to force an Aquatic Recreation Center upon us, now they're opposing this great opportunity that most of us support.</p> <p>I can't imagine continuing to commute from Kirkland into Bellevue over the next 30 years and to see how bad traffic/transportation will become. We've expanded 405 to the maximum width available along most of the freeway, yet travel speeds are just barely tolerable. Please reconsider adding light rail through Kirkland. I see this line as the backbone to all future light rail expansion north of Bellevue on the Eastside. As a final point, the residents of the city of Kirkland will be contributing significantly to this project (I've seen numbers approaching ~\$300 million over 10 years), yet nothing but a BRT on 405 will even come through our city. Yet this line is redundant with other lines that are already available. The future of travel does not lie in buses but in light rail.</p>
EAST KING COUNTY	<p>I think that light rail segments should be added to create a "loop" around the north end of Lake Washington, i.e., from Bellevue to Bothell, and through the 522 corridor to Seattle. Incidentally, I prefer a SR522 alignment over the proposed SR522/NE145th St alignment. I think it's more important to serve the rapidly developing Lake City Neighborhood than the NE 145th St Corridor.</p> <p>I imagine that similarly a "loop" around the south end of Lake Washington would be attractive. I note the absence of Renton in light rail planning.</p> <p>In general, I would be much more supportive if the projects would come on line FASTER. I'm personally willing to pay more in taxes if our urban form were being shaped more by transit than the endless highway expansion. Transit is not getting ahead of growth; it's falling behind, in my opinion.</p>
EAST KING COUNTY	light rail for SR 522

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	Due to the rapid growth of the Sammamish area it should be included in your plan somewhere.
EAST KING COUNTY	Light rail to extend up to not hell and woodinville from Bellevue Redmond Kirkland.
EAST KING COUNTY	Light rail extension to Bothell/Woodinville
EAST KING COUNTY	I think that the light rails are really great. In the future I think it would be really great to be able to have a light rail system from Bothell to Seattle. Although I realize this idea is not very resonable at the moment, I think it would be a dream :)
EAST KING COUNTY	<p>I don't think these projects do anything to help get light rail to the north end of the east side, where it is dearly needed. Buses are great, but still have to travel on the main raods, even with special lanes, etc. Light rail along already set aside tracks would have been the best and fastest use of money and time. Could very easily have taken the east side tracks that were in place, convert those to light rail, and had a line running from Renton to Snohomish in a very short period of time. Magically, it would have served easy access in Maltby, downtown Woodinville, Central Kirkland, near downtown Kirkand, and close to downtown Bellevue, right down to downtown Retnon, and could easily have been extended to reach Tukwila.</p> <p>I also feel that the length of time to build these projects is way to long. If they must be built, then so be it, but any project that will take 25 years to build out is WAY too long or too complicated.</p>
EAST KING COUNTY	I am in favor of light rail along the old railroad right of way from Bellevue to Woodinville. This should be considered in ST3 final plan. Population density is already very concentrated along this corridor. New housing development is expected in Totem Lake. One option would be for the light rail to be on the lower elevation side of the right of way. There would be less impact to the neighborhood. There could be mitigation by lowering the light rail and putting a lid on it in the controversial south Kirkland neighborhood. Our region has spent 3 billion dollars on a replacement highway in downtown Seattle. Building a wall or a lid along a mile section of the Cross Kirkland Corridor to accommodate transit, ( not cars) would be inexpensive in comparison.
EAST KING COUNTY	Light rail to Kirkland should be built, despite the little group of people opposing it. Most of the city supports it
EAST KING COUNTY	I'm interested in light rail now vs years and years from Bellevue to airport and downtown Seattle - sooo many delays - just build it. Downtown bellevue needs light rail - thank you
EAST KING COUNTY	More link light rail using existing pathways should be considered. For instance, along Willows road to connect Totem Lake and downtown Redmond. Bellevue is definitely a hub on the East side, but much of the traffic ends up in Redmond (for Microsoft), and traffic heading North, East, and South from Redmond (not just West) is awful. Providing ways to connect Redmond with Kirkland, Issaquah, and other communities may help alleviate some of the worst Microsoft traffic.
EAST KING COUNTY	There is not much investment to provide additional park and rides. The current transit options are not fully used because of lack of good park and ride and last-mile commute options.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	Light rail should not bypass Kirkland as it runs from Redmond to Bellevue. Kirkland is growing rapidly and needs more than just bus service to lessen our clogged streets.
EAST KING COUNTY	There is not enough rail connectivity added to Redmond. Redmond having such a big economic input as far as businesses will not get enough rail coverage for the cost that the project will impose on the residents.
EAST KING COUNTY	the light rail to Issaquah, Redmond and Bellevue is urgent, I would not wait 25 years!
EAST KING COUNTY	Transit of any kind (bus route is fine) from Overlake Transit Center to UDistrict and Fremont.
EAST KING COUNTY	Please reconsider light rail to Kirkland. We can't be the only major city on the east side without access to light rail. This just seems like a huge issue and I'm not sure how ST3 can be approved as is.
EAST KING COUNTY	Dissapointed thatt there is no idea of 405 rail, though BRT is something. I have heard that there are plans for parking garages at Park and Rides (esp Totem Lake) as a huge deterrent to transit on the east side is lack of spaces after 7:30am, but I didn't see that addressed. Additionally, cities/municipalities should be looking at smaller bus services to get people to transit centers to further unburden neighborhood streets and create easier access to transit centers.
EAST KING COUNTY	Plans to run light rail on east side from Lynwood to Renton through Bellevue? Use the old train rail space??
EAST KING COUNTY	the ability to travel seamlessly from Kirkland/Bellevue to SeaTac airport in a 30 to 40 minute commute.
EAST KING COUNTY	Light rail on South side of Lake Washington through Renton
EAST KING COUNTY	Need to serve Sammamish.
EAST KING COUNTY	There needs to be an express bus route from Canyon Park to Eastgate park and ride. Also, there should be light rail access from Bothell. So many commuters live up here.
EAST KING COUNTY	BRT along SR169. The options for using transit to GET TO the Renton transit center and Tukwila Sounder are not realistic.
EAST KING COUNTY	Kirkland downtown area should be added along with Juanita area to solve the traffic jam problem.
EAST KING COUNTY	A light rail spur or other easier access to the light rail from Renton to Seattle should be added. Consideration of the non-driving population should be added to the plans. Thank you.
EAST KING COUNTY	Study adding Link Light rail to Lake City and along state route 522 east to Woodinville. Add badly needed parking along 522 in Kenmore, Lake Forest Park, which is already beyond capacity and creating hardships in an area underserved by transit, example: elimination of route 306
EAST KING COUNTY	Getting light rail or bus rapid transit to Issaquah is critical, as the only alternatives to go east from 405 are through Redmond to the north or Maple Valley to the south. I-90 is getting overcrowded at rush hour, with no real fix in the works. If not light rail, a bus rapid transit that would go to either downtown Seattle or downtown Bellevue would help.
EAST KING COUNTY	25 years is a long time...but 25 years will pass whether we build more transit or not!!! Let's get going, for Pete's sake! Also, why does every light rail option bypass Renton? We have the worst car traffic in the state along I-405, with massive amounts of new home construction continuing.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	The eastside is growing rapidly and though the included projects help to alleviate the traffic, it ignores the commuters going from Issaquah and Sammamish going directly to downtown Seattle. The 554 is helpful but does not run during the day and has limited buses traveling to Sammamish. Since light rail is unlikely to go up to the plateau, regular service to/from Seattle would be greatly appreciated.
EAST KING COUNTY	I would like to see light rail brought to Kirkland. I take the bus occasionally to SEATAC and work, and will go out of my way to take light rail as it is more reliable in terms of schedule.
EAST KING COUNTY	I admittedly was skimming, not reading carefully; is there truly no discussion of rapid transit across 520 and/or I-90?
EAST KING COUNTY	Why can't a light rail be built alongside I-405 from Everett to South Seattle?
EAST KING COUNTY	Light rail between Bothell and Bellevue!
EAST KING COUNTY	We are moving to Woodinville soon; I only saw 1 project that serves the Woodinville area. I wish there will be more projects serving Woodinville because it is a growing neighborhood!
EAST KING COUNTY	Sr 520 corridor needs clear focus with rapid bus
EAST KING COUNTY	Issaquah/Eastgate to Downtown Seattle
EAST KING COUNTY	I believe a light rail should be added across SR 520. This would help limit the amount of traffic on the bridge that expands to 6 lanes but at the end of the bridge is reduced again. Fewer cars will allow for traffic to flow much easier into and out of Seattle.
EAST KING COUNTY	I am a significant taxpayer who lives in Sammamish, which is not directly affected by any of these proposals, but I very strongly support this initiative. There is almost no tax increase that I would not be willing to pay in order to see this important work for our region completed as quickly and efficiently as possible.
EAST KING COUNTY	Increasing enforcement of cars blocking the bus lane on 2nd Ave in Downtown Seattle. The buses are often blocked by cars turning right onto 2nd Ave which negates all benefits of the transit only lanes during rush hour.
EAST KING COUNTY	Parking garage at the Kenmore park and ride  i go to the park and ride to bus and end up driving at least 50% of the time because there are no spots after I drop my kids at school (8:25am M-F)
EAST KING COUNTY	Extend light rail service to (at least) south Kirkland P&R
EAST KING COUNTY	Increase parking at ALL stations especially at suburbs (Bellevue, Issaquah, Auburn, Lynnwood, Woodinville, etc)
EAST KING COUNTY	Mercer Island
EAST KING COUNTY	Light rail in I-405 corridor added between Lynnwood and Bellevue, with a hub to other light rail lines, with sensible access points and parking along the way.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	The light and conventional rail plan is not nearly comprehensive enough to be a true "regional" system. This piecemeal approach to rail that ST is doing and the length of time it is taking to complete the links is very frustrating. Just bite the bullet and let's do a true regional system now. That would include light rail from Lynwood to Renton via Bellevue, from Seattle to Woodinville via Bothell Way, in addition to the other ST3 light rail routes currently planned. We need high speed rail, for both people and products (we need to get both moving faster), from Portland to Vancouver. The plan to run the south link from SeaTac along I-5 instead of Highway 99 is a huge mistake and will continue reliance on cars instead of facilitating that growth of urban cores.
EAST KING COUNTY	Communities need to link bicycle/pedestrian pathways such as the Kirkland trail w/ Woodinville & link to Sammamish trail. And link to new 520 bridge/ trail & continue that continuous link from the 520 bridge along 520 East. And link the Kirkland trail into Bellevue to the new rail proposal.
EAST KING COUNTY	<p>Rather than rapid bus transit on the I-405 corridor create a north-south light rail line. Existing train access already exists from south Bellevue into the Renton landing area. Why not use this real estate? This would serve the largest employer in the area, the Renton Boeing plant as well as a large commercial area in the landing. This could likely be an above-grade line. From the landing station extend to the new south Renton park and ride and then over to the current Sounder/Amtrak station in Tukwila. This links the north-south Sounder train via South King County to the Eastside. It is badly needed as evidenced by the stretch of I-405 from Renton through Bellevue and then up to Bothell. In later years this line could be extended north along I-405 and eventually connect up the spine in the Lynnwood area and in the south from the Tukwila Sounder station over to Tukwila International Blvd station and the airport. I view this as a far better use of funds than the proposed line between Bellevue and Issaquah.</p> <p>Rapid Bus Transit on I-405 is dicey at best as it will always have to compete with traffic which is not likely to get better in the future.</p>
EAST KING COUNTY	Need more trains on south line, including additional scheduled trains from Tacoma north in afternoon \ Seattle south in morning. Also need later train from Seattle in afternoon for example 7pm departure instead of last train at 6:20pm
EAST KING COUNTY	Renton Highlands and Fairwood
EAST KING COUNTY	More bus routes or some form of public transit option for Lynnwood/Shoreline Southbound (Seattle) commuters. As a Lynnwood resident, it is a very long bus ride (2+ hours) to get into Queen Anne/Ballard and often quite difficult (1.5+ hours) to get into Downtown Seattle via bus.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	The I-405 issue is the most important issue facing us. Instead of extending the plan from overlake to redmond downtown or from Bellevue to issaquah, we should consider putting money into Bothell to Bellevue plan. I find it difficult to support a plan where the impact is low. There are railway tracks and lines between Bellevue, woodinville and redmond even today although unused. A dinner train used to run through those tracks until about 8 years ago. I would strongly support reusing that infrastructure. It might actually impact the I-405 traffic as it is easy for people who live in Bothell to use 522 and get to woodinville where those tracks end and catch the train from there. It might actually make a difference to the 405 traffic as a lot of people commute from Bothell to Redmond/Bellevue. I would also strongly support paying for improving that infrastructure and using it as it can make a difference in a year or two as opposed to 25 years from now as it is planned. In the current proposal there is no solution for i-405 and I dont want to support a cause that does not address the most burning problem at our hands.
EAST KING COUNTY	Seems logically to design a loop like most major cities have in their transportation systems. Why not close the loop in the South as well, connecting Tukwila and Bellevue via Renton, Newcastle, Factoria, and possibly the proposed issaquah route? Renton area is growing incredibly fast and is going to only make traffic on 405 and Coal Creek Parkway worse and worse in coming years. Buses don't seem like more than a little bandaid and will not improve the terrible commute we already face in this area.
EAST KING COUNTY	There is a need to connect Olympia to Everett on a single rai system that can be accessed regularly by residents along the most populated corridor in the Sound transit region, not just along the leak lines along the water. We are 50 years behind most major metropolitan regions
EAST KING COUNTY	you should include a Bicycle Only Freeway system, that connects Transit Centers.....similar to what they have in Bogota, Colombia and in Denmark.
EAST KING COUNTY	Anything on the Cross Kirkland Corridor. As a Kirkland resident that lives west of 405, I see very little benefit being added for my City through several ST plans. I'm an engineer that strongly supports transit, but I feel that my City has been passed over and left out multiple times. Only locating funding in the 405 corridor addresses bypass traffic rather than trips integral to my neighborhood and community in the Juanita and Downtown Kirkland areas.
EAST KING COUNTY	I don't believe this is aggressive enough. We need so much more transit to make it truly useful for the entire region while supporting the anticipated population growth.
EAST KING COUNTY	Expand I90 light rail east to Snoqualmie vallley hospital, and North Bend.
EAST KING COUNTY	We need a light rail line from Southcenter thru the Landing in Renton up to Newport Hills P&R and into Bellevue that way.
EAST KING COUNTY	I would like to see a future light rail line connecting Southcenter, up thru Renton and The Landing, to the Newport Hills P&R, and into Bellevue from the south.
EAST KING COUNTY	I know buses need to be part of the plan, but no rail through Renton?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	Please include projects to improve the traffic on I-90 during rush hours between south Bellevue/Issaquah and Seattle. The existing plan calls for building link light rail from Issaquah to Bellevue downtown, that does not help with commuting times between south Bellevue/Issaquah and Seattle.
EAST KING COUNTY	There should be a light rail extension along the 405 corridor at some point from the Tukwila station, Renton Boeing, Bellevue. Also, the way the population is climbing in the area it is really discouraging to hear some of these projects won't be finished for 17-25 years. I'll be dead by then.
EAST KING COUNTY	Bus service only along I-405 and WA-522 / Lake City Way is not acceptable. During weekday morning and evening commuter hours, Lake City Way operates at a crawl from Kenmore to Seattle. The regular lanes of I-405 back up and slow to a crawl on a daily basis, and the HOV-Toll lanes join them on a regular basis. There is no space on the roads to add more buses today, let alone 25 years from now. Need a light rail plan for the full length of the I-405 corridor and Lake City Way, tying into the ST3 plan the currently only supports the I-5 corridor and wealthy business interests in Bellevue and Redmond. Light rail along I-405 has to happen at the same time as the light rail extending along I-5 under the ST3 proposal. The Puget Sound region is expanding in population extremely rapidly and the current infrastructure can barely handle today's population. Long range buses (BRT along I-405) are a partial and very temporary improvement at best, larger capacity light rail is the only way to effectively take pressure off the roads. All of the light rail expansion proposed in the ST3 plan is absolutely necessary, but it's not enough. You can't leave the I-405 and Lake City Way commuter corridors off the plan for light rail.
EAST KING COUNTY	Please reconsider utilizing the Cross Kirkland Corridor or please consider other transit improvements beyond BRT for the Kirkland area. Especially the Finn Hill neighborhood of Kirkland. We lost several of our bus routes with nothing to replace them, making car trips pretty much mandatory for the neighborhood.
EAST KING COUNTY	The Kirkland rail corridor has been completely left out of this project! We were promised light rail when the corridor was purchased. My support is contingent on this. I am disappointed that a small, vocal minority has been successful in getting this off the plan!!!
EAST KING COUNTY	You took a ton of money 20 years ago and have barely delivered anything usable. You need to put forth a concrete plan with penalties if you don't hit milestones.
EAST KING COUNTY	Light rail to Kirkland (across cross-kirkland corridor)
EAST KING COUNTY	PARKING MUST BE AVAILABLE.
EAST KING COUNTY	transit in Kirkland. Our city has been shut out on meaningful transit in the past and it looks like we will again even though Kirkland has some of the worst traffic and highest density in Puget Sound.
EAST KING COUNTY	Link light rail to the east side to serve Redmond, Sammamish Issaquah should be considered given the increase in housing and average increase in the number of commuters from east side to Seattle Downtown.
EAST KING COUNTY	Please make all this come faster and gather more taxes. We simply cannot afford to hold back and wait. The time we all lose commuting is time none of us can ever get back. Also, parking is a HUGE problem at park and rides. This must be fixed! Mercer island park and ride is in dire need!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	transit in Kirkland!
EAST KING COUNTY	Add Kirkland to the plan! Use the CKC!!
EAST KING COUNTY	I don't live near any bus routes, so I think it is very important to make sure there is adequate and safe parking at the stations. I think this is key if we are to get more cars off the roads. I also think you need to do a much better job of analyzing the existing traffic patterns, since the 405 tolling has caused more congestion on 405 and the side streets.
EAST KING COUNTY	In order to vote in favor there would need to be a rail line going all around the 405 corridor including a station in Renton
EAST KING COUNTY	Increase access from unincorporated king county (i.e., 98053), so that there is greater access to the proposed services and less need for parking.
EAST KING COUNTY	Light rail up the 405 corridor to Kirkland and beyond.
EAST KING COUNTY	Extend light rail up the SR 522 corridor to Monroe. Extend service at least as far north as Marysville. Extend service at least as far south as Olympia.
EAST KING COUNTY	As both a King County Metro and Sound Transit customer. I would like to find out if and when this plan is finalized if there could be away to either use the Link Light rail or King County Metro transit to make it possible for those Metro Sound transit to be able to have a safe way of going to South Center mall in Tukwila if I feel like going to shopping on certain weekends or Holiday's.
EAST KING COUNTY	More options for getting from Kirkland/Bellevue/Redmond to downtown seattle via 520.
EAST KING COUNTY	A light rail stop in Renton along 405.
EAST KING COUNTY	Your time frame is too long. 405 and 167 need immediate help not 8 years from now. You should add light rail on the east lake washington corridor. The railroad bed is already there all the way from Renton to Woodinville. The committee hasn't even scheduled s hearing in south east king county so apparently our opinion doesn't count even though the transit authority will tax us for this project. How can I support something that will take too long to complete and doesn't Address SE King county needs or even the needs of northwest pierce and doesn't provide adequate parking so we can use the transit system.
EAST KING COUNTY	I wonder if this will garner support given the long history of the influence of the anti-tax cadre in the state. As long as we are asking for money, why not shoot for the moon. In my uninformed opinion, it makes sense to me that light rail should go along the 405 corridor instead of improved bus service. It seems that If we circle Lake Washington with train and include extensions east to Issaquah and Redmond, as well as north and south (also to West Seattle?) with light rail, then we have a complete rail system. Of course, this is likely way beyond the \$50 billion being asked for the suggested work and so dead because of the aforementioned strong anti-tax group.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	<p>Would loved to have seen light rail on the cross Kirkland Corridor, connecting South Kirkland P/R to downtown Kirkland on the ST3 proposal. While I do live on the trail and use the trail frequently, I deeply believe that adding light rail is a much needed improvement. While I respect our neighbors and the SaveOurTrail campaign, they do not represent all of us who actually live on the trail and want light rail. I was personally in favor of the proposal put forth here: <a href="http://seattletransitblog.com/2016/03/14/a-grand-bargain-for-kirkland-in-st3/">http://seattletransitblog.com/2016/03/14/a-grand-bargain-for-kirkland-in-st3/</a> - even better if an option, though I understand the reasoning against it, would be to connect South Kirkland P/R directly to the University of Washington station.</p> <p>However, if light rail on the Cross Kirkland Corridor is simply not possible due to the public outcry against it (which may be a true vocal majority or a very vocal minority) then I do support ST3 in its current iteration.</p>
EAST KING COUNTY	A light rail extension to Sammamish
EAST KING COUNTY	I can't believe you have no plans for light rail on I-405 from Bellevue to Renton, the most congested freeway corridor in the state. Why won't you upgrade the BNSF right of way for light rail use?
EAST KING COUNTY	The thought that in 25 years we won't have light rail connecting all of 405 to I5 and across Lake Washington to Seattle is UNTHINKABLE. You can't honestly think that more buses on the 405 corridor is a viable solution. 405 is horrific and the idea that someone from Kirkland or Bothell will have to bus to get to a light rail in Bellevue in order to get to Seattle, is ridiculous. We need to see a holistic plan that is a long term solution. A truly regional light rail is the only long term solution. We are so far behind every other world class city in most countries of the world. Seattle should be an example of innovation and technology, not a patchwork of dysfunctional bus lines and a 25 year plan that is outdated before it begins.
EAST KING COUNTY	Ballard to U District
EAST KING COUNTY	Light Rail along I-405 corridor from Tukwila / Seatac to Bellevue / Bothell / Lynnwood
EAST KING COUNTY	The light rail should be connected to Kirkland/Redmond to help alleviate Microsoft traffic that bypasses the freeway and uses 85th street as an alternate route. It should also connect Bellevue to Lynnwood to help with 405 congestion as additional bus service doesn't help with so much traffic causing a parking lot on the freeway.
EAST KING COUNTY	East side route to include Tukwila Renton Bellevue kirkland Bothel
EAST KING COUNTY	East side needs light rail not bus service. We need light rail to the airport, across the bridges and down 405. Bus service is not acceptable. With all the money this state has spent on studying transit issues, we could have had a light rail system that could have been a model for other cities. We are so provincial in our government in WA it is ridiculous! Grow up. Seattle area will continue to grow and we need to meet that growth forward thinking and action.
EAST KING COUNTY	Extend light rail to downtown Renton and Renton Highlands.
EAST KING COUNTY	Why isn't BELLEVUE in the Light Rail plans?!!!!!!
EAST KING COUNTY	Is there already s plan to extend light rail across new 520 bridge on lower level?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	Transit (either LRT or BRT) along the Cross Kirkland Corridor should be considered - this was removed from consideration because of a very vocal minority.
EAST KING COUNTY	Light rail connection from Tukwila to Renton. Eventual extension of light rail along I-405 connecting Renton, Bellevue, Lynnwood.
EAST KING COUNTY	- Regional Express buses connecting Downtown Redmond - 405 BRT - Downtown Kirkland - Google Campus - S Kirkland Park and Ride - UW Station - Brooklyn Station with stations and other improvements to improve speed and reliability.
EAST KING COUNTY	Additional parking at Lynwood and Mont Lake
EAST KING COUNTY	I don't know if you plan to improve neighborhood bus service, but I don't want to drive and park before I take rapid transit. Right now, I cannot use the Lynnwood park and ride because it is often full when I want to use it. The bus service in my neighbor hood could be easily improved. If there was a loop made that might take 5 minutes at the most, I could use the bus to get to the park and ride. I have asked about this and was told that it would not happen because it would cost too much. The transit person who told me this said that rider fares don't pay for a change like that. This was awful news to me, so I continue to drive my car everywhere. PLEASE IMPROVE NEIGHBORHOOD BUS ROUTES SO THAT WE CAN USE THE MASS TRANSIT WE NOW HAVE!!!!!!!
EAST KING COUNTY	PLEASE ADD LIGHT RAIL TO THE I-405 CORRIDOR! DELIVER A TRULEY REGIONAL TRANSIT PLAN! Connect both ends of I-405 (North and South) to I-5 by running light rail all along I-405. This will reduce the CHRONIC congestion on the East side. Then we will really have a regional solution and not piecemeal. NOW IS THE time to do this because voters are ready to "step up" to a comprehensive plan! PLEASE RESPOND.
EAST KING COUNTY	Bellevue to Issaquah should be extended to or go via Sammamish to cater to more population. Alternatively, there should be more parking in the transit stations in Issaquah. Similarly, DT Redmond could be extended to an area near Union Hill to have a better parking facility.
EAST KING COUNTY	Please add light rail to Sammamish
EAST KING COUNTY	Stop in Mountlake Terrace for light rail.
EAST KING COUNTY	Light Rail from SeaTac to Everett via Lynnwood.
EAST KING COUNTY	Redmond-Bellevue-Downtown Seattle
EAST KING COUNTY	Bellevue to Seattle, Bellevue to u district
EAST KING COUNTY	Additional transit options, or at least increased parking and bus reliability should be added or investigated from the Newcastle/Renton Highlands neighborhoods into Downtown Seattle and Bellevue. Currently it is easier to drive than take public transportation and for individuals living areas of less impactful urban sprawl there should be adequate options for taking public transportation.
EAST KING COUNTY	Been a tech city we are so behind on transpiration.
EAST KING COUNTY	All plans are good but we desperately need improvements NOW with the traffic congestion and the housing going in EVERYWHERE. 25 years is too late...
EAST KING COUNTY	There need to be better public transit options between Seattle and Olympia.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	More trains, something that follows the interstates so that a bus wouldn't be needed.
EAST KING COUNTY	Nothing in here about linking Sammamish to either Issaquah or Redmond. Put something in place to get from Sammamish to a light rail station.
EAST KING COUNTY	I-405 light rail to UW Bothell from Bellevue.
EAST KING COUNTY	Create more incentives or barriers to single-car commuting on highways and more opportunities for parking at light rail/train/transit centers. Create and maintain a government funded bike-share program county-wide. Offer vouchers for scooter/small motor vehicle commuters (ie. vehicle trade-in programs to increase more people on bikes/motorbikes and less in cars.) More opportunities and access for southeast King County to use public transportation and/or have safe pedestrian & bicycle infrastructure.
EAST KING COUNTY	It would be great to have Link light rail cross over the 520 bridge as well. Also, I think it would be super important to ease the transition for buses going from 520 Eastbound to I-405 Northbound specifically. A stop on the I-405 at 85th street would also be a great idea. There are currently a good number of buses using the I-405 corridor, but stops are so limited it makes it hard to access them without driving to a Park&Ride (which is not an option for me). Also why not consider link light rail along I-405 instead of Rapid bus? I was also hoping to see a Link light rail station closer to downtown Fremont.
EAST KING COUNTY	I am very disappointed that ST decided not to pursue BRT on the Cross Kirkland Corridor. The arguments for this option over the BRT on I405 were quite compelling. It is my understanding that wealthy homeowners were able to shout down the rest of us and force the Kirkland City Council to take the CKC off the table. Meanwhile ST retains their right of way so now what?
EAST KING COUNTY	Either in addition to Express Buses along the I-405, there should be strong consideration to use the unused railways that run along the I405 corridor to create a Train or Link service that can take passengers from Tukwila to Woodinville. Since the majority of the infrastructure is there - isn't there SOMETHING that can be done to help this horrible stretch of road on the growing Eastside?
EAST KING COUNTY	Light rail serving Kirkland is very important.
EAST KING COUNTY	The 545 bus Redmond/Seattle is highly over crowded. Can we please discuss options to add more buses or add a light link from redmond to seattle. The tech employers are hiring people from india at alarming rates and overflowing the 545 bus. Please help!
EAST KING COUNTY	Light rail from Seattle to Redmond via Hunts Point (ie 520)
EAST KING COUNTY	The Burien to Bothell Rapid Ride should be sure to include a stop in Factoria (405/I-90 intersection) Factoria is a major intersection and needs a medium sized transit center. There are major employers in the area. I would be daily rider if I could take a bus from Renton to Factoria. Currently I would need to travel into downtown Bellevue to transfer. Unacceptable for long term future planning.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	<p>I currently reside in Downtown Renton and feels the need to have a better bus routes to go to Bellevue and Seattle for work. Normally, the 143 and 566 runs every 15-30 minutes on a weekday but stops after a certain time. These buses should be running as an Express Bus which is every 15 minutes since a lot of people depend on this to get to work. At the same time, there were news of switching the Transit Center - instead of switching it to a location that is 1 mile away - there should be another a 2nd Transit Center in order to accomodate more folks to use the bus lines. It doesn't make sense when something that is working perfectly gets changed and most of the time, people who order these changes aren't the ones affected by it. There is no media or survey that checks-in with people like me who's going to be affected on every single decision that you guys will be making. Isn't it possible to add more stops and services? This has been the complaint for the most part since the buses run late 60% of the time.</p>
EAST KING COUNTY	<p>A better alternative needs to be provided for 522 to I-405 (Kenmore to Bellevue) route - mores buses are not enough. Need to add light rail and/or Lake WA water taxi routes.</p> <p>Timeframe is too slow - especially if best answer is an 8-yr wait for enhanced bus service at best. Water taxi or light rail answer is needed immediately!</p> <p>Would rather fund mass transit through vehicle license/registration use fees, not increased sales &amp; property taxes. Vehicles should pay for transportation improvements.</p> <p>Better light rail/train/water taxi system is needed to reduce congestion. Buses are unpredictable/late and still travel via roadway. Parking/transportation to bus stop is grossly insufficient to make bus or any other mass transit method of travel a reasonable and/or enticing for people. Many people who don't ride a bus now, won't ride a bus later.</p> <p>I would travel by light rail/train/bus/water taxi everyday if I could reasonably reach station/stop and conveniently get to my destination.</p> <p>Our current (and draft planned) mass transit system is disappointing and insufficient for current and future needs.</p>
EAST KING COUNTY	<p>Light rail across 520 would make this single biggest impact for me. I expect the transit times between Overlake and Seattle to only be competitive with car during peak rush hour. Would also like to understand the cost of a more agrees ice roll out (timing) or a broader roll out in the current schedule.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	We should be developing the plan to add light rail to the 520 bridge. that will open up a huge amount of efficiency/optimization options. recognizing that the 520 bridge itself is a long way from complete, it's still the right time to get a provisional plan in place and begin to build support. in particular, i was pleased to see the bridge has design that allows light rail to be added at some point, ideally without reducing traffic/HOV lanes. i'd like to see that in the long range plan, even if its just prospective. overall, i am very pleased with light rail (especially as it is now coming to east side) and expect it will strongly grow in popularity as more stations come on line.
EAST KING COUNTY	Light rail from Bellevue/Redmond to Seattle via Renton, and Light rail Auburn to Seattle via Tacoma. Moratorium on transfer of railway right of ways. Add a surcharge on all parking in Seattle and Sea/Tac for non-city residents, with funds going to light rail.
EAST KING COUNTY	I will not vote for this plan unless you add a rail option for Renton. The Eastside rail corridor should be an option for light rail. It would be more affordable than planning all new lines and would be completed in a shorter timeline. I will be actively campaigning against ST3 in south king county unless this or some other form of rail is added for the residents on the southeast side of the lake. The worst traffic is along 405 and the s-curves and the buses and rapid rides do not cut it. This is a major failure of Sound Transit to not have a reasonable option for this area. I have already organized a large contingent of people from my neighborhood that are ready to campaign against ST3 barring better options for our area.
EAST KING COUNTY	In south Renton, going to downtown Seattle takes forever. Bellevue to Seattle is easier to drive and takes less time, yet there is no rapid ride or express bus to get from Renton to downtown Seattle. I would strongly support improvements for additional transportation from Renton to Downtown Seattle, and better parking in park and rides. Just taking the bus alone (to the last stop in the transit tunnel in downtown Seattle), takes me 1 hour and 15 minutes, not including the additional time to try to park and walk to a bus station. I don't have a lot of time to be with family during the week because of my commute, and Seattle and Bellecue are both too expensive to live.
EAST KING COUNTY	Please don't leave out rail from Bellevue over 520 - it will be needed before it's constructed, even if included in this plan.
EAST KING COUNTY	We desperately need light rail from the Eastside (Issaquah) to downtown Seattle! I-90 is bad and only getting worse. I'm disappointed we're on a 25 year timeline?! why is this not more urgent, and why are companies like Amazon etc not footing some of the bill? they are bringing these traffic headaches upon us and should contribute to the solution!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	The BRT along 522 is greatly needed but there needs to be additional parking opportunities along that route in order for the public to use it. The Kenmore park ride lot should be a multi level structure such as Mountlake Terrace freeway station, which is also filled much of the time if you are not there first thing in the am. Commuter parking in Kenmore is almost none existent past the early morning. I often try Kenmore, then either Northgate Transit station or Mountlake Terrace. Sometime I just end up driving for lack of commuter parking even though my employer provides a free Orcas Pass that I would prefer to use than drive.
EAST KING COUNTY	More Kirkland options, possibly light rail.
EAST KING COUNTY	When will the Mercer Island station be made to provide a better connection.
EAST KING COUNTY	I live in Kirkland and think that BRT is not as environmentally friendly in the long term as compared to light rail. The people against it are rich elitists who don't mind driving and have the resources to do so.
EAST KING COUNTY	More gas taxes!
EAST KING COUNTY	Bring the light rail to the south end of the eastside, Renton!
EAST KING COUNTY	After using rail in England for 2 weeks, getting people out of their cars and changing their mentality is the biggest step. We will adapt and rail is our future.
EAST KING COUNTY	Once again there is no significant transit dollars proposed for Kirkland despite being one of the most densely populated and growing cities that ST serves. In addition, ST3 would tax Kirkland citizens 100's of millions of dollars over 25 years with nothing remotely close to those dollars resulting in transit as a return.
EAST KING COUNTY	Light rail on the 405 corridor, the bus might further congest car traffic
EAST KING COUNTY	Consider more park and ride areas associated with the proposed and existing transit stations.
EAST KING COUNTY	We will not vote for this unless it includes a rail option for Renton. Express buses do not cut it. Use the eastside rail corridor if you have to.
EAST KING COUNTY	There need to be more number and frequency of bus (and/or train) service from Redmond and North Sammamish to Seattle downtown.
EAST KING COUNTY	MOVE FASTER. Your snails pace kills all momentum. Quit being so governmental and get er done.
EAST KING COUNTY	No significant improvements to travel from Kirkland / North-Kirkland to downtown. Increase buses on route 255 and add late night service
EAST KING COUNTY	Parking is very important. The both Tukwila stations fills up by 6:45 am (link) and 8am (Sounder) every week day. A large parking garage or convenient parking access would save many of us from having to drive farther in to Park at the limited number of spaces at Mt. Baker or other lots. Additionally, more rapid bus access from the Benson Hill area of Renton to the stations would save many of us from having to the station at all. At the moment it takes between 35 and 45 minutes, plus several transfers just to get from the hill to either lot by bus. Instead I drive what takes 10-20 minutes and use up a space at one of the lots. Transit is very important to me and I will support measures that will improve this, I just hope issues like parking are taken in to consideration as the lack of parking limits our ability to use the stations at reasonable times.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	(1) The Juanita and Finn Hill area of Kirkland continues to be completely ignored. The only way to get out of this neighborhood is to take a local (not Express) bus, or drive over to 405. An Express bus system around Lake Washington must be implemented to complement, including an Express Bus on Juanita Way NE. (2) Please explain why bus rapid transit (BRT) service on I-405 between Lynnwood, Bellevue and Renton would come online in eight years. Why so long?
EAST KING COUNTY	More frequent routes from Bellevue to Downtown Seattle.
EAST KING COUNTY	Why is there no light rail plans for the 405? That's where the congestion is and buses are not reliable through freeways. We need light rail asking the 405!
EAST KING COUNTY	Please include Kirkland in the plan for light rail!!! Our city is so congested and will be cut off from all the surrounding cities under the current plan. Please don't bow to the pressure of a few very well-founded and very loud voice of the "save our trail" group while all of Kirkland suffers. I use the CKC almost every day for biking or running and would absolutely LOVE to see light rail added to the trail.
EAST KING COUNTY	Please continue to try and get light rail service from Bellevue to Kirkland
EAST KING COUNTY	Your plan does almost nothing for Kirkland. We need light rail through Kirkland and a community transit system to take people from the neighborhoods to major transit stations. With you plan, it is still more convenient for me to drive to work than take transit.  The implementation timeline is far too long. It should not take 8 years to get BRT on 405.
EAST KING COUNTY	It always seems that we are a patchwork system. We need light rail from Tukwila to Everett up I-5, 405, 90 and 520 connecting all of our major cities. This plan is a step, but the timelines are loooooong. We need to cut the waste put if construction such as wasted labor and complete these projects much faster to be useful.
EAST KING COUNTY	I will only vote for funds if project includes rapid bus or light rail on Kirkland corridor. Do not let a vocal minority of homeowners dictate the future if a whole community.
EAST KING COUNTY	I think there should be light rail to Totem Lake in Kirkland.
EAST KING COUNTY	You are missing the low-hanging fruit. We need more or larger parking garages and park n ride stations as well as more buses running during rush hour and other times if demand warrants. Current buses and parking lots are FULL with dysfunctional outcomes such as people driving AWAY from their commuting destination in order to get a parking spot or be able to sit on the bus instead of sanding for 30-60 minutes. Buses often pass waiting customers because thy are full. Rush hour express buses end too early, at about 7:30 am and local buses from the hinterlands just take too long to get to downtown Seattle. Great stations like Clyde Hill has NO parking lot and others like Evergreen Point and Kingsgate have a out 1/4 the space demanded and fill up very early in the morning. Houston Park n Ride is an awesome location but does not have buses that go to Seattle. Too much reliance on I-405 corridor which causes backups at ramp cross-streets. I am in favor of BRT on trail corridor. (Rail is too expensive and right of way is too narrow). We need a direct merge overpass lane from 520 e and 520 w onto 405 northbound express lanes.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	My only disappointment is that powers in charge didn't start light rail 25 years sooner!!
EAST KING COUNTY	Light Rail to Renton, Southcenter  Go bigger, build light rail much, much faster.
EAST KING COUNTY	The light rail system needs to better serve the Eastside. I'd like to see a light rail line running alongside 405 and linking the Eastside to the Seattle lines alongside I-90.
EAST KING COUNTY	There is currently no weekend bus service in Sammamish. Also, no mid-day service in Sammamish. Increase and improve transit service in Sammamish, please.
EAST KING COUNTY	emphasis should be on expanding the eastside to relieve traffic congestion on 405. More options for Renton.
EAST KING COUNTY	Ignore the naysayers: utilize the existing (former Burlington Northern) rail transit right-of-way from Bellevue to Woodinville to construct a modest light rail or trolley system. Just because the City of Kirkland built a lovely Cross Kirkland Corridor does NOT mean the NIMBY residents now own this easement. No, they don't, and Sound Transit should use it, sometime in the next 25 years. Please.
EAST KING COUNTY	I am extremely concerned about the lack of plans to get people across the lake from Kirkland/Redmond area to the booming South Lake Union area. Currently you would have to take light rail down and across 90 to Chinatown then have to get from there to South Lake Union. Given the explosive growth of SLU, and the volume of people having to drive across 520 every day since there are not more viable transportation options, I would highly recommend thinking about this.
EAST KING COUNTY	Absolutely nothing about transit other than buses from 520 to Lynwood. Bottle neck city up 405 to Lynwood yet you think that only needs buses. Really? There's UW at Bothell and Kirkland itself is becoming a major hub with Totem Lake getting revamped. The Canyon Park area too is a mess and you can only think of buses. This is a major area where so many drive single in cars.
EAST KING COUNTY	All people do not walk to a bus line or a rail drop. This part of the world on cars to get them to the bus or rail. We need more parking. We pay much attention to the bus traffic and how many are on board. NOT. The transit system as it is now does no pay for itself, it is state funded
EAST KING COUNTY	Consider adding parking to transit stations: eg Overlake Park and Ride is full every morning before 7:30am and many would-be riders can't make it there in time. They are left with either driving their whole commute (making traffic on SR-520, I-90, and I-5 worse) or taking the local metro busses from their homes, which can mean inconvenient walking, transfers, and wait times and can add hours to their commute.  For instance, from my house, I can either wake up early and drive to the park and ride before seven, and catch my bus to the U-district, and arrive 1-2 hours early, catch the metro route 249 to the transit center which runs very rarely and takes almost an extra hour, or sleep in and drive across the I-90 or SR-520 bridges during the worst part of rush hour, and then pay a ridiculous fee to park at school. If I could drive to the park and ride even an hour later, my commute would be significantly improved.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	I'd love to see light rail extend down MLK/900 through Renton and continue down 167 or even 515 or 169. Renton, especially the Cascade-Fairwood area, is not well connected to quick transit. I actually chose not to live down that way because of how difficult it would be for my wife to commute to work in Seattle by transit.
EAST KING COUNTY	More space for park and ride, generally and also more bike parking...thanks!
EAST KING COUNTY	A light rail line should be added between Tukwila and Bellevue, and get away from 405! follow Coal Creek Parkway etc. and hit neighborhoods/business centers in Renton, Newcastle, Newport Hills, and Factoria. Keep the BRT for the near term, but don't delay the light anymore 25 years is depressing as it is...
EAST KING COUNTY	why would the tram not be extended up 405 beyond Bellevue? Even with an extended bus service the routes would still be dependent upon roads in those areas, not to mention the construction of 405 for toll lanes just completed. Therefore I'm not a big fan on voting to rip it back up again for a metro passing lane. I would rather see a train.
EAST KING COUNTY	The only project I would support with my vote is light rail and or commuter rail from the station in Tukwilla to Bellevue and Redmond. The rail line already exists and could be upgraded and put back in operation with much less funds than some of the other projects. What should be done first is the most economical. To take 8 years to upgrade bus service on 405 is not reasonable especially when the rail line already exists and when buses use the car pool lane between Renton and Bellevue sometimes it takes up to 45 minutes to go 10 miles. Why isn't the existing rail line included in the this plan?
EAST KING COUNTY	RAIL TRANSIT IN KIRKLAND/BELLEVUE. HOW COULD YOU SPEND ALL THE MONEY ON A NEW 520 BRIDGE AND NOT PLAN FOR IT TO HAVE RAIL ACCESS?
EAST KING COUNTY	522 needs help. Light rail on 522 between UW Bothell and UW Roosevelt is missing. SR 523 and SR522 at LAkeCityWay and 145th is horrible bottleneck - basically an unplanned traffic meter that backs up traffic for 5 miles daily to Bothell. Help. Please help with grade separation at 522/523 interchange. Busses would not need dedicated lane of traffic could flow N/South
EAST KING COUNTY	Not including light rail across Lake Washington on 520 is the biggest gaffe that's been made to date. This should have been planned for a decade ago. It needs to be in the plans now.
EAST KING COUNTY	We need improved transit routes between the South Kirkland Park and Ride and our Kingsgate communities.  Bus routes going between the Kingsgate P&R and South Kirkland P&R take 35+ minutes to go ~7 miles. Examining our northern Kingsgate communities the routes get only less direct and much more time consuming (i.e. I-405 & Brickyard to South Kirkland P&R), typically taking 60 minutes to go ~9 miles.  That's an average of 12 MPH or less for either route.  I think there is a large, less-vocal user base in Kingsgate looking for solutions vs. fewer more-vocal Kirkland residents offering resistance. Kingsgate and the Totem Lake Mall are poised to grow.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	Bothell rail service to Redmond/Bellevue please!! And the Great Wall of China took only 5 years to complete.
EAST KING COUNTY	Busses on the 405 corridor in the south end are a poor Band-Aid for large problem. personally I wont vote for any project that doesn't add light rail along the sound end 405 corridor. If that was included in the project I wouldn't care how much it cost or how long it took. As of now with this project I will never see light rail from Renton to Bellevue and going through Seattle doesn't count.
EAST KING COUNTY	Kirkland tax payers are not getting their money's worth. SoundTransit keeps taxing Kirkland and we do not get any useful projects. Put light rail on the cross Kirkland corridor.
EAST KING COUNTY	Please add more accessible transportation in Renton such as the light rail. There's so much congestion on i405. Adding one bus rapid transit will not make a significant difference in the traffice flow.  It's unsafe to walk to some bus stops in Renton as well as biking around the city. Please add accessible biking lanes.
EAST KING COUNTY	We need light rail from the east side (issaquah, bellevue, Kirkland and Redmond) to Seattle!
EAST KING COUNTY	A stop is needed north of NE 51St at the Microsoft Redwest complex. I believe that the construction schedule is decades too slow and too expensive. I also believe that express buses are a waste of money. The East Side rail link needs to be resurrected and converted to commuter rail and intercity use. It is difficult to get to Seattle to catch a train to Portland from the East Side. Express buses lack sufficient evening service which makes trips into Seattle for cultural events very difficult by transit.
EAST KING COUNTY	I live in Sammamish and commute to downtown Seattle. This whole plan still provides no better commuting option for me. Sammamish is totally unconnected to everything and going from Issaquah all the way into Bellevue and back out again to go across 90 into Seattle is ridiculous, so I doubt I would use any of these options at all. This plan caters to very specific employers - Microsoft, Boeing, Amazon, etc. If you don't work for one of them and/or don't live in one of the chosen cities, you can't use any of this public transit.
EAST KING COUNTY	Better service for downtown Kirkland to go north or south bypassing existing back-ups
EAST KING COUNTY	renton to bellevue railroad
EAST KING COUNTY	Train service should run on the I-405 corridor instead of BRT. Seattle seems to be following the same mistake as California bay area transit where the transit is concentrated only on one side of bay.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	<p>A new 4 lane bridge to displace traffic off 522 and connect West Kirkland to Lake City/Sandpoint. A corridor between 145th and 125th in Seattle, and 145th and 141st (Holmes Pt).</p> <p>Add the additional lanes in the original Master Plan for 405, from Lynnwood to Renton. Add 2 lanes Mukilteo/Lynnwood through to 522 to account for growing population outside of Seattle due to housing costs and people moving to cheaper areas.</p> <p>25 year plan to reclaim land from Renton to Bellevue, and create a new North South highway bypass and/or space for light rail to run.</p> <p>Plan to build another freeway east by Issaquah/North Bend to allow for additional population growth. Like the rumored 605 plan.</p> <p>Create no lane changing zones where space in lanes allow. Force people to drive straight, plan early for exit. This could keep traffic going farther in one direction from dealing with changing speeds and space between cars as people try to cross 3 lanes of traffic to get to an exit.</p> <p>Build new P&amp;R garages to provide for current and future population growth in key areas: Kingsgate, 72nd and 85th, Brickyard, Kenmore,</p>
EAST KING COUNTY	Light rail on 405 from Wilbur ton to Totem lake
EAST KING COUNTY	Light rail should be added (instead of rapid transit) from Everett, through Bothell, Kirkland, Bellevue, and end at Seatac Airport.
EAST KING COUNTY	I think adding rail or bus on the Cross Kirkland Corridor is as important if not more so than rapid buses on 405. I am disappointed this is not part of the proposal.
EAST KING COUNTY	Still not seeing enough relief for critical east-west flow, which because of all the water is our biggest difficulty as a region.
EAST KING COUNTY	We need something better than "rapid bus" on 405 through kirkland. We need light rail connecting Kirkland to Bothell, Bellevue, Redmond... North-South traffic through Kirkland is disastrous, and we don't have direct bus service to major places of employment. 45 minutes and two buses to go 6 miles is ridiculous. Light rail along the existing CKC shouldn't take THAT long to build -- it is already graded for rail after all.
EAST KING COUNTY	Redmond or Bellevue to UW light rail needs to be added sooner.
EAST KING COUNTY	Lynnwood to Renton needs light rail. BRT is better than nothing, but not good enough. The northern area (Bothell, Kenmore, Lynnwood) is being developed at a pace that the current transportation system cannot support. We need to plan for the future, not for the present. I support BRT as a fall back option, but would strongly support light rail.
EAST KING COUNTY	I think the existing rail ROW along the eastside (Renton-Bellevue-Kirkland-Woodinville-Monroe) should be utilized for light rail and be part of ST3 package. This is existing infrastructure that can be quickly utilized by ST.
EAST KING COUNTY	Kenmore needs a light rail stop.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	<p>I don't see any obvious bus or light rail support for Bellevue to UW. As a professional that would like to take classes at UW, and with kids to hit college in about 8 yrs, this route impacts our family greatly.</p> <p>ALSO, PLEASE KEEP IN MIND OUR BELLEVUE HIGH SCHOOLERS USE PUBLIC BUSES. I capped that because I don't think neighboring high school districts are so dependent on our public bus system. I often worry about the safety and bus availability for our now 11 yo.</p>
EAST KING COUNTY	Add a light rail station in Renton area for commuters to Bellevue and Seattle
EAST KING COUNTY	Add light rail from Downtown to Lynnwood transit center to this plan NOW. Build more parking spaces at Lynnwood transit center.
EAST KING COUNTY	Light rail to renton
EAST KING COUNTY	<p>Do spread out bus and trains connections with safer and full sidewalks and bike paths to encourage people to walk and bike to stations? If we can get more people moving it helps in many ways. Have more restrooms, water fountains and even cafes located next to stations to encourage people to be near the stations of our transportation systems. Haven't you see New York city subway, Amsterdam airport and other cities in the world, who connect people to get to the airport by some transit instead of drive an inefficient vehicle. Why not study other systems, but watch out for Frances recent problem with size of new trains and old stations?</p>
EAST KING COUNTY	General connectivity between Seattle and east of the lake (Kirkland, Bellevue) at the two bridge connections should be prioritized
EAST KING COUNTY	Light rail needs to extend across the 520 bridge and also along the 405 corridor from Lynnwood to Bellevue.
EAST KING COUNTY	Direct bus line between Redmond and Woodinville is urgently needed.
EAST KING COUNTY	<p>Overall the timeframe for all of these is far too slow. We need the ST3 draft within a year, and to begin construction next year on the top priorities. Fast track! We can do it!</p> <p>Link rail from Seattle to Bellevue/Issaquah should be given higher priority. 25 years is far too long. My dream would be for my children (age 2 &amp; 4) to be able to jump onto the link rail and quickly get into the City. This shouldn't be a driving or bus necessity. The I-90 / 520 corridor is at a standstill already and it's not going to improve within the next few years, let alone 25!?! </p>
EAST KING COUNTY	Sr522 needs more attention.... Add light rail or more buses that efficiently move commuters down this corridor to downtown and back.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	Adding light rail to Kirkland would also benefit a lot of people that have to travel to Bellevue, Redmond and Seattle. As a commuter that constantly travels from the Totem Lake area to Seattle, I would strongly use light rail if there was the option. In the current plan there is no addition of transit to the Kirkland area other than buses, but buses are neither reliable nor environmentally friendly, they get stuck in traffic with the rest of cars and can accommodate a small amount of people. Several neighbors have also shown their support for a dedicated light rail to serve our area. We would use more transit if a fast, reliable way to get to work is available.
EAST KING COUNTY	Please include the option for light rail on the Eastside Rail Corridor/Cross Kirkland Corridor from the Wilburton (NE 8th) Station through the S. Kirkland P-&-R, near downtown Kirkland, to Totem Lake.
EAST KING COUNTY	It is irresponsible not to have a direct rail line from Issaquah to Seattle. Any plan making a mistake that big (Issaquah is a gateway to rapidly-growing outlying towns such as Snoqualmie) makes me inherently suspicious of other conceptual flaws. Therefore, I will vote against the plan until you rectify such an egregious error.  I also think conceptually, you should explore monorail lines adjacent to existing freeways/corridors, as an alternative to acquiring land for more traditional (i.e., 19th century-technology) rail lines.
EAST KING COUNTY	This plan is YEARS behind...when Salt Lake City had the olympics they moved FAST and completely redid the freeways and added light rail. We need light rail and improved 405 access YESTERDAY! I can't believe this is a 25 year plan! Get moving and let's get this done in 10!
EAST KING COUNTY	Light rail between Tukwila to Bellevue through Renton
EAST KING COUNTY	You missed the boat on the eastside population centers where a good deal of your taxes come from. Thanks for the buses, but no thanks. We all know they will be stuck in traffic. This plan is too short sighted, to Seattle centric and won't be getting my vote.
EAST KING COUNTY	I feel efforts to relieve traffic congestion in the South Eastside communities like Renton, Kent, Auburn pale in comparison to all the investment more affluent communities North and west of I90 are going to receive in this proposal. I405 and hwy 167 are always backed up and no relief is in site with this plan.
EAST KING COUNTY	I support light rail on the Cross Kirkland Corridor!
EAST KING COUNTY	First of all, I live in Renton and I am also a business owner in Renton. I collect sales taxes based on where I deliver products that I have sold. I am the one that sees just how much money the RTA garners from my customers and yet still no projects are on the docket to be built to benefit the city of Renton.  This is a travesty! We as citizens of Renton have paid a lot of money in to the coffers of the RTA and have nothing to show for it. Get with the program! We have Boeing and PACCAR here, they build and ship a lot of product out of Renton. They also have a very large workforce, which I am sure a good amount of those people would like to ride a light rail system as opposed to try driving to work or sit in the parking lot we call I405. Stop thumbing your nose at Renton and make something happen.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	Renton, why don't you have Renton listed as a light rail project? If you've ever been trying to get onto, or off of I-405 around the Boeing plant, it is challenging from about 12:30p until 5:00p. Have you seen how many workers the plant has, not to mention Paccar, and have you ever looked at the amount of parking they need for their workers?
EAST KING COUNTY	You have failed to address the HWY 169 corridor and the volume of traffic and continued growth in SE King County/Maple Valley are and the volume of traffic. You continue to expand and propose expansion where traffic usage of existing infrastructure is low and times to get from farther than 15 miles outside of destination. Is twice as long via transit as it is to commute in personal vehicle. A flawed plan, and would not and do not support continued taxation to all without serving a major area of current and proposed growth along the HWY 169 corridor of which covers 5 legislative districts.
EAST KING COUNTY	How about light rail from Bellevue to Seattle?
EAST KING COUNTY	Renton is the 4th largest city in the state and has a major employer, yet is once again left off the plans for light rail service. We even have a rail corridor that is unused. I guess we only count when you collect our tax money. Service should connect the cities around Lake Washington, relieving traffic on I-5 and 405 before branching out. When my kids were going to Bellevue College for Running Start bus service took over two hours each way from our house in Renton. Express bus service still has to deal with gridlock traffic on 405. These projects should have been completed 50 years ago, but we have to wait 8 more for inadequate service!
EAST KING COUNTY	Light rail to Kirkland, please...
EAST KING COUNTY	More bike lanes!
EAST KING COUNTY	A lightrail should go from Tukwila to Renton to Bellevue
EAST KING COUNTY	Many people are riding buses which is great. Unfortunately, there is no parking at Canyon Park park and ride after 6:30 am, I think a priority is to build parking spaces there and also at ASH way park and ride
EAST KING COUNTY	In my opinion too much focus is being put on routes from very southern locations (i.e. DuPont) into Seattle versus Eastside into Seattle where there are a significantly higher number of commuters. Focus on getting efficient rail from the Eastside into Bellevue and Seattle
EAST KING COUNTY	More services need to be added to the city of Renton, not just in downtown, which is not easily accessible for residents coming in from the east.
EAST KING COUNTY	Kirkland needs light rail on the Cross Kirkland Corridor connecting to Bellevue and up into Woodinville. I would also like to see these projects funded with a less regressive tax than sales tax, but I understand that that would take a larger overhaul of WA state taxes than is in the scope of this project.
EAST KING COUNTY	I highly support transit in our area. But if there is no light rail plan for Renton, I will not vote for any of this. Support Renton or lose my vote!
EAST KING COUNTY	Cycling maps, signs, and lanes should be added everywhere and more secure bike storage options should be implemented.
EAST KING COUNTY	Direct connections from Tukwila Amtrak/Sounder station to SeaTac airport.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	There is no light rail plan for Renton. This should be added to the ST3. Just looking at the traffic and number of people live in Renton, this should be on the list.
EAST KING COUNTY	Parking, parking, parking. Kenmore is maxed for park and ride lots. We need more. And a few extra buses is all Kenmore gets after being used as a go around to avoid 520 tolls for years? Really? How about a little consideration for this fast-growing area?
EAST KING COUNTY	Add a Lightrail line running North-South through the Eastside. The population of the Eastside is greater than that of all of Seattle and the traffic on a typical weekday during rush hour on Interstate 405 and its surrounding arteries are abysmal at best. Simply expanding bus service, which is what the current plan calls for, will not be enough to alleviate the traffic, as bus service is heavily impacted by traffic, unlike Lightrail, which has its own right-of-way. The booming economies of Bellevue and Redmond in particular will only add the congestion. Lastly, the majority of people in the Eastside do not commute to Seattle, but actually commute within the Eastside for work. Therefore, why should Seattle, which has a smaller population than the combined Eastside get a Lightrail spine, while the Eastside must settle with expanded bus service from the current plan?
EAST KING COUNTY	(1) There still seems to be very little in the way of enhanced light rail services to SE King County (Newcastle, Renton, Kent, Auburn, Covington, Maple Valley, etc.). (2) There needs to be parking at the light rail stations.
EAST KING COUNTY	Light rail to renton
EAST KING COUNTY	The problem is you are not building park and rides next to the rail lines. I am willing to drive to the light rail station, but I won't ride the bus there. Why? Because it takes WAY TOO LONG. While you may imagine that people have all the time in the world and that riding the bus and light rail is some kind of dream world where you can read/relax/get work done as your commercials seem to indicate, this is simply not the case. How do I know? I've tried it many times. Busses/trains are too crowded. Wait times are too long. It would take me over 2 hrs EACH WAY to get from my home to my work if I only depended on transit. I don't have time for that. No one does. So if you can't meet me half way by letting me drive my car to a park and ride so that I can take ONE train/bus without having to transfer, I simply won't be able to take transit. I wish I could.  Also, what the hell? No light rail in Renton for over 25 years? Am I in Bizarro world? If any community NEEDS light rail, it's Renton. Trust me on this one.
EAST KING COUNTY	Remove improving all bus routes and replace with light rail - why spend money on bus routes when they will just be light rail in 50 years
EAST KING COUNTY	Light rail on 520 bridge to kirkland
EAST KING COUNTY	We need more parking at the existing park and rides. People in the suburbs would use existing buses more if there was adequate parking. Walking, biking, or busing to the transit centers isn't viable. South Bellevue Park and Ride fills up by 7am - so much potential to reduce traffic on I90 if you expand this.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	In general, I support mass transit. However, I am not in support of the ST3 proposed plan. the proposed new transit station and better bus lane on 405 do not really address the need for the residents of renton city. Over the last 20+ year, various improvement to transit stations in downtown renton and bus line have not made a dent to the traffic on 405. I beleive the real need is a light rail line going thru the residential areas of Renton and to Bellevue is need badly. This will reduce 405 traffic significantly.
EAST KING COUNTY	I think it is short sighted to not include light rail on the I-405 corridor from Lynnwood to Burien, which will no doubt see a huge increase in traffic volume as the population grows. Buses cannot match either the efficiency of light rail or its reliability of service without having their own dedicated right-of-way on I-405. If buses are simply added to a toll lane on I-405, they will be subject to the unpredictable slowdowns of car traffic.
EAST KING COUNTY	These projects should be expedited and avoid cost-overruns.
EAST KING COUNTY	1) Light rail up the 405 corridor 2) Build the light rail sooner (have concurrent projects rather than sequential) & Issue bonds to finance the gap in current funding plan vs cost/timing to make light rail happen sooner.
EAST KING COUNTY	Where is Renton in the rail plans?! Renton is grossly underserved by Sound Transit. I quit a job in Bellevue because the transit was abysmal and unreliable. I'd love to use the transit more often to events at Seattle Center/Downtown - but the options are terrible.
EAST KING COUNTY	Light rail between along 167 route to Bellevue area
EAST KING COUNTY	The timeline is too long; we should move more aggressively.  Get the project estimates and dependencies right up front. Don't set up a disastrous project with never ending cost increases and delays.
EAST KING COUNTY	Light rail to Issaquah
EAST KING COUNTY	Please consider bus service between Woodinville and Redmond and Kirkland, due to high tech-industry commute.
EAST KING COUNTY	Light Rail on 520 from Redmond to University of Washington Station = the tolls on 520 where suppose to pay for all of the 520 bridge replacement including light rail - why is not even included in ST3 plan, but only shows it has needing to be studied? The timeline for all projects is too long - allowing buses to drive on the shoulder makes no sense, make capital improvements to get traffic moving so buses can move quicker. I do not currently use mass transit because it takes more than two hours and 3 changes of buses to get my office, and I then I have to attend meetings in different locations and mass transit is not a viable option for this. If the region had a reliable and fast moving system that got you to places faster than driving i would use it.
EAST KING COUNTY	Renton should be connected to the city by light rail!
EAST KING COUNTY	Light rail should go through the Cross Kirkland Corridor where the old railroad tracks were. A light rail through Kirkland would be utilized more than what it is currently is being used for (a hiking/biking path for tree huggers of which there are few).

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	It doesn't make sense to build light rail from Bellevue to Issaquah and Redmond and completely overlook Newcastle and Renton. Additionally there are several right-of-ways that appear to be consistent with routes as described which could lower project costs. Overall I'm strongly opposed to this plan knowing the cost and timeline - \$200/year for something that even if I had access to use still couldn't for another 15-20 years? Certainly tax payers money could be used for something beneficial to those of us on the roads - more lanes and projects WSDOT has been putting off for over 10 years already (I-405 south of Bellevue). Bottom line: I don't feel like I should have to pay for something I'll never use because there aren't any access points around where I live.
EAST KING COUNTY	Really need a light rail extension to Renton. Huge tax-paying population disenfranchised by long (if taking bus to light rail), or time-restricted (if taking commuter rail) Seattle commute. Could easily offshoot current Sea-Tac route in a similar way to how Boston's Red Line train goes to either Ashmont or Braintree. Along Grady Way (via South Center) or an earlier south-east turn onto Rainier Ave towards Renton Transit Center (current one downtown or proposed new one on Grady) both could work.
EAST KING COUNTY	I don't see improvements to get passengers to the light rail - for example in Bellevue. We can get to downtown Seattle but we can't get home on the bus. The bus routes outside of the rapid lines are terrible. We need buses - frequent quick buses - between all the park and rides.  I live on a Major road (North Bellevue Way) and I can't get anywhere on a bus. We are completely neglected in terms of bus service.
EAST KING COUNTY	Rail line connecting Bothell and downtown Seattle
EAST KING COUNTY	Adding light rail in Lynnwood should be one of the first projects to allow for travel all the way from SeaTac to Lynnwood and all the business that is there. That would allow for a seamless ride on the west side of I-5.
EAST KING COUNTY	We need light rail all along the 405 corridor. I commute by car every day RT Kirkland to Everett (Boeing). The current bus schedule does not support my family schedule but light rail (a train every 6 minutes) would be far more flexible.  My spouse commutes everyday Kirkland to Seattle on Metro bus. Light rail across (or around) the lake would be awfully nice to provide options.
EAST KING COUNTY	I wish the Eastside area north of 520 would be addressed. The daily commute from Kirkland south to Renton or southwest to South Seattle are hellacious. There are no good transit options. Why is there no light rail on either 520 or I-90? One way commute has increased from 20 minutes to 45-60 minutes over past year alone.
EAST KING COUNTY	Light rail is needed to connect Kirkland to Bellevue to the south and Lynnwood to the north. BRT on I-405 is USELESS! There is no room. We need light rail. As a citizen of Kirkland I am MAD at our council representatives for not supporting light rail. We NEED light rail if we have any prayer of mobility in years to come. All major corridors are being planned except through Kirkland. It's WRONG. I will not vote for a Sound Transit measure without light rail through Kirkland.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	I feel that with so much traffic added to 522 due to tolls on the 520 bridge and 405, it would be a good idea to add more transit opportunities to Kenmore. We get all the traffic and few benefits.
EAST KING COUNTY	Rather than BRT we need light rail along the SR522 and I405 corridors. The people in north king county will not have any light rail options otherwise.
EAST KING COUNTY	Use a light rail to run from 145th all the way to the airport, high speed busses connecting to it at Bellevue and Issaquah and Tukwila.
EAST KING COUNTY	I would like to see light rail on the 522 corridor. I would also like to see less emphasis on funding from sales tax, since sales tax is regressive.
EAST KING COUNTY	A Bellevue-Kirkland branch of the light rail would further connect the major population centers of the Lake Washington area.
EAST KING COUNTY	The only improvements to Renton are rapid ride routes to Bellevue/Redmond. What about to Seattle?
EAST KING COUNTY	Why only light rail on the "spine" and only spurs within Seattle proper? If anything you need light rail going up the 167-405 corridor. Busses are NOT a solution. They use the same over crowded freeways and roads. They are NOT reliable no matter what proposals you make. Cities that have subways like New York are successful because they are EVERYWHERE, not just along one route. Renton is the 4th largest city in King County yet the only proposal is busses? That is unacceptable. personally I find it insulting that Issaquah gets light rail but Renton or Kent does not, despite both Renton and Kent being many times larger than Issaquah, and having larger employers (Boeing). Personally I think this only benefits the wealthier communities, just like the 405 expansion NORTH of Bellevue, but nothing south. You will not get my vote and I will campaign against this proposal if south King County gets nothing but some extra busses.
EAST KING COUNTY	Construct Bus Rapid Transit lanes along NE 145th St., between SR 522 and the future Shoreline light rail station Construct Bus Rapid Transit on SR 522 and conduct a light rail study for SR 522 Build structured parking garages along SR 522 corridor
EAST KING COUNTY	Construct Bus Rapid Transit lanes along NE 145th St., between SR 522 and the future Shoreline light rail station; Construct Bus Rapid Transit on SR 522 and conduct a light rail study for SR 522 Build structured parking garages along SR 522 corridor
EAST KING COUNTY	I want to see light rail connecting Bellevue to Woodinville and the tech colleges via CKC. Light rail from Bellevue to SKPR should be in ST3. Ultimately, light rail across the north end of the lake may be a simpler and/or faster solution to expand east-west movement than developing 520.
EAST KING COUNTY	Subway lines
EAST KING COUNTY	East side commuters are aging to the horrible commuting traffic. More plans to incorporate new build out areas such of Snoqualmie should be consider in decade long planning
EAST KING COUNTY	Include interactive maps at transit stations to guide passengers from origin to their final destinations.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	It is unfortunate that we have to wait so long for the project to be completed. We need transportation fixes currently in the Seattle area; we don't have time to wait for 25 years.
EAST KING COUNTY	There needs to be a quck option to get from a park and ride in the Redmond/Bellevue areas to the UW district. This could be as easy and affordadable as an express bus that runs frequently.
EAST KING COUNTY	I think the Puget sound is way behind on mass transit, since it has been known that this is a growing area for the last 30 years. Light rails should be in place now, not projects estimated to take another 8-25 years to complete. The urban planning of cities should have included mass transit along the way with rails and express bus lanes, and connecting the eastside to Seattle. The cost to build the toll carpool lanes in the last couple years should be refunded to the taxpayer and one of those lanes should be re-purposed to rail or express bus transit. Many residents of this area have lived in other cities where mass transit has been a way of life for many many years. I have lived in several cities like New York and Chicago, as well as international cities, like London and HK, where you do not need a car to get around, and the cities are much bigger and more populated. These systems have been in place for 40+ years, even older in new York. All urban planning at this point in the Puget sound needs to involve rail and express bus access. We need some talented engineers and planners to get this project going ASAP.
EAST KING COUNTY	Bus transit along the Cross Kirkland Corridor should be included as a high priority. Not necessarily "rapid" transit but local connector transit to the main stem(s). Quiet, small buses with stops every 5 to 10 blocks.
EAST KING COUNTY	I would like to see a light rail station with a parking garage in Tukwila near or at the Southcenter shopping mall. Even better if a single light rail/sounder/bus station could be established.
EAST KING COUNTY	I think this is fantastic news, even if those of us in Issaquah don't see it for a couple of decades.
EAST KING COUNTY	The Eastside has had the most significant growth over the past 30 years, both in jobs and housing. While, understandably, Seattle would like to continue to improve its transit service, it is high time that the more emphasis is on connecting the Eastside, not just to Seattle, but to serving the needs of the local population who want to travel from their homes to another area on the Eastside. It is a lot harder to convince people to get out of their car, if they already have to deal with traffic jams to get to a parking lot close, where you hang around with nothing to do but wait for a bus that runs infrequently.  Consider combining transit centers more often close to destinations like shopping centers. At least if you have to wait a hour or two, you can run an errand or grab a bite while you wait, so less of your life feels like an involuntary waste of time.
EAST KING COUNTY	I think it would be beneficial having a light rail system from Bothell to Redmond/Bellevue. I think the Bus Rapid Transit sounds like a short term fix and I would like to see Bothell to 405 South adding light rail as well.
EAST KING COUNTY	Renton to Seattle, Renton going south

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	<p>Bus rapid transit is an inefficient option on the Eastside. I-405 is already *incredibly* backed up and BRT would make that worse, increasing commute times for motorists and transit users alike.</p> <p>We need light rail on the Eastside ASAP to reduce the area's dependence on cars, specifically in Kirkland. Kirkland City Council's decision to reject light rail does not represent the will of the people. The people of Kirkland want light rail now!</p>
EAST KING COUNTY	<p>I think that the focus between Lynnwood and Bellevue should be connecting lightrail, not BRT. In order to be the most effective, having one system that can connect all of the Eastside to Seattle would make our transit the most like efficient major transit cities such as New York and DC. As our area is rapidly increasing in population, we need to focus on ways to get people off of the road and onto lightrail that isn't beholden to traffic. Having to transfer from bus to train system is more limiting to public transit users such as families, who would be able to easily transfer from one train to another within a train terminal.</p>
EAST KING COUNTY	<p>More needs to be done to address the increase in traffic on I-405 between Bothell and Bellevue. Rapid Transit Bus service will not elevate the bottle neck. Addition light rail options from Bellevue North on I-405 needs to be discussed. Future development of the area is happening north of Seattle/Bellevue and our freeways are unable to accommodate the masses.</p>
EAST KING COUNTY	<p>I voted for ST1; but this plan is total BS. Forget the hub and spoke system of connecting Seattle (the hub) to the rest of the world via spokes. Who needs to travel from Seattle to Tacoma? Who wants to travel from Redmond to Lynnwood via Bellevue, Mercer Island, and Seattle? Or from Issaquah to Southcenter via Seattle? Ditch the Spoke system! Build a Figure 8 light rail system around Lake Washington!</p> <p>Build light rail on the Eastside along the I-405 corridor from Lynnwood to Tukwila and use the Burlington Northern right of way where possible from Bellevue through Kirkland, Woodinville, and out to Snohomish and Monroe to alleviate traffic on I-405 and 522 east of I-405. Forget the bus rapid transit idea!</p>
EAST KING COUNTY	<p>As a Renton resident I am disappointed that we have paid over \$200 million in extra taxes for ST1 and ST2 while much smaller cities such as Issaquah are slated to get Light Rail in ST3 and there is only lip service of basic bus service for Renton. I am leaning towards a NO vote unless Renton has new ST3 service. Renton deserves light rail before Issaquah. Treat Renton equitable or expect a NO vote from me.</p>
EAST KING COUNTY	<p>More transportation is needed in Kirkland.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	The plan takes too long and does not go far enough. Everything must be accelerated to ease traffic conditions now prior to the additional million people that are estimated to move to the Puget Sound area in the next few years (25). Traffic and transportation issues will drive business away, lose jobs and create huge amounts of emissions. Light rail lines do not extend far enough into rural growth areas: Stanwood/Arlington, Puyallup/Auburn/Black Diamond, JBLM, etc. Additional express buses will remove some cars off the road, but not enough, better to invest in light rail and Sounder train options.
EAST KING COUNTY	Reinstate the bus route that goes the full length of Juanita Drive, connecting Kenmore to Kirkland. There is no longer a bus that gets you from Arrowhead elementary school to the QFC and Bastyr University at the top of the hill. This cuts off service to the largest employer in Kenmore (Bastyr), and leaves out the under-served to be able to have food choices. Otherwise, there is an unsafe walk from Arrowhead to QFC on the shoulder of the road without a sidewalk. This is shameful!!!
EAST KING COUNTY	It seems to be a huge oversight not to include Renton in the next phase of light rail! Please add Renton and do right by everyone using the 405 corridor.
EAST KING COUNTY	South Sound is getting Rapid Transit Bus(es) out of this 25 year exorbitantly expensive plan when Northbound I-405 from Tukwila to Bellevue is the worst freeway in the state if not the nation? I think Sound Transit needs to go back to the drawing board with equity, parity and fairness in mind. Not only will I not support this plan, but will actively lobby against it. Living in the south east portion of the sound should not equate to less service.
EAST KING COUNTY	I would like to see a) more frequent service on the sounder train including evenings and weekends. b) reliable bus service to Cottage lake, Duvall and Monroe including evenings and weekends. c) feeder bus's around cottage lake that go through neighborhoods to bring people to the safeway, Woodinville and to other bus routes.
EAST KING COUNTY	Light rail option from south 405 (Tukwila area) to north 405 (Bellevue-Redmond). The commute through the Renton S-Curves is horrible!
EAST KING COUNTY	Mass transit on the east side corridor. Projects must be completed sooner. Don't use prevailing wadge - use lowest bidder contracts!!! Speed up environmental review process.
EAST KING COUNTY	Renton must be part of any light rail network going forward. It's one of the largest cities in the region and a major center for business - it is being shortchanged in all of these plans.
EAST KING COUNTY	Lightrail from Bellevue to Downtown Seattle and to Sea-Tac station.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	<p>The balance of projects with ST3 is difficult to understand.</p> <p>There is no explanation as to "why" on the basis of population growth and traffic growth. I am dismayed that Ballard and West Seattle, both white and increasingly so, get so much love while East-West across 520 and I-90 get essentially nothing.</p> <p>Are we to become like San Francisco, where if you work for Big Tech (i.e., Microsoft) you get mass transit supplied by work, but otherwise you're stuck in a SOV or worse, trying to get a seat on an overcrowded, often delayed bus that isn't reliable enough to get to work on time?</p> <p>This is already the reality. I get that a lot of money is required; fine, I can afford it. But what I don't get is why these routings have been chosen, and why the capital intensive light rail is favored when RBT is faster to construct, is more appropriate to Puget Sound's hilly terrain, and has a lower TCO.</p> <p>And when the money goes to projects I'll never use -- I live off of 520 -- and with no rationale to why certain groups and areas benefit -- I have to say no.</p>
EAST KING COUNTY	<p>The S-curves in Renton need some attention and I believe none of the proposed plans other than a bus service really help with that continuous congestion. THIS IS ONE OF THE WORST SECTIONS IN THE ENTIRE METRO and is NOT under consideration for light rail service under the proposed plan. 405 south of 90 needs a lot of help. Now.</p>
EAST KING COUNTY	<p>light rail through Kirkland should be considered despite a small number of people pushing to prevent the cross Kirkland corridor from being used for mass transit</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	<p>The solutions you developed seem like poor fits to the problems. I think connections between Seattle and Everett, downtown and Ballard, north-south along the eastside are essential, and the timeline for these is crazy long. I also dislike the large amounts of parking, an indication that this isn't actually solving the problem it seeks to solve.</p> <p>I live in Kirkland and there's nothin' here for me. This plan moves people from other areas past Kirkland without good ways for me to access the transit. Have you ever tried walking from downtown Kirkland up to the freeway for the 85th exit? No one's going to do it, it sucks even on a bike -- and the car-oriented nature of the area makes it unpleasant -- there's not even a sidewalk all the way up Kirkland Way from downtown. I live in the Highlands neighborhood, but the closest bus stop is a mile walk, with one bus that services it -- I was really excited about the prospect of buses on the CKC, an easy walk from my house. Essentially, I want to get from Kirkland to downtown Seattle and from Kirkland to the airport -- and this proposal makes neither of those destinations better for me on transit. It takes an hour and a half to take bus and light rail from my house to the airport -- I've done it and I'm over the hassle, it barely saves any money for a weekend trip. Why isn't there anything across 520? A future investment plan...what, so in thirty years you can develop another thirty year plan to maybe connect my neighborhood with UW? I'll probably be dead by that point.</p>
EAST KING COUNTY	PLEASE GIVE OPTIONS FOR THE 405 CORRIDOR AS SOON AS HUMANLY POSSIBLE!!
EAST KING COUNTY	There needs to be better connectivity from Newcastle to downtown Seattle and Bellevue. At the very least a bus station with park and ride facility should be added in Newcastle as part of the I-405 BRT plan.
EAST KING COUNTY	Please consider adding light rail to Kirkland as well. I know several Kirkland residents were very vocal about not wanting light rail on the CKC, but they do not speak for all of us, and we need light rail service in Kirkland too!!!
EAST KING COUNTY	Build more freeway lanes. Stop investing huge dollars, almost always going over budget on pipe dreams of mass transit usage.
EAST KING COUNTY	I'm very unhappy that Kirkland has been bypassed in the light rail planning. There are major new projects under development here, and focusing on I-405 BRT will not be adequate to address the growing need. An alternative to I-405, which is now and will always be a disaster is desperately needed.
EAST KING COUNTY	Rail or bus-not-in-traffic across 520 between Seattle + U-district and Redmond + Kirkland.
EAST KING COUNTY	I think that the transit system in seattle is very good. I think more focus should be included in connecting other cities like issaquah to Everett or marysville to Lynnwood or issaquah so that people can start to use transit daily to go everywhere quickly instead of taking transfers and waiting traffic. Please please please make it easier to get from everett to issaquah and both easier!!!!!! Do NOT build any more tolls!!!
EAST KING COUNTY	full P&R's discourage people from using transit. Increase P&R capacity and/or prevent non-transit people from using P&R's (for example eastgate P&R is filled up with Bellevue college students)
EAST KING COUNTY	Add light rail or commuter station for Renton to Seattle. Bus is not reliable when they do not have exclusive lanes especially at the I-90/I-405 interchange.
EAST KING COUNTY	167 and 405 is much worse traffic than the proposed light rail routes and already has a rail corridor.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	<p>While working on building light rail lines, improve express bus service first. Bus service is less expensive and more flexible than light rail and should play a major role in moving people around our region.</p> <p>Additionally, City of Sammamish residents have gotten almost nothing from the Sound Transit plans yet most homeowners in Sammamish live within the ST taxing district and pay more in ST taxes than many others. Something simple like having direct bus service from the Bear Creek Park and Ride to UW and downtown Seattle would go a long way in appeasing us. Why must all 545 buses go from Bear Creek to Redmond before getting onto 520, thus adding at least 20 minutes to the commute in each direction. Why not have the buses go from Redmond to Bear Creek and then get directly onto 520? Apply the same idea to the reverse commute.</p>
EAST KING COUNTY	<p>Why are you not proposing light rail for I-405, which is one of the most crowded highways of the country! At least bus rapid transit could be implemented more rapidly. If you're not putting in light rail there, can you also double deck I-405 with earthquake proof construction? Please also add a parking garage to the Canyon Park park and ride.</p>
EAST KING COUNTY	<p>Kirkland light rail and 520 bridge light rail need to be added. Plus assessing home owners more property tax is in acceptable.</p>
EAST KING COUNTY	<p>Add parking to all congested/highly used park and rides that Sound Transit services.</p>
EAST KING COUNTY	<p>Sammamish is totally left out. Present bus service to Sammamish is unacceptable.</p>
EAST KING COUNTY	<p>Provide restrooms at all stations in case I [explicit] my pants again.</p>
EAST KING COUNTY	<p>It's interesting that Sound Transit expects Kirkland residents to support a plan that does not support Kirkland residents. Bus Rapid Transit on the Cross Kirkland Corridor (an exclusive right-of-way by the way) provides more opportunities for connections to residents than your proposed express bus on shared HOT lanes. Don't mistake the noise of green shirts as the actual opinion of Kirkland residents. Their arguments are biased toward selfish desires for a personal park system filled with weeds. If Sound Transit expects Kirkland residents to support this plan, then we need to see more reasonable projects on the plan that provide more opportunities for our future generations. By the time this system is fully built, most of us will be retired or dead, let's not mistake who this plan actually benefits. Just so it's clear what is being suggested I'll reiterate my suggestion. Please re-establish Bus Rapid Transit on the Cross Kirkland Corridor on the ST3 Plan. The thousands of votes of bus riders has more weight than that of a few dozen green shirts.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	The major bus rapid transit projects should be largely converted to light rail projects especially on the 145th Street to Woodinville and the Bothell to Everett routes. The Sounder commuter rail service needs to be expanded to Olympia and Centralia and Orting to the south and to Mount Vernon and to Monroe and eastward to as far as Leavenworth to the east over the Stevens Pass and to Cle Elum to the east over the Stampede Pass route. Several more counties will need to be added to the Sound Transit system network. The light rail prosal to Ballard from downtown Seattle needs to be extended to the north to connect to the Shoreline route. It is also necessary to obtain some kind of outside non-conventional financing because the present timelines live within the present budget constraints. However, the proposed project implementation schedules do not adequately meet the increasingly crisis traffic conditions in the Puget Sound area which are leading to the growing problem of increasingly astronomical increases in housing prices in Seattle and increasingly throughout the area. Thank you
EAST KING COUNTY	You need to get light rail into Renton. There are no plans at all for Renton other than bus service. If your not going to bring light rail to Renton at least build a parking garage at the international station in tukwila!
EAST KING COUNTY	This current ST3 Draft Plan is deficient because it provides for no North-South light rail corridor on the East Side. This is a complete failure of imagination and planning. I can't understand how anyone could possible create a long-range light rail plan for Seattle and not include a North-South light rail corridor on the East side from Renton to Bothell, at the very least. Can you imagine the New York City Subway station that doesn't have subway service on the East Side of Manhattan. It's inconceivable! I don't buy the argument that the north-south Rapid Ride Bus routes along the I-405 corridor will fill this need. That's wishful thinking and incredibly short-sighted. As much as I support long-range planning for light-rail and mass-transit in Seattle, I don't see how I could possible support any plan, or be inclined to support any tax funding for a project that does not include the North-South Light Rail corridor on the east side. How in heaven's name was that omitted from this plan. Just a terrible, terrible shortcoming, and the planners who have put this plan forward should be ashamed.
EAST KING COUNTY	I'm seriously considering voting against this proposal as it give nothing to the NE King County area. Specifically Bothell is once again left out of any substantive improvements and stuck on Highway 522. I pay considerable taxes to Sound Transit right now and get nothing but crowded buses going down 522, don't see that that will change with this proposal. I don't mind paying more in taxes but I want to get something for it. It seems like all my tax money is going to Seattle, and South or North not where I live.
EAST KING COUNTY	More parking at current transit centers (Lynnwood)
EAST KING COUNTY	A light rail along the I-405 corridor-- traffic is an absolute nightmare, and the tolls for carpool can get really steep. As housing prices increase, more people will look to move to Renton/Bothell/Mill Creek, and traffic will get worse.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	<p>1) Re-purpose I-405 toll lanes to be Light Rail (preferred) or BRT service (2nd best)</p> <p>2) Vastly improve regional bus service Eastside / South Snohomish County intended to eliminate the need for P&amp;R.</p> <p>3) Vastly increase parking at highly utilized P&amp;R lots full by 8AM or earlier (Multi-level garage parking)</p> <p>4) Cut timelines for bringing BRT service on-line by 1/3 or 1/2. 8 Years out is ridiculous! (Coordinate BRT with existing tolling lanes to make this happen)</p> <p>5) I will be retired/dead in 30 years. Projects that far out help the future of the region, but do not solve my commute pain today.</p>
EAST KING COUNTY	<p>With all the additional traffic through Kenmore on Juanita Dr and 522, due to 520 tolls, more needs to be done to relieve this congestion. This congestion has had a HUGE effect on my ability to leave my home or get back to my home . Why not have light rail through this corridor?</p>
EAST KING COUNTY	<p>Kirkland is essentially left completely out of the ST3 picture, with the exception of a bus stop too far away from the downtown area. This is unacceptable. While I support the idea of large scale expansion of mass transit, it will be a tough sell to get my vote when a city in such close proximity to Seattle is bypassed for all transit opportunities for the next 25 years.</p>
EAST KING COUNTY	<p>Grow existing Bus park and ride lots to accommodate more parking. Mass transit is worthless if you can't park to take bus or rail. When living in remote parts of County, you drive to closest Bus or Rail. When you arrive, lot is full often by 7:15 am. Additional parking should be a priority. Also consider adding drop off points. Current Transit Centers (aka Redmond, Bellevue) do not have any drop off points. Bear Creek Park and Ride is same situation. No place to drop off a rider especially when no parking is available.</p>
EAST KING COUNTY	<p>The whole process needs to be sped up, do it all in 10 years</p>
EAST KING COUNTY	<p>PLEASE Add Lightrail from the Eastside (Redmond) over the new 520 bridge to Montlake Lightrail station.</p> <p>Please add add more long distance busses and frequency: e.g. the 545 is ending at Redmond BearCreek, lots of people are coming from NE Novelty Hill Rd. - the whole road is mostly blocked.</p> <p>Please build a Lightrail ring around Lake Washington.</p> <p>Please plan ahead that the amount of people in the next 10 years are double.</p>
EAST KING COUNTY	<p>Increase light rail frequency from 10 minutes to 5 minutes</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	<p>The most important value of transit is its contribution to reducing carbon dioxide emissions. That goal should be kept in mind in all aspects of planning. In that respect, consider the following points.</p> <p>1) Recognizing that suburban sprawl is inevitable, do what you can to discourage it.</p> <p>1a) Projects that make urban life more attractive are the best, so prioritize Ballard and West Seattle.</p> <p>1b) At suburban stations, do what you can to encourage walking or biking to the station rather than building homes even further out and driving to the station. Eg limited or expensive parking, bike sharing.</p> <p>1c) Work with local planners to encourage high density housing in station neighborhoods.</p> <p>2) Prepare for and encourage electric cars.</p> <p>2a) Every parking space should have 110V outlet – an inexpensive way to allow a commuter to recharge while at work.</p> <p>2b) Reserve many or most of the spaces for EVs.</p> <p>2c) Discount EV parking.</p>
EAST KING COUNTY	<p>Conversion of the cross-Kirkland corridor for mass transit uses, such as BRT or light rail.</p>
EAST KING COUNTY	<p>I feel that Issaquah residents need reliable light rail transportation to/from where they need to be going daily. I also support the other projects for the near future.</p>
EAST KING COUNTY	<p>There is still a distinct lack of support for East/West movement. It shouldn't take 3 buses to get from Kenmore to across I-5 from Northgate. Please consider that folks aren't just trying to move from North to South and vice versa.</p>
EAST KING COUNTY	<p>Until the rail line between Renton, Bellevue, Redmond etc is used for commuter rail I will strongly oppose any new taxes. This rail line exists and would be the fastest way to provide alternative commuter service along the 405 corridor at least between Renton and Redmond. Also creation of parking at the rail stations is needed. Currently when we try to use the available parking in Renton to take the bus to Seattle it is full after about 7:30 AM and so when we need to go down at 9 AM there is no place to park. Taking 8 years to provide a shoulder lane on 405 is a joke. This plan totally ignores anyone east of 405 that works in Seattle, Bellevue, Redmond and Kirkland, particularly those that live towards Maple Valley where major subdivisions exist and are planned. If any of the "planners" looked at a rail map of Puget Sound from the 1950s, all the rail lines would make ideal commuter rail but now many have been or are being considered for bike trails. For example I drive to Maple Valley all the time and the most bikes I have seen including the weekend on the old rail line bike trail is 6. It is a waste of right of way and the population in Maple Valley and Black Diamond is growing rapidly.</p> <p>Until the old rail lines get used for mass transit in the form of commuter services I will strongly oppose and lobby against any plan that does not address SE King County workers commuter needs.</p>
EAST KING COUNTY	<p>The light rail option along the I-405 from Bellevue to Lynnwood should be included as there is little room to expand bus service when all the lanes are at a stop and the highway has reached capacity. Short sighted to not include this critical piece of infrastructure especially since the rail corridor is there and the longer it is not used for transportation, the more difficult it will be to overcome objections of voters to no longer have their walking/bicycling paths.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	Express Bus Service should be added which connects north Kirkland (Brickyard) to downtown Seattle. Right now the only option is the 255 bus route, which crawls through downtown Kirkland. Can ST3 include an express route which hits Freeway park and rides, then crosses the 522 (or 90) and connects to the Westlake Tunnel?
EAST KING COUNTY	Unless you add light rail along I405 from Renton to Lynnwood, along ALL of 520 and along I90 from Seattle to Issaquah, I won't vote for it.
EAST KING COUNTY	ADDITIONAL PARKING AT EXISTING PARK AND RIDES!
EAST KING COUNTY	There are many great improvements in the plan, but it's hard to support a plan that doesn't include light rail to Kirkland and the 405 corridor. While express bus additions would be great, I don't foresee them as a long term solution. And therefore, increased buses, yes, but a huge investment in special lanes is not the answer. With the exception of a carpool to carpool lane interchanges at 405-520. The cross Kirkland corridor should absolutely not have buses. Lightrail would be acceptable.
EAST KING COUNTY	Light rail serving Renton!
EAST KING COUNTY	There is still limited daily, commuter friendly bus service in my neighborhood. I live in North Rose Hill Kirkland.
EAST KING COUNTY	Kirkland should be added to the light rail plan on the Cross- Kirkland trail.
EAST KING COUNTY	Put Light Rail across Lake Washington on SR 520. That is the biggest glaring omission in your planning, yet it could provide some of the biggest benefit.
EAST KING COUNTY	The right-of-way for light rail already exists on the Renton to Redmond corridor. Not taking advantage of it immediately is foolish and will only make it harder to do in the future.
EAST KING COUNTY	Please add parking to existing light rail stations, it's a nightmare
EAST KING COUNTY	to hell with all the projects except Issaquah to seattle.
EAST KING COUNTY	More light rail to even more destinations. Snag some existing but unused rail lines. Like Woodinville to Snohomish. You've got people find some more.
EAST KING COUNTY	The Cross Kirkland Corridor needs transit in ST3, be it bus or rail. We'll kick ourselves for decades if we don't put it in the plan now.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	<p>As a downtown Kirkland resident, I have to say I'm disappointed by the lack of projects serving Kirkland. I'm sure you've heard a lot of this feedback before, so I'll summarize my points.</p> <ul style="list-style-type: none"> <li>- The "Save our trail" group does not speak for all of Kirkland. I am a strong supported of expanded transit in the city, and I know many more people who are as well. There are always NIMBYs for any project proposal. Please don't let them set the narrative for Kirkland.</li> <li>- I don't think the I-405 BRT stop is very useful for the city. It's simply too far and inconvenient from where people live and work, and forcing an extra transfer from local buses makes it a really hard sell.</li> <li>- I don't get the benefit of light rail to South Kirkland Park &amp; Ride only as part of ST3. SPKR would be a useful stop for a full light rail/BRT line from Bellevue through Kirkland and Totem Lake, but just the segment from Bellevue to SPKR is not particularly useful. From SKPR, you wouldn't take light rail to Bellevue to transfer to another train to Seattle vs just taking the 255 directly. SKPR is not near the large residential and business areas, and people coming from further North wouldn't take a bus to SKPR just to transfer to a train to Bellevue. I'd support rail from Bellevue to SKPR as part of a bigger line, but not just to SKPR.</li> <li>- I do strongly believe that Kirkland needs better transit for the future. Between development in downtown Kirkland and Totem Lake (and Google's new campus), many people move around in the area, and having car-light options to do that will be super important, especially in the future.</li> <li>- I don't get the priority of Issaquah over Kirkland for ST3. I'm really hoping that the influence of "Save our trail" wasn't big enough to materially impact that decision.</li> <li>- Kirkland needs great regional connections - getting from the city to Redmond, Bellevue, and Seattle. I'm hopeful that Metro's Long Range Plan prioritizes better service in those corridors, making is easier to get around without a car, and I'm also hopeful that some changes can be made to the ST3 plan to help Kirkland.</li> <li>- I'm hopeful that BRT on the CKC will make for a great project. I'd support light rail too, but I worry about the connection from the corridor to downtown Kirkland, which would be hard/expensive for light rail, and relatively easy for BRT. I think having one stop at 68th St/Google is too far from Downtown Kirkland, so connecting that system to the Downtown Kirkland transit center seems key.</li> <li>- One other random comment: I would also appreciate more frequent ST540 service from Kirkland to UW, especially in the afternoon. I work in Downtown Seattle, and have been alternating between Metro 255 and ST540 -&gt; ULink recently (540 &amp; ULink avoid I-5 traffic and makes my trip more reliable). However, timing the connection becomes difficult with 20-minute headways on 540, especially in the afternoon leaving downtown. With more frequent headways, I'd take that route on Link via UW a lot more often.</li> </ul>
EAST KING COUNTY	<p>I live in Kirkland a block from the Cross Kirkland Corridor and the Save Our Trails folks do NOT speak for me. I want to see good transit options explored for the Cross Kirkland Corridor - bus, rail, study, etc. Everyone knows the trail was a working rail line not that long ago, and that the existing trail is an interim use. Don't let a vocal minority block a needed resource for Kirkland and neighboring cities.</p>
EAST KING COUNTY	<p>More negotiation with Kirkland and activists groups about using The Cross Kirkland Corridor.</p> <p>More reliance on automotive/transit/gas taxes for funding and less on property taxes.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	We need some service to suburbs (Renton Highlands, Fairwood, Maple Valley) or additional parking. Everything is centered around the people who already get great bus service or "milk routes". I love supporting transit, but be inclusive or lose my vote.
EAST KING COUNTY	Any length you want to go past Redmond's station is strongly supported by me. Currently traffic from downtown Redmond to Woodinville on a weeknight can take an hour, continuation of the Light Rail through Redmond's downtown valley into Woodinville's shopping and Winery corridor would be amazing.
EAST KING COUNTY	Seattle needs this, Bellevue needs this, Everett needs this, Washington needs this. My only fear is that these projects will take too long and our population outgrows what we currently have/what we will build.
EAST KING COUNTY	Rename "University Street" station to something else that won't be confused with "University of Washington" station. Perhaps "Concert Hall" station? I helped a young man yesterday who asked me at the "University Street" station, "Where is the University of Washington"? He had gotten off the train at "University Street" looking for the University of Washington. For new light rail customers, having 2 stations named "University" is very confusing. It does not need to be that way. It will only become more confusing as more and more new customers start using Link Light Rail. This is simply a name change. In the 50+ billion dollars allocated for ST3, it would seem there would be the funds to finally take care of this naming oversight (2 stations named "University"). As some background, the University of Washington used to be located in downtown Seattle, on University Street. The University of Washington moved to Montlake in 1895. Please budget this change in ST3 and fix this naming confusion once and for all, for everyone's sake. Thanks.
EAST KING COUNTY	As a Kirkland resident I'm quite disappointed with the lack connections. My understanding is that getting to downtown will only get more difficult under this plan as the local busses will no longer be a one seat ride to Seattle and will have to transfer on the rail. The fact that Redmond and Issaquah gain rail options and Kirkland does not is extremely unfortunate. I'd love to be able to use transit to get to downtown Seattle, but realistically, from Kirkland, the options are fairly poor.
EAST KING COUNTY	make the highways wider, that should be top priority, buses are lowest priority.
EAST KING COUNTY	Increasing late night frequency on the 522 route from downtown to Bothell would enable customers to attend late evening events downtown and still have the every half-hour ST 522 bus available. Currently the route goes leaves downtown Seattle every hour beginning at 9:30 PM. Even a bus a 10 PM would help. Thanks  1
EAST KING COUNTY	Kirkland badly needs transit on the CKC. Please ignore our bus-addled city council and return trains on the CKC as part of the regional rail network. The citizens of Kirkland will thank you. Maybe not now, for many of them, but they'll eventually realize how immature our council is acting and recognize the social and financial urgency of being part of the rail network.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	The BRT service to Renton does not include enough stops in Renton and does not sound like it will be close to equivalent to rail service. For BRT to work there must be a major commitment to stations, lanes, and equipment, and this does not seem adequately funded by this plan. As a result, it feels like Renton is being passed over.
EAST KING COUNTY	Kirkland BRT via ERC is a great project that needs to be included in ST3. It best serves the need for Kirkland and Eastside with the dedicated transitway which will provide fast trips to Bellevue and Seattle via 520.
EAST KING COUNTY	I would like to see light rail plans extend to include northern cities on the East side such as Woodinville.
EAST KING COUNTY	Light rail across 520 bridge connecting Seattle, Kirkland and Bellevue.
EAST KING COUNTY	<p>Improved transit is essential to the long-term growth and development of the region, and it is because I believe so strongly in our need for better transit that it pains me deeply to be so opposed to ST3 in its current form. I support many of the modifications promoted by Seattle Subway and SeattleTransitBlog.com, and *especially* staying true to the principles that grade separation in urban areas is critical, and that regional infrastructure should be funded regionally. Only with grade-separated solutions that serve not only our high-density urban cores, but also provide lower-density residential neighborhoods with compelling, realistic alternatives to filling our highways and streets with cars can we truly address the long-term needs of our region.</p> <p>For those reasons, it is especially as a Kirkland resident that I am so deeply opposed to ST3 in its current form. It's sad and unfortunate that our Kirkland City Council has allowed the Save Our Trail organizers to dominate the conversation in Kirkland, but Sound Transit needs to understand that the vocal interests along the trail nonetheless do not speak for everyone in Kirkland. As nice as the trail may be, the Sound Transit easement along the Eastside Rail Corridor is an essential part of meeting the long-term needs of Kirkland, and we cannot under-serve the growing residential and commercial neighborhoods in Kirkland with a plan that placates a small number of homeowners by virtually ignoring Kirkland's transit needs through 2040 and beyond.</p> <p>As much as the Kirkland City Council may wish to promote Totem Lake as the city's key area of future growth, it is Kirkland's established and vibrant downtown core that sorely needs transit investment. Between Google's expansion, the Kirkland Urban project, lots of new mid-rise development, and promoting access to the regional gem that is Kirkland's waterfront, it is criminal to ignore the growing transit needs at and around Kirkland Transit Center. Over 90% of people living in Kirkland work elsewhere, and over 90% of people working in Kirkland live elsewhere, and Kirkland's transit infrastructure cannot possibly meet the needs of its residents and businesses without further investment. Rush-hour traffic is already miserable and worsening on Kirkland's smaller streets (relative to car-centric Bellevue). Calling BRT on I-405 an effective solution is preposterous, when neither Sound Transit nor King County Metro have any realistic ideas for how to make an I-405/85th St. BRT station (up a giant hill from downtown, and in the middle of a clover-leaf of on-ramps) accessible to our community.</p> <p>As evidenced by ridership on the Metro 255 bus, Kirkland's greatest need is a strong connection to Seattle and the north-south rail spine, yet that bus will get pushed out of the downtown tunnel as light rail improves. As a non-express bus, the 255 already plods slowly through South Kirkland residential neighborhoods, and yet the solution on the table to serve downtown Kirkland is three-seat</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	We need light rail from renton to bellevue. Right of way already there. Hard for me to support existing plan without this in it.
EAST KING COUNTY	Light rail would be the absolute best for me if there were a loop created by joining the Redmond and Issaquah stations via Sammamish.
EAST KING COUNTY	Transit is very dysfunctional in Renton Highlands to Bellevue, Seattle and other areas. I'm extremely disappointed by the amount of money that Renton tax payers put into this fund to see very little in return. I have to drive my car to be able to get anywhere within a reasonable time. The bus route for me to go from Renton To Bellevue Eastgate to get to work still requires me to drive or bike or walk a significant distance, take 2 to 3 buses and over an hour and a half to go 9.3 miles. Do you know how many people drive between Bellevue and Renton? Why is Renton so underserved?
EAST KING COUNTY	Get rid of cement plant in kenmore.
EAST KING COUNTY	Higher priority should be given to light rail along I-405. I-405 traffic is horrific and light rail would offer real alternatives that buses cannot. Additionally, higher priority should be given to West Seattle to Ballard and Seattle to Everett Lines. New stations should be the lowest priority along existing lines. Sounder service should be converted to light rail along the corridors it serves or greatly extended in terms of service. Sounder service needs to reach Olympia or beyond. Future thinking should consider connecting Portland, Seattle, and Vancouver in a regional commuter rail corridor.
EAST KING COUNTY	Considering the cost of living in the greater Seattle area, a rapid transit system must go further out, for example to North Bend and Snoqualmie and every effort must be made to do this in a more timely fashion. Make decisions based on present needs. Let these decisions be well-researched (how have similar areas done it/with what success) and DO WHAT NEEDS TO BE DONE without consulting everyone who could possibly not like it . YOU are the experts, not the man on the street. Do patients dictate to doctors when and how and where to perform a necessary operation??
EAST KING COUNTY	Transit options for south east King County need to be added. I support transit improvements, but this plan almost completely ignores Renton, Kent, and Auburn with very little justification. Please consider adding additional options.
EAST KING COUNTY	Parking, parking, parking. The P&Rs are always full very early. When I was commuting from Renton (Fairview) to Kirkland (no more, thankfully) the main thing that prevented me from using the bus was that I had no place to park to catch the bus.
EAST KING COUNTY	Project is important, but without LIGHT RAIL from Renton to Seattle, I will not vote for it.
EAST KING COUNTY	We are fortunate to have the economic impact of technology in our area. We need a rapid transit corridor across Lake Washington between our two high-tech centers, Overlake/Redmond and South Lake Union so high-tech employees can move easily between these locations. Light rail from Overlake to SLU should be running back and forth all day long.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	Mass transit plans for the city of Renton seems to be minimal, nearly nothing. With the increasing population of East Renton Highlands, more and more transit options and parking will need to be available for these commuters and no where on the ST3 plans do I see a Light Rail stop for the Renton residents. I find it difficult to support this initiative if there is no upside for myself. The ST3 plan leave us with the same crummy options we presently have.
EAST KING COUNTY	We more parking at Lynnwood P&R We need subway/rail to Bothell and Millcreek  Property/Sales taxes are not a good way to fund transit. Car tab is a better way.  Also need business taxes on larger business
EAST KING COUNTY	I would like to see light rail in Renton area. This would help with 405 traffic
EAST KING COUNTY	I live in Renton and I think it is extremely important to add Renton to the light rail plan! I-405 is a mess and very hard to travel most of the day. We need light rail as much as everyone else and we are not even on the plan! Put it along the freeway Please!!!
EAST KING COUNTY	Renton is totally left out. BRT is a joke & a "bone thrown to satisfy Renton voters to vote yes." The proposed new transit center at Rainer & Grady is a joke, proposed by the lame duck mayor to get crime out of downtown Renton for his bestfriend(s) that own much of the real estate in the area. The current "Metro" garage is mostly empty, Metro buys less space than the demand, and SOUND TRANSIT PAY NOTHING altho their passengers are high users. I will be actively campaigning against ST3.
EAST KING COUNTY	Top priority is add additional parking at sounder Tukwila station. I still cannot believe a parking garage wasn't built when the new parking lot was built a couple years ago. Negotiate a deal with Boeing to allow commuters to park on their property again.
EAST KING COUNTY	increased transport between Kenmore/Bothell to both N. Seattle areas (Ballard) and to downtown. More parking at the stations-- especially the outlying ones. If it is not convenient to get to the stations and find parking, the public won't use them but will drive instead. My daughter-in-law is a student at UW Seattle and often has trouble finding parking at the Kenmore Park and Ride.
EAST KING COUNTY	Link light rail station added to Kenmore.
EAST KING COUNTY	I do not see Kirkland included in this plan. Kirkland morning & evening commute is ridiculous & I "strongly support" adding an extension to Kirkland as you have to other Eastside areas. It is unconscionable to leave Kirkland out of the ST3 plan. It is also doubtful, as much as I support rapid transit, & prefer light rail, that I will vote for an ST3 plan that does "not" include Kirkland

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - East King County

EAST KING COUNTY	Add light rail to Kirkland and Renton. Don't go to Issaquah or Paine Field to reduce cost and allow other projects to happen faster. Won't vote for this currently as it is too big, cost too much and is too slow to serve people in need. Use more buses and dedicated bus shoulders.
EAST KING COUNTY	I live in Kirkland and there's no bus service from my area to a transit center that is convenient enough for me to consider. I have to walk a mile+ to get to the bus, then it stops 100 times. I don't have time for that. I do have time to drive to a park & ride. Brickyard or Kingsgate/Totem Lake are convenient for me. But, there's not enough parking. So, if you increase the buses on the I-405 corridor, you also need to improve access to the buses by increasing the amount of parking at the stops.  Basically, none of these projects helps me on a daily basis, but our region needs them. Go, Sound Transit!! :)

<p>EAST KING COUNTY</p>	<p>The City of Sammamish has not incorporated Klahanie as part of Sammamish. This adds another 12000 and projected 15000 people to Sammamish. The only bus route that went through Klahanie connecting Issaquah and Sammamish was the 927. It was cancelled in the big cuts leaving those of us without cars stranded in Klahanie. There is a low income apartment complex called Highland Gardens across from the Klahanie Plaza. The 927 used to stop there. Now nothing! My suggestion was to reroute the 269 at least twice a week to go through Klahanie on Klahanie Blvd, stopping at least on Klahanie Dr. SE. The timing for this is now excellent as gas has come way down and the City of Sammamish is now widening the Issaquah - Fall City Road to 4 lanes.</p> <p>The incremental cost of the 269 going through Klahanie is negligible considering the fact that there is no public bus stop for a mile from the Klahanie Plaza. There are steep hills for this mile or more to a 269 bus stop. Old people cannot make it. Ideally the 269 should also go to downtown Issaquah via Highlands Ave. and then up Sunset and turn right onto Front Street and continue it's regular route.</p> <p>I talked with Metro planners over a year ago and was told it looked feasible, but then after agreeing to sot it out I was told they decided to do no work on the feasibility. They left us stranded without an analysis. I implore Metro to address and correct this situation. We need bus transportation through Klahanie. Both the Cities of Issaquah and Sammamish dearly want a bus service as well. 228th will suffer from traffic congestion and already is and will will get a lot worse. Using Klahanie Blvd as an expanded route makes so much sense it is hard to argue against. The 927 route was a poorly laid out gravy train of a route that took riders forever to get to downtown Issaquah or the Fred Myers. Of course it was a poor route as it was poorly designed.</p> <p>Please get us a bus service through Klahanie. The poor people need to get back and forth to the food bank! The 269 does not go to downtown Issaquah, however, but at least getting up and down the plateau from Klahanie would help. You need to keep in mind that from Klahanie to Issaquah and Sammamish there are the steepest and longest hills in the whole of King County. HELP!!!!!!!!!!!!!!!!!!!!!! My hips hurt.</p>
<p>EAST KING COUNTY</p>	<p>Light rail from the Eastside, Bellevue or Kirkland to Tacoma via hwy 405 and 167 and 512. Light rail MUST be added to 167.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - South King County

Subarea	Additional Feedback - Project(s) should be added in the ST3 final plan
SOUTH KING COUNTY	Ballard to UW should be added and Ballard to Downtown should be completely grade separate.
SOUTH KING COUNTY	I had seen before a plan to include Burien/White Center on light rail, not BRT. Please consider this again. Burien is growing and access to downtown is fairly limited considering the 1st Ave Bridge and I-5 always being backed up during rush hour.
SOUTH KING COUNTY	Easy transportation from King Street Station to South Lake Union. Currently you need to take a bus to Westlake and then the trolley to SLU.
SOUTH KING COUNTY	Parking at transit stations especially in the South end HAS to improve and soon! Why aren't we utilizing half empty park and rides by creating shuttles to and from train stations?
SOUTH KING COUNTY	You have to make transportation within downtown seattle better, more people would use sound transit if they could get to where they need to go once they reach the city. I commuted on the light rail from seatac to downtown for many years, but it's just become too time consuming and aggravating getting from downtown to south lake union.
SOUTH KING COUNTY	More service should be added between Kent and Redmond as well as options later in the nighttime hours.
SOUTH KING COUNTY	There is very little in the plan to directly benefit residents of the East Hill in Kent. Our transit availability is almost non-existent and this doesn't help.
SOUTH KING COUNTY	<p>Please increase access from rest of south end (especially Burien &amp; Des Moines - areas west of the airport) into Seattle. Additional Rail line would be idea - could run all the way up first/ambaum/delridge and become the W Sea line into the city.</p> <p>PARKING - ST seems to have a vision of people walking and biking to various light rail stations, but the culture that exists here is people like to drive to their neighborhood park and ride and commute into the city. But there are not nearly enough places to park to accommodate the need.</p> <p>If the goal is really to get people off the road and on transit, people need to see it as more efficient and cost savings. Despite traffic, it is still almost twice as fast for me to drive to work as it is to take transit. That inefficiency makes it hard to take transit sometimes. Light rail is nice, but so slow. If we want to compare ourselves to big cities like commercials have been doing (DC, NYC, CHI) the big difference is their commuter systems all work to quickly get lots of people in, out, and around the city. Ours appear designed to leisurely get people from one neighborhood to the next.</p>
SOUTH KING COUNTY	Park and rides.
SOUTH KING COUNTY	Parking for lite rail is critical. All along the route. I end up paying for parking at SeaTac when I use lite rail. I understand the problem (lot would be consumed by airplane travelers), but somehow it needs to be easier for those of us who take the lite rail. I can't park at the Tukwila station either, since it's packed early in the day. Maybe parking lots could be remote and then "mini shuttles" to the "major systems hubs" (like lite rail, Sounder, etc.)? I don't have a great answer. I do agree that we need to do make this transportation system available and accessible. And we can't wait "until we really need it". It's infrastructure and it takes time to make it happen. Thank you!!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - South King County

SOUTH KING COUNTY	Renton and Burien should have light rail stations. First Hill and Belltown should have light rail stations. UW to Ballard should have a light rail station. Better funding package should be added to get studies and construction started and completed sooner. Sounder should connect riders to light rail at or near airport station
SOUTH KING COUNTY	You NEED to add a Renton or Kent link light rail stop.
SOUTH KING COUNTY	Why no sounder connection at Boeing Access Road? Is there going to be a Sounder night train so South sounders can take the train to Mariners games on week nights or other Seattle nighttime events. Why does everything take so long to build? Shouldn't the priority be with the routes that would move the most people like Ballard and West Seattle
SOUTH KING COUNTY	I wish that routine (every 30 minutes?) bus service to/from Orting was in the final plan. This would greatly help alleviate traffic.
SOUTH KING COUNTY	West Seattle Light Rail should at least extend to White Center, if not Burien.
SOUTH KING COUNTY	Lightrail to Kent. While this may seem out of left field I believe the region most likely to expand with housing and business is Kent. Bigger businesses will move out of town given the bottlenecks tech is bringing. A lot of people in tech are having kids and buying houses. There is a grater overturning south than north or east at this point. Let's either add light rail to Kent or for heavens sakes expand the hours of operation for the sounder. Right now I'm forced to head home right after work. Downtown is losing the opportunity for me to eat dinner, go shopping, etc on a weekday night and instead I need to run to catch the last train to Kent. We're better than this.
SOUTH KING COUNTY	Lose the billion dollars in parking and add the line from ballard to uw, preferably earliest in the timeline.
SOUTH KING COUNTY	None of your plans reach into my community! I live in Covington - southeast King county. It's like Covington and Maple Valley don't exist. Housing here is growing exponentially. Where is our transit??? Despite that I fully support the plans you have - I would just like to be included in them.
SOUTH KING COUNTY	Expand the Sounder Commuter Rail to operate outside of commuting hours and to operate on weekends. Taking the Sounder train to/from Seattle during the weekend would be a huge benefit to many of us living outside of Seattle. Also, running trains before and after commuting hours would allow more people to access these services (like all of the construction workers that start their workday in Seattle at 6am, who currently drive in from South King Co.). It would also allow people to stay in Seattle for dinner or a movie, then catch an evening train back home.
SOUTH KING COUNTY	I really wish you would consider more transit options for Burien. My express bus to downtown Seattle is packed every morning. There is opportunities for denser development in Burien/White Center and based on the ST3 plan that area seems to get only minimal consideration for further transit options.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - South King County

SOUTH KING COUNTY	<p>East West lines from Ballard to UW should be included in the ST3 plan.</p> <p>Sounder service (heavy rail) should be augmented to an hourly rate throughout the day. Sounder parking garages in the suburbs need to be expanded - they currently fill up by 7am most days. No parking at the suburb stations = no riders on the later trails. Light rail should not be used as the spine from Tacoma to Everett - that is the purpose of heavy rail Sounder train. The trip from Everett to Tacoma on Light Rail in this proposal would take 3 hours! I can fly to LA quicker than that. Similar Sounder service, if available, would take 50 minutes.</p> <p>Finally - the entire timeline of this proposal is preposterous. 8 years to add bus lanes - lanes that people aren't interested in? 22 years for transit to Ballard?? This isn't even true grade separated transit, clearly the authors of this plan have not thought this through very well.</p> <p>Sound Transit has made a series of terrible compromises in ST3 and will find it very difficult to get collective voter support. The region desperately needs transit, but ST3 is not the answer.</p>
SOUTH KING COUNTY	<p>Please include service to Delridge and White Center. These communities are in great need of better service. You already [explicit] us by [explicit] up the old 120 route so now it take 15 minutes longer to get downtown and then by ending the Rapid Ride route at Westwood Village. And now you want to leave us just out of reach of the light rail too. Please stop [explicit] us over.</p> <p>I used to ride transit every day. I had to stop when you added 15 minutes to the 120 route time to get downtown. If I drive, it takes 20 minutes to get downtown. It take more than twice that on the bus. All I want is light rail down delridge so I can get to work faster again.</p>
SOUTH KING COUNTY	<p>I would love to see a Link light rail expansion into Kent. The sounder does not run during the times that I want to use it.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - South King County

SOUTH KING COUNTY	<p>1. parking for buses. When will this be done and how will it be funded? Yes, population is growing. Yes the roads are crowded. But most people are still going to ride buses for public transit, not train. 2. bus lane capacity. can't tell what WSDOT is assumed to pay for, and what's a part of ST3, but for the 405 corridor, it seems like buses on shoulders is the key assumption. So how will that actually work when there's a car in the shoulder area? 3. the "last stop" seems to drive up the cost quite a bit. Stop on the south side of the Ballard bridge and save a lot of money by not having to build a drawbridge. Instead of building a bridge for West SEattle, instead build the BOeing Access Road station, the SODO transfer center, then run buses from a variety of locations to those places instead of to the junction. This gives more flexibility and gives us something better sooner, critical with way the viaduct is being replaced by less capacity. And also, the line from Kent Des Moines Road to points south seems like a complete waste. It will be too slow to go to SEattle, it will be too lightly populated to get a lot of riders unless SOund Transit is going to condemn a lot of single family homes, and it seems like the only rationale for the project is you need to spend a certain amount of money in order to maintain subarea equity. Do something that would actually help people, like running trains on the old Dinner train route.</p>
SOUTH KING COUNTY	<p>Stick to the plans and evaluate connecting the whole region along I-5 corridor. Olympia to Everett. Also make the hours of operation align with peoples lives and the hours they work and play. I could have used the train to go to Seattle for work but chose not to because it didn't allow me to do anything after work in the city Happy-Hour, shopping, gym work-out. ) Also, it took me just as long if not longer to ride light rail and the buss as it stopped every 10 seconds somewhere. I could have driven faster.</p>
SOUTH KING COUNTY	<p>There is a desperate need for more parking at Kent Station. I commute to Bellevue via ST route 566 or 567. My departure time is not set by when I want to go to work, but by when I have to get to Kent Station in order to get a parking space (it's usually filled up by 7:00 or 7:15 AM. Also, although I greatly appreciate bus service to Bellevue, I have a complaint about the busses arriving late at Kent Station. If Sound Transit is going to contract out to Pierce Transit, there should be a provision that any routes that start and end in King County, should have busses that are parked overnight in KING COUNTY, NOT LAKEWOOD! It is hard to explain to coworkers in Bellevue that I am very late to work due to an accident in Tacoma, when I live in Kent!! Also, how come Kent does not have any RapidRide options? Kent has the 4th largest population in the Puget Sound area, much larger than Renton, for example. When I work late, or attend a Mariners game, I have limited ways to get home, especially leaving Bellevue after 8:00 PM. My employer does provide free parking, but I prefer to "Go Green" and use mass transit. This may change, as using mass transit is becoming more challenging for me.</p>
SOUTH KING COUNTY	<p>I support a big plan. Timeline is way too long. I don't see dates on existing or new projects that are aggressive. I would like more urban routes that would fully use the capacity, rather than completing the spine in suburban areas. This would allow us to focus growth on those areas. I oppose a large part of the funding being car tabs, instead I would focus on other taxing options.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - South King County

SOUTH KING COUNTY	I really support expanding the coverage from West Seattle through White Center to Burien, waiting any longer on this will severely impact traffic on 1st Ave bridge and add further to the gridlock on the West Seattle bridge. Have a good one!
SOUTH KING COUNTY	Focus on king county as a whole. Better coverage in maple valley/covington rather than focusing on snohomish/pierce counties if they are not going to contribute.  Also, increase sounder train frequency, not just commuter hours.
SOUTH KING COUNTY	1. Light rail needs to be added from Tukwila out through Renton headed towards Covington. 2. light rail needs to be added along the 405 corridor between Tukwila and Bellevue ASAP. 3. One again you have completely ignored SE King County Remember who the original supporters were. If not we will not support you any more.
SOUTH KING COUNTY	Weekend sounder service would be really cool: much faster than light rail, tracks are already there...
SOUTH KING COUNTY	It would be nice to be able to get to downtown Seattle from Kent East Hill other than from 7-8:30 am and only on weekdays. Not sure if this is a consideration, but perhaps running a shuttle bus around the neighborhoods to the train stations every 30-45 minutes, and running the trains on weekends and more frequently during the week would serve well.
SOUTH KING COUNTY	The Sounder train services should run all day connecting the bus routes at stations.
SOUTH KING COUNTY	More parking at the south end rail stations
SOUTH KING COUNTY	Burien should be on the light rail after West Seattle, a fast bus that goes totally out of the way to downtown makes no sense and Burien urgently needs to be better connected!
SOUTH KING COUNTY	Please consider Light Rail into BurienTransit Center in the future.
SOUTH KING COUNTY	Rapid ride should serve the Growth Management designated urban center of Tukwila, WA as it transitions East.
SOUTH KING COUNTY	Parking garage at Tukwila Link station.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - South King County

SOUTH KING COUNTY	<p>Why is Federal way and the surrounding community being excluded, when considering project importance?</p> <p>Why is the South King County area being "thrown crumbs" as in rapid ride (which is becoming a rapidly long ride AGAIN)?</p> <p>Why did I vote for sound transit, with the PROMISE of train service in federal way when I am being told, "there is no more money" for South King County?</p> <p>OTHER:</p> <p>Why did every train station (with the exception of Tacoma) south of King Street station and north of Lakewood, DISMANTLED?</p> <p>Why were the train tracks also DISMANTLED?</p> <p>Why were the train tracks DIVERTED?</p> <p>Why are you spending BILLIONS, to place the SAME tracks within the SAME AREA?</p> <p>Why are you spending BILLIONS to build train stations AGAIN?</p> <p>Do you have a hatred for Amtrak?</p> <p>AND OTHER:</p> <p>Why waste MANY BILLION dollars (including cost overruns) on sound transit?</p> <p>Why not waste the BILLIONS on FREE higher education for the entire population in Washington state? Instead of creating "MAKE WORK" projects.</p>
SOUTH KING COUNTY	<p>It's unfortunate that most of West Seattle and all of White Center are left out of this plan. There is already fast and reliable bus service from the West Seattle Junction to Downtown Seattle. There is NOT fast and reliable bus service from White Center through Delridge to Downtown Seattle. In the current plan, it seems like the poor people who live in Delridge and White Center will have to exit the train at Delridge and take the bus home while the rich people who can afford to live in the Junction have a faster and easier commute home. This will further polarize the area's residents and decrease access to the rest of Puget Sound for lower-income residents of White Center and the Delridge neighborhoods.</p>
SOUTH KING COUNTY	<p>Extend rail to south east king county ... Covington, maple valley, black diamond and auburn.</p>
SOUTH KING COUNTY	<p>Extend Light Rail from Tukwila Interurban Station to Burien Transit Center. Otherwise there is NOTHING in the plan that benefits a retired individual living in Normandy Park.</p>
SOUTH KING COUNTY	<p>Light rail West Seattle to Burien</p>
SOUTH KING COUNTY	<p>I commute from Kent to Seattle, Monday through Friday. When I take the Sounder in to the city, I have to catch the streetcar now to get to Swedish. However the streetcar is very inefficient as it is in with regular traffic. I would like to see it get its own lane, I think that this would speed up the commute.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - South King County

SOUTH KING COUNTY	We really need a rail system that connects us from Everett to Seattle to Tacoma and Olympia... either the light rail or the sounder. Sounder also should be available more than Monday through Friday, there could be limited service on the weekends but there really should be service available. Also why is Burien being excluded from the light rail system, we should go all over this state using one or the other of our rail systems.
SOUTH KING COUNTY	I love the light rail, and I would like to see it extend all the way down to Vancouver, WA, or at the very least, to Olympia, WA.
SOUTH KING COUNTY	Rail lines already exist along I-405 from Renton to Bellevue. There is no room to expand bus right of way. WE MUST use these lines for either light Rail (Sounder) or convert to Link. Before I can support such an expensive and risky project.
SOUTH KING COUNTY	Servicing higher income neighborhoods such as West Seattle instead of lower income neighborhoods such as White Center is not good planning. Please consider adding White Center to the initial stages of development. Thank you.
SOUTH KING COUNTY	I would really like to see a Federal Way rail station added with the capabilities of going both North and South. In addition, the time frames for the future are so far out for me, I will almost be retired by then. I suppose they should have done it when they had the chance. Sound like good changes, I hope the ease of bicycle and pedestrian use will be an easy one.
SOUTH KING COUNTY	Light rail to SE King County (i.e. Auburn, Maple Valley, Covington, etc.).
SOUTH KING COUNTY	Ballard to university to make a rail circuit
SOUTH KING COUNTY	I live east of Kent and there is no way to easily get to light rail which runs west of I-5. A light rail link from the Maple Valley area through Kent to the planned or existing light rail line west of I-5 would make light rail more usable.
SOUTH KING COUNTY	Those of us in South East King county really need improvements to all our transportation options and I see none of that here, there isn't a single line that stretches from the obvious corridors out here to us. I strongly support Sound Transit but I have a very hard time voting that support and giving my money to a plan that shows zero consideration to cities like Black Diamond, Covington, and Maple Valley; these cities are expanding rapidly and our roads are already insufficient to meet the demand and the current options for using the bus to reach the main corridors and the likes of the Sounder or Link light rail are beyond pathetic. It would take almost 3.5 hours, each way, for me to use public transit to get to my job in Redmond - I find it hard to continue helping everyone along the I-5 and I-405 corridors with my tax money when I'm seeing no benefit at all from the plan for my neighbors and myself out here.
SOUTH KING COUNTY	What are you waiting for!!!!!!!
SOUTH KING COUNTY	Light rail line from Covington, Black Diamond along Kent Kangley road/272nd to Kent Station and possibly Federal Way.
SOUTH KING COUNTY	MUCH more parking needs to be added. Too often, parking centers are full by 7:00-7:30 am, preventing many people from using public transit. I would love to drive to Tukwila and take the light rail into the city, but the single level of parking fills very early so I end up driving the whole way in or taking the bus.
SOUTH KING COUNTY	Add more planning and study funding for expansion to Burien.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - South King County

SOUTH KING COUNTY	There needs to be more done for the kent/auburn area, especially auburn considering there really only being a few ways to get north. The commuter rail doesn't run often enough, there aren't enough buses, the metro 180 is constantly late and overfull. I know some of it has to do with the auburn city council (or has in the past) but those barriers need to be broken down so that we can have more regular and reliable access north, or anywhere really. The ST3 plan over all is great except for the lack of consideration for this area of the county. There is huge ridership here and more access is absolutely necessary.
SOUTH KING COUNTY	Please consider adding rapid transit or other shuttle from auburn/Kent/Renton to take people to light rail stations when sounder is not running (during off peak times). Only option now is slow metro busses to downtown.
SOUTH KING COUNTY	Allow for extended hour and weekends for Sounder trains.
SOUTH KING COUNTY	Pick up the pace getting link to Federal Way, we voted to increase our property taxes several years ago on the promise that Link would be coming to Federal Way within about 10 years, that was about 5 years ago. Instead, our money is going to light rail projects to the north and east, and only as far south as Angle Lake. Not even close to Federal Way. As stated in the first question, I don't use public transit. But only because it doesn't serve me. Federal Way (Twin Lakes park n ride) to the Airport via public transportation would take me over an hour. I can drive it, depending on the traffic, in about 15 to 30 minutes. I would definitely take it if light rail came to Federal Way. Also, we really need the trains running 24 hours a day, just stagger the train usage in order to get in the required maintenance.
SOUTH KING COUNTY	I'm not sure if it was mentioned in the draft, but please please PLEASE add a route from Federal Way to University District as the ride there on a normal 197 bus route takes ~2hours one way. This would save so much time and allow for people to commute to get their education.
SOUTH KING COUNTY	I live on 200th street and normally ride the bus to downtown from the Burien transit station. I will probably not switch to light rail when the station on 200th opens because the ride downtown will be significantly longer on normal traffic days. I think you need better options from Burien/ Des Moines into downtown. That seems totally left out of this plan.
SOUTH KING COUNTY	There really, really needs to be a rail option up the 405/167 corridor -- merely adding buses is a band-aid measure. Rail is still the future of high speed transit, and the congestion along the east side commutes is already appalling. The expansion of high tech industries on the east side of King County is only going to aggravate this congestion.
SOUTH KING COUNTY	Kent East Hill should be added. I used buses to Boeing Renton Plant but they just consumed too much of my day. That was in the 1970s. To take a bus to work I could start 2 hours before and get home 2 hour after work. The bus scheduling was that bad. Or I could drive to a main route and take twice as long as commuting by car all the way. My neighbor took the two hour route to her Bellevue job. I gave up after a time I wanted more of my day with my family. I don't see that your new plan after some forty plus years has improved a single part of that poor metro service to Kent East Hill. As it has for decades under other plans, ST3 just serves a north south corridor. It is expensive for no result for a Kent East Hill resident, so I see no reason to support it.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - South King County

SOUTH KING COUNTY	Light rail service from the West Seattle Alaska junction to White Center, Burien, and the Airport.
SOUTH KING COUNTY	there should be an extension from the Tukwila station to Burien, White Center, then on to West Seattle to hook up with that line.
SOUTH KING COUNTY	<p>You need to add service to the south end of West Seattle OR move the north end line to the south. All of the money ALWAYS goes to the north end. It's the south end that suffers. There should be light rail from downtown through White Center and into West Seattle via Roxbury. This will improve very long commute times that the north end of West Seattle does not suffer AND it will have a dramatic revitalization impact of this area, too.</p> <p>I don't like how your questions are asked. They give no room for comment on answers that I would prefer to mark as no, but won't because your system would misunderstand. Like the Light Rail line from downtown to the north end of West Seattle. I agree there should be light rail from downtown to West Seattle BUT NOT TO THE NORTH END.</p> <p>Thank you.</p>
SOUTH KING COUNTY	Light rail is needed from Auburn and Kent to Seattle and another line to Bellevue on the eastside. A line connecting these with a line to SeaTac would be a good addition.
SOUTH KING COUNTY	Please fund the study of connecting West Seattle light rail down to Burien. There are so many low-income people in this area who need transit access, especially something reliable and NOT dependent on the West Seattle Bridge, which is a nightmare just as often as not. People of color are already underserved by transit, so the new station at Graham St should be another priority.
SOUTH KING COUNTY	Keep up the great planning and dedicated work. Sorry, I don't have more helpful details or suggestion to give better input.
SOUTH KING COUNTY	SEATTLE IS GROWING RAPIDLY WE NEED TO ACT NOW.
SOUTH KING COUNTY	Light rail to Burien...and or exoress buses all day Burien to Seattle and return.
SOUTH KING COUNTY	Mass transit needed along the 167 & 405.
SOUTH KING COUNTY	Transit station in Tukwila - where one can get off the Sounder Train or bus from Kent and then get on a Light rail or Link.
SOUTH KING COUNTY	Light rail service to point defiance and Olympia
SOUTH KING COUNTY	<p>What about SE King County?</p> <p>Until the gerrymandered lines for light rail are altered I will always vote NO. This boundary was created so Tacoma, Seattle, and Everett could get light rail. All areas of the three counties should be included or a least the major urban area (for example in King County- Maple Valley, Covington, North Bend, etc.).</p> <p>I also doubt any government agency can estimate costs over a 25 year plus time period!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - South King County

SOUTH KING COUNTY	Light Rail access from Burien to the West Seattle Junction.
SOUTH KING COUNTY	As a resident of Covington, you want to raise my taxes to pay for transportation for all areas, except the Kent - Covington - Maple Valley - Black Diamond corridor? Transit options in this area, and up toward Bellevue, Kirkland, and/or Issaquah don't exist in any convenient form. Meanwhile the "Urban Growth Plan" is pushing more people into these "bedroom communities" - with no good way to transit to work.
SOUTH KING COUNTY	We need options to get those on the south end of West Seattle and Burien near a light rail station. Extend the light rail south from the West Seattle Junction to the Burien Transit Center.
SOUTH KING COUNTY	Include Burien and white center in light rail. connecting to the airport
SOUTH KING COUNTY	Believe in providing reliable transportation. That helps relieve and improve schedule times and existing stops. My experience is that many schedule times become hour estimates all while driving independently times are greatly reduced to half the wait and travel time by current public transit time. Along with occasions had to wait longer due to no available room on some parts of transit times to ride.
SOUTH KING COUNTY	Under-served areas need attention first. I live in the White Center area mass the transit is lacking. Light rail systems are a good idea, but metro service that is already in place, but that requires more buses, more routes, less fees, etc., needs attention first. I also think that there should be a higher road tax, especially for those who consistently operate single-occupant vehicles and who are too lazy to take the bus. If possible, households should be limited to one vehicle for every two adults. Less cars on the road, more people out taking mass transit, walking or cycling. The more people out in the neighborhood commuting to and from work on mass transit the safer the neighborhoods are as well. we have become a "me-first" insulated society.
SOUTH KING COUNTY	Need to extend light rail to Olympia
SOUTH KING COUNTY	Please bring light rail to Burien.
SOUTH KING COUNTY	A light rail system going east into Maple Valley from the Kent downtown area. Link the Sounder train to the communities east (Maple Valley, Covington, East Hill of Kent). That area is congested with little infrastructure for traffic management. Thousands in those areas could then move North-South along the established access to jobs. There is a high incidence of low income families along this route that could have many new job opportunities open to them with this transportation support.
SOUTH KING COUNTY	Adding this tax that the majority will not use is irresponsible! All board members should resign starting with Dow!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - South King County

SOUTH KING COUNTY	Sounder service should be increased to support regular service through the Kent Valley to Sumner not just daytime commuting hours. If Sounder service hours cannot be expanded, then a light rail link should be run through the Kent Valley. South King County has continually gotten the short end of the stick when it comes to regional transportation support. Bus service is spotty and inconsistent unreliable in South King County. All the I-405 improvements are north of I-90. Will you please have a heart and improve the rail service through the Kent Valley, not just part time Sounder service. We are getting shafted here in Kent!!
SOUTH KING COUNTY	Within west Seattle to connect through to burien.
SOUTH KING COUNTY	Why is the Kent East Hill area ignored in all the last three plans? There has been no additional service and no plans for a BRT service to the area -- nothing. I have not taken KC Metro in over 6 years when my commute doubled from 45 minutes to 1 hr. 30 minutes one-way, minimum. Since then, I have been driving in to work (North Boeing Field) which has been averaging about 40 minutes one-way.
SOUTH KING COUNTY	I think a sounder station with access to the waterfront on Alaskan Way would be very beneficial to commuters from both the South and North end and to residents in Belltown and surrounding areas.
SOUTH KING COUNTY	Burien needs a light rail solution. It's a relatively short distance (8 miles) from Burien to Seattle. I would be happy to pay an additional sales tax and/or property taxes if light rail was built/being built in Burien (connected to downtown). Otherwise I prefer not to subsidize a system that I can't utilize.
SOUTH KING COUNTY	I will say this again Kent always gets the short end of it all. Train service should be extended through weekend. And light rail should also be an option.
SOUTH KING COUNTY	Increase the frequency and times that the Sounder train runs. Make it more than just a commuter train!
SOUTH KING COUNTY	There is a rail bed that goes from Tukwila to Woodinville that is not being used, why is it not being used for light rail? To go from Renton to Bellevue, via Seattle is ridiculous. A light rail train should be added from Tukwila to Bellevue.
SOUTH KING COUNTY	Burien to West Seattle Light rail
SOUTH KING COUNTY	Living in East King County, I would like to see Sound Transit eventually expanded to the Covington/Maple Valley area.
SOUTH KING COUNTY	PARKING is a serious issue at all Sounder Train Stations, at least in the south end. FREE PARKING needs to be expanded either by adding lots and/or garages, or having shuttles to/from nearby park and ride lots, shopping malls, other available parking options.
SOUTH KING COUNTY	Should defiantly add federal way to the light rail line
SOUTH KING COUNTY	ADD PARKING AT THE CURRENT AND FUTURE LIGHT RAIL STATIONS. People would be more inclined to use the light rail system if there was convenient parking available to them. Currently there is parking at Tukwila and that is so inconvenient.
SOUTH KING COUNTY	Burien to west seattle rail, and all of the plan should be done at a faster pace

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - South King County

SOUTH KING COUNTY	West Seattle to Burien link is more important and should be in this proposal.  Timing is frustratingly long. It seems that by the time these projects are completed they will be hopelessly over utilized.
SOUTH KING COUNTY	I really can't believe access to Boeing was never included in the first project. Also- there needs to be a better rail system in place all day long. People can't go into the city to attend events daily so you're losing money that way and it's a standard part of any rail system. Your visions are short sighted and spending more money on reports is a ridiculous waste of money. More rail and less reports but do focus on the southend cities.
SOUTH KING COUNTY	Light rail access kent/Renton and down 167 to Seattle
SOUTH KING COUNTY	Light rail from Tukwila link station, to Southcenter Mall, onto Renton. Extend West Seattle light rail thru to Burien, and from there onto Tukwila link All these propositions I believe eliminate the need for Rapid Ride C & F lines. and I believe it will bring out the 'under-serviced' metro & Transit riders onto regular usage
SOUTH KING COUNTY	One of the biggest objections for me to use Link Light Rail is the amount of time it takes to get from the Airport to Downtown. There are to many stops and it takes to long. I look forward to the extension station toward Federal Way but I don't see how it can get me downtown in a reasonable amount of time. I would recommend that you look into developing an Express train option that skips some of the stations between the Airport and downtown to get the commuters from the further suburbs into downtown in a reasonable time. Time of commute is one of the most critical parts of my decision process. Time is our most valuable asset.
SOUTH KING COUNTY	I do not see a train across Lake Washington to Downtown Seattle which I would support. Also how do you know by the time all the projects are complete they won't be obsolete?
SOUTH KING COUNTY	Not having parking at light rail stations is the most hideous oversight ever.
SOUTH KING COUNTY	We need to make the light rail a universal thing from Olympia to Everett. Right now, the biggest group of people who would use it(Microsoft employees and other tech business in Bellevue and Redmond) can't.
SOUTH KING COUNTY	Burien, white center/west seattle, southcenter
SOUTH KING COUNTY	We need all day Sounder service from Tacoma to Seattle and back
SOUTH KING COUNTY	Based on cost-per-rider analysis a Ballard-UW/U-District light rail line should be extremely high priority
SOUTH KING COUNTY	Light rail in Renton/Kent!!!
SOUTH KING COUNTY	There has never been anything really done from the Auburn/Kent Valley to the Bellevue/Redmond area. Hwy 167 and I-405 are horrible during morning and afternoon commutes and I-405 is horrible all day long. There really needs to be more options for those of us who live in that area and would like to take light rail or the suggested bus rapid transit option.
SOUTH KING COUNTY	I know it isn't happening, but I feel compelled to say, since it would make my life super simple - light connection from Seattle to Kent, or more frequent Sounder server service with regular weekends.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - South King County

SOUTH KING COUNTY	Definitely need some sort of transit system along the Maple Valley Highway area. Connecting Covington and Maple Valley to the I-405 corridor.
SOUTH KING COUNTY	Light rail from Burien to the airport.
SOUTH KING COUNTY	There need to be better transportation options for South Sound (Federal Way/Kent area) to Bellevue.
SOUTH KING COUNTY	<p>The plan doesn't seem to address a few issues:</p> <p>The southbound Sounder is filling up to standing room only on many trains. Instead of making the trains longer, which requires platform modifications, more frequent trains would be nice.</p> <p>It would also help if there was an ST Express bus that emulated the Southline Sounder train outside of the Sounder's working hours. That way, if one works late, they just get on the bus that stops at the train stations (Seattle, Tukwila, Kent, Auburn, etc). This could help speed up / replace some of the existing bus alternatives by offering an express option that would take significantly less time than the current bus options. For example, the bus route that runs outside of the Sounder's hours from Seattle (King Street) to Kent Station take three times longer than the train (one hour instead of 20 minutes). The bus route from Seattle to Tukwila Sounder station requires a transfer and takes ~4 times longer than the train service (~60 minutes instead of 15 minutes). One of the best ways to get people to use the Sounder is improve the parking options and make more bus options available outside of peak hours so they do not worry about being stranded if they have to stay late.</p> <p>Thank you</p>
SOUTH KING COUNTY	Maple Valley needs to be added. There is no plans for some of the larger outlying areas.
SOUTH KING COUNTY	<p>If the city of seattle wants a basketball arena in their preferred spot which would be seattle center, (ballard line), then they should start the light rail project right away. Traffic would be a disaster without it. No way It should finish in 2024. Start now and when the arena gets done, at least people can see the traffic problem being fixed.</p> <p>Also to make money at seattle center, people dont want to look around for parking. So if you want seattle center to have more tourist people coming to events there, you have to make it easier for people to get there to make revenue.</p>
SOUTH KING COUNTY	South center mall to downtown Seattle link rail
SOUTH KING COUNTY	We need light rail that includes Burien. Please bring back the extension of the ST 560 bus from Burien into Alaska Junction in W. Seattle. Burien commuters really need this one. It made no sense to me that it was reduced to Westwood Village.
SOUTH KING COUNTY	Light rail to Kent Station or bus service that operated until 2 am.
SOUTH KING COUNTY	The light rail extension from Angle Lake to Federal Way should follow the original design; not the cheaper redesign which is not pedestrian friendly.
SOUTH KING COUNTY	West Seattle line should extend to Burien. All light rail should progress faster.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - South King County

SOUTH KING COUNTY	Since Burien Transit Center is only a couple of miles away from Tukwila Station adding light rail to Burien makes sense especially if you follow the path of SR-518.
SOUTH KING COUNTY	Where are the Flying Cars?
SOUTH KING COUNTY	I feel that there should be multiple Link lines. Adding stations is great, but no one is going to use the link if it takes 2 hours to get from one side to the other. The current link takes me 45 minutes to an hour to get to westlake from Tukwila which in my opinion is way to long considering its only about 13 miles. Adding multiple lines with each having less stops would greatly cut down on time and increase the popularity. As the link is right now it's only practical to to use during rush hour because any other time its faster to drive, by cutting down the time it takes to reach the final destination it would increase popularity. I know personally if I could get from my home in kent to downtown the same speed or faster I would 100% choose the link over driving, but aside from rush hour driving is significantly faster.
SOUTH KING COUNTY	Sounder service throughout the day.
SOUTH KING COUNTY	We need to move NOW. These projects should have been underway decades ago and should be should be renewable energy driven transit!
SOUTH KING COUNTY	Need more bus service in Shorewood neighborhood. Extend times for 113 bus so students and others may get home safely late at night through dark neighborhoods with few sidewalks, little lighting and higher crime. Walking from Ambaum or Roxbury to Shorewood neighborhood is not safe.
SOUTH KING COUNTY	Stations in and around Renton should be added and connected to the spine as well as Burien. There is a proposal to study Burien but it should be a full fledged EIS so that can save time and construction can begin sooner. Again, adding a light rail station(s) to Renton would be most helpful.
SOUTH KING COUNTY	The west seattle light rail option should be extended to Burien and then to connect to the existing line in Tukwila or SeaTac. A loop would greatly serve all in South seattle.
SOUTH KING COUNTY	Travel on light rail from federal/Tacoma in proposed light rail will take to long to be useful. Development of express trains that do not stop at every station would be beneficial. Also light rail from Tacoma to fort Lewis would significantly reduce traffic,
SOUTH KING COUNTY	1. Have Light Rail go up to Bothell from Bellevue. 2. Have the Tacoma streetcar go all the way to Sumner. 3. Have Light Rail go from SeaTac to Burien.
SOUTH KING COUNTY	Sound Transit needs more Park and Ride lots desperately!!!
SOUTH KING COUNTY	Light rail to Burien should be added.
SOUTH KING COUNTY	Light Rail to Federal Way and beyond southward.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - South King County

SOUTH KING COUNTY	The "Future Investment Study" for the light rail link between West Seattle's Alaska Junction and the Burien Transit Center should not only be moved up in time but should be a part of the Sound Transit plan. The potential area to be served is one of the most rapidly growing in the Puget Sound region much of it composed of people of low income who depend on ST to get to work in downtown Seattle and elsewhere. Appears as though the current ST plan favors areas of high income that are more likely to be able to afford alternative transportation.
SOUTH KING COUNTY	Put Burien on the speed line.
SOUTH KING COUNTY	More love for 405 traffic from Tukwila through to Kirkland!
SOUTH KING COUNTY	I'd like to see more investment throughout the Kent, covington, auburn, five, maple valley areas particularly in bus work to and from plotter points of rapid transit. Parking at Kent and auburn is already an issue and I and many I know feel if we had a more efficient way than driving to the train/bus stations we would use that. I also feel like rapid bus lines have been neglected from the east side of I-5 in all of the planning. From kentwe literally ha e the 150 that runs frequently enough to make commuting okay but it makes more than 30 stops and take more than an hour to get to seattle, usually 1.5 hrs. This is discouraging. Increases in population is huge, but we have the 150 and the train. It's a bummer for all south king county folks and north pierce county. We often feel cut off. Even the buses to Bellevue from here often require us to go to Seattle then catch another bus across one of the bridges.
SOUTH KING COUNTY	Kent to Seattle express bus.
SOUTH KING COUNTY	Tukwila to Bellevue Light Rail and Alderwood to Bellevue
SOUTH KING COUNTY	A lot of people live in South King County and work on the East Side, and currently, it's very difficult and time consuming (generally requires you to go to Seattle first) to get from, for example, Kent to Bellevue. I'd love to take the bus but it takes me more than twice as long so I don't.
SOUTH KING COUNTY	Would it be to add a commuter rail station in downtown Renton via the east side rail corridor?
SOUTH KING COUNTY	Need to add additional service to White Center
SOUTH KING COUNTY	Sound transit has never, I repeat never been interested in reducing commuter traffic. They have only been interested in supplying a light rail line to the lower income people living in east Seattle hills area. It was never designed to go to any place were people work. Please take your liberal ideas someplace else as our traffic issue in #2 in the nation and Sound Transit couldn't care less. Stop wasting tax payer's money and please stop what you are doing because it does nothing to relieve our traffic situation. Our traffic gridlock is mainly caused by middle class people just trying to get to work and Sound Transit doesn't care about the middle class people, they only care about the lower income people. You rejected even the most simplest ideas that could have reduced our traffic problem, but you didn't listen to them, because you had your agenda and it didn't care less. Please just dissolve and go away.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - South King County

SOUTH KING COUNTY	Seems to me when I lived outside the city I had faster commutes via bus, more options and more times. Seems like if we start at the heart of where everyone is heading, start building there and slowly keep adding, much like what is happening down by South 200th, slowly expanding and adding, you get folks closest to the city out of their cars first, and then slowly keep adding and getting more people out of their cars. At is if you keep extending it from say Everett and DuPont, you are only promoting people to keep moving further and further out while development close in keeps growing without transit. I say Impose a development higher tax for people building new stuff in areas that don't have the transit, so it pays for it. I personally love how development in places like San Fran where the Bart was played into growth as development was...and Portland. What can we possibly learn from these places. I've been voting yes for this since 1980. And yet, even with this plan, I will still not be able to have any rapid anything that serves my neighborhood.
SOUTH KING COUNTY	There needs to be either light rail train service running north and south on the east side. I commute from Fairwood to Redmond every day and I am sick of it.
SOUTH KING COUNTY	405 south of Bellevue to 15 needs to have higher priority, even with light rail options, and Bellevue connections to Seattle and Tacoma need to be strengthened. How does one get to Tacoma from Bellevue? And why don't the station options in Tacoma land one in the main downtown area, within walking distance to UW, the Museum and Performing Arts districts? In addition, evening schedules need to be added so the cities around Seattle can be served better, to support their nighttime activities.
SOUTH KING COUNTY	I would like to see Link light rail out to Kent and Auburn. I like to shop in different areas - Federal Way, Tukwila, Seattle. I don't want to always have to take my car to shop and the Sounder train doesn't run on weekends. Can we get more than just bus service to these places from Kent and Auburn?  You probably know already that many people who work in Seattle live in Kent, Auburn and surrounding areas. I think they would appreciate the opportunity to go shopping, to movies or other entertainment, or out to eat/socialize without having to worry about fighting traffic or finding a parking space. A project like this has the potential of taking cars off the road and providing opportunities for businesses near any link light rail station serving these areas.
SOUTH KING COUNTY	Kent, Renton, Auburn East hill area is completely absent from your Light Rail plan. I am strongly opposed to any plan you come out with and strongly opposed to paying for any plan you come out with until your plan includes light rail access on top of east hill, Kent, East Hill Renton and East hill Auburn. These areas are lacking service completely and need to be moved to the top of your list.
SOUTH KING COUNTY	We all need rail service from south and north sound along EAST side of Lake WA. I-405 is a disaster and has been for many years. Throw G buses at it has NOT done the job!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - South King County

SOUTH KING COUNTY	<p>What about SE King County - Renton, Covington, Maple Valley. Oh I forgot :) Covington and Maple Valley are not in the RTA because you made a gerrymandered district many years ago based on an advisory vote. Until you get all of Pierce, King, and Snohomish counties in the RTA I will not vote for any additional taxes and will actively voice my opinion against such increases. As a minimum ALL major metropolitan areas must be included. Residents of these areas are traveling to RTA service areas, taking up parking spaces but yet do not have the tax burden. Revise the boundary for future tax requests!</p> <p>I also doubt government's ability to have a 25 years plan that can be financially managed. We already did not get what was promised in a 10 year plan.[]</p>
SOUTH KING COUNTY	<p>Working with the public for three years is not enough time at all. These taxes are way too high and the plan will not benefit those regions and people that need it most. This is catering to the new Amazon employees that do not care about Washington's long term transit health and therefore I will be voting against this poorly thought out plan on this November's ballot.</p>
SOUTH KING COUNTY	<p>Please build Light rail and or BRT from Burien through White Center to West Seattle and/or downtown.</p> <p>These local residents need and want transit now. Ignoring the local urban areas of Seattle for other less urban projects is a problem for me. There's going to be light rail from Tacoma to downtown Seattle before White Center to downtown Seattle. Weird, right?</p>
SOUTH KING COUNTY	<p>Light rail from Kent to Bellevue.</p>
SOUTH KING COUNTY	<p>We need access to mass transit on Kent's East Hill. This is ridiculous that the light rail is on the West Hill. 25 years is way too long for a transit plan.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - South King County

SOUTH KING COUNTY	<p>Once again you have ignored this states most congested corridor, I405 between Bellevue and Renton. This stretch is this states most congested highway. You cannot travel on this road between sunup and sundown without being stuck in traffic. A few extra buses traveling on the shoulder will not significantly reduce the congestion on this road.</p> <p>It would be better to cancel light rail to Issaquah, and the planed shoulder lanes on I405 and spend the money on light rail between Renton and Bellevue. Better yet, Tukwila station and Bellevue.</p> <p>A park and ride station in Renton, near I405 and SR167 would serve a large number of commuters and make a significant dent in the I405 traffic.</p> <p>I don't know who payed off who to get the Redmond / Issaquah extension. This line will provide very little return for a substantial investment.</p> <p>The proposed light rail station at Boeing access road in Tukwila should be abandoned. There are no homes or businesses within walking distance.</p> <p>The Sounder line is a total bust and I do not endorse pouring any more money into this boondoggle.</p>
SOUTH KING COUNTY	<p>Just do it! This region needs a light rail system / train system like New York, London, Paris etc. Leaders have kicked the can down the road for at least 50 years in this area it's time to act!!</p>
SOUTH KING COUNTY	<p>As a Burien resident, I'm disappointed to see there are no plans to extend light rail from West Seattle through Burien to the SeaTac and the main north-south light rail line. With housing prices so high in Seattle, and WSDOT planning to connect SR 509 to I-5, I would expect to see my area experience more growth, and arterials becoming more congested, in the coming years. Connect Burien with the rest of the light rail system, please. Unless all rapid ride and express busses are in dedicated lanes, they will just sit in traffic, so rail seems like the way to go to move people efficiently.</p>
SOUTH KING COUNTY	<p>More parking at all transit stations would help ridership, parking fills up far too quickly.</p>
SOUTH KING COUNTY	<p>We should be looking at light rail for major routes utilizing the old rail lines on the east side and stop supporting long bus routes but rather use light rail to be the backbone of of Street transit and buses to spoke off. There should be a continuation of light rail to lower income neighborhoods that circle into current plans like continuing from Ballard to northgate and West Seattle to white center and connecting through burien and seatac</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - South King County

SOUTH KING COUNTY	Extending the WS rail line to Fauntleroy/CA would be more appropriate long term planning based on this areas growth (actually to Westwood Center based on growth). Personally, I would like to see buses removed from Seattle and all Seattle transit be rail. Keep people in Seattle moving quickly within the city and keep them "in" the city 24/7. And yes, West Seattle is part of greater Seattle. Double decker RR Buses should be used to connect people from the exterior (Lynnwood, Shoreline, Everett, Tacoma, Burien, Issaquah) to the end of the Seattle rail line. There people can transfer to rail until rail is extended. Fill up Seattle with rail THEN extend out.
-------------------	--

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Pierce County

Subarea	Additional Feedback - Project(s) should be added in the ST3 final plan
PIERCE COUNTY	The Sounder doesn't run frequently enough to be truly useful to the region. I know it is limited because it uses the heavy rail lines, but this is the biggest problem with why cars aren't getting off the roads. Buses will not fill that gap. Don't add more buses! Focus on the rails...yes more light rail. Maybe the Sounder project needs to be cancelled if it cannot run frequently on all days and nights. People will use their cars if buses are the only option. The Sounder rail from Everett is too prone to difficulties with landslides. This makes it too unreliable. Sounder is a problem. Buses are NOT the answer. I would gladly pay twice the requested amount if it meant a system that would actually work.
PIERCE COUNTY	Expand parking across all of the South Sounder line as soon as possible.
PIERCE COUNTY	Parking in Sumner, bus service from Orting to Sumner with parking in Orting. Fix current Sounder trains so they no longer break down multiple times in a week.
PIERCE COUNTY	There needs to be a transfer from Sounder Southline traffic to light rail prior to Seattle so that Light rail remains an option for folks that work elsewhere e.g. Redmond and want to use rail. E.g. Tukwilla.
PIERCE COUNTY	Add a northbound sounder station in Ballard.
PIERCE COUNTY	512 corridor light rail, more parking at Sumner and Puyallup
PIERCE COUNTY	You need to add High Speed Rail, Regular Rail or Light Rail between Seattle & Olympia. The freeway is horrific due to lack of lanes and increased population. Please add some sort of rail system to your plan. We are so far behind other countries with this it's laughable. There are many people that could take advantage of riding the rail instead of sitting on the PARK & RIDE (So called Freeway). It may actually cut down on unemployment if people could commute in a fast efficient way. People outside of Olympia could commute to work for state jobs and people outside of Seattle/Everett could commute to jobs from other cities. It may cut the unemployment rate down.
PIERCE COUNTY	PARKING!!!!!! Expanding services does no good if there is no place to leave our cars. I live a good 3 miles from the closest bus stop and there are no park and rides that will get me to the train station. I have been riding the sounder since 2007 and PARKING is your biggest problem you need to solve. And, not charging us for it. I already pay taxes and my fare, no reason to also pay parking. FIX YOUR PARKING PROBLEM
PIERCE COUNTY	Add weekend train schedules, and late Friday night trains to allow for opportunities to see theatrical productions or concerts.
PIERCE COUNTY	More sounder service: add a 4:30am (TAC) and 2:30pm train (Sea)
PIERCE COUNTY	Living in the South Sound, having an alternative option to driving into the city would allow more people stress free access to culture, entertainment, & work opportunities. A greater weekend service could also prove beneficial to local businesses and communities - relieving crowded Seattle neighborhoods & enhanced benefits to suburbs.
PIERCE COUNTY	We need to link Everett, Seattle, Tacoma, Bellevue and Olympia. You should be able to get on a train in any of those cities and have it take you to any of those cities. My personal commute is Tacoma to Bellevue -- why? I can't afford to live in Bellevue. Housing is simply too expensive for me there. I'm an IT professional and that's where the jobs are.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Pierce County

PIERCE COUNTY	Parking structure at summer station; link light rail (sumner to orting), thank you!!
PIERCE COUNTY	Light rail should come down to the water front and Point Defiance Park, two of the most attractive locations in Tacoma. There is not enough parking to accommodate the amount of people that would like to have better access to these locations. Especially with the addition of Point Ruston and all it has to offer it would be great if there was at least bus service to this area.
PIERCE COUNTY	Consider extending light rail down Pacific Ave in the Tacoma area all the way to the end of the current pierce county route 1. Spanaway and frederickson are growing fast too.
PIERCE COUNTY	Sounder to Orting
PIERCE COUNTY	Light rail should work with existing transit centers and park-n-rides.
PIERCE COUNTY	More frequent sounder trains
PIERCE COUNTY	Highway 162 between Orting and Sumner is a bottleneck for much of rush "hour". There isn't another practical route to take, and no plans or money to expand HWY 162. Some type of public transport (there is currently none) would help a lot. If people could get to Sumner, they could catch the light rail. As it is now, there's not enough parking at the Sumner Station, and with traffic on 162 being so heavy, it's easy to miss the Sounder. I certainly don't want to get taxed if I get zero benefit, would you?
PIERCE COUNTY	<p>Overall I think the proposed ST3 package is an excellent plan. I would like to think this will get approved and in 20 or fewer years (before ST3 finishes build-out) we will have an opportunity to vote on an ST4 package of projects that might include study corridors highlighted in ST3 with those projects completed in a 2046 or 2051 time frame.</p> <p>My disappointment in the ST3 package is that light rail extension south of the Tacoma Dome was not included in the package. My vision is that beyond the dome, light rail needs to serve downtown Tacoma (perhaps just south downtown) and extend at least as far as Tacoma Mall. The Tacoma Mall area is identified as a regional growth center and downtown Tacoma has incredible capacity for employment and housing growth. Light rail to Tacoma should not be viewed solely as a commute solution to Seattle or a quick trip to Seatac, but as a means to draw people from other communities to employment opportunities in Tacoma/Pierce County. As such the Tacoma Dome station, while a critical multimodal destination, should not be viewed a terminus and would need to be sited and designed to allow for easy extension further south.</p> <p>Ideally the ST3 package would include this extension as a project to be completed in 2041. At a minimum, I feel we should add light rail extension from Tacoma Dome serving downtown Tacoma and to Tacoma Mall as a study corridor (with study funding) in the ST3 package to help ensure the long-term vision and planning and it's likelihood for inclusion in a ST4 proposal.</p> <p>Thanks!</p>
PIERCE COUNTY	Additional bus service past Bonney Lake into Buckley, Enumclaw, and West to Orting.
PIERCE COUNTY	Highway 162 congestion is dome of the worse in this area. Would like to see mass transit added to Orting much sooner

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Pierce County

PIERCE COUNTY	There should be some link between the southeast lines covered by Sounder and bus services into the light rail for those travelling further north. Currently there is no clean plan to do that. Current and future station dependencies should consider this option.
PIERCE COUNTY	BRT on Meridian Avenue from Graham to Puyallup
PIERCE COUNTY	lack of bicycle capacity on Sounder Trains. Need additional car dedicated to bike space. I would cycle more often if this wasn't a problem.
PIERCE COUNTY	Would nice for rail transportation all day between Tacoma and Everett. We would like to be able to the 5th Ave and the like in Seattle via rail. And in today's world we would have to stay in hotel for the night!!!
PIERCE COUNTY	Rail needs to go all the way down to Tumwater. I worked at the Dept. of Revenue for four years and commuted from Puyallup to Tumwater and the traffic between Tumwater and Tacoma in the evening is a nightmare. You fail to realize how many people work for the state and commute from as far away as Ballard to get to their state jobs in the Olympia area.
PIERCE COUNTY	You have completely ignored the South Hill, Puyallup area in your planning.
PIERCE COUNTY	I would love to see the Sounder Train run earlier than 3pm out of Seattle going South. I think the reason there is so much traffic before 6am that those that have to be to work at 6-630am or earlier are not able to catch the train before 3pm so that something that needs to be consider when expanding this project. Good Luck with this project and it's about time!
PIERCE COUNTY	The Canyon Park business park in Bothell is huge and keeps growing, contributing to the awful traffic on 405. Because the transit options are so limited and crappy, businesses here give no incentives to CHOOSE transit. It's a traffic nightmare. A light rail station here would make a HUGE difference. Currently there is no transit connection from Tacoma to Bothell that doesn't take >>3 hours. A light rail connection to downtown Seattle would change my life!
PIERCE COUNTY	There is a need for link rail between Seattle and Redmond across SR 520. At expected population expansion rates one line gong Seattle to Bellevue to Redmond maybe to Kirkland is simply not enough, and the busses are not yet reliable enough to be considered a long-term alternative. Reducing commuting time and effort means having transit routes that match the most convenient car commuter routes. I see the value in public transit, and I want to support this measure, but without a plan for a light rail route across SR520, only a plan to "investigate", I wonder if ST really has a good understanding of larger regional needs.  Furthermore, I believe we need a commuter train connecting the Eastside to the South Sound (Kent, Federal Way, Tacoma). For a long-term transit plan, ST 3 is still reliant on Seattle as the main hub of all activity, which adds unnecessarily to commute times. Having a link between the Eastside and the South Sound, or a plan to study the effects of one, allows those regions to grow more independently of Seattle, and to find more reasons to support this package outside of being able to get to Seattle.
PIERCE COUNTY	All day service for sounder trains.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Pierce County

PIERCE COUNTY	<p>-More Tacoma Link lines are needed</p> <p>-UW-Ballard in a grade separated line is better then West Seattle to Ballard, which can be handled by grade separated BRT and a new downtown tunnel</p> <p>-South Link needs to follow 99 instead of I-5 all the way from SeaTac to Tacoma for more TOD and ridership</p>
PIERCE COUNTY	<p>The plan focuses too much on transit from the suburbs to Seattle and not enough on transit within Seattle. A light rail route needs to be added connecting the U District with Ballard. This is a very glaring omission from ST3.</p>
PIERCE COUNTY	<p>Light rail running the I-5 Corridor. The option of express trains from major hubs would be ideal.</p> <p>The train should also be an option along I-405. Giving up a lane of traffic for a train that can move many more people is the most viable option. This would require tax incentives to businesses to provide additional transportation(bus/van/etc..) once at their location, since alot of Northwest companies are not located within walking distance of major highways.</p>
PIERCE COUNTY	<p>You need to connect the sounder to the light rail in Tukwila. It makes little sense to have the light rail connection a 1/2 mile up the road. This would allow an easier commute to the airport for thoseexample of us who live in South East King and North East Pierce counties. Our options in this plan are to drive, take the sounder to Seattle and then the light rail back to the airport (not realistic) or drive to federal way and take the light rail. In all of those options you are not reducing traffic.</p> <p>You also need to prioritize parking at both the light rail and sounder. People won't take it if they can't get to it.</p> <p>We need bigger buses on the Sumner/Bonney Lake route.</p>
PIERCE COUNTY	<p>This survey is flawed. The respondent will answer based on where they live, so this is really just a test of how well you all do in getting the survey out, and the size of the population. You should base projects of this magnitude and impact on real data, you should study other cities' successes and failures. We have major problems in our region - our population is not inclined to use mass transit - were independent, we like our cars, so you have to make the options attractive. The Sounder is slow and unreliable. Its inconvenient, dropping me off in the SODO. How did the survey writers miss Tacoma to Bellevue?</p>
PIERCE COUNTY	<p>It's a travesty that the light rail station(s) in Tukwila are not anywhere close to the Sounder station. Plans should be made to facilitate greater interconnectedness between different transit systems. As it stands now, in order to get to SeaTac using rail, a Sumner resident would have to take the Sounder to Seattle, then get on light rail to head back down to SeaTac. Perhaps of higher interest is longer operating hours for Sounder, including weekends. Many people work past 6:20pm in the evening (last train departing Seattle). Thank you</p>
PIERCE COUNTY	<p>1) Light rail from downtown Tacoma to South Hill Mall Via JBLM 2) Light rail from downtown Tacoma to TCC and University Place</p>
PIERCE COUNTY	<p>I was hoping, given the 25 year length of the plan, that light rail would be extended all the way to the Tacoma Mall Regional Growth center. Pierce County is a fairly large sub area that got no light rail in ST2. I would like to see light rail extended to the mall area if any cost savings are realized on the Sounder South improvements or elsewhere in the system.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Pierce County

PIERCE COUNTY	PLEASE, PLEASE give us more options from the south Puget Sound to Seattle, especially Tacoma!!! I love commuting, but sometimes the options just don't work!
PIERCE COUNTY	light rail from tacoma dome to tacoma mall
PIERCE COUNTY	Consider light rail services from Puyallup to the South Hill and Graham communities that are the fastest growing in Pierce County.
PIERCE COUNTY	Funding for facilities throughout the reigon at other transit agencies (Pierce Transit and King County Metro) for double deckers, so Double deckers can be used throughout the region and not just for Snohomish County. Which would help add capacity on many routes .
PIERCE COUNTY	All ground floor lots used for parking at sounder/light rail stations should be expanded into parking garages, especially at the Auburn, Sumner, and Tukwila (light rail) stations.
PIERCE COUNTY	More stations should be added in Tacoma, near the waterway and areas in the city where there are already tracks. The more accessible the transit is, the more people will be willing to use it. Larger cities all have mass transit, if Seattle and the surrounding region is to grow and prosper, the area needs to have accessible transportation for more people.
PIERCE COUNTY	Until a full light rail between Tacoma and Seattle is built, it would be great to increase the frequency of Sounder trains on that line. Weekends would be super helpful, as would later weeknight options since right now it's very hard for me to stay in the city for after work/networking events.
PIERCE COUNTY	Tacoma southward. I want to go to Olympia. Get me there. Also, we have buses...put more on the road. We have trains....make them work better (frequency etc). Use what we have BUSES AND TRAINS. Bicyclists are road kill for motorists.....put your bikes on a bus or a train.
PIERCE COUNTY	Strongly encourage light rail to Orting, perhaps using old railroad rights-of-way (transit trumps walking-trails)
PIERCE COUNTY	Bus service to Midland should be added.
PIERCE COUNTY	Adding additional times that the sounder train runs to and from Seattle
PIERCE COUNTY	Improved website, kept up to date, Sounder runs expanded, and Sounder schedules for 'special events' to be posted on website.
PIERCE COUNTY	Transportation in rural areas of piece county are needed. I would love to ride the light rail to work if their was a station close to home and work.
PIERCE COUNTY	Run Sounder on weekends. Make the light rail go everywhere. Extend at least some schedules in Tacoma so that it's possible to catch a bus home after 10:00am on Fridays and Saturdays.
PIERCE COUNTY	Sounder commuter rail should run longer hours to accommodate later and earlier shift work and mid day travel throughout the region. Look at purchasing the short rail line from St. Clair near Nisqually into Lacey, this line is currently slated for abandonment by BNSF and would be an excellent future asset.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Pierce County

PIERCE COUNTY	I would take transportation if it was available. I live on Joint Base Lewis McChord and go to school to University of Washington Tacoma every single day. Several people that live near me go there (on separate days and times) and would take it as well.
PIERCE COUNTY	Light Rail to Puyallup from Bellevue along the 167 corridor.
PIERCE COUNTY	Link light rail should be extended to connect Kent, Renton and Auburn.
PIERCE COUNTY	I'm all in favor of this plan, but ultimately would like to see it expanded to run rail (Sounder?) from Olympia to Everett.
PIERCE COUNTY	I see nothing in this plan that helps those in the South Sound in any significant way. You want to extend the rail to DuPont. This is foolish when the services currently provided are dismal at best. Under your new program, I do not see anything that would increase the hours of operation. In 25 years, per your plan, I still will not be able to ride the train from Puyallup to the airport, not will u be able to ride the train on the weekend from either Tacoma or Puyallup to visit museums, etc without having to worry about driving in Downtown Seattle or worry about parking. We have already spent a great deal of money on the existing system, yet it only runs a couple hours a day, during the weekdays. If you want to improve traffic congestion, you need to give Washington drivers an option they can use ALL the time, not just once in awhile. Otherwise, you will never change people's habits from driving themselves to leaving their car at home in favor of mass transit. Stop thinking of just getting people to work and back. It needs to be a total life-change package. After reviewing the current plan proposal, I personally will vote against it as it it short sighted and does not address the rail problems that currently exist. I don't want to take a bus, I want to take a train. Why can't we have a system more like California's BART?
PIERCE COUNTY	We live along Hwy 162 between Orting and Sumner. We are over 80 yrs old and would use transit if it were available in our area on a regular schedule.
PIERCE COUNTY	More public parking at the auburn station and more trains with longer hours!
PIERCE COUNTY	More Airport access. What about light rail from the south sound like Tacoma to the airport. More airport access could mean fewer car parking needs and free up realestate for other purposes. Hate to be a parking lot owner with this idea. I do realize that the bus goes direct to the airport from near McChord. That might be enough though. Me living in puyallup would use rail to the airport about 16 times per year.
PIERCE COUNTY	I think you should make additional parking for the stations as a priority. If you don't get to a station by a certain time there is no parking - what do you do then? Forced either to drive into Seattle & pay for parking downtown or park somewhere on the street or mall & hope that you do not get towed or ticketed. Sound Transit & the city is pushing this easy commute but if we don't have a place to park how do we use it. Not everybody is going to or can walk or bike to a station. I think the citizens are trying to take ST but it is not accommodating all of the citizens that want to use it.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Pierce County

PIERCE COUNTY	East Pierce County, specifically Puyallup, South Hill and Graham areas are growing and congestion is only getting worse. A large percentage of residents commute to Seattle, and some at hours when the Sounder is unavailable. We need a North-South solution beyond Meridian, Shaw Rd and Hwy 162, which are jam-packed during commute hours especially. Why do we not have a "Puyallup Parkway" for example, for residential traffic only? Where commercial traffic uses a different highway? I've heard the Garden State Parkway in NJ does this successfully.
PIERCE COUNTY	I live in Pierce County and work in Thurston County and so do many other state employees. We would like to see extension of Sounder or Express bus service south to Olympia and especially Tumwater to ease congestion along I-5 through JBLM. With the I-5 expansion project starting in 2017, this should be made a priority. The whole state does NOT revolve around King County, no matter what Seattelites believe!!!!!!
PIERCE COUNTY	Anyway to get to Lacey....it's as simple as adding back one stop at Martin Road. The local transfer is not feasible.
PIERCE COUNTY	Improve parking at the Auburn station, lot is full by 0615. More parking would reduce congestion on 167.
PIERCE COUNTY	There are no projects addressing the increasing the speed of the 512 South Hill Commute between the malls. Without accounting for drive/bike walk time to the transit centers, current bus service takes over 1 hour and 30 minutes during commuting times. In a car, I can get to work in 30 minutes. Even if I had to ride my bike to get from the transit centers, if you can get the commute time down to 50 minutes, I would ride the bus EVERYDAY. I am unwilling to triple my commute time from South Hill mall to Tacoma Mall. This makes no sense. The projects proposed have zero effect on "traffic" for me. I am willing to support things that decrease congestion on Highway 167, 512 and I-5, but all of these northerly focused projects where Tacoma doesn't get addressed for another 10+ years is ridiculous. I do like the TCC portion of the proposal and partially like the faster buses on Pacific, but the route doesn't impact enough riders. I also question why there is no effort to address car pool vans in areas that could be served by one Express bus if times correctly and again make he commute comparable. How are you evaluating rider ship to push them to more of an express bus route that will drive even more rider ship?
PIERCE COUNTY	Collaboration with Metro Parks Tacoma to combine expanded pedestrian and cyclist access of ST3 project to expansion plans/extension of our recreational cycling and walking paths.
PIERCE COUNTY	Add bus service to the areas not served so as to provide access for those who do not have readily available means to get to rail systems.
PIERCE COUNTY	I saw the potential future expansion of a bus to Orting. The Orting highway (SR 162) is a miserable stretch of road that the state refuses to widen. A vast majority of commuters from Orting love the Sounder Station in Sumner but parking is so limited we end up driving into downtown. Adding a bus line at commute times to the Sounder Station Sumner would be incredible.
PIERCE COUNTY	Sounder south should have an express train from tacona to Seattle with no stops. I don't take the train because it stops too much and doesn't go far enough into downtown. A fast train from tacoma to downtown Seattle I would ride.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Pierce County

PIERCE COUNTY	I live in Auburn and the Sound Transit coverage of this area is abysmal. I cannot travel to and from Seattle for the commitment I have at the Seattle Aquarium using public transport for the times I need. Let's have more Sounder trains during the daytime so we can go into Seattle for less than a day.
PIERCE COUNTY	Extend the commuter rail to Olympia
PIERCE COUNTY	Add a light rail stop in the Sodo area.
PIERCE COUNTY	I think it is imperative to get effective transit from Puyallup/Sumner/Orting to the Eastside .. Bellevue, Kirkland, Redmond. I see no proposals regarding that.
PIERCE COUNTY	I live in Auburn, work in Renton Boeing, yet there isn't a direct route from anywhere south to Renton Boeing -- pretty stupid! Why would I use transit when all of the transfers take twice as long as driving my car in traffic. There are thousands of commuters from Auburn, Kent, Puyallup, Sumner, Tacoma, that all need to get to the same place, yet there is nothing offered direct. I'd really like to know what kind of research is done to figure out what routes to propose. By the time you plan on getting this phase done, I'll be long retired!
PIERCE COUNTY	I would love to see an extension of the sounder train routes down to Olympia, along with additional route times that would allow for travel between Everett and Olympia throughout the day (both directions), and seven days a week. This would allow others beyond just the "traditional" commuters to have travel opportunities that are more cost effective than Amtrak. A trip from Seattle to Tacoma costs approximately \$5 on the Sounder, whereas the same trip will cost \$15-\$20 via Amtrak. And travel for work or pleasure on the weekends is difficult via public transportation between counties.
PIERCE COUNTY	I would love for the Sounder Train to run on the weekends & have more hours. Hopefully with the expanded lines there can also be expanded times to ride the train.
PIERCE COUNTY	They really need to get light rail from Tacoma to Seattle soon as buses are getting over crowded more and more
PIERCE COUNTY	Obviously, finish the main stuff first, but it would be great to connect the light rail to more neighborhoods in Tacoma, like the Eastside and South Tacoma, where incomes are lower and public transportation is more needed.
PIERCE COUNTY	I would like to see Sounder service extended all the way into Olympia, and trains running all day and on weekends.
PIERCE COUNTY	So much verbiage suggesting these proposals are too ambitious. They're not ambitious enough. We need more rail transit. Lots more, and we need the stations to be better connected to other rail lines.
PIERCE COUNTY	At least some basic bus transit should be available in east Pierce County (Sumner, Bonney Lake, Orting).
PIERCE COUNTY	Light link rail service should be added between Auburn and Federal Way
PIERCE COUNTY	Light rail to PUYALLUP. Give us the promised parking in PUYALLUP. Stop ignoring PUYALLUP.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Pierce County

PIERCE COUNTY	In an effort to speed up travel between Seattle and Tacoma please add Seattle Subway's plan to add the following light rail line: Seatac > Tukwila (Riverton) > South Park > Georgetown > SODO (Lander) > International District > DSTT. This line would trim off significant commute time for South Sound residents and provide a real competitive alternative to Sounder and it's ongoing limitations (parking, frequency, sharing ROW with BNSF). For instance creating this line could possibly make a trip from Federal Way to Downtown Seattle in under 40 - 45 minutes as opposed to the planned 60+ minutes. This idea also creates better access to employment and access to rail for long time under-served socio-economically affected neighborhoods much like the Rainier Valley has been transformed by Link Light Rail. Please add this line ASAP!
PIERCE COUNTY	Please consider addition of bus service from Dupont to Tumwater Department of Health- so commuters could take the rail and then transfer to a bus. Offer work stations/internet connections on all services so employers may consider transit time as work status time.
PIERCE COUNTY	Light rail from Downtown Tacoma to Ruston and Point Defiance should be considered. Mosquito fleet for foot ferries between Downtown Tacoma and Gig Harbor with stops along the way to give options to families visiting the car, glass, history and art museums to get to Point Defiance and Gig Harbor.
PIERCE COUNTY	Gig Harbor should be added to route
PIERCE COUNTY	Light rail or other mode of transportation from Tacoma/Lakewood to Seatac airport
PIERCE COUNTY	It'd be great to see more options to the State Capitol.
PIERCE COUNTY	It seems that the South Sound is ALWAYS the last group to get updated services (ie car pool lanes, updated roads, commuter rail, more lanes) It is fantastic that SR16 & I-5 are getting updated around Fife and the Tacoma Dome however the other areas need to be updated also! SR167 car pool lanes STOP at the Pierce County Line!! Where do you think all those vehicles go? Drive the area from 2pm through 7pm. Traffic is backed up from the Pierce County line on SR167 to Meridian and from the Pierce County line on SR167 onto WB SR512 to Canyon. Also from EB SR512 to Canyon also during that time frame. Please start thinking about us 'poor' folk in the south end...we are just as important as the folks in King and Snohomish counties!
PIERCE COUNTY	The extension of the Link from the Tacoma Dome to the Tacoma Mall Regional Growth Center needs to be included. If not Link, then at a minimum BRT service to the Mall. This very important Center is being totally neglected!
PIERCE COUNTY	Greater access to SEA TAC airport.
PIERCE COUNTY	What happened to light rail to the Tacoma Mall? I could much more support this plan if it included more for Pierce county Tacoma. We pay taxes too. I am a politically active person and when I doorbell my neighborhood what do I say to the citizens when the bulk of the work almost all goes once again to Seattle/King County.
PIERCE COUNTY	Expansion of light rail within Tacoma
PIERCE COUNTY	Tacoma Link Light Rail to central University Place (one more station past the community college)
PIERCE COUNTY	Add light rail service to Lakewood where many people work at Western State a Hospital, Pierce College, and on McNeil Island

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Pierce County

PIERCE COUNTY	Areas south of 512 are already becoming congested. Pacific ave, meridian and some roads in Fredrickson 10 years from now WILL need more public transportation of some sort. Meridian is already hard to bare. I would consider more transportation in those areas. It seems the busses almost don't do anything.
PIERCE COUNTY	Orting you so need to have the train go to Orting. There are so many of us that simply do not use the train because we have to way to get to the Sumner station and if we could we would have to walk 15 minutes after parking.
PIERCE COUNTY	Weekend service should be added to the sounder and light rail service.
PIERCE COUNTY	A direct bus between Tacoma and Bellevue is needed. Having to get off of the train in Kent and then deal with an ALL OUT RUNNING RACE to the Kent bus in order to have a seat is NOT funny, dangerous, and absolutely unacceptable. Paying the high cost already and then daily having to stress about whether or not I am going to have to stand all of the way to Bellevue is a problem that you could fix today by either incorporating double buses during the morning commute or additional buses for those key hours between 5 and 7. You don't need years to fix this one. You have station agents that are witnesses (albeit they seem to be humored by it). Perhaps you'd take it more seriously if you had to do it every day as well.  On a different note, you do have fantastic drivers.
PIERCE COUNTY	1. Improved routes from Graham <-> South Hill <-> Puyallup. 2. Extended hours for Puyallup bus services (current buses stop at 7pm, some people work later hours!).
PIERCE COUNTY	Puyallupis never mentioned. Folks need a way to get east and west beyond using 512.
PIERCE COUNTY	I commute from 98391 to Bellevue and Issaquah. As far as I can see, nothing in this \$50B plan will help me. And that's a bummer.
PIERCE COUNTY	With all of the projects that have been completed, there seems to be a "feed" Seattle emphasis. With all of expansion in the south sound, you would think that there should be a "stay around" showing. Perhaps getting the business to come to the Tacoma/ Frederickson area would be more of a reality, instead of driving to Seattle.
PIERCE COUNTY	Please add transportation considerations to Olympia. Travel by Sounder or Linked Rail from Olympia to Tacoma, Seattle, Kent, Everett, etc., is badly needed.
PIERCE COUNTY	Better connection between puyallup south hill and the rest of the proposed projects.
PIERCE COUNTY	More busses in Auburn from Station to Lakeland Hills and vice versa. That commute is horrible.
PIERCE COUNTY	Instead of longer trains, longer operating hours are absolutely NEEDED - say one more hour either side of current operating times. The biggest reason we don't use it is the limited timetable and not being able to get home on the train. Anyone with irregular hours in any way cannot use the train system. Buses take too long and only add to the misery of commuters. If the shoulders of freeways become bus lanes, where do people go if they have an emergency? This will only make things worse.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Pierce County

PIERCE COUNTY	Please consider expanding light rail service all the way to Olympia. While having light rail options extend to DuPont is useful, especially to alleviate some of the JBLM traffic, many people commute to Olympia each day. Right now, there are very few reasonable and reliable public transportation options from Seattle/Tacoma to Olympia. Extending light rail would help to alleviate traffic on I-5, and also provide opportunities to take transit into the capital.
PIERCE COUNTY	Probably some more trains throughout the day from Dupont-Lakewood to Seattle. On Pacific Ave in Tacoma, making service faster throughout that road into and including unincorporated Pierce County. Would it be possible to have more services near Central and eastern Pierce County (BRT/Light Rail)?
PIERCE COUNTY	We need train service or AT LEAST bus service to Graham, WA... Light rail to Graham via canyon road would be amazing and would give a huge community in Graham access to Seattle and Tacoma
PIERCE COUNTY	Light rail service along Hwy 167 corridor to connect with main light rail route between Tacoma and Seattle!
PIERCE COUNTY	They need larger buses for the express routes from Lakewood-Tacoma-Seattle.
PIERCE COUNTY	Auburn Park and Ride Sounder Station. I would 100% take advantage of the Sounder from my work at Starbucks Headquarters (via Company Shuttle from Station) to and from Auburn - if there WAS parking in Auburn and ideally a later train. I also oppose the expense associated with the flyer - the paper is too thick and it could be black and white. To expensive!
PIERCE COUNTY	We need Sounder rail service up the Eastside (I-405) corridor! I live in Sumner and commute to Bellevue. I love the Sounder train but I have to transfer. The freeways are horribly clogged. The buses are too slow. Please, please, please use that eastside trail/rail corridor to run Sounder service. I know light rail is neat, but don't forget about us who live far away. Running light rail further isn't a good option because it stops too much and is too slow.
PIERCE COUNTY	Orting to Sounder Train in Sumner. Graham to Sounder Train in Puyallup.
PIERCE COUNTY	There should be light rail from tacoma dome to the airport.
PIERCE COUNTY	In the future, there should be a rapid light rail service with limited stops. I used to live in Japan and there was regular subway and rapid service between nearby cities. I support ALL rail projects. Rail projects should take into consideration bullet train service, too. In the meantime, we could expand express bus service.
PIERCE COUNTY	Orting is growing fast. Previous construction on 162 DID NOT HELP flow of traffic and accidents. 90% of Orting residents commute long distance, (Tacoma, Seattle, and Further north.) Sumner train station just is not enough! Orting needs bus services NOW! Although, future planning for sound transit would be a blessing for those who commute to Seattle and further north from here in Orting. Today's bus services IN ORTING and ST3 final plan HAS MY VOTE. YES!
PIERCE COUNTY	I live in Tacoma. We need light rail to the airport and to Seattle.
PIERCE COUNTY	Light rail extension to Olympia should be considered.
PIERCE COUNTY	more sounder service from tacoma to seattle especially on weekends and during non commute times during the day instead of any light rail for tacoma area.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Pierce County

PIERCE COUNTY	<p>We really need express bus service between Tacoma and Bellevue/Redmond. There are a lot of people commuting and they have no options to take transit that doesn't include a long transfer so they just drive.</p> <p>We also need to expand the timeline for the sounder train until Light link is in Tacoma/Federal Way and Everett. Having the limited service in the morning and afternoon really reduces the possibility of taking transit for meetings or trips to the City.</p> <p>Please please please, find a way to reduce the timelines. Isn't that what bonding is for? After talking to numerous people, they are supportive until they find out the timeline and they get disenfranchised. 15-30 years is a long time for people and even the most progressive people are struggling with it.</p>
PIERCE COUNTY	<p>The completion of the eastside corridor from Tukwila/Renton to Woodinville/Snohomish should be added to the plan. This is a high need commuter zone and would truly transform the region and allow for more of a looped system around the Puget Sound instead of always having to go through Seattle. King County, Port of Seattle, and Sound Transit purchased this rail corridor for the Region, it should be incorporated now into the next plan to maximize the congestion relief to this region.</p>
PIERCE COUNTY	<p>As traffic problems illustrate, we are far behind in transit and infrastructure investments for this region. Please make all possible improvements rapidly.</p>
PIERCE COUNTY	<p>Additional bus service along the SR161 corridor to Graham. I currently pay transit taxes but no service exists near me.</p>
PIERCE COUNTY	<p>All Day, Every Day, at least every 60 minutes Sounder South Line Service. Sounder service from Tacoma to Bellevue (or at least a point where you can connect to East Link). You do these two things and your ridership will be off the charts.</p>
PIERCE COUNTY	<p>The rain canopy coverage at many of the Sounder stations to the south is useless and pointless, and needs to be expanded significantly (for example, Puyallup).</p>
PIERCE COUNTY	<p>Please take light rail to olympia</p>
PIERCE COUNTY	<p>Why don't you connect the light rail to the existing transit system? Why isn't the proposed light rail connecting to the existing Sounder train service and the ferries?</p>
PIERCE COUNTY	<p>I understand that the State has pretty much shot itself in the foot in the area of truly effective mass transit by creating "regions" whose boundaries limit where the agencies can deliver service. This is unfortunate. I would use rapid/mass transit more if I had more access to it. I live in DuPont, in no-mans land between Pierce County and Thurston County. What we need is more public transportation that not only goes north to Tacoma and Seattle but south to Olympia. When I worked in Seattle, I used Sound Transit daily and loved it. Unfortunately, it doesn't provide frequent enough service to use for transportation to Tacoma or Seattle for other than business hours.</p>
PIERCE COUNTY	<p>The reality is that a transit system from JBLM/Lakewood yes needs to happen, at the same time...,this needs to have several options during high traffic times to allow people to options for travel</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Pierce County

PIERCE COUNTY	I think there should be additional running of the sounder train every weekend and not just for sporting events. I also think it should run later as this would give access to other events in Seattle such as concerts.
PIERCE COUNTY	Provide hourly rail service from Tacoma to Seattle station between 6am and 6pm.
PIERCE COUNTY	I think the draft plan is excellent in incorporating major commuting centers to its overall network I think it is missing an obvious one, link rail to the Tacoma Mall. Like the stops in Tukwila that will cover South Center, having mall locations covered by light rail makes commute for people who work there easier, as well as easier for those who want to get into Tacoma from further out on the line.
PIERCE COUNTY	Expanding the freeway and highways that carry 99 percent of traffic and commerce. I-5, 405, 167, I-90 should be the priority for the next 10 years or more.
PIERCE COUNTY	Add service to Tacoma mall area

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Pierce County

PIERCE COUNTY	<p>I am concerned that there appears to be a disconnect in regards to the Tacoma Mall Center in the current ST3 package.</p> <p>Tacoma has two Regional Growth Centers – Downtown and the Tacoma Mall Neighborhood. A core principle of our policies at every level is that Regional Growth Centers need regional transit service. Transit is an essential ingredient to growth management, Transportation 2040/Vision 2040 and Tacoma’s growth strategy.</p> <p>The Tacoma Mall Neighborhood Center currently has no Sound Transit service. Furthermore, in the current draft of ST3, no Sound Transit service to this Center is proposed. That means you can’t get from there to or from other regional destinations directly. And that would not change for decades.</p> <p>In my view, this is clearly inconsistent with the regional growth vision. We want this neighborhood to play a regional role. Tacoma is planning for double the jobs and triple the population (2040 targets: 15,000 jobs &amp; 10,000 residents). Yet there is no regional transit service. What’s more, given the timeframe of ST3, we’d be making a policy decision that such service would not be added for the next generation or two.</p> <p>I suspect what happened was that when the TMall LINK extension lost out to the TCC LINK extension, there was no alternate/less expensive proposal in the package. That’s the disconnect.</p> <p>In my opinion, we need to add that alternate proposal back in. ST3 should include:</p> <ul style="list-style-type: none"> <li>• <input checked="" type="checkbox"/> Corridor Study for future high capacity transit service to the TMall Neighborhood</li> <li>• <input checked="" type="checkbox"/> The addition of Sound Transit regional bus service to this Center</li> <li>• <input checked="" type="checkbox"/> Once there’s Sound Transit service, several of the open-ended ST3 projects should be brought to bear as well:             <ul style="list-style-type: none"> <li>· Proposed Bus on Shoulder Program: Opportunities along I-5...</li> <li>· ST Express Bus Service</li> <li>· Future System Planning for ST4</li> <li>· Innovation and Technology Funding Program</li> <li>· Transit-Oriented Development Planning Program</li> </ul> </li> </ul>
PIERCE COUNTY	<p>You need to offer at least bus service to Orting until you get the train service. Lots,of people would use transit if they had the opportunity.</p>
PIERCE COUNTY	<p>Rail improvements should extend as far south as Olympia as possible.</p>
PIERCE COUNTY	<p>Public transportation from south communities of Bonney Lake, (where permits to build 9000 new homes have been issued), Buckley, and Orting, which will feel the impact of all those new homes and the additional 10 to 15000 cars they will bring, to the rail station in Sumner. That does not take into account the additional vehicle load of school buses and the commercial growth vehicles.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Pierce County

PIERCE COUNTY	Light rail station in Auburn to connect the growing number of people taking the train into Seattle with the rest of the Pacific Northwest without worrying as much or at all about traffic or parking.
PIERCE COUNTY	I'd love to see Light rail from Tacoma to Seatac, with the ability to connect to other light rail trains. South Sounders/Tacoma residents are frequent transit users as evidenced by our standing room only on buses and trains. I hate to think of Sound Transit's plan as being overly Seattle-centric, given that we pay into this system too, and unlike Eastside residents who fight Sound Transit projects, we desperately want more.
PIERCE COUNTY	Please look at increasing transit access in Pierce county - Orting/ Sumner/ Graham
PIERCE COUNTY	Serious consideration for service to the Orting Valley
PIERCE COUNTY	Orting heavy rail
PIERCE COUNTY	Orting has been paying for the public transport bond for years and we have no public transport which is needed with the added population that has occurred and/or Hiway between Sumner and Orting is in desperate need of widening.
PIERCE COUNTY	Tacoma has a car museum, museum of glass, state history museum, art museum, several theaters, several waterfront restaurants, the new Point Ruston, and Point Defiance Park, all on or within a short walk from the waterfront. It is a tragedy that there is no water bus to carry visitors and locals to and from those sites. Include Gig Harbor to the water bus route, and the water bus service will actually make money! Public water buses are very successful in Copenhagen, London, Amsterdam, San Antonio, and other cities with unique waterfronts. Tacoma's waterfront is perfect for a water bus service from the foot of the Thea Foss waterway to Point Defiance and Gig Harbor.
PIERCE COUNTY	I really support the efforts to link Tacoma to Seattle via public transit and would also love to see a commuter rail that would connect Seattle, through Tacoma, all the way south to Olympia. I would definitely use this type of service if it was provided.
PIERCE COUNTY	I would rather have a connected western washington and include Olympia to the Sounder expansion then expanding bus routes, etc. Until you figure out a way for people to feel safe on the bus, the majority of washingtonians will not use it, especially for long commutes. You will have the same problem that you have now with people choosing to drive themselves. The answer is not to just offer more mass transit options, it's to offer mass transit the people actually want and the people in the South Sound want an extended train system.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Pierce County

PIERCE COUNTY	Vast majority if not all light rail projects should be removed. (Tacoma's current light rail is a joke and waste of taxpayer money.) Light rail is too costly and an outdated technology. Its not suited to areas where jobs are spread out and urbanization of the Puget Sound area. Urbanization will continue as housing costs in metro areas increase. Studies have shown that it takes years to implement light rail plans as opposed to much shorter implementation time for BRT. In addition, BRT is much more flexible and operating expenses when considering all aspects are less for BRT. Studies have also shown that light rail costs 12 to 70 times as much per passenger mile as expressways and freeways. The bright ideas fairies like light rail because federal funds subsidize building it and it may cost less to operate as opposed to buses/service which cost nothing to implement but may require a local tax burden for operations. Transit systems with that add light rail require more energy to operate. Light rail generally disrupts traffic thereby increasing congestion. Light rail doesn't get people out of their cars. U.S. General Accountability Office has shown, transit agencies can run bus services as fast and as frequent as any light-rail line at a fraction of the cost of light rail. ST3 is so weighted to light rail that it leaves one with the impression that Sound Transit as a body is opposed to other modes of transportation. It is clear that the "planners" of ST3 have not read all the studies that show the pros and cons (mostly cons) of light rail systems.
PIERCE COUNTY	Should be added to bonney lake Not everyone lives in Seattle
PIERCE COUNTY	We need better light rail service from Tacoma to Seattle in addition to the very limited daily service. There needs to be week-end service between Tacoma and Seattle.
PIERCE COUNTY	Need additional thought to support growth in East Piece and South-East King County as development is happening for additional homes and the transit system is already needing expansion. Please add transit opportunities and accelerate timelines. Costs to riders seem very low. Increase fares and decrease sales taxes that would subsidize. Even with all of these projects I will still be driving my vehicle to commute to work from Puyallup to Enumclaw.
PIERCE COUNTY	I live in Sumner/Edgewood. I work at the airport and would like to see all the stations be able to support light rail directly to the airport. I would like to see that it is easy for me to get to the airport. I don't use light rail at all because there isn't anything that works for me. There are so many people on the south and north ends that need direct transportation to the airport. Right now my only options are the bus lines and I can drive and get there faster as well as the cost doesn't really save me money. I want to see something that makes all these stations commutable to each other like BART in California. I am from California and I am also a flight attendant for Alaska Airlines. I use public transportation on my layovers in Boston, New York, DCA and California. Seattle needs to get on board and actually do a rail system that connects everywhere with in the Puget Sound. I will not vote yes on any system unless you actually show some planning that really truly includes a MASS rail transit system that will benefit everyone. I voted for this system years ago thinking that finally Seattle will get their act together and have decent rail transportation. I have yet to see a system that has worked for me and many of my friends at the airport unless you live in downtown seattle. PLEASE MAKE SOME PROGRESS!!!!!!!!!!!!!!!!!!!!!!
PIERCE COUNTY	quicker route from Tacoma to downtown seattle
PIERCE COUNTY	Orting to Puyallup/Sumner Commuter Train needs to be added

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Pierce County

PIERCE COUNTY	BUS service between Orting and Sumner, also direct access Sumner to SeaTac airport.
PIERCE COUNTY	Extension of Rapid Ride A to Tacoma All day sounder service every 60 min New sounder line from Tacoma to Bellevue along former east side BNSF line, or via connecting light rail from tyke ills station along 405. BRT will get stuck in traffic and be useless on that corridor.
PIERCE COUNTY	Adding expanded service to Gig Harbor, Port Orchard, Bremerton, Olympia, Tacoma, and nearby facilities. This could include adding light rail service, expanded Sounder Commuter Rail service, Sound Transit Express, and other like programs. Also, Seattle/Tacoma International Airport needs expanded service, or at least increased service times.
PIERCE COUNTY	ST should strongly consider developing projects in underused corridors in order to speed up time to service. In some cases this may mean using alignments that are generally no first pick. But if the option is to get service running <10 years rather than 25 years ... it makes sense for the region as a whole.  Communities will always adapt.  This is particularly true for rail and trail corridors that are underused or not used at all! In particular Seattle-Renton-SCOPA-May Creek-South Bellevue (using DMU type units similar to San Diego and SMART), Puyallup-Orting (divert alternating Sea-Tacoma routes to Sea-Orting with stations at McMillin and Alterdon), and Tacoma-Graham (using Sounder Sea-Everett sized trains), Sea-Covington-Maple Valley (using Sounder Sea-Everett sized or DMU type with stations at Covington Way and at SR169).
PIERCE COUNTY	Increased parking at Sounder Rail stations, especially at the Auburn Station. The parking lot is full by 6:30 a.m. and the City of Auburn has restricted street parking and parking lot parking all around the station. Everyday it's a struggle to find parking and then have to walk three or more blocks to the station.
PIERCE COUNTY	Currently there is no reasonable way to use transit to get from the south end (Tacoma) to the east side. The sounder train and the 590/594 busses are great for seattle but there is nothing to get to the Bellevue area. Please make sure that a bus option is included. Busses need to be running sooner than 8 years. I understand that rail takes awhile and a lot of money but with busses there is so much less investment 3 years is a more reasonable timeframe.
PIERCE COUNTY	Tacoma Dome to Tacoma Mall instead of TCC.
PIERCE COUNTY	1) Additional Express Bus Service should be added in the evenings from Downtown Seattle to Gig Harbor (595). 2) A Peninsula to Downtown route should be included that skips TCC, saving 20-30 minutes of lost commute time. 3) 1-per-day, Express Sounder Trains should be added from end-of-line stations.
PIERCE COUNTY	the only way to clear up traffic on I5 is to increase ridership on mass transit, the sooner the better.
PIERCE COUNTY	Transportation needs in Orting, Buckley and outer Graham needs to be added.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Pierce County

PIERCE COUNTY	I'm absolutely sold on the necessity of expanding any and all mass transit development in the Puget Sound area. The population is destined to increase significantly, and mass transit is the by far the best means available to absorb this inevitable influx. Developing a well-designed, understandable plan to market ST3 to the voters will be absolutely critical. I'm 100% behind the plan, even though I'll be over 80 years old by the time some of the planned projects that would benefit me are completed, but this isn't just about me.
PIERCE COUNTY	Station in McMillan that connects to Sounder Commuter Rail
PIERCE COUNTY	Add commuter rail trains from Tacoma to Seattle to include mid-day and weekend service
PIERCE COUNTY	I would really like to see bus or rail service to Orting. We have no service at all down here.
PIERCE COUNTY	STRONGLY support extending train services to Orting!
PIERCE COUNTY	Rail service to Orting!
PIERCE COUNTY	You need to connect and spend more in the south end of the transit. There needs to be a link added to the sounder in the Graham/Fredrickson area. Why would anyone want to pay for transit at that expense if they do not benefit from it. Which we won't. There are many, many people commuting to Seattle, Bellevue, and Redmond living in this area, and we want a platform out in this area. I'm sorry but if you already live in the Seattle metro area your commute is already a tenth of what the rest of have, and the need is less. The issue with congestion is all of us trying to drive into the city to get to work. Create better service for the people that actually commute.
PIERCE COUNTY	Sounder service from South Center to Bellevue/Kirkland  More times for the sounder from Tacoma to Seattle. Would use it more often if they had mid day service
PIERCE COUNTY	The more availability and choices we have, the more people will use the mass transit instead of driving to work. This region
PIERCE COUNTY	We support transit investments, due to the many health benefits from transit. More Pierce County area voters might approve ST3 if the plan emphasized the economic, health and other benefits to riders and drivers more, and included investments over the next few years in BRT such as the 590/592/594, 574 and other routes.  We also support transit-oriented development that includes healthy places with ample opportunities to live, work, shop and play within 1/2 mile radius of the proposed stations. We encourage multimodal mobility planning beyond the 1/2 mile radius to ensure people are able to walk, bike and bus to the stations, decreasing the demand for parking at and around stations.  Thank you - Marianne Seifert, Tacoma-Pierce County Health Department Community Liaison, mseifert@tpchd.org.
PIERCE COUNTY	If you rode the sounder or just checked I-5 you would realize that most of the commuters are coming from the south. So why are you not committing more money and improvements to Pierce County?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Pierce County

PIERCE COUNTY	You should add more pedestrian and bicycle lanes, so that more people can commute using the sounder, without driving to the stations. That defeats the purpose of taking the sounder, because if you are going to drive to the station, why not just drive to work? Our dad tries to ride his bike to the station, but all of the bike lanes are extremely narrow, and the sidewalks are too. In some areas, there are no sidewalks or bike lanes available. You should add more bike lanes and sidewalks going to the sounder stations. (Specify Puyallup Sounder Station)
PIERCE COUNTY	Why only to Dupont? Many commute from Tacoma area to Lacey/Olympia. Something should be included for that area as well.
PIERCE COUNTY	Seattle to Bellevue Lite Rail should be the highest priority then anything else ... quickly followed with lite rail between Bellevue and Tacoma and lite rail between Bellevue and Everett.
PIERCE COUNTY	We already have the infrastructure in place, thanks to the ST bus system, and you see the demand for the buses and light rail is only increasing. Let's go the next step, build out the light rail system and phase out the bus system, for on-time and stress-free commutes and simple transportation for all.
PIERCE COUNTY	Desperately need a sounder station between tukwila and king st. Myself and many others would take the sounder daily if this were an option. Right now, it adds nearly an hour to my commute time to go to king st., wait for a bus and then backtrack to Georgetown.
PIERCE COUNTY	167- light rail service needed to Puyallup or rapid bus service up 167
PIERCE COUNTY	Run a light rail to the Tacoma Mall, from the Tacoma Dome
PIERCE COUNTY	Many of the existing sounder train stations lack sufficient parking. I take the sounder from Auburn to Seattle and unless I take one of the first three trains of the morning, there's no parking in the lot. I hear the same story from people who take the train from other stations. I think it's important to find ways to encourage people to bike and walk to the stations, perhaps by encouraging new housing construction near the stations.  On the topic of project completion timelines, it would be great if the light rail extensions to Ballard, West Seattle, and Issaquah could be completed early, however it's understandable that these things take time.
PIERCE COUNTY	Use of a gas tax to help pay for the funding would be in line for what is needed
PIERCE COUNTY	More focus on travel between Pierce county & north King county. Many of these proposed regions already have a head start on transit by comparison. For those of us who live south & work north (or vice versa), it a be an ORDEAL! I used to ride the train Puyallup-Seattle, then bus King St-Issaquah. Loved the train, but all of the bus transfers are too time consuming.
PIERCE COUNTY	It should not that long to do all these projects, at the most 10 years. The right permission, right money, right contractors, right overwatch, right consideration of weather and geographical challenges of this area, consider speedy technology methods from other countries, proper project management that is not involved with the bureaucracy of Olympia and corporations and rich individuals but also the population explosion and housing urban sprawl, job sprawl, car sprawl, you name it, its getting crowded here and its taking away from the pacific northwest image of natural beauty and habitat if the developers keep knocking it down and buying up every piece of property and being so indebted and indebting people

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Pierce County

PIERCE COUNTY	Punch regular Commuter Train through to OLYMPIA and terminate. Connect the Political Capital with the Financial Capital of the state! (Oly-Seattle)
PIERCE COUNTY	Tacoma-Seattle Light Rail!  I support my tax dollars going to a good public transportation system :)
PIERCE COUNTY	I'm extremely frustrated that there's no discussion happening regarding expanding existing service to include reverse-commute options. Particularly on the Sounder Rail North route, where there are currently NO OPTIONS for reverse commuters (one Amtrak in the morning only that most people can't even use DOES NOT COUNT!). It does not make sense to me to have trains just sitting idle in Seattle all day when they could be providing service for those that need reverse commute. I would like Sound Transit to hear the message that IT'S NOT ALL ABOUT JUST GETTING TO AND FROM SEATTLE ANY MORE!!! Please drop the Seattle centric attitude and provide some options for people to commute to other places.
PIERCE COUNTY	In terms of public transit, the widespread availability of bus routes and and runs (along with other forms of transit) should be paramount. My bus (Route 400) only runs until 7 pm and doesn't run at all on weekends, so I can never get home via public transit if I work late, which is pretty inconvenient.
PIERCE COUNTY	It still seems as if some alternate form of transportation should be available from the Puyallup/Sumner area to Seattle. If the train schedule does not work out to your work schedule you have to drive to Tacoma and sit in 512 traffic to get there to take a bus to Seattle or drive to Kent to take a bus to Issaquah and then over to Seattle. Otherwise you can hop a milk run bus that takes forever to get to Seattle. There has to be alternatives like adding more train trips earlier and later in the day and mid day trips or Express buses from these areas to Seattle.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Out of District

Subarea	Additional Feedback - Project(s) should be added in the ST3 final plan
Out of District	<p>Seattle is the most dense, and will continue to increase in density. It will bear the brunt of the tax base and should be far better served than currently proposed. By pushing the density outward we are just shooting ourselves in the foot. We should grow our urban areas, not our sprawl. UW- Ballard should absolutely be a grade separated line on this proposal.</p> <p>BRT is a loser. It has been shown time and time again it will be more costly in the long run to pay for the labor in a first world country. Let's think ahead for our region. Don't waste our money and set transit back with yet another albatross.</p>
Out of District	Consider parking structure expansion at sites which are near capacity (eg Issaquah Highlands)
Out of District	<p>Continue north bound train to Everett safety from mudslides</p> <p>Double decker buses in the shoulders</p> <p>Show bus times and car times on overhead signs</p> <p>More bus only lanes</p>
Out of District	<p>I noticed there were no project to increase transportation options to Maple Valley/Black diamond areas. These areas are growing quickly. Now I drive to the train station in Kent, and other people I know drive to the station in Auburn. If there were express buses, or other options from this area to other transit points (maybe to Bellevue or Renton to ride the light rail). I am for improving the south sounder train (including offering another later trip in the evening), the fact that its shared with BSNF means that things could change there, and we don't have control of it. If you want to go all in on the light rail, there needs to be ways for neighborhoods off the line to easily connect with the light rail for trips in and out of Seattle.</p>
Out of District	<p>Sumner needs parking</p> <p>Connection from Sumner to Bellevue needed (It would be great if it didn't take 3 hours each way)</p>
Out of District	<p>With the rapid growth that the Snoqualmie and North Bend cities are experiencing, it is imperative to extend the light rail beyond central Issaquah. Stations should be added to service Issaquah Highlands, Snoqualmie, and North Bend. If these additional stations cannot be added then at the very least, the last station in Issaquah will need to have a large parking capacity for commuters to park at if commuting to the light rail from further distances.</p> <p>Given the cost and time required to build the light rail project, why don't we just improve the bus service by having dedicated lanes and more service? It would be much more cost effective and could be implemented sooner to address the current problem.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Out of District

Out of District	<p>Improve the last few miles. Make transit in the cities better. I live in Carnation and work in Seattle. I'm already satisfied with the speed and frequency of the busses into town, and don't mind going to Redmond or Issaquah to catch one. I tried it for awhile, but now I drive myself. The deal breaker is how much the system inside Seattle sucks. The speed, time it takes to walk to, wait for, and walk from my connection for the last couple miles is what's broken. A train from the Eastside to Seattle would be great, but until what happens in the city at the end of the train ride is fixed I won't be using it.</p> <p>I'd much rather you gave attention to something that can and should be radically improved, instead of a marginal improvement to something that is already being done pretty well.</p> <p>Finally, as a homeowner in rural King county I doubt my taxes do much to support metro Seattle mass transit. I also doubt I get much chance to vote on issues that would raise my taxes to that end. That's too bad.</p>
-----------------	--

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Out of District

<p>Out of District</p>	<p>To sum up my below comment first; this is a great step in the right direction, but it's A) too slow (this needs to be expedited to keep up with population increase), B) not a complete system, C) not inclusive, and D) rushed.</p> <p>To elaborate:</p> <p>A. Let's face a simple fact, the project timelines you are proposing are, for the minimal expansion being offered, way too long. The expansion needs to happen sooner, and the sooner it happens, the more viable mass transit will become for people. It's very simple. There are ways you can cut red tape, increase cost to speed up delivery, but you need to get these project happening sooner.</p> <p>B. &amp; C To say this is a complete system is a joke, especially when talkie about light rail. Sorry, but it's not. You're biggest problem, you ignore communities outside Sound Transits boundaries. That's a big mistake. To be a truly regional system, you have to include surrounding communities. Communities like Renton, Monroe, Marysville, Lacey/Olympia, Bremerton, Puyallup, Snohomish, Yelm, Orting, Enumclaw, Kent/Auburn, Sumner, Duvall, Woodinville, Arlington/Burlington. None of these communities, even the ones close to Seattle, will be served by light rail under this plan. A lot of you're traffic up and down I-5 &amp; I-405 comes from these communities. You want people to not use cars, then get service to these locations.</p> <p>Furthermore, one light rail "spine" isn't going to cut it. As more stations are added, more spurs completed, your "spine" be as overcapacity as I-5. You need at a minimum two north/south spines for this regional system to have any hope of being successful. And guess what? The eastside rail corridor serves almost all the communities I-405 does, and it's right-of-way is intact. No need to spend billions in right of way acquisition. And a regional trail could easily be included alongside light rail. You could extend this spine north through Snohomish to Everett, and south through the Kent/Auburn valley to Puyallup and Tacoma. And suddenly you have a second LR spine with most of the right of way already in existence. I would suggest you guys begin to study this route, as it'll be far faster, easier and less expensive to build then demolishing homes for a right of way that doesn't exist yet.</p> <p>And a quick note on duplicative services. Having light rail in the Kent/Auburn valley is not duplicative. Sounder trains cannot travel to the east side. A light rail line from Tacoma/Puyallup to Renton then following the east side to Bellevue provides a service only I-405 can serve. And we all know how well the I-405 corridor is handling the regions increased population.</p>
<p>Out of District</p>	<p>Complete all studies first and then do projects.</p>
<p>Out of District</p>	<p>Need to add projects to the Covington, Maple Valley, Black Diamond area And along Hwy 169 to Renton. Currently there are no reliable service options to get residents to a transit center that features BRT, light rail or trains. Cars are our only option to travel. We literally have one bus route. I will not pay for a mass transit plan to rich metro areas that neglect my community for up to 25 years which completely does nothing for my community.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Out of District

Out of District	If little old Portland can have a train service, north to south, east to west already in place and we are talking 20 years.. seriously.. also buses on the shoulder will just cause more accidents, the buses travel too fast now when traffic is slowed down.. Give us trains on their own tracks or a mono rail and yes it worked all these years with few breakdowns.
Out of District	Extend to north bend. You took away our service and now make most commuters drive to issaquah taking up parking space in the p&r. I have used bus service for over 30 years and find my commute the worst it's ever been. The rural communities are growing due to cheaper housing but we have very limited options for decent commuting.
Out of District	Light rail is the best form of local transit. And, it should be extensive. I wish my native Houston's @METRORail would follow suit.
Out of District	The south east region is ignored and is a major growth area. Maple Valley, Covington etc are expected to pay but will receive no benefits.
Out of District	More projects are needed for East Pierce County. East King County has enough options. Large employers in East King County offer shuttle options for their employees. ENOUGH \$\$\$ has been spent already on East King County.
Out of District	NE light rail should be included
Out of District	I live in Tacoma and work in the Technology industry which is all on the east side. An easier way to reach Bellevue from Tacoma (e.g. Bus Rapid Transit or Shoulder Bus) would be extremely valuable. Right now my only option is Pierce Transit Van-Sharing which is not always reliable and doesn't always get me to where I want to go.
Out of District	Practical East/West routes (Ballard/Fremont/Udistrict, etc) need to be added! This is the biggest weakness of the entire system.  The timeline is also incredibly long.
Out of District	It is embarrassing and disappointing that the Greater Seattle and Tacoma areas do not have established rail services. I believe there should be a rail or bus system from Monroe all the way down 522 and connect to already proposed systems for both Seattle and the Eastside. I lived in London for 2 years. I used their expansive and very useful rail and bus systems everyday. I was never late for work, I was always able to get where I needed to go, and I always felt safe. If I was out for an evening or coming home late from an event, I knew I didn't have to make decisions about drinking and driving or finding a cab home and alternatively I knew I wasn't on the road with other people who made the poor decision to drive home drunk. For a city as large as Seattle is and becoming, it is absolutely crucial a train system is in place as quickly as possible. As someone who lives in Monroe and works in Kenmore, there is without a doubt I would take mass transit to work everyday if it were an option, SR 522 is a mess in the mornings and evenings and I spend about 10 - 15 hours in my car each week.
Out of District	Light rail should be extended to the Mukilteo transit center. The Sounder service is good when it operates, but the current hours of service are too limited.
Out of District	I'd love to see an extension to Snoqualmie area

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Out of District

Out of District	Extended service hours for ST Route 592, to include midday service that bypasses Downtown Tacoma and Tacoma Dome Station - weekday morning service ends too early considering the demand at Tacoma Dome Station. Also, better service between Thurston and Pierce Counties that are ORCA Card-accessible, such as an ST Route 592 equivalent that connects directly with afternoon South Sounder trips to provide express service to Olympia that isn't affected by Seattle or Tacoma traffic congestion.
Out of District	Adding weekend bus travel and more buses would help NOW. There are no options for weekend bus travel from Gig Harbor which is apart of this system. What is the plan for this area? This area is also growing extremely rapidly but only 3 buses and no weekends! What about from the Purdy Park and Ride or Gig Harbor to the Ferry system for people who need to get to Seattle?
Out of District	Consider an eventual extension of the South Sounder to Olympia/Lacey. Traffic congestion on I-5 from Tacoma to Olympia is a significant problem and drain on resources. The sooner the extensions to Dupont can happen the better but also the service needs to eventually reach Thurston County.
Out of District	You have completely ignored the 100,000 or more people that live south /east of the I5 or 405 corridor that are depending on 2 lane roads to commute to buses or trains to get to work (hwy 516, 169 & others)
Out of District	I would like to see a Ballard-to-U District line on the light rail. That is the biggest transportation pain that I experience regularly, and the geography makes it a perfect fit for underground light rail.
Out of District	Light rail should support ALL local municipalities, (White Center, Burien, Des Moines, West Seattle, Federal Way, etc.). Light rail should run from the Sea-Tac station into Burien. Rapid-Ride should only be used to service areas not close to the light rail stations.
Out of District	Why is SE King county ignored? Nothing for Covington, Maple Valley, Black Diamond, or Enumclaw taxpayers? The county doesn't end in Renton or Federal Way.
Out of District	BALLARD TO UW PLEAAAAASE FFS
Out of District	Extend Sounder to Marysville. I-5 in the north Everett area gets extremely congested already.
Out of District	I think extending the Issaquah line all the way to Highway 18 and having a large park and ride there along with finishing the grade separation and widening of the stretch over Tiger Mtn. would insure that the people in the East King County and Covington Maple Valley area have access to the transit network.
Out of District	We needed this project yesterday!! Completion of this project should be much ealier than 2041.
Out of District	Extend service to Maple Valley/Covington. We already have a rail line available that connects to Auburn. Light Rail in Issaquah sooner than 25 years is my top priority! I would love to see a park and ride at the 18/90 interchange with an express bus to Eastgate or Issaquah light rail.
Out of District	Expansion of full park and ride lots like south everett park and ride.
Out of District	PLEASE CONNECT OLYMPIA, WA to these plans! I cannot believe that OLYMPIA (the Capitol of Washington State!) is left out of all of these plans and that this proposal is being talked about as "finishing" the Sound Transit system! PLEASE CONNECT OLYMPIA, WA by rail and, less importantly, additional bus service!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Out of District

Out of District	Please please please expand/keep the bus between Olympia and Seattle. It's made my life soooo much better!!
Out of District	light rail on i-405!
Out of District	I don't understand why the state Capitol is being overlooked by this plan. What about Olympia? People in Olympia want to go to Seattle as well, and commute to/from Tacoma and even Seattle. I would like to see a light rail from Seattle to Olympia. That I would wholeheartedly support.
Out of District	Downtown Seattle to Madison Beach : For one thing, it is quite hard for people to get to the hospital district. There's no station near Broadway and Madison, except the streetcar. A Rapid Ride along Madison or something might help. At any rate, the area of homes between Broadway and Lake Washington is surprising unserved by buses or anything.
Out of District	The Kirkland leg to Totem Lake is missing...Why? Without it I'm not sure I can support ST again! How did Issaquah get a rail line and Kirkland DID NOT??? PLEASE ADD IT TO THE LIST OF PROJECTS.
Out of District	There should be a light rail on 405 from Lynnwood to Tacoma. These projects should be paid for by the users (riders) not taxpayers and defiantly not by increasing property taxes. I will not vote for more taxes especially to pay for something I don't use and that does not serve my area. Thanks
Out of District	Put Light Rail on the Cross Kirkland Corridor. As a Kirkland tax payers I am appalled at how little Kirkland is getting compared to other cities in the region for the more than \$350,000,000+ in taxes we will pay over the next 15 years on ST3. Lets review: <ul style="list-style-type: none"> <li>• A \$240M bus stop in the middle of a highway interchange that Sound Transit admits fewer than 1,000 people will use each day and requires pedestrians to cross major streets and freeway offramps to access.</li> <li>• A half mile of bus lanes.</li> <li>• A parking garage allowing a few hundred more people per day to use the Totem Lake Freeway station and a few hundred more for routes 252/257 to downtown Seattle and local service.</li> <li>• New &amp; more buses on 405 but little to no improvements to local service within the city.</li> </ul> BRT on 405 will be almost exactly like today's Express Bus service provided by routes 532&535. All told fewer than 2,500 people will board BRT at the two stations in Kirkland each day. Half of what ride Metro's route 255 today. Get Light Rail on the Cross Kirkland Corridor or consider me a no vote for ST3.
Out of District	It's nearly impossible to take public transit from Tacoma to the Eastside. I don't the current proposal changes this. Thanks for listening!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Out of District

Out of District	Add more parking space to Ash Way P&R. The parking is full by 8 am weekday. Build a parking building (similar to Bellevue's Eastgate P&R)!!!
Out of District	Please consider an Olympia station!
Out of District	The people living in Bothell, Kirkland, Kenmore, and Woodinville should not have to continue to finance highly costly light rail service to Bellevue and Redmond, when we experience some of the worst traffic in the area. If Microsoft wants light rail, let Microsoft help pay for it. Other than replacing existing Metro routes with a little ST bus service our area has received virtually nothing for its ST investment thus far, and ST3 just promises more of the same. Break the Eastside into north (Kirkland, Woodinville, and Bothell} and south (Bellevue, Redmond, Renton) districts and then come back with a plan that shows we actually get something for our money.
Out of District	It makes no sense not to include mass transit to Olympia to the south and Marysville-Smokey Point to the north. Those areas and traffic flow are terrible. Why fix some and not the others, especially with that big of a pricetag? Let's really plan for the future and include those areas. Puget Sound has been too far behind in mass transit for half a century. Let's not continue to stay behind.
Out of District	The entire length of I405 needs light rail and not bus. 522 from Monroe to I5 desperately needs light rail. Buses should be added in the interim but they need to be added immediately!! Light rail from Monroe to Everett Station needs to be added as well.
Out of District	More above ground/elevated trains (digging takes forever and is expensive) also add something for people in east Seattle
Out of District	Connection of light rail to Olympia
Out of District	Any chance that something could be done to make sounder service between Everett and Seattle more reliable during the rainy season? Frequent mudslides disrupt service. I would also like to see more Sounder service between Everett and Seattle. I currently ride the 510 every weekday and know a number of folks, myself included, who would take the train if there was an earlier run than what is currently available.
Out of District	A couple random comments: Lynnwood Transit Center already fills up by ~7:30am on weekdays. I am sure the experience is similar at other busy transit centers/park and rides around the region. If parking is this bad now, it could easily become the limiting factor in transit usage within ST3's lifetime. Most people really don't want to take 2+ busses or bike/walk too far on their commutes. I know you are planning on adding parking at Lynnwood TC for light rail as well as transit oriented development near stations, but please do not neglect parking improvements (garages like at Mountlake Terrace TC) systemwide so that people can actually use these high speed transit lines easily. Secondly, it would be nice to know why it takes 8 years to add a BRT line. Couldn't it be added more-or-less immediately and then improvements made after it is already running? I am probably just not aware of how much goes into this, but maybe more explanation of why certain improvements take so long would help people swallow the relatively long horizons of ST3. Finally, busses on shoulders is a great idea, especcally for getting a lot of bang for the buck. BRT (and even normal busses) should really have a lane on their own at this point so as to be more reliable like light rail, and using the shoulder means cars won't have to lose a lane to do it. Great idea! Maybe publicize that more to show how ST3 is committed to keeping costs down.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Out of District

Out of District	Expand in Tacoma sooner. Connect Tacoma to Seattle sooner.
Out of District	Hwy 169 from Enumclaw to Renton should be a VERY HIGH PRIORITY yet it is NOT even being considered!! Try driving on this road during commute times. And bus service is ridiculous and NOT convenient.
Out of District	Add areal light rail on the I5 and 405. For instance take a look of Mexico City or Rumanian subway system an example of what can be done. Where people don't have to have a car in order to transport.
Out of District	Buses should convey passengers from North of Downtown Seattle to South of Seattle (Kent, Sea-Tac, Tacoma, etc.) without need for transfers, and they should be faster than autos when freeway jams (most of time heading South towards downtown Seattle), possibly by a return of the diamond lane on I-5 North of downtown, or use of freeway shoulders. Effort should be made to purchase new buses that are electric.
Out of District	I strongly support all public transit plans and planning studies that will help reduce car traffic, especially through the downtown corridor, by connecting neighborhoods to work centers.
Out of District	Let's get ahead of it. There is not a plan for light rail for the city of Snohomish or up into Lake Stevens, Woodinville, or Monroe. I use light rail for all Sounder games. ( I park at a friends and use the Columbia city station ). My family just went to San Francisco and parked at friends house and rode the light rail into Sea Tac. if it were closer I would get on earlier. Light rail is the way to go. A 25 year plan to get light rail out to outlying areas is just too long. Rob Starritt 425-418-0094
Out of District	Light rail tunnel from Ballard to u district. Light rail up 23rd.
Out of District	Expanded express bus and /or light rail between downtown Olympia and aeattle.
Out of District	(1) Please create a fast efficient option in the Ballard-Fremont-Wallingford-UDist/Ravenna/Greenlake East-West corridor. Light rail would be ideal. (2) The Ballard and West Seattle rail schedules should come online much sooner. thanks!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Out of District

Out of District	There is a gaping hole in this plan, and that is transit service from South and Southeast King County to the Eastside cities of Issaquah, Bellevue, Kirkland and Redmond. The plan is too Seattle centric, and ignores the tremendous growth that is occurring in these Eastside cities, and ignores the developing population boom in areas from Issaquah and Maple Valley to the south and east. These areas and routes are continually ignored in transportation planning. My commute from Enumclaw to Bellevue has lengthened from 45 minutes to 90 minutes, on average, over the last 15 years. I have always worked in Bellevue, and when I shop or seek out recreation, I usually head to Issaquah/Bellevue/Kirkland. Waiting until 2040 for a rail line to Issaquah from Bellevue is totally unacceptable. Seattle and even South King County already have multiple transit options. East King County service and connections from South and East County to cities on the Eastside is totally absent. Please try navigating these routes during commuting hours, and see for yourselves. Take a look at the amount of employment in Issaquah, Bellevue, Kirkland and Redmond, and Bothell, and then consider that there are MANY people commuting to those communities from Maple Valley and Southeast King County. Issaquah-Hobart Road and Highway 18 are over capacity. Downtown Issaquah is choked with traffic. Maple Valley residents detour through Issaquah in spite of the traffic there because there are no transit connections to the Eastside, and I-405 is even worse than Issaquah-Hobart Road. I am going to find it pretty difficult to support this \$50 billion transit package unless you put a higher priority on getting more service to and from South and Southeast to the Eastside; we cannot wait for 25 years, and we cannot make do with only one light rail spur from Bellevue to Issaquah.
Out of District	Light Rail from Everett to Marysville Washington should be added to ST3 Final Plan
Out of District	These projects have discussed and studied for the past 30 years. Build the damned things, BUT DON'T FORGET THE FOLKS IN RURAL AREA. We don't have adequate mass transit available, which is why I don't use it. I'm over 4 miles from the nearest bus stop.
Out of District	We have waited too long for a reliable mass transit system. The Seattle region would benefit greatly from these improvements.
Out of District	Extend the light rail down 6th ave and down pearl st to the pt. defiance zoo, expanding access for families who have transportation issues. In addition the expansion of the light rail down 6th ave would significantly increase local commerce and decrease drunk driving. As a local I would go out more often and spend more time and money if there was safe reliable consistent transportation and I didn't have to pay for parking.
Out of District	Burien is a major Seattle suburb, It is only 15 miles from downtown, yet the transit options are horrible, burien needs to be connected to the light rail, either from tukwila , or west Seattle
Out of District	Light rail or brt to mukilteo via pane field from Everett
Out of District	Need rail along the 405 corridor. Buses are not enough.
Out of District	Marysville to Everett projects to improve traffic
Out of District	Dupont sounder station the more cars we can remove from JBLM corridor the better. Really only one north south route due to the military base.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Out of District

Out of District	Better access to the light rail and sounder train would be very beneficial. Parking at the train stations and better bus routes to these sites from more rural areas around puget sound would help ridership.
Out of District	I would like to see better transportation from Downtown Olympia to Seattle
Out of District	also expand into Kitsap...we all need reliable public transportation
Out of District	Light rail down meridian in puyallup
Out of District	We need High Speed transit with 3 stops Everett Station - King Street Station -Tacoma on a dedicated track (not using the current (shared) use of the existing rail. Too slow! Everett to King street in 20 minutes. Use the Heathrow Express as an example.
Out of District	The Tukwilla station for light rail is very accessible, particularly for South Sound commuters who do not live near transit facilities. . However, there is not enough parking. As a result, I never even attempt to use it to travel into Seattle because the probability of finding parking is too low. That station could support a much larger parking area and it would in turn increase ridership. The biggest problem would be getting traffic into the parking structures during peak hours.
Out of District	I think extending Sounder Train farther North would be very beneficial. Possibly to Marysville or Mount Vernon, since many people commute from farther North. I take the Sounder Train and ST express frequently, but that only cuts my car commuting time each day in half. There aren't many easy/frequent bussing or train options from farther North than Everett and traffic through these areas is heavy during large amounts of the day.
Out of District	The provisional status of the 130th Street station, should be a planned, because "provisional means What?"
Out of District	The Ballard to UW line is a must. This should be added to the ST3 plan.
Out of District	I hope that at some point, the Maple Valley, Black Diamond, Enumclaw corridor will be on the light rail plan. 12,000 new homes are slated to be built in the next 10 years in Black Diamond alone.
Out of District	I would like to see sounder rail extent to Stanwood or even Mount Vernon.
Out of District	Your survey did not allow me to select improving the Sounder rail service between Seattle and Tacoma along the Kent, Auburn, Sumner and Puyallup corridor, which you guys always forget and should be the top priority. Lots of voters down here and you just need to increase the frequency - no rails to build.
Out of District	You also need to include growing areas such as SE King County in Covington and Maple Valley especially if you are thinking of 25-30 years in scope. Issaquah is just as far out from Seattle but why are they considered for light rail? The mass transit options in SE King County are poor and the roads are inadequate to handle all the increasing congestion in the area. More developments are being constructed in this area faster than road options to handle the increasing volume. There was a study done in 2010 by WSDOT to provide commuter rail service along the BNSF Stampede Pass line but it lacks funding from Sound Transit. This would be a greatly missed opportunity and would help to ease traffic issues in this area a lot.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Out of District

Out of District	Light rail to Kent definitely should be added to the project. The Sounder train only services commuters - early morning & late afternoon and does not provide enough parking to use the train. Light rail stations should all include parking - currently SeaTac to Seattle only provides limited parking at the Tukwila stop - a multistory garage is needed. Light rail usage would escalate if parking was provided.
Out of District	What about Olympia??? Every legislative session everyone traips back and forth. Even non session months I drive to Seattle at least once a week for work. DuPont isn't far enough south!
Out of District	Light rail from Lynnwood down the 405 corridor to Bellevue.
Out of District	If the commuter rail ran more often and on weekends, I would be more inclined to use it as it is faster than the so-called rapid ride buses.
Out of District	I would like to see the north bound light rail to extended from Everett Station to Smokey Point, preferably Stanwood. Monroe/Sultan should be part of the Redmond light rail line, or at least part of the Rapid Bus Network. Thank you.
Out of District	Why is there no mention of Marysville or Smoky Point in this 25 year plan? The traffic up here is every bit as awful as anywhere else, especially because of all the growth, why are we expected to pay taxes on this plan when our city and community isn't even mentioned in this proposal?
Out of District	Enhance bus service to move pedestrians from Mukilteo ferry to the I-5 corridor. No available service on weekends now
Out of District	No eastside rail? It all goes to Seattle and Tacoma? Really? They don't need yet another transit option. They have bus, trolley, light rail, trains, monorail, taxi, it just goes on and on you are not solving problems like the 405 mess.
Out of District	please speed up the process of creating light rail from Lynnwood to Seattle and Lynnwood to Bellevue!
Out of District	Improved access to existing light rail facilities -- for examples.... at Sea-Tac airport, where the long, dreary walk exposed to the weather is a deterrent to use; at Mt. Baker and University District stations, where crossing busy streets is required to transfer between rail and buses; in the downtown transit tunnel, where there are no down escalators and the elevators are often (sad to say) used mostly as toilets and smell horrid as a result..
Out of District	As a former Puget Sound area resident, I believe adding a multimodal transit hub to provide direct connections is essential to the success of this plan. Considering the likely future need for truly high speed intercity passenger rail, you should also add this to your plan now to allow for easier implementation of this mode.
Out of District	Add more park and rides in Bothell area to help commuters fully utilize the current buses to Seattle. Basically provide good last mile connectivity to homes. Just adding the transit centers and buses won't help since most of the buses don't go to residential areas and people need a way to ride from their homes to the transit stops.
Out of District	We need to consider extending Link Light Rail to Snoqualmie and North Bend. The populations in these cities will continue to grow and have a large tax base to draw from.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Out of District

Out of District	There needs to be a light rail line that connects the current UW to SeaTac line to the Eastside, from Renton, and up through Bellevue and Redmond up to the proposed Lakewood stop. Also, a light rail line from downtown Seattle across Mercer Island to Bellevue should be considered. The light rail is beautiful and environmentally responsible, and of course doesn't make anywhere near as much noise as cars on the interstate!
Out of District	I strongly believe in growing transit to the east side. However, I feel commuter rail is more relevant and appropriate for lines built on the east side. I will support any transit measure that can improve King County, but I strongly suggest considering commuter rail in place of light rail the line to Issaquah
Out of District	Please do not forget about residents in northern Snohomish County, Skagit and Whatcom.
Out of District	No projects are currently reaching Monroe, Snohomish or Lake Stevens even though there is a major chokepoint to get from these three fast-growing cities to Everett. Most traffic must use the over-taxed and dilapidated trestle. There are very few and infrequent buses that have inconvenient transfers in Everett.
Out of District	A Sounder station in Ballard should be studied and hopefully included. Such a stop would boost ridership on the Sounder North line and act as an early delivery to Ballard which would not get light rail for many years thereafter.
Out of District	Get light rail to Everett sooner than 25 years, add light rail to the Eastside Rail Corridor between Snohomish and Redmond, add light rail to HWY 2 corridor between Everett and Gold Bar.
Out of District	Commute support for the east side is completely left out for major employers such as Microsoft and AT&T. There is currently NO bus service that runs directly from the north end to the east side without diverting through the I-5 corridor in Everett and Lynnwood. Employers such as Microsoft are implementing their own bus service at select locations because no other service exists. Light rail is an overpriced boondoggle and does not effectively move people or goods as the population and employment centers change. I experienced two terrible motor vehicle accidents in the last year, and I COULD NOT get a bus from my home to Microsoft following surgery, even though I live within city limits. I could not return to work until I was able to drive 12 miles, and then I still had to transfer three times. It takes more than 2.5 hours each way to travel 22 miles per bus and 12 miles per car. Thank heavens a colleague was willing to meet me and drive to work! Adding a rapid transit line from Arlington to Issaquah along the Highway 9 / 522 / I-405 corridor could be implemented in a much more rapid timeline and help so many more people at a much lower cost per mile. You also need to take into account the automation advances taking place at Google, Microsoft, Apple, and other companies that will have dramatically changed the transportation landscape in the next 25 years.
Out of District	Amtrak goes through Stanwood and other Snohomish and Skagit county town centers. Same thing south sound. Why is it nearly impossible for a working commuter along these routes to directly take light rail all the way into Seattle at a reasonable cost? This is really what light rail should be doing, instead of bussing around neighborhoods. Let's open up job opportunities to everyone in our region and improve access into the metro core. I will oppose any project inside the metro area until we also put resources into extending transit beyond it for all regional taxpayers and wage earners.
Out of District	Direct access from Issaquah to downtown Seattle via light rail.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Out of District

Out of District	The Sounder from Everett to Seattle seems to be closed for landslides more often than it is open. . . Are there plans to fix that?
Out of District	I lived in the San Francisco Bay area for 14 years and used the Bay Area Rapid Transit system regularly (sometimes to work and college when I had no car). It was economical and saved many hours stuck in traffic between Concord (then, the end of the line) and Oakland, Berkeley, San Francisco and south. I took BART to and from the Oakland Coliseum for As games, to San Francisco for concerts and other events and in 2006 from SFO (light rail could go to & from Sea-Tac easily to save time and money) to my hotel in the South Bay and back. It's something that we should do here and I was beyond disappointed when I moved to this area and there was no light rail. It's crazy that supposedly intelligent communities can't come together for the greater good to approve such a plan.
Out of District	In addition to Light Rail between Seattle and Everett via Northgate, Light Rail from Everett to Renton via Snohomish, Woodinville, Kirkland, and Bellevue should be considered NOW.
Out of District	1) Funding-wise, I'd like to see a development tax levied against developers, and a capitalist cap tax for businesses making over a certain amount of profit all the population growth that is clogging the existing transportation system. Tax these rich [explicit]; they are ruining Seattle, and should at least contribute heavily to the infrastructure. 2) I live in Renton, and mostly travel to Seattle, so none of the proposed plan is of much help to me. I love taking public transport, but I can't have my commute take upwards of 1.5 hrs, and multiple transfers, and have the cost rising as much as it has. It's unacceptable. 3) You've left Renton (and Bothell) out of the light rail loop, which virtually guarantees the ghetto-ization of those areas, so I am not on the whole pleased with the plan. It also goes without saying, that this should have been started, oh say, about 25 years ago when the population started exploding. I grew up in this area, and I'm pretty angry about how dysfunctional and inadequate the transport system has been and is here. There's no real excuse for not addressing this earlier. Having said that, I am still in favor of improving it and expanding, even if I don't benefit from it personally, as it gets cars off of the road, and others will benefit.
Out of District	Need public transportation off Hwy 16 and on the Key Peninsula 98349
Out of District	SH169 corridor transit improvements should be added into plan.
Out of District	Greater access between Mukilteo and Lynnwood/surrounding areas is needed. The Whidbey ferry run is one of the busiest and most popular in the state, and it's as of yet extremely difficult to go anywhere from the island without taking a car. Mukilteo & Clinton experience massive commuter and tourist traffic around the ferry. At the point that you're getting stuck waiting several hours for the ferry in your car because no efficient/convenient mass transit option is available, *something* could be done to alleviate this. Please, give us more Sounder train runs throughout the day.
Out of District	You really need to look at adding additional buses or light rail to Maple Valley and south east king county. The transit options here are limited. With more and more people moving into king county, especially into and around Maple Valley there needs to be more public transportation. Thank you!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Out of District

Out of District	Connecting those that live East of Renton, down 169 should be in the plan. There is a population explosion in the works with the new homes being built in this area. Get in front of the problem this time instead of reacting to it after the fact! :)
Out of District	Extend Sounder Rail Service to Smokey Point. More people would ride the Sounder if it had a station in Marysville or Smokey Point. The motivator is to not be in Everett traffic. It is a huge bottle neck there and the congestion, as well as the population could move a little farther north. Thank you for doing this!
Out of District	I'd love to see more consideration for growth west to Gig Harbor (and eventually Port Orchard, Bremerton, and Silverdale), south to Olympia, and north to Bellingham.
Out of District	Project should include pedestrian tunnel from ferry terminal to Pioneer Square transit station.
Out of District	Would love to see an extension to Monroe via 522 and Monroe via Highway 2
Out of District	As a taxpayer in the City of Renton, we are woefully under represented in ST3. As it stands now, I will vote against funding this highly unbalance plan. This is continued taxation without any benefit to nearly 90,000 residents Go back to the drawing board - Boeing, Paccar, UW/Valley Medical Hospital are some of the largest employers in our region and there is insufficient transportation options - Link Light Rail, BRT and PR lots included in your proposal to serve Renton's needs.
Out of District	Don't forget Maple Valley, Covington, Black Diamond, and Enumclaw.
Out of District	I took the survey but my computer decided to spaz when I began writing this. So - my address is 755-5th Ave NW, Issaquah. There are businesses here in Issaquah that have a high percentage of Seattle customers and building fast transit (train preferred) from SEATTLE to ISSAQUAH would be a well invested project. Village Theatre brings in 500 people 7-8 times a week for just their Mainstage performances. They have a unique service found in only one other place in Seattle and many subscribers are loyal and steel themselves to make the commute for their shows. To travel between Bellevue and Issaquah, for me, is not an issue as Bellevue holds nothing interesting or unique. Seattle, however, does. Building a fast train between the eastside and Seattle is the key element to solving the dense car pack that I have experienced for the past 15 years. Thanks for reaching out to the community and good job on the ST train from Seattle to Sea-Tac. Bravo!
Out of District	Light rail from Seattle (going through Bellevue and Issaquah) to North Bend, with it continuing up to Hyak. Light rail from Sumner/Auburn to Bellevue and Issaquah Light rail to Portland from Seattle/Tacoma Light rail just everywhere in our state, modelling it after Europe and Asia Raising taxes to help lower cost, and to help complete the project faster
Out of District	Once again Arlington, Marysville and Everett are left out of the process. please bring light rail/commuter service from Arlington/530 to Everett. My other responses indicating I don't use transit are simply because there is no or highly limited transit to use.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Out of District

Out of District	The ST3 plan, in its currently published iteration, is NOT enough to support the needs of the current traffic bottlenecks. All you need to do is watch the morning news or listen to the radio for the traffic reports. The main pain points are SR167 up through I-405 where a great deal of South Enders are getting to work on the East Side. As well as completing the rail along the length of the I-5 corridor through the Seattle area up through, and beyond, Everett. The State needs to take or relinquish oversight to Sound Transit and gain support of County and City Departments of Transportation to expand the Light Rail to more areas and on a much quicker timeline than 25 years out. The State also needs to cancel any non-essential projects to fund and provide resources to the larger Light Rail system. The Washington mass transit system is decades behind other cities, and this mess will only become greater as there more people start to migrate to this region. The long term goal is to get cars off of the roads, lower emissions and dependency on oil. The current highway/freeway system should be left to Long Distance/Charter Busses, Freight and other Deliver vehicles Service providing vehicles (such as Cable, Heating, Electrician type vehicles that are customer driven) and Emergency vehicles.
Out of District	What about the Eastside Commuters; Issaquah, Maple Valley & North Bend Commuters? We need light rail to/from downtown Seattle seriously. WHY are we, (Eastside commuters) continually being left out of these Plans? It is so FRUSTERATING! The bus service that we have now cannot handle the number of people that now drive into downtown Seattle because of the poor bus system! There has been significant growth in our area for the past 5+ years, and continues to worsen due to all of the continued growth in our area. The Issaquah Park-n-Ride lot is full with no parking available after 6:45 am; therefore more people have chosen to drive in to downtown Seattle. Additionally, the Issaquah-Hobart Road cannot handle the daily grid-lock of vehicles coming from the South-end/Covington, Auburn, Enumclaw areas, exiting from HWY 18 & turning onto the Issaquah-Hobart road which will take you straight to Issaquah!! We need more options than just one Park-n-Ride lot in Issaquah, so everyone now drives their own vehicles into Seattle. The bus is no longer an option for many of us.
Out of District	I strongly support mass transit projects (in this case, Light Rail). But, unless your plans are revised to include Light Rail in the I-405 corridor, I'm going to vote NO in November. Light Rail is intended to reduce auto traffic in our freeways. We have 2 major freeways in the North-South direction, one in each side of Lake Washington, I-5 and I-405. Yet, your plan brings Light Rail only to one side of the lake along the I-5 corridor. Why not along the I-405 corridor? In Kirkland, with no right rail in your plan, you're asking us to pay the same in taxes as the people who will benefit from Light Rail from Tacoma to Everett? Your response will be, "But you will have bus service". Please accept the fact that bus service is not the same thing as Light rail. From Bellevue to Woodinville Sound Transit can use the existing path of railroad tracks and Cross Kirkland trail to lower the cost of providing Light Rail in Kirkland. Hundreds of thousands of people live between Renton and Bothell and they deserve to have light rail as much as people in Redmond or West Seattle
Out of District	Light Link Rail should be the priority....getting people from Bellingham to Olympia & beyond.
Out of District	The entire 405 corridor should have light rail ahead of many other projects and instead of buses on 405. Reliable transit and freeway should extend to Monroe.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Out of District

Out of District	It is important to align residential zoning for future development with transit plans. Areas which will be served with transit should have higher residential density while areas with poorer access to transit and no prospects under this plan (e.g. southeast King County) should have lighter residential density.
Out of District	Olympia should be included as there are thousands of long distance commuters making the daily grind to the Seattle area. Please extend Sounder at any cost to Olympia ASAP. Would gladly pay to use it. OR, expand the Amtrak Cascades scheduling. The tracks and cars are already there, make more use of them, especially morning commute times.
Out of District	You don't think you should serve south county? Ashford, Eatonville, Graham and the 161 corridor currently have no service - you eliminated it - leaving those farthest from economic centers with no options, but auto, and isolating some of the poorest in the county.
Out of District	The plan still falls far short. It does too little and takes too long to accomplish its goals.
Out of District	Need to add light rail lines between bothell n Bellevue to alleviate the constant traffic. Need to convert central bus infra to light rail metro
Out of District	Rapid bus service from North Bend to Issaquah and Bellevue College/Eastgate Parking
Out of District	There is too much hesitation to get this project going. We want rail in this city and we want it bad. Look at how successful the UW line was! There's finally a real reason to use the rail on the North end and we're talking about 30 years before we make it any better?! I understand it takes time, but this city will have outgrown the infrastructure before we've even finished building it. We NEED a plan that can get these projects started sooner. Remove some of the red tape, make permitting easier for light rail, make a subcommittee whose sole purpose is to get the rail going sooner. Sound Transit has proven they can get these projects done under budget and ahead of schedule so they deserve to have our trust. We shouldn't have to start over every time we want another line, we need a comprehensive plan that helps ALL neighborhoods of this city. West Seattle to Ballard needs to happen ASAP, that is a priority to connect the outskirts with the downtown corridor. The 130th station needs to HAPPEN, not be a review. We are building the lines already, we need to put stations where they are necessary instead of costing millions more down the road to backtrack and decide we want the station. We need to take this seriously and not let our own bureaucracy get in the way of making this city livable once again. By the time this project is finished at the current rate, Seattle will be too expensive to live in for anybody who would actually benefit from the light rail.
Out of District	N-02cmod + BRT should be the survey and in the final plan. [name]
Out of District	We live in a seriously underserved area. Enumclaw. Commuting by public transit is very difficult here as all public transit ceases at 7 pm and hours on Saturday are very limited. There is no transit on Sundays. Several surrounding communities have no transit service at all. Would Sound Transit consider extending a line that goes through Summer and Bonnie Lake up through Buckley and Enumclaw? It could end out in Auburn or even Federal Way. If there was something that ran on evenings and weekends even if only every few hours, it would be wonderful!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be added in the ST3 final plan - Out of District

Out of District	I would have liked light rail through Kikland but understand our City Council mucked this up for us. Our city has horrendous traffic congestion and the buses on 405 likely won't help much
Out of District	Please do all you can to help I-405! I-405 is the 2nd most crowded highway in the Northwest. Why are we not doing light rail along it?! I realize that if we can't have light rail, at least the rapid bus transit will be quicker to implement. But why aren't we doing light rail there? If you can't do that, then why are we not double decking it with earthquake proof structure? Do all you can for it! I'm in favor of everything else you are proposing and can do for rapid transit.
Out of District	Project should include light rail to Olympia and or lacey
Out of District	i think we need a lightrail from downtown tacoma to downtown seattle. as a bus rider I see how every day it gets more and more packed and the times of buses are short for where I live in tacoma
Out of District	There needs to be rail service between Bellevue & Seattle to ease congestion on the bridges. Plan is not nearly ambitious enough. The plan is addressing a current problem with a solution that takes 25 years. The Plan will not cover the needs of the region in 25 years and so we'll be perpetually behind the needs.
Out of District	Parking to catch the bus is currently a HUGE problem. There is NO parking at any of the major express parking lots along 405 or I-5 unless you can arrive before 7 am, which is not always possible for people who have kids to get to school first. I would like to see a walk-on ferry from Kingston to downtown Seattle.
Out of District	Acquiring the existing train tracks and access rights that run on the eastside heading north through Bellevue/Kirkland/Redmond/Woodinville/Monroe
Out of District	Light rail to connect Maple Valley/Enumclaw to metropolitan areas
Out of District	Lynnwood/Everett to Bellevue Light Rail. I-405 is a disaster and will only get worse.
Out of District	Light rail to ballard should go through fremont. There are a lot of people living in fremont and north queen anne that go down to SLU and downtown during working hours. Would be good to connect Fremont into the light rail or trolley system.
Out of District	Return/expand transit service from Sumner Station to East Pierce Co. Communities.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

Subarea	Additional Feedback - Project(s) should be modified in the ST3 final plan
SNOHOMISH COUNTY	<p>I will definitely support ST3 this November (even if the time frame is quite long, I still think it's important we do this now instead of waiting), but I'm hoping a few of the plans for light rail can be changed and improved.</p> <p>I live in Lynnwood, and while I'm excited for the coming station in 2023, I'm not so thrilled about the extension to Everett via Paine Field. I would much rather see light rail go to Everett station (and in the future Everett College) via Highway 99 for multiple reasons: there is greater potential for Transit Oriented Development and renewal along the SR 99 corridor than a Paine Field routing; light rail service would not duplicate or make redundant Community Transit's Swift BRT--in my opinion, it would only enhance it; Community Transit is already planning a second Swift BRT line into the Paine Field/Industrial Zone that will make a stop at the intersection of Airport Road and SR 99, providing an easy transfer from light rail along SR 99 to Swift II; it seems very challenging to provide access to Paine Field, Boeing's plant (the largest building in the world by volume...), and all the other job centers around Paine Field/Industrial Zone with only one or two light rail stops--it's a huge, huge area better served by Community Transit's world class Swift BRT; in my view, it'll be years before any robust passenger service at Paine Field to justify its own light rail line, and I'm expecting a long, long fight in court over whether to allow service from homeowners in Everett and Mukilteo; an SR 99 routing, by Sound Transit's estimations would be faster than a Paine Field routing, and serving only job centers would create poor midday ridership compared to, just by my own eye estimations, the perpetually nearly-full 512s heading out from Everett to Seattle; finally, forgive me if I'm wrong, but I think I've seen talk that the reason the time frame is so long is because the funding required for these projects is so large. Would shifting the Everett link routing from Paine Field to SR 99 reduce costs, thus allowing the line to be built faster? I think an SR 99 routing seems like the happy medium between an I-5 routing and a Paine Field routing.</p> <p>The time frame is also another concern. If getting the projects done sooner means raising taxes, I fully support that. Last year, 51% of voters in Community Transit's PTBA in Snohomish County approved a tax increase--that's in suburban, car-dependent SnoCo, not even counting the relatively urban Everett.</p> <p>I also want to put my full support behind a Ballard to West Seattle line, but it really has to be a tunnel. It seems absurd to put the Ballard to downtown line-probably one of the routes to see the most ridership-over a drawbridge that has to yield to maritime traffic. I would also like to see at least a study of a Ballard to UW tunnel and a "Metro 8" subway. I really want to see more light rail in Seattle proper--and I say this as someone who lives in the suburbs. I hope Sound Transit can explain to people in Mill Creek and Auburn, for example, that treating Seattle, the heart of our region, as a true city on par with many others around the world will benefit them, too.</p> <p>Couple more things, this time about Sounder. One, is it possible to extend the north line service beyond Everett, either to Marysville</p>
SNOHOMISH COUNTY	<p>Paine Field does not have the capacity to support light rail now or in the near future, unless commercial traffic reaches a significant figure close to that of Sea-Tac. It simply does not make sense to waste extra money and time to divert trains for a handful of commuters that might work in those areas.</p> <p>Also, adding UW-Ballard would be a hugely useful perpendicular line to relieve the 44 bus corridor of congestion and facilitate better cross-town trips.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	You have to get to Everett and the north end sooner than 2041. For someone who doesn't take transit, but understand the community value, there is no way that this should take 25 years. I get you are trying to balance the bond funds and financing, but this may kill the project entirely when we are desperate for transportation alternatives that work for the bulk of the population and not just a minority of activists.
SNOHOMISH COUNTY	Moving north to Everett and beyond should be a bigger priority - these are the individuals putting the most cars on the road because there is barely any good or frequent transit options from up north to Seattle.
SNOHOMISH COUNTY	This needs to happen as fast as possible, in order to support our current and future population
SNOHOMISH COUNTY	I believe that making Light rail from Everett to Seattle should be made a priority to be completed sooner, but then I live in Everett and work in Seattle, so I may be a little biased.
SNOHOMISH COUNTY	Northend and West Seattle are my priorities.
SNOHOMISH COUNTY	There seems to be little thought on being cost-effective with our money. Are we trying to accommodate everyone? Let the Ballard line go east to the UW. They can connect to downtown from there. West Seattle can connect to Georgetown. Does it need to go all the way into town? We go north from the airport to Seattle and now to the UW. Why doesn't it go to Federal way or better yet, Tacoma? Yes, we want people to use it but let's be a little more frugal with my money.
SNOHOMISH COUNTY	How are you going about working with Community Transit, Everett Transit, and Pierce Transit (all of which I'm currently being taxed for as well)? How are you going to get the cost for fares down? I really like the idea of an I5 corridor light-rail system, but with fares already being non-competitive with driving a reasonably fuel efficient car, it isn't economically viable for the average person who already owns a car. Plus you want to raise taxes to implement it. Also, 25 years to complete the project! That is absolutely ridiculous. I would be paying increased taxes for 25 years before the promised improvements even get in place. If you want to get cars off the roads, make it a better option to take transit (cheaper, faster, or in some way better than taking a car.) Maybe by actually using some existing money to improve the system instead of running stupid ad campaigns that I'm sure just annoys people and convinces nobody to use transit). This is a good idea with a piss-poor implementation. If I didn't get a free pass from work to use the transit system, I would most likely be commuting by motorcycle to work.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	<p>I live in Mill Creek and so you'll see in my responses that I may have more heavily weighed the parts of the plan that directly affect rapid transit reaching my area. I'll admit that I'm doing this partly for selfish reasons, but I truly believe it will also be the more effective piece of the plan in increasing ridership. I am fortunate enough to have a job that doesn't require me to come in at a specific time, and I also don't have any time sensitive obligations like picking up kids from school. However many of the people I work with do have these commitments, and many friends have strict start times that persuade them to choose their car over transit. But if we had light rail that could guarantee travel times that weren't dependent on traffic, you could convince so many of those people to abandon their cars for a quicker, more environmentally friendly, and more affordable option. I also commute to downtown Seattle where I take a D Line rapid transit most days, and have and will continue to use light rail from downtown to get me to the airport. I understand the need, urgency, and necessity of expanding the whole system, but I think the focus on downtown areas is only allowing the system to make minor improvements. We need a major change to help fix our congestion in a rapidly growing city and 25 years is too long to wait. To ask taxpayers from all of our suburban areas to pay 200 dollars a year for 25 years before they receive a real benefit is also unacceptable.</p> <p>I'm sure it is easier to prove ridership in downtown residents who will be continuing to use transit, instead of starting to use transit, but the larger benefit for the system will come from expanding the reach of transit, not its density. I would urge you to employ BRT options to reach Ballard and West Seattle to focus on areas which have yet to be serviced. With this approach I think you will find much more support from residents of Snohomish County and many others who have been choosing their cars over an unpredictable transit system for years.</p>
SNOHOMISH COUNTY	Light link rail between from Everett to Bellevue (preferably near the existing transit centers).
SNOHOMISH COUNTY	25 years to complete will be too late.
SNOHOMISH COUNTY	Smaller plans costing less money would go over better to the tax payer. Additionally, how will ST handle more and more cars going electric and relying on less petrol, thus not getting taxed like other cars?
SNOHOMISH COUNTY	All proposals should be grade separated and no draw-bridges!
SNOHOMISH COUNTY	We need Light Rail from Lynnwood to Seattle as soon as possible. Leaving it as one of the last projects is a mistake IMO. The majority of Highway slowdowns I see are from the north end coming into downtown Seattle. The stop of traffic at Northgate is deadly.
SNOHOMISH COUNTY	I am a big supporter. This should have been done in the 70's. My problem is this plan is the time table to Everett. When you have pissed off a supporter, the whole project is at risk. Run it up I-5. The park and rides are already there. Time table and dollars are better.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	(1) Serving Paine Field serves tomorrow's population, not today's, and most of us will be dead or retired by 2041. That makes this plan DOA. Buses from Everett to downtown Seattle/Bellevue are full TODAY. Build Ev-Link on I-5, Swift 2 runs to Paine Field from 128th in 2018, ST can pay to continue it to downtown Everett (since apparently the frequent existing service won't do). All of the buses from S Snohomish County were eliminated in 2003 and NEVER RESTORED. My subsequent vanpool petered out in a few months due to LACK OF INTEREST. Bus service from N and E Snohomish County was scaled back in 2010, most still not restored. The "demand" just isn't there! Worry about our existing problems first! While waiting for LRT, use the \$1.3 BILLION in capital costs saved and the 44% lower operating & maintenance costs/year to complete the NB direct access ramp at 164th and put a new one (both ways) at 128th. Then, buses can stay in the HOV from Everett to/from Seattle (no crossing lanes of traffic to exit and re-enter!) and Bellevue, which will ALLEVIATE CONGESTION TODAY. (2) UW to Ballard has been a problem for at least 4 decades and should be in this plan. The traffic nightmare from platoons of Metro buses could be alleviated if this was in the plan! It also recognizes that people from Ballard commute N and that residents of points N work in Ballard. Why should everything go through downtown Seattle? (3) Ballard to downtown should be via the more-populated Fremont vs. the lesser-populated Interbay, the latter duplicating Rapid Ride D. (4) The most-congested part of I-405 is Bellevue to Renton, yet they ALWAYS get left out. I was told that ST decided not to allow LRT on I-405 long ago, but conveniently I saw that Kirkland may now get an exception, despite the ridiculously high capital cost/rider relative to all other LRT projects. (5) BRT along SR 522 already exists, but this formalizes it (ST 522 + Metro 372 are already frequent). Woodinville folks would be better off with a BRT that goes to the Lynnwood station - it's all freeway vs. plodding through SR 522.
SNOHOMISH COUNTY	The Sounder train already runs a nice route, but it is unusable for a large portion of the population due to its schedule. I live in Lynnwood and work in Tukwila, 10:30am to 7pm. The last train leaves Edmonds in the morning at 7:41am and the last train leaves Tukwila at 5:39pm. This is unusable. It seems there must be more people like me, and you already have tracks and infrastructure. Just make more runs!
SNOHOMISH COUNTY	Running light rail to Everett should be one of the first priorities.
SNOHOMISH COUNTY	I would prefer seeing the Boeing corridor between Everett and Tequila completed first. This would serve a massive amount of Boeing traffic as well as all of downtown Seattle. The core needs to be strong before we add longer sides.
SNOHOMISH COUNTY	Everett by 2041 is a betrayal of promises made decades ago. It's enough for me to actively advocate against st3 even though I am the worlds biggest fan of light rail. Keep your promises this is pure Seattle centric bullshevik.
SNOHOMISH COUNTY	Light rail from Everett to Seattle should follow I-5, not go to a new airport terminal at Paine Field. If it does not follow I-5 do not expect my vote!
SNOHOMISH COUNTY	More attention needs to be given to Everett to Seattle needs. We were told we'd have light rail way before this proposed time!
SNOHOMISH COUNTY	25 years is too long to wait for light rail to downtown Everett.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	I think the most important light rail projects are the ones along I-5 and I-405. And coming in from the North and South. This will take care of much of the traffic as people move North and South to avoid the high costs of metro Seattle living. I am not sure about light rail going into neighborhoods (Ballard). I think that cities are better served by buses. I also think it is incredibly important to have a robust bus system for those people living in between light rail stations or farther away from the stations. Buses also give more flexibility. We know at some point the light rail will have a problem, so we should have a robust bus support system. It is critically important to have trusted local bus service to the stations. It may take years to get people to ride to the light rail, but you need to work with the other transit systems to ensure that the local service to and from the stations is robust, consistent and will be there no matter how few riders there are.
SNOHOMISH COUNTY	The east side of King County has repeatedly worked against the Metro and Sound transits interests to expand services. I feel that We need to de-prioritize the east side and focus on the Areas that continually ask and want the additional transit options. North and South are willing to pay, and we should focus on the east side last.
SNOHOMISH COUNTY	The proposed timeline for 25 years until light rail is extended to Everett and the Everett Boeing facility is too long. The plan is biased toward the south end of Seattle even though areas like Marysville, Arlington, and Lake Stevens continue to grow at a significant rate. The I-5N bottleneck cannot be expanded or solved with busses. In 25 years, traffic will be ridiculous, even for busses. You are already looking at bus traffic bypass options, which is a short term attempt to fix the problem at best.
SNOHOMISH COUNTY	Anything to expedite the process of extending to Everett would be beneficial.
SNOHOMISH COUNTY	Please explore options to increase delivery speed of all projects. In particular moving up BRT, bus shoulder driving, minor station improvements could be relatively easier to move forward and could be a good early face for the plan. Showing some, any decent results after a couple of year would be better than waiting such a long time to see any changes.
SNOHOMISH COUNTY	It is important that the spine of the system, Everett to Tacoma, be completed before adding off-shoots. Both Ballard and West Seattle have more than adequate bus service by Metro. The potential for riders north of Everett (Marysville and Beyond) using light rail in my mind is higher than Seattle suburbs which already have established transit systems. Plus, Boeing workers live all over the Puget Sound basin and the Paine Field/Everett line will give them the flexibility to transfer to better jobs with "guaranteed" transportation. Finally, it is important to provide sufficient parking for commuters. the theory that many will arrive at light rail stations by bus is not valid.
SNOHOMISH COUNTY	Travel from the Everett/Marysville area needs to be addressed sooner

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	The time frame being proposed for the ST3 plan is absolutely ridiculous. I'm 40 years old, I live in Edmonds and commute in my car to work every day on I-5. Some days I commute to Northgate, Seattle and other days I commute to Everett. Your plan means the link light rail to Everett will not be completed for 25 years. That is ABSURD! I will be retired before I can ride the rail to work in Everett. I'm a big supporter of public transit and would be willing to pay much more than \$200 year to speed up this process. Your time frames for ST3 really need to be reevaluated and improved!
SNOHOMISH COUNTY	25 years is way too long to get a light rail system to Everett.
SNOHOMISH COUNTY	Remove all unnecessary projects, adjunct stations. Build stations in rollout process with next closest station built first. Limit unnecessary stations or improvements. Work on the "spine" of ST3. Station design should follow freeway with rapid bussing as necessary. Do not deviate, so as reduce cost and timeline. 25-30 years is unreasonable expectation for project completion. Everett spine should be finished in 15 years. Everett and Eastside transit (to Bellevue/Redmond) should take precedence over all other projects, because they are major business hubs and consequently utilize the system most consistently. A bare minimum design structure should be in place without too many unnecessary additions, because of cost, timeliness and significant need.
SNOHOMISH COUNTY	I've been an early and very supportive proponent of Sound Transit and I have willingly voted for and paid these taxes, but 25 more years until we reach Everett...it would nice to see the light rail to Everett before I die (literally!!).
SNOHOMISH COUNTY	<p>Running the Everett line through Paine Field is terrible and super annoying to everyone north of that section. Run that as a separate loop with transfers to the north and south, like this: <a href="https://goo.gl/maps/QbusuZct9i82">https://goo.gl/maps/QbusuZct9i82</a></p> <p>Also, the 25-year timeline to finish the line to Everett is completely unacceptable. Full stop.</p> <p>No way am I voting for a plan that will take 25 years just to build an incredibly suboptimal route. Go back to the drawing board.</p>
SNOHOMISH COUNTY	<p>I live north of seattle and commute daily. I absolutely agree with the lite rail plan from Everett to Tacoma. That is a bulk of traffic going north and south on I-5. I vigorously oppose going to Ballard and West Seattle, when Seattle has spent money on the streetcar. They can extend that to neighborhoods rather than the lite rail.</p> <p>The Bus rapid transit lines can bee extended to Kent or Tacoma college, too.</p> <p>Keep the lite rail to help with the highway congestion. That will be the biggest bank for my buck. Utilize the busses more efficiently. I will not vote for the draft plan if the final plan says city of seattle neighborhoods are included in the lite rail expansion.</p>
SNOHOMISH COUNTY	Plans are much much too slow. 25 years to fix the issues in thenNorth end increases the likelihood of failure because without faster relief business will move before the problem is solved. Need to address the 30% increase in transit times on the i5 and i405 corridors to the north end before more businesses leave the region.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	reduction in projects in Ballard & South Union .. it is wrong, wrong, wrong for the region to have to support businesses who want to locate/expand in those already overly congested areas. There are better places with better infrastructure for business growth to occur.
SNOHOMISH COUNTY	The Everett/Boeing segment of light rail needs to be completed first; it should be added to the top of the list.
SNOHOMISH COUNTY	The Eastside (Bellevue / Issaquah / Renton) have been largely left out of mass transit development. However these areas are experiencing record growth because of the non-urban setting and affordability. We continue to see mass transit options develop throughout Seattle, however more and more the population is choosing to live on the Eastside. Continuing to ignore the impact of all of the traffic driving into and out of Seattle to offer light rail and bus services to an increasingly elite downtown Seattle area is short sighted. By building mass transit solutions that allow people to live further from Seattle yet commute in a way that makes EVERY road less crowded should be the focus. Stop forgetting the Eastside!
SNOHOMISH COUNTY	Lynnwood to Everett should be the first project on the plan.
SNOHOMISH COUNTY	BRT (Bus Rapid Transit) PLEASE alter the Bus routes and offer an EXPRESS bus from Lynnwood Transit Center to Bellevue Transit Center. It is absolutely ridiculous this doesn't exist. Especially for early mornings and exiting to do the milk-run stops at the UW Bothell Campus. MOST IMPORTANT for ANY and ALL transportation plans is the NEED for FREE PARKING!!!!!!!!!! Figure out how much parking is needed and then double it because who ever planned for it in the past really missed the boat.
SNOHOMISH COUNTY	Please do not neglect bus lines running East to West. Bus lines from Ballard or Fremont to the University District are very important, as are those running from Downtown to Capitol Hill. Please also remember bicyclists when planning new lines; there is only room for one bike in each of the Capitol Hill light rail cars. If you don't notice the other bicyclist before you get on with your bike you have to stand in the way of pedestrian passengers because there's no space another bike. Perhaps install hanging racks like in the Minneapolis light rail.
SNOHOMISH COUNTY	-I see no mention of parking improvements/expansion at existing Park & Ride lots, all South Snohomish Park & Rides are already at capacity and need to be expanded. -North Sounder will never be a viable corridor until a significant slope stabilization is completed. Added parking is pointless until corridor reliability improves. -Sound Transit is a regional system, West Seattle and Ballard corridors should be handled by Seattle/KCmetro.
SNOHOMISH COUNTY	Light rail to Everett needs to be much sooner on the schedule.
SNOHOMISH COUNTY	adding busses to the I5 / I405 won't work. remove the pay as you go lane on the 405, it is a complete failure and has resulted in increased gridlock. Light rail from Everett to Seattle is the only solution.
SNOHOMISH COUNTY	Transit to Lynnwood and Everett should run sooner.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	Priority should be placed on the Lynnwood to Everett/Paine Field project due to commercial air service being offered out of Paine Field
SNOHOMISH COUNTY	<p>Modifications:</p> <p>Remove all the small light rail extensions off of I-5 and I-405 in the plan. First, complete light rail from Everett to Tacoma. Next complete light rail on 520 and I-90 to Issaquah (with a stop in Bellevue (Factoria area or Coal Creek potentially). Where this station on the Eastside stop at Factoria, have it connect with BRT (that goes from Everett/Lynnwood to Tukwila/SeaTac Airport (Even better would be light rail from Everett/Lynnwood to Tukwila/SeaTac with stops along the way to connect with BRT that go to the outside communities not directly on the I-405 corridor. Improve sounder train service from Everett to Seattle, so it is not unusable every time it rains/snows some due to landslides or other issue on the tracks (which seems very often being at the bottom of a bluff/cliff). Reroute it if possible. Cut down the price of the plan and timeline for these key components. The current plan cost too much and does not really help getting around any better than now. Thank you.</p>
SNOHOMISH COUNTY	Everett and Tacoma should be added before West Seattle and Ballard. Coming south into Seattle and north into Seattle are the worst traffic times in the morning and vice versa in the afternoon. A good plan would help those who need it more first. You would get more support if you help the masses first. Please rethink the time line for Everett and Tacoma.
SNOHOMISH COUNTY	I believe we should reconsider the Light Rail going near Boeing in Everett. The Light Rail should follow along I-5 to Everett and big companies like Boeing can shuttle their employees from the stations, just like Microsoft, etc does in Bellevue surrounding areas.
SNOHOMISH COUNTY	The Everett Lynnwood light rail need to be expedited. The light rail backbone (north to south) need to be priority.
SNOHOMISH COUNTY	Taking buses is a pain. The more that you can extend the light rail system, the better I think.
SNOHOMISH COUNTY	Busses are unreliable and can get stuck in traffic. You should work on getting the light rail stuff going sooner. I used to live in Germany and the light rails and subways they had ran like clockwork. They were very reliable and a good alternative for a commute. Busses were less reliable because they still get stuck in traffic. I mostly used busses to go from my house to a rail station. Light rail is the way to go if you want to reduce traffic. It's a reliable option that people can actually depend on.
SNOHOMISH COUNTY	Getting to Everett sooner would be great!
SNOHOMISH COUNTY	Seattle to Everett shouldn't wait for 25 years, and shouldn't go to Paine Field. Too expensive and too dependent on Boeing goodwill to stay in the area. Frequent buses from other stations along a less expensive path could meet that service need.
SNOHOMISH COUNTY	Lynnwood (Ash Way) to Seattle Light Rail should be first priority. This would alleviate so much congestion on I-5. Everett to Seattle would be even better.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	<p>I absolutely love the idea of greatly expanding light rail. What troubles me are that the costs and timeline for completing these projects is way out of bounds compared to similar projects in the world. I work on a project where we are developing a new brand new airplane engine with new technology and will be complete with designing and building it in a matter of a few years, not a few decades.</p> <p>Parking at the light rail stations is a must. It's not realistic to expect people to add on an additional hour to their commute in order to utilize this system.</p> <p>Finally, the most cost effective move ST could make is to have the trains go back and forth throughout the day, from Seattle to Everett. I used to drive this commute only because that option did not exist.</p>
SNOHOMISH COUNTY	The plan for light rail to everett is to far off. I will be dead by the time it gets here. We need i how!!!
SNOHOMISH COUNTY	Its taking to freaking long
SNOHOMISH COUNTY	<p>I'm happy to spend even more \$ but 25 years is too long to wait to get light rail to Everett.</p> <p>The current plan doesn't seem to show how it benefits Everett residents and businesses. The system should not be set up to serve residents only but should support access to businesses, such as those in SW Everett.</p>
SNOHOMISH COUNTY	Complete the spine to downtown Everett before projects to West Seattle and Ballard. Snohomish County has paid into this system for 20 years, it's unacceptable for it to take another 25 years for light rail to reach downtown Everett.
SNOHOMISH COUNTY	I'd love to see the timelines moved up. I hope to be retired by the time light rail comes to Everett, which won't be especially helpful.
SNOHOMISH COUNTY	Timing is absurd. 8 yrs before first project implemented? Changes to bus portions can and should be implemented within 1 to 2 yrs. most popular (per this and/or subsequent surveys) should break ground within a year. It feels like the same problem repeating, building for traffic now. The proposal should already be in place!
SNOHOMISH COUNTY	Routes to Everett should take priority over those to Ballard and West Seattle.
SNOHOMISH COUNTY	With the high cost of housing in Seattle, I would strongly suggest creating light rail for the outlying areas like Everett sooner than 25 years for people commuting to Seattle. I'm also concerned people won't like paying more property taxes to support this much needed project. Is there federal money available?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	<p>The HOV Lanes were built as a temporary mass transit till lite rail down the middle of the freeways was feasible. We are beyond that need to have a dedicated reliable lite rail system serving the greater seattle area. If you feel you cannot stop the HOV bus / auto transit, then build the Lite Rail over the top of HOV as an elevated line. This will save money and speed up getting the trains as fast as possible without having it snake back and forth across I5 and limiting freeway growth.</p> <p>The amount of time to build lite rail it out of line with the needs of moving people now and reducing auto's on the freeway system. Due to incompetent politicians, you have a convention center over the top of I5 and have limited the ability to grow the needed freeway system. You also have a mess of merging on ramps from I90 and the sports stadiums onto north and south I5. The need to reduce congestion is needed now not in 10 to 15 years when it will be even worse.</p> <p>Stop the expensive train runs along the water front, stop expansion of bus lines and focus the funds on buildin the Lite rail system NOW over the next 3-5 years. Built it as an elevated system where people walk out to the center and get on the rail to move into the cities and have local bus lines in the cities. Then you can remove the existing express bus lines from county to county and just have people use the lite rail to move around and then transfer onto local buses.</p>
SNOHOMISH COUNTY	These projects need to be done sooner.
SNOHOMISH COUNTY	It should not take 22 years to Paine Field and 25 years to get a Link station to Everett. Stop worrying about the Bus systems that clog up the roads and freeways for other drivers, put the money into building the infrastructure for the LINK system and get these projects built faster.
SNOHOMISH COUNTY	Connect Lynnwood to Everett sooner in the plan.
SNOHOMISH COUNTY	I live in Everett. This time frame is not acceptable, as I will likely never be able to use the system, as currently structured, and thus don't support the taxes to build it.
SNOHOMISH COUNTY	My understanding is that building light rail through Paine Field will slow the completion of rail to Everett, compared to a line that followed I-5 to Everett Station. Community Transit is already planning BRT from 128th to Paine/Boeing, which could provide this service from a I-5/128th station. I view the completion of light rail along the I-5 corridor as extremely urgent, and would hope that various transit agencies could coordinate to provide service to Paine/Boeing, even if it involves a bus transfer. I work at Paine Field, so I would love to say that rail service could benefit me, but alas, at the old age of 31, I will be retired by the time it is complete.
SNOHOMISH COUNTY	Everett CANNOT wait 25 years for light rail!!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	<p>The timeline to Everett is unacceptable! 2041 is 25 years away. This is crazy! Many of us will not even be able to use it by then! The line to Everett should be re-prioritized so it is completed much sooner for it is part of the original "spine" of Link rail. Also, millions can be saved by not serving Paine Field and just traveling up I-5, this also reduces commute time. Also, going up I-5, Link rail also can serve the Everett Mall area with a station. Serving Paine Field is redundant due to the planned Community Transit "Swift II" BRT service that is scheduled to be operational by 2018 (between Boeing and the Bothell area). This service intersects with Mariner Park and Ride at I-5 so riders can get off Link at that location and continue to Paine Field using Swift BRT. Other Link lines, in the Puget Sound area, can have similar adjustments made where BRT is serving the area or where the service is planned. The ballot will more likely pass if this is done and it will save billions in tax-payer funds. Please make this adjustment for a smarter and more affordable system that will also more likely pass by the voters.</p>
SNOHOMISH COUNTY	<p>With more companies moving to Seattle waterfront and lake Union we need more cross town options. I.e. Expedia 4,000-5,000 on Elliot avenue!!!! How can that area support such growth?</p>
SNOHOMISH COUNTY	<p>In light of the fact that Everett SD is one of the fastest growing school districts, it makes me wonder why the Everett portion of the plan is being built last. It seems to me that it should be a higher priority than seeing fruition in 25 years.</p>
SNOHOMISH COUNTY	<p>We need light rail to Everett much sooner than in 25 years. It is very difficult and time consuming now to travel on I5. I think the schedule prioritization is unbalanced. You risk losing support in Snohomish County waiting 25 years. Buses and commuter rail do not match the transport capacity of light rail. Buses still get stuck in traffic. North Sounder gets shutdown by slides. Please reconsider.</p>
SNOHOMISH COUNTY	<p>Plan has Everett expansion way too far in the future; money should be spent on more Sounder trips, not on bigger trains. I'd love to take the Sounder into town but if I go I have to go rush hours and stay all day -- not viable for me and hundreds of others. And yes, I can take a bus but can't park after about 6:30 am.</p>
SNOHOMISH COUNTY	<p>Light rail is way overdue for the north corridor. Everett is a disaster area with all of the Boeing traffic and this should be your first consideration. We are tired of paying and receiving nothing but lip service and excuses. We were supposed to be one of the main reasons for signing up for this endless money pit. The hardest hit are the retired. And people on fixed incomes. Tax the people who use the system. The major employers in the region should be the people who pay for this. They are the people who benefit from it. We are sick and tired of you people wanting to raise our taxes all the time.</p>
SNOHOMISH COUNTY	<p>The plan to go to Boeing on the way to Everett is wildly crazy. First of all Boeing workers do not use transit-they love their trucks. Boeing may pull out and move -what then? Too expensive and does a disservice to the majority of snohomish residents who work in Seattle and don't want to prolong their trip home.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	Developing, completing and connecting trails such as the Interurban, Burke-Gilman, Jon Wayne pioneer and Centennial trails would be an extremely valuable low cost asset to draw future residents to our advanced city and neighborhoods. Connecting the trails would be an instant low cost and early success story that would pay big with the populace.
SNOHOMISH COUNTY	Completing the light rail lines along the I-5 corridor from Everett to Tacoma seem, in my mind, a higher priority than connecting neighborhoods in the City of Seattle. If us Everett residents are going to be asked to help fund this plan, being at the bottom of the priority list does not appear conducive to maximizing support from Snohomish County.
SNOHOMISH COUNTY	Too much emphasis on projects in Pierce and King Counties, while those of us in Snohomish County wait 25 years to see light rail to Everett and no apparent expansion of Sounder rail or ST Express service from Everett.
SNOHOMISH COUNTY	<p>I strongly believe that the extension of light rail to Everett and Tacoma should occur much earlier than 25 and 17 years. These two important Puget Sound cities form the end points of the originally conceived system and would complete its "spine," something I think is important before branching out sideways.</p> <p>It's also important to note that both cities are in counties to the north and south of King County. Residents of these cities have been paying into Sound Transit for over two decades in the hope of seeing light rail finally reaching them. To complete side projects to other cities and Seattle neighborhoods, residential ones at that, and all within King County, amounts to a denial of that original promise.</p> <p>I live in Everett, and I have seen the tremendous growth of aerospace related and other businesses in the Paine Field area. I-5 congestion could be improved to a greater or lesser degree by providing workers with a relatively quick and stress-free way to get to work there.</p> <p>On a more personal note, I am former King County resident who moved to Everett almost 40 years ago. Every time I drive to Seattle it seems more difficult, not only because I'm older but because I-5 is becoming more congested and frankly more dangerous. By 2041 I will be 91 years old, and if alive I will be too old to ride the Everett-Seattle light rail of which I've dreamed for more than two decades already. Speaking selfishly, it won't do me much good for my children to take my cremated remains for a ride to Seattle by the time ST3 light rail has reached Everett.</p>
SNOHOMISH COUNTY	Convention Center needs to be removed and elevated freeway addressed to improve I-5 through Seattle. Lane expansions should look to the future - the costs to add a couple extra lanes is so minimal once you are already under construction. The toll lanes on I-405 needs to be removed immediately and whoever authorized that should foot the bill. Light rail is key to Puget Sounds future, but the cost and timing is ridiculous. Free or very cheap ample parking needs to be provided at rail stations. Building up mass transit without ways to easily access them or trying to force people on buses is not going to work.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	Sound Transit is an epic failure as a company. Replace all executives with professionals who can run an efficient company. Sound Transit, clearly, has not spent the money to run a report on bus usage off-peak, and considered those numbers relative to cost; and yet, Sound Transit asks for more money. Sound Transit wastes millions of dollars per year on each project in cost over-runs. I vote to remove Sound Transit and replace it with a privately held company. This would save taxpayers close to \$90 million per year.
SNOHOMISH COUNTY	Do not run the Everett extension by Paine Field. I have lived in Mountlake Terrance and Everett and commuted to my job with Boeing from both. Initially I liked the idea of having a station nearby, until I thought about the specifics of getting from the station to work. Assuming the station is placed near the airport entrance, I would either have a prohibitively long walk, a long bike ride, or need to take a bus/shuttle. The bottom line is that this area is better served by a bus line (see Swift II) than by a single light rail station.
SNOHOMISH COUNTY	I5 South bound into Everett is very heavy daily. Putting a big percentage of that traffic on light rail should lighten the burden through out the area. This is many years too late!
SNOHOMISH COUNTY	Would like to see more rail time for Everett. I don't care how many busses you add. I prefer more rail time to Seattle. For some reason the North end we don't count as much. I prefer not to drive, but bus and rail schedule are trouble for the North. South side got a better thing going for light rail. I can't afford the south side. My tax money goes for all of south side. stop planning and move faster traffic is not getting better. Something has to be done.
SNOHOMISH COUNTY	Everett time line should be moved up and delay ballard west seattle improvement and some of south sound. Add a rapid bus line to Ballard instead.
SNOHOMISH COUNTY	Give Snohomish County higher priority with light rail projects. As a transit professional for many years, it is my opinion that King and Pierce counties have been given preferential treatment for rail since start-up.
SNOHOMISH COUNTY	Not linking Everett sooner than 25 years would be a huge mistake and you're alienating a huge population of people who need commuting relief to Seattle and Bellevue for projects that already have massive bus support between them.
SNOHOMISH COUNTY	Why not just make the light rail up to Everett along I-5 instead of dealing with Hwy 99? Wouldn't that be less expensive? Also, it NEEDS to be at the TOP of the list, not the bottom. Everyone I know commutes to Seattle and Bellevue, and traffic is awful from our end. Everett and the surrounding Snohomish County area is growing so fast that if you wait 25 years to address it, it's going to cause major issues. Please don't put Everett at the bottom of the priority list! The city and surrounding community is revitalizing and becoming a really desirable place to live.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	<p>Hello. First off thank you for putting together such a detailed plan as this. I believe this IS the most crucial piece of our puzzle for the growth right now we are experiencing. With that said, Everett seems to be the last piece of the puzzle and with the rising costs of living in the Seattle Metro DMA, the boom will come to Everett and the migration is already happening as people are forced out. Those people will still need to work in Seattle/Bellevue etc. I think the focus of all of this should be better connecting Everett to the Seattle DMA MUCH sooner than 25 years. I think that it a very bad plan to wait that long. Additionally, I would use this public transportation way more frequently if the Sounder or this newly proposed light rail, ran more consistently that just during 'commuter' hours. I've lived in San Francisco and Seattle/Everett/Eastside/Tacoma NEED a system like the BART. Thanks for the hard work on this plan.</p>
SNOHOMISH COUNTY	<p>I strongly believe that the extension of light rail to Everett and Tacoma should occur much earlier than 25 and 17 years. These two important Puget Sound cities form the end points of the originally conceived system and would complete its "spine," something I think is important before branching out sideways.</p> <p>It's also important to note that both cities are in counties to the north and south of King County. Residents of these cities have been paying into Sound Transit for over two decades in the hope of seeing light rail finally reaching them. To complete side projects to other cities and Seattle neighborhoods, residential ones at that, and all within King County, amounts to a denial of that original promise.</p> <p>I live in Everett, and I have seen the tremendous growth of aerospace related and other businesses in the Paine Field area. I-5 congestion could be improved to a greater or lesser degree by providing workers with a relatively quick and stress-free way to get to work there.</p> <p>On a more personal note, I am former King County resident who moved to Everett almost 40 years ago. Every time I drive to Seattle it seems more difficult, not only because I'm older but because I-5 is becoming more congested and frankly more dangerous. By 2041 I will be 91 years old, and if alive I will be too old to ride the Everett-Seattle light rail of which I've dreamed for more than two decades already. Speaking selfishly, it won't do me much good for my children to take my cremated remains for a ride to Seattle by the time ST3 light rail has reached Everett.</p>
SNOHOMISH COUNTY	<p>Snohomish County has been paying for light rail for 20+ years. This plan puts it on the back-burner for another 25 years. Take a look at how many people use Sounder and the bus systems from Everett to downtown Seattle now. WE USE MASS TRANSIT - we want it, we use it, we would use more options. Put Boeing on a rail line, make it so we can get to Alderwood or Northgate without taking 2 or 3 or more buses.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	Light rail to Everett planning should be prioritized to provide those living in the north ability to travel, visit and work Downtown Seattle. The North Sound Commuter train can be unreliable during rainy seasons (mudslides), and I-5 commuter traffic density is increasing yearly. Having access to alternate light rail will attract more people to visit the north: Boeing, US Naval station, Everett marina, attend event @ Everett events center, as well as revitalizes the whole community and its surrounding communities like Mukilteo, Edmonds, and Marysville.
SNOHOMISH COUNTY	Need to move the most people in the projects to be prioritized. Boeing is a major employer and needs to be serviced before others.
SNOHOMISH COUNTY	Light rail to Everett needs to happen sooner
SNOHOMISH COUNTY	It is ridiculous that the plan to expand to Everett is 25 years out. As one of the major manufacturing areas supporting Boeing and other business this is a vital link and only getting more and more congested as people move in to Snohomish county. It is much easier for people living in Ballard to use metro to get into Seattle and the light rail would be much more useful up north. You can see the increase in ridership on the Sounder and how people use that. As a Snohomish county resident we've been paying for light rail with no real benefits for years now. Now the plan is for Everett by 25' that is unacceptable, we need to do better.
SNOHOMISH COUNTY	The Light rail from Tacoma to Everett via Seatac, Westlake, UW, Shoreline, Lynwood and Paine Field should be the #1 priority at the moment. Then a separate Light rail from Seatac to Lynwood via Kent, Renton, Bellevue and Kirkland. Express routes from Northbend to Totem Lake Freeway station via Issaquah, Bellevue, Redmond, and Woodinville.
SNOHOMISH COUNTY	Light rail service to downtown Everett needs to happen in the next 10 years.
SNOHOMISH COUNTY	Everett does not need a light rail via boeing. Have a route that is more direct and serves ALL the people. Boeing can invest in an employee shuttle from the nearest station. Boeing might not be here forever, but hopefully the rail will. It is expensive to have Boeing in the light rail route: and I am not willing to pay that part, although I am supportive of everything else.
SNOHOMISH COUNTY	Include Everett to Seattle light rail service sooner than 25 years!
SNOHOMISH COUNTY	Move light rail to Everett sooner than 25 years, way too long.
SNOHOMISH COUNTY	I cannot support and will not support a plan that doesn't put top priority to the I-5 corridor! On getting light rail from Tacoma to Everett as the most important lines!
SNOHOMISH COUNTY	There has been a great emphasis on commuter services from the south corridor to Seattle, but little improvements in services from Everett and the north corridor to Seattle. I would like to see services come to the north corridor as a priority. If nothing else, I'd like to see expanded parking for the current services and/or expanded bus service to include routes that operate throughout the day from the north to Seattle. I commute to Seattle from south Everett every day, and I would welcome taking the bus, but I am unable to find parking at the Park and Ride lots, and those lots that do have parking available do have provide service to Seattle during the times that I work.
SNOHOMISH COUNTY	Everett line should happen sooner.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	Project timelines should be modified. I wish to see a majority focus OUTSIDE of King County. I live in Everett so my desire to see light rail to Everett is obviously biased. I like ST. I ride the SWIFT everyday. I would love to be able to take light rail into Seattle, Seatac, and Tacoma. I support Pierce County light rail improvements as well.
SNOHOMISH COUNTY	I think it may be easier to work on the light rail from everett south a bit and uw station north sooner than 25 years, that's a long time . A lot of the rail up here can be above ground which is cheaper than digging a tunnel . Maybe do all the above ground work and have it meet up with under ground routes.
SNOHOMISH COUNTY	Light rail to Everett must be available much sooner. The 25-year timeline for light rail access to Everett puts it several decades behind the original plan. As a Snohomish County voter, we have been paying for a long time to subsidize Seattle light rail and will be asked to continue to subsidizing Seattle for much longer before seeing any benefit from the light rail. I would like to be excited about the light rail system, but knowing that I will pay for it for most of my adult life without seeing any benefit, my feelings of support are very low. Even my young children will not be able to use the Everett leg of light rail until they are mid-way through their careers, and even that assumes that the 25-year schedule holds.  This must be reevaluated, if the plan is to get much voter support in Snohomish County.
SNOHOMISH COUNTY	I'm sorry, but you have got to get this done faster!!! Period!!! I'll be dead before you get light rail to Everett. 10 years tops or no go. Find a way!
SNOHOMISH COUNTY	Taking cars off the road from as far from downtown Seattle as possible should be the 1st priority. People driving from Everett to Seattle burn far more gas and take far more time than people driving to Seattle from Ballard or West Seattle. Complete the "spine" of the system before the "arms." Build just the basic light rail system - add the nice extras later (more pedestrian access, more bike access, etc.) Include a LOT of parking capacity! The main goal should be to GET PEOPLE OUT OF THEIR CARS! I will not vote for this proposal as it is now unless the priorities are changed.
SNOHOMISH COUNTY	Light rail to Everett by 2041 is way too late. Need to bring light rail much sooner.  Survey would be better with fewer/more consolidated questions. Some questions cross-over and seem repititive.
SNOHOMISH COUNTY	You are years behind, so I want these projects done way before the dates you are suggesting, especially the "Light rail to Everett"  I am really tried of the mess of the Puget Sound traffic. Like I said you are years behind.
SNOHOMISH COUNTY	I support lite rail in general. I do not support timeline to reach Everett area. You put Everett last, and it's the area that is #1 in WA for job concentration and export revenue generation. You switched your stated priority to develop north-south first, so typical of politicians. So I don't support YOUR version at all now.
SNOHOMISH COUNTY	Would like to see the service to Everett completed before 25 years, that seems too long.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	Stop funding bicycle lanes and bicycle preferential treatment and fund rail and roads that adults can use despite their age and physical abilities.
SNOHOMISH COUNTY	I oppose the current proposal for light rail to Everett through Paine field. I strongly support light rail to Everett utilizing the I5 corridor.
SNOHOMISH COUNTY	The Sounder should reach Olympia
SNOHOMISH COUNTY	ST3 should be modified to complete light rail to the major urban points: Tacoma, Everett and Lynnwood before creating spurs to West Seattle, Ballard, UW because it was the intent of the original plan to complete light rail to Tacoma, Bellevue and Everett, and for which we have been paying taxes since the late 90's. In addition, with the current plan, we in Everett will not see light rail until 2041. AND, this is based on current projections on the timeline and also current projections in funding of \$50B. Therefore, we are opposed to continue paying taxes and receiving no benefits for the next 25 years. We will vote NO on the coming election in November 2016.  Sincerely,  [names and address]
SNOHOMISH COUNTY	everett needs light rail service in my lifetime! i have worked in everett for 25 years and it has been horrible with no relief in sight, a waste of all my tax dollars that go to transportation. Puget sound has the worst public transit of any city I have ever been, and that needs to change.
SNOHOMISH COUNTY	We have to reevaluate the propose ST3 plan. Why not concentrate connection mass points of population to the existing hubs. Connect Ballard to downtown Seattle via rail, then expand that to Everett and perhaps connect Seattle to Bellevue, and finally all the way to Redmond. There's got to be a better way to cut the price!! Ask Boeing, Microsoft, Amazon, Expedia and other major companies in the area to help pay for these changes, aren't those guys getting some nice tax breaks? its time for them to help with the issue of public transportation.
SNOHOMISH COUNTY	Speed up the process by building to Everett first, then work back to the metro Seattle area. That is, add BRT - without using the shoulders!!! - but bring rail to Everett/furthest destinations first. Then work back to adding stations/routes closer to Seattle. This will help to alleviate congestion faster, if you really think about it.
SNOHOMISH COUNTY	I'd sure like to see Everett come online sooner.
SNOHOMISH COUNTY	The Link light rail should go north from Lynnwood as close to I-5 as possible the entire way to the everett transit center and it should be done SOONER than 25 years and with the money saved from NOT detouring to boeing should be used to extend the line further north. Community transit already has plans for a BRT line from canyon park to boeing via mariner park and ride so people wanting to go to paine field could ride a bus with frequent service anyway. I believe that the increase in time for the train to detour to boeing instead of making a more direct route would affect many more people than it would serve. I believe the average boeing worker lives north and east of paine field so the detour would not get many paine field workers to use it.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	Shutdown North Sounder north of area prone to slides. Use BRT only as stop gap until LLR can be built. Add park-and-ride lots at key locations with enough capacity for EVERYONE who wants to use. Extend LLR to Everett, Redmond, Issaquah, and Tacoma within 8 years. Add LLR line from Burien to Everett via Renton - Bellevue - Bothell within 15 years.
SNOHOMISH COUNTY	North light rail shoul be the first to get started not 20 years away!
SNOHOMISH COUNTY	The need for light rail to Everett is serious, and 25 years is entirely too long to wait for it. I've been traveling by bus from Everett to downtown Seattle daily for 13 years (and, prior to that, from Edmonds to Seattle for 10 years), and the commute has become nearly intolerable. As recently as three or four years ago, the commute from Everett to Seattle was roughly 45 minutes. Now, even an express bus can take well over an hour each way when traffic is "light." I love my job, but due to the horrific commute, I am eagerly awaiting the day I can retire!
SNOHOMISH COUNTY	Serving the Everett corridor should be a priority - not last on the list. Snohomish County is one of the fastest growing regions and that's not going to change. Also, it is very difficult to use the Mukilteo sound transit station due to the times that the train leaves/arrives and the lack of parking. It would be really nice to have more times during the day to take the train to accommodate more work schedules.
SNOHOMISH COUNTY	<p>Hi,</p> <p>I am strongly supportive of light rail and mass transit, but I can't say with confidence that I support this plan despite the fact that I work on a Sound Transit job. Connecting Seattle to Everett by rail is crucial to get cars off the road between Lake City and Bothell, I-5, and also by I-405 since many commuters will take 405 over I-5 if they feel they save a few minutes. Every morning I drive from Everett to Seattle and traffic begins at about 4-4:30am. Almost every day, I am forced to take residential roads to get home if I get off work after 3:00pm. That means that not only is I-5 bumper to bumper, but now the neighborhoods and the inner city gets congested. Its not just me, there are many of the north-south "backroads" that get congested. There are long lines of cars through the city just to get to the Highway but cannot get on due to traffic. A long distance rail north-south will not only relieve I-5, but Hwy 99 and 405, 15th Ave, and Lake City Wy. Why not ask Boeing, Amazon, and Microsoft if they would help to fund or partner up with the project? They would benefit enormously from increased reliability and productivity of their workforce, many of which are more fatigued just from the daily commute.</p> <p>Also, I as much as I support light rail, I think that an express bus would help I-405 a ton. I would prefer light rail there as well, but an express bus would be a great improvement on what I think is a clumsy and inadequate busline. That is actually what has kept me and many other commuters from riding the 405 busses.</p> <p>I think that the neighborhood light rails are good, but first lets get the traffic off the main corridors.</p>
SNOHOMISH COUNTY	Everett should be sooner then 25 years. Finish the spine first then branch out.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	Make the Everett to Seattle light rail sooner than 25 years. Growth is given in Snohomish county. Traffic is a nightmare going North and light rail would ease the congestion. 25 years is to long of a wait. Construction North should be high priority.
SNOHOMISH COUNTY	Wrong rail alignments and priorities. Stop duplicating road/bus service and fill in missing connections beyond freeway spines. Think straight-line, high-speed, off-grade, out-of-traffic, If you're spending that much money, do it right, and do it soon!
SNOHOMISH COUNTY	EVERETT CANNOT WAIT 25 YEARS FOR LIGHT RAIL AND THIS MEASURE WILL FAIL BECAUSE WE WILL NOT SUPPORT IT.
SNOHOMISH COUNTY	I think the Everett link should be a priority. The link should run directly from Lynnwood to Everett, NOT via the Boeing manufacturing center. The Boeing loop could be added at a later date and/or be serviced by Bus Rapid Transit. Build the spine of the system first, then divert loops to other areas such as Ballard, West Seattle, Issaquah, etc.
SNOHOMISH COUNTY	Reorder projects: 1. Add busses from Everett to Redmond/Bellevue. 2. I5 corridor between Everett and Tacoma AND 405 corridor from Everett to I90 3.THEN do "feeder" routes. Use light rail whenever possible to minimize CO2. BTY, I bus to and from work, Everett to UW.
SNOHOMISH COUNTY	Completion of the spine to Everett must occur sooner or coincident with any Ballard/West Seattle Light Rail
SNOHOMISH COUNTY	25 years to get rail to Everett is insane. I will not support a plan that takes that long! Under any circumstances.
SNOHOMISH COUNTY	You should start with Seattle to Everett first, then work your way south.
SNOHOMISH COUNTY	For the rapid bus service on I404: it will not remove commuters from ghefteeway if you do not dramatically expand the park-and-ride lots. They fill to capacity each day by 6 AM leaving little choice but driving for many.  Also, I think 25 years is a ridiculously long timeline. We need relief much sooner. In 2 decades, these projects will be obsolete in that the needs will have changed massively again.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	<p>1. Look for immediate solutions to better utilize new infrastructure e.g. express busses from Lynnwood TC - Edmonds P&amp;P - Mountlake Terrace TC - Husky Stadium at 12 minute intervals (wouldn't be a bad idea to run these on game days too). Forget a scheduled stop at 220th &amp; 70th, the 119 never makes it in time and the drivers don't talk on the radio. Add extra runs on the 180 out of SeaTac to handle the outflow.</p> <p>2. Set up a hotline\website where commuters can report problems. Google Maps and Trip Planner routinely fail. Next Bus and One Bus Away are good for confirming "yep, you're [explicit], but we'll get you there 20 or 40 or 60 minutes late". I don't feel comfortable interrupting a driver's concentration to report that the Building Engineer at Westlake didn't unlock the doors to the tunnel until 7:10 on a Friday "because we have problems with heroin users shooting up down there". They have enough on there plate just keeping all 10 tires on the pavement without hitting all the junk that jumps in front of them.</p>
SNOHOMISH COUNTY	<p>I am not sure why it takes 25 years to complete a project. I believe that a fundamental problem / perception is that it takes too long and there is too much money spent / wasted on studies rather than on just executing the plans. I think that any Improvement in regional transit will bring benefit but it can't take too long.</p>
SNOHOMISH COUNTY	<p>Need more investment in the I-405 BRT which seems to be the most cost effective and serves the greatest number of working class cities. Investments in light rail to rich east side cities only furthers the disparity in where tax expenditures go in our region.</p>
SNOHOMISH COUNTY	<p>Snohomish county has been promised light rail service for Over 20 years. We were suppose to be given priority on the latest project, and are now being told a line to Everett, would be at least 25 more years away. Snohomish county has the major manufacturing base in the region, is rapidly growing in population, and has some of the worse traffic woes. Instead priority is being given to areas of King county, that already have many options of routes, and options of public transportation. Snohomish county only has a already taxed HW99 and I-5. I support public transportation, but why would I support another 25 years of waiting for light rail, when the old declarations and promises, haven't been kept.</p>
SNOHOMISH COUNTY	<p>25 years to Everett is too long. I will vote no on this plan if it takes that long. Build the spine north and south first</p>
SNOHOMISH COUNTY	<p>I would prefer if light rail went from Lynnwood to Everett without diverting to Paine Field.</p>
SNOHOMISH COUNTY	<p>Mountlake terrace stop by 220th, as parking is full weekdays in Lynnwood and 26th stations. Will there be any eminent domain applied in Mountlake Terrace or Lynnwood?</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	I see no reason as an everett resident to pay an additional \$200 per year for 25 YEARS before seeing anything up north. It is ridiculous that any project should take that long. Developers keep building mega apartments up here - more and more people from Snohomish into seattle - the commute in 4 years has almost doubled. It is the most needed infrastructure in this region. 25 years is a joke and there is no way anyone from Snohomish county should vote yes on a tax increase to only help out Seattle commuters. MAYBE when we're all retired up in Everett and Boeing has moved everything to China we'll get one freakin station. Why on earth can't MULTIPLE lines be constructed at the same time??!! Mass transit is not a new thing! Get it done in WELL under 15 years or don't expect support from up north.
SNOHOMISH COUNTY	Lynnwood to Everett light rail should follow the freeway, not go to Paine Field. That can be served by buses. This section needs to be delivered sooner than 25 years.
SNOHOMISH COUNTY	Buses should have their own lanes. Faster travel times would attract more rides. Park and Ride lots are too small in some areas and deter potential riders.
SNOHOMISH COUNTY	Service between Everett and Seattle must be built much more quickly. This can be done through two compromises: (1) build a cheaper spur-line option to Pain Field (my friends at the Snohomish County Economic Alliance won't like me for saying it, but I don't buy it that the line would effectively serve Boeing's huge-truck-driving, graveyard-shift-working workforce anyway) to save 9 years getting a line up to Everett (which, believe me, would see much higher ridership than you're projecting); and (2) scrap the hugely expensive, cherry-on-top Ballard line until the outlying areas have all been connected. One gets the distinct sense that ST planners live in Ballard and want more convenient weekend access to the downtown arts and sports scenes. Not good optics. If you want, buy a nice hipster bicycle for every Ballard resident; they'll get downtown on their Linuses just as quickly as would by riding a \$4B lightrail line. Deprioritizing Ballard would allow much quicker implementation of the rest of the plan AND save money overall. We got to the moon in, what, about 8 years. I'd like to see a similar timeline for the Seattle- Everett line.
SNOHOMISH COUNTY	Drop The Pain field detour from Everett, replace it with a spur line, that will serve Pain Field terminal, Boeing, and then descend to Mukilteo, and end at the current Sounder station. Add a spur line near the Mount Lake Terrace P&R, approximately following 104, hitting the Aurora Village P&R, Edmonds Sounder Station, and one point in between. These two spur lines These two spurs could be considered a single line, this would also place all 3 North Sounder stations on Link, and Sounder North then could be retired. Ballard to Seattle Needs to be fully grade separated, with no crossings. Ballard UW needs to be given higher priority. Everything possible needs to be done to move the time line forward, 25 years is too long.
SNOHOMISH COUNTY	Parking should be free at stations. The reason for taking public transit is to cut down cost, and convenience for commuters.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	<p>It seems like it would make more sense and cost less money to continue to extend Link Light Rail along I-5 all the way to Everett Station. Doing so would make the South Everett Freeway station and Eastlake P&amp;R a transit hub, in an area that has grown considerably in recent years and continues to grow. These areas should be better represented in the ST3 plans.</p> <p>Rapid Transit could then be added between Everett, Paine Field, Mukilteo and Lynnwood over Highways 525 and 526.</p>
SNOHOMISH COUNTY	<p>The project costs way to much money to serve a tiny minority of travelers. We need massive improvements on highways (highway 9) and two lane roads that back up for miles in Bothell and Snohomish. These roads serve far more people. Fix what needs to be fixed before spending \$50 billion on trains that won't improve my daily travel frustrations. I would vocally support and vote for \$50 billion for road capacity improvement. I will vote against spending any money on trains before the real problems are solved.</p>
SNOHOMISH COUNTY	<p>Ballard and West Seattle should be considered in the next phase. Keep the North Sounder line and expand the service with more cars on each train and having the train run more often (later in the evening and both ways during the day - not only into Seattle during the morning and out of Seattle in the evening. You must be able to go both directions all day long.</p>
SNOHOMISH COUNTY	<p>Timeline for light rail to Everett should be expedited, and take priority over some of the currently prioritized projects.</p>
SNOHOMISH COUNTY	<p>If the transportation need is already here, add busses to those routes, with the understanding that they will gradually get stations, and may eventually be replaced by trains. I don't take the busses much, but I understand that every rider who is on the bus makes my car trips that much better. I can get to places in a shorter amount of time, with the cars that would have been on the road out of my way. Transit greatly benefits me as a car driver. As a teacher, taking the bus doesn't work for me - it doesn't go into the out of the way schools where I work. Putting a bunch of drivers, who would have been ahead of me, onto a bus instead is wonderful.</p>
SNOHOMISH COUNTY	<p>Get light rail to Everett Community College, is has a very large student body with few transit options, just as the surrounding population lacks.</p>
SNOHOMISH COUNTY	<p>For me to support a plan, light rail needs to come to DOWNTOWN Everett. Why should I have to pay for Boeing employees to get to work? Doesn't Boeing receive enough tax breaks to help IT offset some of these costs? If it's going to take 25 years anyway, let's have the foresight to make good decisions for the long run vs. popular decisions right now. When Boeing has moved its plant and we've wasted billions of dollars, Everett will still be here.</p>
SNOHOMISH COUNTY	<p>The I-405 tolls have created a nightmare in Snohomish County; because of this, the Everett light rail expansion needs to come much faster than 25 years.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	The link to Everett timeline needs to take precedent over the plans to Ballard. Considering the Employment in Everett with major companies like Boeing and Paine Field with the commercial airline plan, there needs to be improvements to the plan to shorten the completion time. Waiting 25 years is not feasible. The link to Everett through Paine Field needs priority.
SNOHOMISH COUNTY	The line to Everett should be the priority. While the north end has expanded as rapidly as the east side and south end, it has been put last, behind even new branch lines to boutique Seattle communities. We have paid our share of the taxes and received nothing. Build the line to Everett first or return our share of the money and we will build it ourselves.
SNOHOMISH COUNTY	Snohomish County is in essence being left out for everyone in the current work force. Fix it.
SNOHOMISH COUNTY	Too slow. I would support it if Everett wasn't 25 years away. With that time frame, money collected from me today would be wasted before its ever completed. Put them all on a 5 year track and raise the tax a significant amount right away and I'm for it. This little bit for a long time means it won't be completed successfully or for the projected costs.
SNOHOMISH COUNTY	Additionally, Light rail should go from Seattle, stopping in Bellevue to Issaquah. As well light rail should go from Everett to Bellevue. A comprehensive light rail system is essential for making the Seattle region a livable city.
SNOHOMISH COUNTY	The Everett light rail plan must be expedited and should not take 25 years. Use eminent domain to get right of way and start building now
SNOHOMISH COUNTY	Everett to Lynnwood needs to be number one priority in ST3
SNOHOMISH COUNTY	It's crazy that Ballard and West Seattle extensions would come before Everett. Doesn't make sense. I support the expansion of the network, but not in the order it has been presented.
SNOHOMISH COUNTY	Light rail needs to be brought to Everett sooner rather than later. Sound Transit originally represented that it would bring light rail to Tacoma, Bellevue and Everett. It needs to do that first before it expands the system or adds additional stations to the existing line. To do anything less is a breach of the public trust.
SNOHOMISH COUNTY	It seems crazy to me that the link between Seattle and Everett will not be completed until 2041. We need to relieve traffic and provide alternative transit opportunities to commuters who are clogging the highways from Snohomish County. Building light rail to Ballard and West Seattle before the link to Everett does nothing to help the highway traffic situation and commutes along one of the most congested highway sections in America. I will not support Sound Transit unless a plan is put in place to complete the Everett link as soon as possible. Preferably by 2030 or sooner.
SNOHOMISH COUNTY	25 years to Everett is unacceptable
SNOHOMISH COUNTY	Why the emphasis of South end improvements over north end, specifically Lynnwood and Everett? I strongly support light rail to Everett. I have commuted from Everett to Seattle for 20 years by bus. It's awful. Thanks.
SNOHOMISH COUNTY	Make Everett (via Boeing) the #1 priority. If 1/2 of the 50,000 Boeing workers got off I-5, there'd be so much room left for the rest of us on I-5.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	ST3 should skip Paine Field and uses BRT to service that work center. Run light rail to Everett via I-5 but extend it to the Navy Base and Everett Community College. And bump up the time frame to get light rail to Everett. I can't vote for this based on your current projections.
SNOHOMISH COUNTY	Taking 25 years for light rail to come to Everett is not acceptable. I would focus getting a complete North (Everett) South (Tacoma) as quickly as possible and allow for quick commuting to these lines until the side lines are added. Ballard, West Seattle, Redmond & Issaquah. Would a bus only lane, instead of light rail be cheaper overall to develop and run? What happens when a train breaks down? It blocks the track. With a bus, it can move over, or other buses can go around.
SNOHOMISH COUNTY	I'm 63 years old. Waiting 25 more years to get light rail to Everett makes it pretty far removed for me. As I understand it, Everett was in the original plans but seems to be now getting squished further and further out in time. That's a problem.
SNOHOMISH COUNTY	Everett light rail service needs to be sooner or I wouldn't support the project. We have been paying for other areas service for too long without much benefit.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	<p>Going to/from Everett via excursion to Paine Field pleases the politician's campaign contributors such as Boeing, who's had enough subsidies, and construction companies, but is foolhardy. The board, save councilmember Johnson, should ask planners to propose projects instead of presuming to be planners. That's because: (1) You are building for 2 generations from now ("build it and they will come," by eliminating all competition, i.e. Everett bus service) while doing very little for today's known problems; (2) The density for today does not support light rail; (3) The demand for HCT is low there right now: \$1/trip limited stop bus service from south county was eliminated in 2003 and never restored, \$2/trip limited stop bus service from north and east county was cut to 2 trips/day in 2010 and virtually never restored, and paid parking lots have sprouted around Boeing because folks there prefer to drive; (4) Boeing employees can transfer like the rest of us do; (5) For about the same money, you get the Ballard to downtown tunnel project with quadruple the ridership and lower operating costs; (5) you're duplicating Swift 2, when you could complete a BRT loop by 2020, 21 years sooner; (6) Your plan disenfranchises the people who live near I-5 so that people who work at Boeing, many from outside Snohomish County, can enjoy a one-seat ride to/from work. (7) Your plan tacks on an extra 2 weeks per year on a train to go to/from Everett and points north via Boeing (do the math: 22 workdays/month x 12 months x extra minutes). (8) The freed up money could be used to help today's known commuting headaches within a few years' time: finish the 164th direct access ramp eliminates Everett/Seattle and Everett/Bellevue buses criss-crossing lanes on I-5; contribute to a bus/bike/ped overpass at 128th removes much of the congestion at the existing roadway, take over all of CT's commuter bus service between regional centers, e.g. Lynnwood to Seattle, to allow that agency to put those hours into more in-county service. When at FTA, Mr. Rogoff supported BRT; now at ST, he's "all in" for light rail, no matter what the cost. Recently, Snohomish County folks said they had a plan to cut the excursion by 8 years, saying that's by using I-5 for the last 1/3-1/2 of the route. However, what they fail to calculate, since their mind is so fixated on light rail, is that an I-5 exclusive route should also be sped up: it should be completed more than 2 years faster than the leaders' plan, even with the spur, and a BRT loop could be operational within 5 years. But, Snohomish County politicians don't care a whit for today's commuters; their bias for light rail is ridiculous, and I think the voters will see right through it.</p>
SNOHOMISH COUNTY	<p>Light rail to Everett in 25 years is completely unacceptable. Anything over 12 years is unacceptable in my opinion and I would not support it.</p>
SNOHOMISH COUNTY	<p>The schedule for project should be revised to provide an earlier Lynnwood to Everett light rail service. Critical to complete the spine as the next first step and fulfillment of the original plan and commitment.</p>
SNOHOMISH COUNTY	<p>Why are you planning to build the light rail thru Paine Field? The majority of traffic in the mornings is heading south bound from Everett to Seattle. and From North Of Everett into Paine Field. How are these plans going to benefit these two major bottlenecks? They are not. Run the line up I-5 directly to downtown Everett, and make Boeing pay for a spur off of it. The Non Boeing residents of the area are sick and tired of everyone catering to Boeing and its employees. As usual the transportation planners in the Puget Sound area have no clue as to what the real issues and can not offer viable solutions to solve them.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	With the tremendous growth in Snohomish County, and the current and expected growth and traffic problems on the freeways and even surface roads, we need more rapid transit in this county sooner than later. But anytime I'm driving north from Tacoma, the traffic bottleneck in central Seattle is just embarrassing for a major U.S. city. Alternatives around the area need to be created for car and bus traffic.
SNOHOMISH COUNTY	I will not support this project if it takes 25 years to get to Everett and it goes to Boeing first! It should do straight up to Everett to serve the needs of the community, not a large private company.
SNOHOMISH COUNTY	Lynnwood to Everett light rail should not be prioritized last. I would rather pay more now if it would mean it could be completed simultaneously with some of the other projects.
SNOHOMISH COUNTY	It is INCREDULOUS to me that it will take 25 years to get the light rail to Boeing and then Everett. The traffic getting to these locations is HORRIBLE. I get that people in the city (mainly Seattle) want more services, but they are already being served by buses and have the ability to bike / walk. Let's give the folks who may be living outside of the city due to rising cost of living, the ability to get to and fro in a much speedier time, which will also allow those who choose to not live in the big city to enjoy a slower pace. For me personally, waiting until 2041 to get light rail to Everett excludes my working years. I'll already be social security qualified by the time the system comes north. Get the whole area taken care of and then address the middle gaps. Individuals voted for a system that PROMISED to make it north to Everett in 1996. I don't think those people, including myself, thought that it would take 45 years to accomplish that task. I am willing to pay more now to get this done sooner. I certainly like to look out for the future generations, but we have desperate problems with volumes now. We CANNOT wait 25 years! Try again. I know it's complicated, but seriously, this plan is so ridiculous and short-sighted. To me it's disrespectful of those living in Snohomish County who have been paying this tax for just as long as the Seattleites. Believe that the people of the Pacific NW, when led in a way that will benefit us all, will support a reasonable proposal. Take care of the outliers and then address the middle. Thanks for your consideration.
SNOHOMISH COUNTY	I would like to see Sounder commuter trains run all day. This is the case in many other large metro areas. SoundTransit is way behind on that.
SNOHOMISH COUNTY	I think the Everett light rail should be higher priority. I believe the further north you go, the less convenient public transportation gets. While there is always room for improvement, I do not believe additional modifications to Seattle public transportation is a higher priority. Traffic every weekday morning and afternoon is proof that there are PLENTY of commuters needing to go to and from Seattle on a daily basis from Everett. More accommodations should be created sooner to fix this.
SNOHOMISH COUNTY	We need the light rail coming to Everett sooner. I'll vote no if it's not sooner than 2041.
SNOHOMISH COUNTY	I recommend that the light rail from Everett to Lynnwood go down I-5 with bus or other services from I-5 to Boeing and other industrial areas along the way. We need this service before 2041!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	Absolutely unacceptable to reach Everett in 2041!!! It absolutely needs to be moved up to sooner than 2033!!! You must stick with the original plan to make Everett a priority!!! I will be dead before it gets here!!!
SNOHOMISH COUNTY	Everett is too far into the future. I would be paying for service that won't be available until after I'm dead.
SNOHOMISH COUNTY	So many people have moved North that it seems prudent to accelerate the north end projects. We in north end have more limited alternatives today. Even increasing the number of Sounder trains daily, to include some mid-day opportunities could be helpful. I don't want to pay increased taxes to support those other (South/Ballard/West Seattle) communities over ours, but I will (happily) support north end projects. This draft feels quite biased as I review the data. The ridership projections seem inflated for the Seattle communities. It does not feel like our representatives' voices have been heard. Please listen to these officials, as they represent a vocal and interested constituency.
SNOHOMISH COUNTY	If light rail has to by pass the Paine Field area in Everett in order to bring it to Everett sooner than it should be done.
SNOHOMISH COUNTY	We Snohomish County residents have been promised light rail to Everett. It needs to be accomplished before rail lines go to W. Seattle and Ballard. I have supported all transit projects in the past but it is getting much more difficult to support these projects when Snohomish County seems to be at the bottom of the heap. I take the bus to Seattle on a daily basis but there is not even enough parking for people to do that. I know of many people who would use the bus now but they cannot find parking to do so. I read of a new route that has been proposed from Lynnwood to Everett via 526 to Boeing and Paine Field then to Everett. This must be considered. If there is not more included for us commuters in Sino. Co. Then I'm not sure that I can continue to support the extreme taxation of Sno. Co. Residents for the benefit of all other areas.
SNOHOMISH COUNTY	Everett light rail needs to come much earlier
SNOHOMISH COUNTY	The plan takes too long to bring light rail to Everett. Please alter the plan to prioritize the fastest growing county in the region, Snohomish county and one of the largest manufacturers is the region, Boeing.
SNOHOMISH COUNTY	I live in Snohomish County. There are extremely few benefits to this plan in my life time (certainly in my remaining working time). Yet, Snohomish county is unfairly taxed throughout the years to pay for benefits in King and Pierce country. While I realize it's a different plan, the I-405 toll roads are a perfect example of Snohomish County residents paying an exorbitant percentage of 'tax' to the benefit of King county projects. Too much can change in 25 years -- I have no confidence the plan would be implemented as scheduled regardless. Being a beneficiary at the end of the process means chance of it happening as planned is greatly reduced, yet Snohomish County residents would have been paying along with other counties whose benefits are more likely to have been executed.
SNOHOMISH COUNTY	The route to Everett Should NOT include Paine field. Paine field should be a seperate track that does not impact riders going from Seattle to Everett. The route to Everett via Paine field wastes time and money and I will not support a plan that includes a route to Everett via Paine field.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	Light rail along the I5 corridor. Boeing should be served with BRT along Boeing freeway and also airport road. Keep light rail in with existing park and rides. Run the buses so that late shifts at Boeing can utilize the mass transit.
SNOHOMISH COUNTY	Everett should not have to wait 25 years for light rail services. It is the largest city in Snohomish county and is also home to thousands of daily commuters into King county. Waiting this long for service is ridiculous.
SNOHOMISH COUNTY	Choose Option 2 on the North Link Proposal!!! 25 years is too long for the projected completion. At the Everett public meeting there was a proposal for Option 2 that completed 10 years sooner, had a higher estimated ridership and cost an billion less dollars. This makes sense financial both to the tax payers and businesses. OPTION 2 with the rail going down I-5 the entire length to Everett makes the most sense. Additionally the option with BRT from North Everett to 128th makes the most sense to me to serve the capacity of the manufacturing corridor. If the measure does not include Option 2 I will be voting NO!!!
SNOHOMISH COUNTY	Light rail service between Everett and Seattle should be in place and operational by 2020. With an average of 12,000 people moving to the Seattle area each year, waiting 25 years is a recipe for disaster. Remove all obstacles just build the light rail. No excuses.
SNOHOMISH COUNTY	Snohomish County has been paying RTA taxes for years without any benefit to date. It doesn't make any sense to me that West Seattle and Ballard have a higher priority than Paine Field. The current plan seems like a political one, not a needs based one because it heavily favors Seattle and south King County
SNOHOMISH COUNTY	Everett link should be a direct grade separated line built along the existing SR99 artery. The plan to build out light rail to the Paine field area is overly expensive and delays the system. Boeing is in the midst of reconfiguring the plant, commercial service is years out before starting a limited service, and the commercial/industrial/residential centers are diffuse around the airport. Build junctions at strategic locations on a direct line, invest savings into BRT to connect the Paine Field area and Mukilteo.
SNOHOMISH COUNTY	Modify the Everett connection to go straight to Everett and bypass the Paine Field 'loop'. Construct with a future connector to a Paine Field train line and in the interim beef up bus rapid transit from/to Paine Field and the light rail line.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	<p>Either the Bus Rapid Transit or Stringer Light Rail Shuttle should be used rather than Light Rail via Paine field in order to reduce completion time to Everett to NO LATER Than 2031. I absolutely will lobby my friends to vote AGAINST any proposal that has a later Everett Station completion date than 2031 or that goes via Paine Field rather than connecting via spur or BRT spur or loop. In addition every effort to beat 2031 should be used including increased and longer bonding authority, expedited permits, additional funding from county or city budgets, construction starting in Everett and or Tacoma Community College moving South from Everett and North from Tacoma Community College to allow construction in both directions at one time, i.e. North to Lynnwood while building South from Everett. Also my understanding is that the spur options are less expensive. Either of these spurs are also far better than the yet unveiled compromise to go via Paine Field being contemplated by Snohomish representatives because they should be years faster than an optimistic 2033 as I understand the compromise is questionable estimating.</p>
SNOHOMISH COUNTY	<p>By the time the light rail comes to Everett, I'll be retired, and so for the rest of my working life, I'm stuck with the crappy situation we have now which is a few trains not even going to the center of Seattle, or buses which take forever.</p> <p>Not good. We should get people moving from Everett to Seattle sooner, who cares about Paine Field and boeing? How many people are going to drop off their cars at the station to catch a train that is only a few miles away? When the traffic leaves the plant, they generally head north, not south.</p>
SNOHOMISH COUNTY	<p>Investing in bus rapid transit and the Sounder train system already in place could reap huge benefits without the wait and expense of more light rail. Re: light rail, we feel that central and south King County areas are already well served by both Sounder rail and light rail. North King and Snohomish Counties have been largely left out. Sounder rail service to Snohomish County is peak hours service. We so wish that we could take the train to Seattle for mid-day and evening events!!</p>
SNOHOMISH COUNTY	<p>I will support going from Lynnwood directly to Everet, going directly to Tacoma.</p> <p>BrT can do the side routes to ballard, west seattle, kent, boeing. Lite rail should get people to central areas and buses can run them to other places they need to go.</p>
SNOHOMISH COUNTY	<p>For Light Rail my suggestion is to bypass the Paine Field Industrial Area and go straight into Everett Station following I-5 most of the way. If Boeing wants a light rail line going into the Paine Field Industrial Area then let them fund it with the \$9 Billion in tax breaks they have gained from the State of Washington over the next 25 years. A better idea would be to have a BRT line going into the Paine Field Industrial area from the 112th St. NE Park and Ride station and also from Everett Station then subsequently expand parking capacity in both locations. The year 2041 for Light Rail going into Downtown Everett is way too long of a timeframe for me to support it.</p>
SNOHOMISH COUNTY	<p>I prefer N-02cMOD + BRT (LRT alignment along I5 with BRT to the Everett Industrial Center) rather than the alignment in the Draft Plan.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	I suggest skipping the ST3 detour to Boeing manufacturing in Everett; take passengers from the light rail to Boeing via buses, in the interest of completing the project earlier.
SNOHOMISH COUNTY	Connection to Everett is too far out. We have paid into ST for 20 yrs and have nothing to show for it. We will not wait and pay for another 25 years
SNOHOMISH COUNTY	PUGET SOUND BOEING -EVERETT/SEATTLE/RENTON -NEED ST3 SUPPORT.
SNOHOMISH COUNTY	timeline for projects from everett should be moved up in the timeline, dramatically. That wasn't even an option in question #13.
SNOHOMISH COUNTY	How do we get this to not take 25 years to get to Everett. That is a ridiculous turnaround time. I will be retired by then and all of this would be a moot point.
SNOHOMISH COUNTY	More focus needs to be on moving people between Snohomish County and Seattle - on a daily basis for work, and for special events. Increase the number of buses, make dedicated bus lanes. Increase parking and security at park and ride lots. Extend light rail to Everett in a shorter time frame, along I-5. Consider BRT for moving employees to Paine Field/Boeing area - buses can deliver people faster to more locations around Boeing/Paine field.
SNOHOMISH COUNTY	Putting light rail connectivity to Everett & Paine Field off for 25 years is UNACCEPTABLE! I have been a strong supporter of light rail and Sound Transit since back in the 60's when we should have started this. Building the lateral extensions to light rail in the Seattle/King County area before extending service to Everett is a huge insult to those of us who have waited patiently (and paying all the while...) for the northern links to be completed. As proposed, the ST3 will completely remove me from the "supporters" list and cause me to fight against any further tax increases to support this highly prejudiced design.
SNOHOMISH COUNTY	Get rid of the part about the light rail Everett extension going through the city and just drive it to the Everett Transit Station via I-5, then run a spur down WA526 and Airport Rd to Paine Field terminal which needs to be revised so that there will be a CT and Everett bus terminal added. This has got to be a whole lot cheaper than acquiring all that land in commercial and residential areas and having to do all the blinking EPA reviews. I lived in Chicago and they have a sprawling rapid transit system consisting of above ground and below ground light rail. It works. I would like eventually sometime in my life to be able to get on a light rail train at some place in Everett, for example the Paine Field station, and an hour or so later get off at Sea-Tac airport. That's what light rail is supposed to be able to do. In Chicago I could do that just about anywhere from the extreme north to extreme south edges of the city.  Forget adding buses because buses are hampered by local traffic. Elevated or subway trains are not hampered at all with traffic. At-grade light rail is a problem whenever it runs outside of restricted right-of-way areas - how many people have been hit or cars smashed by the downtown trolley?
SNOHOMISH COUNTY	There's absolutely no reason any portion of this project should take as much as 25 years. That's absurd and process that Sound Transit is in business only to serve their own job protective interests.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	<p>There is too much emphasis being put on utilizing light rail/bus routes without the consideration for improving the existing infrastructure people would use to get to terminals. The bus routes also risk being affected by existing congestion on the I5 &amp; I-405 interstates. Your survey questions were also difficult to decipher and required I keep referencing the plan map. The plan map also does not offer enough detail of surrounding roads and businesses affected by the routes. The plan does not address congestion issues with HWY 9 to SR 522. I don't like that the transit does not indicate the travel speeds of the proposed transportation options. Most people will utilize google maps to compare their driving commute times to bus/rail commute times. Every time I have checked, driving, even with traffic is always the faster method of commuting. Additional lanes, smart traffic lights, and road design (high-speed feeder lanes to interstates) are essential additions to the proposed solution for the region. From my perspective, there are various additions/alternatives that are much more cost effective than what is being proposed here. New technologies for transportation should be phased in especially considering last phases won't be implemented until 25+ years from now.</p>
SNOHOMISH COUNTY	<p>Since I live in N. Edmonds - I doubt that light rail would reach my area in my life time in the current plan. Thus - even though I have supported previous taxation with a yes vote - it is hard to pay \$200 a month toward something I will never be able to use or experience any traffic improvement as a result. you are looking at population - I see in the newspaper that King County can pass this measure alone - so my input or vote is hardly relevant. You need to look at where the traffic is going - the sheer number of vehicles traveling to and from Snohomish County for employment result in daily gridlock on I 5. We regularly plan to travel only between 10 and 3 - if possible. Or we avoid traveling to Seattle or Everett whenever we can. Sadly, shrinking medical facilities require that we travel to those cities for appointments. This is not likely to change.</p>
SNOHOMISH COUNTY	<p>ST3 we support I-5 light rail line to downtown Everett. Bus line to Paine field from the rail line.</p>
SNOHOMISH COUNTY	<p>Seattle has a massive, ongoing, and growing housing crisis. Already, the suburbs and out-lying areas of Seattle are seeing massive growth and development as populations unable to afford housing in Seattle move further away. However, as the economic, job, and cultural hub of our region, these individuals continue to require transport to and from Seattle. To effectively reduce road congestion, remove cars from the roads, and assist in addressing climate change, ST3 MUST include strong commitments to extending Rail service, not buses, to the areas that actually house our region. Ballard, while a lovely destination to visit, cannot legitimately or seriously be considered as a major transit arm until further, more pressing, needs are met elsewhere.</p>
SNOHOMISH COUNTY	<p>Why rail from Bellevue to Redmond? It takes far less time to drive there than Bellevue to Bothell. Need to focus on P&amp;Rs on 405. Canyon Park P&amp;R is far too small. Why didn't you consider adding a bicycle lane next to 405 from the north to Bellevue instead of creating a bike path that puts rider and cars together? Your plan costs too much for the average worker to add to their already stressed budget. Only higher income people can afford it.</p>
SNOHOMISH COUNTY	<p>As much light rail as possible along I-5, I-405 with enough parking at the park and ride stations. Buses work but not as well if they are competing with every day traffic.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	We need light rail to Everett sooner than later. With Boeing causing traffic problems every day morning and afternoon we need to make some changes soon. Some business people from Japan came to town and could not believe we have no light rail system for this Big Boeing plant. Seattle is so far behind the rest of the big cities in the US. We need help fast or we all be riding bikes to work faster then a car or light rail.
SNOHOMISH COUNTY	Traffic from Everett to Seattle is already so bad, it's shameful that it isn't getting higher priority to get light rail from Everett to Seattle. We've been paying extra RTA taxes for a couple of decades, and for what? This was supposed to provide regional light rail and express bus service to outlying areas, and I'm still waiting for that light rail to arrive. The kind of light rail I rode on in a tiny town in Scotland in 1987. 25 years is too long, as we needed better options 25 years ago. I have friends who try to commute by bus from Snohomish county, but the parking lots are all full by 7 a.m. If you haven't found a parking spot by then, you have to drive. Going to Sounders or Seahawks games, or for any event in Seattle, you have to commit at least an hour to drive that 20 miles--even on weekends and evenings. Before investing in improvements to existing systems, how about taking care of the neglected people to the North?
SNOHOMISH COUNTY	Busses aren't a solution except East/West feeding Light rail North/South. Busses have been a monopoly for far too long. Until you have a comprehensive light rail system and are willing to toll all lanes of 405 and 5 feeding Bellevue and Seattle for all single occupant vehicles we will have a problem.
SNOHOMISH COUNTY	Light rail needs to come to Everett faster than 25 years. That is totally unacceptable!!
SNOHOMISH COUNTY	With Boeing pulling away from Washington State, I think the light rail to Everett should follow I-5.  The Eastside Rail Corridor should be upgraded to provide interim passenger rail with stations in Everett, Snohomish, Kirkland, Bellevue and Renton, with a spur to Redmond, for the next 25 years.
SNOHOMISH COUNTY	The extension from Lynnwood to Everett currently included in the ST3 Draft should be modified. The Option 1 plan, with a travel time 13 minutes longer and capital costs \$1.7 to \$1.8 Billion higher and ridership only marginally higher than the Option 3 plan should be replaced with the Option 3 plan. This should also allow for completion much sooner than the 25 years proposed under the Option 1 plan. Paine Field and the SW Everett Industrial Center can be served by BRT or a spur connecting to the light rail stations at 128th and/or Everett Mall.
SNOHOMISH COUNTY	It is ridiculous to expect Everett to wait forever for light rail. - we've supported the program, only to get continually shafted when new proposals come out. It just took me well over 2.5 hours to get from Everett Station to Bellevue, since there is no direct service AT ALL mid-day. It took 3 busses. I went slightly later than normal due to a doctor's appt. This is absurd.
SNOHOMISH COUNTY	If it takes 25 years to complete light rail to Everett, it will be too late. We will be in flying cars by then.
SNOHOMISH COUNTY	Forget a rapid bus line add a light rail down I-405 from Lynnwood to Renton with connections to 520 and 90. Get rid of pay lane!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	Let's get Light Rail to Everett Faster by bypassing Paine Field for now. Go to Everett first, then Paine Field via a Rail Spur.
SNOHOMISH COUNTY	Despite the additional cost of expanding rail services, I would much more support development of the light rail system over the Puget Sound area than expanding bus services. Having used rail systems in cities like London and New York City, rail is extremely easy to use and navigate and much more effective for mass transport of people on a separate-from-traffic system. It is not dependent on other traffic factors.
SNOHOMISH COUNTY	Liked alternative for north corridor shown at the open house that takes light rail up I-5 to Everett Station and adds BRT between 128th, Paine Field and Everett Station, and accelerates delivery by 10 years!
SNOHOMISH COUNTY	I feel that moving people -with out cars!-from the northern and eastern suburbs to downtown as soon as possible is the most important part of your plan. Anything that can be done to make your plan happen sooner would be terrific!
SNOHOMISH COUNTY	Bypass Paine Field and get to Everett sooner than in 25 years and then put in a spur out to Paine Field after there is rail to Everett.
SNOHOMISH COUNTY	Everett now not in 25 years. Go straight up I-5. Right of way and park & rides already in place.
SNOHOMISH COUNTY	More emphasis on Snohomish County projects - been paying for mass transit for 15-20 years with no improvements. Buses are still MUCH slower than by car despite NO LANE INCREASES to I-5 in South SnoCo in 25 years. Your plans are taking too long - look to what Dallas, TX did 20 years ago and what they accomplished in that time. The proposal is too expensive. Need to complete things faster for less money - we were promised these things 20 years ago and got nothing. With that said, I think the buses on the shoulder thing would work and is a VERY GOOD IDEA - THAT IS YOUR TOP PRIORITY.
SNOHOMISH COUNTY	i would definitely use the Sounder to go to and from Seattle & Snohomish county if there were more frequent runs during the day - both directions. Im not sure if this is part of the proposed additions, but if not, I'd highly recommend it.
SNOHOMISH COUNTY	Please please please please please for the love of all that is holy do not handicap the Ballard line by letting it interact with car traffic on the Interbay alignment!! It will [explicit] up the entire project forever. Every single place a car could potentially stall/crash/get parked on the train tracks is a disastrous failure of design. THE TRAIN MUST RUN IN A SEPARATE, DEDICATED LANE. So long as you can at least do this, I will almost certainly vote for S3. If not... I'll have a decision to make. (Also, TOD and pedestrian/bike access are the things that will best exploit the money already spent, whether S3 passes or fails. It's unfortunate that we have an easier time acquiring billions for expansions to Issaquah (!! ) than thousands to make our current stations better integrated into their communities...)
SNOHOMISH COUNTY	Everett and Snohomish County is growing faster than other areas and needs this transportation system sooner. Housing is still affordable out here, people need good transportation to regional jobs from low cost housing.
SNOHOMISH COUNTY	Add more times and cars to Sounder trains in the meantime.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	Faster time line needed. I came from another state with larger projects completed faster. Get all phases done in 12 years. The traffic is horrible and more lanes are needed on freeways if this will take 25yrs.
SNOHOMISH COUNTY	The Everett light rail should stay along I-5 and a BRT should be used to access the Boeing industrial area.
SNOHOMISH COUNTY	Sounder neglects northline needs when compared to southline. The agency's preferences are obvious even in simple things like variable message signs at the King Street station that show only southline information. Heavy rail in the north is a huge investment. Staff should not undermine the sunk cost by neglecting achievable measures that could improve northline ridership.
SNOHOMISH COUNTY	Evergreen Way must be avoided at any cost, as nearly all the businesses and employment would be in serious jeopardy.
SNOHOMISH COUNTY	Voters approved Sound Moves in 1996 to reach Everett. Ballard and West Seattle were NOT part of that. Seattle recently raised its taxes to vastly increase bus service within Seattle. Adding Ballard and West Seattle light rail would be over saturation and double taxation for them. If they are to get light rail before Everett then I am opposed to the entire ST3 and will vote no.
SNOHOMISH COUNTY	Everett area needs to be re-prioritized. Although more support to local and area buses should be funded to help while waiting the 25 year plan.
SNOHOMISH COUNTY	Priority should be given to the north and east side.
SNOHOMISH COUNTY	25 yrs of waiting for light rail from Everett to Seattle is ridiculous!!! This needs to be bumped up in priority ahead of West Seattle and Ballard; those places don't even have as far to travel!!!
SNOHOMISH COUNTY	As a commuter I always here the difficulties people have commuting in from the North end of the sound into downtown Seattle but the South end doesn't seem to have as many problems or difficulties. I have been paying increased taxes and bus fees for years now and have only seen 1 major improvement in the North end commute - an increased ST Bus service out of the 112th St Park & Ride with increased parking and access to the freeway.  Considering the fact that at least 45% of all Seattle commuters do start their day in Everett, Lynnwood, Marysville, Lake Stevens or Arlington - I would like to see plans to improve the North end commute options and stop ONLY looking at Sound end (Tacoma/Puyallup/Federal Way).
SNOHOMISH COUNTY	I would reconsider the triage of some items.
SNOHOMISH COUNTY	25 years is too long for light rail to reach Lynnwood and Everett. Buses just sit in gridlock on I5 with all the cars. WE NEED RAIL NOW.
SNOHOMISH COUNTY	The Everett Link should be supported with Highway 526 spine if the need to Paine field is that dire rather than diverting to Evergreen Way. That should save time and resources. Proper coordination with other transit departments and services should also be apparent.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

Subarea	Additional Feedback - Project(s) should be modified in the ST3 final plan
NORTH KING COUNTY	<p>Overall, I am highly supportive of expanding light rail, and have no problem with paying for it. I am much less supportive of more buses/roadway investment - getting people off the roads is the key. Extending light rail east/west is key, so I would prioritize the Ballard and West Seattle lines. However, you have two huge problems with those: timing, and supporting Queen Anne neighborhoods.</p> <p>Timing: we need to see those lines built in the next 10 years or so (max!); voting for something that happens 26 years later is a very tough sell. I would remove much of the bus support, prioritize the east/west lines, and aim to get them online in 2025 to really get people excited and supportive.</p> <p>Queen Anne: The Queen Anne neighborhoods (both upper and lower/Midtown) aren't supported at all. I would strongly suggest having the Ballard line cut through Queen Anne hill, and have stations in Belltown and at the top of the hill. Otherwise you miss an entire, vibrant, and heavily populated neighborhood.</p> <p>Thank you for listening. I am happy to discuss further if that helps - [name and phone number]</p>
NORTH KING COUNTY	<p>Light rail or BRT should be not just studied but extended to Burien/White Center. The density and low-income population in these areas makes it clear that if Sound Transit is concerned with equity, these areas must be connected to transit as a top priority.</p>
NORTH KING COUNTY	<p>I am STRONGLY in favor of extending Light Rail to West Seattle, but an elevated track would ruin the character of the neighborhood. At-grade would be problematic because the Alaska Junction is already extremely congested. It feels like a tunnel is the only plan that would actually be really useful. Running an elevated track down California would have a seismic negative impact to West Seattle's independent small business owners, and our economy.</p>
NORTH KING COUNTY	<p>west seattle and Ballard are critical. Especialy west seattle, Huge bottle neck with no where to go. need options for transit not on roads. Continued growth with no options for roads.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>Sound Transit needs to make a commitment to build the 130th Street Station</p> <ul style="list-style-type: none"> <li>• Station Spacing – Best practice for high capacity rail lines in other cities have stops averaging every ¼ a mile. North of the ship canal we will be looking at an average of 2 mile spacing getting as high as 2.5 miles between the Northgate and 145th stations.</li> <li>• Race and Social Justice – Bitter Lake and Lake City are the fastest growing Urban Villages in North Seattle while remaining some of the most affordable places to live. High numbers of low-income families and seniors live in these communities. They also represent the areas with the highest concentration of neighbors who are English language learners in North Seattle</li> <li>• 130th is an ideal place to build out better pedestrian and bicycle infrastructure. In fact some of that work has already started along this corridor</li> <li>• Car ownership is below the city wide average in these areas. This is already a transit dependent community</li> <li>• The Bitter Lake Hub Urban Village has the capacity for over 10,000 residential units and nearly 20,000 jobs. Lake City Hub Urban Village has capacity for 4,000 residential units and 5,000 jobs. These growth numbers will only be attainable and successful with access to reliable transit like light rail. And this doesn't even touch the untapped capacity that could be attained with a TOD directly around the station area. With the housing crisis we are in can we really say no to that kind of potential!?</li> </ul>
<p>NORTH KING COUNTY</p>	<p>The timeline of the project definitely is an area of concern. 20 years for any new light rail to reach Seattle from this proposition? Really need to reconsider the phasing of these project to inspire voters to expect progress sooner. Will I be in Seattle in 20 years and care anymore, or will I just spend several hundred extra dollars a year to have a transit system in my old neighborhoods when I am in a completely different phase of my life.</p> <p>However, the biggest factor in my objection is the proposed alignment for the Ballard leg. The value proposition of light rail over other forms of mass transit is speed and reliability. At grade diminishes these advantages, but a movable bridge over a canal with high boat traffic destroys them. In the risks statement, I believe Sound Transit has essentially glossed over this major risk to reliability by classifying reliability as medium/high and simply stating "reliability could be affected by movable bridge over Salmon Bay."</p> <p>Any form of mass transit which has to routinely wait an extra 15 minutes to make its 15 minute trip because some person decided to take their sailboat out to the sound for a leisurely cruise is neither worth paying billions for nor a 22 year wait, let alone both. If the final proposal doesn't include either a bridge high enough to be fixed, or a tunnel under the canal, you have lost my vote along with my vocal support to peers and coworkers about the future of light rail in Seattle.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>There's a HUGE band of neighborhoods which are not served by ST3 AT ALL. A very large portion of EAST/WEST corridor from Fremont to Greenlake to Wallingford up to the edge of I5 is COMPLETELY out of the ST3 plan. Arguably, the route from Downtown to Interbay rides along large areas of low density vs areas of medium density in alternatives. Moreover, let's not plan for NOW let's plan for what things WILL look like. These areas centrally located near 99 and I5 are going to continue to grow at a rapid rate and will likely outpace Ballard in the time frame we're talking. WHAT is the answer? My guess is that you'll get MORE support and more willingness to spend more money if you include more neighborhoods and expansion at a faster rate.</p> <p>Second, please stop with using congestion as significant means of justification, this is not the cardinal reason people want ST expansion. People want light rail for convenience to work, to nightlife, no parking, no car costs. People of course like avoiding traffic but it's the quality of life improvement people want, the convenience of not having to drive. Just look at bus ridership during sporting events. HUGE traffic, long waits but people still ride the bus. Making cars and traffic evil is not the answer to convincing people.</p>
<p>NORTH KING COUNTY</p>	<p>Ballard: Based on Ballard's population vastly exceeding the PSRC targets, Ballard should be the top priority project for the City of Seattle. Ahead of West Seattle. Even by the Draft Plan's own estimates, this project has BY FAR the highest ridership of any other line. This needs to be top priority. 22 year is too long given the urgent need and the upcoming growth in SLU and Interbay as employment centers. Also, I am highly concerned with a portion of this project being at-grade through Interbay and then elevating over the ship canal with a movable bridge. Truly grade-separated is a must. As this proposal stands, with a 22 year schedule and partially at-grade/bridge alignment, I will vote against this plan (and actively advocate to others to do so as well).</p> <p>Graham Street: This station should be considered an "early win" not something to be added in 20 years. This is an equity issue given the population that this station would serve.</p> <p>Everett: I very much support finishing the spine to Everett. I absolutely oppose what in my mind is a handout to Boeing by detouring (and thus slowing down) a line to Paine field. Keep the alignment along I-5 and avoid the added cost and time to build a handout to Boeing.</p> <p>Ballard to UW: I am very disappointed that this plan does not include a Ballard to UW (and beyond) line in the plan. If it allowed for Ballard to be connected to Downtown Seattle (via existing UW station) faster than 2038, I would even support this above the Ballard to Downtown station in the plan.</p>
<p>NORTH KING COUNTY</p>	<p>Please add a light rail extension across 520 that connects to bothell/woodinville</p>
<p>NORTH KING COUNTY</p>	<p>Light rail from Ballard to Downtown should be a higher priority given all the new housing being built in Ballard. The D Line will not be sufficient.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	In some of the ST3 light rail plans I've seen, it looks like the current Link light rail line would no longer go directly from Rainier Valley to the airport and UW; it appeared as though there might be a transfer, and instead the new line from Ballard would go directly to the airport. I am pleased that I don't see this in the plan on this survey, but do want to weigh in on this in case it's still under consideration. I would not want to see changes like this to the current line--which serves thousands of folks in the Rainier Valley who do not have access to cars and who work downtown, on Capitol Hill, and at the UW--just to make a direct line form Ballard to the Airport. I hope you will keep the current line from the airport to Rainier Valley to UW as-is--with no transfers needed--as you continue to expand.
NORTH KING COUNTY	Every other major city builds mass transit in its city core before expanding out to suburbs. This plan is great but backwards in its timeline. City (Ballard, west Seattle) needs to be serviced FIRST is increased density keeps getting built. It takes me nearly as long to drive downtown from Ballard as it takes me to drive to Marysville. Increasing density without infrastructure is insane. Also east/west travel needs to be added such as Ballard/university to allow for travel from capital hill to Ballard (as an example) which currently takes 45min-1.5 hours (!!!) with bus transit. Buses are too slow and caught in the same traffic which is why I now drive instead. I will gladly take light rail instead of drive. 22 years is too long. City is more crucial than suburbs. We're living and dying in our cars. And yes it's that dramatic as single family homes are replaced with 4 town homes.
NORTH KING COUNTY	Focusing on commuter lines from surrounding cities/regions into Seattle is only as useful as the system within the city. Improving the ability to move within Seattle feels like a priority and precursor to building extended lines that would take people into Seattle without a car.
NORTH KING COUNTY	The Ballard light rail segment needs to be grade-separated the entire way, without a reliability-destroying bridge. The best option to ensure reliability and ridership is to build a tunnel under the canal. Don't build an unnecessary choke point in this important line.
NORTH KING COUNTY	Ballard and West Seattle should be accelerated - these areas have a big impact on these neighborhoods and reducing traffic
NORTH KING COUNTY	No at-grade rail in Seattle city limits
NORTH KING COUNTY	Please complete light rail to Ballard sooner. With the boom in development and density, traffic here has become unbearable. We are a hive full of trapped honeybees, swarming to get in and out.
NORTH KING COUNTY	The Ballard line needs to be fully grade separated and needs to be provided by 2030. There is absolutely no reason to build the rest of the network until the most dense areas of Seattle are connected. A Ballard to UW line is also needed since it provides a much needed East-west connection in the city which connects other important neighborhoods. There recent high ridership on the U link stations shows the insatiable desire of Seattle residents to live fully in an urbanist framework, something that is severely lacking from the suburban stations and their high reliance on park and rides (which ST should leave to the private sector to build and run).

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>Any line from Ballard to Downtown Seattle must be grade separated for the entire route.</p> <p>Planning should consider adding bike/ped. path to the ship canal crossing if a bridge is used.</p> <p>Strong consideration should be given to a Ballard to UW rail tunnel. If the tunnel can't be built/financed in ST-3, the station must be planned/built with minimally disruptive line extension possibilities.</p>
NORTH KING COUNTY	<p>We must have grade separated. If a light link rail gets stuck in traffic we have failed.....and the consequences of that failure will live for hundreds of years. Let us instead think boldly and develop a plan that will serve our community for the duration.</p>
NORTH KING COUNTY	<p>I will likely oppose ST3 unless the Downtown-Ballard line is grade-separated, and unless the plan commits at least to studying a Ballard-UW light rail line.</p>
NORTH KING COUNTY	<p>Ballard to Downtown: Does there need to be two very closely-spaced stations in South Lake Union? Could this \$300m cost be used to tunnel under Salmon Bay or speed up the project timeline?</p>
NORTH KING COUNTY	<p>Ballard line should come online much sooner!</p>
NORTH KING COUNTY	<p>The Ballard and West Seattle lines need to be done first, not last. Seattle is choking to death from traffic. It takes upwards of an hour to move across town sometimes. The populations affected by Ballard and West Seattle lines are far more dense than extending rail to the east, north, or south.</p> <p>Also, at-grade in Interbay is just asinine. We NEED to elevate or tunnel light rail.</p> <p>I would very much prefer the plan proposed in <a href="https://www.theurbanist.org/2016/01/11/ballard-spur-and-metro-8-subway-serve-seattle-better-than-interbay-light-rail/">https://www.theurbanist.org/2016/01/11/ballard-spur-and-metro-8-subway-serve-seattle-better-than-interbay-light-rail/</a></p> <p>If ST3 goes to the ballot in this drafted form, I will be voting no. It pains me, because we absolutely need to invest in more rail and transit options. But there is absolutely no way I'm voting for a plan that would have me paying taxes for TWENTY-TWO YEARS before a Ballard light rail line is operational.</p>
NORTH KING COUNTY	<p>The Ballard to Downtown route must include a stop in Fremont (between 34th and 40th preferably). This would significantly increase ridership and the livability of the north Seattle area, which is being significantly impacted by growth (urban infill and more jobs). Unless the city is going to stop additional development and not increase density in Fremont, high-capacity transit is needed to prevent the complete destruction of quality of life in this neighborhood.</p>
NORTH KING COUNTY	<p>Ballard population is exploding and needs more transit options ASAP!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	The absolute worst option was chosen for Ballard, and why? At grade rail running through a corridor that recently had its speed limits further reduced, and then running it over a single purpose bridge that will have to stop for heavy commercial and pleasure boat traffic? And why did we chose the cheapest option, slowest option with the least ridership? So we can afford a billion dollars in parking at suburban stations that are going to see less use combined than the ridership we are losing? AND we are pushing it off until the very end of the cycle (2030s????). A UW-Ballard spur would be better than this debacle of a Ballard plan. Scale back the unnecessary parking. Fix the currently pointless Issaquah line into something functional (or just use BRT). Fix Ballard.
NORTH KING COUNTY	I feel like the timeline is too long! Is there no way to shorten the length of time needed for all of the projects? Why can't we have light rail to Ballard sooner? With more and more people moving to this neighborhood 20 years is simply too long!!!
NORTH KING COUNTY	Speed up all timelines!
NORTH KING COUNTY	Below grade for the Ballard line!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<ol style="list-style-type: none"><li>1. Central Seattle projects need to be done first ... this is the system's core and w/o these projects done first, the system will not be able to support itself. Start N of Lynnwood using BRT (same for south of Federal Way) ... then upgrade last to LRT ... Ballard / West Seattle have proven their respective route's worth using buses.</li><li>2. Design the second DSTT so that it can have stops, between IDS and Westlake, under Yesler Terrace / Harborview Medical Center and one in North First Hill (near Swedish &amp; Virginia Mason Medical Centers) ... this would allow Yesler Terrace to be fully built out and become an attractive mixed income neighborhood w/highrise towers like we want (i'm a First Hill Improvement Association board member) ... as well as serve the 3 city hospitals ... as well as the densest / most transit dependent residential neighborhood in downtown (First Hill) as well as 50,000 or so jobs ... as well as providing a great opportunity to connect with the forthcoming Madison BRT line that will serve Madison ... would make the stations extremely attractive to EVERYONE east of I5 and between Capitol Hill Station and the future Judkins Park station (at the very least ... even if only one stop were approved a Beacon Hill style stop at Madison ON First Hill would be more game-changing than Capitol Hill ...</li><li>3. Ballard to Downtown will be a nightmare if it runs on the surface, never mind a draw bridge. Needs to be in a tunnel like U Link / N Link ... that is why it is popular because it removes transit from the surface where it can get delayed by other traffic, accidents (and in this case ships)</li><li>4. I like the idea of a line From Issaquah to Bellevue ... would like it better if it were also connected to the East Link line so that one could ride the same train from Issaquah to Downtown (or at least have the track available to offer such service)</li><li>5. It is ridiculous that Graham St infill station has been punted to 2036 ... that should be low hanging fruit and (I thought) was partly funded from the Move Seattle Levy. Work on that should begin immediately ... not in 20 years. And Boeing Access Road ... there is almost ZERO need for that if there is no corresponding sounder station ... or any other transit infrastructure. Build that first. NE 130th ... ridiculous that we are still discussing that station. Just build it. Even if it means getting to Everett a year later than scheduled ... it will be more utilized than Paine Field - Everett ever will be.</li></ol>
-------------------	--

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>Ballard and West Seattle add so much more ridership, it would be preferable to speed up the implementation of those well over the very ends of the spine. Ridership now should really trump completing the spine. The fact that 20,000 new riders were added with U-Link opened and a projected 100,000+ are supposed to use the Ballard line are easy wins to show the region, politicians, voters and the federal agencies granting \$\$\$ that funds are being used in the quickest and most efficient ways.</p> <p>Nice to have - but prefer the spine to these - Ballard to UW light rail and the so-called 8 subway (replace the 8 for a crosstown Seattle Center/SLU/Cap Hill/CD subway). These would be huge to help further with congestion in the city of Seattle proper. Thank you!</p>
NORTH KING COUNTY	The Ballard line needs to have grade separation. Is also need to be done sooner. 25 years is crazy.
NORTH KING COUNTY	<p>1. I will not vote for this unless the rail choices in Seattle are grade-separated, there are no drawbridges, and route(s) serving North Seattle are completed before the spine. There is significantly higher potential for ridership within the city than from the outside.</p> <p>2. UW &lt;-&gt; Ballard should be considered instead of the current Ballard &lt;-&gt; downtown route. It gives us a connection between Ballard and Downtown with a much shorter line requiring no bridge crossing and gives Fremont and Wallingford access to light rail.</p>
NORTH KING COUNTY	dense neighborhoods within the Seattle area should be considered much earlier in the plan as they're the ones that add to the downtown congestion the worst. West Seattle and Ballard are already limited on the routes to downtown and this would expand on that causing less bottlenecks in places with limited routing.
NORTH KING COUNTY	<p>Need to re-prioritize:</p> <ul style="list-style-type: none"> <li>•Timeline: 25 years to bring Light Rail to Ballard. This is 5 years after it's arrival in West Seattle, when the Ballard extension has nearly three times the forecasted ridership.</li> <li>•No Ballard to UW Extension: Currently listed as 'Future investment study' only. This extension needs to be a part of ST3.</li> </ul> <p>Need access from Seattle to Redmond built in earlier.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>It is unacceptable to have at-grade rail or a drawbridge anywhere in Seattle. I cannot support ST3 unless the infrastructure for the Ballard line is grade separated and cannot be stopped by a boat when crossing the canal. The biggest strength of the light rail system is the separation from everything else in the system, and the ability for a car or boat to stop or delay a rail line is unacceptable.</p> <p>The timeline is also unacceptably long, especially for the city of Seattle. Once the Northgate station finishes, the time between it and the next Seattle rail station opening will be measured in decades. We need these projects delivered now and we cannot afford to wait decades.</p>
<p>NORTH KING COUNTY</p>	<p>The ballard line needs to be a tunnel the entire way, including through interbay, or I will vote against the whole st3 package. The ballard line is the only thing that makes this whole package paying for if you live in Seattle. Having it at grade even partway will make it worthless by the time it is completed. Traffic will increase, and there will be delays.</p> <p>In general, there needs to be more commitment to not running light rail through intersections or any kind of "at grade". If light rail has to slow down for crossings, it defeats the whole advantage it has over buses or just driving.</p>
<p>NORTH KING COUNTY</p>	<p>See and being in traffic from snohomish county to and thru king county, as well as pierce, it is unconscionable not to go to Everett and to Tacoma with the lite rail. Ballard and west seattle can do busses, they do not need lite rail. If they do, have street car go. It seems the bulk of planning is in the city of seattle and not diminishing traffic going into seattle from the north and from the south. The taxpayers are also out of the city of seattle and should have better accomodations.</p>
<p>NORTH KING COUNTY</p>	<p>The Ballard and West Seattle light rail plans are too low on the priority scale. Making it easy to get around Seattle should be utmost priority. A moveable bridge is NOT a good idea for Ballard and the light rail line doesn't extend far enough north. Where is the east-west connection in Seattle? . The Ship Canal is already strife with traffic and congestion associate with bridge delay and the City is not advancing towards a solution here. Adding another bridge without adjusting the requirements for bridge openings will worsen the problem. The proposed KC Metro C/D line advanced enhancements is absolutely fundamental if Ballard and West Seattle won't see light rail for upwards of 15 years. How will this be done on the Ballard and West Seattle bridges? Dedicated bus lane?</p> <p>Thanks for focus on bike/ped and general enhancement of multi-modal access to transit.</p>
<p>NORTH KING COUNTY</p>	<p>This whole project should be a 10 year plan. Light rail to West Seattle and Ballard should not take 20 years to be ready! There is a strong urgency to get everything online ASAP. Our region is going stall on growth and livability because of our traffic problems right now.</p> <p>Light Rail/Rail/Trams and right-of-ways for transit are required for fast, reliable, and dependable transit! The experience of transit has to be better than the experience of driving for people to ditch their vehicles.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Downtown to Ballard light rail needs to be grade seperated.
NORTH KING COUNTY	I live in Cedar Park/Lake City area. I can't utilize U-link because there are Metro/ST buses that go downtown directly. Your new ST buses will only accommodate from Shoreline to Woodinville on NE 145th St and SR522 which ignores the whole entire community of people like me. Currently, I have no way of going north to Lynnwood from where i live (I might find a job up there, who knows?). You MUST add NE 130th Station or I have no reason to support your project.
NORTH KING COUNTY	EVERY LINK SHOULD BE SEPARATED FROM NORMAL TRAFFIC!!! No at grade rail systems please. What is the point of waiting 20+ years for a system which will continue to be impeded by normal traffic?! It makes no sense. We need to invest in our infrastructure in a meaningful way which includes realizing at grade link trains are a terrible idea.
NORTH KING COUNTY	I wish the light rail line to West Seattle went further into/down the peninsula for ST3 - not just exploring the issue. So many buses already go from the Junction downtown and from Delridge downtown, it would just swap several options with another one. I would like to see a route extending to White Center (at least) included to truly help alleviate the traffic to/from the peninsula and to reach lower-income citizens.
NORTH KING COUNTY	No at grade crossings should be allowed in the downtown to Ballard LRT. It needs to be completely grade separated. This project also needs to be accelerated given that it is the highest projected ridership of any part of this plan.
NORTH KING COUNTY	The timelines described in the plan (8 to 25 years) is highly suspicious. The cost (\$50 Billion) is fine and a cost I am willing to bear as a taxpayer. Based on my experience with municipal government and contractors you will all find a way to make it \$75 or even \$100 Billion by the end of the project. Honestly, I don't even care if that is what it takes to make it happen SOONER. Apart from that, the only thing I hear often is that there should be no at-grade rail in or near the city. Having the rail interact with cars and draw bridges will slow it down considerably. This isn't my opinion, it is mentioned several times in every story posted to <a href="http://www.reddit.com/r/seattle/">www.reddit.com/r/seattle/</a> including the thread talking about this survey. We need to cut our carbon emissions by having people drive fewer cars. These sorts of projects can actually do that. We therefore need more of them and faster.
NORTH KING COUNTY	Ballard and West Seattle are much higher priorities for me than SEA-Eastside-Issaquah, focus on core neighborhoods first
NORTH KING COUNTY	Please focus on the Ballard and West Seattle light rail options first, in order to serve the densest neighborhoods in our region which desperately need traffic-separated, reliable transit options.
NORTH KING COUNTY	The alignment from Ballard to Downtown should be fully grade separated to avoid the kind of problems we experience today on MLK. At grade service was an acceptable compromise for the Rainier Valley at the time, but it is not advisable for a growing system. Seattleites will fight at grade service because of its unreliability and impacts to 15th Avenue.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>Project Financing:</p> <ul style="list-style-type: none"><li>- Will sub-area contributions/redemptions be published? Reallocation of North/East King funds to complete the "Spine" is unacceptable as those projects project poorly against investments in more urbanized areas that are found in the North/East King subareas.</li></ul> <p>Project Scope:</p> <ul style="list-style-type: none"><li>- Where is a proposal for Ballard - UW or Central Seattle Subway? Given the immense time scale and cost of this package, it is surprising (in the worst way) to see no mention of these projects, and is especially a bad look when the ridiculous timeline for infill stations is provided. Sound Transit must not focus solely on commuter movements, especially using light rail technology over long distances (slow!). We need mobility within urban areas to encourage less driving, otherwise you end up with BART, which is anything but ideal.</li><li>- A Downtown-Ballard routing that utilizes at-grade stretches must not conflict with traffic in any way. A 70' Ballard bridge must minimize conflict with marine traffic. There MUST also be a provision to create a Ballard station at 15th that is compatible with a future Ballard-UW line. If this is not strictly stated within the final plan, ST3 becomes an instant NO for myself and anyone who lends an ear.</li><li>- What additional Sounder improvements can be made to facilitate more/faster Tacoma - Seattle / Everett - Seattle trips? Light Rail does NOT approach the reliability (North Sounder withstanding) or speed of commuter rail for distances of this size and it is incredibly disingenuous to suggest that trips will be faster, or even better by Light Rail over existing ST commuter buses.</li></ul> <p>Project Timeline:</p> <ul style="list-style-type: none"><li>- Quite simply, the timeline for completion of North King projects is unacceptable given the large cost imposed. It is a difficult sell to ask someone to imagine benefits when they'll likely not be a user of the future system, combined with the lackluster routing</li></ul>
-------------------	--

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>- Please reconsider the proposal to have the Ballard line run at-grade with a drawbridge. To fully realize the vision of having fast, reliable light rail service, we shouldn't present an opportunity for traffic to impede the light rail. The at-grade sections we have down south are already terrible, and I imagine it will only be worse on the way to Ballard. I would much rather pay more for long-term, predictable service than spend a ton of money on a solution that has problems from the beginning. I'd even grin and bear a longer timeline, if that is what it would take, even given how bad traffic in that area is now. The University of Washington and Capitol Hill stations are fantastic and set an example of how things should be done in an urban environment.</p> <p>- Consider prioritizing the Ballard line higher. It is extremely painful to reach Ballard/Fremont already, and I can't imagine how bad it will be 15+ years from now. We need better service to that area as soon as possible.</p> <p>- Consider prioritizing the U-District to Ballard line over the Downtown to Ballard line. It would ultimately serve more dense areas sooner. I don't know how much longer a trip to Ballard from Westlake would take with a detour to the U-District, but if it was less than 10 minutes, I'd take it if it meant no at-grade rail in the metro area and bonus service to Fremont &amp; Wallingford.</p>
<p>NORTH KING COUNTY</p>	<p>This plan encourages suburban sprawl at the expense of urban enhancements and development. The lack of a UW-Ballard line is UNACCEPTABLE. The timeline for West Seattle and Ballard lines are UNACCEPTABLE. At grade line for Ballard is UNACCEPTABLE. Spending billions of dollars for parking structures in far off suburbs and connecting Issaquah over improving rail in Seattle is illogical.</p> <p>In short, I will not be voting to approve this plan. Please revise this with timelines and routes that will impact people living in the city today, not our grandchildren.</p>
<p>NORTH KING COUNTY</p>	<p>Not digging (so to speak) the drawbridge to Ballard. The extra cost for a tunnel would be worth it and increase ridership, especially from people like me who have been stuck at the bridges way too many times over the years.</p> <p>Also should really grade-separate it, lightrail/car accidents are pretty common and are just going to maroon people in (or keep them out of) the Ballard end stub</p> <p>Basically spend the extra money and do it right, we don't want to pay for half-solutions</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>The ballard line MUST be modified to be above grade and a clear understanding of how often the new drawbridge would go up. The reason I don't take the bus now is how SLOW the D line takes. If the train is going to be just as slow due to cars/bridge then there is no point. Ballard is in city enough that it must be treated the same as if you were going to U of WA.</p> <p>In addition to that, it's INSANE that it won't be completed until 2038. Ballard is going at a HUGE rate and most of the construction in the neighborhood does not include parking. If we are going to convince people to rent/buy without parking which is what the city wants then we must support it with reliable and fast transit.</p> <p>Right now, I don't believe sound transit cars about the speed of reaching the city however it is the ONLY reason I drive. If the bus lanes were bus lanes all day instead of just bus lanes 7-9am and then parking then that would help. I don't get why parked cars get rights over buses. Do you want to fix the problem or make it worse by allowing cars to park in the bus lanes?</p>
NORTH KING COUNTY	<p>22 years to get light rail to Ballard is absurd. The time line MUST be accelerated. We need additional capacity *now*, not in two decades. I'm saying this and I don't even live in Ballard or go there. There's also the issue of serving less populated areas like Sumner before denser areas like Greenwood, Wallingford, Fremont, Ballard, etc.</p>
NORTH KING COUNTY	<p>Focus on improving moving around Seattle. We are the straw the stirs the drink!</p>
NORTH KING COUNTY	<p>The light rail in the city should be completed sooner. To wait that many years will not help anyone and why should many of us vote to be taxed when we will most likely not be able to use the improvements.</p>
NORTH KING COUNTY	<p>Please improve the Ballard to Downtown Seattle. At grade in Seattle is terrible and 2038 to complete it is also bad. We can do better and we should do better.</p>
NORTH KING COUNTY	<p>The in city neighborhoods of Seattle have sit back and watched as most of Sound Transit 1 and 2 have been focused on County projects and done nothing to connect the densest and highest tax paying citizens neighborhoods to job centers via light rail. Now ST3 is telling us that Redmond and other outlying areas will be before Ballard and West Seattle. Enough is enough! Seattle needs to have priority raised as to when light rail will be built and deployed!</p>
NORTH KING COUNTY	<p>Ballard and West Seattle can't wait decades for rail service. They're densifying now, at startling rates (good!) but without transit that people prefer to cars (i.e., rail), traffic is choking these neighborhoods.</p>
NORTH KING COUNTY	<p>Regarding Ballard light rail: It seems like a missed opportunity to go through Interbay, where only a few people live and work. Since the project is going to be costly, we should build a project that works for more people. Upper Queen Anne and Fremont should get a station. More importantly the downtown-ballard route should be grade separated. Tunneling would ensure timeliness of the system (which is a big selling point) and would eliminate the need for a bridge over salmon bay.</p>
NORTH KING COUNTY	<p>Inner city projects should be moved up. No reason why Ballard is one of the last communities to be addressed.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	50,000/ year and a project that takes 17+ years is approaching 1million pop growth... not fast enough. W. Seattle and Ballard need light rail in 7 years, not 17. Pay for it more with gas taxes in addition to property taxes.  Alson, Open the rarely utilized bike lanes to 2 wheeled motor scooters (<50cc and <20 mph), Seattle has too many hills to make pedal bikes a highly used option and the lanes use too much valuable road space as currently utilized further encumbering traffic.
NORTH KING COUNTY	The Ballard South Lake Union segment should be moved to 1st position in the timeline so that comes on line as soon as possible.
NORTH KING COUNTY	I can't possible see why the Ballard project is so far down on the list. Most of Ballard has been re-zoned for high density housing, yet our current transit system is terrible. How about we fix all of Seattle, which Ballard is a part of, before moving out to the surrounding cities. I'm in favor of mass transit, but I will vote against this in its current state.
NORTH KING COUNTY	There are currently multiple public transportation options to get from Tacoma to downtown Seattle and back. Limited options from downtown Seattle to North King County (Shoreline). Continued options such as buses, light rail are added to Northgate and U District, but not north of them.
NORTH KING COUNTY	The timeline is unacceptable for the projects within the city of Seattle. Unless there is a significant revamp or sound transit 3++ targeting more and sooner projects within the city of Seattle, I won't be able to vote yes. People who live and work in Seattle are ready to pay for a massive expansion in grade separated and bus dedicated lanes etc — give us the opportunity and leadership to get this [explicit] done.
NORTH KING COUNTY	We need access to the light rail from South Lake Washington. All plans seem to consciously cut away from Renton. I love the light rail, and i take it often but I dont have to commute as I work from home. The nearest rail station in Rainier Beach. It is a 15 minute drive from my house and completely unrealistic to reach on foot or by bus.
NORTH KING COUNTY	Priority should be light rail / commuter rail. There are already too many buses on the road and SDOT keeps making it more and more difficult for passenger vehicle commuters by shrinking lanes so the bus gets priority. Adding more buses is not the answer this city needs. I'm 100% behind light rail expansion and would be okay with a tax bump, but I'm not at all interested if that money goes towards more buses on the roads, or more road diets for bus lanes.
NORTH KING COUNTY	Light rail should be modified to West Seattle to go down Delridge at grade and connect back into the system at Tukwilla. I strongly support your proposal otherwise, except for the timeline. 25 years is not nearly fast enough. The plan does not even fully cover what we need now let alone what we will need in 25 years. I would strongly support a more aggressive timeline even if the cost was triple what you have outlined here.
NORTH KING COUNTY	Sound Transit should prioritize strengthening light rail within Seattle as opposed to trying to major area expansions. It would be great to see more options in urban neighborhoods around the city. Also, it seems like a better long term investment to make the light rail bridge in Ballard fixed as opposed to movable.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Ballard and West Seattle projects should be fast-tracked. It is simply unacceptable that they are sidelined in favor of more far-flung projects.
NORTH KING COUNTY	It's unclear to me why there is merely a research proposal for a Ballard/University connection rather than a concrete plan, as there is for so many other things. This should be explained to the public.
NORTH KING COUNTY	More should be done to improve mobility within major urban areas first. Make it easier for people to move within Seattle/Tacoma/Bellevue before spending all that money on regional transit. If people coming down from Lynnwood still cannot get around in Seattle once they get there, why use the system?
NORTH KING COUNTY	<p>Light rail to Ballard and West Seattle must be prioritized and open much sooner than proposed in the plan. Quite frankly, the other rail lines will not compete with the positive impact, ridership, and fiscal efficiency that Ballard and West Seattle lines will bring. Seattle is growing now and needs grade-separated light rail now. Seattle has the higher jobs and population density that demand greater rail access, and we have been planning for rail for over 20 years with our established urban villages. The current project timeline of 17 years for West Seattle and 22 years for Ballard is unacceptable, and I am inclined to vote against this package because of that. A more acceptable timeline would be 10-12 years.</p> <p>In addition, the opening of the Graham Street infill station in 2038, 22 years from now, is similarly unbelievable. The line is already built and Seattle voters just committed \$10 million to build that station. It should be built in the next 3 years.</p> <p>Regarding the proposed Downtown Seattle-to-Ballard line, at-grade rail in Interbay and a drawbridge across the Ship Canal is similarly unacceptable for a high-capacity transit system. The only alignment I would support is at-grade or tunnel in Interbay and a tunnel under the Ship Canal. The proposed plan dooms the Ballard line to ineffectiveness and unreliability for 100 years. Do not repeat the mistake of at-grade rail on Martin Luther King Junior Way.</p> <p>I am disappointed in the lack of commitment to building east-west rail lines in Seattle, namely Ballard-to-UW and the "Metro Route 8" subway along Denny Way and to the Central District. Seattle sorely needs cross-town connections and these relatively short lines must take priority over the lower ridership and more costly-per-rider lines proposed in the low-density suburbs.</p> <p>I know completing the Everett-to-Tacoma spine is important. But it cannot come at the cost of effective light rail in our region's urban core. A complete light rail network in Seattle will benefit not just Seattle residents, but the employees and visitors of Seattle that live across the entire Puget Sound region.</p> <p>I recommend trimming back the ambitions on the east side of Lack Washington and proposing more BRT routes until the next ST4 package. Issaquah simply does not have the density to support or justify light rail, and would be better off with enhanced bus service.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Projects near the Seattle center, especially Ballard need to be finished ASAP.
NORTH KING COUNTY	More focus should be put on getting light rail to dense urban neighborhoods that will use transit (i.e. Fremont, Ballard, West Seattle). These areas are dense, walkable and have already shown that they will use buses, it makes more sense to expand the Seattle network before creating park and ride stations in the sprawl of the suburbs.
NORTH KING COUNTY	Light rail to Ballard should not be built at-grade. The area is simply too crowded. I would rather see a grade-separated option for Ballard-Downtown in ST4, than see Ballard-Downtown pass in ST3 and get stuck in traffic.
NORTH KING COUNTY	<p>I am HUGE transit supporter, member of WSTC and advocate for light rail, BRT and generally willing to pay a high tax to get these projects completed. I have been reading, thinking and talking with other transit nerds about the upcoming ST3 plan. I attended opening day of the light rail stations at Cap Hill and UW. I even bought the t-shirt to show my support.</p> <p>How disappointed I am to see the final ST3 plan! You guys completely blew it. I can't believe how badly you misjudged this. This is way too much (less of a problem) and the timeline is way too long (a major problem).</p> <p>Sorry guys, but no one is going to vote for this. Please read the STB comments and you'll see what I mean. If you can't get buy in from a bunch a massive transit / light rail supporters you have a major problem.</p> <p>What is the problem exactly? I will tell you. You need to focus on a 10 year plan that alleviates traffic and speeds up travel time in the immediate Seattle city area. Ballard, West Seattle, SLU, UW (where is the Ballard - UW connector line????) You are making the same mistake that BART made by running rails too far away. Focus on quick wins for BRT and light rail in the immediate area and forget and Paine Field.</p> <p>And just because everyone has a biased neighborhood opinion I'll tell you mine. Your proposal to reach the AK Junction is ridiculous without going further south to White Center. People in WC and South Delridge would now have a potentially three seat ride downtown? There's no reason to even go to the expense of building that line. You should just rechannel Delridge and turn 4th ave into a BRT only 24/day with bus ROW.</p> <p>I really want to vote for ST3, but I simply cannot vote for this plan. It makes no sense and won't solve any immediate problems. I hope you hear a ton of feedback and revise ST3.</p>
NORTH KING COUNTY	ballard and west seattle should take priority. less traffic downtown = less traffic for people driving from further away.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Ballard is a neighborhood growing by leaps and bounds right now. I think it's silly to push that so far back in the plan. I think it would make sense to put the light rail system in now before it grows so big that it's harder to get it in later. Let the neighborhood grow around the light rail, not the other way around.
NORTH KING COUNTY	Emphasize on Ballard-UW or Ballard-Downtown or West Seattle to Downtown. Don't be so suburb heavy and finish the project faster. I'm not going to vote for a system that will be ready when I'm retired.
NORTH KING COUNTY	The delivery-time of light rail service to West Seattle and Ballard (via the new WSTT) needs to be dramatically reduced to under 15 years in order for most Seattleites to maintain enthusiasm and for ST3. Otherwise, for Seattle to be taxed for that long so that Everett and Tacoma get their 'spine' first is prohibitive for residents of Seattle to support.
NORTH KING COUNTY	Building a new tunnel from Downtown Seattle to Ballard seems a waste of money, considering little ridership until you get to Ballard. Would be better to do a surface or elevated light rail from either the UW Seattle campus to Ballard or a surface or elevated light rail from Westlake to Ballard via Fremont (like at 3rd Ave NW or Stone Way N or Albion N). Ballard needs more service, but a tunnel seems really a waste of money.
NORTH KING COUNTY	The Seattle projects need to be prioritized and fully grade separated. There is no excuse for 2038 to Ballard, and while I support paying for more transit, I cannot vote for ST3 as is right now. The density is in the city, not the suburbs, and light rail should be prioritized where the density exists. Note that I would pay MORE for proper in-Seattle grade separated transit than the current proposal, but cannot support the expansion into the exurbs with their over-reliance on park-and-rides (which shouldn't even be proposed). The ST board is displaying their pure idiocy with the plan they presented to the public. The excess demand of the U-Link stations should clue you in to where the people have a desire for these projects (i.e. doubling the ridership overnight with only TWO stations). Grade separation is also a must which is lacking in the current Ballard-DT plan.
NORTH KING COUNTY	Ballard to UW link needs to be an action item, not just research and discovery. Even if it's a bus rapid line, that link is a [explicit] as it is right now. Take a ride on the 44 from the UW medical center into Ballard and tell me that whole area of transit doesn't need a complete overhaul.
NORTH KING COUNTY	Ballard light rail needs priority and NO AT-GRADE LIGHT RAIL! If we build it, it must be dedicated right-of-way, especially within Seattle.
NORTH KING COUNTY	SR 522 BRT : Finish EB HOV lanes from NE 145th to Lake Forest Park! Some days it takes almost 20 minutes to get down the hill from 145th to Lake Forest Park in the afternoon.  Also, I am supportive of ST3, but the timeline needs to be shortened for the completion of these projects.
NORTH KING COUNTY	We need the projects in the city of Seattle done much quicker and we need a line from Ballard to the UW
NORTH KING COUNTY	West Seattle should be bumped up on the time line!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	While this is a good plan with much needed changes to transportation, a lot of these do nothing to help the situation now. Having a light rail station in Ballard in 22 years does nothing to help the issues we currently face. If there is anyway to speed up the plan for the plans in the Seattle area at least, I would support this project more.
NORTH KING COUNTY	You can't possibly postpone the Ballard line until 2038 with the current density - and projected increasing density - of that area. That seems completely backwards. There is barely room on the busses during rush hour - people are ready to switch to light rail NOW in that corridor!
NORTH KING COUNTY	Eliminate the bus stuff and focus only on light rail. Bring the light rail branches to Ballard and West Seattle online first (within 8 years). Have light rail travel through (not around) Queen Anne and through West Seattle down to Burien and over to the airport. The rest of the light rail system can come online in 15 years. Don't extend it out to 25 years! We need MORE LIGHT RAIL NOW!!!!
NORTH KING COUNTY	Greater priority on the Boeing Access road light rail station. There is already rail line access to the spot and it could potentially move a large population of Boeing employees onto mass transit. 20 years is too long to wait!
NORTH KING COUNTY	Prioritizing parking near stations in the current plan is a waste of money better spent speeding up the extremely lengthy timelines. Cut the money being wasted on parking and use it to speed up the construction process or initiate work on more than one project at a time. Making Seattle wait 17 years or more for light rail when the demand is so heavy right now is also causing a lot of consternation and makes it look like Sound Transit takes Seattle votes for granted when they obviously shouldn't.
NORTH KING COUNTY	The time line on the Ballard to downtown and West Seattle to downtown should be moved WAAAAY up, BOTH should be up and running ASAP. If we can do in it 10 that would be great! Also Ballard to UW ( and possibly to Sandpoint ) should be put on the 25 year list. And Finally I would support extending East Link from Redmond up Rose Hill, down across I-405 and down close to the Kirkland waterfront.
NORTH KING COUNTY	The line to Ballard needs to be completely underground or elevated without a drawbridge element, and it should be routed through other important neighborhoods especially Fremont rather than the nothing wasteland along Interbay.
NORTH KING COUNTY	I think the voters should have a timing option, 25 years to complete the system is a very long time, let people see what it would cost to do faster.
NORTH KING COUNTY	The plan still falls short on creating an unencumbered road free system. The I-405 corridor needs rail! I'm perplexed why that isn't part of a true circuitous system that connects all the major transportation corridors together. Those areas are already so clogged with vehicles. Expanding any system with more vehicles(buses) also would add to congestion and thus creating more greenhouse gas issues that keep mounting. Also, as a taxpayer I would be willing to put up more money if the reward of a better system came faster. 8-25 years is a joke, we are already so far behind. Thank you.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	It's unfortunate the proposed plan prioritizes more buses before rail. I'd prefer a version where both are in progress at the same time. Personally I'm already paying too much to live here, my water & trash bill is 5x more than it was in another state where they have to ship water in and store it in towers. Here water is constantly falling from the sky for free. How does that make sense? My vehicle registration is about 3x the price of vehicle registration in another state. The sales tax is already 3-4% higher than other states. I suggest the city find ways to fund more buses & rails by cutting back on spending.
NORTH KING COUNTY	<p>Biggest concerns about this ST3 proposal, which I will vote for regardless of modifications (as a daily transit user, including the new Capitol Hill station):</p> <p>-Phasing. Graham St Station--it should not take 20 years to build an at-grade infill station. Ever. Ballard-DT, indisputably the highest ridership potential, not for another 22. This is more understandable given the need to complete a second DTT, but still disappointing.</p> <p>-Grade separation for Ballard. I can wait 22 years for a Ballard line with an understanding of the technical challenges involved. But to wait so long for a *drawbridge* over one of the busiest waterways in Washington State is completely unacceptable. Even if mitigation is proposed by way of negotiation with the Coast Guard, this only serves to pit boaters against transit users while simultaneously subjecting future light rail dependability on the whims and good will of future Coast Guard administrations.</p>
NORTH KING COUNTY	<p>Light rail needs to be added across 520 from Ballard to Bellevue. I understand Bellevue is being snotty about it, but even after the bridge is finished being redone, traffic on that corridor was always horrendous. 12 miles should not be able to take 90 minutes without any accidents.</p> <p>I think otherwise it's a pretty good order, although it's really too bad we didn't start this all like 10 years ago.</p>
NORTH KING COUNTY	Work along the Eastside should be prioritized, mainly light rail across the I-90 bridge between downtown Seattle and Factoria/Bellevue. Mercer Island is the worst traffic choke point in the region in my experience. Also the tolling on I-405 is a disaster and if light rail was offered along that route im sure people would jump at it.
NORTH KING COUNTY	<p>Ballard and West Seattle MUST be reprioritized for my support.</p> <p>I'm a massive fan of public transportation and a ST evangelist but I cannot in good conscience support a plan with this tax burden if it doesn't help the communities that need it most more quickly. 2038 is NOT ACCEPTABLE for Ballard. Additionally, I'm disappointed there is nothing in the plan that helps alleviate the significant East-West bottlenecks. With delivery 20+ years out Seattle Subway's proposal for the 44 should be part of this plan.</p>
NORTH KING COUNTY	The Ballard tunnel taking 20+ years is the #1 reason you are not getting my vote. Build the Ballard to UW spur first and get more neighborhoods connected to Link in a reasonable timetable that costs less money. I would also strongly support a Subway connecting Belltown (the "Metro 8"). We need to connect the region, but there's no point if dense city isn't connected in a reasonable amount of time. Ballard direct to downtown can be added later.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Ballard and West Seattle timelines are far too long. These projects need to be prioritized and built out far sooner than proposed in the Draft.
NORTH KING COUNTY	I'd like to see the light rail to SLU much sooner than 22 years! (Part of the light rail to Ballard).
NORTH KING COUNTY	The West Seattle Light Rail should be made to be a higher priority. West Seattle is always ignored by our city leaders. We have major bridge constrictions with not many options so West Seattle should be moved forward on the priority list.
NORTH KING COUNTY	the Ballard Proposal should be divided from the downtown tunnel with a tunnel under the Ship Canal to provide added reliable transitways and avoid the loss of capacity and increase in hazards on 15th NW in Seattle. Adopt the proposal of the Northwest Seattle Coalition which would provide added capacity, speed and reliability.
NORTH KING COUNTY	The light rail/sounder/BRT are separate issues that need to be voted on and funded individually. I would start with a ballot of for or against each one and then a second ballot to select which routes are the priority.
NORTH KING COUNTY	22 years is flat out too long to wait for light rail to Ballard (and 17 to West Seattle). I was supportive of the project till I learned this was the time-frames. These projects need to be done in parallel and not serially. Granted I believe that all areas 'should' be served equally, after living here my whole life and seeing so many missed opportunities for mass transit, I cannot support a project like this that I may now never live to see.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>The current draft plan is way too focused on the suburbs. The new tunnel downtown and light rail to West Seattle and Ballard should be the top priority. Construction should start on those projects as soon as possible. These areas are dense now, and need grade-separated transit now, not 17-22 years from now. Getting light rail to places like Federal Way, Redmond, and Everett should be reprioritized towards the end of the 25-year plan since they will be dense enough to need grade-separated transit decades from now, unlike Ballard and West Seattle that have that density now.</p> <p>Construction of the new tunnel and West Seattle and Ballard lines will take years, so Seattle should also have an "early deliverable" that people can get excited about. That "early deliverable" should be the Madison Street Bus Rapid Transit. This project only needs \$100 million in funding, which is only 0.2% of the \$50 Billion budget. We shouldn't be spending half-a-billion dollars building more parking garages out in the suburbs. The whole point of this project is to reduce dependence on cars; building more parking garages goes against that goal. You should take some of the money currently allocated towards building parking garages and reallocate it towards building Madison Street BRT.</p> <p>The way the plan is currently drafted, I am unsure if I'd support it; and that says a lot because I've been a passionate supporter of every effort to expand public transit so far. As a resident of Madison Valley with no plans to ever move outside of Seattle, I'm not excited about paying more in sales and property taxes only to get a line to West Seattle in 17 years and a line to Ballard in 22 years. I don't see myself ever using any of the lines that reach deep out into the suburbs, and I'd only occasionally travel to Ballard or West Seattle. With this current draft plan, it would still take me 10 minutes on route 8 to travel 1 mile west to the Capitol Hill Light Rail Station, and 25 minutes to travel the 2 miles from my house to Pioneer Square whether I take route 12 or Link. Those travel times are pathetic and I'd expect that a \$50 billion transit package would improve them. Madison Street BRT the travel time from Madison Valley to Pioneer Square would be around 10 minutes, which is something I can get excited about.</p> <p>The densest areas of Seattle are the fastest growing areas of the region. Please revise the plan to reflect that.</p>
<p>NORTH KING COUNTY</p>	<p>We should extend Ballard light rail station to 24th Ave &amp; Market street or even more western. Because there are 2 big tourist spot, Ballard lock &amp; golden garden beach are western of 24th ave. So it will help to ease the traffic for both sight-seeing spot and neighborhood which is surrounding them.</p>
<p>NORTH KING COUNTY</p>	<p>At-grade light-rail should not be significantly slower than tunnel or elevated track. Improvements to how at-grade light rail is separated from same-grade traffic (barriers, etc.) can allow it to operate at higher speeds safely.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	I strongly support expanding light rail in the region but the combination of timeline/choice of at grade to Ballard makes me lean towards voting no. When it comes down to it I may still vote yes for the improvement even if it's only for people after me but I'm sorely disappointed in sound transit as an institution. Please build the Ballard link with full grade separation.
NORTH KING COUNTY	<p>Ballard to Downtown is by far the most important project in this entire package and it needs to be done right. Sound Transit project this project alone to carry 2 to 3 times the number of daily riders currently using the entire Link Light Rail system. It is absolutely unacceptable to have this project not completed to the highest level of reliability. At-grade through interbay with a movable bridge is a non-starter. This project needs to a completely grade-separated route with an underground station in Ballard (candidate project c-01c) ready for a Ballard to UW subway extension (candidate project c-02). I am a huge supporter of light rail, but I cannot vote for a ST3 package that waits 22 years before providing Downtown to Ballard rail, only to provide it in a compromised manner. If that means routing the line through a single station in Belltown and serving SLU with the streetcar (or eventual east-west light rail subway route), I would be fine with that, but I cannot vote for a line that compromises reliability.</p> <p>Similarly, Ballard to UW (candidate project c-02) needs to be in the ST3 package, at least as a provisional project subject to additional funding. Seattle needs reliable east-west transit connections NOW, and, if ST3 won't guarantee the funds, it needs to at least provide for analysis and everything else to get it shovel-ready. If Seattle can come up with funding for Ballard-to-UW or if Sound Transit is able to gain additional funds from federal grants, that project should be the highest priority.</p> <p>Finally, Sound Transit should do everything that it can to expedite light rail to Ballard. That is a political necessity -- people simply will not vote for a package that delays light rail to Ballard until 2038. Perhaps the line could be opened initially only to Westlake station (i.e., operating a stub line), with the rest of the new downtown tunnel opening later. I understand that these are complicated projects that take time, but 2038 is not palatable and you need to find some way to expedite it. Again, if running the line more directly through Belltown would get it done faster, Sound Transit should consider that.</p>
NORTH KING COUNTY	West Seattle Light Rail sooner!
NORTH KING COUNTY	The downtown to Ballard line, regardless of exact path, should absolutely not be at-grade. At-grade rail in downtown will be a nightmare.
NORTH KING COUNTY	I think light rail should be the number one priority and the timeline speeded up to make it happen. More rapid transit to the burbs is not going to solve our core congestion problems.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Ballard line MUST be prioritized, 22 years is too late. I am a West Seattle resident, and my wife uses the C and 55 bus lines extensively. I ride less frequently but we both support light rail for West Seattle ASAP - however, we see the congestion and traffic delays to the NW area of Seattle a much more urgent problem and strongly recommend that ST find a way to push the Ballard timeline up to the next 8-10 years or as soon as possible given the complexity of the project. A crosstown line from UW to Ballard should be moved up from long-term study to urgent. Thanks for listening!
NORTH KING COUNTY	Make the Ballard to Downtown line completely grade-separated.
NORTH KING COUNTY	We should have a Ballard<->UW line, grade separated. In fact, all lines (especially in core Seattle) should be grade separated.
NORTH KING COUNTY	<p>The neighborhoods closest to the city center (Seattle) should be first for expansion! People in these neighborhoods are more likely to use ONLY transit to commute door to door, whereas people in suburbs are more likely to need to drive their car to a transit station, then need parking and THEN use light rail.</p> <p>It makes the most sense to service the closest neighborhoods first.</p> <p>West Seattle, Ballard, Capitol Hill, etc.</p> <p>Servicing suburbs first does NOT clear up local congestion (surface streets) &amp; causes increased need for parking around transit stops which are already located in dense areas. Let those of us who can completely leave our cars at home do so.</p> <p>Thank you for seeking community input!!</p>
NORTH KING COUNTY	Totally biased to my situation, but I wish we could prioritize West Seattle and Ballard earlier. It'd be nice to know if there's any plan to expedite the buildout as I have read this is more based on borrowing capacity and less on construction itself. Increased influx of people into Seattle, etc.
NORTH KING COUNTY	At grade light rail to Ballard is unacceptable. Ballard needs elevated and a tunnel. The timeline for Ballard is also a joke. I want more mass transit desperately but I will be voting no unless ballard becomes grade separated, tunneled, finished first and then connects to UW through Fremont. Suburban equality is [explicit] seattle is getting [explicit].
NORTH KING COUNTY	<p>BALLARD LINE: Should be elevated along the entire Interbay segment. True grade separation is critical and would be a very small investment for massive return.</p> <p>BELLTOWN: One of the densest communities in the state is once again left out in the cold. The Ballard line should stop in Belltown. If not, at the very least, the center connector streetcar should continue north into Belltown.</p> <p>PAINE FIELD: Please reconsider the Pain field detour which adds travel time, delays segment construction, and costs a billion more.</p> <p>TIMELINE: The densest communities with highest transit demand should be prioritized first. Please accelerate the downtown to Ballard segment.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Downtown-Ballard should be tunnel all the way including underneath Salmon Bay. There should be a Ballard-UW tunnel as well. Build it all underground. Do it right and do it once. Speed up the build timeline too. Raise our taxes above the amount called for in the plan to make it all happen. We in Seattle are willing to pay for better Seattle-centric service.
NORTH KING COUNTY	Focus on grade-separated light rail options that will improve safety and ensure the trains move quickly; don't add more stops (Boeing Access Rd, Graham St, 130th) that will make the trips take longer
NORTH KING COUNTY	Start with the core of downtown, and then expand outward.
NORTH KING COUNTY	West Seattle sooner! It's a shorter way to go and will have an immediate impact for the thousands of frustrated daily bus riders already using transit who are fed up with inconsistent and overcrowded buses.
NORTH KING COUNTY	Any light rail line built should be grade separated and have its own right of way for it to be truly efficient.
NORTH KING COUNTY	I'm sure it would cost more, but you would think it would be more feasible in the long run to have the Ballard & West Seattle light rail lines go in a tunnel underneath the waterways as the Capitol Hill to UW does. It just seems like it would be better in the long run. More stable and not having to deal with draw bridges. But then again I'm not an engineer and don't know all the logistics.
NORTH KING COUNTY	Grade separation is a must, especially on any line to Ballard! How a non-grade separated plan could get on this proposal is mind boggling. Do not shoot yourselves in the foot like you did in Rainer Valley (and it will be even worse with a draw bridge). If tunneling under interbay is too expensive, then maybe a Ballard to downtown line should be scrapped and a East-West line from Ballard through Fremond to the existing UW station with transfers or congruent service to downtown would be better. Having a transfer would be preferable to having potentially poor overall service.  Also I hope some of the money in this plan, or at least some money inside of ST's operating budget goes into lobbying congress for federal matching funds/grants. The timelines on some of these projects are insane, and while it needs to get done, being able to get additional support from federal agencies (if there is an administration/congress that seems willing) in funding more projects at once, or working 3-shift days on the same projects would be massively helpful.
NORTH KING COUNTY	Make Ballard and West Seattle priorities.
NORTH KING COUNTY	Ballard and West Seattle light rail needed now, not 17 and 22 years from now. Priority on earlier completion dates on these should be moved way up.
NORTH KING COUNTY	Where is the Ballard to UW line? It is ridiculous that this VITAL link is not included. Seriously... What gives?  Furthermore, prioritizing outer spokes over Ballard and West Seattle in terms of time line is also ludicrous. Built from the center outward. Don't shuttle more people into the city without taking care of current residents' needs first.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	In the proposed plan, Belltown is greatly undeserved by light rail. As the neighborhood with the second highest density in the city, it seems short sighted to miss the opportunity to include a station in the heart of Belltown to encourage ridership of light rail.
NORTH KING COUNTY	Light rail to Ballard and west Seattle are huge. I don't live in either neighborhood but know many people that do. Those corridors are a nightmare on surface streets and will only get worse. If there is any way to deliver rail sooner, I think people will be even more enthusiastic about ST3!!
NORTH KING COUNTY	This plan is completely unambitious. 22 years is too long. We need a serious light rail system in Seattle where the congestion is at its peak and we needed it yesterday. People in the suburbs will continue to rely on cars for the long term. Let's focus on where light rail is needed most--in our densest areas and specifically, Seattle.
NORTH KING COUNTY	Ballard, West Seattle needs to happen much more quickly.
NORTH KING COUNTY	Ballard route should not use a bridge for boat traffic.
NORTH KING COUNTY	Ballard absolutely needs grade separated light rail. Any portion of it being at grade makes me want to oppose the plan as a whole, as it's a waste of money. The timeline for Ballard and West Seattle should be prioritized as they are the densest and most affected by bridge traffic, particularly when 99 closes.
NORTH KING COUNTY	Light Rail isn't for reaching far suburbs. That's what Commuter Rail is for. We don't need the Link to take us to Tacoma, that's what the Sounder is for and the two systems should be designed to work well together. Ballard line needs to be above grade. Ballard and West Seattle lines need to be built much sooner. 17-21 years is far too long. Also need a Ballard-UW line.
NORTH KING COUNTY	As late as last year Ballard was projected to be next to receive rail service. I cannot believe you would suddenly move it that far away when Expedia is moving to 15th and huge growth in the South Lake Union area. This new ST3 proposal misses the mark by concentrating on outlying areas to downtown and not relieving the current traffic issues in and around the 10 miles of downtown Seattle. Modify your plan to grow from Seattle outward and I could support it.
NORTH KING COUNTY	- The Downtown to Ballard light rail route should not include tracks at-grade through the Interbay area. This will make traffic worse and slow light rail schedules.
NORTH KING COUNTY	Your timeline is way way way too long. You need to be more aggressive and deliver this in 3-8yrs, not 25! Whoever put this plan together should be fired. Get someone that knows what they are doing. Stop being obstructionist with unhelpful traffic hindrances and make some real progress!
NORTH KING COUNTY	The Ballard light rail in 22 years (!) is *way* too long. Please reassess the priorities and the design to cut time in half or more. I cannot support the project as is.
NORTH KING COUNTY	Please consider making all future light rail grade separated.  Also please consider east/west light rail, especially between UW and Ballard.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>SLU to Ballard needs to happen first, not last. It also needs to be extended to connected to Northgate to avoid a star system with everyone having to head downtown to make a connection.</p> <p>I grew up in Germany and didn't own a car until I moved to the US at age 32. I know it's possible to build a great system and get traffic under control. But ST3 is both too slow and not ambitious enough for our biggest growth areas in Seattle. I understand that ST needs to include the outer areas due to its charter. But as is, I cannot support it as I can only give each tax dollar once and ST3 is not addressing the most pressing issues in a timely manner.</p>
<p>NORTH KING COUNTY</p>	<p>Do not build to Paine Field detour. It is costly and adds too much time between Seattle and Everett. Even ST's own study shows there will be no net ridership increase for the extra money spent. Use that savings to build a UW to Ballard spur and start engineering work immediately.</p> <p>Lines that serve dense areas with good pedestrian and bicycle access should be prioritized over suburban areas and massive parking structures. Prioritize lines that will be used at all times of the day instead of commuter lines that only serve a purpose during peak hours.</p> <p>If ST is going to waste \$1B on parking garages then an equal investment should be made to promote safe walking and biking routes within the half-mile walkshed of stations that do not have park and ride.</p> <p>Build the Graham Street and 130th Street stations. All of Seattle thinks this is a good idea and we even approved money with Move Seattle to put towards building them. Why are you so reluctant to add these stations?</p>
<p>NORTH KING COUNTY</p>	<p>I'd rather the money be spent on Rail projects, preferably road separated, instead of Bus Transit. It would be a better use of time, construction and dollars to use ALL of the money or most of the money raised in taxes to fund non-bus transit. If more of the budget were allocated toward pushing the deadlines for rail forward, people would support the plan more. People just don't want to wait 25 years for rail. They are certain it can and should be pushed forward much faster. The problems in support that Sound Transit has, is the notion that it absolutely takes too long to finish projects. The money would be better spent by eliminating any Rapid Bus Transit altogether, let the existing buses take care of the current need and put all of that budget toward more time, more laborers and more crews to push the rail forward. Rapid Buses just don't deliver much in efficiency, they don't cut enough time from commutes because they are subject to the awful traffic just like cars. People will not start giving up cars until fast rail becomes available. The buses will become more efficient on their own, if less people drive individual cars and express won't be needed if traffic is lighter. Rail is more important than buses, period. Therefore, Sound Transit should work harder to push all of the money toward shortening the construction time even if it means hiring more people to get job done faster. 10 years is a more acceptable time-frame for all of the projects. You can scrap the Bus stuff altogether. Its not worth wasting money on, if it means waiting too long for rail.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	The west Seattle and Ballard light rail should be prioritized to be done sooner
NORTH KING COUNTY	Inner city service should be serviced first. Short term projects such as West Seattle which do not involve tunneling, but would provide a great example of how the plans can be brought to bear rapidly should be prioritized over end-to-end construction connecting the East Side to downtown.
NORTH KING COUNTY	The plans for the ballard light rail are at grade and with a drawbridge across the ship canal. I'm worried that that could affect reliability of the light rail line.
NORTH KING COUNTY	Tunnel from Ballard to uw should be added and elevated or tunnel from downtown to Ballard
NORTH KING COUNTY	I am a big supporter of transit and the great things Sound Transit has done in our community, but will not vote in support of ST3 unless it priorities improved transit within Seattle in a more timely fashion. Given the density and expansion in Ballard area, it is imperative that we move the timeline for completion sooner and that the plan should be modified to have rail be grade separated that is in a tunnel under the cut. In addition, I would also recommend a UW to Ballard connection and earlier timeline for the West Seattle expansion. Without the Ballard projects being prioritized, I will vote no on ST3.
NORTH KING COUNTY	I think the timelines for the Ballard and West Seattle rail lines are too long. We need both of these lines ASAP. I would also really prefer if the rail plans included a rail stop in the Judkins Park area just before the line crosses to Mercer Island. The Mt. Baker (31st Ave), Seward Park and Leschi neighborhoods all need a proximal rail stop.
NORTH KING COUNTY	Light rail with a new downtown tunnel should be one of the first thing to be done. And have the tunnel also be paid by the rail companies.
NORTH KING COUNTY	Getting light rail, or Sounder service from Ballard to downtown and especially east west improvements Ballard to UW. Currently it can take 30 to 45+ minutes at any point in the day. Bus service is nonexistent from west of 15th Ave NW unless you go to 85th or Market St. Many seniors can no longer get to the Ballard Senior Center or Nordic Heritage Museum by bus since the #17 ONLY goes for rush hour NOT all day
NORTH KING COUNTY	West Seattle & Ballard should be reached before 2033 & 2038. More efficient solutions MUST BE CONSIDERED. Stop with the tunnel building, surface street with right away worked in South Seattl. Look further south to Portland, they do it quicker because they use the surface. MAKE IT HAPPEN, MAKE IT HAPPEN SOONER.
NORTH KING COUNTY	We must expedite the light rail extensions to West Seattle and Ballard. These will impact the most people and must be completed within 15 years.
NORTH KING COUNTY	The most dense areas should be served first, and in alignment with urban village development plans. This means routes like the light rail to Ballard and West Seattle should be prioritized over suburban routes.
NORTH KING COUNTY	As a Seattle resident, I'd like to see priority placed on speeding up Rapid Ride routes through Seattle and building out the light rail network throughout the city, before extending to the wider region.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<ul style="list-style-type: none"> <li>- Prioritize all Seattle area light rail, specifically Ballard.</li> <li>- We need a circle line to complete the system. Make the light rail line from UW to Ballard with stops in Wallingford, Fremont.</li> <li>- SPEED UP THE TIMELINE WITH \$\$\$\$. There is a LOT of money pumping into this city, and we need leverage the wealthy elite, large businesses and ANYTHING WE CAN (pot taxes?) to expedite the light rail expansion. Lets take a risk and go for broke. Lets get it done in 10 years.</li> </ul>
NORTH KING COUNTY	The light rail route should be down 20th Ave West with a tunnel under the Ship Canal (option C-01c). Light rail along 15th Ave West would be disastrous for freight and general traffic, and the bridge will be opening all the time (as it does now) leading to more delay. Also waiting 20 or more years for light rail is too long - concentrate on bus transit that we can get online faster.
NORTH KING COUNTY	Your timeline for completion of certain lines and areas is off. Ballard and West Seattle light rail should be completed first. And the city is decidedly against anything remotely identified with getting products to market, so that key message is WAY off. For instance, I have never heard of a city suing its own port--essentially suing itself--so to try portray the city as being transportation friendly is a joke. Add to that the bike program fiasco. I think you could say the city is bike friendly, but nothing more.
NORTH KING COUNTY	Ballard->Downtown Seattle is far too important to leave at-grade, and to leave until 22 years have passed by. It should be taken off of drawbridges, and prioritized over lower-yielding routes.
NORTH KING COUNTY	C-01C downtown Seattle to Ballard should replace the current project. I am not in support of the rail running on 15th--neither elevated nor at grade. This needs to be a quick and reliable route, built sooner than 22 years.
NORTH KING COUNTY	Inner city projects like Ballard and west Seattle are more congested and should take priority over suburban projects that don't contribute a lot of value, where people are less likely to give up driving (Issaquah, Tacoma, Everett).
NORTH KING COUNTY	Create more jobs for the people moving here and get the project done a lot sooner than 25+ years out!
NORTH KING COUNTY	Please, please connect the other neighborhoods of Seattle to the rest of the city sooner. Making Ballard and West Seattle accessible by reliable transit earlier (rather than in 22 years in the case of Ballard!) would show a commitment to allowing Seattle's residents to best utilize their city, get to their jobs, and grow their hyper-local economies by allowing other Seattleites to easily access them.
NORTH KING COUNTY	22 years is way to late for Ballard Light rail. They need it now
NORTH KING COUNTY	Large parking capacity is only important at stations outside the city (any of them) limits. Inside the city limits, development should be promoted that allows non-car oriented means of travel between stations and destinations.
NORTH KING COUNTY	PLEASE build a Ballard/SLU connection to downtown sooner than 22 years from now...
NORTH KING COUNTY	The light rail extension in Tacoma would be more useful for local business access if it ran along 6th avenue rather than 19th.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	It is not logical to build out into the suburbs while leaving the core Seattle neighborhoods, like Ballard and West Seattle, with nothing but bus service for the next 20 years. This is completely backwards to how viable mass transit systems are built up
NORTH KING COUNTY	I'm a huge supporter of public transit, but I'm having a hard time supporting an at-grade, moving-bridge option from Downtown to Ballard. I will likely vote "no" this November if the proposed line isn't modified to be a fully grade-separated option.
NORTH KING COUNTY	Putting Ballard 22 years out with at grade rail is nearly criminal. The city of Seattle is growing faster than the surrounding region and already uses these systems on a higher per capita basis; there is no compelling reason I can see to push out upgrading the core infrastructure within the city by so much.
NORTH KING COUNTY	Focus on dense areas where people will actually use transit, like Ballard and West Seattle
NORTH KING COUNTY	No light rail to Ballard for 25 years, voting "No". Draw bridge over Salmon Bay instead of tunnel, voting "No". At grade through Interbay instead of elevated, voting "No". No line from Ballard to UW, or any other east-west lines, voting "No". No West Seattle to Downtown for 23 years, voting "No". If changes in the transit system do not start from Seattle, and work their way out, instead of the backwards way that this is proposed, I'm not voting for it, and I will campaign against it. The top three priorities that were voted on in your last survey are the last lines that you plan on completing, over twenty years out? Definitely voting "No". Come back with a better proposal, please, or I will help fight this tooth and nail. I am a huge supporter of light rail and mass transit in the area, but I am not going to vote for a plan that leaves Seattle out until the end.
NORTH KING COUNTY	Sound Transit should prioritize ridership and performance when considering project phasing. If I'm going to pay \$200 per year for decades, I need to know that my dollars are being put to work in a substantive rather than political way.
NORTH KING COUNTY	While transit running from Tacoma to Everett is a nice to have. I think the focus should be on areas where the density supports mass transit. Ideally people should be able to walk or drive to a transit station within 15 mins and then walk to their final destination within 15 mins. Please focus on neighbourhoods where people don't need a car unless they are going to another neighbourhood where they also don't need a car.
NORTH KING COUNTY	The timeline for the light rail plans are WAY too long. 22 years for light rail to Ballard? We need solutions as soon as possible. Tell the voters what resources you need to get the job done in a reasonable time frame.
NORTH KING COUNTY	West Seattle stations at Avalon and Alaska should be below grade via a tunnel. The topographic change is similar that at Beacon Hill, and the station there does a good job of not drastically changing the character of the neighborhood it's in. It also allows for a relatively small surface footprint, whereas both elevated and street level structures both dramatically alter the character of the neighborhoods they would serve. The Delridge station, if land acquisitions allow, is currently not very walkable (unlike the Avalon and Alaska sites) and the option of supporting a park-and-ride placement at that station would make sense to incorporate now, as opposed to in a subsequent phase of development.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Seattle desperately needs grade separated light rail from downtown to Ballard AND from Ballard to UW. I would contend that Ballard to UW might be even more critical than Ballard to downtown. Ballard to UW could connect all of the dense neighborhoods just north of the ship canal to each other and to downtown. This line would ideally replace KC Metro route 44, a route so slow (thanks to traffic and small roads) that it is sometimes faster to walk and always faster to bike. I have not done any of the in depth studies that ST has done, but I really think that a Ballard-UW line would be the best bang for the buck project ST could take on.
NORTH KING COUNTY	<p>1. This needs to get completed sooner. It's ridiculous how long this will take. If Amsterdam and other European cities can build this within a decade, there is absolutely no reason this should take 25 years. ST3 is the most important and pressing need for our region and it's asinine that our leadership and Sound Transit can't get this done sooner. 7 years for an environmental impact study when we have 800 cars a day being added to our streets? That's an environmental disaster. Get this done sooner.</p> <p>2. Ballard to Seattle at grade - that cannot happen. Any legitimate rail system in this city needs to be grade separate - it doesn't need to go through a tunnel but it has to be separate from any possible interference - this includes boat traffic. Building a new bridge is not a solution. Ballard to Seattle - above ground or below. At grade is not an option for a sustainable rain system of the future.</p>
NORTH KING COUNTY	The Graham light rail station should be moved up to the first 8 year phase of the plan. It will provide one of the highest dollar to capacity projects of the entire plan.
NORTH KING COUNTY	<p>I think you should prioritize core Seattle first before continued development makes it too difficult to find space to fit light rail in. I think light rail to Ballard and West Seattle should be in Phase 1, and move out from there. I also think that you need to increase the density of stops on existing lines to get more users. Having zero stops between NE 65th St and Northgate Mall on the 2021 proposed expansion of the existing line is a major oversight in my opinion. And there are plenty of other examples, like there should be at least two stops in Capitol Hill, another one on the north end. Work on feeding the densely populated areas where you won't be able fit stations in the future, and work out from there.</p> <p>Even though we are not frequent transit riders now, we will be once light rail goes north of UW. We are waiting patiently, and we are far more likely to use light rail than the bus system. Thank you for what you do.</p>
NORTH KING COUNTY	The light rail to Ballard needs to be grade separated, not use a rail drawbridge and needs to be completed sooner than 22 years. The bus lines at 15th and NW Market are already extremely crowded at rush hour and there are new condos going up every month. By the time the light rail is completed to Ballard in ST3, it will be 22 years later than it should have been completed.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>1) The Ballard Light Rail Line should be developed faster, if it is technically feasible to do so. Waiting 22 years for the highest ridership Light Rail line for this package to open is unacceptably long.</p> <p>2) There should be more Light Rail projects in the areas that are densest and would have the highest ridership, which would primarily include areas in the dense neighborhoods of Seattle.</p>
NORTH KING COUNTY	<p>Ballard rail cannot wait, and it cannot be anything other than entirely grade separated. Bypassing Belltown, Lower Queen Anne, and Fremont and giving up the best opportunity to build the system right (fully grade separated, ideally via tunnel) is ridiculous. To do it in 25 years is obscene. Look at the success of the two new stations in Capital Hill and UW, and imagine if they had been at street level or with a bridge crossing the ship canal. To spend billions connecting Paine Field to the Link just to short-change Ballard is obscene. Also, the crosstown Ballard to UW line needs to be prioritized. That trip takes 30 minutes via the 44 and would take 8 via a tunnel.</p>
NORTH KING COUNTY	<p>Please make the Ballard line grade separated.</p> <p>Also, please consider incorporating more of the metro 8 subway plan into Seattle light rail.</p>
NORTH KING COUNTY	<p>Please focus more on the city of Seattle and connecting the east and west side rather than Lynnwood and Tacoma. Ballard, West Seattle, connecting to Bellevue and Redmond should take priority and be expedited as projects. Ballard in 22 years just seems so far away when the need exists right now. We need new rail to be grade separated to really make a difference. We also need to look at more east-west linkages Ballard-UW or Ballard to Northgate along 15th/Holman.</p> <p>I would gladly pay, and pay even more than \$200/year in taxes to make sure these projects are prioritized. We do need a regional system, but just commuting within the city and to the eastside is already pretty horrible now. Giving buses a shoulder lane on I-5 is also a decent stopgap and would make me much more likely to take transit.</p> <p>Thanks for the survey and your consideration.</p>
NORTH KING COUNTY	<p>The Graham Street station is a must for me and my neighbors. Walking 2 miles to get to the train (because all the parking is 2 hours max) does not work! If the Graham station was available I would become a daily train commuter.</p>
NORTH KING COUNTY	<p>Ballard is the most productive and effective light rail project - as such it must be built many years earlier. Ballard also must be built prior to West Seattle and any Seattle infill stations</p>
NORTH KING COUNTY	<p>Ballard and downtown and West Seattle to downtown need to be finished much sooner. 12 years instead of 22 years.</p>
NORTH KING COUNTY	<p>I do not think I want to wait between 17 and 22 years to get light rail to Ballard and West Seattle. I will probably have retired and left Seattle by then. And I have only lived here a couple of years. I am sure you all have the projected ridership numbers and where projects will have the most impact the fastest but some more detail on what is getting ranked and why would be helpful.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	The schedule needs to be greatly accelerated and the Ballard line needs to be grade separated.
NORTH KING COUNTY	<p>In order to shorten the timeline on some of the longer-range projects, such as Issaquah, Sound Transit needs to be more efficient about how many 'extras' are attached to this package. We should be encouraging people to get out of their cars as much as possible. I would rather see more funds put toward coordination &amp; partnership with surrounding municipalities in order to improve 'feeder' mass transit (such as local bus routes) that connect to mass transit than wholesale funding of park &amp; rides (P&amp;R). I understand that mass transit as to reach as many riders as possible but to do that, we need to make sure that the other portions of the transit system are connecting to light rail rather than spending money on P&amp;Rs that continue to encourage/fund car ownership.</p> <p>Secondly, I am highly encouraged by Sound Transit's decision to include funding for future TOD planning. This has been an area where Sound Transit as fallen woefully short and its about time we start thinking about the development that is supposed to (but yet to) happen around these stations. And make sure that your TOD studies take into consideration affordable housing. Low income populations need access to transit the most so we need to tie those investments together.</p>
NORTH KING COUNTY	Lightrail to Ballard should have a higher priority
NORTH KING COUNTY	When I first read it would 22 years to get to Ballard I thought it was a joke. I don't believe it's possible to plan for something 22 years from now. Additionally, it's really difficult to support something I will likely never see completed in my lifetime. I thought this would be a much higher priority to accomplish based on previous descriptions of Sound Transit's goals. It seems the downtown tunnel is being added to the cost of the Ballard line which artificially increases its cost and delays its completion. I am also disappointed the route didn't include Fremont. I am a huge supporter of mass transit, but Northwest Seattle seems to be the lowest priority. I will probably oppose sounds transit 3.
NORTH KING COUNTY	The timeline for linking West Seattle and Ballard neighborhoods needs to be pushed forward. Current bus support doesn't meet the needs of residents who live and work in the same city, but still rely on their cars for transport. We have dense populations that would enthusiastically support public transportation, but their neighborhoods do not have sufficient service to make public transportation a viable option.
NORTH KING COUNTY	<p>Ballard should be served ASAP - it is being built up in an unsustainable way by the city and people moving to Ballard now need light rail more than suburban commuters who have space to park cars.</p> <p>The cost of this proposal is completely ridiculous. You need to find a way to cut the cost to about 50% of what you're proposing.</p>
NORTH KING COUNTY	The Ballard line should be grade-separated for its entire length and a tunnel should be used for the ship canal crossing instead of a drawbridge. If a drawbridge is necessary, it should provide a better experience for cyclists and pedestrians than the current Ballard Bridge does.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	I am concerned about speed and eventual difficulties with rising water levels with the Ballard line planned at grade and over a drawbridge. I also wish the plan included Ballard-UW line, as that is a very bottlenecked and highly trafficked stretch of Seattle.
NORTH KING COUNTY	Light Rail to Ballard should be built sooner!
NORTH KING COUNTY	In exchange for 25 year wait and \$50 billion, light rail MUST be dedicated right-of-way with no possibility of boat traffic impeding it. These are the sorts of sacrifices that are made to get the project more cheaply and/or more quickly -- but ST3 is neither fast nor cheap.
NORTH KING COUNTY	I wish there was less rail mega projects and more dedicated right of way for buses. Buses are more flexible and responsive to change, and cheaper.
NORTH KING COUNTY	<p>Overall, I think this is a solid plan, and having closely monitored its development over the years, I respect how much work has gone into it.</p> <p>What I like about it is the decision to GO BIG.</p> <p>However, I do question the use of BRT on 405 instead of rail....in general I view BRT as "fool's gold", something that looks like it will solve the problem for less \$, but in reality is just a waste of time and resources...a diversion from a rail solution that we will eventually have to go with, anyway. Having driven the Bothell-to Bellevue/Redmond corridor, I would find it hard to believe that some form of rail is not possible.</p> <p>Also, when thinking of our region's affordable housing, I think it's crucial to get to downtown Everett as soon as possible. Currently everything north of the 5/405 interchange is too distant from the rest of King to be practical for commuting, but there is tremendous amount of capacity up there, and they're not the craftsmen neighborhoods/urban villages of turn of century Seattle.</p> <p>Thanks.</p>
NORTH KING COUNTY	One of the reasons people don't use link light rail to the airport as much as expected is because it takes too long, and this is primarily because the line loops east to Columbia City. It looks like you are about to make the same mistake on the link line south of Everett, by having the line loop west to Boeing and Paine Field. Instead, the line should run directly to Everett and there should be a connecting BRT line looping from Mariner to Boeing.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>I would be sad if a single tax dollar of mine went to build parking spaces in a suburban park-and-ride. I believe park-and-rides only help to encourage &amp; justify sprawl. I choose not to live in the sprawl and don't want to subsidize others who do (in fact I believe they should pay an extra sprawl tax to help subsidize transit, but I know that's unlikely to happen).</p> <p>The timelines for this plan just seem too long. I know tunnels take time to build, but 22 years to finish the Ballard piece is crazy. Seattle will be so choked with traffic by then that competitiveness and quality of life will be severely degraded. If it's going to take that long we should just build a true heavy rail subway... We'll need the capacity by then.</p>
NORTH KING COUNTY	Users should be charges to park in new parking facilities built to offset capital expense, if only partly.
NORTH KING COUNTY	The light rail route N of Lake Union should be located farther west. the center of 99 or even 8th or 15th ave.
NORTH KING COUNTY	<p>The Ballard/downtown line is the single most important piece of the plan. The routing proposed is atrocious. There was a wonderful ST study earlier including an option ("Corridor D") with a route through Fremont and a tunnel for serving Upper Queen Anne. That option is much better than the proposed one; please implement that one.</p> <p>The proposed plan for this line also bypasses Belltown in favor of SLU, the latter already having a rail connection to downtown. The Ballard/downtown line should serve Belltown and not SLU.</p> <p>The Ballard/downtown line should open absolutely no later than 2030. Even that is an extremely long time. If ST3 cannot accomplish at least that, then I cannot support ST3.</p> <p>The Graham Street station should also be high priority, and should be completed much sooner than projected. Waiting 20 years for an infill station which was already planned for is ludicrous.</p> <p>The Boeing Access Road station is pointless. It should be heavily deprioritized.</p> <p>Under no circumstances should the line to Everett deviate to Paine Field. The time delay is simply not worth it. The DEIS showed that ridership was the same with or without it, so it is not necessary to provide ridership. Boeing is cutting jobs again! There is absolutely no guarantee that this deviation will be needed or useful in 20 or 30 years' time.</p>
NORTH KING COUNTY	Grade separated light rail for Ballard to Downtown. A more aggressive timeline. A Ballard–UW line.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	The Ballard line needs to be grade-separated. With the massive growth of Ballard and parts along the proposed line, the current plans will make the rail to Ballard almost useless. There is so much potential for this line, in a neighborhood that on a bad day can be an hour disconnected from downtown. Please consider grade separation for this line!
NORTH KING COUNTY	Ballard needs to come before West Seattle. An '8' subway really needs to be considered. UW-Ballard is more cost effective than any of the light-rail segments proposed. West Seattle just can't be effectively served by rail. Sorry all you politicians who live there.  Additionally, stations need to be designed with better bus connections.
NORTH KING COUNTY	Considering the expected longevity of the proposed ST3 infrastructure, the opportunity should be taken now to build - at greater initial expense - fully grade-separated routes impervious to traffic, both surface road and marine. In particular, options such as the proposed Salmon Bay movable bridge are a non-starter, and would unfortunately kill my support for ST3 as part of an overall voter package, irrespective of its other benefits. Tunnels, elevated, and fully grade-separated options are the only ones that will earn my support.
NORTH KING COUNTY	Prioritization of the Ballard Light Rail line should be higher compared to Lynnwood/Tukwila line, and potentially West Seattle line.
NORTH KING COUNTY	Deprioritize projects that only serve suburban needs. Finish creating an urban network first. No transit dollars spent on parking.
NORTH KING COUNTY	The plan should be completed faster. I will retire before anything gets completed.
NORTH KING COUNTY	The West Seattle link needs to be completed in fewer than 17 years. None of these projects should run past 10-12 years, we have put it off for too long and to wait longer than 10-12 years makes me NOT want to support the projects.
NORTH KING COUNTY	Build the light rail faster, if possible. I'd be willing to spend another \$50 a year if it would mean light rail projects were coming on line earlier.
NORTH KING COUNTY	Get the areas within the City finished first! Density demands it. Expand bus system for the suburbs, if needed.
NORTH KING COUNTY	West Seattle needs it sooner. The bridge is really the only way into Seattle. 15 years from now traffic will be a true nightmare.
NORTH KING COUNTY	I agree wholeheartedly with the points outlined in this article: <a href="https://www.theurbanist.org/2016/03/25/sound-transit-submits-suburb-heavy-expansion-plan/">https://www.theurbanist.org/2016/03/25/sound-transit-submits-suburb-heavy-expansion-plan/</a> . The city needs to be the priority. I am pro transportation, but will vote no if the plans does not speed up the Ballard timeline and include the Ballard to UW spur. Overall, this is a very poor proposal.
NORTH KING COUNTY	Link from Kent-Des Moines to Federal Way should follow SR 99 instead of I-5. You cannot promote pedestrian access to Link if the stations are only at park and rides. The second downtown tunnel should be #1 priority if ST3 is passed, not extending Link to Tacoma or extending East Link to downtown Redmond.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	The fact that places like Ballard and West Seattle, which contain huge populations, aren't first on the list is ridiculous. That there is no plan for a UW to Ballard line and that the Ballard line is on the streets instead of grade separated. It would have to go over a drawbridge! These things will cause me to vote against this plan in favor of a more sensible one.
NORTH KING COUNTY	Please change the Ballard section of the light rail plan to grade separation. Another bridge over the locks is a terrible idea.
NORTH KING COUNTY	Im very disappointed in the Ballard plan, the bridge over the ship canal, and the timeline.  I do really like the new downtown tunnel.
NORTH KING COUNTY	Transit projects should prioritize options separated from traffic in all cases.
NORTH KING COUNTY	With close to 60 thousand people in the West Seattle area, I would like to see the light rail to west seattle become a priority and THROUGH west seattle a priority as well. We are the second largest district in the Seattle area, and our commute times have been impacted severely by the population explosion. With only one bridge to the north to move people in cars, and buses packed to the gills during commute times, one accident shuts us down. The continued influx of people will be impacting us more than many areas, as our housing costs are still among the lowest. Thank you.
NORTH KING COUNTY	"The best way to add more capacity to our transportation system is with transit, like light rail and commuter rail, that never gets stuck in traffic." This is the biggest point for me in the list above. I'm less a fan of anything at grade as opposed to elevated or through a tunnel, and the downtown to Ballard proposed line being on a movable bridge that will cause train delays when boats come through does not sound good. To me, successful transit has not only high capacity, but also always has movement through the city that is both fast and reliable; this means dedicated routes where trains are not yielding to traffic of any other type.
NORTH KING COUNTY	After spending time in DC, I am worried about Light Rail's reliability in the future. Will there be separate rails being built in parallel so that maintenance can be done while trains are running? This is a major issue for WMATA currently.
NORTH KING COUNTY	Ballard needs to be addressed now. Not in the long term future.
NORTH KING COUNTY	The light rail to Ballard is woefully short. It should EXTEND UP TO 65TH or it's useless for most Ballardites.
NORTH KING COUNTY	ST3 needs an East West link north of Lake Union. Preferably U. District through Wallingford to Ballard.  Also why are your maps in this survey not accessible to blind people through an audio description?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	I don't understand the need to extend light rail from Tacoma to Everett. It should focus first on the already dense neighborhoods within Seattle to encourage a fully transit friendly city with many stops and reliable service. Instead we have a lightrail system proposed between cities and suburbs. These areas are best served by heavy rail Sounder trains, not lightrail. Focus on Ballard, West Seattle, and adding more stops within densely populated Seattle before building a long, sparse lightrail network between counties and suburbs. Also, no more at grade lightrail that can get stuck in traffic or hit by cars which can completely halt the system.
NORTH KING COUNTY	I like the scope of ST3, but I would rather see work done sooner rather than later on the core Seattle areas like Ballard and West Seattle that needed high capacity transit 10 years ago, not 25 years from now. I would like to see projects prioritized based on their ridership potential, and I'm suspicious of light rail's merits to far out places like Everett and Tacoma.
NORTH KING COUNTY	Ballard needs to be line grade-separated. Period.
NORTH KING COUNTY	Please make Everett quicker! I get some areas have to be last with this plan, but having it take nearly 20 years to connect Lynnwood to Everett while South Seattle gets fully expanded doesn't make much sense to me. Everett to Seattle is most congested once the carpool lane disappears, while Seattle to Tacoma has a carpool lane for most of the journey.
NORTH KING COUNTY	I understand that the planned light rail line to Ballard includes a bridge that will require sharing the Fremont cut with Marine traffic. I believe this is a terrible idea, and will devastate the reliability (and therefore ridership) of this line. Please consider an alternate crossing of the Fremont cut, as I believe that we will regret a shared crossing for many decades!
NORTH KING COUNTY	Please build it faster :)
NORTH KING COUNTY	My experience with "BRT" is that it honestly doesn't do that much to speed up commuting. I suppose if there were significant improvements especially in regards to designated lanes and more frequent service it would be worth it, but as it stands rapid ride routes (which shouldn't technically be called BRT) are just not that much better than your every day bus.
NORTH KING COUNTY	ST3 Plan completely ignores the city's vision and the current development of Urban Villages and High Density Urban Villages. Ballard, Wallingford, Crown Hill are all designated as High Density Urban Village and this plan puts those areas as last priority for light rail, which is completely counter to what is actually happening. This delay also harms the numerous small businesses that support the urban village concept. At a minimum the first phase should include a light rail option out of Ballard to connect with existing light rail such as the UW station. These are the populations who are open and anxious for light rail. The demographics on the East side are not.
NORTH KING COUNTY	As a car free person who wants to move to Ballard in the future, please make the light rail extension to Ballard *NOT* at-grade. Current at-grade transit options, like busses and streetcars, are subject to the whims of traffic. If we're pouring all this \$\$\$ and time into a transit system that has to last for my lifetime, build everything belowground! That way, we can save our streets for bicycles, pedestrians, and necessary auto use.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Ballard needs to made more of a priority, it cannot wait 25 years for a transit solution.
NORTH KING COUNTY	City of Seattle projects should be expedited; Ballard to Downtown, W Seattle to Downtown, and construction not study of Ballard to UW. Far more density and users in these areas than Orting, Tukwila, etc.
NORTH KING COUNTY	<p>The line to Ballard should not be at grade. That is such a waste. There should also be far more development in the City of Seattle proper. How is there not a UW-Ballard Line? The 44 is a joke. East-West transportation in this city is a mess, and this 50 Billion dollar proposal does nothing to alleviate that.</p> <p>I realize this is a regional system, but by far the densest population of transit users, located within the City of Seattle, is being left out to dry by this proposal. I will most likely vote against this, even though I am a huge proponent of improving mass transit.</p>
NORTH KING COUNTY	ST3 needs to focus on serving the densest areas first including Ballard and West Seattle before serving suburb to suburb. ST3 needs to look at areas that are growing the fastest and think about serving these areas first instead of less dense areas. I support projects that move people in the city but also from the suburbs to the city. Light rail that serves suburb to suburb should come LAST. Also, on the Ballard line none of the rail should be at grade or else it will get stuck in traffic like everyone else making the light rail ineffective!
NORTH KING COUNTY	Ballard light rail needs to be separated grade.
NORTH KING COUNTY	Ballard has to be grade separated!
NORTH KING COUNTY	<p>Scrap some of the less needed expansions and connect East-West from UW area to Ballard.</p> <p>Grade separated light rail in already dense traffic areas is absolutely necessary (e.g. Ballard-Downtown, traffic which will only be far worse by 2038).</p> <p>Prioritize expansion projects where there is the most traffic (Ballard project completion date 2038?)</p>
NORTH KING COUNTY	Ballard should be grade separated and done before 2030
NORTH KING COUNTY	Buildout of light rail in Seattle (to West Seattle, Ballard, and addition of NE 130th station) needs to be completed MUCH faster than the 2030s. Will not vote for final plan unless funding for NE 130th station is added and timelines for Seattle buildout are accelerated at least 5 years.
NORTH KING COUNTY	Boeing Access station infill in 20 years! This should happen now! How about 5-8 years.... The track is already there, so the station shouldn't take 20 years to build.
NORTH KING COUNTY	<p>There are NO EAST/WEST considerations here. It's shortsighted and crazy that the Ballard to University District route is not being seriously considered for this update. Also the proposed Ballard route seems incredibly inefficient and pointless in its current state.</p> <p>Serious oversights and I personally am voting no on this proposal because of a waste of taxpayer money.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	As a strong advocate of mass transit, it will break my heart to vote "NO" on this proposal, but it prioritizes connecting cities to distant cities instead of concentrations of homes to concentrations of work. Every day, my bus from Ballard to Downtown is standing room only. Ignoring Ballard to SLU and Downtown for 25 years is why I will vote "NO" on a transit system we desperately need. People are not commuting from Everett to Tacoma. They typically live somewhat near the city they commute in. Focus on moving people in within the city, not around the suburbs where traffic isn't as big of an issue.
NORTH KING COUNTY	Light rail to Ballard and West Seattle should be accelerated.
NORTH KING COUNTY	The timeline is outrageous and unacceptable. I will be voting no until I see a proposal that projects an earlier completion date. \$200 more taxes per year for projects that wouldn't be completed for another 25+ years is an insult. Besides, Seattle is going thru a housing crisis and I only foresee the majority of its current taxpayers being further pushed out of the city limits (my rent keeps increasing \$50/mo YoY), while others who move in with higher salaries reap the benefits of what we paid for and will NOT receive, because then we'll need lightrail to expand even further out. Earlier timeline or a flat NO.
NORTH KING COUNTY	Adding the Ballard line in 22 years is probably too long to wait to complete the project imho. If you have seen the density growth in the neighborhood over the last 4 years then perhaps the urgency of a better transit solution will become apparent. No joke every bus line thats not rapid ride is packed to the walls and it's only going to continue to worsen.
NORTH KING COUNTY	Ballard is currently carrying a disproportionate amount of the burden related to growth, yet isn't slated to get light rail for 22 years under the proposed plan. PLEASE consider moving up the timeline and/or providing more express buses. It shouldn't take an hour on the bus to go 6 miles.
NORTH KING COUNTY	Parking is key for older people like myself who cannot walk far or carry items far, but are not yet ready for access.
NORTH KING COUNTY	I feel serving the denser Seattle neighborhoods should be done before expanding out to the suburbs. There are more people the system can get to faster and lead to more success for the system as a whole in the long run. I also feel expanding East to Bellevue and Redmond is more important than Everett or Tacoma.  The timeline for this plan is way too slow, especially for fast growing neighborhoods like Ballard.  I feel a line from UW through Wallingford and linking up to Ballard line is important for the whole system.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>I am choosing "modified" because it more accurately summarizes my thoughts on this program. That being said, i would advocate for removal of some projects, modification of others, and addition of certain others.</p> <p>-REMOVALS-</p> <p>&gt; I believe the Paine Field extension should be removed. It is a huge investment and diversion away from the main Everett-Lynnwood route that costs too much money for too little ROI. I would actually advocate for the removal of the entire extension to Everett because a 40 mile light rail line is absurdly long for mass transit.</p> <p>&gt; Issaquah is a similar argument. Light rail would be a poor choice of investment there, for the same reasons as Everett: too much rail for too few riders. This is a route that would be better served by BRT or a more regional rail system (similar to the S-Bahn in Germany).</p> <p>-MODIFICATIONS-</p> <p>&gt; In an ideal world, the Ballard line would be grade-separated (although I am fairly content with an infrequent or off-peak drawbridge).</p> <p>&gt; Removal of the Paine Field or Everett line would hopefully free funds and resources to bring core rail lines/corridors online, faster - namely Ballard/West Seattle.</p> <p>-ADDITIONS-</p> <p>&gt; UW-Ballard. This E-W corridor is needed <i>*very badly*</i> in North Seattle, which is far too car-heavy and congested now, and too hilly to be easily traversed by a casual biker or pedestrian.</p> <p>&gt; Another E-W corridor somewhere north of Green Lake, for similar reasons to above.</p> <p>&gt; I think the true BRT down 15th Ave NW would be excellent for expansion of service and higher frequency. A bike lane would be nice there as well.</p>
<p>NORTH KING COUNTY</p>	<p>The urban expansion projects within ST3 seem to be prioritized much lower than the suburban ones. Build a strong urban core first while looping in the suburban areas. You need to get urban support for this plan, and moving up the Ballard/DT and West Seattle/DT items will help push ST3 forward!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	The number of people moving to West Seattle based on new construction is astounding. I think that the current plan calls for light rail to areas that are already really well served by highways and the SR520 bridge which HOV lanes, and the like. West Seattle just doesn't have that, but is increasingly becoming a destination for many to go to - living and recreationally. I'm disappointed to see that the first light rail that would come to West Seattle would be as late as 2033. That's 17 years from now!
NORTH KING COUNTY	Ballard should be higher priority.
NORTH KING COUNTY	The only problem with this plan is that it is far too slow. These transit goals are laudable and necessary, but with these timelines, things will be much worse every year for 15-20 years before they get noticeably better. Tax me! But shrink the timelines.
NORTH KING COUNTY	I want to see grade-separated light rail to Ballard, and prefer grade-separated lines in general. The current at-grade option is slower -- transit needs to be fast and reliable. We have one shot to do this right, and I want to see that happen with less at-grade options where trains could be bogged in traffic or bridges going over the canal. The "swinging bridge" concept that I've heard sounds like something that could break down much easily and lead to more delays than a tunnel.
NORTH KING COUNTY	Depending on an additional drawbridge for the Ballard route is an awful compromise - please please tunnel under the sound for this route.
NORTH KING COUNTY	The order of projects in this plan is wrong. The money should be spent first to improve movement within the city (Ballard to DT and West Seattle to DT) before an emphasis is placed on moving people from the suburbs to the city.  Also, going from East to West, or East to West within the city is a nightmare. Light rail needs to be considered from Ballard to University Village.
NORTH KING COUNTY	Less focus on suburbs with little population density and more focus on dense Seattle neighborhoods.
NORTH KING COUNTY	Ballard Extension should serve the Fremont neighborhood, a hub of growing employment, increasing population density, and a dining and entertainment center.(After all, it is "The Center of the Universe.")
NORTH KING COUNTY	Ballard has been the fastest growing area in the city and should have better transit options MUCH SOONER to accommodate it's increase population

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>The proposed ST3 is too expensive, too slow, and too focused on track-miles over ridership. I'm an ardent transit advocate. I've voted for every transit bill I've ever seen. The current draft plan is unacceptable, and I'd campaign and vote against it.</p> <p>West Seattle will cost billions, for low ridership. West Seattle is not dense enough to warrant light rail.</p> <p>Nor are Tacoma and Everett. The Spine is not a useful vision. I can't imagine anyone would ride Link from Everett to Seattle, much less to Tacoma, when existing buses and Sounder are faster.</p> <p>Ballard-UW would generate more ridership for less money than Downtown-Ballard, and you'd be able to build it sooner. Adding East-West lines to complement the North-South spine would do more to attract riders and get people out of their cars than continuing to press further out into the suburbs.</p> <p>Twenty-plus years to add more rail in Seattle is asinine. We needed it yesterday. We need it now. This package isn't for us, and it's not even for our kids--it's for our GRANDCHILDREN.</p> <p>This plan is a step backward, not a step forward. Too expensive for too little, too late.</p>
NORTH KING COUNTY	<p>Projects within Seattle should be prioritized, especially Ballard-to-UW, and projects should not be at grade unless absolutely necessary (Ballard -&gt; Downtown should be modified).</p>
NORTH KING COUNTY	<p>A UW-Ballard link is essential. Cross town traffic, especially through that corridor is a killer and that project needs to be moved from studies to action. In general more focus on the city and connecting the neighborhood cores would make this something people would use in all parts of their lives, instead of a rush-hour commute/airport link as it seems to be now.</p>
NORTH KING COUNTY	<p>A new line to from downtown Seattle to Ballard should include a tunnel under the ship canal.</p>
NORTH KING COUNTY	<p>Bus Lanes/Toll lanes have caused more congestion than it has fixed. That means the current bus system does not reach the optimal population and only a very few people are reaping the benefits of commuting. Investing in the rail system will be the only remedy for congestion.</p>
NORTH KING COUNTY	<p>I think light rail works best in dense neighborhoods, while transit like BRT works best in sparser outlying suburbs. I can't support a proposal that goes to West Seattle and Ballard after Redmond and Lynnwood. 2038 to Ballard is absurd. The BRT proposals are probably the best bang for the buck.</p>
NORTH KING COUNTY	<p>Light rail projects should be modified to be above or below grade. Conflict with cars and lights limits the throughput of the system b</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Ballard and West Seattle light rail, starting now. Everything else put on the back burner. 22 years for LTR to Ballard is totally unacceptable. I am a HUGE supporter of light rail, but if West Seattle and Ballard are not prioritized and the target date drastically reduced I will actively campaign against ST3. That is tragic. Sound Transit is flushing all the recent goodwill of the Capital Hill - UW station completion right down the toilet.
NORTH KING COUNTY	Ballard and West Seattle projects need to be prioritized. Those stops would help the maximum amount of people. Having Ballard light rail complete in 22 years is way too long of a time line. I wouldn't vote for any package that doesn't have the majority of early milestones helping Seattles core since that is where the majority of the people live.
NORTH KING COUNTY	I'm totally supportive of expanding light rail, but the timelines and priorities here are outlandish. It took me 48 minutes to go from downtown to north Ballard on BRT last night, yet Ballard wouldn't get light rail until 2038. We need to prioritize our dense, urban neighborhoods especially as jobs outside the downtown core grow. My employer is moving to Bellevue, and a commute would be well over an hour by bus.
NORTH KING COUNTY	<p>To get buy-in from folks...you pay attention to what is happening within the actual city, and then work out to the suburbs. I am not a fan of buses at all. I think light rail and sub-way (Seattle Sub-Way) is the idea you need to really consider. They have got a great ideas that are worth really thinking about.</p> <p>I was really disappointed with the ST3 plan that you rolled out. I think we can do better and really offering relief first to folks who commute within the city limits...</p> <p>West Seattle to Ballard. Ballard to UW. Are absolute priorities...to get done within the next 8 years.</p>
NORTH KING COUNTY	<p>I understand that building all this infrastructure takes time and money, but for the amount of time and money going to this plan I don't understand having an at-grade, boat and car traffic dependent light rail from Ballard to downtown. Not having above grade or a tunnel for the entire Ballard to downtown route doesn't fall in line with the sentiment from "The best way to add more capacity to our transportation system is with transit, like light rail and commuter rail, that never gets stuck in traffic.", which I completely agree with. I am happy to add more taxes to fund improvements to the system, both in Seattle and regionally, but let's do it right so that the system can last and isn't left to the whims of the coast guard as to when the light rail bridge should open.</p> <p>Additionally, I would like to see a UW-Ballard line added to the plan. We need to add lightrail to the densest travel areas, and I would think this would be a much higher priority than extending the lightrail all the way to everett or downtown Redmond. Without lightrail from NE Seattle to Ballard, it feels disingenuous to call ST3 "finishing the whole system."</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Ballard in 22 years, ARE YOU INSANE? Maybe flip the schedule so it looks something like ballard in 7 years > west seattle in 10 years > redmond in 12 years > everett in 15 years > lynnwood in 20 years > tuk in 20 years > tacoma in 22 years.
NORTH KING COUNTY	The graham street station seems like a relatively easy and inexpensive project that should be done well before the proposed completion date. I think it should be moved up in the schedule
NORTH KING COUNTY	Grade separated rail from Ballard. Please stop building expensive things if they'll just get stuck in traffic! I love transit so much and haven't had a car since I was 17 but this kind of suburban and parking focused plan just makes me sad. I want more for the area, and grade separated rail in Ballard is part of that.
NORTH KING COUNTY	<p>I think that light rail should avoid being at-grade in Seattle as much as possible. Building the Ballard-to-Downtown line at grade would throw away the argument that "light rail never gets stuck in traffic" which I think is crucial to its success.</p> <p>I think that estimated ridership and avoidance of at-grade lines should be the guiding principles for Link light rail transit.</p> <p>I would prefer to focus on building light rail within the cities where the people are, and relying on Sounder trains to get people between cities instead of emphasizing the light rail spine.</p> <p>I hope that a Ballard-UW line gets more consideration for ST3, or that if Sound Transit will not build a Ballard-UW line that Seattle could get taxing authority to go it alone.</p> <p>(also, although I've reported that I do not use mass transit much today, that is the result of a recent move. Prior to 8 months ago, I relied on transit daily)</p>
NORTH KING COUNTY	I would like to see the West Seattle and Ballard extensions of the Light Rail happen will before the proposed 17 year mark. The congestion on all arteries in and out of these communities is already at critical mass.
NORTH KING COUNTY	Why can't the new light rail from Seattle to Bellevue go via 520 and also connect Redmond? I90 is the slowest option... It's painful to take the 550 via i90 when we could go 520!
NORTH KING COUNTY	Ballard and West Seattle NOW. Graham St. station and 130th St. station NOW.
NORTH KING COUNTY	The Ballard and West Seattle lines appear to only serve a small area of these highly populated areas. Will there be "milk run" buses in the greater area that are effective at getting people to the stations and will do so in a manner that doesn't take longer than current metro transit? Also if there was light rail all the way to the Fautleroy Ferry Terminal could you imagine how many people would be riding light every day?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	The light rail extensions to Everett and Tacoma are wasteful should be completed employing an alternate mode, BRT would provide similar levels of service and require significantly less upfront costs. This would hopefully allow the core Ballard and West Seattle extensions to be completed much earlier than advertised.
NORTH KING COUNTY	Graham Street should be way faster. Lines already exist, station shouldn't take 20 years to build. Graham street would increase access for an area of Seattle that uses transit more than average.
NORTH KING COUNTY	All light rail should be grade separated or underground and not rely on mixing with traffic such as is done in Rainier. Plan seems backward. Why is Ballard and West Seattle last? Build out system around Seattle before going out to the suburbs.
NORTH KING COUNTY	As a Ballard resident, I strongly support light rail through the Ballard/Interbay/SLU corridor, but equally and even more important is building additional and viable transit in the more underserved parts of our city. Please bear in mind the traditionally underserved areas, as well as those that are likely to become underserved in the protracted timelines that this plan will require.
NORTH KING COUNTY	Please do what you can to expedite the West Seattle light rail. Having been in West Seattle for almost 20 years, and seen the dream of grade separated transit (monorail) shattered, light rail can't get here soon enough. Unfortunately I'll likely be retired by the time light rail is turned on in WS, but will still likely vote for it so the future generations will benefit.
NORTH KING COUNTY	This light rail and transit expansion serves the suburbs using light rail technology, which tops out at 55 miles per hour. This is actually slower than top quality BRT systems. Additionally, the lack of a Ballard to UW line is an absolute travesty, and one that is essential to making our city great for transit. By focusing on downtown a bit less, we can help make our system less commuter oriented and focus on all day ridership. Additionally, places like Issaquah are located by the freeway, making it easy to dedicate lanes for buses that can go just as fast as rail can. Dense corridors like Ballard to UW can never be served by buses the same level that rail can. Also, grade separated lines can make it easier to automate them. Automated trains mean more frequent service, and advances in automation could make buses driverless as well. These new systems should be built in a quick, highly efficient manner, and help pay for themselves by incorporating dense, efficient land use directly next to them, eliminating sprawl while helping to solve our housing crisis. Seattle is a thriving metropolis, and we needed this expansion 20 years ago. Build it now.
NORTH KING COUNTY	Prioritize light rail over bus rapid ride.
NORTH KING COUNTY	22 years to get light rail to Ballard is unacceptable, especially given that feedback indicates it to be a higher priority for the city. I'm obsessively pro-transit, but if that doesn't change, I'm voting no.
NORTH KING COUNTY	The NE 130th Street station promises an excellent opportunity for transit oriented development and for reducing congestion in a high growth area of our region. It needs a commitment of full funding. Neighborhoods including Bitter Lake, Haller Lake, Pinehurst and Lake City - all to the east and west of 130th need access to Lynnwood Link. Ensuring the train will stop at NE 130th is a low-cost option with high value to current and future residents. Please fully fund NE 130th!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>I will vote, campaign, and volunteer for this plan to pass, wholeheartedly. BUT</p> <p>I disagree with a lot of it, primarily with the suburban focus. Already you are seeing an increase in ridership with just the Capitol Hill and UW Stations opening..upwards of 10k in the first week. I strongly feel dense neighborhoods should have the top priority, such as Ballard and the already very segmented West Seattle.</p> <p>I don't think you'll experience the increase in ridership such as in Seattle. One could argue that these new ST riders are people already taking the bus. But if air quality and the environment is a concern, the more people that abandon their cars *in* the city, the better. And I know many that live in my neighborhood *want* to abandon their cars, but don't because it takes too long to get to Ballard, Georgetown, Northgate.</p> <p>I think an inward to outward approach would be best.</p>
NORTH KING COUNTY	<p>The impact of self driving cars needs to be considered as they will be a major factor in transportation before most / any of ST3 is completed.</p>
NORTH KING COUNTY	<p>Ballard/DT light rail should cross ship canal via tunnel or a bridge high enough as to not be disrupted by marine traffic, and continue on to Northgate to create DT/Ballard/Northgate/UW/Capitol Hill loop.</p> <p>Change BRT on 405 corridor to light rail. It will only become more difficult to build east side light rail if it doesn't happen now.</p>
NORTH KING COUNTY	<p>More stress on Ballard and West Seattle. Anything more than a decade for these two neighborhoods is unacceptable.</p>
NORTH KING COUNTY	<p>I'm confused about whether the Graham St station is included in the ST3 final plan or not, but I STRONGLY encourage you to keep it in. Compared to many projects in this plan that are huge (though worthwhile undertakings), Graham St is relatively small and straightforward, but will have a major impact on the vibrant and growing community there. The work that has already begun on equitable development around the station has the potential to be truly groundbreaking. It would be such a shame for that work to go to waste. Having lived in this neighborhood for almost a decade, I would of course personally benefit from the station (instead of having to walk to Othello), but more importantly I see how it would be a real boost to the economy and public safety of a wonderful community that has struggled and survived.</p>
NORTH KING COUNTY	<p>The future investment study listed for Ballard to UW should be accelerated to a full light rail project included in ST3.</p>
NORTH KING COUNTY	<p>The line to Ballard should not be at grade at any point. A drawbridge would mean the whole system could be held up if it was raised. This line should be a tunnel. Also, Rainier Valley and the Central District need to be served better, whether through additional bus or a future line that would allow them to access the main lines.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	We support the NE 130th Street Station on I-5 because of the needs for the Lake City Hub Urban Village. The current population of under four thousand has the housing development capacity of at least three times that existing population under existing zoning. It is the neighborhood in Seattle with by the biggest growth projections. Then consider growth in the surrounding neighborhoods and the population growth will be far bigger. The already congested 522 route will not accommodate that drastic increase without substantial improvements to transportation. In addition to the 130th station, projections for major transportation infrastructure, not just busses, need to be planned along the 522 corridor.
NORTH KING COUNTY	The projects proposed under ST3 are too oriented to serving suburban centers in an effort to solicit regional level support. Transit maximizes its utility, reliability and maintenance reliability when concentrated in population dense areas like Seattle. I would prefer that Sound Transit prioritize its investment and vision in the city of Seattle so that the most people are served per dollar spent and so that 50 years from now we are not left with too many miles of infrastructure to maintain in far off communities that don't contribute enough revenue to the system.
NORTH KING COUNTY	I haven't seen a lot of detail around the different phases of the plan, associated costs, and timing, but it seems likely the bulk of the costs and effort is going to go into building another tunnel to support light rail to West Seattle and Ballard. These lines are going to also dead end in these neighborhoods without good options for continued expansion, unlike the other lines being added to the system.  Why not improve the service level of the C and D lines to serve these areas better and then focus resources on expanding light rail into areas where the network can continue to be built out and support residents whose travel times are much longer and more difficult.
NORTH KING COUNTY	Projects in Seattle need to happen sooner, and Ballard connection has to be of the highest quality dedicated ROW. A LRT link from UW to Ballard and/or similar to the KC Metro 8 route should be added.
NORTH KING COUNTY	All rail should be grade separated and prioritized over all other vehicle traffic. At grade, in-traffic system (like the street cars in Seattle) are a giant waste of time and money.
NORTH KING COUNTY	FASTER!!!
NORTH KING COUNTY	Ballard and West Seattle routes need to be expanded and prioritized! These are some of the most isolated neighborhoods in the city. Without rail options nearly all commuters are bottle necked onto 15th ave/Elliott or the West Seattle Bridge, respectively. These are also some of the fastest growing and most dense residential neighborhoods in Seattle. These residents needed transit options yesterday, not 20 years from now. Make these corridors a priority. Connect the neighborhoods in Seattle!
NORTH KING COUNTY	It should NOT take 17 years to get the light rail to Tacoma and Everett - that's WAY to long.  Also, when I take a bus to light rail, go downtown for shopping, dinner, a show/concert, then ride light rail back to my area, the bus service to my neighborhood is no longer running. And there is little or no parking around the rail stations. You are NOT providing services that are complete and functional.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	I think Ballard & W Seattle should be more of a priority than the Eastside
NORTH KING COUNTY	Too much focus on far-flung suburban projects, Seattle gets very little in the plan, especially in the early years. Use Ballard-UW light rail to speed construction on the most important part of the plan, service to dense north Seattle. Put Madison BRT back into the plan. Don't just improve Rapid Ride C/D, improve E which is the busiest of all the lines. I can't see how we can prioritize extending rail to Paine Field while we have nothing for the Central District, Fremont, Wallingford, Lake City, and other dense neighborhoods.
NORTH KING COUNTY	I will struggle to support ST3 without a fully funded 130th St. Station. It makes no sense that 90000 people in north seattle have only one station at Northgate when growth estimates and projections show that North Seattle is going to get WAY MORE DENSE and is middle class families and people of color that need a station at 130th for the urban village around that site. My main priorities in this are the 130th station, 405 BRT. Im very disappointed that the 130th station is being called "provisional" we will be hurting for decades without that station and by the time funding arrives our roads will still be congested because of the lack of a station operating in that soon to be EVEN MORE DENSE area of North Seattle.
NORTH KING COUNTY	Project completion timelines need to be shortened--even at the expense of removing other projects from the plan.
NORTH KING COUNTY	Please do everything in your power to expedite the building of a mass light rail system. Our highways simply do not, and should not support the majority of this regions population as the base means of transportation. Dealing with modern issues such as climate change/over population the city of Seattle, and the puget needs region needs to prioritize light rail/alternative transportation above all else, including the expansion of rapid bus services. Bus services simply do not stop people from driving their cars in any meaningful way. With that said, please reconsider the time frame for these projects to prioritize the expansion of our regions light rail program. With a clear vision, the light rail expansion should be able to be completed within the next 10 years. Also, I would add a line that serves Kent to renton and on to Bellevue.
NORTH KING COUNTY	Light rail to Ballard must be built ASAP.
NORTH KING COUNTY	Please provide much less (or no) parking and use those capital funds to expand or enhance the other projects. Please build the Ballard line much sooner, we can't wait that long. Please include the Ballard to UW line.
NORTH KING COUNTY	West Seattle light rail to DT should be made a greater priority given the rapid pace of development in WS

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>I believe the prioritization of in-city versus suburban transit projects should be reevaluated. The fact of the matter is that much of the traffic congestion in Seattle and problems resulting from it (poor road conditions, dangerous conditions for cyclists, etc.) is the product of Seattle residents using personal vehicles to travel within the city.</p> <p>Many popular neighborhoods are very poorly connected by existing transit which leads Seattle residents to drive. For example, travel between Phinney/Greenwood, Ballard, Fremont and Wallingford and Capitol Hill can take in excess of an hour by public transit, even more so on evenings and weekends. West Seattle is similarly isolated from many popular neighborhoods because it requires transfers and lengthy bus rides on already congested roadways. I think every effort should be made to prioritize grade separated Ballard-Downtown and West Seattle-Downtown lines over other projects. I find it unacceptable that under the current proposal, these key connections are projected to be completed DECADES from now.</p> <p>Other crucial connections within Seattle are not a part of the current proposal at all. Ballard to the University District is another notoriously congested route that makes for a lengthy commute despite the relative proximity of the two neighborhoods. In order to improve connection between these neighborhoods, an underground or otherwise grade separated East-West transit line is essential.</p> <p>Additionally, much of the projected population growth in the region is still concentrated in Seattle. Hiring by companies already headquartered in Seattle (e.g. Amazon) and those moving to Seattle (e.g. Expedia) continues to increase the population of the city, and it is in the city's best interest to discourage the incoming residents from bringing their cars thereby increasing in-city congestion. While it is important to provide convenient transit options connecting suburban areas to Seattle and to each other, I believe that the current proposal prioritizes those projects at the cost of ignoring major problems within the City of Seattle itself. As a Seattle resident, I fully support mass transit and I would love to support the ST3 measure; however, I believe the prioritization of these projects should be reevaluated before I can vote to approve it.</p>
<p>NORTH KING COUNTY</p>	<p>Ballard light rail should be prioritized higher as it's both a dense neighborhood and popular destination</p>
<p>NORTH KING COUNTY</p>	<p>The connection to Ballard shouldn't be at-grade and subject to boat traffic. Being subject to traffic, car or boat, kind of defeats the purpose of the light rail. It should either route through the existing tunnel to UW or a new tunnel needs to be built. I understand building a new tunnel would cost more money and take more time, but I'd rather have a good solution later than a bad solution forever.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>As a preliminary matter, light rail is a very poor "solution" for longer distance transit. Commuter rail (e.g., Sounder) is a far better solution, as it gets people where they are going much faster. Particularly in Snohomish County, I don't think it's wise to spend billions extending light rail, when a ride from Paine Field or Everett into any part of Seattle is likely to take over an hour, not even considering the time taken to get to the station. In any case, my vote for or against ST3 isn't dependent on what the suburbs do. If they are paying their own way and no Seattle money is sent to the suburbs, then they can complete any project of questionable value they wish (including the "spine").</p> <p>The reason that I will not vote for the ST3 plan as proposed is that it largely fails to address transportation problems in Seattle, but leaves us with a massive tax bill that will prevent any other transportation solutions in the next 25 years. The timing of the projects is unacceptable. Seattle has massive congestion problems now. Sound Transit needed to address three issues with the ST3 proposal, specifically: (i) provide a grade-separated light rail connection from Ballard to downtown; (ii) improve connections between West Seattle and downtown (note that this priority is really just for political reasons, not because demand justifies it); and (iii) provide a true grade-separated fix for the most congested corridors within the city (between Ballard and UW and Lower Queen Anne-South Lake Union-Capitol Hill). These projects need to be in place on a 10-12 year timeframe, not 25 years. Unfortunately, the projects ST chose will spend all of our tax money for 25 years to poorly address only two of those priorities, leaving the final priority, which is perhaps the most critical, dead in the water for at least 25 years.</p> <p>With better planning, ST could address all three priorities in a much shorter timeframe. As to Ballard, a light rail line in 25 years isn't really a fix. The new Ballard line apparently requires a new tunnel downtown to operate, thus the 25 year wait. However, a new line from Ballard to downtown isn't really necessary to get people from Ballard to downtown. Thanks to Central Link, a line from Ballard to UW would accomplish the same thing with no new tunnel (and no new drawbridge over the ship canal). If, at some point in the future, capacity became an issue, then a Ballard-downtown line could be built. This Ballard-UW line should have been on the project list, even if in lieu of the Ballard-downtown line.</p> <p>With respect to West Seattle, light rail would be wonderful in a world without budgets, but in this package it isn't a cost effective choice. Traffic between West Seattle and Seattle is only heavy for around 2 hours per day during the rush hour commute, and West Seattle is not a densely populated area. Light rail would serve very few of these commuters. More West Seattle residents would be</p>
<p>NORTH KING COUNTY</p>	<p>We need to not only continue the expansion of ST3 and other transit options in the city and region but we need to do it at a much speedier pace. A 25 year plan is good to have but I think many of these expansions, especially the light rail aspects must be done at a much faster pace to connect the cities neighborhoods as soon as physically possible as well as expanding and connecting into the region. We are fighting against time at this point, and if we don't find real solutions right now we are at risk of choking the life and growth out of the region. If these issues are not addressed soon we will see business begin to move out of the region to places where they will be able to expand.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>The core of the the most clogged roads in this master plan are in Seattle, yet this plans says we have to wait upwards of 22 years to even have a study done on the feasibility of a east-west light rail link between Ballard and UW? UNACCEPTABLE. Our city is exploding, east-west traffic has gotten insane during rush hours. Particularly along the Ballard to UW route, and beyond going up Sand Point Way. Not only should building this link be of utmost urgency in the plan, the line itself should go from Ballard all the way up to Magnuson Park. You have a major employer (Seattle Children's Hospital) and low-income housing at Magnuson that grossly disconnected from this system. The bus changes have made frequency better, but the roads around that area are so clogged it takes so much time to even hop on a bus or shuttle to these destinations, people are still opting for cars over transit.</p> <p>Lastly, the Graham Street station being 36-years out is also highly unacceptable. You have a booming neighborhood in Hillman City where many young families are moving to because it's the last bastion of affordable homes. Yet, there is a more than two-mile gap between the Columbia City State and Othello station. Those residing in Hillman City, and the local businesses starting to emerge there, are greatly hindered by this gap in service. Not to mention there is a serious public safety issue having to currently walk at night more than a mile to and from link light rail (because there is no parking available) in these neighborhoods. By adding the Graham Street stop (which should actually be on Juneau instead of Graham), you provide the opportunity to extend the development in Columbia City downward, providing more affordable housing and lively neighborhoods where people are out on the street more, which in turn will increase public safety.</p> <p>Myself and many others in Ballard and Hillman City are completely outraged at the bait and switch you played with us to get our votes on the Move Seattle ballot. If you do not make these two links a priority in your next play (ie. within the next eight years) there is absolutely no way I am voting for this measure.</p>
<p>NORTH KING COUNTY</p>	<p>West Seattle Light Rail extension to the south? For example, service somewhere in the Fautleroy/Westwood/White Center Area.</p>
<p>NORTH KING COUNTY</p>	<p>Seattle's densest neighborhoods need grade-separated transit. For a \$50 billion, 25-year project, we should be able to get at least that. Build the Ballard-West Seattle line first, and make it grade-separated the entire way. The suburbs can wait.</p>
<p>NORTH KING COUNTY</p>	<p>How can we speed up the timeline?          We need more in-Seattle routes.          Parking should not be paid for by ST.          Infill stations on the current line should be built ASAP.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>I have a few issues with the current plan:</p> <ol style="list-style-type: none"> <li>1. Not enough investment in dense areas. We need grade-separated rail in the city linking our sparse neighbourhoods. Ballard to UW should not have to go via downtown. Going East-West is a major pain point in this city as we all know. Only two of the 7 proposed lines from Seattle Subway have made it into this plan. Given that this is our generation's chance to make this happen, I have to say I can't support ST3 in its current form.</li> <li>2. Too much investment in Park and Ride stations in from the suburbs. I do support a regional light rail network but I feel the balance between Seattle and the suburbs is too skewed in this plan. Suburbanites generally drive.</li> <li>3. I don't see the Madison BRT in this plan. My understanding is that it requires funding from ST3. If this is deliberate then I believe that's a mistake. We need a connection for the Central District into this infrastructure. I would ideally like to see rail go out to the CD and Madison Valley. However I know that's not going to happen, so we should really make sure we get the BRT with as much dedicated bus lane as possible as it heads down town. I live in CD and would love to be able to bus quickly and reliably to Capitol Hill (and head into the light rail network) or Downtown.</li> </ol>
NORTH KING COUNTY	<p>Bus Rapid Transit projects should include bus-only lanes (preferably segregated via barriers from general purpose lanes) and on/off ramps for freeways and highways. Sure, it would cost much much more, but it would be true BRT (and not stuck on 99, 405, etc.).</p>
NORTH KING COUNTY	<p>Downtown to Ballard needs to be done WAY sooner than 25 years and needs to be in a tunnel. The instant success of the Capitol Hill and Husky Stadium stadiums make it obvious that we need to be tunneling to create NEW ARTERIALS to dense neighborhoods that can operate independently of any surface-level traffic disasters. We need an intracity subway system.</p>
NORTH KING COUNTY	<p>It seems illogical to extend transit options well outside Seattle when the city proper is still woefully lacking in transportation options along certain corridors. East&lt;-&gt;West travel is always problematic, bridges provide constant traffic jams and disruption, speed limits are nonsensically low on major thoroughfares, parking is allowed on major thoroughfares during busy hours, etc. These are all problems that are much more pressing than having non-bus options extended to Everett, Mukilteo, Lakewood, Tacoma, etc. West Seattle. Specifically Ballard and NW Seattle in general should get light rail before these other cities so that we're not building a slapdash transportation network.</p> <p>Major cities (like Seattle is becoming) require adequate inter-city transportation options before outlying areas can be addressed. Once Seattle is reasonably covered then it becomes much simpler to make good options to connect that system to nearby cities and counties.</p>
NORTH KING COUNTY	<p>Ballard and W Seattle should be priority #1 not 25 years out. Holy mother of god.</p>
NORTH KING COUNTY	<p>I would like to see the projects get done as fast as possible. The light rail system will greatly improve as it expands.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>West Seattle light rail is an easy win. In terms of tunnels vs above ground. The housing market is exploding in West Seattle and a bus that gets caught up trying to merge onto 99, or get stuck rejoining traffic before the viaduct is not an ideal situation. What is preventing west Seattle from getting done much faster than 17 years? And Ballard at 23 years is unacceptable! Also, the university tunnel station just dead ends, with no proper link to UVillage. The tunnel seems like it's going only to north gate with no stop along the way to UVillage. Is there a plan to address this disconnect? Taking an uber currently is an expensive option.</p>
NORTH KING COUNTY	<p>I don't really know about commutes from suburbs and surrounding cities to Seattle, though my guess is that people in those areas would be well served by these plans.</p> <p>For people within Seattle (myself included), there is a strong need and interest in fast reliable mass transit, specifically rail that can travel on it's own right of way. This need is apparent now!</p> <p>For this reason I am very disappointed in the ST3 proposal to bring light rail to Ballard in 2038 and West Seattle in 2033. I believe this infrastructure would be heavily used if it was in place today (witness the usage of the expanded LINK to UW and Capitol Hill) and proposing to build it out in 20+ years seems timid and almost absurd.</p> <p>I, for one, would gladly pay much higher additional taxes that what is currently proposed by ST3 to bring rail to Seattle much, much sooner. Also, the insistence on a downtown tunnel for the Ballard/West Seattle line seems misguided if it extends the timeline to bring these projects to Seattle. Why not elevated rail if that is quicker to build and/or cheaper?</p> <p>I hope that the final ST3 proposal for rail serving Seattle neighbors will include a radically different timeline than what is currently proposed. Otherwise I hope that Seattle could somehow go it's own way and fund and build these programs on it's own.</p>
NORTH KING COUNTY	<p>Ballard needs it sooner than 22 years</p>
NORTH KING COUNTY	<p>If a bigger levy will get rail done faster, propose it. 17 years is an absurdly long timeline.</p>
NORTH KING COUNTY	<p>While it is understandable that we as a Puget Sound community need to find a way to fund such a helpful and needed project, it seems less logical that the bulk of the cost is put on homeowners, many of whom have not used cars as a primary mode of transport in years. Wouldn't it be more sensible to increase car/gas taxes instead? This would give commuters a sense of "buying into" their options, and draws a more direct line between the need to commute and the choices for doing so. I have much less of a choice of where to live (based already upon affordability) than I do a means of commuting.</p>
NORTH KING COUNTY	<p>Grade separated service to Ballard. A tunnel to West Seattle. Ballard to UW service is not necessary.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Completion of inner city improvements to core downtown transit projects, especially downtown seattle, first, before far flung low ridership programs in the suburbs.
NORTH KING COUNTY	Light rail to Ballard in 22 years is absurdly slow.
NORTH KING COUNTY	<p>The downtown to Ballard line in 22 years is unacceptable. With UW to Downtown now open, and the absolutely abysmal options of going East-West, especially in the Ballard - UW corridor, please please please strongly consider revising this plan to develop the Ballard spur to connect Ballard to UW via Fremont/Wallingford.</p> <p>Building an entirely new tunnel/canal crossing to go through the mostly nothingness of Interbay is a total waste of time and resources, especially one that is 22 years in the future. This is the most important piece of ST3, and I will be voting against a proposal that doesn't include this modification with a more reasonable timeline. Thank you for the platform to allow for our input.</p>
NORTH KING COUNTY	Focus less on Bus related projects. Rail systems are what we needed 20 years ago.
NORTH KING COUNTY	The Ballard extension should NOT be ground level. There should be a tunnel that goes under the lake. Having the train stop for boats to pass delays the system and defeats the purpose of implementing the light rail to this area.
NORTH KING COUNTY	<p>Ballard-UW and a Metro8 study must be a part of ST3. The current timeline is far too long, but if Ballard-UW and the Metro8 study were included in the package (completed in the same timeline) I would be more likely to vote for the package.</p> <p>This is an enormous ask of taxpayers, you must include the two highest-quality and highest-ridership lines in the package for it to be successful. At the end of the day, there is just not enough quality in the Seattle lines to make the cost and timeline worth it. Either shorten the timeline, or improve the quality of projects to get my vote.</p>
NORTH KING COUNTY	Grade-separated Light Rail to Ballard and West Seattle are much more important and urgent than some of the other projects. As the plan stands, they will be completed last. I cannot support a plan that prioritizes getting the rail to less necessary places like Everett and other suburbs that will not have as great an impact on the traffic in the city of Seattle. As the plan stands, I do not think it will pass and it needs to be revised for these reasons.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	I think that this proposal has too much emphasis on the suburbs and surrounding areas while the light rail within Seattle has only just begun. I believe the transit options should be picked to benefit the highest number of people and Seattle is much more dense than the surrounding communities. I also think that expanded light rail is the smartest way forward in our ever growing and geographically limited region. Much of the city still has limited access to the light rail lines and commuters from the east side will not use the train if it does not take them to their destination in the city. If the rail only serves some of the city, many will continue their choice to drive. Alleviate the inner-city congestion before making it easier for folks who do not even live in the city to access it. I've been very pleased with Sound Transit's past work and am already a huge fan of the newly opened light rail stations but there are still many areas of the city that are unpleasant to access with public transit. Until it's easy to get around within the city, I see no reason for people to give up their cars. Please consider expediting the Seattle rail lines over the lines that leave the city.
NORTH KING COUNTY	Include as much coordination with Greenways and Bike Paths and Bike Route planning as possible. Mixed use transit connections, bicycle roll-on, multi-generational friendly access designs, etc. are all stress reducing, pollution reducing, healthy living improvements that matter immensely during this planning stage.
NORTH KING COUNTY	I would like to see the Seattle light rail lines (West Seattle, Ballard) done earlier. Fewer cars = safer streets for walking/biking and potentially less honking and road rage - it's dangerous to be a pedestrian here! But even buses block crosswalks and intersections every day.
NORTH KING COUNTY	Ballard and West Seattle should come online sooner.
NORTH KING COUNTY	The Ballard extension should be a much higher priority. The community is setup (zoning, geography) to be high density, much higher than other neighborhoods in the plan. There is and will continue to be a lot of growth. The current rapid transit and 15 express buses are already packed. Plus this line will go through South Lake Union and Seattle Center, a hot bed for economic activity. Further, the Interbay area is currently a lower density location for prime for close nit development and growth. Having the Ballard line come last on the list doesn't make a lot of sense.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>The fact that the Ballard to downtown light rail line takes so long to come on line is hard to swallow, especially since places like West Seattle get light rail first. I understand the complications of building a tunnel, but Ballard has much more use for the general public than a West Seattle line. West Seattle seems great for West Seattle residents, but who else is going to use that line? Ballard to downtown will be useful to much more people since Ballard is an interesting, vibrant area that needs to be connected to the light rail system. I would be in favor even of scrapping Ballard to downtown for ST3 and instead building a Ballard to UW line if it would mean getting Ballard connected sooner. Time is of the essence here as traffic and congestion continue to get worse. Connecting Ballard to UW at a sooner date is better than waiting several additional years for a tunnel to be completed. True, it means Ballard to downtown isn't as direct, but it improves north/south connections which will benefit a huge number of people. Then Ballard to downtown can be completed as part of ST4. "Perfect" can be the enemy of "pretty dang good," and I think the huge amount of time to build another downtown tunnel means we need to go with "pretty dang good" for now and save "Perfect" for the next round. Getting Ballard onto the light rail network as soon as possible should absolutely be the highest priority of ST3.</p>
NORTH KING COUNTY	<p>We need options for Lake City Way SR522 that go at least as south as 125th st.</p>
NORTH KING COUNTY	<p>Suburban network expansion may be politically expedient, but it's not good for the overall health of the system. Priority should be given to the densest service areas. Extending Link and BRT to sparsely populated areas yields a much lower ROI than does expanding coverage in urban areas with new lines and infill stations. That ST3 prioritizes low-ridership suburban expansion decades ahead of urban improvements is enough for me to oppose the package.</p> <p>D Line service to Ballard is sufficient for downtown trips, and with additional investment will be able to serve the neighborhood for decades to come. What north Seattle urgently needs is more reliable east-west service. Link from Ballard to UW via Fremont would do a lot more for the network than another downtown line.</p> <p>And please stop pushing so-called "BRT" when there's no plan here to build a separate, dedicated busway, and regular express buses in HOV/HOT lanes are sufficient to meet demand anyway.</p>
NORTH KING COUNTY	<p>I am angry that the connections to metro busses at the new uw station are so abysmally bad. Walk is WAY too long. I don't understand why it was not arranged so busses stopped right beside the station. Meanwhile it looks as though hospital shuttle service stops right at station. This feels like a tiered class system.</p>
NORTH KING COUNTY	<p>Why so many tunnels? Use elevated rail like in NYC. It is cheaper and faster to build.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>1) Ballard to UW should be included in this plan. This line would serve more people than the Tacoma, Everett, or Eastside lines (and likely all three combined). In addition, ST should study (a) extending the Downtown to Ballard line north to 85th and (b) a line from Mt. Baker north through First Hill, the Central District, Capital Hill, and to the UW. Both of these urban lines would likely provide substantially more benefit to more people than the suburban lines under consideration. Building an effective urban network of light rail will do more to relieve congestion and get people out of their cars than a set of disconnected commuter routes that only join certain locations and still require people to drive for many daily tasks.</p> <p>2) The implementation of the Graham Street station should not be delayed. It is currently scheduled for 2036, but I see no reasons that it could not be opened in a matter of months if ST3 were approved. There is no need for any complex engineering or substantial capital costs, and its addition would greatly improve access to the light rail for a large area in SE Seattle.</p>
NORTH KING COUNTY	<p>The west side corridors of the proposed Light Rail serving West Seattle and QA/Ballard deserve greater priority. These popular neighborhoods are rapidly being developed, with the density increasing each day, yet the current routes to and from these areas are limited by geography and already experience incredible bottle-necking. I am deeply concerned by the large number of high-density condos/apartments being built in these neighborhoods, many without inclusive parking, coupled with the sorely inadequate public transit offered to these areas. These neighborhoods are jewels of Seattle; destinations in their own right. They cannot wait 20-25 years for inclusion into the Light Rail network.</p>
NORTH KING COUNTY	<p>Focus on where the density is, in the Seattle neighborhoods that need it the most, the eastside is getting improvements to SR520, I405, and much more. Invest in the Seattle neighborhoods where the transit will have an immediate impact.</p>
NORTH KING COUNTY	<p>Building out to West Seattle sooner would be great!</p>
NORTH KING COUNTY	<p>25 years is so long. Can we improve timelines?</p>
NORTH KING COUNTY	<p>I would support this plan but I don't want to see the light rail in for Seattle Center to Ballard go up in 22 years; this is a tourist destination and needs to happen a lot sooner than that. It's the biggest Seattle neighborhood as it is and Mercer is constantly backed up.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>I do not understand the need for another downtown transit tunnel. With the modern signalling, trains can run every 3 minutes or less. That's enough for trains every 10 minutes Everett - West Seattle, Ballard - Redmond and Northgate - Issaquah. By avoiding spending money on another downtown tunnel, much needed coverage in the dense neighborhoods of Seattle could be built, such as Alaska Junction - Burien or UW - Wallingford - Fremont - Ballard. Eventually, a new tunnel will have to be built, but the priority should be to get rail coverage throughout Seattle.</p> <p>Also, more improvements to Sounder should be considered, such as another downtown station in Belltown and near the Ballard Bridge in Interbay - areas currently hard to reach by car. In the long term, an all-day half hourly Everett-Seattle-Tacoma could connect the region using mostly already existing infrastructure as an alternative to the terminally congested I5.</p>
NORTH KING COUNTY	<p>I have never voted against a transit package, but I may vote against this one. The timeframes in the plan are ridiculously long. We need better rail NOW, not in 20 years. If this mean elevated lines instead of tunnels, so be it. But I will not vote for a plan that does not bring rail to West Seattle until 2033. Re-think the plan and come back with something better.</p>
NORTH KING COUNTY	<p>I think light rail access to West Seattle, Ballard, and Everett should come earlier in the plan.</p>
NORTH KING COUNTY	<p>Please consider serving more dense neighborhoods and deciding against such highway-focused alignments that will only encourage people to drive to your stations. The amount of parking in this plan alone is enough to vote against it.</p>
NORTH KING COUNTY	<p>Why is there so much BRT? It is not worth the money</p>
NORTH KING COUNTY	<p>Seattle is where the growth is and where the supportive voters are. Build rail to Ballard and West Seattle FIRST. We can't afford to wait until 2038 and BRT won't hold us over for 22 years.</p>
NORTH KING COUNTY	<p>Reduce the timeline. This is in unacceptable.</p>
NORTH KING COUNTY	<p>If there are no immediate plans to extend light rail near white center, having a park and ride near the Alaskan station would be immensely helpful!</p>
NORTH KING COUNTY	<p>I strongly support light rail and mass transit and we are 20 years behind schedule. We need to double or triple our efforts. I am very leary about the length of these projects, we need these projects finished in ten year not 20 to 30 years. Most people working and commuting today will never get to use the light rail and transit system we are trying to create. I am not sure right now if I would vote yes on ST3. I am not convinced that voters in Washington outside of the Puget Sound Region would support the plan.</p>
NORTH KING COUNTY	<p>Ballard should be serviced by a separated grade line connecting to the UW rather than with traffic to downtown.</p>
NORTH KING COUNTY	<p>Putting buses on shoulders is un safe Thats why we have shoulders as a safe place to pull off the road .</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Lake City Way between NE 80th St and NE 125th St is, once again, being ignored. There are so many potential benefits from including this section in the SR 522 BRT plan. First, the area is developing. Second, many people live in the area and it is currently very unpleasant to walk or bike in. In fact, it's simply dangerous. Third, there are number of businesses that would benefit from better transit service in the area and better walking conditions. Fourth, Lake City Way is a main corridor in the area, so a BRT-like transit option along it is essential for a truly connected transit network. I ask you to consider including all of Lake City Way in the SR 522 BRT plan.
NORTH KING COUNTY	We need to maintain priority of more light rail options within the denser parts of Seattle. The longer commuter routes beyond Southcenter and Alderwood, would probably be better served by more consistent and more accessible Sounder service than Light rail. Perhaps adding more trains throughout the day in both directions. Also, the traffic jam that tends to occur within the transit tunnel during rush hours makes light rail through downtown extremely unreliable, somewhat negating the benefits of light rail. There should be an effort to develop a dedicated tunnel system through downtown for light rail that is not shared with buses.
NORTH KING COUNTY	I think that the proposed at-grade light rail to Ballard with a draw bridge will provide very minimal benefit over the existing bus infrastructure, and off-grade light rail connecting the existing UW infrastructure, although less desirable than off-grade direct to downtown, would be preferable to at-grade light rail to downtown.
NORTH KING COUNTY	Ballard to UW!
NORTH KING COUNTY	Getting reliable transit to the downtown core business district and South Lake union should be of the highest importance due to the growth in that area with new developments like Weyerhaeuser and Expedia moving there along with the growth of amazon and other businesses.
NORTH KING COUNTY	Bike lanes throughout Puget Sound, but ESPECIALLY in Seattle, should be moved OFF arterials and on to parallel side streets. This keeps the cyclists safer and increases the number of lanes available for cars, thereby lessening congestion. Also, perhaps running more buses at peak times might help. For example, why on Earth are there EMPTY buses going back to the terminal at 8:30am or 5:00pm --- just when we need them most?? It's appalling how many buses, during both morning and evening rush-hours are heading back to base. It makes NO sense! Neither does running buses on the shoulders of freeways. This is just a BAD idea. How many buses rear-ending stalled cars will it take before it's called off?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>The only project on the list that I support is Downtown-Ballard and what is proposed is inadequate. I do not support at-grade running through Interbay with an operable bridge. The timeline is totally unacceptable for this line. There is no UW-Ballard line which is a must. Almost everything else proposed is light rail running along freeways that already have pretty good express bus service into areas that are totally un-transit oriented and will not be used much outside commute times. I do not support completing the spine, that's what Sounder is for. All the proposals for improving Sounder having nothing to do with improving the rail line or increasing service. I don't care about more parking, longer platforms and pedestrian improvements. I want Sounder service all day and on weekends, I want infill Sounder stations at Broad Street and Golden Gardens. This package is an incredibly expensive proposal at \$50 Billion, I would support it if it was full of great projects but what is proposed is terrible. Even the one line proposed on the list (Ballard - Downtown &amp; Downtown Subway) that I want is severely lacking. Even the suburban projects that I would on occasion are poor or missing (we need a transit line to Kirkland on the Cross Kirkland Trail and the Issaquah line needs to cross the slough and tie into the East Link tracks much sooner for travel to Seattle). I do not support I-405 BRT with its expensive stations in the middle of traffic clogged freeways and cloverleaves. I can not support the package proposed, for \$50 billion I expect a much better list of projects, and projects in Seattle built to higher quality and on a tighter timeline.</p>
NORTH KING COUNTY	<p>Connecting Ballard to Downtown via the University District with stops in Fremont and Wallingford makes more sense than building a bridge and going through Interbay. It could be built quickly and would reduce east-west traffic. An eventual route through Interbay, Lower Queen Anne and Belltown could then be added as a draft proposal.</p> <p>While I fully support</p>
NORTH KING COUNTY	<p>1) For transit to Redmond and Issaquah, I'd rather see rapid buses than light rail. (to cut cost and get it going faster) 2) I would like to see ADDED to the plan... more BIKE parking at rail and bus stations.</p>
NORTH KING COUNTY	<p>I think the Ballard project shouldn't use surface, a tunnel was 5 min faster. We need separated light rail from the roads.</p> <p>I also thought a connection from Ballard through to UW should have been included</p> <p>That and the timelines suck. In 20 years I can use light rail to Ballard or west Seattle?!</p> <p>Frankly this project seems to extend to suburbs like Issaquah? And not even serve the core of Seattle</p>
NORTH KING COUNTY	<p>A UW-Ballard line should not be at-grade. It should either be a tunnel or raised. Also the timeline to complete all the lines is unacceptable. 7 years of environmental study sounds way too long.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	I support the plan. However, I would have hoped that more of the investment would have gone to Seattle, which needs light rail the most. To me, it would have made more sense to fully expand the Seattle system first, with east-west lines and more stops before expanding light rail to places that really don't need it yet. However, politically you have to give the voters what they want, and it makes sense to spread the light rail wealth around the region when the whole region is asked to pay for it. Sooo yaa that's life eh
NORTH KING COUNTY	I can't comment on the regional lines very much since I seldom go to those places. I strongly support connecting Ballard and West Seattle by grade-separated. Given what I've read about the Ballard-SLU-Downtown plan I cannot support ST3 in its current form because it contains at-grade elements.
NORTH KING COUNTY	Finish the studies for NE Seattle/Kirkland/LCW/Ballard first and don't add Ballard/UW until these studies are finished. 2nd Add more Sounder service.
NORTH KING COUNTY	22 years for Ballard.. really???
NORTH KING COUNTY	Too much focus on art installations and opulent features are driving up the cost. Stop wasting our money!!!
NORTH KING COUNTY	I'd personally like to see light rail to Ballard and Redmond prioritized with bus rapid transit filling gaps on other areas until "non-core" rail is extended later in the plan.  When reading a lot of the arguments at the end of the survey, the ones that are alarmist rather than factual really turn me off and I see a *lot* of statements like that in the voter pamphlets
NORTH KING COUNTY	I'm so excited about the ST3 plan. However, the timetables for completion of light rail to Ballard and West Seattle are unacceptable. It seems to me that this plan is putting the priority on getting light rail to the suburbs, rather than expanding it in the dense urban core where it would get the most use. I really hope Sound Transit makes some modifications to this plan before it is put before voters in November!
NORTH KING COUNTY	I will not vote for a bad plan that has more at-grade light rail within Seattle city limits, and a drawbridge connection to Ballard, and somehow still manages to take 25 years. Full stop.
NORTH KING COUNTY	I feel the projects in our urban core should have priority over suburban expansion.
NORTH KING COUNTY	The Executive of King County always mentions equity and social justice. Is it equitable for the residents of Rainier Beach, Skyway, and Renton to have 1 or 2 bus options, but West Seattle, Ballard, and Bellevue to receive light rail. It's feeling like the rich getting richer and the poorer neighborhoods being left behind. Again.
NORTH KING COUNTY	I am a big transit advocate but ST3 is flawed. We should prioritize density (Ballard, Ballard to UW, West Seattle) and only afterwards expand outwards as density in the outskirts catches up with the denser center. ST3 does exactly the opposite, which is surprising. Connecting Bellevue and Redmond makes sense because they are big employment centers, but Everett? Lynwood? Capitol Hill, UW are a huge success because the density is there, some south stations are not for the same reason. Many transit advocates (myself included) will vote ST3 in its present form in the hopes that they can vote for a more rational plan next year.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	We need light rail in West Seattle MUCH sooner than 17 years! We have had a ridiculous amount of growth, and transit options aren't keeping up. Trying to get onto I5 North from the WS Bridge is a frustrating experience any time of the day.
NORTH KING COUNTY	Light rail in Seattle needs to be the priority. It needs to be completed earlier, there needs to be more of it, and it needs to be higher quality. Ditch funding for parking lots and let local areas fund park-and-rides for their residents, so more transit money can be put toward an excellent transit system. Make extensive suburban expansion the lower priority/completed further in the future.  Ballard to Downtown cannot be at-grade, bogged down in traffic and susceptible to the moveable bridges in the summer. If huge ridership is expected on that line, it should be the highest possible quality. This line needs to be built first, to take care of the existing massive need.  Additionally, the Ballard to UW should not be a "future investment study" but should be included in this plan.
NORTH KING COUNTY	Ballard light rail should come much much quicker.
NORTH KING COUNTY	Rail to Ballard is the most important piece of the package and should be expedited.
NORTH KING COUNTY	I would like to see how some of these spurs will connect. the Light rail to Ballard just seems to dead-end and not connect to anything else. Plus it seems redundant with the BRT through Ballard.  there are no high speed/capacity lines linking W Shoreline, Shoreline CC, Edmonds CC. Seems like a missing piece. (I'm sure there will be connector lines to the light rail line?)
NORTH KING COUNTY	We need to pick one flagship project in each region and get it done in the 8 year time frame. My suggestion would be drop Seattle to Ballard and use UW as a transfer station to get it done faster. Build Tacoma to TCC, etc. Retime the plans to get some wins in early and reduce the time to build shock. Also.busses aren't reliable no matter what you do, stop supporting them, I.sit right next to them in traffic and laugh. We need true grade separation. Reliability is the most important thing. I need to be able to predict my commute with precision otherwise, its worthless to me.
NORTH KING COUNTY	Ditch Paine Field. It's not worth the added cost; your studies projected no additional riders compared to an I-5 allignment. Try to find a way to speed up the timelines. Prioritize Ballard over West Seattle; there's more ridership there. Add provisional lines to the project: Ballard to UW needs to be a priority, and West Seattle should be extended at least to White Center (if not Burien) for equity reasons. It's disappointing that Seattle, the part of our region that uses mass transit the most and is our region's primary destination, is receiving so little of the \$50 billion pot. The ridership is here, not in Paine Field.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>What about elevating light rail rather than tunneling? I've read that elevated rail is faster and cheaper to build. People don't mind the monorail and in fact voted to extend it several times. Consider elevated rail to Ballard and West Seattle to speed up those projects.</p> <p>I'd also like to see light rail access to the Greenwood and Greenlake neighborhoods.</p> <p>Love the dedicated shoulder of the highway idea for BRT. BRT will only work if it can completely avoid getting caught in traffic. (A bus coming every 6 minutes doesn't help you any if after that you just sit on the highway for an hour.) Please push hard for dedicated transit lanes. That would be an amazing victory!</p>
NORTH KING COUNTY	<p>West Seattle project for light rail needs to finish significantly quicker than "within 17 years". The West Seattle bridge is already beyond capacity on a daily basis and with the amount of large apartment/condominium complexes being built it will become the worst traffic in the region if something isn't done soon. Look at how quickly population growth has hit certain districts of Seattle and not just population growth as a whole.</p>
NORTH KING COUNTY	<p>This timeline associated with ST3 plan as put forward is too far out in the future to support us NOW. We needed light rail 10-15 years ago. If our city needs to do one thing is to get these lines built faster and to relieve the stress on our roads. I would use a train daily if I had it. As I have in every other city I have lived in. Seattle is in the dark ages considering their delay in implementing this plan. We need it sooner to be effective.</p>
NORTH KING COUNTY	<p>The west Seattle and Ballard routes seem way more important than the other projects because of their impact on Seattle traffic. Those communities need that access as soon as possible, 17 years is way too long to wait!</p>
NORTH KING COUNTY	<p>I LOVE light rail and am an ardent supporter of it, but light rail from Ballard to downtown (and preferably to the U District as well) MUST come sooner, if not as the first priority. I will not support a plan that brings light rail to this very dense neighborhood in 22 years.</p>
NORTH KING COUNTY	<p>I am disappointed with the plan in a few respects. Right now I fear the plan is not supportable by Seattle voters.</p> <ol style="list-style-type: none"> <li>1) The Ballard timeline should be expedited as much as possible. This is the highest impact project; waiting this long to complete it is totally unjustifiable.</li> <li>2) The Ballard line should be grade separated the entire way. Putting it at grade risks the long term reliability and speed of the system, making the investment much riskier.</li> <li>3) Commit to fully funding the EIS for Ballard to UW. This east west line serves two very dense neighborhoods, adds Fremont to the light rail system, and runs along a corridor that's horribly congested. Having an EIS completed would allow it to be built if more funding becomes available.</li> <li>4) Build the 130th St Station sooner. Why wait so long to build a station that's on an existing line?</li> <li>5) Consider removing the Paine Field extension in order to expedite the north end of the spine. People are rightfully upset that the extension is adding 10 years to the timeline of completion.</li> </ol>
NORTH KING COUNTY	<p>Ballard Light Rail should come sooner than 22 years. This should be one of the first projects.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	This need plan needs to be off grade. All transit should not be beholden to car traffic. It should happen everywhere and faster.
NORTH KING COUNTY	<p>There should be NO or extremely limited at-grade rail within the city of Seattle. We cannot be stuck with a flawed system forever. We deserve the right transit system. No drawbridges or anything else that would add ridiculous unpredictability and delays to light rail schedules.</p> <p>What about Fremont and Wallingford? There is serious need for more Seattle infill projects. Ballard to UW, Ballard northward, south from West Seattle, etc.</p> <p>I also doubt lines like the proposed one to Issaquah are practical. How many people in some of these places would use light rail? I think that some of that money will be better spent in Seattle. But I am pleased to see some focus on areas with lower-income people and minorities. That is important to allow people to commute to the city without a car.</p> <p>ST3 needs a focus on more properly-designed Seattle lines! No half-baked designs with surface-grade portions and ridiculous drawbridges.</p>
NORTH KING COUNTY	<p>I believe reducing the number of cars on the road within Seattle city limits will have a ripple effect throughout the entire region. Its imperative that West Seattle and Ballard get light rail sooner than 20 years from now. 10 years would be more reasonable. Push the smaller projects back and put the money and effort into where light rail is needed the most...West Seattle and Ballard.</p> <p>I would also like to see money for studying a line from Ballard to UW and a line from downtown to SLU, up to Capitol Hill, and down through the Central District. In the future, Seattle could then try and build those on its own.</p>
NORTH KING COUNTY	Ballard light rail should happen earlier.
NORTH KING COUNTY	I agree with Seattle Subway organization whole-heartedly. Seattle is the heart of the system, it needs a much bigger focus. Ballard should be grade-separated, Seattle projects should finish sooner, and additional lines like UW to Ballard should be included as provisional (not just studies). Without a sufficient network within Seattle, the whole system is undermined. Aim high!
NORTH KING COUNTY	The time frame is unacceptable. Traffic is horrible now! We don't have 20 plus years to wait. Why is Graham Street Station construction put so far off into the future? We voted in Seattle for some funding to help. Find creative ways to do it sooner. I have voted for every transit oriented ballot initiative since I moved here in 1995. The plan as stands is unacceptable. Regrettably, I will vote no.
NORTH KING COUNTY	By your own admission, West Seattle and Ballard are two of the most dense neighborhoods in Seattle. Why are they the LAST to receive light rail?!?! Please move those lines up on the priority list.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>We need a much larger focus on Seattle. There is no other organization working on an urban rail transportation system within the city itself, so we need to make sure that ST3 is doing as much as absolutely possible for the city of Seattle.</p>
NORTH KING COUNTY	<p>As it stands now, I find the ST3 proposal very unpalatable for commuters and tax payers like myself. I think that the the Seattle Subway revisions need to be included in the measure for the region to get behind it.</p> <ul style="list-style-type: none"> <li>-remove any at grade/shared lane proposals (we don't want another MLK way south)</li> <li>-expedite ALL schedules</li> <li>-simultaneous Ballard-UW and Ballard-Downtown line construction (We need this ASAP)</li> </ul> <p>We are all willing to pay more for a system that works!</p> <p>Thank you,</p>
NORTH KING COUNTY	<p>Politics is politics, and I'm sure the board (and staff) has weighed the utility of the system against the need to make sure suburban communities feel that they are getting something for their tax dollars, but the reality is that by sheer numbers it will be denser communities using this the most - places like Ballard, West Seattle (hopefully) and Bellevue. To that end, ST3 shouldn't make sacrifices to the quality of its service in the urban core in exchange for concessions to far-flung communities (DuPont, Orting) that have little utility. People in those areas aren't likely to vote for this in the first place, and throwing them a bone by giving them a "study" isn't going to sway many of them.</p> <p>I also have concerns about the amount earmarked for parking - this might be a necessity in some suburban stops, but any stations located in reasonably dense areas (Bellevue, Issaquah, Redmond, etc.) should prioritize biking/walking/transit connections.</p> <p>In my opinion, this plan makes too many early concessions to suburban legislators. There was bound to be some of that during this process, but by baking so much of it into the plan from the outset, ST3 doesn't start from a good negotiating position. A more urban-centric draft plan would have allowed concessions to be made to suburban politicians (giving them the "I fought to make this better for the suburbs" optics that are their primary motivation) and allowed us to come to a middle ground. This starts on that middle ground and I fear it could be watered down further.</p>
NORTH KING COUNTY	<p>No at-grade light rail in dense areas. Mass transit expansion can not impede vehicular traffic or it will backfire heavily. Build light rail elevated or underground, especially to Ballard.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Please work on improving the frequency of the E line. I live 3 blocks from the 45th st stop, and I rarely take it. If I try and take the bus to downtown during morning rush hour, I usually have to wait for 2 or 3 buses before I can get on the bus, because it is so full. It has given me a bad taste for all the rapid ride line, which is why I don't really support adding more of them. I would be much more supportive if I didn't have to wait for multiple buses just to get to downtown. Missing 1 bus once a month because it is full is one thing, missing 3 buses at least twice a week because they are too full is not cool.
NORTH KING COUNTY	We need light rail and a train system NOW! Not in 25 years. This timeline is ridiculous, I am in full support of public transit, but this timeline is already behind the current need.
NORTH KING COUNTY	<p>A) 22 years for completion of light rail to Ballard is ridiculous and will likely cause this measure to fail. Of all the projects Ballard to Downtown is crucial for removing vehicles in the densest areas of the city and should be the first phase and completed on a quicker timeline.</p> <p>B) Absolutely NO new light rail should be at street level. It does nothing to relieve congestion having rail at street level it is absolutely idiotic to consider it. Light rail to ballard or west seattle need to be above grade or in tunnels</p>
NORTH KING COUNTY	I live a 1/2 mile from the newly opened Capitol Hill Station and work in the north Ballard area, near 105th and Greenwood. I ride a bike to downtown, catch an E Line bus, exit at 105th and bike the rest of the way. I then bike home in the evening. The light rail segment to Ballard could open tomorrow, and though I SHOULD be a prime candidate to use that line, I would continue my current commute. I will be voting against ST3 if the Ballard line continues to be planned at grade through Interbay. I do not think at grade light rail would be as reliable as the E Line heading northbound in the morning.
NORTH KING COUNTY	Keep the Ballard line totally separate from traffic - needs to be grade-separated and traffic-proof the whole way or it may as well be a bus.
NORTH KING COUNTY	<p>Expedite construction - with all of the people and congestion in the area, it is ridiculous that we would have to wait 20+ years for a complete transit system that is already long overdue. Expedite the construction of light rail in Seattle.</p> <p>Any new light rail lines should be fully grade separated.</p>
NORTH KING COUNTY	Taking 22 years to build an at-grade line to Ballard is terrible. Having it go over a drawbridge, even if it only opens during off hours, is going to make people much less likely to take that line which is dearly needed. A grade separated line for that portion is essential to encouraging ridership which is more costly and takes more time, yes but if the timeline is 22 years, I don't see it as insurmountable.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	The light rail expansion to Ballard should be completed within 8 years and removed from at-grade. This transit will be taking up a corridor that is already at its breaking point and will need to be Below-grade (Preferred) or above-grade. Current transit from Ballard is just as fast as walking which is never a good sign. So what will adding more traffic, buses, and trains do to make that time less? Give us a system that can be used for the future, by the time this line is finished it will already be obsolete and useless. Don't waste tax payers money and do it right.
NORTH KING COUNTY	Ballard absolutely must be moved up in the timeline. We need to get cars off the roads in the city, create mobility within Seattle, which will spur more housing and denser building, improving affordability--meanwhile we can expand BRT and push the legislature to improve HOV and tolling for highways like 405.
NORTH KING COUNTY	We need all of this as fast as possible. I understand there are limitations regarding collectible taxes and borrowing, but we need rail service across more of Seattle today, I can't imagine how far behind we'll be when we finish it in 25 years.
NORTH KING COUNTY	I am stunned that Sound Transit ("ST") will take so long to build the Ballard and West Seattle lines. Seattle needs rail extension sooner, not later. These lines get better ridership numbers than the suburban lines. I was also surprised to see that the Ballard to UW line is missing. It should have been included or at least a full study and plan should be funded for that line. What happened to the elevated option for Ballard? At-grade tracks will get stuck in traffic snarl. The plan for Seattle is disappointing. If Seattle has to wait years to get Ballard and W. Seattle light rail, people will vote it down. ST needs to reform the plan. Prioritize getting the Seattle lines completed.
NORTH KING COUNTY	Link within Seattle should be fully separated from traffic and should not run on grade. Also, people can't wait for 20+ years to get to SLU or other dense and crowded neighborhoods.
NORTH KING COUNTY	In general this is very expensive, considering how far out the project completion dates are, and could use some cost reductions
NORTH KING COUNTY	This plan seems to be about connecting various suburbs to each other. I'd much rather see a plan that improves transit in the most dense parts of the metropolitan area, making it work better where it already exists. I'm not convinced that connecting the center of each suburb to the system will get people to leave their cars at home. If you concentrate on the areas that already have people planning on leaving cars at home, those areas can grow and influence the rest of the city over time.
NORTH KING COUNTY	Please reconsider a Sounder station at Golden Gardens/Ballard
NORTH KING COUNTY	The Station at 130th should be included; it should not be provisional.
NORTH KING COUNTY	Ballard is getting the short end of the stick.
NORTH KING COUNTY	<a href="http://seattletransitblog.com/2016/03/31/how-to-fix-st3-so-seattle-will-vote-for-it/">http://seattletransitblog.com/2016/03/31/how-to-fix-st3-so-seattle-will-vote-for-it/</a>
NORTH KING COUNTY	I would be much more supportive of a plan that invests in LIGHT RAIL solutions and delivers LIGHT RAIL solutions more quickly, even if the fees for doing so go up. We need to invest more and invest faster, in a comprehensive LIGHT RAIL solution. We can't wait 25-30 years.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>Lightrail connection to ballard should be a TOP PRIORITY and should be completed first, whether through a direct connection to downtown, or the Ballard Spur to the university district.</p> <p>The project that has been referred to as the Metro 8 Subway should also be prioritized. We must get people moving WITHIN the city out of automobiles reducing overall congestion.</p>
NORTH KING COUNTY	<p>Overall, the timing of the light rail projects is way too far out. A middle-aged voter that works in Seattle will be retired before they could get to Ballard on the light rail in the draft proposal and even when that voter is in retirement trying to get to Ballard on light rail they'll be at the whims on what's happening on surface streets because the light rail in the proposal isn't grade-separated.</p>
NORTH KING COUNTY	<p>Ballard to downtown Seattle should happen much sooner! And be completely grade separated.</p>
NORTH KING COUNTY	<p>Complete Ballard and West Seattle first.</p>
NORTH KING COUNTY	<p>Ballard light rail should happen much faster (particularly with Expedia adding cars to the road in Interbay) and should not be at grade.</p>
NORTH KING COUNTY	<p>The heaviest use projects in the most congested areas should be vastly accelerated. Ballard and West Seattle, above all other projects, need to be delivered ASAP.</p>
NORTH KING COUNTY	<p>22 years to get light rail to Ballard is RIDICULOUS, as is lack of UW-Ballard light rail. This plan prioritizes the sprawling suburbs at the expense of our fastest-growing, most dense urban neighborhoods. We need fully grade-separated light rail in the city, and we need to build it fast.</p>
NORTH KING COUNTY	<p>It is completely unacceptable for Ballard and West Seattle to wait two decades for light rail that isn't even grade separated. Those lines will have more ridership and have more density than any line to the suburbs. I really support transit and I use it frequently, but will vote against this and save my money if you won't be able to give me more light rail in Seattle before I retire.</p>
NORTH KING COUNTY	<p>more consideration for how projects could be delivered faster</p> <p>exclusive right of way for trains and buses, enforcement of minimum speed requirements for HOV lanes, ie minimum HOV vehicle occupancy from 2 to 3 or if necessary BUS ONLY</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>I am astonished to see the incredibly poor investment in light rail that is being made to Ballard and West Seattle from downtown.</p> <p>On grade systems have been demonstrated to be unreliable, unattractive, and ultimately unsuccessful in promoting Rapid Transit use. Witness the Seattle streetcar and South Lake Union trolley both of which have lackluster ridership and poor performance in regards to schedule and timeliness. And now the South Lake Union trolley is being redesigned to be separated from traffic at enormous cost.</p> <p>We must invest in the highest quality rail completely separated from traffic between downtown and Ballard as well as between downtown and West Seattle. Bus rapid transit, despite many promises has not received the investment that was originally scoped and has not met expectations particularly along the D-line which is overcrowded and under supported. Further investment in bus Rapid Transit would be a mistake given that it is a half-measure solution rather than a full one. Projected ridership on the Ballard to downtown light rail line is enormous and will completely cover farebox revenue. It is a self-supporting extension and it is inconceivable and inexcusable that Sound Transit has elected to support such a demonstrably bad and poorly designed extension to Ballard knowing that the demand is so high.</p> <p>It is additionally confounding that the timeline for construction on the most popular extensions of light rail are the longest while outlying areas are prioritized. Particularly areas that have not supported Light Rail extension in the past and will not support adequate farebox revenue in operation as routes to West Seattle on Ballard would; making them more costly to operate while also less effective at reducing congestion.</p> <p>I frankly cannot support this plan without a greatly accelerated timeline for construction of a high-quality fully separated light rail system between downtown and Ballard and downtown and West Seattle. Unfortunately, I would rather see the entire plan scrapped and start from scratch than support this plan in its current form.</p> <p>Sound Transit is full of smart people and more than a few engineers. These criticisms are surely a surprise to the good people who work there. Please make the right choice and create a plan and a construction schedule that will allow people to ride the rail before they die on a system that does not compromise with poor solutions like on-grade rail to low-density areas.</p>
<p>NORTH KING COUNTY</p>	<p>22 years to complete light rail to Ballard is ridiculous. Start from the core, where the need is greatest, and work out to outlying communities.</p>
<p>NORTH KING COUNTY</p>	<p>Ballard needs to be prioritized. Over 20 years for a light rail system we separately need now? This plan needs reworking.</p>
<p>NORTH KING COUNTY</p>	<p>Prioritize Ballard and West Seattle and instead of taxing everyone, tax those that use the service to pay for the plan.</p>
<p>NORTH KING COUNTY</p>	<p>25 years to finish Ballard line is absurdly long.</p>
<p>NORTH KING COUNTY</p>	<p>The timeline is too long!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Prioritizing the suburbs over a line to Ballard is not acceptable. Currently the draft plan calls for an at-grade (competing with existing traffic) line from downtown to Ballard to be completed by 2038, after virtually everything else in this plan. It needs to be grade-separated, and finished MUCH sooner than that. ST3 will be on the ballot this November and badly needs to pass, but for that to happen, Seattle residents need a reason to vote for it.
NORTH KING COUNTY	Light rail to Tacoma / Everett is duplicitous with heavy rail, and overlays a mode best suited to dense urban environments onto suburban areas with a mere hope for new density. Increasing service schedules on heavy rail, with more frequent, higher capacity service, allowing for large garaged park and rides at the existing stations (the people of Snohomish and South King / Pierce counties will never rid themselves of cars) is a MUCH better use of funds with more realistic expectations and a better allows for a concentration of light rail in truly urban cities (Seattle and Bellevue.) (NYC and NY's Hudson Valley (MetroNorth) service as an example.)

NORTH KING COUNTY	<p>A few things - I FULLY support Sound Transit and am ready to pay up the nose for it.... IF.... Sound Transit provides a world-class, high quality system. Right now... I'm extremely hesitant.</p> <p>Ok... lets get real. Things I believe Seattleites DESERVE (and NEED to see):</p> <ol style="list-style-type: none"><li>1. Expedite this process.... 25 years?? I just graduated from college. My own KIDS will be in college by the time construction would be complete. Please consider projecting more optimistic timelines and prioritize SEATTLE AREA transit (West Seattle and Ballard and the Ballard--&gt;U-District Link. I believe it would be far better to prioritize quality over quantity... getting a top notch, high quality system in the central heart of Seattle... rather than to spread Sound Transit too thin and wait too long. We both know you can shave off a few years... those are very conservative estimates. Your biggest problem will be passing the bill... just ride the good publicity you have now and get-this-bill-passed!!</li><li>2. ZERO and I mean ZERO 'at grade' transit lines. Lets have actual standards. We either go big and do this thing RIGHT or forget the whole thing entirely. The ENTIRE POINT of transit is to be underground and NEVER STOP AT TRAFFIC LIGHTS. Do we want to be a world-class metropolitan city? Or stumble among the mediocrity of cities like Boise, or Spokane? We can aim for NYC, London, San Fran kind of transit. It will pay off in dividends later. What's the point of light rail if car traffic still snarls it? Its practically a streetcar at that point. And we all know how fast those go on Broadway. This means absolutely no drawbridge for the Ballard line.</li><li>3. Also, please provide complete funding of an Environmental Impact Statement (EIS) for the extensions from Ballard to UW and from West Seattle to Burien, and add both lines as "provisional projects" if additional funding becomes available. That could shave 6 whole years off a future project timeline should funding become available (as I'm SURE it will). And fund studies for future lines... gotta plan ahead. Especially the crosstown, East-West line between Ballard and U-District.... even a possible Ballard to Northgate line.</li></ol> <p>OVERALL my main beef is this: why are we not prioritizing Seattle's urban core? Do we really want to incentivise growth in Issaquah? Why don't we focus all this transit oriented development in the inner city core? You build it, people will come. Please consider how building more lines with more interconnections with tighter proximity to each other makes for more viable, high quality transit connected neighborhoods. Fitting and connecting more transit lines within a smaller geographic area will create a FAR more dynamic and successful system that people want to actually ditch their cars for... in more concentrated dense neighborhoods close to the urban core.</p>
-------------------	--

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>The biggest issue I have is the length of time it's taking to done. Traffic is continuing to worsen and prices in the city are rising too much. I grew up on the east coast and have lived here almost 10 years - it's still mind boggling to me that Seattle doesn't have much of a public transit system.</p> <p>I've looked at taking the bus from Green Lake to Boeing Field to get to work - it'll take a minimum of an hour. I'm moving in about 3 weeks to West Seattle. However, that will also take at least an hour on the bus.</p> <p>Why not add more bus transit centers so there are more direct routes? If I can drive to work on my own faster, what is the incentive for me to switch to using transit?</p>
NORTH KING COUNTY	West Seattle and Ballard parts of the plan should be completed earlier in the schedule.
NORTH KING COUNTY	<p>Connection through Seattle should be a priority via light rail. If we build transit coming into seattle, but have our current late, unreliable bus service to move people around the city, people won't take it.</p> <p>We also need to look at replacing the metro 8 bus with light rail. That would help clear up traffic through SLU by adding that connection</p>
NORTH KING COUNTY	Decrease the time for the Ballard and West Seattle line. Include UW -Ballard line.
NORTH KING COUNTY	The Ballard line, has the highest projected ridership by far, and should be completed sooner. Additionally, it should not be built below grade for the whole line.
NORTH KING COUNTY	Do it all at once, 20 years is too late.
NORTH KING COUNTY	17 years for light rail is unacceptable. Those of us in mid career will be retiring by then. Make light rail a priority and complete this asap
NORTH KING COUNTY	I strongly believe the downtown Seattle to Ballard line should be given priority in this plan. There is HUGE ridership. Waiting until 2038 is unacceptable.
NORTH KING COUNTY	Light rail to SLU/Queen Anne/Ballard should be completed sooner than currently proposed.
NORTH KING COUNTY	ST3 needs to put Ballard on the map first. Get the most ridership first. Lines into Redmond are going to be fancy dressing compared to the workload of a heavily used line.
NORTH KING COUNTY	<p>Questions about Bellevue to Issaquah:</p> <ul style="list-style-type: none"> <li>- Can the line start at the S Bellevue Park &amp; Ride instead of Wilburton? This plan looks like it's creating a lot of redundant N/S track parallel to the ST2 line.</li> <li>- Does the ridership justify the costs?</li> </ul> <p>Link from Ballard to UW via Wallingford</p> <ul style="list-style-type: none"> <li>- Why not? This would finish a beautiful, efficient loop.</li> </ul>
NORTH KING COUNTY	Ballard light rail needs to come faster, this corridor will only get worse as the region expands.
NORTH KING COUNTY	Grade Separated Ballard to Downtown should be priority.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Complete Graham St station now. It was on the original plan 20 years ago. Please don't make us wait another 20 years. Please improve service in urban areas before the expanding to suburban areas.
NORTH KING COUNTY	Timeframe needs to be sooner with vision for future plans like completing environmental reviews so projects can get moving when finding is received
NORTH KING COUNTY	<p>Seattle will be footing the VAST majority of this bill. Inter-Seattle transit needs to be heavily, HEAVILY, prioritized. Downtown is expected to have huge residential and corporate growth, with apartment and condo towers sprouting near Columbia Tower (4C), First Hill, SLU, and more. Downtown is where people are going, serve their travel in the city, then worry about the suburbs.</p> <p>Expedite the construction of light rail in Seattle 22 years to Ballard?! 15 to West Seattle?! That's insane. First, Ballard, by every metric, should be first. Secondly, they should be started immediately, the first priority for ST3. Let's go for 5 years -- at the outside. I'm not voting for something 22 years down the line at \$50 billion.</p> <p>Make Ballard to Downtown fully grade separated Anything else is saddling Seattle with a crappy version forever. This is short-sighted and immensely stupid. Grade separation or what's the point?</p> <p>Add Ballard to Eastside or at least UW station East/West lines, for the love of God. Going North/South in this city isn't too bad, West/East is a nightmare. Connect your stations.</p>
NORTH KING COUNTY	<p>Light rail to Everett and Tacoma is less useful then light rail between dense Seattle neighborhoods.</p> <p>Since few people are likely to live within the walkshed of suburb stations, ridership is constrained by parking availability and likely to mostly improve commuting only. Light rail in Seattle facilitates all-day travel and changes peoples' lives.</p> <p>Prioritizing the timeline for Ballard and West Seattle is better than building "the spine" to places that are currently better served with express buses. Tacoma-Seattle is likely to be SLOWER on light rail than the current 59x series. Bus service to Paine Field has proven to be under-used. In contrast, buses that run every 10 minutes are full between Seattle neighborhoods.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>Consider connecting NW and NE Seattle via light rail (Roosevelt to Green Lake, Fremont, Ballard). Making all transit go through downtown encourages the hyper development of downtown and SLU without encouraging business districts in other neighborhoods to thrive. Why is Google moving out of Fremont? Because the system only encourages them to further concentrate their business in the downtown area.</p> <p>Diffusing the business district and making all neighborhoods more interconnected will do more to diffuse traffic than expanding to regions that 1) rely heavily on cars and I have doubts that transit will change that in a meaningful way and 2) have not contributed much funding to transit expansions so far...so why do we think they will kick in money now? We need federal and state funds! As a Seattle property owner, I'm sick of funding our transit system in this haphazard way. At some point you need to consider the financial sustainability of your approach. We're already asked to keep our education system afloat even though that's the state's responsibility. Give me an income tax already!!!!!!</p>
NORTH KING COUNTY	<p>Having at grade light rail between Ballard and Downtown completely cripples this project and will leave us with a transit system paralyzed by the same traffic it purports to remedy. Furthermore, projects in Seattle should be prioritized over projects in far flung suburbs where cars are necessary despite transit options. We need good transit to Ballard and West Seattle that are fully grade separated and therefore fully reliable. We also need more east-west routes; a study of Ballard to U-District line should be funded in this project. It will be difficult for me to vote for a project that has light-rail running at-grade that takes two decades to get to Ballard and West Seattle.</p>
NORTH KING COUNTY	<p>Allocate less money to building parking garages, and instead use that space to build dense housing around new (and existing) stations. Allocate more funds to ensuring people can SAFELY walk and ride bikes to light rail stations. Connecting Ballard needs to be done *now*, not in 22 years. All BRT projects need dedicated right-of-way.</p>
NORTH KING COUNTY	<p>The timeline for light rail expansion to Ballard and West Seattle and in-fill stations is too long. ST3 should focus on building out the lines closer to the core urban areas first and get them done sooner. The lines currently traverse large stretches with no stations like Boeing Access Road that could serve more riders if there was a station without building more lines. South center could better be served with a Boeing Access Road station. Instead of light rail to Tacoma and Everett and Issaquah, focus on better and more frequent Sounder rail service and BRT to those areas, and better connections of Sounder to light rail. Currently the only transfer point is downtown Seattle whereas Boeing Access Road is a potential transfer point as is Ballard.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>The 130th St. Station and connector bus between Lake City Urban Hub and Bitterlake urban village needs to be funded. Without this station, Lake City will be marooned, bypassed by the SR 522 BRT service from the east side that turns west on NE 145th St. Economic development will be nipped in the bud. (Notice that there is no enhanced service in NW Seattle north of Ballard.)</p> <p>The City of Seattle cannot create a new urban village at 130th St. in the Comp Plan for a station that is not funded. These are 100% SF homeowners. You are creating an impossible level of uncertainty in zoning.</p>
NORTH KING COUNTY	Ballard to downtown and Ballard to UW should be priority.
NORTH KING COUNTY	The Ballard to Downtown corridor should follow the C-01c route or I will vote no.
NORTH KING COUNTY	These projects should be sped up as much as possible. We shouldn't have to wait 8-25 years for projects to finish.
NORTH KING COUNTY	I want to see a greater focus on the downtown center of Seattle, rather than on suburbs and other cities like Tacoma. The city will be better off with higher urban density.
NORTH KING COUNTY	Do Seattle to Bellevue to Redmond FIRST (Light Rail), all others can wait.

<p>NORTH KING COUNTY</p>	<p>I'm disappointed about the 'sprawl' of the entire system. I understand it's a regional system, but this package is very heavy at the very outer reaches (and not in a way that fosters local transit-oriented development in say Issaquah or Everett. My fear is that Seattle in particular will need gold-standard BRT well before the system is completed and I think high-quality bus could be used to improve many parts of this plan. The diversion of light rail to Boeing field seems particularly expensive for the riders gained and the time lost. A high quality BRT would provide more stops in the area, create better local service and save money. Issaquah may also be better served by dedicated-lane BRT than a light rail extension. I can already see the benefits of the recent upgrades to the RapidRide C downtown as well as in West Seattle. As far as parking, I fear that a lot of the parking will be obsolete by the time it is built. In particular the 522 BRT would be better served by transit-oriented development, bike share and transit access, and eventually by self-driving ride-share such as the La-Rochelle CityMobil2 system.</p> <p>I do think that significant Sound Transit sponsorship of Pronto expansion (particularly with electric bikes) would be important to helping bike and pedestrian access to the stations. Even Northgate will be very accessible with electric-assist bicycles. Sound Transit should support ORCA integration with bike share. Something like that would lessen the impact of significant problems like the I-5 routing, the lack (or significant delay) of the 130th street station and the routing of 522 BRT on 145th street instead of 130th street via Lake City. Early sponsorship would significantly ease the bike crowding at the ULink station. Sponsoring Pronto expansion to the RapidRide C and D lines (along with significant capital improvements to help their speed) would lessen the blow of the long delays in implementing the system. This sponsorship would be pennies on the dollar compared to building or moving the schedule around. It might not help sell ST3 on the ballot, but the gold-plated BRT plus bike share combo is pennies on the dollar compared to Park-and-Rides. People will use it because you don't have to commit to a transit-oriented lifestyle (you can live a mile or more away from the transit hub) or a biking lifestyle (you don't need special gear for a 10-minute ride). At the very least make the P&amp;Rs accessible by bike so people can buy their own e-Bikes, but also have ORCA-connected bike lockers. Northgate fails on this as it has lockers, but unnecessarily poor bike access. It should have green-painted protected bike lane access to major bike routes and neighborhoods. The nearest safe bike routes passing Northgate literally have 'no turn' signs rather than 'this way to Northgate'</p> <p>Some inspirational BRT, bike and automated bus videos:  <a href="http://www.policyinnovations.org/ideas/video/data/000371">http://www.policyinnovations.org/ideas/video/data/000371</a> - BRT + bike share success.  <a href="http://www.citymobil2.eu/en/News-Events/News/BBC-video-on-CityMobil2-in-La-Rochelle/">http://www.citymobil2.eu/en/News-Events/News/BBC-video-on-CityMobil2-in-La-Rochelle/</a> - self-driving local bus to BRT.</p>
<p>NORTH KING COUNTY</p>	<p>Light rail NEEDS to be the priority. I would STRONGLY support delaying or doing away with the improvements for general bus lines to have a complete light rail system sooner. 22 years to get it to Ballard? Not acceptable. Almost 1,000,000 additional people and we still wouldn't be able to move about Seattle much less the metro region in a reliable and efficient fashion.</p>
<p>NORTH KING COUNTY</p>	<p>Ballard should be completed before eastside, not a generation from now, considering its ridership will be larger. Focus on commuting in the city of Seattle first then expanding to North and South, then Eastside last.</p>
<p>NORTH KING COUNTY</p>	<p>Please prioritize Ballard. Twenty-two years is too long to wait. Thank you.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	I can't support at grade development through Seattle. The Ballard line can not have any intersections with cars or pedestrians, the line through Rainer valley is a mess, I can't support that happening again.
NORTH KING COUNTY	I think you should prioritize the Graham Street Station and move it up in the timeline. the track is already built and it would not be that big of a project and it would help economically revitalize south seattle, which is a historically underserved part of our city
NORTH KING COUNTY	Ballard and West Seattle should be much sooner on the timeline. Also Ballard to UW (by way of Fremont and Wallingford) is very important.
NORTH KING COUNTY	The expansion of light rail to ballard needs to be grade separated. If not, I'd rather just have more bus rapid transit with bus lanes, what the hell is the point of being on a train and stopping for street red lights? I also think that Ballard light rail should be a higher priority than West Seattle, given that the projected market in Ballard is larger. The fact that West Seattle comes first seems a reflection of the fact that our King County Executive is from West Seattle.
NORTH KING COUNTY	I understand that rail and light rail can't service every part of our region, and that buses are necessary. However, I feel we're already too reliant on buses and need to prioritize rail. Working downtown, I can tell you A LOT of the street congestion is caused by buses, especially articulated buses. I see it every day — buses blocking intersections, closing off lanes when they get stuck on a turn. We're an hourglass in shape with little room to expand our roadways. We need to think differently. Rail, light rail and streetcars are a much better method for efficient transit, and alleviating congestion on roads in our region. And please, add parking to the rail stations. This was a huge miss. Not everyone lives within walking distance of a station, or may be elderly or disabled and it's not practical for them to walk to a station.
NORTH KING COUNTY	The eastside is growing too fast not to make Issaquah expansion a high priority. That should be higher priority than 25 years out
NORTH KING COUNTY	In the 1990's Ballard and West Seattle presented their neighbor plans to allow for multiple family construction in place of single family homes. As part of this increased density they were promised prompt inclusion in plans for light rail. I consider 22 years as being anything but prompt. Blocks of well constructed single family homes have been razed and replaced by unattractive condos and townhouses. This has greatly reduced home values and the overall charm of the neighborhoods. It is very shocking that concessions have been made and now that it is time for the promises to be met Sound Transit is not following through. Please honor your word and include Ballard in the plan to have a station as soon as possible. Thank you, Mary Fortino
NORTH KING COUNTY	Speed it up!
NORTH KING COUNTY	Ballard connection should be higher priority and completed in much less than 22 years.
NORTH KING COUNTY	I am more strongly supportive of prioritizing light rail service to Ballard and West Seattle before other services
NORTH KING COUNTY	Graham st station needs to happen a lot sooner. Same with Ballard and west Seattle light rail stations.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	I would like to see funding for trains that can carry more bikes - including cargo bikes - and strollers, luggage, etc. perhaps like the ones at SeaTac airport with few seats and lots of wide open space to stand and hold a pole. One of these style cars every two trains would help crowding a lot.
NORTH KING COUNTY	22 years to get to Ballard?! That is nuts. Quicker timelines on rail, less reliance on buses!
NORTH KING COUNTY	How can we shorten the timeline? Make Ballard to Downtown a sooner priority, and not at grade. I'd love to see a system that supports traveling the city, not just bringin folks in from the suburbs. with so many people moving into town, we need to move these people with less cars on the road...this project doesn't solve that for at least 15 + years!
NORTH KING COUNTY	We live in the city, I don't think we want to wait 22 years for the route in the city to be done. Usually the people that want to use the transit are not the people that lives in the suburban. Im from Montreal, Canada, and trust me it works really well there. Where everyone in the city don't use their car, only the ones that comes to work and lives in the suburban. So they should be the one to pay for the transit, if your plan is to have them taking care of first!
NORTH KING COUNTY	It would be nice to have more frequent and convenient stops along the underground rail system in Seattle, similar to other underground metro systems: the NYC/MTA Subway system, Boston's MBTA Subway system and DC's WMATA Rail system. i.e.: along each major avenue and/or major attractions.
NORTH KING COUNTY	Ballard to Downtown should be one of the first lines completed with the potential ridership numbers as high as they are. Also, more East-West lines need to be have studies preformed so that if their is federal funds or other available funds these lines could be completed. Seattle is already a hard place to move east-west compared to north south and a UW-Ballard line and/or another similar line would be extremely beneficial.
NORTH KING COUNTY	Ballard to Downtown Seattle should extend much farther north. At least to Seattle City limits or beyond. It is a mistake to divert all north/southbound traffic to the northgate area and cut off what could be a truly great line so prematurely. And your timeline is way too long.
NORTH KING COUNTY	Ballard light rail projects should be accelerated.
NORTH KING COUNTY	I'm disappointed that the option to Ballard is surface / elevated with a movable bridge over Salmon Bay. There's a lot of boat traffic there that will make the train schedule unpredictable. Trains will run longer, and ridership will be lower. I strongly prefer the tunnel option, even though it is more expensive.  I am also disappointed that the projects focus on far-reaching regional lines, which technically aren't necessary (we can just run more express buses there), over more rail in Seattle, which the city badly needs.
NORTH KING COUNTY	West Seattle is growing very quickly and so close to downtown. It seems that there should be higher priority in connecting this area with the downtown core. Top priority light rail from W Seattle and shoulder driving buses both N and S on I-5 and I-405.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	This plan takes way way too long. We need these changes in the next 10 years. I'd pay more in taxes to have it happen within a reasonable amount of time.
NORTH KING COUNTY	<p>I believe the idea of connecting far-reaching areas of Seattle like Everett or Tacoma via light rail is a bit of a pipe dream. This is due to the slow speed of the system. While I believe this is a necessary element of Seattle proper's transit solution, light rail doesn't make sense as a system to connect the Seattle metro area. Because of this, I'd strongly support greater expansion of the very rapid Sounder train system. It works with some already existing infrastructure, which saves money, and is a lot faster for long commutes than is light rail. Making more park and rides/buses with access to Sounder stations seems like a better investment.</p> <p>I'd also be more prone to throw \$500/year at a fully tunneled/elevated system rather than \$200/year for a slower system that's partially at grade and interferes with traffic flow.</p> <p>I also support the expansion of bus rapid transit as a way to reach a greater variety of places and to do so rapidly and at a lower cost. Again, light rail seems to make most sense in the most densely populated areas. Bus rapid transit helps relieve traffic pressure in other areas.</p>
NORTH KING COUNTY	Seattle-centric transit to get through the downtown corridor should be the priority of sound transit expansion. The city is crippled with growth and if we can't move current residents within the city reliably, it will only drive rents higher close to the downtown core and turn Seattle into an aspiring San Francisco. No one wants that. We need to connect our neighborhoods before expanding to the suburbs.
NORTH KING COUNTY	I strongly believe the Ballard last of this plan should be prioritized much sooner than other parts. Ballard population and ridership is exploding, and presents a huge opportunity. Waiting 22 years is not prudent.
NORTH KING COUNTY	Ballard to Downtown Light-rail line is the most important item on the ST3 plan followed by the West Seattle to Downtown Light-rail line. These two lines need to be moved up the timeline. Also, these two lines need to be completely grade separated. Tunnel or elevated only. The Ballard-Downtown line should be either tunneled under Salmon Bay or built on a fixed rail-only bridge. To complete these two lines as stated I would be in favor of getting rid of improvements to bus service.
NORTH KING COUNTY	Prioritize transit within city centers, in phasing, scale, and cost allocation. Less emphasis on inter-suburban transit.
NORTH KING COUNTY	We should be building on the infrastructure that we have. Areas that already have moderate levels of mass transit services (i.e. Commuter rail from Tacoma-Seattle- Everett) should be given a low priority (completed later in time) relative to areas with no existing infrastructure (i.e. Ballard/ West Seattle). The plan tries to address the low hanging fruit first, but in so doing, it delays addressing the real areas of need.
NORTH KING COUNTY	22 years for the Ballard extension is too long a delay to garner a lot of support.
NORTH KING COUNTY	Focus on above ground light rail and connecting cities like Bellevue, Everett, Seattle, Tacoma.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	I feel that a rail line to Ballard should be higher on the proposal priority for two reasons. First, self interest. I currently live in Crown hill and this line could benefit me the most. Second and more importantly, the Ballard area is rapidly expanding with condos and new town homes. These are being bought by younger professionals like myself who work at places like Amazon, Starbucks and in downtown generally. Young professionals are the highest likely ridership demographic of new mass transit. It would make sense to have new service to young people. This would relieve congestion on 15th/Elliott and on 99 into downtown, as it takes way too long to get from ballard to downtown via bus currently. Thank you.
NORTH KING COUNTY	Instead of the BRTs on the 405 corridor, I would prefer light rail; however, I do understand that light rail is significantly more expensive and takes much longer to implement. In light of this tradeoff, I agree with the short-term decision to use BRT but I would like to see a final step of the plan that incrementally replaces the BRTs with light rail, especially in transfer locations that would truly link the region together.
NORTH KING COUNTY	<p>1. The route with the biggest ridership per dollar is the line to Ballard. Thus, this line should have the highest priority both in terms of timeline -- 22 years is far too long -- and in terms of infrastructure: this line MUST be on separated grade or we're going to be cursing ourselves with a flawed line on a high-capacity route forever.</p> <p>2. The line between West Seattle and downtown Seattle is also absolutely critical in terms of population served and thus its timeline must also be expedited. This is not only a practical issue for the transit system but also for getting the measure passed this fall: Seattle voters are going to be make-or-break for this measure and to get their support, in-city mobility needs must be prioritized.</p> <p>3. Fully fund all studies/planning needed for the Ballard-UW and West Seattle-Burien lines, and add a provision that they will begin construction if funds become available. Remember, just this year, Sound Transit is \$240 million under budget and will receive \$600 million in federal grants that weren't planned for/expected. If that kind of windfall continues these two high-need lines can come into existence years earlier, with a great positive impact on the city/region.</p> <p>Finally, just a comment: YES. More transit! More rail! More excellent planning/management by Sound Transit, an agency that has proved itself to be responsible, smart and highly competent. The Seattle area is desperately behind in mass transit and the region is in danger of completely breaking down, with detrimental effects to us all, if population growth continues at this pace without commensurate investments in mass transit. I would support a transit plan twice as big as this one. Let's do it all. (My only wish is that this plan could be funded with income taxes, not property and sales taxes, but that is unfortunately not something we can change at this time.)</p>
NORTH KING COUNTY	I think the Bellevue to downtown seattle light rail should be a priority.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	I live in Capitol Hill and have seen that the addition of light in this area has dramatically affected this neighborhood in a positive way. I strongly feel that Ballard, Seattle Center and South Lake Union should be considered as one of the first projects to be completed. These areas need congestion relief, which the light rail would provide.
NORTH KING COUNTY	I think a light rail station should be added in Mountlake Terrace, WA, near the transit center already there.
NORTH KING COUNTY	The Ballard and West Seattle lines should be pushed up in the priority list. The Ballard Line should be extended beyond just market Street. You either need to go up 15th farther, or go down market street to 24th and go north to 85th along 24th street to penetrate the Ballard community better. Providing reliable and consistent commuting to Ballard will alleviate a TON of traffic between downtown and Ballard. Extending rail along market between 15th and 24th would enable access to the Ballard entertainment and retail districts.
NORTH KING COUNTY	I think the city projects should happen first, as opposed to suburban projects. For example, Downtown to Ballard and Downtown to West Seattle should be first priority, then projects outside of the city should happen later. Understandably, Bus projects will be quicker and less expensive, but I would think both the Lynwood to Renton BRT project and Downtown to Ballard/West Seattle light rail projects could happen simultaneously. Most congestion happens within the city and it seems to me that breaking that congestion first, then disseminating out would be the best approach.
NORTH KING COUNTY	Light rail to ballard should be prioritized in my opinion
NORTH KING COUNTY	West Seattle and Ballard first. Intercity is more important.
NORTH KING COUNTY	Light rail to downtown from Ballard and W Seattle should be bumped to higher priority. I voted on monorail project in early 2000 for Ballard and 16 years later....no rail line, worse traffic. Ballard and W Seattle are growing quickly. The buses get stuck in the same traffic as the cars and are slow from Ballard. I now drive daily because the buses are crowded, slow, run late, and don't run frequent enough. I would happily take light rail daily because it runs on its own track away from the cars and won't get stuck in the same traffic situations. I lived in Europe for 7.5 years....light rail/trains are the way to go, more busses are not helpful.
NORTH KING COUNTY	A plan for light rail from Ballard to UW NEEDS to be in ST3. The density and growth of Seattle must be served within the next 10 years by alternatives to bus and car. With projects continuing to deliver on time and at or under budget, the timeline for execution is *painfully* slow. Delivery of Seattle city connections within 10 years is crucial to the success and support of ST3.
NORTH KING COUNTY	Ballard and West Seattle projects should be prioritized and the timing brought forward.
NORTH KING COUNTY	Ballard/Fremont Light Rail should be a priority
NORTH KING COUNTY	Putting lite rail off to Ballard and West Seattle for that length of time is ridiculous. The growth in these areas cannot wait that long.
NORTH KING COUNTY	Connect Seattle neighborhoods to downtown and each other first.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	What will this plan do: for Seattle, in the next fifteen years, that isn't already funded? The answer that I come up with is: not very much. It would be a great act of charity from Seattle voters for residents of outlying suburbs. Honestly, I'm really not feeling that charitable to the lands of Kemper Freeman, and beyond.
NORTH KING COUNTY	I have never voted against a transit plan. If the insulting line to Ballard is not revised, this will be the first transit plan I vote against. The city zoned Ballard to be very high density. That density has arrived. This density only works if accompanied by mass transit. An At-grade, drawbridge light rail route that won't be done for a generation is unacceptable. Period.
NORTH KING COUNTY	I would be far more supportive if the light rail initiatives were escalated. The bus experience is so bad that I'd rather see all funds diverting towards light rail, even if it means outcomes might be delayed.
NORTH KING COUNTY	The prioritization of projects in this plan do not seem aligned with the most critical needs of commuters. Areas like Ballard that are slated for--and demonstrating--dense development should receive light rail first.
NORTH KING COUNTY	Expanding to Ballard should be done quicker than the current plan
NORTH KING COUNTY	The Ballard line needs to come more north by 50 to 100 blocks. Greenwood, Phinney continue to be extremely under-served with this plan. Very disheartened by a 22yr time line for Ballard.
NORTH KING COUNTY	I would suggest getting Redmond and Ballard to downtown online prior to the other projects planned.
NORTH KING COUNTY	As a W Seattle for 13 plus years and intermittently prior to that for another 15 years, I have watched development and population slowly increase and now frenetically do so. Busses have become overcrowded at rush hour. My stop (Alaska Junction) is the last stop on the downtown run that may have a seat, but probably only 50% of the time. By the final stop in WS there may not be space and sometimes the stop is bypassed. Coming from downtown, the bus is so crowded at 2nd and Columbia that people have to push to board or wait for 1 or 2 more busses to get on. This is certainly unpleasant but one could argue that it is urban living finally getting to Seattle. (I grew up in the NYC area, so packed subways and busses aren't unknown to me--though commuter trains seem rarely that full there). However, the housing developments recently completed and those under construction will increase ridership dramatically--especially since many of them were built with almost no parking, with the idea that their inhabitants will use mass transit. Light rail in 17 years is FAR too slow! How will these new inhabitants get to downtown if the rush hour commute is already so challenging?
NORTH KING COUNTY	straighten the section above paine field; do not curve it west and then sharply east before north. figure out a way to do that.
NORTH KING COUNTY	The focus should be on rail over buses, and on in-city rail extensions (to Ballard and West Seattle) over extensions of the "spine" to Tacoma and Everett.
NORTH KING COUNTY	There is a desperate need for better service via light rail and bus from Seattle to tacoma. It's ridiculous that the two major cities are not connected.
NORTH KING COUNTY	This may not be within your control, but I cannot support a regressive sales and use tax increase for the expansion of public transit.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	move transits connecting east side (Issaquah, Bellevue, Kirkland) to downtown Seattle ahead of Lynnwood project.
NORTH KING COUNTY	Taking 17 years to bring light rail station to West Seattle is too long. West Seattle has been growing at a rapid rate. I don't think the transit plan is catching up the same pace as the housing development. Everyday I walk pass the new uprising and ask myself, "how is the transit system going to catch up with such development?"
NORTH KING COUNTY	Light rail projects to Everett and West Seattle should have priority and should be scheduled to come online BEFORE other light rail developments.
NORTH KING COUNTY	<p>First, the Graham Street station in South Seattle (Rainier Ave) needs to be expedited asap. It is urgently needed, presumably one of the "easier" and faster projects to build out, and would increase ridership overnight. The fact that this is not being pursued for roughly 20 years is asinine. This needs to be done NOW.</p> <p>Second, West Seattle just needs a link asap. It should be fast tracked, even before Ballard. I understand the need to prioritize projects, and that they are extremely dependent on funding over a long time, but some of these projects in the urban core need to be tackled more immediately than expanding to the far reaches of the suburbs, all of which will be fine relying on car travel just a bit longer than these central projects can.</p>
NORTH KING COUNTY	<p>The Graham St. Station was in the original light rail plan almost 20 years ago. We've been waiting for this station for a long time and waiting another 20 years is unacceptable.</p> <p>ST3 needs some near-term proofs of progress in urban areas, as we are the voters who will pass this package (or not). The community where the Graham St. Station is planned has long been impacted by the light rail but we haven't enjoyed the benefit. This is a chance for Sound Transit to prove that equity plays a part in their decisions, and to deliver an early and visible benefit for the giant check they're asking us to sign.</p> <p>In addition to the infill stations overdue Central Link, light rail to Ballard must be prioritized. It is a major population and job center as well as entertainment and cultural destination. The network effect of prioritizing Ballard sooner strengthens the entire line and provides incentive for further progress of light rail out to the suburbs or via supporting transit like Sounder and BRT.</p> <p>Finally, providing free and/or subsidized parking should not be a priority for Sound Transit. Rather ST should be focused on facilitating station access, working with partner transit organizations to reconfigure routes to feed transfers, and encouraging TOD.</p>
NORTH KING COUNTY	Prioritize the light rail to Ballard. The area is growing like crazy and there's no great transportation options to commute downtown. The buses are unreliable.
NORTH KING COUNTY	The light rail to Ballard should be completed in the next 8 years, not 22.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Add light rail to the Burien transit station to connect with the International Blvd Station. Compress the timeline. It should take 5 - 8 years. Consider an elevated structure to avoid reduced North/South capacity on 15th W for the Ballard to Seattle connectivity. Please consider retaining the HOV lanes serving Mercer Island and build a separate structure to support the Seattle - Bellevue rail pathway, up to and including a potential tunnel path and/or new floating span adjacent to the HOV lane bridge deck. In addition to rail and BRT please consider simple changes to the flow of traffic in Seattle to improve roadway performance. Eliminate the Seneca and Mercer Street Left-only exits. Build a business bypass tunnel under I-5 near the convention center? Reuse TBMs?
NORTH KING COUNTY	Ballard Extension as the last to complete project is a real bummer. It would benefit me the most and arrive nearly 20 years for now... This makes me question if I can support the overall proposal...
NORTH KING COUNTY	We would like to see better options for bike parking at light rail stations. We were disappointed by the options given at the new Husky Stadium station. We commute downtown with our toddler and there is no way for us to lock up the bike trailer that she travels in. It would also be wonderful to add more local buses that go to the light rail. Also, we are surprised to see that there is no light rail along 405, notorious for bad traffic. We have spent some time commuting to Seattle from Woodinville - it would be great to have more options on the Eastside that would be associated with urban centers (Woodinville, Bothell, Juanita, Kirkland, etc).
NORTH KING COUNTY	South Lake Union light rail should be of higher priority
NORTH KING COUNTY	Downtown rail projects should be given priority and be scheduled to begin much sooner than under the current ST3 plan. Rail connections to the suburbs will already be sufficient under current ST2 projects.
NORTH KING COUNTY	Ballard to downtown Seattle light rail timeline needs to be expedited and not be on a 22 year plan. Ballard being an urban village as well as residential urban village crown hill the city is expecting these areas to absorb density and with it more commuters and traffic. The current transportation system rapid d takes on average 45 min for a 7 mile commute and the only "fast" way via bus is the 15express which is overcrowded already. We need faster and reliable transit for this area within the next 10 years and not 22 years.
NORTH KING COUNTY	Urban light rail projects should be prioritized over suburban. 17 years to West Seattle and 22 years to get rail to Ballard?? I may not even be alive to see the first train roll in. Funding is regressive. Is property tax increase only on residential property? Why not commercial property? Why no gas tax increase? Sales tax in King County is already one of the highest in the nation.
NORTH KING COUNTY	Rapid Ride C and D line improvements need to be defined and given a timeframe in which they will be completed. Without that, I imagine that it will be watered down and this plan will be characterized by me and others in my neighborhood as too little too late. The only meaningful thing that I see in the Plan that may affect my commute during my career is C&D line improvements. Otherwise, you are asking me to vote for future generations - which I am willing to do. But - I would rather have some self-interest in this besides paying taxes for others to ride. At this point, I'd be much more willing to vote yes to a King County Metro or City of Seattle transit proposition.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	The growth in population in Ballard is 10-20 years ahead of the plans to handle the traffic. The light rail link and bud transit plans need to be moved up on the time table
NORTH KING COUNTY	The project order should be reconsidered. The density and over crowded buses from West Seattle and Ballard should make their station development a priority to help far more commuters get from these locations to downtown each day. Microsoft provides their own bus service for employees, those who don't take the connector are not going to ride the bus or the train when service is provided. Giving priority to the already high density neighborhoods should be at the top of the decision making list. The high ridership will help to pay for other connections and revisions to bus service will allow outlying areas to receive better services by bus until rail can be realized.
NORTH KING COUNTY	Service within the City of Seattle should be a priority. West Seattle improvements should be accelerated to the first 8 year project. We are loosing the Spokane Viaduct and Spokane Street bridge is at capacity. The residential growth in West Seattle is accelerating, the transit capacity should also.
NORTH KING COUNTY	Is it possible to add a Shilshole stop the Sounder northbound train? This could definitely help with the commute to/from Ballard in the 22 year period while light rail is being pushed out to Ballard.  Would also like to see light rail to Ballard as a project done sooner than 22 years.
NORTH KING COUNTY	I feel that through bus route additions or frequency isn't as "sexy" as light rail or street cars, it is more flexible and less reliant on heavy infrastructure and I'd prefer these bus strategies to rail or streetcar.
NORTH KING COUNTY	I'm curious as to why the timetable for Ballard light rail is 22 years. This seems excessively long considering demand for light rail there is already high and will undoubtedly continue to rise over the next decade. I would also like to see West Seattle light rail get higher priority. Seventeen years seems excessive.
NORTH KING COUNTY	According to the ST3 Financial Planning Update on WSdot.com, the average household cost is nearly \$400/yr. Paying \$400/yr for services we won't see in West Seattle for at least 18 is insane. Sound transit has a history of asking for more money than they really need if they actually did their homework and were more responsible with taxpayer money.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>The methodology on this survey is questionable. I oppose the ST3 plan because the priorities are wrong, and the timelines are offensive. However, on question 14 you state the cost per person per year and ask if I support the plan. I oppose the plan, but the cost is fine, I have no issue with it. How do I answer the question? If you can't get the methodology correct for a survey, how am I supposed to trust that you can support the transit needs of one the fastest growing regions in the nation with a desperate need for improving transit oriented infrastructure?</p> <p>In summary, there needs to be a higher impetus to improve transit in the most densely populate region of the city. Setting Ballard and West Seattle as two of the lowest priority items, and having their complete dates decades away is insulting to the majority of the population you serve in the region. The surrounding cites, many of which have opposed transit oriented develop on ballots and through their leaders should be prioritized according to their own demands.</p>
NORTH KING COUNTY	<p>It seems that West Seattle and Ballard light rail are the losers in this plan. They should have a higher priority.</p>
NORTH KING COUNTY	<p>The Ballard-Downtown Light Rail plan needs to be expedited and modified. 22 years before that line is ready is unacceptable, especially since it would be at-grade along 15th with a new drawbridge over the ship canal. Along 15th the light rail track needs to be elevated or a tunnel (cut and cover would be the most practical), and there should either be a tunnel below the ship canal, or a bridge that is high enough in that it wouldn't need to be a drawbridge. I understand that it is important to pass the ST3 plan this November, but the current plan for Ballard-Downtown is simply not the best plan. Additionally, an East-West light rail from Ballard to UW (specifically, Golden Gardens to Children's Hospital, with stops near the Zoo, in Wallingford along 45th, and U. Village, and perhaps Fremont) needs to be on the timeline, as well as some sort of solution to the troublesome #8 Metro bus. The #8 is always late and always packed, and is thus unreliable. It is disappointing that there is no plan to fix that route. A lot of people I have spoken to are unhappy with the current Ballard plan, and I think there is a strong chance that many Seattle residents will not vote for ST3 this fall unless there are some major changes.</p>
NORTH KING COUNTY	<p>I would put more urgency on the Light rail project from downtown Seattle to Ballard. I would also suggest having the light rail project not terminate in Ballard, but extend the line all the way up 15th to connect at Aurora and terminate at Northgate. The D line is already significantly crowded in the mornings, and there are more and more high occupancy housing projects being constructed in Ballard and Crownhill.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>I've very concerned at the prospect of at-grade light rail on the Ballard line. Ballard is growing so quickly and I'm concerned that we are trying to cut costs at the price of decreased reliability and speed from Ballard to downtown. The descriptions of the at-grade portion of the line do not address the problems with at-grade rail. How will rail interact with traffic? What traffic problems will cause the train to be delayed? How well do prioritizing traffic lights work?</p> <p>I'm also concerned that nothing is included to address the growing population in Greenwood. Even a shuttle bus to the light rail would be good.</p>
NORTH KING COUNTY	<p>Ballard and the Interbay are becoming a major hub. I am very supportive of this line, but very disappointed that it will take 22 years go there.</p>
NORTH KING COUNTY	<p>The use of buses running N-S on the Eastside is a stop-gap approach that will not meet the region's needs. Building light rail on the Eastside will cost considerably more in 30 years once it becomes clear that it is necessary. The investment should be made up-front in constructing train service throughout the region in order to alleviate congestion and build a more dynamic and cohesive region. Additionally, significant investments must be made in providing parking for outer stations in order to give drivers a way to use the light rail. If more upstream drivers are on trains, then downstream roads will be emptier for the benefit of all who still drive. Also, stations should be located closer together within Seattle itself. Building miles and miles of track from UW to 145th would be wasted if stations are not frequent enough along the route to enable pedestrians and bicyclists. If people see car-less living in all areas of Seattle/King County as viable, then the light rail will have succeeded admirably. Making major investments in tracks and trains without investing in stations is like buying airplanes for a country with no airports.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>== Make Ballard to Downtown fully grade separated. ==</p> <p>Once light rail is constructed at-grade, our city will be stuck with a flawed system, forever. Delays from our existing stretch of at-grade rail ripple throughout the system and limit the future capacity of rail through the Rainier Valley. All new light rail must be constructed with grade separation. This line, in particular, needs to be built to the highest quality possible. The high range ridership estimate for Ballard to downtown is 145,000 riders per day, which would mean:</p> <ul style="list-style-type: none"> <li>-Ballard to Downtown's daily ridership will be greater than the entire population of Bellevue.</li> <li>-Ballard to Downtown's daily ridership will be equivalent to the entire Portland MAX system.</li> </ul> <p>== Expedite the construction of light rail in Seattle. ==</p> <p>The biggest criticism of the proposed package that we've heard from Seattle voters and our supporters is the glacial pace of construction to Ballard and West Seattle. Sound Transit must do everything it can to expedite the construction of light rail in Seattle, including the elimination of projects that do not contribute the same benefits to mobility in Seattle. The line to Ballard is the single best project in the package, by every possible metric (Ridership per dollar? Check. Potential for Transit Oriented Development? Check. Potential for federal funding? Check.). Seattle voters will not support a package unless they will live to ride the rail.</p>
NORTH KING COUNTY	<p>I believe you need to address the most populated areas first, meaning the downtown and surrounding areas. Yes, it will be more complicated, but if this project is to be done, START IN BALLARD FIRST with the tunnel. Also, the cost is so incredible, it is almost hard to believe. How did they come up with these costs? Also, why 25 years? It took 6 years to build a railway across the country with "primitive" tools.</p>
NORTH KING COUNTY	<p>Light rail to and from Ballard first, not last! Stop wasting money on buses! If we had a free market, the city would sell a lane of 15th/Ballard bridge to a private company and we'd have rail next year, not 22 damn years from now.</p> <p>If we don't get light rail from Ballard soon, we'll put a group together to vote all of you out of office.</p>
NORTH KING COUNTY	<p>Ballard and WS focus first.</p>
NORTH KING COUNTY	<p>I can't vote for the plan with the timeline and arrangement of the Ballard spur. Running the light rail at grade on 15th will not significantly improve service past the Rapid Ride buses that already run that route, which get bogged down because of traffic. The line must be grade separated. The spurs expected opening date of 2038 is unacceptable and needs to be prioritized to get my vote. Finally, reconnecting the Ballard spur back to UW (or something on the main line) would make it far more useful. All in all, the plan put forth by Seattle Subway seems much better for this area than the draft ST3 plan. If ST3 doesn't change the spur quite a bit, I will not be voting for ST3.</p>
NORTH KING COUNTY	<p>Priorities should be maximized to light rail projects vs. using existing HOV lanes in major highways.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Extend the West Seattle light rail south toward Burien.
NORTH KING COUNTY	I think that North Seattle should be given more priority in the planning. Ballard to Downtown in 22 years is ridiculous.
NORTH KING COUNTY	Prioritize Seattle-centric projects (Ballard, West Seattle, etc)
NORTH KING COUNTY	Building light rail to Ballard should be a priority. Completing highly-visible, useful and popular projects in the near-term will create confidence in the transit system and enthusiasm and support for future projects.
NORTH KING COUNTY	The west Seattle phase should be prioritized and speed up.
NORTH KING COUNTY	East-west projects (i.e. Ballard to Downtown/UW) should be moved up in the schedule. North-south traffic in the region has a number of options, but east-west travel is terrible currently.
NORTH KING COUNTY	South Seattle has been waiting too long for a station at Graham Street. There are so many people who would benefit from this station - people who cannot afford a car like most in Bellevue and North Seattle. Our part of the city is growing rapidly as the influx of Google and Amazon employees move to South Seattle to find affordable housing. By ignoring this part of the city, you are ignoring the growing need for affordable resources and transportation for those who have lived in South Seattle most of their lives.
NORTH KING COUNTY	Graham Street Station should be added sooner
NORTH KING COUNTY	Downtown to Ballard must be completely grade separated. The amount of spending in Snohomish county is amazingly out of scale with their revenue. Providing a ridiculously circuitous route to Everett while short changing East King County is short sighted. Issaquah to Bellevue should at least include stops in South Kirkland and Downtown Kirkland, considering the job density in those locations and the ridership of the 255.
NORTH KING COUNTY	This plan does not serve the Rainier View/Skyway neighborhood well. We will be paying property taxes on a system that has no easy access for our neighborhood.
NORTH KING COUNTY	The Ballard timeline is quite depressing as it's one of the most dense areas in the state. I think the long timeline could be more tolerable if that route were to also be fully grade separated to maintain proper schedules and support increased headways.
NORTH KING COUNTY	If like to highlight the opportunities to alleviate huge amounts of traffic by increasing the incredibly limited options for transit between the east side and downtown and between downtown and West Seattle. If I had a transit option that would get me to and from work in redmond from lower Queen Anne within 1.5 times the commute at the edge of rush hour (less than approximately 60 minutes door to door), I'd take it.
NORTH KING COUNTY	I believe Seattle proper projects should've prioritized first.
NORTH KING COUNTY	Need parking at light rail stops to increase feasibility as a commuter option. It also should not take 20 years to add a stop at Graham. We need this yesterday!
NORTH KING COUNTY	I would prefer to first a focus on building a strong, interconnected light rail system and expanding on that rather than building multiple diverse systems simultaneously.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Ballard and West Seattle need to be the first light rail lines added.
NORTH KING COUNTY	Prioritize in-city projects for funding and timeline where population is densest, congestion the worst and potential ridership adoption the greatest.
NORTH KING COUNTY	Downtown Seattle desperately needs off-grade light rail expansions. I strongly support all tax increases that will expedite off-grade light rail expansion.
NORTH KING COUNTY	Your plan to add light rail to West Seattle in 17 years makes no sense. As one of the largest neighborhoods, if not the largest, within Seattle, it's low priority boggles the mind. Its proximity to downtown, population density, and proximity to other mass transit hubs should make it a top priority. Bus service has been reduced to West Seattle thereby causing the buses to be excessively crowded. There are limited ways to transit out of West Seattle and its low priority will cause an increase in an already congested commute. If you want the West Seattles population to support and use the system, then you need to modify your plan to include the neighborhood.
NORTH KING COUNTY	I strongly feel the plans for link rail to Redmond/Seattle, link rail to and from Ballard and south lake union as well as link rail to and from west Seattle should be prioritized. A 25 year plan is too long. I would pay triple in property taxes to speed up this project. Not having link rail is severely making work life balance difficult and quality of life as I spend so much time commuting. I also feel there needs to be link rail to u-village and up through lake city/meadowbrook. Currently the u-district link rail doesn't solve the montlake traffic issues.
NORTH KING COUNTY	First, this survey design is awful. Far too many choices, poorly presented. Second, there is no way to respond to the timelines offered. It would be wonderful if ST3 offered a trade-off between speed and cost: As a recent article in The Stranger quoted an ST3 official who said timing of revenue was the main determinant of schedule, I strongly urge ST3 to examine funding capability that would allow the system to be built faster. The fact that we are still five years (the length of time it took to build the transcontinental railroad) from opening Northgate light rail indicates that *urgency* needs a high priority in ST3 planning. It would be great to see the tradeoffs that prioritizing speed of development require represented here.
NORTH KING COUNTY	West Seattle and Ballard should be priorities. If these neighborhoods could be connected sooner than stated in Question 12, that would change my response to that question.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	The focus for light rail should be on the paths where freeway expansion is not an option-across lake WA and I-5 through Seattle. It makes more sense to have fast light rail that goes across the lake, both 520 and I-90 to connect Seattle and Bellevue, then uses buses to reach specific locations. This should be a hub-and-spoke type of design. This way you don't have to have a zillion bus routes, all crossing the bridge(s) which still don't reach all the right commute locations. Instead buses should be used as the last mile portion only therefore being much faster and more efficient. Ideally a rail that goes from SLU to the 520/405 interchange region with only a couple stops, via the 520 bridge, and similarly across I-90 from factoria to downtown seattle (maybe the bus tunnel area) again with limited stops, and as well along I-5 where possible. These are the most common traveled paths so it makes sense to have a fixed-location transportation. However peoples needs change so putting light rail everywhere isn't flexible so buses should be used.
NORTH KING COUNTY	I live in West Seattle, which is growing rapidly, the buses are full and more an more multi-family buildings are being build. I think that 17 years is too long to wait for light rail to West Seattle. How can we pull this part into the eight year plan and how can I help make this become more of a priority?
NORTH KING COUNTY	The project is to large in scope. Would prefer to see focus on just light rail to west seattle and ballard. The other pieces of the project should be on seperate plans. Oppose giving huge sum, less ability for voters to hold sound transit accountable. Also with less moving parts one wouldnt necessarily delay the other.
NORTH KING COUNTY	I would like to see the heaviest use area, Seattle, implemented first and taxed separately from other counties. Getting Seattle moving is more important to me. I like that the taxes are spread out and not just on property owners. And also on my wishlist I would like light rail stations at Southcenter and at University Village.
NORTH KING COUNTY	with the population of ballard growing exponentially, light rail to ballard should occur sooner in the plan
NORTH KING COUNTY	After the decrease in service that I am receiving now that the light rail has opened 2 full miles away from me, I am concerned about the lack of thought put into the areas that wouldn't be served by the light rail stations. Another words, I live in Wallingford/Fremont area, which is a dense area withing the city. There is no reason why I should not get decent bus service just because others can now use the light rail. With the opening of new light rail stations and new BRT stops, will you continue to pull service away from other areas that are now seeing a gap. Especially, in areas that previously did not have a gap? Where is the discussion and prioritization of the parts of the city that lie between these proposed new transit stops? Just because some people will be able to use those new amenities doesn't mean everyone can and if I am going to support funding for ST3, I would like to know how my commute will be affected. Many promises were made about the recent changes but my commute has gone from pleasant to completely unpleasant as a result of a light rail station that opened two miles away from me.
NORTH KING COUNTY	The Graham St Station needs to get priority. It's a social justice issue that it was passed over with phase 1 and now seems to be getting low priority again. I hope it is reconsidered for a faster timeline.
NORTH KING COUNTY	Light rail between Ballard and downtown sooner.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Not sure which ones however. But if modifications could bring down the price tag I feel many more people would be able to support the plan. As it stands I feel the average cost of \$17/mo is beyond those most likely to need and use the services of the plan. A dilemma.....?
NORTH KING COUNTY	i suggest emphasizing higher priority of the ballard-downtown light rail
NORTH KING COUNTY	Any parking built should include fees for parking. Any parking should be limited, with transit connections being the preferred mode of transit to rail stations.
NORTH KING COUNTY	The Ballard to Downtown light rail line should be completed before West Seattle, as it is better in almost every metric.  Why are the timelines so lengthy for all of these projects? I am 23 now and will be 40 before light rail makes an appearance in West Seattle; that's crazy.
NORTH KING COUNTY	Get to Ballard sooner, make strong movement to improve connection between Ballard and UW and include ped/bike infrastructure along the way. I don't want to leave W. Sea in the cold, but TWENTY TWO YEARS until the NW gets light rail? Really?
NORTH KING COUNTY	Addressing congestion in South Lake Union needs to happen earlier in the plan. Development in that area has been unprecedented and waiting 22 years is not acceptable.
NORTH KING COUNTY	This is a truly horrible list of projects driven by weak-minded politicians instead of transit experts. DO NOT BUILD LIGHT RAIL TO WEST SEATTLE. It is an incredible waste of money.  Please consider the following projects:  Ballard to UW Metro 8 Subway Issaquah to Seattle with one seat ride. Why are you so afraid of a route through Mercer Slough?  I am supportive of expanding LRT to the suburbs, but Spine Destiny is absurd and NOT based on sound transit planning.
NORTH KING COUNTY	Few light rail stations only help people living close to them. Easier access to drop off areas or parking surrounding stations support more usage of those slightly out of reach. Also think supporting commutes for people working in dense areas, not just living in those areas.
NORTH KING COUNTY	The timeline is far too slow for transit needs in the area. The Ballard line needs to be completed somewhere closer to five years from the start of ST3. An increase to the tax proposal would be acceptable to me if it meant quicker timeline to bring additional lines and stations online.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>I strongly support the dollar figure you seek, and will happily do my part in the form of property taxes to pay for the plan. However, if the existing plan were to go to ballot in November, I would vote it down. You must prioritize the stations that would move the most people: that means the Ballard and West Seattle stations must be built in the early 2020's, not the 2030's or 2040's. That timeline is unacceptable to me.</p> <p>Also, I must see grade separation for these proposals. Running an at-grade train to Ballard or West Seattle that can get stuck in traffic is unacceptable. I'm ambivalent as to whether the train runs above or below grade, but I must see grade separation to vote for the plan.</p> <p>With modifications, I will happily vote and lobby for ST3.</p>
NORTH KING COUNTY	<p>Population density in Ballard is outpacing transit development and service. Please consider urban locations ahead of suburban location when it comes to schedule.</p>
NORTH KING COUNTY	<p>Focus should be on the areas that are most densely populated with the narrowest land area and most congestion. Ballard and West Seattle should have link rail stations well before dollars and development are directed to Everett and Issaquah.</p>
NORTH KING COUNTY	<p>I would really like to see less emphasis on bus rapid transit, and I would like the West Seattle and Ballard lines to be completed sooner and/or before the outlying areas of the puget sound. I believe that the majority of our transit woes come from not moving people around the core of Seattle efficiently enough, and we can't afford to wait two decades for them to come online. I also would like the Ballard line to connect to Capitol Hill, and to add more streetcar lines which are more predictable than bus lines.</p>
NORTH KING COUNTY	<p>My only comments have to do with timing. I don't understand why it will take SEVENTEEN YEARS to get light rail to West Seattle. As I live here, I'd of course like to see it happen before Ballard, but I'm guessing the need is greater there. I'd really like ST to do a better job at explaining the reasons behind the order. Also, I know I'd be willing to pay more in taxes if it could bring light rail to me faster. Possible? Please help the public understand why it will take so long.</p>
NORTH KING COUNTY	<p>As additional businesses move to 15th Ave NW, South Lake Union, and Downtown, the plan needs to deal with the surrounding congestion first. I think waiting 22 years to connect the light rail to West Seattle and Ballard is a horrible idea. These areas are densely populated, desirable neighborhoods, and have city employees commuting by car in large numbers because transit is unreliable or inaccessible. If the city can make it convenient and safe to commute with transit, city dwellers will get off the road!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Investment studies should be upgraded to environmental studies to move development along. I think language should be included that outlines HOW it MIGHT be possible to speed up development of these projects, possibly including reworking of project financing rules and environmental impact assessment burdens, so that people who want these projects but on a shorter timeline can understand that, although these projects will take significant time either way, they don't necessarily need to take a quarter century to complete.
NORTH KING COUNTY	<p>While it won't directly benefit me, light rail to South Lake Union/Seattle Center/Ballard seems like the most desperately needed project. I know there will be lots of engineering challenges involved, but why is it so far out in the timeline? Why does West Seattle take precedence over Ballard? I hope that engineering considerations - and not political considerations - are driving these timelines.</p> <p>I oppose the idea of adding extra "infill" light rail stations. The travel time from Sea-Tac to downtown is already fairly long - adding more stations will only slow it down. Better to add capacity at existing stations, if possible, than to increase travel times further.</p> <p>I'm also concerned about the feasibility of light rail service to relatively outlying areas - Issaquah, Federal Way, Everett... What are the projected travel times and ridership numbers? Would BRT or express buses be better for these areas?</p> <p>Finally, I'm concerned about over-reliance on the freeway system for light rail. A major goal of any transit expansion in this area should be to encourage more transit oriented development and expand the number of urban areas, job centers, etc. - not just create a bunch of park and rides along I-5 and I-90 that take you to Downtown Seattle and Bellevue.</p>
NORTH KING COUNTY	Move the Ballard time line-up and you'd probably get our votes. This neighborhood has absorbed a huge amount of growth and has seen very few investments in transit. I understand a lot of this is Metro's problem and there are increased pressures across the region. Members of our household work on the eastside and downtown (and use transit for commuting) and over the 15+ years we've been commuting, access to the eastside has gotten better and trip time reduced, whereas the trip between Ballard and downtown has gotten significantly longer, more crowded, less comfortable, with fewer buses servicing our neighborhood, meaning the car gets used to drive downtown way more than it used to. We can afford that choice, but we'd rather use clean, efficient transit.
NORTH KING COUNTY	Crank up the funding, go big or go home.
NORTH KING COUNTY	The timeline should be modified to serve the densest population areas first. Housing should be prioritized over park and ride. The planning of the stations should be directly tied to land use changes and TOD opportunities. Local business interests should not override serving the good of the population who will be paying for the system for the next 25 years.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Projects within the densest parts of Seattle should be given priority. Ron Sims tried pushing a plan to extend light rail to Tacoma and Everett, and it's not really something people want, or are passionate about. If you live out in Tacoma and Everett, it would be a long ride to get to downtown Seattle. Just from Westlake to the airport is about 30 minutes. If you can get Seattlites that live next to these stations to use them on a daily basis that really frees up the streets for the cars for suburban buses and commuters.
NORTH KING COUNTY	<p>First of all, this is a terrible survey -- too dense for most people to take. The results, therefore, are meaningless.</p> <p>The Ballard to Downtown alignment you proposed is insane. Clearly nobody on the board has ever driven on the 15 Ave W corridor lately. A coalition of stakeholders including Community Councils, community organizations, the maritime industry, Chambers of Commerce, transportation advocates (with a particular interest in freight mobility) and The Port of Seattle have coalesced around an alignment that puts the route close to 20th Ave W, with a stop at Dravus. This alignment will serve the Expedia expansion, proposed Uplands development, current and planned high density housing in Magnolia, and will have 2 added benefits: no interference with already ridiculous traffic and freight mobility issues on 15th W, and will provide Magnolia (population 25K+) a route off the hill when and if its 3 bridges need repairs or tumble down.</p> <p>Removing several lanes of traffic and adding pedestrian crossing time to an already congested arterial is a nightmare scenario for any person or business along the northwest corridor. It provides no benefit whatsoever, and adds to congestion and travel time for business and freight.</p> <p>Go back to 1-c-3, alignment along 20th Ave W, with a tunnel below the Ship Canal. Defer the second downtown tunnel, and build out that alignment.</p>
NORTH KING COUNTY	Please get things done faster. Ballard in 2038 is a long long time.
NORTH KING COUNTY	<p>The Airport Access Rd station was funded years ago but not built. I have been told many times it was to punish Tukwila for not going up highway 99. I wanted it to. The Tukwila Station only has a measly 300+ parking places, of which almost half goes to commuters. Does this really illuminate traffic? I pay taxes for it and get almost no service. One cannot get a space on a weekday. Now I am told that the Airport Access Rd. Station wont be built for 20 years. Where Unified Grocers is located will be developed in a few years, Boeing is very close by as is the Museum of Flight. Maybe you can put my ashes on it if I don't make it to 86 years old. The station does not have to be fancy. but it has to be built now. We were first in line. who's running your agency, Donald Trump? You avoid the subject and ignore what is needed and what is fair. To conclude... lots more parking at Tukwila Station and a new station at Airport Access Road.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>Make Ballard to Downtown fully grade separated and consider different alignment.</p> <p>This was probably my biggest issue with the draft plan. If it's going to be one of the highest ridership lines in the system, don't you want the highest quality of rapid transit? Please don't half ass this portion and make it less useful to save a few dollars. The most used portions of this system running through the region's urban core need to be the highest possible quality. If they're not, how can they be competitive with driving? If people have to wait 20 years for it, don't you want it to be for something they can get excited about? Not something that could shutdown because of a clumsy driver or is too slow be competitive with driving?</p> <p>Provide complete funding of an Environmental Impact Statement (EIS) for the extensions from Ballard to UW and from West Seattle to Burien, and add both lines as "provisional projects" if additional funding becomes available.</p> <p>Completing the EIS for the extensions from Ballard to UW and from West Seattle to Burien will deliver those projects six years faster once funding becomes available. That makes the lines closer to "shovel ready," and creates the possibility that they can be built in ST3 if additional revenue becomes available through federal grants or cost savings on other projects. Just this year alone, Sound Transit is \$240M under budget on projects under construction, and the agency will also receive \$600M in unexpected federal grants. Seattle needs a plan that will leverage the benefits from Sound Transit's continued success.</p> <p>Fund Study Work for Future Lines</p> <p>If you want to avoid the push back on the project time line you saw with this draft plan why not start studying future lines now? Sound Transit must study additional lines in Seattle, including the "Metro 8" from Belltown to Judkins Park via South Lake Union, the Central District line, and from Ballard to Bothell via Greenwood and Lake City. Seems kind of cray to build first a line to Ballard through warehouses and rail yards that will hardly serve anyone between downtown and Ballard rather than lines like the Metro Route 8 or Ballard spur that would serve a continuous connection of dense built up area. But anyway, I know the Ballard spur study is in the plan. Could you also include the metro route 8? Pretty sure that would prove to be one of the most productive lines in the network since it would serve the fastest growing and already dense neighborhoods in the city.</p>
<p>NORTH KING COUNTY</p>	<p>concentrate on building the light rail city system - Ballard and West Seattle, buses and rail from the suburbs can feed to these</p> <p>I lived in Germany 35 years ago and that's what they did, it slowly expanded out then I lived in Portland 25 years ago and they did the same</p> <p>you spend to much on the 'burbs . Why does Ballard - which is now a density nightmare and completely ruined due to allowing all those condos- has to wait 22 years for light rail ? That is not good.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	We need to address the downtown and local areas (west seattle, ballard, etc.) before integrating with the suburbs. Similar to other big and previously fast growing cities (NY, San Fran, Chicago), you have to have the downtown set first and then connect the other areas. If the close-to downtown neighborhood connects aren't working properly, you are compounding issues.
NORTH KING COUNTY	Line ending in Ballard? Have you seen the proposal where the line goes up to Lynnwood serving Crown Hill before serving aurora through shoreline to Lynnwood? I bet you have. That other plan that I saw makes more sense.
NORTH KING COUNTY	The west Seattle light rail should be moved up in priority and completed sooner.
NORTH KING COUNTY	As a 100% pro-transit person, active follower of Seattle transit politics, and 100% chance yes-vote for this measure, I can state with absolute confidence that this proposal <i>*will not pass*</i> in its current form. I understand why the second downtown tunnel is needed, but it can happen later...perhaps build Ballard-->UW instead with this package to get everything connected more quickly and save money that will allow projects to complete more quickly. The timeline is not OK. Voters will vote no unless there is real hope that it can be completed <i>*much*</i> more quickly...like twice as fast. So come up with a "best-case scenario" timeline to present alongside a more pessimistic one. This would include: 1) savings for if a local municipalities pitched in to speed up their own project(s), 2) a most optimistic federal grant outcome, 3) the state loosens bonding rules regarding transit, 4) the area economy continues to boom and revenues exceed budgeted revenues by X%, 5) charging for parking. Also: try opening up partial light rail lines before the full line is completed: if we can get a stand-alone Ballard to South Lake Union opened up 8 years before the full line (with tunnel) is completed, that would be amazing and would win back the votes of the disenchanteds.
NORTH KING COUNTY	Traffic within the city is a nightmare and should be addressed before the suburbs.
NORTH KING COUNTY	Move up priority timing of Ballard and West Seattle light rail projects. 22 years until Ballard is connected is way too long.
NORTH KING COUNTY	More attention to the Seattle core, including Ballard UW link. The emphasis on the spine promotes sprawl. Parking garages are not destinations and promote travel in one direction. More emphasis on building stations that are destinations - with the chance to create interconnected livable neighborhoods.
NORTH KING COUNTY	Congestion in Ballard is horrible and is only getting worse. Light rail is needed between Ballard and downtown NOW.
NORTH KING COUNTY	I support the overall plan, but the timing of the projects is very disappointing. Servicing the downtown and central Seattle neighborhoods like Ballard and West Seattle should take priority over extensions into the suburban areas. This would do more to appreciably reduce congestion than the current plan, and service larger segments of the population more efficiently. Reconsider the timing of ST3's light link expansions.  It'd be great to have a Ballard to UW section in this plan as well, not simply as an exploratory study. This needs to happen.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Have you seen the development in Ballard? It's growing at an intense pace. 22years before light rail arrives there in the plan? Bummer.
NORTH KING COUNTY	I think that the focus of this plan should be on getting more transit for Seattle city neighborhoods. The idea that it will take 22 years for the light link to reach Ballard is incompetent planning. Ballard is growing in population rapidly, and needs improved transit options. We need transit where people are living. I have worked both in SLU and the University district while living in Ballard and have time and again had buses that were too crowded (sometimes I had to wait for multiple buses just to fit) and long commute times. The buses to downtown are also extremely crowded and there are not enough of them. I think that Seattle is a wonderful city that is expanding and changing in great ways. We need to really focus on what we can do now to improve our city. This means we have to really think about what is best for our residents right now, and right now the neighborhoods in the city Ballard, and West Seattle need better options. If new light link stations are made at these locations they will immediately be in use because the people that live there are in serious need of better transit. I understand that this is a complicated position to be in, but I think that the current plan is not taking the current reality of the transit situation into account. We need transit where people are living first, then we can move out towards less populated areas. The people that are currently living in the city are already using and paying for buses and the light link, we deserve not to wait two decades for something that we need now. Also building a light link rail at grade level to Ballard is ridiculous. It may be cheaper but that shows poor judgement in planning. Why waste money on something that is actively a bad choice? We have the opportunity to improve our city, why not make the best system we can? Seattle deserves better.
NORTH KING COUNTY	I would like to see greater prioritization of transit options within Seattle, including the Ballard options but also greater expansion of Light Rail throughout Seattle (including to North Seattle and West Seattle).
NORTH KING COUNTY	Light rail needs to come faster, why the glacial pace? I know the funding is restricted, but anything to prioritize delivering light rail quickly would be better than waiting 25 years.  Also, run light rail as fast as possible, I think running with traffic on MLK was a mistake and makes rides south seem very slow.
NORTH KING COUNTY	Ballard to downtown has highest ridership and provides most benefit. To put this project 22 years out is not acceptable. I will cast my first no vote on transit if this is not changed. I support paying for good timely transit. But ST3 is not it.  Ballard to UW is second most important and is not even addressed be ST3.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	I really wish to see better service to the Lake Forest Park area. At this point when bus drivers are short 522 simply drops busses which has the effect of extending the wait by another 25 minutes. this makes taking the bus very unreliable if one has to be somewhere at a certain time. Planning for a skipped bus also is not leasable as the buses already only come every 30 minutes. In addition Bothell Way has become extremely clogged up as a lot of people use it to avoid the only for the wealthy tolls on 405. Really I think some of the toll money should be used to improve public transport as 520 has been basically built for the high wage earners and wealthy exclusively
NORTH KING COUNTY	It would be good if the Ballard light rail could be much sooner--this area of the city is booming and growing very rapidly.
NORTH KING COUNTY	Light rail to Ballard should be grade-separated the whole way and built ASAP. Light rail UW-Ballard should at least be studied (even better, built). Light rail to West Seattle should not be a priority, and could be replaced with BRT.
NORTH KING COUNTY	I'm generally in agreement with Seattle Subway's proposal here <a href="http://seattletransitblog.com/2016/03/31/how-to-fix-st3-so-seattle-will-vote-for-it/">http://seattletransitblog.com/2016/03/31/how-to-fix-st3-so-seattle-will-vote-for-it/</a> Sppecifically, speeding up the Ballard and West Seattle routes, having a fully great separated route to Ballard, and studying further LRT routes within Seattle.
NORTH KING COUNTY	Bring the light rail to Ballard in less than 10 years
NORTH KING COUNTY	As a non-driver, my ability to navigate Seattle over the last three years has been significantly limited due to the time cost of public transit and the financial cost of private transit services. My hope is to see a plan with increased North Seattle neighborhood access (Lake City-Ballard-Wallingford rapid buses and/or light rail). I would also like to see broader payment options. Currently, Orca card stations at Northgate are shut down, which is a transit barrier. I would like to see a transit app, such as Tri-Met uses in Portland. Most ideally, I would like to see Lake City/522 connected to the light-rail system. Light-rail connection in Lake City would reduce traffic times for many commuters, improve neighborhood livability, and increase accessibility for many in that location and nearby neighborhoods.
NORTH KING COUNTY	<p>As a Seattle resident, I am completely disappointed by the proposed plans for future light rail projects within the city. Ballard to downtown in 2038 is inexcusable, as is the lack of an east west link between Ballard and the University of Washington. I understand that we need to be seeking votes in other areas of the region, but building lines outside of the city core shouldn't be the main focus right now. please work on establishing the inner city high demand routes, and provide better bus service to Everett, Issaquah, and Tacoma. Ballard was the project with the highest estimated ridership, so it should see that reflected in its completion time.</p> <p>I do not plan on voting for this proposal with the current estimated timeframes for the Seattle projects. I also do not plan on voting for a proposal which places downtown Seattle to Ballard at grade, and doesn't have a Ballard to UW east west option. These are compromises that do will not give Seattle the best service.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Ballard and west Seattle should be the first to be completed. 17-20 years is too long. Congestion of people who live within the city who don't have timely, reliable and adequate transportation and have to drive is what makes traffic stand still on I-5 through the city. We need to fix city proper before we put money into expanding outward. I have lived here 6 years and have gone from riding the bus to driving every day because the buses are full and passing my stop during commute times because it is filling up in Ballard before it even reaches me. I live on a line that comes every ten minutes and it's still full. Ballard has grown too fast, we need a solution fast. Similarly I have a coworker that lives in west Seattle that drives because of the same problem. And all his neighbors do the same. Help those that already have been living here for a long time before making it easier for those living outside the city to get here. Or find a way to do it all in half the time.
NORTH KING COUNTY	What happened to light rail stops in Queen Anne and Fremont? You already serve interbay with the D line...
NORTH KING COUNTY	Build the Ballard line first!
NORTH KING COUNTY	Please make it less expensive and focus on areas driving highest congestion
NORTH KING COUNTY	I understand that every local agency wants to prioritize their own area, however, I think it's more necessary to build the trunk for the light rail system before starting to work on spurs. Therefore I recommend building the EVERETT extension BEFORE or concurrent with the BALLARD and WEST SEATTLE segments. I don't know specifics about the BALLARD or WEST SEATTLE segments but I've heard talk via newspaper articles of a BRT line to the Boeing area in Everett and having the light rail follow I-5 instead of having a light rail segment go past Boeing. I would counter that proposal with a proposal to make the EXISTING BRT lines to BALLARD and WEST SEATTLE more RELIABLE and build the EVERETT extension through Boeing WITHOUT the BRT service to Boeing. If Sound Transit was serious about this BRT route to Boeing then it should have been formally brought forward in the draft plans. Since it was NOT, then I assume that there is a reason you don't think this is viable project although it is VERY NECESSARY since it is a HUGE employment center.
NORTH KING COUNTY	I think the order of some events should be reversed.
NORTH KING COUNTY	Prioritize light rail development over bus. Especially, new Ballard and West Seattle lines. 22 years is a long time to wait (22 years ago Amazon didn't even exist!)
NORTH KING COUNTY	I think Ballard light rail will be constricted by a movable bridge, given the amount of boat traffic in the area.  Also, a faster development timeline would be desirable.
NORTH KING COUNTY	BRT and shoulder running busses should be prioritized to relieve traffic on freeway corridors and increase reliability of these routes.
NORTH KING COUNTY	Do it faster. 22 years for more light rail in major Seattle residential areas? This is laughable.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	While I generally support all transit investment. I feel that this plan focuses too heavily on mobility of suburban commuters and not enough for diverse areas within the City of Seattle. There is no station serving South Park, Georgetown, White Center, Renton, cross town movement from Ballard to the U District etc. This plan seems to serve on portion of the regions population (white suburbanites) not those within the city that currently rely heavily on public transit.
NORTH KING COUNTY	Any way to speed this up? Given the pace of population growth I believe expanding transit is going to be THE most effective pressure valve to ease the housing affordability problem. We needed this yesterday.
NORTH KING COUNTY	Putting light rail on 15th Avenue W, whether at grade or elevated, would be disastrous for vehicular traffic. The much better option is the line west of the BNSF tracks and a tunnel under the ship canal ("West is best", per City Councilmember Sally Bagshaw). It should be constructed before the downtown to West Seattle light rail line, which will be on a new bridge parallel to the existing West Seattle Bridge and hence will not disrupt traffic. It will also provide a means for Magnolia residents to get to and from their homes after the Magnolia Bridge is destroyed in the predicted earthquake which is now over due according to scientists. That Bridge has the same vulnerability as the Alaskan Way Viaduct.
NORTH KING COUNTY	Bring light rail to Ballard sooner than 22 years.
NORTH KING COUNTY	Expanding the light rail service should take precedence over expanding bus services. The lure of bus services is always the lower initial expense, however they never perform as well as imagined. Look at any other major city in the world, the cities with the most success have expansive light rail/subway transportation systems. Would Paris, London or New York City be what they are today without investing early in rail? – the answer is no btw.  Additionally, the timeline on deploying this plan seems laboriously and unnecessarily long. Portland, OR went from one light rail line in 2003 to over 53 miles and growing today. We should follow suit while we can.
NORTH KING COUNTY	West to East transit in Seattle is needed more at this point than North-South Extensions
NORTH KING COUNTY	The timeline for these projects seems far to long, especially the needed extensions within Seattle to Ballard.
NORTH KING COUNTY	Ballard and West Seattle projects should be accelerated. Their time horizons are too far out in comparison to the other projects.
NORTH KING COUNTY	You already have commuter rail with the Sounder. I do not believe Link should be another commuter rail. By adding park and rides at suburban locations with low density, this is just one more way to encourage people to live in unsustainable communities and commute to the city for work. This is not a sustainable way to increase our regional population. Park and rides are not compatible with light rail.
NORTH KING COUNTY	West Seattle and Ballard should have stations underground, they are too dense for elevated stations. A precedence has been set in Roosevelt.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Waiting 22 years for light rail to Ballard is a mistake. Growth in the form of multi- family developments (large condo/apartments)over the past 20 years is already putting a strain on the existing infrastructure. Developments are designed to limit cars by way of reduced parking spaces. To maintain a vibrant and healthy city, we need to invest in transportation to our fastest growing neighborhoods now. We have an opportunity to get ahead of what is sure to be continued growth. Waiting so long will be a mistake and surly a detriment to neighborhood businesses and residents alike.
NORTH KING COUNTY	I want to pay for this through my taxes but I don't think you have your priorities straight. Ballard and West Seattle are HUGE neighborhoods where downtown commuters live and where other folks visit for nightlife. Waiting 22 years for a Ballard lightrail just boggles the mind!!!! What planet do you people live on? I live in Interbay and it takes me 45 minutes to get home from downtown EVERY NIGHT. And callin the D Line "rapid" is a joke. Have you taken it at 8:30am? It's packed to the point you don't get a seat (so you have to stand) and it takes 45 minutes to drop me off 5 blocks from my office on 7th and Olive. So I don't use it.
NORTH KING COUNTY	More bike and ped access MOST important. If we can't get there why use it. Next. North seattle has been ignored enough. Greenwood to Shoreline need some serious light rail help.
NORTH KING COUNTY	The Ballard to downtown portion of the project should be a tunnel under the canal. I'm disappointed, if willing to wait for this sort of infrastructure. But I am emphatically not willing to wait for a [explicit] drawbridge that will be subject to the needs of boats moving through the canal. This portion must be modified, or I am really willing to vote against the proposal. Again, this drawbridge idea is [explicit], and should be regarded as [explicit]. Tunnel or no deal.
NORTH KING COUNTY	At grade improvements or lines are an unacceptable option for ST3, particularly on the Ballard-Seattle route. ST3 should only include below grade improvements on the Ballard route in particular due to the existing congestion on surface routes and the impracticality of a draw bridge over the ship canal. Additionally, a Ballard to U-District route would greatly increase East-West connectivity in the North Seattle region and should be given a higher priority.
NORTH KING COUNTY	I'd much rather see the following improvements than the existing plan:  <ol style="list-style-type: none"> <li>1. Improve existing bus services (speed and reliability) for 545 and current routes around capitol hill, downtown, SLU, Fremont, Queen Anne, and Ballard. This could include expanding routes to decrease travel time and number of transfers.</li> <li>2. Allow buses to transit faster on highways by using express lanes, shoulder, etc.</li> <li>3. Increase speed of development of light rail from Seattle to Redmond</li> </ol> Thanks!
NORTH KING COUNTY	The current plan for an at grade Ballard to Seattle route is a bad idea with current traffic. A stop in SLU and more transit in Kent would be nice.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Please prioritize the Ballard light rail. 22 years is ridiculous for how fast this area is growing. It is becoming very concentrated and the need for light rail here is high. Thank you.
NORTH KING COUNTY	I think we should place the highest priority on where the highest traffic is for commuting times. And that should determine the order in which things are prioritized. Is the highest travel (and congestion) from redmond to/from seattle and federal way to/from seattle? They are listed as being completed first as far as light rail. As well, I think light rail should take priority over rapid buses. My assumption is that the most needed areas are from the north and the south into/out of seattle.
NORTH KING COUNTY	More Sounder trains and have them run on weekends. More people would take them if they came more frequently and reliably like the light rail. The rails are already built. There could be a station somewhere in NW Seattle to capture some of the demand until Ballard light rail gets here.
NORTH KING COUNTY	Service to Ballard can't wait 22 years. Buses are overloaded, commutes take 30 minutes or more (it takes as long to get from Downtown to Ballard as it does to get from Downtown to Federal Way via transit), and this booming neighborhood will continue to add ridership steadily. We need more transit now!
NORTH KING COUNTY	The Ballard and West Seattle lines should have priority over Redmond and Tacoma extensions. The Ballard and West Seattle extensions offer much higher ridership.
NORTH KING COUNTY	Service to West Seattle needs to happen sooner than 17 years from now!
NORTH KING COUNTY	It is absolutely absurd that the line that will be most used (Ballard to Downtown) will be completed last and crippled with a drawbridge. SLU and Ballard will continue to grow at a tremendous rate, and waiting 22 years to build decent public transit will be missing a golden opportunity to build a more livable, human, car-free city.  It's a real shame to see ST3 focusing so heavily on distant commuters and not those who actually live in the city.
NORTH KING COUNTY	Please prioritize light rail to/from West Seattle and Ballard sooner. I would pay more taxes to have these services in 10 years rather than 17!
NORTH KING COUNTY	If LRT is truly our solution, and on the off chance a human actually reads this, one east-west line is not sufficient. Ballard-UW-520-Eastside (Using new bridge? Old bridge? Submerged tunnel?) would provide better crossing opportunities. Complete light rail ring around Lake Washington in Eastside rail corridor rather than BRT. Extend West Seattle line grade-separated through White Center to Tukwilia/SeaTac for faster downtown access to airport. Trains LRT trains overall need to go faster to remain competitive. Issaquah does not have near the population to warrant a spur.
NORTH KING COUNTY	I believe there is no need for an additional tunnel down town seattle. I think you should use the existing tunnel and add to it to branch off to go under Bell Town to get to Ballard. No need for another light rail tunnel under seattle.
NORTH KING COUNTY	Studies for Burien and North Seattle should be studied and added first before any other lines are added.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	The in-fill projects in Seattle should be prioritized and not built at the end of the plan in 22 years. They need to happen sooner. Sounder already serves Everett and Tacoma, getting the light rail to those destinations should come later than the Seattle projects that are desperately needed now.
NORTH KING COUNTY	While I support the plan in general the timeline is much too long. As a resident of West Seattle I have seen commute times go up dramatically. Seeing that "relief" is 17 years away at best seems ludicrous. Surely the time frame could be accelerated. There is a large amount of money be asked for already, why not just ask for more to benefit people now as opposed to when my children have already left the city. Additionally, continuing to fund projects like this through property taxes is basically a non starter. In the last year we have had many property tax levies and this just adds to the long list of taxes that we pay for our commute to get longer in the short term. Please revise the tax structure of the state instead of taxing property owners. I would be happy to pay a personal income tax to fund things like this. I am not happy that the City of Seattle and the State treat property owners like a piggy bank.
NORTH KING COUNTY	1) Light rail is slow and less than ideal for connecting cities. Sounder trains are faster and carry more people. More Sounder service between cities, more light rail within cities.  2) Capital improvements to bus service within Seattle and connecting to other cities.
NORTH KING COUNTY	Need to focus on Ballard and west Seattle rail. In general focus should be rail not buses. There are a lot of people, myself included, who would take rail but won't go near the buses.
NORTH KING COUNTY	More frequent and later north sounder arrivals between Eddmonds/Mukilteo and Seattle.
NORTH KING COUNTY	Light rail construction NEEDS to be expedited. 25 years?! I want to still be alive when the rails are completed!! Ballard to downtown should be fully grade separated. It's an extremely important project. We also need to provide complete funding of an Environmental Impact Statement (EIS) for the extensions from Ballard to UW and from West Seattle to Burien, and add both lines as "provisional projects" if additional funding becomes available. Funding study work for future lines, as well as funding 130th St Station, is also crucial.
NORTH KING COUNTY	Prioritize lightrail. Connecting downtown to West Seattle, Ballard, and the East Side are huge. I agree that as home prices continue to inflate in the Seattle Metro area, it becomes increasingly important to reach out to areas farther out. However, we can't expand our roads any more in the downtown corridors. We need subterranean lightrail.
NORTH KING COUNTY	With all the investment made with the new SR-520 bridge, I'd like to see more projects take advantage of the carpool lanes and widened bridge. Travel between East and West over the lake is a bottleneck that backs up the 405 interchanges with I-90 and 520, and I-5 with I-90 and 520.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>I don't understand why Bellevue has to be the hub between Issaquah and Seattle. From the very basic diagram ST has drafted, it looks like a lot of extra tunneling/track laying to run two lines from essentially Factoria to Bellevue which I estimate to be about three extra miles. From a commuter's perspective, this also provides for an unnecessarily longer commute. I currently live within walking distance of the soon-to-be Northgate station and I work in Issaquah. I'm not sure how long that commute would take on ST, having to go all the way up to Bellevue on each leg, but if that "detour" adds another 30 minutes to my commute, then I have to question if ST3 would even provide any time savings for me.</p> <p>Also, 22 years for full ST3 completion is just too long of a wait. A baby born today would just be graduating from college before he or she could use the transit expansion! My quick research shows I-5 in Washington state, all 276 miles, was completed in about 13 years. While I understand these two projects have very unique distinctions (tunneling, local versus federal initiatives) the region cannot wait an entire generation for infrastructure it needed 10 years ago.</p>
NORTH KING COUNTY	<p>Consider pushing forward the light rail to West Seattle and Ballard. Also Consider pushing forward the light rail between Seattle and Tacoma.</p>
NORTH KING COUNTY	<p>Light rail should focus on serving existing high density areas (Ballard, Downtown Redmond, SLU, Belltown, First Hill, etc.) and avoid long expansions into the low-density suburbs. West Seattle and Issaquah are probably better served by express buses and Rapid Ride.</p>
NORTH KING COUNTY	<p>Ballard above/below grade &lt;10 years, Ballard to UW below grade &lt;10 years. Metro 8 light rail also needs to be considered. We need better East - West lines yesterday. ST3 Issaquah route is not priority, Light rail along the 405 including Kirkland would be ideal if possible.</p>
NORTH KING COUNTY	<p>Fremont is still neglected in the new plan, despite it being a major destination and place of residence.</p> <p>The project is also being proposed as one large chunk with no options for completing some segments and not others. The plan should be split up into logical smaller chunks so that stakeholders can decide which portions are important to them, rather than approving one massive project and having to foot the whole bill at once.</p> <p>All in all, though, it does address the larger need, that the light rail system in Seattle needs to be expanded to be fully functional, to address the expanding population, and realize its full potential.</p>
NORTH KING COUNTY	<p>The faster you can build the full plan, the better. The current time line on the build out is too long.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Currently, there is are express lanes or HOV landes for the projects that are being listed as "first" on the priority list. I think focusing on the areas that have the MOST congestion (and no alternative for relief) to be looked at first. Like - Ballard (and the Ballard Bridge issue), West Seattle (and the Seattle Bridge issue). Focusing on areas that already have temporary solutions for those that come into the city - should be lower on the priority level.
NORTH KING COUNTY	the time lines for the projects sound extremely long, particularly for west seattle and ballard - 17 years? why so long? also, as a west seattle resident the rapid ride lines come more often and already service the junction. The 120 route has a higher ridership and those buses come less frequently, yet the light rail will skim Delridge and provide service along the junction. more attention should be paid to current bus frequency and ridership levels to assess where light rail is needed most in west seattle. Also, if the cost will be \$200/year per resident, what will the costs be to ride the light rail? Is the estimated \$200/year going to be forever, or for a designated period of time until the project is paid for? These are all questions that should be made clear when we go to vote on this.
NORTH KING COUNTY	It's a waste of money to do bus service along the whole 405 corridor. The ST3 plan should have a north-south light rail route instead, along a smaller section of the Eastside that goes through dense neighborhoods that people actually live in, where they can walk to the stations. Hardly anyone will use a bus route that requires them to go to stations on 405.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>I have two comments, one about the overall timeline of ST3 and one about the proposed stations at Graham St and near Boeing Access Road.</p> <p>Timeline: I'm thrilled that ST chose to ask for a big package all at once that completes the light rail system and gives voters in the entire district something. This is the right approach. However, the proposed timeline is simply too slow. I think the media and others have already sent this message, but I'll reiterate: the traffic is bad NOW. Tens of thousands every year are moving to Puget Sound NOW. In 25 years many if not most of the people voting on ST3 will probably either be dead or live somewhere else. The key to fixing this is probably getting creative with the financials. I don't know if the answer is asking the legislature for more bond authority or what, but you've got the right package, and the price, while large, is doable. But we need ST3 to come much sooner.</p> <p>Graham St and Boeing Access Road Stations: I live within a quarter mile of the Columbia City light rail station, and I work at Boeing at 9725 East Marginal Way S. And I would not use the Boeing Access Road station were it to be built. Why? It's still quite a walk to get to work, and it simply would still be more convenient just to drive. The south Seattle to Tukwila commute is currently well-served by roads; there isn't much traffic either direction any time of day, and there's convenient free parking everywhere you'd want to go around the vicinity of Boeing Access Road. The only reason adding this station makes sense is if there's a large projected number of people in the Tukwila/Burien/SeaTac area not well-served by the Tukwila Intl Blvd station that would park at the Boeing Access Road station for a commute to downtown (or Bellevue or one of the other places the light rail system will serve in the future). Otherwise, this station will simply add travel time to every destination south of it (including the airport) for EVERYONE ELSE using the light rail system, which is not an improvement.</p> <p>Regarding the Graham Street Station, I think putting a station half a mile away from the existing station at Othello also doesn't make sense. That kind of station density makes sense near downtown where the population density justifies it, but in the Rainier Valley adding a station so close to an existing station will simply add transit time for the many thousands using the light rail system while only benefitting the small number of people who are now at most half a mile closer to a light rail station than they were before.</p> <p>I worry that with so many stations already on the south Seattle line adding more will create the problem of slow travel times that transit is supposed to help solve. The Northgate to Westlake line will be several miles longer than the trip from Columbia City to</p>
<p>NORTH KING COUNTY</p>	<p>I support Seattle Subway's proposals: <a href="http://seattletransitblog.com/2016/03/31/how-to-fix-st3-so-seattle-will-vote-for-it/">http://seattletransitblog.com/2016/03/31/how-to-fix-st3-so-seattle-will-vote-for-it/</a></p> <p>Expediting the construction of light rail is absolutely essential. Grade-separating the Ballard-Downtown portion is very important. The overall plan should also include provisions for complete funding of an Environmental Impact Statement (EIS) for the extensions from Ballard to UW and from West Seattle to Burien, and additions of both lines as "provisional projects" if additional funding becomes available.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Fishes should be on only rail, not BRT. We need rail on 405 corridor and from Seattle out to Everett, North Bend, Auburn and Tacoma.
NORTH KING COUNTY	<p>With increasing tech hub development in SLU (Amazon, Google and Facebook all expanding significantly) in the coming years, the Mercer Mess seems like it will only get worse. I'd put a focus on connecting Ballard via rail much sooner rather than later in order to alleviate and bypass some of that.</p> <p>Waiting 22 years for light rail to Ballard while farther flung areas get connected sooner is just crazy!! (Not that I don't appreciate the 28X and the D, but I spend a lot of time on them just waiting for them to get out of the north downtown area.)</p>
NORTH KING COUNTY	<p>Needs to be delivered sooner. This is too long to wait, and I'm willing to pay a little more to get out of GD I-5 traffic. \$200 a year? Take it. Please. Just go faster.</p> <p>And no, I'm not rich.</p>
NORTH KING COUNTY	Light rail service to West Seattle and Ballard would benefit the most people and reduce congestion in downtown Seattle and should be the highest priority. Seattle voted for a mass transit system to West Seattle in 2002 and we are still waiting for anything to be built. West Seattle has one of the highest population in Seattle and also one of the highest density and yet we have NO mass transit.
NORTH KING COUNTY	The projects with the highest immediate impacts to freeing up surface streets around the Seattle core are the ones with longest margins. Yes, we should have done this 20 years ago. The success of the Capitol Hill and UW stations demonstrate that if you build reliable off-grade transit to places people want to go - People. Will. Use it. We see big cities all over the world building out hundreds of miles of rail every year - and yet it takes 25 years for us to built out 4 miles? That's simply unacceptable and far too long. Sound Transit has demonstrated that they can work much more quickly and efficiently than that, and a faster build out the high-impact high-visibility projects to benefit the people paying the most in property taxes will only serve to get more buy-in in the future.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>I personally would like to see more projects within the Seattle area, for those many who have no alternative transportation other than public transportation, rather than the majority of the projects I'm seeing- that are linked to the suburbs and prioritized over the Seattle projects in the timeline. The suburbs by their nature, are most often made up of residents who commute, but have the resources for personal transportation and I would think less likely to give up that luxury - lower adoption rate.</p> <p>Lightrail to West Seattle and Ballard I heard were planned to be at-grade. Wondering why that design was selected, being slower, and potentially hindering adoption rate.</p> <p>Was there any consideration to have the competitive industries help fund this project? If companies are looking to draw talent to Seattle, I think it would be in their interest to help fund infrastructure that will make the area more appealing for prospective employees.</p> <p>Last comment, no plans to further develop water transportation in the area? Where we lack room for roads, we've got plenty of water :)</p>
<p>NORTH KING COUNTY</p>	<p>Support expanding link in Seattle prior to expanding to Lynnwood and Tukwila</p>
<p>NORTH KING COUNTY</p>	<p>Prioritize Ballard and West Seattle. Also, be realistic with your timelines. The current timelines are too pessimistic to fail</p>
<p>NORTH KING COUNTY</p>	<p>The time lines for the light rail projects are just completely unacceptable. 12 years out for the first ST3 light rail project? That's ridiculous. I am a huge, HUGE supporter of public transit but this frankly is an impossible sell to skeptics who wonder why they should pay all this money for something they'll see almost no benefit for in their lifetime.</p> <p>Also, the 130th St station is an absolute deal breaker for those of us in north Seattle. It should have been included in ST2, and definitely needs to be in ST3.</p>
<p>NORTH KING COUNTY</p>	<p>I strongly oppose any plan of this magnitude that does not include light rail from downtown to Uptown, to Upper Queen Anne to Fremont, to Ballard. Light rail must serve the community centers that people actually want to go to. Central Seattle traffic is bad, it can only be alleviated by trains, and I would like to see ST3 acknowledge this. Light rail to Ballard is missing a big opportunity by traveling through Interbay. We don't need rail in Interbay. We need to be able to move between core communities quickly. This was addressed in your study of potential corridors to Ballard, last year, when nearly 70%+ of respondees voted for the route that went to Fremont, Uptown and Upper QA. I cannot support a plan that gets everyone to downtown Seattle without allowing people within Seattle to move more freely. Thank you.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	I strongly oppose any plan of this magnitude that does not include light rail from downtown to Uptown, to Upper Queen Anne to Fremont, to Ballard. Light rail must serve the community centers that people actually want to go to. Central Seattle traffic is bad, it can only be alleviated by trains, and I would like to see ST3 acknowledge this. Light rail to Ballard is missing a big opportunity by traveling through Interbay. We don't need rail in Interbay. We need to be able to move between core communities quickly. This was addressed in your study of potential corridors to Ballard, last year, when nearly 70%+ of respondees voted for the route that went to Fremont, Uptown and Upper QA. I cannot support a plan that gets everyone to downtown Seattle without allowing people within Seattle to move more freely. Thank you.
NORTH KING COUNTY	I live in Bitterlake, and currently a plan is being developed for a light rail station on 145th. My current issue with this plan, is the lack of space for pedestrian foot traffic to the station. in a few stretches of the street there are no side walks, or the sidewalks are too narrow.  I walk my daughter to school almost every morning, and when we get to greenwood ave between 145th and 140th there are no sidewalks on the portion we walk on. We have to walk on the shoulder of the road. I'm all in for the price to expand transit, but really want investment in sidewalks for foot traffic in the neighborhoods.
NORTH KING COUNTY	Prioritize Ballard to UW fully separated from grade, and completed as soon as possible to serve the most riders.
NORTH KING COUNTY	Why not include the Link along the I 405 corridor instead of buses? It will make changing trains much easier. A broadened comprehensive bus/rail plan for The Puget Sound area is important for getting people off streets and onto the Link. The expansion of Link has made a huge difference for ease of getting around. This greater expansion plan will encourage us to use mass transit and I think you will hear a collective sigh of relief when it is finished!
NORTH KING COUNTY	West Seattle rail should continue to Morgan Junction.
NORTH KING COUNTY	I think we should be worrying less about getting light rail go communities that already have heavy rail in place (like Everett). I can't think of any other mass transit system that goes that far out, and there's good reason for that.  The money would definitely be better spent in Seattle proper. Neighborhoods like South Lake Union should definitely be on the plan, as Amazon is making traffic much worse there. Also, we need more East-West options!
NORTH KING COUNTY	Light rail access in the city NEEDS to be the priority. Getting around Seattle, even in off-peak hours is a congested nightmare. The fact that you want to wait 20+ years to link Seattle neighborhoods by rail would be laughable if it wasn't for the prospect of the nightmare traffic is going to be in 5-10 years.
NORTH KING COUNTY	I feel we should start rail service first in West Seattle and Ballard. We can use the existing rail line to save cost and this would cut down on traffic quickly. From there branch out and build the other lines. I feel everybody deserves the option to have great public transportation in the Seattle area but I feel the city of Seattle should be first in creating the rail line.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	It is absurd to wait for light rail in Ballard for 22 years (which would actually be 30 years with delays). I will be retired by then- my children will have graduated from college (in preschool now). What is my incentive to approve a measure that will never benefit me? The timeline needs serious work. I am highly supportive of expansion of public transportation- I am an easy YES, but this plan makes me hesitate. Will the plan be outdated by the time it is implemented?
NORTH KING COUNTY	The 25 year time frame is ludicrous for a \$50 billion with a B project. First and foremost traffic in and around Seattle should be improved then leading out to the outlying areas and why does it take so long to put down light rail lines? Why would it take 8 years for bus rapid transit to be added? Can't the tax burden be shifted slightly to say .1% on the sales tax to lessen the continual burden that home owners pay?
NORTH KING COUNTY	I strongly believe that we should prioritize light rail within the city of Seattle, as soon as possible. This would mean speeding up the timelines for the Ballard and West Seattle lines, and also adding additional lines and stations within the city. I believe that rapid transit between downtown Seattle and surrounding suburbs and cities (Tacoma, Bellevue, Redmond, etc.) is only useful if people can get around Seattle once they arrive; otherwise, they will still have a strong incentive to drive, rather than take trains. Please do everything you can to increase light rail lines in Seattle and speed up the timelines. We need them NOW!!!
NORTH KING COUNTY	We don't need light rail to W Sea. The rapid transit buses do just fine. Ballard need light rail yesterday. That should be moved up. IMHO
NORTH KING COUNTY	17 years to provide light rail service to West Seattle is too long. I will NOT support this proposal unless the time frame is accelerated.
NORTH KING COUNTY	I do not like that it will take so long to complete the light rail lines to Ballard and West Seattle. That is simply too long! Why is Sound Transit spending so much money on free park and rides? The money would be better spent building rail than parking. Also, the proposed plan leaves out the Ballard to UW line. Currently, Seattle has no West to East link for light rail. I am skeptical about supporting a plan that prioritizes light rail to downtown Redmond over rail to Ballard. You need to fix the timelines for Seattle.
NORTH KING COUNTY	Light Rail to Ballard MUST be grade-separated and not have a movable bridge to cross the ship canal. Aside from the reliability issues of crossing traffic and waiting for drawbridges, Seattle voters may not think a plan that makes them wait 20+ years for rail and doesn't even do it right won't be worth voting for, and that would doom the plan for the entire region.
NORTH KING COUNTY	Deprioritize parking at stations. Emphasize transit connections wherever possible.
NORTH KING COUNTY	RapidRide capital improvements need to be detailed -- right now they're so vague as to be useless for informing my decision on the package. I hope to see full bus lanes from West Seattle Bridge onramps such as Avalon all the way to downtown -- anything less would not be BRT, obviously. I believe these improvements would have the best bang for the buck of almost any transit project in the region and could be implemented very soon.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	light rail to U District, Northgate, Ballard, West Seattle should be prioritized. light rail should be prioritized over busses that are subject to traffic jams, and cost should be placed more on all motor vehicles in the state of washington (people register their cars in cheaper counties), tolls on highways and freeways passing through Seattle, and not as much on the property tax, since all users use; not just property owners. Thank you, Seattle Homeowner
NORTH KING COUNTY	Love the overall plan but please rapidly speed up the timeline on Ballard (22 years!?! ) and West Seattle -- this needs to happen ASAP!!
NORTH KING COUNTY	Focus should be on getting the light rail across the two bridges; 520 and I90 and allow bikes on the light rail trains so people can cycle to and from light rail stations.
NORTH KING COUNTY	I would love to see a line that goes east west through Seattle. I also would love an earlier completion of some of the lines. 25 years is a long time down the timeline!
NORTH KING COUNTY	<p>First and foremost, I believe it to be a mistake to attempt to create a "regional light rail system." It makes much more sense to focus on increasing light rail coverage in the densely-populated innercity areas, such as the way many cities in the Northeastern US have done. We already have existing high-capacity transit options (e.g. the Sounder and express buses), which are much better suited for linking the various cities in the Puget Sound region.</p> <p>I'm also heavily opposed to constructing any portion of the light rail system where it does not have a dedicated right-of-way. This could only serve to make trips via light rail slower and less attractive than other modes of transportation, and I would not vote yes for a package the proposes surface-grade alignments where there are potential conflicts with cars. A working example of this is the existing Central Link alignment through Rainier Valley. Trains in this area must slow to a crawl, making the trip between Sea-Tac Airport and Downtown Seattle much longer than it needs to be. In a nutshell, do it right, or don't do it at all.</p>
NORTH KING COUNTY	Sales Taxes are really regressive. I would be more in favor of this plan if it relied only on the other sources of revenue
NORTH KING COUNTY	I understand the need to build a strong LINK main line, which has been currently under way for the last decade with in the Seattle city limits. The prioritizing of some of the LINK projects not connected to the mainline needs to be considered, specifically in Ballard. This is one of Seattle's fastest growing neighborhoods, to have to wait 22 more years to see LINK service there is not acceptable. LINK service should be prioritized to come to Ballard with in the next 10 years. Many will not like the short-term disruption, once it is finished the long term benefits will far out weigh the inconvenience of the disruption the studies and the construction bring.
NORTH KING COUNTY	Ballard from SLU and downtown should NOT be street grade along 15th! Priority for study, plan and construction is needed for alternatives as well as financial priority. The time frame should be advanced for the Ballard access project. Thank-you.
NORTH KING COUNTY	Should focus more on connecting ballard, downtown and u - district areas before expanding to Everett Bellevue and Tacoma

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	All Light rail in the Seattle area should be below grade as to not cause increased congestion on road ways in the city core.
NORTH KING COUNTY	520 light rail please!
NORTH KING COUNTY	Ballard and West Seattle projects should happen faster. 17 years?! 22 years?! It's better than nothing, but that seems like forever.
NORTH KING COUNTY	If adding a station at 145th in Shoreline, it is going to cause serious traffic problems. Without the link there now there are already serious problems & traffic delays due to back up of people heading I5 South. The link will only cause more congestion to an already bad area. Please put link station at 130th where it is not as busy
NORTH KING COUNTY	Ballard and West Seattle should come first!
NORTH KING COUNTY	First, the Denny Way station should be moved a few blocks east to Fairview so that it is more accessible to Cascade and all the new towers going in. Second, if we can't afford a full grade separated rail system to Ballard maybe we should build a bus tunnel and upgrade it when we can.
NORTH KING COUNTY	Downtown to Ballard needs to connect to Northgate.  The whole thing needs to be done sooner. I've decided I will NOT vote for extensions that take 30 years to fulfill. Get it done faster or forget it.
NORTH KING COUNTY	All studies should be performed first and then the entire line from Downtown to Burien via West Seattle should be considered. Likewise, all north Seattle (Bothel, Lake City Way, Kirkland, Kenmore and et) should be studied and then be included with a Ballard-UW line.
NORTH KING COUNTY	It just disappointing we can't have light rail where there are planned rapid bus services. I realize it would take longer and cost more, but even if it were broken up into different projects it would be totally worth it. Busses will always in some way be bound to our horrible traffic. You just can't avoid that, unless it's on a dedicated rail. That kind of vision is what's needed in our growing city.
NORTH KING COUNTY	The order of projects in #12 is what I don't like. We need light rail to Ballard now, not in 22 years! If you changed the order of projects focusing on those closest to the downtown area (Ballard & West Seattle) and moved outwards you'd have more support.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>No credible transit planner would have dreamed up this [explicit] sandwich of projects.</p> <p>UW/Ballard is a must  Metro 8 subway is a must  Issaquah to Seattle via one seat ride is a must</p> <p>Please fix this project list if you want this to pass. West Seattle LRT is DOA - total waste of money. Paine Field is a waste of money. Issaquah is only worth doing if you go through Mercer Slough to get downtown.</p>
NORTH KING COUNTY	<p>25 years is too long. We need rail now. I would only support a project that was less than 15 years. Rail (with own access - not on roads) should take priority. Stop with adding buses into transit programs. We've voted for buses over and over and over - enough already. We need a 10 to 15 year plan with extensive light rail. I don't mind paying more in taxes. My only concern is on the sales tax - it's starting to push 10%. It's getting a little out of hand. I would support 1) car tab tax, 2) property tax, 3) \$.50 add on to all bus and light rail for use on future build - but goes away after 15 years, and 4) increased bridge tolls to pay for light rail - on both I-90 and 520. Also, why are we not selling BONDS to pay for transit? No mention of that in the plan. I will vote for light rail only if it's a short term plan.</p>
NORTH KING COUNTY	<ol style="list-style-type: none"> <li>1. SR 522 BRT needs to serve Lake City, rather than 145th Street.</li> <li>2. All new stations need to have integrated bus transfer capabilities and potential layover spots. A bus service scenario describing concepts of replacing parallel bus routes needs to be presented to demonstrate aggregate transit subsidy savings for taxpayers.</li> <li>3. All stations need to anticipate accommodating driverless transit shuttle vehicles, shared vehicles and dropoff/pickup vehicles.</li> <li>4. Pedestrian improvements should specifically include down escalators at existing and future stations wherever there are more than 20 steps as well as up escalators.</li> </ol>
NORTH KING COUNTY	<p>Ballard to U-District line should be added rather than studied as part of ST3</p>
NORTH KING COUNTY	<p>Please allow local add in's to projects where local municipalities would like to contribute more to have their projects funded and completed sooner, aka Downtown to Ballard, West Seattle to Downtown, I'm sure Seattle residence would be willing to chip in more to accelerate those.</p>
NORTH KING COUNTY	<p>Ballard should have a higher priority! I don't want to wait 22 years to take the Light Rail from Ballard to the UW Husky Football Stadium!!! Also, taking Ballard light rail to West Seattle would be a higher priority too!!!</p> <p>Light rail is far superior transportation than Busses! Hurry up to Ballard!</p>
NORTH KING COUNTY	<p>I think a light rail line from Ballard to UW (and onward to Capitol Hill) is much more important than a line from Ballard to downtown Seattle. The rapid ride and number 15 line already take people quickly downtown, but it is difficult to traverse the city to the U District (the 44 is very slow) and getting to Capitol Hill via transit can take more than 1.5 hours.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Replace Paine field connection on light rail with BRT. Bring Ballard to downtown before West Seattle to downtown
NORTH KING COUNTY	BALLARD should be prioritized. It's at the end of the list right now, and that is not OK. There is tons of traffic in Ballard and Ballard residents want and will use transit. If only outside of Seattle is prioritized, I am far less likely to support it.
NORTH KING COUNTY	The Light Rail to Ballard and West Seattle should be prioritized above the other Light Rail extensions.
NORTH KING COUNTY	It seems like adding a Tukwila station would be comparatively easy/fast. Why is it one of the last additions?
NORTH KING COUNTY	The idea that you would put forth a plan to have at-grade rail to Ballard by 2038 is absolutely insulting and I will be voting NO to this proposal despite the fact that our city desperately needs mass transit. I can almost see the rationale behind the timeline, though, I don't like it. I get that connecting the suburbs is a priority for you even though in-city transportation is awful. However, the audacity to think you could float a plan for at-grade rail to and through Ballard is just plain stupid. Full stop.  If you fix that part, and include a plan for grade separation through Ballard, I might consider voting yes.
NORTH KING COUNTY	I think we don't need a rail system to issaquah. I think they need to make drastic changes to SR 522 asap. In rush hour, I go from downtown to north seattle and on a bad day, it can take 40 minutes to go to north seattle.
NORTH KING COUNTY	I strongly support all of the light rail and sounder phases of the project plan, but am skeptical of the bus phases of the plan , especially use of shoulders since the fiasco on I-405, and I do not even drive there.
NORTH KING COUNTY	Ballard should be built first
NORTH KING COUNTY	Light rail projects involving the connection of neighborhoods within the city of Seattle should have priority over expansion to the suburbs and surrounding cities.
NORTH KING COUNTY	The inner-city projects might need to be sped up on the timeline as population density rises and traffic, which is already a huge problem, increases.
NORTH KING COUNTY	Ballard to UW lightrail should be included. Need buses along Delridge, White Center, and Admiral to be modified around the Junction if you want make a California Ave. SW West Seattle alignment equitable for access. I'm worried no lightrail to Kirkland will lead them not to vote for the overall package; then again, so many there seemed not to want it that maybe the BRT will satisfy them. In South King please focus on developing AWAY from I-5 and in such a way that pedestrians and bikes can get to the station easily and safely, not just acres of parking lots. Otherwise this will come back to bite us a few decades down the road when this is all actually complete.
NORTH KING COUNTY	West Seattle and Ballard should be prioritized, due to rapid increases in commuter population, concentrated in those communities.
NORTH KING COUNTY	Pease prioritize speedier construction of light rail up and down the I-5 corridor and throughout Seattle as this is where the most congestion is. It's easy to drive east and west in Seattle, but it's north and south that is troublesome during peak hours.
NORTH KING COUNTY	Prioritize the projects that are needed. The cost of \$200 a year is crazy.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	The Boeing Access Rd Station is a deferred station from ST1, not an infill station. People made investments in the vicinity based on the planned station. The station should be categorized as such: Deferred original station. Given this fact, it should be prioritized on the timeline--adding the station to the existing line should be completed in the near-term.
NORTH KING COUNTY	Light rail is great but I think the focus should be on moving people around within the city first (make it easy to get from one neighborhood to another). Right now there's a big focus on moving people through or into the city, which I disagree with. There should be a higher priority for stops in each major neighborhood in the city (Ballard, Fremont, Greenlake, West Seattle, Maple Leaf, etc.). Also, light rail should be the priority (not buses or bus lanes or carpool). Finally, all light rail should run in its own corridor (no sharing roads or bridges with cars).
NORTH KING COUNTY	Less money dedicated to Park and Rides (I heard a report that \$1 Billion of this plan is dedicated to building parking garages). Light rail in Seattle proper must come sooner, ST3 will lose significant support in Ballard and West Seattle because of these long timelines. We already have a North / South option with Sounder Trains....why not increase frequency in fill-in stops on the Sounder as opposed to building a light rail extension running parallel to Sounder?
NORTH KING COUNTY	22 years from Ballard to downtown is too long. Really? 22years!? I'll could be dead by then. This plan needs to be modified.
NORTH KING COUNTY	Traffic getting into, through and out of downtown Seattle is atrocious, particularly anything crossing the area east/west. With the station already up and running to the University District, a station in the Ballard area is what is essential to help alleviate that congestion further and MUST occur before 22 years is up! That is ridiculous. Light rail should be considered for the 522 corridor around to the Redmond/Bellevue area.
NORTH KING COUNTY	We need a way to connect West Seattle to Ballard and to the airport.
NORTH KING COUNTY	There is too much focus on serving a huge area and not on moving the most people.
NORTH KING COUNTY	The extension to Ballard should not be at grade. If it is at grade, the extension should have right-of-way and not conflict with traffic.
NORTH KING COUNTY	Priority needs to be given to getting Light Rail to Ballard. That should be issue #1 and one of the first projects completed along with improving mobility on the Eastside. As seen with U-Link ridership, Sound Transit underestimates the demand for its services in the City of Seattle. The incredible levels of use of Sound Transit services in Seattle and to/from Bellevue would help pay for and cover any financial shortfalls when expanding ST to regions where it is used less. I can understand that SoundTransit wants to secure non-Seattle support for ST3. Waiting 22-25 years to complete what would be its most profitable line would be a serious error as it opens up the option for Seattle to go it alone and cannibalize ST revenue.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	As the region grows people are moving into the city more than moving to the Suburbs. I love the light rail project and have been an advocate for it, but as of yet it does not benefit me at all, and will not for 25 years. Before extending the light rail outside of the city limits lets connect our neighborhoods within the city first. There needs to be more east west routes within Seattle. An example would be a loop from Westlake, to Queen Anne, to Magnolia, to Ballard, to Fremont, to Wallingford and connecting to the Brooklyn station at UW. That would start allowing people to actually use the light rail.
NORTH KING COUNTY	This plan has many excellent features but most are needed immediately. Likely, by the time these improvements are fully implemented, they will have been outgrown. We need a simple system that can easily flex to accommodate fluctuations in population - obviously including rapid growth. The Sounder Rail infrastructure is already in place and would need minor investment to improve capability compared to a new light rail system. Although improving the rapid bus capability is a great short term solution, buses must still use the existing highway/roadway system and will continue to contribute to the I-5 corridor congestion. Allowing traffic to travel on the highway shoulder is unsustainable - Honolulu is perfect evidence. Although it may help temporarily increase the throughput on a highway, any traffic accidents will bring the flow to a halt. Furthermore, once you exceed the maximum throughput on the shoulder, there is no room to grow. I am an advocate for a light rail system but due to the high cost and long timeline, I would strongly recommend the planning team consider an alternative such as an elevated rail system. An elevated rail may follow our highways or easily navigate our downtown hills. If the system were common across the whole Sound, a visitor or resident could easily manage a trip from Tacoma to Everett without having to change modes of transportation multiple times. The pillars and supports for a well planned system may be constructed off-site and installed with minimal interruption. Elevated rails make the most efficient use of the resource in highest demand in Seattle - surface area. Bottom line, our area is known for developing creative solutions to local problems as well as global innovation across many industries. Why shouldn't our public transportation system be just as innovative?
NORTH KING COUNTY	West Seattle and Ballard plans for light rail should be planned much sooner!!
NORTH KING COUNTY	<p>Front load and improve and increase planning for areas with already high density that are growing, such as Lake City, Bitterlake and First Hill.</p> <p>Suburban sprawl should not be incentivized by continuing the planning for the misguided spine to nowhere.</p> <p>Where there are a high density people, you should build transit. Skip the political nonsense. Just build a good, high capacity network that works.</p>
NORTH KING COUNTY	Studies for Burien and North Seattle should be done first. Burien and West Seattle should be done as one line. Bothell, Sandpoint, Kirkland and UW-Ballard should be done as one project.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	I think the immediate needs are downtown, Seattle proper. Traffic is atrocious and buses are inconsistent, and very unreliable. Private companies are doing a better job facilitating the commuting need, which is a bad thing for Seattle long term.
NORTH KING COUNTY	Bring the SLU station earlier. Until that station is serviced, rapidly growing tech in this city cannot take advantage of the service and get off the roads.  DO NOT cancel bus routes that go downtown (ala 66) until you can get to the point where someone can get downtown with one transfer-- three is TOO MUCH!
NORTH KING COUNTY	The Ballard and West Seattle line must be prioritized above all else. I ride the Link line from Capitol Hill every day, and the demand output has been amazing. Surely Ballard/WS will be the same. Push up the timeline please.
NORTH KING COUNTY	This will take way too long. Seattle is in a transportation crises!!!!!!
NORTH KING COUNTY	Possibly decreased ST Express Bus service. I have seen a lot of empty or nearly empty ST buses from personal experience.
NORTH KING COUNTY	Faster light rail expansion please. More interconnection.
NORTH KING COUNTY	The Issaquah line cannot travel all the way up to Downtown Bellevue before meeting the rest of east link. This makes no sense. People from Issaquah need to be able to get to downtown Seattle. Under the existing proposal, you would have to travel all the way up to Downtown Bellevue, and then travel all the way back. Link needs to go through the Mercer Slough in this area. Otherwise the line will be hardly used at all, as it won't be a competitive way to get people to downtown Seattle.
NORTH KING COUNTY	Think the plan focuses too much on suburbs and supporting travel from outside the city. That certainly needs to be a priority, but I think the plan is missing an emphasis on intra-city connection as well. Seattle itself turns into gridlock during large portions of the day and a better connected intra-city system could help significantly, but also ensure our investments are consistently valuable in the future.  <ul style="list-style-type: none"> <li>- More emphasis should be put on full grade separation to Ballard.</li> <li>- Ballard to UW via Wallingford needs greater emphasis, at least to study sooner to fast track opportunity later (like Seattle Subways proposal)</li> <li>- Study of and planning for a South Lake Union to Capital Hill segment to create a more integrated mesh within the city (particularly here since streetcar connection is likely physically impossible).</li> <li>- Additional study of how to better support SLU and Belltown areas to support continued growth and development.</li> </ul> <p>The regional plan and package is absolutely necessary to strengthen Seattle and ensure a bright transit future. But more emphasis on intra-city mobility is crucial.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Seattle desperately needs the inner city projects. Suburban buildouts are really critical, but the Ballard and West Seattle lines have to come on line ASAP- as in the first phase. Please, please, please speed it up in Seattle! These are all great projects, but Seattle rail is super urgent.
NORTH KING COUNTY	Seattle needs to be higher priority. Ballard needs light rail yesterday. It cannot be last. Seattle must be prioritized towards the front.  Also, don't expect Seattle voters to just automatically vote yes. This offers no support for Fremont or Wallingford neighborhoods, some of the densest in Seattle. Why would they vote for this?
NORTH KING COUNTY	West Seattle should be a higher priority. The proposal also seems too expensive for the tax payer to carry alone, especially for a project that many of us won't see the benefit of for two decades. Given that Seattle is becoming a more transient city, some young people who are not sure they want to settle here permanently may not want to pay. Are there no other funding sources we can use? No private investment we can tap into? See Denver for a fantastic example of how private investment got them a transit system cheaper and faster.
NORTH KING COUNTY	I think light rail to West Seattle to include White Center/Fauntleroy area. There is too great a part of West Seattle being left out of the transit improvements, and these areas would all benefit from the improvements light rail would offer.
NORTH KING COUNTY	The horrible housing projects developing in the larger ballard neighborhoods are in service of the growing southlake union area, to wait to support transportation in support of these populations would be unwise and (again) impact negatively on the transportation issues clogging the city.
NORTH KING COUNTY	Ballard is needed sooner
NORTH KING COUNTY	Like to see the Ballard link sooner.
NORTH KING COUNTY	The west seattle light rail should come further south through Georgetown, South Park, White Center, West Seattle and Alki
NORTH KING COUNTY	Ballard should come online much earlier. Should move up in priority.
NORTH KING COUNTY	Ballard light rail should be higher priority.
NORTH KING COUNTY	Northgate to West Seattle via Ballard light rail needs to be done now and tunnel/elevated with no surface track. This will unlock the city and while it is a complex project 22 years is 15 too late.
NORTH KING COUNTY	Focus on Link speed, currently the length of the link is almost an hour imagine how long it would be when it extends from Lynnwood to Tacoma.
NORTH KING COUNTY	You can do the rail faster. Put the money in rail and get it done in 5-10 yrs
NORTH KING COUNTY	Studies for Burien and North Seattle should be completed first and then Light Rail lines decided.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	With all of the high density building, approved/permitted by Seattle, in West Seattle, we feel that our need is greater than having to wait so many years to get this done. We believe that West Seattle should be considered ahead of other projects, especially since our bus service has been drastically reduced, and more people need to use cars to get to their destinations. Also Seattle approved no or very little included parking for these cars that are needed for our high density building boom.
NORTH KING COUNTY	SR-522 BRT line should serve Lake City as Route 522 does today; many Northshore riders want to access Lake City and its transit connections; the NE 145th Street station of Lynnwood Link is a very poor terminal for a BRT line; it will have traffic congestion due to the I-5 interchange; it will have little space for a bus turnaround or bus layover; riders will have little interest in reaching the station; the SR-522 BRT riders would be much better off connecting with Link at either Northgate or Roosevelt via Lake City; in the former case, the line could serve the NE 130th Street station. the NE 130th Street station should be an ST2 project.
NORTH KING COUNTY	West Seattle should be moved up in the schedule. We are isolated when there is an incident on the bridge. We need additional means of transportation out of West Seattle and into downtown. I ride the 55 or the C line daily and they are overcrowded (especially in the evenings) and not always reliable. Also, the 3rd and Pike bus stop is a full blown disaster. We need options now, not in 17 years!!!!
NORTH KING COUNTY	All these things need to be completed sooner. And we need more underground light rail.
NORTH KING COUNTY	Very urgent needs. But wonder about the culture in our region that would convince us to use mass transit.
NORTH KING COUNTY	Grade separated light rail system should be put in higher priority than BRT, which makes the already narrow streets crowdier. It will be more expensive, but the overall impact, including on environments, will create more advantages for the region and its exploding population.
NORTH KING COUNTY	With the rapid growth being experienced within Seattle city limits I believe the light rail projects for west seattle and Ballard should be prioritized as completed in the next 8 years.
NORTH KING COUNTY	Timeline is crazy. 17 years to complete West Seattle light rail! My newborn will be an adult. We need strong leadership to accelerate ST3.
NORTH KING COUNTY	Spend the money on rail and buses, not parking
NORTH KING COUNTY	I think with Ballard's quick overgrowth, it is imperative that a solution for commuting happens sooner.
NORTH KING COUNTY	Move delridge station farther down Delridge Way SW, around SW Brandon St. The current placement isn't around many houses, and it would be much more beneficial placed around the area I suggested, as it has a library, several stores, and is close to S. Seattle College. Or, alternately, improve route 120 by replacing it with a new RapidRide line.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>Light rail to Ballard needs to be accelerated into a 10 year MAXIMUM plan. A 22 year timeline is laughable; this needed to be done 22 years ago, not 22 years from now. In addition, the route needs to be completely grade separated, either in a tunnel or elevated the ENTIRE route. In addition, the route across Salmon Bay needs to be tunneled. It is unacceptable to have a regional, mass transit system go over a drawbridge that can and will open and cause cascading delays in the system.</p> <p>An equivalent solution could be implemented tomorrow by turning the King County Metro Route 15x into an all day route and making the BAT lanes 24 hours, for a whole lot less cost. The Sound Transit plan basically builds a very expensive bus on rails.</p> <p>The current, draft route makes it seem like we are giving up mobility for the region in exchange for an geometrically awkward rail route to serve Amazon, Gates Foundation and Expedia, who may not exist in these areas in 22 years. Serve the people, not the businesses.</p> <p>Until priorities are put on Seattle, with extremely high passenger projections and not serving the far reaches of suburbia, with low passenger projections, I can not in good conscience vote yes on this plan.</p>
NORTH KING COUNTY	<p>prioritized from east side to downtown seattle light rail. and 25 years is crazy, people alive now might not reap the benefits.</p>
NORTH KING COUNTY	<p>The idea that in coming decades we'll all be driving to transit stations neglects the reality of the shift we have to make in order to avoid catastrophic climate change. Seattle should be a leader in truly innovative and just solutions. This ST3 draft plan by no means accomplishes this. Send it back to the drawing board, and come up with a plan ambitious enough to actually reflect the laws of physics.</p>
NORTH KING COUNTY	<p>Mass transit should support the densest and the most transit-dependent populations first. This plan doesn't seem to do so.</p>
NORTH KING COUNTY	<p>So this probably isn't my place AT ALL but I'm a huge proponent of Public Transit and do my best to ride the Light Rail when I can (from the U District). That being said, I do find it very odd that it essentially runs on an honors system of tapping your Orca card. I always pay, but I imagine it would be really easy to not pay at all. For instance in Japan they have gates that you have to tap in/tap out of to enter/exit the station. I think this would be a lot more efficient and probably in the long run save you guys some money. That's just my two cents. Either way, I'm really excited Light Rail expansion is happening!</p>
NORTH KING COUNTY	<p>In the past I've taken my bike on the LINK and I've had to wait a view trains to fit my bike on a car. It would be great to have more bike storage slots on the LINK trains. Perhaps the last car could be prioritized to bike storage?</p>
NORTH KING COUNTY	<p>Let's build Ballard to UW!</p>
NORTH KING COUNTY	<p>the west seattle light rail MUST include Delridge</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>Why such a huge wait? 25 years is WAY TOO LONG to wait for Light Rail in many areas, including West Seattle and Ballard!! This plan will be obsolete by the time it is completed. Start building the multiple lines now and complete it all within 10 years. I'm a HUGE fan of light rail but I think that it asinine and absurd to build it in phases, especially since this area is gridlocked now. We don't have 25 years to wait on this. I'm sure you'll say "We can't afford to build it all now," but I'd counter with saying that "We can't afford NOT to build this all at an expedited schedule." This city/area procrastinates way too much on building this stuff. It took years to agree to build a new 520 bridge and get rid of the viaduct. We blew it 45+ years ago with not building out a light rail system at that time. We had a Monorail line approved from West Seattle to Ballard to build 10 years ago that would have been completed by now, but the lame mayor pulled the plug on that at the last minute. Don't we all wish that this Monorail line would be up and running now? How much better/easier would it be to maneuver over the West Seattle Bridge, down to the stadiums, through Belltown, South Lake Union, Lower Queen Anne and into Ballard if the Monorail was running? Let's not blow this, over think this and dilly-dally around any longer. Strike when the fire is hot and really make a lasting legacy for this area and community. Let's not 'dip our toe in the water' on this and drag it out for such a long time. By dragging it out, you minimize and mitigate the impact that it will have. You are also going to kill the momentum that this region has right now for light rail.</p>
<p>NORTH KING COUNTY</p>	<p>In general timelines should be pushed up if at all possible. A comprehensive plan is great ut hard to gather support around when the payoff is 20-30 years down the road. It's silly that the stations being added to existing lines (Graham Street) are more than 10 years out, especially if the populace has already approved it like some Seattle stations.</p> <p>Ballard seems to be getting overlooked again as far as planning goes. Cutting Ballard out of the monorail project was a large reason for it's eventual failure, and the neighborhood's only gotten bigger since. There's such a huge market there and potential to join back up with the North Link line that to promise an at grade line appears to be a real insult to Ballard in particular but also the Seattle populace in general in such a suburb focused plan. At least allow the option for a mechnaism for Seattle to push for their own lines.</p> <p>Overall the timeline is very underwhelming when you consider that the UW route was such a success.</p>
<p>NORTH KING COUNTY</p>	<p>It would be great if this plan took into consideration voter feedback before implementing the expansion of light rail to specific regions. For example, people in West Seattle would have a say as to when their project gets underway or completed. Are the completion dates for particular regions SET in this plan or still up for debate?</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	The schedule is absurd. ST has been figuring out what to do and how for the last several years on ST 2. I would expect that the timetable for completion would be about half of the proposed time--some even less. 22 YEARS to build light rail in in-town areas that needed several years ago?? If you want my support in November, shorten the time to no more than 10 years (of course it's possible--I'm very familiar with light rail construction) and do the Seattle parts first instead of giving more and more and more to the suburbs.
NORTH KING COUNTY	Ballard Light Rail should have a higher priority.
NORTH KING COUNTY	As I understand it the light rail line to Ballard will be at-grade and will be run along the existing bridge. This is unacceptable. A separate ROW should be constructed for this line, or at least the portion that crosses the canal.
NORTH KING COUNTY	Seattle has some of the highest public transit ridership but gets short changed in this plan and many Seattleites will vote against it. The Ballard rail extension should be moved up by several years. It should form a loop from downtown to Ballard via Interbay as planned but continue east following Leary Way to Fremont and back to downtown via Westlake forming a loop. Much of that route could be built above ground saving lots of money.
NORTH KING COUNTY	I am a huge proponent of light rail. However, as someone who lives and works in Seattle, I have absolutely zero interest in subsidizing the commutes of suburbanites. What do we get out of ST3? Why does it take so long?  Prioritize high-quality, grade-separated transit for the City of Seattle above all other projects, or I will absolutely vote against ST3 and encourage all the Seattleites I know to do the same. Thank you.
NORTH KING COUNTY	17 years is too long to wait for light rail between downtown and West Seattle. That's ridiculous. We needed it yesterday!
NORTH KING COUNTY	Answering #12 is difficult the way it's phrased. I believe you should rephrase because you're going to get misleading results. I disagree with the lacksidical time frames. I think they should be more aggressive. As phrased I should answer "disagree" to the question, which would lead you to believe I don't support it.
NORTH KING COUNTY	I believe our future lies in the light rail because it will get more people off the road and doesn't require idling buses or carbon emissions. Instead of trying to do several different projects at the same time, we should focus on competing a few of them quickly, in succession. If we do not move quickly on some projects, they may loose momentum over time. For example, when the Bertha drill for SR 99 was broken, the senate tried to kill the entire project. Also, by developing light rail quickly, we can take more buses off the road simultanesously and save taxpayer money by more or less requiring light rail usage. These assets can have a return on investment but not if they take 20 years to complete meaningful sections.
NORTH KING COUNTY	I would prefer excellent access (bus, pedestrian, bicycle) to light rail stations (e.g. 145th) instead of parking garages.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	De-prioritize mass transit in places where parking/space is already abundant. Instead focus on the places where you essentially have to park your car at the city limits (Seattle, Bellevue) and rely on mass transportation from within the city (think London, New York city) this will help solve the congestion on the freeways and environmental impact. Tacoma has a lot of commuters but it is not growing nearly at the pace of Seattle. Most people in Tacoma still require a car on a daily basis, whereas millennials moving to Seattle can't even afford a car and are increasingly pushing our mass transit to its limits. In addition, the only way for Buses, Streetcars, and BRT not to be a waste of time is to provide street light synchronization, or else they will never be able to compete with the convenience of driving your own car -this is a relatively inexpensive solutions that pays huge dividends for speeding up buses and helping them run on time (something they, so far, do not).
NORTH KING COUNTY	Ballard to Downtown should be first. West Seattle to Downtown should be second. A tunnel under Salmon Bay - not a movable bridge!!! If these are not changed, I will vote no.
NORTH KING COUNTY	It is absolutely absurd that a light rail line is not proposed to open in Ballard until 2038. With the massive growth of the area, this need to happen soon!
NORTH KING COUNTY	Ballard link needs to be via a tunnel, not a draw bridge. Don't reduce traffic space on 15th. Do Ballard and West Seattle sooner. Everything is for the East Side need more equity with fast growing West Side areas.
NORTH KING COUNTY	Tunnel under the Lake Washington Ship Canal to reach Ballard. No new bridge.
NORTH KING COUNTY	Light rail from Ballard to downtown should become priority one.
NORTH KING COUNTY	- Light Rail to Bellevue/Redmond should be fasttracked - Ballard Light rail is shortest distance and should be fasttracked - West Seattle Bridge is a nightmare, Fasttrack Light Rail to connect and reduce congestion/traffic into Downtown
NORTH KING COUNTY	Too much; access to light rail is important in Seattle. Bus transportation is also important. People should not be forced to use light rail as seems to be the case now (taking bus routes out.) This project is attempting to do too much in one big PROJECT. Seattle is notorious for this type of thing. I supported light rail years ago and still do but this needs to be broken down. Pedestrian access does not mean bike access either. They should be separate line items....
NORTH KING COUNTY	The light rail line to Magnolia and Ballard should run west of 15th with a tunnel under the Lake Washington Ship Canal (as opposed to investing in a surface level light rail line running on 15th and adding a new 70' bridge over the Ship Canal).
NORTH KING COUNTY	All studies should be completed first followed by Light Rail to Burien through West Seattle and Light Rail to Kirkland and Bothell via Sandpoint and Lake City Way.
NORTH KING COUNTY	A bridge to Ballard is entirely unacceptable. The proposed alignment is unsafe, unworkable, and puts a miles long viaduct though our city. There is plenty of western street right of way to use, a rail yard as well, and a freeway interchange in any part of Ballard - which is what the station will look like - is an insult to Ballard - the highest ridership line that the system will have for a long time to come. Fix this now.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Ballard to downtown is not being prioritized correctly. We are basically next to downtown but access makes it feel like we're on an island. San Jaun ferries might get us there faster. So not need to prioritize Bellevue over Ballard just to serve the people with the most money.
NORTH KING COUNTY	<p>1. Seattle proper is growing from the inside out, particularly now that Amazon is pushing for rapid expansion in the downtown area. Ballard is an area that is much loved by Seattle residents, with its only real downfall being that it feels so much further than it really is. With effective light rail service to Ballard, the city could eliminate numerous redundant bus lines, promote people to reside in a suburban-feeling area of the city (avoiding extra freeway traffic), and promote cycling as a means of connecting transit stations to destinations. I myself am part of the new influx of technology workers in the city, and I would love to live in Ballard if getting from there to downtown weren't such an ordeal. I believe Ballard light rail should be priority number one.</p> <p>2. Growing up in Everett, I've watched utilization of Paine Field grow remarkably. Aside from getting Boeing employees to and from the area, the Seattle/Tacoma region will eventually outgrow SeaTac and need an additional hub for air travel and Paine field is the obvious choice. Additionally, as a young person splitting time between my life in Seattle (UW, downtown industry) and visiting my parents in Everett, the 510/511/512 from South Everett Freeway Station has been a staple in my transportation needs. A more reliable means of making this connection to the city (light rail) would be a revelation that I believe should be highly prioritized.</p>
NORTH KING COUNTY	The Ballard Light rail needs to be completed sooner than currently scheduled and should be an underground tunnel into Ballard on 17th NW. Overhead on 15th is totally unacceptable and will be a complete fiasco!
NORTH KING COUNTY	It is absolutely insane to have Ballard and West Seattle at the bottom of the priority list. Especially behind places like Redmond. SEATTLE, much more than the suburbs, is EXPLODING. Waiting 22 years to get the line from Ballard to downtown is essentially worthless. It will be far too little, FAR too late.
NORTH KING COUNTY	<p>My wife and I recently attended a presentation in Magnolia explaining the proposed route for light rail along Fifteenth Ave W. A surface/tunnel alternative through Interbay and under the Ship Canal was also shown.</p> <p>We feel strongly that the Interbay surface/tunnel option is the better choice. Fifteenth Ave. W. is already at capacity most of the day. With increased population and traffic growth in Ballard and Interbay as well as 4500 new commuters to Expedia, there is no room for a light rail system along Fifteenth.</p> <p>With the new SR99 Tunnel replacing the viaduct, Fifteenth Ave W. will become even more important. The tunnel will not be a practical route for Ballard, Queen Anne and Magnolia residents. SR99 users who want to avoid the toll will also increase traffic through Interbay.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Ballard to Downtown absolutely needs to be the first and most urgent priority. The Ballard line should be re-designed to use a tunnel and not the drawbridge. Seattle-dwelling voters will need a light rail line they can count on seeing within 10-12years. REFOCUS your efforts to get Seattle moving again! If West Seattle has to wait for a potential ST4 to get LRT, it may be a necessary casualty. Please also consider studying a UW to Ballard line that would greatly ease east-west congestion among this corridor. Please also invest in building up improvements to BRT to make them more "station like" to increase ridership. What happened to the Madison corridor BRT plan?
NORTH KING COUNTY	I have two problems, the most pressing is the at grade tract for the light rail. The rail line in Rainier has shown that at grade rail is slow and accident prone. I would rather pay more for it to be either underground or elevated (with a preference for the former).  The second problem is the lengthy wait until the Ballard line is complete.
NORTH KING COUNTY	I am generally in favor of expanding mass transit, and like most of your plans, including how to pay for it. As a Ballard resident, I am completely biased about my priorities, and feel like waiting 22 years for light rail to come to Ballard is unreasonable. With the dramatic increase in housing units, especially the many buildings that do not include significant parking options, and no real mass transit solutions, we seem to be creating an unsustainable, or at least undesirable neighborhood. I'd like to see the Ballard timeline move up (meaning sooner), to help accommodate the increased number of residents, as well as extend the line up to at least NW 85th St, with the potential of connecting up to Northgate, if that makes sense based on ridership/potential ridership. I would certainly use the light rail more, especially to get downtown and to the airport.
NORTH KING COUNTY	The Ballard downtown project and east west projects should be prioritized. The amount of traffic and ridership in the northwest area is always at crush capacity.
NORTH KING COUNTY	We need light rail to Ballard BEFORE 22 years.
NORTH KING COUNTY	While I understand people commute that far, I feel this devotes too much to connecting Everett, Seattle, and Tacoma. I feel we should be focusing on in-city issues. There's nothing here addressing the bridges. I live in-city, at a light rail stop, and work next to the Bellevue Transit Center, but it takes me over an hour, without traffic, to use public transit. So I sit in traffic for 40 minutes instead.
NORTH KING COUNTY	The West Seattle line and Ballard line should be priority projects. Waiting 22 years for light rail to Ballard is horrible. I am disinclined to support ST3 if the Seattle projects are not sped up. Further, why is so much money being spent on parking stations? The point of transit is to discourage cars for commuting. Parking garages do the opposite. The Ballard to University of Washington line should be added to the plan. This plan needs a lot of work.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>Is it possible to get better connections for future Issaquah riders headed to Seattle? Like possibly linking it with mercer island or one of the southern bellevue stops so that the trip is as straight forward as possible? Also, this line should be built so that future expansions in issaquah to say, the highlands or sammamish are easier to accomplish.</p> <p>The other comment is that possibly opening up the extension to tacoma community college sooner would help the tacoma link to pull more riders than it currently does, while it waits for a connection to the larger system. It seems to me like that is a more logical order to build ridership sooner rather than later.</p> <p>And keep up the good work! we want these projects as soon as possible so the more open you as an agency are about goals of these projects and the needs to accomplish them, the easier it is for us as citizens to rally around you and help.</p>
NORTH KING COUNTY	<p>The line from Ballard to downtown Seattle should be modified to avoid conflicts with marine traffic: A tunnel should be used under the Lake Washington Ship Canal instead of a bridge. I understand that this alignment has been proposed by the Northwest Seattle Coalition for Sound Transit and is being referred to as the "West" alignment. Please use this as the recommended alignment if you'd like to secure my family's support for ST3. Thanks!</p>
NORTH KING COUNTY	<p>I worry that the Ballard light rail being finished in 20 years is too long. There is a lot of density in West Seattle and Ballard now and- at least West Seattle- will continue to grow- I hope that the rapid ride improvements help those commuters.</p>
NORTH KING COUNTY	<p>Areas with dense population should be prioritized.</p>
NORTH KING COUNTY	<p>Attention to transportation within the City of Seattle should have 1st priority. As a West Seattle resident, traveling out of WS or back into WS is almost always horrible. Sunday morning is ok; late at night is good too. As I sometimes travel to Ballard, I know that travel to and from Ballard is crazy as well. West Seattle has a huge building boom and when those apartments, etc. are completed people will move here and need to commute to work. Good Grief. I like the fact that more people live here and even more will in the future. It brings increased economic vitality to our area. But the bottle neck we have for traveling to another part of the city is ridiculous and should be addressed with more priority.</p>
NORTH KING COUNTY	<p>Build light rail to West Seattle sooner.</p>
NORTH KING COUNTY	<p>West Seattle and higher priorities than Bellevue</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	I would support anything to get more transit for ballard and west seattle. My neighborhood (south park) completely misses out on any of the benefits of this plan, but I realize the needs of this city has long outgrown it's transit infrastructure. I would rather the efforts focus heavily on Seattle's needs rather than all of these outlier transit options. I strongly support transit, but to lump in Kent and Lakewood's transit needs with Seattle's is kind of silly. Those areas will be well served with auto transport for the next two decades while the Seattle/Bellevue corridor is in desperate need for improvement. If you can scratch two or three of these other projects to get a better (or faster) product in Seattle metro, I'm for it.
NORTH KING COUNTY	The Ballard Light Rail MUST be completed sooner than 2033, and it MUST be fully grade separated, with a tunnel under the Ship Canal.
NORTH KING COUNTY	Expanding public transit service to all of King County is vital, but the existing ST3 draft plan over-emphasizes light rail expansion to suburban communities in favor of more heavily used, more economic (\$/rider) urban routes. I would prioritize urban light rail expansion project (Ballard, West Seattle) and expand rapid bus options to suburban communities of Everett, Redmond, and Issaquah.
NORTH KING COUNTY	Seattle's primary pain point for public transportation is east west movement. which is why the 145th cross over is extremely important. Given how many people commute in to Seattle from the suburbs. That crossover to connect with light rail would change the way people commute into Seattle from the northern neighborhoods. The additional expansion of Google and Facebook in South Lake Union will Further exacerbate the existing choke point at mercer street. The more expedient that downtown core workers can be moved into their surrounding communities. the less pressure on that point. which will be seeing a drastic increase in traffic.
NORTH KING COUNTY	The Ballard line *must* be moved up to the top of the schedule. It makes no sense that the most dense area with the worst traffic problems is prioritized below far away suburbs. I will no support the plan if Ballard takes 22 years.
NORTH KING COUNTY	More investments in biking and walking access should be included in the final package so that it is equivalent to parking access investments.  Also, the Downtown Seattle to Ballard should be expedited and should not have a surface street alignment (tunnel only).
NORTH KING COUNTY	Getting dedicated lanes for the BRT by using the shoulder makes complete sense as it will give the buses time advantages that will then incentivize its use. It seems like the Ballard line could be move forward at a quicker pace. Using a street car like system with dedicated lanes along Leary would make this more cost effective and more feasible.  Pushing for density upzoning at transit stops should be assisted by regional authorities to help deal with the local nimbyism that always occurs around this issue.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	You have a stop in 145 NE Shoreline, but what about all of us on the west side of I-5? Why no stop over here, other than going the wrong way, as to Edmonds to get the green line to go downtown. Why not a stop in Richmond Beach ??!!!!
NORTH KING COUNTY	Parking should be available at transit stations, but it should not be free. Parking has a number of external costs and its availability should reflect this cost to help shift societal expectations about their car owning rights.
NORTH KING COUNTY	I am only interested in paying for HIGH SPEED trains in dedicated rights of way or express buses serving outlying communities. BRT is a joke and a waste of money. People need to take a local bus to the train station....in other words, I am not interested in paying for parking. I want the light rail to be completely grade separated and, preferably, underground. Those areas most populated need to be built first (e.g. Ballard). Some emphasis needs to be added that we want a Regional Transit agency that works efficiently and is not comprised of overpaid politicians that just manage bloated construction contracts...that way, maybe construction won't take so long.
NORTH KING COUNTY	I support transit generally, but my own neighborhood in NorthEast Seattle has been gutted by Metro changes to the point that our household may have to add a second car. For most Seattleites to support this project is pure altruism. I would strongly prefer that Metro work on more reliable, frequent east-west connections in Seattle rather than enabling regional sprawl.
NORTH KING COUNTY	The timeline is ridiculously too long. 25 years to connect Ballard to the rest of the city via light rail make no sense in light of density now and to come. It would make much more sense to connect Ballard to the University of Washington in the near term while waiting for a new downtown tunnel.
NORTH KING COUNTY	We need faster development. I understand the importance of strategic planning, and that no strategy can attempt to achieve all objects urgently, but I do think we need to expand Light Rail faster and extensively. Once that system begins to develop, ridership will increase and mobile traffic should decrease. While Buses are important, they don't necessarily impact traffic as much as Light Rail. That, and Light Rail is a more ecologically sound and forward looking development.  I appreciate all that you do. Go ST!
NORTH KING COUNTY	Ballard to downtown a priority and should not take 22 years!
NORTH KING COUNTY	The best way to sort out Greater Seattle's transportation woes would be to identify a central hub and then spoke out from there. I believe this would be best accomplished by repurposing Terminal 46 (currently used by Hanjin Shipping) so that ferries from all over the Puget Sound arrive and depart from that pier similar to the way in which Sydney Harbor's ferry system's 7 ferry lines all converge together at Port Jackson. Build up the on and off ramps of I-5 and I-90 in that area to swiftly move vehicular traffic away and provide a concourse for ferry pedestrians to move quickly to the King Street Station and China Town Light Rail/Bus Tunnel entrance.
NORTH KING COUNTY	Pushing Ballard out for 22 years is ridiculous. It's a prime area for commuters and the Sound Transit studies indicate that it would be used more than Seattle to the East side routes.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	time frame to complete EVERETT LINK needs be shortened population of region growing faster than transit need to take into account why now you are 40 years too late
NORTH KING COUNTY	Ballard and west Seattle light rail should not take 22 years. Large gas tax increases should be imposed in addition to the proposed tax increases.
NORTH KING COUNTY	Altho the rapid bus would be the easiest to implement, I would prefer the light rail project to be implemented first. The light rail are more convenient, reliable, reduce traffic (i.e. not sharing the roads with cars like the buses still have to do). If something needed to be dropped to reduce the overall cost, I would rather not spend any money on expanding the buses. They will just add to the congestion.
NORTH KING COUNTY	Build the lines in the city first: Ballard, West Seattle. The fewer cars the city dwellers need to drive, the less traffic through town and the greater commercial growth.
NORTH KING COUNTY	East-west (Seattle to Bellevue across lake Washington) is sadly lacking. We need better Seattle to Bellevue transit, that is the biggest challenge and opportunity.
NORTH KING COUNTY	I would be strongly supportive if the Seattle let portion of light rail were moved to the front of the time schedule. The city acts as if all mass transit is for moving people from the suburbs to downtown. Let's get city dwellers out of their cars. Build the in cities you links first , then expand to the suburbs .
NORTH KING COUNTY	Money should be better utilized on fixing existing problems: the congestion of the street cars on street with cars, the waste of money on the sounder because it is constantly on a weekly basis late or stopped. There are too many factors that obstruct it's efficiency. The buses to shoulder of I-405 would cause more problems such as the frequent accidents use the shoulder so then the buses would also be adding to the backup. Take the buses out of the tunnel! No other city has this and for good reason- look it up! Money should be spent on the link because it actually addresses the issue of congestion that will be uncontrollable with all the thousands of people expected. Stop wasting money on quick fixes that waste money!! street cars, extra bus lines, spend the money on actual solutions, long term investment is what will b e future's answer!!!!
NORTH KING COUNTY	Please consider connecting the light rail to other transportation such as ferries, specifically the Fauntleroy Ferry in West Seattle.
NORTH KING COUNTY	22 years is a long time to wait for light rail access for Ballard and West Seattle.
NORTH KING COUNTY	Light rail between Ballard/downtown Seattle should be a higher priority. In 22 years the today's transit needs that we area planning for week not be adequate. Increased bike and pedestrian routes should be part of this plan. I am in favor of increased taxes to fund the plan, I strongly support transit improvements, I'm not certain we are focusing on timelines in the right areas.
NORTH KING COUNTY	22 years is too long
NORTH KING COUNTY	15 years and over seems like quite a long time to wait. many of the individuals who will be contributing to the plan will have moved out of the area where it may be impacting or out of king county all together and get no benefit but have paid into the plan.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	West Seattle light rail should be on an 8 year plan.
NORTH KING COUNTY	Please design the system to link to other systems. Please also consider additional light rail or train service that is not on surface roads in lieu of expanded bus service that still relies on roads shared with commuters i.e. SR 522 express buses and C and D line expansions.
NORTH KING COUNTY	With the amount of people that live in the Ballard neighborhood and are constantly moving in. The Ballard proposal should be moved up in completion date. When this order was created, there may not have been extreme growth considered. Please move the Ballard addition up in years! This is an issue considering our distance to 99 or 1-5 making an optimal corridor necessary.
NORTH KING COUNTY	No additional parking. Add TOD and feeder bus routes, not SOV's.
NORTH KING COUNTY	Ballard first!
NORTH KING COUNTY	<p>I think that rail should be built where demand is currently the highest - Ballard to downtown is extremely important not only for the purpose of ridership, but because an additional downtown tunnel could create opportunities for creating late night service on weekends and around sporting events.</p> <p>** I should note this is assuming that the new tunnel would be an expansion of the current one, as opposed to a separate but adjacent structure. By having alternate tracks for trains to run on late at night, it could avoid disruption to the already slim nightly maintenance window that the system requires. It would help to avoid the problem that currently plagues DC Metro (as one example) with their late-night weekend service, which is the source of constantly deferred maintenance.</p>
NORTH KING COUNTY	The plan for the light rail from Ballard to Downtown should be rethought. Adding another drawbridge and an elevated track on 15th would cause undesirable congestion and ruin the character of the Ballard neighborhood, especially the elevated track on 15th. Also, 25 years seems far too long to serve this neighborhood with better mass transit options. I would assume, as well, that many people from north of Ballard will want to park and take the light rail downtown. As this is already a very congested area for parking, something will have to be done to accommodate that.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>Projects should begin where they will have the greatest impact in the shortest amount of time. For example, light rail from Ballard to downtown should go online earlier than later. Twenty-two years away is insane. The need is now. Five to seven years would be more logical. Identify the bus routes and roadways with the largest number of current commuters and build those lines first. That would unclog the roadways and buses for riders and drivers with a longer commute.</p> <p>As the UW is a major employer in the region, it would make sense to have non-stop or transit center to transit center stops only on the express routes. As a UW employee and resident of Shoreline, within walking distance of Aurora Village Transit Center, I find it insane that both the "rapid ride" and the "express" buses take nearly an hour to travel those ten miles. I suggest this as an interim plan, as the light rail won't reach 185th in Shoreline until 2023.</p> <p>There are currently too many "ideas" out on the table...</p> <p>Thanks for your efforts and good luck moving forward.</p>
NORTH KING COUNTY	For the love of god please prioritize West Seattle and Ballard connectivity to the central mass transit artery
NORTH KING COUNTY	<p>Ballard to downtown must be 100% grade separated! No exceptions. The alignment should ideally be away fro 15th avenue. The preferred alignment should be in west interbay with a tunnel under the ship canal and a tunnel under Market Street.</p> <p>Further Ballard/UW must be included as a contingency route.</p>
NORTH KING COUNTY	It is incredibly important to be developing these alternative transit options, thank you for that. However, in their creation, we also cannot forget the people who are poorest in our community, knowing that many of them rely on transit to get around, and the most recent updates to the bus systems severely disadvantaged those poorest among us. We need to make sure that transit is accessible to everyone, and not leave out the poor.
NORTH KING COUNTY	20 Years for Graham St station!?! South Seattle was promised the station 20 years ago. Now you are asking us to wait another 20 years. We have had to deal the construction and the traffic headaches light rail has brought to rainier valley but not the convenience. I work downtown and my wife works at UW. Taking the light rail should be a no brainer but with children in daycare it is hard and time consuming to walk a mile to either Othello or Columbia City to ride the train. My family does not feel compelled to vote for ST3 so we can pay for more infrastructure when we do not feel we get the benefit. You want to increase our taxes so we can sit in traffic on either a bus or a car for another 20 years. No thanks!
NORTH KING COUNTY	A funding commitment for the NE 130th Street Station in North Seattle would assure my vote. Remove the non-committal "provisional" wording.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>Fremont is being neglected. It is a huge growth neighborhood in Seattle, especially with the influx of tech jobs from Google, Adobe, and Tableau. In fact, the only change to Fremont has been the reduction of buses going across the Fremont bridge, further reducing the amount of transit accessible to Fremonters.</p> <p>Also, the 522 corridor is getting the shaft. BRT is not a sufficient answer to the growing populace in Maple Leaf, Lake City, Kenmore, and Bothell. The 522 corridor needs options that are not at-grade. Buses are subject to street traffic and gridlock, even if it has a refuge lane for part of the path. The only reliable solution is to go over or under the streets and run trains at consistent intervals, removing cars from the equation.</p>
NORTH KING COUNTY	Focus should be on the Seattle core and looking at adding stations to the existing light rail system to maximize return on investment
NORTH KING COUNTY	The "s curves" between Renton and Bellevue on 1-405 are frequently congested to "maroon" on the Washington State Department of Transportation website. I would prioritize a 1-405 adjacent light rail before the Bellevue-to-Issaquah stations beyond Eastgate (Bellevue College). I get the Bellevue to Redmond light rail because Microsoft is a colossal employer / tax base, but I am dubious that most Microsoft commuters begin their route along the 1-5 adjacent stations. Overall, I am giving "somewhat support" because of the timelines; as a single adult with no dependents who earns 45K annually, I would be in favor of paying more per month if it meant all the timelines be moved up. As we all know, the light rail is way overdue and the Seattle metropolis is in the top for unpredictable travel times, which I attribute in part to the lack of comprehensive light rail system.
NORTH KING COUNTY	Light rail from Lynnwood to Everett and from West Seattle to downtown should be the priority projects for ST3. Sales tax is a regressive tax and the poor pay a disproportionate amount of taxes this way. Find another way to fund these projects. How about taxes on bicycles (require bicyclists have licenses and license plates for their bikes). We've spent a ton of money to make roads bike friendly yet many cyclists don't obey the rules of the road and there's no recourse (you can't turn in their license plate number for example). Cyclists should pay their fair share!
NORTH KING COUNTY	Modify the Ballard alignment to eliminate South Lake Union Station and provide alignment independent of at-grade 15th Avenue West, preferably on 20th Avenue West.
NORTH KING COUNTY	Timeline is a deal breaker. We can't wait decades for these improvements. Greater taxes are okay if it means I can actually benefit from the plan in the foreseeable future.
NORTH KING COUNTY	Less rail in outlying areas. More emphasis on how to get people to transit at the edges of the existing rail system.
NORTH KING COUNTY	This is incredibly important work that everyone knows should have been done decades ago and will be vital to managing the growth of the Seattle area. As a driver, if I could pay \$200 to make traffic in Seattle less terrible every year, I would. Make sure there's parking because Seattle won't be a utopia of transit-oriented development by the time these stops are finished. Is it possible to get light rail from the U district to Ballard?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Light rail should be the priority. The instant success of the expansion to Capital Hill and UW should support this! More bus lanes and improved bus times are good but aren't taking vehicles off roads! I would never get out of my car for a bus. I would commute every day in a train to the east side!
NORTH KING COUNTY	Focus should be on connecting light rail at expense of buses. Rail will make this city expandable, not buses.
NORTH KING COUNTY	Ballard was identified many years ago as a priority for light rail destination and stop for going downtown. I think the city government should honor that designation.
NORTH KING COUNTY	Ballad via interbay doesn't serve riders & needed routes. We need crosstown light rail: ballard to UW would provide a route to downtown. Ballard to 65th, and then up Lake City Way would also be welcome. !!
NORTH KING COUNTY	All light rail should be built down the middle of major freeways & highways. Bus routes should be contained within neighborhoods & service the neighborhood's light rail station. One additional bus route should run from neighborhood to neighborhood around major cities (i.e., Seattle, Tacoma, Everett).
NORTH KING COUNTY	We should improve the timeline in connecting Seattle to Ballard and West Seattle.
NORTH KING COUNTY	Move up Ballard in the plan!
NORTH KING COUNTY	Local Seattle light rail should be expanded to accommodate higher density and put the service where it would get the most use and the best bang for the buck. I don't currently use much transit but have begun to use light rail and will continue to do so, but would like more options in seattle
NORTH KING COUNTY	I understand that the eastern suburbs want more for their transit dollars, but everyone out there drives. Many families in Ballard can only afford one car already, and in 22 years, Ballard won't even be middle class if we don't support a much faster rail timeline.  A 22 year timeline is a failure.
NORTH KING COUNTY	Light rail should be priority to lessen congestion and give citizens more options. Adding more buses, different routes (shoulder on freeway), or rerouting does not help overall issues.
NORTH KING COUNTY	The Ballard to downtown extension should be expedited. While bike and ped access to stations is important - when the trains are full it's hard to get bikes on and off. Please consider alternate car configurations that allow better bike access on trains. Also consider stroller access and storage. Copenhagen has excellent examples of cars that have large open areas for bikes, strollers, wheelchairs, etc. Stations should also be linked with better and safer bike/ped routes so large parking areas are not required at all stations. This will require better coordination with local municipalities to extend sidewalks and bike lanes.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	In a perfect world, the ST3 wouldn't disrupt the existing footprint of Seattle. I would hate a light rail that cut through the middle of the city. I'd rather have underground tunnels rather than elevated platforms where there's lots of noise and obstructs views. I strongly recommend there are larger cabs on the light rail to accommodate family cycling like cargo bikes. And I strongly recommend there is access to the light rail for elderly passengers, cyclists and pedestrians. I can't stress how many cargo style bicycles are in Seattle and if they do not fit in light rail eventually you will have to change the design and infrastructure to accommodate these bikes, you would be surprised just how many of these bikes are being purchased in the west coast. Anyway, good luck!
NORTH KING COUNTY	Please do not forget those with accessibility issues! As a disabled person, I am unable to use any of this for one of the following reasons: I cannot park near a light rail station; buses are so overcrowded that I cannot get a scooter/chair on board; there has been very little thought/accommodation for those with mobility challenges so I support all these efforts solely to get cars off the road so that I can take care of myself rather than rely on something that clearly does not allow for those with handicaps.
NORTH KING COUNTY	Any way to move up the plan to focus on West Seattle and Ballard area first.
NORTH KING COUNTY	I wish this could happen more quickly as Seattle is growing very fast
NORTH KING COUNTY	I question the logic of building light rail to Issaquah as there is not sufficient housing density there to support it. It seems to be included for political reasons only. I realize that all the added service cannot just be in Seattle, but that is where the ridership is and will be. Ballard in 22 years is way too far off.
NORTH KING COUNTY	Put light rail to Everett straight up I-5. Limit the number of stops and use buses to feed the rail like "real" cities do in the east coast. Ballard/Greenwood light rail should be a priority. Restore Metro route 48 that you just destroyed by splitting it in half.
NORTH KING COUNTY	More stations in the Seattle area should be completed sooner than 22 years from now.
NORTH KING COUNTY	The West Seattle and Ballard light rail projects are URGENT. These should be moved up in priority and accelerated as much as possible. 22 years is too long to wait for light rail to Ballard. Can we not do it in 3-4?
NORTH KING COUNTY	far too much emphasis on suburban routes when bulk of spending is from within city limits.  ballard to uw route is critical. yet not a single survey question here. shows me how this project is going to be prioritized. not a good sign.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Looking at the proposal, many of those benefiting from Light Rail will be predominantly white/affluent residential and commercial areas (Central Ballard, Northern West Seattle, Downtown Redmond, Issaquah, Boeing). Southern West Seattle/White Center/Burien is pushed to "future development" and will continue, as with many less affluent/higher minority areas, to be dependent on slower/less dependable modes of transportation (ie: buses). Apparently, our time is less valuable than those with money. Even with the West Seattle connection, the timeframe for all of these projects is ridiculous. 30 years and \$50B until completion... and what is being done to address the transportation problems of tomorrow, next year or even 5-10 years from now? As with any Seattle/King County/Sound transportation project, how much of this money will be wasted and how much will it REALLY cost? How sad that people who vote for this proposal will be middle-aged/elderly at completion. Taxation with ZERO benefit during the lifespan of most voters. Truly shameful!
NORTH KING COUNTY	I think projects should be done as fast as possible to maximize what is already available or soon to be available. I think projects that would be done on already existing lines should be done first. For example, a new station at Boeing Access Road. The link light rail is already here. This project should be done as soon as possible to get more people on light rail. With Boeing, Microsoft, Metro, Providence and other large companies employing thousands of people within a couple miles of this potential station it is a huge opportunity to get more people using light rail and transit. It should not be put off for later it should be one of the first projects done.
NORTH KING COUNTY	You are dependent on massive density increases to Ballard and West Seattle yet Ballard won't get significant improvements for 22 years, prioritized last. You want to turn Ballard into an even denser urban village but improvements don't come for decades. Please sync up with the city's aggressive up zoning plans.
NORTH KING COUNTY	Ballard is *melting* under the weight of development. Need more/better transit options ASAP! Bring rail sooner!
NORTH KING COUNTY	There are several big needs here intermixed with a lot of nice-to-have proposals. A backup proposal should be prepared with a trimmed down and focused agenda, as this asks for the world all at once. More transit options are great to eliminate traffic and otherwise reduce the reliance on cars in the area, but proposals that don't make them easier to use aren't useful, such as lack of parking at stations or easy biking connections to bus/link/sounder.
NORTH KING COUNTY	Tax to pay for the ST3 should be more evenly divided between residential taxes and other sources to reduce property tax burden.
NORTH KING COUNTY	Ballard downtown should be completely grade separated (no surface tracks!) and be moved up in the project order. Ridership numbers suggest we'll get the most value by moving that project up.
NORTH KING COUNTY	Funding should come from businesses not homeowners!
NORTH KING COUNTY	Ballard expansion should be in the eight year plan, and should go further north into Greenwood/Blue Ridge. This would increase ridership far beyond any of the east side expansion plans!
NORTH KING COUNTY	Based on population density, the West Seattle and Ballard routes should be the completed first. Unless the timeline for the West Seattle and Ballard routes changes, I will be strongly opposing this plan.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Light rail to Ballard and West Seattle must be top priority. The ridership estimates alone should make this clear. In addition, it will provide significant tourism cross-traffic opportunities between the urban villages.
NORTH KING COUNTY	I live in Northgate, in a house adjacent to the western edge of I-5 (150 NE 116th Street), with a large family that loves our home. All of us use metro transit daily, and love the light rail, but we're extremely concerned that a rail extension north will result in losing our house to a city program. We want to set down roots in this house, to raise at least one generation and live here for the rest of our lives preferably. If there's any way the light rail running north along I-5 could spare our home, we'd be eternally grateful and ardent supporters of this program.
NORTH KING COUNTY	Ballard to downtown--or Ballard-UW--should have a much higher priority.
NORTH KING COUNTY	Link light rail and express buses should be favored over plans to expand the Sounder train.
NORTH KING COUNTY	I think you should prioritize the largest residential neighborhoods first, like Ballard and West Seattle, in terms of light rails because you'll get more users and therefor more revenue right away. It makes no sense to wait something like 17-25yrs to bring Ballard and West Seattle into the light rail game. We have the least amount of options as two of the largest residential neighborhoods that are also the furthest west which makes it all the more difficult for us in some ways to use other sustainable alternatives. I moved here in the Fall of 2001, voted for light rail three different times and here we are in Ballard 15 years later with nothing! That's why I would strongly oppose this plan because it's doing the most effective thing last in this plan you are proposing vs. doing the most effective thing first. And, I'm someone who supports more taxes for more sustainable transit options. AAAAGH!
NORTH KING COUNTY	Move the Ballard line up in time frame. High density area that needs access sooner than two decades
NORTH KING COUNTY	With the population growth in West Seattle, light rail to that area needs to be addressed earlier than 17 years from now. Please prioritize that project!
NORTH KING COUNTY	West Seattle light rail should be traveling on Delridge corridor to provide greatest access for people who need transit. West Seattle project timeline should also be accelerated.
NORTH KING COUNTY	1) Do all studies 1st. 2) Do Downtown to West Seattle and Burien combined. 3) Do North Seattle(Lake City Way, Sandpoint, Kirkland, UW and Ballard combined)
NORTH KING COUNTY	Projects in the city should be prioritized above far north and far south projects.
NORTH KING COUNTY	1) Move Ballard up/faster. We are a priority ... and we will serve more people and be more cost effective to ST to build due to high ridership. 2) Extend Ballard line up to 65th. Crown Hill is being asked to absorb tremendous growth under HALA ... growth without better transit is lethal for our neighborhood. Look forward/plan ahead. 3) Why are we doing the elevated option to Ballard. We could have already had the Monorail by now if we wanted elevated. Follow recommendations for "West is Best" option to move the Ballard line west and then tunnel. 4) I will pay more for something remotely relevant to me and my life. Right now ST3 will do nothing for me or my neighbors - and we have been asked to absorb even more density. It's pretty miserable right now being "Trapped in Ballard".

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Prioritize West Seattle and Ballard lines first- would serve more riders and ease gridlock in Seattle. Also build a Ballard to UW line.
NORTH KING COUNTY	Please reconsider buiding the Ballard extension at grade, this will significantly impact the performance of the segment The Ballard and West Seattle segments stopping at Market and Alaska Junction are a massive shame. Is this a real representation of subarea equity, to prioritize the suburbs over the city? What about lower income individuals who live in White Center or north of 65th? This is especially troublesome considering the reduced performance the Rapid C will provide once the Viaduct is torn down. Parking should not be free at suburban and should be replaced with private parking garages funded outside of ST3 when feasible Are we funding suburban stations (and parking?!) with Seattle area sub-equity?
NORTH KING COUNTY	Light rail in Ballard should be grade separated the entire way
NORTH KING COUNTY	Build lines with the highest projected ridership first and with grade separation.
NORTH KING COUNTY	Ballard and West Seattle need transit now. Ballard to U District seems like a better way to get the project completed faster and provide many needed connections.  People want to bike to light rail. Stations without secure bike parking are unreasonable with the extremely limited bike space available in the current trains.
NORTH KING COUNTY	Cost is way too much. Remove all regressive taxation like property and sales taxes.
NORTH KING COUNTY	Since there are plans to expand the lightrail system as far out as Issaquah, I find it disheartening that cities like Shoreline are not included in the lightrail plans. I'd argue that people in Shoreline commute to Seattle and back just as often if not more. Buses are always a great investment as is any form of public transportation that helps aid our traffic congestion. However, like most, I'd prefer to take the train over the bus.
NORTH KING COUNTY	These projects should not take decades to complete. I strongly oppose all the plans due to the timelines. We have a transit problem that needs addressing this year.
NORTH KING COUNTY	22 years is insanelly long to wait for light rail to Ballard. The region will have changed out of all recognition by that time. Why are you not prioritizing mass transit for dense areas within the city of Seattle above connecting the outskirts of the entire puget sound region.
NORTH KING COUNTY	I think the link rail expansions to Ballard and West Seattle from downtown should be prioritized above all other aspects of the ST3 draft plan.
NORTH KING COUNTY	With Ballard given such a distant completion time, the project building a bridge over the shipping canal rather than tunneling, and moving the light rail at-grade along Interbay, I will not vote for this project.
NORTH KING COUNTY	High demand projects like west seattle and ballard light rail should be prioritized and fastracked.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>The Ballard to downtown line should be delivered first. It offers the most bang for the buck. The fact that it is in Seattle is not relevant. What is relevant is the massive bang for the buck.</p> <p>We must build everything grade-separated. We must do this right the first time.</p> <p>We must speed up delivery of these projects. I would easily support five times the tax hit in order to speed up delivery. We need to make sacrifices so that this will be completed while I am still young enough to use it.</p>
NORTH KING COUNTY	<p>25 years is way too long to wait for these things to be completed, especially the urban light rail projects.</p>
NORTH KING COUNTY	<p>Light rail from downtown to Ballard through Seattle Center needs to happen much sooner, more like 8 years than 22.</p> <p>I would strongly support a plan in which this line (and others) came online much sooner.</p>
NORTH KING COUNTY	<p>Emphasis on Ballard Light Rail needs to be further studied. Building light rail stations in affluent areas is not a high priority. Other suburbs would be better served by these funds.</p>
NORTH KING COUNTY	<p>The approved ST2 light rail station at 145th is poorly configured to serve Shoreline and North Seattle. The proposed 522/145 BRT exceeds the capacity of the station. Use the inside facility loop for Metro Access and handicap, move regular service out to 145th Street and 5th Ave. Provide elevator service from the south side of 145th into the station. Continue the 522/145th buses over to Aurora and their BRT corridor. Provide North Shore/Tricities access to Rapid Ride/Swift and provide rail access to the Aurora Corridor.</p> <p>Transit Oriented Design is a poor mandate from the state, some stations need density and some stations need bus service. Leave density choices to the local jurisdiction and designate stations for bus service where congestion already occurs. Light rail should provide about 5 routes per new station to increase ridership and solve local congestion problems with the existing population. I5 is clogged in the afternoons already, we don't need to shape residential areas for the future, we need to get buses out to the suburbs now.</p>
NORTH KING COUNTY	<p>I hope that the order in which the light rail extensions is planned in a way that affect the most people first, for example, if the growing population of West Seattle would benefit most by a light rail to downtown, versus the population of Ballard, the rail to West Seattle would be first priority.</p>
NORTH KING COUNTY	<p>the current light rail seems to have a lot of inconsistencies or interrupted service. It also needs to have a dedicated line through downtown. It shouldn't be faster (30 minutes) for me to walk from Sodo during early rush hour (4:30/5:00) to get to downtown Westlake. If it were on a dedicated line and it buses were in a separate lane than all single occupant vehicles then you would really have a public transit system that people would ride, which is what actually helps congestion. Also, having ample parking at express bus centers, I hear that Bellevue fills by 7:30am and Eastgate is backwards if that fills. you need a real plan Sound Transit! Look at Boston's public transit system and go back to your drawing board. There are so many condo's and apartments flying up in Ballard, the express 18 is already packed and rapid ride is a joke, it takes too long to go through Seattle Center. Make that a separate route for tourist. Most of us need to get downtown and a dedicated line along the waterfront is the best way to achieve that.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Instead of bus rapid transit, it should all be light rail! One, unifying mode of transportation instead of different types. Light rail is way more convenient and safer than buses.
NORTH KING COUNTY	<p>I recommend an alternative route for Ballard light rail that delivers much more reliable, rapid transit service at comparable cost. This alternative, which involves: using a corridor to the west of 15th Avenue West; crossing the ship canal by means of a tunnel; and constructing an underground station in Ballard with the best options for northern and eastern expansion capability identified in Sound Transit planning documents as alternative CT01c.</p> <p>In addition to more reliable service, we need light rail much sooner than 22 years from now. We believe that Sound Transit's priority must be first to deliver a reliable Ship Canal tunnel crossing to the highest ridership corridor proposed in ST3 and second to ensure the fastest delivery schedule possible.</p> <p>I support the recommendations and reasoning presented in the Northwest Seattle Coalition's white paper found here: <a href="http://www.northwestseattlecoalition.org/Northwest_Seattle_Coalition_White_Paper.pdf">http://www.northwestseattlecoalition.org/Northwest_Seattle_Coalition_White_Paper.pdf</a></p>
NORTH KING COUNTY	Think some of these projects should be re prioritized.
NORTH KING COUNTY	<p>Light rail must be faster than driving. Make sure there are local and express trains.</p> <p>There needs to be an express train from the airport to downtown that doesn't make a zillion stops and makes it actually faster to take rail than drive. I would also like to prioritize light rail from the montlake station to Redmond via 520 which would take a ton of traffic off the i5/520 interchange which is still a mess with people merging 4 lanes to exit and is a primary cause of traffic in n Seattle.</p>
NORTH KING COUNTY	Ballard first
NORTH KING COUNTY	Build it faster

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>I am a 4th generation West Seattle resident. I could never have imagined our congestion could be this horrible. It's crippling. I work at UWMC and spend over 2 hrs a day commuting. It's ridiculous! I can't understand why there is still zero busses that go from West Seattle to the UW? Or at the very least a bus from downtown to the UW?! With the amount of commuters in West Seattle that go to U District, there should be a straight route. Let's not forget the additional ferry traffic that's added to our commute. This has been ignored for FAR too long. What are we to do when the viaduct closes?! I'm fortunate to have found a Metro Vanpool, but it's difficult for hospital workers to put one together when our hours vary so much. I urge ANY transit desicions makers to try our commute for ONE DAY...then understand what we deal with daily! There is still massive amounts of new condo/apt buildings going up and still one way off our hill! It's heartbreaking what's happened to my West Seattle. I understand it's getting crowded everywhere and we have big problems to deal with...but it seems as though we're a forgotten or overlooked area. Morning traffic reports don't even mention West Seattle Bridge traffic unless there's a huge accident! We desperately need help over here! Thank you for your consideration and offering this survey. Respectfully, [name]</p>
<p>NORTH KING COUNTY</p>	<p>It's very frustrating that the light rail is modifying the current bus schedules and making it more difficult to use the busses. Over the last few years my bus route (316) has not only been moved from the tunnel to the street but more recently has a number of routes in the morning have been removed thereby forcing people to drive into work rather than take public transportation.</p> <p>The light rail stations do not have enough parking lots. If don't use light rail because they're are not any close to my house but even if I wanted to drive to a station there is not parking close by.</p> <p>I use to think Seattle has a good public transit system compared to other large cities, but over the last few years my opinion has changed and Seattle has become a more difficult city to use public transportation.</p>
<p>NORTH KING COUNTY</p>	<p>The consideration for expansions should be major cities, and highly populated areas. This plan should be shown in comparison with expansion of highways for current drivers. The cost package for this plan over the next 25 years should be shown in comparison with wsdot major projects over the same period of time.</p>
<p>NORTH KING COUNTY</p>	<p>Currently there is no way to go straight to a light rail station from west Seattle. It would be nice to have a bus service that directly feeds a newer station in the light rail maintenance facility.</p>
<p>NORTH KING COUNTY</p>	<p>The failure to connect Ballard to UW is a massive oversight. Seattle badly needs an east west route around downtown. The inclusion of the Ballard to UW would finely give the city a comprehensive train system. Do not blow this opportunity!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	the length of time to complete the West Seattle and Ballard extensions or UNACCEPTABLE. Also not having right of way is ill conceived at best--in 25-30 years our population will be so high these improvements will be negligible. I have supported and actively campaigned for every single transit related expansion. I cannot support this plan as it stands--in fact if changes are not made--not only can you expect a NO vote but you may also plan on this voter actively campaigning against this plan. Get it together ST. You can do better--you must do better.
NORTH KING COUNTY	would be interested to understand the prioritization process for choosing Tacoma over W. Seattle or Lynwood over Ballard. Population driven? Growth Driven? Congestion Driven? Outlying neighborhoods are ripe for transit where cars can be left at home - commuting in the suburbs tends to be a more car-centric affair with commuters needing to drive to the station - by investing in city neighborhoods, you can reduce the car traffic where people can walk/ride to transit and get to work...
NORTH KING COUNTY	Seattle is the economic center of the region. Seattle projects should be higher/highest priority!
NORTH KING COUNTY	The order of projects is wrong. The process should be to fix issues within the city (Ballard to downtown, West Seattle to downtown) before worrying about the suburbs.
NORTH KING COUNTY	More direct rail & light rail extension, focus on high-speed, long-range service, particularly North-South. Emphasize rapid bus service across East-West corridors to connect with longitudinal rail. Stop building erratic, loopy, inefficient light-rail across lakes and hills unless you're just going to tunnel under everything. Eastside Link route is a joke. Scrap it now.
NORTH KING COUNTY	The first priority should be connecting West Seattle, Ballard/Fremont, Green Lake areas. These are local neighborhoods that cause the most congestion on our city streets and waiting 25 years to solve these issues is unacceptable. Revise the plan or I vote NO and my friends vote NO and anyone I can get to listen to me, I will encourage to vote NO to ST3. GET THE LOCALS OFF THE ROAD FIRST! Give us the ability to get around our most densely populated areas first THEN worry about the suburbs. They already have commuter rail options that can be improved, add more service hours to support them. Build out West Seattle, Ballard, Fremont, and Greenlake neighborhoods FIRST.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>The Ballard line needs to be modified. Taking out lanes on 15th, which is already extremely congested, is not a good idea. The line needs to run either below ground or above it. It does not make sense to have this at-grade. Another option is to move the line west, away from 15th. Additionally, the draw bridge is a fundamentally bad idea because it will really slow down the line and make it unpredictable. A tunnel should be built, rather than the bridge, so it is not dependent on maritime traffic. The Ballard line also needs to go farther north, up to Crown Hill (NW 85th St). The current version stops at Market, so it misses Ballard High, and a lot of development in the new "urban village" that extends up to Crown Hill. We should also consider looking at a cross line in the future to go from Ballard to the University district. This is another busy route.</p> <p>I would love to support this plan, but find myself against it as it currently is drafted. It is not a smart design (for Ballard, at least), and will take way too long to implement. Make changes like I have suggested to make it a better and faster route, and please consider bringing this line on first! Ballard has the most expected riders, but it will take 22 years to get here. We need it much sooner.</p>
NORTH KING COUNTY	Ballard to Downtown should be prioritized as the first thing we do, not the last. 22 years is too long!
NORTH KING COUNTY	The ballard phase needs to be finished sooner than currently scheduled.
NORTH KING COUNTY	Light rail in West Seattle and Ballard should be prioritized much higher than it is now. That should be in the within 8-year plan. 17 years is too long!
NORTH KING COUNTY	Light rail to Ballard should be prioritized. 22 years is far too long to bring this into service.
NORTH KING COUNTY	I think that getting inner core stuff done first is more important and Ballard/west Seattle should be done sooner.
NORTH KING COUNTY	<p>Because of the huge demand (estimates go up to 145,000 weekday trips, pretty much the population of Bellevue), the Ballard&lt;-&gt;Downtown light rail should have top priority. 22 years is too long; we can &amp; should do it in 15. Additionally, it should not have the compromises that are currently proposed. The whole line should be grade-separated, so that it is not delayed by level-crossings, and the ship-canal crossing should be tunneled, to avoid delays due to boat traffic.</p> <p>The Ballard-&gt;UW-&gt;Eastside corridor should be more than a corridor study. At the very least, we should prioritize the design &amp; engineering work so that it is "shovel-ready" should a Federal grant become available, or should Seattle voters choose to double-down on mass-transit.</p>
NORTH KING COUNTY	Build light rail supporting densest areas first, not focusing on inefficient park and rides. Promote TOD and increased density around urban lines to further support most efficient transit.
NORTH KING COUNTY	West Seattle and Ballard should be connected well before the 17 year and 22 year plans.
NORTH KING COUNTY	West Seattle is the fastest growing neighborhood in Seattle, with tons of condos being completed as we speak. It needs to be a higher priority than suburbs

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	I am a staunch advocate of transit and development but will not vote for this plan (nor encourage those I influence to do so) unless the downtown-to-Ballard project is elevated to top priority, built below-level, and the suburban projects are deprioritized.
NORTH KING COUNTY	Push for Light Rail in Seattle to come on MUCH sooner than suggested...
NORTH KING COUNTY	Expedite the Redmond light rail service.
NORTH KING COUNTY	The corridor today which appears to have little to NO transit coverage at all is the Mercer corridor. As someone that lives in Queen Anne, its Odd that its so difficult to get from Queen Anne to South Lake Union and back.
NORTH KING COUNTY	The projects need to be speeded up and the core Seattle projects (Ballard, West Seattle) which would have greater ridership should be considered first.
NORTH KING COUNTY	I don't know if I can wait 25 years to have decent transit from Ballard, especially at the current rate of development. Please do what you can to speed up these timelines.
NORTH KING COUNTY	I would like to see the connectivity to the Lynwood/Everett area happen sooner than 25 years from now. I take the 512 multiple times a week, and this change would dramatically impact my commute. At that time frame, though, I'll be retired before it happens. Thank you for your hard work and consideration!
NORTH KING COUNTY	Ballard Light Rail will have highest ridership and impact - build it first, and make sure it is never in traffic.
NORTH KING COUNTY	Given the overall concern with the length of the construction timeline, I think it would greatly increase public support if rapid ride lines were built to follow propped lighth rail expansion and, most importantly, were referred to as those lines prior to completion of light rail. Thus people would more intensely feel that they are benefiting the expansion of the system as well creating opportunities to celebrate transit as lines "graduate" from RapidRide to light rail.
NORTH KING COUNTY	Please ensure that light rail from Ballard is unimpeded by traffic and has it's own dedicated right of way.
NORTH KING COUNTY	A more aggressive time table is required. The focus seems to be on connecting to the suburbs when there isn't a core infrastructure to connect to - more needs to be done in Seattle proper to ensure that the system is usable by those who would commute to the city.
NORTH KING COUNTY	Build Ballard and west Seattle light rail first! It makes the most sense given ridership.
NORTH KING COUNTY	Better connections from suburbs to hubs to get to work as real estate costs increasingly prices families away from cities
NORTH KING COUNTY	Best is West + tunnel to Ballard and improved schedule in light of ridership from Westlake to Ballard.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>Most urgent is to make the most of the current investments in Link Light Rail - this can be done by quickly building large Park &amp; Ride areas at the endpoints (current and planned) and shifting operational costs of lightly utilized neighborhood bus routes to the expansion of these parking lots and improvements to the rail infrastructure. Capacity, transit time efficiency, and future utilization can be best maximized by letting individuals make small trips from their home to a station by personal transportation, and then use the network for the longer common routes.</p> <p>All of the ST3 plans are bad because they are hugely expensive, they do not apply enough pressure on operational efficiency or utilization, and they do not fit the needs, modalities and lifestyles of a majority of the Puget Sound residents.</p>
NORTH KING COUNTY	<p>1) 22 years is completely insane to get LRT to Ballard.                  2) Light rail from Everett to Tacoma is completely unwise. Find a similar system anywhere in the world that has a 70 mile long LRT train.</p>
NORTH KING COUNTY	<p>The inner Seattle projects need to be speeded up as much as possible. As a city resident, I'd be willing to pay more than those in the rest of the ST3 area to accomplish this. I think a Ballard to UW subway and Alaska Junction to White Center light rail projects should be added. I support all of the projects in ST3 but can't support the timelines for inner Seattle where support and demand is greatest. I understand the need to put emphasis on the suburban (north, east and south) projects to gain political support. That is why I suggest possibly having the City of Seattle possibly make an additional request to City residents to expand and expedite the inner Seattle projects. The popularity of the UW line extension should demonstrate the desperation felt by Seattle residents to have more reliable/frequent transit sooner. I also support the notion of making the South Sounder an all day/all week service.</p>
NORTH KING COUNTY	<p>Twelve to twenty-five years to get light rail built out? A quarter of a [explicit] CENTURY to give the already overcrowded and fastest growing tech area in the country access to halfway decent public transit? I've already moved once and changed jobs twice to get me and my wife closer to work and out of hours of traffic every day. Hell, we even work in tech/medical and make good money, but we got started a bit too late in our careers and we're priced out of the market. We're in a position to play it smart and get out of this rat race early, but we can't do that paying the ridiculous prices around here, in areas that are so disconnected by the existing public transit.</p> <p>Listen, we came to Seattle for a better future, and to enjoy a thriving metropolis in the middle of the most amazing environment in the world. But it's pretty [explicit] difficult to enjoy everything Seattle has to offer when your only options are contending with the awful traffic and parking, or dealing with the grossly inadequate public transit -- both of which are fantastic for wasting your time and sanity. These transit surveys go around for years and produce these [explicit] suggestions that are still decades out? [explicit] on a cracker.</p>
NORTH KING COUNTY	<p>Ballard and West Seattle should come first in plan</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>We need to look for every possible opportunity to expedite the construction of light rail mass transit to Ballard and West Seattle. These corridors should be highest priority, and should be fully grade-separated.</p> <p>ST3 should not include significant funding for free parking for commuters at suburban stations. Any public lots should require some payment, and opportunities for transit oriented development should be prioritized highly over adding parking garages or surface parking lots.</p> <p>Until Ballard light rail is constructed, the existing Ballard line of RapidRide should receive focused money to improve speed and reliability. I see buses stuck at lights routinely (for example, at the southbound station at Leary, buses frequently get stuck on the north side of Leary before they can get to the stop...). Addressing this and other bottlenecks and issues along existing RapidRide corridors will make these services much better.</p> <p>ST# should also include funding to support EIS review of the future Ballard to U-District line.</p>
NORTH KING COUNTY	Connect Federal Way to Seattle ASAP!
NORTH KING COUNTY	Light Rail in West Seattle and Ballard (more dense areas) should have priority over Lynnwood, Bellevue and Renton (less congested areas).
NORTH KING COUNTY	The plan seems heavily weighted to serve the east side without adequately attending to pressing issues between Lynnwood and Seattle.
NORTH KING COUNTY	I would adjust and put the light rail capacity projects ahead of the BRT projects. Given the heat generated from buses and the associated environmental impact it makes more sense to move forward with the light rail projects and thereby reducing the overall CO2 and heat generated in the metro area. Twenty two years out seems too far out for putting light rail into Ballard. Also would like to see more solutions for East West traffic with North Seattle particularly U district (+ Magnuson Park) to Ballard.
NORTH KING COUNTY	The Proposed Ballard plan goes to downtown, while quite a few residents in the Ballard/Loyal Heights, Crown Hill, Greenwood neighborhoods need to commute not only to downtown but across to the UW campus area. It would make more sense to add a light rail line that would connect with the UW/Northgate line where one could connect to continue to UW/Capitol Hill and downtown. This would also eliminate the need to build a bridge over the ballard shipcanal.
NORTH KING COUNTY	Living in West Seattle and working in Ballard, I believe I is dire to offer light rail ASAP. 17years is entirely too long. As a tax payer, I see little value in paying for these projects as planned. Considering the new tunnel through downtown as a primary transit option isn't nearly enough. Additionally, many people are already being passed by busses trying to get downtown to work. West Seattle is experiencing extreme rapid growth and needs viable options much sooner than proposed.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Ballard has been significantly impacted by construction of new high density housing recently, and the building and plans for building continue. I do not see how the Ballard Bridge, two lanes each way, can possibly support the population that needs to get downtown for work. It is already a nightmare crossing the bridge on a bus. Is there any way to move up the timeline for the Ballard light rail improvements?
NORTH KING COUNTY	<p>Despite the fact that the Ballard neighborhood has exceeded the city's growth targets by a larger margin than any other neighborhood (429% of targets for 2024), Seattle Transit has announced that it will not execute the Ballard extension of light rail until 2038, at which time there will be 7–10 years of disruptive surface work (construction and staging equipment) along 15th Ave, an arterial already beset with gridlock during peak commuting hours. Traffic is bad today getting to and from Ballard. In 22 years, traffic will be beyond untenable after a disruption of this magnitude (lasting 7-10 years)!</p> <p>The city MUST PRIORITIZE Ballard, which has already received a massive influx of growth. Furthermore, since the city has already put the cart before the horse (in terms of permitting growth before infrastructure expansion has taken place), a less disruptive plan must be considered so that residents are not trapped by gridlock for the 7-10 years during which construction will take place.</p>
NORTH KING COUNTY	Light rail extension to Ballard is a much higher priority than a 22 year wait suggests. The rapid growth in the south end of the east the east sound, such as Issaquah should receive a little more priority. I believe, in terms of timelines, that the priorities are set in reverse order here with respect to ridership probabilities, current alternatives, and contributions to congestion.
NORTH KING COUNTY	I'm biased, but many of the new homes built in the area are pushing northward. If we are looking in 10-25 years time, try to anticipate these needs.
NORTH KING COUNTY	I live in Greenlake but my son lives in Ballard and commutes downtown to Amazon. If the Ballard line doesn't get public transportation for another 22 years, perhaps we should reconsider the lax zoning laws and density plans currently in place within Ballard?
NORTH KING COUNTY	Money isn't the issue; this just seems like a plan with its priorities backwards. Having moved here from SF, I understand the political pressure of pleasing the suburbs but have seen the results - empty suburban cars while eager urban residents wait. I would like to move to Ballard but can't see it happening if the only option for 22 years (!!!) is bus.
NORTH KING COUNTY	West Seattle needs to be addressed earlier to alleviate the traffic congestion issues and rapid population growth which is occurring in the next 2 years due to large scale development of apartments.
NORTH KING COUNTY	Grade separate any new light rail lines, omit the draw bridge over the ship canal in favour of a tunnel, and prioritise projects with the highest projected ridership. Extensions of light rail to Everett and Tacoma should only be pursued if they will move more people faster than existing commuter rail and express bus service.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	West Seattle and Ballard seem to be lacking in transportation as most busses are standing only. Also, east-west options for ballard and downtown need to be considered or enhanced. The #8 is one of the only east-west busses and is many times full, late, or both.
NORTH KING COUNTY	West Seattle and ballard should have higher priority
NORTH KING COUNTY	West Seattle light rail needs to be done SOONEST, and Ballard behind it. The microhousing boom is still going on in West Seattle and overwhelmed the D line already in Ballard. Oh, and GRADE SEPARATED.
NORTH KING COUNTY	Not fair that ballard service is hitched to a second downtown tunnel while west seattle is not. 5 year delay b/c of this is lousy! This makes D line brt improvement more critical than C line in early years.  ST needs to include study of where to go next from 65th street in this plan NOW. Need to fund alt.analysis and PE to design a good 65th LRT station and will need some bus connection investment if really stopping at 65th. It isn't an easy transfer locale for buses and so, also not far enough north for a terminus in my opinion.
NORTH KING COUNTY	MUCH QUICKER TIMELINE NEEDED! It's already far behind the actual need. Speed up this timetable. Also too much money for busses and BRT! More for rail more quickly. Money spent on massive bus and road upgrades is a waste for how little actual impact it will have for the most people.
NORTH KING COUNTY	I would gladly pay more in taxes to accelerate the rollout of this plan. 25 years is ridiculous, and everything should be completed in a fraction of the time. Modify to provide a plan to accelerate rollout. Prioritization is a concern as well.
NORTH KING COUNTY	I am in support of the Ballard-Downtown Seattle line, but I don't support the proposed timeline. On most Spring/Summer (rush hour) afternoons, it can take me up to 45 minutes to travel from Interbay to Pike/Pine whether via car-sharing, driving my own vehicle, or riding Metro. That's only about 4 miles away! When certain businesses occupy (i.e. Expedia) the vacant spaces on Elliott, I can see this getting much worse. I would like to see Ballard-Downtown Seattle moved up in the timeline.
NORTH KING COUNTY	I would like to prioritize Ballard and West Seattle connectivity to the light rail. These districts are both difficult to get to on public transit because of the lengthy bus rides currently in place.
NORTH KING COUNTY	Investing in the light rail will be the best long term solution for reducing traffic and allowing commuters viable options for daily commutes. The Sounder is so limited in service that it is hard to use to get to work. Busses get stuck in traffic and have limited capacity. The light rail is really pleasant to ride, has more stops, and is not impacted by traffic. It should be the top priority.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>I don't see much value in the bus options. Seattle traffic is terrible and only getting worse. Buses get stuck in traffic, no matter whether they're able to use the shoulders or not (people park in the shoulder regardless, so the bus has to go around). We have to provide incentive for people to use transit. To me, that means trains. They don't get stuck in traffic, meaning they will hopefully be faster than commuting alone. Chicago has a huge transit ridership because you can get to the suburbs via train in about half the time as it takes to drive. Even people in near-in neighborhoods take the train because it's faster than finding a parking spot. If we want public transit to be successful in this city, we need to support train systems, not more buses.</p> <p>Also, the timelines are unbelievably long. I understand the need to keep the taxes relatively low to get this passed, but because of this timeline it's barely better than doing nothing at all. We need solutions now (or 5 years from now), not 25 years in the future.</p>
NORTH KING COUNTY	<p>Finish all studies first and then plan a DT to WS and Burien line. Finish all studies first and then plan a Kirkland - Sandpoint - Ballard line and Bothel/Lake City Way to UW line.</p>
NORTH KING COUNTY	<p>I have two main areas for feedback:</p> <ol style="list-style-type: none"> <li>1) We really need the West Seattle light rail project to extend further into West Seattle at a minimum to the Westwood Village area to be viable. Ideally, it would extend to the Burien Transit Center.</li> <li>2) The timelines are extremely too far out to be of comfort to support the current plan. Sound Transit should find ways to bring both the West Seattle and Ballard projects online more quickly including exploring additional funding mechanisms in order to speed up the timeline.</li> </ol>
NORTH KING COUNTY	Get light rail to Ballard faster!
NORTH KING COUNTY	Train to Ballard sooner than 22 years.
NORTH KING COUNTY	<p>Some of the highest tax payers are northwest and southwest of downtown. Ballard and W. Seattle are growing by leaps and bounds. The plan should be modified to give these LINES WEST OF I-5 SHOULD BE GIVE THE HIGHEST PRIORITY. West Seattle has a population of 49,000 (2010 Census) and the new high rises going up are surely going to make the population surge. It is the most populous section of the city. The proposed light rail to WS is so short, it would be easy and inexpensive (competitively speaking) to run it over the lower bridge. This would be an easy way to get support from the western neighborhoods - concentrate on the city first, then you can connect Everett. No one over here is interested in a line to Bellevue if you can't get on it over here.</p> <p>[name and phone]</p>
NORTH KING COUNTY	Put Ballard ahead of Lynnwood, Bellevue, Renton, Redmond and Federal Way and West Seattle & Tacoma.
NORTH KING COUNTY	Needs to be built quicker. Traffic is horrible. We can't wait 25 years

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	The plan should focus on bus service which is flexible, rather than light rail which is extremely expensive and has a too-long timeline to complete. If anything, we should focus on subway underground, as long as Bertha or Seattle Tunnel Partners are not involved.
NORTH KING COUNTY	<p>The Seattle traffic mess and projected city growth should shift the priority of the ST projects. The City traffic needs to move with a rail system independent of the buses and cars and cyclists and skate boarders, etc.</p> <p>LIGHT RAIL NORTH, SOUTH AND EAST TO WEST NEEDS TO BE DEVELOPED - should have been developed 50 years ago!</p> <p>More employers and more people are moving to Seattle, this is great for Seattle, but all of this development needs to be met with light rail appropriate to move people to and from.</p> <p>I'm a former New Yorker, and used to decent transit with the NYC subways. While I realize this is a very different area geographically, Seattle needs help.</p> <p>Fish trucks and broken bridges should not paralyze a city, putting aggressive bus drivers on the road instead of light rail does not help these disasters. Just think, what will happen when we have a real disaster?</p>
NORTH KING COUNTY	<p>As a former Tacoma resident with family still there, it's very odd that the Tacoma light rail is running along 19th rather than 6th, which is significantly more active in terms of restaurants, bars, and cafes. 6th street also brings the light rail close to University of Puget Sound, a large population of students that would be happy to take the light rail to downtown Tacoma or even transfer to take light rail to downtown Seattle. If modifications can still be made, I would suggest switching the line to 6th st.</p> <p>In addition, the fact that this project will be completed by 2041 is very unattractive to Tacoma voters (family members still there wonder why they should pay for something prioritized so low). Given that this line is one of the less expensive projects and requires no tunnels or bridges, why will it take so long to complete?</p>
NORTH KING COUNTY	I think that projects within the boundaries of Seattle should be focused on first Instead of Ballard and Greenlake being one of the last. Traffic is worse in Seattle, downtown, Ballard and university district. These should be the area of focus instead of trying to get Redmond and Bellevue traffic to Seattle. People actually living in Seattle are not able to pay for things as much because it's so expensive and this is where the transit should be improved for these people instead of others who are able to pay to come into and out of Seattle from Redmond, issaquah or bellevue.
NORTH KING COUNTY	Too slow. 17 and 25 years for light rail to Ballard and West Seattle is ridiculous when the monorail was voted yes by the city twice 10 years ago.
NORTH KING COUNTY	Rail service should be interconnected and not simply stop in a neighborhood such as Ballard or WS. Explore more bus options, beefing up what service we already have.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Light rail from Downtown to Ballard in 22 years is unacceptable. Ballard is one of the fastest growing neighborhoods in Seattle. It currently takes 55 minutes to ride an "express" metro 17 or 18 bus from Nw 75th to international district. Nearly 30 min of this ride is getting through downtown. Also the proposed line stopping at Market also very short sighted. Why not continue the Ballard line above surface to 85th nw then expand to Northgate station which would serve so many more people other than those that live in a confo in downtown Ballard
NORTH KING COUNTY	I believe that we need to focus on building the link light rail to Ballard and west Seattle before expanding to the surrounding cities. 22 for a light rail to Ballard is absolutely unacceptable. we need to focus on moving people in and around the city before we can focus on moving people from outside in or inside out. I purpose we move up the Ballard and west Seattle line to first on the list and also possibly adding a Ballard to U district line.
NORTH KING COUNTY	Ballard rail (grade-separated) should be prioritized. It would move more people than any other proposed line.
NORTH KING COUNTY	Considering how rapidly West Seattle is growing, I believe the West Seattle line should move up on the priority list.
NORTH KING COUNTY	Ballard to Downtown line with a at grade section is a bad idea considering the current traffic.
NORTH KING COUNTY	Light rail to Ballard and West Seattle should be fully grade separated. Also, these projects should be completed BEFORE the expansions to Everett and Tacoma. You've got two tunnel boring machines sitting around after the Northgate tunnel gets dug. Finish the East Link expansion into Bellevue and then ship them back to dig tunnels to Ballard and West Seattle.
NORTH KING COUNTY	Forget about tunneling for the light rail, build elevated rail if you can do that faster and cheaper. We desperately need more light rail sooner. Also reevaluate whoever you buy escalators and elevators from because they break down way too often. The repairs alone that you're spending on them has to offset the cost of buying better escalators and elevators in the future. Godspeed!
NORTH KING COUNTY	It is my view that these projects are not being completed quickly enough to truly combat climate change. I think that efforts should be made to spend more up front/ get federal and other grants to complete the "spine" by 2018-2020 at the latest. Current freshman students upon graduating from high school should be able to get to college via these proposals from anywhere in the metroplex. Thank you for your consideration.
NORTH KING COUNTY	Ballard has been determined to be a higher priority then many other projects. It is political concerns which pushes it immediately aside. It should have a higher priority (along with the parallel tunnel) then other projects. Plus, the idea of running it up 15th Ave. NW is absurd. The impact on transit because of the impact on 15th can be avoided by a tunnel. Also, having an above grade transit hub at 15th and Market will destroy the connection between Central Ballard and East Ballard. It will also be, quite frankly, a massive concrete structure in the middle of Ballard.
NORTH KING COUNTY	Tacoma and South Sound demographics are best suited to average public transit riders, it would make most sense to start developing the sites with the most potential ridership; this would be the south sound unless your data and market info suggest otherwise.
NORTH KING COUNTY	For my personal needs (not necessarily indicative of the whole of Seattle), I would want the Ballard and West Seattle light rail stations to be open sooner, and as such a higher priority.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Ballard should ideally be above grade and needs to get finished sooner. I will vote no if the Ballard link takes until 2038 to finish. You are planning to build the light rail out to cities that constantly vote no to transit improvements. Buses in Ballard during commuting times are always packed and with all the new construction in Ballard it is going to get worse.
NORTH KING COUNTY	Ballard in 32 years is UNACCEPTABLE. This project has the highest ridership and by far the biggest need. Do what is right for the city as a whole NOT just the suburbs!!! This line will reduce traffic for everyone and make the city a better place to live. Get your priorities right. ALSO Build it right. GRADE SEPARATED all the way!!!! There is NO excuse for building a sub-standard line to Ballard. You will be screwing our children and their children with this short-sighted design.  <a href="http://seattletransitblog.com/2016/04/19/ballard-to-downtown-must-be-done-right/">http://seattletransitblog.com/2016/04/19/ballard-to-downtown-must-be-done-right/</a>
NORTH KING COUNTY	Re-prioritize the West Seattle and Ballard shift to rail to the first phase. This would get MANY buses off the roads downtown and provide additional entry points to downtown.
NORTH KING COUNTY	For the sounder train, is there any way to add one more departure from Seattle to points south in the morning after 6:50 AM? It may be more viable to instead add another departure of the 590 bus from Seattle to Tacoma between 7:30 AM and 8 AM. The 8 AM bus always has standing passengers because it is too full, which is dangerous when driving on the highway. Also, please phase out the bicycle racks on buses that can only hold 2 bikes. There have been many instances where myself and others could not board the bus because the bike racks were full. Finally, I don't expect to be living in the area by the time any of these projects get finished, but still strongly support all of these mass transit initiatives in order to reduce greenhouse gas emissions and congestion. Thank you all for your hard work on this.
NORTH KING COUNTY	Way too long for Ballard!!
NORTH KING COUNTY	Where are the stops for Fremont and Wallingford? With the opening of the UW link station, many of the buses have been cut through those neighbourhoods.
NORTH KING COUNTY	The Downtown to Ballard and Downtown to West Seattle segments should be started and completed much earlier than the current timeline - it's absurd to have to wait 22 years for light rail service to Ballard, especially when other cities can build out a full (downtown-centric) subway system in fewer than 10 years (for comparison, the initial buildout of the DC Metro system took 7 years to open, with more mileage than the Downtown-Ballard route).  Additionally, it's a non-starter to have the Downtown-Ballard route cross the ship canal via a drawbridge. Every effort should be made to completely separate Link from traffic, be it car, bus, rail, or boat traffic.
NORTH KING COUNTY	I believe that there should be grade separation on the entirety of the Ballard to Downtown light rail line. This is crucial.
NORTH KING COUNTY	Ballard needs to be 1st and done right. It is by far the biggest ridership and benefit for the entire city!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Ballard to downtown should be entirely grade separated  The timeline for Ballard should be moved forward
NORTH KING COUNTY	Ballard is the most densely populated neighborhoods in Seattle and construction continues non-stop. Most of these new projects do not include resident parking, forcing residents to use transit to access locations throughout the city. And, you would wait 22 years to provide light rail to Ballard- that is a wait for an entire generation!!! The only transit carrot you offer is the existing D-line. I will not support a plan that ignores Ballard for a generation! And all your plans run north / south. No thought whatsoever for transit to/from Ballard to the U district.
NORTH KING COUNTY	Increase costs in order to deliver the West Seattle light rail sooner than 17 years. Target 10 years to get support from voters today so they might actually get to see benefits in their lifetimes.
NORTH KING COUNTY	The Ballard to Downtown needs to NOT be on the street. This has to be an underground system to not further clog 15th.
NORTH KING COUNTY	Please add the 130th NE Light Rail station as a full non-provisional part of the plan.
NORTH KING COUNTY	The project timelines are way too long! Cut the red tape and get to building already!
NORTH KING COUNTY	Do this faster:) This city is growing and none of this is getting cheaper.
NORTH KING COUNTY	Ballard to Seattle completely off grade is the most important project available. The 2nd is the passage between Seattle and Bellevue. If these things are prioritized the highest, I will vote for the deal.
NORTH KING COUNTY	West Seattle to Downtown Seattle: This entire line will need to be grade separated and should be expedited if possible to allow for an earlier delivery. Is it all possible to speed this up to a 10 year or even 12 year time line?  Ballard to Downtown Seattle: This line absolutely has to be grade separated the entire length of the line. There is no question about this. The stations need to be planned to accommodate future line from Ballard to UW and further north. Lastly, this timeline has to be sped up. This line needs to be delivered in 10 - 12 year time frame. This has to be possible, just tell us how much money is needed.
NORTH KING COUNTY	Being a Seattle resident, I of course am going to prioritize Seattle-based projects. I would support higher tax rates in Seattle (as opposed to the greater Seattle area) to fund light rail expansions specific to the Seattle area (i.e. Ballard to downtown, Ballard to UW, Seattle to Bellevue, etc.)
NORTH KING COUNTY	Ballard needs to be moved up, with grade separation ( <a href="http://seattletransitblog.com/2016/04/19/ballard-to-downtown-must-be-done-right/">http://seattletransitblog.com/2016/04/19/ballard-to-downtown-must-be-done-right/</a> )
NORTH KING COUNTY	Ballard rail project should be prioritized and completed first! It has the greatest number of riders and will link the City of Seattle to the overall transit system. Cost and time efficiencies should be developed to move Ballard to be first in the plan and build a tunnel instead of the proposed bridge over the ship canal. It is unbelievable that the Ballard line will be open in 22 years-- my 2 year old daughter will have finished college by that point. This is important! Please consider revising this plan!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>Grade Separation. The Ballard corridor must be grade separated. That includes avoiding almost all disruptions due to shipping traffic when crossing the Ship Canal.</p> <p>Recognize that both Downtown Subway Tunnels will be regional assets. Resourcing the tunnel as a regional asset can ensure funding available to resolve reliability issues north of the tunnel that will affect the entire system if left unaddressed.</p> <p>We hope to see a timeline for Ballard delivery under 20 years. We ask that Mayor Murray, the Seattle City Council, and community stakeholder groups commit to the actions outlined above with the stated goal of shaving 3 years off delivery timelines for all high ridership projects within the City of Seattle.</p> <p>Plan and build for the future. We look forward to seeing ST’s terminus alternatives to ensure North and East lines can easily be added from the Ballard terminus. In addition, Ballard to UW and West Seattle to Burien need to receive full EIS/Record of Decision status, as well as the Lake City Extension HCT Corridor Study, and the Metro 8 Extension HCT Corridor Study.</p>
<p>NORTH KING COUNTY</p>	<p>Ballard cannot wait 25 years for light rail access. The roads from Ballard to downtown and the buses are already full/jammed every day. The order projects are completed should be based on projected ridership as well as ease to current traffic.</p>
<p>NORTH KING COUNTY</p>	<p>Light rail service to Ballard needs to come sooner than 22 years from now. The city is adding density in many places, but Ballard is one of the major focus areas for increased density. The existing transit options in Ballard are limited, and have been made worse with recent modifications to bus routes. Additionally, the Rapid Ride D line does not proceed from Ballard directly downtown, and instead makes several stops in Queen Anne on its way. These factors cause many people to use cars to commute relatively short distances from Ballard. While some investments in bus transit may help, the light rail is the real key to modernizing our transit infrastructure to support expected growth and additional density in the coming years. It is worth taxpayers spending more to accelerate the timeline for the transit plan because that additional expenditure will be offset by savings elsewhere, such as reduced time and money spent commuting and reduced numbers of automobile accidents. Additionally, preparing for higher density sooner rather than later encourages the growth of the tax base, which helps offset per-taxpayer costs.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Asking Sno.Co. residents to pay during the entire time frame and be last to receive rail service into Everett seems incredibly inequitable. Considering the cost, more emphasis should be put on BRT. The Ballard light rail extension should be the lowest priority or people in those portions of Seattle should be asked to pay more (or Sno.Co. residents allowed to pay less). Considering the 20-40 year time horizon for completing the proposed phase there needs to be some expiration date and/or roll back to the tax rates/taxable formats. There must be more protection for taxpayers when Seattle's leading politicians are constantly complaining about cost of living/overly expensive housing costs. These taxes will make Seattle even more unaffordable than it already is.
NORTH KING COUNTY	Ballard light rail in 22 years?! As in the year 2038?? Are you kidding me??
NORTH KING COUNTY	Become a real city and expand your light rail first. The buses work... shift focus to light rails.
NORTH KING COUNTY	The Ballard light rail line (and frankly all future light rail lines in Seattle) should be GRADE SEPARATED from street traffic at all times. It does nobody any good to build fantastic public transportation options and then subject them to the same traffic problems our current bus system deals with. Trains will not be reliable if they run on the street w personal vehicles.
NORTH KING COUNTY	There must be a way to speed up the delivery of services to these much needed projects! Light rail to Tacoma (17 years) and Everett (25 years) is unacceptable!
NORTH KING COUNTY	Emphasis should be placed on high-ridership projects. Install as much BRT as possible as quickly as possible. Then, install Link light rail in the areas of highest potential ridership first. Issaquah will be more effectively served with BRT until ST4, so use those funds to service high-ridership areas instead.
NORTH KING COUNTY	Ballard line should be prioritized. And when doing so, please look at having a station at *top* of Queen Anne hill, and not just all the way down by Seattle Center.
NORTH KING COUNTY	I strongly do not support the proposed Sound Transit Light Rail and/or Sound Transit Bus additions in the Ballard   Interbay   Queen Anne Neighborhood as shown on the Sound Transit Map on this survey. I strongly support the current Metro   Rapid Ride Bus system we now have in place. I think Seattle   King County Transportation system is perfectly fine and serves this areas transit needs well. I support expansion of Light Rail outside of the Seattle Core Neighborhoods. Areas such as Everett   Paine Field and the combined bases in Tacoma need a better transit than they now have.
NORTH KING COUNTY	22 years to get light rail to Ballard is not a good plan - while i'm not sure if it's reflected above if that's not revised i would be hesitant to support the plan as currently proposed. As far as increased ridership adding the Ballard line is clearly preferable to West Seattle.
NORTH KING COUNTY	Parking at the current stations need to be the first priority. People who want to take the transit need a place to park. The current lots become full before the commute even starts. There is no parking at Husky Stadium and the Northgate lots cannot handle current bus loads. The proposed Northgate garage is too small and at least 1,000 cars will need to park at 145th & 130th.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	With the influx of new residents in West Seattle & Ballard the need to increase light rail to those areas should have a higher priority in my opinion; especially in light of the fact that bus routes to/from West Seattle have been drastically changed or reduced in recent years making it even more difficult for commuters to use mass transit over driving to those areas of Seattle.
NORTH KING COUNTY	I believe that Light Rail to Ballard, due to its greater density, should be commenced before West Seattle. But I also believe we should exhaust all possibilities, in terms of funding, bond issuance, etc., to speed up the timeline for the ST3 plan to increase its chances for passage.
NORTH KING COUNTY	Personally, with all the growth in Seattle, we should take the chance now to really build out Seattle light rail. Connect all the neighborhoods - Queen Anne, Fremont, Madrona, etc.
NORTH KING COUNTY	West Seattle desperately needs more buses on the C line. I got on at the Fauntleroy ferry dock and got off at SW Avalon and Yancy. Luckily, I had a seat, but by the time we got to the Alaska Junction, many were standing -- already!
NORTH KING COUNTY	The majority of traffic is due to commuters on limited highway space. It is difficult to expand the highways due to natural geographic boundaries, so we need to remove vehicles from the road. Most people would rather sit in traffic than take the bus, so expanding the bus service does not help the problem and only costs more. Light Rail is the best way to reduce road traffic. However, Sound Transit needs to ensure the Light Rail stations actually go to the locations of the largest employers (consider the Boston Commuter Rail with a stop at the GE station). Having a station "close" will not work, we will just drive to avoid having to walk 30 minutes in the rain to our offices. I would love to take the train daily, but it does not stop anywhere close enough to where I (and most people I know) want to go.
NORTH KING COUNTY	Your Ballard to Downtown plan needs to change and is more expensive than other options offered.
NORTH KING COUNTY	Ensure the the Downtown to Ballard line is not at grade.
NORTH KING COUNTY	The two biggest improvements I see are the separation of light rail lines from regular traffic on proposed lines to speed up service and increase reliability, as well as to include in the ST3 final plan studies for future lines, especially proposed lines to Burien and future lines from Ballard to other destinations in North Seattle.
NORTH KING COUNTY	It was not clearly stated if the West Seattle and Ballard Light Rail projects would be built as tunnel, raised rail, or traffic congested surface street rail, and it is important that these project progress without limiting current or the growth of street traffic.
NORTH KING COUNTY	The light rail to Ballard needs to be a priority, especially with the density the city is putting in Ballard.
NORTH KING COUNTY	I am disgusted by the order of projects proposed in the ST3 draft. Ballard to downtown first or I vote against the plan. Period.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>-It's imperative that new transit projects not have to sit in traffic with cars or wait for lights. The travel time to Seatac could have been reliably much faster than driving, but someone decided it should stop at traffic light on MLK. The new trolleys/streetcars whatever they're called are insane, I could ride my bike faster.</p> <p>-With this in mind, I'd like to see proposals that eliminate unneeded delays for existing transit. Time the lights on MLK for light rail. Build more bus-only lanes, or re-allocate existing lanes as bus-only, put bypasses around intersections where possible, and time the lights for them too. There should be an excellent cost/benefit opportunity here.</p> <p>If public transit is the fastest way to get somewhere, then everyone will get behind it, and everyone will ride it. If not, poor people will ride it and rich people will fight it. And by rich people I include all the Microsoft etc employees who are riding privatized mass transit already.</p> <p>-Did you check your map for usability to red/green colorblind? I'm just barely r/g colorblind and I had a hell of a time with it. Also your graphic designer wants to strangle you for using a .jpeg copy of the artwork instead of a .png</p>
<p>NORTH KING COUNTY</p>	<p>Ballard-CBD line should strive to attain a High reliability rating through the elimination of all potential right-of-way conflicts in the at-grade segment/replacing at-grade segment with grade separated option, as well as reduce the operational impact of the Salmon Bay crossing. The project timeline should be prioritized to deliver the Ballard-CBD light rail line earlier than 2038 through better construction phasing (e.g. construct the Ballard-Westlake w/O&amp;M facilities in the Interbay area in the first phase earlier than 2038 followed by the construction of the 2nd Downtown Transit Tunnel).</p> <p>Graham St and 130th St stations should be prioritized as earlier deliverables to provide better regional connectivity to the Central Link and Lynnwood Link lines. Preferably, both stations should be completed by 2023 in time for the opening of the Lynnwood Link and East Link extensions.</p> <p>An extension of the West Seattle-CBD line to International District/Chinatown Station should be considered as a stopgap until the the delivery of the 2nd Downtown Transit Tunnel to enable better connectivity from West Seattle to one of the major transportation hubs in Downtown Seattle. This would also make the International District/Chinatown station operationally ready to handle split-spine operation as soon as the 2nd Downtown Transit Tunnel is delivered.</p>
<p>NORTH KING COUNTY</p>	<p>I would rather see Sound Transit focus on light rail rather than spending funds to improve rapid rides, etc on corridors where light rail is proposed. It is a long wait for light rail to West Seattle (and the very vocal complainers in Ballard) and my understanding is that while part of it is the time to develop the project, part of the reason is also funding. If less dollars are spent early than the light rail funding may be available sooner</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	I work in community mental health in South King County. There are many low-income housing units in White Center and the bus system is infrequent here. In terms of supporting income equality, I believe it would make more sense to give people in this area access to higher paying jobs and good services downtown. It would make more sense to have the rail line be a straight shot to Burien, rather than jogging west over to the junction. West Seattle already has rapid ride, which could be used to connect people to a North/South line closer to the West Seattle bridge.
NORTH KING COUNTY	You should start close to Seattle and work out
NORTH KING COUNTY	The timeline is ridiculous. Ballard and West Seattle need transit solutions now. For it to take 22 years is unacceptable. By the time 22 years roll around the city could look completely different and then what? Another 85 gazillion dollar transit plan that we "have" to implement for the sake of the city? I'm not buying the flaming pile you are selling.
NORTH KING COUNTY	Remove extra SLU station in favor of tunnel under ship canal. Going to Ballard needs to be reliable, a bridge that opens precludes this.
NORTH KING COUNTY	I think it would be better for the Lynnwood to Everett route to go directly to Everett via either I-5 or Evergreen Way, and not go to Paine Field/Boeing. It would save time and money.
NORTH KING COUNTY	Would like the Ballard line to come faster. Ballard line should also *not* include at grade sections. It should not be affected by car/bike/pedestrian traffic.
NORTH KING COUNTY	The most dense neighborhoods are in the most dire need for LRT but this plan wouldn't deliver to those areas until 17-22 years from now! Unconscionable. Why is getting LRT to places like Federal Way being put ahead of that? It makes no sense except to satisfy political demands. The dense neighborhoods already have the land use pattern and the population (8K - 12K per sq mi) to ensure strong ridership. Ridership = success. Federal Way, Lynnwood, etc. have 1/2 the density (4K per sq mi). More importantly, they have an extremely auto-oriented land use pattern that requires large park and rides to attract ridership. These jurisdictions (and others similar) should be required to develop station area plans to ensure adequate activity units (jobs and population) in the vicinity, walkable from the station. We can seed the need for those types of areas with BRT as a precursor to eventual LRT. As you know, when/if BRT has its own dedicated ROW, it can offer many of the same advantages of LRT. In summary, I would like to see at least a modified plan that accelerates delivery of true mass transit for Seattle's urban neighborhoods (Ballard, West Seattle) that are both horribly tough to get to now, including by bus. That would get my support even if the overall cost and scale of the plan didn't change.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	I believe that the West Seattle light rail line should be in the FIRST phase of light rail rather than the second. Access in and out of West Seattle is the WORST in the entire King County area. Please, please, please consider bumping up the West Seattle line ahead of Bellevue and east of Lake Washington. Thank you very much. I totally support this effort but really, West Seattle is being screwed by the loss of the viaduct and we desperately need better access to the entire area, based on the huge influx of high-density housing in West Seattle. (I believe we have already achieved the population goals that were set by the City Council for several years into the future, and the traffic crunches are really hurting us.)
NORTH KING COUNTY	I reviewed the plan for the Ballard to Downtown route and strongly disagree with building a large above-ground station on 15th and Market. Ballard is becoming more and more dense. I don't think a station like that, with a long platform for an extra train to boot, is right for that space. Let alone building ANOTHER draw bridge over the ship canal? I saw earlier plans that included tunneling under the ship canal, and while I realize it is more expensive - in the scheme of this huge proposal, I did not think it was a material amount.
NORTH KING COUNTY	The tunnel plan for Ballard is the best open. Building another bridge across the ship canal? Having a draw bridge is half our congestion problem now! The trains can't run "every 6 to 8 minutes" if you have to wait for a bridge. Only a tunnel provides the way to keep that kind of schedule.
NORTH KING COUNTY	Condos are being build all over Ballard and there are no improvements being made to support this growth. 22 years does not help.
NORTH KING COUNTY	Light Rail from West Seattle/Ballard to Downtown should be placed at a higher priority than BRT.
NORTH KING COUNTY	130th street station should NOT! be provisional. This area agreed to more density with the understanding that light rail would be provided. North Seattle needs another access point to the light rail.
NORTH KING COUNTY	For the Ballard to downtown route, why not avoid the bridge and 15th Ave Interbay area, and instead go north from Ballard up 15th Ave NW to Hollman Rd then under Interstate 5 to the Northgate station park and ride area.
NORTH KING COUNTY	Buses can be put on the roads today and infrastructure is minimal compared to rail. Imagine the existing light rail track as a road exclusively carrying buses and airport taxis. The service would be more flexible, cheaper to implement and could adapt to technological advances more quickly than trains. The choice to go with rail should be scrutinized heavily and fully vetted before committing. Also, continually leaning on property taxes for cash results in pile-on and pushes the less advantaged out of their homes, gentrifying Seattle. Bump up the sales tax since those who have moved to retirement would not be forced to pay as much as those at the peak of their earning potential. Think of it; two houses of equal assessed value but one home has two earners at peak levels, the other household has retirees with no income, drawing off of retirement savings to pay bills. Why should both pay the same amount for public infrastructure? They both do not have the same means to pay. Top earners have more disposable income to pay toward taxes and growth.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	It is important that Link Light Rail projects in the urban areas be separated from traffic - either elevated or below grade. The idea of a drawbridge across the Ship Canal is silly. Tunnel is a better option. Think long term and the additional cost compared to risk of injury and slow service becomes moot.  I am concerned about the delivery timelines. How will you get voters in Ballard excited about supporting a service that won't arrive for 22 years???? What would it take to speed up delivery system wide?
NORTH KING COUNTY	Focus on Seattle Light Rail projects. Focus on using Sounder to connect different metropolis areas. Drop light rail extensions to Everett and Tacoma in favor of Sounder improvements.
NORTH KING COUNTY	Ditch light rail. It's locked in to just one route. Use lots more buses.
NORTH KING COUNTY	West seattle is land love ked and need help much much sooner than the plan outlines. Property taxes need to be spread between all counties server and not just seattle
NORTH KING COUNTY	It seems West Seattle has been generally D prioritized in transit options. We really need better ways to get into downtown and other business hubs. The congestion with 99 and the upcoming title will really grow worse. West Seattle needs options now – not in 17 years.
NORTH KING COUNTY	Ballard to downtown should be moved up to first priority. Add the 130th street station.
NORTH KING COUNTY	The west seattle station should be one of the first projects completed. I feel that it would relieve a lot of congestion between Boeing and downtown.
NORTH KING COUNTY	The Boeing access road station must include improved access for South Park residents to light rail. West Seattle improvements should also connect to South Park!
NORTH KING COUNTY	West Seattle has only one road way to get to Downtown Seattle, that being the West Seattle Bridge. There are many routes to get from Ballard or Northgate into Downtown. Why is light rail not a priority for West Seattle? 17 years for West Seattle to get Light Rail?! It is already a big problem to get across the West Seattle Bridge and with all the apartment density going up in West Seattle, it is only going to get worse. Additional bus service puts more buses on the already overcrowded West Seattle Bridge. This is not a solution.
NORTH KING COUNTY	Make sure that any light rail to Ballard our the east side is high enough that it doesn't get stopped by ship traffic
NORTH KING COUNTY	The decision to use street-rail and a new bridge to Ballard should be reconsidered. With the expanding density and traffic within the city limits, gobbling up surface real estate is a bad idea. Street rail still gets hindered by road traffic and open-air stations like those used in the Sodo and Central districts pose security risks. Please don't "cheap-out". Make the investment, build it right and use tunnels as much as possible within the city limits.
NORTH KING COUNTY	Consider more access through the Central District. Consider West-East lines connecting UW to Ballard and Cap Hill to Madison Valley through the Central District would be effective alternatives.
NORTH KING COUNTY	With expedia moving in to the interlake area, the Ballard light rail NEEDS to be much sooner than 22 yrs

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	I would like to see light rail service to Ballard be a higher priority and earlier completed item than light rail service to West Seattle.
NORTH KING COUNTY	Add 130th station ASAP. This will help abate the southbound I-5 slowdown mess which (guess what!) always starts at about 130th
NORTH KING COUNTY	I can't understand why Seattle neighborhoods, like Ballard and W. Seattle are so low in priority and so late in the schedule. Given the exploding density, this makes no sense to me.
NORTH KING COUNTY	Prioritizing lightrail to Issaquah over South Seattle and South King cities like Burien doesn't seem to get the best bang for the buck. I don't support encouraging growth farther from the urban center by reaching to Issaquah with lightrail. We need to hear serious conversations about the length of the lightrail spine, from Tacoma to Everett. The original spine from Sea-Tac Airport to Westlake in Seattle made a ~40 minute commute of a ~16 mile stretch. Will enough people want to spend ~80 minutes traveling from Tacoma to downtown Seattle? Why not focus on densifying King County lightrail options before spending the money to reach so deeply into Snohomish and Pierce? If we could get more Burien, Renton, Kent, (and yes, Ballard/West Seattle) commuters into the lightrail system, rather than trying to get Everett/Tacoma commuters to make the switch, could we see more traffic improvements per dollar spent than building so far south and north but having fewer east/west connections to the spine?
NORTH KING COUNTY	As a recent Ballard transplant from Capitol Hill, I am feeling the effects of fewer transportation options. Although I strongly support the idea of non-bus public transportation to/from Ballard, I am trepidatious about the existing proposal's solution. It sounds as if the risks are considerable, even to the layman reading the proposal. After recent history with digging for the latest light rail expansion, I can't imagine the citizens or voters will have much tolerance for such risk. Is there an alternate proposal if the testing shows tunneling to be difficult/cost-prohibitive/technically impossible. I think the plan should be comprehensive in its exploration of alternatives, and I favor as aggressive a timeline as is reasonable. For example, based upon what I see in the traffic and development in Ballard, having a system that proposes to solve the problem in 22 years, seems woefully inadequate. I appreciate the intermediate measures by proposing increases in reliability of the D line, yet the limitations inherent with bus service make this solution helpful but inadequate.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	The Ballard to Downtown Seattle connection is perhaps the most vital connection in the plan, and has been left for last. On top of that, it is proposed to be at grade, leaving it to repeat the mistakes of Link on MLK, and the streetcar along Broadway. Why would we remove capacity along one of our busiest corridors that could be modified to better accommodate BRT while enhancing the public realm to put in an at grade rail line that will undoubtedly lead to more traffic issues? No matter how you set it up, there will be cars or buses waiting at traffic lights, stations, etc. for the train to pass, and 15th will become a parking lot (more of one than it already is). Grade separation is the only option, be it underground, elevated, or adjacent to the BNSF railyard. Running rail adjacent to 15th will allow riders to be free from traffic while allowing the city to improve RapidRide and other modes along the corridor. Interbay is one of the few areas where we have the capacity to put grade separated rail above ground in the city, and by losing this opportunity now, we lose it forever. Don't do it. Also, don't leave it for last, the line is needed now. The fact that low density Issaquah will receive a rail line adjacent to a freer flowing I90 before Ballard is preposterous.
NORTH KING COUNTY	My additional feedback on the proposal is to try and have any BRT project proposed to service a light rail station (ie SR-522 to NE 145th Station) come online around the same time the the station is completed. My biggest fear is that; for example if of the light rail station projects is completed and in use but the BRT doesn't come online until many years down the road. In this scenario I feel that the potential of having them together would not be fully realized as they would be working together from the start of the stations life.
NORTH KING COUNTY	Why are we not increasing the gas tax? It seems like the vehicles congesting the roadways are not proportionally taxed. I have a car that I barely use and having to pay excise tax for having it sit around seems unfair.
NORTH KING COUNTY	This does not address the fact that commuters driving themselves are suffering. Adding additional busses only helps a small portion of the population. The busses coming from North Seattle to Seattle DT are full of people misbehaving and on Drugs. Security measures and better standards must be added for any support of the already stressful experience of riding the bus. You must be willing to regulate bus riders and provide a way for other riders to report misbehaving passengers. I would recommend a text system and security that can respond quickly. I would also recommend additional funds for infrastructure, if you can't park at a park and ride structure what does it matter if you have more busses coming and going?
NORTH KING COUNTY	Light rails, especially from West Seattle to downtown Seattle, need to be completed sooner than 17 years from now! The population in West Seattle is expanding way too fast. You won't keep up.
NORTH KING COUNTY	25 years is unrealistic. I oppose because the timeline should be halved. Take care of high density areas first, then expand to the areas that are less. Ballard first, Everett and Bellevue second, and every one else in the final phase. This needs to be done now, not in the next generation.
NORTH KING COUNTY	Why are outlying areas which have traditionally voted against transit being given priority over Ballard and West Seattle which have strong supported transit AND are seeing rapid growth in high density housing? If it takes 20+ years to reach Ballard I will vote against as I will be close to retirement by the time it benefits me.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Ballard needs to be prioritized before wear Seattle. West Seattle is better served by buses than light rail as there are more people who commute daily from Ballard than West Seattle and the West Seattle line is more track with fewer stations.
NORTH KING COUNTY	Could light rail go straight across lake to issaquah without the jog north to Bellevue-follow path of I-90?
NORTH KING COUNTY	Large employment centers, including south lake union and Google Kirkland, are not very accessible under this plan. Not enough of the plan services dense Seattle areas. Trains to Everett are unnecessary, BRT from Lynnwood down I-5 would more than suffice, especially with dedicated lanes.
NORTH KING COUNTY	<p>Please reconsider your priorities on the light rail. The biggest problem our region faces is rapid growth and traffic congestion. While I agree that Redmond should be first given the fact that it is home to a major regional employer, Federal Way should be at the end of the list. In fact, if I were to pick, I would go:</p> <ol style="list-style-type: none"> <li>1) Redmond</li> <li>2) West Seattle</li> <li>3) Ballard/Tacoma</li> <li>4) Federal Way</li> </ol> <p>Lots of people comment from West Seattle to SLU/downtown and can only get there via one stretch of highway. The way I see it, completing that stretch would have a solid impact on traffic. The same with Ballard and Tacoma. I say this as a Capitol Hill resident that stays local for work too.</p> <p>I just don't see why Federal Way should be that high on the priorities list. I can understand if the issue is the fact that you can get it done sooner due to not having to dig as much, but if it's anything else then I think you need to reassess your priorities.</p>
NORTH KING COUNTY	Ballard to Downtown light rail needs to be prioritized much higher. Having to wait 22 years is completely unacceptable.
NORTH KING COUNTY	service to Ballard should be higher on the list
NORTH KING COUNTY	I think Ballard and Tacoma links need to be prioritized and done quicker.
NORTH KING COUNTY	Timeline is way too long. I say I support the plan because I want something to happen, but the timeline is ridiculous.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>I live in Ballard so of course I am biased, but also I know what I am talking about. The RapidRide to Ballard is already over capacity during rush hour and things are only going to get worse as more housing comes on line. It is preposterous that we have to wait 17 years for light rail to come here. It is equally preposterous that the proposal does not include a tunnel under Salmon Bay. That is a recipe for slow, underutilized transit that annoys transit riders and drivers. Yes, of course it will be more expensive. It will also be worth it. You only have to look at the popularity of the recently opened Capitol Hill and UW stations to see the value of fast, convenient transit that connects densely populated areas and downtown and doesn't interfere with street transportation. We also need more RapidRide buses in the interim (and more express buses -- the routing through Queen Anne is a joke). Honestly, this is a problem that the transit agencies should be delighted to have -- too many people riding transit. But if the service levels don't improve, that trend will start to go in the other direction.</p>
NORTH KING COUNTY	<p>I understand this is a big issue with a lot of moving parts. Your organization is failing, has failed to communicate why it has taken so long for us to get here and why it will take so long to get this done. The growth in the region isn't going to slow down. These light rail expansions need to be done in five years or less. Get a few interns and mid level communications director to put together a 3 minute youtube video on what you need from the public to make this happen now! Is it public pressure to fast track the permitting process? Pressure on elected officials and if so a what level? More money? I really feel like the timeline you released will be a permanent black mark on sound transit's image.</p> <p>Also why can't you get from metro Seattle to the airport in under 2 hours to catch a 6 am flight? If light rail to the air port started like 30-45 minutes earlier you could catch an early morning flight.</p> <p>[name and contact info]</p>
NORTH KING COUNTY	<p>Light rail service through Fremont, Phinney, Greenwood and other neighborhoods that would likely grow as Seattle's population grows.</p>
NORTH KING COUNTY	<p>While time and money have been invested in these presentations, it is also necessary to be absolutely sure that the options that are offered in this huge plan meet the needs of the most people. Getting from the west side of Seattle to the east side of Seattle by car is very congested and most of these plans respond more specifically north south flow. Regarding financing, there has rarely been a highway project has been able to come in on budget, and there is no reason to diminish the cost of these endeavors for the purposes of good public relations. It may also be necessary to have communities commit to using new commuter services by promising that 50% of their travel endeavors will be committed to using the new transport systems.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	I live just north of Ballard. I feel that pushing the expansion to Ballard out 23 years is too far out. Ballard is rapidly growing and the need for public transportation to get all of the people moving into the area is critical. I want to support the expansion but I know that I'm not alone in saying that it will be hard for me to do with the current timeline that is proposed.
NORTH KING COUNTY	Please get Ballard to Downtown light rail done quicker! And please take it off the street either tunnel or rise, so it doesn't have to sit at lights. It just feels slower going through SODO then when its in the tunnel connecting UW to Cap Hill. I like that speed.
NORTH KING COUNTY	Ballard and new Seattle DT tunnel need to be moved forward and open sooner. The density is there and needs the mass transit.
NORTH KING COUNTY	The Ballard light rail should be sped up to come online in fewer than 22 years. Understood that the projects need to be phased, but the ballard/fremont areas seem to be rapidly growing, along with West Seattle, and the ST3 plan should be revised to reflect this.
NORTH KING COUNTY	Light rail from Ballard to downtown should be completed much sooner than 22 years from now---that's far too long in the future.
NORTH KING COUNTY	Light rail into west Seattle should go down Fauntleroy to the west Seattle junction and not up 35th avenue with sharp turn down Alaska street
NORTH KING COUNTY	So far BRT has been a waste of taxpayer money - all the lines are referred to as "Un-Rapid" lines by those of us stuck using them. We want the old Metro routes back. The only way to make them work is to remove the cars along the routes and that is unreasonable and completely unrealistic. It has created more congestion than it alleviated.
NORTH KING COUNTY	The station at 130th should be a priority of ST3, not provisional.
NORTH KING COUNTY	Southwest Seattle is missing in this plan. This includes the southwest Seattle area near the areas of Highland Park, Westwood Village, South Seattle College and also White Center south all the way to 128th Ave S in Burien. This LARGE very populated geographic area supports a very large, diverse working class community. We have thousands of residents that are not being supported at all by this plan, but we will be paying for it. We will also be very likely to use it for commuting, rather than more affluent neighborhoods. Many of the residents are lower income, or on fixed incomes, are senior citizens, young families. The West Seattle development stops near the West Seattle Junction and the plan doesn't pickup again until Burien Transit Center - that is 8 plus miles!!! It is also unacceptable that it will take 17 years for West Seattle/Junction area to get service. West Seattle is in the City of Seattle, with thousands of residents - many commuting to downtown Seattle, these residents would benefit from light rail sooner! We currently one major roadway out - the West Seattle Bridge. We need more access, we need light-rail service sooner, please. That all said, thanks for the great job so far! I know it is a TON of work and a lot of catching up to do! Thanks!
NORTH KING COUNTY	Re order priority for light rail stations to the North end stations. Consider Ballard to University District light rail.
NORTH KING COUNTY	25 cents per thousand is too much. Ballard and West Seattle should be considered first to ease congestion.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Light-rail to Ballard should be at minimum grade separated along 15th with a bridge tall enough to avoid most commercial boat traffic. Even better, include a tunnel under Salmon Bay if we can find the money. Pay for these improvements by acknowledging that the new downtown transit tunnel is a regional asset and should be funded as such when it comes to sub-area equity. Speed up the timetable by limiting alternatives considered in the EIS, build 24/7 if you have to, and hold Seattle's feet to the fire (don't worry, I will too) to get permitting done in a reasonable timeframe.
NORTH KING COUNTY	Ballard is the highest priority service neighborhood.
NORTH KING COUNTY	I think the UW to Ballard link should be done before the Downtown Seattle to Ballard tunnel extension. The downtown to ballard portion is hindered by a lot of infrastructure needed (tunnels and bridge improvements) and Ballard needs light rail access a lot sooner than those infrastructure challenges allow.
NORTH KING COUNTY	Ballard and west seattle must happen NOW, not 25 years from now.  Ballard must be grade separated, and not impact car capacity on 15th.  Ballard must cross ship canal with at least 75 foot minimum height clearance, or tunnel Under the canal.  Spend the money NOW and get the system working in less than a decade, not a quarter f'ing century!
NORTH KING COUNTY	The ST3 plan should be modified so the priory is given to the inter city neighborhoods which are growing rapidly with several high rise condo and apartment building coming on (namely West Seattle and Ballard). These are short lines that could be completed relatively quickly compared to longer lines outside of the city of Seattle. Having access to the system by rail from these neighborhoods would alleviate congestion on the freeways keeping in mind that most people in these neighborhoods are working in places other than downtown.
NORTH KING COUNTY	22 years it too long to wait for the ballard to downtown line to be built. We have a huge amount of commuters that would use the line every day (114,000 to 144,000 estimated). There needs to be a modification to speed this lines construction up.
NORTH KING COUNTY	Money to increase Bus service should only be used as *temporary* measure while more light rail and/or dedicated ( non road)transit options are implemented. Especially in the Renton/I-405 corridor!! Our household would go from no transit to primarily transit users if this were the case!
NORTH KING COUNTY	I fully support light rail across the Puget Sound, however, the rate at which these projects are planned to be completed is asinine. Light rail to Ballard in 22 years? Bus rapid transit takes 8 years? The timing of these projects, that is what needs to be modified. Our region needs improved mass transit services much faster than this 25 year plan.
NORTH KING COUNTY	I support an elevated rail to Ballard with a tunnel under the canal. A draw bridge is the antithesis of rapid transit.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Please raise the Ballard light rail project's priority level. The already booming population as well as the increasing residential density, requires action sooner than 22 years out. Can you imagine how impossible 15th Ave NW and Fremont Way will become after another 22 years of growth at the rate we've seen without light rail?!
NORTH KING COUNTY	Need for rail In Ballard and West Seattle is high. Should be targeted for completion in less than 20 years
NORTH KING COUNTY	Rail line to Everett needs to be completed sooner, and Ballard to the East side should be included in the plan. Also accelerating the rate of construction would be better, and a more simplified route in Everett (Snohomish County has proposed a different route that would work).
NORTH KING COUNTY	Ballard and west seattle light rail need to be completed soonest.
NORTH KING COUNTY	No surface light rail to Ballard and use NW Seattle coalition plan ASAP compleation
NORTH KING COUNTY	Bus rapid transit should be used in lieu of light rail in many of the route extensions or new routes. Can be completely grade separated in choke point areas and allows for some routes to continue beyond the "end of the line" or to have during "rush hours" routes of varying distance. Rail lines further out simply encourage sprawl and cost too much. Parking at major rail and BRT stops is very important. Timing BRT to feed (and pick up from) light rail is key as well. The BRT connection Woodinville to the 145th Station is a great idea (with some parking along the way)!!
NORTH KING COUNTY	Ballard and West Seattle should be prioritized over far flung suburbs. Fix the mess in the city first.
NORTH KING COUNTY	22 years to build the Ballard rail is ridiculously long; in that time, there should be rail to Crown Hill, Broadview, and Edmonds! In addition, the Ballard route should neither run ON congested 15th Avenue nor kowtow to So. Lake Union developer interests.  The rail extension north from Northgate already has too many stations, and should move over to the Hwy 99 alignment a.s.a.feasible. In particular, adding another station on I-5 (e.g., 130th) will inevitably slow travel and be redundant.  The sources of funding are haplessly unfair: neither a sales tax nor adding to residential property taxes is progressive or just. There are better alternatives available now, and Sound Transit should be fighting the Legislature for an income tax realization.
NORTH KING COUNTY	Selfishly - I would like to see the Ballard extension completed sooner rather than later. I live up north and work on Capitol Hill, and the commute seems unnecessarily arduous.
NORTH KING COUNTY	Any rail should be either elevated or underground. No more super slow surface rail! Use a bus, it's way more cost effective.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Focus on link stations in Seattle. Focus on Connecting Seattle to Tacoma, Bellevue, Everett. Let's become world Class. The metro region needs to grow up!
NORTH KING COUNTY	West seattle and Ballard are the 2 most important light rail extensions and their completion dates need to be moved up considerably. I will not support a plan that shows them complete in 17 and 22yrs..they both need to happen in next 10 yrs
NORTH KING COUNTY	BRT MUST be completely separated from automobile traffic. Otherwise, don't bother. It does no good to have buses stuck in traffic. The whole point of transit is to separate people from cars.
NORTH KING COUNTY	Most light rail should be underground or in a dedicated road bed. Not to replace current road with rail.
NORTH KING COUNTY	It is my belief that the inter Seattle projects should be a higher priority with outskirt parking areas to help with traffic problems in the city. Then once the city of Seattle is better set up then bring in the outer limits projects once the city is able to handle in increase in people.
NORTH KING COUNTY	I am shocked that Fremont I'd not considered in any of these plans. It's ridiculous that an important neighborhood is not considered in the least.
NORTH KING COUNTY	<p>It's ridiculous to claim that 130th Street station can't be built until after trains are running to Lynnwood. If Denver can get stations added without jeopardizing their federal funds, surely we can, too! It's been in all the documents that the feds approved, so it's no surprise to them. 130th Street Station should be operational in 2023 with the rest of that line, no excuses.</p> <p>In the documentation, Boeing Access Road station is shown as being part of "North King subarea" when it clearly is in the "South King subarea". Make sure that you're not taking Seattle's money to give to Tukwila.</p> <p>If a rail line is built to Issaquah, it must join East Link at South Bellevue. It's entirely possible to build right along I-90 through the 405 interchange. Use a little imagination. If it connects farther north, who do you think will use it? It will be much worse than the current bus routes. Issaquah residents will have to use their cars to get to Seattle in a timely manner. Is that really what we want??</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>For the Ballard to downtown Light Rail Project there should be 1 additional stop north of Market Street. The Ballard Urban Village extends to Northwest 65th Street. There currently is about a billion dollars of new residential construction in this area. It's too far to expect residents to walk to Market Street from the North End of the Ballard Urban Village. As part of the increased residential zoning that created the Urban Village, Ballard was promised increased Transit service.</p> <p>Waiting 22 years is too long a time before this area is serviced by light rail. The Transit extensions to the suburbs I fear will only increase urban sprawl as people now can move farther out into the open areas and still maintain their current commute time.</p> <p>Sound Transit needs to reward those people who move into the urban core. It's now faster to commute from Shoreline to downtown than it is from Ballard. That didn't seem right.</p>
NORTH KING COUNTY	<p>In light of the results of the priorities of previous surveys, the completion date of West Seattle light rail needs to be much sooner than 2033. We live within city limits, and it is completely unfair that the date of completion is the same as linking Seattle and Tacoma by light rail. I want to be able to enjoy light rail linking West Seattle and downtown before the last 7 years before retirement if at all possible. All the same, thanks for all you do and the overall plan is encouraging.</p>
NORTH KING COUNTY	<p>No new downtown seattle transit tunnel. Have elevated ballard line terminate at westlake (new main base in interbay).</p>
NORTH KING COUNTY	<p>The focus needs to be light rail. Streamlining buses would be nice, but the expansion of the light rail system would serve the city and suburbs more.</p>
NORTH KING COUNTY	<p>More covered/protected bike parking and bike access to light rail. Less money spent on car parking.</p>
NORTH KING COUNTY	<p>The schedule for light rail to West Seattle should be accelerated. With only one main access point to the community (West Seattle Bridge), we need another option that does not depend on streets, in the manner Rapid Ride does.</p>
NORTH KING COUNTY	<p>West Seattle and Ballard lines should come on line sooner.</p>

<p>NORTH KING COUNTY</p>	<p>OUR POOR NEIGHBORHOODS IN SOUTH SEATTLE are the ones in most urgent in need for light rail and bus service from the secondary streets to the arterial.</p> <p>Recently we lived through Trayvon Martin’s killing in Florida, Michael Brown’s death by a police officer in Ferguson, Freddie Gray in Baltimore, and many others. We have Black Lives Matter, a Movement that points to our poor neighborhoods as focus of segregation, continuous poverty and the failure of integration. In Europe; hoping we will not get there, the poor segregated neighborhood of Molenbeek has been consistently generating terrific terrorist’s attacks in and around Paris and Brussels.</p> <p>Planning Policies and Strategies</p> <p>In the U.S. these tragedies, born from mostly poor urban neighborhoods are the result of late 19th and 20th century sub-urban automobile planning, that came with segregated zoning, culminating in dysfunctional planning architecture and design that increases economic stagnation income inequality, crime, homeless, and displacement, while promoting ever increasing areas of sub-urban sprawl and congestion outside city limits.</p> <p>Many believe the reason for these tragedies to be the policing, lack of jobs, bad schools lack of housing etc. However these are consequences of the dysfunctional planning we planners; learned in planning school.</p> <p>It’s time to acknowledge isolation and segregation are not working and change to a more equitable functional physical planning and quality architecture. For these are no less then human rights, a social and moral issue.</p> <p>Sound Transit \$50B light rail build out must be considered a structural element for planning a 21st century progressive and profitable future for our culturally rich however poor neighborhoods of South Seattle.</p> <p>Sites with regional node potential, such as close and around the Othello Light Rail Station, (not every corner or crossroad) need be envisioned plotted and protected, for future 21st century walkable malls with structured underground paid parking, that will become destinations for all incomes within an integrated transportation system, will help connect all districts.</p> <p>Regrettably the new \$50B transit plan does not mention the South Seattle neighborhoods: Georgetown, South Park, Roxhill, Delridge, West Seattle, and Rainier Valley, Hillman City, down to Seward Park. They can all be accessed by the East West arterial from S. Othello street, coming from the existing North-South light rail at the Othello Light rail Station in the heart of South Seattle.</p> <p>We wonder, could the ending stations be called Jimmy Hendrix to the West and Quincy Jones to the East? Or are they destined to live in isolation with a lesser transportation system, busses, old automobiles and bikes?</p> <p>It is paramount to acknowledge our ignorance of the needs of our society’s popular, creative and bohemian culture. Currently our</p>
<p>NORTH KING COUNTY</p>	<p>Project completion time will be insufficient for seattle's rate of population growth.</p>
<p>NORTH KING COUNTY</p>	<p>West Seattle light rail should be moved up. It should happen fast!</p>
<p>NORTH KING COUNTY</p>	<p>Prioritize Ballard! Growth is skyrocketing and transit is not keeping up. There is no highway to Ballard like the east side. BALLARD LIGHT RAIL FIRST!</p>
<p>NORTH KING COUNTY</p>	<p>connections to West Seattle and Ballard should be prioritized.</p>
<p>NORTH KING COUNTY</p>	<p>Pierce county and Seattle should be connected first.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	The elevated crossing for the Ballard light rail line with a surface station at 15th and Market is just stupid. Why not build a higher bridge - maybe partner with Seattle and rebuild the current Ballard bridge higher so that bridge openings don't delay transit and light rail. Also, the best spot for light rail is probably a few blocks west of 15th at say 20th NW where two other proposed RapidRide corridors come together and closer to the heart of Ballard.
NORTH KING COUNTY	Too long and too much money. We are still paying for ST2. I think the plan needs to be scaled down and a way to expedite the higher priorities should be the focus.
NORTH KING COUNTY	Shorten time frame. We need all this now! We need more stations in the city and faster trains/subways!
NORTH KING COUNTY	I'm very supportive of the Ballard (with the modification of a tunnel instead of a bridge over the locks) and West Seattle light rail projects, which have the worst transit times to downtown (given proximity). However, I do not support the amount of time for completion. This transit solution should have been done two decades ago. I'm willing to pay more in property taxes, etc (even though there are caps on increasing these taxes currently). The city needs to figure out how to get more money upfront for capital costs associated with the construction, before proposing such a poorly thought out plan. If this first plan fails, we will only be given a less optimal and cheaper second proposal. Let's do it right the first time!
NORTH KING COUNTY	West Seattle and Ballard light rail should happen much sooner than planned.
NORTH KING COUNTY	Ballard is the fastest growing community in Seattle, with so many multi-unit buildings going up with insufficient parking. Occupants need rapid transit now, not in 18-22 years, to make Ballard livable. If light rail is 18 years away, the city must stop allowing multi-unit buildings that have less parking than there are residential units, and we must fix the traffic bottlenecks on 15th Ave toward downtown.
NORTH KING COUNTY	The Ballard light rail should be moved up in the timeline. 22 years is way too long. The neighborhood is so densely populated already and growing every day.
NORTH KING COUNTY	The Ballard and West Seattle extensions should be prioritized. The city needs to be connected via Light Rail as soon as possible to ease congestion. A 17 - 22 year plan to incorporate West Seattle and Ballard is far too long. They need to be incorporated by 2020. Yes that's aggressive, but the city is growing too fast to postpone local light rail needs.
NORTH KING COUNTY	Add West Seattle to Burien leg down California/35th/Delridge corridor.
NORTH KING COUNTY	Ballard and West Seattle should be prioritized. Twenty two years is a ridiculous amount of time to wait, especially with all the new condos going up in Ballard and West Seattle. We need improvements much sooner. Thank you.
NORTH KING COUNTY	speed up delivery times of a few projects vs. distributing across many.
NORTH KING COUNTY	The urban routes should be prioritized over the suburban routes.
NORTH KING COUNTY	Salmon Bay crossing should be via a tunnel and not be subject to delays due to boat crossings. Also not be at-grade through Interbay. I also support modifying the Everett Link line so that it skips Paine Field initially and going straight to Everett
NORTH KING COUNTY	West Seattle is growing far too rapidly to wait 22 years for light rail. At that rate we won't have light rail until after my unborn baby graduates from high school and that is ridiculous.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Indtead of doing a 2nd North/South route from West Seattle to Ballard, any new routes should be east/west located to tie in with the exiting station. An East/West from Magnolia & Queen Ann should go East to Madison Park. A second east/west link should go from Shilshoe east to Laurelhurst. East/West lines at West Seattle to Lake Washington, ditto at 65th, Northgate, 130th, 145th, etc. Now that the North/South line is built, future lines should focus on crossing it with transfer points. Same with most bus lines! Simplify!
NORTH KING COUNTY	The number of P&R's is way too high for too high of a cost. The investment in BRT's rather than a true light rail system is unfortunate. It's a waste of money as a temporary bandaid. The Paine Field alignment is not as good as a direct alignment with the opportunity for expansion.
NORTH KING COUNTY	Although I strongly support ST3, I would really like to see the Ballard/Downtown connection made grade-separated. It would be unacceptable to have mass-transit snarled because of a traffic incident on 15th Ave NW, which is something that happens frequently (yesterday: <a href="http://spdblotter.seattle.gov/2016/04/25/injury-collision-investigation-at-15th-avenue-westwest-armory-way/">http://spdblotter.seattle.gov/2016/04/25/injury-collision-investigation-at-15th-avenue-westwest-armory-way/</a> ). Transit needs to offer improved value over driving, and grade separation is one way to attain that. Especially since the timeline is so far in the future, we should make the Ballard/Downtown connection as strong as possible and not compromise.
NORTH KING COUNTY	It's nuts that the Ballard extension isn't one of the first things to do in this plan. I understand the long term vision for the suburban extensions but a line to Ballard will *instantly* have huge ridership and do a lot to ease traffic. Change the priorities.
NORTH KING COUNTY	the city of seattle needs first priority. west seattle has one way in and out. west seattle should be 1st priority. other seattle lines should be next. at that point work outwads.
NORTH KING COUNTY	West Seattle: just going to the junction is VERY IMPORTANT, but would serve far more people if extended down to Roxbury to serve south West Seattle. Connecting to the link at the airport would make the most sense, right away. Support the density that has been happening. We were overlooked when the monorail went down after FIVE votes. Don't make the same mistake now. Make West Seattle a sooner priority, and extend the line through the rest of West Seattle.
NORTH KING COUNTY	It makes not sense to build LRT to Issaquah which doesn't connect in South Bellevue. The current alignment would make it impossible to use LRT to get from Issaquah and Eastgate to the center of the region.  Also, the diversion to Paine Field requires large amounts of money and make LRT slower in Snohomish County. ST should build a direct link to Everett, and connect to Paine Field with a spur or a BRT alignment.
NORTH KING COUNTY	Replace with Everett Paine Field alignment with a direct Everett rail alignment with a junction for later rail expansion to Paine Field. For Ballard to Downtown, route must by fully grade-separated along Interbay to make for a fast reliable trip.
NORTH KING COUNTY	Direct routing along SR99 between Everett and Seattle, bypassing the Paine Field industrial area. Build a BRT system in place of the previous rail plan.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Prioritize light rail to Ballard and west seattle
NORTH KING COUNTY	The fact that it will take 17 years to get to west Seattle. It's almost \$7000 for my family - with nothing to show for it for 17 years. That's ridiculous. West Seattle is basically isolated. I'm tired of paying for transportation that benefits everyone else. I cannot support this plan. How about 5 years? Or don't charge me until 5 years out.
NORTH KING COUNTY	The projects should be timed to support and increase urban density; include green spaces and commercial spaces in and around new/improved hubs to support community development and reduce travel requirements; prioritize projects that have the greatest effect of reducing traffic congestion.
NORTH KING COUNTY	Light rail to West Seattle it desperately needed sooner than 17 years. Other neighborhoods have better transit options that West Seattle, particularly because it is largely cut off from the rest of the city and the main entry/exit point is the bridge, which is only three lanes at the widest (one of which turns into HW 99, and one of which gets bogged down with the only entrance point to I5 north).  With the ever growing population in West Seattle due to the addition of multiple condos, row houses, and high-rise apartments, more and more people are migrating here and the bridge is becoming increasingly worse. In the four years I have lived here, my commute time has increased approximately 15-20 minutes (depending on the day), and if there is even one accident or stall on the bridge, everyone is late to work.  We need light rail to come to West Seattle!
NORTH KING COUNTY	As a Belltown resident, I am extremely disappointed that the currently proposed Downtown -> Ballard LRT line makes an unnecessary diversion through SLU and in the process completely misses Belltown. I would suggest routing the line through the more direct and likely cheaper Belltown alignment (as studied in the "Ballard Transit Expansion Study" released in June 2014) and adding a short one or two stop spur to reach SLU.  ST3 should then include funding to study and make "shovel-ready" a new LRT "8 Subway" line (Downtown -> Belltown -> SLU -> Capitol Hill -> Central District) as depicted by Seattle Subway. This would extend the SLU spur line through capitol hill and onto the central district.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	The worst traffic choke points are between West Seattle and downtown Seattle and between Everett and downtown Seattle. These routes are ALWAYS a problem. Thus, it is ABSOLUTELY ridiculous to have these projects be among the last to be completed. These timelines demonstrate the same stupidity that brought us a tunnel without the ability to access downtown which will make traffic coming from the south and West Seattle even more of a hideous nightmare. I am willing to pay more to support transit, BUT ONLY if those choices make sense. And these timelines for the various routes make no sense whatsoever. SDOT and WADOT are destroying Seattle and this region and they continue to offer NOTHING useful at all and only more horrific plans. I am a business owner who is going to move her business out of Seattle because I cannot get to my office downtown and my clients find it a nightmare to try to get to see me. This just guarantees that I will be leaving and in spite of the current building boom, Seattle will collapse under the weight of its traffic and your inability to do anything even remotely reasonable or rational.
NORTH KING COUNTY	West Seattle light rail needs the timeline moved up to ease congestion on the bridge and throughout Seattle.
NORTH KING COUNTY	Besides addressing ST express buses, additional bus service within neighborhoods to get people to the light rail stations needs to be addressed. This has become abundantly clear after the problems getting to the UW light rail stadium station following changes to Metro bus service. Expanding light rail is great but not if people can't get to the light rail stations as none of the light rail stations within Seattle (UW stadium, Roosevelt, etc) have parking lots.
NORTH KING COUNTY	Tunnel To Ballard... no bridge. West Is Best... stay off 15th. Build a Ballard to UW Line, with a stop at 8th & Market (West Woodland Neighborhood). Thank you!
NORTH KING COUNTY	Increase timeline. 25 years for some stations is too long to wait.
NORTH KING COUNTY	Ballard should be moved up the timeline to completion asap!
NORTH KING COUNTY	I know that a lot of thought and energy has gone into the current plan. That said, I'm disappointed to see the lack of access to the South Park and White Center neighborhoods represented in this. These are growing, diverse, low-income neighborhoods that rely on transit. I hope that this is resolved in future plans.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>Some points:</p> <p>Light rail should always run off grade, preferably underground. A bit more expensive but worth the investment.</p> <p>A short underground light rail line should run from Ballard to the University. Stops at downtown Ballard, 46th and Phinney, 45th and Wallingford, etc. I don't live in this area but this would be a most useful line.</p> <p>Future light rail lines operating in West Seattle should run underground. Don't make the same mistake made in South Seattle by running the trains at grade on surface streets.</p> <p>The time table need to be speeded up and all projects for ST3 should completed within 15 years. 25 years from now we should be well on our way with ST4</p> <p>Looking past ST3 to ST4:</p> <p>The at grade on street level light rail portion south of Beacon Hill should be cut and covered. Moving that portion underground.</p>
<p>NORTH KING COUNTY</p>	<p>Buses to and from the poorest and most populous parts of West Seattle to other areas of the city are more and more packed. Meanwhile, the density in the city just keeps going up. I understand that Sound Transit's charter should be to serve all of Puget Sound, and agree that the failures to provide effective mass transit should fall squarely on the shoulders of the City of Seattle and King County. However, the spillover effect of hiring at Amazon, Facebook, and Google means that these workers are being pushed to the outskirts of the city. In short, you have a demographic that cares a lot about the environment, values mass transit, has money to burn, and lives in Ballard and West Seattle. I acknowledge that you have West Seattle and Ballard light rail stops in the longer-term plan, but 17 years is simply too far away. I'd put these in the 8-year timeframe, if not sooner. Trust me when I say that, if you build them, you'll get your money's worth. The sooner Sound Transit gets that money, the better for Sound Transit.</p> <p>I also strongly believe that light rail access from 35th Ave SW is as important as Delridge -- maybe that's the plan for the Avalon stop, but it's not clear from the map.</p>
<p>NORTH KING COUNTY</p>	<p>Speed up the timetable for everything, particularly projects around the downtown core. Construction schedules of 17 years to West Seattle and 22 years to Ballard should be an embarrassment to Sound Transit. I cannot emphasize this enough</p>
<p>NORTH KING COUNTY</p>	<p>Seattle to Everett should be the top priority at this point.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Light rail should be prioritized within the city of Seattle (e.g., the Ballard and West Seattle lines) over buses, as the existing buses are overcrowded and slow. Accelerate the short-distance light rail projects and allow buses to deal with the outer-city transit.
NORTH KING COUNTY	Please consider above ground transit options. Look at the bus rapid transit system, TransMilenio, in Bogotá Colombia for inspiration. Portland and Chicago have different ways of handling trains above ground that are very successful as well.
NORTH KING COUNTY	1) Planning for a second extension from the Junction to Burien, formerly referred to as option C-13, must include funding for a complete Environmental Impact Statement (EIS) and record of decision, which would shave up to six years off future construction of this line at minimal cost. 2) The Junction to Burien and Ballard/UW lines must be designated "provisional projects." 3) Reach West Seattle as fast as possible.  Thank you.
NORTH KING COUNTY	1) ALL Link services must be built grade separated for performance and reliability - particularly important in the Ballard corridor  2) Deliver 130th Street station as part of ST2 as promised or at a minimum as an immediate front end ST3 project  3) Bypass Paine Field and speed Link construction to Everett - BRT can support multiple geographically spread stops in the Everett industrial area much better than light rail  4) Reclassify the Ballard-UW and West Seattle south Link expansions as Provisional Projects and fully fund the preliminary studies so tha they can be delivered quickly if additional funding becomes available or immediately in a future levy.  5) Consider a modification of the ST rules to allow a slightly higher debt load to accelerate cash availability and project timelines
NORTH KING COUNTY	130th street station should be fully funded in ST3, this will alleviate congestion st 145th street, and better service both lake city, Haller Lake and Bitter lake communities.
NORTH KING COUNTY	I don't think the line to everett should go to paine field. Getting from the station to work will be a hurdle that a lot of people won't care to deal with. Might as well make it cost less and finish sooner so you don't lose the everett vote.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>The 130th Street Station should absolutely be included in this plan. Not only does it not cost that much more to add it in, but it would make a huge difference in the ability to navigate North Seattle and North King County. The community has been advocating for this for quite some time and for it to not be included, especially after we were told it would be is kind of a slap in the face. Adding this station would continue to move the conversation on growth in our area further and would add a whole new urban village to our neck on the woods. It's a necessity and I don't think that I can vote for an ST3 plan that does not include a station at 130th.</p>
NORTH KING COUNTY	<p>I have to say, the timeline makes this proposal very unappealing to me. I am a big supporter of transit, but I live in Seattle. With the current timeline, I think Seattle could build a better system (i.e. include Ballard to UW) faster than ST3. We must prioritize a strong GRADE SEPARATED urban core within 15 years. To make this proposal better I want to see the following changes:</p> <ol style="list-style-type: none"> <li>1. The Ballard to downtown must be grade separated. Traffic is currently terrible, and it will only get worst in 25 years. We need to plan a system that is able to move people quickly and efficiently. Grade separation must include crossing the Ship Canal.</li> <li>2. The second Downtown tunnel is a regional asset. It will be used for the entire system, so it should be funded as such. This funding should be used to accelerate the timeline.</li> <li>3. With this new funding, we must accelerate the timeline for the Ballard line. We need to study fewer options (only grade separated solutions)</li> <li>4. Provide complete funding of an Environmental Impact Statement (EIS) for the extensions from Ballard to UW and from West Seattle to Burien, and add both lines as "provisional projects" if additional funding becomes available.</li> <li>5. Fund 130th Street station and build it before North Link is online. This will save funding and provide a vital stop for the system.</li> <li>6. Bypass Payne field and go directly to Everett via I5. I worked at Boeing in Everett, and having light rail go to Paine Field is a waste because of last mile transportation problems. We will need buses regardless of the station, so lets provide the fastest transportation to Everett and then have rapid ride buses for Paine Field.</li> </ol> <p>I would vote against the current draft plan and advocate that Seattle build the system alone. I hope that the final plan proposes something Seattle voters can rally behind so we can build the regional system we desperately need.</p>
NORTH KING COUNTY	<p>Would like to see West Seattle light rail sooner as commutes will be impacted by the viaduct being removed.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	I'd rather spend the \$ necessary to go rail all around as opposed to rapid buses. My guess is better transit experience, higher usage, more support.
NORTH KING COUNTY	Graham Street infill station must be completed during the first phase of ST3 projects.
NORTH KING COUNTY	Faster
NORTH KING COUNTY	Please concentrate on light rail. Buses have a much shorter lead time and can be added anytime. Also, ALL rail MUST be tunneled or elevated from now on. Trains having to deal with intersections is ridiculous and slow. The train from downtown to the airport takes much longer than it should and creates danger for pedestrians/drivers. The cost savings are not worth it in the long run.
NORTH KING COUNTY	Given the numbers of residents living in the Ballard and West Seattle areas, it's ridiculous that these regions won't get light rail for an additional 22 years.
NORTH KING COUNTY	Please don't wait so many years for Ballard expansion. I would be willing to support funding needed if it would expand sooner than 22 years.
NORTH KING COUNTY	Light rail MUST be completely grade separated otherwise it's not worth the price premium over BRT. I want a transit system designed by transit experts not politicians. Please strongly consider all suggestions from Sound Transit Blog and Seattle Subway. All plans should be designed to account for ease of implementing possible future expansions.
NORTH KING COUNTY	The core should take priority. We need solid central light rail transport to which we can extend bus feeders. Suggest reverse timeline starting light rail with Ballard and West Seattle with extensive bus improvement north to Everett south to federal way
NORTH KING COUNTY	The order of the efforts seems a bit skewed. West Seattle and Ballard today have MASSIVE growth and traffic problems -- you want to wait 17-22 years to address this? I think those need to be accelerated, at least. The whole plan could be done in 10-15 years with appropriate political will. If you had this plan in place today, you would have significant and growing use of light rail.
NORTH KING COUNTY	Ballard station timetable should be moved up. Need it now.
NORTH KING COUNTY	Given the region is basically trying to start a multi-modal transportation system from scratch, I don't quite understand the priorities. Why does light rail extend beyond Seattle city limits? It seems for longer commutes to various suburbs, commuter rail and BRT are better, cheaper options. The idea of someone taking light rail from downtown Tacoma or Everett or Redmond to downtown Seattle is ridiculous. Those commuters would be better off with heavy rail or BRT that should be quicker and more efficient for them. Metro buses, and other bus systems, could then be used to connect the various light, commuter rail and BRT stations with areas that are not easily served via those transit options. The current ST3 plan just seems like a mish mash of expensive, incoherent options. I can't support that at the price requested.
NORTH KING COUNTY	move the light rail project from West Seattle and Ballard to a faster online pace

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Seattle is extremely congested during rush hour, with many single drivers that live within the city limits. Neighborhoods need to be connected with reliable transit that is free from traffic congestion. This will give incentive to take public transportation and in effect bring traffic congestion down, not to mention the environmental benefits.
NORTH KING COUNTY	Consider other major US and international cities that have highly functional transit plans (Berlin, New York, Paris) Please start with the city core, so people are using transit to go to work, the grocery store, etc instead of driving a mile. If we have fewer cars (because of viable public transit options) in our densest population areas we could go very far in alleviate congestion.
NORTH KING COUNTY	Changing the priority list. Speed up light rail from Everett to DuPont to help ease congestion on I-5 before doing a lot of the south King county improvements like Renton or Federal Way.
NORTH KING COUNTY	If we're going to wait so long, I would rather pay more and get the 'perfect' route. Don't subject a Downtown-Ballard line to a drawbridge. Keep the line separate from all traffic, all the time--that includes boats. Consider the Ballard-UW spur.
NORTH KING COUNTY	The whole thing should speed up! And we should get Ballard to UW sooner. Thanks!
NORTH KING COUNTY	We need light rail to Ballard and West Seattle immediately. I would pay much more to see this happen. Considering most current commuter options are \$100 or more (parking garage, orca card) \$17 is nothing and we could easily do more if it meant we could ride the Light Rail instead of just our great-grandchildren.
NORTH KING COUNTY	Ballard faster.
NORTH KING COUNTY	Light rail to Ballard and West Seattle should be completed much sooner - like by 2020!!!!
NORTH KING COUNTY	The Link station at 130th needs to be moved from provisional to planned status and ST Express buses should connect Aurora to that station. 130th is a critical east-west thoroughfare and its importance will increase with the completion of the new Seattle Police Dept North Precinct at 130th & Aurora. The growing urban village in Lake City also requires access to light rail at 130th. The center of that urban village is 125th/130th, not 145th and bus transit south on Lake City Way won't be able to keep up with population growth in that area. A station at 130th with good connectors from Aurora and Lake City would have a huge benefit to people with mobility challenges who lack adequate east-west and then downtown service now. As a result, they rely more on the much more expensive to operate Access van services. There will be growing populations of people with disabilities living around the 125th & Lake City center and the 130th & Aurora center because of the availability of other needed services that are not found along 145th. Transit needs to keep up with that population growth and a 130th light rail station would help immensely.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>For the Ballard light rail, I strongly felt that we need to priorities it higher than any of then any other route as it has the highest demand(rider share) among all other route. Also we should also consider to build one more stop of Ballard station to western 24th street as there are 2 public scenario spots, Golden garden beach and Ballard Lock. These 2 places always has traffic issues and it impact the neighbor hood's environment.</p> <p>On top of that, we should also consider to add a new route from UW (NE) to Ballard (NW) to release the traffic condition as it is always the worst commute neighbor hood within greater Seattle. You have to spend almost 40 to 60 minutes drive from Ballard 24th street to UW.</p>
<p>NORTH KING COUNTY</p>	<p>Light rail that gets stuck in the same traffic as cars and buses is a complete waste of money. What is the advantage of light rail over a bus in this case? Completely separate bikes from cars - more bike lanes like the Burke Gilman trail. Create bike right-of-way paths on certain residential streets. Divide street in half with no parking on one side. create physical barrier to separate cars and bikes.</p>
<p>NORTH KING COUNTY</p>	<p>I'm a long-time resident of Ballard and have watched with horror as we have been inundated with new development WITHOUT concurrent new infrastructure (new development in Ballard is currently 427% of what was predicted for the year 2024). And while Metro has valiantly tried to keep up with new ridership and high transit use, buses are standing room only during commute hours and consistently full throughout the day.</p> <p>We deserve to have rail service sooner than the year 2038. In fact, in meetings over the last 2 years, Sound Transit promised to prioritize Ballard in its plans. Furthermore, it is clear that the Elliott/15th Ave corridor is already near or over capacity. So why on earth would you run an elevated track for rail smack down the middle of 15th? It's difficult to imagine the traffic logjams during the 7–10 years of construction.</p> <p>I strongly support the Northwest Seattle Coalition alternative plans for Ballard light rail: an elevated line WEST of the Elliott/15th corridor, a tunnel under the Ship Canal that continues north under Ballard, and an underground station anywhere but on 15th Ave NW--perhaps on the 20th Ave NW corridor. The additional expense is well worth it and would alleviate the construction mess on 15th that ST3 currently proposes.</p> <p>Ballard has endured the development; we deserve the transit--and we deserve it sooner than the year 2038.</p> <p>Light rail to Ballard MUST be prioritized.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	As the line with the highest projected ridership, it would be ridiculous not to prioritize a new line from downtown to Ballard. I also think that a draw bridge over the ship canal on said line would be a major mistake. A line from Ballard to UW should also be a major priority as there are still very densely populated areas in North Seattle that would greatly benefit from light rail service. Overall, I'm a little unsure as to where ST priorities are coming from. Certainly there's an argument to be made for building out to Redmond before West Seattle, but before Ballard?? I also think that the timeline that's been set is incredibly unambitious. If we're to be realistic, many of these projects could be finished sooner than projected. Rather than set itself up to say certain projects were completed well ahead of schedule, ST should set a timeline that more accurately reflects approximate completion times.
NORTH KING COUNTY	Everett portion completed first. Ballard needs a tunnel, not a 75 foot high bridge...think Earthquakes..do you want to plunge 75 feet, or be in a tunnel and go out an escape route
NORTH KING COUNTY	Since 15th NW is so heavily traveled, why not have the rail come along Leary Way with a station at 24th NW and Market Street? Continue bus service on 15th NW.
NORTH KING COUNTY	Ballard needs light rail in less time. Please keep Urban growth in mind and plan for Ballard to have access to downtown sooner.
NORTH KING COUNTY	West Seattle transit projects should take highest priority to allow a large seattle community to transit more efficiently in and out of the greater Seattle area.
NORTH KING COUNTY	The West Seattle light rail should come before the extension to Federal way. It would be best to deal with the city proper transport issues before the suburbs.
NORTH KING COUNTY	Light rail to Ballard should tunnel under the bay.
NORTH KING COUNTY	West Seattle and Ballard light rail projects should be the top priority and should be done first.
NORTH KING COUNTY	The Ballard line should not be on grade on 15th and should go under the ship canal rather than over by another bridge. The loss of capacity on 15th due to surface line would be too great on what is already a vital north south arterial. The plan to go over the canal an up 15th in Ballard on an elevated line leaves the line too vulnerable to disruption by continued shipping traffic and to earthquakes. The elevated line in Ballard would also hinder the continue growth and quality of life in one of (the?) fastest growing neighborhoods and commercial areas in Seattle.
NORTH KING COUNTY	More trains, less BRT
NORTH KING COUNTY	Cut Tacoma services. Plan us way too long.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	West Seattle has always been gypped in the transit realm. How about some decent transit to/from the airport (since a disproportionate number airline industry employees live here)? What about decent bus service from the Admiral area? It is currently ridiculous. West Seattle to downtown is the last project on the rail docket, and still requires going to downtown (to go south to a major airport) to anywhere. Yet...West Seattle is one of the neighborhoods with the most egregious and wanton over-development in the city right now. Traffic is off the hook and most of the new units are not even filled yet! I the plan wants my support, then help the people in urban areas who live with constant congestion in the urban areas (West Seattle/ Ballard)!
NORTH KING COUNTY	Ballard need light rail today. Not in 22 years!
NORTH KING COUNTY	I strongly support light rail from downtown to Ballard. HOWEVER, THE CURRENT PLAN WILL BE BAD FOR BALLARD TRANSIT- I SUPPORT An Alternative route-A TUNNEL UNDER THE SHIP CANAL AND KEEPING LIGHT RAIL OFF OF 15TH .We cannot afford to lose more of the inadequate transit capacity we have right now.Also the timetable needs to be sped up- transit by 2038 is too long for the rapidly growing area.We have waited long enough!
NORTH KING COUNTY	I believe that priority should go to light rail to Federal Way and West Seattle should be first. More buses causes a bit more traffic than light rail.
NORTH KING COUNTY	I live in Ballard and drive to Boeing Field everyday for work... I know a lot of people who do a similar commute and know that if a mass transit option was available, I would start taking it immediately, especially with my company's commuter benefit. That would get a lot of cars off the road, and out of Seattle to aid in traffic flow while other projects are underway. It makes me sad that I pretty much will be retired by the time the project to get me from Ballard to Boeing Field would be complete.
NORTH KING COUNTY	The time table for light rail is too long.  Light rail should go down Delridge.
NORTH KING COUNTY	there's little logic to creating a plan with such a long timeline with so little to be done as laid out in the draft. more focus needs to be paid on connecting large residential areas to large work and communal centers that, today, are choked by current infrastructure. connecting Ballard and West Seattle to the Central LLR line should be prioritized. removing obvious obstructions, like buses from the downtown tunnel, to actually achieve the "6-8 minute" schedule during weekdays needs to happen. no current stop at Boeing's Seattle plant or Southcenter/Tukwila is an embarrassing oversight. 25 years to complete something that any other region, city or country can complete in 10 is an embarrassing waste of money as costs rise due to inflation and borrowing over time.
NORTH KING COUNTY	Please drop light rail service for Paine Field. Everett, and the rest of the light rail network, would be better served by having what will likely be a lightly used station drop from the northern segment. Instead use BRT to service the Boeing Industrial area with future plans to build a light rail spur if ridership ever pencils out. Issaquah is also low priority, ST3 should be trying everything to get to West Seattle and Ballard ASAP where demand is the greatest.
NORTH KING COUNTY	Ballard light rail and W Seattle light rail should be highest priority.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>-Please build less parking. We have too many cars in the region and downtown as it is, and I don't want these transit investments going into parking.</p> <p>-Please avoid at-grade light rail; it's just not as fast or reliable (or safe) as below-grade or above-grade. This region is so car-reliant, and people need to see transit beating driving (in travel time, as it does in NYC and, for example, from UW to Capitol Hill now) in order to be persuaded and change their habits. A sea change is needed and the trains need to travel as fast as possible in order to help that sea change happen.</p> <p>-West Seattle is very car-dependent and not that dense. Please make sure the ridership will support the light rail line before going forward on that. I want there to be more stations and lines in Seattle proper, and close to downtown, so I'm enthusiastic about this line - but only if it has enough ridership to justify the project.</p>
NORTH KING COUNTY	<p>Parking at stations should be a lower priority and other methods of access, such as walking, biking, and taking transit should receive more emphasis.</p>
NORTH KING COUNTY	<p>The Ballard area has seen enormous growth in population in the past few years and should not have to wait 22 years for light rail. This corridor is one of the highest projected ridership segments per STs own analysis and needs to be built earlier in the st3 plan in order to get voter support for st3. Options that do not require a second downtown tunnel should be evaluated, such as going east from Ballard to either the 65/Roosevelt station or the U district station. From their riders could go north or south. A station in Ballard should be in central Ballard near Market and Leary rather than Market and 15NW. Thanks.</p>
NORTH KING COUNTY	<p>Implement BRT sooner and plan to do it for all segments until light rail comes online. I understand that long timelines are part of the "Seattle process" of trying to make everyone happy and doing very high quality engineering and design work.</p> <p>Please consider the equity impacts of LRT and route bus connections appropriately -- only those who live on expensive parcels within 0.5 miles of a LRT station will benefit from it, so some critics are quick to say LRT is adds to socioeconomic stratification and the further limits the access of poorer people in our urban and urbanizin areas.</p> <p>Encourage TOD in the Rainier Valley and elsewhere ST intends to route LRT. We need high residential and employment density near stations for this megaproject to be worth anyone's tax dollars.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>PLEASE PLEASE PLEASE stop dinking around with the Boeing Field/Tukwila Station. I live right below the light rail, and in order to use it (since there is no parking at the 'Tukwila' station - due to the parking being presold, and no parking at the next 5 stops - I have to either:</p> <ol style="list-style-type: none"> <li>1. Walk 1/2 mile to a bus stop that runs along Tukwila International Boulevard, to get directly to the light rail - but that bus only runs every 1/2 hour, and is notoriously late/early/no-show.</li> <li>2. Take 3 bus transfers to get down Interurban Avenue to Southcenter, to the F-Line to the station.</li> <li>3. Bike 3 miles to the Rainier Beach station and board with my bike/park my bike and walk on.</li> </ol> <p>Please make Boeing Field a priority. 20 years is too late. We are right on the line, and our entire community can't access the best transit in the city. We don't need a full station - just give us a walk on platform like the Rainier/Columbia City stops.</p> <p>We also employ upwards of 100,000 people in Southcenter. Plus Boeing/BECU and a new Industrial Park. The businesses are willing to pitch in a bit to offset the costs so that their employees can get to work easier.</p> <p>We are right here, and due to poor design, we are passed over literally every 6-7 minutes by a train that runs through our neighborhood that is completely out of our reach.</p> <p>Please move us up on the list. [name]</p>
<p>NORTH KING COUNTY</p>	<p>Please focus on transit, pedestrian, and bike access to stations. Shift money from parking to other priority investments.</p>
<p>NORTH KING COUNTY</p>	<p>We need a Belltown station closer than LQA or SLU. Belltown is a residential hot spot and transportation dead zone. It would make the proposal way more attractive to me, both because I'm a resident who would use it (I currently rent my Belltown apartment out and live in another space in Pioneer Square because of the transportation issues) and because I know it would be good for tourism revenue. I would move back into my own apartment if there were a light rail station within 5-7 min walking distance of 1st and Wall, for example.</p>
<p>NORTH KING COUNTY</p>	<p>I generally support the position of Seattle Subway. I believe we need grade-separated rail to Ballard (preferably underground), and serious plans and study of a Ballard to UW line/extension and extensions south from Alaska Junction. The long timeline is unfortunate, but it is more important to build the projects the right way than to build them quickly. If there is ever a choice between quality and speed, I would choose quality. Additionally, I think Seattle voters would be in favor of putting some additional Seattle-generated revenue into Seattle projects if it meant there would be more/better/faster construction in Seattle. But I don't know if such a possibility exists.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	The Ballard light rail line needs to have 100% priority over boats and car traffic. If the final plan commits to this, I would support the plan at any reasonable cost, probably even 2x the current projected.
NORTH KING COUNTY	I want to strongly support the ST3 plan for light rail to Ballard, but 22 years is absolutely ridiculous!
NORTH KING COUNTY	Ballard and Bellevue should be the main priorities since they have the highest congestion of traffic.
NORTH KING COUNTY	(1) The recent Sound Transit expansion to bring light rail to the University of Washington highlights how extremely important it is to have local transit connections that work with these big projects. I find myself essentially unable to use the new expansion due to the increased total time to get where I need to go. When I have ridden the expansion, I've found some interesting unreliabilities: for example, signs in the station will say a train is departing in 3 minutes, but the train arrives and leaves early and another doesn't come for 9 more minutes. (2) While I see a yellow dotted line across north seattle from wedgwood to ballard, there appears to be no expansion there. The east-west travel in this area is much less efficient than north-south travel in the city. This would be an important component to add to the plan.
NORTH KING COUNTY	Recommend soliciting Private investment from those benefitting most but contributing least... (especially those which have politically lobbied for light rail routes the loudest - Vulcan, Microsoft, etc).  Move Ballard and West Seattle (and new transit tunnel) to very top of list, in front of extensions to Everett, Redmond, Tacoma etc. Must accommodate core routes and feeders first and build a better system backbone, and THEN... extend further out. Delaying hardest projects (and worst chokepoints\most bottlenecked or landlocked people) is worst plan. Do NOT be afraid of simultaneous projects (north and south).  ALSO...I consider relook of New down-town tunnel plan. Consider Ballard LTRail line following 1st (Elevated).. service stadiums (Stadium West Station).. continue elevated up Alaska and service Ferry Terminal (Waterfron\Ferry Terminal Station)... continue elevated and turn east in new tunnel near Pike\Pine... turn north sharply under 3rd... where a new subsurface station would connect directly to existing Westlake station (like two elbows, opposite but kitty corner to eachother connected by pedestrian corridor at Mezzanine Level)... continue north (Belltown Station).. (Seattle Center/Lower Queen Ann Station)... then under Queen Anne for a Deep station similar to Beacon Hill's (Queen Anne Station).. then turn back west by south west for a station serving cruise terminal (Innerbay Station)... north at grade or elevated (Dravus Street Station), then tunnel under ship canal to a Ballard Station... continue and pop up and continue on surface (sim to MLK line), for a 65th St Station... A Downtown Hill Station, etc...
NORTH KING COUNTY	light rail from SEATAC airport through West Seattle to downtown should be top priority. Redmond to Seattle via Bellevue should be right up there, too. BRT connecting Ballard to Lake City is also a vital link.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>Skip paine field. If you build a paine field detour into the system from the get go, then every train from Everett to Seattle has to make that same dumb detour every time. It'll be a milk run. Just get straight to everett, and leave a stub in an appropriate place so you can run to paine field later. Honestly, probably the best thing would be to leave things set up so that in the future you could run from Mukilteo/Paine field straight down the 405 corridor to Kirkland and Bellevue, tying into the existing system with an interchange station at Alderwood perhaps, and then again in Bellevue.</p> <p>What I'm saying is don't try to do everything with this first leg. If you try to accomplish all of it with one line, then none of it is going to be particularly great. Get the everett to Seattle line in, and build something people go ga-ga over, and they'll throw money at you for another line down the eastside. I know I will.</p> <p>Oh, and for what it's worth I'd love to see every foot of link, the whole system I mean, underground. I know it costs a fortune up front, but in the long run it pays off. DC did a study about their system as I recall, and they concluded that underground was the way to go. I wish I had that here I'd send a link.</p>
NORTH KING COUNTY	<p>Light rail should not go to Paine Field. Use BRT to service this area with more stations ( a bus network would be required anyway if there was a single light rail stop due to the dispersed destinations in the largely industrial area). The light rail spine should be just that - a fast reliable line to get the most people through the corridor, with branches to get people to their local destinations.</p>
NORTH KING COUNTY	<p>Ballard and West Seattle projects need to be moved up</p>
NORTH KING COUNTY	<p>Deal with Ballard and West Seattle First. Thanks and good work</p>
NORTH KING COUNTY	<p>I strongly urge ST to emphasize that the greatest opportunity for positive economic impact is to have stations accessible by foot and bike or bus, not park and rides. This spurs economic development and community building around stations, providing a direct return on investment in the form of increased tax revenue from those developments. Park and rides are heavy subsidies and is a short term political move to get votes from existing area residents. I realize this is how the sausage is made, but I have faith in the voters as a whole that they realize the main goal of ST3 is to make central Puget sound more livable.</p>
NORTH KING COUNTY	<p>The Graham Street station is a relatively quick project which would substantially increase ridership for a minimal investment. I hope that this can considered an immediate priority.</p>
NORTH KING COUNTY	<p>The Ballard line should be bumped up as the growth and traffic in the area has out paced other areas in the Puget Sound. Also Seattle to West Seattle should also be made a priority. Waiting 25 years is way tooooooo long.</p>
NORTH KING COUNTY	<p>We need Light rail to Ballard much faster and less disruptive.</p>
NORTH KING COUNTY	<p>I don't think a Ballard station is needed.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Building Seattle transit network builds regional equity because it removes cars from job centers that other regions commute to. It has the greatest ridership benefits and should be prioritized. Additionally, the timeline is unacceptable for Seattle voters. Who wants to pay a tax they would see no benefit from? Seattle transit investment needs to be prioritized and increased and the timeline needs to be halved.
NORTH KING COUNTY	1. Sound Transit is a regional system. It should not duplicate what city buses or trolleys can do. Getting to Everett, Tacoma, Bellevue are priorities, not Ballard, W. Seattle and other in-town areas that can be served as well by conventional transit.  2. Is Boeing still going to be a major employer at Paine Field 25 years from now? Would direct access to Everett Downtown be more logical with a future extension to Boeing if it is still a viable destination?
NORTH KING COUNTY	ballard & west seattle first with less alternative route studies
NORTH KING COUNTY	Rail should be built where ridership is strongest and, generally speaking, density is highest. This plan spends billions upon billions building rail where a network of buses could be much more effective. Spending \$5 billion on light rail to everett, for example, make no sense on a cost per rider basis. Meanwhile, SLU, with 20,000+ new jobs, is left wanting until 2038. This plan is clear evidence that ST need to go back to the drawing board next time and put transit planners in charge instead of politicians.
NORTH KING COUNTY	I really wish that the Ballard to UW line would have been evaluated sooner rather than the Ballard to downtown line (even though the Ballard to downtown line is infinitely better for me personally).  Also, the idea of a non-grade separated line between Ballard and downtown worries me. The light rail in South Seattle gets so bogged down in that. I don't know how much time we'd be saving compared to the RapidRide D (although I'm lucky and can take the 17).
NORTH KING COUNTY	The Ballard line has the highest ridership projections and needs to be completely grade separated. Including where it crosses the ship canal. The Ballard terminus should be built to allow for future North and East expansion.
NORTH KING COUNTY	Timeline for Ballard needs to be shortened and putting tunnel crossing instead of bridge at Salmon Bay. Project should be prioritized based on highest projected ridership. Finally, Ballard to U-District light rail line should be included at least as provisional in the upcoming ballot.
NORTH KING COUNTY	I would highly support moving Ballard to Downtown up by 7 years. Potentially slashing the vehicle traffic off of 15th W, 50th & 45th NE, and a reduction in I-5 arterial would have a massive impact on our current congestion woes.
NORTH KING COUNTY	I strongly oppose prioritizing wealthy suburbs over projects serving Ballard, West Seattle, and Federal Way. Bellevue, Kent, and Redmond are the absolute lowest priorities on my list.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>With Expedia moving into the Interbay area, light rail, or Sounder Rail, service through the area to other neighborhoods desirable to the existing and new commuters in Magnolia, Ballard, Queen Anne, Crown Hill, and north will be very important. I believe the light rail to Ballard should be completed as quickly as possible. Not having this service for 22 years will keep Seattle behind where it should be in terms of transit to major neighborhoods.</p> <p>A potential solution in the interim could be to expand Sounder service, which runs through Interbay and the West side of Ballard. Adding Sounder stops at Dravus, somewhere along Shilshole, and maybe even near the sculpture park would allow residents to have greater access to quick and reliable transit downtown and back.</p> <p>Additionally, the planned expansion of Sounder service should include longer operating hours going both north and south. Aside from having to commute to the South side of downtown town just to catch the train, the main reason I do not ride the Sounder more often is due to lack of return trips from South Sound locations later in the day and on weekends.</p>
NORTH KING COUNTY	<p>I am strongly opposed to the Bus in shoulder option. I see far to many cars already using bus only lanes and feel that bus in shoulder would have drivers turning the shoulder into a general lane. If this option is seriously going to be implemented, you need to install cameras at frequent enough intervals to prevent drivers from driving in those lanes.</p>
NORTH KING COUNTY	<p>With the huge population boom in Ballard due to high density building, and its close proximity to SLU employers, the Ballard Light Rail should be moved up a decade or two and be a top priority. And, instead of being a stub line, it should continue north and connect with Shoreline.</p>
NORTH KING COUNTY	<p>Re-prioritize timing and routes. Ballard and West Seattle light rail highest priority. Willing to pay more for shorter timeline.</p>
NORTH KING COUNTY	<p>We need rail in the city of Seattle first and foremost. 22 years for Ballard? Insanity. Why are all our resources going to connecting the suburbs? Start with the urban core, then move outwards, not the other way around. I am happy to be taxed for public transit. I support transit 100%. But pandering to the outlying areas while ignoring the actually dense areas in the city is ridiculous.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>Light Rail needs to be addressed sooner in the plan. By the time it rolls around, the population and needs will likely exceed carrying capacity. Already, during peak hours, one not infrequently has to wait for a train or two to pass before there is room. Platforms are becoming increasingly congested during peak hours.</p> <p>As we add more support, and people understand that it is a commuting option, people will park in outlying areas to save money and will commute in, adding load.</p> <p>We grow nearly 3% currently per year in population. In the 17 years it will take to get West Seattle, as one example, Seattle's population may be 165% of what it is currently, compounding that growth percentage. The ability to drive given that growth will decrease and the need to commute via alternative means will increase. I anticipate that the existing routes will become increasingly frustrating without expansion, and that the need for new routes will eclipse our ability to provide them in time, given current plans.</p>
NORTH KING COUNTY	<p>Downtown to Ballard Line needs to be a priority.... 22 years is way too long. Concentrate on the Seattle core before moving outwards.</p>
NORTH KING COUNTY	<p>Light rail is too costly and moves too few people and is too inflexible to be considered in the Puget Sound area. It simply is a poor use of taxes. Focus on expanding buses and also providing turnouts for the bus stops so they don't impede traffic when loading/unloading.</p>
NORTH KING COUNTY	<p>Build the West Seattle line sooner!</p> <p>The Delridge, Highland Park and White Center communities are diverse and fairly low-income (for Seattle), yet we are always looked over when it comes to transit. Please think about these communities when you're planning light rail.</p> <p>Thanks for all you do, [name]</p>
NORTH KING COUNTY	<p>Why can't we run light rail from the University district across Wallingford into Ballard instead of a whole new train? Wallingford could use light rail too. Run it from the Ballard locks, down market to 45th in Wallingford to the University district station.</p>
NORTH KING COUNTY	<p>Projects within Seattle (Ballard and West Seattle) or connecting to Seattle (Seattle to Bellevue) should be given higher priority.</p>
NORTH KING COUNTY	<p>I find it crazy that with the growth in NW Seattle that a Ballard light rail link (to downtown AND to UW) is not a higher priority. Would be interested to learn more about why that is as you'd think you could expand out from the center, naturally hitting communities in outer Seattle areas next.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Downtown to West Seattle and downtown to Ballard via SLU should be a bigger priority. I have no car, this is my only transportation and I would love having a way to get to these neighborhoods. Priority number one needs to be on making transit inside Seattle more smooth, connected and efficient. Focus on the city, then start branching out after a great urban transit system has been established. Let's work on getting to a place where no one will need cars.
NORTH KING COUNTY	<ol style="list-style-type: none"> <li>1. It's really important that light rail have it's own right of way in tunnels like other successful world class mass transit systems. Boston, New York, London and Paris all put their light rail underground more than 100 years ago when congestion was so bad it made the most sense even during the era of horse drawn transportation. Please make long term investments that will continue to have value more than 100 years from today.</li> <li>2. It's also really important to have huge enormous parking facilities at the end points of both light rail and commuter rail so it is convenient and easy for car commuters to make the intermodal transfer. Boston built many of its parking lots too small so they fill up at 6:00am which forces people to drive to their destination anyway.</li> <li>3. It's super important to connect the dots for all modes of transportation. In other words, it should be convenient and easy to make an intermodal transfer from car to train, bike, ferry, or airplane by sharing stations and transfer points. More good examples of this in Europe than in Boston and New York.</li> <li>4. Please provide each mode of transportation with its own dedicated throughway. Trains and bicycles should not have to mix with cars and buses.</li> <li>5. Please invest for the next 100 years and allow for growth of the system.</li> </ol>
NORTH KING COUNTY	Ballard needs more transit options, much sooner than 22 years
NORTH KING COUNTY	I feel that light rail service within the city of Seattle (specifically to West Seattle and Ballard) should be a higher priority than extending light rail out of the city. West Seattle and White Center have been underserved, and light rail would be an important change.
NORTH KING COUNTY	<p>Why do we need a second tunnel downtown, in addition to the current tunnel?</p> <p>Why is it going to take 20 years to build the line to Ballard?</p> <p>This plan does nothing to address the issue of traveling East - West in the city.</p> <p>Why are none of the station built to service future lines? Why do we need to build multiple stations in an area when one would work well.</p> <p>I am very supportive of mass transit in Seattle but I do not believe many questions have not been addressed or explained to the public.</p>
NORTH KING COUNTY	Complete grade separation of Light Rail to Ballard or I will serious reconsider my support. The at grade section is a mediocre compromise from a 2016 perspective. We can not be limiting ourselves permanently by expedient choices in from today's perspective
NORTH KING COUNTY	#tunnel to Ballard; #west is best option, and sooner than 22 years!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	The rail in west Seattle should go down the Delridge corridor, not the 35th St corridor. We should build light rail to serve the low income people who rely on it more. By serving the Delridge area, we can do this, and help the financial inequality in the area.
NORTH KING COUNTY	You've built up Ballard so it's a traffic nightmare. Get light rail and better bus service there now. Busses are packed at peak hours. We need more options and sooner to keep us out of our cars. Some days I swear I'd rather sit in traffic in my clean car than deal with transit chaos you've created through poor planning.
NORTH KING COUNTY	The Sounder needs to add stops in Ballard, Magnolia, & Seattle with improved bus feeders to the stations. This would reduce the need for a Ballard light rail. No light rail from Ballard to Seattle should be considered without a stop on Magnolia or incorporation of additional pedestrian & bicycle routes across the ship canal.
NORTH KING COUNTY	Inner city projects should be completed earlier. Ballard to downtown & West Seattle to downtown.
NORTH KING COUNTY	Speed up Ballard and West Seattle Link Light Rail construction time.
NORTH KING COUNTY	The Ballard-Downtown light rail line is projected to have the highest ridership among all the projects proposed in ST3. It needs to be prioritized accordingly and should be fully grade separated and NOT include a drawbridge over the ship canal. Waiting for maritime traffic will completely negate the 6-8 minute wait on the busiest line. A drawbridge should be avoided on this line at all costs for future investment and use.
NORTH KING COUNTY	Survey is biased as your major emphasis is on the east side and north and south corridors with marginal discussion about Ballard or West Seattle routes. The elimination of the monorail to Ballard and West Seattle and a tunnel that eliminates two major exits into downtown will most drastically impacted the commuters of West Seattle. You've spent money to improve the I-405 corridor and now you want to help them more now. Where is the balance and fairness? This plan doesn't guarantee that a West Seattle route will be built. We've seen how you failed to build the route to Federal as promised and now want more money to build that extension. Will you return our tax dollars if you decide in ten years not to build a West Seattle extension? Where is the consideration for the more economically challenged individuals of Delridge and White Center. Help the rich, and screw the more impoverished is the name of this plan. I'd vote NO on this poorly thought out plan.
NORTH KING COUNTY	E line needs more busses during peak times in morning and evening.
NORTH KING COUNTY	Issaquah and Ballard commute projects should have higher priority!
NORTH KING COUNTY	West Seattle Bus Service and Transit to the Admiral Junction and Alki has been severely cut. I do not see improvements in this plan with ST3 serving only the West Seattle Junction. I am concerned that this entire portion of West Seattle is being left out. Bring back the bus service to Admiral - not just morning commute times and you will see more people using it again. There is a senior living facility on Admiral and you have cut off a whole group of seniors who can no longer easily use the bus during the day for appointments downtown. Also, difficult to use bus service for weekend sporting events at SAFECO and Century Link fields due to the cutbacks.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	I don't know the answer to this question and I suspect you have already considered it, but to me getting around in Seattle is the most important thing - those are the projects I would like to see ST focus on first. The reason is that we have the most population density in the city (which is already much less dense many foreign cities). Making it easier to get around in the dense areas will encourage more density, a good thing I believe.... and while I appreciate the Rapid Ride bus as an improvement over the old clunky bus system, it is more for shorter, neighborhood trips and has the disadvantage (seen often already) of getting bogged down in the same traffic it is intended to alleviate.
NORTH KING COUNTY	If Ballard isn't one of the first sites I will vote against the plan. Ballard has been ignored too long. My bus (18) is standing room only before we get to Market Street. The Rapid Ride sucks. It takes too long to get downtown and it is incredibly uncomfortable. Ballard was chosen to be a Hub Urban Village around 1987. Since then we have grown by leaps and bounds, but ignored when it comes to support for the growth. Again, I will vote against this if Ballard isn't in the first batch of sites for service.
NORTH KING COUNTY	Ballard and west Seattle are in desperate need of better service. If you don't fix those hubs you are going to continue to have traffic and housing issues across the region
NORTH KING COUNTY	I am feeling ill at the idea of running Light Rail out to the far county line when your most dense line to Ballard, 5 miles from downtown that is projected to be higher usage than all of Portland's light rail system all together is taking 22 year to get finished is a tough pill to swallow. Ballard needs completed 6 months ago! Rapid Ride D is a FAIL! It is no more rapid than any other line, is stuck in traffic all the time in downtown and is completely spaced out in frequency. I am really disappointed with RR-D. I am considering voting no if Ballard isn't high priority. It is worthless to run trains out to East King County where they didn't vote for the lines and have typically been ill supporting of light rail in the first place. Ballard is busting at the seams. The Metro 40 route alone is packed by the time it starts to get to Market St. I just can't vote for irresponsible growth of light rail. PLEASE get Ballard done sooner than 22 years, we simply CAN NOT WAIT.
NORTH KING COUNTY	Highly recommend seattle to Bellevue and stations on the south end.
NORTH KING COUNTY	Lines with highest ridership should be emphasized; Ballard in particular. Ballard line should be entirely grade separated, not surface running in Interbay. The second downtown tunnel will affect mobility around the entire region and should be supported by tax revenues from *all* subareas, not just Seattle/North King. No detour to Paine Field which is too decentralized for a single station and is better served with BRT or shuttles. BRT on 405 should be true BRT, not a grab bag. The 130th St Station is absolutely necessary, and the Graham St station should be moved up in the timeline. Parking structures should be deemphasized; TOD near stations will actually make the stations nicer places to want to be than a monolithic garage would be. Parking should NOT be free, that goes against the whole point of trying to get users onto transit. All stations should have excellent bike and pedestrian access (I hope that lesson was learned from the Northgate I-5 bridge). Study additional projects so that they are shovel ready should additional grants, savings, tax revenues, etc. become available. All projects should plan for future expansion; e.g., stations in Ballard and West Seattle should be oriented so the lines can be extended without disruption.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	My understanding is that the Ballard route will be on 15th Avenue and cross the Lake on a bridge. This is a major project that should be placed besides the train line through Interbay and cross under the lake. Ballard needs and underground station similar to the other neighborhood station. It seems incredible hard to believe that this station and trains would compete with an already increasingly congested area. Let's get this right, it will last for a hundred years!
NORTH KING COUNTY	We really need to do the Ballard to UW line, West Seattle, and the 130th Street station
NORTH KING COUNTY	<p>Additional/provisional LRT stations need to be located in areas of greatest pedestrian accessibility and TOD potential, i.e. large areas of auto-oriented commercial development adjacent to established neighborhoods. Stations along an I-5 alignment would make both of these opportunities difficult.</p> <p>Locate stations/alignments for access to densest centers and redevelopment opportunity areas. Minimize modal transfers as this lowers desirability of using public transit.</p> <p>Increase tax on private vehicles - possibly with a premium on single use 'recreational vehicles' i.e. sports cars, motorcycles, etc. Or consider congestion charging.</p>
NORTH KING COUNTY	<p>While I strongly support mass transit I will NOT vote for ST3 if there is not a merger of all Puget Sound transit services or the privatization of the many overlapping transit agencies with attendant deregulation to allow vigorous competition. Our current system is incredibly wasteful with empty buses passing each other during rush hour and no connection between competing agencies such as ST and Everett Transit.</p> <p>VOTE NO!!!!</p>
NORTH KING COUNTY	Ballard to downtown should be prioritized higher-- 22 years is a long time to pay taxes before seeing any benefits. I would accept higher taxes for a timeline like 10 years or less.
NORTH KING COUNTY	<p>Im in Osaka right now, and they have *amazing* transit options— especially the municipal subway, and how easily it connects to 3rd party (JR, Hankyu) rail.</p> <p>Like Japan, we should also have food/magazine kiosks **inside** the rail stations. Rail stations are for people, and people gotta eat.</p> <p>I'm generally disappointed with how slow light rail is coming online, especially to close to downtown, dense neighborhoods like Ballard, Fremont, and Wallingford.</p> <p>One last point: PLEASE make light rail grade seperated. Pleaaaase! It won't get any use, and be a huge pain otherwise!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>For future rail lines, we must lower per mile costs and maximize value. Good sense dictates that we construct urban infrastructure that takes advantage of light rail's cost-lowering attributes: tight curve radii, steep grade tolerance and general flexibility in service offerings.</p> <p>To this point, instead of wildly pricy deep bore tunnels, we must explore surface and elevated infrastructure options that exploit the wide streets of South Lake Union and Lower Queen Anne, specifically Westlake Avenue, Fairview Avenue, Dexter Avenue and definitely Mercer Street. Possibly, if the cost increase is deemed acceptable, rip up the avenues for cut-and-cover tunnels and stations, literally saving billions of dollars over deep bore tunnels.</p> <p>Elevated lines in many, if not all, of these areas would be perfectly fine, except on the immediate approach to Westlake Station, which rests underground. And if those neighborhoods are unwilling to forgo an auto lane in lieu of the support pillars for a grade-separated rail line, then how committed are they to urban growth, and how deserving are they of a far more expensive tunnel? Not at all, I argue. You want the region to pay for new rails and yet demand that your neighborhood sacrifice nothing to accommodate it? Then no rail for you, unfortunately.</p> <p>For the same proposed corridor, our region has to accept a drawbridge over the waterway to Ballard with marine traffic restrictions during the corridor's busiest hours, or similarly reasonable sacrifices in line quality. The trade-off is quite okay. Again, we don't require tunnels, nor ludicrously tall bridges, for a rail line that hosts only moderate demand at peak-hours, and which will receive priority over boats during those times anyway. However, if the drawbridge proves politically unacceptable to our region, build the UW to Ballard rail extension instead, which totally circumvents the need for a new bridge over the Salmon Bay Ship Canal.</p> <p>Next, finally cancel the Alaska Junction, West Seattle, rail extension. It is such an absurd and outrageously expensive project serving zero core neighborhoods of the city, nor does it improve regional mobility. This is a ribbon cutting project for politicians if there ever was one, and the entire route is better served by legitimate bus rapid transit.</p> <p>Continuing on, ST3 should actually dedicate lanes for bus-rapid transit services that will have a far reaching impact on our region's mobility and residents—or construct new lanes in key areas. No longer should the vast majority of our transit trips suffer from zero</p>
<p>NORTH KING COUNTY</p>	<p>Please tie the Georgetown and South Park neighborhoods in to the plan!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>Downtown-Ballard needs to be grade separated, and needs to be completed much faster.</p> <p>Lynnwood-Everett should take advantage of Community Transit's SWIFT 2 line, and not extend to Paine Field. I am saying this as a Boeing Employee - I would rather have a ANY connection soon, rather than a perfect connection by the time I retire. Also, consider a bus like the current route 512, with a fork to Paine Field (and maybe a stop at Green Lake or Northgate). If it's so important to get light rail there, why not at least run a bus there in the interim? The current route 512 and CT Swift 2 won't even share a common stop!</p> <p>Build a UW-Ballard line.</p> <p>Consider some frequent transit in the Greenwood area.</p>
NORTH KING COUNTY	Ballard & West Seattle should be a priority.
NORTH KING COUNTY	West Seattle line must be in a tunnel to Alaska Junction and allow for further expansion to Burien in future phases.
NORTH KING COUNTY	I oppose the plan because the Admiral district of West Seattle is not included. At this time, our bus service has been decreased significantly when Rapid Ride service started. Our area, and Alki, no longer have direct service downtown, and in the evening hours we have long wait times for a bus to take us from the Alaska Junction to our homes in Admiral and Alki. We have been forgotten, and I cannot support additional transit funding that does not serve my neighborhood.
NORTH KING COUNTY	<ul style="list-style-type: none"> <li>- Timeline is way too long for in-city projects such as light rail to Ballard.</li> <li>- Light rail at-grade should be avoided and light rail should NOT run on streets (e.g. 15th Avenue NW and Elliott Avenue West).</li> <li>- General-purpose lanes should not be converted to bus-only lanes, as this increases congestion while the bus lane is under-utilized. Overall throughput of people is lower, with little change in bus average speed. Buses on the shoulder is an even worse idea.</li> <li>- The main improvement needed on the Sounder North is a way to avoid the frequent closures due to mud slides. It's currently not a reliable mode.</li> <li>- More thought needs to be given to how people will get to transit (specifically train) stations. Few are close enough to walk, and bike accommodations are inadequate. Many need to drive, and there's little or no parking.</li> <li>- Need a more enlightened choice of funding sources instead of the usual easy targets: car tabs, regressive sales tax, and still higher property taxes. A substantial part of the cost needs to be borne by those profiting from the unchecked growth and development that is driving the massive need for transportation infrastructure.</li> </ul>
NORTH KING COUNTY	West is best Ballard option. And not in 25 years!
NORTH KING COUNTY	Timeline is a non-starter. Rapid Ride C and D corridors get improvements with nothing for Rapid Ride E. I'd be more supportive of building a 2nd downtown transit tunnel that would serve Rapid Rides C, D and E that could be built quicker without light rail (but possibly upgraded to rail at a future date).
NORTH KING COUNTY	I'd be willing to pay significantly more in taxes (even compared to the proposed increases) if it meant these transit options became available sooner. ~20 years is too long.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>I understand the logistical complexity of a new DSTT and building across the ship canal, but light rail to Ballard needs to be expedited. I'm 38 now, and wouldn't see light rail to Ballard open until I'm 60 – that's a really long time from now, and traffic congestion will continue to get worse in the interim. Ballard and SLU have absorbed disproportionate shares of regional growth already! Furthermore, the Ballard corridor has the highest ridership estimates of any segment, yet gets lower quality grade separation than the mainline through Capitol Hill and NE Seattle – why? It would make perfect sense to tunnel from Downtown to Ballard, and serve QA and Interbay on the way, as we have for CH and the U-District. The reliability issues with a bridge over the ship canal present potential problems, and the surface disruptions posed by lane closures on 15th are also worth addressing.</p> <p>I'm extremely in favor of this plan on the whole; my only hesitations come from 1) the long timeline for and suboptimal implementation of one of the most crucial projects in our region, LRT to Ballard, and 2) the taxing structure is somewhat regressive, given that we have one of the most regressive tax structures in the nation, so increasing the sales tax just exacerbates this, while increasing property taxes will further hurt low-income renters.</p>
NORTH KING COUNTY	<p>Modify the Everett light rail plan to go more directly to Everett without the Paine Field 'loop' in the line as now shown. This gets light rail to Everett sooner and cheaper and shortens the rail travel time to/from Everett. Include the necessary engineering to add a future spur light rail line to Paine Field later, use BRT to/from Paine &amp; the light rail line in the interim.</p>
NORTH KING COUNTY	<p>The Ballard line should be prioritized due to the extremely dense and ever growing population that largely commutes to downtown Seattle. I've heard that the long building plan is a result of the onerous approval process, and that it could be resolved through action by the City of Seattle. Please work with Seattle to make this happen! The bus commute between Ballard and downtown Seattle is terribly slow due to the bottle necks in this corridor. A light rail link would greatly improve the commute, and consequently our overall quality of life!</p>
NORTH KING COUNTY	<p>Direct stops for Boeing Everett and Boeing Renton</p>
NORTH KING COUNTY	<p>I am unclear if BRT is true separated rapid transit or buses still stuck in same traffic as other vehicles. Only in favor of the former.</p> <p>The amount of free parking alarms me. Getting fewer people driving is a big reason I would consider this a wise investment. As a family without a car, I feel like I'm subsidising a package that will only have a slight reduction on driving, and meanwhile I'm still begging for safe and adequate bike parking at stations. Infuriating that currently I feel scared leaving my bike at rail, am banned from taking on (cargo bike rule), would have to rent a safe space *if it were ever available at my local station*, and yet am being asked to support giant investment in free parking.</p>
NORTH KING COUNTY	<p>Stations at 145th and or 130th need to reengineer traffic as there is already to much congestion</p>
NORTH KING COUNTY	<p>I would love for it to take a lot less time as 20+ years is insane, but I will take what we can get as seattle desperately needs trains.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	The time frame needs to be decreased to keep up with the population increase in the region.
NORTH KING COUNTY	Other options should be considered for the downtown Seattle to Ballard. A tunnel really?
NORTH KING COUNTY	Grade-separation on the Downtown-to-Ballard light rail line is crucial. At-grade was a huge mistake in Rainier Valley and would be even worse on this line.
NORTH KING COUNTY	Light rail does not have to extend to each corner of the Puget Sound region in order to have an impact on the residents who live there. The plan should focus on getting the most people off the road as soon as possible. People within Seattle still drive to work within Seattle due safety concerns with biking and the inadequacy of the bus system. Giving them rapid transit first will ease the commute for people living farther away.
NORTH KING COUNTY	The Ballard line needs to be off-grade. The traffic on-grade is only getting worse...it would be a waste of money and effort to allow our transit system to get stuck in the same traffic we are trying to avoid by building it.
NORTH KING COUNTY	First comment: Pedestrian and bike needs are different. You should have them as separate questions. I believe strongly that pedestrian needs should be prioritized — everyone is a pedestrian. People won't walk to the stations if the walk is unsafe. Second comment: New stations should have parking. Maybe parking garages can be built in a way so that they can be converted into housing once the parking needs go down, but the parking is necessary right now and will be for the next few decades. People won't use the trains (or buses) if they can't get to them. And that means a car because our bus service isn't reliable enough or thorough enough or flexible enough make cars unnecessary. Third comment: Please get to Everett faster. I think the whole system would be well-served and succeed faster if you get to Everett sooner. Fourth comment: Please keep the 145th Street Station. It is a good place to have a stop. 130th is a nice idea, but not necessary for the success of the system.
NORTH KING COUNTY	The light rail line to Ballard needs to be implemented much sooner to ease congestion in this fast-growing area of Seattle.
NORTH KING COUNTY	Ballard can't take 25 years! Prioritize inner city transport. I would be happy to pay even more if we could get the ballard and west seattle lines done before I'm dead.
NORTH KING COUNTY	I strongly feel the most bang for the buck will come from creating a light rail line between Ballard and Downtown Seattle. The timeline for the installation of this line should be moved up as it will benefit more people that live in the greater Seattle area relative to the other proposed light rail lines.
NORTH KING COUNTY	The increasing density of Seattle neighborhoods highlights the need for Ballard and West Seattle to come online earlier.
NORTH KING COUNTY	I believe strongly that 22 years is too long to wait for major improvements to transit service in Ballard. Need to invest in either the light rail extension (preferred) or significant improvements to the rapid bus lines in a shorter timeline in order to reduce commute times and pollution.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>I want a #TunnelToBallard and the #WestIsBest route in Interlay (Option 3)</p> <p>Why should we make this kind of investment in the Downtown-Ballard line? The expected ridership in the Downtown-Ballard corridor is projected to be roughly 140,000, the highest of any sub-area in the entire Sound Transit region. It is critical this corridor is done quickly and done right. The Downtown-Ballard line will be a regional corridor—that is a fact. Our communities deserve infrastructure investments to meet the demands of regional ridership.</p>
NORTH KING COUNTY	<p>Ballard light rail can be improved greatly with the following:</p> <p>1) replace the 70 drawbridge with a simpler tunnel, a dredge-tube-cover, similar to the BART transbay tunnel. Dredge the route across the bay, drop a prefabricated tube, and then cover. More reliable than a drawbridge, and not as complicated construction as a TBM under the bay. Shallower approaches for light rail results in less expensive infrastructure. Run trains at-grade in Interbay, albeit in exclusive right of way with no grade crossings, and cut &amp; cover station/tracks in Ballard.</p> <p>2) speed up Ballard timeline by separating the downtown tunnel portion into it's own project and running Ballard link down 1st ave from Lower Queen Anne through Downtown on the surface until the tunnel is complete. When tunnel complete however many years/decades it will take, 1st Ave surface alignment to become the Belltown branch of SDOT's City Center Connector, while Ballard link continues into the tunnel. This could speed up Ballard by 10 years AND give Belltown residents a reason to vote for ST3.</p>
NORTH KING COUNTY	<p>Link light rail should be completed to Everett before the completion of light rail to Ballard. Since corridor I-5 is the main transportation stem from Everett south to Seattle moving people from cars to light rail from the northern outlying areas will relieve some of the pressure off the close in Seattle neighborhoods, easing their commute into downtown Seattle.</p>
NORTH KING COUNTY	<p>Ballard link light rail should be prioritized to complete much earlier than the current proposal and should not share grade with 15TH AVE NW.</p>
NORTH KING COUNTY	<p>See Seattle Subway.</p>
NORTH KING COUNTY	<p>Any light rail at grade is a huge mistake.</p>
NORTH KING COUNTY	<p>First priority for funds and timeline should be the I-5 and 405 corridors for BRT lines, stations and schedules. Get people moving quickly in the north/south corridors and connect them with frequent cross-town shuttles running along major cross-streets. Modify circuitous bus routes for efficiency, and build public tolerance and expectation for walking 2-3 blocks to transit (ie: San Francisco, Manhattan).</p> <p>Once the system is moving, build rail infrastructure strategically. Plan more above-ground rail lines and access whenever possible for cost effectiveness.</p> <p>Proactively acquire available property along transit corridors/stations for pocket parking lots enhanced as city/county parks.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Putting light rail to Ballard at-grade is a terrible idea. It needs to be in a dedicated space. I travel along this route daily and feel it is essential to get rail in this area (and hopefully a LOT sooner than the plan anticipates) but putting it on 15th is unworkable. If you're going to spend the money to do it, at least do it right!!
NORTH KING COUNTY	In 17 years I will no longer need mass transit as I will, more than likely, not be working. The timeline needs to speed up! And look at where the priorities are. It takes me 40 minutes to drive 7 miles to downtown. Yet you want me to pay MUCH MORE than \$200 per year and never benefit from it. Not too realistic!
NORTH KING COUNTY	<ul style="list-style-type: none"> <li>- Too much North-South emphasis, not enough East-West.</li> <li>- Add more light rail/subway in City of Seattle</li> <li>- Go faster!</li> <li>- Ridership on Link downtown seems amazing...shows how much demand there is for fast, in-city service</li> </ul>
NORTH KING COUNTY	It's gotta happen before the next generation. Escalate the rail improvements. 25 years is just too long.
NORTH KING COUNTY	I'm concerned about the tax burden on people with fixed incomes and lower incomes. I strongly support expanding bus service; I'm not so sure about building infrastructure that may be outdated in 25 years, in light of expanded urban villages, driverless cars, etc.
NORTH KING COUNTY	You should consider the Ballard route to bypass Westlake and Fremont, considering the multitude of big businesses and residences it would bypass, rather than fewer businesses on the Interbay side.
NORTH KING COUNTY	If the H130th street station is built before the n 145th street station I will go door to door in my community telling my neighbors to vote down this plan.
NORTH KING COUNTY	<ol style="list-style-type: none"> <li>1. Monorail for West Seattle - Downtown Seattle - Ballard/Crown Hill</li> <li>2. Instead of light rail from downtown Bellevue to Issaquah, branch off from Seattle-Bellevue line at Factoria to Issaquah.</li> <li>3. Build station at 130th. Frequent bus service along 130th/Roosevelt/125th corridor would provide access to/from retirement home on Greenwood, Linden, and in Lake City; apartments in those areas, business on Aurora, 15th N.E., and Lake City; Broadview-Thomson K-8 school on Greenwood and Ingraham High School between Ashworth and Meridian. It would be expected that opening of the station would lead to more high-density housing and business around the station and along the 130th/Roosevelt/125th corridor. No parking should be provided since auto drivers can go one mile north or south to parking facilities at 145th or Northgate. Riders boarding at this station would arrive by foot, bike, wheelchair, or bus, be dropped off by drivers.</li> </ol>
NORTH KING COUNTY	West is best for the Ballard line

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Instead of building a line from Ballard to Downtown via interbay, couldn't ST3 shave time and cost off the plan by having an east-west tunnel from Ballard to the University District Station that shared the montlake cut undercrossing, and forked off the Cap Hill tunnel to stop in SLU, then into the new transit tunnel. In addition to sparing the cost of a new water crossing, this plan would kill two birds with one stone, serving the congested 45th st. Corridor as well as the Ballard to Downtown commuters. If you designed it so Downtown-bound Ballard boarders didn't have to transfer at UW, they could probably get Downtown in about the same amount of time as they would with an interbay route, right? Does the residential density in Interbay warrant a light rail connection?
NORTH KING COUNTY	It's ridiculous that West Seattle (with only the bridges to get to the city now) should have to wait for 17 years to see light rail. I supported the monorail idea years ago and still think it's the best way to get everyone 'above the traffic.' Light rail is a second choice, but to wait THIS long within the city is ridiculous! Seattle taxpayers pay the lion's share of taxes as it is, but are far underrepresented in these plans.
NORTH KING COUNTY	West Seattle/Ballard lightrail should be a priority with the influx of employees from Amazon, and soon Google, that live and work in these areas. Current plans need to be updated with the demands of the area. Partner with Amazon/Google/Microsoft for additional funding as lightrail is more reliable and less costly than running employee shuttles.
NORTH KING COUNTY	East west traffic in Seattle is still terrible. If you are finally adding expansion to BALLARD, why does it only go downtown? East west traverses are a nightmare with few public transport options.
NORTH KING COUNTY	Light rail to Everett, Ballard and West Seattle should be higher priority to be completed sooner.
NORTH KING COUNTY	The Proposed surface alignment along 15th Avenue for the Downtown to Ballard is unsupportable. It's impact on capacity along that alignment, both during construction, and beyond is too great, and will provide for a line with poor reliability, given that it must yield to marine traffic. It is well past time to keep the tunnel boring machines running, right under the ship canal. I can tolerate waiting for the construction if it is done the right way, underground. I also question the value of delivering suburban commuter lines into the city center that still lacks a truly reliable transit system. We all want this done ten years ago, I think we can agree on that point, but we also want it done right. West is Best on the DT to Ballard line. I don't think I can support ST3 if 15th remains surface running, I know many that feel the same way!
NORTH KING COUNTY	West Seattle should be sooner than 17 years given the massive growth and limited transportation out.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>The city dweller lose every time in Ballard and West Seattle. W. Seattle deal with Ferry traffic and Port shifter traffic. We have taxed ourselves to provide extra transit. You need to move people in the city with dedicated service not just buses. Put I-5 to use in the outer areas with greater park and ride and rapid ride. Give the east side the same options. Build affordability and accountability into the system. You should not build a system with per mile costs of 200 to 300 million. (Comparable to Portland OR at 15 to 20 million per mile.) You cannot have an affordable city and continue to have big asks. Prioritize the city people with light rail around the gridlock created by people living outside the city entering the core. The priority need for movement of bus rapid ride and park and ride in the regions you prioritize for rail first is a mistake of epic proportions.</p>
NORTH KING COUNTY	<p>The timing and order are not inline with planned density. In city transit is important first, then suburbs. This is backwards. The current transit commute times in city make us a joke. Capital hill to Ballard via bus in the evening commute takes an hour. For that commute I can move out of the city I love. Maybe this plan is trying to promote suburbs but it does not support living in Seattle. Without a change to the timeline, support by many in the city will be nonexistent.</p>
NORTH KING COUNTY	<p>Downtown to Ballard alignment - west is best. Do not take lanes on 15 ave w for light rail</p>
NORTH KING COUNTY	<p>Graham Street Station time line should be move ahead on the plan.</p>
NORTH KING COUNTY	<p>The light rail from Ballard to downtown should not wait 22 years! That and light rail to West Seattle should be done first. Please change those timelines! 22 years is way too long.</p> <p>I support bus on shoulder programs because they actually reduce volumes, whereas merely adding more buses to sit in the same traffic does not.</p>
NORTH KING COUNTY	<p>ST3 project prioritization should build Link light rail to West Seattle first and it should be done in 8 years instead of 12. Of all the light rail projects, this is the best combination of low price, fast delivery and most importantly, provides mass transit to a large population of people who live in walking distance of future West Seattle Link stations but currently drive to downtown. Upon project completion people would immediately be able to convert from driving to walking onto mass transit.</p>
NORTH KING COUNTY	<p>Ballard and urban neighborhoods need better rail transit sooner than the plan. Bus service in the city neighborhoods is stuck in the same traffic as cars and doesn't solve commuter or traffic challenges.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	<p>1) There has got to be a way to speed up light rail to Ballard and West Seattle. 22 YEARS?? I don't have children now, but I could have grandchildren by then.</p> <p>2) All new light rail really must be grade-separated and should not be limited by bridge openings.</p> <p>3) Please improve pedestrian and bike access to stations. Parking cars should cost money. More bike lockers at all stations would be much appreciated.</p>
NORTH KING COUNTY	<p>Being that I live in Seattle, I would like to see Ballard links and West Seattle links established before reaching out to outlying areas. Those folks are commuters during rush hour and sporting events but most likely would not use it on a daily basis for other uses, whereas Ballard and West Seattle would use it more often.</p>
NORTH KING COUNTY	<p>It is imperative to make light rail connections to Ballard and West Seattle the highest priority based on demand - number of users that would benefit. I believe it would serve the most users sooner. I also strongly support the 130th street station as this location is an important East West crossroad linking lake city and north aurora to the light rail system - both areas are candidates for increased density.</p>
NORTH KING COUNTY	<p>From your own survey, "Light rail operates in its own right-of-way, separated from traffic," but the current Ballard line is the opposite of this. It will face competition from both cars and boats. This will kill speed and reliability. We are making a 100 year investment here, please do it right by giving the rail "its own right-of-way, separated from traffic". The mixing of rail with traffic is the only reason I will oppose ST3.</p>
NORTH KING COUNTY	<p>There should be tax breaks for bicycles, and higher taxes on gasoline, car tabs, parking, and meters. Do you know that the annual car registration in Shanghai China is higher than the purchase price of the car? and they still have congestion and traffic because the rich elite and corporations will always pay for their personal cars to avoid public transit. Also, in my opinion we want to solidify the flow/commute to and from downtown first. Cars and drivers in downtown are dangerous. Every day I walk past Pike Market and am aghast we allow cars to cross that intersection when we really should make it pedestrian only/friendly with the amount of people and tourists on foot at that location. Make downtown really easy to connect to from Ballard, West Seattle, U Village Link stations with plenty of park and ride parking first. Look most people avoid downtown because of the one way streets and horrible parking. They already don't prefer driving into downtown. All you have to do it make it easy to ride the light rail in. Put these stations close enough at Ballard + West Seattle + U Village first. Then expand rail further. But you need to promote riding into downtown as the first priority and stop the cars from driving in. The best example are game (Sounders/Seahawks/Mariners) days when I see lots of fans riding the bus. They all are in a good mood and seem to enjoy the bus ride. Imagine every day as game day and the fans as commuters -- you don't need, don't want cars.</p>
NORTH KING COUNTY	<p>Not fast enough development in the projects that support the immediate areas around Seattle. Seattle is a bottle neck.</p>
NORTH KING COUNTY	<p>Consider Ballard/Downtown light rail as priority for timeline.</p>
NORTH KING COUNTY	<p>Light rail to Seattle Center/Queen Anne/Ballard/Greenlake is crucial</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	I support the "West is Best" proposal for light rail between Ballard and downtown. We need continued transit improvements much sooner than the 22 years outlined in ST3 given rapid growth in Ballard.
NORTH KING COUNTY	There needs to be some bus transit and bike route improvements to the 185th St Station in Shoreline from both the east and west sides of the station.
NORTH KING COUNTY	Light rail between Bellevue, Kirkland and Totem Lake.
NORTH KING COUNTY	The Ballard to Downtown line is the most important line on ST3 and needs to be completely grade separated. The line needs to either be tunneled under the cut or on a tall fixed bridge that will never open! We should not be building lines that don't meet those standards! I would be in favor of switching money from the proposed bus improvements to get all the lines built faster and to higher quality. The lines should be pushed to open in 12 years at the most. The ST3 package needs to focus on light rail and commuter rail. We already have a bus system called King County Metro.
NORTH KING COUNTY	The 130th street station should not be provisional and should be completed much sooner than is currently included in the plan. This is an easy win, as it will already be along an existing rail line. The stop at 145th is arbitrary and does not serve as many communities as a stop at 130th could, more easily reaching diverse individuals that rely more heavily on public transit increasing ridership including Pinehurst, Bitterlake, and Lake City. The timeline for the light rail to Ballard and West Seattle should also be sped up as these are growing population centers that currently lack decent transit options.
NORTH KING COUNTY	Why build another expensive tunnel. Stop running buses through the downtown tunnel and add more trains at faster speed!! Also, the plan has completely left out the Central District. Make Mt Baker a hub and create a train from Mt Baker to the UW to Ballard!
NORTH KING COUNTY	I don't understand why the projects have been staggered in the order that they have and I don't believe in investing in a different type of bus system since that will further delay the light rail that we know is effective and eat up limited funds - focus on the infrastructure that works and drive towards it! But I also don't understand why the Ballard link is so delayed, when I ride the bus from Ballard to downtown at any time during peak hour, there is sometimes not even room to enter the bus. The bus changes made 5 years ago have crippled the public transport on this side and that neighborhood is growing exponentially. Until I see traffic numbers that support why the projects are staggered the way that they are (vs developers and politicians greasing the wheels to get the projects they want...), I can't support this proposal. I don't mind paying taxes to support light rail since it works and it is the future we need but we need data to show why you are staggering the projects in the manner you are proposing.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>Make NE 130th Station definite, not provisional. Figure out how to fund it without disturbing the Lynnwood Link grant, and try to open it in 2023.</p> <p>Replace the Paine Field detour with BRT or a spur line. Link has diminishing returns the further north it goes, so consider leaving it at Lynnwood or going just to 164th or 128th.</p> <p>Instead of 405 BRT and Issaquah Link, give Metro a large capital contribution for its Long Range Plan. That would serve the dispersed area much better. Make the 535 and 560 more frequent, and create an ST Express route from downtown Bellevue to downtown Kirkland and Totem Lake.</p> <p>Transit, not parking! Let the cities fund garages around the stations if they want them. That's what east coast transit agencies do.</p> <p>Make Sounder South hourly and speed it up.</p> <p>Pierce and the other subareas should contribute to the second downtown tunnel, since it's a regional asset that benefits them.</p> <p>More grade separation in Ballard.</p> <p>Give Ballard-UW light rail a complete EIS and Record of Decision. Do Alternatives Analyses for Ballard-Lake City-Bothell light rail and "Metro 8" light rail (Denny Way, Central District).</p> <p>Implement your new policies for TOD and affordable housing around stations.</p>
<p>NORTH KING COUNTY</p>	<p>I support alignment N-02b for the Lynnwood to Everett segment over alignments N-02a or N-02c. Paine Field should not be a mandatory stop on the backbone for all riders travelling to and from Everett; instead, it should be connected with a spur route. The accelerated timeline, lower costs, and quicker travel time are all well worth it.</p>
<p>NORTH KING COUNTY</p>	<p>Please run the West Seattle light rail line down Delridge Ave.</p>
<p>NORTH KING COUNTY</p>	<p>Placing a higher priority in mass transit for the west to east corridor (Ballard to Bellevue) is very important.</p>
<p>NORTH KING COUNTY</p>	<p>I think the most important project is connecting Tacoma's light rail to the airport and to Seattle.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>I want to preface my comments by stating that I am a huge supporter of mass transit and love that the Seattle area light rail options are growing and serving the community so well.</p> <p>I have concerns that really long distance light rail - to Everett from Lynnwood, to Tacoma from Des Moines - is not a good value overall. It seems that projects focused in more dense areas (inside Seattle, on the Eastside) would benefit more riders and be a better value for the taxpayer. Commuter rail seems like a better option for the really long distance travel. Because it's not drawn to scale, the map you use to show the draft plans does not accurately convey how far Everett and Tacoma really are.</p> <p>I understand that this proposal is a 25 year plan and that the engineering and construction of the light rail lines to Ballard and West Seattle with an additional downtown tunnel are very complicated. But we really need relief from traffic sooner. Please speed up the implementation to the extent possible, including bringing more BRT online sooner.</p>
<p>NORTH KING COUNTY</p>	<p>Raising property tax soothing be the solution. That would impact low income families and elderly on fixed income. The money should be coming from elsewhere.</p> <p>I would vote for state income tax to finally take place.</p>
<p>NORTH KING COUNTY</p>	<p>Ballard to downtown Seattle plan needs to be moved up.</p>
<p>NORTH KING COUNTY</p>	<p>Prioritize Graham Street station. This would be transformational for residents of Rainier Valley, doing the most good for the lowest income residents.</p>
<p>NORTH KING COUNTY</p>	<p>Light rail has been great, and it's only getting better with each line we have. I fully support investing new light rail at the cost outlined above. However, we should focus more lines on central Seattle and less on taking it out into the suburbs. This plan only includes a couple lines in the city, and those are the farthest off. I would like the see additional lines in the city built out faster. Other lines out into the suburbs (e.g., down south) might be better served with buses or Sounder trains.</p>
<p>NORTH KING COUNTY</p>	<p>I have concern over the extent to which Snohomish County's demand for a diversion to Paine Field will require money from other subareas, especially North King County. Despite that, I don't strongly oppose what another subarea wants to do so long as it doesn't negatively affect the most important aspect of this plan: light rail line from downtown to Ballard. That line must be fully grade-separated for me to support this plan. No matter what else is built with ST3, I will support ST3 if the downtown-Ballard line is fully grade-separated, but oppose it if it isn't. The current ST3 plan calls for at-grade crossings in Interbay and drawbridge over the ship canal. I will not support this plan under any circumstances, even if construction is sped up, but will support it if the line is redesigned to be completely grade-separated, even if the timeline is 25 years out. Sound Transit must build light rail lines right the first time. At-grade along MLK is a mistake that I will not support again.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	The alignment of the light rail project to West Seattle should be described as grade separated rather than elevated in the financial plan for ST3. A decision between elevated vs. other options should be made during the preliminary design/environmental process.
NORTH KING COUNTY	Several thoughts: 1.) The LRT projects in particular are skewed towards East King County at the expense of more urban areas along the Seattle-Everett-Tacoma corridor. It's a fairly blatant sop to voters on the Eastside, but not necessarily good transportation planning. 2.) In the same vein, it's absurd that a neighborhood as close-in as Ballard would have to wait 25 years for LRT service -- these priorities are totally out of order. 3.) Where is the east-west connector in North Seattle? To me, that would be even more useful than a Ballard-downtown line, as it could also connect with the main LRT "spine." 4.) Sound Transit, like all transportation agencies (transit and roads) suffers from the overwhelming desire to BUILD MORE THINGS. What we really should be doing is focusing on how to reduce the need for everyday, regional trips in the first place, rather than simply accepting them as a given and spending insane amounts of money on the necessary infrastructure. But, I suppose a tiger can't change its stripes...
NORTH KING COUNTY	Replace the Paine Field router with a BRT spur from I-5.  Do we need a second tunnel through downtown to accommodate the Ballard line?
NORTH KING COUNTY	While I understand the need for various pieces, we need to complete the light rail system across the city first rather than patch and piece an ecosystem together now. I am a HUGE supporter of light rail and mass transit but this plan seems long and there are too many moving parts. For a city the size of Seattle with the growth we are expecting and our geography, we need solutions that will have the biggest impact.
NORTH KING COUNTY	22 years to Ballard is really far too long.
NORTH KING COUNTY	- Please find a way to find 130th St. Station in N. Seattle! This will be the only easy and reliable way to access Link from Lake City and Pinehurst. - Please pursue options that allow for full grade separation on the Ballard-DT line. - Do what you can to speed up project delivery!
NORTH KING COUNTY	The rail connection to West Seattle should include an underground station at Alaska Junction. I am very disappointed that Sound Transit has not considered (so far as I can tell) any alternative alignment that includes this underground station. If light rail construction is going to be slow and expensive, it might as well be done right, and an elevated rail line/station would complicate the ultimate extension of rail to White Center/Burien while destroying the treasured streetscape on California Ave.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

NORTH KING COUNTY	Taxes should not be based on residential property only - need to find a way to fairly tax all potential users of transportation, i.e. have renters pay their fair share as well.
NORTH KING COUNTY	I believe it is important to build from inside out . Which is from Seattle city center out . The Ballard light railway will be one such project which is extremely important to be implemented immediately. People living in the city will then be able to travel using public transportation rather than cars which will help with congestion and parking.
NORTH KING COUNTY	The negative impact of light rail in West Seattle would outweigh any benefits. There is simply no place at the West Seattle Junction to build light rail without destroying the character of the neighborhood. Visit any city in the US to see the negative impact of elevated trains on neighborhoods. Or just look at conditions along/under our Alaskan Way viaduct. Nobody wants to live, shop, work or eat under an elevated roadway. We should build light rail in non-populated neighborhoods and have good bus service from population centers to the light rail stations.
NORTH KING COUNTY	Ballard should be expedited and built with grade separation. There are already delays with the light rail from UW and Capitol Hill.
NORTH KING COUNTY	Look into bus lines running more frequently (ie 125 running every 15 minutes instead of every 20). Also look into offering incentives to businesses who choose to open and/or operate within certain proximity of bus stops and light rail stations.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>I grew up in the greater Seattle area. I have voted to fund every public transit project proposal for many reasons, especially because I believe that urban areas should have infrastructure to support people, especially those who are lower income, mobility challenged, too young/old/impaired to drive, visiting from other countries, etc. That said, this proposal (or something similar) will be the hardest to decide on a vote, especially because the deliverables are so long and the items are so varied. I think ST and the related transit agencies need to be more adaptable to the realities of usage especially given the recent reductions and elimination of Metro service this spring when light rail opened. I get that some people who have been waiting for 10 years finally got their Light Rail stations and I am happy for them. But trying to restrict the traffic patterns which force people with limited mobility into funneling through transfers and huge amounts of walking or biking in areas that are not always super accessible is terrible for those with mobility challenges and also those who work non-traditional hours (which is likely the majority of working people). I realize that these plans are trying to be all things to all people everywhere, but what about people who decided to buy houses (or rent) intentionally in areas that were super accessible to public transportation and are now left with 15 or more minute walks to the nearest transit location, and left with no or little service in evenings, nights or weekends? Whatever the plan entails, I hope that there will be yearly surveys or focus groups or community meetings (whatever it takes) for ST and related transit agencies to continue to assess the service needs of people. Even someone who is historically as pro-transit as me will have a hard time voting for something that seems to leave a lot to be desired in terms of affordability, accessibility and efficiency. At some point when my commute time doubles it becomes unrealistic to keep taking public transit. Then ultimately if it becomes so unusable, then it becomes harder to pay so much for something that has dramatically worsened the commute for our household and so many of our neighbors and coworkers. Good luck. I will try to stay engaged in positively helping crafting a solution if community input is still sought after during the next 25 years.</p>
<p>NORTH KING COUNTY</p>	<p>The Ballard connection to downtown should be completed earlier. There should also be a route connecting Ballard to the UW. This will only get more expensive the longer it is delayed. In addition, these routes should NOT BE AT GRADE!. These need to be below ground (or above) to not conflict with existing traffic.</p>
<p>NORTH KING COUNTY</p>	<p>This survey asks the wrong questions. The only good project in the entire package is downtown to Ballard based on Sound Transit's own ridership estimates, yet that project is pushed to the back and done cheaply in order to build dubious projects in Snohomish County and West Seattle. Ballard-UW crosstown rail combined with true BRT between downtown and Ballard is a better and more cost effective project. The 2nd downtown tunnel is a regional project and the costs should be split between all of the jurisdictions. And: bonding should be more used to speed up the project, and to spread the costs over the future users as well as current tax payers. I strongly favor expanding transit in the region and would be willing to pay for it, but this is a package of bad projects whose only value is to generate suburban votes.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

Subarea	Additional Feedback - Project(s) should be modified in the ST3 final plan
EAST KING COUNTY	The Ballard line needs to be at the very least on a fully separated grade. A tunnel under Salmon Bay would be very important as well, but definitely putting it at grade through Interbay will be a long term mistake. This is the only key issue for me. I probably won't vote for the measure as is, but would if this was changed.
EAST KING COUNTY	<p>I completely oppose current plans for BRT on the I405 corridor. They will do nothing to alleviate my travel time or improve my commute as an existing daily bus rider. BRT basically means more frequent buses for me which is nice but not worth the \$1000+ more a year in taxes I will pay. At that price point it becomes worth it for me to pay to use the HOT lanes vs take the bus.</p> <p>I will vote no to ST3 without transit on Cross Kirkland Corridor. I and several other 252/257 riders will actively encourage all 1,000+ metro riders at the Kingsgate Park and Ride with whom there has been little to know direct engagement to oppose it also. Give us our light rail station or BRT stop!</p>
EAST KING COUNTY	I think light rail should run up and down I405 BRT will not help reduce congestion,
EAST KING COUNTY	<p>Transportation in the Puget Sound is completely broken today. Traveling between cities and neighborhoods requires slogging through endless traffic jams on overburdened highways, regardless of whether one chooses to drive or take a bus. We need a transportation plan that provides fast, reliable transportation between our densest, most populated areas *now*, and I wouldn't hesitate to vote for such a plan. However, I can't support the ST3 plan in its current form, when it:</p> <ol style="list-style-type: none"> <li>1. Won't get me to Belltown, Fremont, or Wallingford - some of the densest, most populated neighborhoods in Seattle - without sitting in traffic.</li> <li>2. Won't get me to Ballard or West Seattle for two decades, when travel to these areas is literally impossible at times today.</li> <li>3. Won't allow for crosstown travel in Seattle without a detour and transfer downtown.</li> <li>4. Won't get me to downtown Kirkland at all - 405/85th doesn't count.</li> <li>5. Won't get me to Everett without a lengthy detour.</li> </ol>
EAST KING COUNTY	<p>Ballard to Downtown needs grade separated rail.</p> <p>Ballard to UW seems like a necessary part of the plan.</p> <p>25 years is too long.</p>
EAST KING COUNTY	Renton is very poorly served by transit of any sort. Express buses from downtown Renton, as well as shoulder access for express buses, should be prioritized in the ST3 final plan.
EAST KING COUNTY	You state that "light rail to Lynnwood and Tukwila at Boeing access road in 20 years" but I thought light rail would be at the 44th Ave P&R in Lynnwood by 2023 (7 years). Has this time frame changed?
EAST KING COUNTY	Please consider Ballard to downtown to not create a new drawbridge/use the existing one, if possible. Boat traffic could significantly hamper the consistency of any light rail crossing the ship canal.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	Why so long to come to Issaquah?? Issaquah has struggled with recent growth and there is no long term plan in place to address it. Bring the light rail (and plenty of parking spots!)
EAST KING COUNTY	The Eastside Rail Corridor should feature light rail (or DMU commuter rail) connecting Woodinville, Kirkland, Bellevue, and Renton. With transfer to Sounder operations during peak hours at either end! This is such a valuable, publicly owned asset, in which ST already owns easement rights.
EAST KING COUNTY	I want light rail from Renton to Bothell.
EAST KING COUNTY	I wish the Issaquah link were coming sooner, but I understand that this costs a lot of money.
EAST KING COUNTY	Timeline way too long and costly. Why is it taking almost 50 years from the start of ST to the projected end?? I support transit but I will be dead before it is expanded enough for me to use. Why should I pay with no chance of getting any benefit.
EAST KING COUNTY	1) Light rail should prioritize on Seattle where there are lots of residents and jobs and few parking lots. For people from suburb, light rail should provide plenty of parking lots in existing suburb stations and a few strategic new suburb stations so people can park and ride. New roads should be built if necessary to handle the traffic to there. The parking lots should not be free. The fee should be higher initially to recoup the construction cost in reasonable timeframe. Afterward, the fee should be enough to support ongoing maintenance.  2) Light rail should not share road with cars and boats. It should have extremely reliable schedule.  3) The rails in Seattle and the park and rides should be completed within 10 years. Maybe it can be financially supported by new property development near or above light rail stations where property values will increase substantially.
EAST KING COUNTY	You should have a light rail system that loops around the north end of lake Washington--I5-I405-522, another from 522-I5-I405-520, another from I5-520-I405-I90, and another from I5-I405-I90.
EAST KING COUNTY	22 years for Ballard light rail sounds preposterous. Eastside projects sound about right.
EAST KING COUNTY	Access to Ballard via light rail should be a higher priority given some of the express and rapid ride options that will help supplement other light rail destinations that don't really exist for Ballard.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	<p>You need to remember that technology will continue to develop over the next 25 years and this 'plan' and time frame are completely ridiculous. Self driving cars on highways will make your plans to expand clear to Everett, Tacoma and Issaquah completely useless by the time they are complete - much like how the 520 bridge will already be at max capacity when it is completed.</p> <p>Get light rail completely integrated into the core of Seattle before expanding it, then do it in an intelligent and cost effective way. Also, a direct like from Ballard to UW Seattle as well as going up Lake City Way to downtown Seattle are far better routes than having 'Rapid Ride' buses that hinder traffic more than help. Also, dont over-design and spend too much money on stations - the CH station is gorgeous but incredibly over built. Keep them clean and utilitarian and put money into the actual rails.</p> <p>Also, you are getting push back from the cost. Programs like this hurt middle class homeowners as well as the poor - who are already being forced out of Seattle as-is. Money is a finite source.</p>
EAST KING COUNTY	<p>It is unfortunate that the Tukwila to Bellevue area is not going to receive light rail.</p> <p>I-405 traffic will only continue to get worse and tolling I-405 does not help the traffic, it only makes it confusing for drivers and is marginalizing to those that cannot afford the high tolls. As well, studies have shown time and again that on the whole, more people are likely to take rail transit rather than take the bus. Ultimately BRT will be a waste of money, time and infrastructure. I understand that it will be cheaper and faster to deliver to people in the short run, but by not connecting that portion of the region by rail, you will handicapping the citizens that live there in the future. Please reconsider using BRT and please think more carefully about bringing light rail South I-405.</p>
EAST KING COUNTY	<p>In my humble opinion, the current plans are going to burn too much money on light rail.</p> <p>The issue here is traffic and number of people to service.</p> <p>Why spend money building light rail dedicated infrastructure when we already have the infrastructure needed to vastly improve our transit situation.</p> <p>Simply improve the bus infrastructure. That means send busses (not light rail) on dedicate road lanes avoiding all traffic. Increase bus system coverage, reliability and frequency of service.</p> <p>This will be cheaper, scalable, and quicker improvement to our transit system than building light rail everywhere.</p>
EAST KING COUNTY	<p>I am curious of the overall transit plan and why a consistent light rail around the lake wouldn't be desired with shorter bus routes then being required to destinations on the light rail. it would be possible that light rail from Bellevue to Redmond or Issaquah might not be necessary. I do not know. I assume drivers on the highways or main roads would decrease. Is Seattle's tram necessary or even part of this survey?</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	All light rail should not be at-grade. It should be above-grade or below-grade. We are trying to fix traffic issues not increase them
EAST KING COUNTY	My vote is No. All the folks I talked to in my neighborhood is a No. 25-30years plan is not acceptable. Please lower the scale of the project with a 5-7 year commitment. Also, I am very disappointed the rail will not reach Kirkland. We will have higher property tax just to get a transit station on 85th & still on bus. No Thank You.
EAST KING COUNTY	Issaquah is a priority please
EAST KING COUNTY	Why is the 405 corridor only planned to receive bus service? Anyone driving this nightmare at any time of day can see that demand would certainly fill light rail up - in my mind the only solution to our gridlock. Also: have you ever had to stand in a 554 express bus during rush hour as it hurtles across I90 at interstate speeds? I do not consider this a serious alternative to light rail - for safety reasons!
EAST KING COUNTY	The plan has relatively little to offer the Renton area. The Bus Rapid Transit plan depends on smoothly functioning transit lanes in the I-405 corridor, which are not currently available. The recent experience with the express toll lanes north of Bellevue is a cautionary tale. I would like to see better and more specific plans about connecting Renton to employment centers in downtown Seattle and Bellevue. Perhaps more ST express buses could do part of the job, along with improved park and ride locations.
EAST KING COUNTY	Mass Transit can use any fuel we decide in the future and go much faster than cars if we decide change the engines.  I am curious if a round the lake light rail plan would be feasible with shorter bus or rail routes to the decided convenient stations.
EAST KING COUNTY	I see inadequate planning or inclusion for communities that will be growing in the coming years such as Woodenville Snohomish Millcreek Clearview there is nothing in your plan that addresses that area you make no guarantees about BART or anything else so I would vote against this
EAST KING COUNTY	Bellevue to Issaquah details are confusing. The description states the Wilburton station will be an end station and then the description goes on to describe a connection at East Main. I would prefer a Wilburton end point and avoid more rail lines around SE 8th on the west of I 405.
EAST KING COUNTY	As usual, no one is listening. Light rail should parallel every major throughway, I5, I405, I90, 520, 522 with stops and transfers at all major junctions. If the rail goes to and from where the cars go there will be more transit use and less vehicles clogging the roadways. Instead the ST3 plan is a hodge-podge of individual parts that build up to a completely dysfunctional system. For example... Want to get from Tacoma to Newcastle with ST3? Can't be done without getting on a stupid bus that you'd have to wait for 40 min at the train/bus transfer point (if history tells us anything)... But worse, you'd get stuck in eastside I405 traffic just getting from Tukwila to Newcastle. ST3 does almost no investment in the south I405 corridor except put more cars on the road. Stop messing around with buses and put light rail everywhere. If you-all were really motivated you could get it done in 10 years max... Other Metro areas have, but for some reason the Puget Sound area planners can't figure it out.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	BRT on I-405 is the wrong choice for Kirkland. I am not going to drive to a flyer stop to take a damned bus, but I would walk through the Kirkland neighborhoods to take light rail running on the existing rail right-of-way (CKC). Light rail to Totem Lake/Evergreen would be an wonderful means of knitting together Bellevue, to its neighbors to the north. You can't say that about buses running on a freeway.
EAST KING COUNTY	Less stations
EAST KING COUNTY	No part of ST should be built on or use the Eastside Rail Corridor. We need transit, but we also need parks. That is a linear park, gifted to the people of King County by the Federal Government in the Rails to Trails act. They pay the property owners for the conversion of the rail easement to a hiking and biking trail. It is sad to see the County solving the transit problem by stealing a linear park from the people. Trains and hikers/bikers don't mix. As I-405 is being widened, it should be constructed Light Rail "friendly" so that eventually the BRT can be replaced with Light Rail in the median of I-405, like is being done on I-90 and 520.
EAST KING COUNTY	Make a Light Rail line across the North End of King County ie: SR522!!! from 145th to Woodinville and/or Redmond. Forget the added Bus service along SR522 which will still need to use the existing surface roads.
EAST KING COUNTY	Why do you always phase Tacoma to the middle-to-last of these initiatives? I would first extend light rail down to Tacoma and beyond AND extend Tacoma's Link in their city. This would capture the 2nd largest city in the state with the 1st to provide dual alternatives for commuting giving us the ridership to justify such a system. I honestly believe it is somewhat of a mistake to expect someone to sit on a light rail train from Everett to Seattle with all of those stops; might as well drive - CR is a better choice but Light Rail should be more localized to the community (like Tacoma's Link). Also, it is a HUGE mistake to remove existing ROW (such as the I-90 Express Lanes or adding busses to shoulders); we need dedicated ROW and we have a vehicle already being built to cross Lake Washington and that is 520. Why doesn't the line cross from UW (which arguably will be the 2nd busiest transit node in the region) to Bellevue and then branch to Redmond and Issaquah - this makes more sense and does not take away from the already very useful transit infrastructure we have with I-90 AND it gets us away from an expensive and totally unnecessary Bellevue tunnel (or at least not as long). I like transit, I just think it needs to be rethought and some areas reprioritized. How can we keep ignoring the 2nd largest city and why would we take away from existing functional ROW we we have a new opportunity already being built? If you reprioritize, likely things will be less expensive and at least you'd have the ridership to justify potential help from the feds or other sources and not just trying to increase vehicle registration taxes and property taxes on those who wont have service (as usual).
EAST KING COUNTY	We need to provide transit to the areas that need it more economically

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	<p>I think you have gone about the extension to Ballard all wrong...and I don't live in Ballard. It seems to be way too far off in the future, and I find it very difficult to understand why it seems like to good idea to build light rail at grade when that involves crossing a drawbridge.</p> <p>Additionally, the cross-Seattle (Ballard to UW, possibly then extending to the east side) seems like a no-brainer to pursue.</p> <p>I think you will really need to sell why we need Link to go all the way down south when there's already a commuter train that travels the same route.</p> <p>Finally, as someone who on the eastside south of Bellevue, I feel like my community is pretty much ignored by the plan. Yes, there will be busses on 405, but that does nothing to make getting around in the neighborhoods (or getting to the busses from my house) any easier. I'm also skeptical that this will do much to make 405 any more palatable. When my wife and I buy a home we plan to buy largely based upon accessibility to transportation, but it seems a real shame that with all the building going on in Newcastle/Renton/etc very little is being done to help the new residents buy in to public transport and alleviate the congestion that already exists (for a fun time, drive Coal Creek Parkway during commute times) and will continue to boom.</p>
EAST KING COUNTY	<p>The Landing/Southport and North Renton shouldn't be ignored in the 405 BRT line. It's the one part of Renton that's currently developing and growing. The new massive park and ride on Grady and Rainier in South Renton will be fantastic, but won't adequately serve all of Renton on the BRT line. An 11th stop on the BRT route at an inline station at Park Ave on the 405 would better serve the developing Landing/Southport, the rest of North Renton and the Renton Highlands.</p>
EAST KING COUNTY	<p>Support for the central king projects is critical for the passage of this plan. The timelines for West Seattle and Ballard should be moved up a couple years and if feasible, done concurrently. Furthermore, the Ballard run should be fully grade separated to avoid road and boat traffic impacts, as well as improve speed and reliability in general. The U-link extension has proven grade separation is worth the cost. It should be for the Ballard line as well.</p> <p>Finally, a comment on the Issaquah line. Missing downtown Bellevue is a huge whiff on this one. While it would require a second crossing of I-405 or figuring out how to mitigate environmental impacts to the Mercer Slough, downtown Bellevue as a destination as well as ease and speed of transfer for those continuing into Seattle is critical for a fast and reliable service. If our vision of light rail is to build up urban centers, such as Issaquah, then making connections between those centers harder is counter to that goal.</p>
EAST KING COUNTY	<p>Light rail shoul run on SR 522 from Woodinville to 145th and then west on 145th to I-5 as a substitute for the BRT plan.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	Getting BRT busses from general traffic lanes to express toll lanes will add to congestion problems on I-405.
EAST KING COUNTY	We need to make sure that the light rail from Ballard to downtown is grade seperated. Traffic from there is horrible and anything that has any contact with surface street traffic will drag down service time reliability like no other.
EAST KING COUNTY	8 YEARS for BRT to come online for the I-405 corridor? Why so long? I can understand if it means constructing new 'transit only' freeway lanes, but otherwise implementation should be on a more accelerated timetable.
EAST KING COUNTY	<p>SR99 alignment for Link Angel Lake to Federal Way. Aligning it along the highway merely complements an existing transit corridor, but aligning it to SR99 creates a new corridor entirely. Highways obliterate neighborhood walkability (look at the poor use of Rainier Ave. Freeway Station), and the whole point of Light Rail and TOD is to make walkable neighborhoods. Building light rail stations next to the highway to Federal Way misses this goal by forcing people to walk in a pedestrian hostile area and misses the commercial cores of the cities it serves, along with the increased ridership the intra-neighborhood traffic the commercial core alignments would bring.</p> <p>Also! Dont you dare align the Issaquah Light Rail over the ERC. Ridership estimates for Issaquah-Seattle trips over potential light rail could be as high as 7000-9000 people a day. If you route the light rail up and over the ERC, it not only misses downtown Bellevue, forcing a transfer for Bellevue commuters (a major faux pas), it also would add so much time to the Issaquah-Seattle commute that, given 10 extra minutes, the commuters may as well just walk from Eastgate to South Bellevue. The best routing would be Highlands-Issaquah-Eastgate-South Bellevue-Bellevue-Wilburton-Etc. to Totem Lake.</p>
EAST KING COUNTY	Too much Sound Transit planning, programming is geared around existing badly-pre-planned mess. Streamline and make more direct-line, high-speed, high-capacity, longer-distance transit. The entire plan will be 25 years out-of-date by the time you get around to doing any of it, and fortunes have already been spent on "research" analysis, debate, process, and retro-active re-evaluation instad of getting anything tangible accomplished. Move up timetables to 'unreachable' goals to prod more efficient and cost-effective results.
EAST KING COUNTY	focus more on light rail, less on buses
EAST KING COUNTY	<p>Having spent a significant portion of my life using the excellent transit in Duesseldorf, Germany, I am both acutely aware of how light and heavy rail systems are a boon to society. I am strongly in support of expanding these systems in Seattle. However, the ST3 plan includes at-grade light rail to Ballard and a draw bridge. Coming from a region that expended great effort to grade-separate its light rail (Duesseldorf), this proposal is backwards from the start.</p> <p>Additionally, the notion that Bus Rapid Transit on 405 will do anything for mass transit is laughable. Proposing to allow buses to pass traffic on the shoulder of a highway is a half-baked solution to what we know we already need - grade-separated transit. Anything else just contributes to the congestion. If you can't put light rail along the eastside to Seatac, at least build a busway for the BRT.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	Light Rail to Issaquah should go to the South Bellevue Park and Ride, so commuters can easily transfer for service to downtown Seattle. Reuse track through Bellevue. Why build a parallel line less than 2 miles away?
EAST KING COUNTY	I don't believe the statement in question #14.. that "the plan would cost the average resident in Puget Sound approximately \$200 per year." This appears to me to be a wholesale lie. An increase to my property tax, plus an increase to my motor vehicle excise tax, plus an increase in the sales tax... will certainly add up to more than \$200 annually. And why doesn't this "survey" of my opinion ask me if I support paying that cost (on top of what I'm ALREADY paying for ST2) for 25 years? It all adds up to A LOT of money. Where I live, it doesn't appear that I (or even my grandchildren) will get much service benefit for my investment and my community's investment.
EAST KING COUNTY	My largest complaint is that BRT on the CKC will not preserve the existing trail, where light rail could coexist with the existing trail due to its smaller foot print and lower amounts of noise pollution.
EAST KING COUNTY	Surprised you chose to include a Bellevue-Issaquah Light Rail versus having a similar option through Kirkland/Bothell. Issaquah has 33K people whereas Kirkland has 89K and Bothell is growing. I think the ST3 plan falls flat and doesn't push Light Rail enough on the Eastside. Yes it is expensive but if the plan connected more neighborhoods (Ballard-UW-Kirkland-Redmond route would have been nice). BRT through Kirkland along the 405 is inadequate. Yes, it may be quicker but you have the Cross Kirkland ROW to use that takes you directly from a built Park N Ride station to Downtown Kirkland to Totem Lake. Parkplace and Totem Lake are being rebuilt as I type this and the ST3 fails to connect directly...You'd still need to take another bus from the 405 down to downtown Kirkland. If BRT through Kirkland was modified a bit, then maybe I can support this, but the Eastside still lacks decent options in ST3 and makes only the 90 or over Lake Washington the only options to connect to Seattle using LR or BRT. I'd love to see a light rail option that circles the entire lake. Have you looked at how Los Angeles MTA is being so successful in quickly adding subway/LR to the region? Seems like a new line pops up every few months and they have received some federal funding, too. Thank you.
EAST KING COUNTY	why no light rail going from bellevue to lynnwood or over the lake from kirkland to seattle??
EAST KING COUNTY	Please DO consider using the old railroad right of way now called the Cross Kirkland Corridor for either bus or light rail and avoid freeway stations on 405 that would be more difficult to access. the current opposition is coming from a group of people that purchased property along the corridor and want it to be their personal trail.
EAST KING COUNTY	I would prefer to remove the Tacoma/Everett links.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	<p>-It is imperative that all Link extensions be made fully grade separated. That means no level crossings, and no shared ROW. Surface alignments are only acceptable if totally separated from all other modes of transportation.</p> <p>-The South Link alignment must be changed to the hwy 99 option for its entire length. This maximizes TOD, walkshed, and speed potential. Building up against a freeway may save some money, but removes these advantages.</p> <p>-An east/west line between Ballard and the UW, with future extension to U-village, Children's Hospital, and Kirkland must be included. This line has higher ridership potential than Ballard/downtown, and would still enable faster trips from Ballard to Downtown than current bus service.</p> <p>-All lines and stations must be built with future expandability in mind. That means stations capable of multiplatform support.</p> <p>-Build with the goal in mind to upgrade to automated metro service in the long run.</p>
EAST KING COUNTY	I would like to see light rail on the eastern side of lake washington going all the way to the airport
EAST KING COUNTY	we need transit now!!! no on projects that are not efficient and quick! No at grade projects that the link rail has to compete with cars and busses. Let's create a world class transportation system. Yes for Ballard / UW line!!
EAST KING COUNTY	Rail across SR 522 from 145th instead of bus.
EAST KING COUNTY	Light rail needs to be the priority. Get it done faster-25 years is way too long. Let's focus on the rail and none of the other projects
EAST KING COUNTY	Faster.
EAST KING COUNTY	<p>While expanding bus routes in an 8 year plan is a cost effective band-aid idea to improve mass transit in the PS area, it is a flawed plan, much like the 405 tolling system. I have little faith in current WST management and leadership who are incapable of fully conceptualizing mass transit ideas. Bus routes will only further congest freeway/highway traffic. I commute between 110-160 miles/day for work in the Puget Sound area (90, 18, 405, and I-5 corridors); and have lived in the Los Angeles, DC/NOVA, and in Japan--and understand traffic congestion, and efficient mass transit systems (e.g., used in Tokyo, JP). We need to prioritize efficient and thorough planning into light rail and supporting infrastructure development first, and foremost, especially given the influx of commuter population into the PS area, especially considering the geographic/topographic constraints against further developing our highway/freeway system; and the fact that most residents are already priced out of purchasing homes/renting in King County, where most of our current/future economic development (e.g., the IT industry), and already commute into King County from Pierce and Snohomish counties daily for work.</p>
EAST KING COUNTY	I think it's time to build a light rail to Issaquah, we shouldn't wait for 25 years to have it done.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	<p>I'm concerned with the plans solution for transit on I405 from Everett to Renton. This should be a MUCH higher priority. You say rapid bus service is a solution as it is a quicker fix but your plan and cost for this is long term. I want to see a plan for a temporary solution using rapid buses with a more concrete plan to add light rail from Everett to Renton. The funds for the bus system should go to light rail in this corridor. You mention a short term solution but I would expect to see the schedule support this and implementation of funds redirected to light rail.</p> <p>People want light rail as the wait times are so short. The traffic song 405 is horrific as well. Please add this to your plan sooner or address it upfront. Thank you!</p>
EAST KING COUNTY	<p>The light rail should connect Issaquah with Seattle, not Bellevue. All plan should be completed faster.</p>
EAST KING COUNTY	<p>405 BRT missing station at NE 70th, Link missing station at NE 51st in Redmond. The combined gap means I'll campaign within Redmond against ST3 unless the gaps are addressed.</p>
EAST KING COUNTY	<p>Allowing buses to drive on shoulders is an unsafe and atrocious idea. The number of accidents that have occurred on highway shoulders to people pulled over have been numerous across the nation, and this would increase that drastically in the area. It would become a dangerous and scary situation to get something as routine as a flat tire. I strongly oppose the entire plan due to this component.</p> <p>In general, it's time to stop focusing on buses and shift to light rail in a timely fashion as a real solution.</p>
EAST KING COUNTY	<p>Please push Issaquah earlier in the plan. Please also connect Issaquah directly to Seattle.</p>
EAST KING COUNTY	<p>We do not need BRT. Just build light rail.</p>
EAST KING COUNTY	<p>The extension to Issaquah needs to be MUCH sooner than 25 years. More like 10 at the most.</p>
EAST KING COUNTY	<p>I think we need to increase the speed with which we build light rail. We need it now, not 25 years from now.</p>
EAST KING COUNTY	<p>The I90 corridor to Issaquah should be addressed sooner than 25 years.</p>
EAST KING COUNTY	<p>Remove the bus projects and start the light rail now!!!</p> <p>Build light rail from issaquah to Seattle</p>
EAST KING COUNTY	<p>Light rail is not cost effective compared to buses for the number of people moved. Furthermore, I will be taxed immediately for it, but not even see that negligible benefit from it for years. Why should I be asked to shoulder an excessive tax burden to support people electing to live from away from their places of employment?</p>
EAST KING COUNTY	<p>It is time to expedite Bellevue and Issaquah links. We are tired of continually getting the short end of the stick.</p>
EAST KING COUNTY	<p>Having the Issaquah/Eastgate link cut up to Bellevue instead of continuing west towards Mercer Islands does not make much sense from a Seattle-bound commuter living in the region's fastest growing cities of Issaquah and Snoqualmie.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	<p>I CANNOT support a plan that takes 25 years to solve today's crisis. These projects shouldn't take a generation! It smacks of incompetence and stupidity that these projects might be finished by the time I retire. This is an avenue for partnership with state and federal government, inclusion of broad use of eminent domain. Eminent Domain might be some bad PR, it might be a hard part of the job, but you and the do nothing government need to DO YOUR GOD DAMN JOB! If the plan is dependent on state and federal partnerships to complete in 10 years, include that. We'll protest and vote. That's part of your job, so DO YOUR GOD DAMN JOB! Do you get the message that this plan is showing us that you don't know, or don't care, about doing your job.</p> <p>I'm voting NO unless we have some projects that finish in 4 years. This is a stupidly lazy proposal. It makes me want to run against you in an election. A plan to need 25 years to finish, which I'm guessing is to give you job security on a "do nothing" job. Put forth a real timeline, or get voted down. We can vote this one down, protest for years until you don't want to run for this position again, and vote some competent people in to finish this project in 12-13 years.</p> <p>We're not as stupid as you. We know it isn't "this or nothing". This kind of incompetence in government is leading people to want to vote for corrupt demagogues, when we need to just work to get competent people in.</p>
EAST KING COUNTY	Seattle to Issaquah light rail done in next ten years instead of 25!
EAST KING COUNTY	<p>Light rail makes sense in Seattle where the density is higher and people there are more apt to have a car-free lifestyle. It doesn't give you that bang for the buck once you move outside the city and over into the suburbs. In the suburbs where cars are a necessity, park &amp; ride lots are important, as are buses. I'm not going to vote for something that pushes light rail to places like Issaquah. Get more park &amp; rides, and more bus service, and give the buses easier access to the HOV lanes on I-90 so that they aren't stuck in traffic.</p> <p>You really need to let the citizens of Seattle tax themselves to build out whatever they want and quit trying to get folks outside the city to bankroll their public transit. A light rail line out to Issaquah just looks like you're throwing us a bone in the suburbs to vote for something.</p>
EAST KING COUNTY	Increased prioritization of light rail projects, including Issaquah, West Seattle, etc. Moving forward with the light rail aspects would permit potential reductions in service or negotiations of other aspects of the project, resulting in additional savings in the latter part of ST3.
EAST KING COUNTY	It would be much more valuable to focus on light rail, and less on busses. I drive from Issaquah to Seattle every day, and busses would not save me time, and are very inconvenient. Light rail (like Vancouver's skytrain) is very reliable and user friendly. I would take light rail. Many people I know would not take busses but would use light rail. No traffic and the frequency of trains is the main reason
EAST KING COUNTY	I love all of this, but I really wish it could be done much faster. 25 years from now is an immense amount of time, and even 8 years from now seems like it just won't be soon enough.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	The greatest growth in Issaquah is the Plateau and the Issaquah Highlands. Connecting into downtown Issaquah will just make it more difficult to get around old downtown. The SR900 park and ride should be moved to the freeway, and/or more routes added up into the Plateau, otherwise no one will fight the traffic to get to the park and ride, and will continue to drive.
EAST KING COUNTY	<p>Please please please consider adding more parking to existing and proposed new stops on the light rail and commuter rail stations. Tukwila Sounder Station's brand new parking lot is much too small so it's almost full at 7:30 each morning and I know the other stops' parking lots are frequently full well before then. For some reason the old parking lot was fenced off so people could not park there anymore, which was ridiculous since that's where people had to park before. Now it's a staging area for construction but that lot has been fenced off for a long time. Bus service does not come near my home and if I had to try to use that to reach the station, my commute each way would easily be 90 minutes or more and it would be faster to drive. If we have to pay for the parking or have to carpool in order to get a spot, these transit systems become far less attractive and less cost effective for people to take it. Parking is paramount to my concerns, and likely many others who currently or are interested in utilizing the Sounder trains or the Light Rail system to get to work/school. I like taking the train to work, since I'm still able to park in the morning, but if I had to get there at 7 or earlier just to get a spot (and still have to start my shift at 8), I would probably be better off driving.</p> <p>Also, putting aside a bit more money for improving Sounder train reliability would be nice. Some months have multiple trips cancelled for riders, often with not enough notice to take another route to work to get there on time (even though the train broke down at the first station an hour before the alert text reaches the riders). There will always be some circumstances that arise that can cause a train to be late or cancelled, but when it's frequently maintenance, it seems like there should be more effort taken in making sure they're operating properly and reliably.</p>
EAST KING COUNTY	we should get transit farther into the eastside faster, as there is a large population of seattle employees stuck in traffic trying to cross the lake
EAST KING COUNTY	Ballard line should run to UW and connect to spine there.
EAST KING COUNTY	Considering the growth and expansion east on I-90, if we're really talking about 25 years until the light rail is completed to Issaquah, it should continue to the City of Snoqualmie (I-18) or possibly even North Bend. Also, I don't see anything in the plan addressing the horrible traffic congestion on I-18 and 167. Thanks.
EAST KING COUNTY	Pushing buses is a waste of time and money. Having lived here and ridden buses for decades, I know all too well that they get caught in the same traffic messes as everyone else. Grade-separated rail should be the sole push.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	I think that projects within Seattle such as the Ballard light rail, Graham St. Station and West Seattle light rail should be prioritized because improving transit within the city helps everyone in the region by de-congesting the core and providing fast and reliable transportation to the largest number of people. City dwellers are simply more inclined to drive less than their suburban counterparts so transit should focus on that population first.
EAST KING COUNTY	The BRT plan for I-405 is flawed and does not provide a reliable high capacity transit option. As offered, it would weave and mix with general purpose traffic for about half of the corridor. The other half would depend on performance of the toll lanes. There are no stops between Bellevue and South Renton. This project will not win votes for the package, especially with the new proposed tax burden. Please come back with a better plan for the I-405 corridor.
EAST KING COUNTY	Anything that can move the timeline for light rail projects up for faster completion will make ST3 more palatable as a whole.
EAST KING COUNTY	What role do autonomous vehicles play in this plan? How has sound transit modeled the impact of autonomous vehicles in its planning? What is sound transit doing as part of its plan to accommodate autonomous and electric vehicles? This plan feels like its based on a technology vision frozen in the 1960's.
EAST KING COUNTY	Renton should be included in Light Rail expansion that connects Renton to Seattle, Bellevue and the airport. BRT is not helpful, is not faster or more convenient (currently) and it does not help the roads to clog them up with more buses. Renton is the last community around Lake Washington that is experiencing very rapid development and population growth and residents of Renton have paid into the transportation improvement funds at the same rate as other communities. Please consider Renton for Light Rail - not more buses. We are not frequent transit users but would be if we had better public transportation options that connected our community to the region.
EAST KING COUNTY	I think there should be a connection between Issaquah and Seattle across I-90 without having to go north to Bellevue. Seems like a missing link.
EAST KING COUNTY	I ride on the Sounder train into Seattle from Tukwilla every day. One way to greatly improve my experience and cause minor impact, would be to add another train heading South after the 6:20pm train, thus making it possible for people who work late, etc. to use this train.  Also, I believe there may already be plans in the works, but parking is pretty much impossible at the Tukwilla station. I would suggest putting in a huge multi-story parking garage here if your plan includes accommodating population growth. It's also very difficult to park in Kent. I've tried to drive to Kent to catch the train, just because they have the garage, and still not found parking.
EAST KING COUNTY	Prioritize timing of work inside 405/5 corridors first to serve the most people with the best. Use buses and satellite stations to bring people to rail. Very disappointed to see that Lynnwood to Burien will remain buses and not rail. Shorten outer spurs and drive more rail traffic inside I405/I5 corridors
EAST KING COUNTY	Ballard line should run to UW, not to downtown.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	Get light rail to Redmond MUCH sooner!
EAST KING COUNTY	<p>Bus rapid transit- It would be a good idea not to spend money on new buses and work on the routes. Currently taking the bus along I-405 is a waste of time and will be a waste of time if further consideration is not taken to address parking and how to get to final destination with sporadic bus service. It is frustrating to be dropped off at a freeway bus station and then a person has to work 45 minutes to get to a final destination. This does not help to address too many cars on the road.</p> <p>Light rail- It would be a good idea to get the eastside connected to Seattle and the airport. It is frustrating to see the eastside being left out and having to be so dependent on a car to get around anywhere.</p>
EAST KING COUNTY	Light rail on the 405 corridor and across 520.
EAST KING COUNTY	More focus on extending light rail capability over bus lines.
EAST KING COUNTY	Seems like ST3 is no longer negotiable as all meetings scheduled are in the major affected areas. Aren't the communities to the East and South of Lake Washington in Renton, Kenndale, Newcastle, Maple Valley, Covington, and Black Diamond affected as well? Personally living on the Renton plateau, I can only imagine what my options will be in the next few years on I405, SR900, SR167, and Coal Creek Parkway and certainly do not wish to wait 8, 12, 17, 20, 22 or 25 years! I currently have to limit my use of these routes to mid-day use only so as to avoid them during commute hours.
EAST KING COUNTY	It is imperative that light rail lines be built around the north and south ends of Lake Washington to link to those Eastside communities. This should supplant the Rapid Transit Lines and be completed within 10 years. Bridges are terrifically expensive and delaying light rail routes around the lake will add millions to the cost.
EAST KING COUNTY	Remove pain field stop. Run down I5 to Everett and down Broadway. (No guarantee Boeing manufacturing will be here in 50 years). Let's get Link rail moving from Everett to Olympia ASAP.
EAST KING COUNTY	I just moved into Redmond at the end of 2015. I was so disappointed to see I had to drive into Seattle instead of take the train. Having lived in major metropolitan areas with max transit trains (San Francisco, Portland, D.C, Singapore) I was surprised to see Redmond not on the loop due to the heavy influence of Microsoft in the areas economy, as well as all the people who live in the outlying areas and have to commute into Seattle. Getting the light rail up an running ASAP is a priority. I've never seen people use the bus system as they do the metro/bart/max... systems. They are commuter and tourist friendly compared to buses.
EAST KING COUNTY	Light rail service from Issaquah should go to Seattle not Bellevue. I could transfer at Mercer Island to get to Bellevue.
EAST KING COUNTY	Expanding light rail to Kirkland via the Cross-Kirkland corridor is a huge missed opportunity in ST3! More bus service to Kirkland/Totem Lake are highly appreciated but we need to continue building out more options that don't rely on our already congested road infrastructure. Whether that is light rail, subways, gondolas, or canons shooting people across the water we've got to improve our infrastructure.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	The more we connect and expand light rail lines, the more useful it becomes. Being in Kirkland there is very little new service that will be viable for me anytime soon as if I have to drive to a station, I might as well just drive to the location. We don't need large expensive transit stations, we need to connect to more locations and integrate buses to light rail. I am disappointed there is no light rail services along I-405. We already have buses on I-405 but they take too long driving to large transit stations (like in Bellevue) to really be an efficient alternative to driving (unless you are going to the Bellevue transit station). I think some of the tax breaks going to large employers should instead be used to increase light rail and speedy transit to these locations. Especially considering the exceptional parking issues at Everett and Renton Boeing sites, many employees would greatly value a viable transit option.
EAST KING COUNTY	The 405 Corridor is in urgent need of transit options. Instead of express bus service they should also think about light rail along the entire 405 Highway
EAST KING COUNTY	I think it's ridiculous to expand BRT from Renton to Lynnwood. How antiquated! My husband and I have lived in our house in Renton for over 20 years and, for over 20 years, we've wondered why there wasn't a rail system running from the Renton Boeing plant to the Everett Boeing plant. For my extra \$200 a year in taxes I expect to be included in the light rail plans along with the rest of the region, rail that I would actually use, and not just get additional buses running up and down I-405 that contribute to the already unbearable traffic in this area.
EAST KING COUNTY	Light rail needs to come to Lynnwood in 2023 not 2036. Light rail should not go to Ballard or West Seattle until other areas are served. Everett should come next after Lynnwood. Federal Way light rail should occur as planned and further south before the eastern route. Why will it take 8 years for the BRT between Renton and Lynnwood on the 405?
EAST KING COUNTY	For any of these mass transit plans to work, residents must be able to get from their homes to the hubs (light rail stations, heavy rail stations, bus lines). In South king county there is very little local bus service, so plenty of parking at these hubs is required, which is not there especially in Renton/Tukwila. Please provide more parking at the stations. Otherwise adding more light rail, trains, express buses is pretty much useless.
EAST KING COUNTY	I live in eastern Bellevue, and just started a job in downtown Seattle. I am puzzled about the layout of the Bellevue-to-Issaquah Light Rail. Why does it head north along 405? That seems to make it slower to get from Eastgate Park & Ride to downtown Seattle. Will it require a transfer? Or will there be another train that makes a turn and continues on to Seattle, making it direct? It just seems inefficient -- shouldn't the junction be closer to I-90 (e.g. the Bellevue Park & Ride)? Additionally, there should be many more secure bike parking facilities all over (the bikelink locker). The Bellevue Way Park & Ride (which I never use) also looks incredibly crowded. Are there plans to improve it?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	The Light Rail parking situation at the Tukwila station is grossly insufficient. This has been the case since it's opening and has only become worse as usage of the station has increased. I don't know if all parking at all stations needs to be increased, but many people bypass Light Rail at Tukwila and take their car into Seattle due to the lack of parking at the Tukwila Light Rail station. It's a shame when you have motivated customers who go the less 'green' route of driving individual cars into Seattle because of lack of parking at your Tukwila Light Rail station.
EAST KING COUNTY	Light rail should take precedence as opposed to the quick and dirty fix of adding busses.
EAST KING COUNTY	I think the timeline needs to move up.
EAST KING COUNTY	Building Light rail to Issaquah and Redmond seem like much lower priority than connecting the Eastside north and south including commuting to the UW Bothell campus and eventually up to meet the other light rail in Everett or Lynnwood. Microsoft already provides lots of transit opportunities for its employees and it doesn't seem there is another major employer or reason for lots of people to go to either Redmond or Issaquah. I would swap the bus routes to Redmond and Issaquah and replace the Bellevue to Lynnwood section with light rail options.
EAST KING COUNTY	I believe that a rapid electric bus system would be much better for the Puget Sound area, would not require as much infrastructure, can be up and running faster and can be more easily updated. In addition, emergency vehicles could use the bus lanes if needed. Light rail is antiquated and a rapid bus system would be much better for this area. I do not support rail, but would support a rapid bus transit system from Issaquah to Seattle.
EAST KING COUNTY	The overall plan just seems too expensive. As much as I'd love better access into SLU, \$5 Billion for a new tunnel is just too much.
EAST KING COUNTY	Parking is horrible on the light rail in Seattle. The only park n ride is at Tukwila and there are never any spaces available after 7am. I like that the Boeing Access Road will have a park n ride and I think more stations should have one.
EAST KING COUNTY	I'm disappointed by the lack of light rail to Kirkland. Hopefully this opens the door for an east-west line from Kirkland-UW-Ballard in the future, but I think light rail would be a great benefit for a rapidly growing city with very few and increasingly congested roadways leading south to Bellevue and the lake bridges.  I don't understand what the advantages of BRT are, or even what that means beyond standard bus service. Buses are slow, they load slow, they stop frequently, they accelerate slowly, they arrive late, and they get stuck in traffic. If BRT solves these issues, I think it should be made more clear exactly how. Otherwise, light rail seems to be of a much greater benefit.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	<p>Eliminate the BRT projects, bring back the Totem Lake Light Rail segment, and consider Light Rail along 522.</p> <p>Given the cost and timeline for this plan, I expected much more. While I strongly support the expansion of light rail in the region, I do NOT support the use of BRT, except as a temporary measure. Unfortunately, this plan offers very little on the East Side apart from BRT (especially the north East Side). It is difficult to support a plan that has us waiting 25 years for so little. As it stands, I will be voting against this in November.</p>
EAST KING COUNTY	<p>Speed up the timeline for the South Lake Union light rail station.</p>
EAST KING COUNTY	<p>I would prefer to see the light rail stations be completed sooner, rather than the focus on the Rapid ride system. Given the number of Microsofties and other tech companies building on the Eastside, it would be extremely helpful to connect Seattle to the Eastside via light rail ASAP. This would help alleviate the traffic jams in the area immensely. I would also see if there was a way to get the corporation who are bringing people into the area to help fund parts of the projects since it would benefit their employee base as well.</p>
EAST KING COUNTY	<p>Shoulder driving should be in place. Front-load light rail on East side to contain sprawl and preserve habitat.</p>
EAST KING COUNTY	<p>The bus rapid transit along 405 should be light rail or any other form of transit that does not use the roadway. Additionally, none of the light rail projects should ever share the road with cars, including intersections. The marginal cost of separating the rail from the road is negligible compared to the costs of additional travel time on a normal schedule and additional time when there are accidents with the rail and cars. If you want my vote, do it right or not at all. I am willing to pay for transit that is off the roads. The more anything interacts with the road the more likely I am to vote against it.</p>
EAST KING COUNTY	<p>It looks like commuters from I-90, Issaquah, and further out would need to travel through Bellevue when taking the train. That's just dumb. These commuters currently go directly to Seattle.</p> <p>It's pretty insane, stupid, dumb, and the like that it will take 25+ years to get the train from Seattle to Issaquah along an existing freeway, I-90. Actually, it should be globally embarrassing that it would take the United States, of all countries, 25+ years to build a simple light rail line a few miles. GLOBALLY EMBARRASSING!!!!!! The buses are currently so overloaded that they are unsafe to ride. 25+ more years of growth can be handled by buses????!!!!</p>
EAST KING COUNTY	<p>ST should connect the population/work centers within the region as a first priority. Extending service to West Seattle and Ballard (intra-regional) before completing the connection to Everett is not the correct prioritization.</p>
EAST KING COUNTY	<p>If there are to be 1,000,000 additional residents in the coming 25 years, the plan is inadequate from its inception. Light rail is the proven best solution for moving increasing numbers across greater distances and should be the primary focus. Buses are fine in the heavy urban centers, but quickly become impractical when travel distances reach out to current suburbs, not to mention the suburbs which have yet to be developed, or conceived. Light rail as far as Mt. Vernon and North Bend should be developed immediately, not 25 years from now.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	The Issaquah segment to the Bellevue central terminal should join the segment across Mercer island at Richard Road rather than extend into the Bellevue Station. It should help relieve congestion at the Bellevue Terminal and allow a transfer into Seattle and Bellevue much more efficiently.
EAST KING COUNTY	Issaquah continues to be underserved by this plan. Suggest adding a direct route into SEA and SEATAC.
EAST KING COUNTY	Re-evaluate the estimated cost of \$200 per year per average resident to fund the \$50 billion budget. Does this mean that for a household of 4 people, it will cost \$800 for that family? Can the fiscal budget be re-allocated to help with more of the \$50 billion budget? What about the inevitable over-run of the projects? How will this be funded? The costs need to be transparent.
EAST KING COUNTY	The 17+ year duration of completion means 17 more years of current traffic nightmares and is a bit discouraging :(
EAST KING COUNTY	Neither of the redmond stops are very close to the technology campuses that it's supposedly serving. It'd be great if there was a stop closer to 148th/156th & 40th range, near the overlake transit center
EAST KING COUNTY	Think about the communities that have very little infrastructure first. Redmond and Issaquah have very limited bus service. I live in Sammamish and it takes me 1 1/2 hours to get into Seattle.
EAST KING COUNTY	Proposal for light rail from Issaquah to Bellevue should be realigned to follow I-90 and connect with ST2 project. Coming across I-90, the line should split into 3 lines -- Bothell, Redmond, and Issaquah, with appropriate headways for each line. Having Issaquah folks go into Bellevue and transfer there makes no sense. Light rail trains should be able to run on 3 minute headways so you should not need a second tunnel in Seattle. You need to go back and plan something more reasonable that can be done in a shorter time frame.
EAST KING COUNTY	The timelines for completion need to be cut in half on all these projects.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	<p>I strongly believe the I-405 corridor needs a more adequate solution than what I suspect would be something akin to mild improvement. The recent expansion of I-405 is an extremely temporary solution at best, and by the time the BRT expansion is completed in just under a decade, I see no reason to believe the traffic situation will be anything less than several times worse than it is now.</p> <p>Adding buses and stations, I believe, will have little-to-no effect on traffic along I-405. Already during rush hour, traffic along nearly the entirety of I-405 comes to an almost complete halt, including buses. If the bus offers little in the way of improved commuting, travelers will have little reason, aside from monetary, for taking the bus.</p> <p>I strongly believe an extended light rail system, or added bus-only lane would serve the purposes of public transport much better than improvements to the current routes. The Eastside is, and hasn't been for a long time, simply the handwave-able group of suburbs across the lake from Seattle. Much of it is an much closer to urban than suburban, and with the rising costs of housing and increase in apartment complexes and condos, the urbanity of the Eastside will be much greater by 2024. As such, I think it warrants consideration for the same degree of high speed public transportation that its more western neighbor has. Anything less will likely have a marginal impact, if any at all, and we'll remain a metropolitan area treading water at best, while the rest of the country speeds ahead.</p> <p>Thank you,</p>
EAST KING COUNTY	The SR522 route should include Woodinville and the Wine areas: The Warehouse District and the Woodinville Wine Valley.
EAST KING COUNTY	Why is the rail spur on the Eastside from Woodinville to Renton /Kent not being activated? Upgrade the tracks etc. We Europeans use better logic to move commuters.
EAST KING COUNTY	Light rail projects should be prioritized, and then the rapid bus lines. I strongly support the expansion but would like access to East Marginal Way along the Boeing field Corridor to improve my commute
EAST KING COUNTY	EastLink is a disaster, it won't make anything better and it will make the commute worse for many people. Should not be taking lanes away from I90 bridge, if you do, you need to get to Issaquah AND serve people south of I90 AT THE SAME TIME that the lanes on I90 are lost. I can't comprehend why you are forcing Issaquah commuters to detour through Bellevue to get to Seattle. I can't believe you are seriously proposing BRT on Richard's road to connect to downtown Bellevue. I've been wanting commuter rail in the Seattle area for a long, long time, but the way you are implementing it is driving me mad. It seriously makes me want to move to a city with well designed mass transit like Portland or Vancouver, BC.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	Traffic on the eastside is a critical concern. The toll lanes on 405 only made the matters worse. I am disappointed to see eastside projects continue to be a lower priority. Given that I will pay an above average share for these transits plans, I will only support a plan that moves up the priority of eastside projects and offers real solutions (not using the shoulder lanes as a stop gap).
EAST KING COUNTY	I think the north/ south commute needs to be improved more than the east/ west commute.
EAST KING COUNTY	I'm fine with the taxes proposed EXCEPT for the property tax. Especially when my area isn't be helped.
EAST KING COUNTY	I would support this fully if light rail to Issaquah wasn't the last project for completion. 25 years is ridiculous, especially given Issaquah is an area with tremendous growth and will continue that rapid growth trend. I'm not as likely to support at this point when our area won't feel the substantial benefits for 25 years. Ridiculous!
EAST KING COUNTY	I believe with the future expansions and construction in Issaquah, the plan should have Issaquah transit sooner than 25 years from now. HWY 90 is already backed up with traffic all day everyday and the buses are too full to use to get to downtown in peak hours. There are times and times when from the park and ride you have to wait for at least a couple of buses in the morning in order to be able to get on the bus. More buses should be added and the train system should be expanded sooner than 25 years. I think that timeline is unacceptable!!!
EAST KING COUNTY	It's hard to be supportive when rail to Issaquah is 25 years out.
EAST KING COUNTY	Continue direct rapid transit to Seattle as exists in 2016 . Oppose rail/bus to Bellevue first enroute to Seattle. Provide direct transit Issaquah/No Bend to Seatac airport avoiding travel into Seattle first. Having to travel to Bellevue center is OUT OF THE WAY!!
EAST KING COUNTY	I somewhat oppose #12 because I strongly oppose adding more buses or putting any more \$ into adding more buses or widening our roads. Our main focus should be 100% on building trains. I would easily start taking a train if it ran in my area. But I refuse to take buses because they are slower than if I drive. Buses slow down traffic. Stop adding buses.
EAST KING COUNTY	I think the project should be done in a shorter time that suggested.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	<p>With existing gas taxes, new highway tolls, and other transportation dollars available to Sound Transit, why is there not a single project being discussed to expand road capacity and improve our existing roads? Why is <i>*more*</i> money needed given all of the existing fees, taxes, and tolls that are collected today?</p> <p>The project and priorities do not reflect the priorities and wishes of communities on the Eastside, so I and other actively oppose the current ST3 plan.</p> <p>I also have very little confidence and trust in the current transportation leaders to develop, execute and complete our transportation projects. Fiascos like Big Bertha delays, unexpected sinkholes, mismanagement of budget from state audits, ridership nowhere near projections that were used to sell the program (can't blame lack of money here), and unacceptable budget overages and late completion of the new 520 bridge are examples behind the lack of trust. If I can't trust leaders to make responsible planning and management decisions for simple, straightforward projects, then how can I be expected to trust leaders with something as huge and complex as the ST3 plan?! I don't! And it's not because building a transportation plan is easy - it's not - but since I've been living here the past 15 years, the transit and transportation leadership has not given me any reason to believe or trust that they know how to plan and deliver a program <i>*that best serves the public.*</i></p> <p>Until transit can show it can deliver programs that are valuable to the public, not program that the leadership wants, you won't get my support or my \$s.</p> <p>Thank you for the opportunity to provide feedback on the plan...</p>
EAST KING COUNTY	<p>Why light rail to Redmond and Issaquah? The demographic of those cities is a higher than average household income and the people who are least likely to use public transit. I don't see those residents as willing to give up their BMWs, Audis, and SUVs to take mass transit. The ST3 plan ignores the fact that the highest users of mass transit are those who have no alternative as in the residents of South Renton, South Kent and outlying areas. You have given them buses and are sending the light rail to the rich folks who will mostly ignore it. I understand that the plan is to get cars off the road but really, the wealthy will not give up their cars. Give the light rail to those who need it and stop pandering to the rich.</p>
EAST KING COUNTY	<p>EAST LINK LIGHT RAIL SHOULD BE INSTALLED ON THE 520 -- NOT RETROFITTED TO TRAVEL ACROSS THE I-90!!!</p>
EAST KING COUNTY	<p>We don't need to wait eight friggin years to build parking structures in Kenmore that are needed today. TODAY. It is not fair that we fund your transit projects everywhere else in the region and have to wait for the completion of the light rail station in Shoreline EIGHT FRIGGING YEARS from now, when we could use the projected 300 parking spaces now. User pay if necessary. Let's get started and drop the artificial link between the light rail station and our parking structures, which we need now.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	The existing Kingsgate and Brickyard park and rides are completely full every week day. People are parking along the curb in spots that are not parking spots and even in the grass on occasion. Parking spaces should be added ASAP. A quick stopgap fix would be to take the decorative medians and greenery out, square up the space and then restripe. There is a lot of wasted space as currently designed. Waiting 8 years for a parking structure at Kingsgate is a terrible idea. A structure should be built but there needs to be some added spaces THIS YEAR.
EAST KING COUNTY	What we need on the Eastside I-405 corridor is light rail, not buses that add to the congestion on the already crowded roads/highways. Think about the future and how traveling from Lynnwood/Alderwood to Redmond will be very indirect via Seattle.
EAST KING COUNTY	More transit-oriented development, and buses that would help eliminate the need for P&R to access light rail from the suburbs and exurbs.
EAST KING COUNTY	Add light rail north-south on eastside. It is only going to get more expensive to in the future. Need to get started so it can get finished, duh. Nobody wants to pay, but all of us have to pay. Need to make sure nobody (contractors, etc) are going to get rich off this project. Fair firm-fixed project awards and hold contractors accountable.
EAST KING COUNTY	Keep Cross Kirkland Corridor free of light rail and bus/motor traffic. Bike and pedestrian only
EAST KING COUNTY	I'm against BUS transit on CKC trail. There are two little designated bicycle trails in the area. For my family bicycle commute is the main type of commute for 5-10 miles distance. CKC trail is the great commute corridor, but not with buses around.

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	<p>Light rail should go directly from Eastgate through Seattle much like the ST554 bus route. No one in Eastgate or Issaquah is going to want to take a detour through downtown Bellevue to get to Seattle. If it wasn't for Microsoft, the Bellevue to Redmond link light rail would be pointless. Make Microsoft pay for improvements that benefit them and their employees. Not our problem that they chose an out-of-the-way location for their campus. If they don't like it, do like Amazon did and expand in downtown!</p> <p>Major transit routes should follow major highways. When it deviates, you should really carefully consider "why"? The link light rail between the airport and Seattle is terrible because it takes longer than the express bus it was supposed to replace! Why it didn't just follow I-5 I'll never know! When visiting San Francisco, the BART follows highways and goes directly where you want to go. No need for a car!</p> <p>Park and Rides should always have parking all times of the day. Otherwise, I'm not going to waste time gambling on no parking and just drive instead. The parking at Tukwila for the light rail is a joke. No way people can park and ride at that station. It's hard enough fighting through the parking area just to pick up or drop off someone! At the very least there should be a way I can check real-time parking information at park and rides before I start my trip.</p> <p>I tried using sound transit to go to work, but at an hour and a half each way, it's no good! I work near Olympic Sculpture Park at the Seattle waterfront, which is somewhat of a 'transit hole'. If you kept the ST554 going north from downtown through Belltown, you'd have something I could use.</p> <p>I know it's maddening process to try to please everyone AND try to get people to pay for it! Thanks for reaching out for feedback.</p>
EAST KING COUNTY	The rainier valley dog leg becomes redundant when the Kent connection to downtown Seattle is done. So the SeaTac to Seattle line can be revised to give faster service by following a straight track separated from other traffic.
EAST KING COUNTY	It's ridiculous not to have light rail serving the i-405 corridor
EAST KING COUNTY	522 has been adversely effected by rolling on 405 and 520 yet is one of the oldest routes in and out of Seattle. I find it disappointing that plans don't include light rail along this, which would not only ease traffic, but link UW campuses and Bothells biotech companies to Lake Union. Instead the plan is based on past employment in low growth aircraft manufacturing which is moving more out of state to avoid local unions. Rather than reach out in long lines it would be better to create infrastructure surrounding the lake and the east side, thus decreasing suburban sprawl, and creating rail commutes that are functional from homes to work. Build a solid core for business, research, and academics, not strings connecting parking lots.
EAST KING COUNTY	More parking at park and rides!

Sound Transit 3 - Draft System Plan

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	I feel as the whole East side is in need of more modifications of transit besides just the speed, frequency and reliability of the bus system. I live in Renton and commute all the way in to Wallingford. The traffic on I-405 is ALWAYS backed up, whether its 9 am, 1 pm or even up into 8 pm when I come home from work. I think extending the light rail down south on I-405 to either Kent, Tukwila or Sumner would make a huge improvement on commuting.
EAST KING COUNTY	Issaquah connection appears poorly designed.
EAST KING COUNTY	Kirkland should have a light rail in the Cross Kirkland Corridor.
EAST KING COUNTY	Really 25 years. Already some of the worst traffic in the US. Plan should have much more aggressive timeline. At some point traffic becomes a detractor to growth. Fund it now, build it now creates job now and in the future.
EAST KING COUNTY	spend more on busses, less on light rail
EAST KING COUNTY	Why is light rail being ignored in what is the hottest real estate market presently in the East side (Bothell/Woodinville/Kenmore)?  Buses are nice, but there has been remarkably little foresight involved with bringing long-term investment to these areas well in advance of what is promising to be a surge in both density & property prices.  Anyone who disputes the need for mass transit in this area can travel from Lynnwood to 85th st in Kirkland between 7:30am and 9:30am, or 3pm to 6pm pretty much any day of the week.  (Bonus points for driving into Kirkland via Juanita Drive during this time)  Closing the loop (if not by 405, then perhaps by taking 522 to Avondale, to Redmond Town Center, neatly avoiding the whole 'Kirkland Issue') will significantly add to redundancy, ease traffic, increase the tax base and make your support in this traffic-locked section of the Eastside quite fervent.
EAST KING COUNTY	Remove Bellevue to Issaquah line in favor lowering cost (too much cost per rider), add Link station at NE 51st in Redmond
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail Remove the environmental study between Bellevue and Bothell via the CKC Trail Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride If all of these are not removed, I will actively work to defeat ST3 in November

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	I believe this is a vital project but I believe it should go even further. Eventually connecting the whole state with long term goals of connecting the country. Along with ST3 updating the sounder to high speed and extend from Vancouver B.C. to Portland, Spokane to Tri-Cities then Spokane to Seattle. The final goal to work with the federal government but be positioned to connect the west coast from north to south and are state to the east coast with high speed rail.
EAST KING COUNTY	I live in Kirkland near the cross-Kirkland corridor, and support light rail on the corridor as in earlier drafts of the plan. I think good transit up and down the Eastside and across the lake to Seattle is critical for the region, and buses are not remotely adequate. Sorry for the noisy opposition from a few of my neighbors.
EAST KING COUNTY	Issaquah to Seattle should not have to stop in Bellevue. A light rail direct route from Issaquah to Seattle should be considered. Thank you for asking and providing this opportunity for feedback.
EAST KING COUNTY	north/south Light rail on the east side should be pursued further, either along 405 or further east (preferred over 405 BRT).
EAST KING COUNTY	Too much reliance on bus transit. Rail & light rail on dedicated right of ways will do more to reduce traffic congestion. Priorities should be on building longer distance routes first: i.e. routes Seattle to Bellevue, Issaquah, North Bend and Seattle to Redmond, and the northeast residential development areas as well as Olympia to Arlington along I-5. Concentrate on routes that get people to/from residence and their work areas. Use buses as feeders to rail for long distance.
EAST KING COUNTY	People on the Eastside want to get North and South and into Seattle. I would support light rail but when I commuted on Metro it would take me nearly 2 hours to get to and from work, from North Kirkland to South Seattle (4 hours!!). I have had it with the wild promotions of the less than fast bus service. Also what is this crazy idea that people are going to take buses to rail lines; Mayor Murray should not be listened to! You urgently need parking!
EAST KING COUNTY	Would like to see BRT in Kirkland connecting to Seattle, too. ST Express bus service to north Kirkland is minimal, would like to see longer hours and better access. I generally support the plan because, for a metropolitan area, we have very poor public transportation. But none of these plans will directly impact my use of transit because it does not serve the areas where I travel (live/work.)
EAST KING COUNTY	BRT from Bellevue to Renton should be replaced with light rail that would extend all the way through Tukwila and to SeaTac. South Lake Washington could then have a circle line for all communities in that region.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	I think that alternatives need to be looked into in the plans to run BRT from Bothell to Kirkland via the Kirkland Corridor Trail. There are very few mixed use running/bike trails in that area. My children often come and run with me on the trail; their safety and that of the many other children and adults who use the trail for cycling and running would be severely impacted by utilizing the trail for transit. I am definitely in favor of increasing transit from Bothell to Kirkland, but hope that existing roads, and BRT on 405 will be considered instead of the Kirkland Corridor. I also hope that light rail options may be considered instead of BRT for a more long term solution to our transit needs. Thanks.
EAST KING COUNTY	BRT are the least cost options and for the price of a mile of light rail, you could greatly improve bus service. We need reliable fast transportation. buses are the right way to quickly complete this. Then adding light rail. I oppose Levies that are perpetual.
EAST KING COUNTY	Focus should be put on adding and improving light rail services sooner instead of improving buses.
EAST KING COUNTY	Timing of light rail to Issaquah should be accelerated as there is already alternate bus options in the downtown area for mass transit.
EAST KING COUNTY	<ul style="list-style-type: none"> <li>• PLEASE DO PUT High Capacity Transit on the Kirkland portion of the ERC, the "CKC"</li> <li>• PLEASE expedite the environmental study between Bellevue and Bothell via the CKC</li> <li>• PLEASE ADD the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride along the ERC</li> <li>• I will actively work to SUPPORT ST3 in November</li> </ul>
EAST KING COUNTY	Cities outside of Seattle should be the first priority to help with congestion on I-5, I-405 and the bridges. Bellevue, Everett and Tacoma should be the first cities complete, not the last. Ballard should be completed last as there are already several buses taking residents to downtown Seattle from there. Focus on the areas that need it the most first, then address the areas that could use it for convenience.
EAST KING COUNTY	The opposition to having light rail on the Cross Kirkland Corridor has been loud, however, I believe that it would be beneficial and would like to see it stay.
EAST KING COUNTY	More taxes, finish this up faster.
EAST KING COUNTY	BE SURE TO MAKE RAIL LINE TRANSFERS ACROSS THE PLATFORM TO MAKE THEM AS EASY AS POSSIBLE FOR RIDERS.
EAST KING COUNTY	The Eastside, especially Issaquah and Redmond, are growing rapidly. I think ST should strongly consider moving Issaquah up from the 25 year completion goal to at least 15, if not sooner.
EAST KING COUNTY	Could the Rapid Bus line on SR522 from Bothell to 145th Street be Light Rail?
EAST KING COUNTY	Ideally I would want light rail connecting downtown Bellevue, downtown Renton, & Seatac Airport with stops covering Factoria and Renton Technical College.
EAST KING COUNTY	The Seattle downtown to Ballard line seems like the most significant project in the whole package by far. It should be prioritized sooner and with maximum quality (i.e. fully grade separated right of way). I'm also confused about the Redmond extension going to east Redmond before downtown. If feasible the other order

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	Relieve the major corridors (i.e. 405 and Lynnwood to Everett) before dealing with Ballard and W. Seattle. There are already a lot of transit options in the city, including buses, Uber, taxi, and biking. Getting cars off the freeways gets people in to the city and neighborhoods without clogging things up for those who live in the city.
