EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail Remove the environmental study between Bellevue and Bothell via the CKC Trail Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride If all of these are not removed, I will actively work to defeat ST3 in November
EAST KING COUNTY	We should make these improvements on a shorter timeline if possible, even if it will cost some extra money. We're facing a gridlock problem now, a global environmental crisis NOW, and there's an appetite for more people to use mass transit in any situation where it isn't exceedingly punitive to do so.
EAST KING COUNTY	I would like to see any LINK LRT expansion removed in favor of BRT expansion using EV buses. EV buses like Proterra seem to be a more economical solution today and has the potential to be much more cost effective over the 25 year window using EV, Autonomous Driving, and other safety measures that are coming online. I believe that the same amount of passenger boardings can be accommodated using BRT over LRT...please use our tax dollars wisely!
EAST KING COUNTY	Please keep mass transit off of the Cross Kirkland Corridor. Don't bother with any environmental studies. Spend that money elsewhere. The CKC's abandoned railroad ROW should remain a pedestrian-oriented (bikes and dogs too) thoroughfare. If on the other hand, mass transit is inevitable, then please limit it to light rail. Rapid bus transit is not tolerable. Thank you. Bill Hoover, Kirkland, WA
EAST KING COUNTY	Please keep rapid transit off of the CKC and on I405. I use the CKC almost every day to commute on bike and for walking and it would not be the same with busses on the trail.
EAST KING COUNTY	The Boeing Access road site is an easy win to bring both light and heavy rail together. It also provides access to the Museum of Flight, Boeing sites, and many other businesses in the area that currently are not served by rail in any way. I strongly urge the plan to consider doing this project as one of the first to be funded.
EAST KING COUNTY	Make Overlake & Issaquah a higher priority.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	I firmly believe the systems in place to get from south King county to Snohomish county are frustratingly limited. If the Sounder train from Seattle to Everett is the last item on the list, perhaps you could consider running the Sounder both directions in the mornings currently instead of only from Everett to Seattle in the morning and Seattle to Everett in the evenings. It's difficult to live south of Seattle and commute north, I believe a plan to expand direct routes, add an express bus or use the Sounder trains that are already running in the morning from Tukwila to Everett would be heavily used and appreciated by the commuters! Currently if you commute from Renton to Boeing Everett, you need to take the 101 into Downtown Seattle, then 512 to Everett, then the 8 to Boeing, this route is heavily trafficked in the morning and I believe more people would use transportation if you had a few routes that completely bi-passed downtown Seattle or stopped once on the way north. Thank you so much for your time!
EAST KING COUNTY	BRT investment needs to be increased on I-405. It should be thought of a light rail on rubber tires. The level of investment in BRT versus Light Rail makes no sense and the ridership numbers are not credible. For example light rail from Bellevue to Issaquah has a higher level of investment and higher ridership projections than the I-405 BRT project from Lynnwood to Renton serving 5 regional growth centers. The level of investment in this plan seems to have more to do with the make of the ST Board Members than an objective plan that serves the region.
EAST KING COUNTY	Re-focus on light rail and drop the Bus Rapid Transit projects immediately. I can not support the continued wasteful focus on Bus transit projects that are inefficient, only add to congestion on are roads abd consume more dollars without commensurate benefit
EAST KING COUNTY	Ballard to downtown should be the priority, followed by West Seattle to downtown. All other components should be secondary to these two.
EAST KING COUNTY	Bring light rail, Renton to Bellevue
EAST KING COUNTY	Buses are not even close to as desirable as trains. Rail is necessary for service reliability. Expand rail.
EAST KING COUNTY	25 years is far too long for some of these projects, particularly the eastern corridor even out from issaquah which is exploding in size. The timeframes need to be accelerated.
EAST KING COUNTY	Replace the I-405 toll lanes with light rail
EAST KING COUNTY	I strongly support including bus or rail commuter transit on the Eastside Rail Corridor between Renton, Bellevue, and Kirkland in addition to developing it as a ped/bike path.
EAST KING COUNTY	25 years for issaquah light rail is too long. Much too long. The east west traffic over 90 would be greatly alleviated by having reliable mass transit. We need light rail to the east side sooner than that.
EAST KING COUNTY	My gut tells me there should be shuffling of time lines as well as more speed in completion. 405 is extremely needed especially with the tolling that is removing capacity. I'd think link light rail would be best there especially if it could connect to existing system in the long run.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	"rapid bus routes along 405" and the bus routes in general should be scaled back and stable light rail routes should be implemented instead. Would love to be able to get from Redmond to seattle or southcenter or Issaquah on a reliable schedule with 1 or no transfers. East side residents have seen so many bus routes get axed over the years that we can't get anywhere in a reasonable amount of time using public transit. id sooner fund heavier light rail development and have bus lines that can run shorter routes with more reliability. It currently takes about an hour to get from east Bellevue to downtown Bellevue if you don't get in the bus at just the right time. That's unacceptable. I'd rather have a subway-system equivalent at or above ground level (though preferably below where possible) running as quietly as possible on electric.
EAST KING COUNTY	Need to accelerate the schedule of the ST3 plan as we have thousands of people moving into our area now and we need the transportation assistance ASAP!!
EAST KING COUNTY	I would like to see the Issaquah Light Rail moved up in the proposed schedule
EAST KING COUNTY	25 years is a long time to wait for a Bellevue to Issaquah route, if I have to wait that long then it becomes hard to support. I would be more supportive of 5 years.
EAST KING COUNTY	Add light rail to the 522 line. There is way too much traffic there, especially after the 520 bridge became a toll bridge!
EAST KING COUNTY	Adding more bus service, whether rapid or not, does not seem to be future looking. Please look at data on the expected growth of businesses in the Puget Sound region, especially large technological companies bringing in an exponential growth in the number of people living in the region and commuting to work every day. Seattle and Eastside are projected to the next Silicon Valley. Please look at data that shows the number of vehicles on the road as a ratio of the population. If there is a burst in population, the number of vehicles on the road will grow exponentially. In such a scenario, buses, rapid or not, can't compete and would necessarily be slow. The only way out of this is to fund more light rail expansion than what is proposed and get it done faster. Even at the cost of not adding anymore bus service. By the time the bus expansion is done, it won't be effective due to the surge in traffic. I rather wait just for light rail and know that my money is going there and it will arrive faster if I don't have to fund bus service.
EAST KING COUNTY	I would like to see them accomplished faster! I would pay double or triple in taxes to have these services implemented sooner. They greatly increase the quality of life in an urban area and Seattle is WAY behind most other major cities worldwide in the area of public transportation.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	<p>In my opinion, light rail needs to be the one and only priority of this project. As noted, light rail is reliable and convenient transportation that takes buses and other vehicles OFF the road. People like me will not opt into bus transportation because buses still get stuck in traffic, are overcrowded, and they are unreliable when it comes to being on time. We don't need additional bus services on the road, and I certainly don't want a gigantic bus blowing past me on the shoulder of the freeway. Putting funds towards making the current bus system better is a waste of time and public money that could be better spent on shortening the timeline for light rail and actually solving the commute problem. A complete comprehensive light rail system is what the city/region truly needs, and the success of the UW/Capitol Hill line has shown that people will use it, when its available.</p> <p>I am somewhat bias because I live in the East Renton Highlands, but I think a light rail line that comes across the I-90 to the Eastgate stop should then turn south and travel along the 405 through Newcastle, Renton, and meet up at the Tukwila station completing that circle. Stops could be at the current park and ride on exit 9, the VMAC on exit 7, the Landing on Exit 5, and then travel through downtown Renton with a stop or two toward the Tukwila stop on the current line. Primarily I support this idea because this section of the 405 is only three (3) total lanes (including a carpool lane) vs. the five lanes it becomes just north of the I-90 interchange moving north. Additionally, more and more SR-167 traffic is taking I-405 to bypass going through the city on I-5. Renton is the next boom town of this current Seattle area growth cycle, and in my 2 years in this part of the city, I have personally experienced more traffic congestion as people are pushing further and further out to find affordable housing.</p> <p>I am not an expert on the situation, but the I-90 seems more primed to incorporate light rail right now than the SR-522 since in theory, you could just use the express lanes for the track, but I would hope the future of light rail goes around Lake Washington in its entirety serving all of the commuters in the communities northwest, north, east, and south of the lake, and across both the 522 and i-90 bridges.</p> <p>I would still support the light rail expansion at the proposed timeline above, but in 22 years, I will basically be retired, and the problem will be so much worse than it is even now. We need light rail as fast as we can build it, and the cost is worth it. We are one of, if not the fastest growing city in the country, and our decision in the 70's is negatively affecting us now! We should be able to charge a fee to new residents applying for ID's and licenses when they move here since they are part of the reason traffic has become so bad. I would gladly pay \$17/month in extra taxes to have a fully functional light rail system. I would also HAPPILY use</p>
EAST KING COUNTY	<p>Putting light rail into Issaquah that requires riders to go into downtown Bellevue and transfer in order to get to Seattle is a poorly conceived plan that will make riding light rail totally unattractive to me, and undoubtedly to a very large number of others.</p>
EAST KING COUNTY	<p>Rethink the timeline for Ballard and West Seattle.</p>
EAST KING COUNTY	<p>When considering Seattle Center stops please include stops for the business on Elliott like Holland America, F5, And the new Expedia Building.</p>
EAST KING COUNTY	<p>Issaquah needs light rail sooner than 25 years.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	Renton, and particularly the neighborhoods outside of downtown are not served by this plan. Light rail does not come close to us, and access to light rail to get into Seattle is not addressed in this plan. I believe few of my neighbors will vote for this, as we are left out.
EAST KING COUNTY	Timeline it too long, more investments to speed this project up and increase investment to provide faster high quality trains.
EAST KING COUNTY	Must hold vendors responsible for bids so burden of additional project costs are not passed onto taxpayers. I would highly consider adding light link rail to 520 bridge starting NOW because this is going to turn into a case of "we should have done this a while ago" just like this project has turned out to be.
EAST KING COUNTY	<p>Just reading this makes my blood boils.</p> <p>1/ The timeframes are insane. Just as 405 was never adequately done &amp; when it finally opened, it quickly became overloaded;</p> <p>2/ it's beyond me that we can't have the missing light rail link on the Eastside. Why is ST not including a proposal for a logical link between Tukwila, Renton, Bellevue and on to Redmond &amp; Woodinville??</p> <p>It is one of the worst corridors NOW, how do you expect that it'll look in 5 years? Let alone, 8, 17 or 25 at the rate of construction going on in the Renton area &amp; elsewhere??</p> <p>The current bus system requires that I spend twice as much time commuting, or about 1.5 hrs one way for only 11 miles, with going to the Transit Center, drive up &amp; down 405 stuck in traffic, walk to the office! Adding more buses on 405, how do you ever expect that they'll access &amp; exit a freeway that is completely congested most of the day, except for a couple of hours?</p> <p>The Kenndale area of Renton with houses on both side of the freeway is a complete bottleneck; brand new big houses were recently built just above 405 past Renton, nearing the Coal Creek Pkwy exit.</p> <p>On the other side, it's the rail corridor &amp; expansive homes on the lake.</p> <p>Where will those buses go?? Adding to the awful congestion?</p> <p>Your plan isn't one, it's completely insane, unfeasible &amp; I wouldn't trust you to spearhead &amp; manage the projects within reasonable budget &amp; timeframe.</p> <p>Back to the drawing board!</p> <p>We NEED a light rail link from Renton along Lake Washington going N &amp; of course linking to Tukwila.</p> <p>Renton is currently building 730,000 sq of mixed office space, hotels, living space at Southport, with a Hyatt hotel &amp; Convention Center, &amp; a second hotel across the street also currently in construction.</p> <p>How will the 1,000s of people working there or attending conventions move in &amp; out of there onto 405???</p> <p>That part of 405 is already a parking lot mornings &amp; afternoons.</p> <p>Be real, what you're proposing is off the mark completely!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	East side light rail access should be moved up the timeline to be sooner than 25 years. It needs the rail system in the next ten
EAST KING COUNTY	Bellevue-Issaquah line should be either extended to Kirkland (or UW or Ballard) or changed to an Issaquah-downtown Seattle line. Why replace one section of 555/556 (which doesn't even run all day) when you could replace 554 (an all day route) with fewer miles of track?
EAST KING COUNTY	Direct connection from Issaquah to Seattle is more important to me than Issaquah to Bellevue. Is it possible to plan connection to Seattle south of Bellevue (maybe through Richards Road station)?
EAST KING COUNTY	As much as I support transit development in general -- including previous YES votes for ST1 and ST2 -- I will not be able to support ST3 as it now stands. Those of us on the I-405 corridor north of Bellevue have waited patiently for this phase and yet, ST3 does almost nothing to support transit access to/from Kirkland. The 85th ST freeway station is expensive and practically useless. Incredibly, ST3 funds an expensive LRT extension to low-density Issaquah but completely ignores HCT to Kirkland. ST should reconsider its dismissal of Kirkland's BRT proposal on the Eastside Rail Corridor. Instead of wasting money on the 85th ST freeway station, ST should fund an HCT connection (BRT or LRT) from the Willburton station to the South Kirkland Park&Ride.
EAST KING COUNTY	Light rail service expansion should be prioritized over all else.
EAST KING COUNTY	I love the plan, overall, however I feel that it is paramount to start the Ballard/West Seattle extensions ASAP!  As an aside: I'd like to suggest that shutting down the Viaduct for 2 weeks means we can shut it down indefinitely without replacement. Use the monies to make the water front great and maybe use the surplus to start the Ballard/West Seattle extensions early (I'm aware that this plan is currently not possible due to how federal and state monies are earmarked, however if there's one thing I've learned through the tunnel process: anything a politician wants, they will get). The tunnel has been a disgrace since the second time it was (rightfully) voted down by the people.
EAST KING COUNTY	Add: Link station at NE 51st in Redmond, Drop: Issaquah, Drop: Light-rail south. Long transit should move to commuter rail, vs. Light rail (i.e. from south sound)
EAST KING COUNTY	I would prefer light rail along the I 405 corridor and would reallocate the money designated for the environmental study of the Cross Kirkland Trail to that project.
EAST KING COUNTY	Kenmore and the North end of Lake WA have been negatively impacted by prior projects: the toll on 520 and the mess that was made of 405. Priority on servicing the impacted area should be the highest by implementing BRT in the 522 corridor early. Also, inclusion of a BRT along the 522 corridor to Northgate Transit Center should be included.
EAST KING COUNTY	Project should focus on getting the light rail up as soon as possible with minimal cost. Adding additional buses and other "plans" slows down the process and waste funding. If the light rail can be build faster, commuter will use it. That will significantly reduce traffic in the road. If people have assess, they will make it participate.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	Everett before anything more in Seattle. Seattle has sufficient options for now. Lynnwood and North do not!
EAST KING COUNTY	Light rail should be used everywhere the plan shows rapid bus, especially 405 corridor and 522. A 25year plan that does not completely circle lake Washington with light rail is incredibly short sighted. Rapid transit buses should be implemented immediately and used only as a temporary solution while light rail is under construction. The timeframe for this proposal is ridiculous. For this amount of spending we should see it complete within 10 years maximum. We also need more accountability for this spending. I do not trust sound transit with this much money
EAST KING COUNTY	Strongly recommend altering the Lynwood-Everett route to follow the I5 alignment to save money & reinvest that into BRT service to Paine field area via 526 to connect Paine field to both SWIFT on 99 and Link on I5. Phasing: early deliverable support for SWIFT 2, then build out the LRT, and have BRT on 526 go live when LRT reaches Everett Mall.  Strongly recommend serving Ballard via UW. Mitigate lost service to Uptown by supporting Center City Seattle Streetcar extension. Fund Ballard-UW by eliminating Interbay routing, and fund new downtown tunnel only to Seattle Center station but place DT tunnel at end of ST3 phasing to support all other projects first. Finish building out the system, and then have the entire region fund the 2nd DT tunnel at the end of ST3. Perhaps fund EIS for Seattle Center to Ballard but not engineering & construction.  Thanks!
EAST KING COUNTY	PLEASE DO NOT USE THE CROSS KIRKLAND CORRIDOR FOR BUSES OR LIGHT RAIL
EAST KING COUNTY	Access to/from West Seattle should be prioritized higher, with bus connections to Burien and Renton. BRT on I 405 is supported, but any mass transit on the Cross Kirkland Corridor is not supported.
EAST KING COUNTY	Why not use the rail lines that used to run all around the eastside? The dinner train had the ability to run from woodinville (and farther) all the way to Renton (and farther). The law required that the trail that now exists was REQUIRED by law to be turned into mass transit. Why not use those existing lines and add that to the current light rail
EAST KING COUNTY	We will not vote to increase taxes for any of these projects. We are sick of seeing empty busses and vanpool vehicles with tinted glass hiding one or two riders in them go by, and this is the majority of what we see.
EAST KING COUNTY	Light rail within Seattle communities like to Ballard and West Seattle need to happen before 22 years from now. That's ridiculous.
EAST KING COUNTY	Please make Sound Transit Buses Safe Place Friendly for LGBTQ individuals so that they are able to feel more comfortable. Thank You

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	This takes way too long. By completion technology will make the plan obsolete. Buses are an obsolete technology as autonomous vehicles will be the norm in 25 years.
EAST KING COUNTY	1. Should include extra cars (8 and 10 car) for south Sounder service. 2. Issaquah to Bellevue LRT line should not cross I-405, but instead stay east of 405 and connect at Wilburton Station.
EAST KING COUNTY	Make Issaquah light rail a higher priority and extend it to Issaquah Highlands.
EAST KING COUNTY	I won't support any option which includes study of light rail or BRT on the CKC. In fact, I will do what I can to help defeat this ST plan based on that alone.
EAST KING COUNTY	The timeline is so long, and the needs are so great at present, that the Kirkland to Seattle situation really needs improvement, quickly. There are so many new bus riders from Amazon, just in the last 2-3 years, that the bus trips (e.g., 255) are dangerously overloaded. We know they are from Amazon because they get off the bus at the first stop (by REI) on Stewart (and they were their badges and bring their dogs). Plus routes were cancelled, like the 265, so there are fewer options to get to Seattle from Kirkland.
EAST KING COUNTY	Light rail from Lynnwood to Renton along 405. Roads are too congested and rapid bus is not the answer.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	<p>Thank you for the opportunity to provide feedback on the proposed plan!</p> <p>My wife and I are staunch supporters of the creation and expansion of light-rail throughout the Puget Sound. We have voted in favor of every initiative offered to the public for this improvement.</p> <p>I heard on the radio that the proposed plan is described as "equivalent to San Francisco" - "A regional transportation solution" Having visited San Francisco many times without arranging for a rental car - I am very familiar with what San Francisco offers and would be delighted if the ST3 plan lived up to this claim!</p> <p>However, in reviewing the ST3 plan it is very obvious that only 3 (of 4) quadrants of the Puget Sound are being offered light rail. Why is it that the South East quadrant continues to be bussed - while all the other quadrants receive light rail?</p> <p>I have first hand experience in traveling on the I-405 corridor, every weekday, from Renton to Everett and back, for over 2 years. On the worst days (typically Thursdays), a one way trip takes nearly 2.5 hours. On average my one-way travel time is 1.75 hours. This has improved somewhat with the additional Good-2-Go lanes installed North of Bellevue, but the roadway from Bellevue to Renton is really a problem.</p> <p>I am seeking your consideration for revising the ST3 plan to add Light rail along (or adjacent to) the I-405 corridor from Renton to Bellevue. Such a change would demonstrate equal (not second rate) service to the South east quadrant.</p> <p>In evaluating this request, please consider the traffic snarl that is present every day from downtown Bellevue to Renton (I typically have to sit IN-GRID-LOCK from downtown Bellevue to the I-90 junction for 35-45 minutes).</p> <p>If this transportation were available - we would choose to use it Daily instead of driving our cars.</p>
EAST KING COUNTY	go with electric or alternative buses - much less expensive to run and maintain, much more adaptable to future needs
EAST KING COUNTY	Increase priority of Ballard. Hasten timeline for BRT on I-405 to "within 2 years"--it's a BUS, this should be easy and quick. Add rail to 520.
EAST KING COUNTY	BRT is a joke. I will only support a plan that circumnavigates Lake Washington with a light rail spine which is fed by bus or other surface street options. Start with that, and I'm on board. Otherwise, forget it.
EAST KING COUNTY	Please prioritize the light rail to Issaquah higher on the priority list.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	Too many transit solutions are suggested which will be too costly. It should be done in phases implementing those phases first that will have greatest impact. That is likely bus service and extending the Sounder corridor. Light rail takes forever to build and burns money both before and after the trains are running. We are subsidizing every passenger for every mode of transportation and that is wrong. I especially oppose this because there is little thought given to east of Lake Washington but you sure want our tax dollars.
EAST KING COUNTY	Bus service from the NON SEATTLE, areas of Puget Sound needs to be improved so the residents can use the service with reasonable times and reliability. At present everything is centered around Seattle and the service in the outer parts of King County is terrible. Good, frequent, dependable bus service will give people a reason to use the service. It takes far less investment to concentrate on bus service rather than light rail. Any service must include adequate parking so the people who use it have a place to leave their cars since it will never get to the point of direct access from rural or semi-rural addresses. Mass transit would be used if the service was reasonable, at the present time it is not, NOT, a reasonable alternative to a POV. The only viable alternative to building roads is to provide transit that is reasonable in cost but most of all convenient to use and that doesn't mean spending hours getting around the County. Yes, there will be a period, a learning period, before the average commuter will use the transit. That period takes investment, but eventually will be a self funding operation. Another thought is to stop the WASTE that occurs with every government controlled project, road, light rail, parking etc. to "beautify" the surroundings. The maintenance cost of these so called improvements is a travesty. Let's move people not build monuments.
EAST KING COUNTY	I would consider using light rail going up and down 405 corridor to ease traffic congestion. Connecting cities from Everett to Bothell to Redmond to Bellevue, Issaquah and Seattle. Please take a reference from other light rail system in UK, Hong Kong, Tokyo. Completely using light rails without having to use bus transit. It is more efficient and time saving to link up cities.
EAST KING COUNTY	More parking needs to be added at all eastside lots. Most lots fill up in the early morning and give many riders no other option than to drive themselves.
EAST KING COUNTY	I would prefer investment in extending light rail to Kirkland over just busses. We really need a single integrated system rather than several different systems. I need the ability to go from Totem Lake to downtown Seattle, for example, and coordinating that between bus, brt, rail, etc puts me off enough that I'll probably end up driving instead.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	Where is Renton in all this? We get a parking lot and a bus stop and that's it? We are gridlocked on 405 and there is no other option but a bus stop in South Renton that I have to get on 405 to access? I live in North Renton and it'd be faster just to drive north through the gridlock than to drive south through the gridlock to get on a bus that goes back into the gridlock going north to get to Bellevue. It's so ridiculous it might be comical if it weren't so short sighted. This plan ensures that Renton will be left in it's own version of road hell while everyone else can move smoothly. I've wanted to use public transit to get to my job in Issaquah for 5 years, but the fastest bus trip takes 1 hour 45 minutes each way. Or I can drive it in 15 minutes. You guys don't see a problem with that? Why should I vote for more taxes for a plan that doesn't benefit the 4th largest city in King County at all? Seattle seems to be your hub, but Bellevue is a better hub. Or why not have both? This plan is ridiculous and I will vote against it.
EAST KING COUNTY	I live in the Renton Highlands. Our family is active in the Kent and ISSaquah areas every day. Why is this taking 8 years to do anything? Why isn't Renton part of Light Rail expansion? We are a HUGE hub, for traffic. Have you seen how many people DRIVE through our neighborhoods from Kent to get to ISSaquah. IT's frickin' ridiculous! Our transit system is a joke. I wanted to show our kids how to use and to get to Issaquah it takes 2 hours on the bus. And we live in Issaquah School District. Fundamentally we are wasting time and money. We need to address the hardest hit areas ASAP! This needs to be done NOW
EAST KING COUNTY	The route down the I-5 Corridor from Everett to Seattle needs to be a top priority - not one waiting 30 years. The highway congestion and relief will not only support the workforce but those that are moving north and working in Seattle each day. Snohomish County offers affordable housing for those that work in King County and should be the priority. The growth in Snohomish County also offers jobs as well. The priorities need to be re-adjusted.
EAST KING COUNTY	Light Rail should go around the lake (i.e. Tukwila to Renton to Bellevue), not over the lake removing car lanes.
EAST KING COUNTY	It is too expensive and I don't trust the money will be used efficiently
EAST KING COUNTY	Construction needs to happen faster. You are asking me to pay \$25,000....TWENTY FIVE THOUSAND DOLLARS....before I will get ANY benefit. Totally unacceptable!!!!
EAST KING COUNTY	<p>Ballard to downtown line must be grade separated to avoid the mistakes of current Central Link alignment in the Rainier Valley (delays, collisions, etc.).</p> <p>East/west connections that are currently poorly served must be studied such as Ballard to U-District (and possibly continuing over 520 to Redmond and/or Bellevue) and Metro 8.</p> <p>Eastside rail projects require enormous capital investments for lower ridership than some of the more urban projects. Because of that, BRT/express bus service may be more cost effective in certain suburban corridors while serving multiple arterial routes for the same cost as rail.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	I think more emphasis should be made for the current bus transit system, as much as all these future plans sound great and would be much needed for our ever growing population, we also need to look at what we can fix now. Parking at transit centers and park and rides need to be improved. A lot of the stations/transit centers do not have enough stalls to accommodate riders. Either expand them or make more plans for when building future stations that you make more stalls and levels. If you want lots of people to utilize these systems then make room for them. Hire more bus drivers so we can add more routes back and not have buses that are full and don't run as often during peak times. Of course more drivers will be on the road when they try to get to the park and ride or transit centers and they don't have a parking spot, so let's focus on what improvements can be made to expanding what is already in place.
EAST KING COUNTY	I'm willing to pay higher taxes now to speed up the timeline that light rail gets done so we can finish everything and under 15 years.
EAST KING COUNTY	Extending the light rail all the way to Everett and Tacoma makes no sense and is in stark contrast to known good practices in urban planning. Light rail is far too slow for those long distances. Commuter rail is best and far cheaper. The light rail should be focused on servicing the 15-20 radius around Seattle. The Ballard link is already late and should be fast tracked. ST3 should also be targeting a loop around Lake Washington and relieve pressure on 405.
EAST KING COUNTY	Provide voters the opportunity to decide whether to pay increased costs for expedited construction schedule. 25 years is too long to wait for completion of some of these projects.
EAST KING COUNTY	BRT should be in middle of 405 between Bothell and Renton; BRT from Issaquah to South Bellevue light rail station makes far more sense than two light rail lines into Bellevue paralleling each other; 405 BRT needs another stop at the landing in Renton.
EAST KING COUNTY	Yes to Bus Rapid Transit on I-405; No to Environmental study on the Trail, instead do a study of light rail on I-405; No to Mass Transit from Bellevue Wilburton Station to S. Kirkland P&R; and No to High Capacity Transit on the Trail.
EAST KING COUNTY	Change the bus line to light rail from Renton to Bellevue. Expedite all projects, as we are already way behind in our mass transit options.
EAST KING COUNTY	PLEASE bring light rail to the Eastside. Ballard and West Seattle gets light rail but 405 corridor and 522 don't? That doesn't make any sense. Until you adopt light rail as the future plan for all areas, I don't know if I can support your measures.
EAST KING COUNTY	HCT environmental study from Bothell to Bellevue via ERC/CKC needs to include best alternatives for HCT than the CKC. Local stakeholders need to be vetted in determining scope of study.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	<p>Issaquah is amply served by I-90 and Redmond is doing better than I-405 with the 520 investments already made but there are very little if any transportation benefits for Renton &amp; Southeast King County. The I-405 corridor especially south of I-90 needs far more service sooner. If not light rail at least provide dedicated true BRT on I-405 with new dedicated lanes and cut back on some of the Light Rail to areas already better served with existing traffic lanes using BRT instead. More true BRT would provide more and quicker relief generally than the Light Rails. Find a better financing plan to get this done more timely.</p>
EAST KING COUNTY	<p>I'm highly skeptical of any "improvements" to the bus system. I think using shoulders on freeways/highways during peak traffic is dangerous and an unacceptable solution. Our transit system is pathetic and embarrassing. I get the short term relief of adding and "improving" the bus transit system, but light rail is really the only sustainable long term solution. As a resident of unincorporated King county, our access to any public transportation is a joke. If you want people to use it, especially people commuting from the suburbs into large business centers, you have to put in light rail, period. My family rarely goes into Seattle because a) public transit into the city takes forever (90 min +) with multiple bus transfers (even when leaving from a park &amp; ride) and b) if you drive, you're paying ridiculous tolls and parking to shave 30 minutes off the drive. So, we just don't go, which is what I think the Seattle city council wants anyway, no one to visit the city ever.</p> <p>I'm not thrilled at paying \$200 a year for a transit system I won't use, nor will my family. I just don't see how the proposal improves use of the bus. Comprehensive light rail is the only good long term solution.</p>
EAST KING COUNTY	<p>Bart or sound transit not to NE 145 St. to long time line, why not go to Roosevelt station, or Northgate station.</p>
EAST KING COUNTY	<p>Don't take the train to Paine field          Take the quickest and easiest route and use rapid transit to get to Paine field. It makes perfect sense because people will use the train either way so you should jump at every opportunity to provide service quicker</p>
EAST KING COUNTY	<p>Rapid Bus Transport plans for Bellevue/Bothell/Kirkland/Bellevue should be replaced by lite rail and/or Sounder rail plans from the Eastside to SeaTac Airport. We need similar service on the East side as is provided by the Bay Area Rapid Transport (BART) in the San Francisco Bay Area.</p>
EAST KING COUNTY	<p>I do not understand why Renton is not considered in the future light rail plans. Also, are there plans to expand parking facilities for better access to light rail. There is never any parking spots available at the Tukwila light rail station during the weekdays.</p>
EAST KING COUNTY	<p>I think focusing primarily on light rail is most important. While it is the most expensive, it is the best option to reduce traffic congestion while simultaneously providing viable time-saving public transit options vs. current bus service that typically means wasting large amounts of time on a bus. You have to make mass transit time-efficient otherwise people like me will not use it.</p>
EAST KING COUNTY	<p>Consider scaling down the plan a bit. For example, duplicating most of the proposed light rail spine with Sounder wastes money.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	Rail from Bellevue to Issaquah is not smart. Take the line to eastgate area and either switch trains to go to Seattle or switch trains to go to Bellevue. I can't support a line where one would go up to the hospital then down to go across I-90.
EAST KING COUNTY	Emphasize bus rapid transit, which can be implemented sooner and for less money. It would be a shame for BRT to be scuttled due to public's lack of appetite for large, costly infrastructure and delays associated projects like the the 99 Tunnel.
EAST KING COUNTY	Seattle-Ballard should be early priority. Paine Field better served by BRT at this time.
EAST KING COUNTY	I think a lot of the assumptions and plans built into this plan are wrong-headed. I'm an engineer who's worked in transportation, and to be blunt, I think a lot of the plans (at least in connecting Seattle to the inner-ring Eastside and within the inner-ring Eastside) could use a lot of work.
EAST KING COUNTY	You need to step up the time line. How about taking the trails back from "rails to trails" the original intent was to preserve those right of ways for the future. Our highways suck, you need mass transit now not 20 years from now. Also do away with the "rich People" toll roads or Lexus lanes.
EAST KING COUNTY	I am strongly supportive of light rail expansion, but 25 years to connect the major cities is too little to late. This plan should have been done 25 years ago. Does your plan account for population and traffic growth over the next 25 years whatever you are designing today will be outdated in 10, 15 and 25 years. So glad the next generation will enjoy 20th century technology for commuting, by the time I can utilize I will be retired.
EAST KING COUNTY	I think the projects may need to be re-prioritized. There's a greater need to extend service AREAS as opposed to making current routes faster. That seems like a very low priority to me. We need to focus on making locations more accessible as the housing market continues to become less affordable - I'm less concerned about getting to a location 10 minutes faster and think that's a waste of taxpayer money.
EAST KING COUNTY	The plan continues to be Seattle-centric, ignoring the fact that many people in the region do NOT work in Seattle proper. The heavy traffic on the Eastside, channeled into the very narrow corridor of I-405 requires a re-evaluation of this plan. Acknowledging that the Eastside portions of this plan are inadequate for the traffic issues that exists is mandatory.
EAST KING COUNTY	The Everett Lynnwood link should be in states faster. I have a hard time voting for something that I won't use for 25 years, if that.
EAST KING COUNTY	More of an investment should ve made in eastside/405 bus rapid transit including exclusive shoulder use and on/off ramps to allow it to function as a cost effective light rail on wheels. Cancel route to issaquah, not enough ridership and too much cost. Look into adding renton and kirkland light rail.
EAST KING COUNTY	Focus should be on light rail. light rail doesn't get stuck in traffic.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	Yes, Bus Rapid Transit on I-405 only No, Environmental Study on the Trail, instead do a study of light rail on I-405 No, High Capacity Transit on the Cross Kirkland Corridor Trail
EAST KING COUNTY	Too slow. Too expensive. Nothing to improve roads for the majority of us who need to drive when and where we choose and w/o passengers. Replace some buses with point to point on demand modes (taxis, DART).
EAST KING COUNTY	Focus should be on routes with highest ridership instead of one's that are almost as expensive with low ridership better served by bus, ie Issaquah. Cost overall is too much. Renton is huge but continues to get nothing even though it is close to light rail connection.
EAST KING COUNTY	ST3 should look at population growth historically and reprioritize the timeline distribution of projects. Obviously the 405/5 corridors need immediate assistance. If the current problems there are neutralized, expansion to the rapidly growing Redmond and Issaquah areas can be placed on the fast track for rail systems in the 12 year plan.
EAST KING COUNTY	Support light rail extension to Redmond Town Center. Connection from Bellevue to Issaquah should be Bus Rapid Transit NOT light rail. Oppose rail and BRT on Kirkland Corridor, but fully SUPPORT BRT on I-405 with good connections at Totem Lake and 85th Streets in Kirkland among others. BRT projects and heavy rail extensions north and south should be given top priority given that they can be accomplished more quickly and cheaply using existing roads and rail infrastructure. Light rail extensions, given large cost and ROW acquisitions, etc. should be a lower priority. Also consider dedicated busways like in Pittsburgh PA. Cheaper than light rail and has advantage that buses can run on regular streets too. Can equip metro area with THOUSANDS of energy efficient, low polluting buses for cost of a couple of light rail extensions. Bag new downtown Seattle tunnel proposal and other items that add tremendously to transit costs and instead direct efforts elsewhere such as heavy rail extensions north and south and more BRT on main freeways and arterials.
EAST KING COUNTY	Extend all the way north to the S. Kirkland P&R as has been discussed, and then complete the study of how to use the rest of the ERC up to Bothell, and down to Renton
EAST KING COUNTY	North to south plans are far more urgent than any east to west
EAST KING COUNTY	Light rail to Bellevue/Issaquah should be implemented first.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	The timeline for running link light rail up to Everett is unacceptable. A 25-year wait to connect King and Snohomish County's largest economic centers will hinder the economy and traffic continues to inch closer to a standstill. At 31 years old, I will not see a benefit to commuting by any means other than a car to get to Everett until I am 56 when the light rail is expected to open. Why is Everett such a low priority for Sound Transit where places like Ballard will have already completely constructed light rail to commute several miles to downtown in addition to Bus Rapid Transit which is already set up. The largest commute times will hinder the development of Everett's downtown and commercial interests while Seattle continues to gentrify and push families like my own closer to Everett where they can afford a home over a studio apartment to house family members. Please re-consider the 2041 date to connect to Everett. Snohomish County's economy depends on it. Thank you.
EAST KING COUNTY	I strongly believe that just based on the estimated ridership that the Ballard extension should be given first priority simply for its miles to ridership ratio. This would bring in additional capital and support for the next highest ridership projects.
EAST KING COUNTY	BRT services, especially along the 522 corridor, should take a priority over other bus improvements as they will have a more dramatic impact on traffic in the short term as the longer scope projects are slowly implemented.
EAST KING COUNTY	Why is LRT not an option on I-405? I understand the I-405 master plan decided BRT over LRT as the mode choice, but I feel like that was a decision made based on jurisdictions along the corridor being less supportive of rail at the time. Maybe that Master Plan should be revised today with an opportunity for current public input. If investments are being put into a high-quality BRT line on 405 why not just make the investment in rail? I'm sure the cost wouldn't be much higher and the quality of transit would be better.
EAST KING COUNTY	The timelines proposed look a little too futuristic. These improvements in the public transportation are a necessity TODAY. Without a reliable and quality cost effective public transportation system congestion and pollution are just problems worsening in a daily basis.
EAST KING COUNTY	The proposed plan provides almost no benefit to the Cities of Kirkland and Renton, yet the citizens would be expected to help pay for services in other cities which they may or may not benefit from.
EAST KING COUNTY	<p>More than anything else, I want to see the Rapid Ride along I-405 replaced with Light Rail, preferable through urban areas, either elevated or in a tunnel, or with bus along a dedicated corridor, like the cross Kirkland corridor. Many people support the Cross Kirkland Corridor, even if their voices aren't heard.</p> <p>Also: MOVE THE BUILDING SCHEDULE UP. Work with the state to expedite permitting and land acquisition. We need this system built faster. In more like 15-20 years.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	<p>I believe we have general positive support for Light Rail in the Puget Sound. We also have several community groups and activists supporting Light Rail. Sound Transit should take advantage of this positive support and build the Light Rail Spine faster.</p> <p>For the Light Rail within Seattle, pass along the responsibility for implementation to SDOT (i.e. First Hill Streetcar). For the regional/intra-city Light Rail lines, why not start the environmental work, alignment, design, etc for all the Light Rail simultaneously after ST3 passes?</p>
EAST KING COUNTY	<p>Massive cost and time required for light rail cannot be justified as, in the time needed, it is probable that, as is already under way in the East, the Uber and Lyft concepts will be developed to permit direct commuter/commuter connections, rather than via driver. By the time ST3 is complete, it is probable that this will have been developed to the point where commuters will arrange by app for direct transport from their front door to their destination, probably by electric - and perhaps driverless - vehicle, together with all those with a similar requirement, as combined by computer. The life expectancy of this massively expensive rail system will be terribly short</p>
EAST KING COUNTY	<p>Light rail to Redmond should be completed in less than 8 years. The region has been rapidly growing with many commuters to Bellevue and Seattle. Efficient public transport is the only way to alleviate the traffic and current commute times for working people.</p>
EAST KING COUNTY	<p>Not sure plan addresses low income communities most in need of transit. Timeline for BRT is TOO slow.</p>
EAST KING COUNTY	<p>Kirkland, Bothell, Woodinville, Kenmore and Lake Forest Park are not served. Why on earth would we vote more taxes for a service that offers our area more infrequent and unreliable bus service?</p>
EAST KING COUNTY	<p>GRADE SEPARATE BALLARD</p>
EAST KING COUNTY	<ol style="list-style-type: none"> <li>1. Sound Transit should focus on high quality, grade-separated rail.</li> <li>2. Stop funding parking spots!!! If the cities want to do that, let them.</li> <li>3. Stop with this low-ridership BRT stuff---specifically the I-405 BRT. I'd much rather have you build a short, but high quality, *grade-separated* extension of Link from Bellevue toward, say, Kirkland.</li> <li>4. Stop with these stupid I-5 aligned rail segments. This is related to point #2 in that future ridership is permanently crippled because TOD does not occur around freeways. I realize I-5 alignments are politically expedient, but you're forever damaging our regions future growth. I strongly feel that Sound Transit overestimates the importance of these suburban concessions.</li> </ol>
EAST KING COUNTY	<p>I would like to see separated/dedicated BRT lanes instead of light rail. BRT can carry more people, at less cost, and with more flexibility. Dedicated and separated lanes would ensure travel time reliability.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	<p>The only way to build light rail that meets the ST claims of frequent, reliable, and consistent is to build grade-separated rail. This is essential in order not just for the new lines to perform, but for reliability to remain high throughout the entire system. If mitigations can be put in place, such as improved BRT infrastructure, I am willing to wait the extra time for rail that is ultimately done correctly as an entirely grade-separated line.</p> <p>As reliability on light rail is an asset for the entire region and not just the areas where new lines are constructed, I ask that sub-area funds from ALL AREAS be available for regional projects such as the new Downtown Tunnel. Light rail from every sub-area will benefit from this infrastructure, and the funding mechanisms should reflect this.</p> <p>At the Seattle ST3 open house, it was mentioned that congestion won't decrease, we can only do our best to provide alternatives so that it doesn't get worse. With this insight, it is clearly important that we continue planning for even further into the future. I ask that the studies along the Ballard-UW corridor and in Southwest Seattle to Burien be upgraded to full Environmental Impact Statements. We will need these lines, and including a full EIS as part of the ST3 package will help to accelerate the timelines in 10 years when we're voting on the next package. Indeed, I know that a majority of commenters (myself included) are less than thrilled concerning the slow timelines for many of the projects in ST3, so it is all the more important that we include as much planning as possible for projects that we know are not simply "if," but "when."</p> <p>As our region grows, we need to focus more on transit oriented development with infrastructure for bicyclists and pedestrians the top priority. For a transit and mobility project, parking should always be an afterthought and never a priority. Stations should be a highlight of growing urban neighborhoods, not just another building surrounded by a parking desert. The plans to expand parking on the north sounder line are especially worrisome as the existing parking is not at all near capacity. Improve the quality and frequency of transit first - lack of parking is an OK problem to have, but without good transit options, why build a parking lot that no one will use?!</p> <p>As someone who lives in the suburbs and chooses to not own a car, transit is critical. We must proactively provide GREAT transit choices that are applicable to as many people as possible and not simply sell out to loud voices with money who advocate for providing OK transit options for those who have no other mobility options.</p>
------------------	---

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

<p>EAST KING COUNTY</p>	<p>Improved transit is essential to the long-term growth and development of the region, and it is because I believe so strongly in our need for better transit that it pains me deeply to be so opposed to ST3 in its current form. I support many of the modifications promoted by Seattle Subway and SeattleTransitBlog.com, and *especially* staying true to the principles that grade separation in urban areas is critical, and that regional infrastructure should be funded regionally. Only with grade-separated solutions that serve not only our high-density urban cores, but also provide lower-density residential neighborhoods with compelling, realistic alternatives to filling our highways and streets with cars can we truly address the long-term needs of our region.</p> <p>For those reasons, it is especially as a Kirkland resident that I am so deeply opposed to ST3 in its current form. It's sad and unfortunate that our Kirkland City Council has allowed the Save Our Trail organizers to dominate the conversation in Kirkland, but Sound Transit needs to understand that the vocal interests along the trail nonetheless do not speak for everyone in Kirkland. As nice as the trail may be, the Sound Transit easement along the Eastside Rail Corridor is an essential part of meeting the long-term needs of Kirkland, and we cannot under-serve the growing residential and commercial neighborhoods in Kirkland with a plan that placates a small number of homeowners by virtually ignoring Kirkland's transit needs through 2040 and beyond.</p> <p>As much as the Kirkland City Council may wish to promote Totem Lake as the city's key area of future growth, it is Kirkland's established and vibrant downtown core that sorely needs transit investment. Between Google's expansion, the Kirkland Urban project, lots of new mid-rise development, and promoting access to the regional gem that is Kirkland's waterfront, it is criminal to ignore the growing transit needs at and around Kirkland Transit Center. Over 90% of people living in Kirkland work elsewhere, and over 90% of people working in Kirkland live elsewhere, and Kirkland's transit infrastructure cannot possibly meet the needs of its residents and businesses without further investment. Rush-hour traffic is already miserable and worsening on Kirkland's smaller streets (relative to car-centric Bellevue). Calling BRT on I-405 an effective solution is preposterous, when neither Sound Transit nor King County Metro have any realistic ideas for how to make an I-405/85th St. BRT station (up a giant hill from downtown, and in the middle of a clover-leaf of on-ramps) accessible to our community.</p> <p>As evidenced by ridership on the Metro 255 bus, Kirkland's greatest need is a strong connection to Seattle and the north-south rail spine, yet that bus will get pushed out of the downtown tunnel as light rail improves. As a non-express bus, the 255 already plods slowly through South Kirkland residential neighborhoods, and yet the solution on the table to serve downtown Kirkland is three-</p>
<p>EAST KING COUNTY</p>	<p>Light Rail should be added along the 405 corridor. Kirkland is being left out in the cold but has a usable rail bed with the cross kirkland trail, wich was intended for transit use and would be ideal.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	<p>Somewhat support rather than strongly support because:</p> <p>a. Can look at reducing the timelines (and hence cost). Are all studies during planning necessary or can they be shortened? Waiting for 25 years is almost 1.5 generations from now.</p> <p>b. Why was light rail across the new 520 bridge not considered when light rail was extended all the way to UW and there is a huge ridership on 520 public transit on buses 545, 255 and 271 (these buses are packed during peak hours even at 5-10 min frequencies and full even during non-peak hours).</p>
EAST KING COUNTY	<p>I am very favorable towards the Sound Transit board's draft ST3 proposal. The basic approach of commitment to an ambitious long-term program that will enable continuous investment in regional transit infrastructure for the next quarter century is very good and far preferable to the uncertainties together with the fits and starts that would inevitably result from multiple smaller and shorter-term initiatives. If adopted, this ST3 plan will not only drastically improve transit and mobility for the region for decades to come, but the certainty it provides will also allow numerous other investments to be made – both public and private – that will improve the quality of life in the Puget Sound region.</p> <p>In general, the specific projects, timelines, and financial assumptions are solid and justifiable. However, there are always elements with which some disagreements may result. Included below is a list of specific critiques on individual elements of the draft plan. While there may be good counterarguments to many, perhaps even all, of these critiques, it would be valuable for the Sound Transit board to better articulate its reasons for these decisions.</p> <p>System-Wide</p> <ul style="list-style-type: none"> <li>• Completing the Light Rail Spine</li> </ul> <p>Many professional transit engineers have said that light rail is not the best way to connect communities as far from Seattle as Everett and Tacoma in a region with its current density. Riders will be discouraged when they learn that their trips between Seattle and the cities of Everett and Tacoma on light rail will be substantially slower than they are today via either Sounder commuter rail or ST Express Buses. These light rail "spine" projects only become productive if and when the density of the Puget Sound region reaches that of larger metropolitan areas such as the San Francisco Bay region.</p> <p>Although there is a strong public desire for these spine completion projects, I encourage the Sound Transit board to act early only to preserve right of way necessary to build these projects and to sequence the construction of these projects late in the ST3 timeline.</p>
EAST KING COUNTY	<p>Issaquah, Snoqualmie and North Bend should be completed much sooner, like 10 years.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

<p>EAST KING COUNTY</p>	<p>WE DON'T WANT TO SETTLE FOR BUS RAPID TRANSIT on the Eastside 405 corridor, we want Light Rail. I will not vote for a project that raises my taxes when all we get on the Eastside is more buses which we already don't like, to pay for Seattle and the I-5 corridor to have Light Rail.</p> <p>Also, the 520 BRIDGE NEEDS LIGHT RAIL. Putting it on I-90 alone makes it useless for people on the Eastside north of Bellevue. The excuses I've heard for our brand new bridge not having it from the start are inadequate, and smack of corruption/politics.</p> <p>THE TIMELINE IS TOO LONG - We need this soon, not by 2041. Other municipalities have been able to build much larger mass-transit rail systems in less time for less money.</p> <p>Give us a complete, fully-realized light rail network on BOTH sides of the lake, and I will vote for it, even if it costs twice as much.</p>
<p>EAST KING COUNTY</p>	<p>Light rail to Ballard should be built underground and stay underground once it reaches Ballard. This may increase costs, but it is critically important that we build this line right. Underground light rail has been a blessing for the Capitol Hill, UW, and Beacon Hill neighborhoods. We can see it works well. The line to Ballard needs to not only be grade separated, but underground, as well, to ensure that the spine we're building will work reliably and not cause additional problems on surface streets in Ballard.</p> <p>Sound Transit must figure out how to move forward the estimated completion dates in the draft plan. This may require cooperation with partner cities, but it's vitally important. We may not be able to shave much time off the construction phase, but we ought to be able to get through the design and engineering faster.</p> <p>Funding for an eventual station at 130th needs to be part of the mix for the ST3 plan. North Seattle needs this station.</p> <p>ST should investigate the possibility of adding stations on Sounder North in between King Street Station and Edmonds. These could be part of the early wins in the plan. We have an existing rail corridor that we've got service on, but it's really only useful for people who live in Snohomish County and work downtown. We've got to at least explore the feasibility of allowing more people to utilize Sounder North for their commutes.</p>
<p>EAST KING COUNTY</p>	<p>I really think Ballard needs to be grade separated and in a tunnel under salmon bay instead of a bridge. I would be fine if it came multiple years later if it was grade separated and did not have a bridge. We only get one chance to build this line, let's build it right.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	<p>Issaquah already has a pretty good transit setup with buses. BRT on 405 doesn't connect many of the population centers in an effective way. I know there were plans to use Kirkland's Cross Kirkland Corridor for Light Rail, and Seattle Subway group even has some compelling ideas around bringing light rail directly to downtown Kirkland. Please consider altering the plans to expand light rail in place of BRT. I would also happily pay more money in taxes to see these projects completed faster and as a Microsoft employee would urge ST to lobby Microsoft to help contribute funding to push these projects forward faster. I would love to see Microsoft shut down its Connector shuttle program and instead focus on transit everyone can enjoy. As a rapidly growing urban center, the Puget Sound needs to get ahead of the curve with mass transit, and I fear that the current proposed timeline and expansions will not keep up with the growth we'll see in the same time frame. I currently commute by car, but look forward to the day I can use transit, instead. In short, I want to see ST3 do MORE with light rail, SOONER, no matter the cost.</p>
EAST KING COUNTY	<p>Buses, Buses, Buses; Light Rail is not needed. Cancel ST2 as well. We can have buses now when ever and wherever we need them. The Electric buses (route 241?) in trial show great promise. There really is no case for light rail. If you really want clear input then separate bus and Light rail into different options</p>
EAST KING COUNTY	<p>Issaquah should be earlier. My husband and I will be dead before it comes otherwise! We are looking so forward to seeing reasonable public transportation enacted. Thanks for all your efforts!</p>
EAST KING COUNTY	<p>Lynnwood to Everett light rail should be moved up on the list and completed much sooner.</p>
EAST KING COUNTY	<p>The new light rail to Issaquah via Eastgate should be much, much sooner in the timeline. In fact, if Sound Transit would change the light rail to Issaquah to BRT to Issaquah, service could be built/available much quicker. Sound Transit needs to be building much more parking on the Eastside. There is an agreement between Eastside cities and Sound Transit which says tax dollars from Eastside residents must be spent on the Eastside. Sound Transit is violating that agreement with the draft ST3 plan!! Our tax dollars are being used to provide service in Seattle. Sound Transit made a commitment and you need to honor it!</p>
EAST KING COUNTY	<p>North of Seattle, (Everett) and south of Seattle need to come on line sooner. The commute to Seattle/Bellevue is atrocious but people have no choice because the cost of living in and around Seattle/Bellevue is ridiculous. Get people from the Everett area and people from the Tacoma are to and through Seattle/Bellevue faster. Also, I'm not a fan of buses or the way we pay for them. Living outside of Seattle I have to pay ST fare then pay metro fare when I get to the city. It's too expensive and buses arrive just early or just late enough at stations to make planning difficult for all commuters, blue collar workers in particular. Please, please, please concentrate on light rail and trains through the I-5/I-405 corridor and get them here faster! And explore an income tax to pay for it. Sales taxes are regressive and we're getting close to king county residents saying enough is enough on the sales tax. Make some of these high earners that are taking over the city pay more for the services we are now being forced to consider. Thanks.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	The most important projects are where there is the heaviest traffic such as I405, I90 and I5. These routes should have a light rail system beside them to provide a faster and more ecofriendly way of transportation.
EAST KING COUNTY	The light rail line proposal for Issaquah is ridiculous. Bar far the great need is to go DIRECTLY to Seattle, rather than Bellevue. Ideally the plan should support both options, but a direct line to Seattle is absolutely necessary, otherwise ridership will be very low.
EAST KING COUNTY	The Seattle projects that move the largest numbers of people should be prioritized higher. Massive boondoggley parking garages should be cut. The focus should be on core improvements to dense areas and other areas that are densifying, not park and ride stations.
EAST KING COUNTY	If you're going to have a rail system then do it right. This hybrid bus/rail system won't solve the problem. Why light rail is not going to be implemented in a way that allows every King County suburb to have a station, hop on the train, and get to any major city, e.g., Bellevue, Kirkland, Bothell, Renton, Issaquah, etc., is not understandable. The county population will grow eastward and the time to build for that growth is now. Go to any modern city... London, Paris, Beijing, DC, NYC, Boston, etc., and a subway/rail-based system is the essential transportation hub. Put light rail throughout the 405 corridor, down 167, out I90 etc. Don't waste a dime on bus route infrastructure expansion. Buses will always be bound by surface traffic. Not so for properly designed train transit systems.
EAST KING COUNTY	Focus on convenient parking, fast buses, employment centers. In that order. I don't ride busses because they stop every two feet and its not easy and safe to park my car and take the transit.
EAST KING COUNTY	schedule Issaquah sooner
EAST KING COUNTY	I think the time line are too far out for these services. There is no benefit for many residents but they are supposed to pay for 25 years before they can see any benefit? The time line is painfully slow and seems like there are massive rooms for more expedient building.

EAST KING COUNTY	<p>Very pleased with the proposal for Link light rail expansion. Like others, I'm frustrated by the extended timeline, but recognize the reasons for this. Have a few suggestions for Link planning to submit for your consideration:</p> <p>1) DENNY STATION ORIENTATION: Consider re-orienting the proposed Denny Station on Ballard Link from north-south under Westlake Ave to east-west under Denny, and move the station box itself to the east so that the western edge of the platform is ~1 block east of the Denny/Westlake intersection. Escalators, stairs, and elevator would be sited on the western end of the platform and rise headed west, so that by the time they reach the surface they would be close to the Denny/Westlake intersection (for transfers to the SLU streetcar). The eastern end of the platform would have stairs &amp; escalators that would rise as they head east, finally surfacing on top of the hill on Denny between Boren &amp; Fairview – this would provide access to the substantial number of new high-rises, hotels, and office buildings being built atop the hill and to the eastern half of the South Lake Union/Cascade neighborhood. The track itself could then turn southeast onto Boren after the station, then southwest onto Virginia to return to Westlake Ave.</p> <p>2) BALLARD LINK STAGED OPENING: Consider a temporary truncation of southbound service at Westlake station (similar to the model proposed for West Seattle Link). This could allow earlier completion of the line from Ballard to Westlake, with the tradeoff of deferral of the 5th Ave subway tunnel until later in the ST3 project. This will place a heavy transfer load on blue/red trains at Westlake, but this would not be as severe in early years as it would be in 2040, by which time the remainder of the tunnel will be complete (note also that the mere fact that there IS a transfer will decrease potential ridership, which will help alleviate this problem).</p> <p>3) ALTERNATE STAGED OPENING FOR BALLARD: Assuming that the Denny Station is re-oriented as suggested above, the northern portion of the line could be constructed past Denny Station to the intersection of Boren &amp; Virginia. At this point, the tunnel would branch: A dead-end aiming to the southwest (where a future tunnel heading back toward Westlake Ave &amp; eventually under 5th Avenue would eventually be constructed), and a fully-constructed branch that continues southeast on Boren, up a three-block incline to Boren &amp; Olive. At that point, construction with the convention center could be coordinated to extend the tunnel under the new convention center (i.e. across the current Convention Place Station property) to the corner of 9th &amp; Pine, where the Ballard line would merge at-grade with the north main Link line. At-grade merges are undesirable, of course – however, this would</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - East King County

EAST KING COUNTY	<p>SR522 BRT through Bothell - the existing Bothell P&amp;R is an ideal location for TOD &amp; SR 522 was just straightened and improved. Yet, some Bothell officials want to route the BRT off of SR522 and away from the Bothell P&amp;R. I think a heavily used BRT line should stay on SR-522 and access the college campus at the south campus entrance, which is lighted and suited for bus traffic. TOD at the Bothell P&amp;R could incorporate easy access to Main St through the NE 103rd ST public ROW. This alternative would be cheaper than making necessary improvements on NE 185th ST, a constrained corridor as it stands now.</p> <p>I am very pleased to see BRT on the I405 corridor. Whereas Seattleites want new tunnels &amp; more light rail, we on the Eastside are happy to finally see some new, badly needed bus capacity. BRT is a much more economical way to provide transit in our region.</p>
EAST KING COUNTY	<p>I'm very supportive on new light rail investments and bus rapid transit. I'm not supportive of parking. I think ST needs to spend less money on parking and more on transit - we have to consider the kind of money you're proposed to get doesn't happen often (and may never happen again) so I'm not convinced that spending \$600 million on parking is a wise investment for the future. I'm also supportive of the project that best serves my area (522 BRT), but I don't think building all that parking for it is a good idea. I can live with just the bus investments.</p>
EAST KING COUNTY	<p>Both my wife and I feel strongly that the main North to South spine from Everett to Tacoma should be completed first. Skip the Paine field stop and serve it by rapid bus service to a nearby station. The side laterals to other places can come on as funds are freed up but the main trunk needs to be in place and working before adding the branches to other places. Dedicated bus lines can serve the laterals far sooner and with less expense.</p>
EAST KING COUNTY	<p>I-405 BRT seems like a pretty useless project. It won't serve Eastside communities well because the major population and employment centers aren't on I-405. The Bellevue-Issaquah light rail line is okay, but has low ridership. These two projects should be revised to increase ridership and utility.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - South King County

Subarea	Additional Feedback - Project(s) should be modified in the ST3 final plan
SOUTH KING COUNTY	I am extremely disappointed with the fact the line will not continue on SR99 and will instead diverge onto I5 due to decisions by Seatac and Federal Way's city councils. Not only will diverting the light rail to I5 instead of continuing on SR99 result in houses being destroyed, it's moronic, as businesses and communities would flourish if it stayed on SR99. I really want an opportunity to get this re-looked at. There is no reason to have to divert to putting the light rail on the freeway because some dinky cities with their "small-town feels" city councils decided it would ruin their "small-town feel" vibe. It's just wrong. I live in Federal Way and I want the light rail on SR99. I want this looked at. I don't feel like the McDonald's on SR99 should have more say in the matter than I do because their business will "suffer" with some construction. Horribly backwards and wrong.
SOUTH KING COUNTY	Allowing buses to drive on shoulders sounds very dangerous to me. Better mass transit options between Federal Way and Bellevue are long overdue.
SOUTH KING COUNTY	I believe the prioritizing is off. We need light rail along I-5 first then west. Seattle Ballard. As well rapid transit. 2041 to finish these projects is way to long. Need to speed things up in order to get more people to vote Yes. Everyone I've talked too doesn't like that long of a wait. Speed up EIS!!
SOUTH KING COUNTY	Seattle to Ballard via At grade through Interlake and a draw bridge? Are you guys ok up there?  At grade sucks, this has been show constantly with the current line as it travels along MLK Jr. Way, you can work around this to some extent with light timings (and I will admit that the timings have definitely improved over the last 5 years). However, the nature of a drawbridge is completely unpredictable. Is it worth it to have multiple trains pile up on one another at the bridge while waiting for ships to pass?  I would much rather see a tunnel through Queen Anne and under the ship canal and an underground Ballard Station, or a viaduct like structure (like the current line south of Rainer Beach Station) and a bridge of sufficient height to let ships pass through.
SOUTH KING COUNTY	Light rail will not be efficient over long distances without express routes that don't stop frequently (serving major stops only). I am more likely to drive when I know I can get there faster than the train(light rail is slow due to stops, sounder train is faster). Also need to add parking at major stations.
SOUTH KING COUNTY	Speeding up the timeline!
SOUTH KING COUNTY	It's absolutely imperative that the Ballard-West Seattle line be 100% above- or below-grade. We'll be waiting too long to receive second-rate transit.  I strongly support building infill stations such as Graham St and 130th St as quickly as possible, and I impore Sound Transit to study Ballard-UW and Central District lines for inclusion in a future package.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - South King County

SOUTH KING COUNTY	Completely ignoring the need for light rail between Renton and Bellevue is short sided. I have commuted in the Seattle area for over 30 years and the commute between Renton and Bellevue is the worst. Express buses are a waste of money. If your going to spend the money do it right the first time. Southeast king county is being poorly served by the current plan yet we are being asked to continually contribute to a system that only provides train service a couple hours a day.
SOUTH KING COUNTY	<p>ST needs to continue to prioritize the impact of the investments on the least economically prosperous communities within the region. The cost of housing is already extremely challenging for many in the region and getting left behind from public investments in critical infrastructure is something we need to be careful of.</p> <p>Buses, no matter how "rapid" you want to call them, simply aren't going to work. Many of the recently added lines are actually slower than normal metro routes, they slow other modes of traffic using the surface streets, and they don't provide the sense of permanence that sparks the investment in transit-oriented development around them. I live in a part of the city that only has rapid ride and express buses. They are so inadequate I choose to ride my bike 27 miles round-trip to work each day.... year round. Do I enjoy riding my bike? Yes. Do I enjoy riding my bike 135 miles a week in rain wind and in the dark.... it's a bit of grind, but the bus service is so unpredictable and at the whims of traffic, I don't have the time or the patience to deal with it.</p>
SOUTH KING COUNTY	The Light Rail and Heavy Rail systems need to be completed and upgraded before adding buses --- Seattle and Washington State are late to the party considering the Monorail was on display at the World's Fair in the early 1960 --- now we will have light rail by 2035? Need to shorten that window; get the systems moving more people faster, friendlier and safer.
SOUTH KING COUNTY	Run the Ballard Line underground through Queen Anne instead of at grade through Interbay. Don't run at grade and build a drawbridge over the ship canal. That's just silly.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - South King County

SOUTH KING COUNTY	<p>The SeaTac to Federal Way leg of the light rail expansion was originally sold to the voters in the initial light rail approval to run down Pacific Highway/International Blvd with a stop directly adjacent to Highline Community College. HCC would be one of the largest single destinations for the light rail in the south corridor, yet the plan was rather stealthily change to move the plan to being adjacent to I-5 with some rather obtuse shifts in location to put in a station for HCC that will not be feasible for a good portion of light rail riders who are also HCC students (elderly and those with physical limitations make up a considerable part of the HCC student body).</p> <p>Additionally, this will move the light rail line closer to more residential lots than previously detailed with the Pacific Highway original proposal. Have these residents been properly informed and has all noise issues been fully detailed. When the Tukwila station opened, the residential neighborhood was not properly taken into account by Sound Transit, leading to lawsuits and additional costs to mitigate noise (as well as substantial decreases in property value for these residents). I know people who live along the stealthily changed proposed route and they were not fully informed and have numerous concerns about noise.</p> <p>I understand this change was done to save money (even if the amount saved through this change is rather insignificant versus the budget for ST3), but will it save money if homeowners sue for loss of property value and for noise complaints? This change should have been better detailed to the public, and I know people in these neighborhoods who are still not fully aware of the change from the original Pacific Highway route.</p> <p>This change alone will cast my vote as a "no" in the fall. I need government that sticks to what it originally proposed, avoid duplicitous sharing of vital changes in public service proposals, and is willing to spend an extra dollar today if it means avoiding a larger lawsuit tomorrow. Also, as a former HCC student, and knowing how many people there could use closer light rail, I cannot support making the location of a station that inconvenient to those who are not in the top of physical ability.</p>
SOUTH KING COUNTY	MINIMAL taxation needed!
SOUTH KING COUNTY	<p>Light rail build out to Federal Way has been delayed from the original bond issue plan. This is wrong and would be one reason I would not vote for the overall project. I am more likely to support the bond if the original timetable for light rail to Federal Way would return to the plan. I think waiting 12 years for the extension to Federal Way is folly. I-5 traffic and Valley Freeway traffic north bound is a snarl. In 12 years it will be gridlock. Let's return priority to the South Sound build out timetable. As an interim, more Sound Transit express buses could take up some of the slack.</p>
SOUTH KING COUNTY	<p>The Ballard portion should be fast-tracked and prioritized. That area is particularly dense and hard to access. With the Seattle Center there, the congestion is ever worse for residents, commuters, and tourists. That area needs focus.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - South King County

SOUTH KING COUNTY	The timeline of the projects is skewed. 405 BRT is a big, quick win as are most of the BRT projects. North Rail improvements aren't worth it because the tracks aren't stable. Ballard and West Seattle Link should be the first two projects, after completion of the existing lines to Lynnwood and Overlake. the south line should only go to Fed Way, Issaquah should be next but the extension into Redmond and the push to Everett can wait. They don't have the density like the other lines have. Build it out in the densest and growing areas first.
SOUTH KING COUNTY	Extend West Seattle light rail service to White Center or even all the way to Burien.
SOUTH KING COUNTY	Raise the priority of expanding/improving Sounder rail service vi more parking, bigger platforms, more trains etc.
SOUTH KING COUNTY	I would rather have a Ballard to UW line, and be able to transfer North/South from UW, than a Ballard to Downtown line.
SOUTH KING COUNTY	Street level link tracks in the city is a terrible idea, either raised or underground.
SOUTH KING COUNTY	The West Seattle light rail plan should be given greater priority considering the area is so populated and uses transit often. Almost 20 years is too long to wait. Also please consider adding light rail or faster bus service to White Center.
SOUTH KING COUNTY	The line in West Seattle needs to go south of the junction and much SOONER!!!!
SOUTH KING COUNTY	<p>Items:</p> <ol style="list-style-type: none"> <li>1. Going to Everett and Tacoma are too far for this plan. Everett should go to the intercept of WA-99 and WA-525. BRT can support Paine Field until it becomes a real airport. Tacoma should only go to Federal Way Transit Center. (Promised in ST) ST4 can complete the spin.</li> <li>2. There is insufficient density to justify building to Issaquah. If Issaquah earns a light rail system through proper upzoning then they can have it in ST4. Kirkland is more important and harder to get to. Don't let NIMBYs near the Central Kirkland Corridor ruin building a proper system.</li> <li>3. Ballard is more important than West Seattle. Build UW to Ballard instead of Ballard to Downtown or complete Ballard before the West Seattle line.</li> </ol> <p>The system needs to be completed sooner. I will be retired by the time this system is built out. Why bother voting in favor if it won't help my commute now.</p>
SOUTH KING COUNTY	RAISE THE SPEND AND ACCELERATE THE PLAN. By the time the draft plan is scheduled to end, it'll cost so much more & not be extensive enough.
SOUTH KING COUNTY	Nobody wants to take the bus, they are unreliable with time and they deal with traffic. It would be BEST and not only CONVENIENT but BENEFICIAL if the sound transit expands it's horizons around through Tacoma to Everett or long ways of Seattle. Just better transportation like Europe or example London transit. \$\$\$\$\$

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - South King County

SOUTH KING COUNTY	More ST express bust routes from Federal Way to 405 Corridor - there are currently no viable bus routes for those that commute from Federal Way to Bellevue. current metro routes take longer than driving even on the worst most congested days.
SOUTH KING COUNTY	We need to do this faster than 25 years.
SOUTH KING COUNTY	More emphasis on ST express buses, less emphasis on Light Rail !
SOUTH KING COUNTY	I don't care that bus rapid transit is easier to get done first, push it back. I'm so sick of bus projects! I hate riding the bus. I don't use mass transit because right now my only choice is the smelly buses with the junkies and smokers. Light rail and Sounder are so much better. Start them first, finish them first, and push the bus plans back. Why is there no light rail or Sounder plans to from Tukwila to Bellevue?!
SOUTH KING COUNTY	Light Rail to Burien!
SOUTH KING COUNTY	Speed up the light rail line building program and include Burien on light rail. To hell with any bus route improvements. Also you should be looking at building a hub for a bullet train or hyperlink on the West Coast.
SOUTH KING COUNTY	I would love to see the West Seattle link line extended south to White Center.
SOUTH KING COUNTY	I would like to strongly advocate for improving last mile service access via either express or improved local bus service to increase probability of full adoption of the proposed West Seattle light rail extension. For residents of neighborhoods such as Arbor Heights, Fauntleroy and the Morgan junction increasing the speed and frequency of local service that connects to the C and ultimately the light rail will reduce total time in transit needed by reducing headway time or ambulatory time spend reaching the nearest stop. In my particular example, the local 21 express stop is very conveniently located at only 3 blocks from my home, and walk-able in only 2 minutes. In comparison, the nearest C line stop requires a 15 minute walk up a steep grade, a walk many residents are either unable (due to physical condition) or unwilling (due to inconvenience and lack of sidewalks) to make.
SOUTH KING COUNTY	Light rail is extremely expensive. Bus, small, medium and large are much more reasonable in price when compared to light rail. So far light rail is NEVER built on time or on budget. Buses , all sizes, can be purchase much quicker and offering various sizes will certainly help.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - South King County

<p>SOUTH KING COUNTY</p>	<p>It's interesting to note that with the 2 new light rail stations open, the discussion has changed from "Why do we need this?" to "Why can't we build it faster?" It also is changing to "Why can't my area have light rail?"</p> <p>I don't know enough about BRT to have much of an opinion. But in West Seattle, problems with existing Metro and the C line have bothered many people. You will need a solid, practical plan to genuinely improve both rapid and snail bus service, because the track record so far isn't that good.</p> <p>For light rail, I think the Ballard and West Seattle routes and to Bellevue and Redmond would have the most significant initial impact.</p> <p>A VERY hard look should be given to whether we need a second, expensive downtown tunnel. Can more (maybe all?) tunnel buses be put on surface streets and technology used to increase the frequency of light rail trains?</p> <p>As to West Seattle, I think you could terminate the route at Avalon, if necessary -- the Junction is just a short distance away and could easily be served by shuttle buses to the Avalon station. You also have a ready-made station/ parking garage spot at the stadium parking lot.</p> <p>I don't think light rail to Issaquah, across Tacoma, or Everett-Lynnwood is needed. The Tacoma line especially would be very expensive. BRT or other enhanced bus service should be adequate.</p> <p>To summarize, you've got a solid winner in the UW-Angle Lake line. Build to where the people are. I realize there are political reasons for projects in Pierce and Snohomish counties, but whether the proposed projects add that much is questionable. You have to make this less expensive, yet speed the timetable (very tough, I know). Closely study emerging technology -- 2041 will be vastly different from 2016.</p>
<p>SOUTH KING COUNTY</p>	<p>I find the design of the proposed route from Ballard to downtown rather perplexing. Light rail is most effective in corridors where roads have already reached capacity, and where riders embark and disembark throughout the course. The route through Interbay thus seems illogical; why not run along Westlake Avenue, perhaps including 45th Avenue or Denny Way? Furthermore, I do not see why service to Tacoma should be completed before Ballard. While the goal of connecting Tacoma to the airport makes sense, I doubt the impact to traffic in south King County would make up for another five years of gridlock in Seattle.</p> <p>Oh, and I would love to see BRT funded from Burien to the West Seattle station!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - South King County

SOUTH KING COUNTY	<p>Having traveled quite a lot in major cities which invested in and have terrific mass transit systems, it's heartening to see Sound Transit moving ahead with bringing the Seattle-Tacoma region up-to-date. It's long overdue. The final plan seems a good one, excepting that it seems not to place as much emphasis on simply getting a basic net of rail to cities/areas around the region as quickly as possible so much as first trying to bolster what currently exists with expanded stations and bus services to a degree that will no doubt be quite costly. That may be for a number of very good reasons, and I'd be interested to know more, but as voters we've been down that road soooo many times, spent sooo much money, only to find that single passenger vehicle traffic in this region simply precludes any significant time or ease gains that can be made by buses.</p> <p>My concern is that trying to augment roads and highways for better bus service in this gridlocked region is money that would be far better spent on rail, with supporting bus lines, stations, etc. being put in place to support that endeavor, rather than trying to greatly expand those services before the fact.</p> <p>I've been on and off trains in rural areas in Europe and on the east coast of the US where the 'station' is little more than a platform with a roof, and some kiosks for pass purchases and information. It may not be super-pretty, but it's adequate. I'd like to see tax money spent efficiently, of course, and get the most efficient, comprehensive rail system possible in place soonest, then worry about upgrading for appearance and other considerations. I imagine traffic volumes would quickly identify where upgrade would need to take place first.</p> <p>Also, since I'm making a wish list, I think Burien really needs to be on the rail plan rather than being a maybe!</p>
SOUTH KING COUNTY	Focus on seattle as main destination. Add lines through white center that connect burien and west seattle
SOUTH KING COUNTY	25 years for all projects is way to long. We need light rail to Tacoma Ballard and west Seattle yesterday!!
SOUTH KING COUNTY	I strongly oppose the payment plan because as of right now the proposed routes are useless to me. I live on Kent East-Hill. Traffic is absurd going up and coming down from Kent East-Hill. The current arteries are constantly clogged - James street, Kent Kangley, 277th. Covington uses Kent's streets to get to 167 and I-5. Additionally, it is both physically difficult and dangerous to ride a bicycle up to East Hill. We need a light rail station up on Kent East-Hill to make public transportation viable.
SOUTH KING COUNTY	Please complete sooner. 25 years is way too long.
SOUTH KING COUNTY	I know that previously the plan was to extend light rail to federal way within the next 8 years. Not very happy to hear that it is expected to complete in 12 years now :(
SOUTH KING COUNTY	Expanded bus transit should be the top priority. It is less expensive than light rail, more flexible and faster to implement.
SOUTH KING COUNTY	Congestion in this city is absurd. These timelines are way too long.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - South King County

SOUTH KING COUNTY	From what I can see of the plans it appears that many of the new stations for the light rail are still do not appear to include parking structures. I believe this is likely a critical feature that will result in much larger ridership. Specifically it appears that the current plan is to route the light rail to the current Federal Way transit center. The garage there is already at capacity. I think it would be much better to route it to the old transit center and place a new parking structure in the existing lot. This would provide more parking for commuters and easier access for riders to the local mall.
SOUTH KING COUNTY	Start the expansion when you have the money to pay for it
SOUTH KING COUNTY	Light rail is a waste of money. Increase bus lines, which are more flexible and adjust to demand immediately. increase lanes, eliminate commuter lanes, open lanes outside after commute peaks
SOUTH KING COUNTY	Light rail, to Federal way within 8 years NOT 12 years
SOUTH KING COUNTY	BRT on I-405 from Tukwila to Bellevue is crazy...this is THE MOST heavily traffic areas in the city. USE the EXISTING rail line that goes along the East Side of Lake Washington...too bad that the people who live near there will have to deal with light rail trains...they bought near existing rail way tracks...that's the risk any of use take. Catering to the wealthy who bought near an excellent area of living and near an existing rail line is just too bad for them...the good of the many out weigh the "claimed" needs of the few. I-405 traffic is so bad it clogs up I-90 and I-5. Let's fix this the right way. I'm from Oregon...and everytime we saw Seattle vote down light rail in the 80's we just couldn't believe the lack of long-term vision...while we all voted for Metro-link lightrail down there...Portland is 35 years ahead of Seattle...that's amazing considering the population and tax base the Seattle area has to work with...what ARE you doing with all of the resources? What happened to the voter approved extension of the light rail to Federal Way that was already supposed to be done/nearly done? Where did that money go? Let's talk about the Tunnel...or should we say "Funnel" (of money)...how did this get approved? One of the options that cost less and would have been done/nearly completed by now was a suspension bridge along the waterfront...Why did that option get shot down/ignored? Who is minding the store in the Seattle area? If you want to keep big biz in town...you need to snap too it...although, quite frankly...I think it's way too little, too late. We should have been filling this survey out in 2001.
SOUTH KING COUNTY	25 years is an absurd timeline and it seems you'll be working on each project one at a time.  I'd rather pay more to have several projects going at once to speed up the process. An example would be DC metro making their transit system in a far shorter time period
SOUTH KING COUNTY	I would like to see the Kent/Des Moines light rail station along International Blvd., as the Angle Lake station is, instead of moving east toward I-5. It would be great for the station to be near Highline Community College instead of way over by the Kent/Des Moines Park&Ride, which is not very accessible to pedestrians heading to Highline Community College.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - South King County

SOUTH KING COUNTY	Has the committee considered what the Puget Sound area will be like in 20 years? I feel like the focus of this project should help the long-distance commuters first. People sometimes have a 2 hour commute to travel 20 miles. If no improvements are made for 20 years, those people are going to leave, or work outside of the city, and most people can't afford to live in Seattle. People in the city can walk, and are able to use current resources to get around (I just moved from SLU and had no issues getting around if I walked out used public transit, but would definitely not drive).
SOUTH KING COUNTY	Light rail to and thru Tacoma should be first on the agenda as traffic on I-5 and 167 is horrible.
SOUTH KING COUNTY	Buses are faster and cheaper to implement. They are more flexible as well. Rails are fixed. We need more Park and Ride lots with lots of bus service. I do not see any options for commuting from south Seattle/Seatac/ Des Moines to Issaquah or Bellevue or Redmond.
SOUTH KING COUNTY	Higher priority should be given to linking light rail from Tacoma to SeaTac airport and expanding South end Sounder services since these are both regional people movers. Expanding parking garages in places like Kent would help more people connect to the trains. The current garage is filled by the third train. Lower priority should be given to linking inner Seattle neighborhoods especially those that don't have major employment destinations. This would include places like Ballard and West Seattle. Don't waste money creating spurs to these neighborhoods, there's nothing there worth connecting to. UW was a good connection and even Redmond would be good since it has Microsoft.
SOUTH KING COUNTY	Expanding lightrail south of des moines to south federal way should be completed with the first 8 years.
SOUTH KING COUNTY	Getting a light rail station from West Seattle say California junction to follow West Seattle bridge to downtown Seattle would be highly utilized and is a must to relieve daily commuting downtown.
SOUTH KING COUNTY	While I am in strong support of any light rail expansion, I much preferred the plan with the West Seattle loop. In fact, I think neighborhoods connected by loops (also Ballard to North Seattle and a loop around the lake to Bellevue Kirkland Renton) would offer far more versatility and flexibility in the long run. Evidence Tokyo!
SOUTH KING COUNTY	There seems to be no mention of additional parking at existing bus transit centers, like Federal Way. Current parking becomes full before the end of the commute period. Since I do not live close to a bus route, I need to use a car to reach ST 578 to Seattle - but there is little chance I can find a parking space during the day. So ST578 now and light rail in the future will be of no value. Before we decide to move forward on ST3, we should develop a broader tax base in the state and be clear on what other funding requirements there will be over the 25 year timescale (like education). Our tax system is highly regressive - and it is wrong to pretend that property taxation is progressive - it is not. Property taxes are based on capital, not revenue to an individual, and hence there can be NO assumption that homeowners can readily find money for extra property taxes. It's time we said NO to any future expenditures until the taxation system is improved

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - South King County

SOUTH KING COUNTY	<p>As a resident of Des Moines, we live just one block in from Pacific Highway. The noise level already generated from Pacific Highway and flights coming in and out of SeaTac is already, barely tolerable. Bringing a light rail system within one block of residential homes is simply too close. The residents in Des Moines would like to know exactly, where along Pacific Highway, this system is intended to be placed. The fact that I cannot find on any website the exact plan for where this light rail is to go, leads me to believe Sound Transit has no intention of listening to the concerns of residents. I fully support well planned neighborhoods and transit systems. I see a real lack of skilled planning throughout the Seattle and surrounding areas given that a mass transit system was not readily incorporated into the I-5 and I-405 corridors, and how poorly laid out the neighborhoods and schools are. Schools are situated in odd locations, not always within walking distance of it's students homes, and too close to commercial lands. High schools have too large a student body, detracting from the quality of the learning environment. Perhaps the people of these areas would have been supportive of a comprehensive and intelligent designs 20 - 30 years ago. I can appreciate the challenge of working with what we presently have. However, I think the notion of running the light rail down Pacific Highway, rather than moving it over to the I-5 corridor was an error. Students don't get enough exercise anyways, the walk would have improved their fitness.</p> <p>The Des Moines residents simply ask that the rail system not be in our back yards. This can easily run adjacent to the I-5. My hope for this project is to see it parallel the major roadways, like I-5 (not Pacific Highway), in order to reduce noise and traffic along Pacific Highway. With schools and homes within one block of Pacific Highway, increased traffic along this corridor will detract from this city's ability to feel like a unified community. A major installation like this can literally divide a community. There are several studies to this effect. Des Moines does not need any further influx of people without first improving our police force. Des Moines police are understaffed and cannot handle even the present growth. This needs to be addressed at the county and state level.</p> <p>I would fully support increased express transit from Maple Valley into Burien, with extensions both north and south to other major corridors. Given this is an earthquake prone region, an elevated commuter light rail system does not make sense from a safety and cost perspective. It would seem to be more cost effective to improve express bus service, and the Sound Transit website. I mistakenly went to the King county metro transit site. This site is almost useless. Now that I have gone through the Sound Transit website, I would actually consider using the bus service more often. I was able to find exactly what I needed. Finally, safety is always my first priority. I often see the transit officers at the bus stops, and it improves my confidence in your service. I am reluctant to support larger infrastructure projects unless the project clearly places safety for the passengers as a top priority.</p>
SOUTH KING COUNTY	<p>By looking at the map of proposed transit projects, West Seattle gets the short end of the stick again and is not getting much in the way of service. Our roads are falling apart and there is limited ways to get out of West Seattle with the Duwamish. We must have very weak speaking representatives. We are one of the fastest growing areas, but maybe we don't have the monied elite to get noticed yet.</p>
SOUTH KING COUNTY	<p>Increase the dotted of light rail</p>
SOUTH KING COUNTY	<p>Taking a bus is as pleasant as going to the dentist. But I love the light rail system and wish it was expanded, especially along the I-405 corridor where every day is a parking lot.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - South King County

SOUTH KING COUNTY	There should be light rail from maple valley/Covington to seattle
SOUTH KING COUNTY	The regional priority is congestion everybody agree on it - which is critical right now. From the perspective of demographics, most of the drivers who are creating this congestion is people going to work, contractors, or people doing business. Why Sound transit is dismissing this fact when designing a mass transportation system focused only in minorities and low-income passengers? If we want to bring real and effective solutions to the congestion in the great Seattle area, the mass transportation system should be designed to take people to work and bring them back home, then low-income people can be integrated to benefit of the system but not design and invest billions of dollars and creating a massive debt in the bear shoulders of tax payers with no effective impact in the dynamism of our economy and the sake of our environment.
SOUTH KING COUNTY	25 years is worthless, my kids won't even get benefits out of this. We need to find a way to address our traffic problems now, not in 25 years.
SOUTH KING COUNTY	To hell with busses and bikes. Build light rail only and subways and speed up the process to 5-7 years tops!
SOUTH KING COUNTY	West Seattle expansion should be moved up in the timeline to occur sooner than 17 years from now.
SOUTH KING COUNTY	Plan for elevated light rail stations in West Seattle by far the most poorly thought out part of this plan. Alaska Junction has nowhere for this to go, it would dramatically decrease downtown views while also decreasing property values. There is no space in the Alaska Junction, particularly with new development that has occurred. Running light rail through Fauntleroy would be better, and connection to existing C lines could extend up to the Alaska Junction for those not able to walk the short distance between Fauntleroy and Alaska Junction. Alternatively, running the light rail along Delridge to White Center would also be a significant improvement to the current plan.
SOUTH KING COUNTY	The rail plans to West Seattle and Ballard need to be pushed up. 17 years? Here in West Seattle, we're growing WAY faster than that. I'd gladly leave my car here in West Seattle and take light rail downtown all the time, with a decent park n' ride in the area.
SOUTH KING COUNTY	I strongly disagree with the decision to build part of the Ballard line at-grade and to use a drawbridge for it, and further, I strongly disagree with taking 22 years to build it. I neither live nor work in Ballard, but even from my vantage point, I can see that it desperately needs grade-separated, non-drawbridge service from downtown, and it needs it sooner than 22 years from now.  Continuing to build a "spine" down to Tacoma is not a good use of ST3 funds. I'm unaware of any transit expert who supports prioritizing "spines" over reliable, grade-separated service in the densest part of cities. Build Seattle the mass transit it needs and *then* move out into the suburbs and exurbs.
SOUTH KING COUNTY	MMore bus, less light rail.PLEASE

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - South King County

SOUTH KING COUNTY	Several years ago, the City of Federal Way and WSDOT co-funded something called the "City Center Access Project". It was very much supported by the citizens, WSDOT, but especially the businesses of Federal Way. It would have created a much needed exit from SB I-5 to 314th ST, and a bypass to 320th. Unfortunately, the City of Federal Way council killed the project because of a few complaints from a small group of residents near the Steel Lake Park. But, it is inevitable that this project will someday be build, as WSDOT will simply force their hand and override the council's decision, in order to safely and efficiently move more traffic on and off of I-5. ST3 should completely review the WSDOT's recommended design for that "City Center Access Project", and ensure that ST3 design for Federal Way compliments that recommended design. Please don't design a light rail plan that prevents the future implementation of the "City Center Access Project" by the WSDOT.
SOUTH KING COUNTY	The tax structure is unfair as it unjustly puts the burden on homeowners/property taxes. Find a better way, such as increasing fares or fees on congested roadways, registration fees, fees for companies, or other creative means that align more with pay-per-use so that this does not keep loading burden on a single population.
SOUTH KING COUNTY	Rapid bus transit should be first and faster timeline for reduction in traffic jams and increased servicing to areas with less routing.
SOUTH KING COUNTY	MORE PARKING at certain stations , current parking situation at Tukwila Park & Ride is a joke for those that work non-traditional hours
SOUTH KING COUNTY	F Line rapid ride bus service on I-405 should connect to the Tukwila Sounder Station for riders to access Sounder to downtown, as well as national Amtrak, and connect with other feeder bus services.
SOUTH KING COUNTY	<p>Bus connections are vital to make this system effective. I identify a 130th station as the most important part of the ballot because it is still left out of the plan despite the obvious benefits it can bring. It will allow two large parts of the city (Lake City and Broadview) to be served with fast access to Light Rail. Lake City is a growing urban village and still left out of the 522 BRT corridor. Now, it won't even be served with a bus connection to a station. At least include a 130th Station to allow fast bus access to a station. Not including this station is emblematic of Sound Transit's pivot away from building rail to create fast reliable access for more riders to its obsession with completing the spine with parking as a priority, ridership and access for densely populated communities be damned.</p> <p>I think the Ballard to Downtown line should be modified to a Ballard-UW line, but it appears that Ballard to UW is no longer an option.? So given that we are going with a Ballard to Downtown line Ballard to UW must be sped up and THE STUDIES AND EIS COMPLETED so the PROJECT can be accelerated and delivered as soon as possible. The estimated ridership is 19,000- 24,000 (a low estimate that doesn't factor in bus connections at I-99, or if considering it in addition to Ballard Downtown and that future north stations in Crown Hill and East Stations at Children's Hospital can add ridership) which exceeds Overlake- Downtown Redmond and Bellevue-Issaquah.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - South King County

SOUTH KING COUNTY	priorities should be given where highest ridership is expected: i.e. Ballard ABOVE OR BELOW GRADE NOT AT GRADE. Link to Everett might be second priority, West seattle third, Redmond forth, Tacoma fifth. BRT 1st priority on heaviest use areas.  NO AT GRADE LIGHT RAIL SHOULD BE CONSIDERED ANYWHERE where there are other traffic priorities.
SOUTH KING COUNTY	Light rail transportation and parking should be the top priority with the ability to go from Everett to Tacoma. With the major stops in between.
SOUTH KING COUNTY	The timeline proposed is what makes this proposal fail. We've already been waiting over 20 years to get a transit system that works. We keep getting taxed to pay for promises that are extremely slow to materialize. Driving busses on the shoulder of already accident prone freeways is NOT a good idea for the Puget sound region - at all.
SOUTH KING COUNTY	Getting buses from remote parking areas like churches near to line up with the Sounder schedule without making more than two stops. The current buses in Kent and Auburn Sounder stations make too many stops to get to my area so I drive to the train station to park. If I had a more direct bus I would park remotely.
SOUTH KING COUNTY	Too many stations on light rail line to Everett. Stations are being put too close together.
SOUTH KING COUNTY	We definitely need a system connecting Covington/Maple Valley to the 405 corridor (Bellevue).
SOUTH KING COUNTY	Since we already have freeways, the bus options are the best and have the most bang for the buck and should be considered top priority along with parking at transit centers. It is ridiculous to pay for services that cannot be used because there is no parking. This has to be the number one priority. It isn't rocket science. If there is no parking then the services will not be used.
SOUTH KING COUNTY	The timeline needs to be modified to give West Seattle residents light rail and quicker, more reliable bus routes!! We NEED this sooner than is planned!
SOUTH KING COUNTY	Light Rail to Issaquah should be a priority, or at least let it connect to Eastgate in the next 5 years.
SOUTH KING COUNTY	Increase frequency of Sounder trains and run trains all day and on a limited schedule on weekends. The Sounder is a lifesaver for me living in South King County.
SOUTH KING COUNTY	I am in much better support of the light rail and sounder improvements than I am in any of the bus options that are proposed. I am not a fan of riding buses - much prefer train and light rail options as would most folks that I know.
SOUTH KING COUNTY	Consider the household incomes of each area and who NEEDS good transit most; not just who has spare time to advocate for what they want. Consider where Park and rides are full (aka there is surplus demand) and how to accommodate more of that. This plan adds to light rail, that has limited hours and is twice the price of the bus. Efficient options from Seatac/Renton/Kent to Seattle and the Eastside will be increasingly important over this time frame due to gentrification in those areas.
SOUTH KING COUNTY	More projects to serve east hill of Kent, Renton, Auburn, Maple Valley where population is growing rapidly and while land for projects may be more available. Parking at Kent Station line needs to be increased.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - South King County

SOUTH KING COUNTY	I am EXTREMELY, let me re-emphasize that, -EXTREMELY-! upset that Federal Way WANTS the Light Rail. But Sound Transit doesn't care. I am EXTREMELY upset that Federal Way VOTED to approve light rail, and voted to PAY FOR light rail while BELLEVUE WAS STILL COMPLAINING THAT THEY DIDN'T WANT IT ... and yet Bellevue gets light rail first.
SOUTH KING COUNTY	I don't know if this is included or not, but the parking garages for the Sounder Commuter Rail need to be expanded. Especially in Auburn.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Pierce County

Subarea	Additional Feedback - Project(s) should be modified in the ST3 final plan
PIERCE COUNTY	Access in the Puyallup orting area for light rail
PIERCE COUNTY	Hurry this timeline up.
PIERCE COUNTY	Light rail needs to be prioritized above everything else.
PIERCE COUNTY	I know current riders are concerned about parking and the reliability of the trains. We feel that expansion is good as long as this doesn't come at the risk of current service
PIERCE COUNTY	We need non-stop Sounder Rail service from Seattle to Tacoma. One train in the morning and one train in the evening would make a huge difference.
PIERCE COUNTY	It would be nice to see a two spine approach to the light rail system. One spine as proposed running the I-5 corridor. The second spine running the 167 and 405 corridor. Even with the proposed plan there is no efficient way to connect auburn and sumner to he rest of the area, even though the sounder train currently stops in these towns. People in auburn cannot look for high tech jobs in Bellevue and Redmond because there is no good way to get there - take the sounder to downtown then take buses or maybe a light rail across lake Washington. How long would that take? Currently it takes almost two hours. Even taking some of the more direct buses take 1.5 hours because of traffic and switching buses. It would be nice to see a more fully geographic approach to add light rail everywhere. If there is no better option for adjusting the light rail proposals. A lot of money needs to be put into extra parking. Look at auburn station for example. Making the platform longer to accommodate longer trains will not help without having triple the available parking for commuters. As a final thought before the current light rail was put it you could go from downtown to the airport faster by bus than you can now by rail. Something needs to be adjusted if people are going to use a light rail from federal way to down town is going to take much longer than current buses. Speed them up or have express trains that only stop at a few stations. It's a bummer that voters turned down the mass transit system decades ago. But a patchwork of buses and rails is not going to solve the problem. Other cities, especially in Europe, have amaizing rail systems. We need to mimic those systems to fix, not bandaid, our current system.
PIERCE COUNTY	You need to provide a strong commitment to providing all day every day Sounder South service to ensure my vote. People in Puyallup, Sumner, Auburn, Kent, Tukwila (Renton) and surrounding areas deserve all day every day rail service just like people who will be connected by light rail. We deserve an adult commuter rail system like San Francisco, LA, San Diego, Albuquerque, Denver, Salt Lake City, Chicago...
PIERCE COUNTY	I work in Seattle and live in Puyallup, with out Sounder this would not be possible.  I would like to see an express Sounder service that services Pierce county stops for those commuting into and out of Seattle each day to reduce our travel times, and improved timetabling with Pierce transit buses to and from Sounder stations.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Pierce County

PIERCE COUNTY	Tacoma is the 2nd largest metro area on the Puget Sound, approx 35 miles to Seattle, yet it takes over an hour to commute. This makes no sense for the two largest metro areas this close together to not be connected by light rail (Sounder is a waste of time based on its limited schedule. It only runs in the early AM and PM with no weekend service). People need a reliable transit that can get them where they need/want to go quickly. (Adding busses is also a waist of time. Traffic is the issue and busses...are in the traffic). Lets face it, cost of living is less expensive in the Tacoma region. I am sure more workers/students/visitors commute from Tacoma to Seattle than from other cities outside Seattle. In short I believe the Seattle - Tacoma light rail connector should be the priority.
PIERCE COUNTY	There was brief talk about parking expansions. It would be great if you could go into detail for expanding the lots in Sumner. Thanks
PIERCE COUNTY	17 years to Tacoma is far too long. I was strongly supportive of this plan until I saw the time frame.
PIERCE COUNTY	I cannot support ST3 unless it includes an MOA stating that the 578 will not be cut or truncated anywhere south of Sodo until there is all-day Sounder, and that the 590/594 will not be cut or truncated anywhere south of Sodo unless the combined headway and Tacoma-King Street travel time of Sounder is less than the combination of the current headway and future Dome-King Street travel time of the 590/594. Other than adjustments to the number of runs on the basis of fluctuating demand, no run of the 590/594 should be removed unless the above condition is met.  For the southern extension of Link, it would make much more sense to add the Tacoma Dome-Tacoma Mall segment (with stations at least every half-mile) and not the segments from the Dome to Star Lake, than to extend the line from Star Lake to the Dome without then continuing on to the mall.
PIERCE COUNTY	light rail should be moved up on priority to allow trans between Tacoma and Everett and all major hubs/ city centers of both people and freight better reliability and transit time
PIERCE COUNTY	Tacoma and Everett light rail should happen sooner. Seattle and Bellevue already have light rail. The short Tacoma line is nice, but it's not apart of the regional network.
PIERCE COUNTY	There is no need for light rail to run along the I-5 corridor from Tacoma to Everett. You did not build a support system that would enable people to get from the farthest stations to Seattle in an efficient manner. The Sounder train solves that. The best option is to focus on making the local areas more interconnected through light rail, and use more train times and bus-only lanes for commuters. A Seattle to Tacoma trip would be approximately 2-3 hours on the light rail based on current travel times from Tukwila to Westlake (about 45 minutes to go maybe 10 miles). That is horribly inefficient. I support expanding light rail to run locally and connect to transit centers in the local area, but there needs to be a faster solution to connect the major cities. The timeline is also terrible for the money it's costing.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Pierce County

PIERCE COUNTY	The sounder trains are great but the schedule and station parking is pathetic. I have travelled all over Europe on trains without any problem at all but getting from Tacoma to Seattle by train is a serious pain if one doesn't work an 8 to 5 schedule. Add express trains that do not stop at all the little towns. Have trains running every 15 minutes in both directions from early morning until midnight. Have buses show up at the train stations when trains arrive. And the really obvious one - have the light rail and heavy rail come together at various points so we could switch systems and get to places heavy rail doesn't go. The sounder should go from Olympia to Bellingham. Maybe even further south.
PIERCE COUNTY	light rail is NOT the answer because it makes too many stops to be an effective commuting option. The best option is the Sounder train service (auto traffic is never a problem) however we need more frequent service and express trains from some areas so they can get to Seattle sooner. Also MUST remove the homeless shelters near King Street for commuter safety reasons. very scary/dangerous for early morning commuters that have to walk past the missions on 2nd avenue. there should be a constant police presence in the area at the very minimum.
PIERCE COUNTY	Accelerate the Federal Way to Tacoma, and Tacoma Light Rail timelines. These are not heavy engineering routes and can be accomplished faster. 20+ years out is too long. Also, find other ways of taxing than sales tax. Our sales tax is too high and regressive.
PIERCE COUNTY	I believe there is too much emphases on the northern portion of pudget sound the southern portion should be higher priority light rail would help with congestion in the south sound this should be the priority we need it now not 17 years down the road
PIERCE COUNTY	There's two major issues:  -the sounder train and light rail do not cross paths in tukwila to be able to switch transit choices to reach all areas. Seems silly.  -parking opportunities at existing and new transit stations (we already have little to no options to park to be able to even utilize these options)  - more sounder train times.. Need a mid day option and a later one at night!  -25 years.. I'll nearly be retired.
PIERCE COUNTY	Expansion to Tacoma should be done quicker than the next 17 years in light of the type of community and demographic it would reach. Tacoma / South Sound is an important part of Washington. Please consider the money put into the system by the port and military environments and do not only focus on the "white collar" communities of Seattle.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Pierce County

PIERCE COUNTY	<p>Tacoma is a major hub for Puget Sound. It is often snubbed by King County. If Tacoma has a higher priority then there will be far less congestion along the entire southern route. The route from the Tacoma dome to Tacoma Community College is folly. We do not need the inner city rail to dilute the pressing need and delay the building of the more important need. In addition, the build should be timed on the total number of cars per distance traveled. That should prioritize hub cities.</p> <p>Also, lack of parking greatly influences rider usage.</p>
PIERCE COUNTY	<p>Americans are not given to public transportation even though there are so many benefits in favour of it. However, government is totally out of control. To support this very expensive project, lets see some government cut back to help we taxpayers pay for it. We are going to one day, balk at all these taxes, particularly when government spending is completely out of control.</p>
PIERCE COUNTY	<p>Should have Speed Sounder Service along major cordior from Tacoma Dome directly via I-5 / hwy 99 pathway to Sea-Tac airport and then Downtown Seattle</p>
PIERCE COUNTY	<p>SHAME ON YOU! The people of Tacoma have been paying into Sound Transit for over 10 years with the promise that when light rail was completed between Seattle to Sea-Tacoma, it would come down to Tacoma. With you and other members of the board with personal agendas, now are asking us AGAIN to invest again for another 10 – 20 years to complete that which has already been paid for, at least twice. Every time one section is complete, you members find another area in which the light rail should go. Mayor Strickland, you and the Tacoma City Council authorized the Planning Commission to complete the 2040 guide for Tacoma’s future, paid for consultants from all over the United States to work with the commission to examine and make recommendations as to what various sections of Tacoma should look like in the future. The 2nd area, currently under evaluation (and within 4 months of going before the council), is the Tacoma Mall Area where the entire plans, predictions and buy-offs included light rail ending at the Mall area where Tacoma makes a GOOD SHARE of its’ tax revenue, along with dealerships. Now you present this garbage that sends it along the affluent section of Tacoma (who really don’t want, or need public transportation at this caliber) only to continue to ignore your bastard children, here in the South Tacoma Area. AGAIN, SHAME ON YOU.</p> <p>[name and address]</p>
PIERCE COUNTY	<p>Removal of projects or further delays to Tacoma/Pierce county would cause me to no longer support Sound Transit at all.</p>
PIERCE COUNTY	<p>King County has been a priority in the ST1 and ST2; time for King County residents to fund projects in Snohomish and Pierce Counties with no whining. I think I have been told that ST dollars have stayed in the counties where they have been collected. Any ST3 marketing should detail that. By the way, ST express buses from Tacoma to Seattle and Everett to Seattle should be considered King County money. I'd want to see data...</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Pierce County

PIERCE COUNTY	The proposed light rail station in Fife should not be so close to the Emerald Queen Casino. While this proposed location greatly benefits the Puyallup Tribe of Indians because it increases customers to their casino and nearby tribal-owned smoking establishments, I feel the new light rail station should be located more centrally in Fife. This is a better option because it shows how light rail brings visitors to the City of Fife, and not to the Puyallup Tribe of Indians.
PIERCE COUNTY	<p>The timeline for light rail to Tacoma from the airport needs to be sped up. I have worked with ST and found them to be politically motivated, unresponsive, and deceptive at times.</p> <p>Please stop running the commercials for new stations you do not need to waste \$\$ that way. The commercials almost make me want to boycott all ST3 projects</p>
PIERCE COUNTY	TCC to Downtown Tacoma light rail should go through 6th Ave. the current route on 19th has very little pedestrian or bike access, and very little between TCC and downtown for people to go to. A route through 6th ave would serve the business district which is already very pedestrian friendly and has many more people and businesses served by the light rail. This route is already identified by the city as a transit priority route. It should also be moved earlier in the timeline to be before the Tacoma-Federal Way link. This would give more people non-motorized access to the light rail, and to Seattle which would increase ridership, and decrease need for additional parking at the Tacoma Dome Station.
PIERCE COUNTY	Longer light rail / Sounder trains. More bicycle storage on both LR and sounder trains,

<p>PIERCE COUNTY</p>	<p>Running buses along the shoulders of highways is an okay idea, but putting light rail in those locations would be an earthshakingly fantastic idea. The problem with your current plan is that it doesn't resolve the gridlock along the I-5 and I-405 corridors. The gridlock is impossible now -- and in 17 years light rail will be too late. The problem with mass transit in Seattle is the traffic coming into the city. Once someone has brought a car into Seattle, they won't switch to a bus. A car will always seem faster and quicker than the bus. And for people living in Seattle, the vast number of cars traveling in and out of Seattle on a daily basis makes taking a bus torturous -- and it makes buying a car attractive. A fast, dependable express light rail line that brought car-less commuters would greatly reduce the number of cars on the roads -- making mass transit a legitimate alternative.</p> <p>Your proposed plan will fail because you are thinking too traditionally -- additional buses will not fix our transportation woes because they run on the same roads with cars. If you complete the light rail path a piece at a time -- digging a tunnel, laying rails, building a station, repeat -- you will have a beautiful transit line -- but you will not solve our transit problems. Think outside of the box and create an aggressive 5 year plan to move people via light rail from Tacoma/Lakewood to Everett in less than an hour. Do that and you will solve our transit problems.</p> <p>Build the length of an express light rail system now -- using above ground along surface streets and/or parallel to existing rail or freeways. Yes. It will cost more in the long run. But if the goal is to move people, you will succeed exponentially. When your focus shifts to moving people -- then setting up fancy stations becomes secondary. Let the full-service stations be the last item on your list. Letting people out at existing bus terminals or park and rides will work in the short run. And, yes, once you have pulled thousands and thousands of cars off I-5, express buses would make sense.</p>
<p>PIERCE COUNTY</p>	<p>They need to go to Northbend WA Link light rail needs to go thur I90 north bend WA. TO down Towe Seattle WA with stops to ISSAQUAH WA. and THUR REDMOND WA. TO CARNTION WA.98014 I90 OVER DOTIE HILL TO FALLCITY WA. and to Monroe WA. TO SNOHOMISH TOWN THUR HYW #9 TO COLLNECT WITH I 5 IN Everett WA and concocnt with a major stop to the casino, in snowhomish hwy#9 please do not forget Eatonville WA to Puyallup WA and thur Woodville the only reason that I think this is because there is peoples family that needs there mothers' is people like my mother that drivers 100.plus a mile five to a job that she took care of her chindlen and got off pulcie asstintaces it floods out in the smaller towns and citys during winter I can;'t for get how much my mother could not get home to cook dinner and eat dinner with us we need to be thogather really EXSAPE these for the childens PEOPLE LIVE IN FLOOD aears that need there family at night. please contact me at [email]</p>
<p>PIERCE COUNTY</p>	<p>Investing more in the Sounder heavy rail system is counterproductive. These trains do not travel both directions simultaneously. Waiting more than 25 years to begin the process of replacing heavy rail with light rail service is foolhardy. In 25 years the right of ways will no longer be available. We are attempting to stitch together two incompatible technologies. I need to see a plan to extend light rail along the BNSF right of way instead of these one directional trains. Heavy rail is a stop gap not a solution.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Pierce County

PIERCE COUNTY	The south sound needs to be more of a priority, 17 years!?
PIERCE COUNTY	The timeline is way too long. We vote in November, 2016 for projects that won't complete until 2024-2039?!?! I don't want to pay for that long and not receive benefits. Light rail is desperately needed, but can't vote for a package that makes us pay, wait, pay, wait, pay, wait, ad nauseum.
PIERCE COUNTY	would like to see the south sounder service run at times other than peak commuter hours as well, i.e. not just increasing the train length/platform/parking/access, but the number of trains/times as well.
PIERCE COUNTY	Why is Pierce County an after thought in light rail expansion. It is already at Sea Tac. The Tac stands for Tacoma. Been Paying For King County for years while our express busses are stuck on I-5 parking lot.
PIERCE COUNTY	Auburn Rail Station is terrible for parking. The parking garage is full by the first 2 trains in the morning, causing many people to park in the residential neighborhoods and walk a few blocks to the train. This is a nuisance for both the commuters and the residents that live near the station. Expanding the parking at this station ASAP should strongly be considered.
PIERCE COUNTY	Bus service isn't the answer unless additional lanes are paved. Traffic is too much. Rail is the answer. More frequency. Route to SeaTac Airport is critical.
PIERCE COUNTY	Please re-prioritize the order of projects. Light-rail east and north of Seattle should NOT be the first priority. Residence in these areas are not as likely to utilize the service and the growth potential in these areas are not as great. Focus on connecting southward instead. These areas have the greatest growth potential for low to medium income families. These residence are more likely to utilize the light-rail. I believe it is important to focus on opening the most successful routes first to give the expansion momentum.
PIERCE COUNTY	Light Rail should be constructed down the middle of EVERY freeway/highway. Too much money is WASTED on "right of way." We are forty years behind where we should be with light rail. I spent over a year in Japan in 1965, could go anywhere in minutes on light rail. Here, NO PARKING, NO LIGHT RAIL FOR MILES and BUS NO FASTER THAN CAR so why would I ride TRANSIT? We have used LINK from SeaTac to Westlake station many times but PARKING DOES NOT EXIST except at airport. FIX IT and THEY WILL COME/USE IT.
PIERCE COUNTY	Tacoma needs to have the light rail sooner than later.
PIERCE COUNTY	If continued population growth is expected, I feel the ST3 plan should deemphasize improvements for busses and bus routes. The existing highways and freeways are already at high capacity. Immediate priority should instead go towards increasing the ridership of existing non-road infrastructure; rail & light rail. Personally, I think that is achieved by improving the accessibility to stations. Examples include more frequent trains, additional and/or larger parking lots, bike routes, bike lockers at stations, station shuttles to nearby parking lots, commuter education programs, rider incentive programs, etc.
PIERCE COUNTY	I would like to see the proposed bus service on 405 converted to a rail project that links with Sounder or lightrail.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Pierce County

PIERCE COUNTY	<p>8-25 years??? We can do way better than that and it's imperative to do so. Part of the reasoning for these expansion programs into public transportation is to accomodate for the growing population and the threat of climate change looming over the PNW. In 25 years we'll be approaching 2032/2033. The population will increase from current levels (7.09 million) to 8.50 million by the time these projects are finished. Moreover, in 25 years climate change effects will be in full display.</p> <p>I think this plan needs tweaking to increase the expedience of these projects. We have built much larger projects in far less time.</p> <p>As for funding, I don't think it's reasonable to rely on the state tax which is a regressive tax that disproportionately affects low-income families.</p> <p>Despite that, it's clear from my previous form submissions that I am an ardent supporter of expansion -- I would just like to see these tweaks.</p>
PIERCE COUNTY	<p>I notice that most of the significant improvements are scheduled at the beginning of the project for the North Sound areas. You might have greater support from the entire South Sound region if you were to move some projects for South Sound areas forward in the planning cycle.</p>
PIERCE COUNTY	<p>Pacific avenue is of major concern. Routes are slow and unreliable. Would be of great benefit to have a link rail run the length of pacific to 172nd.</p>
PIERCE COUNTY	<p>The south sound has paid for RT since at least 1996. We have paid car excise taxes year after year - with little to no benefit. No significant improvement for south sound people is even a distant thought for the next 40 years. And you expect us to pay \$200/person more for another 40 years for nothing? Let Seattle pay for mass transit in Seattle. If we got any return on the monies already spent we would have USABLE service from the south to Seattle. The Sounder is nice but not enough trips per day, no weekend service! Must be nice to be the Mayor of Seattle and say no more cars. We in the south have no choice but cars!</p>
PIERCE COUNTY	<p>The timeline needs to be accelerated. This should be made a priority for the region and all available resources should be allocated to building within about 10 years maximum.</p>
PIERCE COUNTY	<p>Please increase the priority of Tacoma light rail expansion and the tukwila stop. They are not so needed!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Pierce County

PIERCE COUNTY	Any opposition I have is toward the timeline and priorities within the timeline. And any reluctance I have in the tax/average cost is because of how long it would take to develop what I think should be at a higher priority. Yes, I see urgency in developing more light rail. I would like there to be a higher priority to getting it to Tacoma, the state's third largest city. I think express buses should be more highly promoted and expanded, particularly to off-shoot areas like Renton, Ballard, West Seattle, DuPont and along Pacific Avenue. They are less expensive in the short and long run and require much less infrastructure development (and cost much less in the long run!). I don't want to have to pay so much to have to wait so long for what I think we need. I think ST3 is trying to appeal to everyone at once ("light rail everywhere for everyone") and fails to promote what would be best for the region at a "first-things first" approach.
PIERCE COUNTY	We need more rail service ASAP to Tacoma. There's a serious lack of rail. This keeps people from working good jobs and hurts families. We need MetroNorth style service here.
PIERCE COUNTY	Extending Sounder light rail to DuPont without adding parking won't work. I expect there will be very high demand for rail and that residents commuting north from Thurston County will attempt to board at the first available stop in DuPont. Adding parking in that locAtion is a must!
PIERCE COUNTY	It's imperative to get some type of transit in place for Orting. Currently this area has no public transit system in place. People have no way to get out of Orting without a car or a bike. The population has increased and will continue to increase and it's grid-locked in the morning and afternoon to evening. This is a two-lane highway and it's dangerous. People need a way to get to Southhill, Bonny Lake, Puyallup, and Sumner or anywhere else.
PIERCE COUNTY	MOVE UP TIMELINE TO CONNECT LIGHT RAIL TO TACOMA! (Yes, I'm yelling!)
PIERCE COUNTY	Being that Sound Transits record of delivering what they promised on time and on budget has a track record of miserable failure, I can not support this plan. It is way, way to grandiose. It should have been presented in much smaller individual projects. Finish one and then plan the next phase. Show us you can do what you promise. I have no doubt that it would benefit this area to have rapid transit. You build stations with no or grossly inadequate parking - REALLY??? Stations don't seem to be placed where they would be used. You bypassed a stop at South Center mall and ended the line a mile short of the airport. This is just a small example of questionable planning.
PIERCE COUNTY	Light rail between Tacoma & SeaTac should be a top priority, as opposed to being completed in 17 years.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Pierce County

PIERCE COUNTY	<p>To Whom It May Concern:</p> <p>My husband and I will not likely be able to attend one of your open houses on expanding public transit, ironically because of traffic. We both work in Bellevue and live in the city of Milton. Our original plan was to move at least 30 minutes closer to our place of business. However, with the rising cost of rent we are unable to do so as we currently have other financial priorities (i.e. student loans and saving for our first house).</p> <p>Our commute even though we only live 30 miles from where we work is on average an hour and a half one-way, which without traffic should take only 35 minutes. So we wake up at 5:00 am every day just to make it home around 6 or 7:00 pm. We love our jobs and we love the community we reside in but we would also love it more if there were a train service to Bellevue.</p> <p>By providing a train service to Bellevue you would be making a huge impact in not only our own lives but in the lives of others. Less stress of driving and fear of other drivers causing a serious accident. Less money in insurance because people won't have to drive so far to their place of business. Lower gas prices in the area because of the reduction in supply and demand. Less wear and tear on our roadways. And most importantly, more individuals choosing to live farther away from where they work, causing the prices of housing in more exorbitant areas to diminish. However, after reviewing your plan we are unsure why the plan is aimed at building more rail for Joint Base Lewis McChord as we have both driven I-5 South often and the congestion is nowhere near as bad as it is Northbound. It is disappointing and makes us both less likely to support the plan as is this is an ineffective use of taxpayer funds at this time.</p> <p>We have been hoping for years that Sound Transit would find a way to expand their services and if that means we pay a little more in taxes to make it happen then so be it. We are ready and willing to make that sacrifice for the greater good of our communities.</p> <p>We truly appreciate your time and hope that you consider expanding Sound Transit service to Bellevue. Thank you for your time, patience and consideration.</p> <p>Sincerely, [names]</p>
---------------	---

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Pierce County

PIERCE COUNTY	<p>Your bus plans are ridiculous. Buses are no good on 405. You need rail. Real rail, not the Sounder that only runs during commute time. Stop relying on Burlington Northern and build your own rail lines. And put light rail along the entire 405 corridor. Now. There was a rail line that ran from Renton to Woodinville that the dinner train used to run on. You should have moved mountains to acquire that and put commuter rail on it. But you didn't. You only think about how to get people into and out of Seattle.</p> <p>You put out these insulting ads, essentially mocking people for using their cars instead of taking transit. I used to live in Puyallup and work in Redmond. Taking a combo of the Sounder plus bus -- the best options you offer -- took me 1.5 hours to get to work and 2.5 hours to get home. Driving took 1 hour to get to work and 1.5 hours to get home, plus it gave me the flexibility to get into work and go home when I wanted which the Sounder doesn't do. My husband works in DuPont. When we lived in Puyallup, there was literally no way for him to use transit to get from Puyallup to DuPont in the morning and back home in the evening because your ridiculous buses only run one way each time of day.</p> <p>You also should be making plans to get all the way to Olympia. It's foolish to have the largest city and state capital only 60 miles apart and rely on Amtrak as the only non-car connection.</p> <p>But again, your plans are clear. You only care about people who live in Seattle or work downtown. You have no real plans to help the 405 corridor, and your contempt for people who don't use your broken system is evident in your mocking ads. Make transit that works and people will use it. Snottily mocking them in ads for not using it won't.</p>
PIERCE COUNTY	<p>There are always cost over runs. Why would this be any different? Who would be accountable for the final costs and who would they be accountable to? There should be auditors on board at every phase.</p>
PIERCE COUNTY	<p>The south sound (Tacoma to Tukwila) is the worst traffic in the region going north and should be the first expansion and be priority #1. The north sound has express lanes that the south does not. The north sound can wait. ST3 expansion should seriously reconsider the order of these expansions. Especially if it wants tax payer support.</p>
PIERCE COUNTY	<p>There needs to be better support for parking at the Sumner station. I have received multiple parking tickets for very questionable violations (within x number of feet within crosswalk, even though my MINI Cooper is definitely not impeding any visibility). Bus reliability is a huge issue, especially with the Express bus lines.</p>
PIERCE COUNTY	<p>Less Bus, More Light Rail. We need light rail going down to Auburn and Puyallup. We need it from Everett to Redmond, We need it from Issaquah to Auburn to Federal Way. We also need to ramp up the timelines, Issaquah should already have light rail, 25 years from now is so far behind that people will have started moving away from that area because traffic is so bad before it comes on line.</p>
PIERCE COUNTY	<p>The BRT should connect with the Tucwila Sounder Station for those riding train to there then catching bus to Bellevue. Actually what we really need is a second train that goes up the east side instead of to Seattle.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Pierce County

PIERCE COUNTY	Parking at the South Sounder train stations is desperately needed ... especially in Puyallup and Sumner. Extending the light rail to the Tacoma Dome Station so that someone could now travel from Tacoma to Downtown Seattle every 8 - 10 minutes at the busy times of day would be HUGE, especially since it would also allow for users to stay in downtown Seattle later in the day / evening and travel on weekends... I think you'd see an even bigger up-tick in riders and a great benefit to all business downtown Seattle if there were so many more opportunities for those of us in the South end to get to Seattle easier without having to drive and deal with parking.
PIERCE COUNTY	I will probably be voting no on this plan because of the time frame. As a long-time Tacoma resident i feel Sound Transit is doing our community a great disservice. There is no good reason Tacoma should be waiting this long to finally connect to SeaTac airport, this should have been done in ST1
PIERCE COUNTY	I'd rather see Seattle-Tacoma options (lite rail extension) have sooner priority than some of the earlier 8-25 yr order of priority, but all of it is necessary! I-5 needs relief and rail seems best way to reduce cars on existing highway.
PIERCE COUNTY	Higher priority on the South commuter (heavy) rail upgrades in a quicker timeline. There is an existing demand to use those trains and more people would use them if there was a greater capacity per train, more parking at Auburn, Kent and Tukwila stations and more trains available (especially later departures out of downtown Seattle to the south).
PIERCE COUNTY	Speed up the plan to Tacoma since Tacoma is a pretty big city after all
PIERCE COUNTY	The investments in this plan seem needlessly diffuse. The public would be better served by a plan with a more aggressive timeline that was built around one prevailing vision, be that bus-only lanes on roads/freeways, greatly expanded light/elevated rail, or significant investment in a heavy express rail/urban bus route combination. There needs to be a greater focus on mass transit options that are SIGNIFICANTLY faster than sitting in traffic, otherwise mass transit will continue indefinitely to be under-funded and under-appreciated by the public and the region's growth will choke on our inability to efficiently move increasing densities of people. Also, an increased gas tax should play a large part in funding these projects.
PIERCE COUNTY	Finish the light rail from Tacoma to Everett FIRST! Bus on the 405 second.
PIERCE COUNTY	I really feel they need to go back to the drawing board and focus more on improving what we already have. Putting in more runs on South Sounder during peak hours, more bus services offered. Create a better parking situation for commuters now. You keep upping the price to commute, yet commuters can't find places to park, trains don't run often enough and bus routes keep getting discontinued..... This plan needs to be modified, think outside the box!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Pierce County

PIERCE COUNTY	<p>My wife and I use the Light Link rail system from SEA to downtown Seattle 2-3 times a year; bus from Lakewood station to downtown Seattle 4-6 times a year.                  \$17 a month, plus current cost of riding seems excessive.                  As prudent stewards of our tax dollars what taxes will be reduced to offset this increase? Other governmental entities are also proposing tax increases.                  WA State &amp; Seattle, King County want more and more \$\$\$\$\$\$\$\$\$\$\$\$\$\$\$\$ without identifying improved efficiency to better use tax \$\$\$.....</p>
PIERCE COUNTY	<p>The Projects involving south of Seattle are critical due to the fact that many people have been priced out of Seattle, and are forced to live in Towns/Cities further South. I would place Rapid Transit to Tacoma and Light Rail to Tacoma as number 1, following Lynnwood and Everett, followed by West Seattle, and then Bellevue. The people who are commuting from north and south of King county are obviously commuting that far because they can't find work near their residences that pay anything decent. Bellevue, however, is home to many companies!</p>
PIERCE COUNTY	<p>Priority should be given to alleviate traffic between the south end Redmond. The traffic between Sumner and Bellevue is unbearable.</p>
PIERCE COUNTY	<p>Light rail to and from Tacoma needs to be completed far sooner.</p>
PIERCE COUNTY	<p>I support the need for more transit, light rail and overall ST3 - but I don't think it fairly captures the transit needs for Pierce/South King Counties. It seems WAYY tooo centric on Bellevue/Eastside/Seattle/North Seattle.</p> <p>The biggest transit gaps in Pierce/South King Counties are 1) lack of light rail linkage between Seatac Airport and Tacoma Dome Station and 2) lack of more frequent &amp; weekend Sounder service.</p> <p>It seems weird and counter-intuitive that the plan proposes bus-shoulder improvements on the interstate highways instead of just shooting to run more frequent Sounder service with additional train cars.</p>
PIERCE COUNTY	<p>Bus Services should not be part of this plan. Look towards the future and population growth; more people, more cars, and less room. No more bus services ! ! ! Bus service doesn't work today. Make the investment in light rail that encompass the whole picture. Light Rail I-5 Olympia to Seattle to Everett. Light Rail I-405 SeaTac to Alder-wood. Light Rail SeaTac/Renton (Hwy 167 to Hwy 512) to Lakewood.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Pierce County

PIERCE COUNTY	I believe light rail should replace I-5 completely. Make the light rail more important than cars. Lower emissions, find a way to help us help ourselves. Increase the size of park and ride by 5 times. Increase the number of times routes are made on light rail and commuter rail. Make ST3 the normal of the Puget Sound and not the exceptional event. Other counties and east coast people think we are no way aggressive on our future planning. What is the plan to reduce 75% of vehicle off I-5, I-90, 520, 405? Come on people let's stop fooling around, we know what we need to do. The elephant in the room is WSDOT promotes cars and freeways while ST3 carries the load of Mass Transit. I think we should restructure WSDOT and put the highways under Sound Transit. That way WSDOT will engage in reducing the vehicular attack on the state of Washington. We do not need any more future plans to expand the use of cars, it criminal to the future of this region to do so.
PIERCE COUNTY	More parking and access from ferries
PIERCE COUNTY	Although our infrastructure is very outdated in this area, I have little faith in our leaders fiscal responsibility when spending on such huge projects. We the people have enough of a tax burden, but what percentage of us hardworking tax paying citizens will truly benefit from all of this?
PIERCE COUNTY	Most of the congestion in Puget Sound is related to people going to and from work. There are huge corridors that are left out of this plan. It seems that the focus is on pleasing as many people as possible vs minimizing congestion. If you were to link this plan to the why vs population growth, you may get more of a by in. Also, how does this link into the DOT plans for Puget Sound. Seems like we are spending a lot of money for the convenience of a select few.
PIERCE COUNTY	The light rail service being added in Tacoma serves a limited community. Is there another route the train could take to service the stadium district and hilltop?
PIERCE COUNTY	There must be improved public transportation along the I 5 corridor from Tacoma to Seattle. The traffic backup on I5 southbound around the Fife curve is horrible especially during peak hours in the afternoon. As Seattle continues to be more expensive and urban sprawl increases, Tacoma area will be greatly affected. Southbound Seattle needs to take precedent
PIERCE COUNTY	Your time lines are too long. There is a problem with transportation now! Please speed up the timeline.
PIERCE COUNTY	Projects that extend infrastructure North, South and East should be priority. Building new stations along routes should not be priority.
PIERCE COUNTY	The timeline for implementation of all improvements should be accelerated. Transit is strongly supported by business and individuals and the need for it is excruciatingly clear. Getting carbon emissions down will not happen if transportation methods are not massively changed. The cost to business of extended and undependable commutes is going to stop companies from locating here. We need to show our commitment to mass transit and build out a transit system now.
PIERCE COUNTY	Parking at existing rail stations could immediately help access by more users. If there is no place to park, no one will use the service.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Pierce County

PIERCE COUNTY	I have slight concern about light rail going to places like Everett. If light rail will go to the Sounder station area in Everett, then would the Sounder train lose hundreds or thousands of riders, who may abandon it for light rail only?
PIERCE COUNTY	Many of these projects are phenomenal ideas, but it would be nice if it were faster to be deployed. In particular, I'm excited about the idea of the light rail to connect Tacoma to the King County light link system, but 2033 is a long ways away and traffic is just going to get worse each year.
PIERCE COUNTY	Overall cost is too high. Many of the projects are decades away from completion which raises the possibility that they will never be built. Not sure that ridership will be at levels to justify the high cost.
PIERCE COUNTY	I think that a train station should be added near the Boeing access road that connects the Sounder to the light rail. This would offer better access to the industrial area along the Duwamish river area and the Rainier valley for commuters on the Sounder. This was part of the ST1 plan I believe.
PIERCE COUNTY	The tax plan will never pass. I have used transit all around the world and nation and understand the need but it is just too much ask. Go for less. Add Sounder trains during the day and experiment on weekends. The schedule can be limited, allowing a person to go to and from the North and South Sound on a train to Seattle on weekend days.  I do not see the need to expand light rail to Tacoma Mall. The Mall is a commercial enterprise. Unless the retail stores are going to kick in, the PT bus service to Tacoma Mall station is fine.  Connecting Federal Way and Des Moines via light rail to Tacoma is a good plan but is it necessary. Can we connect light rail or increased buses from those areas and increase Sounder service to Tacoma? This is how the suburbs in the Chicago area work. Trains to the inner city, commuter rail and bus outside.
PIERCE COUNTY	Light rail to Tacoma should be the first priority!
PIERCE COUNTY	I think Tacoma needs a more reliable link to Seattle first and foremost, as well as an easier access from Puyallup to Seattle. It's very difficult for me to use public transit in South Hill, and I would love it if that weren't the case.
PIERCE COUNTY	Tacoma should be sooner on the list. It's growing quickly and will grow beyond the current capacity of mass transit far before the scheduled improvements
PIERCE COUNTY	I don't trust the people making the recommendations and spending the money
PIERCE COUNTY	Seriously, scrap light rail. Use the same type of routes, but instead of rail lines, make Bus-Only dedicated highways. Buses don't have to queue behind one another, there can be point-to-point routes as well as ST Express routes on the same highway. Plus, the Bus infrastructure exists if one goes down, we can leverage electric buses, and there isn't near the capital investment as light rail.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Pierce County

PIERCE COUNTY	This infrastructure improvement (ST3) is very important to the well being of all people from Tacoma to Everett and would strengthen our cities and economies, this needs to happen as soon as possible. Increase the taxes, the cost per person, to expedite the work, hire more people and commit serious resources to this project. Projects like this should bring everyone together to achieve something wonderful, it will move us into the future. So increase the taxes for this, it is necessary.
PIERCE COUNTY	Increase operation of the Sounder Commuter train to evenings and weekends. Expand reverse commute hours/trips from Tacoma to Seattle.
PIERCE COUNTY	I would like to see a breakdown of how much money from taxpayers comes from the different areas and where it has been used in Stages 1 & 2 and where Stage 3 tax dollars will be used. My sense is that the South Sound has subsidized this project for years with very little to show for it in our area compared to the timelines proposed when we were asked to approve bonds in the past. Meanwhile if we want to get something done that Seattlites don't use, we have to pay to have it built and then pay a toll to use it in perpetuity (Tacoma Narrows Bridge). I no longer have faith in your planning system.
PIERCE COUNTY	I think there is a greater need for the Tacoma expansion to be redirected to the Tacoma Mall instead of Tacoma Community College. I think the Sound Transit would double the amount of riders projected to use the proposed line and it would allow for a much greater impact for the community. By having the proposed line go to the Community College, Sound Transit is limiting themselves to the students and faculty that frequent that area and neglecting the massive amount of traffic that flows in and out of the Tacoma Mall area on a daily basis.
PIERCE COUNTY	Where would people use the service the most? Start with them first. If most of your commuters are coming from Tacoma to Seattle for example then those projects should be supported and constructed first.
PIERCE COUNTY	Rather tired of funding projects for seattle. Will not vote for, agree with, or support with any of my personal income to more projects supporting seattle/king county until commuter and light rail progress is made in the south sound region.
PIERCE COUNTY	With continual growth of the south King County and Pierce County, it is imperative that access to public transit grow along with it. One of the first steps should be increasing capacity for parking at Southland Sounder lots. Parking at the Puyallup lot has long ago reached critical mass, and the continued growth of that area will guarantee that unless you're on the first train, you'll never find a place to park within a reasonable walking distance. Improving capacity on the South line lots should be the first priority.
PIERCE COUNTY	We need bike lockers at the stations, not just bike racks. Unless there is constant security at each station (which there is not) bike locks get sawed-through and bikes get stolen A LOT! Also two bikes to a car, especially now that the Link goes to UW makes it really difficult to find a spot to get on with a bike in the middle of the line. We need more space at stations and on trains for bikes. I ride every day to work, and bike/ST bus every weekend.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Pierce County

PIERCE COUNTY	The plan for Ballard to West Seattle, although important, is designed wrong. The system overall needs to be built with West/East lines crossing the main North/South line. To get from Ballard to downtown, ride a line east to the main corridor, transfer at UW, head south on the already built line. Build a line that goes from Magnolia, under Queen Ann, crosses at the Capitol Hill station, and continues east to Madison Park. East/West lines could connect West Seattle by heading east to Leshchi. West Seattle folks would transfer to the North/South line near the stadiums. Add trains North/South, do all the East/West lines as shuttle lines that go back & forth East/West then West/East. East/West lines at 145th, 130th, Northgate, 65th, & UW stations would cover more of the city for less money, than building additional separate North/South lines. There is no need for an Interbay/Ballard tunnel because any tunnels should travel under 45th in the U District North to South. Seattle tall and narrow shape make this plan feasible, and for far less money than what the West Seattle & Ballard people are proposing.
PIERCE COUNTY	The cost is too high. For all tge money we are spending on the rail system we could give everyone free bus service for years
PIERCE COUNTY	Additional funding should be allocated to increase bike access and pedestrian access to transit stations - especially Tacoma Dome Station.
PIERCE COUNTY	Don't ask me to rate my level of importance values on all the proposed action items only to propose a plan in number twelve that doesn't take into account my valued rankings. Connect Tacoma to Seattle and make the link rail system move people to places of high employment.
PIERCE COUNTY	NO MORE additional RAIL!!! NO MORE TAXES TO PAY FOR MINIMAL IMPACT RESULTS. BUSES WORK WELL. ADD HIGH TECH ROAD SYSTEMS FOR AUTOMATED DRIVING. Thank you for opportunity to give feedback.
PIERCE COUNTY	Tacoma Link Light Rail really [explicit] up traffic for the whole length of downtown. I'd love to see it extended to TCC, but this badly needs fixing first.
PIERCE COUNTY	Pierce County has by far the worst traffic. Rail projects there should have the highest priority.
PIERCE COUNTY	Monorail extension to west Seattle is cheaper and easier to implement than light rail.  Also the 25 year timeline needs to be reduced.
PIERCE COUNTY	GOVERNMENT SHOULD CUT THEMSELVES BACK AS THE REST OF US HAVE TO DO, TO HELP PAY FOR THESE PROJECTS. WE, LITTLE PEOPLE CANNOT CONTINUE TO BE TAXED TO DEATH JUST BECAUSE GOVERNMENT WANTS ALL THESE PROJECTS.
PIERCE COUNTY	Don't route Tacoma light rail down S 19th street to get to TCC. There are few businesses or homes along that route and nothing is on 19th, you have to walk several blocks to get there from 19th. Instead, send the route down S 6th Ave and then turn south on Mildred for two blocks to get to TCC. This takes the route through much much denser commercial and residential areas along the way. The route will be far more useful and popular, it also builds on existing expansion plans. I support rail from downtown to TCC, I don't support it along 19th.
PIERCE COUNTY	More parking, faster
PIERCE COUNTY	More focus on projects in the 167, 405 corridors

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Pierce County

PIERCE COUNTY	A greater priority should be given to extending light rail to Tacoma and improve the Tacoma-to-Seattle Sounder route.
PIERCE COUNTY	We need train service to Federal Way and Tacoma NOW not in 17-25 years!!!!!!!!!!!!!!
PIERCE COUNTY	Needs better distribution of riders at the stations. Better bus service
PIERCE COUNTY	BRT will not be a helpful long term solution for 405.
PIERCE COUNTY	Add more Sounder trains at different times of day and weekends and extend service South.
PIERCE COUNTY	Timeline too long; can't wait 25 years....escalate.....
PIERCE COUNTY	We passed ST2 in 2008 to start the process of extending light rail from SeaTac to Tacoma. Now you want to wait until 2033 to complete it? That's absurd. If you didn't fulfill your 2008 plan to get properties and do the planning for the project under the last set of taxes, why would we think you'll do it now?
PIERCE COUNTY	I think the time line to expand light rail in Tacoma is too long. There should be a balance between all projects time line. Each individual improvement should be worked on simultaneously bit by bit so all commuters can benefit
PIERCE COUNTY	SOUTH SOUND PROJECTS NEED TO BE ADDRESSED.. SEEMS EVERY THING IS SEATTLE BIASED. WE ARE NOT BENEFITING EQUALLY.
PIERCE COUNTY	Expand train service with longer trains and more trains now, expand light rail to Tacoma now, take care of parking and quit misrepresenting the so called parking study...it was not a success and by adding costs you will increase carbon footprint rather than reduce.
PIERCE COUNTY	We are retired. We would gladly help pay for projects if they were likely to affect us before we are dead!
PIERCE COUNTY	<p>Please look into light rail to the Tacoma Mall area.</p> <p>I think the priority is to build light rail where it encourages TOD, not sure why so much of the Link both N and S of Seattle are next to I5.</p> <p>It's more important to me to have Link to the Tacoma Community College than to have Link to Federal Way. I also think you should consider Link down 6th Ave rather than 19th Ave.</p> <p>It would be great to have more Sounder service, especially on the weekends, and a southbound train during the week in the 7 or 8pm hour.</p> <p>Overall, I encourage you to find ways to speed up this plan however possible.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Out of District

Subarea	Additional Feedback - Project(s) should be modified in the ST3 final plan
Out of District	<p>*Everett should NOT divert to Paine Field</p> <p>*Ballard should not go by interbay - will flood way too soon. Go via Fremont.</p> <p>*UW-Ballard is more important</p> <p>Most importantly, this package is too slow.</p>
Out of District	Would love to see Everett get light rail sooner
Out of District	It is extremely important for the light rail to go to everett however please run it up the 5. Paine field is a waste of time and resources
Out of District	The worst commutes are currently from the north where I live. I would like to see the focus be on improving that commute first rather than 35 years from now
Out of District	I would like to see a commuter option by train from olympia using existing amtrak stations and rail lines that better align with 7am to 5pm work schedule
Out of District	Sounder light rail should run on a regular basis - not just during commute times. People who work non-standard hours or wanting to travel on the weekend could use it too.
Out of District	<p>Please follow best practices for designing transit. Sometimes the cities ask for things which are contrary to best practices, and you end up giving in to their requests. You guys are professionals. Do what works, even if it's not what the cities asked for.</p> <p>This includes, not placing light rail stations by the freeway, this decreases the walkshed; use Sounder/high-speed heavy rail for long commuting distances, not slow Link; etc.</p>
Out of District	Light rail to Everett in 25 years is far, far too much time. This is needed in 8 years given the growth in areas surrounding Everett.
Out of District	<p>Downtown Seattle to Ballard MUST be grade-separated throughout. NO VEHICLE CROSSINGS.</p> <p>Please add a Ballard-UW route study at the VERY least.</p>
Out of District	<p>Light Rail should never be at grade (Ballard).</p> <p>Rollout times, especially for simple BRT project are too slow. Overall plan window is way too slow.</p>
Out of District	I would argue that the light rail to Everett should be moved up the list of priorities for multiple reasons: A) the buses are always full, B) there is a mudslide concern on a regular basis at the Everett Station with the train, which then impacts the overall commute as well as bus loads, and C) for those that are regularly commuting farther distances and given the # of people taking this route this would take more people off the roads for longer periods, decreasing the overall traffic for all routes on I-5.
Out of District	Need to speed up the plan for greater EASTSIDE reach (ISSAQUAH etc...)

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Out of District

Out of District	Get light rail to Everett much much sooner. Boeing and the rest if us are so squeezed. Please, much sooner.
Out of District	None of this Ballard to Downtown "it would include a mix of elevated and at-grade light rail on 15th Avenue NW and Elliott Avenue West and a rail-only movable bridge over Salmon Bay." No at-grade along 15th W and no movable bridge over Salmon Bay. Tunnel under the bay like ST 2 in NE Seattle. ST2 pays for tunnels all the way to Maple Leaf in single family zoned neighborhoods with little to no TOD potential for an incredible cost! Central Ballard Station deserves to be a subway station. NO at-grade alignments for dense NW Seattle! NO DRAWBRIDGES! Ballard and the region require and deserve better solutions than what is currently being proposed. The Ballard-Downtown project needs to be delivered sooner too! Please don't compromise on ST3 deliverables in Seattle just to cater to the cries of the low density suburban areas. Sound Transit officials: Please BE BOLD and propose TRANSIT SOLUTIONS that are WORTH THE BILLIONS you are requesting!
Out of District	Do the Link extension to Tacoma, and Sounder rail extension to DuPont really need to be linked? There are a lot of south sound (DuPont, Olympia, Lacey & south) residents who travel north to Seattle or Tacoma for work making the Ft. Lewis traffic extremely bad on a daily basis. With Sounder extension to DuPont, many of those individual would be able to utilize Mass Transit to Tacoma & Seattle for their jobs daily.
Out of District	<p>a. The north expansion study from Everett to Everett Community College needs to continue to some point just north of Marysville because I-90 is already often congested and if it will take 25 years to get to Everett, the clogging on I-5 will be horrendous to Arlington by then.</p> <p>b. ST needs to expand its engineering and support staff by a minimum of 100% so the ST3 project can be completed in half the time. Gads, if current ST3 timetable was used for WWII, we'd still be fighting the Axis powers. I believe cutting the timetable by half would ensure a more favorable vote because people I know in Seattle are bemoaning how slow the building pace.</p> <p>c. Six years to Northgate, Lynnwood five years? Really! Can't you hire enough employees and work 24/7 to get Northgate to three years; and after watching slow pace of Angel Lage, get elevated track sections fabricated and erected at a faster rate? Maybe ST3 needs to include funding to expedite ST2.</p>
Out of District	The proposed timeline for extending light rail to Everett is unacceptable. From the beginning, the Sound Transit board promised to make this a priority and it appears that they are backing off on their promise. ST3 should focus on finishing the spine of light rail as a top priority, and expansion into predominantly residential areas (Ballard, West Seattle) should be lower priority.
Out of District	Great plan that includes the whole area, but the project timeline is unacceptable. I will be voting "No" unless you can reduce the schedule. Stop pandering to NIMBYs. Adequate parking is required for the light rail stations in the suburbs, where cars are the main source of transportation by far. The Tukwila station is great but the parking lot fills up very quickly. Consider charging a parking fee to offset the cost of parking structures. Consider adding more east-west routes, like Ballard to UW.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Out of District

Out of District	The I-405 corridor continues to be ignored as I still don't see any proposed plans to add light rail. Traffic through Bellevue and the S curves during peak hour is extremely heavy yet your focus is mostly on connecting areas that don't yet command the volume of cars that I-405 does. If we truly intend to move people by the masses and be a part of a mass transit system, not only do we need to target the congested areas but also make it an efficient alternative, particularly for people living far away from the Seattle area who currently endure a long commute by bus or car. I would be a stronger supporter of light rail if it incorporated express trains into its infrastructure. The way I see it, light rail is built mostly for people commuting short distances or the tourist visiting the Seattle area with time in his/her hands.
Out of District	Given the current state of the commute from Everett to Seattle or Bellevue I believe there should be a bigger priority placed on extending light rail service to Lynnwood and on to Everett in advance of the 25 year time table. While I think having this plan is extremely important I feel it doesn't prioritize those coming in from Snohomish county enough. Given that I-5 has become horrendous even for the carpool lane (I take a vanpool and we use I-405 and then I-90 in order to reach South Seattle, choosing to drive an extra 5-10 miles each way to save 15 minutes) and that the Sounder service for the North end is not dependable in the winter months and also not conveniently located for most North end residents, I feel that with prioritizing the North end would greatly improve ridership. I live 5 minutes from the Ash Way Park and Ride and used to bus in to work all the time but the reliability of the transit system has pushed me out of this model.
Out of District	We MUST consider moving the Everett project up in the timeline! We cannot afford to lose out on the manufacturing opportunities that Boeing has to offer, regardless of whether they play well with others. Many families in the region rely on their employment. Also, we will have an airport soon, which means that mass transit needs to be ready to move people NORTH for access to this service. Spreading out congestion and increasing economic opportunities.
Out of District	If you can't get light rail faster to Everett, then I am a no vote on everything. Why are the ST planners so against this plan and risk the entire package to fail because they don't want to go to Paine Field? Such a waste of political assets to play this game.
Out of District	22 years for Ballard is absurd. That should be done immediately. Also, there need to be improvement for east-west just north of the lake (i.e. between Fremont and UW) and more services in and out of Greenlake
Out of District	20+ years is a long wait. I may be dead before this is completed
Out of District	You need to get to Everett sooner than 2041. Much, much, much sooner.
Out of District	People need to by into light rail linking the entire puget sound and compared to similar communities. If BART is a good example - use it.
Out of District	Grade separation all the way to Ballard

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Out of District

Out of District	<p>In general, the draft plan seems to focus too many resources on the outlying areas and not providing enough to the already dense and clogged sections within Seattle. I cannot see lightrail to Tacoma being very useful. I don't understand why the huge price increase caused by the Paine Field diversion was required. And as much as I'd like to have rail service out to Issaquah, I don't see a connection at Wilburton being useful for the vast majority of riders, and it addresses a particular area where existing traffic is really not that much of an issue.</p> <p>I would like to see a major reduction in the investment going towards light rail lines in the outlying areas and a reinvestment of that money into the core to improve the areas that are in a much more desperate need for the type of service that light rail can provide. I would like to see a move away from the goal of completing the spine with light rail, because these outlying areas make much more sense to serve with upgraded heavy rail systems, like Sounder trains.</p>
Out of District	Change the timeline. Get tunnels built to West Seattle and Ballard first.
Out of District	BRT should be "real" BRT. If true BRT, with fully dedicated right of way were developed, this could provide an attractive, but less expensive and more flexible alternative to light rail options. That being said, certain disadvantaged areas (Everett and West Seattle and probably others) should receive full light rail to encourage economic equity.
Out of District	Light rail down I-5 from Lynnwood to Everett by passing Boeing and west should be considered to shorten the time to build light rail north.
Out of District	It cost to much, but really it take to long. Ill be old and dead before it is all done. Please focus on the inner city, west Seattle and Ballard light rail routes, and light rail across the lake as this is a major source of all the bottlenecks.
Out of District	<p>The cost effectiveness of the Ballard line is an order of magnitude more than Lynnwood-Everett ( the ridership and service populations are a joke ). Our money would be much better spent adding more LRT on the urban core and upgrading sounder (commuter rail ) and express buses to round out the megaregion connections.</p> <p>Need more central city subways to reduce local VMT in the places where traffic is the worst. This plan doesn't do that. It just let's people live further from the core.</p> <p>If u are going to spend a half dozen B's, why not upgrade your real rail line to be less impacted by freight.</p>
Out of District	The station at 130th NE should be included in the plan and constructed rather than left as provisional.
Out of District	Efforts to support Ballard need to be moved to the top of the list. Density increase has been astronomical over the last two years and shows no signs of slowing.
Out of District	Everett can't wait that long. Please are moving out of Seattle because of cost. Everett consistently is under-served - finish the spine first!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Out of District

Out of District	<p>Station at 130th should be included!</p> <p>Project delivery should come with shorter timelines.</p> <p>Within city projects should be prioritized over between city projects. We should be able to use transit to get to everyday activities not just to get to a faraway job.</p>
Out of District	<p>The west Seattle line should go down Delridge instead because the ridership would be better and could easily add a stop for south Seattle college.</p>
Out of District	<p>Being retired I really don't have a dog in this fight. However, I periodically travel between Renton, Puyallup and Olympia and use the 167/405 HOV Good-To-Go lanes. This, I like. I understand the need for additional light rail. My position is the emphasis should be expansion to the eastside first(Bellevue, Issaquah, Woodenville). With the Sounder train available from Tacoma and Everett public transit modes can be enhanced to provide additional service/connections to existing stations while other transit priorities are met. I am reluctant to vote on the "full meal deal" give the past record of cost overruns and numerous delays. Prove to me ST can complete phase one in a timely, cost-effective way, and then I'll consider the proposed ST3 package. But, being 73, I doubt I'll be around to see the completion of even phase one.</p>
Out of District	<p>25 YEARS TO GET TO EVERETT IS A NON-STARTER. IF THAT STAYS THE SAME YOU WILL HAVE A PRO-TRANSIT VOTER VOTING NO</p>
Out of District	<p>Caving to Kirkland's demands by replacing light rail with BRT was a huge mistake. Kirkland needs light rail, not BRT infrastructure.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Out of District

Out of District	<p>Regarding the Link extension to Ballard that is to be completed in 22 years, I feel that both the favored design and lack of priority given to this project in the draft plan fail to address both current and future transit needs in the area. Ballard currently has a population density approaching 10,000 residents per square mile, which is enough to support light rail today, and delaying the implementation of light rail by two decades will certainly have an adverse impact on the area both quantitatively in an economic sense, as well as qualitatively in terms of the quality of life for those who live there. It is highly unlikely that current transit options to downtown (the Rapid Ride D and Route 40) using Leary Way and 15th Ave W will be adequate as the city continues to grow in both population and density northwards. While King County has added 185,000 residents between 2010 and 2015, and Seattle has accounted for approximately 30% of this growth, the real imperative when it comes to determining where to implement light rail is population density. The advantages of light rail over other modes are also amplified when it is implemented below grade in high density areas, which brings me to my second point. If the Ballard link must be delayed for a full two decades, I feel it should be configured to meet the needs of the area two decades from now, rather than current needs. I strongly favored the tunnel option below the ship canal that would avoid service interruptions, and more importantly, below grade service north of the ship canal as I find it highly unlikely that by the 2030's or 2040's a future right of way could ever be established northward along 15th Ave W going North or along Market Street East towards the U District Station without massive disruptions and costs. Quite simply I feel that any increased costs associated with a below grade option for both the ship canal crossing and Ballard Link will be more efficient in the longer term and and happier to pay those up front costs now and for the coming years, than settle for a system that under-performs.</p>
Out of District	<p>Downtown to Ballard light rail should be build entirely underground. ALL light rail within Seattle city limits should be build entirely underground except when overhead tracks are feasible--over the Duwamish, for instance, to get to West Seattle. To build transportation for a city that is already dense and will only grow denser any other way is shortsighted and poor planning. It might be CHEAPER to build light rail above ground, requiring a bridge that would need to CLOSE periodically for boats to pass under it, but it is most definitely NOT the right choice.</p>
Out of District	<p>The idea that light rail should be used to enable better access to Seattle, rather than being extended to improve mobility within Seattle, is an extreme flaw. If people can't get around Seattle without a car, they're not going to use public transit to get into the city. Buses don't cut it for getting around in the city. The ideal plan would be light rail within city limits and buses/souder rail to commute in. Using buses for commuting could draw the insanely long lead time of this proposal in, too. And please ensure that any light rail system avoid at-grade installations. The point is to reduce traffic.</p>
Out of District	<p>I am amazed at how long it will take to get this plan complete. Other regions do much more in a shorter amount of time. I do not support this plan because of the time it takes and think that while I contribute to the plan, I will never see any benefit due to my age and how long it will take to support the north sound area.</p>
Out of District	<p>25 years to Everett... are you kidding me? It take 90 minutes most days to drive to Seattle you need to hurry the [explicit] up!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Out of District

Out of District	<p>Where is the density? Seattle. Where do people work Seattle (mainly). We need to move people in and out of the city with greater efficiency out of cars and out of buses. More buses are not the answer if they are in traffic with the cars. Buses are too small and cannot efficiently move the masses like trains and trolleys. One reason people commute on a bus is to avoid parking fees or they can't own a car in Seattle and pay for rent and parking. RAIL, RAIL, RAIL. Rail as far north then going south south through Ballard, through West Seattle and as far south as possible. Same idea going east to west and visa versa. Trains not buses. More SAFE bike path options as well. See you at the Ballard meeting.</p>
Out of District	<p>Don't do this as it will NOT cost \$200/year - it will expand to \$200/month because the state of Washington is incapable of projecting how much a project costs. Let's consider for a moment the tunnel project in Seattle that has gotten 400' in over a year and the costs are exponentially more if not 100% more than projected. And didn't the State have to guarantee the company behind Bertha because they were not solvent?</p> <p>The problem with this state is that they build things that people are not interested in - instead of putting the tax payer dollars into new lanes on roadways so that the average working Joe can get to work without horrible delays.</p> <p>I do appreciate the state opening up the lanes on I-405 in early morning and evening. This is a good use of highway dollars as most commuters are home by 7 p.m.</p> <p>I have had to drive I-405 from Lynnwood to Puyallup the last 10 months and the only thing that saved my trips was traveling in most off-peak hours.</p>
Out of District	<p>Timeline is far too long. It should take 10 years max to get light rail to Everett, not 25!</p> <p>Also routing light rail past Boeing will increase travel times between Everett and Lynnwood, and thus decrease ridership. Why not keep light rail next to I-5, with a spur line along SR 526 that can be used by some trains during peak Boeing commute hours?</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Out of District

Out of District	<p>People of good will can disagree on this, but Seattle has a fair number of geographical bottlenecks associated with moving people around. Those that provide an alternative means of movement across geographical barriers should be given priority in order to reduce the negative impacts of failures on single point of failure systems.</p> <p>Why not consider using the Sound itself more, especially for West Seattle down to Tacoma? Commuter ferries that don't take cars (but with ample "park and ride" parking facilities) that go from the east side of the Sound to Elliot Bay might relieve some of the commuter congestion on the roads from those who live in West Seattle, Burien, White Center, Kent . . . etc.</p> <p>Most important: Please do NOT build more mass transit facilities without adequate parking. That there is, to date, only one real park and ride facility on the light rail system makes me very doubtful and suspicious of giving you more money. The parking lot at the Tukwila International Blvd. Station fills up very quickly in the morning. Imagine how many cars you could get off the roads in downtown Seattle if you provided adequate parking at all of the light rail stations.</p>
Out of District	Federal Way light rail needs to happen in less than 12 years. If that is the time frame I think support in the Federal Way area is going to be hard to come by.
Out of District	Build the light rail significantly faster than proposed. I will not support a plan that takes 25 years before it gets to Everett. It needs to be done at the very most 15 years. I don't want it to be completed by the time I retire.
Out of District	<p>I am currently a resident of North Lynnwood (former resident of Everett and Mukilteo for approximately 15 years). Sound Transit needs to educate voters as to the benefit of detouring the Link light rail to Paine Field. As proposed the Link extension to Everett appears to be pandering to Boeing or the local politicians who are pandering to Boeing. To provide useful light rail between the Cities of Everett and Lynnwood the line must be time efficient between the transit centers. Additionally the most efficient transit option in Snohomish County (Swift I BRT) has no feeder points into Link. The existing Swift I south terminus should be relocated from Aurora Transit Center to one of the proposed Link stations in the Shoreline area. Additionally Swift II should be fed into an I-5 corridor based light rail line (there is your efficient Paine Field connector). This draft plan does not provide the education I need to determine its utility (detour to Paine Field) and is inconsistent with my expectations as a resident of the North end (I-5 corridor based line). The BRT to the Eastside would be a priority over light rail as proposed and would be the most likely reason for me to support this proposal although I am leaning no even given how important transit improvements are to the area.</p>
Out of District	<p>No way should ST being building lines to Ballard and West Seattle until the main line it built all the way to Everett as was originally stated. Living in the Everett area, I will not support ST as long as ST shows obvious favoritism to Seattle.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Out of District

Out of District	The timeline for the Lakewood to seattle rail system is extremely long for an engineering project, it should be implemented faster, before the tacoma traffic gets worse. I would love to park my car in Lakewood and ride train all the way north for a small fee ( less than 5 dollars). Europeans have figured this out, why does it take us 20 years to build something similar?
Out of District	While there are tradeoffs as part of this discussion, please understand that 25 years to reach Everett means the measure will likely lose in Snohomish County. Get creative to speed that up, reaching Everett sometime in the 2030s.
Out of District	I firmly believe that transit between downtown Seattle and Everett Station needs to be improved upon, but am not certain that light rail (underground) is the way to do that. What about above-ground commuter trains, like in Portland? The Sounder train is inadequate, as the hours it operates are extremely limiting, and the number of stations severely limit access. More double-decker buses to operate the 510/512 line, as well as more departures, and allowing those buses exclusive-access lanes, would seem to be a much less expensive option than an underground light rail. Just yesterday, I sat on the 512 at the intersection of Stewart and 5th Avenue for 10 minutes, because the bus could not turn left, due to traffic heading south on 5th. Buses cannot be efficient when they have to sit in traffic with the masses of cars. This encompass Metro buses and all Community Transit buses. What is happening now isn't working.
Out of District	Ballard needs to happen sooner. Doesn't the data show that it would be one of the more profitable routes?
Out of District	The 25 year plan to Everett is RIDICULOUS! This area had a high concentration of potential users and to dismiss them for a quarter century is beyond appalling. It's time to focus on getting a viable alternative to Snohomish County.
Out of District	There should be an extension to the Mukilteo ferry to connect to the ferry system without having to wait for rare sounder service.
Out of District	Prioritize projects by ridership potential.
Out of District	West Seattle and Ballard need to be connected to the core via light rail first.
Out of District	Light rail should go from Tacoma to Everett on I5 and I405 and across lake Washington on I90 to Issaquah and across 520 to Redmond. Park and ride options should not be provided at light rail stations.. Install Rapid bus and additional bus to bring people light rail stations. Provide park and ride at outlying bus transit centers.  I oppose the ST3 plan as currently designed and will vote no
Out of District	Service to Olympia
Out of District	We need light rail to Issaquah to Downtown and Bellevue. Issaquah is growing rapidly. Let's get ahead of the curve because it becomes like I-5 and I-405.  We need light rail or BRT on I-405.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Out of District

Out of District	I would rather see rail down 405 than the rapid bus transit. I would be more likely to commute to work via rail/bus if it didn't take twice as long as it does to drive from lake stevens to Redmond. My only options for transit are to bus/drive from Lake Stevens P&R/Home to Everett Station then Bus to Bellevue transfer to a bus to Overlake Transit Center. There used to be heavy rail all the way from Snohomish to Renton passing through Redmond and Kirkland. It would've been nice for the county to convert that to a regional transit rail than tear it up for bike paths.
Out of District	I don't think that the suburbs should be the first to get light rail. I think the inner-city (Ballard and West Seattle) should be the first to get light rail. And then it should extend out. Light rail should be built FIRST where there is the MOST density.
Out of District	There should also be expansions in parking at park and rides. Those fill up very quickly forcing many drivers to drive around for a space which wastes gas, time, and takes away from revenues.
Out of District	I will not support a plan that puts Everett last on the time line, if you want my support then the board must rearrange the schedule of projects and put Everett before Ballard and West Lake. I am an elected and I will be very vocal about this in Snohomish County.
Out of District	Presentation of bike and pedestrian access as a choice separate from the project is a unbalanced setup both in terms of cost (bike lane is astronomically less expensive than a new rail corridor) and in terms of overall transit choice (an individual choosing mass transit shouldn't be forced into a car as the other part of multi-mode). Bike and pedestrian access as well as sufficient and expandable parking should be built in to the baseline of each the subprojects. Then let the projects compete in overall value.
Out of District	There needs to be a plan for mono-rail to be built instead of light rail due to cost and maintenance.
Out of District	Issaquah service needs to be higher in priority - 25 years is way too long.
Out of District	Light Rail to Ballard should be a Priority

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Out of District

<p>Out of District</p>	<p>Only a few comments. As a resident in Sammamish (obviously Bellevue/Issaquah leg is important to me) I noticed the plan would be for the rail to come in to Lakemont. It appears whoever did the plan failed to recognize several keep growth points in our area that are not really serviced by Lakemont - First, there are two MAJOR urban villages in Issaquah; Issaquah Highlands and Talus. Neither is fully built out but, when complete, will result in large population commuter base to and from this part of the eastside. I believe, if a person has to get in their car to travel to Lakemont from these areas (including Sammamish), I would surmise they would simply stay in the car and NOT transition to light rail. In which case, a Lakemont station is NOT the most advantageous location (why there, is one of the designers an avid golfer and believes its important to service Newcastle?) - Suggest an alternative location would be at the current Issaquah highlands Park and ride. Several advantages are obvious - close proximity to MASSIVE urban village population that will continue to grow leaps and bounds throughout the 21 Century with immediate improvement to those expected ridership numbers in the draft plan (revenue generator, right?), It may actually be less difficult to permit as its got a substantial buffer to the arterial corridor you'd design through along sunset interchange, more I-90 median less critical habitat impact (again, less cost from land purchase and permitting), draws in City of Sammamish as another funding pocket.....hmm....so much more to add.....You get the picture. Alternative location would be the Issaquah P&amp;R and come in through Newport way. Here there are critical habitat issues to manage (minor due to the fact DOT already has run interference for you) but at least its in Proximity of Talus.</p> <p>Only other comment is (related to the Eastside part) it appears planning personnel didn't include folks familiar with the eastside. You MUST have involvement of engineers/scientists who are familiar with the areas of expansion. Not only the eastside but all other regions. Why? For reasons noted above. AND, in some cases, you may actually substantially reduce project costs and increase ridership simply by applying local knowledge. On the other hand, don't feel bad because even the local municipalities bring in consultants from outside the area to revise ordinances they know nothing about - Example Critical areas ordinance development by City of Sammamish who hired an out of area consultant who told the city there weren't any steep slopes in Sammamish so they didn't need Steep slope critical areas in their ordinance. As a geologic engineer who resides in Sammamish, I still fume of that .....and it was from 2006 or 7.....Anyway, my 2 cents.....</p>
<p>Out of District</p>	<p>Develop a plan based on population growth and congestion. The adoption of programs like Microsoft Connectors and the Sounder have shown people will use mass transit to avoid long commutes in their own cars and to have more time to work on their commute. Look for high traffic patterns for commuters and prioritize those investments.</p>
<p>Out of District</p>	<p>Light rail to Everett via Paine Field is too expensive and adds too much delay. Light rail needs to go directly to Everett. Some other form of excellent service should be provided for Paine Field</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Out of District

Out of District	Sounder connections and expansion development needs to be sped up drastically. We need expanded light rail immediately, and 25 years out is not acceptable. The failing of our regions transit planning needs to be even more aggressively fixed. I recognize that this is aggressive, but it needs to be more so. Light rail needs to expand even farther south and north, into Olympia and Bellingham, to make this a truly regional system. Sounder service also needs to expand ridership hours now. Stop treating as a rush hour/weekday only service. People will use it if it is available during the day and on weekends. This is a ridiculous failing of the current system. Honestly, Seattle and other regional cultural hubs should be shouting for this, as the lack is leaving tax revenue on the table. From Olympia, it is currently easier to get to Portland than to Seattle. Be more aggressive. Make this plan something people voting on the system will be able to enjoy in their lifetimes. 25 years is not aggressive.
Out of District	I support making light rail to areas already serviced by the Sounder (Everett and Tacoma) a lower priority. I'd rather see Sound Transit putting money into expanding and increasing the reliability of the Sounder service, and working with Washington State Ferries to enhance connections between Edmonds and Mukilteo ferries, the Sounder and buses. Sound Transit should partner with WSF to expand parking at bus/train/ferry transfer points at Edmonds and Mukilteo.
Out of District	ST3 should put more emphasis on getting the main-line rail completed from Everett to Tacoma before they start on branch projects, i.e. West Seattle, Bellevue, Ballard it.
Out of District	West Seattle rail today, west Seattle rail tomorrow, west Seattle rail forever
Out of District	From where I stand - the region would benefit from the rapid expansion of light rail within Seattle, with Sounder / BRT / shoulder access providing quick access for areas outside of the city.
Out of District	North Sound is underserved by Transit. Ignore Tacoma. Traffic volumes are north of Seattle. Took my husband a hour to get from Boeing in Everett to Smokey Point via Northbound I-5. Traffic volumes and commute times through Everett and Marysville should be studied versus Tacoma.
Out of District	I wish the north-end commuters didn't have to wait 25 years to get light rail in service. 405 is terrible in the car, even with ETL, and I'd rather take a few extra tolls I would pay and invest them in a faster implementation towards rail service along the Everett-Lynnwood-Bothell-Bellevue-Redmond areas. ST cannot lay it down fast enough.  Also, Sound Transit should take over end-to-end operation of mass transit in Puget Sound, absorbing King County Metro, Community Transit, and Pierce Transit into one operational entity under the Sound Transit name.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Out of District

Out of District	The focus of this plan should be on making mass transit (ie. light rail) more accessible to the north end. As property prices and rent increases, people are forced to move further away from their place of employment where they can find more affordable housing. In most cases, this means Snohomish County. The amount of new housing and building that is going on is unprecedented, yet our transit infrastructure has not evolved in decades to support this growth. Bring light rail and other mass transit options to the north end, where it will have the greatest impact on getting people where they need to be quickly, efficiently, and most of all safely by taking many cars off the road. You have the opportunity to greatly improve the way Puget Sound residents move throughout the area - it is a great responsibility, and I hope you take it seriously. Our future is counting on you.
Out of District	*Ballard-downtown should be prioritized, completed much more quickly, and should NOT travel via Interbay (which is dangerous in the event of sea level rise!) *130th street is VITAL *Study, design, and EIS for Ballard-UW (shovel-ready) should be included.
Out of District	For the tax revenue requested of Snohomish County residents, light rail to Everett needs to happen faster than 25 years. Either skip Boeing and sub an extension express bus from rail to Boeing or get assurances from Boeing that they aren't leaving before building to Paine Field.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Out of District

<p>Out of District</p>	<p>ST3 draft plan needs to be modified with some of its service plan being deleted segment to add proposed service to Marysville, which is just north of Everett. Consider having all of the Core Urban and some of the Suburban cities to have their own Link Light Rail line just like the City of Everett currently has its own transit agency which is Everett Transit. I believe the ST3 draft project plan was planned the horrible way that will include BRT and should should never need to be BRT, period. Instead of that, consider having alot of Link Light Rail lines (including municipal Link Light Rails) like Marysville link, Lake Stevens link, Arlington link, Everett link (a line or 2), Lynnwood link, and so much more. Express bus routes 510 and/or 512 should have a proposed expansion up to Marysville by deleting all the selected trips to Downtown Everett. Sounder North Line should have proposed stations to Seattle Waterfront, University, Northgate, Shoreline, Mountlake Terrace, Lynnwood, Mill Creek, and Marysville as well as Everett, Mukilteo, Edmonds, and King Street Stations. 4 round trips should be expanded up to 10, 4 out of 10 serving King Street, Edmonds, Mukilteo, and Everett Stations which is currently the existing Sounder North Line just need to add Seattle Waterfront, University &amp; Northgate Stations, but needs to stick with 4 round trips. 6 out of 10 North Line trips should serve King Street, Seattle Waterfront, University, Northgate, Mountlake Terrace, Lynnwood, Ash Way, Mill Creek, Mariner, Everett, and Marysville Stations. Sounder South Line should never have a proposed expansion to DuPont because it is a pretty small city and that station project can be absolutely 100% preventable, so instead of South Line expansion to DuPont it needs to add SeaTac, Federal Way, and maybe Des Moines Stations. The reason why I need this plan to happen is that it can be a much better offer and the plan I made and wished for would make ridership a whole lot more intense. 8 round trips + 2 reverse trips should be expanded up to 12 round trips + 2 reverse trips. 6 out of 12 trips should serve in Pierce County should serve Pacific, Edgewood, Tacoma Dome, South Tacoma and Lakewood Stations and the other half should serve Sumner, Puyallup, Waller, and Tacome Dome Stations. The 2 reverse trips should delete the segment stops to Puyallup and Sumner Stations and should only serve Tacoma Dome Station in Pierce county. All South Line trips should serve all stations/stops in King County.</p>
<p>Out of District</p>	<p>It seems an obvious response that in general Snohomish County residents are not going to support a plan that we receive not benefits from for 25 years! Plus there has not been one single project that has happened in the promised timelines. So I have to assume we in Snohomish County would probably see no benefits for realistically more like no less than 30 years. That's absurd. I also think more attention should be payed to the fact that light rail is a great idea for Snohomish County residents to access Seattle &amp; the east side and would greatly benefit with the extension from Lynnwood to Everett. HOWEVER the route being proposed all geared toward Boeing/Paine field IS NOT where the majority of commuters are going! Look at current traffic.....if rail is extended, it should be along the I5 corridor, period! The majority of traffic in Snohomish County is traveling from Everett and north to get to the east side or Seattle.....NOT Boeing! It's ridiculous to cater the whole idea of rail to Snohomish County specific to Boeing. The proposed station/route to Boeing is not convenient for the majority of Snohomish County commuters.....and they wouldnt use it. Boeing commuters may use it, but that's it! It's not a small detour for the typical Snohomish County commuter to have to get off I5 to travel to the Boeing area to access rail to Seattle or the East Side. Why don't the people in charge of these projects ask the actual citizens where they would want actual routes and stations instead of just assuming or catering to a company like Boeing?</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Out of District

Out of District	Complete the spine project "to Everett" and "to Tacoma" in 12 years.
Out of District	Snohomish County taxpayers seem to be getting the shaft in this deal. While I realize that King County and Seattle in particular represent the targeted market there are a number of people, roughly 20% by my calculation of census data, of the total Puget Sound population that live in Snohomish County. We'd be expected to pay \$200 per person per year for the next 25 years before we see any of those returns. That's \$20,000 for my family before I ever see any returns! I don't dislike faster bus routes, light rail or the Sounder but there needs to be some serious reconsideration of the project staging because Snohomish County residents are getting no love at all.
Out of District	Light rail in Seattle should be grade separated, especially along the Ballard-downtown corridor; the Redmond Overlake/Bellevue corridor should also be prioritized. These systems need to be built in next decade, hopefully less, due to the increased population growth in the region and the finicky politicians who are looking for easy money to cut form budgets.
Out of District	Light rail from downtown Everett to cities along both the 405 and i5 corridor need to happen much sooner. Much of Snohomish county commutes South daily and they need an option that gets them off the crowded highways. My commute from Marysville to Kent averages 1.5 hrs -2 hrs each way. Even if I were to bus I would have to take 3 buses and it would take even longer. My commute is not that unique anymore, many people have to drive long hours to get to work due to the lack of good jobs and the high cost of living where the jobs that do exist are clustered.
Out of District	Seems like we are delaying the most critical projects that being light rail connect with Redmond and issaquah to last. I don't support a plan that takes 25 years to create a true countywide transit system.
Out of District	Eastside needs light rail now not in 25 years
Out of District	The north link should be a priority, it takes 2-3 hrs for me to get to and from Seattle
Out of District	We need transit in and around the metro faster. Suburban riders are not likely to use transit -- and will likely be users of autonomous vehicles in 20 years.
Out of District	Light rail to Everett as soon as possible would cause me to be very supportive of ST3
Out of District	1. Additional 592 buses from Lakewood to Seattle, both morning and evening. The buses are always overly full and in warm weather, they're really unpleasant to be in. I'd rather drive. 2. Parking at/near light rail stations. It will make it easier for folks who live more than 3-4 blocks away to use the light rail in bad weather.
Out of District	Please make light rail to Ballard a higher priority, completing the project within 12 years.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Out of District

Out of District	<p>I am at a total loss for why somebody traveling from Northgate to the Airport on light rail is going to have change trains. The main spine should stay intact with Ballard connecting to West Seattle, not into the Everett-Tacoma line. Ballard to West Seattle helps only Ballard and West Seattle and should be paid for by the city of Seattle, not the Sound Transit region. The rest of the region has already paid for tunnel through Seattle; we won't pay for another tunnel which does little to help the transportation bottlenecks for non-Seattlites who make up the vast majority of population in the Sound Transit region.</p> <p>On a second note, I refuse to answer your survey because of the political nature of the questions, one of which you fortunately we forced to remove. I am hugely in favor of supporting continued light rail development, but not with an agency more interested in politics than efficiency. Unless you improve the honesty of your communications, I will vote no.</p>
Out of District	<p>2033-2038 is will not work; Seattle needed transit improvements yesterday. There are hundreds of cities who have been able to build and implement transit and light rail quickly, efficiently, and cost effective. Look at Salt Lake City for a great example; they build it fast, purchased used train cars, and it is very effective. Get on it Seattle by the 2030's we will be WAY behind where we need to be.</p>
Out of District	<p>South east King county is NOT represented in this plan. We are expected to pay taxes but we get next to nothing, and it will take entirely too long to get what little you are proposing. WE are the fourth largest city and we should be getting light rail almost immediately given our existing train line which is not being used. The transit changes should take place within a year and should be major. Look at the WSDOT MP3 at any time of day and it will be seen that 405 is more often than not in the black which means stop and go. Even downtown Seattle isn't as congested as many hours. Only south bound I 5 north of 45th equals our standstill traffic.</p> <p>This survey tries to put words in our mouths. That is why so many of the questions aren't answered. Unfortunately, unless this plan changes and takes more notice of Southeast King county, I have to go out and campaign against it. I don't object to taxes that benefit my community and region, but I will not pay Taxes to support regions that ignore our importance and tremendous need. The time line for accomplishing this plan is also entirely too long. The needs are NOW, not in fifty years. The planning committee needs to be bolder and more visionary and to requiE that when they become too old to safely drive, they can still get around on mass transit, but ONLY if it exists. You build it and It will be used.</p> <p>Until now I have supported public works and have paid taxes uncomplainingly, but this project has to be better and include my region.</p>
Out of District	<p>My opinion is that light rail should be more heavily emphasized, since it is the one form of transportation that is independent of both existing roadways (where traffic impedes buses) or existing railways (where freight traffic limits passenger trains). Light rail can move more people faster.</p>
Out of District	<p>Having a DEDICATED bus lane that goes from north to south. From Dupont to Seattle.</p> <p>That way not only could buses use it but also emergency vehicles.</p> <p>I dont know how many times being on the bus, that we have stopped because of traffic.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Out of District

Out of District	SoundTransit needs to change its agency name from the word Sound to the word Puget, which it can be named PugetTransit, because there's already approximately 100 sounds world wide. There are 2 different sounds, which are 1 you hear the volume mass & other is consider ocean inlet in geography. ST which stands for SoundTransit needs to go from the word Transit to the word Transportation, which can make it stand for SoundTransportation. ST3 draft plan needs to be modified with some of its service plan being deleted segment to add proposed service to Marysville, which is just north of Everett instead of Sounder Commuter Rail expansion to DuPont.
Out of District	Consider having all of the Core Urban and some of the Suburban cities to have their own Link Light Rail line just like the City of Everett currently has its own transit agency which is Everett Transit. I believe the ST3 draft project plan was planned the horrible way that will include BRT & should should never need to be BRT. Instead of that, consider having alot of municipal Link Light Rail lines & proposed expansion station for Commuter rails, 4 Sounder lines by going A/B & 2 Amtrak lines. Amtrak (Seattle- Stanwood) line being part of Commuter Rail North Line should serve Amtrak stations between Seattle & Stanwood by going only 2 weekday round trips. Amtrak (Everett-Tacoma) line being partof Central or Metro line, not part of Commuter Rail South Line should serve Amtrak stations between Everett & Tacoma by going 6 weekday trips both ways, which are 6am, 7am, 10am, 4pm, 5pm, & 9 pm.
Out of District	Light rail to issaquah sooner
Out of District	The focus should be on Buses only .... that is the most practical use of money and has versatility and flexibility. Areas outside of the major sections are not even covered under ST3 because you are focusing mostly on train services rather than buses.
Out of District	There is a much larger need for transit options in the Snohomish county area. I think the light rail project needs to be completed much sooner than the proposed 2041. We are and will continue to grow as a community and I think it is irrespirable to ignore this growth. It will only cause more traffic in the years to come.
Out of District	Light Link (light rail) between Seattle and Everett WA would much more efficient, and serve the area much better, if routed parallel to Interstate 5(I5) between Seattle and Everett WA using existing park and ride stops such as Everett Station, South Everett Park and Ride, Lynnwood Park and Ride etc.. Bus Rapid Transit routes with connections at Lite Link (lite rail) stops can serve the industrial areas around Pain Field, Boeing Everett and Mukilteo (WA St. Ferries etc.). Prepaid fares using kiosks and Orca Cards or similar transit passes when possible and practical speed up transit as well. And of course in transit inspections of tickets, Orca Cards etc. to catch and fine(\$35+ full fare) cheaters trying to get a free ride.
Out of District	Light rail to Everett should initially skip the Paine field and go straight to Everett.
Out of District	The traffic tie-up from and to Everett to Bellevue every morning and evening is horrendous. And the fiasco of I-405 Transit Lanes is proof of the inability of the planning effort to achieve realistic goals and results directed to the need. With the gross revenue going to Arizona and seventy percent staying in Arizona, how does that setup benefit this state?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Out of District

<p>Out of District</p>	<p>Ok, it is utterly ridiculous and unacceptable to consider expanding light rail to Ballard and West Seattle before Everett!!!          Talk about renegeing on the original ST1 plan, which was only approved by the voters when they thought they were being promised that a priority of the plan would be to connect to Everett before the aforementioned destinations.          Who inserted these destinations, they were not even on the table!!?          Everyone with a modicum of common sense knows that you have to have a strong trunk system prior the developing the branch networks!          In case you have not heard, we are growing even faster than King County, who by the way thinks they control the rest of the regions transportation plans.          Please stick to your original promise and plan to bring light rail to Everett sooner rather than later because with light rail reaching Everett in 2041, I probably be dead and you will have extracted a goodly amount of hard earned money from me to finance these other "so called important" projects and I will have gotten nothing in return to show for my years of investment.          ST, please correct this mistake!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!</p>
<p>Out of District</p>	<p>The north-south I-5 corridor between Everett &amp; Seattle is dangerous, in constant gridlock at daytime hours, and must be prioritized as a first project timeline for light rail. Original plans for this corridor must be preserved. 25 years to light rail will continue to cripple business, impede traffic safety, and does not recognize the hefty growth in this part of the region.</p>
<p>Out of District</p>	<p>I recommend that the light rail line from Lynnwood to Everett be a direct route with a feeder line coming in from Paine Field that could be constructed in future years. BRT service could transport commuters from Paine Field to a stop located somewhere along I5 until the feeder line is put in place. This would help shorten the time necessary to construct the initial backbone of the transit system that currently serves the majority of the commuters.</p>
<p>Out of District</p>	<p>LRT to Everett should be delivered earlier in the plan.</p>
<p>Out of District</p>	<p>Instead of 25 years for light rail to make its way north to Everett, how about focus on building a main North/South line to/from Everett &amp; Seattle. And then over the years build out the branches into other neighborhoods such as Ballard, Edmonds, Bellevue, etc.           The sooner riders at least have an expanded major N/S line, the sooner we can use that income and successful ridership to encourage building out the project.</p>
<p>Out of District</p>	<p>I support MORE BUSES, and MORE Park-n-Ride lots. Many more P-n-Ride lots can be constructed between the N-bound and S-bound lanes on I-5, so that the already-owned land can be used! You build it, they will use it. I have issues with the extreme length of time the proposals are asking US to think is OKAY; phooey! That's for the next generation after I'm dead and gone! Be realistic, or forget it. This should've been done 20 years ago... too late now. Add more bus service, and that is sufficient.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Out of District

Out of District	I am a baby boomer that in a very few years will be on a limited income. You are asking me to pay for a transit program that will not benefit me in my lifetime. You better hire the marketing firm that did the commercials for legalizing pot because you are going to have to be that good. <grin> Just saying. Peace, ned
Out of District	The Everett Light Rail plan should initially run directly to Everett station through I-5 or Evergreen Way, instead of going through Boeing and manufacturing area. Traffic is not that bad to these areas and the relief needs to be for people traveling to downtown Seattle and Bellevue. Plus, most people that work in the industrial are live close by and have shifts that are adjusted to a less busy commute times. This would be able to be completed sooner and provide relief to riders, including adding commuters that choose not to use transit due to its current inadequacies.
Out of District	I believe that the eventual plan should go further than Issaquah, If it extended to Highway 18 and had a path to downtown Seattle as well as Redmond, I believe that would add traffic from far outlying areas such as Snoqualmie, Maple Valley, North Bend and so forth, however that might be harder to sell currently. I don't support addition of Buses, they do very little to slow the congestion and they are not reliable for planning a commute to work if there is anything more than one stop, I gave up on Buses a long time ago as a reliable source of transportation. I realize they do have a purpose and if the cost is small enough they might help somewhat in the short term, however in any long term solution for a reliable commute option they are an extremely poor choice and should not be considered. Currently our household does not use transit as Buses are not reliable and there is no light rail option where we are, however I will use it as soon as it becomes a viable solution.
Out of District	I think the light and heavy rail should be removed. I don't think these are best way to provide the transit capacity and are too expensive.
Out of District	Eastside commute to issaquah ought to be a higher priority. 25 years is an eternity!
Out of District	Don't go to Paine field. Let CT run a Swift2 there and have it connect to the Light Rail.
Out of District	Remove projects that would serve/support Pierce County sprawl development in mid and east Pierce County and further development in the floodplains and farmlands of the Puyallup, White, and Carbon Rivers.  There should be eastside (I-405 corridor) commuter rail rather than BRT. Reinstate rail lines through Kirkland and make use of the perfectly located railway to remove any need to further expand or de-congest I-405.  Either provide adequate parking and transit access solutions (parking pricing is no solution at all!) so people can use public transportation, or don't bother with building anymore Sound Transit.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Out of District

Out of District	I'm trying to figure out the intended alignment of the light rail segment between downtown Bellevue and Eastgate, which indicates a stop as "Richards Road." It seems to make more sense to have a station that's Factoria-centric, which follows the I-405 corridor and overlaps existing freeway infrastructure, opposed to introducing a new transit element to the Lake Hills Connector and Richards Road corridor, which passes through sensitive areas and contemplative park lands such as the Botanical Gardens, Kelsey Creek, the historic Wilburton neighborhood and Bannerwood Field. Supporting bus lines may continue to serve the Lake Hills Connector and Richards Road corridors without disturbing one of the last remaining "quiet pockets" of Bellevue, displacing properties in established neighborhoods, and imposing on senior housing living along the Richards Road corridor. There's NO REASON for the rail line to traverse this corridor. A line that follows the I-405 corridor and swings through the 90/405 interchange to a station near the Factoria Cinemas will support connectivity and walkability to employment centers to both the north and south. Then the line, traveling eastbound, can serve the Bellevue College/Eastgate locale at its next station/stop. At the end of the day, a policy of minimizing displacement of private property and neighborhood disturbance should be a central component of the SoundTransit light rail agenda....and this segment in question falls at the heart of such an issue.
Out of District	The light rail to Lynnwood/Everett should come much sooner in the schedule.
Out of District	Greater density in King and Pierce Counties are a given. That being said, please understand that city living is not an ideal fit for everyone for numerous reasons. That is why ST investments that allow those of us living in the suburbs to travel to urban centers in Tacoma and Seattle are important for work and leisure. The commute along I-5 from Tacoma to Seattle is a nightmare. Please support efforts that expand Light Rail and Commuter Rail services so we can move people efficiently.
Out of District	After reading many things about rail to Everett, The route going to paine field may not be the best thing and sounds like it will slow the whole process down. Might be better to run a bus from the Everett station.
Out of District	Ballard and West Seattle should be completed sooner than in the current proposal. West Seattle rail should extend all the way to the Fauntleroy ferry terminal.
Out of District	All light rail needs to be grade separated from traffic and pedestrians.
Out of District	Step up issaquah light rail. You have an open highway system with space
Out of District	TUNNEL TO BALLARD and West is Best. What you have for Ballard now is unacceptable and will receive 3 no votes from this household, and two from my parents. NO BRIDGE for Rail... since you will be speed limited over the opening, since it will open, it's a nightmare for the highest density ridership corridor in the system.
Out of District	The project tho bring better transportation to Everett should not be put off for 25 years. Everett is priced reasonable to live in, but limited in quick transportation to other areas to work.
Out of District	Parking should be at ALL rail stations. Neighborhoods should not be invaded by commuters.
Out of District	Raise priority of eastside and Ballard rail lines
Out of District	Build Ballard to Westlake before the new tunnel through Downtown Build the Metro 8 subway through Belltown and SLU to reward density

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be modified in the ST3 final plan - Out of District

Out of District	Traffic in Seattle needs to be addressed before expanding so far north and so far south. People living within the city or nearby shouldn't have to pay extra for the costs of people that wish to commute from so far from the city. I will vote against this bill, focus on transit within seattle. Connect ballard the rest of the city, put a lightrail near mercer because that road is miserable. Connect Bellevue and Seattle via lightrail should be phase 1, not 20 years out.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - Snohomish County

Subarea	Additional Feedback - Project(s) should be removed in the ST3 final plan
SNOHOMISH COUNTY	Light rail up to Everett and down to Tacoma needs to be completed sooner than a whole 25 years from now. The daily rush hour traffic from Everett to Seattle on I-5 really needs to be one of the first issues tackled, not put off for another couple decades to become even worse. I feel that perhaps the Bellevue to Issaquah light rail should be removed in order to complete the Link line faster, have that be placed in a ST4 package with the planed Bothell to Bellevue via Kirkland additional track length.
SNOHOMISH COUNTY	We need to get light rail to the "spine" of I-5. Everett to Tacoma. Once THAT is done, we can start the work on West Seattle, Issaquah and Bellevue. And not to be too snarky, the Eastside folks are the least likely to use mass transit. They don't want the construction in their neighborhoods, scream about the raise in taxes and would not use it enough to make it a priority in the region.
SNOHOMISH COUNTY	I live in Everett and my community is very opposed to the light rail coming in, in 25 years. Ballard should be pushed back before Everett is pushed back, there are many, many people here trying to commute to Seattle for work on a crowded I-5. Getting a light rail to Everett needs to be a priority, not an afterthought.
SNOHOMISH COUNTY	Light rail is a horrible waste of taxpayer money, with BY FAR the smallest impact on traffic congestion relief at BY FAR the highest cost. I could support increased bus service and increased general purpose lanes because they are so MUCH more cost-effective and efficient. We need to revise laws so we're not paying sales tax on these construction projects; reduce environmental impact studies (which consume 1/4 of the road construction costs); make consistent 2 passengers to qualify for commuter lanes; and eliminate the requirement for union labor and prevailing wages. You need to start using some common sense and treating our money as if it is very precious and limited - because it is!
SNOHOMISH COUNTY	I'm okay paying additional taxes for "Rail" expansion, as it avoids the roads and clogging the freeways. Buses however are NOT a viable long term solution as they are inconsistent due to the roads, and don't move enough people. I will NOT vote for this if bus is anyway apart of it. For an example of how Rail functions better than bus, look at the east coast of USA, Europe, parts of Asia. Buses aren't much better than cars.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	The blanket statement that roads can't handle any more traffic is absolutely irresponsible. We do not have a proper road system in this area and never have. We must straighten out the freeways that we have now, correcting long standing design flaws, build another freeway east of 405 and build the proper surface arterial streets. Remember, transit moves when everything is moving. Your plan will tie up \$50 billion dollars to build a system to get people to subscribe to your way of living to and from work. What about after work or on the weekends. People have places other than work to go to. The roads will remain at a stand still with no money to correct it because all of our money for many generations to come is gone. Your blatant disregard for cars and people's personal freedom to move is evident and your only reason to build this train system is to tie up money and prevent a proper road system to be built just to "stick" it to car owners. I used to roll my eyes any time I heard an official make the comment that we couldn't build any more lanes because it was to expensive. Now it upsets me to no end when I hear you talking about spending \$50 billion (You're not fooling anyone. It'll be many times more once cost over runs are added in and then the interest we will be paying for the next 100 years) likes it's nothing. This is many times more than the cost of road improvements any one talked about.
SNOHOMISH COUNTY	The entire plan should be overhauled. Get rid of the 405 toll lanes. Our family of four can barely afford to have one car let alone pay an extra 200 per car per year for transit that is unreliable, will take decades to finish, and that I will never use.
SNOHOMISH COUNTY	Remove all projects from plan not related to Link light rail and get that done to Everett sooner rather than 25 years from now. I am tired of Snohomish county being King County's purse. Connect Everett NOW or give me my money back.
SNOHOMISH COUNTY	Given the population projections and the current traffic issues on I-405, it makes no sense to attempt bus rapid transit here. This needs to be link light rail from Bellevue to Lynnwood Transit Center to connect with the Everett to Seattle line. If that is not feasible now, it should be converted in the next phase and I am concerned that there will be simply no will to bring it on as rail if there has been a bus service.  I currently seldom ride transit because it would take me twice as long to walk to the nearest bus stop as it does to drive to my office. However, I will be changing jobs in the next 6 months and one of the considerations in my search is my ability to use transit. I would like to be using transit daily...ideally trains. If I begin working downtown, I will probably drive to nearest train and park there in order not to drive downtown.
SNOHOMISH COUNTY	Bus Rapid Transit on the shoulder of I-405 should be reconsidered. I-405 is already a nightmare and adding more construction and chaos would not be helpful. There should be a plan for Link light rail that runs the length of I-405 not buses.
SNOHOMISH COUNTY	There is too much bus use being proposed. Bus use should be downgraded until buses are at or very near to CO2 zero and CH4 zero.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	<p>Once again Sound Transit continues its legacy a mismanagement and misguided objectives.</p> <ol style="list-style-type: none"> <li>1. Instead of competing with other transit authorities, partner with them. Prime example 522 bus is cheaper than Metro routes on the same route.</li> <li>2. Unable to provide bus alternatives to Sounder trains not running due to mudslides even with 18 hour notice is inexplicable.</li> <li>3. Expanding into areas, like the Eastside, where the general populous is not accepting of Sound Transit is a joke. Expand the system where your advocates are encouraging it and willing to pay for it.</li> <li>4. Another tunnel, another street lane removed; really? Start building what was an example of the future in other cities and our own World's Fair. Elevated trains running down major through fairs is a lot cheaper and less impactful at the end of the day.</li> <li>5. The fact that people who don't even pay RTA tax benefit more than people in the core of the RTA district is ridiculous. RTA taxing authority bounderies need to be expanded. If you live less than 5 miles off I-405 or you live within a 20 minute car ride of the south line of the Sounder Train, you should be paying RTA tax. Currently these people do not. Ridiculous!!!</li> </ol> <p>Even though I use Sound Transit on a daily basis, I will be voting against any increases in taxes until the RTA district is expanded and a SMART plan is promoted.</p>
SNOHOMISH COUNTY	Link light rail is underutilized and too expensive.
SNOHOMISH COUNTY	There isn't a good history of selecting projects that help the public out the most as well as completing projects fast, on time, and under cost. Reduce the list of what's in scope and focus on projects that actually help WA's public.
SNOHOMISH COUNTY	<p>Please do not approve this plan!</p> <p>You are putting our money into a technology that will quickly be made obsolete by self driving cars. Non-personalized transportation will be entirely impractical, when you are able to have your own car arrive &amp; take you directly from point A to B for less money and faster.</p> <p>We will have self driving cars. They will be hyper efficient. Expand our bus service, this is the best patch until we have automated cars.</p> <p>Don't invest our money into a form of transport that will be history before it's completed.</p>
SNOHOMISH COUNTY	<p>Light rail is far too expensive and will never be cost effective to run. The focus should be on reducing traffic during the rush hours. The best way to do this is an improved bus system for commuters. Money should be spent on increasing the parking at overcrowded park-and-rides like Ash Way and Canyon Park. Those park-and-rides frequently fill up at 6:30 in the morning. If there is more parking then more people can use them.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	I'm a senior citizen and this would raise my taxes at least \$1000/year. There must be a lot of magical thing going on to conceive that an educated voter would approve a tax hike like this. There is no mention about improving the main mode of transportation in Puget Sound, which is our crumbling highway system. Sound Transit is an out of control agency that feels it can tax as much as it wants for pet projects that serve a limited number of our citizens. We need help with transportation in Puget Sound, but it isn't coming from Sound Transit.
SNOHOMISH COUNTY	BRT seems stupid
SNOHOMISH COUNTY	I would like to see actual percentage usage of the various means of public transportation now available. It appears that the community transit system is poorly used at present. Are there projection studies of possible use of these rail systems that would include population increase?
SNOHOMISH COUNTY	Sound Transit has spent billions already with limit accountability since you were able to change your budgets many years ago without voter approval. I don't trust that you are being good stewards of tax dollars.
SNOHOMISH COUNTY	ELECTRIC CO-GENERATION BUSES would fix the problem, stop wasting money on light rail. You could run buses for 20 years for FREE (no fares) on what you plan to spend on that stupid light rail. Hey, ride the SLU Trolley sometime, stinks like puke in there. FIX the roads and the freeways and use BUSES... not hard to understand. Mobility that is FLEXIBLE. A train can only go on its tracks, and living in Mukilteo, Sounder can't go after a landslide. Same issue with light rail, only ONE way, can not divert. BUSES can go anywhere, road or no road... think about it... long and hard... FIX THE ROADS (and no more TOLLS!)
SNOHOMISH COUNTY	Light rail is too expensive and does not reduce traffic congestion nor increase ridership. The emphasis should be on more busses and expanding current routes with additional capacity with no expansion of light rail.
SNOHOMISH COUNTY	The costs outweigh the benefits of this plan.
SNOHOMISH COUNTY	Stop using my tax dollars to subsidize the Sound Transit bureaucracy. Fares should reflect the actual costs and not be subsidized. No more projects should be allowed until I5 and I 405 are expanded by one or two extra lanes in each direction.
SNOHOMISH COUNTY	We need to build the civilization of Man in a way that it encourages virtue. Driving a car to ride a rail or bus is no exception. Neither is spending more than our counties' budget can support. If instead, when the parking garage is full, people will instead take the bus and rail the entire way to their destination and end our "addiction" to oil and driving cars, which can also prevent world war 3 from happening, by not trying to make money off of gas and oil for the rich companies and rule of the land. Also, we should focus more on either balancing the budget, whether in our nation or in our county. Secondly, the growth shouldn't happen in the first place because we should be planning for there to be an equal amount of people, such as a "perfect civilization" that only has one kid per person. Instead of spending more, we should focus on spending less. If growth takes place in the future, even against all "perfect society" strategies, then you simply add more vehicles with a hydrogen fuel cell {and not more routes} and allow for "mass transit" green energy {hydrogen fuel cell in the future, or less gas and oil today} to be able to drive on the shoulder.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	Emphasize bus service improvements.
SNOHOMISH COUNTY	Stop spending countless taxpayer dollars on modes of transportation which are least flexible and how the lowest use. Direct the money to improving roads and freeways since that is where the vast majority of transit actually takes place.
SNOHOMISH COUNTY	Priority seems to be given to areas that already have regional transit, just not "enough". Why not give priority to areas that do not have viable regional transit at all? Everett & Issaquah being on the end of the plan is not going to help reduce congestion for 25 years.
SNOHOMISH COUNTY	The main goal, if projects are to be removed or chosen, is to connect Tacoma with Everett.
SNOHOMISH COUNTY	Light rail to Everett needs to happen faster if you want any Snohomish County votes. I'd support a plan that skips access to Boeing if that's what it takes to speed things up. Frankly, I think bus shuttles paid by employers like Boeing should be in the mix.  Also, I think expanded Bus Rapid transit should be emphasized vs. the Sounder in Snohomish county. The Sounder trains are neat, but unreliable and way too expensive. I think the professionals at ST know this!
SNOHOMISH COUNTY	Buses are not rapid transit. They either short neighborhood connectors to transit or temporary bandaids until a transit system can be built. Continuing to pour funds into BRT is long-term waste.
SNOHOMISH COUNTY	Keep the dang buses on the road and off the shoulders...emergency equipment would be blocked with buses on shoulders. Keep light rail out of home owners back yards. We need places to walk on trails within the city not buses or trains buzzing through back yards all day. This could increase crime rates in those neighborhoods and decrease property values.
SNOHOMISH COUNTY	I am a huge proponent of mass transit, but this plan is too big, too expensive, and takes too long. We need solutions that will convince people to get out of cars and onto mass transit, now. If mass transit is going to be attractive to people who are currently driving, it needs to be noticeably, reliably better than driving. Meaning, it needs to be comfortable, FAST, affordable, on-time, and convenient. More parking at existing and new stations would help this massively. The plan has a lot of great parts, but relies too heavily on light rail, which is incredibly expensive and takes too long to build. I agree with continued investment in light rail, but my opinion is that quicker solutions are needed to address the critical mobility issues that face the region today, particularly during commuting times.
SNOHOMISH COUNTY	I support improvements to bus transportation but am opposed to any plan that includes light rail; the most expensive, least flexible, least efficient form of transportation. From the beginning, RTA officials very openly admitted that light rail would not reduce congestion. We should instead spend limited resources on projects that reduce congestion and begin preparing the infrastructure for the inevitable self-driving cars coming in the near future. Trains are centuries old technology and represent the past not the future.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	Concentrate on on the I-5 corridor. Complete what's already on the drawing board then ask for more tax money. All we see are tolls and tax increases and traffic is still messed up.
SNOHOMISH COUNTY	Trains are very old tech...
SNOHOMISH COUNTY	Rail transit is old technology, providing transportation 'from where you aren't at to where you don't want to go'. It is very outdated now, by the time it is built it will be ancient technology. And, it completely crowds out funding for improvements that should be made now. We need to concentrate on improving bus and van service, discouraging unneeded car trips, improving freight transportation and investing in new technologies, such as roadways for small high-tech automobiles and scooter-type vehicles. The most 'bang for the buck' today is improving bus service with connecting van and bicycle routes. Once people get in their cars to get to a station, they are often better off continuing to work in their cars.
SNOHOMISH COUNTY	In order to get this proposal to pass you may need to scale back lesser projects in order to lower the overall cost. Most people will balk when they see the cost.
SNOHOMISH COUNTY	I am opposed to this draft plan because it will be very expensive and not show results for 8-25 years. I have only lived and commuted through Seattle for 3 years, and the traffic is noticeably worse over that time. We can't wait 8 years for improvements. We need them much faster than that, especially for the prices here.  For this cost, you could expand the "express" lanes where it narrows down to one lane through Seattle and see very quick improvements on I5. You could incentivize businesses to have non-essential employees work from home one day a week.  This is a significant investment and it just doesn't seem like it is going to the best use for resolving the traffic problems we have now.
SNOHOMISH COUNTY	The small number of commuters that this project may or may not get off the freeways does not justify the enormous expense. Opening up the HOV lanes during non-peak hours would make far more sense. So far all the light rail program has accomplished is to transfer former bus commuters to the train. Is has not helped the traffic in any way. Do the math people! Bike paths are a complete waste of time and money since they are often for recreational use. If you want to pay for bike lanes, have the bicyclists license their "vehicle" to pay for it!!
SNOHOMISH COUNTY	I would prefer that the light rail spine from Seattle to Everett be pursued faster than a 2041 completion date, and to do so eliminate the Ballard line, additional BRT service and other construction north of Seattle. Removing traffic from I-5 from Everett to Seattle provides more capacity on I-5 for residents of Ballard to get to Seattle by driving.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	This proposal does not serve the maximum number of people in the shortest amount of time. The vision and goals of Sound Transit are not clear, with service to Ballard happening before service to Everett. I don't understand why a relatively small community like Ballard would have service before Everett, and I also don't understand why Sound Transit chooses to package together a funding proposal to so many destinations serving relatively small numbers of people.
SNOHOMISH COUNTY	I will not comply to any tax or fee implemented due to ST3. Let those who use public transit pay for it not everybody else. Capitalism not Communism! Sincerely [initials]
SNOHOMISH COUNTY	This is "Highway Robbery" to make our road system more congested with fewer auto lanes. No mention of adding any lanes to current freeways - just taking away. <b>STRONGLY OPPOSE.</b>
SNOHOMISH COUNTY	Use buses only.
SNOHOMISH COUNTY	Light rail to Paine Field IS A TOTAL WASTE OF MONEY! If light rail doesn't follow I5 to Everett I will not vote yes on this project.
SNOHOMISH COUNTY	Seattle is a growing city and we do need a better transit infrastructure. However we should not lose what make Seattle part of the evergreen state. Please do not put any high capacity transit on the CKC trail. Furthermore, remove the environmental study between Bellevue and Bothell via the CKC trail. Remove the proposal of mass transit from Bellevue to South Kirkland Park and Ride. If all of these are not remove, my family, friends, and I will actively work to defeat ST3 in November. Thank you.
SNOHOMISH COUNTY	All of them
SNOHOMISH COUNTY	IF you just improved the existing system, it would cost BILLIONS of dollars less, be as much, or more efficient, be done sooner and if we are lucky, on time, and not too far over budget. There is NO WAY given the history of Sound Transit that this will not fall under one of the biggest transit failures of all time... PLEASE rethink what you are doing before it's too late, like these "brilliant roundabouts" that everybody loves that are causing trouble everywhere around the world be we are installing at an increased rate, please try something better, like electric buses?? ANYTHING but this...
SNOHOMISH COUNTY	We don't need light rail to Paine Field since BRT is already coming there with Swift 2, and that low-density area with several different shifts and far-flung work sites is better served with buses anyway. I'd be very happy with more frequent bus service to more locations. If light rail has to go to Everett, it can end around Mariner Park and Ride (at the city of Everett's southern boundary), the South Everett Park and Ride, or Everett Mall (which is one of Everett Transit's 3 major transfer stations and a big employment/entertainment center that somehow gets ignored in comparison to Paine Field).
SNOHOMISH COUNTY	Focus on extending as far north along the main transportation corridor first and foremost. Eliminate projects that do not support this.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - Snohomish County

SNOHOMISH COUNTY	Sound Transit should focus on Regional Transit. Drop the LINK Light rail plan for Ballard and West Seattle. The cost would be considerably cheaper and the plan may just pass the voters. I personally support Sound Transit, but would have to vote against this bill as long as it seems that Seattle is trying to have the rest of the region pay for their transit. I'm afraid this bill will fail as it stands now.
SNOHOMISH COUNTY	You should start collecting from Elementary school kids, There the only ones that will be using the Service. the Rest of us will be long Dead!..
SNOHOMISH COUNTY	<p>Buses should be minimized or removed from the plan. They add to traffic, are no more reliable than car pooling and, except for the new busses, pollute as much or more because half the day they drive around empty.</p> <p>Efforts should be put into tried and true light rail earlier, not later. In 25 years it will not have helped me because my commute will have went from an hour to a couple hours while you will have raised my taxes, causing me to sell my house and find a job in a city that has it's act together.</p>
SNOHOMISH COUNTY	Light rail to Paine Field must be removed. It is a waste of \$1.5 Billion!!!!
SNOHOMISH COUNTY	The Everett to Seattle Sounder issues with mudslides and inconsistent ability to run should be a top priority for the Sounder elements of this proposal. I would be a daily rider if there were a reliable daily train. Prior to the extensive service interruptions, I was a daily rider from Edmonds to Seattle. Because I get motion sick on buses, I'm now a daily single occupant car commuter. Extending Sounder so far south before addressing core functionality issues on the north line seems backward to me.
SNOHOMISH COUNTY	<p>ST's goal is to move people through the region quicker. I DO NOT support the extension to Paine Field and the SW Everett Industrial Center.</p> <p>1) Is Boeing going to partner with ST?</p> <p>2) Is Boeing going to provide shuttles for their employees like Microsoft?</p> <p>The extension from Lynnwood to Everett currently included in the ST3 Draft should be modified. The Option 1 plan, with a travel time 13 minutes longer and capital costs \$1.7 to \$1.8 Billion higher and ridership only marginally higher than the Option 3 plan should be replaced with the Option 3 plan. This should also allow for completion much sooner than the 25 years proposed under the Option 1 plan. Paine Field and the SW Everett Industrial Center can be served by BRT or a spur connecting to the light rail stations at 128th and/or Everett Mall.</p>
SNOHOMISH COUNTY	<p>STOP Sound Transit!</p> <p>ABOLISH Sound Transit!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

Subarea	Additional Feedback - Project(s) should be removed in the ST3 final plan
NORTH KING COUNTY	<p>I'm very disappointed with the proposal. Although I'm a strong transit supporter, this plan will be a sprawl-generator allowing far more people easier access to the far suburbs.</p> <p>What we need is as much transit capacity within our core as possible, not a BART-like sprawl machine. I strongly supported ST2 because it added enough core transit to justify the sprawl-creating suburban transit. But ST3 is far past that balance point, giving Seattle only at-grade rail we have to wait 25 years for while far expanding suburban transit.</p> <p>I understand you want to "complete" our light rail system, but it might be time to end Sound Transit as a construction agency (based on its unfortunate equal spending requirement in all areas), and start over with an agency that focuses in the core.</p>
NORTH KING COUNTY	<p>I support light rail expansion but believe this plan is just too big and too long. Remove the projects that would take more than 20 years to complete, and focus on light rail to West Seattle, Redmond and expanding it south toward Tacoma. Look at commuter rail as a way to commute north and to Ballard. Can this be expanded there? I don't see any mention of this.</p>
NORTH KING COUNTY	<p>The timescale on which these rail projects are scheduled to be finished means that by the time you're performing the ribbon cutting ceremony in 2040, 75% of the traffic on Seattle's streets is estimated to be autonomous vehicles. This is expected to double the capacity of streets due to reduced congestion and increased speed limits. Ride-sharing services like Uber using electric autonomous vehicles in 2040 are estimated to cost the customer between \$0.08 and \$0.44 of today's dollars per mile. A ride on a Metro currently costs \$2.50, history suggests that price is very likely to increase in the next 25 years, and I would be willing to bet that the majority of transit trips are not more than 2-3 miles. Don't think about today's challenges when planning a 25-year project. Think about whether your potential customers in 2040 are going to be interested in riding your train when they can pay ~less~ money for a ~faster~ trip which goes ~door-to-door~ rather than to infrequently placed train stations. Urban trains are cool, I agree, but we're rapidly approaching the point in human history where they become obsolete. By all means finish building out the currently approved system, but don't spend another \$50bn of other people's money for what is going to wind up being an unused vanity project.</p>
NORTH KING COUNTY	<p>denser urban areas should be considered earlier in the plan to ease congestion in the city of Seattle.</p>
NORTH KING COUNTY	<p>As I strong transit rider and supporter I will vote against this proposal as constructed. ST needs to prioritize high cost capital projects where they are needed most, and that is: UW-Ballard, Ballard- SLU-Downtown, SLU to Capitol Hill, and Overlake to Redmond. Building rail from Lynnwood to Everett and Federal way to Tacoma is wasteful, but I could tolerate the waste (its not my sub-areas's money, one could argue), if the Seattle lines would construct sooner - three years to permit and six to acquire and construct.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	I don't see why Seattle tax payers should foot the bill for Tacoma to get light rail. and you are flat out lying about it only going to run each person 200\$ a year. the only way that could be true is if you make less then \$35,000 a year. most people that live in Seattle will pay over \$500 a year more in taxes when 12% of the city that will ride this thing should be paying more for it.
NORTH KING COUNTY	I think the majority of the focus needs to be on building light rail out, not on buses. Part of the problem we have is communities are not being planned and built on permanent solutions like rail. Bus service comes and goes. If we build a light rail station then you can build a large number of small unit housing with no parking because there is and always will be light rail. Bus service comes and goes with leadership changes and budget instabilities.
NORTH KING COUNTY	Less spending on buses. Spend the funds on light rail first!
NORTH KING COUNTY	I would say I think projects should be added and removed. Specifically, it seems like you are trying to get light coverage to the entire region rather than really fix the problems in one part of the region. For example, the light rail to Everett and down to Tacoma seems like it would have a much lower value than trying to move people around the immediate Seattle area. It is like Manhattan having only 2 subway lines while trying to build all the way out Long Island and into Western New York. The population centers just don't support it.
NORTH KING COUNTY	BRT should be completely removed from ST3, it is a farce without a grade-seperated right of way.
NORTH KING COUNTY	Not supportive of expanding Sounder train service between Seattle, Tacoma and Lakewood, with an extension to DuPont. Please scale back to expanding link light rail service and bus rapid transit.
NORTH KING COUNTY	Sounder service should be increased to Everett and Tacoma and extending the Link to those areas should not be a priority. Running the LINK light rail all that way is impractical as busses and driving would still be quicker. There isn't a lot of demand for Tacoma to Seattle or Everett to Seattle by light rail with length of time involved. The costs don't outweigh the benefits. Also it is sprawl inducing. Improving Sounder service would be quicker, cheaper, and make more sense to get rail service to these areas. LINK light rail should be used for shorter distance, high-demand routes like Ballard to Downtown Seattle and/or UW, West Seattle access, and routes from Seattle to the Eastside. These routes will remove more cars from the roads and should be made a priority. That way someone from Everett could take a quick Sounder ride into Seattle, and catch the LINK to get to any neighborhood destination. A greater than 20 year wait for light rail to Ballard and West Seattle is beyond ridiculous. For these reasons I am leaning towards voting no on this package even though I strongly support mass transit and the light rail is essential to the region.
NORTH KING COUNTY	Many of the proposed additions to the plan would serve low-density, mostly single-family housing areas where people are unlikely to switch to transit. In addition, funding should come at least in part from additional fees levied on people who choose to drive solo into Seattle: more HOT lanes, more tolls, higher parking taxes, and so forth. Only by disincentivizing solo car travel will people even consider changing to mass transit.
NORTH KING COUNTY	Focus on light rail and Sounder and focus/spend minimally on interim bus solutions.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	Transit stations in downtown areas of Seattle are too close together. The stations are costly and make trips longer making it a less appealing option.
NORTH KING COUNTY	Buses driving on highway shoulders is unsafe, causes visibility and safety problems for all highway drivers, and precludes the safe use of the shoulder by disabled vehicles (one of the main intents of highway shoulders). Remove bus driving on shoulders from the ST3 plan.
NORTH KING COUNTY	Light rail beyond Lynnwood and Federal Way is a colossal waste of money. Those trains will run as empty as BART trains to the ends of its system. The rail system would be more useful to both Seattle and suburban users if the network in Seattle were more comprehensive. More lines in Seattle mean more service to the job centers the suburbanites wish to commute to.
NORTH KING COUNTY	light rail all the way to Everett is a political boondoggle at a fraction of the ridership and economic benefit as project in the urban core at comparable high costs. I would highly support removing it and doubling down on transit modes more appropriate for long distances such as our Sounder commuter rail system.
NORTH KING COUNTY	Please avoid spending too much money on parking. I know the Seattle Times editorial board wants it always, all the time, everywhere, but... :)
NORTH KING COUNTY	I don't understand why cities further out are getting light rail-I feel like the most dense core (Seattle proper) should have prioritized light rail, and the further out areas, like Lewis McCord and Everett should be served by commuter rail. Why are we trying to server everyone with both?
NORTH KING COUNTY	Buses are not the answer. Speed up the light rail implementation and take buses out of the equation!
NORTH KING COUNTY	I think focusing less on the further suburban areas would be better and focus more on Seattle/Eastside and areas closer to the center since light rail in areas closer to downtown Seattle will make much more of an impact than light rail in less densely populated areas where it wouldn't make a big enough difference in convenience for those people and they'd still probably drive instead.
NORTH KING COUNTY	Please stop this charade of lies. Everything "Sound Transit" or more accurately Unsound NO TRANSIT does is incredibly over budget, delayed by years/decades, over promised and under delivered, in short you lie about everything and are a rogue agency that needs to be destroyed in SHORT ORDER! YOU ARE A BLACK HOLE FOR TAXPAYER FUNDS AND WE ARE SICK AND TIRED OF YOUR SCREWING US OVER TIME AND TIME AGAIN!
NORTH KING COUNTY	Seattle has had an excellent bus system. We have wasted billions on light rail, that could have been spent making it the best in the world. The problem with transit planning in Seattle is that Seattle politicians and planners don't actually use it, and have not got a clue, when it comes to planning it. ST3 is hardly more than a politicians sound bite, and will have precious little real impact on public transit usage, dollar for dollar spent. Take Metro Transit, see for yourselves how many people use it, and use ST3 dollars to tangibly improve it. On ST3, this pro-transit voter is a great big "NO"!!!!
NORTH KING COUNTY	The total cost is too high and I don't see the value in extending light rail so far from urban centers. Grade separated light rail is best used as a way to move people around dense urban areas, not for commuting from distant suburbs.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	<p>The spine is missing the densest neighborhoods to use an inappropriate transit mode (light rail) to hopscotch through lightly populated areas.</p> <p>Focus on where the people live, not where the building is easiest. Focus on Lake City and other dense, poorly served urban villages, not far-flung suburbs where commuter rail like sounder is appropriate, not light rail.</p>
NORTH KING COUNTY	<p>While mass transit, including light rail, commuter rail, and express buses (BRT) are critical to the region, the priority ST-3 places on lower density, outlying areas at the expense of already dense neighborhoods in the core of Seattle is unacceptable. Additionally, light rail to Tacoma and Everett is not the solution for long distance travel. Many cities have several tiers - commuter rail for long distance, light rail for short to medium urban routes, and buses for other connecting service. Additionally, the timeline should be reversed. Service to Ballard and West Seattle, already dense neighborhoods, should be accelerated. And additional routes should be investigated to connect even more of Seattle.</p> <p>It's understood that Sound Transit is responsible for transit in the whole region, not just Seattle. And it's understood that outlying areas will not support a Seattle-centric proposal. However, is there no way to bring greater service (frequency, reliability, and clarity of routes) to outlying areas without light rail? It would make sense to use the mode that can carry the most and costs the most to build in the areas that are already dense and suffering from lack of adequate transit. By refocusing efforts in the outlying areas on BRT and much improved Sounder service (frequency at current levels is almost a joke), resources might be freed up to better invest in an urban light rail system.</p>
NORTH KING COUNTY	<p>Focus on rail rather than buses and speed up timing. You won't get support for a system that will take 20 plus years to build out. Ask our state's congressional delegation why they aren't doing more to get us more money -- this would be different if we were on the East Coast.</p>
NORTH KING COUNTY	<p>I'm 65 years old &amp; born in Seattle + I took Metro Bus to work everyday for over a decade. Buses take twice as long to even get close to where we need to go, they're often over-crowded with standing room only &amp; they stink! I need a car to transport groceries, to timely to get to Dr. appointments, etc. Just fix the damn car-wrecking potholes &amp; stop changing 4 lane roads into 2 lane parking lots or bike lanes that us old folks can no longer use. Also stop charging \$10 or requiring 3 instead of 2 occupants to use the car pool lanes so that just the rich 1% have the use of our highways! Fire all the inept DOT staff &amp; their consultants. Just get the developers out of the politician's pockets &amp; over-crowding/congestion will solve itself!</p>
NORTH KING COUNTY	<p>Go to whitecenter via delridge rather than to West seattle junction</p>
NORTH KING COUNTY	<p>Everett and Tacoma light rail is pointless. Spending billions on technology that isn't designed for the job to get ridership from massive parking complexes is terrible planning. We only get one shot at this, lets build the parts people will actually use, subway in the city.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>I strongly support transit for Seattle. I strongly oppose this plan because it offers almost nothing for Seattle and asks us to wait an unreasonable amount of time for what little we would eventually get. For the last several years I have held out hope that ST would get its act together and start building a useful urban transit network for Seattle, but now I am giving up. I am bitterly disappointed with ST. I don't want a regional network, I never wanted a regional network, and I am not going to pay for a useless regional network if I can avoid doing so, especially not at the cost of the real urban transit network we have so desperately needed for over a decade now. Instead of advocating for further transit investment, as I have been doing for years, I will now counsel my friends to oppose ST at every turn. We need to get Seattle out of this mess, stop wasting our money on your car-dependent sprawled-out mess of a future, and establish a new transit organization focused on real urban transit for Seattle that will actually solve our actual problems in Seattle instead of wasting Seattle's money all over the hinterlands accomplishing nothing of any value.</p> <p>Your plan enshrines car dependence into our future for decades to come. Light rail nodes in sprawled-out suburban neighborhoods do not come anywhere close to allowing those people to live car-free lives. By wasting our money serving them, you give up the opportunity to allow more of the city dwellers who are already close to being able to give up their cars to do so. What on earth are these enormous park-n-rides supposed to accomplish? Why would we want that?</p> <p>We need real transit for Seattle and we need it so much sooner than your hilariously pessimistic timetable proposes that this whole plan feels like a cruel joke. No, I will not vote for this. Go away and bother the suburbs, I'm done with you.</p>
<p>NORTH KING COUNTY</p>	<p>ST3 is too expensive and too long in its timeline. Focus first on light rail in Seattle. The suburbs have already voted against expanded bus service. They won't ride the rail options nearly as much as Seattleites will. Focus first on Ballard and West Seattle and add a UW to Ballard line. Don't expand light rail into the suburbs until Seattle is more complete. Also, don't take decades to execute on the light rail plan. It doesn't take 20 years to dig a tunnel.</p>
<p>NORTH KING COUNTY</p>	<p>Don't connect to Ballard</p>
<p>NORTH KING COUNTY</p>	<p>I will not vote for a project that ignores where people are and takes 28 years to get to the highest population centers. I've supported ST from the start but I will not vote for this plan. Subarea equity be damned.</p>
<p>NORTH KING COUNTY</p>	<p>Remove Everett portion, they already have commuter rail! Light rail will take too long to get there anyhow. Not a priority. Use the funding to fix east-west traffic. UW-Ballard is essential, will not support the plan without that. Route 8 should also at least be investigated. Also, I will not support any at-grade light rail within the most dense parts of Seattle! (Like the proposal for Ballard)</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	The ST3 plan should focus on completion of the North South routes, before adding Issaquah (crazy) or specific local routes for Seattle neighborhoods. And why in the world do we need another expensive Seattle tunnel? Sometimes the simplest solution is the best.
NORTH KING COUNTY	This is a pretty bad plan overall. Seattle is 4-5x the land area of Manhattan, yet is served by one single rail line right now. And most of the rail milage in this plan is going to suburbs. We need to first focus on improving density and transit in the city itself. It's not going to be cost effective in the long run to build and maintain long relatively lightly used rail lines to suburbs.
NORTH KING COUNTY	Do it for cheaper or don't do it at all. And if funding is needed, get it from corporations, not individuals.
NORTH KING COUNTY	Let's focus getting the core of the three cities (Seattle, Bellevue, Redmond) connected before running a line to far away places like Everett.
NORTH KING COUNTY	I strongly oppose expanding the bus system here, in that light rail is the only way to go (it doesn't interfere with vehicular traffic). I believe it is critical to expand light rail to West Seattle and Ballard FIRST, as the multi unit housing boom is ridiculous in those two neighborhoods. The other option is to STOP zoning for multi unit housing. These two communities have completely lost their charm in the last 10 years (W. Seattle in the last 2). TOO MANY PEOPLE in these smaller communities, and no where to park for those visiting, especially Alki Beach. I lived in New York City for two years, and the best thing about living there was getting rid of my car and being able to get anywhere within 20 minutes on the subway. Buses take up road space and aren't very safe.
NORTH KING COUNTY	I live in Georgetown--that Boeing Access Road station would be our closest station if completed, but it really would be in the middle of nowhere--down an empty, empty road from Georgetown itself, and not terribly close to Boeing either. It doesn't seem like a good investment.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	<p>In the past 20+ years of Sound Transit's existence, it has yet to place a single mile of rail in Snohomish County. No consideration for infill or West Seattle/Ballard/second tunnels should even be given until the spurs of this line are completed. Places like Issaquah and Lynnwood are no longer suburbs, but a part of urban sprawl. The entire RTID footprint needs to be expanded before we start infilling the downtown core lines (this includes rail to 512 before any kind of TCC spur).</p> <p>Any rail to Issaquah that goes north of BCC (say to South Bellevue, or worse all the way up to Overlake) is a non-starter. Treating anything east of Bellevue as a "red headed stepchild" is both damaging to our transit and patently unacceptable.</p> <p>In the end, light rail may not be able to be saved. The existing lines are so poorly designed they come across as money pits (designed to take the most fare for the least service) as opposed to transit (removing as many car/people miles from our roads as possible). An entire paradigm shift is needed at ST before I can support their actions. Which is a pity, because I support light rail. I just don't support the current attitude coming from ST and the RTID.</p> <p>Think about it for a moment. We're discussing an entire second downtown tunnel before we've moved one inch towards Bellevue. Olympia isn't even on the map yet (yes, it should be included despite its myopia). Something like BART (ignore its NIMBY naysayers) is needed in this region above all else. You've turned BART lines like a Seattle-airport express into the light rail equivalent of local lines. That doesn't serve transit in the region. It only serves getting money into ST's coffers more quickly. That's not the RTID's job. That should not even be a consideration.</p> <p>I am unsure if it was removed, but original plans included a hefty sum for ST4 planning. I don't think I need to explain the unmitigated gall behind such a request. If that is still in the proposal, that is a poison pill that I cannot support.</p>
-------------------	--

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	<p>I'm concerned that the (completing the spine) metric for selecting light rail projects is arbitrary, unacceptably political, generally ineffective for mass transit and wasteful of public funds and ST staff time. Station and alignment routing should be primarily determined by ridership calculations existing density, with REALISTIC population growth and bus transfer ridership. The extensions of Link beyond Lynwood and Federal Way do not serve station areas that can generate much additional ridership without either massive redevelopment, or parking garages. And current express bus service appears to serve commuters better than link will. Meanwhile existing dense neighborhoods that can effectively be served by light rail will not be for an unacceptably long time and with an alignment and routing that appears to clearly serve special interests at the cost of degraded service, more complex and time consuming construction while foregoing stations that would serve established dense neighborhoods like First Hill , Convention Place, Belletown, Queen Anne, the Central District, Wallingford, Fremont, Bitter lake, Lake City...</p> <p>In short, as an extremely pro transit North King voter, I feel that this plans shows that ST, in it's current form, does not adequately serve urban Seattle interests.</p>
NORTH KING COUNTY	<p>Too big. If you're not going to build light rail to Ballard and West Seattle unti 203? (does the monorail look so stupid now?), then put off including them in the plan until 2025. Why commit yourself to something so many years in advance.</p> <p>One more thing: All the data on Question 15 should be ignored since the descriptions clearly nudge voters toward YES, WE WANT SOUND TRANSIT.</p>
NORTH KING COUNTY	<p>No parking garages. No useless freeway stations. Only walkable/bikeable transit, please.</p>
NORTH KING COUNTY	<p>Remove all parking expansion plans from the project.</p>
NORTH KING COUNTY	<p>remove sales and use tax - low- and no-income users should not be taxed for this project</p>
NORTH KING COUNTY	<p>The proposed light rail to Ballard and West Seattle is the stupidest parts or a very poor and overblown plan. As a professional traffic engineer and transportation planner with over 25 years experience, I am appalled at how bad this plan is. Start over and do it right.</p>
NORTH KING COUNTY	<p>Less crap in the burbs, more in Seattle. The timelines are so ridiculous for the Seattle project why even bother.</p>
NORTH KING COUNTY	<p>I believe all focus should be placed upon making a Link solution for Ballard. Lynnwood extension to Paine Field appeases Snohomish County, but it really doesn't make sense for affordable, efficient transit. And while Tacoma extension may look good on a map, existing bus service is faster and cheaper. I'd like to see a smaller plan for Seattle, and not outlying areas.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	Prioritize high-ridership, transit-oriented projects that will get big bang for our bucks. This means Ballard to downtown and W. Seattle to downtown. Those trains would be full if operating today! Delay costly, low-ridership projects like Sounder North, service to Orting, Bellevue-Issaquah. ST3 must use our finite funds more wisely!
NORTH KING COUNTY	This is a plan for sprawl. The light rail trainsets are not meant for commuter rail. We're building a BART network with SLUT rolling stock.
NORTH KING COUNTY	I didn't comment positively on BRT because I think it's a been counter-productive as deployed in Ballard. People are getting where they want to go either more slowly (for the commuters downtown) or with more walking (for the former local bus riders). So, basically, it works worse for the most people, v. The prior system of local and express buses. I would still take the former 15x and 15 local system; rapid ride is garbage and I never ride it. Also, I am opposed to prioritizing projects in the 'burbs that favor suburban sprawl. We don't even have good transit for the city people. When Ballard's 28X is being cut (stops added, making it less and less "express") even though the population of Ballard has tripled since I moved there (with no meaningful transit improvements, and in fact a step backward with the BS rapid ride), why are we discussing sounder train expansion and light rail to the hinterlands? Please start with moving people rapidly (for real) IN THE CITY, when we are the people paying through the teeth to live "close in" (which has a host of cost-reducing benefits) and, so far, are getting nothing for it. Please bring real transit to Ballard. The City raised heights to 8 stories ~10 years ago and has done jack to improve infrastructure to accommodate the growth.
NORTH KING COUNTY	I don't care about outlying areas and I think this project is a waste of money.
NORTH KING COUNTY	Building light rail transit to suburbs should be not be a priority over building GRADE SEPARATED light rail transit to densely residential areas of Seattle. All light rail investment in Seattle should be GRADE SEPARATED. A drawbride to Ballard? What a ridiculous waste of money!  I'm opposed to the ST3 proposal in it's current form because it makes the wrong investments.
NORTH KING COUNTY	I think the 2nd downtown tunnel should be included in a later phase and only if needed, Money should be spent on Ballard and West Seattle lines first and a new tunnel should only be added when capacity of the existing downtown tunnel has been reached. Sounder should be the main connector between Tacoma and Everett. Light rail is not well suited for these very long milk runs.
NORTH KING COUNTY	This plan has too many worthless appendages on its map. Hack, them, off. Feed the core. Fix the core. Only then will I ever in my lifetime support branching out. And yes, please, tax the [explicit] out of me. Do it. Take my money. Please. But for the love of god don't waste it on [explicit] like this branching out nonsense. The light rail needs to WORK. Right now, you get on the light rail at SEATAC, you close your eyes, you wake up and you're in Downtown. That's BEAUTIFUL DESIGN. The second you have to involve the foot traffic of 12,000 people transferring from light rail A to light rail B, the entire system will crawl to a halt. Kill the expansion. Fix the existing. Fortify the core.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	The thing you haven't asked because you are clearly too afraid. Why won't you support this? Gee, maybe because in Seattle we are being taxed out of homes compared to the rest of the region with nothing to show for it. More traffic, an investment in a worthless bike system, more crime, an investment in a bike lane system that very few use, rainbow crosswalks etc. I don't trust any of you with my hard earned dollars. You never know when to hold back and live within your means.
NORTH KING COUNTY	Light rail to Issaquah makes little sense given ridership projections. Issaquah is not urban and would be better served with bus service and vehicular traffic. More emphasis should be made to make Ballard to West Seattle via a new downtown tunnel happen within the next ten years, otherwise this package is useless.
NORTH KING COUNTY	130th, Boeing Access Rd, Issaquah LRT, Tacoma Link too expensive, BRT projects don't seem like true BRT should continue with Express Bus Service, remove paine field options too.
NORTH KING COUNTY	What made Sound Transit trustworthy was planning major projects in manageable bites, preferably less than a decade to completion, and connecting the parts of the region that are already eager to ride transit. I'd definitely vote over and over for one or two subway segments at a time, plus BRT or similar to induce light-rail-supporting density. Tell us what regions are going to eventually get connected by rail, but don't make us vote on the whole thing at once. ST is great now, but a pre-funded behemoth could lose accountability and we can't afford another one of those.
NORTH KING COUNTY	studies that include the impact of self driving cars should be considered
NORTH KING COUNTY	If congestion improves with the rest of the area, there is no need for a Ballard to West Seattle light rail connection. It has often been said that you live in Ballard, you work in Ballard. Bus improvements would go a long way to ease this problem. Perhaps limiting lanes to bus only, or entire streets are bus only.
NORTH KING COUNTY	The plan is redundant. The Sounder already goes to Tacoma, but you also want to add the light rail and faster buses and dedicated bus lanes and etc. etc. If it were up to me, I would prefer light rail to focus on all of these areas (especially W Seattle because I live there. But also, traffic gets bottlenecked on the bridge w/no other course). I do like the dedicated bus lanes, but if you are going to have that, why do you need to add rapid transit? If the light rail or Sounder don't serve some areas, then I see the reason to add buses. But otherwise, money and time is being wasted. I hope I am not the only one who sees it that way.
NORTH KING COUNTY	Please please please stop taxing us to pay for more transit. Very few people as a percentage of the city and state would choose to pay for this stuff and even fewer will actually use it. Commuting should be paid for by those who use it. If i use my car to get to work, I shouldn't have to pay for other means of transportation. We already have the highest gas taxes and our sales tax is absurdly high as well. Please, the people of Washington are begging you, stop trying to force more public transit on us.
NORTH KING COUNTY	Eliminate all Sounder trains from Everett to Seattle. Redirect people to light rail. The service is totally unreliable because of too many mudslides. STop throwing good \$\$ after bad.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	ST3 is more likely to be passed without some of the extra-curricular projects added on. TOD and ped/bike access could be part of a smaller ST4?
NORTH KING COUNTY	Too much focus on suburban bus lines that aren't going to solve the region's transportation issues. They are a distraction from the urgent light rail needs, the timeline for which is ridiculously long.
NORTH KING COUNTY	I would vote for improvement of transit within Seattle before voting to be taxed to improve transit outside of Seattle.
NORTH KING COUNTY	Do not do so many projects. Focus your money on light rail - not pedestrian improvements, not bike lanes, not bus rapid transit, not Sounder Rail, not parking lots, not road construction. What really changes commute times are subways and light rail that do not in any way get involved in traffic. Everything else is wasted money, doesn't save time, or decrease traffic. It may seem politically expedient to give rail to the suburbs first. Do not cave to this. Base your decisions on where the population density is highest - West Seattle and Ballard. Also the fact there is no plan to immediately add rail to 520 is a major failure. You need to up your timelines significantly. Light rail to Ballard, North Seattle, and West Seattle need to happen immediately, not 20 years from now. It is grossly unfair to continue taxing homeowners and poor people via sales taxes and motor vehicle taxes when several major, global corporations operating in this state greedily avoid paying state taxes by incorporating in other states or claiming they sell their products in other states to avoid paying Washington taxes. These corporations are getting a free ride by getting the advantages of their workers commuting on public transportation without adequately paying for it. Not to mention many of them provide private buses for their white collar workers which remove revenue from the public transportation system and create a system of rich and poor that is inequitable. The same goes for developers - when they add tens of thousands of people to an area by building housing or office towers, they must bear some of the cost of getting all those people to and from those new, huge buildings. A tax package without money coming from developers or corporations is regressive and disproportionately punishes the poor and middle class.
NORTH KING COUNTY	Improve bus service. Do not extend light rail further. Do not tax homeowners further. Increase bus and light rail fares to raise more money.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	<p>Though I have been a transit-only commuter in my previous city of residence (Chicago) and have ridden transit in over 20 cities on three continents, I am unalterably opposed to more expansion of Sound Transit in any form. The reason is Sound Transit's unerring actions to ride roughshod over road access, travel times, and costs of car users. SOUND TRANSIT DOESN'T "GET IT"!!! It has to be car capacity AND transit. Not transit attempting to force car commuters out of their cars by "taking" previously functioning road systems (used by 75% of the travellers in the best scenarios) by obstructing them in every way possible. For example, we have lost fully 50% of our road-land capacity out of my zipcode to cockamamie lane reductions. For example the expenditure on truly loony building of toll lanes in I-405 that made traffic worse. For example the opening of a huge new 520 bridge that has NO MORE GENERAL PURPOSE LANES THAN ITS PREDECESSOR, despite the desperate need for same. For example taking the I-90 bridge express lanes for the sole use of rail, when BRT could have been used, connecting in rail stations to rail on both sides (Cf Boston's "Silver Line"), thus preserving carpool lanes.</p> <p>Getting from one place to another by car (my two electrics, charged by my solar panels) has become a guerilla activity, involving sneaky routes up side streets and arterials not yet seized by TRANSIT AND BICYCLE PIGGIES. Sound transit's planning executives have their heads in their posteriors!!</p> <p>I am a contributing member in over 15 liberal (D) campaigns nationwide, for the US Senate and House, and the Presidency. But vis Sound Transit you have made me "Tea Party"!! Sound transit expansion needs to be defunded, its planning offices shut down, its planning staff sent away. And then started over with whole different priorities. I will be voting the first (R) of my 73 yr lifetime (!!), supporting Bill Bryant for Governor to <u>_first_</u> get the roads moving.</p>
NORTH KING COUNTY	<p>I would like to see a smaller plan with faster timelines focusing on Seattle neighborhoods for light rail and rapid bus for outlying areas. I support light rail, however it is unpalatable to vote on such a large plan that doesn't even implement light rail for 17 years.</p>
NORTH KING COUNTY	<p>Timeline is too long. Plan prioritizes low density low ridership light rail to Everett, should be replaced with BRT. Light rail is needed in the dense areas.</p> <p>Please consider light rail or BRT from Ballard to the University District / UW, and/or Ballard to Northgate.</p>
NORTH KING COUNTY	<p>I'm not in favor of expanding commuter rail until we can make it as reliable as light rail. I hear often on the morning news that commuter rail is out of service due to land slides.</p>
NORTH KING COUNTY	<p>This is the most ridiculous undertaking I have ever heard of. Businesses will leave Seattle because they have to make room for the ST3; taxes on all income households will be increased causing more homelessness; people will move out of Seattle and elsewhere to make room for this huge unnecessary project. The whole thing is ridiculous. The leaders of this city and county must be smoking something to come up with such a pipe dream.</p>
NORTH KING COUNTY	<p>I smell a rat the project in a waste of taxpayer money</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	THIS ENTIRE PROJECT IS TOO COSTLY in more ways than one! The cost per person is too expensive per past history showing only a fraction of the metro population using the rapid transit system. All our money is going into this instead of roads and buses. People who live outside the "bullseye" of the transit system (other than buses) will be left using a vehicle. But, of course, by design, you have made it more and more difficult to do so! No! No! No! Too expensive for ROI while leaving out an entire rural metro population who must still pay into this fiasco. I also disagree with the idea of buses using the shoulder. This is crazy. A disaster in the making. I for one do not want to see my tax dollars spent on the lawsuits that will surely happen because of this asinine idea! I will be voting NO in November.
NORTH KING COUNTY	Real property owners have paid enough in taxes for these projects to-date. This current proposal would require payment of hundreds more dollars annually. This is a significant burden to property owners on fixed/limited incomes. Social Security payments will not increase year-to-year sufficiently to cover hundreds more dollars in property taxes. Some other way of funding should be found, or property owners of incomes below a stated amount should be exempt from paying added taxes, or should pay less in added taxes.
NORTH KING COUNTY	The line from Bellevue to Issaquah does not make any sense. Issaquah does not have any population centers that can support light rail, and the regional growth center designation does not appear to have any grounding in reality. Conversely, there is substantial demand and continued growth in Ballard, Wallingford, and Kirkland. Quality transit should be prioritized for population centers that have existing density and existing growth. We should not be building rail to paper town centers.
NORTH KING COUNTY	Local Seattle/Bellevue light rail and BRT projects should be priority, Rate fee increase should be included taking burden off of property and sales taxes, projects should complete sooner than 25 years.
NORTH KING COUNTY	Focus on rail service everywhere and put money there. I'm more likely to support tax increases for a rail project than for rail plus bus.
NORTH KING COUNTY	Maybe half or a third of these projects are vital and well worth the cost and investment, but many are not and the money spent on transit improvements should be focussed on areas that deliver the most economic benefit.
NORTH KING COUNTY	I don't trust your numbers. The Ballard Monorail alone grew from 3 billion to 11 billion before being withdrawn.
NORTH KING COUNTY	ST3 should be broken into a smaller, short-term plan that can be implemented within the next 10 years. As our region continues to grow we shouldn't ask voters to approve projects that won't even be constructed for 20+ years. Please use Denver's FastTracks program as a model for the Seattle region & modify ST3 to identify as many changes as possible that can be implemented for low cost & in the short-term.
NORTH KING COUNTY	I believe the plan is over ambitious and too expensive. Please look at the overall feedback on what the most people believe will help them in their commute and leisure travel. I work from home and try not to contribute to the transportation mess! Scale down the plan to perhaps a handful of bus rapid transit, light rail, and Sounder train projects in the core population areas bounded by Lynnwood, Bellevue, Renton, and Tacoma.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	<p>It seems extremely short-sighted to presume that the surrounding areas will require light-rail service (the most expensive investment) at such extraordinary ranges over the course of the next 25 years. During the last 25 years, we've seen significant changes to our lives with regards to transportation, technology, and the development of the region overall.</p> <p>I would strongly urge a plan that is shorter, less expensive, and more effective per-dollar rather than building a system that may have a significantly less impactful presence in the expected timeframe.</p>
NORTH KING COUNTY	<p>The Graham St infill Station shouldn't happen in my opinion, my least favorite aspect of the light rail is how long it takes to get to the Airport. 2 ish miles is enough between these stations, and it is very walkable in-between stations, in contrast with something like the Boeing Access road infill which would actually provide light rail transfer to an area that was completely inaccessible by the link before ST3.</p> <p>Overall I think it is a great plan. The early, under budget Universtiy Link is a great success, improving the rail utilization quite a bit. Fifth avenue to Ballard is my favorite extension, as it would make Link to the Airport not have to compete with busses which often frustratingly delay the light rail, further reducing the journey time to the Airport. Ballard is a cool place too, it would be nice to have a mass transit option there.</p>
NORTH KING COUNTY	<p>Seattle needs a light rail (or underground subway) system to decrease traffic. Light rail projects that attract bus riders will not cause a decrease traffic. In the past several years, traffic has become worse and will likely worsen further in the future. I can somewhat support buses having a shoulder lane except that buses carry a stigma that rail does not even if they cost the same price. I believe there is research that says people who would be willing to take rail/subway, will not take a bus even if the cost for bus is less than rail/subway. Also, the location of the stations needs better planning to be easy for the demographic who drives to access otherwise you will only attract bus riders. An example is the University stations. It isn't near enough shopping or the University that I would be willing to not drive. And the stops from downtown to capital hill are a bit useless because that is an easy walk...and it is about the same price to take uber/lyft if more than 1 person is traveling without the wait.</p>
NORTH KING COUNTY	<p>Up the light rail, move away from bus transit, as a less sustainable mode of mass transit--get on with the lightrail, we are so far behind!</p>
NORTH KING COUNTY	<p>Light rail is a bad use of our money. The costs outweigh the benefits. We should put our money into buses instead of light rail.</p>
NORTH KING COUNTY	<p>Ballard</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	<p>ST faces a structural problem in its planning and operation; a board of suburban constituents hijacking planning for inefficient and ineffective uses, and a state government oversight run by transit hating conservative lawmakers. Despite this, ST has a real opportunity with ST3 to right the ship.</p> <p>However, ST has another major challenge that is the flaw of their mission to provide transit non-supportive locations with transit. Doing so only perpetuates destructive sprawl and wasteful infrastructure spending. ST should connect existing centers with transit. Areas that cannot support high capacity transit should not be targeted for multi billion dollar transit investments. These are areas that should receive BRT or other express bus connections. Most importantly, ST should stop building parking immediately. The \$1 billion (~2%) of this proposed package being targeted for parking is OUTRAGEOUS.</p> <p>Allocating the resources as described in this plan in no way relates to goals of maximizing financial investment, reducing carbon emissions, encouraging transit support land uses, or serving the most people with high capacity transit. Projects that do meet these critical goals are diluted with surface routings delayed timelines, or are absent completely. Subways in Seattle, improved Sounder service between existing cores, and Express bus service should be what this package includes. Unfortunately, parking, trains to nowhere, sprawl rail, and more parking is what is being presented.</p> <p>This plan currently reads like a vision for 1958, not 2038. ST needs to seriously reconsider.</p>
NORTH KING COUNTY	<p>Remove all BRT that does not operate on its own, separate right of way. This means most of it. BRT is required to operate on its own ROW to operate safely, efficiently, and speedily. Remove light rail north of Lynnwood or Edmonds. Routes to Everett must be commuter rail only. Repair or replace the commuter rail ROW north from Ballard to either a new right of way, or begin reengineering the cliffs above the rails, including eliminating the residences above the cliffs.</p>
NORTH KING COUNTY	<p>The Seattle streetcar does not bypass traffic, diverts funds from other more important projects, and serves a very limited ridership. It only moves forward as the pet project of a few wealthy and influential private citizens. Please remove this project.</p>
NORTH KING COUNTY	<p>Prioritizing parking is bad for the environment, dangerous for pedestrians and bicyclists, and reduces much-needed density around the light rail stations. We should be adding neighborhood bus lines and bike trails to and from light rail stations rather than adding parking.</p>
NORTH KING COUNTY	<p>Do not build another tunnel underneath downtown Seattle. That is wasteful. Improve the existing tunnel to work with more trains and to branch out other directions, such as Ballard.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	If Snohomish and Pierce Counties are not on board financially, then we don't expand in those areas. I don't feel that we, in King County, should shoulder the burden for the Puget Sound area. Also, I noted that there is no end date to the taxes. This brings back memories of paying taxes for the Kingdome after it had been imploded (i.e. paying taxes for a building that no longer exists). Who is going to be held accountable for cost overruns and ensuring the project is running on-time? Who is accountable for the budget, to ensure taxes are spent appropriately? Has anyone thought about the project as far as we'll be moving more people via public transit into Seattle, knowing that the current bus system cannot support it? The current bus system can barely handle the number of bus riders during peak hours as it is.
NORTH KING COUNTY	The overall timeline needs to be sped up.
NORTH KING COUNTY	If you really want to make transit RAPID - so that people will actually use it - then you need to concentrate on the ends and not stations in the middle. Remember that people will have additional bus/walk time at the end of their train ride - so you better make the train ride super quick if you want people to use it. Otherwise it will be a very expensive white elephant, like the SLUT (Oh, sorry, the South Lake Union Trolley) - which no one in their right mind except the disabled or the lazy takes. And PLEASE for goodness sake THINK more about the future health of Puget Sound while you are at it!! The more green space you pave over, the more mature trees you cut down, the more you increase toxic runoff into Puget Sound. Ask the hydrologists at UW - they will tell you that no amount of "mitigation" will make up for crazy development. Don't site your stations in environmentally sensitive watersheds, such as the proposed station at 130th St, which is less than a mile from the already disastrous station at 145th St, slap-bang on top of Thornton Creek, which used to carry 30% of salmon in Lake Washington. When Puget Sound is a polluted cesspit of runoff with dead Orcas on the top, will you wring your hands and deny all knowledge of how this happened? TRANSIT IS ONLY PART OF THE LARGER PICTURE, SO TAKE YOUR BLINDERS OFF.
NORTH KING COUNTY	rapid bus transit is only as good as the roads the buses run on. Seattle traffic is gridlock all the time. We have enough buses, and people are already over taxed (my car tabs were \$230 this year) forget the "rapid" bus idea and focus on light rail. a separate, traffic free, independent infrastructure that we can depend on. FORGET THE BUS IDEAS!!
NORTH KING COUNTY	Light rail needs to focus on connecting Seattle to Seattle, not Seattle to Issaquah. Ballard and West Seattle should have light rail! And not in twenty years. That's a snails pace of expansion compared to other industrialized countries. And it makes no sense financially to add light rail out to Issaquah when buses would be way more efficient. Especially if there are more bus only lanes. Another place that Does Not Need light rail is the airport to the north. Nobody wants that and it makes the light rail track go off on a tangent. Use the more efficient route and leave the airport out.
NORTH KING COUNTY	Prioritize Link light rail to Redmond. Deprioritize buses.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	<p>The project should first focus on expanding the light rail and sounder trains. The bus service is highly inefficient, and waste of tax payer money. I would also recommend expanded hours of operation for light rail, as that would encourage more people, who work outside of general business hours to use public transit, thus decreasing the amount of cars on the road. I also recommend completely separate lanes for the trolley in addition to much faster speeds and better signal timing.</p>
NORTH KING COUNTY	<p>I think it's hard to justify the light rail extension up to Everett.</p>
NORTH KING COUNTY	<p>First, my background: I live in the Seattle core, and am generally a very strong supporter of transit. I moved here 3 years ago from Boston, the city which formed my experience and expectation of rail/subway transit.</p> <p>I view mass transit as falling into two distinct levels of service: (1) frequent service, where I feel no need to check the schedule and can take trips on a whim and (2) less-frequent service where I have to plan ahead and check the schedule. In general, I want places I might go for an unplanned trip (out to dinner, to visit friends, shopping, etc) to be connected by frequent service, but am okay with less-frequent service for longer trips that I am more likely to plan ahead (long commute to work). In looking at the ST3 draft plan, I equate the Link Light Rail segments with frequent service, and the Sounder Rail segments with less-frequent service</p> <p>I think the current ST3 draft plan makes a mistake in extending the Link Light Rail (hopefully providing frequent service) domain too far. Personally, I would never take an impromptu trip from Seattle to Everett, or Tacoma to Bellevue. Extending frequent service over this 60 mile range (Tacoma to Everett) is a waste of resources. Frequent service should be concentrated in the core (Seattle, Bellevue, Redmond, Shoreline, Renton, Seatac, Lynnwood), with approximately a 30 mile range. Then less-frequent Sounder rail can serve that extended range, reaching Tacoma, Everett, Issaquah, Monroe, and Puyallup.</p> <p>By reducing the range of frequent service, ST3 could speed up delivery and/or increase density of that frequent service, and also increase the range and/or density of the less-frequent Sounder Rail service.</p> <p>My vision for ST3 is based on my experience in Boston. The Boston T covers roughly a 30 mile with frequent subway service. (For example, the Redline runs 30 miles from Alewife to Braintree.) Beyond that, less-frequent commuter rail provides service over roughly a 60-80 mile range. (For example, Rockport and Worcester are the ends of two commuter rail lines.)</p>
NORTH KING COUNTY	<p>The timeline is ABSURD - focus on grade separated rail on a reasonable timeline and I'll happily pay for it. But not this crap, bus-centric plan.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	By the time these improvements are made other technology would make these totally obsolete. Thus wasting more of the peoples money. Why would a forward thinking city consider train improvements, it's not 1880 anymore. The Sounder train is a disaster and Sound Transit has removed or altered bus service that was working, thus putting more cars on the road. There is no way that Sound Transit could responsibly handle projects like this. 9 years to add bus service?!!
NORTH KING COUNTY	Extending light rail from Tacoma to Everett/Canada makes absolutely no sense. Busses, cars, and trains already serve the rural areas. Adding light rail will do nothing to decrease traffic on I-5. Every dollar allocated to light rail MUST be spent adding lines and stations within the densely populated neighborhoods of Seattle proper. This is the only way citizens will voluntarily abandon their cars - commuters are not going to walk more than a mile to reach a station, waste time waiting for a bus that may never show up to take them to a station, or rent a ridiculous Pronto bicycle to pedal uphill in the rain to reach a station. Also, the proposed timelines (25 years) are an absolute deal killer. One-third of the current population will be dead from old age before your proposed plan is completed. If the time to completion cannot be reduced to a maximum of 10 years, don't bother. You have an amazing, once in a lifetime opportunity to collect billions of dollars and build something amazing. The current ST3 plan is a complete waste of time and money. Fix it.
NORTH KING COUNTY	Too much emphasis on bus rapid transit. The actual term seems to be an oxymoron. Will not support it. We need light rail.
NORTH KING COUNTY	remove all rail projects from plan. fund more buses and more frequent buses.
NORTH KING COUNTY	ST should not build additional parking structures and should start to charge for the parking facilities they currently have. In short ST focus should never be on cars. Focus for improving ridership should focus on other means.
NORTH KING COUNTY	The Link light rail line connections to Everett and Tacoma seem excessive and would burden the middle class tax payer in order to allow for a better commute for the few who choose to live and commute beyond a reasonable distance. As Seattle becomes more and more dense, my opinion is that focus should be in improving the traffic in and around Seattle by prioritizing the connections to West Seattle and Ballard.
NORTH KING COUNTY	I really would like to keep the \$17 per month -- no interest in your project whatsoever
NORTH KING COUNTY	No added taxes....be frugal!!!!
NORTH KING COUNTY	The light rail going through the Everett Boeing factory is expensive, when the relatively limited need may be better served by generous busing and the Everett rail passengers by a more direct line. As well, the Tacoma lines and Redmond lines are the weakest part of the plan, cost/benefit wise. Good luck!
NORTH KING COUNTY	The Ballard extension should be removed until it's better studied to route through u-district. I also heard that it's an at grade crossing with a movable bridge. To keep trains on time this seems like a BAD idea. We should hold off on Ballard extension until we have the money to not let boats mess up the schedule.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	Give us only a few things to vote on instead of a lot. Rapid Bus Transit is just silly. West Seattle expansion makes a ton of sense. Ballard through Fremont but not through Queen Anne makes sense. The bus tunnel is a pain but not horrible. It works
NORTH KING COUNTY	Souder rail is low priority.
NORTH KING COUNTY	Don't raise my property taxes. I can't afford it. It's bad enough that the King County Tax Assessor is already gentrifying me out of my own neighborhood. Amazon, Google, and Microsoft made this mess. Rather than spending money on campaigns to defeat initiatives like I-1098, maybe Jeff Bozo and his buddies should be spending their money to help fix the problem their companies created. Otherwise, scrap the whole thing. I'd rather we use our tax dollars to oust Amazon and others out of our city. The ST3 package, with the funding as it currently is today, is nothing more than corporate welfare.
NORTH KING COUNTY	I'm in support of expanding transit, but this plan is too ambitious/expensive. A more modest, less expensive plan has a much better chance of being approved. As it now stands, at best, I'm on the fence on agreeing to pay out \$400/year for 25 years for this one.
NORTH KING COUNTY	Prioritize link rail within Seattle, increase frequency and hours of service, improve Souder trains. Expansion to the bus system is a waste of money!
NORTH KING COUNTY	Money should not be spent on bus service that is not a real long term fix. Rail and dedicated transit lanes are the only options. Souder service should be in both directions.
NORTH KING COUNTY	Do not take car lanes away for buses and bicycles.
NORTH KING COUNTY	use the money you already have instead of adding taxes and spending existing funds for social engineering projects!
NORTH KING COUNTY	The parking projects at Mukilteo and Edmonds are not cost effective, given the poor performance and ridership of Souder North. It is imperative to take another look at the assumptions on project delivery so that a more optimistic timeline, particularly for Ballard to Downtown is proposed. You need a very large Seattle positive vote (75%?) to make sure this bold plan passes. Any reservations I have concerning this plan are due to the slow delivery of needed projects. Consider asking for help from Seattle and King County in financing key projects .
NORTH KING COUNTY	Let's not subsidize parking. Let's focus on bringing transit to places with more modern land use policies
NORTH KING COUNTY	The ST3, as presently proposed, is WAAAYYYYYYYYYY to expensive!! \$27 billion in new regional taxes!! Heck, Denver's Fastracks, approved by voters in 2004, cost only about \$4.7 billion - for 122 miles of new light rail, commuter rail and express buses, vs only 108 miles for ST3. And, Ballard (the most important) doesn't come online til 2038?!
NORTH KING COUNTY	Sometimes too many considerations to a proposed project can stall the project as a whole. Focusing on the most important additions and how to make those happen sooner rather than later due to delays in process, should be priority.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	Too many station for light rail defeat the purpose of "rapid"ness. Each station must have good access to neighborhood with either "Rapid Ride"/ Express, or local bus, but should remove "130th" station or limit stations within Seattle area. I believe within Seattle, it is good # of the stop.
NORTH KING COUNTY	Rapid bus service is worthless. Expanded rail service is the only thing worth paying for.
NORTH KING COUNTY	I really dont see the value of light rail to ballard or west seattle.
NORTH KING COUNTY	The trains need to be focused on places where density already exists, such as Ballard. The long distance trains don't make sense from a ridership, commute time, prioritization, or density perspective. I strongly support the Ballard line and could care less if the lines to the lowest density suburbs are dropped.
NORTH KING COUNTY	The provisional station at 130th street seems redundant and wouldn't necessarily serve enough ridership to justify the investment, especially with the Northgate and the 145th stations nearby. The same for the Boeing Access Rd Station; this would serve a large population of employees from the Boeing Plant (provided they live along another transit corridor) and potentially visitors to the Museum and few local businesses; however, the demographic of employees would likely continue to use a personal vehicle due to the readily available parking at the plant. This station would likely turn into a desolate wasteland after commuting hours; if constructed, explore only having that station operating during workday hours.
NORTH KING COUNTY	Lakewood and Redmond. The motives to secure them in your plan will cause me to reject this project
NORTH KING COUNTY	This draft plan extends regional light rail out in all directions to car-oriented suburbs while ignoring the underserved walkable neighborhoods that need rail transit most. We need a functioning subway system in Seattle (with Ballard, West Seattle, and the Central District included) where people will use it most, before justifying this kind of spending on low-ridership, slow regional projects.
NORTH KING COUNTY	Focus should be made on one project so it will actually be completed.
NORTH KING COUNTY	I would prefer that we focus on more aggressive expansion and completion of light rail. In 1996 when we first voted yes for light rail it was supposed to be done faster and with a much farther reach than it has come close to accomplishing. We need non-highway options which is why I do not support BRT expansion. We also need options that run regularly which is why i do not support funds going to Sounder Train expansion. This region needs light rail done now and not at a glacial and lazy pace.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

<p>NORTH KING COUNTY</p>	<p>This is a convoluted survey for a convoluted plan. Why does a light rail line to Ballard need to include a new downtown tunnel? Also where is the option of running a line from Ballard to the U District? I am actually a big proponent of light rail but there is no way I will vote for this package. It is simply too big and too complicated for Sound Transit to execute well. Given progress to date my impression is that Sound Transit can capably deliver a new station every year or two, and that's fine. I don't trust Sound Transit to do more than that, as Sound Transit pulled a bait and switch with the original proposal, choosing to build a slow, underutilized line to the airport rather than to implement more practical connections between Downtown, Capitol Hill, Husky Stadium and the U District. We will finally have those connections in 2021, twenty five years after the original proposal was approved. Call it social equity if you want, but it adds up to poor stewardship. Particular pet peeves with the current proposal are the line to West Seattle (which has very little population density within walking distance of the proposed station) and the second downtown tunnel. Anyone who remembers construction of the first downtown tunnel has to seriously question 1) any urgent need for a second one and 2) Sound Transit's ability to execute the project. The only things in this proposal that make much sense to me are the light rail connections to SLU, LQA and Ballard (or alternatively to Ballard via the U District), the idea of integrating the rail stations with real estate development, the idea of integrating parking structures with light rail stations, and the idea of extending the regional spine. I-5 is dysfunctional, so let's figure out how to give people a light rail alternative. A line to West Seattle is an insane waste of money toward solving a problem that no one outside of West Seattle knows we have (or cares about).</p>
<p>NORTH KING COUNTY</p>	<p>I think that some of the ideas/projects regarding express bus service should be removed. I don't think that riding on the shoulder of the interstate, or trying to expand the Bellevue / Renton / Lynwood bus transit is a good way to spend the money.</p> <p>I think most people already have a car in those places. Maybe you have statistics that say otherwise, I don't know. For me: Bikes &gt; Trains &gt; Buses &gt; Cars. So we should put a lot of money into protected bike lanes/parking and focus on expanding light rail the most. Yes we were just in the news for the massive increase in bus ridership - that's great, but we're not thinking big enough.</p> <p>The 12-22 year plan to expand light rail within Seattle should be advanced, because by the time the city has grown and in 2038 when the Ballard line opens, it will be so crowded everywhere that the new rail line will be like a band-aid over an amputation. West Seattle too.</p> <p>However since you probably aren't going to listen to me, I strongly support the increase in taxes to pay for this. My generation will have to pay a lot, but I guess our children deserve a world they can breath in.</p> <p>But seriously if you're going to build infrastructure do the light rail - trains are way cooler.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	Having above ground light rail in Ballard will seriously diminish 15th and Market.
NORTH KING COUNTY	Choose more cost-effective solutions such as BRT as opposed to extravagantly expensive light rail. This region has the best bus service in the world and it is well-utilized by the population. The buses on major commuter routes are packed during rush hours. Light rail is costly and inflexible. And the Sounder commuter rail is preposterous. I see the north train on a regular basis and I can't recall it ever consisting of more than two cars and the locomotive.
NORTH KING COUNTY	And built to Everett much faster
NORTH KING COUNTY	<p>Tunneling under Queen Anne Hill and the ship canal and tunneling under the Duwamish River is too expensive. That money should be used to extend the light rail to Everett, Redmond, and Tacoma. Buses should then feed into the extended line. There should be no more tunneling in downtown Seattle; additional tunneling downtown is too expensive. The Bellevue line should connect with the Everett-Tacoma line south of downtown. This will save even more money to be used on other transit needs.</p> <p>Sound Transit is overreaching with soundtransit3, risking people getting angry with its grabbiness and risking other worthy uses of funds in the Puget Sound area.</p>
NORTH KING COUNTY	You are asking for another I-695.
NORTH KING COUNTY	Some of the peripheral routes are extremely expensive in terms of initial costs and operating costs but have little benefit. It looks grand to have these schematic maps but the truth of the matter is that nobody travels from Everett to Beacon Hill or Federal Way. If they did, they need the flexibility of a car. Therefore, it is foolhardy to be spending other people's money in this way. Instead, Sound Transit should push very hard to increase population density in Seattle and the Eastside through elimination of lots having only single family homes or allow easy subdividing to 2 lots, concentrate on bus and light rail from the area of the Airport/Issaquah/Redmond/Lynnwood and not all these far away places. If you want to make an exception and do a little local transit in Tacoma, fine. But not all these expensive, grand looking plans. You should also be honest and say that it will cost an average family about \$600 or more per year or \$7000 per decade.
NORTH KING COUNTY	Rapid Ride E Line improvement
NORTH KING COUNTY	The major employer sites in Puget Sound MUST be served. That means Boeing sites. There is FAR too much traffic associated with Boeing factories. That Boeing Field is not directly served by Sound Transit is negligent to the point of criminality. Further, Boeing Everett and Boeing Renton should be intimately connected to the network ASAP.
NORTH KING COUNTY	This is about rapid mass transit, not bikes. I'm will vote against the entire proposal to stop wasting money on bikes.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	Have a master plan and be more specific about what is happening and the oversight for it. Why are there no fees to developers when there is new construction? Adding buses in Seattle is cheaper and quicker. NOTHING is added for NW, SW, and NE Seattle for years? I recently retired and plan to take public transit but it takes a long time to go the same distance since the new routes were implemented. I weekly travel to help relatives in Burien and there is no easy bus route to get there, now or with this plan. Keep it simple and small and get fees from developers who are impacting future school construction needs, road and sewer fixes, and the need for the transit plan. I am speaking for Ballard/Seattle but each region wants to be heard and pay for what it will receive in a timely manner.
NORTH KING COUNTY	To Redmond and Issaquah from Bellevue, and, To West Seattle and Ballard should be REMOVED, and REPLACED the routes with Bus services--Express bus es to the major stations, and SMALLER BUSES to the neighbors, which work great in Seoul! This plan will take less that 25 years and much cheaper!
NORTH KING COUNTY	Too much emphasis is being placed on light rail. Bus Rapid Transit is much less expensive and can be instituted much quicker. Time lines for most projects are too far out. Taxes to pay for it are too regressive. We need an income tax, capital gains tax, and or business impact fees to share the expenses.
NORTH KING COUNTY	Stop subsidizing free parking for sprawl commuters. P&Rs are fine, but they must cost money or more transit will just generate more sprawl.
NORTH KING COUNTY	Suburban projects and parking will solidify my opposition to this plan. Build in the dense center or fail and we'll use city authority instead.
NORTH KING COUNTY	The main focus should be on i5, i90 and i405 corridors then urban areas. I don't feel that Redmond, Burien, and Ballard are as critical areas to address.
NORTH KING COUNTY	The light rail to Ballard project should be removed. It is a waste of resources and money as bus service is adequate and convenient - in fact it'll just ruin the community feel of Ballard. Too invasive a project for an old neighborhood that looks just fine the way it is. Do not bring light rail to Ballard. If one wants the light rail, they can take the route 44 bus to U District to catch the train - it stops right across the street from the light rail station. Please do not bring light rail to Ballard!
NORTH KING COUNTY	I believe the light rail project is a gross misappropriation of priorities and funds. My concern is for the impact on our local economy through increased / prolonged taxes during a time when we're already seeing a spike in cost of living. It's absurd for the broader community to spend \$200 / person annually when ST carries less than 5% of commuters without any hope of carrying more. I believe our monies should go toward improving bus routes and speed and/or looking into more flexible, new transit technologies and ways of thinking—not rail.
NORTH KING COUNTY	Public transit funds should not be used to build parking facilities. At the very least, charge for parking instead of offering it for free.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	You're asking too much all at once. I question the need for light rail extensions to West Seattle and Ballard when we already have BRT. Beef up the RapidRide. Am thinking this would eliminate the need for the pricey new downtown Seattle tunnel.
NORTH KING COUNTY	ST3 is way too expensive to get a finished product to out lying communities. The use of Buses a far better economic benefit to the computer, now and into the future. Once rail is laid down, it is fixed. If businesses move or relocate, the rail can not be moved to the new site, with ooout much additional cost, where buses, are completely flexible to meet demands now and in the future. I will NOT support ST3 current plan.
NORTH KING COUNTY	It is very exciting to see light rail expansion proposals being discussed and planned!!! I worry, however that the specific details are more political than pragmatic. The light rail station at SeaTac was built too far from the terminal, and requires a long walk. The route isn't direct so the service from downtown Seattle takes longer than the bus used to. How did mistakes like this happen? Similar mistakes should not occur in new plans. I question why the current plan proposes to provide service as far out as Redmond and Lynnwood before service is provided to Ballard or West Seattle. All of these are important areas, but we need to think carefully when we build transportation systems that will last a century. Assuming Seattle will continue to be the center of economic growth, Ballard and west Seattle are natural population centers that were historically served by street car. But the current pattern of sprawl (that includes places like Redmond and Shoreline, federal Way, etc) are not natural growth patterns - they are more based on automobile use, the success of specific companies, etc. Let's be careful to not build a system that embeds current short term trends that may not be desirable. Rather, let's build a system that supports and creates development patterns we want, and also delivers efficient service.!
NORTH KING COUNTY	The ST3 is too big - too ambitious. The priority should be on the north/south routes - to Everett and to S King County - to provide meaningful transit options for the workforce that is priced out of living in Seattle or the Eastside. There should be a N/S light rail option on the Eastside, so that folks coming in from Pierce County or Snohomish can travel to the Eastside to work - as RBT will not be adequate over the next 30 years. And the lightrail options for Ballard and West Seattle looks like a political gimmee to obtain votes and good wil from the wealthy to support the package - rather than meeting any substantial need. Keep the eye on the workforce - shave off the expensive political add-ons- that ultimately make this too costly a burden for the taxpayer. The additional \$200 plus a year (beyond what we are already paying for ST2) will increase housing costs and exasperate the need for the lightrail to be built - as more people will search for affordable housing outside of the unaffordable neighborhoods of Seatle and the Eastside. Remember, although W Seattle and Ballard have strong voting blocks (and can afford this additional tax), people in the rest of King County will be disproportionally impacted by this tax. You can stay ambitious to address the 30 year horizon -but for the sake of the poor and working class - please reduce the scope of ST3 and do not add lightrail to serve west Seattle or Ballard or Issaquah.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	Less parking, more walk bike bus connections. Would have preferred Ballard to UW. Disappointed in Sound Transit planning that has thrown out some really useful projects in favor of a religious devotion to light rail spine.
NORTH KING COUNTY	I don't think that adding additional Sounder service is a good use of funds. It will always be limited in what it is able to provide by sharing rail with BNSF and it will be redundant with the light rail spine when completed. I also do not understand the need for the Tacoma Community College Link. That is not a congested corridor and adding funds to increase Pierce Transit service would be a much more efficient use of funds (particularly if this link will function more as a streetcar and share vehicular lanes). In general, I think that priority should be given to our most congested areas of Puget Sound and should take into account where the majority of the tax payer money is coming from.
NORTH KING COUNTY	There are too many frills and "nice to have's" in this plan. I am a strong supporter of transit development but even knowing that you need to provide project for constituents in each county, there are too many extras and lower priority items added into a mega project. I would recommend cutting it in half and focusing on what would directly reduce highway and road traffic.
NORTH KING COUNTY	More and better bus service now. This plan is PR BS.
NORTH KING COUNTY	all bus improvements should be minimal focus all monies on light rail bus and shoulder bus add to traffic !!
NORTH KING COUNTY	*Remove the Paine Field stop from light rail to Everett. It is a waste of money, especially since Community Transit will be operating BRT along Airport Road. If this station were removed from the plan, I would strongly support instead of somewhat support. *No improvements to North Sounder should be included. Once light rail to Everett is completed, North Sounder should be eliminated - it's extremely expensive, not serving that many riders, and is cancelled every time we have a rainstorm. That money should be spent on other elements of the plan.
NORTH KING COUNTY	I would support reducing the overall number of projects in exchange for building more rail sooner.
NORTH KING COUNTY	The focus is too heavily on the suburbs/satellite cities. Getting from place to place in Seattle is so difficult, more people would receive more benefit by focusing on transit within the city rather than on connecting Tacoma to Everett.
NORTH KING COUNTY	I'd like to see a two year hiatus in current planning while Sound Transit solicit RFPs from transportation futurists (GM/Lyft <a href="http://wapo.st/1VyKzlt">http://wapo.st/1VyKzlt</a> , Google/Ford <a href="http://bit.ly/1VyKt0">http://bit.ly/1VyKt0</a> , Uber <a href="http://onforb.es/1VyKRsz">http://onforb.es/1VyKRsz</a> ). If they could imagine a cooperative region (Snohomish/King/Pierce Counties), what autonomous, self-driving vehicle system might they suggest that would exceed ST3 capabilities for less cost deployed on a faster time table.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	Light rail is the most interesting to me, but I feel that the number of stations should be reduced. My primary concern is that light rail will take to long if it has to stop every mile or two. With fewer stations you could have the potential for faster trips on light rail then by car in normal traffic conditions.  Alternatively, I would be way more interested in ST3 if there was research / study put into improving the function or efficiency of the existing light rail / LRV. For example, seeing if emerging technologies would allow for the use of a high number of small, low capacity LRV's that would not need to stop at every station improving travel times (like a horz. elevator), or automated LRV's that would not need a driver (reducing ST's operating costs).
NORTH KING COUNTY	I don't think LRT needs to go all the way to Everett and Tacoma.
NORTH KING COUNTY	Please develop robust transit options for neighborhoods with highest density of the working poor without cars whose only way to work is public transportation.
NORTH KING COUNTY	Too expensive fir timelines, which are ridiculous.
NORTH KING COUNTY	Light rail needs to be completed with in the city asap. Ballard and west Seattle lines will have a noticeable impact on reducing traffic and can't wait 18-22 years. The success of the UW/cap hill extension shows this
NORTH KING COUNTY	parking structures support car culture, pollution and only add to gridlock.
NORTH KING COUNTY	Stop with the [explicit] bus [explicit] already. We need grade separated light rail URGENTLY. Who gives a [explicit] about the suburbs? They [explicit] us years ago and now Microsoft and all the other private businesses operate their own bus system - [explicit] them. Light rail projects ONLY! No more PARKING LOTS. No more PSUEDO "BUS rapidlyslow TRANSIT" [explicit] It's ALL IN now - RAIL!
NORTH KING COUNTY	Too big for voters to approve
NORTH KING COUNTY	Until I see fiscal accountability, on-budget, and on-schedule performance, I will continue to oppose any new taxes for transportation plans
NORTH KING COUNTY	Don't build Link to Tacoma and Everett. Focus on the denser areas of the metro area: Roughly between Federal Way and Lynnwood, and between the sound and Lake Issaquah. Serve areas outside this with commuter rail or express buses. Light rail will have too many stops between Everett/Tacoma and downtown, and without express tracks and express trains it will be too slow.
NORTH KING COUNTY	Eliminate funding for the Boeing Access Road station, and use that to speed up light to Ballard. We also need to expedite construction of the infill stations at Graham Street and 130th street, NOT PARKING!
NORTH KING COUNTY	Too much other stuff is bundled in to this plan. Please offer just the rail plan and focus on that.
NORTH KING COUNTY	Remove the outrageous amount of parking. Use the savings to keep the rail lines truly grade-separated. NO MORE AT-SURFACE LIGHT RAIL. Tunnel or elevate!
NORTH KING COUNTY	quit wasting taxpayer dollars and your grandiose plans that will do nothing to relieve congestion anywhere. You've proven time and again that you are NOT good stewards of the tax dollars that you collect.
NORTH KING COUNTY	QUIT trying to tax us to death!!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	Proposed Light Rail projects are far too ambitious and expensive. Bus service increases should be implemented and parking facilities expanded at existing stations. Also a station should be added at north 130th. Voters are not going to accept the 25 billion price tag with the cost of housing and state property taxes what they are currently in this region. The plan needs to be scaled down and alternative funding considered.
NORTH KING COUNTY	West Seattle and especially the Ballard expansion seems unnecessary and favoring neighborhoods.
NORTH KING COUNTY	My property tax went up \$400last year with a different transit initiative. ST has added at least 2 fees to my car tabs already. STOP WITH THE TAX INCREASES. This is why Seattle is becoming unaffordable. I only have a 700 sq ft house and find it ridiculous that I can barely afford to live here. Find the money somewhere else. How about instead of yet another stadium, use the money to improve transit to Everett and use that one. This is out of control.
NORTH KING COUNTY	Puget Sound residents seem to operate under the "if you build it, they will come" philosophy. But the reality is actually "if you make driving miserable, they will take mass transit." Ask anyone who has lived in New York or Chicago why people take mass transit there. It's not because of the beautiful buses and trains. It's because driving takes forever and is very expensive. Unless driving becomes more painful in terms of time and cost in the Puget Sound, people will NOT get out of their cars. Spending billions of dollars to switch a few riders from inexpensive buses to super-expensive trains is a huge waste of money given all the other needs that must be met in our region. Please do not waste billions building new right of way; instead convert existing road right of way to mass transit. Take things step by step - rapid buses first. Once the demand is there, upgrade to light rail. But forget the "if you build it, they will come" nonsense.
NORTH KING COUNTY	NO line up 15th West over bridge and into Ballard. The insane traffic with Expedia for Magnolia and Queen Anne residents for this project would be prohibitive. Build a tunnel. WEST IS BEST!!!! We will be voting out any officials pushing for any development of light rail on 15 W.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	<p>1) The BRT/RapidRide routes that are proposed within Metro's King County jurisdictional service area, or have the majority of the route within that area, should be operated by Metro and deleted from the ST3 plan. Likewise for any route[s] in Snohomish County (sb operated by Community Transit) and Pierce County (sb operated by Pierce Transit). This would reduce the budget of the ST3 plan and allow those dollars to be allocated to other aspects of the plan, or to allow for accelerated construction to bring selected elements of the plan online sooner. Metro, Community Transit and Pierce Transit should be responsible for their respective intra-county service (with occasional cross-county extensions, such as the ST3 proposed Lynnwood to Burien RapidRide line via I-405), and leave true "regional" service (inter-county), only, to ST. Taking it s step further, and better yet, it would be prudent to simply relinquish ALL ST bus service to Metro, CT and PT, leaving ST to concentrate its planning and dollars on rail service, only. The ST3 plan has a scope that is too encompassing, too expensive, and too extended in its timeline - 25+ years for some parts of the plan to come online is simply ridiculous. Let the bus operators (Metro, CT, PT) plan and operate the bus service, and let ST concentrate its planning expertise and dollars on providing one of the US's best metropolitan rail systems. 2) Light rail between Seatac and Tacoma should not be part of the plan, or should be very low priority. ST already has excellent bus service between Tacoma and Seattle (albeit not Seatac), as well as commuter rail service. Metro's RapidRide A-Line between Seatac and Federal Way already performs exceedingly well and could easily be extended to Tacoma at a much cheaper cost, with the opportunity for route adjustments over time, and with a much advanced start date. The freed dollars could be put to much better use elsewhere in the ST3 plan.</p>
NORTH KING COUNTY	<p>Please don't add stations to the existing rail line, or the 130th station. Please space these stations out. Having stations every mile is too short; the goal is to move people quickly long distances, then have other modes move the short distances. Adding more stops just makes the whole trip longer, and loses the value of the light rail.</p>
NORTH KING COUNTY	<p>Get rid of busses. More trains! We need a North seattle loop (uw, fremont, Ballard, Northgate, sand point, uw). Connect West Seattle! Build the 130 st station! Connect Ballard! Save our commute!!!!</p>
NORTH KING COUNTY	<p>Ballard to Downtown Seattle light rail route is basically a replication of the Rapid Ride D line. Avoid the expense and inevitable time/cost overrun of digging a tunnel. Priorities should include connecting Capitol Hill to SLU to Uptown/Rapid Ride D line and creating a Mercer or Roy Street bus route that runs from SLU to existing D line.</p>
NORTH KING COUNTY	<p>Don't build parking with transit money - work with private developers to build pay lots nearby. Issaquah &amp; West Seattle want BRT improvements not light rail. Paine field diversion is dumb. I5 alignment (vs. SR99) is counterproductive.</p>
NORTH KING COUNTY	<p>West Seattle is better served by restoring driving lanes and increasing rapid transit to &amp; from downtown Seattle. Create better light rail service around JBLM.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	Too much money is spent extending light rail to areas 20+ miles from Downtown Seattle. BRT needs to be used to connect areas further out with shorter light rail lines and or to existing commuter rail lines rather than spending the money to build light rail all the way to Tacoma and Everett. Focus the money on denser areas and job centers like Seattle, Bellevue and Redmond. Also delivery is too slow - this city needs less rail lines built faster.
NORTH KING COUNTY	NO station at 130th street in North Seattle!!!! NO Provisional station at 130th Street in North Seattle!!!! There are already two stations within one mile of 130th Street. That is reasonable and we thank you. Spend the money extending the light rail south please.
NORTH KING COUNTY	Remove the station or provisional station at NE 130th Street in North Seattle. I will vote NO for any plan that includes that station on the plan. There are already two stations within 1 mile in north and south of NE 130th Street. The light rail is an EXPENSIVE project. Please extend the light rail SOUTH to Olympia!
NORTH KING COUNTY	Stop with the development around rail stations because it causes more congestion. Building the station at 145th was a numbskull move, now all the people trying to park at the rail station will have to compete with people getting on and off I-5. Why on earth would I vote to give you nincompoops more money to make more horrible decisions?
NORTH KING COUNTY	Infil stations in existing lines slow lines and do not increase ridership. Take them out.
NORTH KING COUNTY	The plan is too big and too long and not agile. It won't be completed till I am too old to care. Travel needs and technology might be revolutionized by then. I would prefer to see more emphasis on bus and BRT improvement because of shorter timelines, lower cost, and flexibility. I do support capital improvements to get buses around or through traffic at chokepoints, especially if they can be used by LRT later (like the downtown tunnel). I do support moderate LRT expansion.
NORTH KING COUNTY	Create robust light rail system in King county and rely on commuter trains north and south. Light rail from Everett to Seattle is too far. Tacoma could have own system. Heavy rail should connect those three cities similar to east coast cities and Chicago. Ballard to west Seattle usage will surpass the new cap hill station.
NORTH KING COUNTY	Please provide mass transit to West Seattle as soon as possible. Lynnwood should not have light rail before West Seattle and Ballard.
NORTH KING COUNTY	I know there is a push by some to remove parking. This is really misguided as our best chance of increasing transit use is to embrace mixed mode. I was just in Amsterdam and they have a three story, block long garage next to the central train station that is all bikes. So if car parking becomes less important over time -- there are other potential uses for those garage spots!
NORTH KING COUNTY	Please focus more on light rail and not bus rapid transit. The 405 corridor would benefit from light rail instead of bus rapid transit. Any way we can speed up tying together the region with light rail the better we will be

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	REMOVE any station or provisional station to NE 130th Street in Seattle. It makes no sense to add the cost of this station EVER! There are already two stations within 2 miles in North Seattle!!! That is Northgate and NE 145th Street. I live in North Seattle and I will vote NO on any funding requested at any time which provides for a station or a provisional station at NE 130th Street. AND, please put the light right underground - NOT ELEVATED - at Northgate Way and 1st Ave N! We currently have horrendous traffic roar from I-5. No additional noise from elevated light rail tracks please.
NORTH KING COUNTY	Can't we streamline in this region? We have far too many different types of transit projects proposed here. The timeline is very long as a result.
NORTH KING COUNTY	I think Sound Transit could be more successful if it starts small, building from the core outward than with this massive, all-encompassing proposal. While it would be fabulous to please everyone, reality makes that a tough order to fulfill. Asking each taxpayer to ante up \$200+ annually is a BIG ask. While many taxpayers may be able to withstand such an increase, there are many more that can't. In a city that struggles to find a solution to its homeless crisis (tent cities in the middle of I-5???), we need to find a better way to prioritize. Like any good growth strategy, Sound Transit should grow from a position of strength. It has established a strong light rail backbone from Westlake to SeaTac. A smart strategy would grow light rail from this backbone. Start with a smaller light rail proposal for connecting West Seattle and Ballard to the existing system first and use bus rapid transit along the highway shoulders in other areas (like along the 405). Also, limit the required number of studies and environmental impact statements as they greatly inflate the projects' cost. I would venture that a scaled-down project, while still incredibly expensive, would be more palatable to voters than the behemoth ST3 one.
NORTH KING COUNTY	There is too much in Seattle itself. That balance and delays in getting service to areas like Everett and Federal Way will kill the plan
NORTH KING COUNTY	West Seattle light rail station should be completed sooner. The propose station at NE 130th street should be REMOVED & not given provisional status. There is much more area in Seattle to cover which should prioritized over a stop within one mile of two others! N Seattle has two stops!
NORTH KING COUNTY	This package is stuffed to the gills with politically-motivated projects that do extremely little for mobility in the region. Light rail to Issaquah is one of the worst-performing transit projects I have ever seen. To ask citizens across the region to pay for some of these projects is unethical in my opinion and if the package remains I will actively work on the no campaign. Please eliminate Issaquah-Bellevue, Payne Field, some of the parking, I-405 BRT (another project doomed for low ridership), and the Dupont sounder expansion. Please prioritize Ballard grade-separated, more sounder service, and infill stations.
NORTH KING COUNTY	Remove the anE 130th Street Station. No provisional station there either! North Seattle already has two stations within 2 miles of each other! West Seattke and Ballard need ONE right now!!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	Remove NE 130th Street Station in Nirh Seattle. No provisional station. Northgate and 145th Street should be everything Nirh Seattle needs.
NORTH KING COUNTY	What a heap of misbegotten projects!
NORTH KING COUNTY	Eliminate the NE 130th Street Station.
NORTH KING COUNTY	I think we need more access for low income and south king county. Also better bus reliable routes is great now, but added improvement to high functioning areas now served I would sacrifice. The cost of \$17 per person per month for so many years is just too high a price to pay. It should be in the scale of half of this proposal.
NORTH KING COUNTY	parking for cars???!!! WTF?
NORTH KING COUNTY	The rapid ride system is a joke and shouldn't be implemented at all. Blocking traffic to supposedly increase buses only increases congestion. I am both a bus rider and car driver during certain days and the rapid ride is filthy and unsafe and the stops even more so. I see nothing in these plans to deal with gangs, drug dealers, toxic cigarette smoking, etc.
NORTH KING COUNTY	Remove the light rail to west seattle and ballard part of the plan concentrate on expanding use of sounder as the infrastructure is already in place
NORTH KING COUNTY	I am a big advocate to a organized, efficient, thorough mass transit system. Unfortunately Puget Sound has been behind in making that happen. However, this plan is full scale in many different geographic locations. I will admit that some of my responses are for selfish reasons (more favorable responses to the plan that will benefit me and less favorable for those that do not benefit me). However, I think that this plan is quite large and may have some voters shying away from it due to it's size and cost. With that in mind I think that there are some sections that could be trimmed and still have a significant impact on helping to "move people around the region". My preference would be to accelerate those projects that will help to move people around the city of Seattle first (which seems to be the hub with several spokes from there). Also, I think that Sound Transit can have a quicker impact on on congestion by changing up the priorities and focus on the West Seattle and Ballard branches first, not including light rail to Redmond and Federal Way in this project, and dropping the Issaquah link arm all together. Of course this is just my opinion. Of course if you reach for the stars you just might catch one on the way back down. Thanks for the opportunity to voice my opinion.
NORTH KING COUNTY	Seattle is broke and we need to stop spending money we don't have. Raising taxes, is only going to make people leave Seattle or go broke. Lets get rid of this crappy mayor we have and stop spending money!!!
NORTH KING COUNTY	Eliminate the Paine Field Detour and the Boeing Access Road Stations. Use that money to prioritize light rail to Ballard!
NORTH KING COUNTY	We should not build light rail to issaquah. I do not support growth here as it is so close to the mountain to sounds greenway. We should limit development in this area and light rail will only encourage it.
NORTH KING COUNTY	REMOVE the provisional light rail station to NE 130th Street in Seattle.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	This is too big to vote for. West Seattle and Ballard are becoming isolated islands with even more density and development. They must be prioritized over other projects. You can't do it all and too much will change over the course of this proposal. Also as we have seen with AWV project, tunnels are severely risky so Ballard tunnel not palpable.
NORTH KING COUNTY	We made a fatal error when we dumped the monorail idea from Ballard to Downtown. Light rail will be too slow . . .you might as well just leave it at the rapid ride . . .what's the difference! Same for West Seattle. We would be better off with a faster ride from Ballard to the UW light rail station!
NORTH KING COUNTY	Lynnwood to Everett light rail does not look like a good investment. Use commuter rail instead
NORTH KING COUNTY	With intel leaving it shows how the loss of. Thousands for jobs in one location is going to resault in a station being built that is never used if it takes you 10 or 20 years to build it. Your asking for billions and dont say anything about how you would stop a project when its not needed.
NORTH KING COUNTY	It would seem more prudent to have light rail in the Seattle city boroughs and expand faster and more rapid bus service for those south and north. The timelines are way out of proportion to what benefit these changes will provide and, to be frank, fall short of 20 year growth.. The tax structure is a back breaker to the already extremely high taxation placed on homeowners and individuals. Where is the business buy-in? Also, why is Tacoma such a high priority?
NORTH KING COUNTY	Feel the cost is too high, make it half that. Would want the focus on extending the line north and south, and not on creating the crazy Ballard spur line.
NORTH KING COUNTY	Focus on the inner core of Seattle first and how to alleviate the choke points and make it easier to get through Seattle. Then start to bring the veins to further areas like Lynnwood, Tacoma, etc. People on the east side don't have the choke points that Seattle has. Please address Seattle first with light rail and quickly.
NORTH KING COUNTY	Projects that will have the greatest impact on improving Seattle-area transit issues should be given the highest priority. Population growth in the area is exploding because of Seattle, not because of Tacoma or Federal Way or other communities. Transit projects should be focused on improving transportation time and efficiency to and from the major population driver.
NORTH KING COUNTY	Maximize the number of users of current Light Rail routes with more stations. The goal should be to connect Paine Field and SeaTac with Downtown Seattle. Use Bus Rapid Transit to reach new areas, since easier to adapt BRT routes to new population growth.
NORTH KING COUNTY	Why are you rebuilding commuter rail that already exists?
NORTH KING COUNTY	A second tunnel seems redundant - I also don't understand why buses can't be up top on 3rd Ave. - i was once on light rail and it actually stopped to let a bus go ahead before going into the tunnel - maybe the trains should have priority and the buses should wait.
NORTH KING COUNTY	Stop sucking the public's hard earned cash. Youre terribly mismanaged company that squeezes money out of your customers. Your light rails are dirty and unsafe. You dont need billions of dollars to expand.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	Remove anything having to improve buses - they add to congestion and are NOT A TRAFFIC SOLUTION. I rode a bus for years to downtown and still would not support buses as a solution to traffic. With the growth in NW Seattle I am SHOCKED that WSDOT thinks Ballard can wait 22 years for a solution. I am not quite sure the BALLARD BRIDGE will last 22 years. It is falling apart and this burden of taxes should be placed on new development like my house that was built in the 90's had to support the waste treatment facility and I had to pay specifically as an added tax burden to my home.
NORTH KING COUNTY	Too much and too long. Redesign ST3 for fewer projects sooner.
NORTH KING COUNTY	The proposed parking should all be priced so that commuters who use them pay their way rather than burden riders who don't use the P&R spaces. All of the proposed parking should be reanalyzed to see what the optimum size should be and how much could be reinvested in other forms of access. I particularly like the "early wins" approach and hope that local jurisdictions and Sound Transit can find ways to shorten the time frame for implementation. You are to be commended for your bold plan!
NORTH KING COUNTY	Remove light rail to Tacoma
NORTH KING COUNTY	As a dedicated pro-transit voter, I absolutely oppose the Paine Field Diversion as a waste of my (and East King's) money, and will vote to no on an otherwise good proposal that includes it. I would encourage the board to carefully reconsider the Paine Field diversion, as it is likely to foment much opposition in Seattle, particularly after skipping the 130th st station that Seattle very much needs.  Moreover, Ballard-UW should be accelerated over Ballard-Downtown
NORTH KING COUNTY	Please do not put High Capacity Transit on the trail corridor, and remove the environmental study between Bothell and Bellevue via the trail corridor. Instead do a study of light rail on I 405. Remove the proposal of mass transit from Bellevue to south Kirkland park and ride. If all of these are not removed, I will actively work to defeat ST3 in November. Preserve rail corridor as a linear park for bike transit and walking. No transit on this recreational trail corridor (the ERC).
NORTH KING COUNTY	Please reduce support for car parking at rail stations. Construction of a blockade between the station and the people they serve, for only the benefit of further flung tax-avoidance suburbs to leave their car for a third of the day, is the only major (enactable) negative to my support of the plan.  My dislike for regressive consumption taxes remains a personal issue which reduces my willingness to support this plan to others, but I understand the social goals of the project to well to be fully opposed when the time comes.
NORTH KING COUNTY	The capital costs of rail are excessive and limited in use. Buses use roads that are useful for cars and trucks at lower cost. Congestion should be managed with tolls instead.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	Prioritize West Seattle over Ballard LRT. Drop concept of "shoulder running buses" as any traffic enforcements will most likely be ticketed in these lanes, as now happens with HOV, messing it all up; must leave capacity for breakdowns or system fails too much.
NORTH KING COUNTY	We should focus on light rail and focus on building it along existing corridors instead of creating new north and southbound routes. There should be one corridor on the west side and one on the east side and links to it should not cross waterways. Bus improvements are highly overrated. The Rapid Ride buses aren't rapid at all. Driving on the shoulders is a safety issue. I actually applaud what Sound Transit has done so far but this is a crazy plan that is not a good use of taxpayer money.
NORTH KING COUNTY	All BRT should be removed. These are not true BRT projects. They put buses on the same limited right of way as cars. Every single one of these projects, every one, should be eliminated. All parking projects beyond those currently in construction should be eliminated. Employees lying at public meeting should be fired for cause immediately.
NORTH KING COUNTY	ditch the entire plan. Sound Transit has wasted BILLIONS and enough is enough
NORTH KING COUNTY	Remove light rail build roads for buses lanes for buses if they change population areas you can't move Light Rail you can move buses
NORTH KING COUNTY	There is absolutely no way that light rail to everett and tacoma will be time competitive with driving or express buses, particularly if the light rail to everett passes through paine field. The best case scenario is that light rail from everett matches the commute time of taking i5 when i5 is congested, but off peak it will almost certainly be substantially longer. This is a massive waste of a large amount of money. The money would be much better spent getting better express bus service and hov3 lanes along the corridors. On the other hand, Seattle desperately needs grade separated transit, and has the density to support effective high capacity rail without requiring expensive and limiting park and rides. Just make sure that stations are placed with urban stop spacing (ie ~3/4 mile apart) so that there is a walkshed around the entire line rather than the ridiculously wide stop spacing between the current Capitol Hill and UW stations.
NORTH KING COUNTY	The second transit tunnel project should be de-coupled from the Ballard line and included in a later phase. If a second downtown line is required in conjunction with the Ballard line alternatives such as surface light rail (possibly along the waterfront) should be considered instead. Removing the transit tunnel could reduce the overall project cost and increase delivery time.
NORTH KING COUNTY	If choices need to be made, I support Rapid Bus Transit over light rail for its flexibility and decreased cost. Ideal to have it all (light rail and buses), but buses with dedicated bus lanes have worked well for my commute. Dedicated bus lanes are a huge plus- and a good selling point for mass transit.
NORTH KING COUNTY	Please leave the CKC trail alone! There's no need for the environmental studies currently being done on it, as it should remain as is instead of being destroyed and lost forever, so please stop them. Please remove the Bellevue to South Kirkland P&R transit proposal. If these things are not removed I will actively try to defeat ST3 in November.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	The plan is generally great, but should remove those projects that don't have huge ridership and support transit oriented development. No need to spend over a 100 million for the low ridership of the Boeing access station, for example, that will also slow the system down. Focus on building an efficient, high ridership, transit oriented system.
NORTH KING COUNTY	<p>Sound Transit projects have never been on time nor under budget. As ST has done a poor job in the past of assuring tax payers that they should trust time and budgetary projections, I not only believe \$50B and 25 years is way too expensive and long term of a project, but I simply do not believe that the project will ever be completed as planned at or under that budget.</p> <p>This would be the largest most long term local tax increase in my adult lifetime, and it extends indefinitely which should not be allowed for a project like this. I simply do not believe that the relative amount of good ST3 would do is even close to worth the cost, and believe that \$50B could be put to much better use from a transportation standpoint in many other ways. The cost per mile of ST3 is so far and away higher than every other major city in the US, it makes me wonder if the planners have made serious errors or if the greater Seattle area is just not cut out for light rail.</p> <p>The bottom line is that light rail is fun, hip, sexy, clean and people feel good riding it. In Seattle it is like the Ferrari of transportation. But like a Ferrari, Light Rail in Seattle is totally impractical and costs too much money for what you get. And guess what, NO ONE only owns a Ferrari. It's not as if the largest tax hike in history will solve our transportation woes. The city and county will still come back to me next year, and the year following and ten years following that for tax money to fix roads, bridges and other new and existing infrastructure. Light Rail is not a transportation solution; it's a pet project. And \$50B is far too much money to spend for that purpose.</p>
NORTH KING COUNTY	Buses yes, light rail no!
NORTH KING COUNTY	<p>Parking at future light rail projects should be removed. The point of transit is to move away from vehicular travel, and that money could go toward making transit better, not accommodating drivers.</p> <p>Additionally, I would like to see a greater focus on Seattle proper, as in the Seattle Subway plan, and a greater emphasis on urbanisation, not gentrification, and an accommodation for low income people to have transit without impacting the overall rent in a neighbourhood.</p>
NORTH KING COUNTY	The plan should focus on bus service and parking for already-built stations that fill up. Not light rail. Bus is a better and more flexible transit solution. Parking fees, congestion charges, and transit-only lanes should be used to limit congestion so that buses can move during rush hour.
NORTH KING COUNTY	<p>Start with a much smaller package, instead of asking for support and such a high property tax hike during such an expensive real estate market.</p> <p>Raise money through the car users, including Uber and Car2Go and Zipcar, and put more effort into assessing the actual demand for more rail versus improved bus service.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - North King County

NORTH KING COUNTY	The plan is too big to feel comfortable voting on all at once.
NORTH KING COUNTY	Remove parking elements from the plan. They are expensive and inconsistent with HCT goals. Thank you.
NORTH KING COUNTY	Remove the capital project for improvements to C and D Rapid Ride routes. The Move Seattle levy vote included at least \$70M for the Fauntleroy / California Corridor improvements. It is disingenuous for public agencies to duplicate projects without explaining the added value of each in comparison. Further, the Seattle Transit Master Plan includes capital investment to upgrade the Delridge corridor to Rapid Ride service levels which the local residents are opposing.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

Subarea	Additional Feedback - Project(s) should be removed in the ST3 final plan
EAST KING COUNTY	Light rails is an 18th century solution. It is a ridiculous waste of money taking a ridiculous amount of time. Only a limited amount of people can ride it in a restricted area. It does nothing long or short term for the problem. There a many solutions. This is a political and short sighted solution. It is a crime against the people who live and work here. It is a lie that more roads and interchanges with parking cannot be built. Monorails, trams, passenger ferries, escalators, buses, even air vehicles could be built for less time and money. This is about control, tolls and money. Myself and friends will never support this. I could discuss how current projects that are designed to extort and control are now being phased in. The WSDOT and SDOT should be restructured to a more futuristic and modern vision, with people who really care about transportation and the well being of our citizens. I will eventually move to escape your insanity, but sincerely worry about the young generations of King County.
EAST KING COUNTY	The plan is too large; some of the side spurs and following duplicate routes with multiple service types (ie. light rail providing same trip as Sounder) do not provide enough benefit to justify the cost. The focus should be on getting people to the system that is built for now. Once the system is functioning efficiently, you can turn to expansion; but if people can't get to the light rail line, the previous investments will have been wasted.
EAST KING COUNTY	Its simply taking too long to build the key components of the light rail system specially completing Everett to Tacoma segment. In 25 years commuting demand and demographics of the region will substantially change. There must be a way to trip down the package and advance schedules even if it means higher expenditures up front. Might have to look at PPP contracting options to move the project forward. I strongly recommend doing B/C analysis of increased cost compared to delayed completion of the key light rail links.
EAST KING COUNTY	I'm worried that this proposal is too big for the voters. If they don't like one option, it may negatively affect them voting on others they might otherwise approve.
EAST KING COUNTY	The light rail options are somewhat useful for me as I live in a dense area and can walk to one of the upcoming stations. The customer experience, however, is extremely poor. I've ridden the antiquated light rail system in San Diego, the somewhat newer system in San Jose, and Seattle's even newer system. They are all slow and relatively uncomfortable. Has there been no technological progress in the last 40 years? It's discouraging that the ST board is proposing to tax and spend such an enormous amount of money on an archaic and low-performing system. We should expect more.
EAST KING COUNTY	This whole thing is a bad use of taxpayer's dollars, build more roads, it is less expensive than trains. We need more lanes and less trains.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	<p>1. Remove the USELESS \$20M Cross-Kirkland-Corridor environmental study! There's NO WAY it will ever conclude that motorized transit can exist there. Use the \$20M as a down-payment to put a second I-405 BRT station near the 70th St Park and Ride.</p> <p>2. For a REST of the cost of that station, use A SMALL PART of the \$1 BILLION cost proposed for the ridiculous "Balducci Spur". That will allow meaningful negotiation for REMOVING the tracks all the way from the South end of the CKC to Wilburton, extending a walking/biking TRAIL along the ERC through downtown Bellevue, so that one can bike along non-motorized trails from Ballard to Wilburton (and hopefully, eventually, all the way to Renton).</p>
EAST KING COUNTY	<p>Your asking the wrong questions. I am very supportive of transit expansion but the expansion in st3 includes places that I don't think are needed. I don't think service to Everett is needed. I'd rather see service to Ballard sooner. And you propose more 522 buses without any more park and rides. The park and rides fill up very early. If the bothell, Kenmore and woodinville residents can't park near the bus line, whose going to ride the new buses!</p>
EAST KING COUNTY	<p>I support Bus Rapid Transit service on I-405, but due to environmental and local quality of life concerns, I most strongly oppose using the Cross Kirkland Kirkland Corridor (CKC) either for Bus or Light Rail use.</p>
EAST KING COUNTY	<p>ballard and west seattle links. as a former long time seattle resident who got no benefit from light rail but supported it and now eastsider, if seattle wants links that will only benefit them, their citizens should pay for it. if eastside links aren't priorities, I won't vote for it.</p>
EAST KING COUNTY	<p>Largest traffic jams are on 405 through Renton. Where is the light rail plan for that?</p>
EAST KING COUNTY	<p>all light rail should be removed from the plan</p>
EAST KING COUNTY	<p>I strongly oppose any consideration of light rail or BRT on the cross kirkland corridor. The current plan includes a study of these options, which implies that transit may be added in future. For that reason I will vote against the transit package. As long as there is any chance of transit on the trail, I will vote against.</p>
EAST KING COUNTY	<p>I'd be more supportive if the projects were implemented in increments rather than one huge package at a huge cost to everyone. We just passed a \$900 million+ bill to pay for bus projects, and now we're being asked to pay \$50 billion for another transit project? In general I strongly support Seattle having some form of subway/light rail system - Seattle is certainly behind the times in that regard - but I just feel that this package is asking too much of us (both in time (25 years?!)) and money. Also, I feel that growing South Lake Union is always disregarded. Based on the current plans, I could still drive to work in current traffic faster than taking any of the proposed future light rail lines.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	I dislike the buses on shoulders plan. The shoulder of a highway is supposed to be used for emergencies only. Now, if there is an emergency, you are in more danger of a bus hitting you/your vehicle than you would have been normally. Plus, it is very likely that someone will see someone having an emergency as a revenue generating opportunity as they "are obstructing bus traffic". Buses already get to use the car pool lane. This should be good enough, if you can bring down the amount of traffic, like the rest of this plan is supposed to do. Please don't endanger people further that are already having a bad day.
EAST KING COUNTY	The bus rapid transit (BRT) should be removed from the overall plan
EAST KING COUNTY	We need meaningful investments NOW. Waiting decades more for multi-billion-dollar rail investments instead of immediate, vastly cheaper BRT investments is unacceptable. Provide a robust BRT and RR network and then worry about rail, if it's even necessary once meaningful bus service is operating.
EAST KING COUNTY	Ballard and West Seattle should be dropped from the plan
EAST KING COUNTY	The projects connecting to Issaquah and to Tacoma should be removed. Light rail is not the right mode of transportation for these long runs. It is simply too costly and these can be served just as well using more cost effective and flexible means. ST3 also lacks vital light rail connections to Kirkland and Renton, two areas that are densely populated areas that would experience a much larger benefit with much lower cost to build out. The overall cost of this project is just too high and will take too many years.
EAST KING COUNTY	Please stop wasting time and frustrating Kirkland residents with the CKC environmental proposal. as soon who owns 3 Homes adjacent to the old tracks I can honestly say it will become a larger boondoggle than Bertha. It is mostly a Class 1 wetland, ask me how I know. soil is garbage, runoff and groundwater are impossible to deal with. Just give up the idea and eliminate the Gray hashmark off of the map. Its a mess and COMPLETELY IMPOSSIBLE. Keep the buses on the shoulder of 405.
EAST KING COUNTY	Stop subsidizing parking and developing stations where there is neither dense, walkable development today, nor, any plans in the future. 405 is the best example. Basically all of the stations are in the middle of freeway interchanges or parking lots (TIBS, Renton, Kirkland, UW Bothell, Canyon Park, Brickyard). Putting BRT on 405 is the most egregious waste of transit dollars I've ever seen. Transit should help people reduce their dependency on cars not increase it. Building transit in areas that require personal vehicles (or infrequent coverage routes) doesn't improve mobility even remotely as much as building up transit options in more dense areas.
EAST KING COUNTY	Stop this unrealistic war on cars. Mass transit is never going to work if you try to build it on the back of car-owners. Provide adequate parking in park&rides. Stop taking away lanes on surface streets and awarding them to freeloaders like bicycle riders and buses. HOV lanes mostly benefit people with families using the carpool lanes, now you are making money off then lanes with tolls. Try cutting the cushy healthcare and pension plans of transit workers who are bleeding the system out of money, don't try to extract more money from tax payer motorists to fund mass transit boondoggles. Motorists are already getting shafted as you are scheming to take away parking and lanes.
EAST KING COUNTY	No bus on the Kirkland rail corridor. Light rail would be ok.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	Remove all rail. It is inflexible and very expensive. Existing light rail line fares do not even come close to paying for the system operation and maintenance. We don't need to increase our dependence on higher taxes to fund a highly unsustainable system. Light rail is a money hole. Also, the whole ST3 project relies on the premise that it is government's business to provide the transportation solution, but it is not. Question 15, sixth paragraph indicates that some people think that increasing publically funded transportation is a good thing because it entices employers to move here. So with the new employees, you exacerbate the problem in paragraph 1. Hello .... are you thinking? The very best things to do regarding mass transit are: Go flexible. Go inexpensive. And let people make their own decisions about where to live (Ie NOT paragraph 8) and how to get to work. People need to make up their own minds what they are willing spend in terms of time on the road and commute expenses. It is NOT the government's right to determine this for us by limiting our choices. And finally, as the population ages, negotiating transfer stations is a real challenge both physically (walking and facing the cold and wet) and the fear of being attacked and robbed by homeless people and gangs.
EAST KING COUNTY	Too much light rail. More money towards improving quality of busses today. I'd like you to invest 2billion yearly to improve parking (park and rides) and bus transit. I won't support throwing all this money at light rail. Focus on slow and flexible plans. We won't need light rail in 25 years. Self driving cars and busses are coming.
EAST KING COUNTY	Outside of the fact that the costs of this proposal are ridiculous and not credible given the past history of cost over runs and delays from existing Sound Transit projects. I don't understand why any taxpayer would be willing to funding this. I'm also concerned that Sound Transit is not being fully transparent in that this proposal extends our current taxes indefinitely as well as these new taxes. That's just unethical to not be fully transparent. Additionally, the cost per family is not the \$200 per person you advertise. That is an ill-conceived low ball average based on low average home value, minimal # of cars someone owns etc. and it bases car taxes on MVET which is a flawed method that we voted to eliminate years ago to go to \$30 tabs, albeit we have it with ST 1/2. Given my particular situation I estimate that my property taxes would increase over \$300/year (forever), my car tab taxes would increase well over \$800/year (forever) and hard to calculate by my .05 cents Sales tax increase would cost my family thousands of dollars per year. In effect my family would be paying a few thousand dollars in ADDITIONAL taxes every year FOREVER. Given all the taxes we pay today, there is no more taxing capacity remaining and we are being nickel and dimed to death. And if Government did need more money we should instead be investing it in education. First advice is to be fully transparent and provide people with the complete range of possible costs. for example what % of the population will pay the amount of taxes that I will end up paying, what % will be more like the average you indicate etc. I would then throw out this plan and seek out public-private partnerships and co-develop a plan that would require ALOT less public funding. Focus on bus services that work today and scrap all the expensive light rail. Finally, to get to the point....people do not have any more \$ to be taxed. This will never fly.
EAST KING COUNTY	Remove the low-quality projects. I think the success of U-Link speaks for itself. People want rail, fully grade separated (fast and reliable), to places with high trip demand (either origin or destination demand).

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	No future high capacity transit line through Kirkland utilizing the Eastside Rail Corridor should not be considered!!
EAST KING COUNTY	BRT sounds terrible. Stop screwing around with buses. It doesn't matter if they get their own lanes on the highway, they're still going to get caught getting on and off of them. The bus system is complicated, unreliable, and unpredictable. Furthermore, funding cuts are constantly being threatened and fares continue to rise for what is only a continual decline in quality of service. The only measures I would support involving buses would be to completely overhaul the whole thing from the ground up. They are terrible! We should focus all of efforts on rail construction and providing transit options irrelevant of whatever is happening on the highways.
EAST KING COUNTY	advertising for light rail and commuter rail should include pictures of the trains in Japan after the tsunami... including the picture of the train that totally disappeared. We live in an seismic neighborhood and we've been waiting for The Big One for all the decades I've been here.
EAST KING COUNTY	The whole enchalada, baby! NO NEW TAXES!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

<p>EAST KING COUNTY</p>	<p>To be fair and accurate you need to talk about the real ridership percentages of current and cuter state when project is complete. Most studies have shown levels around 2%</p> <p>{\fonttbl\font\fnil\fcharset0 .SFUIDisplay-Regular;}</p> <p>{\colortbl;\red255\green255\blue255;\red0\green0\blue0;}</p> <p>\deftab720</p> <p>\pard\pardeftab720\partightenfactor0</p> <p>\f0\fs42 \cf0 \expnd0\expndtw0\kerning0</p> <p>\outl0\strokewidth0 \strokec2 \</p> <p>}{\rtf1\ansi\ansicpg1252</p> <p>{\fonttbl\font\fnil\fcharset0 .SFUIDisplay-Regular;}</p> <p>{\colortbl;\red255\green255\blue255;\red0\green0\blue0;}</p> <p>\deftab720</p> <p>\pard\pardeftab720\partightenfactor0</p> <p>\f0\fs42 \cf0 \expnd0\expndtw0\kerning0</p> <p>\outl0\strokewidth0 \strokec2 \</p> <p>}{\rtf1\ansi\ansicpg1252</p> <p>{\fonttbl\font\fnil\fcharset0 .SFUIDisplay-Regular;}</p> <p>{\colortbl;\red255\green255\blue255;\red0\green0\blue0;}</p> <p>\deftab720</p> <p>\pard\pardeftab720\partightenfactor0</p> <p>\f0\fs42 \cf0 \expnd0\expndtw0\kerning0</p> <p>\outl0\strokewidth0 \strokec2 \</p> <p>}</p>
<p>EAST KING COUNTY</p>	<p>The reason I strongly oppose the plan is you are investing money in the already unused bus system and creating more of a strangle hold on the north and south ends of the 405 corridor.</p> <p>Please understand that Buses do not work in the Puget Sound area, you are wasting money on them, the trains will work because they are not delayed by traffic. You need a rail line from Lynnwood to Bellevue and from Kent to Bellevue. Money also could be better spent on adding parking at Park and Rides near rail stations.</p> <p>Note: my occupation as a General Contractor cannot be done via Bus or Rail, and my partner carools as it is still much faster than a bus.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	Puget Sound is known for rain and lots of hills. To think money would be wisely spent on bicycles would be illogical. Why don't we just dredge the Cedar River for container ship traffic while we're at it.
EAST KING COUNTY	Too much too fast for the dollars.
EAST KING COUNTY	with the development of driverless technology , light rail will become obsolete. I vote for more studies of newer technology to improve sound transit problems.
EAST KING COUNTY	All light rail projects more than 15 years shall be removed from the plan, but focus on projects which may ease congestion in near term, like part of BRT.
EAST KING COUNTY	Light Rail has been a failure for the last 20 years that you have gouged the taxpayer on it. You never met the goals that were set in the 90's, when you started collecting taxes and you added another hike to taxes again. I will be dead or moved out of state before any goals of this plan are completed, but my kids will be stuck paying on this mess for years.
EAST KING COUNTY	I didn't answer questions that may imply support for putting bus service on the Eastside Rail Corridor. I absolutely oppose this and would rather see buses use the shoulders of major roads. Light Link rail may end up on the ERC but never buses.
EAST KING COUNTY	You guys should have your head examined! Any road related transportation projects are ridiculous. Stop wasting time and money on them! Anything in the eastside of lake Washington needs to s rail service.  This whole ST3 project is worthless to East and Southeast King county. This is where the exploding growth is happening. We all know that the roads are at capacity, why don't you realize this and abandon any plan that calls for busses that are stuck on traffic like everyone else!
EAST KING COUNTY	Reprioritize based on cost-effectiveness, time to completion, and service equity. Light rail should be minimized, because inefficient in terms of cost per passenger and low total passenger capacity. It is a supplement, not a replacement, for commuters, and very costly at that. It serves wealthy populations at expense of low-income. Primary light rail efforts at this time should be to complete promised routes, expand parking facilities, and add intermediate stations wherever possible. My priority for Sound Transit in general is to focus on improving and expanding heavy rail (Sounder trains) and bus service. Desired improvements include enhanced and expanded parking, expanded express bus service, and bus rapid transit in place of most or all planned light rail expansions. Over long term work to replace existing light rail with bus rapid transit. Finally, reconsider route design. Consider looped routes for Lake Washington crossings and I-5/I-405 corridors. Provide direct I-90 to Seattle route, rather than necessitating transfers in Bellevue or Mercer Island. Let Seattle focus on transit within Seattle (West Seattle to downtown, Ballard to downtown). These should not be Sound Transit priorities (although it may make sense to integrate service).
EAST KING COUNTY	Please remove bus services and do not touch the cross kirkland trail.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	<p>Sound Transit is a joke. The website claims about projects being completed on time and under budget are all lies when compared to the original promises when the projects were put to the voters. The agency is the locus classicus of bureaucratic bloat with no political accountability, since its directors all run for other offices, and the performance of Sound Transit for which they are responsible is at best a footnote when it comes time to re-elect them. Whenever the organization pretends to have "listening" sessions with the people over whom it plans to steamroll, the surplusage of available "staff" is astonishing. The obsession with light rail projects shows complete disregard of the time required or the eventual value to the taxpayers. The agency's projects takes decades to complete under its schedules, which it never meets, except for those that it recreates on the eve of completion. Other forms of transit can be brought on line much faster and at lower cost. The subsidy per passenger for light rail is so many time higher than for other forms of transit that only a spendthrift would consider it. With other important needs in the region, Sound Transit's continued grab to take and waste taxpayer resources bespeaks Marie Antoinette's attitude to the hungry peasants. Strengthening bus service and bus access is the only thing in ST3 that has some potential economic justification--but we can count on Sound Transit to make it cost substantially more than necessary.</p>
EAST KING COUNTY	<p>This plan is overreaching, costs too much, and the taxing authority never expires. Bad, bad, and very bad.</p>
EAST KING COUNTY	<p>Use of Cross-Kirkland Corridor as a Transit route. Leave as a trail. Do not use Bellevue portion of old rail line for Transit.</p>
EAST KING COUNTY	<p>The bus rapid transit plans are only going to slow light rail development and add to the traffic issues that are only getting worse as is. It seems like a very short term, very expensive band aid until the light rail projects move along. Either save that money or spend it on getting the light rail projects moving faster.</p>
EAST KING COUNTY	<p>Sound Transit needs to be moving the most people the greatest distance with the least overall cost. Another goal needs to be great flexibility in future mass transit choices. Light Rail is the most expensive to build and least effective use of transit money. It is not flexible; it is single, preset route that can never change. It is very expensive for each mile built. It serves only a small group of people, even on a good day. The focus needs to be on building roads and providing bus service. Bus service is very flexible, since routes can change very easily and often. It is terrible that Sound Transit has a goal to force people out of their cars. Instead, you should provide the service people need, not make things worse for the person so you force them into a train they wouldn't otherwise take. Not having sufficient parking for cars at train stations and many bus transit centers is another very foolish decision.</p>
EAST KING COUNTY	<p>Stop building trains. They are cost prohibitive, require significant operating subsidies, never hit their ridership quotas and cannot adapt as the region changes. If Microsoft leaves in the next 20 years, you just threw away billions of dollars building a train to nowhere. Our population density doesn't support rail.</p> <p>Increase bus service. Buses are comparatively cheap and flexible. Improving bus infrastructure is an easier sell since it is the same infrastructure used by everyone else.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	People don't use light rail. They use cars. We should be developing more access for cars. I live on Mercer Island and I don't have a way to even take bus or rail unless I get to the park and ride before 8am. We need more parking and more highway lanes.
EAST KING COUNTY	The investigation of bus rapid transit on the CKC is a waste of time and money. If you talk to anyone who actually lives in Kirkland they will tell you that the CKC has been a wonderful addition to our city; on any day you can see people riding their bikes, families walking, birds flying, etc in our peaceful, tree-lined path. The addition of bus rapid transit would absolutely ruin the feeling of the trail and furthermore would be anything but fast, since there are 30+ crossings there would be no way for the bus to ever get up to a reasonable commute speed - I can't even get to speed when commuting by bicycle on the trail. We have a great high-speed corridor in 405 right nearby and other roads where many buses used to run but don't anymore (like 106th). Please keep buses off the CKC.
EAST KING COUNTY	User fees NOT taxes should be used to fund any and all ST projects moving forward.
EAST KING COUNTY	STOP BUILDING CHOO-CHOO TRAINS
EAST KING COUNTY	<ol style="list-style-type: none"> <li>1. Do not fund bikes lanes</li> <li>2. Focus on parking spots at Light rail stations</li> <li>3. Think short term. Find a project that will complete in 2-3 years for a fraction of the cost.</li> <li>4. \$50 Billion and 25 years is ridiculous. I will have retired by then so I will vote NO. Learn from China how big projects are done at a smaller cost and in shorter time.</li> <li>5. Have construction crew in 8 hour shift. 24/7. Rain or shine. Save on labor costs.</li> <li>6. In 25 years, self driving cars will be the norm. Come back with a shorter timeline.</li> </ol>
EAST KING COUNTY	Too many years and too much money. Focus on MANY MORE buses that run cleanly.
EAST KING COUNTY	Absurd that solutions don't come for 25 years - by then all of this will be obsolete (self-driving cars, etc.). Focus on buses that use existing roads. Way more flexible and cheaper. We don't have the geography for rail (which is a technology from 100 years ago).
EAST KING COUNTY	Screwing up the traffic on the I-90 bridge by decreasing the number of lanes open to vehicular traffic is insane and I will never vote for any measure that includes it. Stay in the outlying areas with your stupid traffic slowing ideas. I hope someone runs for office that opposes this incredible waste of money by you people that think you are smarter than the rest of us. As Raymond's wife would say...IDIOTS!!
EAST KING COUNTY	Light Rail will be obsolete at tremendous cost with most tax payers never living to see the completion of this expensive boondoggle. Use busses and driverless cars and expand the highways.
EAST KING COUNTY	Bus projects should be excluded or given much lower priority. Rail projects are much more needed. I think financial support should come from increased sales taxes or gasoline taxes and motor vehicle licensing taxes and property taxes.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	There should NOT be any BRT, Light rail on the Cross Kirkland Corridor! Bad idea! Sure it is possible to do, but at what costs to the environment, community and safety to the residents of Kirkland. This is not a good fit for the location and is the wrong approach to transit improvements. What if semi-trucks were allowed to drive through downtown Kirkland as a way to add more transit options? Wouldn't work. Comparing that to using the CKC for motorized traffic--same result--won't work!
EAST KING COUNTY	The average cost seems high vs. the benefit of all improvement plans. Selecting several high-impact plans to focus on and reduce the overall cost of ST3 seems more effective and more likely to get voter approval.
EAST KING COUNTY	Remove bus plans, focus on rail plan. With 3.7 million by 2040 it's time to operationalize toward a more desirable outcome for that size of metro area.
EAST KING COUNTY	This region needs high speed rail similar to Europe. Light rail is limited and wasting billions of dollars.
EAST KING COUNTY	I live on the Eastside and pay high taxes, yet you can't even get regular bus service near my home. I don't live in the middle of nowhere. We are taxed and ignored by transit. We would use transit if you brought it to us. As it is, we have to drive 15 min to take the bus downtown. This doesn't sit well when you keep asking for more money to help everyone else but me.
EAST KING COUNTY	Clearly this would be a drain on society with little to no effect on congestion. Much rather the money be spent on technology improving roads, for example and autonomous driving vehicles. Very sad projects such as this are being promoted as solutions when the costs clearly are very high and the benefit very low.
EAST KING COUNTY	needs to focus on getting as much value delivered as soon as possible to show some improvement to the current transportation grid. Has to work in conjunction with highway improvements and not instead of highway improvements/expansion.
EAST KING COUNTY	The north-south movement in this region is very constricted. I believe that ST should be focused on north-south movement first and completing the regional spine. Completing the spine includes the customer infrastructure and amenities necessary to make it work effectively moving the most people. East-west movements like Ballard, Redmond, West Seattle, Issaquah, etc. are good but I believe are the next priority. Completing the Regional spine from Tacoma to Everett as quickly as possible should be the goal of this plan. I include the BRT program in the high priority north-south movement needs.
EAST KING COUNTY	Leave the cross Kirkland connector trail as a trail. NOT a bait and switch bus route. Thank you.
EAST KING COUNTY	Bus expansion should not be a priority in Seattle at all. A central system using light rails is more consistent and reliable for transit. If people are going to adopt public transportation, it needs to be a reasonable step up from simply driving. We already have bus lines in Seattle, and they don't work! Buses still follow traffic, and they are more prone to human error. Light rail systems should be first priority!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	Eastside seems well served by existing bus infrastructure. Eastside light rail in Issaquah and Redmond seems far less important than on the Seattle side.
EAST KING COUNTY	The project cost needs to be reduced significantly
EAST KING COUNTY	Remove busses, focus on light rail on the eastside.
EAST KING COUNTY	The project is too big and way too costly. You need to go back to the drawing board and come up with a much more economical plan. Pick the top priority projects and do those. I suggest focusing in the immediate Seattle area - light rail in Ballard, West Seattle and Bellevue.
EAST KING COUNTY	<ul style="list-style-type: none"> <li>- Environmental study for Bellevue to Bothell via Kirkland</li> <li>- Proposal for rail from Bellevue to South Kirkland Park &amp; Ride</li> <li>- Any HCT on the Cross Kirkland Corridor trail</li> </ul> <p>If any of these projects are included in the final ST3 package, I will absolutely vote against the package and work actively to defeat it in November.</p> <p>If they are removed, I will vote for ST3 in November.</p>
EAST KING COUNTY	Remove Bellevue to Issaquah light rail part -- this is unnecessary as there is already perfect transit via I90 on Sound Transit busses. Rail would be overkill.
EAST KING COUNTY	<ul style="list-style-type: none"> <li>- Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>- Remove proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> <li>- Do not put any High Capacity Transit on the CKC Trail</li> <li>- If all of these are not removed, I will actively work to defeat ST3 in November</li> <li>- If all are removed, I will support ST3 in November</li> </ul>
EAST KING COUNTY	<ul style="list-style-type: none"> <li>• Do not put any High Capacity Transit on the CKC Trail</li> <li>• Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>• Remove proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> <li>• If all of these are not removed, I will actively work to defeat ST3 in November</li> <li>• If all are removed, I will support ST3 in November</li> </ul>
EAST KING COUNTY	Rail is too expensive and disruptive, All this BS will never pay for itself, never.... The paying ridership never materializes. Just go with buses, routes, and shoulders and call it done earlier and cheaper...
EAST KING COUNTY	No transit on the Cross Kirkland Corridor-none, zero, nada. No environmental study on the Cross Kirkland Corridor. Don't add light rail from Wilburton to the South Kirkland park n Ride. I plan to support ST3 and work for it's passage ONLY if the above items are not in the final plan.
EAST KING COUNTY	Please stop encouraging the total destruction of Ballard

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	I'm not a fan of ST3 and will absolutely not support any plan that leaves the door open for transit in any form on the Cross Kirkland Corridor.
EAST KING COUNTY	<ul style="list-style-type: none"> <li>• Do not put any High Capacity Transit on the CKC Trail</li> <li>• Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>• Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> <li>• If all of these are not removed, I will actively work to defeat ST3 in November</li> </ul>
EAST KING COUNTY	<p>Do not put any High Capacity Transit on the CKC Trail</p> <ul style="list-style-type: none"> <li>• Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>• Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> </ul>
EAST KING COUNTY	<p>please:</p> <ul style="list-style-type: none"> <li>• Do not put any High Capacity Transit on the CKC Trail</li> <li>• Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>• Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> <li>• If all of these are not removed, I will actively work to defeat ST3 in November</li> </ul>
EAST KING COUNTY	<p>I hate buses! We should have an extensive light rail system throughout Puget Sound. If we are to use buses, they should augment the light rail system, otherwise, get rid of them.</p>
EAST KING COUNTY	<ul style="list-style-type: none"> <li>• Do not put any High Capacity Transit on the CKC Trail</li> <li>• Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>• Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> <li>• If all of these are not removed, I will actively work to defeat ST3 in November</li> </ul>
EAST KING COUNTY	<p>I strongly oppose any transit on the Cross Kirkland Corridor Trail. DO NOT put high capacity transit, or Bus rapid transit on this trail. You need to remove the environmental study for transit on the trail from ST3. we also do not need mass transit from Bellevue to the South Kirkland Park and Ride (what is the point if not to use the trail in the future?) These are deal breakers for me, and will cause me to vote NO instead of YES.</p>
EAST KING COUNTY	Any use of the cross kirkland corridor should be eliminated.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	<p>Do not put any High Capacity Transit on the CKC Trail. I am an avid user of the trail. It is a great place to have where pedestrians and cyclists can go without the fear of being hit by a car. With the number of incidents on the rise of texting while driving, the roads are not nearly as safe as they once were.</p> <ul style="list-style-type: none"> <li>• Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>• Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> <li>• If all of these are not removed, I will actively work to defeat ST3 in November</li> </ul>
EAST KING COUNTY	<ul style="list-style-type: none"> <li>• Do not put any High Capacity Transit on the CKC Trail</li> <li>• Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>• If all of these are not removed, I will actively work to defeat ST3 in November</li> </ul>
EAST KING COUNTY	<p>I will not support any projects that will jeopardize the CKC Trail or any environmental studies that would lead to development of the trail system to a mass transit system.</p>
EAST KING COUNTY	<p>I think BRT is archaic. I think any rollout of bus transport that isn't immediate will be outdated and obsolete. I don't support any investment in BRT. That said, the 405 corridor as been ignored for too long. Something has to be done NOW and tolling isn't working to move enough volume. I do not support giving any money to the City of Kirkland for the study or development of the Cross Kirkland Corridor.</p>
EAST KING COUNTY	<p>Keep high-capacity transit OFF the Cross Kirkland Corridor Trail. It is a huge boon to public health and transportation (e.g., safe bike-riding, walking and running) and has been embraced by the community.</p>
EAST KING COUNTY	<p>Do not put any High Capacity Transit on the CKC Trail. Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride. If all of these are not removed, I will actively work to defeat ST3 in November.</p>
EAST KING COUNTY	<p>I've lived on the trail for 26 years. I have seen it go from use by the dinner train to now a place where family can walk and ride. Adding rail or other transit will ruin the trail forever. In addition, I will aggressively fight to make sure that ST3 does not become a reality. Because if it does everybody on the track will have to move.</p>
EAST KING COUNTY	<p>NO high capacity transit on the CKC trail. So not spend more money on "environmental study" between Bothell and Bellevue involving the CKC trail/ Remove proposal of mass transit from south Kirkland Park and ride to Bellevue. I will work with the group to keep the CKC free of bus and rail and do my best to DEFEAT ST3 in November.</p>
EAST KING COUNTY	<p>I will not support ST3 if there are plans for high-capacity transit on the CKC Trail, or if there are any plans that eliminate Mercer Slough. I will not support ST3 unless it removes the environmental study between Bellevue and Bothell via the CKC Trail, and removes the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride. If all of these are not removed, I will actively work to defeat ST3 in November.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	<p>Remove any high capacity transit along the CKC</p> <p>Remove any environmental study via CKC for possible Rail/bus.</p> <p>Remove proposal of any mass transit from Bellevue to South Kirkland P&amp;R.</p> <p>If these are not removed I will work diligently to defeat all of ST3.</p>
EAST KING COUNTY	<ol style="list-style-type: none"> <li>1. There should never be any High Capacity Transit on the Cross Kirkland Corridor.....it is our 'Burke Gilman' trail.</li> <li>2. The environmental study for the CKC should be REMOVED.</li> <li>3. Remove the proposal of a study of rail between Bellevue and the South Kirkland Park and Ride. That is a prelude to rail on the CKC.</li> <li>4. Without these items removed, I will have to actively work against ST3.</li> </ol>
EAST KING COUNTY	<p>I believe mass transit as we know it will drastically change over the next 25 years with driver-less cars etc. I don't think we should be making 25 year plans based on technology as we know it today.</p> <p>Additionally I passionately believe:</p> <ul style="list-style-type: none"> <li>- Do not put any High Capacity Transit on the CKC Trail</li> <li>- Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>- Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> </ul> <p>Note - If all of the above are not removed from ST3, I will actively work to defeat ST3 in November</p>
EAST KING COUNTY	<ul style="list-style-type: none"> <li>* Do not put any High Capacity Transit on the CKC Trail</li> <li>* Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>* Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> </ul> <p>If all of these are not removed, I will actively work to defeat ST3 in November</p>
EAST KING COUNTY	<ul style="list-style-type: none"> <li>* If these are not removed, I will actively work to defeat ST3 in November</li> <li>* Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>* Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride (not currently in the plan, but being floated to add)</li> <li>* General input: <ul style="list-style-type: none"> <li>* Do not build a parallel structure to the Wilburton trestle for E04, but find another way to connect Bellevue to Factoria then Issaquah</li> <li>* Do not put any High Capacity Transit on the CKC Trail</li> <li>* Reduce the package by 50%--you are trying to satisfy everyone and not being realistic</li> </ul> </li> </ul>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	<p>I strongly oppose any transit on the Cross Kirkland Trail. Remove the environmental study between Bellevue and Bothell via the Cross Kirkland Trail. Remove the proposal for mass transit from Bellevue to South Kirkland Park and Ride.</p> <p>If these projects that impact the Cross Kirkland Trail are not removed we will work diligently to to defeat ST3 in November.</p>
EAST KING COUNTY	<ol style="list-style-type: none"> <li>1) Do not put any High Capacity Transit on the CKC Trail</li> <li>2) Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>3) Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> <li>4) If all of these are not removed, I will actively work to defeat ST3 in November</li> </ol>
EAST KING COUNTY	<ol style="list-style-type: none"> <li>1. The plan is too expensive - the cost figure in question 14 is far lower than the actual cost.</li> <li>2. The cost of plan exceeds the intent of the enabling legislation</li> <li>3. The "environmental study" of converting the Cross Kirkland Corridor Park to mass transit use of any kind must be removed from the plan - it's just a sham to set up to take the park away.</li> <li>4. Remove the project to build mass transit from Bellevue to South Kirkland Park &amp; Ride - there are too many grade level crossings that will make the roads unusable for local traffic.</li> </ol>
EAST KING COUNTY	<p>I really think there shouldn't be any High Capacity Transit on the CKC Trail. We love that trail and would love to leave it how it is. It's a family trail and is perfect for riding our bikes, walking and just taking the kids on that path and enjoying our beautiful nature around us. You don't see many beautiful trails like that within cities. Usually you need to travel way outside the city to hike beautiful trails. This trail is literally in our backyards and perfect in every way. I'd hate to see such a beautiful trail demolished and become such a busy transit route. We need to protect our beautiful nature and what's left of it in our beautiful city. I think they should remove the environmental study between Bellevue and Bothell via the CKC Trail and also remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride. If all of these are NOT removed, you can bet I will actively work to defeat ST3 in November.</p>
EAST KING COUNTY	<ul style="list-style-type: none"> <li>• Do not put any High Capacity Transit on the CKC Trail</li> <li>• Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>• Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> <li>• If all of these are not removed, I will actively work to defeat ST3 in November</li> </ul> <p>In general, I would like to see more emphasis on BRT and less on light rail. I think BRT is a quicker and more cost effective way to help resolve traffic problems in the PNW. Light rail is a huge investment and its value in increasing commuters using transit is not proven. In fact there is a study that shows in 6 cities where light rail was installed, commuters using transit actually declined over a 30 year period.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	With all the closures of the sounder rail service in the winter months caused by hillside slides it seems that we are throwing away assets that should be used elsewhere. My thoughts are that since we use bus service when we have the slides and the bus routes have the flexibility of changing routes as necessary, Why bother with rail service in this area at all.
EAST KING COUNTY	Any high capacity transit on the CKC. The environmental study on the CKC from Bellevue to Bothell
EAST KING COUNTY	- Do not put any High Capacity Transit on the CKC Trail - Remove the environmental study between Bellevue and Bothell via the CKC Trail - Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride - If all of these are not removed, I will actively work to defeat ST3 in November
EAST KING COUNTY	No HCT on the CKC Trail; Remove the environmental study between Bellevue and Bothell via the CKC; Remove the proposal of mass transit from Bellevue to the South Kirkland Park & Ride. If all of these are not removed, I will do my best to defeat ST3 in November.
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail •Remove the environmental study between Bellevue and Bothell via the CKC Trail •Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride •If all of these are not removed, I will actively work to defeat ST3 in November
EAST KING COUNTY	BRT and light rail should never be used on CKC in Kirkland. Remove proposal of mass transit from Bellevue to Kirkland Park and Ride. If all of these are not actively removed I will work hard to defeat ST3 in November.
EAST KING COUNTY	*Do not put any High Capacity Transit on the CKC Trail *Remove the environmental study between Bellevue & Bothell via the CKC Trail *Remove the proposal of mass Transit from Bellevue to the South Kirkland Park & Ride *If all of these are not removed, I will actively work to defeat ST3 in the November elections
EAST KING COUNTY	No high-capacity transit on the Cross Kirkland trail. No environmental study to place HCT on the trail at a later date. We are better served by BRT on I-405 with a really good build-out to downtown. And it's cheaper.  These are the conditions for my support.
EAST KING COUNTY	Please, please do not place ANY high capacity transit on the Kirkland Corridor Trail. This is important to young families and older people who need a great way to stay fit. The Environmental study between Bothell and Bellevue via the CKC trail needs to be deleted. Also remove mass transit proposal from Bellevue to So. Kirkland P&R

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	<p>Do not put any High Capacity Transit on the Cross Kirkland Corridor (CKC) Trail</p> <p>Remove the environmental study between Bellevue and Bothell via the CKC Trail</p> <p>Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</p> <p>If all of these are not removed, I will actively work to defeat ST3 in November. Thanks!</p>
EAST KING COUNTY	<p>Remove Environmental Study (which curiously does not appear on this survey!), take the money planned for that, and the "Bellevue light rail spur", and construct RBT stations on I-405 similar to those great ones on 520 east of Lake Washington. Add one of those at NE85th and build parking garage there. These types of central highway RBT access let buses exit and enter the HOV lanes rapidly, not having to cross from shoulder to HOV and back to shoulder</p> <p>ALSO, The proposed timelines are way too long, and the fact we'd be paying taxes yearly for something that may well not be completed in my lifetime, is ridiculous. I'm OK with contributing to the future good, but 25 years to get transit to Everett - Come On!!</p>
EAST KING COUNTY	<p>Get the tunnel done and sink pioneer square, then waste billions on bike lanes.</p>
EAST KING COUNTY	<p>Do not put ANY high capacity transit on the CKC trail. The trails should be used for walkers and bike riders only. Remove the environmental study between Bellevue and Bothell via the CKC trail. Remove the proposal of mass transit from Bellevue to So. Kirkland Park &amp; Ride. If all of these are not removed, I will work to defeat any ballot issue trying to have taxpayers pay for something that would destroy the CKC trail and has already shown there would be low ridership on any high capacity transit using the existing CKC trail.</p>
EAST KING COUNTY	<p>Do not put any High Capacity Transit on the CKC Trail</p> <p>Remove the environmental study between Bellevue and Bothell via the CKC Trail</p> <p>Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</p> <p>It is not right the city went through all the trouble of touting the trail as a "protected habitat" and for the promise of some potential revenue destroy aforementioned "protected habitat".</p>
EAST KING COUNTY	<p>Do not put any High Capacity Transit on the CKC Trail</p> <p>Remove the environmental study between Bellevue and Bothell via the CKC Trail</p> <p>Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</p> <p>If all of these are not removed, I will actively work to defeat ST3 in November</p>
EAST KING COUNTY	<p>No environmental studies for the CKC. The trail should be preserved for pedestrians and bicyclists.</p>
EAST KING COUNTY	<p>all projects except non-capital improvements to bus service.</p>
EAST KING COUNTY	<p>High Capacity Transit should be excluded from the Cross Kirkland Trail</p> <p>Delete the pending environmental study of the CKC Trail between Bellevue and Bothell</p> <p>Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</p> <p>I believe strongly that these projects are ill advised and should be removed from ST 3. Absent their removal, I will work to defeat ST3 in November's election even though I support other aspects of the plan</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	Drop the Issaquah light rail route. Speed up delivery of the other ones.
EAST KING COUNTY	do not put light rail next to the Kirkland corridor walking path
EAST KING COUNTY	I do not support any rapid transit on the CKC, and unless those proposals are removed from the ST3 I will not support it. I do support rapid transit on the I-405 corridor.
EAST KING COUNTY	Remove any light rail and Sounder extensions and focus on BRT and Express Buses improvements and operations.
EAST KING COUNTY	No more taxes for this stuff until current taxes expire.
EAST KING COUNTY	Do not put any High Capacity Transit on the Cross Kirkland Corridor Remove the environmental study between Bellevue and Bothell via the CKC Trail Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride If these are not removed, I will actively work to defeat ST3 in November
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail Remove the environmental study between Bellevue and Bothell via the CKC Trail Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride If all of these are not removed, I will actively work to defeat ST3 in November
EAST KING COUNTY	Do not put any high capacity on the CKC trail Remove the environmental study from Bellevue and Bothell via CKC trail No mass transit between Bellevue and So.Kirkland Park and Ride If these proposal are not removed I will vote against ST3 this November and will also vote against any any & all who are infavor.
EAST KING COUNTY	Remove the environmental study between Bellevue and Bothell via the CKC Trail •Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride •If all of these are not removed, I will actively work to defeat ST3 in November
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail •Remove the environmental study between Bellevue and Bothell via the CKC Trail •Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride •If all of these are not removed, I will actively work to defeat ST3 in November
EAST KING COUNTY	Green energy busses are better than expensive trains. We need to fix crubling roads and bridges first before building expensive trains.
EAST KING COUNTY	•Do not put any High Capacity Transit on the CKC Trail •Remove the environmental study between Bellevue and Bothell via the CKC Trail •Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trial. No mass transit on the CKC from Bellevue to North Kirkland.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail! Remove the Environmental study between Bellevue and Bothell via the CKC Trail. Remove the proposal of mass transit from Bellevue to the South Kirkland Park & Ride. And, if all of these are not removed, I will actively work to defeat ST3 in November.
EAST KING COUNTY	1. NO high Capacity Transit on the Cross Kirkland Corridor 2. Remove proposal of rapid mass transit from Bellevue to South Kirkland Park and Ride 3. Remove the environmental study between Bellevue and Bothell via the Cross Kirkland Corridor  I will work actively to defeat ST3 in November if all the above are NOT removed.
EAST KING COUNTY	Instead of trying to put busses on the shoulder (which is a dangerous idea; cars often need to pull over and use the shoulder-- that's why we <i>*have*</i> shoulders), you should add more actual lanes to the highways. And not for the purpose of bleeding people on tolls!
EAST KING COUNTY	I believe we should focus on utilizing the systems we already have in place -- such as buses that have both highways and parking areas supporting them. Why build more and more systems when our current one (buses, i.e). can be improved and updated with more parking in areas that need it and more routes and/or more often times. If you can't do the one system that is in place better, why start making 5 or more other systems that will all be mediocre?! The ST3 is like a huge project going far too many directions re mode of transportation (or similar to bills in the legislature that tackle too many diverse items). And for that reason alone, I wouldn't vote for it. Let's tackle one at a time and GET IT RIGHT! Or FIX OUR CURRENT SYSTEM!
EAST KING COUNTY	Give us more lanes on 405. Many people simply can't use mass transit. I see empty busses already on 405. More empty buses is not the answer. Parts of 405 have not seen addition expansion since the late 80's
EAST KING COUNTY	Sounder Rail expansion should be removed. Better to modify routes if existing buses than create new Rapid Ride buses.
EAST KING COUNTY	This is too expensive and requires FAR too much in the way of taxes on average working Washingtonians. We already pay one of the highest gas taxes and property taxes in the nation but aren't getting any improvement in our freeways for it. Fix those first!
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail <ul style="list-style-type: none"> <li>• Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>• Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> <li>• If all of these are not removed, I will actively work to defeat ST3 in November</li> </ul>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	The CKC Trail should not be considered for any transit project whatsoever, now or in the future. Please remove the Bellevue to S Kirkland P&R proposal, and the environmental study regarding the trail between Bellevue and Bothell. We need to keep the Trail as a regional recreational asset, not a mass transit takeover. I strongly support mass transit, have done so for decades, but I will diligently work to defeat ST3 if the above are not removed from the final plan. Thank you.
EAST KING COUNTY	DO not put ANY high capacity transit on the CKC Trail Remove the environmental study between Bellevue and Bothell via the CKC Trail Remove the proposal of mass transit from Bellevue to S Kirkland Park and Ride  If these are not removed, I will work to defeat ST3 in November
EAST KING COUNTY	No transit on the trail; remove environmental study between Bellevue and Bothell via the trail; remove the proposal of mass transit from Bellevue to So. Kirkland park & ride.
EAST KING COUNTY	If all of these are not removed, I will actively work to defeat ST3 in November
EAST KING COUNTY	<ul style="list-style-type: none"> <li>• Do not put any High Capacity Transit on the CKC Trail</li> <li>• Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>• Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> <li>• If all of these are not removed, I will actively work to defeat ST3 in November</li> </ul>
EAST KING COUNTY	I do not support any transit on the trail and will lobby to remove all studies thru Renton for rail or mass transit.
EAST KING COUNTY	Do not put buses or transit on the CKC Trail We do not need mass transit between Bellevue and South Kirkland P & R
EAST KING COUNTY	I would oppose ST3 if there are any plans to put transit on the Cross Kirkland Corridor.  I would oppose ST3 if it included putting light rail between Bellevue and the South Kirkland Park and Ride. That is short-sighted, expensive waste of tax dollars, which would benefit few riders. It could also foreclose future plans for the Eastside Rail Corridor. Don't do it.  I would also oppose ST3 if it includes plans for an environmental study of transit on the CKC between Bellevue and Bothell. This seems like a tremendous waste of money with unspecified goals and benefits.
EAST KING COUNTY	Do not any high capacity transit on the CKC trail
EAST KING COUNTY	There should never be any form of mass transit on the CKC trail. It should always be kept for recreational use only. I will vote against any Sound Transit proposal that doesn't include the promise to keep the CKC trail for recreational use only.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail Remove the environmental study between Bellevue and Bothell via the CKC Trail Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride If all of these are not removed, I will actively work to defeat ST3 in November
EAST KING COUNTY	I strongly support BRT on 405 and related capital improvements to improve service on 405.  I will actively oppose and will NOT vote for ST3 containing ANY of these projects: - HCT of any kind on the Cross Kirkland Corridor - an environmental study aimed at implementing HCT on the Cross Kirkland Corridor - mass transit from Bellevue to the South Kirkland Park and Ride via the Eastside rail corridor
EAST KING COUNTY	Do not put any high capacity transit on the CKC trail
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail Remove the environmental study between Bellevue and Bothell via the CKC Trail Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride If all of these are not removed, I will actively work to defeat ST3 in November
EAST KING COUNTY	<ul style="list-style-type: none"> <li>• Do not put any High Capacity Transit on the Cross Kirkland Trail, the trail should be a benefit to residents, allowing for safe walking and bicycling.</li> <li>• Remove the environmental study between Bellevue and Bothell via the Cross Kirkland Trail</li> <li>• Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> <li>• If all of these are not removed, I will actively work to defeat ST3 in November</li> </ul>
EAST KING COUNTY	Remove the environmental study between Bellevue and Bothell via the CKC Trail
EAST KING COUNTY	-Do not put any High Capacity Transit on the CKC Trail - Remove the environmental study between Bellevue and Bothell via the CKC trail. -Remove the proposal of mass transit from Bellevue to South Kirkland Par & Ride - If all of these are not removed, I will actively work to defeat ST3 in November.
EAST KING COUNTY	Anything that would put any kind of transit on any of the bike/walking trails anywhere, and specifically the cross-Kirkland corridor. If that ever becomes part of the plan, I, and many others, would actively oppose any further transit planning and funding.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	<p>It is TOTAL INSANITY to put any high capacity transit on the Cross-Kirkland Corridor, but especially BRT. While the right-of-way is technically 100 feet wide, it is not developed to nearly that width today, and doing so would COMPLETELY DESTROY the character of the trail and the woodland environments it passes through. The community has embraced the CKC as an urban oasis--an exercise route that provides a place for contemplation, respite, and solitude. Adding two concrete lanes of BRT would be a DISASTER. PLEASE DON'T DO THIS, especially since BRT can be done on I-405 nearby.</p> <p>Remove the environmental study between Bellevue and Bothell via the CKC. Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride on the Bellevue section of the same trail. If these projects are not removed, I will actively work to defeat ST3 in November.</p>
EAST KING COUNTY	<ul style="list-style-type: none"> <li>• Do not put any High Capacity Transit on the CKC Trail</li> <li>• Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>• Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> <li>• If all of these are not removed, I will actively work to defeat ST3 in November</li> </ul>
EAST KING COUNTY	<p>Do not put any High Capacity Transit on the CKC Trail;          Remove the environmental study between Bellevue and Bothell via the CKC Trail;          Leave the CKC Trail as is and transit free.</p>
EAST KING COUNTY	<p>You minimize the average cost of light rail. I have read that the real cost for full expansion is between \$ 400 and \$1300/year for the \$50 Billion plan. That \$200 + per month must have been for the \$ 15 Billion bond measure. Bus rapid transit and more efficient bus service costing a fraction is good, but light rail costs and timing are inefficient and remove the necessary money from the state and federal budgets to maintain our highways and bridges. This will make roads and bridges progressively more dangerous, while light rail expansion will increase the cost of living in this area for the benefit of a small percentage, heavily subsidized. Until the population density warrants a light rail system that can financially support itself -not for over 40 years, I reject any and all additional light rail indicated in ST3.</p>
EAST KING COUNTY	<p>Once and for all the idea of putting buses on the Cross Kirkland Corridor should go down in flames. This is insanity. We have 405 already. Adding buses on the CKC would utterly destroy the environment and endanger the people using the trail as well as local wildlife. It would add pollution and crime and devalue adjacent properties. It won't significantly increase ridership. I'm just aghast at how much money is wanted for all of these projects-- I'm a middle income person and nearly half my paycheck goes to rent. I don't have any extra to contribute to subsidizing transit options I'm unlikely to use. If bus service was improved along the 522 corridor I would be more likely to use it to get to Seattle. There is often standing room only. Please, no new taxes, no buses on the CKC. Thank you.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	Remove any components that study, consider, preserve, or move toward any form of motorized transit on existing and committed trail corridors (Cross Kirkland, Eastside Corridor, etc.). Even though I generally support most components of this draft plan, I feel most strongly about preserving and maintaining non-motorized use of these trails. Therefore, if the version of ST3 presented for voting this fall includes components intended to further or preserve the future possibility of motorized transit on trails, I'll vote against it and campaign to defeat it.
EAST KING COUNTY	Link light rail is too expensive compared to express bus service, and provides no flexibility for changing demographics as the region grows. Buses can be rerouted periodically to reflect changing demand. Rapid ride with fewer stops are more attractive than the "mail run" made by King County Metro, which double or triple the time it would take to just drive a car.
EAST KING COUNTY	NO USE OF THE TRAIL FOR RAIL OR BUS SERVICE
EAST KING COUNTY	In the early 1900's we had light rail everywhere. When cars came in we got rid of light rail in favor of buses and cars because they could take people anywhere. They still can. Sound Transit is unwilling to build park and rides, I suppose due to cost, but without park and rides the majority of our commuters cannot use light rail, buses, or Sounder Trains. We should focus on buses and park and rides to make it easier for people to use them. Sounder Trains and light rail are ridiculously expensive for the few they serve. Also, looking this far into the future is problematic. Self-driving cars and working at home electronically will affect things in ways we cannot imagine.
EAST KING COUNTY	Do not put any kind of transit on the Cross Kirkland Corridor. It is double the cost. Take off the environmental study between Bellevue, the Cross Kirkland Corridor and Bothell. It is a waste of money. Remove any proposed transit from Bellevue and the South Kirkland Park and Ride. If all of these are removed, I will actively support ST3.
EAST KING COUNTY	I am extremely supportive of mass transit expansion, but am adamantly opposed to ANY transit on the Cross Kirkland Corridor trail. Any research, studies, etc on the CKC should immediately be abandoned, with the focus moving to how to push for better/increased access on our major highways. We should NOT interrupt suburban "green" areas in the name of mass transit, we should just build upon what is already implaced.
EAST KING COUNTY	I am a runner and use the CKC Trail almost on a daily basis. Please do NOT put any buses on the trail! The environmental study between Bellevue and Bothell via the CKC Trail is NOT necessary because it's NOT an option and is not only bad for the environment but also bad for people who waited years to have this trail built. There no need for the proposed mass transit from Bellevue to South Kirkland Park & Ride since commuter as me and a LOT of my friends do NOT like the broken up pubic transit and still prefer to drive or carpool to work. It's like favoring a non-stop flight v.s. a cheap multi-stop flight. It's just human nature! Don't waste our tax money! The tax money is better spend on fighting drugs and substance abuse that will be made worse with more wide spread light rail!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	I am strongly opposed to any high capacity transit on the CKC trail in Kirkland. I do not want an environmental study done on the CKC trail between Bothell and Bellevue. I do not approve of the plan to run mass transit from Bellevue to South Kirkland Park & Ride. I will work hard to defeat ST3 November if all of these actions are not removed. Thank you.
EAST KING COUNTY	<ol style="list-style-type: none"> <li>1. Don't put any HTC on the CKC trail.</li> <li>2. Remove the 20 million dollar environmental study between Bellevue and Bothell via CKC.</li> <li>3. Remove the proposal of mass transit from Bellevue to South Kirkland Park and Ride.</li> </ol> <p>\$. I will actively work to defeat ST3, and its 50 billion dollar price tag, in November if these items aren't removed from the ballot.</p>
EAST KING COUNTY	<ol style="list-style-type: none"> <li>1. Do not put any High Capacity Transit on the CKC Trail</li> <li>2. Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>3. Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> <li>4. If all of these are not removed, I will actively work to defeat ST3 in November</li> </ol>
EAST KING COUNTY	<p>no high capacity transit on the CKC trail</p> <p>remove the environmental study between bellevue and bothell via the ckc trail</p> <p>remove the proposal of mass transit from bellevue to south kirkland park and ride</p> <p>if all of these are not removed, I will actively work to defeat st3 n November</p>
EAST KING COUNTY	<p>Do not put any High Capacity Transit on the CKC Trail</p> <p>Remove the environmental study between Bellevue and Bothell via the CKC Trail</p> <p>Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</p> <p>If all of these are not removed, I will actively work to defeat ST3 in November</p>
EAST KING COUNTY	<ul style="list-style-type: none"> <li>- Do not put any High Capacity Transit on the CKC Trail</li> <li>- Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>- If all of these are not removed, I will actively work to defeat ST3 in November</li> </ul>
EAST KING COUNTY	<p>I will ONLY SUPPORT the ST3 plan in November if and only if all reference to "use of" or "study of" or "assessment of" etc. the Cross Kirkland Corridor (CKC) trail are REMOVED completely. Consideration to use the CKC for anything other than non-motorized community use is a NON-NEGOTIABLE and a NON-STARTER for ST3 approval.</p> <p>I will work actively and vehemently to DEFEAT ST3 in November if there is any, even subtle, reference to "High Capacity Transit on the CKC" or "environmental study between Bothell and Bellevue using the CKC trail" or "investigation of mass transit from Bellevue to P&amp;R at South Kirkland" etc. All of these MUST BE REMOVED prior to the November ballot, otherwise our strong local communities will solicit support from the EPA, Greenpeace and all publicly recognized and esteemed organizations to block, defeat and bring suit against the Kirkland City Council.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	CKC trail has to be removed from any high capacity transit plans, thus there is no need to continue invironmental study.
EAST KING COUNTY	No high capacity transit on CKC Trail. No environmental study between Bellevue and Bothell via the CKC Trail. Remove proposal of mass transit from Beelevue to South Kirkland Park and Ride. I willactively work to defeat ST3 in November if all the above aren't removed.
EAST KING COUNTY	1. Put no transit on the CKC trail. 2. Delete environmental study of any transit via the CKC. 3. Delete proposed mass transit from Bellevue to South Kirkland Park & Ride. 4. If Items 1, 2 and 3 are not accepted, I will actively work to defeat ST3 in November.
EAST KING COUNTY	I strongly OPPOSE any high-capacity transit on the Cross Kirkland Trail. I oppose any environmental study between Bellevue and Bothell that involves the Cross Kirkland Trail. I oppose mass transit from Bellevue to South Kirkland Park & Ride.
EAST KING COUNTY	Please do not put any High Capacity Transit on the CKC Trail!! We do not need to spend money on an impact study for the CKC trail. If these are included, I will work to defeat ST3. We cannot lose the wonderful trail we have just installed in Kirkland!!
EAST KING COUNTY	no light rail on CKC Trail no environmental study for Bellevue and Bothell via CKC trail remove mass transit from Bellevue to South Kirkland P&R no light rail from Issaquah to Bellevue
EAST KING COUNTY	Because of the environmental impact of such development and the extreme need for the Puget Sound region to continue to expand non-motorized walking and bike transport and recreation pathways like the Burke-Gilman Trail, the Kirkland Cross Corridor should be withdrawn as a part of the regions transportation plan.
EAST KING COUNTY	While public transportation is important, we should preserve and be proud of CKC trail as it has become integrated part of our community, representing great balance of "human living with nature" spirit. Buses and trains should be kept in 405 corridor. Bringing buses and trains into a small trail like CKC, will ruin the oasis enjoyed by many of residents daily, and also against our value, in my opinion.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	<p>I don't believe think it's a good idea to perform an environmental impact statement for the possibility of implementing light rail/mass transit along the Eastside Rail Corridor, specifically the CKC. The study will cost a lot of time, money, and energy to investigate something that many people have already expressed opposition to.</p> <p>Your own investigations into developing transit along the trail has shown less than favorable ridership, while also having a very high cost/mile of construction. Also, the additional infrastructure needed to allow access to any mass transit system would be costly (ped access, vehicle parking structures, etc is practically non-existent right now along the trail). With this in mind, it seems much more reasonable to look into the possibly of implementing light rail (eventually) along I-405. The extra ridership and financial savings with this alternative would allow for even more capitol improvements along I-405, including but not limited to more in-line stations, parking structures at park and rides, and pedestrian access.</p> <p>In short, why not use the existing infrastructure WSDOT has already spent millions improving as an alternative for light rail? Long term I believe it will be cheaper, obtain more ridership, and have a greater impact on the Eastside.</p> <p>Thank you</p>
EAST KING COUNTY	Do not put any high capacity transit on the OKC trail
EAST KING COUNTY	<p>No transit on CKC Trail</p> <p>No environmental study between Bellevue and Bothell on CKC Trail</p> <p>Remove proposal of mass transit from Bellevue to south Kirkland P&amp;R</p> <p>If these aren't removed I will work to defeat ST3 in Nov</p>
EAST KING COUNTY	<p>Improving and building our transportation infrastructure is critical. We live in Kirkland and strongly request that you please do not put any high capacity, or motorized transit on the Cross-Kirkland Corridor. The community loves the access to the outdoors and nature, which is core to our PacNW culture. In addition, most of the individuals who would use the trail to go to work at Google would be more than happy to ride their bikes instead, or take a bus on i405, which would be more cost-efficient. Please also remove the environmental study between Bellevue and Bothell via the Cross-Kirkland Corridor trail. We'd much rather see the funds and energy spent on another investigative project. In addition, please remove the proposal of mass transit form Bellevue to South Kirkland Pak and Ride. While I'm very supportive of the general ST3 effort, if these provisions are not removed, I will vote against and actively work to defeat the ST3 plan in November. Thank you!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	I'm in favor of limiting mass transit options on the Eastside to the I-405 corridor, and I strongly oppose any transportation plan that would involve the Cross Kirkland Corridor. There is no need for the environmental study, Bellevue-Bothell that entails the Cross Kirkland Corridor, as I would not support any mass transit proposal that involves the CKC. I also oppose the proposal for mass transit from Bellevue to the South Kirkland P&R. There is no way that I will vote for ST3 if the above projects are built into the proposal.
EAST KING COUNTY	Remove the environmental study between Bellevue & Bothell via the Cross-Kirkland Corridor Trail. Remove the proposal for high-capacity transit from Bellevue to the South Kirkland Park & Ride. Do not put any high-capacity transit on the Cross-Kirkland Corridor Trail. Inclusion of any of these proposals will result in a "No" vote for ST3 by me and my personal active opposition to ST3.
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail
EAST KING COUNTY	Any public transportation that would effect existing public trails such as the cross Kirkland corridor, or others that may be affected, will be grounds for me to actively work against public transportation. I have spent many years living abroad in Europe and can confirm our public transportation is significantly lacking and needs rapid, serious improvement. However this should not come at the cost of other public services, such as trails, especially in such a beautiful area where there are limited options available. The cross Kirkland corridor is one of the best parts of living in Kirkland, and allows residents to go outside and enjoy the place they live. It's extremely disheartening to think that we will continue to destroy nature to put in more machines. I can't believe such a proposal has even been made in the Pacific Northwest, and I believe if more people fully understood the ramifications of what you are proposing to destroy they would adamantly disagree with your transit plans.
EAST KING COUNTY	While I do support (and use) the public transportation in general, I'm specifically concerned about the plans regarding usage of the CKC for mass transit. This trail is a rare gem in our community and it will be a huge loss to the livability for the entire area. I and many people I meet everyday enjoy walking and biking this trail to get to/from the P&R stations or simply for their daily exercise. Living close to the trail, I cannot imagine it ever being the same if there are buses or light rail going through it. If projects regarding even the future usage of the trail continue to be included as part of the larger project, I will do everything in my power to get it defeated in November even though I support many other parts of it.
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail Remove the environmental study between Bellevue and Bothell via the CKC Trail Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride If all of these are not removed, I will actively work to defeat ST3 in November
EAST KING COUNTY	Do not put any transit on the CKC Trail, remove the proposal of adding any type of mass transit from Bellevue to South Kirkland Park & Ride
EAST KING COUNTY	Please do not put any High Capacity Transit on the CKC Trail. Its the only area that I can safely walk/bike with my kid. I will only support the ST3 only if it maintain the CKC trail at its current state.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	I do not support the environmental study aimed at light rail on the CKC between Bellevue and Bothell. I support light rail but feel that using the CKC is short sighted given the availability of developed thoroughfares between these locations. Developing this last remaining strip of relatively undeveloped land seems a senseless elimination of needed watershed, habitat and safe recreational trail. More roads is not the issue, effective use of existing roads and availability of transit is; that, and everyone wants to live here. I lived half my life in LA and still own property there, and I used to work half week in San Francisco. I know all a non-engineer can know about traffic and transit, and believe me, developing the CKC is not the solution. If ST3 is positioning potential development of the CKC, I will not support it and work against it.
EAST KING COUNTY	<ul style="list-style-type: none"> <li>- NO MASS TRANSIT SHOULD BE PUT ON THE CKC (WHICH IS A "TRAIL" NOT A CORRIDOR!)</li> <li>- WE SHOULD NOT EVEN WASTE MONEY ON ANY STUDY OF ENVIRONMENTAL IMPACT ON THE CROSS KIRKLAND TRAIL (CKC) BETWEEN BELLEVUE AND BOTHELL BECAUSE IT IS CLEAR WHAT THE IMPACT WILL BE - DEVASTATION OF A GREENBELT, NOISE, AIR AND TRAFFIC POLLUTION AND "URBANIZATION" OF THE ONE REMAINING CONTINUOUS WALKING, RIDING, SKATING NATURE TRAIL THAT WE HAVE. NO STUDY NEEDED!!!!</li> <li>- THERE IS NO NEED FOR MASS TRANSIT FROM BELLEVUE TO SOUTH KIRKLAND PARK AND RIDE.</li> <li>- IF THE ABOVE PROPOSALS, CONSIDERATIONS, STUDIES AND FANTASIES ARE NOT REMOVED, I AND MY FAMILY, FRIENDS AND NEIGHBORS WILL WORK TIRELESSLY TO DEFEAT ST3 IN NOVEMBER. WE ARE VEHEMENTLY OPPOSED TO DAMAGING THE ESSENTIAL NATURE OF OUR NEIGHBORHOOD, AS ARE ALL OF THE RESIDENTS OF MEDINA, HUNTS POINT AND YARROW POINT. WHY NOT RUN MASS TRANSIT AND LIGHT RAIL THROUGH THERE?</li> </ul>
EAST KING COUNTY	There should be absolutely no further work done to impair the current use of the Cross Kirkland Corridor. This is a pedestrian walkway and cannot support bus traffic under any circumstances. You should immediately cancel any environmental impact study and utilize the funds for establishing the corridor along I-405. You should immediately remove any consideration of mass transit from Bellevue to South Kirkland Park & Ride. Concentrate only on the I-405 corridor. There are aspects of the plan that I support but I will actively oppose mass transit from Bellevue to South Kirkland Park & Ride and any utilization of the Cross Kirkland Corridor for anything other than pedestrian and bicycle use. Please listen to your constituents!
EAST KING COUNTY	Please, do not put any High Capacity Transit on the Cross Kirkland Corridor (CKC) Trail. Consequently, remove the environmental study between Bellevue and Bothell via the CKC Trail, and remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride. If all of these are not removed, I will not vote in favor of ST3 in November.
EAST KING COUNTY	<p>Do not put any High Capacity Transit on the CKC Trail</p> <p>Remove the environmental study between Bellevue and Bothell via the CKC Trail</p> <p>Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</p> <p>If all of these are not removed, I will actively work to defeat ST3 in November</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	Eliminate plans for "rapid transit" buses (in quotes because buses will never be rapid). Buses will never be a well received commuting option, look at the number of people who take buses for commutes of 30 or more minutes today anywhere in the US. Trains are the only way to go, look at the rest of the world: first world nations invest in trains, third world nations use buses. Trains are more reliable, smoother ride (no way I could work on a morning commute on the bus with how bumpy they are), and don't impinge on existing roadways. The social stigma of taking a bus to a white collar job will never be overcome (last time I rode a bus in Seattle I thought I was in a homeless shelter). Adding dedicated bus lanes takes away from the ability to widen existing roadways in the future (an absolute necessity, no other cities in the US would refer to 2 lane roads as interstates, 3 open, dedicated lanes are required for I-405 and I-5). Fix the existing choke points on roads before cramming in buses. Seattle is becoming a major city, stop thinking like small city planners.
EAST KING COUNTY	Please do not use the Cross Kirkland Corridor for high capacity transit.
EAST KING COUNTY	Do not put light rail or buses on the CKC. Take off the environmental study between Bellevue & Bothell via the CKC and the mass transit from Bellevue to South Kirkland Park & Ride. If these are not done, then I will continue to work to defeat ST3.
EAST KING COUNTY	I am strongly opposed to the proposal of putting mass transit on the Cross Kirkland Corridor trail, and will continue to fight it. The CKC is a treasure of Kirkland... please do not ruin it.
EAST KING COUNTY	Please drop the proposal to add mass transit to the CKC trail. We love the CKC and transit will ruin it, not to mention the environment around it.
EAST KING COUNTY	<ul style="list-style-type: none"> <li>• Do not put any High Capacity Transit on the CKC Trail</li> <li>• Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>• Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> <li>• If all of these are not removed, I will actively work to defeat ST3 in November</li> </ul>
EAST KING COUNTY	<ul style="list-style-type: none"> <li>• Do not put any High Capacity Transit on the CKC Trail</li> <li>• Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>• Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> <li>• If all of these are not removed, I will actively work to defeat ST3 in November</li> </ul>
EAST KING COUNTY	<p>No buses and trains on the CKC Trail.</p> <p>Don't waste even more money study using the CKC Trail.</p> <p>Don't ruin any of the entire trail when you can use the I-405 corridor.</p> <p>I will actively work to defeat ST3 in November.</p>
EAST KING COUNTY	Insane cost. You all are NUTS.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	Remove the Bellevue to Issaquah light rail project. The demand is for express bus service to downtown Bellevue, similar to express to DT Seattle. Have voter approve each phase not the entire plan at once. If there is a need in 10 years for a line to Bellevue, then put it to the voters then, since it won't be completed for 25 years. Also, preserve the greenway, and discourage more grow beyond Issaquah. If you put a rail station in Issaquah, more people will move farther east, but use Issaquah to park and use light rail. This plan seems to benefit the Rawley family vs the community that prefers living in a less congested area.
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail <ul style="list-style-type: none"> <li>•Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>•Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> <li>•If all of these are not removed, I will actively work to defeat ST3 in November</li> </ul>
EAST KING COUNTY	Public transportation is extremely important to the health of our region. It encourages growth in a responsible manner. However, balancing growth and quality of living is key. We should keep transportation to transportation and not make it a trade off between transportation improvements vs lose of public trails. I would like to request removing the option of putting transit on the Cross Kirkland Corridor trail (CKC trail). We should focus on studying transit options on 405 instead of environmental study on CKC trail between Bellevue and Bothell. The bottom line is that I believe in advancements in our public transportation, but not make it a trade off decision between transportation vs public trails. I would actively oppose and campaign to defeat against ST3 if the CKC trade off remains part of the proposal.
EAST KING COUNTY	Light rail will lower our standard of living. Why are you people so bent on creating ghettos? Most of the buses are empty. This is nothing more than a plan to increase bureaucracy and larger government. STOP THIS OR WE WILL ELECT REPUBLICANS.
EAST KING COUNTY	Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride.
EAST KING COUNTY	Oppose High Capacity Transit on the CKC Trail. Please remove the plan of environmental study between Bellevue and Bothell via the CKC Trail. Remove the proposal of mass transit from Bellevue to South Kirkland P&R.
EAST KING COUNTY	Do not put any high capacity options for the Cross Kirkland Corridor trail on the ST3. Please remove the environmental study for it.  I strongly believe that the best option is I-405. I will oppose the November ST3 plan if any of these are on it. Thank you.
EAST KING COUNTY	We should not use existing bike trails for motorized traffic (e.g. on the Cross Kirkland Trail) Remove the environmental study between Bellevue and Bothell via the CKC Trail

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	I strongly object to light rail on the Cross Kirkland Corridor. This trail is a treasure to our community and should not be ruined by a rail system. It will not help relieve commuter traffic in Kirkland and spoil a gem of wet lands and pristine nature we now enjoy (I would support, however, tunneling under the trail. Seattle is using tunneling technology in most of their light rail projects and it is curious to me why this has not been considered!!??). Therefore, I do not support any activity relating to putting light rail on the CKC, including environmental studies, bringing light rail to the South Kirkland Park & Ride (which would put undue pressure to continue through the CKC) and any monies spent on surface rail. I will not support any plan that put light rail on the surface of CKC but would support tunneling alternatives (such as Seattle did in their Seattle-UW line and the future UW-Northgate line).
EAST KING COUNTY	Do Not put any High Capacity Transit on the CKC Trail If this is not removed, I will not support ST3 in November
EAST KING COUNTY	Please do not include the Cross Kirkland Corridor in any ST3 plans for mass transite. It must remain a walking biking trail for environmental & cost reasons. Mass transit in that area needs to stay along already established transportation infrastructure ie, I405. It would not be economically responsible to use the CKC for mass transite.
EAST KING COUNTY	I am NOT in favor of an enviromental study between Bothel and Bellevue. There are sensitive wetlands that should NOT be disturbed.Do not put High Capacity Transit on the CKC Trail. The proposal of mass transit between South Kirkland to Bellevue sets up the necessity to use this corridor. These projects should be removed in the St3 Final Plan.
EAST KING COUNTY	Strongly opposed to environmental studies or any kind or mass transit on the Cross Kirkland Corridor. Will have to lobby against ST3 if these are included.
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail Remove the environmental study between Bellevue and Bothell via the CKC Trail Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride
EAST KING COUNTY	-Do not put any High Capacity Transit on the Cross Kirkland Corridor Trail!!! -Do not put any High Capacity Transit on the Cross Kirkland Corridor Trail!!! -Do not put any High Capacity Transit on the Cross Kirkland Corridor Trail!!!
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail Remove the environmental study between Bellevue and Bothell via the CKC Trail Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride If all of these are not removed, I will actively work to defeat ST3 in November
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail Remove the environmental study between Bellevue and Bothell via the CKC Trail Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride If all of these are not removed, I will actively work to defeat ST3 in November
EAST KING COUNTY	Transit route through CKC.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	<ul style="list-style-type: none"> <li>• Do not put any High Capacity Transit on the CKC Trail</li> <li>• Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>• Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> <li>• If all of these are not removed, I will actively work to defeat ST3 in November</li> </ul>
EAST KING COUNTY	<p>I really like buses for their flexibility and ability to schedule. With all of the technology we have, we can figure out when we need to run more buses and make it happen, even for a Seahawks or Husky Game commute or Presidential visit or even bad weather. I am against trains and light rail because they are really expensive, never pay for themselves, are a burden to the taxpayers, and do not have any flexibility. They also take away bus lanes and take away jobs. Please remove train and light rail from these plans. Invest more in Buses.</p>
EAST KING COUNTY	<p>No high capacity transit on the trail corridor, get rid of the environmental study between Bellevue and Bothell via the trail corridor, remove the proposal of mass transit from Bellevue to south Kirkland park and ride. I will strongly oppose and fight to defeat ST3 in November as these items would affect the quality of life and the land values in our area!!! We need a "world class trail" as was promised!!!</p>
EAST KING COUNTY	<p>DO NOT put any high capacity transit on the Cross Kirkland Corridor, no buses, no light rail          Remove the environmental study between Bellevue and Bothell via the Cross Kirkland Corridor          Remove the proposal of mass transit from Bellevue to the South Kirkland Park &amp; Ride</p>
EAST KING COUNTY	<p>For the sake of all Kirkland children who safely take this trail to elementary and middle schools, please DO NOT put any High Capacity Transit on the CKC Trail. School bus service has been removed from many neighborhoods because of lack of school funding, and many children take these trails to and from school safely without worrying about busy streets. Putting light rail on this trail would put our kids in danger as this trail winds through parks, wetlands, neighborhoods; and having active tracks in their "backyard" makes it a danger zone. A light rail would take away their freedom and security of being able to walk to and from school, ride their bike or even walk their dog to a friend's house safely.</p> <p>Please remove the environmental study between Bellevue and Bothell via the CKC Trail. Last year I volunteered my hard-labor along the trail to help keep the native plants healthy so the natural habitats prosper. The animals and wildlife that live in the forests and streams along the trail are imperative to our beautiful city.</p> <p>Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride          Please note - If all of these are not removed, I will actively work to defeat ST3 in November</p>
EAST KING COUNTY	<p>The environmental study on the CKC is not necessary and a gross waste of funds.</p>
EAST KING COUNTY	<p>Environmental study on CKC Trail is a waste of money, we know the environmental impact of BRT will destroy native wetlands and forested scenic areas.          KEEP THE BRT on I 405 or close to it.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	Based on actual usage there is WAY to much money to serve a minimal number of residents. You may have missed an opportunity in 1970 but this is a massive waste of money!
EAST KING COUNTY	85th street BRT stop in Kirkland doesn't seem terribly useful. It doesn't have a good walkshed, not much potential for transit oriented development, and not a good alternative compared to Bellevue/Seattle bus routes from the Kirkland Transit Center.  I would much prefer an extension of the Issaquah/Bellevue line to the South Kirkland Park and Ride.
EAST KING COUNTY	I strongly believe we should not be putting any transit on the Cross Kirkland Corridor. I ask to remove the environmental study between Bellevue and Bothell via CKC from the proposal. I will not support ST3 in November if this is not removed.  Similarly to Burke-Gilman or Sammamish River trail, this trail already provides the greenest possible way to get to work (walking or biking), as well as supports active lifestyle of the local community. Tons of local residents have been enjoying using the trail since it opened. Adding side-by-side transit would ruin it - it will ruin the feel of the neighborhood, have numerous safety and environmental issues, and have low ridership. Rail feasibility has already been studied on this trail and arrived at the same conclusions. No one I know in the area would want to use transit on CKC. This will be a huge waste of money. Please keep expanding major roads like 405, where the transit should be, or build a subway. Don't ruin CKC for Kirkland.
EAST KING COUNTY	Each project the city does makes things worse. Stop spending our money and let private industry, the real world solve this.
EAST KING COUNTY	I would like to see the Eastside Rail Corridor (at least the Cross Kirkland Trail) reserved for human powered transportation - walking and bicycles. We have walked this corridor for over 20 years now to get to Totem Lake and Houghton destinations, to walk the dog or just for recreation and value the tranquility even when many folks are out enjoying the trail. Rail or buses would transform this from a relaxed, pleasant experience to yet another busy road.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	<p>You must stop considering using the CKC for mass transit. Please remove the environmental study between Bellevue and Bothell via the CKC Trail and also remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride. If all of these are not removed, I will actively work to defeat ST3 in November.</p> <p>The CKC trail is a critical bridge between Kirkland communities and could be an exemplar for the US if Bellevue and Woodinville were also connected. Instead focus on using this corridor for people with bikes to commute and reduce traffic that way. Similarly, you have express lanes on I405 why not put the light rail in here? You could even also use the CKC for people with bikes to get to the light rail stations. Kirkland could lead the US for healthy commuting options.</p> <p>Also, final feedback. The plan doesn't seem to accommodate for the future of transport. My belief is that self-driving cars + demand-based (Uber / Lyft etc) pricing models will mean congestion should start getting distributed more evenly throughout the day and number of cars will decrease. Interested to know if you have studied that or not. Contact me at jahogg@microsoft.com if you have this information.</p>
EAST KING COUNTY	<p>no high high capacity transit on Kirkland trail no need for environmental study expense for Bellevue to Bothell via Kirkland trail if these are not removed my support drops to 0 for any of the ST3 plan</p>
EAST KING COUNTY	<p>I truly don't understand why there is a proposed light rail going all the way to Everett and Tacoma when there is already the Sounder train system. It already takes upwards of an hour to take the light rail from Columbia City to the U-district. I can't imagine why anyone would commute from Tacoma or Everett in to Seattle by light rail, especially given that there is already the Sounder train. I think that the resources for extending the light rail to Everett and Tacoma would be put to better use by making lines to Ballard and West Seattle. Seattle should grow the light rail system within the city, and leave commuter rail (which is faster) to the exurbs and surrounding cities. Thanks for your hard work!</p>
EAST KING COUNTY	<p>I am STRONGLY OPPOSED to ANY transit whatsoever on the CKC Trail.</p>
EAST KING COUNTY	<p>Living in my neighborhood for over 40 years, I have experienced the RR being so close to my home - I was very pleased to be able to have the 'RAILS to TRAILS' project replace the RR. I will be very disappointed to have any High Capacity Transit on the Trail Corridor. Please do not consider the environmental study between Bellevue and Bothell on our 'Trail Corridor.' Also remove the proposal of mass transit from Bellevue to South Kirkland Park and Ride.</p>
EAST KING COUNTY	<p>Do not put any High Capacity Transit on the CKC Trail Remove the environmental study between Bellevue and Bothell via the CKC Trail Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride If all of these are not removed, I will actively work to defeat ST3 in November</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	too many bus proposals
EAST KING COUNTY	Take the bus improvements, shoulder driving, additional rapid transit etc out of the plan! Put all the money into speeding up the timeline on light rail and rail connections + parking at the light rail stations everywhere!!!!
EAST KING COUNTY	<p>I know we have a huge transit problem in this region that needs to be fixed soon. I am strongly in favor of some sort of cultural paradigm shift from long commutes to people living very close to their jobs so they can walk. While I LOVED my home in Seattle, I moved to the Eastside so that I could be close enough to my job to walk to work. If I can make the sacrifice of giving up a home that I lived in for years and LOVED, just so that I could remove my car from traffic and walk to work instead, well then other people should be able to do this as well. As long as they are able-bodied and don't have some other extenuating circumstances, there's really no reason why people can't shift their lifestyles to accommodate a walking commute.</p> <p>By the way, I walk to and from work 2 miles each day on the Cross Kirkland Corridor which I consider a lovely nature trail. Every day on my walking commute to work I see all kinds of wildlife (deer, quail, eagles, falcons, owls, hummingbirds, snakes, and many species of birds). As you can guess, I am STRONGLY OPPOSED to putting any busses and/or rail on this peaceful nature trail. It should be left for pedestrians and bikes and nature. Walking to and from work on a peaceful nature trail every day improves the quality of one's life and reduces stress, while improving overall health.</p> <p>Please remove the environmental study between Bellevue and Bothell on the CKC Trail. Also, please remove the mass transit proposal from Bellevue to the South Kirkland Park &amp; Ride.</p> <p>As much as I support mass transit improvements in general, if these are not removed from your plan, I will vote against it in November, and will actively work to convince others to do so.</p> <p>Thank you :)</p>
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail. Remove the environmental study between Bellevue and Bothell via the CKC Trail. Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride. If all of these are not removed, I will actively work to defeat ST3 in November.
EAST KING COUNTY	<p>Please do not put any High Capacity Transit on the CKC Trail; Remove the environmental study between Bellevue and Bothell via the CKC Trail.</p> <p>Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride.</p> <p>If all of these are not removed, I will actively work to defeat ST3 in November</p>
EAST KING COUNTY	Bellevue through Kirkland via KCC. This is a trail used for pedestrians not a bus line. It's absurd to take it away. This trail serves as a wonderful avenue to parks around Kirkland that would otherwise take double the time to walk to. Walk on it yourself sometime and see the beauty of the lake and Seattle skyline and Olympic mountain range.
EAST KING COUNTY	Please remove the environmental study and possible BRT on the CKC Trail from ST3.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	<p>Light rail and Sounder service are used at far lower rates than required to make any further spending make sense. If there were a way to get a refund on previous spending, the transit agency should do so and replace all rail solutions with improved bus service along with improved road capacity. Rail, by it's fixed nature, can not easily adapt to changes in neighborhoods, lifestyles, or community preferences. The fixed nature of rail also requires high operating cost commitments. Additionally, the operating costs for rail are much higher than buses, primarily because buses don't have to run and cost much less to acquire than do trains.</p> <p>If you're obsessed with trains, check out Eastside Trains for the latest from Lionel. For a few thousand dollars you can build a huge layout and use the rest of your budget providing flexible and meaningful transportation options.</p>
EAST KING COUNTY	<ul style="list-style-type: none"> <li>- No monies should be spent on the environmental study for the Cross Kirkland Corridor (for future transit possibilities). Any effort to develop the CKC for mass transit use would catastrophically abuse and destroy an increasingly natural environment enjoyed by the citizens of and visitors to Kirkland.</li> <li>- Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride. That corridor can be inexpensively reworked as an extension of the CKC for safe use by pedestrians and cyclists, with the presence of motorized vehicles* (except as required for maintenance). *Or trains</li> </ul>
EAST KING COUNTY	<p>building roads should be the priority building transit is more expensive and serves fewer voters</p>
EAST KING COUNTY	<p>I am strongly opposed to high capacity transit on CKC Trail. Transit fits Kirkland better on 405 and with increased bus service out to the neighborhoods. Please remove the environmental study on the CKC.</p>
EAST KING COUNTY	<p>Get proactive. There will be major development along the corridor from the Kirkland/Woodinville area up to Snohomish. There will be continuing development from Renton northward along the 405 corridor. There is an existing rail corridor and there is the opportunity for more-than-ample parking along this corridor. Building rail stations without sufficient parking assumes we will all be centralized but population growth testifies otherwise. Using the available corridor would provide tremendous savings.</p>
EAST KING COUNTY	<p>I strongly support the bus projects - they are much more economical and versatile. The light rail projects are way too expensive for the number of people they would benefit.</p>
EAST KING COUNTY	<ul style="list-style-type: none"> <li>- Please do not put any High Capacity Transit on the Cross Kirkland Trail. It is a beautiful nature trail used heavily by walkers, bikers and runners. It is a primary reason we moved to Kirkland and love the connection to nature and the environment.</li> <li>- Please remove the environmental study between Bellevue and Bothell via the Cross Kirkland Trail</li> <li>- Please remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride.</li> </ul> <p>If all of these requests are not removed, I will be actively working to defeat ST3 in November</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	No transit on the Kirkland trail. No studies for future transit on the Kirkland trail. I will vote against anything or anyone that supports transit on the Kirkland trail. I love the Kirkland trail for people and exercise and health and community and fresh air.
EAST KING COUNTY	No high capacity transit on Cross Kirkland Corridor. Remove environmental study between Bellevue and Bothell on Cross Kirkland Corridor.
EAST KING COUNTY	Cross Kirkland Corridor environmental study
EAST KING COUNTY	I will oppose any project that includes transit on the cross Kirkland corridor
EAST KING COUNTY	The Cross Kirkland Corridor should be removed from the ST3 plan.
EAST KING COUNTY	use of CKC trail for any transit should be removed.
EAST KING COUNTY	Do not put any transit on the CKC Trail Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride If all of these are not removed, I will actively work to defeat ST3 in November
EAST KING COUNTY	Transit does not belong on the CKC Trail, and the environmental study via the CKC Trail should be removed. The proposal of mass transit from Bellevue to South Kirkland Park & Ride also needs to be removed. If all of these are not removed, I will actively work to defeat ST3 in November.
EAST KING COUNTY	<ul style="list-style-type: none"> <li>•Remove all reference to High Capacity Transit on the Eastside Rail/Trail Corridor - that corridor is a park, it should not be used for transit. There are other options.</li> <li>*Remove the environmental study between Bellevue and Bothell via the Trail Corridor - it is a waste of money, there should not be transit in the rail/trail corridor.</li> <li>•Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> <li>•If all of these are not removed, I will actively work to defeat ST3 in November. We support transit! But not in the wrong places, and not at any cost. If you insist on proposing transit in what should be a public park, a hiking and biking trail, we will reluctantly remobilize again (as we did the last time ST proposed using the rail bed) to defeat the ST3 proposal.</li> </ul>
EAST KING COUNTY	Do not use the Kirkland Corridor for either rail or bus.
EAST KING COUNTY	I do not want High Capacity Transit on the CKC Trail The environmental study is a waste of money. Remove mass transit from Bellevue to South Kirkland park and ride
EAST KING COUNTY	The plan is too big -- tax increases too high! Focus on BRT and parking connections and scale it down.
EAST KING COUNTY	More free parking needed at all park and ride lots, especially on I-90 corridor. If you want people to use the bus and trains, you need to give them some place to park. Only idiots believe people will walk to or get dropped off at the station for their commute....get real!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	<ul style="list-style-type: none"> <li>• Do not put any High Capacity Transit on the Trail Corridor</li> <li>• Remove the environmental study between Bellevue and Bothell via the Trail Corridor</li> <li>• Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> <li>• If all of these are not removed, I will actively work to defeat ST3 in November</li> </ul>
EAST KING COUNTY	I do not think that LRT to Everett should go to Paine Field. Ridership is the most important consideration.
EAST KING COUNTY	Do not consider putting any transit on the CKC trail. Access is very limited and the community trail use is high.
EAST KING COUNTY	I will not support this plan if you include using the cross Kirkland trail system
EAST KING COUNTY	Public transit to Kirkland.
EAST KING COUNTY	Bellevue to Issaquah Light Rail is least important. It also conflicts with the Trail Corridor initiative. Will be against ST3 unless this light rail project is removed.
EAST KING COUNTY	all
EAST KING COUNTY	Remove any feasibility funding for using the Kirkland Cross Corridor. Leave the trail as a walking / bicycle path. Strongly oppose any development of the Kirkland Cross Corridor for public transportation (bus or train).
EAST KING COUNTY	Strongly opposed to any High Capacity Transit on the CKC Trail. Keep the CKC available only for walking and biking. Remove the environmental study between Bellevue and Bothell via the CKC Trail. Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride.
EAST KING COUNTY	Do not put mass transit on the CKC trail. Do not waste money on an environmental study on the trail from Bellevue to Bothell. Do not put mass transit on the trail from Bellevue to South Kirkland park & ride. I will vote "no" if these are included in the ST3 proposal.
EAST KING COUNTY	light rail lines should be removed
EAST KING COUNTY	Drop light rail.
EAST KING COUNTY	The draft plan is far, far, far too expensive with limited benefit or improvements for commuters. Sound Transit is being greedy.
EAST KING COUNTY	520 bridge was just built. Why in the world did they not put light rail across that instead of i90. I doubt it is actually safe to put light rail across i90 on an old bridge that wasn't designed for its use. Unbelievable. Also, after commuting for years and occasionally taking light rail from airport to downtown it is almost always empty. It's ridiculous. Electric busses are the way to go.
EAST KING COUNTY	No high capacity transit on the CKC Trail. Remove environmental study between Bellevue and Bothell by way of the CKC Trail. Remove proposal of mass transit from Bellevue to South Kirkland Park & Ride. Should all of these not be removed, I will actively work to defeat ST3 in November.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail Remove the environmental study between Bellevue and Bothell via the CKC Trail Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride If all of these are not removed, I will actively work to defeat ST3 in November
EAST KING COUNTY	ST appears to be believe it can operate with an unlimited drain on taxpayer's wallets. Sensible, cost-effective improvements are badly needed. Sound Transit simply must find a better way to manage costs to ensure taxpayers are receiving the best return on their investment.
EAST KING COUNTY	Remove light rail options. Increase BRT. Do not put light rail across Lake Washington.
EAST KING COUNTY	The Kirkland Corridor should have ONLY walking and bike trails, no motorized, electrical or mass transit use. It is in an environmentally sensitive area, and does not aid in transportation for the residents of Kirkland.
EAST KING COUNTY	ST will continue to not deliver any services that do not serve Seattle directly.
EAST KING COUNTY	Try fixing the freeways first!
EAST KING COUNTY	Building out rail will limit flexibility as we enter an era where self driving vehicles and ride sharing systems create additional efficiencies
EAST KING COUNTY	Light rail is far too costly for taxpayers. Homeowners are already overburdened with property taxes. Dump the light rail and Sounder extensions. Widen the roads and add more express buses and perhaps a few more park and rides along the freeways. Rail lines create areas of blight, are noisy and provide access to communities by criminals, gangs, drug users and dealers. We don't want light rail on the East Side.
EAST KING COUNTY	Do not put any High Capacity Transit on the Trail Corridor trails are for people using it not high capacity transit that would wreck the trail experience Remove the environmental study between Bellevue and Bothell via the Trail Corridor Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride If all of these are not removed, I will actively work to defeat ST3 in November
EAST KING COUNTY	Stop making huge contracts with out of state contractors. Keep our money and jobs by hiring in-state contractors.
EAST KING COUNTY	A complete waste of taxpayer funds which provides very little improvement in transportation. Construction to eliminate bottlenecks in our highways would be a fra better use of funds. Light rail will never be effective in this area, we don't have the density in population or destinations. This is not New York where a subway does make sense.
EAST KING COUNTY	I'm a strong supporter of light rail. However, the price tag for ST3 is way too much. Moreover, I don't see a compelling reason why Everett and Tacoma need to be connected to Seattle by light rail. Those are not seattle bedroom communities. They are there own cities.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	Please remove from further consideration any use of the Cross Kirkland Corridor for motorized transit. Since use of the CKC would no longer be an option, it is not necessary to spend money for any study regarding the use of the trail. You should also eliminate the option of light rail from Bellevue to South Kirkland Park-n-Ride as it would serve very little purpose if use of the CKC is eliminated. Leaving any of these projects in the final plan would signal to me that Sound Transit is still considering using the CKC and would force me to vote NO to all of ST3. Thank you for your consideration,
EAST KING COUNTY	You are wasting our tax dollars!
EAST KING COUNTY	Because the CKC trail serves many bikers going to the Google site and serves as a recreation site at other times, I do not think transit of any sort should be considered along this trail. And for this reason, no more time and resources should be spent developing plans along this bike/walk/running trail
EAST KING COUNTY	No more buses...  Call Portland and ask them on how they did it...
EAST KING COUNTY	I walk on the CKC Trail several times per week with my family & dog and DO NOT WANT any high capacity transit on the trail, this trail is a gem to the city and will adding mass transit here does not make financial sense when other opportunities cost less per mile. Do not include an environmental study between Bellevue and Bothell on the CKC. I am NOT in favor of mass transit from the South Kirkland P&R to Bellevue. I feel very strongly about these points and will not vote for ST3 if they are included and will urge my friends and co-workers to do the same.
EAST KING COUNTY	I am strongly against a High Capacity Transit on the CKC Trail! Remove the environmental study between Bellevue and Bothel (CKC Trail). Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride. I will actively work to defeat ST3 in November.
EAST KING COUNTY	YES - Bus Rapid Transit on I-405 NO - Environmental Study on Cross Kirkland Corridor, instead do a study of light rail on I-405 NO - Mass Transit from Bellevue Wilburton Station to the South Kirkland Park and Ride NO- High Capacity transit on the Cross Kirkland Corridor Trail
EAST KING COUNTY	I support the removal of proposed mass transit from Bellevue to South Kirkland. I very strongly support the removal of an environmental study along the Kirkland Community Trail. Leave it as is!!! A trail for the community! I strongly support NO transit on the CKC (Kirkland). The "transit" we have in place now is perfect.....pedestrians and bikes. The trail serves a GREAT NUMBER of citizens currently. I vigorously support improvement of Bus Rapid Transit on I-405. We will work diligently to defeat ST3 in November if my community wishes (and my family/friend's wishes) are ignored.
EAST KING COUNTY	Stop rails, add buses.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	I do NOT want this light rail going into MY city's trail. There is wildlife living here. There are people using this trail for it's beauty and tranquility for exercise and to be outside. Get rid of your plans to take this trail away from us in Kirkland. Find a different route, please don't destroy natural or our communities bliss.
EAST KING COUNTY	Please leave the kirkland corridor trail alone, at least we have some zone to bike, run or just walk.
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail <ul style="list-style-type: none"> <li>•Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>•Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> <li>•If all of these are not removed, I will actively work to defeat ST3 in November</li> </ul>
EAST KING COUNTY	NO High Capacity on the CROSS KIRKLAND TRAIL NO environmental study between Bellevue and Bothell on Cross Kirkland Trail Bellevue to South Kirkland P&R, remove mass transit proposal I will actively work to defeat the ST3 proposal in November, UNLESS these proposals are removed
EAST KING COUNTY	1) Do not put high capacity transit on the corridor 2) Remove environmental study between Bellevue and Bothell via the trail 3) Remove the proposal of mass transit from Bellevue to South Kirkland  If the actions above are not removed from the proposal, myself, family, friends and neighbors will actively and aggressively work to defat ST3 this Nov.
EAST KING COUNTY	Absolutely no mass transit in any shape or form on the CKC trail! Therefore no environmental study between Bellevue and Bothell is needed. Remove it from the plan, since it would be a waste of money! I strongly believe in mass transit and will support ST3, but only if these 2 messures I mentioned above are being removed. If not, I will fight ST3.
EAST KING COUNTY	We are opposed to High Capacity Transit on the Cross Kirkland Trail and want the surrounding environmentally sensitive areas to be preserved. I plan to be active in working to defeat ST3
EAST KING COUNTY	I am strong opposed to any High Capacity Transit on the CKC Trail and believe the environmental study between Bellevue and Bothell via the CKC Trail should be removed along with the proposal for mass transit from Bellevue to South Kirkland Park & Ride. While I strongly believe and support extension of light rail I do not and will not support anything that would removed pedestrian/bike corridors in the Puget Sound area.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	I do not support support high capacity transit on the cKC trail and will actively fight it in November. The trail is used Daily by pedestrians and bikers for commutes to schools, work, and every day life destinations (grocers, retailers, neighbors, etc.). In areas where parking is now limited due to the increased density caused by the new construction of homes in the Kirkland area you will find an increase of foot/bike traffic on the CKC trail. The opportunity to "walk" to where you need to go safely - without the extra chaos of any kind of transit is very, very valuable. Most importantly, it is the number of kids who use that path to the neighborhood schools that is important. With the lack of an appropriate school bus system to take kids (including elementary schools ) to neighborhood schools they need a safe and efficient route to walk/bike. By adding any kind of high capacity to the trail you are inviting dangerous situations to the kids walking to school. In addition, the CKC trail backs up to Peter Kirk elementary school .The safety measures to ensure all kids' and parents as they arrive to school (so I am now including those people who don't walk to school via CKC) will also be exposed to dangerous situations. It would take only one accident and the public will demand a reroute; which will result in a loss of \$, time, support and God forbid a life. In fact, the trail cuts right through the middle of neighborhoods. Realistically, the safety concern could include anyone whose final destination is just in the neighborhood. I do not support high capacity transit in the CKC.
EAST KING COUNTY	I am against any form of transit that will disturb the CKC trail. If any proposal continues to threaten the trail I will actively oppose the project.
EAST KING COUNTY	Please don't consider Cross Kirkland Corridor as a good place to run mass transit. It's a quiet walking and biking trail, and it feels just right this way. It would still be very inconvenient for people from the other side of 405 to get there, as opposed to a transit on 405
EAST KING COUNTY	<p>-- do not put any High Capacity Transit on the CKC Trail</p> <p>--Remove the environmental study between Bellevue and Bothell via the CKC Trail</p> <p>--Remove the proposal of mass transit from Bellevue to South Kirkland Park and Ride</p> <p>--If all of these are not removed, I will actively work to defeat ST3 in November</p>
EAST KING COUNTY	no bus or light rail on the cross kirkland corridor please! Leave it as a pedestrian and bike trail. put more transit on 405 instead. thanks
EAST KING COUNTY	<p>I commute by bicycle. The CKC is an incredibly valuable community resource for commuters, and for general purpose use - I commute via bicycle on it daily. THERE MUST NOT BE TRANSIT PUT ON THE CKC!!! With no high-capacity transit on the CKC, there is no need for the proposed environmental study between Bellevue and Bothell - that should be eliminated as well. Mass transit to the South Kirkland Park &amp; Ride is also unnecessary.</p> <p>If these are NOT removed, I will fight ST3 politically, with my last breath and my last dollar. As a woman, CKC has made it safe for me to bicycle to work, and I won't stand by and see that destroyed by inappropriate deployment of transit that can more appropriately and more easily be run down 405 via bus rapid transit.</p>
EAST KING COUNTY	Not a fan of buses, needs to be dedicated rail.
EAST KING COUNTY	ANY use of cross Kirkland corridor by motorized transport!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	No high capacity transit on the Cross Kirkland Corridor No environmental surgery for high capacity transit between Bellevue and Bothell via the Cross Kirkland Corridor Remove the proposal of mass transit between Bellevue and South Kirkland Park & Ride If all of the above projects aren't removed, I will actively work to defeat ST3 on the ballot this fall even though I overall support high capacity transit
EAST KING COUNTY	I plan to actively work to defeat ST3 if there is any proposal to put high capacity transit on the CKC Trail. I am also opposed to an environmental study between Bellevue and Bothell via the CKC Trail or any proposal for mass transit from Bellevue to the South Kirkland Park & Ride that contemplates use of or impairment of the CKC Trail.
EAST KING COUNTY	Keep our CKC trail free of any High Capacity Transit System. I am not supportive of any environmental study being done between Bothell and Bellevue by way of the CKC trail. The Mass transit proposal from Bellevue to South Kirkland Park and ride needs to be removed, or I will do all I can to defeat ST3 in November.
EAST KING COUNTY	Light rail is what we need now. Buses only add congestion
EAST KING COUNTY	it seems that bus service could provide a cheaper access from Tacoma to Tacoma CC. That seems like an expensive addition that I'm not sure is necessary.
EAST KING COUNTY	Cost is way too high for so little return. Nobody outside of Seattle gets any value. Our HH will pay over \$30k for this thing before the station opens in Issaquah. Even then, it is most certain to have inadequate parking as all of the other suburban stations do. I'm voting no. Pass it as a straight sales tax and I'll consider it. I'm tired of the homeowners of WA getting gouged for everything.
EAST KING COUNTY	Please: Do not put any High Capacity Transit on the CKC Trail! This makes no sense at all. The trail is beautiful and amazing as is! Remove the environmental study between Bellevue and Bothell via the CKC Trail Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride If all of these are not removed, I will actively work to defeat ST3 in November
EAST KING COUNTY	I am asking you to please NOT put any High Capacity Transit on the CKC Trail. There are so few local places where we and our young children can walk and bike safely away from traffic. I encourage you to NOT waste valuable resources to do an environmental study of the trail; there are already posted signs along the trail of fragile environments. Instead I ask you to do a study of light rail on I-405. That's where the traffic fits best. Thank you for your attention to these matters.
EAST KING COUNTY	CKC is a regional asset that should be preserved as a trail. I will not support ST3 if it includes an environmental study of potential transit on the trail. Instead please study light rail on I-405.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail Remove the environmental study between Bellevue and Bothell via the CKC Trail Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride If all of these are not removed, I will actively work to defeat ST3 in November
EAST KING COUNTY	Keep the mass transit out of CKC. The CKC is an unique opportunity to change the quality of life in Kirkland and beyond. In any given day there are so many people on the trail, walking, biking, keeping active and healthy. Mass transit should be kept on I405.
EAST KING COUNTY	Three points: 1. Sound Transit has squandered tax payer money and cannot be trusted. This is another example: a slanted and poorly designed "survey" enacted, again at our expense, to prop up these misguided plans. 2. Question: IS ANYONE observing the rapid development of self-driving cars? No, not at ST. 3. Any further light-rail development MUST BE focused outside the City of Seattle: IN Pierce, Snohomish, East/South King County. Spread this thing around the region -- we are done throwing contracts, dollars, and effort into one municipality.
EAST KING COUNTY	1. remove environmental study between Bellevue and bothell via trail corridor 2. do no put any high capacity transit on the trail corridor 3. remove the proposal of mass transit from Bellevue at Wilberton Station to South Kirkland Park and Ride 4. I support Light Rail on I 405
EAST KING COUNTY	Rapid Bus is quicker to realize, cheaper to implement/maintain/upgrade, and more flexilble to run on regular lanes as well as dedicated lanes. Light rail is too expensive and plagued with delays.
EAST KING COUNTY	Remove the environmental study for the Cross Kirkland Corridor. Remove light rail from Bellevue to the South Kirkland park and ride. If these are not removed I will actively campaign against the entire ST3.
EAST KING COUNTY	Remove the environmental study for the CKC trail. Remove all transit options from the Cross Kirkland Connection trail. Put the bus on 405!
EAST KING COUNTY	I believe that the CKC Trail should not have any bus or light rail service and the trail should not be despoiled. I do not believe we need mass transit from Bellevue to the Park and Ride in South Kirkland and advocate no environmental studies as well for transit between Bellevue and Bothell. The trail is a resource and transit can traverse through other arteries. I will work vigorously to defeat ST3 in the event that these items are not removed from the final plan.
EAST KING COUNTY	Remove the environmental study between Bellevue and Bothell via the CKC trail. Do not put any high capacity transit on the CKC trail. Remove the proposal of mass transit from Bellevue to South Kirkland Park and Ride. I will actively work to defeat ST3 in November if all of the above are not removed.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	<p>Do not put any High Capacity Transit on the CKC Trail</p> <p>Remove the environmental study between Bellevue and Bothell via the CKC Trail</p> <p>Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</p> <p>If all of these are not removed, I will actively work to defeat ST3 in November</p>
EAST KING COUNTY	No high capacity traffic on the CKC trail
EAST KING COUNTY	To make it affordable. Major traffic and population is along the Seattle - West side corridor and should be considered 1st.
EAST KING COUNTY	<p>Do not put any High Capacity Transit on the CKC Trail</p> <p>Remove the environmental study between Bellevue and Bothell via the CKC Trail</p> <p>Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</p> <p>If all of these are not removed, I will actively work to defeat ST3 in November</p>
EAST KING COUNTY	A high capacity transit on CKC trail is a very bad idea and should not be put there. The environmental study for viability between Bellevue and Bothell should therefore not be conducted. Mass transit proposal between Bellevue and South Kirkland Park & Ride should also be removed.
EAST KING COUNTY	<p>- Please Do not put any High Capacity Transit on the Lake Washington Trail Corridor Renton to Bellevue. The many many many reasons to preserve this corridor for trail and trail related use have been enumerated many times - see PSE Energize Eastside documentation for reference, as most if not all of the issues apply with regard to high capacity transit on the trail corridor, with further issues of the transit itself.</p> <p>- Remove the environmental study between Bellevue and Bothell via the Trail Corridor, as the trail corridor should not be considered for high capacity transit, per the above.</p> <p>- Without removal of the above, I will actively work with my community to defeat ST3 in November. This is not my desire as there are elements I believe are critically important to the region. But the negative impacts of high capacity transit on the trail corridor in this area are just to great.</p>
EAST KING COUNTY	<p>(1) Do not propose or put any High Capacity Transit on the Kirkland CKC Trail</p> <p>(2) Remove the environmental study between Bellevue and Bothell via the CKC Trail</p> <p>(3) Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</p> <p>If all of the above are not addressed, I will actively work to defeat ST3.</p>
EAST KING COUNTY	<p>Do not put any High Capacity Transit on the CKC Trail</p> <ul style="list-style-type: none"> <li>•Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>•Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> <li>•If all of these are not removed, I will actively work to defeat ST3 in November</li> </ul>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	Please do not turn the Kirkland trail into a Sound Transit bus route. Use 405. It will completely ruin a great pedestrian space.
EAST KING COUNTY	I am a Kirkland resident asking that we preserve the CKC. I use the trail daily and see the positive impact it has made on my community. Families, dogs and teenagers have a place to be away from cars and away from the busy blvd. I see little kids on bikes and families walking together after dinner. I support transit incentives and deepening our bus systems. Please remove the proposal to construct high speed light rail and mass transit on CKC. Please remove any environmental study on the trail. I will continue to push against this agenda if the proposals withstand. This trail has become so valuable to my family and my community that I am committed to saving it.
EAST KING COUNTY	keep the CKC nonmotorized like the Burke gilman and Sammamish trails .... if you do not remove the proposed environmental study btwn Bellevue and Bothell and the mass transit connection Bellevue and South kirkland I will campaign actively against the funding of ST3....
EAST KING COUNTY	I don't support transit development of the cross-Kirkland corridor of any sort, even including the proposed environmental study. If that's part of the final plan, I'm very likely to vote against it. There's no need to do any sort of study unless you're planning on developing it. Particularly given the cost and (very long) timelines involved in ST3, I'd assume that you'd be looking for things to cut to speed it up.
EAST KING COUNTY	<ul style="list-style-type: none"> <li>•Do not put any High Capacity Transit on the CKC Trail</li> <li>•Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>•Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> <li>•If all of these are not removed, I will actively work to defeat ST3 in November</li> </ul>
EAST KING COUNTY	DuPont recently had layoffs, the major company there is moving.
EAST KING COUNTY	I strongly oppose High Capacity Transit on the CKC Trail and the environmental study between Bellevue and Bothell via the CKC Trail I'm against the proposal of mass transit from Bellevue to South Kirkland Park & Ride
EAST KING COUNTY	Fix the hov problem first before you goof up other transit plans

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	<p>This proposal should be removed from consideration. My objections are to the entity that is to execute these projects and the attendant costs associated with them. Time and again there have been promises of project X costing budget amount Y and with almost perfect execution the DOT achieves severe cost overruns above and beyond amount Y. The already astronomical costs associated with ST3 will undoubtedly be overrun as well with the DOT leading the way. The lesson learned here is that anything the DOT undertakes to do with light rail needs to be stopped to protect the taxpayers. Additionally the citizens of the surrounding communities to Seattle are very much opposed to Seattle-centric public transportation projects and instead desire car traffic alleviation efforts as opposed to ST3 which when penciled out will come to a cost of \$13K+/inch and not be completed for some 25 years. Certainly there are more cost effective ways to allow traffic to flow. Light rail proposals are not it. Try widening freeways and creating reversible traffic (dual direction) lanes to accommodate commuters as suggestions and steer away from costly dream projects which give the taxpayers very very little return on their investment. Please exercise some common sense devoid of political objectives in planning. You are rubbing us taxpayers raw with your shenanigans which have been in the works for decades now.</p>
EAST KING COUNTY	<p>Do not put high capacity transit on the CKC trail. Please remove the environmental study between Bellevue and Bothell via the CKC trail, and remove the proposal of mass transit from Bellevue to South Kirkland Park and Ride. This is a trail myself and my family use daily for nature walks, community engagement, and physical exercise. It runs close to and near residential neighborhoods and homes, this is NOT a place for high capacity transit without completely destroying treasured neighborhoods and community. There are better, and more affordable options to create transit opportunities that could benefit the Kirkland community as a whole. If all of these outlined things are not removed, I will actively work to defeat ST3 in November.</p>
EAST KING COUNTY	<p>Plans for transit on Cross Kirkland Trail (both high capacity plan and environmental study for using it between Bellevue and So Kirkland park and ride).</p>
EAST KING COUNTY	<p>Please remove the sound transit environmental study on CKC in Kirkland. the environmental study is a waste of funding and will go nowhere. class 1 wetland north of 85th.</p>
EAST KING COUNTY	<p>Light Rail (or Heavy Rail) is the most expensive and least used of all transportation options. The Sounder from Everett is one of the biggest money losers in the US I believe. America is Freedom and Freedom is driving your own car! Rail is Government's way to control people and decrease freedom. I have already moved out of the People's Republic of Seattle and am getting ready to move out of the State of Washington soon. No matter how you disguise it, the City and County Government dispise private vehicles or they would not be spending Billions of dollars on the most expensive transportation mode per people mile that exists! Silly Liberals will always attempt to control the freedom of other people! What a bunch of sheep!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	<p>Do not put any High Capacity Transit on the CKC Trail</p> <ul style="list-style-type: none"> <li>•Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>•Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> <li>•If all of these are not removed, I will actively work to defeat ST3 in November</li> </ul>
EAST KING COUNTY	Remove Environmental study and rail from south Kirkland
EAST KING COUNTY	<p>Any projects related to putting High Capacity Transit on the CKC Trail, including:</p> <ul style="list-style-type: none"> <li>•the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>•any proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> </ul> <p>If projects related to putting transit on the CKC Trail remain a part of ST3, my strong support for ST3 will change to weak or no support, or even to opposition.</p>
EAST KING COUNTY	<p>BRT(or any transit for that matter) on the CKC is a non-starter. This trail is much loved and needed by the residents of the east side and serves their health and lifestyle needs. It can be a pedestrian and cyclist feeder for your new station on 85th, when BRT runs on 405 in the new HOV lanes. Do not waste time or expense doing an environmental impact study of this, as it will just engender more opposition and draw this entire process out when its not necessary.</p> <p>I will actively work to oppose ST3 if any transit on the CKC is part of the draft plan.</p> <p>Major trunks need to be fast tracked - this 25 year event horizon exceeds the grasp of most intellectually/temporally. Light rail to Bellevue, West Seattle, Ballard and Tacoma should all be completed within the next seven years. In the last decade, we've watched a well managed transportation infrastructure start to sag and begin to fray at the edges. Major relief at these choke points needs to be provided in the near term.</p> <p>More attention needs to be paid to cyclists and pedestrians - more facilities for them at every level should be supported to improve green(er) modes of transport and in an effort to reduce the number of vehicles on the roads.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	<p>The CKC trail is such a treat for those of us living in the area. It provides a place where one can safely run, walk, bike, etc. without the fear of, but not limited to, road rage and gagging on exhaust fumes (for the most part). It is a scenic trail that immerses the users in the beautiful nature that we all know and love about the PNW. To put any high capacity transit on this trail would be a huge loss to the community. Please don't take away our little slice of heaven!</p> <p>We also ask that the environmental study between Bellevue and Bothell be discontinued. If we're not going to add high capacity transit, what's the point?</p> <p>Additionally, we do not feel traffic is bad enough to warrant mass-transit between Bellevue and South Kirkland P&amp;R. Extending it further north, yes, and along 405, but let's look at the bigger picture.</p> <p>We feel passionately about saving our trail and if these are not removed we will do whatever we can (and we have access to a broad &amp; captive audience every day) to defeat this in November.</p>
EAST KING COUNTY	<p>I am appalled that the City of Kirkland has spent millions of dollars on creating an incredibly beautiful nature/walking/jogging/biking etc. trail on the old train line and just a couple of years later decide to destroy it.....and the faith of the community in their elected leaders!! What a disgrace...an absolute waste of hard earned tax dollars!! This magnificent trail has become critical to my health and well being after many difficult surgeries and I am devastated that this could even be considered....shame on you City of Kirkland!!</p>
EAST KING COUNTY	<p>Please leave the CKC Trail as it is - do not do further environmental studies on it and leave it as a pedestrian/bike pathway.</p>
EAST KING COUNTY	<p>Please keep our trail. Do not put any kind of transit on this!</p>
EAST KING COUNTY	<p>Leave Kirkland Trail out of any Sound Transit plans          No traffic on Kirkland Trail (no buses, no light rail, no other vehicles)          No environmental study on Kirkland Trail          If these are not removed from the proposal, I will be voting against any further ST3 plans</p>
EAST KING COUNTY	<p>Do not put any High Capacity Transit on the CKC Trail</p>
EAST KING COUNTY	<p>The benefit for the cost is not there. Sound Transit has proven itself to be untrustworthy with its budgets and timelines. There is absolutely no reason to believe the budget proposed can be met. The ridership numbers ST provided do not make a difference in the auto traffic. The operation costs are too high to be self sufficient thus the tax payers who do not use ST will have to continue to subsidize the program. This is a very unattractive proposal and I am not interested in paying for it.</p>
EAST KING COUNTY	<p>There is no compelling reason to destroy the CKC Trail with high capacity transit. Please remove the environmental study between Bellevue and Bothell via the CKC Trail. Also, please remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	CKC trail should NOT be considered at all for any future rail connection. CKC trail could be considered for additional bike and/or pedestrian improvements for access to south Houghton park n ride to reduce car traffic and parking saturation and increase use in bus commuting.
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail Remove the environmental study between Bellevue and Bothell via the CKC Trail Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride If all of these are not removed, I will actively work to defeat ST3 in November
EAST KING COUNTY	Remove the Cross Kirkland Corridor "Environmental Study." I am strongly opposed to any transit on the Cross Kirkland Corridor, and any measure (including the environmental study) that supports putting any transit on the Cross Kirkland Corridor will turn me from strongly supporting ST3 to a loud "NO!" vote on ST3. The Kirkland City Council has no credibility on ST3 and no explanation for why BRT on I-405 is not fully sufficient for Kirkland. The Cross Kirkland Corridor is very close to I-405 at key transit points (e.g., Totem Lake, 85th Street, South Kirkland Park & Ride, etc.), so there is no advantage to transit on the Cross Kirkland Corridor as compared to I-405.
EAST KING COUNTY	I am extremely supportive of this measure and of bus rapid transit on I-405. However, if transit is proposed for the Cross Kirkland Corridor, I will strongly oppose ST3.
EAST KING COUNTY	No transit on the CKC Remove environmental study between Bellevue and Bothell via the CKC Remove the proposal of mass transit from Bellevue to South Kirkland Park and Ride I strongly oppose any mass transit on the CKC and will actively work to defeat ST3 in November.
EAST KING COUNTY	No rapid transit, bus, rail or otherwise on the kirkland cross corridor trail.
EAST KING COUNTY	Any development on the CKC is a waste of time and effort. This is not a viable high-traffic commute path. Remove the mass transit proposal from Bellevue to South Kirkland Park and Ride - too many other priorities. No need for an environmental study on the CKC between Bellevue and Bothell - again, this is a waste of time and money. This is not a viable high-traffic commute pathway, especially since 405 is right there! I will consider it a huge waste of time and money if these are kept on the project list, and would consider it a reason to not support ST3 in November.
EAST KING COUNTY	Plan is too costly and takes too long. I will support a smaller and faster package

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	I live in the Houghton area of Kirkland, very close by to the current bike/pedestrian corridor that was only just put in last year. I strongly oppose putting any kind of transit on the CKC trail as it would disturb the peace of the neighborhood I live in; would be a complete waste of investment that was put into the CKC trail, that my family very much enjoys and uses at least 2-3 times a week; would bring in strangers/commuters into my family friendly neighborhood, and would take away from the general vibe and reputation of Houghton and Downtown Kirkland as a healthy community. I also strongly oppose the environmental study that is proposed between Bellevue and Bothell via the CKC Trail as I believe it would not purport my already stated stance. Likewise, please consider removing the proposal of mass transit from Bellevue to South Kirkland Park & Ride. Unfortunately, if these are not removed, when they are finally proposed on a ballot, I will have to oppose the ST3 plan in November.
EAST KING COUNTY	Don't wait to implement light rail...do it first!
EAST KING COUNTY	The proposed plan is way too expensive. Buses and more lanes on existing roads are much more practical. When 60% of roads money is wasted on transit and only 40 cents on every transit tax dollar is spent on roads, it is no wonder that traffic is a mess.
EAST KING COUNTY	Long term commuter plans should be prioritized in both cost planning and schedule. Rapid transit options (rail) should be pushed and implemented as they will make bus routes obsolescent. Other major cities (NYC, DC) have a robust metro/subway system that services many areas without over reliance on bus routes. Ease of use and robustness of the system will encourage commuting where bus routes only serve as a band-aid. The drawn out timeline and high costs will eventually lead to tax-payer dissatisfaction due to perceived lack of progress and roadway construction delays (for bus routes).
EAST KING COUNTY	Please, please, PLEASE REMOVE the proposal of mass transit from Bellevue to South Kirkland park&pride. I don't understand how yo can put mass transit...OR ANY TRANSIT....next to what WA has already marked with signage for environmentally sensitive land!? IF ALL of these are NOT removed I will ACTIVELY work to defeat st3 in November!
EAST KING COUNTY	Keep all transit off of the Cross Kirkland Corridor Trail! And don't do the environmental study of the trail, waste of money.
EAST KING COUNTY	The Ballard/West Seattle light rail needs to be removed. they already voted this mass transit option down. If your focus will remain Seattle centric then only tax Seattle.
EAST KING COUNTY	The Environmental study should be removed along I-405 from Bothell to Bellevue. Buses should be running along I405 as part of this plan and thus exploring an additional route would be a waste of tax payer's money. Furthermore, this route is a option for multiple reasons: safety (runs through residential areas), access and noise pollution (is not a main thoroughfare like I-405), environmental (wetlands area), culture (residential neighborhoods with personality, running thoroughfare right through the middle detracts), money (cost/rider along this route is astronomical compared to along I-405)
EAST KING COUNTY	not interested in being taxed for something I will never use. I will be dead before any of this will be completed. I think it is a waste of tax payer money

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	Light rail is inefficient looking at the project cost vs. number of people that benefit. Although living densities have improved in a few areas of Puget Sound over the last decade, most people live in low-density areas and work in low-density areas. This is not at all conducive to efficient transportation by rail or bus. The best solution is expanding highways with intelligent systems and smart cars/trucks.
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail Remove the environmental study between Bellevue and Bothell via the CKC Trail Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride If all of these are not removed, I will actively work to defeat ST3 in November
EAST KING COUNTY	As a resident of Kirkland I would like to see the environmental impact study taken off of the project. I strongly urge Sound Transit to designate the Cross Kirkland Corridor a pedestrian and bike transit only. As a region we have the ability to link several communities with a safe family focused natural trail. Not only does it improve the health of the towns it passes through it can be a strong draw to prospective tourists who can ride bikes in Seattle wine country of Woodinville. We should be focusing our resources to building transit systems on the I 405 route not destroying neighborhoods and erasing the last few patches of nature left around Lake Washington. Thank you for your time and work towards transit solutions.
EAST KING COUNTY	The Cross Kirkland Corridor is the best. Do not change anything to existing trail used by thousands of pedestrians and bicyclists. Transit on the trail would endanger people, the environment, and rob everyone of a greenspace to enjoy for generations. I vehemently oppose the inclusion of this in your plan.
EAST KING COUNTY	stop the light rail expansion and focus on improving bus services. Rapid and bus only lanes.
EAST KING COUNTY	At a cost of nearly \$300 million per mile constructed, light rail is not an efficient use of limited taxpayer resources. Additional bus service is needed to reach more commuters within the Sound Transit taxing district. Additional bus service could be implemented sooner and at a much lower cost. Plus bus routes can change with commute patterns whereas light rail cannot. The proposed taxes to pay for ST3 will greatly add the cost of living in this region. This will greatly impact retired neighbors and lower income families living in my neighborhood. How can ST ask for more money when ST has yet to complete the all projects from ST1 and ST2 and those that have been completed were done so well after the timeframes promised.
EAST KING COUNTY	I am a strong supporter of making mass transit more prevalent. However, I am 100% opposed to any development on the old dinner-train line that runs from Renton to Snohomish. This should be regarded and valued as a precious recreational asset. Putting any type of transit on this will destroy it's recreational value (who would enjoy a walk or ride alongside exhaust-emitting buses). It will also make neighborhoods more dangerous. Sophisticated, long range transit planning must preserve these spaces. Once they are developed for transit, they are gone. I believe we should keep transit where it already is and keep the pollution, noise and unsightliness close to existing routes.
EAST KING COUNTY	Remove them all. Stop wasting Taxpayer Money on this garbage. Let the people who use mass transit pay for it.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	<p>I think the money for the expansion of light rail to Redmond downtown and building stations at Graham Street and Boeing Access Road should be used for more (and better) transit options for South and Southeast King County residents - Renton, Kent, Auburn.</p> <p>With I-405 south of Bellevue is congested , wouldn't it be better to address the needs here before the above projects? I would also put this above the project to extend light rails to Issaquah. It took me 20 - 30 minutes to just get from Renton (at exit 6 on 405) to the Eastgate P&amp;R (to go to downtown Seattle) ... and I think there's quite a bit of people like me. Please consider better options for residents in South and Southeast King County.</p>
EAST KING COUNTY	Remove all light rail, increases buses!
EAST KING COUNTY	<p>I think there should be a much lower priority on expanding Sounder service to far reaching areas like Everett and Tacoma. We need to work on getting people out of cars who live in Seattle and the immediate suburbs (including the Eastside), not encourage people to buy homes far away from their workplaces and commute long distances. Also for light rail to work in the suburbs, you need sort, frequent, loop feeder bus routes in each neighborhood that are coordinated with train departures. Otherwise you have most people getting in cars to drive to park and rides.</p>
EAST KING COUNTY	<p>I strongly oppose BRT on 405 as it's not much better than existing Express Bus Service and costs hundreds of millions of dollars. The NE 85th station is in an unsafe location in the middle of a interchange and is inaccessible with low ridership and massive cost which concerns me greatly (I currently ride from Totem Lake). \$300M there is incredibly wasteful could be much better spent elsewhere in Kirkland on things such as better Express bus service.</p> <p>If Sound Transit is not going to build link on the Cross Kirkland Corridor as part of ST3 I would rather see a focus on developing transit centers and ridership in those spots where light rail stations might someday be built in neighborhoods not the freeway (e.g. Totem Lake, Downtown Kirkland).</p> <p>405 BRT would not reduce already bad local traffic on the streets surrounding my home and would make it worse as more people drive to park and rides by the freeway, fundamentally it will not improve my commute or quality of life. If the I405 BRT plan is significantly modified in some way I may vote no on ST3 despite my belief that other projects like Ballard and West Seattle are hugely important.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	<p>You need to <i>*reduce the total cost of this plan*</i>. You need to focus on improving service to places with a high population density, since that's where the ridership is! All the light rail improvements in Seattle are great. But it makes no sense at all to be spending billions on light rail lines to Issaquah and Tacoma.</p> <p>It's also hard to believe that you would ask people to take a survey like this <i>*without giving any information about project costs*</i>. How can you expect people to prioritize A vs B without knowing how much A and B cost? Similarly, how can you expect people to prioritize A vs B without knowing what the estimated ridership is? Not that Sound Transit has a great record of estimating ridership, but it would be better than nothing.</p> <p>Please release a summary that gives a breakdown of costs and ridership <i>*by project*</i>. Then people will be able to make an informed decision. I'm certainly not going to vote to give you \$50 billion without having any idea of how you're going to spend it.</p>
EAST KING COUNTY	<p>Light rail is not efficient enough. It needs to be able to transport roughly the same number of people (per minute per lane per dollar of support and maintenance) as roads supply. Buses are a much better investment and they have much better reach.</p> <p>It might also help to encourage a paid van system which operates like uber.</p>
EAST KING COUNTY	<p>Stay out of the Kirkland pathway/X railway right a way. This is a VERY MUCH PROTECTED AREA FOR PEOPLE TO USE AND ENJOY</p>
EAST KING COUNTY	<p>Any project relating to any kind of high capacity transit on CKC trail should be removed.</p> <p>Likewise, mass transit from Bellevue to the South Kirkland Park and Ride should be removed.</p> <p>These projects negatively impact the beauty, culture and serenity that residents chose Kirkland for their home. If these projects are not removed we will continue to voice our concerns and defeat ST3 in the November election.</p>
EAST KING COUNTY	<p>It is premature to send this proposal to a vote. The plan currently favors Seattle projects, has a high risk second tunnel option in Seattle, requires a trip between Bellevue and Everett to go through Seattle, uses most of the available bonding capacity, and may not lessen existing and future congestion. Time for a pause to demonstrate the effectiveness of the system currently under construction, allow the development of alternative modes of travel and to revise the plan to provide better service distribution.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	This plan ignores Renton. I will not vote for this proposal unless Issaquah light rail is dropped and a light rail system is proposed that would connect Tukwila - Renton- and Bellevue. There are 98,000 residents in Renton and it is a employment hug - the 4th largest city in King County. There are only 15,000 residents in Issaquah. It makes no sense to build light rail to Issaquah. Also, the ST Board needs to add the Mayor of Renton as a member. I will not tolerate taxation without representation. This plan is insulting for residents of Renton. We have paid \$237 million in sales taxes for ST and have received little benefit. Our city sits along I-405; a major transportation corridor that is not handling demand. A light rail system is needed in this corridor to provide better commute times and reduce pollution.
EAST KING COUNTY	Light rail is not cost efficient for the low ridership. Bus Rapid Transit is much more cost efficient, flexible and faster to implement.
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail!! If this is on the ballot, I will vote everything down. Remove the environmental study between Bellevue and Bothell via the CKC Trail Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride If all of these are not removed, I will actively work to defeat ST3 in November  ALSO if you can't improve the timeline, I will not support this. I am not supporting something that takes 17 - 25 years to complete. That is ridiculous to present to voters. Figure out how to do this in a MUCH more timely manner. Our traffic is horrible NOW and you want voters to wait 25 years, unbelievable!
EAST KING COUNTY	Do not think Dupont should be included in the plan.
EAST KING COUNTY	Keep the bus - it's flexible and more easily modifiable as technologies change. The light rail is horribly expensive, fixed, and completely inflexible. Those in outlying areas could be served by buses but are helped very little by rail. With so few rail lines, even after 25 years, I don't know how it would be useful. People need to get from their homes to work without it taking so long; I would rather sit in my car than drive to a park and ride to catch a bus to catch the rail to catch another bus to finally get to my destination. Way too much time lost. The return on investment is terrible and technology will be outdated by the time it is completed.  This doesn't even take into account the possibility of driverless cars...
EAST KING COUNTY	Focus on train transit. Busses get stuck in the same traffic as cars. Trains help take pressure off the roadways so busses and cars can run more smoothly.
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail Remove the environmental study between Bellevue and Bothell via the CKC Trail Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride If all of these are not removed, I will actively work to defeat ST3 in November

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	Please remove consideration of the Cross Kirkland Corridor as a route for buses or light rail. That trail is a wonderful addition to the community that I've been waiting for since I was a child and now enjoy often with my own children. Because the CKC should not be considered as an option for transit expansion, please do not go forward with any EIS on the CKC trail. The trail should be expanded into Bellevue, so please remove any consideration of using the rail corridor to move buses from Bellevue to the South Kirkland P&R. I will actively work to against any transit proposal that puts the CKC at risk.
EAST KING COUNTY	Leave the CKC trail alone. The costs to make it suitable for two way traffic would be ridiculous given other options and the trail serves a valuable function in quality of life for Kirkland. Eliminate the environmental study between Bothell and Bellevue using the CKC trail.
EAST KING COUNTY	I want to keep the cross Kirkland corridor safe and quiet for our community. I don't support the environment study for the corridor or future plans for mass transit on it. If these are in the draft plan I will work against it passing in November.
EAST KING COUNTY	any high capacity transit on the CKC trail; spending on environment study on CKC trail should be used on BRT I 405 or on faster/better completion of Ballard line where the ridership numbers support light rail; mass transit from Bellevue to South Kirkland Park and Ride SHOULD NOT be added to ST3. Smart ST spending is the ONLY way I will support/vote for ST3. I have never voted against mass transit but will ACTIVELY WORK TO DEFEAT ST3 if these projects are included in ST3.
EAST KING COUNTY	Any transit on the CKC trail
EAST KING COUNTY	Please do not destroy the Kirkland Corridor path by putting transit on the path. The path is currently an amazing community resource. Don't ruin it. Thanks.
EAST KING COUNTY	Please do not put any High Capacity Transit on the CKC Trail. Open space is so precious and I do not see how this will benefit anything beyond ruining the trail. I also support the removal of the environmental study between Bellevue and Bothell via the CKC Trail. Again, 405 offers the best solution and this part of the plan offers extremely limited benefit. I would like to see the removal of the proposal of mass transit from Bellevue to South Kirkland Park & Ride. Bellevue has an existing transit center and park and rides. I don't get this. As someone who lives a stones throw from the CKC I will work actively and tirelessly against these proposals and if necessary, I will actively work to defeat ST3 in November. Thank You
EAST KING COUNTY	Remove the light rail connection to Issaquah. It promotes sprawl and destruction of natural areas that we need to conserve. Carpool and driving options in Issaquah are excellent now, but in South Lake Union and from Seattle to Tacoma we need much more transit.
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC trail. Remove the environmental study between Bellevue and Bothell via the CKC trail. Move the proposal of mass transit from Bellevue to South Kirkland Park & Ride OFF the CKC trail and move to 405. If all of these are not removed, I will actively work to defeat ST3 in November.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	The cross Kirkland corridor should remain a walking/biking trail, and I will strongly oppose any action that would allow vehicles on in.
EAST KING COUNTY	There should be NO high-capacity transit on the Cross Kirkland corridor trail. It is a quiet respite within the city enjoyed by young and old, bikers and walkers, locals and visitors - the peaceful opportunity for a nature walk would be destroyed by putting transit on the trail EVEN IF it is safely "separated" from the pedestrians. We would never get this back. The environmental study between Bellevue to Bothell via the Cross Kirk Corridor should be REMOVED. The proposed mass-transit from Bellevue to Kirkland Park & Ride should be REMOVED.
EAST KING COUNTY	I don't want to see buses or rail on the Cross Kirkland Corridor trail. Any public transportation involving the CKC would be harmful and I'd like your environmental study to be stopped. I would like you to remove the proposal for mass transit from Bellevue to South Kirkland. I can't agree to an ST3 proposal that includes transit on the CKC and I will actively work to make sure it doesn't happen.
EAST KING COUNTY	Please consider NOT including ANYTHING that will lead to mass transit on the Cross Kirkland Corridor. There are MANY more important ways to spend the Sound Transit tax dollars (the station at 130th in Seattle for instance) and faster and cheaper ways to provide transportation to the Eastside. Thanks
EAST KING COUNTY	No transit on the Cross Kirkland Corridor. Tax dollars better spent on BRT on I-405.
EAST KING COUNTY	Remove the study to add transit to the cross Kirkland corridor bike and walking trail. I will vote against this measure if this study is included. Transit through a residential suburban neighborhood mixed next to a scenic walking and bike path is a horrible idea.
EAST KING COUNTY	no mass transit from Bellevue to Kirkland "P&R", no environmental study on the cross kirkland corridor, or use those tax dollars for developing transit on I405
EAST KING COUNTY	do not put transit on the CKC trail.
EAST KING COUNTY	Please do not plan any transit lines on the Cross Kirkland Corridor Trail. Please remove the environmental study that includes the Cross Kirkland Corridor Trail. This trail is far more beneficial to the community today than it would be if it were converted to mass transit. If these items are not removed from the ST3 proposal, I will strongly oppose ST3 when it comes to vote in November.  If our Kirkland Trail is preserved, I will be very supportive of ST3. I use Metro every single day (bus line 255) and I am very happy with our mass transit service overall.
EAST KING COUNTY	Please remove High Capacity Transit on the CKC Trail. I will not support any plan that deters the tranquility of the CKC trail. We should use I405 to expand transit options. Please remove environmental study between Bellevue and Bothell via the CKC Trail and mass transit from Bellevue to South Kirkland Park & Ride If all of these are not removed, I will actively work against supporting the ST3 plan in November

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - East King County

EAST KING COUNTY	<p>the plan is generally good with the focus on Bus Rapid transit on 405. there are some potential additions that become 'deal breakers' for me if they are included.</p> <p>there must be no studies or support for transit on the kirkland trail. there must not be light rail to south kirkland park and ride as this is just a precursor for rail on the trail. if these are included , my vote changes from yes to no.</p>
EAST KING COUNTY	<p>Do not put any High Capacity Transit on the CKC Trail. Remove the environmental study between Bellevue and Bothell via the CKC Trail. Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride. If all of these are not removed, I will actively work to defeat ST3 in November</p>
EAST KING COUNTY	<p>Remove light rail from the plan. Focus on Bus Rapid Transit.</p>
EAST KING COUNTY	<p>Please remove the environmental study on light rail/mass transit on the Cross Kirkland Corridor. This pathway cuts through residential neighborhoods and close to elementary schools making safety a concern. The CKC runs along multitudes of areas already designated as environmentally sensitive areas making the corridor in appropriate for use for high capacity transit. Please abandon the idea of using this corridor for high capacity transit. The I405 corridor is the right corridor for high capacity transit, whether light rail or bus rapid transit.</p>
EAST KING COUNTY	<p>No light rail across I-90.</p>
EAST KING COUNTY	<p>I walk on the Cross Kirkland Corridor almost every day and strongly oppose the mass transit being used on it. I encourage the removal of the environmental study on the CKC between the South Kirkland Park and Ride and Bothell as well as the proposal for mass transit on it. If these are not removed I will be voting against ST3 in November.</p>
EAST KING COUNTY	<p>I do not want Transit on the CKC Trail I do not want money spent on environmental study between Bellevue and Bothell via the CKC Trail I do not want mass transit from Bellevue to South Kirkland Park &amp; Ride If all of these are not removed, I will actively work to defeat ST3 in November</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - South King County

Subarea	Additional Feedback - Project(s) should be removed in the ST3 final plan
SOUTH KING COUNTY	Any plans to include expansion of bus services should be ditched. Buses clog up the highways and surface streets just as much as cars do. While I am very limited in ever using Sound Transit buses, my experiences with King County Metro have shown a system where buses are crowded and not reliable. I would also ask that the plan consider the economics of various regions versus population density. By expanding to Ballard and Issaquah, this plan is basically telling me that you're giving transportation options to those who can already afford to be in their cars.
SOUTH KING COUNTY	MY PROPERTY WENT UP GREATLY THIS YEAR BECAUSE OF THE MAYOR'S INITIATIVE THAT WAS PAST LAST YEAR. i OPPOSE ANY ADDITIONAL INCREASE TO MY PROPERTY OR GAS TAX.
SOUTH KING COUNTY	To hell with busses and bikes of any kind and I don't want to encourage more business to move to King county. I do want to make a light rail line that works effectively for those who do live here but to encourage further growth is ecological insanity. If the idea is that business will come here because of a better transit system then screw it - don't build anything. Over population is killing us and will destroy our environment and salmon. As for who gets taxed and pays for it- Tax the rich mega corporations like Boeing, Amazon, and Microsoft who will benefit directly from this system.
SOUTH KING COUNTY	I don't understand how a forward looking group would not consider adding driverless cars on certain routes. The routes to West Seattle and Ballard would be great to research for that. Expanding bus service to those areas and then having routes available for driverless cars would work when driverless cars become relevant. Driverless cars can be implemented in different phases. Yes, driverless cars may not be the answer and using the technology of the 20th century isn't necessarily the future either. I'm leaning towards no on this vote only because the plan doesn't appear to be thinking long term.
SOUTH KING COUNTY	Bus Rapid Transit is at best a stopgap measure and at worst a failure of a program that does more harm than good being included in this plan due to the negative image most commuters have of BRT. Buses on roads are poor transit solutions even when they are separated from some traffic, and they take away from what ST3 should be focused on: a full, robust rail system. Rip off the bus bandaid and focus your attention on rail and you've got a winner here.
SOUTH KING COUNTY	ST3 may be too ambitious
SOUTH KING COUNTY	Please reduce taxes and cancel transit projects. I do not want any of my tax dollars to support any mass transit projects.
SOUTH KING COUNTY	The figure of \$200/year is a fraud. The actual cost per household would be circa a thousand to twelve hundred dollars.
SOUTH KING COUNTY	Bellevue Redmond projects should be eliminated or reduced

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - South King County

SOUTH KING COUNTY	You need to stop steeling from tax payers and get your money from the people who ride your bus ,I'm sick of all you liberals that drive in to work so you can tell all us little people we've got to take the bus ,you can't even protect people on the bus and you drivers are careless, they change multiple lane's at one time and don't care for other cars safety. I find it very funny that you liberals look at us not as people but as a milk cow that you can squeeze every time you need a buck for your pet project's when you won't to help your sanctuary city friends or the growing population of gays and mental midgets that can't figure out how or what they are but what are you going to do when real tax payers start running out because at your rate you will soon be Chicago.
SOUTH KING COUNTY	Light rail is rapidly becoming obsolete. No further expansion of light rail service should be undertaken. Sounder train service may continue to make sense for longer trips, ie Tacoma to DT Seattle and Everett.
SOUTH KING COUNTY	All phases of mass transit should only be paid for by the residents that CHOOSE to use it. I will NEVER use mass transit, I NEVER want to pay for it. I use the road system in this state and country and am willing to pay for that. Taxes should only be used for the programs that benefit all residents, schools, roads, energy infrastructure, NEVER mass transit systems only used by a very small portion of its residents <10%. Stop the forced socialism of our state!
SOUTH KING COUNTY	We do not use this tax draining non sustaining pet project of politics. Why should we have to pay for this service which is a dream child of some biased narrow minded paid politician that insist on using tax payers money that built roads and now used for none taxed bike pedelers. As a senior person that has paid for the roads etc, I am not pleased with all the freebee's that our SOCIALIST bums are asking us to pay for. Our social security IS NOT INCREASING, however cost are escalating.
SOUTH KING COUNTY	Extension north from Tacoma should be much more important than extension south. Sounder should be extended to Olympia.
SOUTH KING COUNTY	You need to deliver on ST2 before more taxes or everyone resign!
SOUTH KING COUNTY	Plan is very ambitious. Afraid that cost to residents will be off-putting.
SOUTH KING COUNTY	I live in Federal Way. I voted to support ST1 & 2, with the "plan" that light rail would be built south to Federal Way. Then we heard there was not enough money so the light rail will only make it to Midway, about 7 miles short. In the meantime ST1 & 2 included surface light rail to Bellevue. But the good people of Bellevue did not like that so somehow enough money was found to put their light rail underground - a much more expensive option. I feel like the people in Federal Way were over promised and under delivered. And funds were redirected to Bellevue to accommodate a change in scope for them. You have lost my trust. For that reason I do not support ST3.
SOUTH KING COUNTY	Our taxes have gone through the roof the last couple of years. Leave the poor tax payers of property taxes, and gas and license fee taxes alone!!!!!!!!!!!!!!!!!!!!!! Charge the fees needed to those users who actually use these services. We are taxed to the breaking point already.
SOUTH KING COUNTY	Light rail has proven to be a huge waste of transit dollars. Priorities should include better bus service, more parking at transit centers, and better security at transit centers and park & rides
SOUTH KING COUNTY	Bus Rapid Transit is not cost effective. Use the money to build light rail quicker

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - South King County

SOUTH KING COUNTY	<p>WA DOT, SDOT, and Sound Transit have a terrible record of cost overruns, and huge delays. While I think its great to have a plan that looks forward 20 years, I think the plan should be passed in phases. With each step complete, re-evaluate before the next. There is too much going on in this plan. The link between TCC and Down Town Tacoma, or Lynwood to Everett, Bellevue to Issaquah seem premature and unnecessary. I also do not like the idea of busses using shoulder, as it could create a safety hazard. There is a reason cars can't do this already. Bus service should be optimized for carrying people from outlying areas to and from rail stations and less focused on being an alternative to the light rail. Parking needs to be expanded at several light rail stations. There is no huge demand for more bike/pedestrian access. Motorists pay the bulk of taxes for the roads. Bike/pedestrian access doesn't encourage us to ditch the car. The number one reason I don't use Link light rail more than I do? Free parking full near closest stations (Tukwilla, Seatac), and too many stops through the Rainier valley.</p>
SOUTH KING COUNTY	<p>You should charge the actual riders who use the system more in fees, than the people that are not serviced by the system or just scrap all of it.</p> <p>My work takes me from south King County to South Pierce County or Kitsap County and you do not have services that get my family or me to the areas we travel to.</p> <p>All this plan does is financial strap Puget Sound tax payers for decades to come on a system that will cost at least double or maybe even triple the projections you are proposing. Classic example of the original election of building light rail of 2.3 Billion and it cost more than 8 Billion. A second one is the U district of being completed in 2005 and a re-set was done in 2006 and was just recently completed for more than double the original cost estimate and time to build.</p>
SOUTH KING COUNTY	<p>Light rail is more expensive to take than the bus thus discriminating against the poor and minorities.</p> <p>Building more light rail does NOT alleviate car traffic jams on the freeways since a majority of those taking light rail used to take the bus.</p> <p>All things built by the government always goes over budget and never gets finished on time.</p> <p>A majority of taxpayers paying for this project will never use the light rail but may on occasion use the bus. Light rail is unnecessary and is often empty most of the day (other than the early morning and late evening for working folks).</p> <p>Use the money to build more roads instead.</p> <p>The lower class and lower middle class needs to stop paying for projects that is used by the middle and upper middle class.</p>
SOUTH KING COUNTY	NO RAIL!!!!
SOUTH KING COUNTY	<p>Why have any rail additions at all? Buses are cheaper, more flexible, more cost effective and quicker to implement. Rail is very limited and very expensive. I would be willing to pay additional taxes to improve the bus system, but not the rail system.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - South King County

SOUTH KING COUNTY	I don't think the cost should be added to property taxes-I support the other two taxes. With the legislature refusing to fund schools this year we have no idea what our property taxes could jump to next year when, hopefully, they will finally address this complex situation.
SOUTH KING COUNTY	To hell with bus service and the Nazi Bike crowd downtown . Build light rail and nothing else and speed it up and build it down I-5 over those asinine Diamond Lanes!. Light rail to Burien where the poor people live !Get the Seattle city council dilettantes to get off their gluteus Maximus and make up their mind about the new basketball and ice hockey stadium and build a light rail stop to that stadium. Parking ! Parking! Parking! If you were really smart you would hire some European and Japanese managers to run this project because they know what they are doing. Prepare for hyperlink and Mag lev incorporation into the light rail system. Thanks! :)
SOUTH KING COUNTY	Unless DuPont area residents begin paying as much into the ST revenues as the 3 central Puget Sound county residents do, that area should not get Sounder service. Also, completing "the spine" for light rail is a promise to voters that should be fulfilled. This means that light rail to Tacoma should come BEFORE light rail to Ballard and to West Seattle. Continue supporting ST Express buses as well. Downtown Federal Way needs more parking now in order for residents to take ST Express. Perhaps you could partner with KCM to build a garage at the 320th P&R.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - Pierce County

Subarea	Additional Feedback - Project(s) should be removed in the ST3 final plan
PIERCE COUNTY	This is not cost effective. At close to \$1 billion per additional mile this money would be better spent on other things than a static rail to address traffic
PIERCE COUNTY	Too much money and time for light rail. Much faster and cheaper to implement better express bus service, such as a bus only lane on I5 from tacoma to seattle. The hov lane there now is usually slower than other lanes. This would significantly reduce the time from tac to sea with minimal cost.
PIERCE COUNTY	I think that allowing buses to use shoulders is a bad idea - there is not room for buses to use shoulders at every point between Tacoma and Everett, which means that they will need to be merging on and off the regular freeway at points that are already bad (otherwise they wouldn't need to be using the shoulder), which is just going to snarl traffic in the carpool lane to accommodate this merging. Much more important to create opportunities off the freeway (e.g., light rail). I didn't see any improvements to Sounder rail service that would prevent so many breakdowns and other problems - just improve stations and capacity (which are also needed) - I don't take the train anymore because it is not reliable. I can't be late for important meetings because the train is having trouble, in which case I am trapped without any other way to get to work faster.
PIERCE COUNTY	If at all possible we meet to shorten the timeline for the Tacoma to seatac light rail project. I'd also support a higher vehicle tax before an increased sales tax.
PIERCE COUNTY	More parking at Sumner, Puyallup stations.  More regular buses between Seattle and Eastside (express).  Express buses from Sumner/Orting/Bonney Lake to Seattle/Bellevue/Redmond
PIERCE COUNTY	Tacoma Community College was talked about by the local Business districts and it was not the highest priority. Connecting Tacoma to the Airport and beyond is far more important and should be moved up in the rotation of projects
PIERCE COUNTY	Putting more buses (regardless of allowing them to drive on the shoulders or making them express) is not going to help our congestion! Get the buses off the roads and build mass transit that doesn't need the street! Seattle is so behind the times!!!
PIERCE COUNTY	Sound Transit is another costly and unnecessary government attempt to limit our personal freedoms. All proposals to expand this costly/mandated system should be stopped immediately. Once Sound Transit can prove that it can support itself without existing and proposed taxes, then expansion proposals could be considered. Eliminating semi-truck traffic on our roads via increased freight rail services would be a far more beneficial effort.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - Pierce County

PIERCE COUNTY	I vote NO to any additional parking garages in downtown Puyallup (especially a 5-story monstrosity), NO to pedestrian bridges of any kind, and NO to use of the site that the Puyallup Eagles do NOT wish to sell. Place new surface/transit station parking outside the downtown core and bus commuters with dedicated shuttles, fast and reliable, to the station. Has anyone considered using the abandoned Lowe's property on South Hill? The abandoned QFC property in Sumner? Or parking commuters in the Puyallup High School lots, and changing school policy to prohibit children from driving to school. Solve several problems at once. :)
PIERCE COUNTY	I'm in Tacoma, and I don't think expanding light rail to TCC is necessary right now. Please get it to Tacoma, though. People don't come down to Tacoma because traffic is so terrible in the Fife area and on. I think I voted for light rail to Tacoma several years ago, but light rail has been available only in the Seattle area, but for a number of years now. We're getting left behind.  Please add more frequent Sounder trains so that families and non-commuters can use them.  I like the idea to use busses on the shoulders.
PIERCE COUNTY	rail is too expensive and inflexible. Remove rail projects and concentrate on busses
PIERCE COUNTY	The ONLY necessary mass transportation system that needs expanding is bus service. Rail is simply an 1800's technology that cannot change with the times. Clean buses make sense. Populations and ridership change and buses are the ONLY mass transit system that make sense for the future. Rail is simply too expensive to implement and maintain. The rail system will never see the proposed projected ridership and thus waste billions of taxpayer dollars with this antiquated system. STOP RAIL NOW! INVEST IN BUSES!
PIERCE COUNTY	I do not support the light rail system as I would never use it, even though I am a resident of the west side of the state. Imposing this tax on those outside of the region is ridiculous. The previous projects were over budget and behind schedule, that does not warrant another funded project.
PIERCE COUNTY	Stop making taxpayers pay for things they don't even use! A few more tax hikes and I'll have to let the bank take my house - YES, I am serious! The people who use the transit system are the ones who should pay for it - not the entire state!
PIERCE COUNTY	Allowing buses to drive on the shoulder of the freeway doesn't seem like a very wise idea. And if your plan is to widen the shoulder to allow for both buses and disabled vehicles to coexist, that real estate would be better served by adding another general purpose lane to alleviate congestion all around.
PIERCE COUNTY	I HAVE LIVED IN TACOMA WA 98404 IN MY SAME HOME FOR 45 YEARS. MY WIFE AND I ALREADY PAY TO MUCH TAXES, ESPECIALLY OUR HOUSE AND ALL OTHER TAXES, IE ON EVERY BILL YOU GET SERVICE, PRODUCTS REGISTRATIONS, TAXES ON EVERYTHING WE NEED TO LIVE. MY WIFE AND I ARE RETIRED AND IN OUR MID SEVENTIES. WE ARE ON FIXED INCOME AND BARELY LIVE CHECK TO CHECK . WE CAN NOT AFFORD TO PAY A CENT MORE TO LIVE, JUST LEAVE US ALONE. BY THE TIME A RAIL IS IN TACOMA WA WE WILL BE DEAD, LONG GONE AND THE SOUND TRANSIT ST3 , WHICH IS PARTLY THE BLAME IF WE LOSE OUR HOME BECAUSE OF TAXES AND CAN NOT AFFORD MEDS, FOOD ETC. !!!!!!!!!!!!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - Pierce County

PIERCE COUNTY	<p>Trains, an ancient mode of transportation. Terribly expensive, inflexible and cannot go everywhere we live. Buses, can be flexible, change routes as needs and people change their life patterns.</p> <p>AND I WILL NEVER SUPPORT A PROPERTY TAX!!!! I am just living now. What happens in 25 years when my house increases in value????? I can hardly make the tax payments now!!!!</p>
PIERCE COUNTY	<p>In typical ST manner, you ask for WAY more than is needed to fund pie-in-the-sky dreams. This plan would cost me (and a lot of others) a lot of money for something that we would never use. Although I like the idea of light rail linking the Puget Sound area together (by the way, you forgot the capitol of Washington - OLYMPIA), it should be done with PRIVATE funds and paid by those who use it.</p>
PIERCE COUNTY	<p>While I understand the potential need for additional stations at existing sites, I do not see any value in prioritizing them at this point. It makes the most sense to me for ST3 to focus on reaching riders, establishing a firm ridership, and then increasing the number of stations as need requires. As it is, transit does not reach enough people and improving infrastructure should be the top priority.</p>
PIERCE COUNTY	<p>Add lanes of traffic for cars (which people use), not mass transit (which people do not use - but uselessly hope that others will so they can continue using their cars with less congestion).</p>
PIERCE COUNTY	<p>While extending light trail connectivity to Tacoma and expanding rapid bus along I405 from Renton to Lynwood is welcome, none of the plans address providing better transport from Federal Way to Bellevue along WA 18, WA 167 and I 405. This particular segment is largely ignored in all the plans. I live in Milton and commute to Bothell several days a week. To add to the problems, parking is Federal Way or Renton is at capacity by 9 am.</p> <p>The Seattle, Bellevue, Issaquah, Redmond corridor is reasonably well connected compared to connections from South King / Pierce County to Bellevue. I would like for the authorities to revisit the priority.</p> <p>Also, the survey combines several sectors into one (specifically the last two or three questions) when we are asked to comment on our support for that particular project. it will be helpful if the the questions separately address each corridor.</p>
PIERCE COUNTY	<p>Time lines for the bus upgrades are way too far out. They should be completed within two years. You are trying to go too far out into the future, and you don't have any idea how/where new residents will be living in that time frame. You should keep every project and tax program to under 5 years.</p> <p>There is no justifiable reason for adding to the Sounder Train system, until you have made the north section more reliable -- available over 95% of the time.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - Pierce County

PIERCE COUNTY	50 billion are you insane. 50 billion with a "B"! Why does it have to be paid for by property taxes, sales tax and motor vehicle taxes. It should be paid for by those who use it, or at least the majority of it. 50 billion does not sound like the end users are paying anything more than a drop in the bucket. Maybe you should cut out 40 billion from your proposal and then maybe people might consider it....but you would still be talking about 10 billion. where does that money come from even we already have high taxes. if we want higher taxes maybe we could build a wider freeway through seattle instead of 2 lanes where it is most congested.
PIERCE COUNTY	any connection to Pierce County.Let King county pay for the benefits they will they will receive and leave us alone. You are the most disgusting public agency in the state of Washington.
PIERCE COUNTY	Sound transit has wasted too much money, has always come in late and over budget. We need more freeways. People need their cars for work, errands and running children to activities. Buses and rail do not work for most people. Sound Transit has never been efficant with tax money.
PIERCE COUNTY	I don't see major problems in getting people from West Seattle and Ballard into downtown Seattle or through downtown Seattle. The majority of people coming into or through Seattle come from as far south as Olympia and as far north as Mount Vernon. These are the corridors that you should be concentrating on. Get those people off the freeways in their cars and into public transit which eliminates the cars trying to find parking in town.
PIERCE COUNTY	All proposed rail based services are incredible wastes of taxpayer money. Sounder trains are fatally flawed due to mud slides and routes that are so circuitous that it is actually faster to drive or take the bus. The limited schedule is also pretty worthless to anyone who doesn't work 9-5 or needs to go in the opposite direction (i.e. Puyallup to Tacoma in the morning and back in the evening). Useless waste of money. Light rail is inflexible for future needs and has a tremendously higher per seat/mile cost than buses. All proposed ST3 funding should be spent on increasing express bus service to outlying areas. This would provide the bang for the buck to the average taxpayer.
PIERCE COUNTY	The focus should be on light rail and sounder surface. I can not stand riding buses nor support any addition to bus services.
PIERCE COUNTY	Pierce County gets very little in return for an additional 25 years of heavy taxation. PC residents will pay to develop transit in King County.
PIERCE COUNTY	Link light rail to Tacoma Community College is a waste. Use those funds to build light rail north from the Tacoma Dome toward Federal Way. Improvements to city streets are already paid for by local citizens and the local governing bodies should accept that responsibility. This is a too expensive project--it is death by a thousand cuts to local tax payers.
PIERCE COUNTY	I don't predict voters will approve this size tax increase. I'd support it over doing nothing, but I don't think it's a wise use of resources. I'd rather see a scaled-back, less ambitious, more practical plan. I'm guessing most voters can get behind BRT and more parking.
PIERCE COUNTY	smaller list of projects and faster timeline would seem helpful to build support

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - Pierce County

PIERCE COUNTY	I already pay to much in taxes. and I will be dead in 25 years
PIERCE COUNTY	Stop wasting billions on things that will NEVER be self-supporting and will just waste more tax dollars than are already wasted.
PIERCE COUNTY	projects involving the laying of light rail should be removed in favor of buses that can adjust to ridership needs.
PIERCE COUNTY	Buses and Sounder trains are much more important and cost effective than light rail, which should be removed from future plans
PIERCE COUNTY	If these project will be funded from taxes places on residents outside of Seattle, the focus can't be on Seattle. The projects need to be based on expansion and infrastructure, not just servicing Seattle better.
PIERCE COUNTY	Eliminate almost ALL of the light rail extension projects. I like light rail, but the Puget Sound region does NOT have the population to warrant that kind of investment. We are not New York. That money can be better spent improving transit, like the BRT proposals, and beefing up the existing bus/rail infrastructure, as well as adding new lanes to our highways. It needs to be a combination of all of those things.
PIERCE COUNTY	Waaaay too much emphasis on Sounder which only runs during "peak commuter" times making it useless for those of us who work outside those hours. For what is proposed to be spent on trains, you could greatly expand the bus systems which desperately need it and which serve far more people. I love trains. I love to ride them, love to watch them, love to hear them. I do not love continually being taxed higher and higher on essentials like food and housing to support a train system that only serves a small segment of the population and will not even be realized in my lifetime.
PIERCE COUNTY	the transit system should be emplaced prior to cosmetic enhancements. in addition to this 200 per year, more will be asked for education and protective services. are bike racks more important than teachers and first responders? instead of enhancing platforms to make them more ergonomic, why not adapt the rail cars? this is a black hole for developers.
PIERCE COUNTY	Rail carries a huge amount of the cost, but doesn't do anything you can't do with buses. In particular, additional light and heavy rail in Pierce County will have very low bang for the buck. (Too many bucks for too little bang compared to what you could do with buses.)
PIERCE COUNTY	As someone whos lived in Kent, Milton, and spanaway all during a 5 and 1/2 year period while working at Boeing in Everett/mukiteo. Well I since lost that job because I couldn't tollerate the traffic anymore. I was also recently idagnosed with severe sleep apnea and was falling asleep. I would have taken the train /light rail everyday if it ran early enough (4am) we desperately need to invest in railways. Traffic is intolerable and busses only complicate a strained infrastructure. Carpooling and vanpooling is also dependant on traffic conditions. WE NEED ROBUST RAIL SYSTEMS! THANKS FOR THIS SURVEY! P.s. everyone I know HATES (WITH A PASSION) the HOV HOT LANES in Kent, and we can't believe the DOT implementation along 405. BRAVO GOVERNMENT WAY TO WASTE MONEY! (AND RIP US OFF WITH PRICE GOUGING) TRADITIONAL HOV LANES WORK GREAT AND ARE SAFER!
PIERCE COUNTY	Enough is enough. It's time to reduce transit plans and focus on road improvements and expanding the number of lanes for drivers.
PIERCE COUNTY	Too expensive and too long to complete. Let's take one step at a time.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - Pierce County

PIERCE COUNTY	Your inability to provide any functional level of service at a reasonable price per commuter has proven your complete incompetence.
PIERCE COUNTY	I am a proponent of both bus and rail but expanding/improving existing roads for a "Bus On Shoulder Program" seems like a waste of money. If WDOT is going to improve crumbling road way infrastructure let spend the money on a sustainable option like light-rail. Please remove the "Bus on Shoulder Program" from the ST3 final plan.
PIERCE COUNTY	I would like to see north to south more complete before you add all other directions. Everett to Tacoma should be a priority with added parking. Bus prices and the sounder train should increase their prices to help with costs instead of all additions coming from taxes.
PIERCE COUNTY	We don't need new train lines. Trains were great before cars and highway systems, but haven't been a viable business for nearly 100 years. Stop this idiotic facist boondoggle.
PIERCE COUNTY	all light rail should be removed and the money spent on buses. studies show light rail will be carrying a tiny percentage of passengers (<.5 %). light rail is an absolute waste of taxpayers' money. buses are cheaper and flexible. light rail will not make any difference in commute times. spend the money on roads and buses.
PIERCE COUNTY	Trains are old. Driverless cars are the future.
PIERCE COUNTY	Sound Transit Three (TS3) should only have light rail and Sounder rail projects. Buses are last century.
PIERCE COUNTY	This isn't a windfall opportunity for ST. \$50 billion is too much money. Learn to work with what you got.
PIERCE COUNTY	Any rail projects are a complete and total waste of any and all taxpayer money. These projects will never remove drivers from the road or operate even remotely sustainable. Stop all rail projects not privately funded or self sustainable(which are none). Focus on roads that move traffic improve busing that works and please stop pretending that wasting billions on rail will help anything.
PIERCE COUNTY	All projects within Tacoma should be removed from the plan as there is no congestion along the proposed routes. The focus should be on the main light rail routes along the I5 corridor.
PIERCE COUNTY	Light rail from TCC to UWT is not needed. The #2 bus already serves this route well.
PIERCE COUNTY	Stop wasting our tax dollars on this nobody rides what we have the trains are empty everyday
PIERCE COUNTY	Are you crazy? Can we build some more roads!?!?! 50 billion dollars!!! No more trains that no one will ride, subsidized by my tax dollars. And keep your transit authority away from Pierce County. Why do you think I bought a home out here and not in King County!! To be away from insane BS projects that taise my taxes and then squander the money. I hope this goes down in FLAMES!!!
PIERCE COUNTY	Every last one of them! What a waste of money to expand FURTHER THIS FIASCO! If it is so good for our area...let private enterprise fund it! They won't because it is a loser! Claiming that it will cost each tax payer \$200 is a complete lie!! A great percentage of the population do not pay their "fair share", so the balance is transferred to the working class.
PIERCE COUNTY	Link to TCC. Buses work fine. Redirect monies to shorten wait time for rail from Tacoma to SEATAC.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - Pierce County

PIERCE COUNTY	The need for light rail expansion within Tacoma itself completely pales in comparison to the needs of better regional commuting between Tacoma and major employment centers such as Seattle. There is urgent need to improve existing bus and train service before spending millions to expand the current "train to nowhere" aka Tacoma Link.
PIERCE COUNTY	I feel the Issaquah and West Seattle destinations would be best served by increase bus service at a lower cost than light rail to basically dead-end locations. Ballard might also fall into that category as does potentially anything beyond Redmond. The priority needs to be on the North-South spine. As the stations are built they should be built to accommodate more train-cars than we currently use, or so that they could be easily expanded to load more. Frequency needs to be increases and 24-hour service is optimal. Light rail doesn't compete with regular freight trains and needs to be the ultimate goal as freight and commuters can't compete for rail space and end up with expansion available for both! Focus on Lightrail spine!
PIERCE COUNTY	Until the original problems are fixed, you need to stop expanding - this only adds to the daily frustrations of broken trains, inadequate parking and unreliable transportation. Fix the train - 90% of the time there is a mechanical malfunction causing a delay, if your stats say otherwise you don't take the train twice a day five days a week, this is causing people to be disciplined at work and in some cases losing their jobs. The constant increase in fares is ridiculous - why should I pay for someone else to have a reduced fare permit when I already pay over \$150/month, where do you come off thinking I have money in my budget to pay for someone else? Let alone, thinking I have \$50/month for a parking pass - which should only be available to those taking the transit 4 days/week or more! Your studies and drafts are a waste of tax payer dollars and nothing gets resolved.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - Pierce County

PIERCE COUNTY	<p>The region continues to choose to underinvest in projects that serve the economically and ethnically diverse communities of the South End of Tacoma and South Tacoma. Failing, yet again, to consider investment along Portland Avenue to Salishan (or the Lincoln District for that matter) to better connect growing residential communities with jobs is an embarrassment and smacks of economic and cultural insensitivity. Sounder service to DuPont would really just enable long commutes for Thurston County residents subsidized by RTA district taxpayers. If Thurston County wants to subsidize job exports to Seattle, let them pay for it. Likewise, light rail to Tacoma Community College will be a folly. The TCC area has little potential to be an economic engine or a 24-hour neighborhood because of the suburban development pattern entrenched in that area and the corridors leading to it.</p> <p>The previous proposals were put into the plan rather than light rail to the Tacoma Mall area? The Tacoma Mall area is one of the region's economic engines, it is identified as a regional growth center, has a huge potential for redevelopment as the Tacoma Post Office vacates its Pine Street location, and Tacoma is completing its Tacoma Mall subarea plan to make permanent an urban feel to the area. I think the decision by the Sound Transit board is both short-sighted and a vote killer.</p> <p>Regarding timing, why does it take so long to deliver projects in the Puget Sound region? Tri-Met and the City of Portland have accomplished so much more with Max and the Portland Streetcar. Denver has expanded light and heavy rail quickly. Perhaps the first thing Sound Transit should be doing is hiring leadership from Tri-Met or Denver and working in Olympia and county courthouses to change the labor, financing and project delivery laws that are holding back success in our region.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - Pierce County

PIERCE COUNTY	<p>Thank you for reading this Soundtransit Professional.</p> <p>I support many of the ST3 proposals. I ask the following b considered;</p> <p>Collect the same amount of money, but none from property tax. This money is for local schools, etc and does not need to share its only revenue source with ST. I won't vote yes if property tax is included in the ST3 plan.</p> <p>Project 4; light rail from Downtown Tacoma to the mall. Skip this project. By the time it is built everyone will shop online and no one will be going there. Transfer the money to project 3 option B.</p> <p>Project 4 and 10 are too expensive. Use buses instead.</p> <p>If you want Tacoma to support Sound Tranist, myself included, you need to promise us in writing on the ballot that our projects will get done. Last time we voted, we paid, and no new rail. Tacoma does not want to pay for everyone else's projects and get no new commuter rail to King county.</p>
---------------	--

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - Pierce County

PIERCE COUNTY	<p>sound transit has a long history of corruption, non accountability and pandering to special interests, for example, ST1 spent 1/2 billion dollars just to retain most large legal firms in the west coast just to make it hard for citizens to sue to protect their property rights. I am an engineer and deal in facts. Sound transit does not. The officials of sound transit have been lying to the public for 20 years. Sound transit has never come close to meeting a planned schedule, sound transit has never come close to meeting a budget.</p> <p>light rail at best can only carry a minute fraction of to total commuting public. Quit trying to shove social engineering down my throat, quit trying to get me out of my car. I can't get to the little league game any better with an inflexible over expensive light rail system that only goes one place in spite of what your CEO, Peter says in the public comments meeting. The fields are not near the ball field, now or in 25 years.</p> <p>The last spur to the UW stadium was 10 years late and over 2 billion overrun for just a 3 mile stretch. And it did not meet the original plan, route length or service.</p> <p>This is another attempt to take more of my money forever with no accountability, with a plan that will never end.</p> <p>Building an inflexible, fixed rail is not the way to move people, now or in the future.</p> <p>Its projected cost is 600% higher than the average cost of similar programs around the country that are already in work. You have failed in developing your plan, you may get it past the liberal voters of Seattle but you will never build what you promise here today. you will however, take lots of my money.</p> <p>Your statement that it will cost 200 dollars per adult per year is off by almost one order of magnitude (that's times 10 for you liberals that flunked math in high school) by your own analysis of the 3 three major taxes you wish to raise (property, sales, and tabs).</p> <p>Please start over, lose the fixed light rail and fire my Phi Cap fraternity brother, Dow Constitine. He is more interested in buying off his special interest groups, (down town lawyers, property owners and unions) than he is in doing the people's business.</p> <p>Seattle, and king county and Olympia caused this mess with 60 years of one party rule, (building a convention center over I-5, are you kidding me). Now you want me to pay you 50 billion to build a failed system that can not work but tell me it will fix all our problems, in 25 years (if you can stay on schedule for the first time ever).</p> <p>Thanks, but no thanks.</p>
---------------	--

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - Pierce County

PIERCE COUNTY	<p>The \$200/year cost per adult is wrong by your own numbers. It is 10 times higher than that (or an order of magnitude for the folks who can do math). ST has never maintained a schedule on anything so there is no reason for the taxpayers to presume that would occur now. This project is 600% more expensive than the average cost of similar projects that several other cities are considering to achieve the same results of this project. Why is it this project cost so far from the norm? Building a very expensive, inflexible, fixed rail system is not a good investment for the community and would likely fail or fall down in the next earthquake. A combined approach of expanded bus systems and added freeway lanes is a much better approach to ensure flexibility as communities expand, change, or contract with economic, industry, and business changes. The \$50 billion can turn to \$80 or \$100 billion in 5 to 10 years. The Puget Sound tax payers cannot afford this especially with the layoffs at Boeing, Microsoft, and other large employers. Many small businesses and larger retailers have already closed their doors. Look in Federal Way. Some spaces have been vacant for so long that to prevent continued vandalization and community safety issues, the buildings have been demolished and removed, leaving just the empty parking lots. We cannot afford this project.</p>
PIERCE COUNTY	<p>All non-essential parts should be shed. Things like aesthetics, art, fancy depots and so on should be trimmed away. Use existing structures wherever and whenever possible, even if they are old. As long as places are sufficient such as protected in the most basic manner against the elements, they should be good enough. there is no need for huge, fancy projects. Also, cut back on salaries for planners. These and other cuts can speed up production and lower cost. Otherwise, those of us paying for it may never get to use it, and many changes might be obsolete by the time they are implemented. In the meantime, accelerated usage can help pay for improvements, and adjustments can be made such as waiting to improve the lesser used routes.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - Out of District

Subarea	Additional Feedback - Project(s) should be removed in the ST3 final plan
Out of District	<p>1. I feel the Everett and Tacoma light rail should be removed. We have sounder, as an option and we can improve that.</p> <p>The suburbs have enjoyed the downtown transit tunnel built by King county metro funds. You have seen how king county didn't want higher car tabs, but Seattle did to help transit. The above light rail segments should be removed and pay for a new second tunnel. The suburbs have been in debt ever since the tunnel was built to help them out. Now we are simply giving them rail and a new tunnel at the cost of Seattle AGAIN.</p> <p>2. All parking should be removed from the budget. If they want it have them pay for it. We are moving people not storing cars. I heard the plan called for 1 billion dollars in parking. That's insane. SLAP IN FACE</p> <p>3. the E line, is completely forgotten. Under the current plan the e line will be 30 years from today the same. Doing the very simple like updating stations with readers is a small task. I think ST is hoping Seattle picks up the tab. But the E line goes into two cities so it is region. What is worse we will spend millions on the D and C lines updating them only to tear it down and build a subway.</p> <p>SLAP in the FACE</p> <p>I feel this is going to be a big fight. This plan was to appease the suburbs, but do little to provide anything for the urban core in the next 20 years. You couldn't even provide stations at graham or 130st. Probably the lowest of \$\$ amount on the table.</p> <p>Thanks for nothing!</p>
Out of District	<p>All future light rail expansion is a \$500 Million/mile boondoggle. \$50 Billion is just scratching the surface, the real cost is going to be far higher than that. WSDOT and Sound Transit projects prove this out time and time again. We can spend our limited transportation dollars much more effectively without crippling our budgets in making a system that will be obsolete in 50 years. It is not flexible, scalable, or cost effective. BRT was the recommended mode of transportation by the experts and those in leadership chose to ignore it completely. Also, the self driving car will show light-rail to be an outmoded waste of time, energy, and money.</p>
Out of District	<p>Instead of having a Sounder South Line expansion to DuPont because it is a small town, it just needs to expand some stations like the SeaTac &amp; Federal Way stations. The Sounder North Line needs to expand stations like the Seattle Central/Waterfront Station, University Station, Northgate Station, Lynnwood Station, &amp; Marysville Station. And also plan on having several cities to have their own Link Light Rail line(s) like Marysville Link, Everett Link, and several more Urban &amp; Suburban cities in the region as well as Tacoma Link.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - Out of District

Out of District	Take Everett out of the equation. Also, the problem is that ST is just intent on spending lots of money, regardless of what the people say. You aren't listening. Seriously. And what about jobs where people can telework? Can we offer more incentives for that to keep people off roads? There are other ways than throwing more busses at the problem. I see empty busses all the time. Busses were the answer to transportation problems in 1930. Seriously.
Out of District	we should focus closer on projects near the city. many of the outlying communities should be BRT, not light rail, we need more light rail in the nearest communities prioritized first, such as west Seattle and Ballard.
Out of District	Repeal light rail to Paine Field and put Bus Rapid Transit instead. I wish I had that option as Geoff Patrick publicly said.
Out of District	Remove all projects in the ST3 final plan EXCEPT for Link to Downtown Redmond. Then add Ballard-UW light rail in a tunnel with stop half-mile station spacing. Build a level junction to connect this spur to Central Link just north of U-District station.  Then stop building any light rail outside of Seattle city limits.
Out of District	How about more lanes on the freeways. Our cars would pollute less if we were not in bumper to bumper traffic all the time. You're not pushing us out of our cars; you're making us more and more angry.
Out of District	The West Seattle to Downtown project is not cost-effective compared to Bus Rapid Transit, especially given the very limited potential ridership.  The same probably holds true for the Ballard to Downtown route.  Adding stations that will slow down the trip to SeaTac airport does not seem to be a good idea.
Out of District	Improvements for bicycles should be thrown out. Money spent should benefit the most people and not a elite group.
Out of District	Abandon light rail in favor of buses and building more road lanes to allow for the increase in traffic. Only cars and buses can automatically adjust for population density change. Light rail has no flexibility and is extremely expensive to implement in hilly areas and in areas broken up by lakes.
Out of District	The central spine of the light rail, Tacoma to Everett as proposed and voter-approved in 1996, should be built out first before adding spur lines such as Ballard, West Seattle, Bellevue, etc. Those are localized distractions from the original overall plan that would suck too many funds from the big picture regional benefit. I and most of my fellow Snohomish County residents are strongly opposed because of such distracting diversions of available project funding. NO NEW TAXES for NO BENEFIT for 25 years or more!
Out of District	Light rail has ruined bus service in northeast Seattle
Out of District	Running buses on the shoulders sounds like a terrible idea for a long term plan. It sounds unsafe. And it also sounds like it would limit flexibility for highway planning and construction. And isn't that what HOV lanes are for?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - Out of District

Out of District	BRT on I-405 is the only option that makes practical and economic sense on the Eastside. Anything else is pie in the sky thinking. I don't think the Puget Sound region is capable of supporting commuter rail at even 10% of the rate of most major cities in the world. Our geography is different and prohibitively complex. We are not Moscow, NYC, London, Tokyo or Paris. Buses are the only means of transport flexible enough to deal with our geography.
Out of District	Ballard and west seattle light rail eliminated, emphasis on north south development only. Bellevue/redmond lightrail projects some other day, OK all areas for improved busses. Too expensive for average homeowner, why burden only homeowners. Tax all more equitably, perhaps food tax.
Out of District	Remove the bus service improvements and focus on Link Light Rail and Sounder service. Buses are delayed due to heavy traffic.  Add turnstiles for stations to increase revenue by ensuring that users pay for the service.
Out of District	Light rail is a waste of resources. By the time it's fully implemented needs can have dramatically changed. Buses on the other hand are flexible. Routes can change, additional units shifted to fill gaps etc. Stop wasting our taxes.
Out of District	This is such a massive transit overhaul of which many people paying won't reap the benefits. Particularly for those living up north, some won't be completed for 20 years, and many commuters will be retired by then... I'm skeptical about one company taking on a project this size and how it's being financially overseen and managed with separation of powers.
Out of District	Lose the bus, rapid transit components. Rail is where it's at; busses = congestion regardless of special lanes; busses are less efficient and less punctual than rail; investing in busses now will yield a poor ROI--much worse ROI than investing in rail ONLY.
Out of District	Stop adding more buses to an already overloaded road system.
Out of District	No trains or buses on the Cross Kirkland Corridor No environmental study between Bothel and Bellevue on CKC I will actively oppose the ST3 if these are not excluded
Out of District	Do less for less money. Prioritize.
Out of District	The plan is too bloated and the time line prioritizes the wrong projects. Immediate expansion of light rail in Seattle is desperately needed, but suburban light rail expansion should be deemphasized. Issaquah, Redmond, et al, are car dependent areas where transit will always be a second option. Light rail to Ballard and West Seattle, on the other hand, could have significant impact on car dependence and trip reduction. Those projects should be the primary focuses of ST3 and must be completed sooner than the projected 17 and 22 years.
Out of District	The ST3 plan should NOT move forward in fact Sound Transit is a rogue agency which has wasted BILLIONS of taxpayer dollars and has NEVER finishing a SINGLE PROJECT ON TIME AND UNDER BUDGET. The agency needs to be defunded and done away with ASAP!
Out of District	Light rail is a complete waste of money and energy. Expanding bus traffic by increasing lanes and then busses would move more people efficiently around the Puget Sound area.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - Out of District

Out of District	There are too many projects. You should remove the Ballard project. I live in Ballard. The current D-line serves Ballard well and service can be improved tremendously by not allowing parking on 15th Ave W and building a parking lot or two "somewhere" in Ballard and Interbay to cut down on commuter traffic. For a gain of a few minutes by using the Link you are asking for 4 billion dollars for a project to be completed in more than 20 years! Have a master plan, but ask for funding every 10 years or so as the city changes.
Out of District	ST3 draft plan needs to be modified with some of its service plan being deleted segment to add proposed service to Marysville, which is just north of Everett. Consider having all of the Core Urban and some of the Suburban cities to have their own Link Light Rail line just like the City of Everett currently has its own transit agency which is Everett Transit. I believe the ST3 draft project plan was planned the horrible way that will include BRT and should should never need to be BRT, period. Instead of that, consider having alot of Link Light Rail lines (including municipal Link Light Rails) like Marysville link, Lake Stevens link, Arlington link, Everett link (a line or 2), Lynnwood link, and so much more. Express bus routes 510 and/or 512 should have a proposed expansion up to Marysville by deleting all the selected trips to Downtown Everett. Sounder North Line should have proposed stations to Seattle Waterfront, University, Northgate, Shoreline, Mountlake Terrace, Lynnwood, Mill Creek, and Marysville as well as Everett, Mukilteo, Edmonds, and King Street Stations. 4 round trips should be expanded up to 10, 4 out of 10 serving King Street, Edmonds, Mukilteo, and Everett Stations which is currently the existing Sounder North Line just need to add Seattle Waterfront, University & Northgate Stations, should also expand Lake Stevens Station but thip to Lake Stevens should be limited by only 2 out of 4 trips, second and fourth and the first and third trips should start and end in Everett. 6 out of 10 North Line trips should serve King Street, Seattle Waterfront, University, Northgate, Mountlake Terrace, Lynnwood, Ash Way, Mill Creek, Mariner, Everett, and Marysville Stations. Sounder South Line should never have a proposed expansion to DuPont because it is a pretty small city and that station project can be absolutely 100% preventable, so instead of South Line expansion to DuPont it needs to add SeaTac, Federal Way, and maybe Des Moines Stations. The reason why I need this plan to happen is that it can be a much better offer and the plan I made and wished for would make ridership a whole lot more intense. 8 round trips + 2 reverse trips should be expanded up to 12 round trips + 2 reverse trips. 6 out of 12 trips should serve in Pierce County should serve Pacific, Edgewood, Tacoma Dome, South Tacoma and Lakewood Stations and the other half should serve Sumner, Puyallup, Waller, and Tacome Dome Stations. The 2 reverse trips should delete the segment stops to Puyallup and Sumner Stations and should only serve Tacoma Dome Station in Pierce county. All South Line trips should serve all stations/stops in King County.
Out of District	I'm appossed to any plan that does not include Kirkland
Out of District	ST has no track record for keeping any schedule or budget, so now you expect the residents to "trust" you with \$50 BILLION OVER 25 YEARS?  Sorry but I am voting not only no but "HELL NO".

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - Out of District

Out of District	All non-light rail projects should be dropped until the backbone rail system is built to conserve money and focus on getting the rail build timeline reduced, especially returning Sound Transit to it's initial time commitment to SW Snohomish County for the building of light rail to Everett. Priority should be placed on the line to Everett, via Paine Field above all other construction projects since it has been ignored the longest of any part of the initially proposed plan and is in the most need of traffic relief. No more Bus routes should be implemented that take lanes away from car traffic as this is only creating more congestion. Build the [explicit] rail line to Everett and keep your commitments! Put an end date on the revenue collections for the build out, don't expect it to continue forever!
Out of District	The present system of mass transit does not seem to be used by many people and is not cost effective. Most people want access to area by use of their private vehicles and want better parking facilities at those visited sites. The bus and train systems are presently hardly used at all. They are mostly empty vehicles. The new bike trail system and the bikes to use the bike system is a disaster and should also be eliminated. Why have taxpayers like me pay for a system that is not used and in effect slows down traffic in the areas served by bikes. You can't force people to take bikes when they want to use their own vehicles.
Out of District	To start with it is too expensive, excessive waste, poor management/poor planning and in the end still have traffic delays.
Out of District	Too much tax payer Money!
Out of District	Focus on bus service above all other projects. Sound Transit has failed to deliver on budget and within promised deadlines.
Out of District	Get Metro and Sound Transit out of Maple Valley. I see empty busses which are more of a hazard to traffic flow than a help.  GET METRO OFF MY COMMUTE!
Out of District	Light rail should be mothballed for now, Bus services should be increased at every opportunity.
Out of District	population control
Out of District	Seattle is a destination for all the bedroom communities. ST1 promised links from Tacoma and Everett into Seattle and never delivered. Light rail from North and South hasn't lived up to the original promise and we're told another 25 years to realize that. Twenty years later I no longer am a wholehearted supporter. \$50B is too much and the project duration is too long. This will fail to get voter approval. Propose light rail all the way to Tacoma, Everett, and Redmond to create the backbone. Come back later for an ST4 with Seattle specific extensions.
Out of District	Do not put any High Capacity Transit on the Cross Kirkland Corridor (CKC) Trail. This is a perfect trail for bike commuters to Google and S. Kirkland P & R and for recreation. Any development would spoil the beauty and quiet of this gem of a corridor!  Remove the environmental study between Bellevue and Bothell via the CKC Trail. Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride If all of these are not removed, I will actively work to defeat ST3 in November

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Project(s) should be removed in the ST3 final plan - Out of District

Out of District	The light rail projects should be removed. They are extremely expensive and less efficient than expanding bus service. Continue to focus on mass transit using bus services. They are more flexible. Routes can be easily changed if demographics and traffic patterns change. They are much faster to deploy. Usage is more easily measured and they can be expanded incrementally. Light rail projects become multi-billion dollar white elephants.
Out of District	Focus money away from BRT and into LRT. LRT is more efficient, more attractive to voters, and more attractive to investors.
Out of District	This boondoggle should be stopped! An additional 200 a year per adult? Are you ill to think that additional tax is okay?
Out of District	It seems like a waste to run into Ballard. I think the goal you set to move any many people as quickly as possible in and out of Seattle and Bellevue. Making everyone divert to Boeing Everett also seems like a waste. Send a shoot off to Boeing makes more sense. Long term I would like to see high speed rail between Mount Vernon and Olympia. I would like to ride rail system if it makes sense. The rail between Seattle and Sea-tac was a poor design, straight lines are much faster and move people better!
Out of District	Remove any plans to make a provisional station or fund a station at NE 130th Street in North Seattle.
Out of District	you are all worthless government leaches. You are using eminent domain to hurt good people that actually work and produce something for the marketplace.
Out of District	Bus on shoulder plan is terrible. Drop it. Entirely.
Out of District	Light rail is a step backward in the effort to improve our traffic congestion. Anything on tracks does not help us to make traffic move better. Taxing us more is not something that people in Washington want, either. We are overtaxed as it is. More buses are better and cheaper than light rail, and making more roads or lanes would help tremendously.
Out of District	Ballard and West Seattle unless Seattle is going to pay for the majority of those extensions. ST3 should be focusing on building the backbone of a regional system. Until the Eastside has its own north-south line, they should not be giving Seattle spurs that they will be the only ones to use.
Out of District	Do not put high capacity transit on the CKC Trail Remove the environmental study between Bellevue and Bothell via the CKC Trail

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

Subarea	Additional Feedback - OTHER
SNOHOMISH COUNTY	Build more garage parking lots in the pre-existing park n ride while we wait for the Link to get expanded.
SNOHOMISH COUNTY	I would also like to see extended services hours. The lack of transit in/out of the city between midnight and 5am limits access to night-life and evening events.
SNOHOMISH COUNTY	We need to build more lanes and concentrate less on transit. It is not convenient to rely on transit for grocery shopping and people who work different shifts.
SNOHOMISH COUNTY	I am 54 and lived here all my life with the exception of time at grad school in the bay area. I ultimately blame our parents for rejecting the Forward Thrust project dollars the federal government offered Seattle in the 60-70's; these monies as you know became Atlanta's MARTA system. Our generation is paying for this colossal mistake, However, the timelines proposed for our rapid transit expansion are unacceptable. We need a light rail system connecting Everett, Bellevue, and Tacoma with Seattle immediately. I would prefer you raise taxes even further to hasten the development of light rail in the Puget Sound Corridor. My friends and I often joke that if we had shovels, concrete and wiring we could build the system ourselves faster than you are proposing. I am doing my part by leaving my car in Mukilteo and taking the bus into Seattle daily, but the time it takes me to get to my job is interminable. Please, please do whatever it takes to expedite the development of light rail. I know you didn't cause the current situation but it is an outrage that Seattle has waited so long for a meaningful rapid transit system. Thanks for listening.
SNOHOMISH COUNTY	The north end always gets screwed when it comes to transit. For example, paying outrageous prices to drive to work and back on 405. The transit sucks from Everett to Bellevue because you stop every off ramp on wrong side of road so you make traffic worse by having to go from left to right and left again. Who designs bus off and on Ramos in the opposite side of the freeway. It does it on I-5 and 405. Obviously people who never take transit.
SNOHOMISH COUNTY	The sooner the better for all of these additions. We CAN afford it as a region - in fact, we can't afford not to do it.
SNOHOMISH COUNTY	Thank you!!!!
SNOHOMISH COUNTY	I wanted to add that I recently quit a great job I loved because the commute made it so I was getting up at 5, getting home between 5:30 and 7:30 and hardly seeing my kids at all. Public transportation in this region is lacking and needs to be fixed. I support this and am thankful to have gotten solicitation of my feedback.
SNOHOMISH COUNTY	It's essential to increase the amount of parking at the Mukilteo Sounder station. It's already inadequate for the current ridership. It should be expanded as part of the Mukilteo Multimodal Project of the WA State Ferries. Now is the time to incorporate additional parking into the overall project plan.
SNOHOMISH COUNTY	Please get more project like additional buses, light rail, etc from Seattle to Everett faster than currently estimated.
SNOHOMISH COUNTY	I strongly support expansion of our mass transit system in all forms, as soon as possible. Honestly, 25 years is too late, but I know we have to start somewhere. I am willing to do my part to pay for this important upgrade to our infrastructure and quality of life. In a perfect world, light rail or high-speed trains would run from Portland to Vancouver, B.C. Thank you for running this survey, and all the hard work your group is doing to ensure that our region remains viable for our businesses and citizens.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

<p>SNOHOMISH COUNTY</p>	<p>I have selected mostly opposing views of all these expansions, and I say this as someone that tried to rely on transit commuting into the city from Edmonds for a year and a half. The argument that there are too many cars, and too much congestion is a problem that we are inducing on ourselves with never ending construction and expansion, poor upkeep of our road systems, and silly ideas like HOV lanes (utilized more by parents with children in tow than actual commuters) and the recnetly unveiled pay lanes on 405.</p> <p>More significantly than that, though, is my experience with the unreliability of the rail system overall. In the winter months, the Sounder train is 50/50 as to whether the Northline will actually even be running due to mudslides, and engineering oversight that has fairly significant impacts on those depending on train. In the end, these commuters end up relying on the roads to get to their destination, and are subject to the "congestion" on the roads that are the reasons for supporting expansion of this. The second, and perhaps more frustrating aspect is to the Light Rail. I have relied on this option to get me to SEATAC on multiple occasions, and in two cases, I have missed my connection due to unforeseen blockages on the tracks, or some unknown malfunction. In either case, had I decided to drive, I would've arrived on time just fine, even with traffic. The argument that light rail will continue to operate, obvious to traffic or road blockages seems to be a fallacy, given that in one of these cases, there was traffic blocking the light rail route.</p> <p>Overall, I would support rail options if it weren't at the cost of continuing to discourage drivers in the Puget Sound area, and if I could have some sort of assurances to the reliability of the rail system actually getting me where I need to go on time. Thus far, sitting in traffic has ultimately proven a more dependable method of commuting than rolling the dice on a train, and getting stuck for hours with no alternative option once a rider is essentially "hostage" to the train once committing to it.</p>
<p>SNOHOMISH COUNTY</p>	<p>With the growing tech industry here -- and many of those in the tech living outside Seattle in Pierce County and on the East Side -- companies should work to find solutions that benefit their employees and locations their employees can reach, otherwise, allow your employees to work remotely (and most jobs are capable of that). I easily pay more than \$1,700 annually to commute to work on the Sounder Train. Why would the plan add light rail from Everett south when there is already a train station in Everett that goes all the way to Tacoma! I would be much more likely to support programs that improved the existing infrastructure - such as improving the train schedule for Sounder commuters. The last train leaves Seattle at 5:30. I believe adding a 6 p.m. northbound train and more capacity for riders with an added car would increase ridership, allow more opportunities for commuters, and alleviate the rising housing costs many commuters face by opening up communities to the North where there is still capacity to grow. If you want to make the Puget Sound Region more livable, start by improving what we have.</p>
<p>SNOHOMISH COUNTY</p>	<p>Instead of taxing the residents, corporations who are fueling this rapid growth should be paying more into the system.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	Get it done as fast as possible.
SNOHOMISH COUNTY	While I recognize my following comments will likely be at best ignored, please understand that I voted for the initial light rail plan that was voted down and am thus a supporter of the theory. Issue #1: ST lacks credibility. Holding out as completed ahead of schedule and under budget to UW is a fiction justified by saying there was a 'reset'. By that standard, Boeing's dreamliner could also have been considered on time and under budget. The originally approved ST1 measure was already supposed to do way more than what has been completed Issue #2: You keep pouring money into the north line and supporting those riders. At what point in time will you realize that it would be cheaper and more reliable to buy those riders limousine service than have that route. Issue #3: Population density and demographics flow make it such that you are best served by having a really good transit system that services the core of Seattle - Ballard, Magnolia, West Seattle, Shoreline, etc. rather than providing mediocre service that stretches out more. Issue #4: Your demographic survey demands are invasive. I understand why you want them, but it is none of your business if a respondent chooses to not provide the information you are hoping to get.
SNOHOMISH COUNTY	Autonomous vehicles need to be integrated into the system. People don't want to leave their vehicles so incentives need to be thought of like free lottery tickets or a reserved seats via point system.
SNOHOMISH COUNTY	Improvements in, around and between Snohomish County and north King County are not represented well enough in this plan. Better transportation in this area will help to keep jobs and population in this region and reduce the traffic flowing into Seattle. It's imperative to promote mini-hubs in addition to some primary routes to travel east to west and north to south.
SNOHOMISH COUNTY	I HATE the idea of imposing taxes to fund this. STRONGLY in support, but government NEVER expires taxes. So, send me a monthly bill, we will happily pay it. When the project is done, stop billing me, simple.
SNOHOMISH COUNTY	Can't wait for a system that quickly gets me from Edmonds/Lynnwood to the Factoria area of Bellevue!
SNOHOMISH COUNTY	While we wait for light rail to Everett, there should be more express bus and sounder train options for Everett-Seattle commuters. These additions should be immediate!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	<p>Light Rail, More buses, stealing more lanes for commuters is not going to solve the problem is people cannot get from their homes to their places of employment without a 30 - 60 minute walk to catch the a ride, that dumps you 30 minutes away from your job. It doesn't matter how many people you can dump in Seattle's City Core if there is no way for them to get the rest of the way to work. This survey states that people sit twice as long in traffic now than they did 5 years ago. But what it doesn't address is the fact between driving to a Park and Ride, Bussing from Bothell to Seattle and 30 minutes walk to work, taking transit causes my commute to be twice as long now. Plus, I am stranded in Seattle if I need to get home outside "Your" perceived schedule of my commute needs. If the bus lanes were returned to the drivers the commute would ease. If "Transit Improvements" wouldn't block traffic the commute would ease. I don't know if you have ever seen either of the Park and Rides in Bothell but neither of them are able to support more a few hundred cars and they are no buses that bring people from their homes to these Park and Rides. The issue is less getting people up or down the I5 Corridor and more getting people to busses, get routes to run later in the evening so if you are running late, you are not stranded in Seattle. And the most important problem that any Transit Solution must address is shortening the length of time needed to get from home to work. As a commuter, I don't care how long it takes a bus to get from a Park and Ride to Seattle Nordstoms, I need a fast, reliable, and safe way form home to work and work to home. 50 Billion Dollars will not solve this.</p>
SNOHOMISH COUNTY	<p>There seems to be a lot of spin to ST3 and the notion that it will take/keep cars off the road. If there are not enough collection points, park &amp; rides, it won't get as many cars off the road as the pundits are saying.</p> <p>I think BRT would be more nimble than Light Rail and able to move to the areas of most need rapidly even thought Light Rail is more appealing way to travel.</p>
SNOHOMISH COUNTY	<p>Try and separate the light rail from car and pedestrian traffic as much as possible. I am constantly reading notices of line blockages and service interruptions along MLK way in the Rainier Valley, it messes up the entire service. Drivers and pedestrians are not getting smarter, so conflicts should be minimized.</p> <p>The problems with mudslides and freight train interference on the Sounder North Line must be more aggressively addressed. Without addressing those issues, the Northline trains will forever be running with just 2 or 3 cars because of reliability issues. Train mechanical failure issues need to be better looked into also,</p> <p>Highway shoulders are needed for disabled motor vehicles. I would be very nervous traveling on a bus zipping past stalled traffic on the road shoulder.</p>
SNOHOMISH COUNTY	<p>First, this is not a scientific survey so I am suspicious of its inclusion at the June board meeting. Second, Sound Transit repeatedly refers to the tax increases over the 30-year life of the project, even though a separate Sound Transit document says that the taxes will remain for an additional 25 to 30 years. I think Sound Transit should make clear that the taxes are not for twenty five years but for over fifty.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	You've already taken sounder cars away from the north end. It's obvious you prefer to operate in the south end as the north end is getting shafted on this plan. Why are you even bothering to survey people when you've already made up your minds
SNOHOMISH COUNTY	Spending such massive amounts of money of which the real impact to mitigate traffic congestion is microscopic is a ridiculous waste of our taxpayer money. This survey states that there simply is no more room for on our roads. With the kind of money discussed here and already spent, there could have been much more traffic mitigation success with road widening. Although difficult, it is no more difficult than the effort spent on building light rail of which it is estimated only .4 percent of the population will use. Also, business is seeing the enormous potential of self driving cars which, when incorporated into an overall traffic mitigation effort, would have a far more positive impact on the region. Money should be spent instead on supporting the infrastructure needed to support that effort.
SNOHOMISH COUNTY	Not aggressive enough. We need to be on par with San Francisco, Washington, D.C. Chicagoans New York.
SNOHOMISH COUNTY	Would be nice if the current system you have supported workers on ALL shifts, not just day shift. Currently no way from Mukilteo to Boeing Everett unless you work the day shift. Ridiculous.
SNOHOMISH COUNTY	Build roads and add bus service. Light rail is a grossly expensive option that will do nothing to reduce congestion and improve transportation.
SNOHOMISH COUNTY	Bothell area!
SNOHOMISH COUNTY	The timeline is much too long. The need is now. Find a way to shorten the timeline, if possible.
SNOHOMISH COUNTY	Build rail from Lynnwood southbound ASAP!
SNOHOMISH COUNTY	The spine needs to be completed to Everett before all the side routes. Buses, bikes and walking can handle the shorter runs.
SNOHOMISH COUNTY	Sitting in traffic on I-5 South in Lynnwood is no fun!
SNOHOMISH COUNTY	I select "Other" in the drop down because I have two categories of feedback. 1) The Ballard UW link connection should be added to the plan. 2) The completion timelines are far too long. Your questions above pointed out how there are 800 more cars on the roads every week. We need regional light rail, and we need it now. Completing the Tacoma to Everett connection in 22 years is not soon enough. Sound Transit has an excellent record of coming in ahead of schedule and under budget. Go to the voters with a ST3 Rapid implementation plan. Give us the option to approve a higher expense plan, that will deliver the results in half the time.  Thank you

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	I live in north Everett and commute to downtown Seattle almost every day. I travel regularly which requires trips to the airport and I NEVER use the Light Rail to go from Westlake to SeaTac because more often than not, it's faster for me to drive. In order to get significant backing for the light rail, there needs to be a push for express lines that have 2 or 3 stops and it gets business professionals and other travelers to the airport in 30 minutes, not 54 from downtown. In addition, the Light Rail needs to have its own tunnel system/station. There have been times where I have been dependent on the Light Rail to get me from Westlake to King Street to catch the Sounder to Everett and I have missed the train because the Light Rail is stuck behind buses that cannot get to the surface streets because of traffic. Lastly, I understand that some of the capital needs to come from the residents of the state however major companies that are establishing businesses in the city must be responsible for some of the capital. If it's possible told businesses accountable for the X percentage of employees who commute 20+ miles each way every day than the state will see a bump in revenue.
SNOHOMISH COUNTY	I live in Everett and work in Seattle, but all of these proposed projects do not seem to include anything to alleviate the slow bus service from the Everett Transit station. I have had to change what time I get a bus to Seattle (which is only 1 option, the 510!) as the service is not reliable. The buses show up late and leave the station late, which puts my getting to work on time in jeopardy. I personally think Sound Transit needs to re-look at the Everett to Seattle route and update to reflect the needs of Snohomish County. Not all commuters work at Boeing or on the Eastside.
SNOHOMISH COUNTY	Sound transit is useless. It takes too much money and does nothing to ease congestion. Any expansion of this outrageous system would further take away from the money we need to use for the road system we need to update, as in add more roadways. Please quit asking the tax payer to pay for stuff we do not need, cannot use and distracts from actually making our communities accessible.
SNOHOMISH COUNTY	you need to refund the tax money to all that live in Snohomish.
SNOHOMISH COUNTY	Please consider enhancing bus routes for the North Sound. We might have the sounder train but it is not reliable because of landslides. When the Sounder becomes unavailable it cause a heavy load on bus routes. I do not see that additional buses are actually added. Having buses that run frequently and consistently to the north end would be nice. Right now because I am unable to consistently predict when I will get home via bus based on buses not showing up at scheduled times, I am actually going to have to start driving. I have evening commitments and Sound Transit buses do not provide consistent timing. The bus routes that have extremely frequent buses are the ones that have no parking (Ash Way) and are not convenient. Add additional buses to other park and rides. Light rail and better busing options need to be made. Government agencies need to stop sitting on their hands and move forward. Stop wasting my tax dollars and get something done that I can actually use.
SNOHOMISH COUNTY	move up the schedule, esp. for Everett light rail get federal funds try not to impose more sales tax -- lobby for a more progressive funding mechanism like a state income tax or taxing the rich

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	To see a system that works very well, go to London. There are apps that guide you through the system. It is easy and fast. I want it here.
SNOHOMISH COUNTY	The cost to property owners is prohibitive. The payment of this kind of project should come from either an income tax, taxes on the businesses who have so many of the workers contributing to the congestion ( Amazon, Google, and Boeing). Our current system of road has not been maintained and is crumbling. We need to take care of those issues first, stop focusing on using homeowners as a cash cow, and truly look at how taxes in this state are assessed, and spent. This survey is not helpful in that it is mainly about providing information ( through the questions asked) rather than simply asking the questions. There is already a tunnel to be paid for, roads projects that need to be done. Fix how the projects get paid for before heaping on more expensive projects for persons who will not benefit from to pay for. Leave the homeowners out of it ( we pay for schools already) and tax those who will use the system.
SNOHOMISH COUNTY	Please plan ahead to build enough parking. In suburban communities for families with kids, taking local bus connections, walking, or biking is often not an option. We need sufficient parking to be able to plan around other family member's needs (drop kids off a school, run errands in single-occupancy vehicle) and still have available parking at park-ride to commute to work. Recent projects such as the South Everett Freeway Station and the Mountlake Terrace Freeway Station have already exceeded capacity on parking. It's also important for families with young children to be able to get home midday in case of an emergency, so please plan for some sort of connecting service to all park and rides (even smaller ones) all day long, not just at peak hours. Also commuters would appreciate having restrooms and recycling bins at the transit stations, and wi-fi on the bus.
SNOHOMISH COUNTY	<p>your plan makes no mention of smart car technology which will increase capacity of existing roadways. by "locking in" transit with rail, aren't we losing the flexibility that comes with technology innovations? I'm just pointing out that if we're making a 20 year plan, we should we leave flexibility.</p> <p>it also seems that we should focus on connecting Tacoma to Seattle via light rail. Those two port cities are powerful population centers who, if combined, would make a powerful economic impact.</p>
SNOHOMISH COUNTY	Find a different way to pay for your project. Taxing those that don't use public transportation to make more public transportation is asinine. Having and driving a car is an American dream. Figure out how to make it possible for everyone and expand our roads instead of creating toll lanes.
SNOHOMISH COUNTY	I think it is about time you post the amount of money you've taken in and how much you've spent, along with the executives pay! Like everything this state does is over priced and most is needs to be re-done!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	The time frame for getting light rail to Everett is way too long and an otherwise good plan unacceptable. Ballard and West Seattle are not regional facilities, and should not take priority over completing the spine. Snohomish County would be better off to use the golden spike approach than this delayed plan for getting to Everett in 2041. Building from North Everett at ECC/WSU south to downtown Everett then to Boeing immediately, even if it ends there until Phase 4, will do more to support Everett as a regional growth center than waiting until 2041 and not including north Everett. This plan continues to support Seattle interests more than regional interests.
SNOHOMISH COUNTY	Why does Snohomish pay for 30 + years without anything to show for it??????
SNOHOMISH COUNTY	It would be nice to have an added route and/or car to the North Sounder route as standing room only has become more frequent.
SNOHOMISH COUNTY	There are some great cities to look at to compare at least parts of the plan. I'm sure cities like Vancouver Canada or even London Englad have been looked at in comparison. I used to live in Vancouver and while the translink system does have some flaws, the system they have built (and continue to build) have provided easy and quick access to multiple forms of transit throughout the city and out into the surrounding cities.
SNOHOMISH COUNTY	We the people who live within the area... cannot keep up with Groceries, taxes, fees, utilities and the ever raising costs. Not all of get the raises that city, state people get we are lucky to get a raise every three years. So even a raise in \$100 tax, sets us back. We need develop or create new ways to have this income or the funding for such dreams. Like perhaps Caucasian casino's on non-Indian lands. that really pay taxes and high fees to counties. Look if we can pass laws to smoke Marijuana we certainly can built casino's for tax purposes.
SNOHOMISH COUNTY	the only reason I plan on voting against this plan is the timeline for getting rapid service to Everett is behind West Seattle and Ballard. King County has already hijacked the original intent of Sound Transit. I find it extremely unacceptable that we have to wait another 25 years for rapid transit in Everett. When we were sold Sound Transit we were promised a rapid from Tacom0 to Everett we were not told that it would take us 50 years to get it. What King County and Seattle have done to the present system is deplorable and inefficient.
SNOHOMISH COUNTY	This is a boondoggle that comes with a ludicrous price tag. People around here like the idea of mass transit, but given the ridiculously long travel times, even on the light rail routes, plus the costs for tickets and annual operating/maintenance costs, few people are likely to switch to mass transit. I would rather see shoulders opened to ALL traffic for example, not just buses. That would significantly improve flow, certainly much more so than opening them to just buses.
SNOHOMISH COUNTY	Given ST's poor performance to date, it's highly unlikely voters are going to hand \$50B to the current organization.
SNOHOMISH COUNTY	This needs to be done FASTER.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	<p>I really love the idea of more transit (rapid light rail specifically), but definitely want to ensure it's managed correctly. Sound Transit has done a good job so far, and I hope they continue making this sort of thing work well. However, many of these timelines are sadly too long to be of real use. 25 years for rail to Everett? I'll be an old man (or dead) by the time that comes around. These items are needed NOW, and should have been planned long ago in order to keep up with cities like Vancouver and Portland (Portland, for god's sake, has way better transit than we do).</p> <p>So, way to look forward and push this stuff through, but goddamn it just reeks of "too little too late".</p>
SNOHOMISH COUNTY	<p>Now is the time to raise gas taxes, when gas prices are quite low. The people who use the highways the most should be paying the most to add mass transit. Higher gas prices will encourage people to ride mass transit more, and to buy more fuel efficient cars, things that will help our environment.</p>
SNOHOMISH COUNTY	<p>More parking at park &amp; rides</p>
SNOHOMISH COUNTY	<p>ST wastes an excessive amount of my tax dollars for nothing in return.</p>
SNOHOMISH COUNTY	<p>Survey is very important, I am very supportive</p>
SNOHOMISH COUNTY	<p>Unless light rail service to Snohomish County is completed sooner, there is no incentive for me to vote for this package. I have consistently supported Sound Transit but I will be dead before you reach Everett.</p>
SNOHOMISH COUNTY	<p>The Sounder service from Everett to Seattle sucks. The service, due to the slides in Edmonds, is unreliable. On top of that there are only 4 trains, each way, per day. If the service were expanded to accommodate a more flexible schedule that would increase the ridership. In addition, weekend service would increase the usability.</p>
SNOHOMISH COUNTY	<p>Why is light rail taking DECADES?! I'd like to be able to use light rail before I die. Seriously. That's the only flaw in this plan, that light rail is TWENTY FIVE YEARS away. Please step it up on the light rail. A lot can happen in twenty five years. Plans change. Why should I believe you guys will follow through? That is why I opposed the plan. Create a plan that will expand light rail in ten years or less and I will support that.</p>
SNOHOMISH COUNTY	<p>I live in Everett. The light rail won't make it to Everett in my lifetime. I shouldn't have to pay the rest of my life for a benefit I'll never see. I don't believe light rail's primary purpose should be to get Boeing workers to work. The paper today says Boeing is going to lay off 10% of its workforce. That solves a good portion of the transportation problem. My guess is that most of the Boeing workers live north of Everett or in Everett. They wouldn't use light rail. Some of the 50 Billion dollars should be spent on finding ways to get workers to live closer to their work. The first thing we need is adequate parking at transit centers.</p>
SNOHOMISH COUNTY	<p>Thank you!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	<p>Increase Everett-Mukilteo to Seattle downtown train service daily runs to all day 5am to midnight or complete Everett light rail within 10 years. Be fair to Everett.</p> <p>Seattle should fund their own intra-city train system much like San Francisco Muni system. Seattle is only a part of Puget Sound metropolis. Sound Transit system should link outlying cities to Seattle first - highest priority. Be fair now!</p>
SNOHOMISH COUNTY	<p>We have been so car focused for so long that until there is a much larger network than even ST3 aims to create, the overwhelming majority of people will still need to use their car in order to reach a light rail station. This means people are still going to be clogging up the side streets to reach stations. My ask is that ST doesn't just plan for today, but plans for the future parking needs that will be needed for all those people commuting to stations.</p> <p>My 2nd request is to make an effort to expand light rail to cover more of the 405. Most of 405 is left out of the light rail plan and instead left only with bus service. I need to know ST is taking this heavily congested area seriously as well.</p> <p>Last of all, the reason why I'm considering voting no is that ST hasn't done a very good job in the past of meeting targets and because we still have until 2023 before the previously promised light rail opens in Lynnwood, Bellevue, and to the south. I'd like assurances that these projects are going to finish on time and within the original budgets before agreeing to hand over another \$50B. A part of me is skeptical that ST isn't just going to use some of this money to finish already promised projects, so I need ST to rebuild trust. I desperately want light rail, but it needs to be done efficiently and with quality.</p>
SNOHOMISH COUNTY	<p>I think people would be more likely to pay for transit improvements if actually USING transit would save them money. The idea of a current transit user who is already paying a LOT to ride transit to pay even more to improve it when we are not even part of the traffic problem, is a little much.</p> <p>For example: I currently spend over \$130.00 per month (\$1,560 per year!) to ride on overcrowded busses and watching as routes are removed and stops are deleted that actually inconvenience me. In September, I will be expected to cross a FIVE LANE HIGHWAY at rush-hour with no crosswalk or light. Even though I have been a proud rider, it is getting hard to justify using public transit when I'm not feeling the love. I am an average transit user and I hear this complaint several times a week: "Why are we being penalized for doing the right thing?"</p> <p>Stands to reason if the incentive offered were to US, actual transit users, and let those who are causing the problem PAY for the luxury of being part of the problem. You don't want to pay extra to drive your car...? Get an Orca card. Makes sense to me...</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	<p>Unless you are going to SIGNIFICANTLY add at least 100-200% more parking at each and every station and park and ride - there is really no reason to spend any more on mass transit. You have to be able to park to ride. If you can't park - any transit you build is useless and a total waste of money. I can't park and ride now at South Everett Freeway Park &amp; Ride - as it fills up too early in the morning to be of use. It was two small the day it opened. I am really bitter about that and that does not make me want to vote for spending more money on systems not planned properly for commuters to actually use them successfully. Don't tell me to take a feeder bus -- the closest feeder bus is over 1 mile from my home and even if I did walk to it -- the changing of buses doesn't work and would add far too long to an already overcrowded and 'standing room only' commute. The monthly pass cost isn't worth it now -- when you can't park and you have to stand from Everett to Seattle. No longer a fan.</p>
SNOHOMISH COUNTY	<p>Your draft is not realistic , other large metro areas in the country have built rail systems while sound transit still has meetings about it. It needs to have the main rail lines run up I-5 and I405 first from Everett to Tacoma with express bus off of these lines. Who knows in 20-30 years where the jobs will be located but you know I-5 will still be the main route north and south. More people will support it if you build it faster. I guess Everett area and north can say we will wait 15-20 before starting to pay for it because there is no plan for more express buses or rail in our lifetime.</p> <p>Sound transit keeps referring back to votes 20 years ago overall very little has been accomplished in that time frame. People see this and think will only a quarter to half of what is being promised now be completed in the next 20 - 30 years. If you want voter money things have happen now not later.</p>
SNOHOMISH COUNTY	<p>25yrs entirely too long. The fact that this should have been started in the 70s notwithstanding, it's time to bite the bullet and get it done. In a dozen yrs, you won't be able to move through this corridor by ANY means.</p>
SNOHOMISH COUNTY	<p>I believe the Sound Transit Express buses, like I have used many times to get from Everett to Seattle and Tacoma and back, are much more cost effective and flexible than light rail. The key to making them more viable on I-5, is to take the two-person carpools out of the HOV lanes. I believe BRT, like CT's Swift on SR 99, is also a good investment. I don't think that light rail between Lynnwood and Everett will have any impact on Land Use, because the station locations don't have good development potential. The Light Rail in the North End will have to rely on Park-and-Ride, which offers no advantage over buses. And, most people will not take a bus to get to a Light Rail station.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	<p>While there is no stopping what is being done, I am sorely reminded of the promise in 1994-1996 that the first phase of Sound Transit would reduce congestion. That was the selling point. Only after the program was approved did the authorities come out and say that Sound Transit offered an escape from congestion. That bait and switch has stuck with me and been a source of doubt regarding any other promises/selling points from that point on. I voted for the first phase. But after the promise of reducing congestion proved to be nothing but a fantasy, I have been in the opposition. Another thing that has been a major point of contention to me was the loading of the board with elected officials instead of electing board members. I get it. The motive was to provide an illusory 'empowerment' of people to create change in this project by unelecting the one or two people from any jurisdiction and thereby modifying the makeup of the board. Without the power to vote out the electeds in other jurisdictions, the board was guaranteed to be made up of transit supporters with zero chance of the citizens getting in the way with democracy. Or even representative republic. So, faced with the fait accompli and general dishonesty inherent in the program, I offer my survey results as they stand. Thank you. And one day, I hope that Sound Transit and its board chooses to be honest with we, the taxpayers funding these projects.</p>
SNOHOMISH COUNTY	<p>Just expand 405 and don't waste time and money trying to convince people not to drive their cars.</p>
SNOHOMISH COUNTY	<p>We are so far behind other regions when it comes to rapid transit! We need to get these projects done sooner if possible, from Everett to Olympia. This is taking too long - I'm in my 50's and feel I will never see this in my lifetime - but if it was available, I would use it a lot. No more excuses!!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	<p>I oppose this plan because I'd be paying at least \$10,000 for a system that I'd never be able to use. I'd be dead or, at best, retired and not living where I'm at (extension of mass transit promotes sprawl and will increase taxes) that I won't get to use. Elements of this plan are aimed at future users and residents while those of us living here today are stuck enduring the status quo until we die, retire, and/or move. Going to Everett should be via I-5. Swift BRT can take folks from 128th and Everett station. Use the \$1.3 billion in savings for other worthy projects that benefit us until it opens in 2031 or sooner vs. trying to placate the moneyed interests! The demand to the Boeing plant does NOT exist, otherwise they wouldn't be leasing all of the private lots that they do while the transit providers eliminated all south county service in 2003 - never restoring it during the good times that followed - and cutting back the N and E county service in 2010, most of that not restored. It also duplicates Swift 2 from the SE and there are plenty of buses left from Everett station. Examples of quick, productive uses of the \$1.3 billion: NB Ash Way ramp and 128th direct access ramps would ensure buses stay in HOV from Everett to/from downtown Seattle: no more buses crossing the lanes, an easy way to alleviate congestion. Another good use of funds would be extending rail east to Snohomish, then south to Redmond to connect with E-Link. On the Eastside, you blew it by not putting light rail from South Bellevue to Renton and on to Tukwila International Station: that's the worst part of the congestion there. Like BART, you've failed to encircle the metro area, a HUGE mistake for rider options. Instead, we're told that BRT was chosen for I-405 by a past board, but out of the other end comes the Issaquah to Kirkland proposal, which evades the "can't have light rail" reason. I can live with Issaquah to Bellevue, for you serve Bellevue College, but I would've connected to E-Link at South Bellevue, then gone south! BRT on 522 already exists: it's ST 522+Metro 372. I've waited there; I just take the first bus that I see, usually 5-7 minutes. A better BRT would go from Woodinville to Lynnwood Link (the 535 already does from Bothell). Ballard to UW has been congested for at least 4 decades, yet it's omitted: 45th could have seen platoons of Metro #43s eliminated, while commuters to Ballard from the north and commuters from Ballard to the north could've avoided having to go via downtown. Ballard to downtown by Interbay duplicates Rapid Ride D and travels a lesser populated area than had you gone via Fremont and eastern Queen Anne. I am supportive of extending light rail to the Tacoma Dome and Sounder to DuPont, supporting the latter on the hope that demand to the bases will be there - plus some shuttle available from the stations into the bases.</p>
SNOHOMISH COUNTY	Taxed enough!!!!!!
SNOHOMISH COUNTY	<p>The time line to Everett and completion is way too long. Being taxed until 2041 for something I will never see is complete crap. The interurban railroad of this region in the 1920's, did not take 40 years to complete and billions of dollars. I do not want anything else other than light rail in a reasonable period of time and that is not 2041.</p>
SNOHOMISH COUNTY	Make sure it is easily accesble to disabled riders.
SNOHOMISH COUNTY	<p>The timeline is too slow...a light rail from Seattle to Everett in 25 years is just super long. With the technology we have today we should be able to do it in at most 10.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	<p>Traffic is an increasing problem in Washington State. Resources to sustain personal automobiles for more and more people is not promising. I strongly support these plans to improve transportation in the State.</p> <p>Please be mindful throughout the project that this is from and for the average citizen. That means, in their shoes, how can they get to these stations from their residential homes without significantly changing their family/life-schedule? People need an alternative that is as convenient as personal transportation. It's hard, but not impossible to do. If you can sell that to them, they will most certainly buy it. Otherwise, regardless of my support and others, it is a phenomenal waste of money, time, and other resources.</p>
SNOHOMISH COUNTY	<p>The observed ST3 plan includes an Everett station going to what I assume is better Boeing Everett access. As a Boeing employee who has worked at that site for years, I know many people that work there from Seattle and simply rarely have a traffic problem due to the fact that the morning commute is the exact opposite of the congestion. I'm unsure if there is value in this particular stop when people can drive to the site for much less time. Most of the employees value their time above all else, and I fear the transit option would be underutilized. Most of that crowd would like to not drive it, but if the travel time is probably more than 10 minutes than their drive, they may not opt for it.</p>
SNOHOMISH COUNTY	<p>Planning for transit is a kind of chicken or egg idea. If you build it they will come. As soon as it is announced that transit stations will be built in an area land values go up and a variety of business start to show up near the planned installation. So the question is "What area do you want to grow?". Mercer Island was just a sleepy summer cabin area until the first floating bridge was built across Lake Washington for example. Land values went up when the Interstates were built AND values went down on old main roads when the new routes for the roads were built and traffic patterns changed.</p>
SNOHOMISH COUNTY	<p>Sound Transit isn't sound. The projects completed and proposed/planned require WAY too much time and cost to implement. Simple expansion of bus service region-wide is the answer. It can be implemented immediately and if/when commute routes/times change, you just print new route/schedules. Hard projects are sexy but horrendously bad in terms of cost and changeability.</p>
SNOHOMISH COUNTY	<p>ST should develop a plan to lay light rail tracks in current highway's HOV lanes to save cost and time!!! Please plan to take buses out from highways!!!</p>
SNOHOMISH COUNTY	<p>Don't cripple bus service in areas where new train service is added. When u district tunnel opened college students lost bus service. Residents lost service to downtown.</p>
SNOHOMISH COUNTY	<p>Snohomish county (Bothell, Millcreek area) is going through a major housing boom yet after all of the the 405 tolling changes they didn't widen any of 405. In 10 years this area is going to be nothing but a giant traffic jam. You need to get in and build some infrastructure before there is no more room to widen any of the roads. Why can't I light rail into Seattle from Snohimish?</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	On the map above, I didn't see any indication of a Mountlake Terrace station for the light rail. I hope you are studying and considering adding one there.
SNOHOMISH COUNTY	My only concern: It will take 25 years to complete these projects and we are already 25 years behind....
SNOHOMISH COUNTY	Add parking for more cars at small P&Rs along the North 405 corridor so more people can use the Rapid Transit from closer to their homes. Extend the "peak" hours to 9am to allow more people to use the Rapid Transit when they need to travel during the later peak hours.
SNOHOMISH COUNTY	We love to ride the buses but can't most of the time because there is not enough parking. (Everett Station, Lynnwood, and SE Everett park and rides) Stop the BNSF extortion for using their tracks. Its faster to ride the express buses anyway. Snohomish county has funded projects but has received little. Now we have to pay for the West Seattle and Ballard extensions. Voters will not support that kind of thinking.
SNOHOMISH COUNTY	I am very unhappy that I would be paying for over 25 or 30 years before I get to use it North of King County. I am asking all my friends to join me in voting this down.
SNOHOMISH COUNTY	Do not add rail line to pain field unless Boeing pays for it completely. They would bennifit the most. There will not be enough need for transit to or from the field. Bus would be enough from the I5 station.
SNOHOMISH COUNTY	Asking people to pay your proposed taxes (which are absolutely sure to increase) for MORE THAN 25 YEARS before we get light rail, after it was promised on the last tax proposal leads me to believe that you think we're all a bunch of suckers. And if WSDOT has anything to do with this, it'll cost twice what you're asking and it'll be 50 years before we see rail service.  In order for this to work, you need lots and lots and lots of available, safe parking. Without that, this whole project is doomed to fail. I see NO evidence that you have, or will properly address this problem.  You're certainly NOT getting my vote and I'm advocating to all I know to vote this boondoggle down.
SNOHOMISH COUNTY	This survey is calculated to get favorable responses without every addressing the real problem with the current proposal--which is it takes way too long to do anything meaningful for Pierce and Snphomish Counties who residents have been paying this tax for 20 years and received almost nothing.  Everything has been focused on Seattle. I believe this region desperately needs light rail ASAP but will probably vote against the current proposal because it continues to put Seattle and King County first. I also am not completing the survey because it does not allow me to address this concern. I think Sound Transit either doesn't care about the needs of Snohomish and Pierce County or doesn't care because it can get enough votes from King County.
SNOHOMISH COUNTY	I don't ride a bus or light rail so why should I pay for it, I pay enough tax's

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	I'd just like to say as someone who is originally from the bay area part of northern California, the public transit system around here disappoints me. Bus and light rail don't run late enough, or often enough for a person who is unable to drive have a productive life.
SNOHOMISH COUNTY	I work nights, and I see your empty busses running full strength as if there's some silent demand for it. They only thing they do is bring transients onto the property I monitor. Most of them maintain such low standards of personal care that I find it amazing that any person feels comfortable occupying a seat that they just vacated. You are not worth what you already cost, and still you want me to find two hundred extra dollars for you somewhere in my already limited means. People's endeavors are not meant to generate some infinite banquet of cash for you to glutinously consume in the pursuit of rolling frivolity. And it is frivolous. Like I say, I see it every night.  I used to not loath ST. Ratchet back your thirst for my effort and we can regain a happy coexistence.
SNOHOMISH COUNTY	Sounder, Swift buses, and any expansion of light rail should be funded by the users that use these services.
SNOHOMISH COUNTY	I'm from the east coast but don't use transit here because it is awful and doubles my commute to downtown Seattle. I have voted for mass transit for the thirty years I've lived her and it is still a mess. I'll be gone from the region I hope when this is in place but for the safety and sanity of the people please make this finally happen. Commuting into Seattle daily is the bane of my existence. I hate it here and would never encourage anyone to move here because of the traffic and bad transit.
SNOHOMISH COUNTY	We had better get started ASAP. Yes there will be costs - did anyone think this stuff is free? I wanted to use the North Sounder to get to my 7am job at First Hill but my repeated requests for the first train to run just a little bit earlier were met with repeated rejections.
SNOHOMISH COUNTY	There is no government funded mass transit system that is sustained solely by ridership. Not only with it cost billions to build this, but it will be forever a drain on government budgets which will be supported by ever higher taxes on all of us. If this is such a great idea, see if their are any private interests that are willing to build and operate it. There aren't any? There is a good reason for that.
SNOHOMISH COUNTY	I feel it's too little to late. You should have had a better vision many years ago looking forward to a better future and been better prepared. I retired two years ago and I can't believe how slow the state works for better transportation. Now my income is down half I cannot afford to now get on board with your plan.
SNOHOMISH COUNTY	I support this primarily because we need to protect our environment from pollution and too many cars. Secondly, gridlock is a bummer and I would like to plan my life around something other than if I'll get stuck in traffic or not. Thank you for your hard work.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	<p>Buses are far more versatile than trains; thus, any further light rail should be avoided, and concentrate on bus service (and PLENTY OF PARKING). If the bulk of the population moves to another area, the bus lines can move there, too--trains can't.</p> <p>Furthermore, you really need to do Something about all those mudslides onto the tracks up in Everett!! It seems every time it rains, there are several mudslides, which closes train service. Why bother if you can't use the trains?!</p>
SNOHOMISH COUNTY	<p>Buses are far more versatile than trains; thus, any further light rail should be avoided, and concentrate on bus service (and PLENTY OF PARKING). If the bulk of the population moves to another area, the bus lines can move there, too--trains can't.</p> <p>Furthermore, you really need to do Something about all those mudslides onto the tracks up in Everett!! It seems every time it rains, there are several mudslides, which closes train service. Why bother if you can't use the trains?!</p> <p>Also, I see no mention of Mountlake Terrace in any of the plans. WHY?!</p>
SNOHOMISH COUNTY	<p>There are public transit options available in the Seattle metro area that could be improved without having to do light rail links. People that live in the north have fewer options, so I believe it would be more palatable to emphasize getting light rail built where it can reduce congestion on I5 and I405. Those of us who live out here are not likely to support the expenditures if we are not going to see the benefits for 25 years. We keep hearing it's only about \$200 per person per year, but that means we will have spent \$6000 each before we even begin to see the benefits, and that's assuming the project is on time and on budget.</p>
SNOHOMISH COUNTY	<p>Sound transit needs to improve the reliability and functioning of its existing North line before it invests in expansion. I have nearly stopped taking the train due to its unreliability. Mudslides and mechanical problems too often. Fix that, perfect, then move on expansion.</p>
SNOHOMISH COUNTY	<p>The tax increases should be more equitable. For example, 1) forget the sales tax, it is already too high. If you want this tax, make it a luxury tax instead. 2) Motor vehicle tax should go up to perhaps 1% or more. Too many vehicles on the road are the reason for all this development in the first place. 3) You should reduce the property tax by at least half of what your proposal states. Property taxes are already ridiculously high. 4) Increase the taxes on gasoline according to octane rating. 92 octane, highest tax, 89 octane less tax, 87 octane very little tax, and so on.</p>
SNOHOMISH COUNTY	<p>You've already shown that every project you do is vastly over budget and that \$200 a year will turn into \$600 a year or more. Even the \$200 a year is too much. I can't afford this and will be voting "No".</p>
SNOHOMISH COUNTY	<p>We need a mass transit rail system in the puget sound with enough parking, stops and reliability to make it usable for the majority of commuters. Similar to BART in the Bay Area. We need to do what it takes to achieve this goal.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	All transit centers and park & rides that I know of in the Puget Sound area have inadequate parking. I often consider partial transit trips, with a car drive from an outlying area that's not in the intended service area, connecting to a major transit center; but the biggest problem for me is parking. I have periodically driven from my home in SW Snohomish County to Northgate Transit Center, Aurora Village Transit Center, or the University District, stopping where traffic becomes severely congested. But I often abandon the idea and continue in my car because there is not parking that I could find in a reasonable amount of time.
SNOHOMISH COUNTY	We should have started thirty years ago.
SNOHOMISH COUNTY	get a life with your 200 per year cost per resident. a 40,000 truck would be taxed at about 900 a year, plus sales and property taxes of about 1200 a year. your totally full of crap
SNOHOMISH COUNTY	Waste of money. Please call me for my views that are not focused on soundtransit
SNOHOMISH COUNTY	You guys need to change the name from sound transit to SEATTLE transit!
SNOHOMISH COUNTY	Can't park to ride bus. I'm sure I can't park to ride rail. Area is totally F'd up in transit. Used RTA in Denver for years. Seattle area I tried for 2 months and gave up. Denver has ONE freaking agency to serve SIX counties. Here - let me count the ways to fleece the taxpayer: Metro, Community, Peirce, Sound Transit, Everett, State Ferries, SLUT, Monorail....all for ONLY 3 counties. YOU SHOULD ALL BE FIRED.  (2) I really wish on that survey was: Should lowest cost labor be used and not prevailing wages on a project this size? Should ST do more to reduce the cost of operating the system. Every morning I go to lunch with the wife and meet a group of six retired Sound Transit bus drivers who tell me how much an uneducated driver makes, another great way to fleece us.
SNOHOMISH COUNTY	Provision should be made to include light rail on the railroad corridor from Snohomish to Kirkland. Those of us who use highway 9 and highway 522 are not included in any of your proposals. There isn't any bus service on hwy 9. Light rail from Snohomish to Kirkland/Bellevue would reduce some of the huge amount of traffic on hwy 9 and 522 since both feed into I-405. A lot of us using this corridor work in Kirkland and Bellevue. I would be livid if I was taxed for these proposals that make no provisions for the large amount of traffic on hwy 9 and 522 coming from Monroe, Snohomish and Lake Stevens.
SNOHOMISH COUNTY	There is nothing in this project I would ever use. I will be dead before it is finished, It will bankrupt me. Anyone who rents will not be able to pay , when their landlords raise their rents.. This is a very bad for the general population.
SNOHOMISH COUNTY	Major issue for me is limited parking at ash way PR. You must be there by 7am or u must drive. It's full
SNOHOMISH COUNTY	Seattle has become a dirty hub of person, drug and property crime. Seattle mayor and council has let the city deteriorate and made their police department impotent. I have no interest in visiting or shopping in the Seattle area. My only interest south is access to the SeaTac airport. Such an environment will make rail a haven and conduit for more crime. Bus systems allow for more varied access to more locations. It allows the system to adjust and react to Increased or decreased service as areas grow or diminish.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	17-25 years seems too long, we're over due for mass transit options now! We need to build faster, sooner!
SNOHOMISH COUNTY	<p>First, before any more consideration is given to the east side, get rid of the disaster that has evolved from the 405 HOV lanes. Traffic is stifled as it is on that freeway to even consider adding more busses into the mix.</p> <p>As for the rest of the project? Why should the taxpayers have to foot yet more of a bill for services they won't see for a decade or more? The counties in question need to reconsider the allocation of their budgets before thinking they can foist the bill for this off on people who won't get the chance to use it, or to whom it won't matter for...oh, say, another 25 years.</p> <p>Get it right. This plan is a joke, at best, and a farce at worst.</p>
SNOHOMISH COUNTY	Quit wasting tax payers money on these failed projects. Tear down the convention center and make I-5 a 5 lane highway in both direction though down town Seattle. That would be a start....
SNOHOMISH COUNTY	People living in the outlying areas still need to rely on their own cars in order to reach a transit center, only to find there is no parking available. We really need some sort of scheduled bus service to take people to the transit centers.
SNOHOMISH COUNTY	It would be wonderful to plan how to mitigate the resulting traffic congestion that will result from all the construction during these projects... Make it worth it to people to carpool and for employers to allow folks to work from home. Incentivize staying off the road somehow!
SNOHOMISH COUNTY	The proposed \$50 billion tax increase is simply outrageous. There is no longer enough money to continue to ask for never ending tax increases. I would love my kids to stay in the Puget Sound Area. Unfortunately the never ending tax increases sought by progressives and existing governments means that the costs are simply becoming too much. The area is a beautiful place. Too bad no one can afford to live here.
SNOHOMISH COUNTY	I have no real understanding of much of what is being proposed. I suggest you develop an online tutorial for people to watch -- perhaps an animated tutorial. Although I have answered the above questions, I have no confidence in what I have checked or not checked. In particular, I have no understanding of which projects are projected to cost what (level of) money and which residents and tax payers will benefit most -- if at all -- from which projects.
SNOHOMISH COUNTY	Use transit (buses) it is more flexible to changing demographics and population centers and changes in business and manufacturing centers. This is not Europe, it is America and Americans like the independence of their vehicles. Not every one can use transit and who do you think pays for these projects through taxes and vehicle tabs, the people who own cars and trucks and the businesses that use them. We are taxed enough already. A concerned TAX PAYER.
SNOHOMISH COUNTY	I say drop the whole plan. Put more money into building more lanes on new and existing freeways, forget tolls and help us get our cars to places we want to go in less time.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	<p>Choo choo trains have been obsolete for almost a century, yet we have politicians who have decided they will do what is necessary to force people out of their cars. Transit (buses, trains, light rail, ferry, et al) has been an enormous waste of my money, consistently over budget, extensive delays and lack of use. Time and money is of value to our family. Some care not whether they have to wile away their time waiting for a bus or train to show up. Not here.</p> <p>I've told our politicians to privatize our entire transit system, but they do not listen, nor do you. Me, I'll walk before I'll ever ride a state transit system.</p>
SNOHOMISH COUNTY	If you need to raise Taxes why do we have RTA TAX??
SNOHOMISH COUNTY	North sooner rather than later
SNOHOMISH COUNTY	<p>SOUND TRANSIT IS "NOT" TO BE TRUSTED. YOU ARE NEVER ON TIME, WAST MONEY - WHY NOT, IT IS NOT YOURS. I WON'T LIVE LONG ENOUGH TO USE THE SYSTEM. I HAVE NO NEED TO USE IT EVEN ONCE IF IT WAS READY TODAY. I DO NOT WANT TO HELP FINANCE A SYSTEM THAT WILL BE OUT OF DATE BY THE TIME ( SOME 20 YEARS OR SO) THAT YOU MAY COMPLETE IT.</p>
SNOHOMISH COUNTY	Why is only residential property taxed for this? Businesses benefit from transit--there should be a commercial property tax levied to lessen the burden on consumers.
SNOHOMISH COUNTY	Your survey Questions DO NOT match the Response boxes so that answers do not match questions..... Makes most of survey useless, just like the Everett plan..
SNOHOMISH COUNTY	I will never vote for or support these types of projects. Taxpayer money has been wasted again and again - and the purchase of the failed bike company in Seattle recently is just one more example of poor judgement and management that I will never support. This project will only line the pockets of politicians, corrupt contractors and will not help the little guy one bit in the end.
SNOHOMISH COUNTY	Your plan takes too long. Buses are more efficient than rail -- a bus can go anywhere, rail is limited to the rails. Remember the obligation to the N-S spine, not neighborhoods in Seattle. Go directly from Seattle to Everett, eliminating the Boeing spur. Run frequent dedicated buses from the Eastmont area to Boeing in Everett. Get the companies in the Paine Field area to help pay for the buses. We visited Washington DC a few years ago, riding the rail system from Fairfax into DC several times. Most obvious was the large parking lots/garages at nearly all of the terminals. People need to be able to DRIVE their cars to the rapid transit terminals.
SNOHOMISH COUNTY	I live in Everett....25 years is way to long to wait to get the benefit of light rail....I am not seeing my tax dollars being used to better my commute....the sounder is ok....but just ok....,as it only benefits those who work early in the morning.....why?.....until light rail hits this region why not have the sounder run more times during the day?
SNOHOMISH COUNTY	I understand mass transit is an important part of our cities infrastructure but a 50 billion dollars price tag for a 1% ridership does not fly. I will be 70 years old by the time this is completed.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	I'm confused about question 14. It says that the ST3 plan would cost the average resident in the PS about \$200 per year, but question 13 says that the money would come from sales tax, motor vehicle tax and residential property tax. Would the sales tax be applied equally to the affected counties? Would the tax be applied to King and Snohomish counties at the same time? More development is proposed for King County than in Snohomish County. Would the sales tax imposed reflect this distribution of development?
SNOHOMISH COUNTY	My biggest issue is the different transit systems in the various counties which don't take a regional approach, as well as the difficulty understanding how/what to pay. Sound Transit is regional, but Metro and Community Transit aren't. It makes the transit system unduly complicated and sometimes seem quite ridiculous for the users. For example: going to Seattle along 99 from Snohomish County. If you want to take one of the rapid ride buses, you have to change buses at the county line. Paying (which system am I on now?) can also be complicated. I have lived and used public transit all over the world, so I'm very confident getting around - yet even I get confused. How is it that the transit systems in countries where I don't speak the language are easier to navigate than the system in my own back yard? In addition to paying for and building transportation systems, more emphasis really needs to be paid to the end users and how it all goes together. I teach students from many other countries, and it is beyond confusing for them, which is a problem because they don't usually have cars. My other concern is paying for the systems. Many lower income people have to live far away from their jobs because of housing prices, and things need to be priced in such a way that they can access the system. I would hope that any payment plans take this into consideration. I'm more than happy to pay more so others can have access to jobs and housing.
SNOHOMISH COUNTY	20 years ago people in snohomish county were told we will tax you so king and pierce county can upgrade their counties. both king and pierce counties kept adding projects to get done and snohomish county kept being taxed to help pay for it. we were told you will be next after 20 years, well now you are saying keep paying taxes and in 25 years it will be your turn. let me guess in 25 years we will be told your next again.
SNOHOMISH COUNTY	Keep up the good work!
SNOHOMISH COUNTY	This plan is all over the board. 25 years? 50 BILLION?? Are you serious??? It needs to focus on the best bang for the buck objectives first. What option will get the most cars off our roads? Prioritize those by cost/timeline to deliver the greatest benefit to the most people in the shortest time frame. THAT is how to run a city. Back to the drawing board Sound Transit!
SNOHOMISH COUNTY	Light rail to everett should be top priority
SNOHOMISH COUNTY	Why should we believe ANYTHING you propose?
SNOHOMISH COUNTY	Can we feed and house our homeless first, PLEASE!!!!!! Spend the funds where it is needed!!! For the homeless and lower income people!!! NOT the Seattle millennials or lawyers, bankers, overpriced restaurants, ridiculously overpriced housing. Will the last humane human being leaving Seattle...please grab the flag!!!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	I would like to see light rail extended to Mukilteo and Edmonds, and I'd rather see light rail access rather than a bus linking the 145th street station to Lake Forest Park, Kenmore, Bothell and Woodinville. I'd also rather see light rail instead of bus down the 405 corridor (Renton to Kirkland up to Bothell and Woodinville).
SNOHOMISH COUNTY	Plan is good, but scheduled durations are unacceptably too long. 25 years just to complete? We needed light rail transit over ten years ago and the best idea was to expand the monorail??? No more time can be wasted. Start building now.
SNOHOMISH COUNTY	Traffic congestion is a self imposed problem. Don't like traffic? Then live closer to your work. It really is that simple. Why should I be taxed more for my fellow citizens lack of understanding of simple economics?
SNOHOMISH COUNTY	Sales tax should not be used to fund this. Western Washington sales taxes are already too high.
SNOHOMISH COUNTY	Make Amazon pay for it.
SNOHOMISH COUNTY	How about more highway lanes??? That was never considered!
SNOHOMISH COUNTY	Puget sound covers a wide area and I'm not sure taxing everyone to improve transportation in the Seattle area is fair. What I understood is that I'll be paying for expansion to Everett (30 mins away) and wouldn't even get it for 25 years! At that point I still have to drive half way to get to any form of mass transit to Seattle. Sound transit also only runs at popular event times from Everett. Will the proposal increase run times?
SNOHOMISH COUNTY	I strongly recommend the immediate used of shoulder operations for buses.
SNOHOMISH COUNTY	I have no confidence in this project. It's taking too long and doesn't seem like the planners are doing a good job.
SNOHOMISH COUNTY	The #1 reason I don't use mass transit is that the Park & Rides fill up too early. There needs to be more parking everywhere. It doesn't matter how many busses or light rails stations are added if there is nowhere to park.
SNOHOMISH COUNTY	Canyon Park/Bothell area REALLY needs a dedicated bus exit in the middle of the freeway. Having to merge over to the right to exit & back left to the carpool lane after getting back on the freeway is a total nightmare.
SNOHOMISH COUNTY	NOne
SNOHOMISH COUNTY	I strongly support the overall proposal and whatever sequence/timing makes the most sense for the routes proposed. I have seen light rail voted down at least 3 times from the late 60's through the 70's to my great disappointment. The cost is considerably greater now; however, overall it's still cost effective in the long run and will add to the quality of life in our beautiful region.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

<p>SNOHOMISH COUNTY</p>	<p>If you are NOT going to help out Snohomish County within the next very few years- I'm totally against any plan. 50 years is to long for us to be on hold!</p> <p>We've been waiting for rail, just to Lynnwood, for 19 years and still have to wait for 8 more. You are so busy 'sucking up' to King county [and Tacoma a bit less] and just wanting our money! The sales tax in my town will be over 10% with your add on.</p> <p>Why is Snohomish county always a 25 year wait? Just cross us off you list, as, you only need us for our \$\$\$\$'s. You are NOT HELPING US OUT - AND THESE MAYORS, UP HERE, THAT ARE ON YOUR BOARD, ARE JUST WINDOW DRESSING [they, obviously, are afraid to vote against anything that Seattle wants).</p>
<p>SNOHOMISH COUNTY</p>	<p>You suck at planning, you suck at staying on budget, you suck at listening to the public. Most of your current transit is underused and lame. Why on earth would we give you more money? You expect my family to pay \$200 more PER PERSON PER YEAR? You must be insane. Build some damn roads and encourage local companies to move to work-at-home models for their employees when possible (tech, customer service back end employees, etc.) Stupid buses and trains are NOT the answer.</p>
<p>SNOHOMISH COUNTY</p>	<p>50 Billion is overwhelming. I am 65 and you will tax me out of my house on my fixed income. Only \$200 per person per year....my friends that is in addition to the funding you want for schools and other programs. You need to more cost effectively address priorities, not bikes and pedestrians. You need to make direct transit up and down I-5 more passable. Is there any discussion of an alternative freeway out on the East side and why isn't this even discussed? What does one seat on the Sounder cost today....all of these things should be self sustaining in 5 years. Please listen. Or I guess I will have to move to Spokane or Tennessee.</p>
<p>SNOHOMISH COUNTY</p>	<p>I very strongly feel that we need to work to integrate these different modes of transportation so that people can actually get from where they are to where they need to go. Seems obvious, but let's think about it. How does someone in e.g. Lake Steven's or Snohomish or Everett or Bellevue get to the airport and back? Well, right now they drive. Would these improvements make it possible for them to use public transportation to get there? I think that's very important. Say I live in Mukilteo and want to go downtown to do some shopping and then have dinner at a nice restaurant and then get back home. Is there a reasonable way to do that without spending 2 hours or more waiting for buses to do that? Why can't the Sounder train accommodate that? Could the service be expanded? Will these means of transportation actually enable people to get out of their cars? People don't want to have to drive everywhere. Don't spend money trying to convince people to not drive. They will gladly take public transportation if it's realistic and helpful.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	You fail to understand that adding more transport INCREASES traffic and not reduces it, since more people will use it. Also using compulsory taxation is unethical! Use Toll system!
SNOHOMISH COUNTY	Everett to Seattle light rail should be #1 priority in my opinion. Waiting until 2025+ is way to long.
SNOHOMISH COUNTY	King & Snohomish buses could already be made faster by doing the following: 1. Allow 2 buses to load & unload at the same time at Mountlake Terrace P&R freeway station. In downtown Seattle we have buses this close loading and unloading - there really isn't a safety issue. 2. Get rid of wheelchairs on regular buses. The ramp going up/down and the load time makes just 1 wheelchair load or unload really back up traffic and other buses behind that bus (in downtown Seattle). The buses do NOT have to serve everyone, just 99% of commuters - give wheelchair people taxi passes and speed up the buses.
SNOHOMISH COUNTY	We will vote against any proposal that raises our sales tax to 10%.
SNOHOMISH COUNTY	stop wasting money on projects that will not fix congestion . Your analysis shows that .
SNOHOMISH COUNTY	Remove the increased Snohomish county sales tax for transit and replace it with your proposed property tax increase. I own my business and commute to people's homes with all my tools & equipment, so transit is not my means of daily commuting. I often choose commute times that are off peak hours.
SNOHOMISH COUNTY	Look into creating Hyperloop tech into our local as well as long route from state to state.
SNOHOMISH COUNTY	Efforts should be made to shorten the light rail timetables.
SNOHOMISH COUNTY	I have to say that last week I took the light rail transit from the university to the airport. It was easy, and I enjoyed the experience. I just wish that it was not going to take 25 years to get the light rail transit to Everett, as I and many people I've talked to would use it to get into and around Seattle. I truly believe that it will reduce the number of cars on the road once it is built. I was talking to a woman who works at Sea-Tac and commutes from Marysville, if it was built and easy for her to access she would have been happy to be able to use the train.
SNOHOMISH COUNTY	I'm in Everett and was in the original train program from 96?, where did it go - nowhere. Been pay RTA taxes for years for nothing. You put in the sounder from Seattle to Seatac, another mess. A train for tourists, an honor system of paying - Hows that working out for you? Now a tax for perpetuity for something I will not use. The tax payer funded money loosing system is a waste. North Sounders \$29/passenger government funding, running at 1/3 predicted capacity, closing when due to rains...- At that rate why not just make the buses free and save us all money. 405 screw up, tax us for another lane, then give added capacity to only 3+ carpools (forcing more cars to general purpose lanes and making them much worse) Then collecting tolls to fatten the states pockets. Oh I see how it is, create a worse problem so the state can step in an fix it with tons of tax payers money and charges, I say NO. Instead of the big government approach, how about things like Lyft Line. Small people doing big things, NO states taxes/costs, NO state/county/city employees, NO pensions, NO health care benefits, etc. A modern day approach that is flexible and adaptive to peoples requirements.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	Not enough relief soon enough for north-end (North King County and South Snohomish County). Why nothing on Highway 9?
SNOHOMISH COUNTY	The survey says it is half done after the first question which leads you to believe it is going to be shorter than it is. Subsequent questions took a lot longer.
SNOHOMISH COUNTY	Sound Transit plays no part in our family's future. We have observed that if you want to live a normal life with government dependancies, Sound Transit will fail you in every category. Please stop wasting our money on political boondoggles that do not solve our means of independent living.
SNOHOMISH COUNTY	My biggest concern is DOT projects in the past that seem to have been run less than efficiently with allocated monies being poorly overseen. Making sure the tax dollars set aside for these projects are carefully monitored and accounted for and that our sub-contracts are managed like they are your own dollars and reviewed regularly seems to be a large concern as well. I may be referring to City of Seattle projects but they were in conjunction with State DOT.
SNOHOMISH COUNTY	I think the main focus should be light rail expansion before anything else. Once that is done connect it all together with more buses and better improvements and then we will have an amazing transportation system. I'm 24 years old and I've always dreamed of Seattle having a transportation system like Portland or Vancouver B.C.. I would love to see it happen before I'm 35.
SNOHOMISH COUNTY	the plan should be implemented more quickly
SNOHOMISH COUNTY	The problem is that light rail or buses will have to be subsidized which tells me they should not be implemented. Rail lines never get the occupancy that the politicians say they will and it ALWAYS costs far more than they promise. If the politicians are willing to sign a legally binding document that they will personally pay for any cost overruns out of their pockets and if they cannot they are willing to go to prison for having lied to the public I'll vote for light rail.
SNOHOMISH COUNTY	More parking. Many choose to drive because P&R is always packed during rush hour
SNOHOMISH COUNTY	The timeline for this plan should be depreciated! ST3 should be completed in a 15 to 20 year timeline, NOT 20 to 25.
SNOHOMISH COUNTY	An easy addition/change to existing transit that I would strongly support would be to add commuter buses that exit the freeway on Mercer and travel to 5th before heading to downtown Seattle. Making the downtown commuters who work north of the core have to transfer or walk farther creates a deterrent to using any transit options. Including commuter stops on the NW side of downtown (Queen Anne, SLU area) would also be a welcome addition to the light rail plan.
SNOHOMISH COUNTY	The plan to extend light rail should be realized much faster
SNOHOMISH COUNTY	We need more park and ride infrastructure. None of this benefits those of us who can't walk to a bus stop or light real station etc. The main reason I don't use the bus today is because I don't want to get up at 5am to secure a parking spot at the park and ride.
SNOHOMISH COUNTY	Bus fees are too expensive. 10 dollars to go from lynnwood to downtown seattle and back. That makes it more appealing to take your car and pay for expensive parking.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	Proposed vehicle, sales and residential taxes are quite excessive and this survey vastly under-reports the actual values of those proposed excessive and burdensome taxes. Sound Transit needs to be honest in disclosing how much ST3 this will cost the tax payers over many decades, keep out of sales and residential taxes, and stop penalizing vehicle owners with ever increasing registration taxes.
SNOHOMISH COUNTY	The proposed projects in #12 should be reversed. It looks like a lot of investment and services will be emphasized in King County and Pierce County esp. the south sound areas. The traffic in Snohomish County esp. northbound is getting worse everyday. City of Everett, Marysville and Lake Stevens and surrounding areas are a major bedroom community hub as people can't afford to live in the areas from Lynnwood, Shoreline, Edmonds, Seattle. Making citizens in Snohomish pay for increasing costs of transit improvements in many other areas is a big mistake. Boeing and big Shopping area in Tulalip have been the major employment centers in this area for a long time and will still continue, but this area don't get any attention from Soundtransit as it should be. Other suggestion: the trip of train from Mukilteo to Seattle should be increased during the weekday and also provided on the weekend, so people can use it to go to Seattle for recreational purposes on the weekend. Nowadays I don' t go to Seattle on the weekend anymore due the heavy traffic jam on I-5 from Friday - Sunday just like during the weekday.
SNOHOMISH COUNTY	Please consider that some of the worst traffic in the state is 405 from Everett to Bellevue. That should be a heavy focus of your efforts. The ultimate goal of transportation is to link the major areas of life in the NW together. Those are really: Seattle, Bellevue/Redmond, Everett and 1 day as far south as Portland or as far North as B.C. we want to connect the world. But forget Tacoma. It's not worth the investment.
SNOHOMISH COUNTY	We are already decades behind where we should be. We need to pick up the pace!
SNOHOMISH COUNTY	What will be estimate cost to ride these service which would be on top of the taxes we would already pay to build these services? Keeping the daily use cost down are important to success of these projects.
SNOHOMISH COUNTY	This takes to long to build by the time it's done we are already so far behind, why can't we get rail up along i5 from Marysville to Olympia
SNOHOMISH COUNTY	Seattle is offering a plan that is too little too late. As a world traveler I've been on various mass transit systems. We need a mass transit, fast system not a disneyland train. As I travel from Everett to Seatac I find the time is the same for me as if I had boarded the light rail in Westlake Center. It's just not enough!!!
SNOHOMISH COUNTY	Could you increase capacity of the Sounder train by adding just a station around the sculpture park? You would likely get more commuters since there are many office buildings along Elliott Ave north and south of the park.
SNOHOMISH COUNTY	How about running sounder on weekends? The "infrastructure" is already there... Let's be more like other major cities! Also, 5:30p, last train going north on weekdays...really???!!!
SNOHOMISH COUNTY	Tunnel disaster aint enough?
SNOHOMISH COUNTY	Get the line to Everett a lot faster than proposed!!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	Although I would love the light rail to Everett already be finished its not. I live in Everett & did live in Lynnwood... transit in the North end sucks. Local buses stopping as early as 8pm. Mass transit to the area running only in 30 or an hour intervals. It's frustrating. So, I say yes focus on the light rail project which in my opinion should have already been under construction years ago... but more so yes on the rapid ride in the North end.
SNOHOMISH COUNTY	Do not make this tax payer money grab a reality.
SNOHOMISH COUNTY	I think rail lines are more important than busses, let's get the main lines done first adding Spurs later.
SNOHOMISH COUNTY	Need to re-think about first phase construction to the outer cities to ease daily congestion . Example - Issaquah
SNOHOMISH COUNTY	Light rail to Kirkland!!!
SNOHOMISH COUNTY	Thank you for this transit initiative. We need a strong public transportation system!
SNOHOMISH COUNTY	ST 3 is very important to the area and should move forward faster.
SNOHOMISH COUNTY	The businesses of the area, which benefit from better traffic, seem not to be tasked with paying for this plan. As they are the money-generating units, you should be asking them to pony up, not the residents, who are already fed up with the rate of growth in the area. Put a tax on new construction, if you like. Auto taxes, OK. Tax on the increase in property value after a certain date, I would support that. A tax on the increase in share price of corporations that do business in the area, I would support that. "No" to sales tax or residential property tax, except as noted.
SNOHOMISH COUNTY	what is "transit-oriented development associated with transit stations"?
SNOHOMISH COUNTY	Prefer the north end light rail and sounder expansions to be sooner to support Lynnwood and Everett now not in 20 plus years...urgent need for light rail versus bus transit. The traffic challenge in the north end of Puget Sound always take a back seat to Seattle and south end ...we need light rail to Everett now!!!!!!!
SNOHOMISH COUNTY	Better routes/transit options from Lynnwood to Downtown
SNOHOMISH COUNTY	Mass transit in Snohomish County is a JOKE right now because transit centers are filled before 7:00 a.m. Good luck getting us to vote on tax increases when we can't use existing services due to the lack of parking! Yet you want me to vote to spend thousands of dollars over the next several years to support light rail that, with your track pattern, will be unusable due to the lack of parking? I used to commute daily on transit from 2004 to 2011. I'm finally DONE supporting transit due to your poor handling of parking.
SNOHOMISH COUNTY	Too much money to move too few people
SNOHOMISH COUNTY	more buses and no more light rail. Bus service far less expensive than all of this light rail expansion.
SNOHOMISH COUNTY	Sped up time frame.
SNOHOMISH COUNTY	25 year timeline for Everett is a tough pill to swallow...
SNOHOMISH COUNTY	Light rail projects should be a priority for the northern part of the region. 25 years is unacceptable. Please reconsider the timeline to bring light rail to Everett.
SNOHOMISH COUNTY	While working on these plans, bus service needs to continue and improve NOT be decreased. I was a bus commuter to a full time job. This became more and more difficult as service became more limited. Public transit needs to decrease commute time to increase public use.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	Please stop with the buses, they don't work, they never have. Light rail is our future, spend the money now on that! Puget Sound could be the next San Fran/Oakland. We need to connect the north and south cities! Everett and Tacoma, via light rail.
SNOHOMISH COUNTY	Great job!
SNOHOMISH COUNTY	Easier access of the light rail along the I-5 corridor to Everett/Marysville.
SNOHOMISH COUNTY	Waiting for 25 years to get light rail to Everett is unacceptable. I'd vote to support and pay the additional taxes only if Everett is prioritized.
SNOHOMISH COUNTY	We need any bus access in SE Everett. We have no bus service at all. 35th ave SE from 100th to 132nd. We had it 20 years ago. It's 1 1/2 miles to the nearest bus stop. "Deadhead" buses run this route several times a day, but Community Transit said it would put them off schedule to pick up and drop off people. Why should I be taxed for something I have no access to? Toni Poh
SNOHOMISH COUNTY	Later service, earlier service everyday from/to Seattle and north (Everett)
SNOHOMISH COUNTY	Time lines for all of the mass transit can not sped up. Construction around the area is slowing, traffic down as is, the tunnel downtown is taking for ever, and who is going to pay for that cost over run. Where and how is all the federal transportation money being spend, King, Pierce & Snohomish counties gets hundreds of millions of dollars for transportation. We are way behind on the transportation game, hope we can get something done SOON !!!!!
SNOHOMISH COUNTY	look at other countries with successful transit systems. there's no use of light rail on long distsnce commutes, instead you should be using full size mass transit rail system running up and down between Everett to Olympia, and use light rsils on extensions running laterally, runnig west-east. Light rail is too slow, run out of passenger volome capacity too soon. You're wasting \$ and it's a mistake with the current plan.
SNOHOMISH COUNTY	Your transit system is ineffective now and very expensive given the limited ridership, inefficient routes and extremely high overhead costs. The expectation that we should continue to sink unlimited dollars into a system only some people can or will make use of, rather than improving and expanding our roadways is pie-in-the-sky thinking. You cannot WILL people into using public transit. However, you can boondoggle the public into paying for it. Thus we all lose because it's not a broad-spectrum plan - it spends money in a specialty sector for a certain group of people and no more.
SNOHOMISH COUNTY	I been paying for this for awhile with no benefit Money from gas taxes and tax should be spent strictly on roads and not for bicycles ,general fund or tolling wsdot waited so long to do anything that it has now became a problem. Quit issuing licenses to the illegals. I ride motorcycles 95% of the time and live close to work. I am tired of you taxes Wake up and smell the asphalt.
SNOHOMISH COUNTY	Don't do this buildout on the backs of homeowner taxes....  More lanes less trains

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	The timeline needs to be sped up and are Federal being sought to help funds the projects?
SNOHOMISH COUNTY	We need more transportation in Mill Creek.
SNOHOMISH COUNTY	The time frame to complete the entire system within 25 years is excessive. Why so long when there is already experience with the building of the earlier system? There should be a learning curve that has taken place. Let's get it done sooner.
SNOHOMISH COUNTY	I'll think about it, talk with others and will send this on to another tax payer and have them include my thoughts along with theirs. Thank you for taking this on as such a needed project and win/win for our state. dayna
SNOHOMISH COUNTY	The decentralization of city and urban development should dramatically reduce the need to commute to jobs, entertainment or shopping.
SNOHOMISH COUNTY	The bus lines are/have been unreliable (sometimes just not showing up, or showing up as late as an hour after they should) and, on the best days, take 2-3 times as long as driving in traffic to some locations. I am not willing to bus if it is important for me to show up somewhere on time. You may have better luck with ridership with trains that (thus far) don't have the same bad reputation busses in the pacific NW do.  Also, taking the bus/train is not always an option, so I am opposed to increasing public transit *rather* than improving driving conditions, both problems should be addressed (one recent Mayor seemed to be of the opinion that making it more painful to drive would make people more willing to take public transit. Bad idea. People will still drive/need to drive, simply make public transit reliable and fast and people will prefer it to driving). I did not bus to my last job as it would have taken 2 1/2 hours and nearly a mile walk each way... It was only an hour drive...
SNOHOMISH COUNTY	There are too many cars on the road
SNOHOMISH COUNTY	I oppose using taxes to fund the proposed projects. The proposed projects should be funded with revenue from those that use the system.
SNOHOMISH COUNTY	The BRT bus service improvements make no sense when the cross town services are not included for enhancement. We don't use the service because the cross town connections are so time consuming..at least 45 minutes additional travel time per trip. It was not worth it to us. A trip from Lynnwood to Redmond was 1 and a half hours one way. WE have no inclination toward buses because they are so unreliable.Especially the Everett transit. We have tried the connection to the Edmonds Community College. Very unreliable from Mukilteo. In Particular the #113 line. Sometimes they show up and sometimes they don't. Speaking of the BRT funding is a waste of time as far as we are concerned. Strongly support the Everett connection for light rail. That impacts a far greater traffic concern than to Ballard,West Seattle and Redmond.
SNOHOMISH COUNTY	Need light rail to come up to edmonds. Train is great but it goes to pioneer square so not easily accessible to parts of downtown or south lake union whereas light rail accessible from downtown and essentially anywhere.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	I strongly oppose the choice of the sidetrack to Paine Field to/from Everett, which is merely pandering to business and political interests. Bus service from south county was eliminated to that area in 2003 and never restored. Bus service from north and east county was drastically cut in 2010, with hardly any restored. Boeing employees obviously prefer to drive and private lots in the periphery charge \$70/month do to so (if my sources are right). The demand doesn't warrant light rail, nor does density! Further, BRT is being tried out from the southeast in 2018, so why not do the loop (downtown Everett to Paine Field to 128th) and give the county transit agency the operating funds to run it? BRT first, until demand warrants anything more. One can compare this to the Ballard tunnel option and see that, for about the same capital investment, the Ballard option gets you triple the ridership and lower operating and maintenance costs. Why not save the \$1 billion+ for Snohomish County and use it to: (1) open the ring of BRT in only a few years, when most of us will be alive and still working to use it; (2) contribute to a separate bus overpass at 128th (a direct access option there would be outstanding, but could be omitted); (3) contribute to finishing the direct access ramps at 164th (to enable freeway buses going from Everett to Seattle to always be in the HOV lanes during peak periods, no criss-crossing lanes, helping commuters of all types today); and (4) take over all intercounty bus service from Snohomish to King County that goes between regional centers, e.g. Lynnwood to downtown Seattle, Mukilteo to downtown Seattle, Everett to downtown Seattle, freeing up the county bus providers to greatly expand their in-county service, again helping today's commuters. By doing this, Sound Transit could show those voting on this colossal package "wins" within a few years rather than telling us to pay \$10,000 or so, to wait 25 years - if you live that long, and live in this area that long, and if you can afford to pay for that long. Frankly, since the ST-3 proposal for Snohomish County is only for those working and/or living there 25 years from now, our county's share should be 100% paid for via development fees.
SNOHOMISH COUNTY	The extention to Lynnwood should be built ASAP.
SNOHOMISH COUNTY	Taxes should be collected thru an income tax.
SNOHOMISH COUNTY	Oppose any additional sales tax as revenue generator.
SNOHOMISH COUNTY	I'd be interested in knowing what contribution local businesses make to paying for this--large scale employers (like Boeing, in particular) should help to pay to get their employees where they need to go.
SNOHOMISH COUNTY	Needs to happen as soon as possible.
SNOHOMISH COUNTY	Sound Transit needs to learn to operate using the funds it has already better before taxing citizens more to do more projects.
SNOHOMISH COUNTY	Everett to Bellevue and Bellevue to Everett
SNOHOMISH COUNTY	I do not want to be taxed any more than I currently am. I do not want to pay for things that I do not use. If they want to put this project in they should use the money they get from me whenever I go on the 405 express lane----- I refuse to give any more of my money!

<p>SNOHOMISH COUNTY</p>	<p>In the meantime seriously please sort out the parking at park and ride situations and make more bus routes to the main park and rides! I go from Everett to Redmond each day and I prefer to take the bus, even the two busses for 2 hours! But I cannot do that if I go to both the S Everett and the main Everett Stations and there is not a SINGLE free space at 7am! Why not have a quick rapid bus route that picks people at a CENTRAL Everett Location, where people can park and shuttle to these places? Because the existing busses within Everett are not worth using, but if there was another CENTRAL Everett Location to park at I am sure I am not the only person who would use it - the Everett main station is fairly easy to access by bus (and does have more parking, sometimes, if you drive all the way up the road and don't mind parking by the homeless shelter - nothing against homeless people, but it doesn't feel totally safe to leave a car where loads of people are out drinking and doing drugs, which I do most days at SEVEN IN THE MORNING when there isn't another space.). But the South Everett Station is so full ALL THE TIME I don't even know how people deal with trying to go there in the morning. And this is like before 7am! I would love to cycle more, but it would be even more desireable if the cycle path had a bit less of going on traffic by the mall and nearly getting killed...Seriously, the park and ride situation NEEDS to get sorted out and I am sure there are relatively cheap ways to do this with limited infrastructure investment while we wait 25 years (or let's be realistic, it will probably be more - although thank God you aren't going to try to build any tunnels going to Everett - are you?). Something in Central Everett would be brilliant and I don't think it would be hard to set up. I mean, why not try and make a lot at the South end of Broadway where it's entering the freeway and stop having the busses stop at 34th and Broadway (a bit redundant since it's like 2 blocks from the station isn't it?) and figure out some kind of parking thing, or at least let people from the area get there some other way. While you're at it, you could even put a parking lot on the far other end of Broadway, like in North, North Everett and people could catch the bus there before it gets to the Everett Station, thus giving some people something closer to home and also opening more spaces for parking at Everett Station. Why not? It's not like having an additional bus stop in North, North Everett would really impede the ride for people going South, and also do you know how many people commute into Everett from Marysville, Lake Stevens etc to get busses? Give them another location to park at, if you're not giving them more rapid services in their area. I think with the relative values of properties in North side of Broadway in Everett and then across the flats towards Marysville you could pay very little to have a very successful park and ride lot. I know that the 513 bus goes down Evergreen Way, I wonder if there's another way for more busses to serve something in the middle of Everett and maybe without taking a lot longer, and going where there is parking...? The bottom line for transit is that you have to make it more convenient for people than driving, people around here are so obsessed with driving their own cars everywhere, so I sympathise with you and your situation, it's a tough sell. I lived five years in Europe and never had to drive and I much much preferred it. Traffic on the 405 is such [explicit] I don't know why</p>
<p>SNOHOMISH COUNTY</p>	<p>I am highly supportive of all these projects but the time line. We need to find a way to implement all of this within the next 5-8 years, not 20 years from now.</p>
<p>SNOHOMISH COUNTY</p>	<p>Please give priority to additional parking at transit centers. Local bus service (especially CT!) has been cut and is not reliable, so connections are difficult. Driving to a main line is the only way some of us can commute at all.</p>
<p>SNOHOMISH COUNTY</p>	<p>I'm new to the area, but having lived for 50 years in Chicago and London, I know good public transportation is the lifeblood of any thriving metro area. Your plan sounds like a good one and is critical to the continuing viability of this area. Good luck!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	<p>1. Speed up the timeline for completion!!</p> <p>2. I detest nickel and diming us through sales taxes! Find another way to charge us that doesn't affect taxing minors who buy a pack of gum or candy, too. Adults should be who pays for this project, not minors.</p>
SNOHOMISH COUNTY	<p>It seems to me, being a daily I-5 commuter, ST's plans 1 and 2 failed so now its time for 3. It is also pretty obvious the plans to toll our freeway systems is an attempt at making traffic worse to coerce votes for ST projects. We have already wasted billions of dollars on trains that have not helped the traffic situation, ie, light rail between the airport and downtown Seattle. The joke is on us.</p>
SNOHOMISH COUNTY	<p>In the mean time, if there were more park and rides think the ridership would increase.</p>
SNOHOMISH COUNTY	<p>There is no mention in this plan to provide regularly scheduled Sounder service on weekends, in addition to the special event trains. This needs to happen now. Also, working in conjunction with the other rail users/owners (BNSF and others?), what is ST's plan to fix the chronic slide areas on the north line to improve the frequency and reliability of Sounder service? Additionally, what's the plan to add the 2nd set of tracks on the mile-long missing link of single track through Edmonds? I've been looking at a graded surface that appears to be ready for the 2nd track for years now with no sign of action. Why isn't this happening? The 2nd track would increase the rail bandwidth for both the commuter and freight trains. I'd like to see ST add these important north line projects to your near-term plans. Thank you.</p>
SNOHOMISH COUNTY	<p>Funding for the ST3 projects should be paid for by bonds and not by burdening people with more taxes that last 25 years! NO NEW TAXES. With our sales tax being abused to being close to ten percent, we don't need any new taxes.</p>
SNOHOMISH COUNTY	<p>Changes from the inevitable arrival of autonomous vehicles will revolutionize transportation. Auto companies are actively pursuing the end of buses for public transportation to be replaced with autonomous on-call cars. Your plan seems outdated before you start, and, probably, a colossal waste of money.</p>
SNOHOMISH COUNTY	<p>Get it done sooner :)</p>
SNOHOMISH COUNTY	<p>I think all carpool lanes should be for buses only and motorcycles.</p> <p>I think light rail should go down I-5 where the diamond lanes are Property is already cleared and owned and the carpool lanes are slow and only wor sometime. We certainly should not be making carpool lanes for only people who can afford to pay to drive in them, yucky.</p>
SNOHOMISH COUNTY	<p>Sounder rail stop in Ballard.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	Ways to improve bus service are fine but trains should be the final goal, buses still get caught in traffic. Trains should follow existing right of ways, I5, I405, I90, SR520, etc because that follows existing travel patterns (in Bay Area, nothing says ride the BART like being stuck in traffic and watching a train go whizzing by). Get WSDOT off their uncooperative butts and fire management until they "play ball" with transit. Parking is essential! End the dumb idea that people will bus, walk or bike to transit centers, some will but you must make it as easy a possible to get from home to transit and back. Many park & rides are full by morning, you could increase ridership just by giving the late comers a place to park (hint - build up, not out, Mountlake Terrace station is a great example). Pay for transit with gasoline tax, thus improving transit and making driving more expensive.
SNOHOMISH COUNTY	How are we going to be assured that the money collected will go to this project and not spent on some other project that needs funds. How are we going to trust your figures when there are always cost overruns! Half of the time I don't think there is a cost over run but you need the money to cover a mistake that was made or spending is just out of control. You just keep coming up with project after project and never give us a rest and regroup. My pay does not increase as fast as you are taking!
SNOHOMISH COUNTY	Forget increasing bus routes down 405. I travel 405 via bus every day, we need light rail that is not subject to traffic and weather. Also all efforts should be made to complete light rail to all ST3 proposals including 405 corridor much sooner than 25 years. The area needed it 25 years agony and now we are paying for the short sightedness of not doing it back than. ST must make every effort to link light rail throughout the region as soon as possible.
SNOHOMISH COUNTY	The timeline for the completion of ST3 is absurdly long. All of these transportation changes should have been made about 10 years ago to plan for the booming growth in the population of the Puget Sound area. If this project isn't fully completed until 25 years from now there will be a whole slew of other problems that are unaddressed at that time.
SNOHOMISH COUNTY	I view connection by light rail of Everett to Seattle to be of prime importance. I don't use public transportation because it doesn't reliably reach Everett. Mudslides frequently disrupt Sounder service, putting more people back on the road. How about a "mud tunnel" to keep Sounder service running?
SNOHOMISH COUNTY	I would love to be able to take the light rail on the Everett to Seattle route. but I won't be here in 25 years.....
SNOHOMISH COUNTY	I commuted from Everett to Seattle every week day for 10 years. Over half that time it was in a Community Transit van. As my job took on more responsibilities I could no longer commit to a defined time to leave work. That is when the true horror of commuting began. It ended up being a 2.5 hr commute regularly. Do you have any idea what the commute will be like in 25 years? Everett should absolutely be put on the front burner. Folks are moving farther and farther North for affordable homes. Lucky for me I am retired and the commute was my biggest negative.
SNOHOMISH COUNTY	We need to improve our regional transit ASAP! Too bad it wasn't done years ago, but we need to move ahead now!
SNOHOMISH COUNTY	Would love it if the plan timetables could be moved up.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	Parking! Parking! Parking! I live within two miles of the South Everett Freeway Station and ST is my preferred method of travel to Seattle since I am a senior citizen and find that is an economical method of travel for me. However, on any weekday, there are no spots left by 8 am. The same is true of the Everett Station, where I have had to walk as far as half a mile from a parking spot. North County is growing by leaps and bounds, more people would use mass transit if there was expanded parking available or if more feeder routes from Metro or Everett Transit were available. I used to be able to catch an Everett Transit bus just blocks from my home, now the closest stop is over a mile away. Coordination of all aspects of transit needs to be addressed, not just light rail.
SNOHOMISH COUNTY	While I am hardly riding the bus now, in 98204, I rode the bus daily in my 40 years living in Seattle, primarily 98105. I have no driver's license, and I'm finding life extremely difficult in 98204. My daughter in law lives in this zip, and rides the bus intermittently to downtown Seattle, my husband works near Seattle U, and is driving every day - we would all love improved transit up here. I would love complete sidewalks, but that's not really in your purview.
SNOHOMISH COUNTY	Everett appears to be relatively underserved by the more recent completed projects and in the priorities in the current plan. In fairness, political expediency, and practicality, a higher prioritization of projects serving Everett, especially the light rail to Everett Station, needs to have a time priority.
SNOHOMISH COUNTY	I 100% support the ST3 plan and improved transit in general.
SNOHOMISH COUNTY	I only support Light Rail projects. Ditch sounder projects. Replace Sounder with light rail, elevated on north route to avoid mudslides. Sounder should not have been built. Light rail / Monorail better option. Double decker BRT is OK.
SNOHOMISH COUNTY	You have failed with our tax dollars before
SNOHOMISH COUNTY	Move Everett leg up 10-15 years
SNOHOMISH COUNTY	I am opposed to the plan for the reason that 25 years for Everett is way to long. All the development thus far and for the near future is focused Seattle and South. Do not ask me to pay for a system that will not benefit the north for 25 years. Also, I am totally opposed to anything to do with buses. That money should be directed to lite rail. The bus system in Washington sucks and I do not want to see any additional money spent on the bus system.
SNOHOMISH COUNTY	I Live in Lynnwood and work in Tukwila at BECU. I am extremely supportive of a smooth mass transit system between those two locations
SNOHOMISH COUNTY	Don't raise taxes. Not one cent.
SNOHOMISH COUNTY	Bus drivers should spend at least a year using the bus system they work in, to familiarize themselves with what it's like to use mass transit.  Bus drivers should use there intercom whenever a bus "incident" happens and the bus has to turn off its engines.
SNOHOMISH COUNTY	Why not add a stop in Ballard with the current train system? It would help alleviate traffic in and out of Ballard during peek traffic hours.
SNOHOMISH COUNTY	Providing law enforcement so riders on public transit can ride safely, especially women and the elderly.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	Projects that support existing transit should be given priority. It's important to keep up /fix what we already have before spending tons of money to build more. Also, up till now the excitement for transit has overridden the necessity of keeping costs down. If projects cannot be funded, they should not be begun no matter how helpful they may be.
SNOHOMISH COUNTY	<p>The bus using the shoulder to bypass traffic is a good first start, but I propose that you make bus only transit lanes along the I5 and I405 corridors as well as building freeway stations (like the Mountlake Terrace station). The fact that buses get stuck in standing traffic with HOV cars and SUVs literally changing lanes in front of buses in the HOV lane and then slowing way down, forcing the bus driver to jam on the brakes, which results in the passengers in the bus being thrown around (along with whatever they have on their laps, things like computers and such) is a VERY BAD THING.</p> <p>Get the buses their own lanes and make our (bus riders) commutes both faster *AND* safer.</p>
SNOHOMISH COUNTY	Waste of money! These type projects don't correct the problem they are money holes that never end. Building is one thing how about yearly cost to maintain?
SNOHOMISH COUNTY	Do it faster!! 25 years is crazy, the technology will be extremely out of date by then. Who knows if we'll even still be on roads??
SNOHOMISH COUNTY	I used to use Sound Transit buses, but overcrowding and the buses ability to maintain a schedule and deliver me on time in a semi comfortable manner (meaning we aren't crammed in like sardines) turned me off. It wasn't saving me time or money, and certainly not saving me hassle. We need to invest heavier in Snohomish County which seems to get overlooked when it comes to traffic and transportation issues.
SNOHOMISH COUNTY	25 year is way too long for all of this to be implemented. Let's make it happen faster. Get creative with funding.
SNOHOMISH COUNTY	<p>There are too many problems with this plan for me to vote for it. It is far too expensive for what we're getting. Light rail as ST is constructing it doesn't offer that much more speed than a bus. There are far too many lightly utilized stops and you are looking to add even more. I mean Graham Street? Its a half mile from the Othello station and there's already a bus on MLK Way for the people that don't want to walk that. So you're going to add another two or three minutes to the already absurdly long 40 minute trip to the airport from downtown for a non-destination neighborhood that isn't particularly dense.</p> <p>This region needs rapid transit to connect its major destination points. The less popular destinations can be served with something else. What you are building here isn't rapid transit.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	Bus rapid transit will only be effective with dedicated lanes, reliable service, and easy access to the service. Educating drivers who chose to drive instead of riding public transportation should also be made a priority - yielding to busses, not cutting them off because there is space of multiple vehicles in front of the bus and leaving space behind the busses, just to name three examples of unsafe and impolite driving I have seen as a driver and experienced as a bus rider.
SNOHOMISH COUNTY	Throwing around billions of dollars on an experiment to see if people will start riding is reckless. Expand sounder service.
SNOHOMISH COUNTY	The biggest mess in traffic is constantly Everett to seattle and the fife area. Why not start there ? Why start the rapid rides to 405 first when they just got the new lanes on 405 what about the people who work in seattle and commute on i-5
SNOHOMISH COUNTY	The Sounder (Everett to Seattle) needs to run more often both ways and on the weekends with a regular, predictable schedule. Four runs south, in the morning, and four runs north, in the evening, weekdays only, is a very minimal schedule and does not encourage regular ridership.
SNOHOMISH COUNTY	Extending rail to Everett should be the top priority. It's been part of the plan for 20+ years. I will not support ST3 unless Everett rail is completed by 2030. This plan is so Seattle centric it makes me want to vomit. Everett and Tacoma deserve rail so they can compete as employment centers. This plan is totally rigged to support Seattle hegemony.
SNOHOMISH COUNTY	The voters have approved countless measures to support improvements in transit with countless delays and missed opportunities year after year. The region's transit problems are inexcusable and lack foresight. I've ridden mass transit in Seattle since the 1970's and find the daily bus ride to be nothing short of torture. Buses are often standing room only into Seattle from Snohomish County. We deserve better.
SNOHOMISH COUNTY	Get busy!
SNOHOMISH COUNTY	Work on light rail first before instituting the buses. We already have buses and that doesn't work. We need light rail from Tacoma to Everett before making off shoots to other communities.
SNOHOMISH COUNTY	Keep building, we need it.
SNOHOMISH COUNTY	It's hard to know if any of this will actually help. The main corridors are obviously important, but I see a HUGE gap in being able to get to a light rail/Sounder station and commuting west-east within Seattle. Just moved to Edmonds, lived in Bsslard for 18 years. You took away the 17 except for peak times. That was the bus I sometimes took, and that my daughter took to SPU. The time factor for me makes it unacceptable. And so often, you just can't get there from here.
SNOHOMISH COUNTY	Until ALL the transit entities all are under ONE UMBRELLA nothing is going to work. They all want there own money to use. GET with it WASHDOT so it will work. Take a good look at a system like BART in the Bay Area. That serves more than 1 county and city under 1 system and travels whole comuter routes where they are needed.....

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	Schedule is of prime importance. It is no good if I can get downtown but can't get back home using the same mode of transportation. If I can't live in Ballard and work in Lynnwood or live at North Gate and work in Redmond. I should be able to live in Everett and work in Tacoma without going thru downtown Seattle. Right now in Edmonds I can get to work in downtown Seattle taking the Sounder but could not work a full day before the last Sounder train runs north. If I must transfer from train to bus to light rail to get somewhere then I will drive.
SNOHOMISH COUNTY	We need to connect EVERETT Boeing to the rest of the world.
SNOHOMISH COUNTY	It's hard to understand your map. If you add light rail from south Everett to downtown Seattle I would strongly support, everything else I don't really care about.
SNOHOMISH COUNTY	This plan seems like it takes way too long. In 25 years there will be twice as many people in this city. I'm happy that Seattle has finally decided to embrace light rail and has seen the benefits but this project is already 25 years behind where it needs to be. It needs to be expedited.
SNOHOMISH COUNTY	Oddly, it might be worthwhile, if possible, to run some sort of independent crowd-funded campaign for at least some of these projects in order to more quickly fund (and thus be able to complete) them. More wealthy area citizens and those who may not live in the area but enjoy having better transit options would be able to contribute more to the project than the tax rates would allow. Breaking projects down by neighborhood or by type would allow for smaller funding goals, but also allow for wider involvement of the public. This might also allow for certain tax breaks on this particular tax for individuals/households that are below the poverty level, who need the transit options but may not be able to foot the bill as easily, even in distributed property taxes. For those of us who would be willing and able to foot more of the bill, having a way to pay into the fund for these projects directly would be amazing.
SNOHOMISH COUNTY	More Sounder stops along current route from Edmonds to Seattle, like a stop near Pike Place Market or Ballard
SNOHOMISH COUNTY	Extending the light rail to Everett station would be the most beneficial and drastically reduce congestion on I-5 and create a more sustainable and friendly way to travel from the heart of Snohomish county to Seattle.
SNOHOMISH COUNTY	What about adding a light rail station to the existing Mountlake Terrace Park and Ride? Change the priority of having light rail extended to Ballard. This is more of a critical need for that area and needs to happen sooner rather than later
SNOHOMISH COUNTY	None
SNOHOMISH COUNTY	The reason I do not utilize the sounder train is because THERE IS MINIMAL PARKING AT ACCESS POINTS!!!
SNOHOMISH COUNTY	The coordination of bus services in the area is really poor. I live in the Community Transit area and those buses don't link well with either Everett Transit or Metro Transit. Midday service is abysmal. Weekend service, which is so important for blind and handicapped individuals has been totally inadequate. Dial a ride has been totally unreliable for my handicapped friends and family.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	Extending light rail from Seattle to major population and employment centers (Tacoma, Everett), with supporting feeder bus routes should be a top priority and the schedule for those projects advanced. Improving existing bus service to Seattle neighborhoods (Ballard, West Seattle) and outlying smaller population/employment centers (Issaquah, Redmond) should be prioritized over light rail service to those areas. Sounder rail service should be improved in the South end (Tacoma to Seattle) but is unreliable as an option in the North end (Everett to Seattle) due to frequently slides.
SNOHOMISH COUNTY	Make more bicycle friendly commuter options.
SNOHOMISH COUNTY	How does \$17 monthly cost compare to automobile operating costs and lost time without ST3 draft plan?
SNOHOMISH COUNTY	We are senior citizens on social security. Can't afford your budgets.
SNOHOMISH COUNTY	WHY DON'T YOU STOP STEALING AND LIEING TO PEOPLE, AND STOP THIS MASS TRANSIT STUPIDITY. YOU ARE ONLY CAUSEING BACKUPS AND MORE CARBON IN THE AIR. BUILD BETTER ROADS, BETTER HIGHWAYS. AND STOP FUNNELING PEOPLE INTO SEATTLE AND FIX THE ROADS NOT THE TRANSIT
SNOHOMISH COUNTY	I strongly support transit improvements, but the main lines to Everett and Tacoma should have priority over spur lines to places like Ballard and west Seattle.
SNOHOMISH COUNTY	Prioritizing light rail extensions to Ballard and West Seattle before completing the spine is NOT what the social contract was agreed to in 1996 when the original Sound Move plan was adopted. Completing the spine and connecting job centers should be the explicit priority for Sound Transit. Congesting in the Everett to Seattle I-5 Corridor has increased 89% in the last FOUR years. To say that Everett residents will have to wait another 25 years before they have access to the system is criminal. Sub regional "equity" did not make sense in 1996 and it doesn't make sense now. Sound Transit is the Regional Transit Authority. Not another extension of King County Metro. Please find a way to get light rail to Everett sooner.
SNOHOMISH COUNTY	I would focus more on Puget sound bus services then anything else, especially north of Seattle to everett
SNOHOMISH COUNTY	I'm very much in support of our state having a state income tax hoping that that tax would lift some of the burdensome taxes on our citizens and therefore those people might be more likely to vote for these transportation needs.
SNOHOMISH COUNTY	25 years to Everett is too long
SNOHOMISH COUNTY	Create bus only lanes on highways and downtown streets. This should be number 1 priority. Buses if they can move are flexible and much less expensive.
SNOHOMISH COUNTY	I could strongly support the plan and the taxes if the paine field and Everett portion were to be completed much sooner
SNOHOMISH COUNTY	Why are there so many OUT OF SERVICE buses on the roads (often during rush hour) and yet you are talking of needing new routes. My husband travels from Mukilteo to south Boeing field and counts the buses each way. He routinely counts in the 30s and 40s of number of OUT OF SERVICE buses. That makes no sense.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	How can you expect voters over 50 years of age to vote for something that will not be completed in their lifetime but will make several big business very rich and would be expected to overrun costs and extend building deadlines.
SNOHOMISH COUNTY	Everett and Snohomish Cty
SNOHOMISH COUNTY	I strongly support the total project to get the metro Seattle area from Everett to Tacoma and Lakewood as well as to the East side as soon as possible. I believe with the proper planning and getting the money through whatever means possible to complete this master plan in 15-20 years rather than 25 years.
SNOHOMISH COUNTY	If it takes 25 years to get to Everett I will vote no! Quit doing so many damn studies and build something!
SNOHOMISH COUNTY	Get the lines laid faster. You can pretty up the stations, add parking, etc. 25 years is much too long for the end parts. Get the lines built, even if the stations are temporary wooden platforms that only feed half the train. Then start upgrading the pieces. Local support in outlying communities will rise when you can actually use transit. Bellevue/Redmond, Everett, West Seattle, and South to Federal Way and beyond should all be up and running in under 10 years. Launch Northgate next year, start laying track North immediately. The same South. Get to Bellevue quickly, then start laying the track further East. A West Seattle resident should be able to get to Microsoft within 5 years. Stop building the Taj Mahal at each step before moving on.
SNOHOMISH COUNTY	The sales tax should not be used or increased to pay for this transit plan. It is regressive and is already too high.
SNOHOMISH COUNTY	Please increase the existing Sounder Everett-Seattle routes to run on times like light rail. 25 years for light rail to Everett is insane. I'll support it for my future grandkids, but come on now.
SNOHOMISH COUNTY	Light rail works bus don't
SNOHOMISH COUNTY	here in Bothell/ Unincorporated you have been taking money from us for many years now on our car tabs telling us it is to go to the rapid tansit (light rail) since we "live on the in the boundries" of the this project! We arew getting ripid off here! everyone else pays the \$15 car tabs but not those on the "supposably" transit line! We want the light rail not the freaking BUSES!!!~ All those here in the "boundries should sue for robbing the people!
SNOHOMISH COUNTY	Expand bus system, eliminate sounder, float bonds to pay for improved bus system, then charge enough for usage
SNOHOMISH COUNTY	Get it done, you should be starting at Lynnwood now to connect to Northgate and building a new parking garage at Lynnwood TC now and not waiting till down the line, If you go there now much past 7am you can't even find a place to park to take transit to Seattle, or Northboud... Get it done, or at least started now. You should be coming at this from two different directions,now not later...
SNOHOMISH COUNTY	Your organization should significantly improve transparency and accountability to the people of Washington State. Your over-spending and incompetent management should be investigated immediately and all parties responsible for not acting in the best interest of WA citizens should be terminated immediately with no benefits and serve time in jail.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	The North Sounder Commuter line has done nothing but lose millions of dollars each and every year. Billions have been wasted since the inception. The Sounder Board promised 3500 riders per day but is closer to 1150 a day. The route is unsafe and eventually a train is going to be lost due to a landslide. When landslides do occur and the line is closed there seems to be little affect on the commute via bus or auto. This proves this line is not needed. When and if light rail occurs leaving every 6-8 minutes riders will chose light rail over the commuter train and the subsidy paid by taxpayer dollars will increase. Yet talking to the Sounder Board the commuter train will continue. It already is an elitist service only for the wealthy and is a tax burden on the poor who have to pay higher taxes to keep this elitist train running.
SNOHOMISH COUNTY	Snohomish has been paying for Years and still waiting..
SNOHOMISH COUNTY	Speed up the light rail deployment up and down the I5 corridor as well as heading east on I90.
SNOHOMISH COUNTY	We need additional, later train times from Mukilteo or Edmonds to downtown Seattle!!! Last train leaves Edmonds at 7:40 and we need additional morning trains after that! My office is literally across from the train station in Seattle and I would take the train to work 3-4 times a week if there were later trains. Thank you for listening!!
SNOHOMISH COUNTY	The Everett Sounder is so unreliable, it really seems like it would be helpful to try to address that which likely includes quite a bit of slope stabilization. I am hard pressed to believe it cannot be done, though. I think getting parking at stations and feeder busses to planned stations working (as well as Uber and other planning that is not "oh gee, we'll just have everyone walk, bike or move within 1/4 mile of stations" is important to bring a sense of realism to the planning.
SNOHOMISH COUNTY	Better access from Everett to Bellevue without having to connect in Lynnwood.
SNOHOMISH COUNTY	How does this give you an idea of Snohomish county. It is all for downtown Seattle and Tacoma stupid
SNOHOMISH COUNTY	Light rail should go all the way up 5 into Lynnwood and from Lynnwood down 405 into Bellevue
SNOHOMISH COUNTY	We need mass transit/rapid transit in Bothell/Mill Creek
SNOHOMISH COUNTY	Even if it cost more I will still support ST3!!!
SNOHOMISH COUNTY	Please first focus on synchronizing the lights on major arterial roads such as 128th/132nd & 164th in Lynnwood and Everett. Reduce development and density, and please STOP building apartments.
SNOHOMISH COUNTY	Express bus options really need to be expanded and improved. I live in Mill Creek and I generally drive my own vehicle to downtown Seattle because the bus just requires far too much commute time. We need more people taking public transit but it must be more convenient. Adding more express routes is a good place to start. I think the state needs to take over public transit. Having separate public transit systems in each county doesn't work. It also doesn't work for public transit to be run by for-profit companies. I cannot fully support the plans put forth in this survey because I don't believe they'll successfully resolve traffic and individual commuter problems under the current system. We must look to other cities/states that have more successful public transportation for possible resolutions.
SNOHOMISH COUNTY	I hope jobs are created with these plans. I have wanted to work in the public transportation field for over 20 years.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	If I could travel more quickly on public transportation I'd prefer to bus rather than drive. Unfortunately it's still more convenient for me to drive, even with all the traffic. I live in the suburbs and public transportation isn't always an option. I live in mountlake terrace but commute to the international district everyday for work. I use my personal vehicle to do my job. I am a case manager and have various meetings all over the city. If I could do my job and take the bus that would be great, but most of the time it's easier to drive so that i don't have to worry about bus times (at times there's big gaps in service time). If the buses all ran very frequently, every few minutes, the hassle is gone.
SNOHOMISH COUNTY	ST3 final plan should be overhauled. Put lightrails in highway HOV lanes and take buses off Highway to reduce cost!!!
SNOHOMISH COUNTY	I do not use mass transit, I will not support mass transit and the WA DOT has a proven track record of not completing a project on time or on budget. By telling us that it will be 200.00 per adult is a childish way to make the tax burden we are going to be strapped with seem smaller than it really is. There are estimates out that state we will have to pay as much as 600.00 a year in new taxes. That is on top of all the school levies that get dumped on us every year as well. You need to prioritize your budgets and manpower and start building anf buying ferries where you can get them cheaper and end the unions ties to the programs. I am afraid that if this passes, the projects in Seattle will start first and then there will be no oversight on the funds and they will be siphoned off into other pet projects or used to fix cost overruns on Bertha or the 520 bridge. I will be voting NO
SNOHOMISH COUNTY	you'll never get people out of their cars & pick-ups.
SNOHOMISH COUNTY	The time frame to get light rail to Everett Station is way too long.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	<p>The backbone of the light rail system should be completed first with completion of spurs coming later. The main line should first connect the major cities along I-5 i.e. Tacoma, Seattle and Everett.</p> <p>Also, the current North Sounder line is not dependable. Mud slides often prevent use for days. This option should not have any major consideration unless these slides can be prevented.</p> <p>It is also unfair to ask Snohomish County voters to begin paying for something they will not see for 25 years while other counties have more immediate benefits. It is also unfair to ask property owners to absorb more of the cost burden. If the intent is for all to benefit, then all should share the cost equally. As an owner of rental property, and if this proposal passes, I will raise the rent to cover costs. I would assume other landlords will do the same so there goes affordable housing.</p> <p>Also, those of us who pay for auto tabs are again absorbing more of the costs. There needs to be a better way to fund projects so they are fair and equitable to all. Somehow it always comes down to some paying for the many and somehow the budget numbers are historically incorrect, especially for Sound Transit plans. That means for sure additional funds will need to be acquired along the way, again only for some to pay. I am tired of government going to the well. This well is running dry. If you want to establish a fairness and a transparency to fund the project, just go ahead and increase the sales tax to cover all the costs then everyone contributes their fair share.</p> <p>I also believe in accountability and to date I have not seen any from Sound Transit, which gives me concern.</p>
SNOHOMISH COUNTY	<p>Taxes for this would be way too high. Sound Transit is not a credible agency, but it is a costly, inefficient bureaucracy of protected government workers.</p>
SNOHOMISH COUNTY	<p>I see a bigger tax for Snohomish County residence, but not a lot of service improvement for us. I see us as first to pay and last to gain benefit. We have spent a lot of time and money on things in the south and east areas of the greater Seattle/Bellevue metro, but we don't seem to be giving any focus to the building snarl for Everett, Lynnwood, Edmonds and worse the connect from North Sno and South Skagit counties.</p> <p>[name] Everett WA</p>
SNOHOMISH COUNTY	<p>To be in competition with other major cities Seattle needs to have a transportation system that supports its residents and growing population. The plan is great the timeline is long. If it could happen faster the that would be great.</p>
SNOHOMISH COUNTY	<p>Allow private jitney service to replace rail and bus routes!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	Build roads, fire the transportation department and get new thoughts. Freedom to drive in my own vehicle is a GOOD thing. Making me pay for riders and a transit system guaranteed to be WAY over budget and way over time line is insane
SNOHOMISH COUNTY	why should everyone pay for something they don't use? you are wasting money that doesn't belong to you
SNOHOMISH COUNTY	ST3 is too expensive. Sound Transit needs to expand using their current tax levels and rider payments. Stop Taxing before 3.
SNOHOMISH COUNTY	As a Senior living on fixed income I am already over taxed for transit seeing as I pay with my car tags based on their value every year. Now you want more to cover costs that are being generated because fares do not come anywhere near covering your operating costs.
SNOHOMISH COUNTY	Can not afford this plan. Need to reduce costs and spending.
SNOHOMISH COUNTY	Schedule increased Everett to Seattle Sounder trains trips including additional cars per trip.
SNOHOMISH COUNTY	The north end needs to see expansion in less than 25 years due to rapid growth and significant job opportunities
SNOHOMISH COUNTY	Why not better hours and more runs for the Sounder train? And why not run it a few times on the weekend as well? I live in edmonds and drive downtown every weekend. several times. would much rather take a train. And why on earth do we not have biking lanes as developed as portland? We could be doing better at encouraging walking, ride shares and biking.
SNOHOMISH COUNTY	I will NOT vote for a tax that has no sunset built in.
SNOHOMISH COUNTY	The costs of the plan are completely out of line with the benefits. Construction costs for light rail are already thousands of dollars per INCH of track. Sound Transit and local leaders only discuss the capital costs of the plan in isolation from the operating costs. To my knowledge, voters have never been presented with forecasts of the amortized capital costs combined with operating costs and ridership projections to produce a true ridership cost. Nor have the costs Sound Transit proposes been publicly compared in a meaningful manner with light rail and bus rapid transit costs in other cities.
SNOHOMISH COUNTY	Tax sources and percentages are regressive. Taxing sales and homeowners highly, vehicles moderately and businesses not at all. So that very low income elderly homeowners (especially in the north) will be highly taxed for projects they are unlikely to live long enough to ever use. Yet businesses, who will benefit greatly by the peak hours improvements, get them at no increased tax cost.
SNOHOMISH COUNTY	It will take too long for any of this to come on line. It all needs to happen much more quickly!
SNOHOMISH COUNTY	\$200/year is ridiculous for people who rarely use transit. I'm all for the expansion and hopefully it will increase transit use, but the reality is I will not regularly use it and don't want to have to pay a significant amount to subsidize it.
SNOHOMISH COUNTY	Focus on BRT, stop wasting money on light rail and focus on solutions that are affordable and work for transit users.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	This expansion should have been completed 30 years ago. No foresight among the the leaders. In fact the whole thing is a joke at this point in time. Cost over runs and other issues have slowed every to a snail's pace. Seventeen dollars a month will help me with bills. I am a widow on a fixed budget. NO MORE TAXES!!!
SNOHOMISH COUNTY	I would be vastly more supportive of bus only options. Including more busses, designated lanes and shoulder driving. These should be where we focus our mass transit dollars because of the cost savings and the flexibility of the system.
SNOHOMISH COUNTY	If I recall most of these improvements were included in the 1996 RTA initiative and should be nearing completion. So why would I support More wasteful spending on transit?
SNOHOMISH COUNTY	Buses and Sounder Trains are not the answer. Focus 95% of your money and energy on getting light rail done faster. Seattle is a wonderful place but I do not travel or spend my money there for one reason; the traffic is horrible. Fix it for the future of Seattle. We are the only major city on the west coast without light rail, that's embarrassing.
SNOHOMISH COUNTY	I might vote yes if projects in my area (Lynnwood//Mill Creek/Everett) would happen sooner. I would LOVE to take transit - any type of transit - to work (Mill Creek to Everett Community College), but right now it's way faster to drive and fight for parking at the college than to take the bus.
SNOHOMISH COUNTY	While rapid bus transit along freeway corridors is important, most people I know want light rail as it's reliable and doesn't share the road the same way. Right now because of bus transfers etc, it's faster for me to sit in traffic in my car than ride the bus. Light rail up and down the I5 and I405 corridors should be priority number 1!
SNOHOMISH COUNTY	Just do something. I have been paying higher taxes for years and today transit options are worse from my home than ever before.
SNOHOMISH COUNTY	Need a lot more parking at park and rides
SNOHOMISH COUNTY	Light rail from Everett and North, to Seatac, with major stops at Everett, Edmonds, Ballard, Seattle...then on to Seatac. Parking would need to accommodate those that would surely ride the rail at these locations, Especially Edmonds and Mukilteo.
SNOHOMISH COUNTY	Light rail is the MOST inefficient method you could choose. Centers of population and industry always change over time. Wouldn't it be much better, faster, and less expensive to just increase bus opportunities? Then you can just reroute as needed. That said, what we really need are MORE ROADS, not more mass transit that no one wants to use and that costs huge amounts of money, and where every single ticket ever sold requires massive subsidies. My family can't afford this!
SNOHOMISH COUNTY	My problem is you charging me thousands of dollars for something I will not be alive to see. 25 years to get to everett is insane! I need better commuting options to Seattle now! Not after I will be barely alive in an old folks home.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	<p>The actual cost per person is closer to \$400 not \$200                  Buses work way better and COST way less, this is a huge Tax grab and a raping of citizens for an inferior system that would take way too long to build. Remember the U of W Station was 1st promised to be completed in 2005, oops it was 10 years late and over budget.</p>
SNOHOMISH COUNTY	<p>Puget sound is growing too fast and too big! Once it was a beautiful place to live work and play. Now it is an expensive traffic nightmare, with plans to keep growing even tho it's too big already.                  I moved to Everett from Boston Mass, which also grew too big for its own infrastructure.                  Now Seattle is too big and crime ridden. Growth is insane to pursue.                  Leave Everett alone - don't include it in the King county nightmares, nor try to get our money to pay for King county [explicit] ups.                  The rapid growth is killing Puget sound and making a few people rich. The rest of us suffer. Traffic gets so bad I won't go to Seattle anymore.                  The way things are going, I'll finish up my career here and take my retirement money elsewhere. Put the money towards homeless and drugs - that's urgent! Not moving more people here.</p>
SNOHOMISH COUNTY	<p>Priorities should be to connect outlying areas ASAP. Sea to Sea connections exist already. Redmond has it already. Make sure large companies not only pay taxes, they pay for parts of the proposed work. They benefit from them.</p>
SNOHOMISH COUNTY	<p>I am a retired senior citizen. I did not receive an increase this year in SS. I do not have enough money to eat. Rents are going up, food prices are going up as well as utilities. How can you expect people to pay any more in taxes? I will never see the completion of this.</p>
SNOHOMISH COUNTY	<p>We are tired of this! We voted years ago for this and you abused our vote by wasting our tax money! NO MORE WASTE! WE want action! We are Baby Boomers and the majority of us will never be able to use this . Our tax money has been wasted and we are ANGRY! STOP the insanity and DO SOMETHING!!!!!! NO MORE MONEY UNTIL YOU CAN BE TRUSTED TO REALLY do something!!!!!!</p>
SNOHOMISH COUNTY	<p>No more taxes!</p>
SNOHOMISH COUNTY	<p>Stop spending our tax dollars on something that does not have the value you claim it does. Everyone knows that it has not helped the traffic situation at all and the cost per passenger is ridiculous.</p>
SNOHOMISH COUNTY	<p>Everett needs to be prioritized. It was promised in ST2 and my family will not only vote against ST3, but will also be vocal, if Everett is not moved ahead of new projects including Ballard and West Seattle. The high-wage aerospace and advanced manufacturing jobs center and growing university district in Everett have to be the priority.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	<p>Yes, I'll be dead by the time this stuff gets done--and I stopped the 'survey' because most of it was nonsensical. Make all transit lanes Buses only throughout the region--and run buses so people can get where they need to go at LOW PRICES--not \$200/yr for something I will never see finished or use. Really? That's the solution? Transit from Snohomish County just plain sucks! CT and ST do not work together.....you absolutely NEED to use a car to connect with anything transit related. You can run buses for minimal money compared to light rail.....and we cannot 'catch up' with growth which is out of control. Going to Paine Field.....lets see.....they'll have a Swift Bus system (another royal boondoggle!!) and now light rail? Really? How about putting light rail where most of the civilian population can use it? Along major corridors IN A TIMELY MANNER NOT A QUARTER CENTURY AWAY.....and with supporting bus service. It's amazing to watch the limited choices ST proposes as if they have all the answers.....so disappointing on so many levels. If people choose to be in cars they can deal with it.....but when there aren't transit choices for the bulk of people in Sno. Co. (P&amp;R's maxed out and limited bus runs) then it is NOT a choice. It's a necessity to drive! Think about that..... We've spent 3 hours using existing 'transit' to get to SEA for a flight. (Buses into Seattle then light rail to SEA) Compare that to a 45 minute car ride.....which would YOU rather do? I rest my case.....</p>
SNOHOMISH COUNTY	<p>Wishing light rail from Seatac to Lynwood or even Everett would happen earlier in the plan. For decades I have had commuter train envy whenever I have visited D.C., New York or London. In the past decades I have voted for every rapid transit enhancement and voted down building sports stadiums. It's a little frustrating that we have 3 stadiums and have had less effort into transit. This proposal should have happened decades ago when it would have cost less. I was more willing to pay for it when I was younger, but am recently retired now. Now I feel that we are desperately playing catch-up to the local area population expansion. Oh well, (sigh) at least this proposal is at the starting gate now. I'm still willing to pay for this plan for the benefit of our children's future shorter commutes, but I feel we missed the baby boomer bell curve and better a economic era that would have kept the overall cost lower. Sorry about the venting. It's a great plan, but I'll be dead before I can ride Seatac to Everett. I hope the other survey takers are as pro-Light Rail as I am (and always have been). Good luck to us all!</p>
SNOHOMISH COUNTY	<p>Before increasing taxes on seniors and wage earners to improve the 'kingdom of public transit', a responsible planner would view (as I have) all the 1/2 to 2/3 EMPTY bus seats on both city streets and local highways, and use digital models to improve utilization of current assets. No one strongly objects when an airline maximizes ROE. Why can't the primary objective of your organization copy that strategy?</p>
SNOHOMISH COUNTY	<p>I don't believe light rail will substantially reduce traffic congestion. I do believe dramatically expanded bus and bus rapid transit can accommoplish this at a far lower cost.</p>
SNOHOMISH COUNTY	<p>We need to get our mass transportsrion updated</p>
SNOHOMISH COUNTY	<p>Follow the original strategy to build the spines first!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	<p>Widen the interstates. I-5 and I-405 need more lanes to handle the traffic. Don't waste money on a fantasy plan that is already obsolete. This is just a tax grab for projects that will never be finished and won't help the issues. Widening the interstates and route 99 will improve North-South access at a much lower cost. Take down the tolls on I-405 and the floating bridge. We've already paid our taxes to fund them and now we have to pay again to use them.</p> <p>Most people that drive do because it is the most convenient way to commute about daily life. Running our lives on transportation that doesn't go to our destinations is not realistic. No thought has been given to people with mobility issues that would have to walk over a mile to get to a station.</p> <p>The only plan that isn't a waste of money is buying buses. They can use existing infrastructure and are flexible enough to meet demand.</p>
SNOHOMISH COUNTY	<p>Ridiculous. 25 years of extra congestion while the freeways are tied up in construction that would "provide" a mode of transportation that would be outdated by the time completed. Why can't you widen the roads so people can drive with added lanes. Congestion happens when cars have no roads to go on. I-405 gets narrower and fewer lanes each time it is "improved" No shoulders means emergency vehicles can't pass or stop. The toll o I-405 is causing more congestion and has eliminated drivable lanes. Even the wide double painted stripes take up a third of a lane and more in some places. light rails cannot work in place of cars and moving people to the places they need to go. More busses would make more sense. Don't need 25 years to build. We like our cars and when and where it takes us. If you're 30, paying and waiting 25 years. You may not need to or able to travel on that rail. In the meantime?</p>
SNOHOMISH COUNTY	<p>Bothell is fast becoming a major suburb population wise. Please add direct connections to Seattle</p>
SNOHOMISH COUNTY	<p>Increasing Lynnwood capacity as a major ST hub similar to Everett</p>
SNOHOMISH COUNTY	<p>Link to everett should be done quicker than 25 years. Housing is so expensive in Seattle area that people who work in city can't afford to live there. Needs to be quicker way to get into the city from Everett</p>
SNOHOMISH COUNTY	<p>It would be great to have buses &amp; trains that ran when bars close. A lot of drunk drivers would be of the roads.</p>
SNOHOMISH COUNTY	<p>This should be separated into multiple projects -- giving the population an opportunity to see if Sound Transit is handling \$ and timelines appropriately. Also, not sure Sound Transit has proven the ability to handle such a wide variety of projects at the same time.</p>
SNOHOMISH COUNTY	<p>Light rail to Everett should be a major priority. Snohomish County must not be forgotten.</p>
SNOHOMISH COUNTY	<p>None of this solves the traffic problem on I-5 going south from everett area to SEATac in the next 5-8 years. We need solutions MUCH SOONER than 25 years, or even 10 years. We have put up with extensive traffic building up on I-5 southbound, which, when leaving the house from Mill creek at 1:30 in the afternoon, can take anywhere from 1 1/2 hours to 2 hours to get to downtown. We need relief now. Why only one express lane in one direction on I-5? I used to live in Houston, and we had the same problem. It was a huge improvement when they discarded contraflow and went to express lanes in both directions. While I am supportive of new taxes to improve transit, i can't wait 25 years for that to happen and would oppose the plans as currently described.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	1. You must build adequate PARKING structures (multi story) at suburban light rail stations or people will NOT ride the light rail. 2. Sounder service between Seattle and Everett is not reliable during our rainy season. It needs to be re-routed or abandoned for light rail service.
SNOHOMISH COUNTY	Horrrifying to use 19th Century technology that is completely unadaptable. The mere notion of trains is backward unrealistic thinking. Why not institute stage coaches?
SNOHOMISH COUNTY	We grew up using BART in the SF Bay Area. A comprehensive plan that provides reasonable regional transit to this region is critical and long-past due. A downside of BART has been lack of sufficient parking at the stations. As a family that lives in Lynnwood, sufficient parking at/near the transit center is already an issue, so increasing transit usage will necessitate that high priority is given to providing parking that will serve the local communities well in the future, not just the immediate ridership estimates. The ridership boom once the UW station was opened (I work at UW), is the tip of the iceberg...once you bring the transit WE WILL RIDE!!! We will need an efficient and reliable way to get to the transit center to make that happen!!
SNOHOMISH COUNTY	I have always wondered why the Bert Gillman trail can't be used for the light rail train. From what I see, the price would be greatly reduced by using those old trails instead of buying up valuable property and allow less than ten percent of the population keep them for bike trails. It runs along the freeway and it is already owned by the public. Bike trails could be built in new areas at less money. I'm sure considering what has happened here in the past this will go unheard with that, it will be no vote. Yes we need to be healthy but we also need to be able to get around.
SNOHOMISH COUNTY	Why not use all the tax money coming in from weed sales to fund this project. That's what it's for. That and education.
SNOHOMISH COUNTY	Have never supported or voted in favor of this boondoggle and will never. I will continue to oppose any attempt to impose it!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	<p>I believe that light rail is an outdated form of travel. I feel we could do better with smaller, more individualized forms of transit. With the high speed computers, cell phones, and instant forms of communications, I think transit should operate more like DART, Uber, etc.. Where the actual modes are controlled by the user instead of controlled by fixed schedules. I think bus service is important, I just am not a fan of rail service, where the infrastructure is not already in place.</p> <p>I am not against the idea of utilizing alternative transportation corridors away from the Highways and Larger Main Arterial roadways. Its just that I feel these "rail corridors" could be better utilized for small electric vehicles, scooters, Motorcycles, etc. only. For their safety, separating them from "larger" vehicle traffic, higher speeds, etc.</p> <p>Use the "rail" money saved for assisting customers to purchase these small electrical vehicles, charging stations, etc.</p> <p>I am not an expert and just moved to the area, but this is a lot of money invested in what is an outmoded form of transportation. With the way our society is evolving so rapidly and in ways that nobody can predict, I think this is a very risky plan. Even though the developers of this plan have the best of intentions, I feel that more than likely it will be a failure, or at the very best, an extremely expensive form of transportation that will only have marginal benefit.</p> <p>Thanks for the opportunity to express my opinions.</p>
SNOHOMISH COUNTY	<p>As a visually impaired adult non-driver I think every one of driving age deserves their own "personal transportation". Mass transit may work for suburban commuters going to work in a city but that's it. Mass transit does not work in this country for people who can't physically drive a car, for whatever reason, including the disabled and senior citizens. It's inefficient, unreliable, sometimes downright unsafe, and will never provide anything remotely resembling the indepdence provided by personal transportation, especially in a country where everything is so spread out. Stop wasting money on these ridiculously expensive mass transit projects. Take all of that wasted money and invest it into research and development of autonomous vehicles or any form of personal transportation that doesn't discriminate against non-drivers.</p>
SNOHOMISH COUNTY	<p>I think the express lanes between seattle and northgate need to be readdressed, because frankly they were not meant to handle its current volume and are almost useless.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	<p>Would greatly appreciate some near term focus on solutions that improve commute times during congestion peak hours. Not sure it should take that many years to be able to run buses on the shoulders of portions of designated highways. Faster the better on that. I still remember the original promises of 94 where Sound Transit was promising to reduce congestion to get the proposal passed. And then the switch to people 'avoiding congestion' after. You guys promised to help improve the traffic situation, and frankly, you haven't. You will forgive me that I am somewhat wary of your mass communications given the original deception. Not exactly pleased with the populating Sound Transit Board positions where to impact our 'representative' on the Board, we have to un-elect them from their primary positions. It's smart if you want to ensure a transit friendly board is free from accountability. Having said that, I know this is going to happen regardless of the degree to which I support the plan and am not going to get all worked up in opposing it.</p>
SNOHOMISH COUNTY	<p>There should be a Sounder Train schedule for week ends, not just for special events.</p>
SNOHOMISH COUNTY	<p>Shorter time frame to get light rail to Everett.</p>
SNOHOMISH COUNTY	<p>It is super important to add parking to the train parking lots and the other park and rides (Mountlake Terrance, Lynnwood, Mill Creek. I usually have to drive 2 days a week. If the park and rides had more parking I could use the sound transit buses and days I have to drive, due to no parking.</p> <p>A general sale tax is way to regressive a tax to use to finance this project. Use a sales tax on gas, property taxes, taxes on parking spaces. Taxes to discourage car use.</p> <p>Also the 14% tax that was just added to the Sounder trains and sound transit is really bad. Why should working middle class bus/trains commuter pay for poor people to get subsidized fares, while rich people (the top 5%) who drive luxury cars to work do not have to pay for this.</p>
SNOHOMISH COUNTY	<p>I am a huge public transportation supporter but simply put, ST3 timeline and cost are just not acceptable. I am early on in my career and I have no hope to be able to use any of these transportation options within my working career. That is a fundamental flaw. I think ST should go back to the drawing board and find how to make transit work in a short period of time. BRT is a great example of how we can give people frequent/convenient service without huge infrastructure costs. Light rail would be great if it were affordable and came within our lifetime. It is clear as day to me to shut down 1-2 lanes of I5 and 405 and make them exclusive to BRT. Ensure BRT has priority on/off ramps. This infrastructure is already built and the busses would be a low percentage of the cost. Many people will hate this idea but it is the best bang for the buck to address our transportation needs. Sometimes our leaders need to choose the best solution even if it is not popular.</p>
SNOHOMISH COUNTY	<p>Renovate the existing track from Snohomish to redmond and Renton thru Bellevue</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	<p>I am going to start by saying that the timeline is ridiculous. 8 years for buses to start working? 25 years for the final completion date? The time was 30 years ago not 25 years from now and our property taxes are already WAY TOO HIGH. You want to fund a lot of this with more property tax, kiss my ass. This state is completely out of control with taxes and whatever happened to the lottery funding schools and not politicians? We were told the lottery would fund all schools and we wouldn't have HALF, YES, HALF OF OUR PROPERTY TAXES GOING TO SCHOOLS THAT DON'T WORK!. I would never authorize the people in Olympia to take another dime from us, ever. This state has needed mass transit for at least 40 years and now you think 25 more and a bunch more taxes are going to do it? You people are out of your minds and I sincerely hope the people of this state finally see how greedy and inept the liberals are. Look what has happened to Seattle, no plan for parking whatsoever, just keep putting up apartments, offices, and condos with no requirement for these places to provide parking and you think we should trust you with a plan of any kind? I still can't believe with some of the highest if not the highest taxes in the country that you greedy people think you need more just to do what should have been done long ago and now with the pay to drive highways you still think you need more. How about pay cuts for all of you so called "civil servants" to pay for what you all have squandered away starting with the lottery money, you should be ashamed to ask us for anything, period!</p>
SNOHOMISH COUNTY	<p>Additional parking at bus lots and improved ability to use public transportation in more areas is greatly needed!</p>
SNOHOMISH COUNTY	<p>Sounder service between Everett and Seattle need new rails because of all the mudslides</p>
SNOHOMISH COUNTY	<p>Several comments: Skip the everett 'industrial' stop and focus on getting the light rail to everett sooner.  overall i like expanding this but it needs to happen much sooner than the projected timeline. i'd pay more to have it done sooner.</p>
SNOHOMISH COUNTY	<p>People in Everett are getting tired of all the taxes for light rail projects that won't get to us for ANOTHER 25 YEARS. it's crazy that the I5 corridor straight from Tacoma to Everett is not the first priority.</p>
SNOHOMISH COUNTY	<p>you need to get light rail to the Everett Boeing alot of people work there.</p>
SNOHOMISH COUNTY	<p>We who live in Snohomish County particularly in North Everett really can't see paying taxes on something we may or may not see in our lifetime. Too little and way too late.</p>
SNOHOMISH COUNTY	<p>Everett cannot wait 25 years! If you put buses on Bothell Everett corridor from Canyon park y Boeing you better provide parking!</p>
SNOHOMISH COUNTY	<p>In this plan complete a mainline spine then do feeder lines. Also do grade separations for faster speed and less risk to cars. Take a look at Denver light rail. It is ahead of schedule and a great example of how to do it. The timeline needs to be sooner. 2041 is too long. Also heavy rail needs improvement. Too many mudslides on bnsf tracks.</p>
SNOHOMISH COUNTY	<p>Why so long to Everett, since 1996 we have been paying in for King county projects with little done for the numerous commuters from snohomish county, at this rate I will pay for almost 45 years for nothing that eases the congestion</p>
SNOHOMISH COUNTY	<p>Projects should be rearranged - snohomish county should stop getting the short end of the stick!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	<p>The present Transit system is blotted with administrators, employees and their retirement packages. The only time busses are needed is early in the morning and late afternoon / evening. Busses are driven around all during the day mostly empty. What a waste of machinery, fuel and worker hours. The whole system needs a major overhaul and change from public to private. Light rail is used only by a small minority of the population. It is hard to access and extremely inefficient . The cost to have one person park and then transport that 1 person to their destination far exceeds the cost to have them drive.</p> <p>This Government transit plan can only this bad commute worse.</p>
SNOHOMISH COUNTY	<p>I would support the plan if it included light rail to everett downtown.</p>
SNOHOMISH COUNTY	<p>Taxpayer pockets are not bottomless, will this boondoggle ever end?</p>
SNOHOMISH COUNTY	<p>Buses are more efficient, versatile, and more cost effective than light rail</p>
SNOHOMISH COUNTY	<p>Doing as much to expedite completion of rail light rail system similar to other cities such as Denver.</p>
SNOHOMISH COUNTY	<p>We cannot wait, we need mass transportation NOW!! The sooner the better. Traffic congestion is affecting business, transportation, economy here in Puget Sound.</p>
SNOHOMISH COUNTY	<p>Including a Paine Field detour for light rail in 25 years doesn't have the science to support doing it. In 25 years, most commercial aircraft will be built in China, not Washington.</p> <p>Another idea: Sound Transit has spent billions of dollars, yet public restrooms are largely absent. A one holer at the Lynnwood transit center, what a joke. Get a clue, people using transit often spend more time traveling than when going by car. Ergo, they have more need of public comfort stations. To me this is a big gap in all ST projects. Relying on a neighboring Macy's or McDonald's is a non-solution.</p> <p>Forget all the east-west side lines off the north-south spine of light rail. Concentration on the north-south spine was part of the original concept of ST, as I recall. Buses are for the east-west routes until the north-south spine is completed.</p> <p>The Sounder train is a huge joke, intended as a sop to fend off complaints from north end and south end constituents. It's mostly useless, off-route, few stops, infrequent, saps valuable revenue for "real" projects. Get rid of it.</p>
SNOHOMISH COUNTY	<p>None of the proposed projects would help as none are far enough north, nor support times needed to support travel for work. Based an all past over runs and waste in management I do not support any additional projects other taxes.</p>
SNOHOMISH COUNTY	<p>Hurry up!</p>
SNOHOMISH COUNTY	<p>Another source of funding should be obtained. Reliance on the sales tax is not sustainable. The Legislature needs to be involved in authorizing additional sources of funding.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	405 is a mess!!! What about adding mil creek-Redmond route?
SNOHOMISH COUNTY	Light rail should supersede all Bus transit.
SNOHOMISH COUNTY	Everett first, Tacoma second east side last
SNOHOMISH COUNTY	It's funny that I should be responding to this survey at this time. I live in Everett; I've been here since 1996. Now that I'm close to retirement my plan is to leave Washington. The reason is the poor transportation system. I'm originally from Philadelphia & the transportation system there was very good. I have never owned a car. Living here is like living in a place where everyone expects to drive until they drive into a grave. Everything is geared toward the car. It took ten years to get a sidewalk on the east side of Highway 99 between Airport Road and 112th Street - the only reason there is one now is because they needed to put in drains. The cities that dot this highway have no pedestrian bridges so people don't have to walk to the next traffic light where there might be a light where they can cross. Pedestrians are an after thought & your transportation system is geared to get people to and from work & sports events. And no one ever thought about getting old, perhaps infirm and unable to drive. Other than that my impression has been there has been no effort to plan a transportation system that would get people out of their cars and into buses, subways or trains. By the time this plan is complete I'll probably be dead - I really don't plan on being here if I can escape..
SNOHOMISH COUNTY	expand existing roads. return the HOV lanes... not toll lanes
SNOHOMISH COUNTY	Get some more buses. Build some more park and rides. Abandon this silly obsession with trains.
SNOHOMISH COUNTY	Mass transit to get people from point to point is part of the solution. There also needs to be consideration for getting people from the various end points to their final destination quickly and easily.
SNOHOMISH COUNTY	I'm not happy about my household paying \$600 (three adults right now) a year for a project that will not really benefit Everett for 25 years.
SNOHOMISH COUNTY	Why just additional taxes? How about using the existing gas tax? (one of the highest in the nation)
SNOHOMISH COUNTY	There is no mention of additional parking at current transit centers. Many lots, at least in the north end, fill well before 8:00 pushing later morning commuters onto the highways and extending the traffic congestion later into the day. Contracting with neighboring merchants to use sections of their parking lots as overflow would allow many of the commuters I see circling the current lots access to the buses already in service. Seems like a quick and relatively inexpensive "no-brainer" solution since these drivers obviously want to take an alternate.
SNOHOMISH COUNTY	Demonstrate good management of expenditures / tax dollars. Much more open information about the budgeting expectations and actual costs
SNOHOMISH COUNTY	I really wish light rail could be completed sooner.
SNOHOMISH COUNTY	Stop raising taxes. Get gov't to incent businesses to support remote work. Stop raising taxes. Figure it out without increasing taxes. Or levies. Or bills. Or fees. Did I mention, "Stop raising taxes?"
SNOHOMISH COUNTY	add more bus service Edmonds/Shoreline

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	People do not live or work at rail stations. Without good access, commuter rail useless. In my wildest dreams, I could not have come up with a more expensive way to put light rail between SeaTac and downtown Seattle. Lower cost options need to be explored. Such as using existing publically owned right-of-way to put light rail - even if elevated at some locations.
SNOHOMISH COUNTY	1-Provide a sunset clause in the language for the proposd tax hikes that will be used to pay for the ST3. 2- Scale down the project and cost.
SNOHOMISH COUNTY	I support light rail and feel generating a system that cover the longest routes first especially to large manufacturing centers. At this point I personally wouldn't use it, but I am lucky to live close to where I work. Others, especially lower income people don't have that option. They need the most help. They should be helped first. People living close to Seattle need help as well, but I feel they already have multiple options.  As for funding, I am just as strong a supporter of eliminating regressive taxes as I am supportive of mass transit. I feel it is morally degenerate to make people already struggling financially bare the greatest support for a community project. Multi-billion dollar companies in our region are provided with tax breaks without a second thought, but we debate the mix of regressive taxes to impose on the poor. It is immoral. As long as big corporation get tax breaks I would vote against any project that includes regressive taxes before I would vote for light rail. I would rather not have to.
SNOHOMISH COUNTY	I particularly support growth of rail transit to facilitate travel from cities such as Everett and Tacoma to Seatac Airport. This is how other well-planned metropolitan areas improve access to their regional airports.
SNOHOMISH COUNTY	I feel this is a better late than never plan. I will be dead by the time it is complete. Getting more buses moving now is a big priority and incentives for people NOT to drive. Thanks
SNOHOMISH COUNTY	The original plan that was drafted and agreed upon was the Spine, this idea has been hijacked. Do that first (Tacoma to Everett, then work on the Spurs.
SNOHOMISH COUNTY	Snohomish County paying for everyone else and we are left behind. Bad planning, incompetent leadership representing Sno. County. Bus and light rail needed urgently but time table sucks and so do the priorities. While waiting, increase bus transportation, parking at the lots and the ability to get to them.
SNOHOMISH COUNTY	Expanding Lynnwood to Everett light rail needs to be expedited. Has issuing bonds or other financial levers been explored, along with elimination or streamlined environmental reviews to fund additional concurrent projects?  Also, parking needs to be added at Park & Rides and Transit Centers. Rail will not help if people can't reasonably get to or park at the stations.
SNOHOMISH COUNTY	If you aren't serving Everett much, much sooner than this plan, I will not vote in favor.
SNOHOMISH COUNTY	Don't forget Snohomish County. Be equitable, please.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	<p>Sounder North Service - Because of geography (it doesn't have a catchment area to the east) generating low ridership and landslides curtailing service several times each year making it something you CAN'T count on, investment in Sounder North should be a low priority.</p> <p>Paine Field Manufacturing Connection and Service to Everett Station - The plan should be changed to include one of the less costly alternatives, preferably the one proposed by the Snohomish County members of the Sound Transit Board (Light Rail Connection via Airport Road and Hwy 526), to get light rail service earlier to Everett Station, decrease impacts to existing businesses along Evergreen Way, and reduce the overall cost of construction.</p> <p>Coordination with Community Transit SWIFT bus service - Community Transit has recently a funded a Bus Rapid Transit system along Airport Way in Snohomish County. This should be better implemented into the Sound Transit planning to reduce the proposed cost of ST3 and the connection to Paine Field.</p>
SNOHOMISH COUNTY	the existing lines cannot be funded now. just adding more lines will drain local resources. a bus only transit system is the better way.
SNOHOMISH COUNTY	Anything that can be done to ease commute from Everett to Seattle and back, I will vote for and pay for!!!
SNOHOMISH COUNTY	We need to build more lanes for general traffic. This would relieve traffic stress much quicker and cost millions less.
SNOHOMISH COUNTY	<p>What about commercial truck traffic?</p> <p>Need to build more roads.</p>
SNOHOMISH COUNTY	Lynnwood to Everett should not go through Paine Field, but stay along I-5 corridor. Number of potential Link Light Rail users should influence schedule. Start using BRT as soon as possible.
SNOHOMISH COUNTY	This region will remain a traffic nightmare until such time as you build more freeway infrastructure. Your projects are trying to throw a bucket of water on a 10,000 acre forest fire!!!! I am leaving the region and heading to a part of the country where freeway infrastructure has been established along with good communication of traffic accidents which give vehicles options to skirt around accidents. I have been commuting from Everett to Duwamish for over 15 years. I get up early and get ahead of the traffic....that is the only other way to beat the traffic other than more freeway infrastructure. Hoping someday you realize the error of your ways and develop a REAL plan which means raising taxes.
SNOHOMISH COUNTY	When this is all done I will be 87yrs. old and possibly not able to take advantage of this service. But Washington should have done this year's ago.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	<p>I have real issues with this preposterous draft.</p> <p>First of all it is assumed that all Eastside riders want to transfer through the "convenient" Bellevue Transit Center. I'm sorry. This is convenient for no one. The myth that the "Rapid Ride" takes "10 minutes" to go from Bellevue to Redmond is laughable at best. You'd do far better to add light rail from Lynnwood to Renton or have you ever tried driving to Renton in the afternoon after 1:30 p.m.? I did. I had a job in Renton. It was 3 hours by bus and 2 hours by car IF the traffic Gods were with you. Please try again and quit [explicit] I405 drivers.</p>
SNOHOMISH COUNTY	<p>Get rid of all the still existing bureaucrats and create a stand alone infrastructure for the RTA. We all pay way too much for old system and need to truly move the RTA to a new financial model</p>
SNOHOMISH COUNTY	<p>The Lynnwood to Everett link is much too slow, given the expected growth in the Snohomish County region. Also, I feel that the plan to go out to the manufacturing center is less important than creating a link directly to Everett Station. I would, then, make sense to use a Swift Bus system to link out to the manufacturing center - Boeing, etc.</p>
SNOHOMISH COUNTY	<p>I support building mass transit. It is more than overdue. I have been paying for this for decades and will be dead before it arrives in Everett!!!!!!! Your plan is too little too late, and we are already I. Gridlock. You want us to continue to contains for another two decades ??????? This plan is too expensive and takes too long. You need to talk to the planners in Vancouver BC who seem to be able to build multiple rail transit in a quarter of the time and expense.</p> <p>I also resent that this system is not paid for by more western Washington residents. I know people in skagit county who drive to Everett to take the train to Seattle and they paid for none of it. Money is part of the problem. Require a greater number of people to pay for it. Be fair.</p>
SNOHOMISH COUNTY	<p>why do we keep promoting bus transit? We need reliable light rail or subways. I have traveled the world and am amazed at our lack of reliable subway/metro systems. we should be leveraging existing railways and converting them to light rail. they just converted a bunch of legacy track in Redmond to walking trails! It is absurd. Build a viable mass transit system.</p>
SNOHOMISH COUNTY	<p>I don't want to pay more tax. I shouldn't have to pay more taxes. I pay taxes but now someone in their infinite wisdom decided I should pay to drive on 405. Our sales tax is high enough. Our current government is not spending judiciously. One of my pet peeves is seeing cars with expired tabs out there &amp; no one is doing anything about collecting this revenue. Let's do better with what we have trusted them with.</p>
SNOHOMISH COUNTY	<p>I think you should consider routing light rail straight up I-5 from Lynnwood to Everett to complete the project faster. You can build a loop to Paine Field, Boeing and the Industrial center later. Use rapid buses to connect light rail at Mariner with those areas. I know Snohomish County executives want to make Boeing leaders happy and provide transit options to entice more companies to the industrial area, not to mention their continuous full court press on opening Paine Field to commuter flights, but you should help get cars off I-5 sooner by putting the needs of north-south commuters first.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	First priority Sound Transit light rail priority to Everett which has poor transportation infrastructure before Eastside, Ballard, West Seattle which already have good bus transportation infrastructure. Everett is a major city and major employer. Fund Everett light rail first if track is run alongside I-5. Then have Boeing Everett and other Everett aerospace employees pay for their own light rail extension or improved bus service.
SNOHOMISH COUNTY	Please, please allow for sufficient parking at the train and bus stations. Most of us cannot consistently ride our bikes or walk to these hubs, and most transit centers in the north end and Snohomish County are full by 8am, or even by 7am. I work from 10am-6:30pm, so parking is a huge issue. This makes it impossible to have a reasonable commute time either way. My commute from Edmonds to SLU currently takes 70-90 minutes, where driving can take 25 min. I still use transit in my 60's, but most people my age don't, because it's too difficult and time consuming. I agree with all these improvements and am willing to pay for them; I just wish they could happen sooner. But for God's sake, when you cancel local bus service to towns, how are we supposed to get to these transit hubs? Thanks for listening. One more thing - please consider the suburbs carefully in these plans, and don't just accommodate the new hordes in Ballard and West Seattle. They at least have buses that could run more often, while Edmonds has exactly two buses going to our Park & Ride. I currently have to drive 15 minutes to even get to a transit center. Look north for a change.
SNOHOMISH COUNTY	way too much \$\$ for too little return over a much longer timeframe
SNOHOMISH COUNTY	The north/south spine of light rail should be completed first; the timeline for reaching Everett in particular should be earlier. The light rail to the eastside is of almost equal priority. I don't understand why Ballard and West Seattle light rail are being treated with almost equal priority. It seems as if Seattle is being given greater political weight.
SNOHOMISH COUNTY	we need a light rail for 405 going from Lynnwood to Bellevue and beyond!
SNOHOMISH COUNTY	Put some bus stops on Admiralty way between Center rd and Airport rd
SNOHOMISH COUNTY	Please stop raising our taxes. The way are tax money is waisted is really getting old.
SNOHOMISH COUNTY	Everett has BEEN paying for this and the wait is too long
SNOHOMISH COUNTY	You left the 522 corridor and highway 9 out of the mix. Yet again. Hooray for Woodinville, but what about Monroe and Snohomish?
SNOHOMISH COUNTY	Whats the use, I will be dead before it is completed and you will tax me and my children and grandchildren forever and you know it.
SNOHOMISH COUNTY	This is another tax burden to the citizens of these proposed counties! It's stated the "average" cost per person is \$17.00, this is only an estimate, based on an unrealistic projected use of Sound Transit. Has any "proposed" project in this State not had cost overruns? An where do these "cost overruns" burden fall, but on the current struggling tax payers! Washington State has become one of the highest taxed States in this Country. I am completely opposed to this "proposed project." Sound Transit and it's current use by no means justifies expansion. STOP THIS PROJECT! OPPOSE MORE FUNDING.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Snohomish County

SNOHOMISH COUNTY	As a taxpayer, I'm willing to pay for light rail, however the time frame needs to be adjusted. Either we give large incentives for early completion or hire a much larger crew up front. I'd like to know if it's possible to have work being done on multiple areas of the project simultaneously so the North end isn't waiting over 25 years to catch the train.
SNOHOMISH COUNTY	<p>Priority must be placed on completing the spline from Tacoma to Everett ASAP.</p> <p>That portion of revenue from ST 1 &amp; ST2 for light rail development from the sub-areas waiting for service between Everett and Tacoma which was directed to creating the base project in Seattle must now be returned to fore mentioned sub-areas. This would allow for increased resources to be applied to expediting the administration and planning phases of completing the spline from Everett and Tacoma.</p> <p>There is also a need to secure a commitment from Boeing that their manufacturing will continue at the same or increased levels at Paine Field and the surrounding area by the time ST3 service is available. Otherwise Paine field should have a lower priority.</p> <p>My Vote will be NO unless resources and effort is made to complete the spline from Everett to Tacoma within 10 to 14 years. Even at that rate, I will have been paying taxes and fees for 30 year with out benefiting and may not while I am alive even see the completion of light rail to Everett.</p>
SNOHOMISH COUNTY	I am voting against ST3 as it does not serve Everett in a timely manner. We are one of the largest cities and 2nd fastest growing population in the state. There should be more emphasis on the major county seat than in suburbs of King county.
SNOHOMISH COUNTY	The only reason I checked somewhat oppose the ST3 plan is that is should ALREADY HAVE BEEN DONE. We are stressed out on the fwys already. I can't even imagine what the FWYS will look like in 20 years. We will have road rage as a REAL possibility. I have noticed a increase in HONKING. The young ones go off if you don't move quickly. It makes me very uncomfortable. You have no idea how stressed out the regular commuters are. Your lack of planning have created a living nightmare and it will only get worse. You are robbing us of quality life.
SNOHOMISH COUNTY	Suggest more be done regarding mudslides cancelling trains from Everett to Seattle, realize this involves Burlington Northern.
SNOHOMISH COUNTY	Everett should not be via Boeing field, just downtown Everett to shorten the time frame. Lots of great bus service to Boeing from Everett station now exists.

<p>SNOHOMISH COUNTY</p>	<p>The plan for Lynnwood to Everett is extremely flawed. It's obvious that Snohomish County leaders, who - as too many politicians do - think they are instantly professional planners, when in fact they aren't, and their motivations are clearly about getting re-elected by pleasing business interests than on actual demand. Express, fewer stops than BRT, \$1.00 per trip bus service to Paine Field/Boeing was eliminated from south Snohomish County in 2003. It was never restored! Express, fewer stops than BRT, \$2.00 per trip, bus service from east and north Snohomish County was cut to 2 trips in each direction in 2010. Most of it has never been restored! Meanwhile, pay parking lots (\$70/month) have sprouted up around Boeing. Translation: Boeing workers prefer to drive, big time, i.e. the demand for transit is not there. It's better to try BRT and see if that works than in something that is far more expensive, takes a decade longer, and can't practically be moved once it's in.</p> <p>It's a shame that ST's planners are being dissed by Snohomish County leaders for presenting options and for telling the truths about the "Paine Field diversion": that it costs \$1 billion more, it costs those not interested in going there 2 weeks/year on a train and \$1 more per fare each way, that it takes a decade longer, and that there are faster options. Yes, Boeing/Paine Field workers can learn transfer from one line to another, just like us ordinary people whose employers aren't being subsidized and coddled by the politicians!</p> <p>The better package would be balanced, i.e. helping today's congestion-weary commuters vs. pandering to people who aren't living or working here yet, and would look something like this: (1) Start BRT service as early as 2018 (Swift 2 could continue NB by leaving the new Seaway Transit Center, hopping onto EB SR-526, exiting at Evergreen Way N, then following the Swift 1 routing to Everett station: no land acquisition, right-of-way, eminent domain, etc.!!! The main cost would be buying the buses to run this segment, and if the order was placed within the year, they'd be ready for service in 2018!!!); (2) Make the speed and reliability improvements to the BRT loop, I'd guess by 2020; (3) Contribute to finishing the 164th/Ash Way NB direct access ramps, which would keep all Everett-Seattle/Bellevue buses in the HOV lanes, i.e. no crossing over GP lanes; (4) Contribute to a bus/ped/bicycle overpass at 128th, alleviating congestion around the current intersection; (5) Construct light rail, but keep it along I-5. If and when demand warrants it would be the appropriate time to consider a spur between Everett Mall and Paine Field. (6) Take over all bus service between regional centers. While you're at it, though, the #513 runs as a "deadhead" along Casino Road, which is loaded with multi-family housing...instead, it should be in revenue service. Because it's not, those residents have to take an Everett Transit bus north to Everett Station to take a bus or train south (to Seattle or Bellevue)! Give ST express buses more of a priority vs. an afterthought.</p>
<p>SNOHOMISH COUNTY</p>	<p>Think the light rail would be used much more than busses in the future of transport. 10-15 years we will see so much development wig autonomous vehicles for shorter rides but longer trips will still be done with light rail transit.</p>
<p>SNOHOMISH COUNTY</p>	<p>It's ridiculous that I have to pay so much money to support something that I won't even be able to take advantage of because it will take 25 yrs to implement! and by the time it's complete, the needs will have changed and it won't be able to support the population growth at that time</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

Subarea	Additional Feedback - OTHER
NORTH KING COUNTY	It should not take 25 years! By the time this plan is complete, trains would have to be running every 2 minutes to keep up with demand if it's coming all the way from Tacoma and Everett to Seattle. Trains would still be packed. Imagine if there was a delay on the tracks?
NORTH KING COUNTY	<p>All light rail must be grade separated. Inclusion of a draw bridge in the Ballard/Downtown plan must also include data on how often that bridge would open or if there is a way to schedule openings between trains so that downtime is as short as possible. The additional bridge proposed in the West Seattle/Downtown plan is good.</p> <p>We should not be considering light rail to Tacoma or Everett; these destinations would be better served by heavy rail (Sounder) or BRT to light rail stations in Des Moines/Federal Way &amp; Lynnwood, respectively. Access to the airport from Tacoma can be better served using BRT + Sounder instead of light rail.</p> <p>Light rail expansion should happen in Seattle first &amp; should be considered the top priority for ST3. Additional lines that should be studied are: Ballard to Northgate via 15th NW/Holman w/ stops in Crown Hill &amp; Greenwood Ballard to UW w/ stops in Fremont &amp; Wallingford</p> <p>Rethink your schedule. As an advocate for improving transit I would vote against ST3 as it stands based on the schedule alone.</p>
NORTH KING COUNTY	No more money to any Government agency especially ST. I'll sit in gridlock.
NORTH KING COUNTY	Yes for transit!!
NORTH KING COUNTY	Seattle needs to be built out as quickly as possible. Its becoming a world class city, it needs to look and act like one.
NORTH KING COUNTY	Please build it faster. Twenty years is far too long for relief.
NORTH KING COUNTY	We absolutely need a grad-separated Ballard-UW line in ST3. To not include it in ST3 is unacceptable in my eyes.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>The biggest benefit, as I see it, of transit is to allow and encourage people the ability to reduce or eliminate automobile usage. It would seem that the best use of resources then would be to provide grade separated transit through or around choke points, thus providing a faster more reliable trip. It helps if access to this transit is possible by means other than automobiles, preferably by walking or biking, augmented by feeder buses. The worst choke points that I experience are into Seattle from the north, out of West Seattle via the bridge and east-west travel within the city, especially between Ballard and the U district. I would be more supportive of the measure if projects that improve reliability and speed within Seattle and adjacent area were given higher priority. I'm particularly distressed because Ballard to Seattle has such low priority and is not truly grade separated and there are no east-west intracity lines, particularly Ballard to the U district. I also do not like the idea of spending on park and rides, rather I would like to see that money spent on improving non-motorized acces to the stations. At the very least park and rides operations ought to be self funding by charging parking fees. Finally, the Everett Paine Field loop is pure pork. I lived in south Snohomish County from 1986 until 2014. During this entire time there was almost constant agitation to bring scheduled airlines into Paine Field. It will not happen nor will Boeing employees suddenly start using public transportation. Also, remember that Boeing is not a good corporate citizen. Just because we spend a fortune on infrastructure to support their operations does not mean that they will not pull up stakes and leave. We would then have the transit equivalent of the famous "Bridge to Nowhere"</p>
NORTH KING COUNTY	<p>With the viability of an incredibly flexible autonomous (self-driving) electric car-share system within the next 10 years, which would require much fewer and less costly infrastructure modifications, and which would be much more distributed thus decreasing the housing-price-inflationary effects of train stations allowing more dispersed and affordable housing, (not to mention the self-limiting speed and safety issues of having rail at the road level, versus elevated trains) the Puget Sound region should not be planning to install 19th century technology that takes more than 20 years to complete. Investments in developing an autonomous car system would allow the Puget Sound region not to play catch-up with other cities, but to effectively leap-frog them in terms of livability and affordability.</p>
NORTH KING COUNTY	<p>Don't mess around with buses on shoulders. Instead, defend the HOV lane network from congestion so the buses can use it at full speed.</p>
NORTH KING COUNTY	<p>Ballard is growing too fast to wait 22 years for light rail. Ballard lines should be a priority.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>My main concern is the amount of time being taken to build out lightrail in central Seattle. Approving a plan to build light rail in Ballard that opens sometime in 2035 is absurd. The pay as you go scheme is just too limiting. In this scheme I understand that the taxes have to accumulate before build outs can complete. If we built houses and apartments that way, nothing would happen. This project should be completable in 8-15 years with the use of debts/bonds - in which case the projects complete sooner and have a higher likelihood of voter approval.</p> <p>Lastly, at grade trains going in and out of Ballard is crazy. You can't have a train that's waiting for a drawbridge. Build a tunnel.</p>
NORTH KING COUNTY	<p>The order of the projects should be modified so that the second downtown tunnel is completed first, allowing for a faster completion of the Seattle projects. Also, elevated or tunnel options should be considered for the full length of the Downtown-Ballard Link expansion. Finally, a Ballard-UW Link expansion should also be considered.</p>
NORTH KING COUNTY	<p>Voting no based on Ballard timeline.</p>
NORTH KING COUNTY	<p>I agree with the sentiments of ST3, but this plan, overall, is horrible. For example, just above you say "Light rail encourages walkable, livable communities" but this plan does NOT do that. I builds park and rides and stations that are far away in the suburbs where people don't live near those stations. Rail stations in Seattle will do this, but not in the suburbs. The trend is people moving into the city, not into the suburbs. With re-zoning of the city for construction, more people will be able to live in Seattle proper. This plan does not have enough rail in the city. Additionally, \$50b for 53 miles is WAY too expensive. Look at the cost of similar systems around the world. Tokyo, Berlin, etc are getting 5-10x more rail per dollar than ST3. Denver built 122 miles of rail for \$5.5b. Why is ST3 20x more expensive than Denver? I understand that it will be more expensive here because of geography and land costs, but I am not convinced it should be 20x more.</p>
NORTH KING COUNTY	<p>ST should think about using lanes of existing freeway for rail. This will cost less and allow for quicker build out. ST should also start thinking beyond nineteenth-century technology, such as rail, to solve twenty-first-century problems. When your only solution is rail, all your nails look like trains. There is going to have to be a broader approach that includes things such as telecommuting, single-occupancy vehicle restrictions and penalties, high-speed rail, etc. Light rail connecting Tacoma to Everett will do little if anything to resolve congestion given that it is an inconvenient solution that will not get folks out of their cars.</p>
NORTH KING COUNTY	<p>Priority should be on completing rail projects first and connecting Seattle city core before BRT and suburb connections. The density of Seattle city proper is the fastest growing area of the region the most affected by vehicle congestion with need of other ways to transit through downtown without a vehicle</p>
NORTH KING COUNTY	<p>Please execute plans for light rail as quickly as possible. In the few years that i have lived here - there seems to be a lot of "studies" and no short term solutions. It is impossible to get around during all hours of the day. Walking is sometimes much faster than utilizing transit. Sadly big companies around here are using bandaid fixes such as company shuttles which only contributes to the problems with lack of available transit.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	You're doing good work! Keep it up!
NORTH KING COUNTY	<p>Stop giving out biased surveys like this that imply that mass transit is a solution to all our problems. SDOT has done more to reduce capacity and increase congestion than any other event. SDOT is filled with extremists, and they've given a bad name to Sound Transit. Moreover, I'm less likely to vote for Sound Transit if Seattle insists on a mega-bond referendum this fall.</p> <p>It's come down to either Sound Transit or SDOT. I'd prefer Sound Transit, but the fanatics at SDOT have more power.</p> <p>Adding things like a Graham Street Station---more SDOT fanaticism---will make it less like for Link to be used.</p>
NORTH KING COUNTY	Takes far too long to finish projects. The problem is now. Not 25 years or more in the future.
NORTH KING COUNTY	130th stop is vital. The distance between Northgate and 145th is 2 miles without a stop.
NORTH KING COUNTY	Build it and they will come.
NORTH KING COUNTY	<p>Eastside light rail from Lynnwood via I-405 to Renton will be the next big project. It can not be included in the current proposal because \$50 billion is already being asked of voters. But, after ST3 passes, the voters in King County will need to be made aware of a future for light rail running North-South along I-405. Not with ST3 but in the distant future.</p> <p>The San Francisco Bay Area has a robust light rail history and established system which runs not only from San Francisco to South Bay but also along the East Bay and beneath the Bay. We need such a system and we needed it two(2) decades ago!</p> <p>Stating the obvious but needs to be reinforced. Thank you for your efforts on our behalf.</p>
NORTH KING COUNTY	1) The timeline for Downtown to Ballard and Downtown to West Seattle is ridiculous. It makes me less likely to support the plan with the slow in-city timeline. 2) There <i>*NEEDS*</i> to be an east-west, Ballard to UW line in the plan, not just as future study.
NORTH KING COUNTY	<p>Focus on Landlocked West Seattle and Ballard first, which are the easiest impacted by inclement weather and any hiccups in traffic. West Seattle is bottlenecked at the West Seattle bridge and Ballard by Aurora and the draw bridges. They are effectively cut off. Seattle is an hourglass, with downtown being the waist. A light rail system equitable with the current central link needs to be established to pick up the lost neighborhoods of White Center, Highpoint, West Seattle proper, Belltown, Lower Queen Anne, Upper Queen Anne, Innerbay, Magnolia, Freemont, Ballard, etc. Criminal to serve Redmond first, over Ballard and West Seattle, and even Issaquah.</p>
NORTH KING COUNTY	I ♡ light rail :)

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	BTMFA
NORTH KING COUNTY	Ballard to West Seattle needs to be more immediate to get my vote.
NORTH KING COUNTY	We should make sure autonomous vehicles are taken into account when planning, as well as hyperloops.
NORTH KING COUNTY	this project takes a big bite out of property taxes and will hit hardest residents living in the seattle who will not benefit from improved services to federal way and tacoma. residents in tacoma and federal way will be subsidised by property taxes in seattle as seattle has higher property value on average. this doesn't seem fair and i don't think that this should be prioritized over other important projects that state and local government should be using property taxes for like retrofitting the ~500 bridges in the state that are at risk of collapsing in an earthquake.
NORTH KING COUNTY	Sound transit needs to provide toilets at its stations for patrons. It is absurd that Sound Transit has no toilet at any station for its patrons. Airports have them; bus stations have them; railroad stations have them. People are not machines and are subject to the call of nature. The longer the line, the more time people spend in the system, and the more likely nature will make an urgent urge. Overseas, passenger rail stations have toilets --- Sound Transit should learn from them.
NORTH KING COUNTY	For those living outside of the city, bus stops within reasonable walking distance is quite unlikely. I think it is very important to provide adequate parking for those that do not live within walking distance of a bus stop. For example, I commute every day from Shoreline/Lake Forrest Park area to the U District in Seattle (45th/Brooklyn ave ne), where parking is awful. I currently drive to MLT P/R, which decreases the amount I drive significantly, but doesn't add an unreasonable amount of time to my commute. A total commute time of over an hour, for a 10 mile commute, is unreasonable in my opinion. My current commute time is 45 min, any longer and I would be driving instead of taking transit.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

<p>NORTH KING COUNTY</p>	<p>1) This project is much too slow for the critical needs of Seattle and the region more broadly. I understand that putting expensive projects at the end is more cost efficient (\$1 now = \$2 later), but Seattle cannot afford to wait this long for transit to Ballard.</p> <p>2) I am confused about some of the priorities here. The Ballard routing through Interbay doesn't seem like a clear win over Ballard - Fremont - Wallingford - UW, which seems like it would serve more riders. It may be that the rationale just needs to be more clearly explained? Why is Ballard waiting for West Seattle, when Ballard seems like it is a better setting for light rail than (not dense) West Seattle?</p> <p>3) Also, while I understand the importance of sub-area equity in a regional plan, I'd really like to see studies for projects like the so-called "Metro 8 subway" included, since it seems like that would help more riders and do more to reduce gridlock. Perhaps the city of Seattle needs to step up and do projects like this on its own, complimentary to the regional network -- but it's hard to evaluate this plan absent a plan for more robust in-city transit construction. And while maybe this is selfish, I'd rather spend my taxes on higher priority and higher impact local transit than this regional plan that seems like a bad political compromise.</p> <p>4) The recent opening of ULink -- and its negative consequences of the resulting restructure on my commute -- make me skeptical of further light rail plans that do not include true urban stop spacing and routings.</p> <p>5) It is also possible that I am being too negative. Is it possible to present some scenarios for how federal grants processes could *possibly* speed this up or allow the money to go further? I understand not wanting to promise too much, but it would help me understand the range of possibilities here rather than just the one scenario. Similarly, what happens if we have another Boeing (or Amazon or Microsoft) Bust?</p>
<p>NORTH KING COUNTY</p>	<p>There should be a direct bus route from Ballard, through Fremont and Wallingford to the UW light rail station. An actual link route to connect those neighborhoods to light rail. Current bus routes that get close to the light rail stations should have that as part of their stop announcements and signage. For example: "transfer here to the light rail station"</p>
<p>NORTH KING COUNTY</p>	<p>We need neighborhood circulators to move people to stations and stops. Partner with ride sharing services.</p>
<p>NORTH KING COUNTY</p>	<p>Hello, it's important to me that as you grow the system you maintain what already exists. There were recent repairs to broken paving at the Rainier Beach Light Rail station with uneven, white caulking. Why didn't you hire a careful craftsman who would use the proper materials? These "repairs" will look horrible for a very long time. The paving is also extremely dirty. Please add a robust maintenance plan into the ST3 plan. It's not as enticing as a new station, but ST's contributions need to be pragmatic. There is a documented connection between well-maintained public spaces and public safety that's important to fund.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

<p>NORTH KING COUNTY</p>	<p>I'm a single-issue voter when it comes to this stuff. Unless there's a timeline to get light rail to Ballard (and going through Magnolia with at least one station not on 15th Ave W), I'm strongly opposed to it.</p> <p>I'm against suburban/exurban expansion, and these plans all seem to revolve around making it easier for the folks who contribute to the problem in the first place. It's like everybody who bought outside of an urban area is about to hit the jackpot, while those of us that have been using transit while living in a City with walkable amenities are being left out in the cold -- for 22 years! It shouldn't be faster to get to Downtown for work from Issaquah or Burien than Ballard, and yet that's what this plan proposes. 22 years is far, far, FAR too long. I was thinking it might be a 5-year plan or something.</p> <p>Given that, I'm almost certainly going to be voting against this. While I support the overall goal of the program and agree it's necessary, I no longer agree with the "this is better than nothing!" mentality. It's not better than nothing. I'd literally rather have nothing, with no additional taxes, and let the people who choose to live far away deal with the extra traffic that they created in the first place. Until the City of Seattle folks can get around on rail easily, I'm just not interested in paying money to help people in suburbs get downtown faster.</p> <p>Additionally, given the recent tolling debacle where the powers that be caved on the 405 tolling to the whiny east-siders, I have absolutely no good-will towards them, and I'm not interested in subsidizing their lifestyle choices.</p>
<p>NORTH KING COUNTY</p>	<p>The focus on this plan is only transit and not on roads. I am a naive Seattlite and have traveled extensively domestically and in Europe and have never seen anything close to this bad except for the Bay Area. You are not doing it right, have a whack job agenda and don't entertain views other than your own. I ask you, why would anyone with an investment in the community want to give you more money?</p> <p>[name, address, contact info]</p>
<p>NORTH KING COUNTY</p>	<p>Commuter rail should run both ways all day long and on the weekends, similar to many of Chicago's Metra Lines! During other than rush hours on less frequent basis.</p>
<p>NORTH KING COUNTY</p>	<p>Much faster development and completion of a new Ballard light rail line - and please extend it up to NW 85th Street.</p>
<p>NORTH KING COUNTY</p>	<p>You must balance Light Rail and bus options. The light rail will take longer and cost more than what you forecast, everyone expects that. However if you can create some balance with the bus routes, times, price, ect, you will keep the riders calm.</p>
<p>NORTH KING COUNTY</p>	<p>I know it won't be financially feasible, but these light rail and bus service improvements should be completed ASAP.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Should have more free parking facilities build within walking or escalator transport distance on most light rail stops before extending light rain stops or bus transits. Otherwise there is no point for the project people would just drive to their destinations and park there
NORTH KING COUNTY	Ballard to the U-District station should be included in the ST3 plan, not as a study proposal. Traveling from the U-District to Ballard is one of the most congested, circuitous and cumbersome routes in the city.
NORTH KING COUNTY	This plan is taking too long. We need some relief now. Try riding a rapid bus between 5 and 6 they are so crowded and at times I feel unsafe for the passengers as well as the driver. Sounder trains north are limited and overcrowded. Why is this?
NORTH KING COUNTY	the more the area takes over travel lanes for cars and replacing them with bus only and bicycle on it lanes the worse traffic problems will become ... doing this after the light rail is expanded would have alleviated the current mess seattle is in ... that's why in moving AWAY!!
NORTH KING COUNTY	Too expensive
NORTH KING COUNTY	My one current beef is the priority of the light rail in the downtown Seattle bus tunnel as it sometimes severely delays buses. I'm pretty sure this isn't the forum for that but it definitely frustrates me.
NORTH KING COUNTY	It's very important to connect neighborhoods within Seattle so I really support light rail to Ballard and west Seattle
NORTH KING COUNTY	<p>Priorities in the ST3 plan seem to be a bit out of order. While I am biased being located in West Seattle, I am of the opinion that this location is one of the most difficult to access with limited roadways and should be prioritized ahead of others. Most other locations beindg suggested have multiple transit options existing as well as multiple roadway options. With West Seattle's lack of access to downtown and the surrounding area this should be a primary focus. An alternative and less costly option would be to increase the offering of water taxi times and bus routes/times. Currently water taxi offerings are very limited unless you work in a 9-5 environment and bus access is not considerably better.</p> <p>With the additional costs of light rail it would make more sense to use that money to expand routes and availability times of both water taxis and bus routes.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	You need to "reward" or subsidize those of us who DO USE buses and link. The more one uses the less they should pay!!! Give people incentive!!! I know a lot of people at work who don't use it because its not timely or convenient or they have to walk a few blocks.... I also heard of people who purchased new cars getting "offered" FREE bus passes, however those of use who USE and depend on it keep paying. I have used bus to get to HMC for 15yrs and never driven there and its getting more difficult due to the time cuts of bus sched. I HAVE to work weekends and the downtown buses are every 30min. on the weekends!!!! The limited times make and mandate people to drive. We have to clock in! and the buses are NOT on time! Also. PLEASE TAX the renters!!!!!! Not fair for "homeowners" and DOWNTOWN/KING county folks to keep footing all these bills and issues. There are too many cars with ONLY one person in them. Also, I have noticed that food/coffee etc in Pike Market is increasing in price. Well tax the tourists not US! IF you want residents to support you ALL YEAR ROUND don't charge me \$5.00 for a cookie or \$2.00 for an apple!!! Also put a bit of a limit on all the building downtown. I hope this stays a beautiful city not ugly and crowded with random highrises and cheap purse and t-shirt vendors for tourists and cruise boats.
NORTH KING COUNTY	The new changes in my bus schedule have passengers standing up throughout the entire commute. Our driver had to pass 5 bus stops on two round trips (day 1 and day 2) because the bus was stuffed to capacity. Both disability/wheelchair spaces were occupied, so if another person in a wheelchair were to be waiting on that route, the driver would need to pass him/her by. This is disrespectful to your customers.
NORTH KING COUNTY	I think the large businesses that are bringing in all of these people from across the country should be hoofing a good part of this bill. Or at least their very fair share of it. If businesses are to be treated as citizens, they should be taxed as such.
NORTH KING COUNTY	Time frame for opening the Roosevelt Station should be moved up.
NORTH KING COUNTY	You need to focus exclusively on RAIL. Not buses. Taxpayers are tired of seeing additional taxes for bus systems. Rapid-transit buses are simply not as fast and not as effective as light rail because they share the same roads. Focus on light rail to connect downtown Seattle with other major neighborhoods and the Eastside. Stop making it complicated!
NORTH KING COUNTY	I don't support this being funded through yet another residential property tax. Put greater responsibility on the employers recruiting the masses to fund these projects and do it faster! 25 years to connect Ballard by light rail? If we were in Japan, it would be 10 years at most.
NORTH KING COUNTY	You guys sure messed up when you killed the monorail
NORTH KING COUNTY	Great job!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

<p>NORTH KING COUNTY</p>	<p>OMG what a mess this plan is. I've been a strong advocate for public transit my whole life but I'll vote against (and campaign against) this plan if it's what gets sent to the voters.</p> <p>Seattle is the largest city in the region and drives the regional economy, yet it doesn't get very much out of this. This plan builds more suburban parking lots than urban train stations! What a joke. The absolute hardest part of getting around Seattle is moving East/West, and this plan does nothing for that.</p> <p>I'm going to talk about Ballard for a minute because it's the neighborhood I know the best: The route to get to Ballard makes no sense. Who wants to go hang out or walk around Interbay? WTF! Go through Fremont instead, you know the neighborhood with Google and Tableau, with cafes and restaurants people want to go to. A neighborhood with a Sunday market and cultural activities like the solstice parade and Oktoberfest. There's been talk of building a Ballard/UDub line, well if you went through Fremont you'll have part of that line built already because going from Ballard to the UDub you pass through Fremont.</p> <p>Also, the choice to go at grade to Ballard and have a drawbridge makes no sense. If I need to be stuck at a drawbridge anyway I'll prefer to do it from the comfort of my car. Build a tunnel. The federal govt controls that waterway, just go under it.</p> <p>It really feels like the Seattle portion of the map was drawn by someone who's never actually lived in Seattle. Why would I trust any other part of the map to be sensible if you mess this one up so much? Why is a transit agency building parking lots in car dependent suburbs?</p> <p>Oh and then we get to the timeline. 20 years to get to Ballard, assuming everything is on schedule. What a joke. My toddler will graduate college before you guys can lay a track from downtown to Ballard. Seattle built the &gt; 1mi South Lake Union Streetcar in two years. At that rate Seattle could build a 6 mile track to ballard, via fremont, in 12 years.</p> <p>This proposal has led me to question the basic competency of ST. It makes me wonder if you guys actually even take transit, or do you drive to and from all the planning meetings where horrible decisions get made? Honestly it hurts for me to be against transit. I love public transit, and I think Seattle desperately needs it. But this plan has made me realize that we as a city cannot count on ST to</p>
<p>NORTH KING COUNTY</p>	<p>The survey seems to have very little to do with underserved population--people who really <i>*need*</i> transit. It's too long, too biased and as a voter, I wont; trust the results.</p>
<p>NORTH KING COUNTY</p>	<p>Need to improve pedestrian access. Seattle's sidewalks are in poor condition, many not negotiable for wheel chairs. I would like to see budget for that, as My neighborhood does not benefit from many of the proposed changes. We need to take care of what we have as well as develop new.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	The ST3 plan seems to be heavily focused on transit the suburbs - however more focus needs to be on urban transit infrastructure. Also, the timeline needs to be condensed! The current proposed timeline isn't fast enough given our growth curve and current transit woes. Ballard and West Seattle transit to downtown are key components that needs to be completed sooner than later. These neighborhoods continue to densify and suffer from transit issues. They are also low hanging fruit on the transit tree because the mileage of transit to population densities is very favorable!
NORTH KING COUNTY	I think the "why" for ST3 is quite obvious and it's clear most voters are onboard with investing in public transit. I believe ST should spend more time explaining the "how". As a Seattle resident, I'm biased towards more light rail within the city and am less concerned with solutions for distant locations like Dupont, Everett, or Issaquah. I want to believe solutions in Seattle proper would have a greater impact on traffic but I don't know that. Perhaps services for the east side will impact me in ways I don't realize. All I know is, there are way too many cars downtown and on I-5 every day. But I'm looking at the plans and I see a slate of ideas for a wide variety of areas with no understanding of the impact those different solutions will make. They all sound like improvements so I guess I'd say yes to all of them but if you're asking me to rank, I need to know more about the impact.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

<p>NORTH KING COUNTY</p>	<p>Why you are fixated on LRT to West Seattle is beyond me. This is a really terrible idea and waste of money. Ridership will be poor - guaranteed. Seattle needs UW/Ballard and a Metro 8 subway much more. You need to totally revisit this project list. At grade through Interbay? Are you kidding me? Draw bridge over Salmon Bay? WTF? Why does Issaquah go to Bellevue and not through the Mercer Slough to Seattle? LRT to Everett via Paine field makes no sense whatsoever; ridership will be too low to justify the price tag.</p> <p>This project list sucks and I will be voting against ST3. It pains me to type that. If you guys had a clue and focused on ridership and meticulously planned and sited stations and lines, I would support you. But Spine Destiny is not rooted in any sane transportation planning.</p> <p>The timeline is too long. Seattle's need for LRT is desperate, so why deliver to TACOMA before Seattle?</p> <p>I'm really pissed off at ST for delivering such a crappy list of projects in ST3.</p> <p>Also, there is no way this is a scientific survey - who put this thing together? Take this statement from above, for example:</p> <p>"It's time for us to build light rail from Tacoma to Everett, and from the Eastside to dense neighborhoods like Ballard and West Seattle. We need to finish the whole system."</p> <p>WRONG WRONG WRONG. Stop conflating the value of all light rail projects simply because it is light rail. It is not time to build light rail from Tacoma to Everett! NO WHERE ELSE IN THE WORLD HAS LRT OVER SUCH HUGE DISTANCES FOR A REASON! Everett and Tacoma are much better served by BRT and Sounder.</p>
<p>NORTH KING COUNTY</p>	<p>Knowing where I live and commute and knowing most of the changes and additions will only have a minor impact if any on my commute, it is hard to justify so many tax increases for a project in 17 years will only bring light rail to North West Seattle. I like some of the other options but the busses I use now are very efficient and already have dedicated bus lanes. I would be much more for this plan knowing this would have a more direct impact on my commute. 17 years doesn't seem to be a time frame that will benefit me for the price I will be paying.</p>
<p>NORTH KING COUNTY</p>	<p>The obsession with completing the Spine with light rail is wasteful. It's time to move on from the spine plan and focus on two tiers of transit in the region. Commuter rail, eventually using electric multiple units on the spine from Olympia to Marysville (and one day further), with incremental addition of track improvements and dedicated passenger tracks over time. And the metro tier with grade separated light rail (or light metro) within the rapidly intensifying King County area, particularly West Seattle to Ballard, Ballard to UW, and Bellevue to Redmond. We must change course.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	The timelines need to be shortened a lot by doing construction on all expansions simultaneously instead of consecutively. Also going deeper into west Seattle to burian and connecting at the yuk will station
NORTH KING COUNTY	I'm a current university student who'd like to continue living in Seattle once I graduate. Without effective mass transit near affordable housing, it would be difficult to justify the cost of living near the city I grew up in when cities like Portland have better transit for those of us who simply cannot afford to use cars. Please consider not only expanding transit in dense areas but also affordable areas.
NORTH KING COUNTY	The 130th st. Station is very important!
NORTH KING COUNTY	Light rail and buses need to be less expensive if there are going to be more people using them AND you are going to tax citizens more. It's not fair to gouge our pockets and take away our buses. You also need to make it more known that busses and routes will be changing and HOW they will be changing. I know a lot of people were and still are very confused by the new light rail stations and where their buses have gone.
NORTH KING COUNTY	Take heed ST, you have missed the mark with project "equity" on ST3. I should be your low hanging fruit, easy yes vote citizen. I live in Seattle, use transit when I can, and have been a huge advocate of transit expansion. I even frequent transit blogs and ST's website in anticipation of updates on projects. It hadn't even crossed my mind to oppose ST3, until I saw the proposed draft plan and was dumbfounded. Don't misunderstand me, I wasn't naïve to think that the Seattle area would get everything we wanted. I get that this is a regional system and tax dollars need to be fairly split between subareas, but I would have never guessed that you would take the Seattle vote for granted this much. Not only did you give Seattle the bare minimum in projects, despite having stats that blow away the alternative projects, but you also prioritized their completion virtually last. I couldn't believe it! The UW-Ballard connection should be a no brainer, but I saw the writing on the wall for that project, so I'm not surprised it didn't make the cut, but how do you place the Ballard and West Seattle projects out 20 years? And at grade Ballard to DT with a draw bridge, really? I may sound like a bitter Ballard resident who didn't get their way, but until about 3 months ago I didn't even live in the Ballard area, and have no false notion that my current place of residence will be the same as 10 or 20 years from now, so it's really not the case. But I do expect I will be living in the City, and if you want the people of Seattle to support this project you can't give us the bare minimum of routes, marginally performing design options, and back of the line schedule dates. People need to have a system that can connect them between urban Seattle neighborhoods, and places of interest, not just out to the suburbs. What happened to smart growth in the City above easing the connectivity of suburban expansion? We may be the easiest vote, but we aren't an automatic vote. I never thought I'd be saying this, but at this price tag, unless some of these priorities are re-evaluated and revised I may find myself voting against ST3. Please don't take Seattle for granted.
NORTH KING COUNTY	a significant percentage of your community is color blind. Don't use color coded maps in a survey.
NORTH KING COUNTY	Priority should be given to the Graham MLK station, new devoplement at the intersection could be taxed to help pay for the station and move it to the front of the line.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>As you can see by the number of times I clicked on "extremely urgent", I think all these plans need to be implemented. Our traffic here is horrible. I don't use transit as often as I used to because I mostly ride my bike now - to avoid crowded buses or crowded roads. I don't support the idea of expecting homeowners to shoulder a huge tax burden to pay for this. I would like to see a broadly diversified funding source for these transit plans, including property taxes and sales taxes, but not limited to these and a few other sources.</p> <p>Respectfully, [name]</p>
NORTH KING COUNTY	<p>This burden should not only fall on already over taxed homeowners. The entire region will benefit, everyone should pay.</p>
NORTH KING COUNTY	<p>I love the new First Hill Streetcar, but as a reliable transit option, I have to say that it's pretty much a failure thus far, the main reasons being that the streetcars have to share lanes with automobile traffic and transit signal priority (TSP) has evidently not been implemented. Further, if cars are to share the lane, they should not be allowed to make left turns at intersections along the route - I've frequently had the experience of waiting for 2-3 traffic light cycles while waiting for cars to turn left ahead of the streetcar. It's time for Seattle to get truly serious about transit and stop meekly kowtowing to automobile drivers - transit will only fulfill its function if its pathways are truly dedicated and signal priority is established.</p>
NORTH KING COUNTY	<p>Need more projects in Seattle. This plan is too suburb heavy and builds minimal expansion in Seattle. Need bell town, Fremont, cd, UW to Ballard, green lake, Wallingford, slu, Georgetown. Will it be another 25 years until we can even vote on these projects? Our region will be much larger, especially the city. Do we need to create a Seattle authority?</p>
NORTH KING COUNTY	<p>Too expensive for older homeowners who have to pay their full property taxes now.</p>
NORTH KING COUNTY	<p>I live in NW Seattle. We have lost almost all bus transportation options. Light rail isn't planned for our area. Why should I vote for this plan?? All I see is a big tax increase on my slightly-above-average cost home. I support the general idea of rapid transit improvements, but this is VERY painful.</p>
NORTH KING COUNTY	<p>The contention that "The ST3 draft plan would cost the average resident in Puget Sound approximately \$200 per year, or about \$17 per month." is patently false.</p> <p>The car tab increase alone will exceed that amount for a vehicle assessed at \$25k. As property taxes rise due to increased assessed value, revenues increase for this project. Who will cover the inevitable cost overruns? What costs are being covered by the Boeings and Amazons of the region? How many park and rides will be build to allow commuters to access this rail system? Why is "inflation" being figured into the costs of construction when seniors see no increase in SSA payments because there "is little or no inflation"?</p> <p>This survey is very misleading and significantly downplays the actual annual cost of this project to individual property owners and taxpayers. It certainly is not \$17.00/month.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Great job of proposing the full buildout. I only regret that we didn't do this in 1995. I regret that the Ballard to U District line isn't included, but the short stub line with its own maintenance base wasn't viable. We should be connecting urban villages, as was proposed in the early 1990s.
NORTH KING COUNTY	I am unclear on why we need a second tunnel downtown and in the United District. For a lot of people it seems like a very expensive and time consuming project that has not been explained.
NORTH KING COUNTY	I wish the Sounder didn't just run at commuter times. I would like to be able to ride it up to Mukilteo to visit family on Whidbey on the weekends, for instance.
NORTH KING COUNTY	Any way you can speed up the completion date of light rail and/or BRT to West Seattle and/or Ballard? 17 years. Really?!?
NORTH KING COUNTY	I commute M-F on Link from Tukwila to Pioneer Square. Talk that you will soon CHARGE for half the parking spaces at Tukwila sticks it to those of us who don't want to have to pay for/can't afford whatever crazy price you're going to put on those slots. Not building parking at other stations is the same kind of punishment. I live two miles from Tukwila: I will NEVER walk it, and I will NEVER bike it, and I will NEVER car-pool. Don't punish me for that by taking away free parking. I get there at 6 a.m. for a decent spot; don't make me have to get there earlier. If you don't make riding transit easy (and that means PARKING) people won't do it. Same with busses. You need an express bus from Burien or SeaTac or Tukwila to Seattle. Not the routes that take AN HOUR or more. I will NEVER take the bus unless somebody pays attention to those of us in south King County, and gives me a reasonable ride to where I need to go. And, the 40-year timeline on completing the Link system is nuts. Make it a quarter of that.
NORTH KING COUNTY	It's too much money all at once. Seattle is increasingly unaffordable and we can't afford everything that would be "nice to have". We can do a lot lot lot more with buses. Sounder is a big waste of money... subsidies per rider are HUGE. Expand bus facilities, expand walking and BIKING a ton! With Seattle's own billion dollar transportation program we can't afford another \$27 billion. It's just too expensive.
NORTH KING COUNTY	Thank you for making light rail a reality in the Seattle Metro area! This is much needed and much preferred over the use of busses. I will use light rail and the streetcar system and stop using my car once this is up and running to make it easy to get from home to work and elsewhere. Very excited to help you make this a reality by paying more in taxes and giving my vote.
NORTH KING COUNTY	Need to see support for proposed extensions - should be prioritizing helping the most people the soonest - not just bus before train and rail
NORTH KING COUNTY	Ballard and West Seattle first!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>The draft plan will not address transportation needs of Seattle on any meaningful time scale. 22 YEARS to Ballard?!</p> <p>Further it ignores many parts of the city that badly need grade separated transit. And Ballard line itself goes at-grade through Interbay+gets stuck when the bridge opens for boats.</p> <p>Park and rides in suburban area leads to more sprawl, defeating the environmental benefits. The draft ignores corridors like 99, that have potential to spur Transit Oriented Development. Like San Francisco's BART, the system will be stuck forever subsidizing low ridership suburban tails, and may be technologically obsolete by the time it opens.</p>
NORTH KING COUNTY	<p>The emphasis on improvements for auto users in the explanations of the plan leaves me cold. I'd like to hear more about improvements for transit users - especially more convenient non-auto access to busses and rail. (The situation at Sea-Tac airport saps my enthusiasm for ST development every time I use it. Why oh why is it so unwelcoming and inconvenient?!?)</p>
NORTH KING COUNTY	<p>The amount of time the plan to expand light rail is a huge concern. If you could focus on fewer lines and move up the time frame many people I've talked to would be more supportive. Currently I know many people who don't use light rail because there is no affordable parking near the station.</p>
NORTH KING COUNTY	<p>Priority should be given to West Seattle and Ballard with the great increase in high density building and lack of parking for cars and younger folks who want mass transit and older folks who will need to give up driving but need access to downtown.</p>
NORTH KING COUNTY	<p>The corporations that are benefiting from/causing the exponential growth in our city should be responsible for funding these transportation necessities.</p>
NORTH KING COUNTY	<p>Priorities should be changed so that densely populated Ballard with much multifamily and apartment housing will be served sooner than some other projects now put ahead in the queue.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>Don't try to do this on the backs of property owners alone! Consider all potential funding sourc, including major local employers who would potentially benefit from improved transit. Some major employers already subsidize or provide Orca cards free of cost to employees. An income tax or capital gains taxes should be considered. Sales taxes are highly regressive, and disproportionately hurt the poor.</p> <p>Consider that many property owners are not rich people, and that education, mental health and other basic societal services are going after property tax dollars under the same time window as Sound Transit.</p> <p>Personally, I would love to use light rail for every trip into downtown Seattle. Unfortunately, I will be extremely old (or dead) by the time you serve my neighborhood (Magnolia/Ballard).</p> <p>Please understand that for disabled and/or elderly persons, it will still be necessary to use a vehicle to access a station. We are not always able to walk of bicycle to a station, as a younger person might. Therefore, please, please, please incorporate public parking within mixed use development associated with transit stations! This is a 'missing link' in your current plan.</p> <p>Thank you for listening. I will be following your progress. I wish you well (I am a retired licensed architect, with clients including large commercial developers and corporations--so I appreciate the difficulties--and the potential--of long range master plans).</p>
NORTH KING COUNTY	<p>Why did they waste money building the seattle streetcar? What a waste of time for a train that gets stuck in traffic.... Why not accelerate light rail efforts</p>
NORTH KING COUNTY	<p>Bus on shoulders is a stupid plan. Changing traffic lanes to bus only is a big fu to the public, and should be made illegal. See: how Aurora avenue was ruined.</p> <p>Ballard already got rapid ride, no more stuff for them til north Seattle gets some.</p> <p>The 522 is often SRO. And why no north circulator route that stays out of downtown?</p>
NORTH KING COUNTY	<p>The plan takes way, way too long before we would see help for Ballard. That is a reason I might vote this down. I do understand the reasons why you propose it happens this way, but I won't get anything out of it, despite paying higher real estate taxes.</p>
NORTH KING COUNTY	<p>Light rail to Ballard should be in less than 22 years. I think that might threaten the viability of ST3, especially considering that ST2 was a 15 year plan to get Light Rail to Lynnwood, Bellevue, and beyond SeaTac. I urge Sound Transit to reprioritize the projects in order that the Seattle Light Rail lines are both finished within 15 years.</p>
NORTH KING COUNTY	<p>I'm hugely in favor of bold taxes to build out a light rail system inside Seattle, and have it done MUCH sooner than the current plan has scheduled. I'm sorry to say that as much as I love Sound Transit, I will vote against Sound Transit 3 based on the current timetable for rail expansion within Seattle.</p>
NORTH KING COUNTY	<p>You need to focus on light rail or other non-bus options. Busses are not a solution. They sit in traffic with cars, clog the roads and are not enjoyable to use. Also NO MORE BIKE LANES! That is NOT the solution. We need more mass transit non-bus option!</p>
NORTH KING COUNTY	<p>Ballard in not just 15th ave. The project needs to extend farther west.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Promotional material should highlight concrete commute speed improvements - for example things like "adding light rail between Ballard and downtown would allow commuters to reach downtown an average of 5 minutes faster than by car on weekday mornings" make it more obvious that the project improved people's lives. If it's still quicker to commute by car, people will still take cars.
NORTH KING COUNTY	Please make all Seattle segments grade separated. We don't want to repeat the mistake we made in Rainier Valley.
NORTH KING COUNTY	Everyone loves trains, including me. But they are extremely expensive, especially when over-designed and over-built like the new Husky stadium station. Some of the extensions would encourage and promote more suburban sprawl. Improvements to the existing Sounder program might be worthwhile, but the line to Everett is a big money-loser. Not much usage. BRT gets you way more "bang for the buck" any is more flexible.
NORTH KING COUNTY	Priority should be given to Ballard over Bellevue/Federal Way and West Seattle/Tacoma
NORTH KING COUNTY	The high taxation is making this only a city for the rich and the poor. Not much room for those in between. Higher taxes mean higher rents.
NORTH KING COUNTY	Stop lying about the average mvet and other taxes to market this outrageous package.
NORTH KING COUNTY	My family, friends, and I will be voting against this proposed plan in November. the Taxes are extremely regressive and will put too much strain on the lower classes and middle classes, and will lead to more homelessness in Seattle, gentrification, and put more stress on the people of Seattle. If you want to pass this plan, cut the construction time in half, reduce the property taxes and sales tax, and introduce a big business tax and income tax on the big corporations, big businesses, and millionaires in King County who ARE NOT PAYING THEIR FAIR SHARE OF TAXES. Otherwise, this plan will not pass. Anyway, isn't light rail technology already outdated? why aren't you considering a bullet train? I'm sure, in 30 years when this plan, hypothetically, will be finished, it will already be outdated and functionally obsolete. Please look into better technologies and seriously consider a different way to raise taxes that is not so regressive. If you don't revise this plan, IT WILL NOT PASS. please stop trying to destroy Seattle with these awful regressive taxes and wasteful plans.
NORTH KING COUNTY	Can we also have the light rail go later than ~12:30 at night? Something like 2am would be perfect, just for those nights when you're out late and don't want to get stranded in Capitol Hill with a dead phone or something. Otherwise, great plan! The new stations are amazing.
NORTH KING COUNTY	1) Light rail to Ballard that depends on a movable bridge is not going to be fast or reliable. 2) These transit suggestions are great... but the 20+ year timeline for a significant increase in taxes is ridiculous. We need improvements now, and this won't be enough if we continue to grow at this rate. 3) I always vote for transit because I think it's important and it's something that the Seattle area desperately needs. BUT this package is lacking in a lot of ways - so much so that I am considering voting against it. We need transit, but I don't think we need transit developed slowly for this insane cost.
NORTH KING COUNTY	The cost burden is excessive given the long time frame. The implementation via a sales tax is also regressive.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>Thank you for providing a solution. You are the only group to move forward and show delivery. WA legislators unequivocally failed. Yes, your plan is going to take a l-o-o-o-ong time. And it will take even more time to have more regional connections as per your ST3 maps of 2014. Expensive? - sheesh, holy smoly, yikes, ouch! Working people can't afford this, but government has left no choice. Yes, I will pay in all ways many times over and may not use it at all as a 65 year old. But at least somebody (you, and the voters) are doing something to move this region forward. The only real benefit I have is the knowledge that future generations will use it and it may help me sell my property 30 years from now. This is our most desperate hour. Help us Obi-wan Sound Transit. You are our only hope.</p>
NORTH KING COUNTY	Great job ST3 team!
NORTH KING COUNTY	The biggest concern about these projects is the long time between approval and completion. If people don't have guideposts to watch for in the planning stages, they may think it is a hopeless case.
NORTH KING COUNTY	<p>I think the end result will be fantastic. Can't wait.</p>
NORTH KING COUNTY	The opening of light rail to UW stadium and Capitol Hill has reduced my commute by 15 minutes each way per day. Just think of what that extra time per commuter could mean across our whole region....time with your family, time at your place of work, time to do what you want to be doing.
NORTH KING COUNTY	<p>Large corporations should be helping to pay for the transit expansion both short-term and long-term. They are helping the economy grow and stimulating the population growth. They have a responsibility to help pay for the increased pressure on the infrastructure.</p> <p>I-5 light rail projects should be sped up.</p> <p>The 145th corridor is in desperate need of more frequent bus service and roadway improvement.</p> <p>Please seek ways to disperse the cost evenly. Tax payers in Seattle are being slammed with tax increases and soon a lot of us will not be able to afford the city. Again, corporations need to chip in, and we need to be more creative with the dollars.</p> <p>Lastly, light rail that shares the roadways and intersections is not optimal. Look at Chicago CTA, the train goes right down the middle of the hwy. This has a two-fold benefit. 1) Train stops can utilize overpasses and the graded surface to be developed more quickly. Bus lines already cross or can be re-routed to intercept these overpasses. 2) Every car has to watch a train speed by while they sit in traffic and this reinforces the benefit of public transit.</p>
NORTH KING COUNTY	How about taxing bike lanes or use as a way to support those features

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>Projects to remove: any transit that includes Boeing/Paine Field unless Boeing comes up with 50% of the cost</p> <p>Projects to remove: Extending taxpayer paid light rail to JBLM; have the Federal government pay for the extension and station 100%</p> <p>Too long of a Timeline: it appears as if Sound Transit is doing this to keep people employed, not effectively implement the system. It takes too long over multiple generation to get these projects done, and their are faster ways to finance the projects. "VOTE NO" ON CURRENT ST3 DRAFT PLAN UNLESS A MORE AGGRESSIVE TIMELINE IS IMPLEMENTED. GET THE APPROPRIATE BONDS TO GET PROJECTS GOING QUICKLY. STOP WASTING MONEY ON BLOATED SALARIES.</p> <p>Projects to add: Must, Must, MUST HAVE BALLARD-UW SUBWAY. PERIOD. Far outweighs needs such as Issaquah to Totem lake light rail. Far outweighs.</p> <p>Project to add: 130th St. Station. Whoever the morons were that decided 145th was better are, well, morons. Now you have to go back and fix another mistake, that, well, people who aren't morons wouldn't have made in the first place.</p> <p>Project to add: tunnel under ship canal in Ballard. No more dumb draw-bridges for boats! Get over it and get in the 21st century! Spend the money and dig under the water like the UW station.</p> <p>Project to delete: ANYTHING DEFERRED FROM ST2. IF YOU CAN'T GET THE FINANCING RIGHT THE FIRST TIME, MOVE ON.</p> <p>Disclaimer: I live in NE Seattle, a 15 minute bus ride from the UW station, and a 15 min. bus ride from the future University District Station. Many Seattleites, I suspect, will "vote no for this package in present form" due to the timelines associated with getting light rail to additional neighborhoods, and, the missing Ballard-UW subway that gives crosstown capacity. Sorry.</p>
-------------------	--

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

<p>NORTH KING COUNTY</p>	<p>I am a huge fan of light rail as someone who lived in south Seattle for 4 years. It made getting to downtown so much easier and it's essential to offset traffic caused by growth in this region. It's frustrating to be stranded at the office for hours because a truck turned over on the viaduct or there's a Selena Gomez concert at Key Arena. In every city I've ever lived or visited that had a comprehensive subway system, getting from A to B is FAR less stressful than it is here.</p> <p>However, while I was single and trying to make it on my own in a one bedroom apartment in Seattle, just four years ago, even working full time, a \$17/month increase would have been very hard on me. There were weeks I couldn't afford enough food to eat and had to hope I'd get a dinner invitation from a friend. I'm not exaggerating. I am so happy about all the investment in our region that's happening because of the tech industry, but not everyone here has a tech job. Now that I'm a married homeowner, my savings have increased and a \$200/yr increase is something I'll easily and happily pay considering the great benefit this package will have for all of us in the region. However, I worry about those who are not as lucky as me.</p> <p>Finally, I think it's important to emphasize that reliable, fast mass transit cuts down on drunk driving. It would be VERY helpful if light rail trains ran until at least 2:30 am to help offset drunk driving and other problems that can arise as a result of bars all closing at the same time in neighborhoods like Capitol Hill, Pioneer Square and the U-district.</p> <p>Thank you for the opportunity to comment!</p>
<p>NORTH KING COUNTY</p>	<p>we need light rail across 520 to Microsoft for everyone living on the west side! Large numbers of people commute that direction (witnessed by the back-up around 520 onramps on I-5) and that would make a significant difference to have light rail across 520. Light rail should be all the way around the lake and across both bridges and connect to large communities outside that area (e.g. Ballard, West Seattle).</p>
<p>NORTH KING COUNTY</p>	<p>Links to West Seattle and Ballard need to be earlier in the timeline.</p>
<p>NORTH KING COUNTY</p>	<p>The Ballard line needs to tunnel underneath Salmon Bay. A drawbridge would pose too many reliability issues and would impact overall ridership and public opinion. The line also needs to be open ended to allow for an extension across town to UW. The second transit tunnel needs to be prioritized in order to improve accessibility and reliability for all lines, which would benefit the greater region as a whole. I understand that there is a strong desire to mitigate expectations and to avoid over-promising, but now is the time to deliver what Puget Sound residents have been wanting for decades. Rail from Ballard to West Seattle has been shortlisted for over thirty years, don't make us wait twenty more. Listen to what the people want, because that is what will win their votes.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I feel that we focus too much on bus transit. Yes it is easier and cheaper but as you said our roads are running out of room. My biggest hesitation with this plan is having to wait 17 years for light rail to West Seattle and Ballard - that is way too long. Also, why is the Sounder only offered during commuter hours? This should be offered at all times. I also don't have good options for transit to get to work as I don't live or work downtown. I live in West Seattle and work in Renton. It is impossible for me to take transit to work unless I want to take multiple transfers and spend up to 2 hours on the bus each way. It amazes me that Seattle is thought of as such an environmentally friendly city but has such horrible transit.
NORTH KING COUNTY	(1) \$16b is a good ST3 plan; \$50b is too hard to swallow. I'll pay \$200-\$400 more a year to live here for the next 20 years, at which point I'll retire and move somewhere else, just in time for the first major projects to be delivered. (2) This is a scattered investment approach and is WAY too focused on the suburbs where P&R is the only access mode; a P&R lot will fill up one train, leaving a bunch of trains empty and serving nothing but full parking lots and no destinations... to which I'll add (3) Seattle needs to learn how to develop urban nodes, and Seattle needs to learn how to build an actual city with density that supports transit. The goal shouldn't be to build as much rail as possible across a broad, low-density suburban region; the goal should be to build enough urban density to support a dense network of transit services, and (4) there is no indication in the ST3 plan that the various bus operators will do anything to provide integrated services... we need trains running every 3 minutes served by frequent buses at outlying stations with good transfer facilities, not low frequency rail serving downtown coupled with low frequency buses serving downtown, all designed to choke the 5 downtown streets that can actually accommodate transit. NO BUS ON SHOULDER - put barrier separated HOT lanes with more inline freeway stations and increase HOV minimums and HOT fees based on actual conditions to maintain a 50mph minimum operating speed for transit - Washington's HOV/HOT operating policy is the most idiotic thing I've ever seen.
NORTH KING COUNTY	Should include Ballard to U-District!
NORTH KING COUNTY	Please consider that property values near any transit investments will increase such that low- and moderate-income households are unlikely to afford the luxury of living in close proximity to transit stations. All proposed investments in high-capacity transit MUST include accommodations to expand the 'transit shed' by providing convenient and frequent connecting feeder service to stations. And, investing in subsidized affordable housing near stations should be prioritized above other uses like parking.
NORTH KING COUNTY	Seattle to the east side especially Redmond needs to be done sooner. We need add a train to 520 urgently!!! That this was not done as part of the new bridge is absurd!
NORTH KING COUNTY	I would like to express my strong support for the Graham Street light rail station, which is long overdue. I'd also like to speak on behalf of my neighbors, many of whom are unable to access surveys like this because of language and other barriers. This station is critical to this area and would provide a much needed link to other parts of the city and region in a safer and more reliable way for a greater number of residents. Thank you.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	The draft plan notes when the rail is at grade, elevated, or tunnel, but it is not clear if all of the proposals are out of the regular traffic flow. I think this is incredibly important and should be featured more clearly as a part of the plan.
NORTH KING COUNTY	More transit!
NORTH KING COUNTY	<p>This plan is a mishmash of politically selected projects that make no sense from a strategic transportation perspective. The amount proposed is preposterous, and the amount stated as the cost per household conflicts with reported data. I support light rail, but the key is to build it where it will make a difference and to provide a network in the urbanized area. Portland and Vancouver did that at a tiny fraction of our cost. Instead we have 30-40 mile suburban freeway-oriented intercity connectors, with long station spacing, no urban network, stations at freeway interchanges where no pedestrian would ever go, all for \$50B before debt service is factored in.</p> <p>The two Seattle tunnels are designed to ensure they are regional (not city) responsibilities, but both will have dramatically unbalanced flows resulting in extremely inefficient use of capacity. You're asking me ideological questions about rail vs. highway, but transit won't help if it's built in the wrong places, uses all our resources and fails to move the needle beyond 5-6% of regional trips. This is a love fest with mega-project developers and real estate interests that will gentrify the places it touches without making a real difference getting around.</p> <p>You have managed to leave out almost everything I think is needed - Kirkland to Issaquah, Cross-town on 45th in Seattle; while including some truly terrible ideas like moving the Renton Transit Center out of the downtown. You are proposing BRT on I-405 without investing in the infrastructure to make it work. You can't sell a package around "rail is good", you need to design a system that delivers real value to real transit customers, and those people have no advocate within Sound Transit.</p>
NORTH KING COUNTY	ST3 Plan should be withdrawn from consideration until at least 2024, when existing Sound Move and ST2 will be more complete and attraction of riders will be visible. 50 miles of light rail may prove to be sufficient given changing conditions on the roads, and that much is fully funded and authorized.
NORTH KING COUNTY	MORE LIGHT RAIL!!!! LIGHT RAIL VIA 520 FLOATING BRIDGE!!!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>I'd like to preface this by saying I ride the light rail train everyday to work.</p> <p>But the time lines for this are way too long. You can't simultaneously use the argument that mass transit is urgently needed due to congestion, or greenhouse gases or whatever else while extending the construction of high ridership lines, such as Ballard, out to over twenty years. ST2 I could stomach with its 12 to 14 year horizon, but this is ridiculous.</p> <p>And with the twenty plus years for Ballard, the draft plan include a horrendous drawbridge crossing. Meanwhile Issaquah and Everett get low ridership rail lines. I worry that in trying to make every voter happy, you're going to make a very big and very mediocre system and build it very slowly.</p>
NORTH KING COUNTY	<p>Why so LONG to implement!? We need a tighter construction timeline and simultaneous projects to get this all online quicker. 25 years is crazy. West / East traffic through the Seattle neighborhoods is in crisis. It takes me longer to get from ballard to u-district then it takes to get from ballard to shoreline! Ballard to u-dub line a must and should be part of this proposal.</p>
NORTH KING COUNTY	<p>Ballard needs to be fully grade seperated! And that line and west Seattle need to be the priority over extending the spine. Just look at the ridership the first weeks of U link!! Seattle cannot wait 22 plus years for these lines. It needs to be in 10.</p>
NORTH KING COUNTY	<p>I will not support this. It should be funded by the riders who use it, through fares. Do not add it to the already too expensive property tax. It is not my problem to fund a cheap system for a highly paid .com technology worker to get to work.</p>
NORTH KING COUNTY	<p>Thank you, thank you, thank you!</p>
NORTH KING COUNTY	<p>If you got all the money you wanted, how fast could you build light rail?</p>
NORTH KING COUNTY	<p>I'm a bit worried about the cost. \$200 per year in property tax increases alone is roughly a 4% increase for our household. Add that to cost of living and it adds up. I think this is the single reason some folks might oppose this. Other than this single reservation, I agree that we need to keep investing in public transit.</p>
NORTH KING COUNTY	<p>There NEEDS to be parking at light rail stations, especially if you want to reduce the number of cars on the road. It makes more sense to have commuters drive to a nearby station complete their trip via public transit than to that expect them to rely on public transportation for 100% of their commute. I've heard more than one colleague say they've given up on public transit and would rather just drive into Downtown Seattle than to deal with the no parking available situation at their nearby transit center, especially considering the drizzle often experienced living in the Northwest.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>West Seattle, Ballard, and Bellevue need service faster than planned. West Seattle is already a nightmare.</p> <p>Sales taxes are regressive. I'd like to see income above certain amounts being taxed to build these projects. Poor people can't afford this as described.</p>
NORTH KING COUNTY	<p>I think it is a racial and economic justice issue to make people in South Seattle and South King County wait so long for mass transit improvements. These communities should go to the front of the line, given that they are on the receiving end of Seattle's housing affordability, gentrification and displacement crisis.</p>
NORTH KING COUNTY	<p>Why should Seattle residents support extending light rail in Lynwood, Bothel, Bellevue, etc. when the residents of these suburban cities already voted down metro bus improvements. This has forced Seattle to seek and obtain higher taxes to restore transit service within the city of Seattle. The regional transportation plan for light rail, highways, and rapid bus service should be funded by one plan so that suburban residents don't have the option to pick and choose where to fund parts of a regional transportation plan.</p>
NORTH KING COUNTY	<p>Need to speedup the timeline. My only objection to the plan is that it doesn't expand the system quickly enough.</p>
NORTH KING COUNTY	<p>Ballard to downtown Seattle light rail must be grade separated</p>
NORTH KING COUNTY	<p>One of the questions was "It's time for us to build light rail from Tacoma to Everett, and from the Eastside to dense neighborhoods like Ballard and West Seattle. We need to finish the whole system." I'd like to be clear that I strongly disagree with the Tacoma to Everett section of that statement and strongly agree with the connecting dense neighborhoods section. Our primary metropolitan city, Seattle, is watching its designated dense neighborhoods get over-developed and we need connection there WAY MORE than we need to worry about connecting the people who chose to live in the suburbs. Also, I'd like to mention that the timeline for those projects needs to be "fast-tracked". We need light rail in Ballard and West Seattle before the current apartment buildings are done being constructed. Tacoma and Everett can wait... people who live there and commute to Seattle chose that lifestyle/property price and can live with their decision by sitting in traffic until we get around to building their rail later. Finally: Bus Rapid Transit is an oxymoron. Please stop. It creates massive safety problems with merging in and out of bus lanes for cars and bikes. Seriously. Stop it with the bus lanes. We will gladly pay for grade-separated transit: a REAL mass transit system.</p>

NORTH KING COUNTY	<p>I chose Other because I couldn't select all 4 other options together. You timeline for completion is ice-age slow. This timeline will realistically not help anyone staring at moving outside Seattle, nearing retirement. You keep saying we need to invest in the future, but our taxes we pay out do nothing to help us today. You need to figure out how to shave 5 years off the timeline to West Seattle, design and construct the WSTT so that Ballard can come online at the same time as West Seattle. West Seattle residents are upset that the line will end at the Junction (you surprised me by saying you would tunnel there) and what of the residents of the southern part of West Seattle, White Center, Burien or north of Ballard proper? You are asking some residents to 'find Pluto with their naked eyes' with this timeline. It's horrendous! They will theoretically be paying taxes for you until they die and not have any direct benefit to show for it. You also have folks that are upset that Ballard is five years after West Seattle. I can see why they're upset. I still cannot fathom why you don't include employers by enacting an employee head tax. You proposed a decent ST3 plan, but it doesn't go near far enough. I am a fervent supporter of mass transit but this plan as it stands right now is a big fat NO vote for me, regardless of the fact that West Seattle is getting a stunted rail line, and unless you make some major adjustments to this draft proposal it will remain a NO. You have the power to change this. Listen closely to the people who will be voting on this. We can't afford to wait for the timelines you have proposed and you cannot afford to fail us. Seattle won't just blindly vote yes for something less than adequate by today's population numbers and this proposal has definitely given folks many reasons to vote no. Timeline being your biggest issue along with inadequate service to West Seattle and Ballard. Sorry, it sucks! I'm no numbers guy, but the folks at Seattle Subway seem to be. They proposed 30 years of taxes and they feel you can come up with much more than what you have proposed: Burien, Renton, Ballard to UW, a 'Metro 8' line, Lake City Way, Bothell/Woodinville. I'm inclined to agree. I can keep going on but know this, you're staring failure in the face if you cannot guarantee a speedier delivery of what our tax dollars are allowing you to do. I just hope I'm around to see and take a light rail trip to and from West Seattle to work, to Ballard, to UW sporting events, the airport. It's in your hands.</p>
-------------------	--

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

<p>NORTH KING COUNTY</p>	<p>I am in favor of mass transit, I ride it every day and would love to see it become better. I've traveled to other cities/countries and have experienced how great it can be.</p> <p>I will NOT support any measure that puts rail in the streets to be subjected to the traffic. That defeats the purpose. Look at the SLU Trolley. During peak hours I can in all honesty walk to Westlake faster from the Fred Hutch stop. I've seen 3 trolleys stacked up waiting along Fairview Ave. It gives the rail service a bad name and discourages people from using it. It is not an effective way to move people through the city.</p> <p>If you want a way to improve the reliability of the Rapid Line C, here's a tip that anyone who's ever driven around Seattle should know, don't have it cross Mercer twice! Extending the line is great and all, but that has to be most idiotic move of the last reorganization (and that's saying a lot given what a cluster the West side of Lake Union/Queen Anne is now). Why would you route a Rapid line through a known choke point? Until you prove that you can make rational, common sense decisions with our money, it will be difficult to vote in favor of any measure put forward.</p> <p>There is no reason for it to take 22 years to build a light rail to Ballard. That's inexcusable and too long term to garner much support.</p>
<p>NORTH KING COUNTY</p>	<p>Complete faster</p>
<p>NORTH KING COUNTY</p>	<p>As sad as it makes me that the portions of this system that would benefit me personally will not be completed in my working life, we need to get on with it! We should have done this 30 years ago.</p>
<p>NORTH KING COUNTY</p>	<p>The map is a gross simplification of the route. Where is it underground, where at grade level, where elevated? Are there any level crossings? How is the Link integrated with Metro bus service into neighborhoods? Are fares consolidated so that one can transfer without paying extra when moving from Link to Metro buses and vice versa? Where do commuters pay their fare? As best I can tell, Metro integration is largely nonexistent in this plan, which is astonishingly stupid if I am correct.</p> <p>You've said that light rail will bring wonders to the city and those of us who live here, but there is too little detail here to substantiate your claims. I hope you're right. But I need to see far more detail.</p>
<p>NORTH KING COUNTY</p>	<p>Support micro housing developments along transit corridors for this reason and their tenants lack of vehicle ownership. These are the Seattlelittes that make our city's wheels turn</p>
<p>NORTH KING COUNTY</p>	<p>The sooner the better.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Overall, transportation in Seattle is simply abhorrent. It is in a state of emergency. I don't use public transit because it is slow and unreliable. Buses to/from Ballard have consistently left me late at night in the rain. I want to ditch my car so bad. But, until transit is reliable and quick, I am a part of the problem. Seattle is growing into a world class city and must prioritize the immediate completion of this entire plan - nearly no matter the cost, lest our city suffer choking on its own inability to support its citizens.
NORTH KING COUNTY	Don't let the light rail be hindered by other forms of transportation. the current light rail gets stuck in the Beacon hill area due to cars and pedestrians and such. If we are putting in a trail system it should be able to run at a fairly fast speed between stations without worry that a car will end up on the tracks or a person will walk in front of the light rail.
NORTH KING COUNTY	There are thousands of people commuting by ferry every day and there is no convenient way to connect with the rail stations. Shuttles should be incorporated to transport people from the ferries to the closest rail station or even to the closest buses that does not entail them having to walk straight uphill or walk for .5 miles
NORTH KING COUNTY	No more regressive taxes! Funding should come from raising the Estate taxes paid by the wealthiest 1% of Puget Sound residents and higher taxes on corporate income.
NORTH KING COUNTY	\$50B and no money for road improvements - all mass transit related, does not make sense. Your own statistics suggest population will increase by 1 million people in the next 25 years. To make ZERO investment in this plan to increase road capacity and spend the money entirely on busses and trains, doesn't make sense. We are blessed with a robust economy in this region, people who do well financially own and drive cars, often more than one, it is likely that there will be 1-3 million more vehicles regularly traveling our roads in the next 25 years - in my estimation ST3 is a gross misuse of our tax dollars, the plan seems to pretend we can get all of these new cars off the road by building more trains, and providing more busses, alone - we need more road capacity and \$50b buys a lot of road. It feels like the plan is to punish us into submission by not upgrading roads, or adding traffic capacity, while simultaneously allowing new construction with little to no parking. it's time we fact the facts that a significant portion of our population will always drive, and act accordingly.
NORTH KING COUNTY	Anything that can be done to expedite light rail to West Seattle would be good... Those poor people.
NORTH KING COUNTY	waiting years and years to get any help in west seattle makes this hard for me to vote for. the city taking away car lanes for bike has added more gridlock to the area. Give us some roads back and this can help too. not everyone is able to ride transit or bikes
NORTH KING COUNTY	The plan as it stands is for a suburban commuting solution. Not a good plan. This doesnt remove the need of a car for most of these stops. It just creates less of a need for cars during commuting hours. This plan is located on freeways, built around parking garages and park and rides. These need to be placed in dense areas like capitol hill, south lake union, ballard, etc. Take the 8 bus, turn it into a subway and Ill support this. Otherwise Im voting no. The plan needs to be for people to use it for things other than commuting.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	With all the current constitution Ballard light rail needs to moved up. We can continue with the rate of people and wait 20 years
NORTH KING COUNTY	I agree with developing ST to the areas listed. But PLEASE don't forget about other existing areas. While Aurora-Licton Residential Urban Village has Rapid Ride E line, we have poor east-west commuting. I have to walk 10 blocks to pick up an E-W bus - yes, I can travel south on the E line and transfer at 85th, but when one is carry groceries/parcels, it is challenging at best. So I use my car. The entire system needs to be looked at: sidewalks, which we do not have a contiguous connection so that I can walk down to Greenwood or 85th. If you want the support of the public, the existing infra-structure needs attention. Ignore it, your proposed measures won't pass. Listen and respond to the citizenry. Having a "conversation" means just that - give and take - not just the bureaucrats telling us what we are going to do.
NORTH KING COUNTY	Light rail from Ballard to Seattle above grade and make a route from Ballard/greenlake to uw
NORTH KING COUNTY	Projects should be reprioritized and sped up by spending more money.
NORTH KING COUNTY	Downtown Seattle to Ballard must be grade-separated rail. West Seattle, Ballard, Ballard to UW, Northgate lines should be highest priority for light rail. High density, walk-able neighborhoods like Capitol Hill will have more people willing to make the switch to using light rail and will be using it all hours of the day, not just during the morning and evening commutes.
NORTH KING COUNTY	Keep going! super positive about your approach and progress. congratulations on Cap Hill Link station.
NORTH KING COUNTY	This proposed plan includes Billions of tax payer dollars spent and it appears doing things like adding light rail to communities like Redmond for example only reduce peak travel time by 5-10 minutes (not much value add relative to \$\$ spent) but will INCREASE travel time during off peak hours.  WHY WOULD WE CONSIDER INVESTING BILLIONS IN TAXPAYER MONEY TO MAINTAIN OR INCREASE TRAVEL TIMES??????? This is ridiculous!!
NORTH KING COUNTY	There need to be express routes added like European cites. That would be my number one priority. Sidings and switches need to be added to the core network. Examples would be occasional Downtown to Airport with no stops and visa versa. It should not take 40 minutes to get from downtown to the airport. Make the system faster to get to and from the airport and ridership will skyrocket. You can still drive to the airport from downtown in less time at all times except rush hour morning and evening.
NORTH KING COUNTY	Ballard is one of the most dense areas in the region, and yet you are making us wait last for ST3. We were promised a line to Downtown and told we should not support the Ballard/West Seattle Monorail which would have been built by now. This is all politics not what neighborhood needs ST3. 130 NE is not dense-Ballard is dense! This is unacceptable.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I would like to see more emphasis on mass transit tying in with multi-modal transit (walking, cycling, carpool, local buses, etc.) This would give us a "whole" solution that would address a much larger portion of the population and show a complete plan to tackle congestion, traffic, and improving conditions in the region.
NORTH KING COUNTY	Not <i>*only*</i> should we have been able to build light rail between ballard and the UW in 25 years, but 25 years? WTH? I would gladly double and possible triple my payments to get this in 15 years. Certainly triple my payments to get it in 10 years.  I know you guys have put a lot of time into this, but if you want to ask questions trying to figure out how to focus your campaign, maybe do more research about decreasing the timeline at the cost of getting more money. I bet people would be happy to make that tradeoff.
NORTH KING COUNTY	You have not approached this plan from a best practices in transit planning perspective. The corridors you have chosen are not the ones with the highest ridership that will allow exponential access to transit via a connected transit network in areas with density to support it. You have completely disregarded Ballard to UW. I will be dead by the time this would ever be built as a subway, and already route 44 is crush loaded. With this corridor there would be multiple points where bus transit could intersect with the line, multiplying manyfold the riders that could use it. The same principle is why a 130th station should have been included all along. And Ballard to downtown Seattle is at grade in perpetuity, and Belltown is excluded. It's not worth the billions to build what you think looks good on a map but will be of very little benefit. Also, you make an assumption in this survey that BRT costs much less than rail. This is not necessarily true; in our region where ROW is very constrained, to build separated BRT that doesn't get stuck in traffic costs about the same as rail. Please change to using correct transit planning principles, since you are a transit agency. Many of the questions couldn't be answered in the way I wanted them to because you didn't ask the questions correctly, so I had to say "Don't know" which is frustrating too. Thank you.
NORTH KING COUNTY	taking away existing traffic lanes for cars and replacing them with transit does not solve our curret traffic issue
NORTH KING COUNTY	The motor vehicle excise tax is likely to be one of the main points of contention for this proposal. People who drive vehicles instead of taking public transit for their daily commute aren't necessarily doing it because they don't have great public transit options; they may just want their own private transportation. A motor vehicle excise tax is easy to see as a punishment for people who don't want a lifestyle that revolves around communal transit. A higher sales and use tax would be better, and if possible a property tax for the neighborhoods receiving improved service would be better - you could argue that these improvements increase the livability and therefore value of residences in the area.
NORTH KING COUNTY	I would gladly pay more per year for these light rail projects to finish earlier.
NORTH KING COUNTY	N/A
NORTH KING COUNTY	I will not vote for the plan unless some other way is found to pay for the project other than putting the cost on the backs of home owners. I will actively campaign against forcing home owners to foot the bill again

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>RE: questions 12 and 13 above. I am a strong advocate of public transportation and use Link Light Rail daily to commute back-and-forth to work. I find the cost reasonable and it's extremely easy to use. However, I am deeply concerned about a 25 year timeline. That does not speak to a sense of urgency. Secondly, we need to stop being asked to fund projects of public benefit via property taxes. I am reaching the saturation point. And I think it's disingenuous of Sound Transit (and you're not alone in doing this) when you say "it will only raise your property tax about \$200." That's \$200 on top of recent parks levy, on top of the universal pre-K program, on top of... You can't keep asking people to do this. As I said, as reliant as I am on Sound Transit I can't keep heaping this tax burden on myself. You need to find another revenue source.</p>
NORTH KING COUNTY	<p>We are way behind on our transit build-out. The problems of parking, livability, affordable housing, and homelessness can all be alleviated - somewhat - by a fast, efficient, comprehensive mass-transit plan.</p> <p>Also, when I ran the Mercer Island Half Marathon it was painful how limited and disconnected the transit map is -- ST offered a 'free ride' to the race -- but you can't get to Mercer Island from Ballard and Metro wouldn't honor your 'free ride with the race bib' offer so we ended up driving. Shame.</p>
NORTH KING COUNTY	<p>Racial equity for SE Seattle is important.</p>
NORTH KING COUNTY	<p>Ballard is exploding and with it, transit is already limited and very crowded. Please help!</p>
NORTH KING COUNTY	<p>I will vote NO if the words "at grade" are included for any of the light rail proposals.</p> <p>I will vote NO if the word "enforcement" is NOT included in any of the BRT proposals.</p> <p>I will vote NO if ST continues to spend money on the expansion of comuter rail - the current cost of over \$10.00 per ride???????</p> <p>I will vote NO if there is NO commitment to correct admitted mistakes on existing BRT routes.</p> <p>I will vote NO unless there is some rational explanation of why ST continues to use 19th century technology on the light rail projects - See SKY-TRAIN in Vancouver, BC which has been using automated systems since 1986!</p>
NORTH KING COUNTY	<p>Light rail makes perfect sense in the dense parts of Seattle and the Eastside, but it's an expensive boondoggle in the the more sprawling areas of the region. Completing the spine seems to be the Prime Directive for Sound Transit this round, but achieving that goal would be a huge waste of money given how few people would use it. More regional bus service would be a much more cost effective solution for the sprawling suburbs. If there is to be a third Sound Transit package of improvements, light rail should be limited to King County only (and maybe Tacoma proper).</p>
NORTH KING COUNTY	<p>There must be a way to get the Downtown to Ballard line completed before 2038. 22 more years of growth in the area will only further entrench auto dependency in the area.</p> <p>Ballard to UW line should be constructed instead of just studied. Ballard is a significant destination with a population that is continuing to grow at a rapid pace. The east-west corridor between these destinations is extremely difficult to navigate in a timely manner.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	The execution plan seems a little bit backwards. With proposed development to increase urban density why is the focus on everything BUT the urban density? That is the last phase of this proposal. This is also the group of people most likely to consistently utilize public transportation - including taking their children to/from daycare on public transportation. Outlying areas seems to have more instances of commuters driving because of family obligations not serviced by public transportation.
NORTH KING COUNTY	With recent changes to existing bus services that DECREASE existing service, improving rapid transit to many neighborhoods is much more urgent.
NORTH KING COUNTY	Seattle disproportionally pays for transit, but is the lowest priority based on completion dates in the ST3 draft plan. For that reason I oppose the plan.
NORTH KING COUNTY	Sound Transit needs to read this: <a href="https://www.theurbanist.org/2016/01/11/ballard-spur-and-metro-8-subway-serve-seattle-better-than-interbay-light-rail/">https://www.theurbanist.org/2016/01/11/ballard-spur-and-metro-8-subway-serve-seattle-better-than-interbay-light-rail/</a>  This article expresses my shared feelings about ST3 and the incredible missed opportunity being put forward. There is still time to get this right, so please incorporate the Metro 8 Subway line and UW to Ballard. It would connect more people for less money. As ST3 stands, I cannot support it.
NORTH KING COUNTY	Keeping fighting for it. We support you.
NORTH KING COUNTY	Why do we need a new tunnel in downtown Seattle? Why can't the Ballard/West Seattle light rail use the same tunnel we have now on 3rd? Too crowded? Get the busses back up onto the street and make the 3rd ave tunnel exclusively Light Rail. This would save a ton of money and disruption of business.
NORTH KING COUNTY	This should be funded by a state income tax so that the rich pay a larger proportional amount than the poor. Even though I am a strong supporter of light rail I will not vote for it if it keeps increasing my property taxes which are already way to high.  People should have the ability to transfer from the bus to light rail by transfers for those who pay cash. This would make the light rail more accessible for the poor.
NORTH KING COUNTY	I support the sales and motor vehicle taxes to make this project happen but the raise in property taxes is too high.
NORTH KING COUNTY	takes way too long - I'd support if it were complete in 5 years
NORTH KING COUNTY	Transit has to be faster and more reliable than driving, or middle class people won't use it. To support this, trains/buses need to run every 6 minutes or less, we need housing and building density to get the population to have enough demand to use frequent service, and trains/buses must be separated from traffic so they are not affected by traffic. Get rid of the roads that currently cross the light rail tracks. Strictly control the number of stops and transfers. Stops and transfers increase total travel time.
NORTH KING COUNTY	Companies developing the SLU area should be involved in creating public infrastructure to cope with the increased usage of Mercer St. Offering services limited to employees of thees companies should incur a tax.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I see this package as disproportionately benefitting the people who are going to vote against it out in the suburbs and not doing enough in the Seattle core where people will be more likely to vote in favor of it. I also find the idea of the "average homeowner" intellectually dishonest without disclosure of what the "average numbers" are that you are assuming. Again, those of us in Seattle are paying for our access to a dense, walkable and transit friendly life with higher real estate costs per square foot than our suburban brethren and we pay again (and again and again) with our property taxes for these systems that grant us relatively small benefits. Let's put the resources where there is the strongest community support (both in dollars and votes). Let's not continue to support and mitigate the sprawling, horrible developments east of Seattle that are slowly (but surely) eating away at the last bits of rural land and lifestyle within King County.
NORTH KING COUNTY	I don't think the time it will take to build this proposed light rail system is acceptable. We need this level of transportation sooner than 25+ years from now. God knows there are going to be delays, and at 24 years I don't want to have to wait until retirement to enjoy being able to get places easily.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

<p>NORTH KING COUNTY</p>	<p>While I realize that this question is specifically about the draft plan, there appears to be no other place in this survey to explain why I do not currently support the draft plan or any other expansion of Sound Transit:</p> <p>I do not support any further expansion of Sound Transit, due to the data handling policies of the Orca Card system.</p> <p>Specifically, I believe that the long-term retention of Personally Identifying Information (PII) - including region-wide travel patterns - is completely unacceptable, especially considering sections 12, 13, and 14 of the Privacy Policy state that this information may be shared among several regional agencies, that the retention period for this data is "for as long as they believe it useful", and further state that this data is a matter of Washington State Public Record.</p> <p>While I understand that minimal protections exist against the release of PII, and some options still exist for anonymous travel (e.g., drive a car, or pay cash for buses), I am unable to support Sound Transit until a more acceptable privacy policy is adopted. Honestly, I don't believe this type of indefinitely-retained, large-scale, personalized tracking of individual travel patterns <i>*should*</i> be legal, at least for a public agency whose data is beholden to public records laws. Legal or not, it's certainly not a good idea, and could present a significant danger to some at-risk individuals if that data were to ever be made public via hacking, social engineering, or any other means.</p> <p>I'd like to see Sound Transit adopt a policy more in line with the privacy protections of the Oyster card in London, which discards data about individual trips after 8 weeks. [<a href="https://tfl.gov.uk/corporate/privacy-and-cookies/oyster-card#on-this-page-2">https://tfl.gov.uk/corporate/privacy-and-cookies/oyster-card#on-this-page-2</a>] Aggregate, anonymous data is retained for longer time periods, and seems to fulfill all the needs they have for "monitoring the functionality and performance of the system".</p> <p>I have taken public transportation in the Seattle/Tacoma/Everett region for my entire life, starting while I was still in grade school. I have used various iterations of bus passes over the past 30+ years, and have enjoyed the convenience they offer. When the Orca card was introduced, and the Puget Pass retired, I purchased roughly \$800 worth of bus tickets and used them until they were gone. Now, I use cash only. Public transportation in this region has never been <i>*less*</i> convenient for me than it is today, as a result.</p>
<p>NORTH KING COUNTY</p>	<p>We are 50 years behind in rail commuting. We need more rail YESTERDAY. This will drive our regional economy, save people time, reduce our dependence on our roadway, cleaner environment and it's simply the right thing to do. It should have been done in the 70's! For such a high tech,, modern city, we are so behind on issues of infrastructure etc.. more rail now!!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>Where was this plan 25 years ago? Shameful. Not your fault I suppose. Puget Sound has hung its hat on a mediocre bus-as-transit solution for years and to me buses aren't "mass transit" and never will be. Buses are inner city street solutions.</p> <p>I would like to see Ballard connected north to 145th.</p> <p>I would like to see a spur up Lake City Way.</p> <p>I would like to see a plan that gives preference to people that have chosen to live in densely populated areas. Too much focus on Lynnwood and Woodinville, not enough focus on making Seattle and Bellevue move efficiently within themselves. This plan further rewards the suburban model which f**ked us in the first place. A Ballard to University connection is more important to me and could serve my current situation better than this "Everett to Tacoma" vision. Yet, the Ballard-UW line is only budgeted for a study. Weak.</p> <p>My current live/work situation is not compatible with this plan but it does not keep me from understanding its importance. I try to bike most days, it's faster than a bus.</p>
NORTH KING COUNTY	<p>Transit oriented development around stations needs to be a priority. I lived in The Bay Area, where the Daly City BART is surrounded by a small city of parking garages. Even if you manage to find a spot, it takes 15 minutes to walk to your car. It just stifles the business district, which could have been much more robust. The new Capitol Hill station is so exciting, because there are already places to go within walking distance of the station. I am on Beacon Hill, and it is just now starting to have some destinations that make riding the train attractive.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>I have multiple comments that fit into all of the categories:</p> <ul style="list-style-type: none"> <li>* The Graham Street station was included in the original Sound Transit proposal. It is an infill station that, presumably, has already been partially or wholly designed. There is no earthly reason that completion should be pushed out another 20 years, especially considering the positive impact such a station could have on economic mobility for communities of color in the area</li> <li>* 28 years for a Ballard-Downtown line is unacceptable, as is one that is at-grade for half the route. We needed this line five years ago. This type of half-hearted proposal isn't just bad policy, it's bad politics when it comes to locking down votes in Seattle.</li> <li>* Spending almost a billion dollars on parking on the front end of the package takes away funding from far more worthy projects later on. I would urge you to reduce and more appropriately phase this amount.</li> <li>* Even as the last project in the package, there is no reason to send light rail out to Issaquah. There are so many other crucial routes like Ballard-UW or Bellevue-Kirkland - where those funds could be better spent.</li> <li>* It honestly doesn't matter terribly to me, but pushing Lynnwood-Everett out to 2041 seems very risky when it is the only project that Snohomish County voters have to look forward to.</li> </ul>
NORTH KING COUNTY	The timeline for Ballard-Downtown, as the best project from a cost per rider basis, should be accelerated!
NORTH KING COUNTY	I HATE the way bicycles have made our sidewalks hazardous to pedestrians. I will NEVER vote for bicycle rights/access/anything, and am very sorry I supported this effort under the guise of 'green' (progressive), when it has actually served to give license to ridiculously dangerous sidewalks on our downtown streets. This is one of the reasons I drive as close as I can get to work and stay away from metro buses because they require some walking!!!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>Overall the timeline is unacceptable. Light rail to West Seattle and Ballard needs to happen much faster. Infil stations are inexpensive and should happen as soon as possible as well.</p> <p>Full funding for 130th street infill station should be. Included. Ways of having this station open concurrently with Lynnwood Link should be investigated.</p> <p>Ballard LRT should be fully grade separated.</p> <p>Lynnwood to Everett LRT should use SR99 or I5 rather than serving Paine Field. The deviation is far too expensive for the projected cost.</p> <p>Bellevue to Issaquah LRT is of limited benefit for the cost. If it cannot serve South Bellevue P&amp;R it should be deleted in favor of BRT to Bellevue and Mercer Island.</p> <p>LRT between Kent/Des Moines road and Tacoma Dome should use SR99 rather than I-5</p> <p>Sounder commuter rail to DuPont is a waste of money. BRT/Express Buses can serve the same travel needs at less cost.</p> <p>HCT to Orting will never be cost effective. The money should be used on further advancing planning and engineering for Ballard/UW LRT.</p> <p>The overall project list should be prioritized based on cost effectiveness. Sub-area loans should be used to build the most cost effective projects faster.</p> <p>A deal like LA cut with the Federal Government for loans should be investigated to allow rapid construction of ST3.</p>
NORTH KING COUNTY	<p>You should add a Sounder or Light Rail Station from Enumclaw to Issaquah/Bellevue or to the Auburn Station. This is an area that could house thousands of people if there was an easier way to commute to work / larger cities.</p>
NORTH KING COUNTY	<p>although i am unable to use mass transit because of my job (i'm in outside sales and am required to drive my car around) i am in complete support of any mass transit because it's something this region has needed for well over a decade. i would use it all the time on the weekends and weeknights when going to events or just wanted to go downtown or somewhere i might avoid due to traffic issues. it really is a win-win for all involved!!</p>
NORTH KING COUNTY	<p>Build it faster.</p>
NORTH KING COUNTY	<p>Thanks for your hard work! Go for it!</p>
NORTH KING COUNTY	<p>The order in which some of the light rail projects get done should be changed. Higher density areas such as Ballard and West Seattle should not be 22 years away. In general, I fully support additional light rail services.</p>
NORTH KING COUNTY	<p>A 25 year plan is just unrealistic. Sorry to say... given the past projects/plans, I have no faith that such a long plan would even come close to be completed on time or within budget. I would much prefer to see a series of smaller projects with well defined budgets. If you started to do those on time and within budget then I would start to have some faith and consider longer term projects.</p> <p>Thanks for listening.</p>
NORTH KING COUNTY	<p>Just do it!!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I am a hardcore supporter of transit. What really makes this plan iffy for me and may vote against it is the fact that it is more focused on outlying suburbs and the time for completion is outlandish. The cost is not a factor for me. I will support almost any tax for improved transit service. Transportation between Everett/Tacoma and Seattle should be focused on Sounder rail, not light rail. Making these light rail segments so long will kill the reliability and usefulness. We need light rail in the dense core of the city. Seeing that Seattle only gets Ballard to West Seattle by 2041 is absurd. We need to connect the dense parts of the city before gaining a few thousand riders from Tacoma, Federal Way, Everett, Issaquah, etc. The BRT along 405 should be rail instead considering how terrible 405 is. This should also be prioritized over serving far-flung, non-dense cities for commuting purposes only.
NORTH KING COUNTY	I thought we just approved additional funding/taxes do the graham light rail station. Feels like double dipping. Paying twice. Did we approve it or not?
NORTH KING COUNTY	When considering the study to link West Seattle light rail to Burien I think considering a Delridge path to better serve low income communities should be considered above routes that would serve higher income communities. Also, underground is preferred to above ground in that case. It is not equitable if high income communities get their rapid transit underground and low income communities have to deal with complications of having the transit above ground.
NORTH KING COUNTY	Eliminate the additional property tax from the project funding-- enough already with taxing homeowners. Propose BUSINESS TAXES on large corporate entities (ie: the employers like Amazon, Microsoft, Boeing, Nordstrom, etc. who stand to benefit most from reducing travel-times to work) and DEVELOPER TAXES because it's the new, massive apartment/condo dwellings that increased transit service will most likely serve.
NORTH KING COUNTY	I only ride a bike. The less traffic the better.
NORTH KING COUNTY	Ballard has got to be one of the fastest-growing neighborhoods with the least accessible routes, and I can't believe it makes sense to do that last, especially when the route is one of the shortest into downtown!! Ssme for west Seattle!! That's crazy.
NORTH KING COUNTY	Train service from yuk will station to skyway to downtown Renton to maple valley. Encourage more growth along coal creek and sunset between Renton highlands and issaquah
NORTH KING COUNTY	It's about time. This should have been done 30 years ago!
NORTH KING COUNTY	Although this is just the ST portion of the vision for 2040, it is important to make sure that the general public know that getting people from the various Light Rail and Train stations will fall to the regional transit service in that county, and Metro Transit/King County is definitely planning for 2040 now, in conjunction with everything that our friends at Sound Transit are/will be proposing. By working together, riders will see frequency of service improved and a shorter commute to their end destination.
NORTH KING COUNTY	Encourage all companies to allow as many employees as can to telecommute.
NORTH KING COUNTY	Ballard should be tackled much earlier than 22 years from now.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	This is such an important plan for us to move forward with and an example of a good way to spend tax dollars. We need to fix the quality of our lives and take it seriously. The light rail is a magnificent work of engineering art and we need these stations on the east side fast. The highways are a mess and HOV lanes are not helping anyone get anywhere faster we really need public transportation to have right of way on the freeways.
NORTH KING COUNTY	<p>We desperately need Ballard to UW light rail- even more than Ballard to downtown. Minor improvements to rapid ride could make Ballard to downtown pretty good - but there simply aren't enough lanes to make east-west travel tolerable.</p> <p>A train tunnel from Ballard to the UW would be the fastest route at any time of any day, and at rush hour, not even a comparison. This is what we want from transit - to go faster and more reliably than in our cars - why aren't we building the route where we could most easily beat car travel times?</p> <p>Additionally, Wallingford and Fremont are dense, walkable, destination neighborhoods that desperately need improved transit.</p> <p>We need to build Ballard to UW, or at the very minimum, build the Ballard station to accommodate a future east-west connection.</p>
NORTH KING COUNTY	<ol style="list-style-type: none"><li>1. More taxes on car use to represent the true costs to the Seattle community ASAP and give the reasons why it is being done.</li><li>2. Change traffic patterns to enhance the speed of buses versus speed of cars.</li><li>3. Survey could be improved - use - 3 to 4 times per week.</li></ol> <p>Thanks!</p>

NORTH KING COUNTY	<p>I am not a believer in light rail. It is slow to build, expensive to build, and offers no flexibility in the face of changing communities.</p> <p>I am a major believer in self-driving cars. Henry Ford once said if you asked people what they wanted they'd ask for a faster horse. I believe that light rail is a faster horse. It's the past. Seattle should be looking to the future.</p> <p>I am desperate to see a full study on what Seattle could look like with self-driving cars. What would Seattle look like with \$50,000,000,000 invested in infrastructure for self-driving cars? I don't know. You don't know. Nobody knows! I can not in good conscience vote in support of ST3 when I do not believe that alternatives have been fairly discussed. I'd like to see Google put together a vision for Seattle's future. What do they think our city could look like? If they put together a vision and side-by-side ST3 looked better then I would vote for and support ST3 without hesitation. But not until other options are explored. Because they've not yet been explored.</p> <p>My belief is that if all cars were autonomous tomorrow, if we could flip a switch, then our existing infrastructure would double if not triple current traffic flow. No more accidents on rainy days. No more rubbernecking. No more slowdown on I-5 north past the 520 on-ramp because of a hill. A hill! Traffic slows down every day because of a HILL. It's insane. The list goes on and on.</p>
-------------------	---

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>I'm not sure the plan prioritizes the Lynnwood to Everett link enough, but that's okay, I still support it. It's good to see something happening on this front.</p> <p>I think the best model is to focus on moving people into and out of downtown Seattle (and maybe Redmond also). If you complete the link from Everett to Seattle and then to Tacoma, and build ample parking at all the stations, the model can work as it does in DC: Drive to the station, light rail from the station to downtown, walk the last bit.</p> <p>Extending that: if your average daily trip is a few miles (to the station), electric cars become more practical. Bikes are more practical.</p> <p>For north Seattle, I think that, rather than squabbling over which neighborhoods to connect first, we concentrate on putting together the backbone of the system on the I5 corridor. Looking at a map of the Puget Sound region, (and neglecting the East side) rail is a great fit. Most people live within a few miles of the I5 corridor. Neighborhoods like Ballard could easily be connected to the backbone via buses.</p> <p>As far as the East side: the east side is plagued by NIMBY, which is a big part of why none of the roads there quite work... No one wants traffic running by their house. Everything we do on the east side will be a struggle where everyone's a squeaky wheel. While I think it's pragmatic to connect Redmond quickly, (lots of people commuting to Redmond) I think that the only reason Issaquah is being included in the plan is those squeaky wheel types, who are going to make it a living hell to actually build the thing. See comments about neighborhood-centric approach above. (Frankly, I think the East side sort of deserves the traffic mess they've cultivated.)</p> <p>I also suspect that you'll get higher ridership building in places where the average person doesn't drive a BMW. --Just a thought.</p> <p>As far as buses: I don't know all that much about the bus system here. When I've used it, I've found it extremely cumbersome and slow, largely due to traffic. I know there have been improvements, especially along 99, but I haven't heard of anything radical enough to make me consider riding the bus. I suspect that buses should prioritize low income areas and important connections. If you set your buses up so that every bus connects to light rail somewhere near the midpoint of the route, you can get a lot more use</p>
NORTH KING COUNTY	<p>I would like to see more emphasis on urban core transit improvements. Getting to-and-from work while living in Seattle is relatively easy via transit. Living without a car in Seattle is not easy except in a few select areas; doing errands and getting from any arbitrary point A and B is time consuming and the transit coverage is uneven. When I lived without a car for a few years in Seattle, I estimate that I was adding 3-5 hours worth of transit time weekly that I now save via car ownership. This is supposed to be a city. The investment in any given regional area should be somewhat proportional to the population density of that area.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I think Seattle as the biggest and densest residence/employment center needs more light rail/subway connections. Extending the link far away is fine, but one should also connect the densest areas closer before 2040. Maybe that does not have to be Sound Transit task though.
NORTH KING COUNTY	We should be considering a future where self driving cars are the norm when planning 10-20 years out. The time it takes to get to downtown from the airport is too long because of the number of stations between those locations and the slow speed of the train itself. The rail should be considered for longer range travel with fewer stops, not stopping in each neighborhood. Let buses, ride share, and other emerging technologies handle the short distance work.
NORTH KING COUNTY	Please serve the city of Seattle first. It is densely populated and we need better services within the city limits.
NORTH KING COUNTY	Everything I have read about a west Seattle rail line is that west Seattle will not now or in the future support the ridership numbers that rail requires. Meanwhile corridors like Ballard to UW and Lake City Way are not even part of ST3. The proposed expansion within Seattle in ST3 SMELLS. It smells bad, and seems to be based on political expediency instead of current and projected growth patterns. You need to share the data upon which you have based your assumptions.
NORTH KING COUNTY	Can we complete it in half the time for 100 billion?
NORTH KING COUNTY	Why are you planning ST3 without acknowledging the impact that autonomous vehicles will have on EVERYTHING. If you are dismissive of this fact then you are misinformed. Any kind of train or transit that is on a fixed path will be obsolete before ST3 is completed in 25 years.
NORTH KING COUNTY	New York City opened their subway system in 1904. It has been over a hundred years since they did it and we are just now proposing this? We need to catch up with the rest of the country!
NORTH KING COUNTY	Just wish it was here already / could be done faster! :(
NORTH KING COUNTY	Why does it have to be one huge plan? I think it would make much more sense if it was split up and the communities that benefitted directly from the improvements helped pay for them with local levies.
NORTH KING COUNTY	I am 68 and retired. I live near the light rail station on Capitol Hill and am delighted that it is finished. I did not complete most of this survey as the timeline is likely beyond the time period that I will be using transit but I am very willing to pay my share. I do think that there needs to be an emphasis on bus transportation beyond the light rail stations. I do not support having parking lots. A bus or shuttle between the VA hospital in Beacon Hill and the Beacon Hill station would be a big help for our family.
NORTH KING COUNTY	The timeline is weak. Please speed it up. I would gladly pay double in taxes to get it done in half the time. Also, a rail line along Lake City Way would be great.
NORTH KING COUNTY	Start the Ballard to downtown line sooner!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	As a small business owner the issues of traffic are of primary concern to my employees. We're looking to expand and upgrade into new office space, and commute distance is what everyone seems to care about the most. Just getting from one side of the city to another is an issue for my employees. We're having trouble staying within the area because of this issue. It's costly, troublesome, and we can do better.
NORTH KING COUNTY	Speed this up!!
NORTH KING COUNTY	<p>The average person has to have an incentive to use transit, even if no one else does. Which means that busses that sit in the same traffic the person would drive in are of basically no use (only if the person can stop owning a car does that help) So the only transit that really matters for reducing traffic is transit that has it's own right-of-way. So "shoulder/designated lanes" work, as does light rail.</p> <p>Because of those reasons, I really only support the rail (and busses on shoulders) projects.</p> <p>Pointing out how we don't have enough roads just makes me pissed off at the fact that we can't build any damn roads. It doesn't make me support transit, it makes me support building more roads. So raising those points would seem to be a persuasive mis-step.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

<p>NORTH KING COUNTY</p>	<p>First, many of these questions are really two questions put together that have different answers, making them useless. For example, there are questions on supporting buses vs. light rail, but there's no way for me to specify that I strongly support Light Rail over buses in the city, but prefer commuter rail and buses regionally. I must either answer that I don't like Light Rail (even though I do), or answer that I support it for the whole region (which I don't).</p> <p>Likewise, a question like "The ST3 draft plan would cost the average resident in Puget Sound approximately \$200 per year, or about \$17 per month. How supportive of this plan are you?" gives some confounding information about taxes, but then only asks about the draft plan independent of taxes. I strongly oppose the ST3 draft plan, but I'm fine with the taxes, in fact, I would support a good plan with significantly higher taxes. This information isn't captured in the survey, however.</p> <p>I will not be supporting ST3. It wastes tons of money building relatively-slow light rail lines so long they will be impossible to operate efficiently or reliably instead of focusing on expanding Sounder or other commuter rail service for longer runs, while at the same time building hardly anything in the core where it would be useful.</p> <p>What a wasted opportunity. I only hope that when this measure fails, which it clearly will, Sound Transit doesn't learn the wrong lesson. The problem with this measure isn't that it's too big, it's that it's using its large size to build the wrong thing in almost every case. The right package is: Light rail from Ballard to UW, and also from Ballard to Downtown via Fremont and Queen Anne hill (NOT interbay). Longer running Sounder/Commuter Rail service between Tacoma/Lakewood, Seattle and Everett even if it means building more tracks. Light rail from Seattle through Bellevue to *downtown* Kirkland (NOT Totem Lake). Express buses from elsewhere on the eastside to feed into the Light Rail line. The draft plan is almost completely the opposite of what should be done. How did this happen?</p>
<p>NORTH KING COUNTY</p>	<p>Parking - Lots are not safe - Theft is high and transient harassment prevents me from any desire to use your services. I would rather see \$\$ spent on Law enforcement and the the judicial (criminal) Courts.</p>
<p>NORTH KING COUNTY</p>	<p>sure wish there could be more, we need it yesterday.</p>
<p>NORTH KING COUNTY</p>	<p>My husband and I are retired seniors. We are planning on using the free ORCA card tomorrow to see if we can get from Lake City to UW Light Rail to downtown to SeaTac AND back. It will be interesting to see our times. If it works out we will probably get ourselves an ORCA card and use public transit. It should be only a couple of block walk between home and bus and vice versa. Keeping our fingers crossed.</p>
<p>NORTH KING COUNTY</p>	<p>Focus on light rail think about where the density will be add cross town or circular light rail network</p>
<p>NORTH KING COUNTY</p>	<p>If you notice on holidays there is less traffic. Why not stagger Federal and State worker hours to get them off the road during prime time. Hey that would even mean we wouldn't have to take time off work if those offices had earlier and later hours where the public could take care of business! what a concept!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	build grade separated light rail everywhere!
NORTH KING COUNTY	Build this instead (for Seattle): <a href="http://seattletransitblog.com/2015/11/30/an-alternative-for-st3-with-something-for-everyone/">http://seattletransitblog.com/2015/11/30/an-alternative-for-st3-with-something-for-everyone/</a>
NORTH KING COUNTY	<p>Ballard to UW should be included. The whole "complete the spine" is worthless.</p> <p>As currently constructed, I will not vote for ST3. I have voted for every other transit measure in the last 20 years, but the bloated, suburb-heavy ST3 will not see my vote in November.</p> <p>As a Seattle resident, I support rejecting this measure and Seattle breaking away from Sound Transit. We can't wait 22 years for light rail to the neighborhoods with the most density in the state. Link to Paine Field? Give me a break.</p>
NORTH KING COUNTY	Need to move faster. If that means requiring more money, we need to increase the tax burden on our most wealthy residents. I'd be strongly supportive of the plan if its finalization was not a quarter century away.
NORTH KING COUNTY	Ballard-Fremont-Wallingford-UW line needs to make this list. There is no good east-west route across town by car or transit.
NORTH KING COUNTY	<p>The Ballard and West Seattle lines need to go much further into those regions, at least to 85th and White Center.</p> <p>Freeway alignments do not encourage TOD and should be avoided.</p> <p>Graham street station should have been built in 2009.</p>
NORTH KING COUNTY	Get it done I'll be glad to pay
NORTH KING COUNTY	I strongly support the affordable housing inclusion
NORTH KING COUNTY	MLK represents a choke point in the Light Rail system. Whenever a car vs. train incident occurs on the tracks between Mt. Baker and Rainier Beach, the whole system is affected. There are roughly fifteen places where streets cross the tracks at grade along MLK. The system may well be expanded to the furthest end of the region and be crippled by an accident that could have been prevented with a more aggressive approach toward safety. This system has the potential to be great but it can't be kept vulnerable to accidents on tracks at grade. These incidents occur frequently.
NORTH KING COUNTY	<p>Delivery is way too slow. Service absolutely needs to include capacity for express trains. Trains should not be run along freeways for 3 reasons. 1. Often this is not the most dense part of a city. The train should stop in dense, walkable areas, and areas near freeways are inherently not walkable. 2. Trains should encourage density directly next to the stop, not an expense of freeway. People don't typically want to live next to a freeway (which is noisy and dirty), so density near freeway stations will be a challenge. 3. Trains should provide a transit alternative. An alignment that exactly mirrors an existing transit option is not much of an alternative.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Rant alert: I'm an American, and close to 60 now, but having spent much of my 20s and 30s living and working and riding transpo in Berlin (both sides, but mostly in Westberlin), Hamburg, and even in the very provincial Göttingen, we need to pull up our huggies and be an all grown up, big kid region now. This means spending on non SOV oriented transpo. Prefer trains, but if the busses just had their own infrastructure, that would go a long way as well. Oh, and even as 20 year long + Ballardite (still have cheapish rent, but it may be Tukwila here I come), the south end of KC is majorly underserved as soon as you move away from the light rail. Transpo from Renton is pitiful. Safe bike and ped routes to transpo hubs, such as they are, lame. Try riding the 101 for a few days. OK. Rant over, all clear.
NORTH KING COUNTY	Only the first map referred to actually showed up on my screen.
NORTH KING COUNTY	I love the plan of expanding light rail and understand that it will only be a true success with a comprehensive, efficient system. This is essential to our region. My family and I have been, and will be riders for sure! While busses are necessary, I see adding more of them as somewhat of a band-aid to the problem. Moving forward, there CANNOT be any future budget and timeline resets, only to market an under-budget & ahead-of-schedule delivery! This erodes faith that Sound Transit is acting in our best interests with this community's enormous investment. Please do us right!
NORTH KING COUNTY	Not fast enough.  Trains are too slow.  Building the rail is too slow. Get it done.
NORTH KING COUNTY	There needs to be parking too!!!! There is not enough parking, go to SF and you have big parking lots at every station
NORTH KING COUNTY	It is ridiculous that it would take so long to complete this plan. This should be done by no later than 2021. To take until 2033 is absurd
NORTH KING COUNTY	25 years is way to long. You need to find a way to make this all happen sooner.
NORTH KING COUNTY	It needs to happen faster.
NORTH KING COUNTY	The faster the better! I love being able to take public transit everywhere. I own a car, but hate dealing with Seattle traffic. I wouldn't be able to enjoy the quality of life that I have without good public transit.
NORTH KING COUNTY	ST needs to be building transit to serve already densely populated areas and building TOD to encourage density near transit. Freeway medians should NEVER be used for rail transit as they are not walkable and offer few opportunities for TOD. If you build even one more space of parking at any station you must begin CHARGING for that parking.
NORTH KING COUNTY	I am in favor of density. Is adding more transit farther and farther from city centers going to encourage sprawl?
NORTH KING COUNTY	I'd like to speed up the process. We need light rail all over Seattle NOW.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I support a light stop on Ne 130th in Seattle- it seems odd that federal funding funding would not accommodate flexibility in a transit plan.
NORTH KING COUNTY	Buses utilizing the shoulder is a good idea that seems cost effective.
NORTH KING COUNTY	<p>Whenever I see these plans, I wonder - what takes so long to build them? I'm not being hostile, I'm genuinely curious! I know we must do things differently than other countries (like Asian cities that built their metro rapid transit and bullet train systems quickly)...I just wish they'd come online way sooner. We live in NE Seattle and until the Roosevelt &amp; Northgate stations open in a couple years, the light rail is still not a convenient option for us. Maybe y'all could make that information known so we can understand/be more patient? Or can we help speed up the process somehow?</p> <p>On the issue of parking at stations~ On the one hand, it uses up a bunch of urban space; on the other hand, it does get people on transit for at least part of their commute. The current Northgate P&amp;R is already always full, and others I've seen are typically full as well. Why aren't P&amp;Rs multi-storey garages (with security officers)? Another thought: when considering parking issues at stations, topography needs to be considered - when we use the Northgate station, we will almost always need to P&amp;R because to get there, we'll have to climb one of the steepest hills in Seattle (not feasible with, say, kids or luggage).</p> <p>Very eager to have us (someday) have a well-developed, world-class rapid transit system! Yay!</p>
NORTH KING COUNTY	<p>I want to vote yes for ST3 in November but the emphasis of building to suburban communities before helping relieve the congestion in population dense zones of Seattle has me thinking otherwise.</p> <p>The atrocious commute times from West Seattle to Downtown during high traffic hours via Rapid Ride is just one example of the need to focus on connecting the Seattle neighborhoods to downtown before a small town like Issaquah is even considered a need for light rail.</p> <p>By changing the time tables of the project completion dates to have Ballard and West Seattle done in 8 - 12 years from now would be what gets my yes vote.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I'd like to share a strange story about one of my coworkers. I live and work in Seattle and have another co-worker who does so as well. I bus to work every day using an Orca card (love it by the way! All forms of public transportation are great!). My co-worker lives in Capitol Hill and for the longest time walked the 1 - 2 miles to work everyday in Pioneer Square. The day you opened Capitol Hill light rail station was the first day he actually started using public transportation. I found it to be the oddest thing, since there was plenty of bus infrastructure for him to use before the light rail, but he chose not to use it. He hasn't explained to me why he's done this (as I think it seems quite dumb/weird/silly) but I can only hypothesize that there's a big aversion to the bus system (by not just my coworker) as I think for the uninitiated it's perceived as complicated and confusing. But because the light rail - one line, a few stops, a few places to get on is easy and clear for people (despite the fact that buses are very easy to understand once you use a trip planner or google maps). The reason I'm sharing this is that I think the light rail is a great addition to the area, as more people understand and desire to use it. But if you are betting on buses getting used as well, a marketing strategy for those new to the city should be considered (he is also new to the city, from a rural town where he didn't have to use buses) who need encouragement to start using things other than the light rail - especially for things like the shoulder buses. Just wanted to share that strange anecdote, hope it helps!
NORTH KING COUNTY	"The best way to add more capacity to our transportation system is with transit, like light rail and commuter rail, that never gets stuck in traffic" - for the Light Rail, that comment is not true. Just yesterday (3/30/16), there was an auto accident down in Rainier Valley that occurred on the rail tracks. Our Light Rail had to go back to the Tukwila station because it could not get past the accident. Therefore, all of us on the Light Rail were late to work. Either build the tracks up high over the traffic (like most of the track is already laid) or tunnel it. I know the issue is cost, but if you're gonna make the statement of: "...never gets stuck in traffic....", that's not true.
NORTH KING COUNTY	I'm not answering these questions; this is political research and should not be part of public survey on Sound Transit's website.
NORTH KING COUNTY	I strongly support ST3 in principle, and am happy to be taxed for it. But, unless the timeline for light-rail expansion from Ballard and West Seattle to Downtown Seattle is significantly accelerated, I will aggressively campaign against the passage of ST3. We can't wait ~20 years for light-rail connections between Seattle's least well-served neighborhoods.
NORTH KING COUNTY	<ul style="list-style-type: none"> <li>- Everett via Paine Field is silly, use SR99</li> <li>- Not convinced that a movable bridge for Ballard light rail is cost-effective option</li> <li>- Expedite West Seattle rail if possible</li> <li>- South Sounder improvements to facilities and dramatic expansion of operating schedule are really good projects that can be done quickly</li> </ul>
NORTH KING COUNTY	The cost of the plans are very high. I understand that these exciting new projects cost money, but maybe the costs can be metered out some or shared by the local cities who could benefit from the expansion.
NORTH KING COUNTY	Light rail has been a failure. BRT makes much more sense.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Ballard has grown so fast, it should get light rail in the first rounds. Ballard and Interbay has supported the homeless camps, why not light rail.
NORTH KING COUNTY	Sound Transit really need to broadcast the cost, the first thing I heard was that it would cost \$400 per person per year and that it would take 25 years. I don't watch TV but I was flipping through and a council person said I'll be dead by then which is ignorant. Advertise that the benefit start much sooner, the cost is less and distributed not only hitting homeowners, and that the consequences will cost a lot more. For example the lost time in traffic and other expenses will cost everyone x\$ per year if we don't do this and what is the equivalent number of highway lanes does this equate to. some people believe we should build our way out with more roads. How much would extra lanes cost, including acquiring the property and maintenance.
NORTH KING COUNTY	Stop wasting funds for bike lanes - unless bikes are licensed - they should share the cost if they want to share the road.
NORTH KING COUNTY	Just [explicit] build it ALL!!!!!!
NORTH KING COUNTY	Need a stop between 145th and Lynnwood I don't believe people are going to give up their cars entirely in this city. They move to Seattle for work... But they also move to Seattle for the outdoor activities such as skiing and hiking. They need cars to get to those activities. If it is too hard to get to a transit station or there is no guaranteed parking there.... They will still drive their cars. Parking is key!  I am not sure where the \$200 per family comes from. Last I saw it was based on an average home value of \$400,000. There are very few homes in Seattle selling for \$400,000. I am tired of getting taxed every time I turn around. I am now paying more than \$500.00 in taxes than a couple of years ago.... No more taxes!
NORTH KING COUNTY	Ballard and West Seattle need to be sooner. Do not add to the regressive sales tax.
NORTH KING COUNTY	Rather than increasing assessed value residential property tax to fund ST3, more of the burden should be placed on motor vehicle owners and operators as that more directly relates to the issues of traffic and congestion.
NORTH KING COUNTY	I just want to express how happy I am that our public transportation infrastructure is improving. I am a bike commuter, and over the last few years, the increase in cranky car drivers has lead to many unsafe conditions. I am very fortunate that I haven't been hit, but I have a close call about 3 times a month.
NORTH KING COUNTY	I just wish we didn't have to wait 22 years.
NORTH KING COUNTY	Parking at stations is HUGE in this first stage of the system. If I can't park at the station, or if there isn't a quick and easy bus run there I won't use it. Right now it would take me two busses and 30 minutes to get to the nearest station, or a 7 minute drive.
NORTH KING COUNTY	I would like to see more emphasis on the light rail expansion first. We need to see what can be done to make these projects move along faster to get the most help to the transit problems we have now.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Having a fast public transit system is essential for quality of life. As someone who won't be able to afford to live in the city much longer, I am looking to the suburbs for my future home but hating the idea of commuting in to work. A streamlined system would take this concern away and allow me to still be a part of the city I love without the headache of traffic and expensive parking. It would give me more flexibility in the times I commute and places I can go for shopping and recreation without a car. Sadly, 25 years for full implementation won't solve this problem for me but it will give future professionals more choice.
NORTH KING COUNTY	Two pieces of feedback from one who sits in SR99 traffic every day because there is no efficient way to get from West Seattle to Fremont: 1) add more options to West Seattle low income (south Delridge, Highland Park, White Center) areas, and 2) re-think the financing that places the burden on low and middle income tax payers. Go after the employers like Amazon who are bringing all the new people to the area but don't pay their fair share of infrastructure costs! If you did those things, I could get on board.
NORTH KING COUNTY	West Seattle NOW!
NORTH KING COUNTY	Ballard to Downtown needs to be grade separated, or else the train will just get stuck in traffic along with everyone else.
NORTH KING COUNTY	The light rail isn't fast. It is still significantly faster to drive from downtown Seattle to the airport or even UW to the airport. Existing Metro bus routes are much more efficient and I would prefer that system be expanded. Additionally, while I think the outer areas (especially north Seattle) need more transit options, leaving Seattle Center out for 20 years, a major source of tourist traffic, and SLU, a major source of commuter traffic, I don't think you're really considering many commuters pain points.
NORTH KING COUNTY	Build it now! We're way too late with all this!
NORTH KING COUNTY	I'm concerned about where the funding is coming from for these projects. I believe an income tax would be the most progressive and fairest way to fund these projects.
NORTH KING COUNTY	Most of the plans only help those living outside the city/county limits. I live in the city and pay the high property taxes to have a reduced commute. Because of all the rapid rides those living out of town now have a faster commute then I do living in Magnolia (only 10 min from downtown). I want more done for those of us living in the city.
NORTH KING COUNTY	Will the proposed taxes go away once the projects are completed? Is the proposed time frame of 8-25 years to complete the plans mentioned above a conservative estimate meaning that the time to complete could be less?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I just want to be able to get to south lake union and fremont from capitol hill. I walk miles every day because everything currently goes through downtown for a transfer. Why do I have to go downtown to get anywhere except UW :( Also more stations. The cap hill station is great, but honestly the time it takes to get there from other parts of capitol hill make it not worth using, especially since it just goes downtown - which ALL the busses already do anyway. The bus is still the best option for me, and now the bus routes got reduced because I don't live near the station. It sucks. It's so hard to get from one place to another in this city, which is silly because everything isn't actually /that far/. It's nice that we're looking at how to get people in and out of the city quickly, but we need to work on getting from one part of the city to another too.
NORTH KING COUNTY	Addition stops ST Express routes should. be eliminated from the plan.
NORTH KING COUNTY	Faster more aggressive timeline is needed.
NORTH KING COUNTY	The way to get this done isn't by adding taxes, it's by better managing where the tax money already goes. Don't spend 1.4 million to save a failing bike program, paint rainbow sidewalks (I do support the gay community, but that's a bogus use of money) and paying for all of Washington's homeless. Use the tax dollars smarter.
NORTH KING COUNTY	Move the Seattle projects forward. New transit to Ballard and west Seattle will be instantly full. New transit in the suburbs will languish for years. Wait for the suburbs to density then deliver light rail.
NORTH KING COUNTY	Timeliness too long
NORTH KING COUNTY	New parking lots should be paid for in part by charging users for parking, just as riders pay to ride transit. This is just common sense. It also addresses the problem of asking people who don't own cars to subsidize parking. Furthermore sound transit should prioritize projects that will perform best in the short term and work to complete those first. Seattle has urgent transit needs. A Ballard to u district tunnel would fall in this category and serve downtown commuter needs as well. We need a fiscal analysis of the projects to show that sound transit is making the most effective use of limited taxpayer \$\$.
NORTH KING COUNTY	Hugely important to link UW to Ballard via an East/West line!!!!
NORTH KING COUNTY	The plans are great, the timelines are ridiculous. We need this to move much more quickly or the city will collapse under the weight of all the people moving here.
NORTH KING COUNTY	Interesting set of projects. Light rail time line should be significantly accelerated; busses are hampered by traffic in ways that LR is not. Also, nothing from UW to Ballard? Seems like a flaw.
NORTH KING COUNTY	22 years is a long time to wait to connect Ballard to downtown Seattle.
NORTH KING COUNTY	60 hours isn't a week and a half. It's two and a half days.
NORTH KING COUNTY	I don't understand what use a Ballard to West Seattle light rail is. This doesn't improve the major choke points of our region and helps only wealthy neighborhoods of Seattle. Seattle has already gotten a disproportionate share of Sound Transit funding. That makes sense to connect other areas to and through Seattle, but the new line doesn't help anybody but Seattle and is incredibly expensive

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Ballard to downtown should be grade separated; otherwise, it's not a commitment by the city to anything besides taking too long to slightly speed things up. Ballard to UW connection is also vital, as no matter how many north-south corridors we build, we're still logjammed by east-west travel.
NORTH KING COUNTY	We need to incentivize businesses to allow more work-from-home and alternative schedules (e.g. 4 / 10hr instead of 5 / 8). This should be fully supported and implemented by local law-makers even though it may (if the incentives are as makes sense) reduce local gov't revenue.
NORTH KING COUNTY	Can't read the options in a mobile phone, Need meant more East-west options. Our system is all north south.
NORTH KING COUNTY	The number one priority for ST3 is to structure the proposal to win voter approval in November 2016. You've wisely given voters in Everett, Issaquah, Federal Way, Tacoma and DuPont reasons to vote YES. Seattle voters may express some concerns about ST3, but there's never enough money to please everyone. I'm a Seattle voter myself. Based on past votes, you can assume you will receive a resounding YES vote from Seattle voters regardless of the details of the ST3 package. If you do make any final modifications to the proposed ST3 plan, please consider how you will attract YES votes from voters in Kirkland, Woodinville, Kent and Auburn. While ST3 throws a few bones to these communities, they may feel left out and decide to vote against ST3. Whatever you can include in ST3 to attract these voters will be beneficial for everyone when we are celebrating our victory in November. Perhaps you can accelerate bus programs for these communities so they see almost immediate improvements? Perhaps you can add parking at transit centers in these communities?
NORTH KING COUNTY	I would like bus service to run earlier in the morning. The buses in our area 98155 do not run early enough to get to the airport for early flights, e.g. 8:00 a.m.
NORTH KING COUNTY	Please focus attention in North non Seattle cities of Lake Forest Park and Shoreline.
NORTH KING COUNTY	Thank you for soliciting the feedback of the community as this proposal moves forward.
NORTH KING COUNTY	I don't understand how increasing bus service can help our transit problem. Are you planning on adding extra lanes to roads just for bus service? otherwise, buses will continue to get stuck in traffic with everyone else. HOV lanes are too congested to make the dream of 'rapid bus transit' a reality. A focus on light rail is our best bet - get people out of cars and off the roads, able to commute efficiently and comfortably.
NORTH KING COUNTY	Parking, additional train cars (both light and heavy rail), additional runs for south sound heavy rail, and corridors for buses only (shoulder or full roads) should be prioritized first to maximize existing service. Get real, quit pushing cars out into the neighborhoods adjacent to stations and transit stations. TOD development is gentrifying the poor further away from jobs. Stop it.
NORTH KING COUNTY	Please focus on getting g the core city service right first. Ballard is choking under the burden of all of the new condos and apartments. I love the idea of an urban village but this neighborhood cannot support the influx of traffic our new neighbors bring.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	eliminate surface light rail and replace it with an elevated MONOrail that runs around the lake north to south STOP wasting time and money on light rail it causes more traffic jams than it solves do away with bike lanes unless they license and tax/tab bikes for those over 10
NORTH KING COUNTY	I am generally in favor of public transit but found the ST3 proposal frustrating. there is a suggested update via the Seattle times op Ed column (I think it's the S. Times?) that if modified to fit, would make me more likely to vote in favor of ST3. At the moment, I'm inclined to vote no.
NORTH KING COUNTY	ST3 does not adequately address the issues raised in #15. Extending light rail beyond Lynwood to the north or Angle Lake (maybe Federla Wya transit center) to the south does nothing to alleviate traffic. Meanwhile, it would be much less expensive and quicker to connect Ballard via the UW station, not another downtown tunnel. Additionally, the cost of light rail to W. Seattle makes BRT a much more viable option. Finally, if you really want to get people out of their cars, then you must build a line through the heart of Seattle - i.e. through the Central District along 23rd that ultimately connects to the Central Link line.
NORTH KING COUNTY	This is not one of your best surveys. I stopped filling it out fairly early. I would assume that anyone filling out this survey will agree that mass transit is important. That is, by definition, your audience. Also, you ask whether things are important, but not in relation to anything else. It's hard for me to imagine that answers to these questions would be helpful to anyone. You're a great organization and my perception is that you listen to the populations you're serving. This survey is not representative of that.
NORTH KING COUNTY	<p>Sound Transit should prioritize light rail stations and lines where it is needed and will have the highest ridership: within Seattle city limits. Worldwide, people are ditching the suburbs for dense, walkable cities. This is evident in the high demand for housing in Seattle. This plan bewilderingly skips many densely populated residential neighborhoods and business districts such as Belltown, First Hill, Georgetown, Fremont, Queen Anne, and the Central District. Further, it is disconcerting that the in demand Ballard and West Seattle lines are slated to open after Federal Way and Redmond, which will surely have lower ridership. Although I am a strong supporter of mass transit and would rather use it than own a car (unlike many suburbanites), I am tempted to vote against this plan as it stands now.</p> <p>Thank you for your consideration.</p>
NORTH KING COUNTY	We're already taxed into oblivion, especially for senior citizens and those of us on fixed incomes. I know I can't afford to live in Seattle anymore. Why not tax the developers, the corporations and all of their employees that are developing in, moving into, and working in Downtown Seattle. Somebody is getting off free and those of us who have lived here for years are footing the bill. \$200 per year may not seem a lot to kids pulling down large salaries at Amazon, for instance, but increased taxes are killing seniors and forcing them to move.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	More and more frequent small buses will allow more flexibility, ability to get around traffic issues and allow folks to more easily deal with not driving and go with mass transit options. Just retired and my husband and I cut back to one car and are trying to use Metro and Lyft.. Would love more smaller buses, light rail will require at least one transfer to get most places.
NORTH KING COUNTY	Graham Street station should have been built in the first wave of Light Rail construction. It wasn't. It needs to be a priority now for the development of the long under-served Rainier Valley.
NORTH KING COUNTY	Graham street station should be the first priority it was in the original plan.
NORTH KING COUNTY	There are too many people trying to get into downtown and not enough public transit options.
NORTH KING COUNTY	Put light rail where density, transit use and willingness to contribute to transit are greatest. Transit is a benefit that should accrue first to areas of density and it should be used to combat sprawl not accommodate sprawl.
NORTH KING COUNTY	Building out the core infrastructure of the light rail system, BRT system, and sounder system should be the top priority. Expanding the existing system into the suburbs should be completed later. Maximizing ridership via construction and improvements in the densest area of the region needs to be the focus, not building out a system for suburban weekday commuters.
NORTH KING COUNTY	Ballard needs transit now!
NORTH KING COUNTY	Faster is my top concern. Many (most?) people,won't support paying for a plan that takes 25 years in my opinion.
NORTH KING COUNTY	This was difficult because we should have had light rail a long time ago--I have been an advocate since 1979, HONEST! The cost is drastically more now than it would have cost then. I remember people saying we need more people. To me, this is dumb. Build BEFORE they come; be ready for them. Issue bonds. Do whatever can be done to get the light rail asap.
NORTH KING COUNTY	You're time frame is to slow, thinking 25 years out is to long. If traffic is as bad as you say it's become in 5 years? What will become of our economy in 15 years. I've lived here my entire life & my quality of life is very much diminished.
NORTH KING COUNTY	There are several reasons that I would not vote for this plan. Ballard and W. Seattle in 17-20+ years is absurd! These areas need to be served much sooner as well as light rail to the Eastside (Bellevue and Redmond) I also oppose the \$200 year tax increase, but not because it is an increase in taxes. I will GLADLY pass the increase to have a light rail system for the Seattle Metro area where transportation is greatly needed NOW... but it needs to be put in place in the greater Seattle Metro area first, not last. And lastly, the last section of comments (15) are all agreeable, just not enough to sway me to vote for ST3.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>I am a huge proponent of public transit, but the current draft of ST3 is awful. It disregards several important facts: (1) growth in the Puget Sound region is concentrated in Seattle, not the suburbs, (2) light rail is ill suited to long distance trips such as Everett to Seattle, which could be better served by heavy rail, (3) there are no decent options for traveling east-west within Seattle.</p> <p>Ballard-Downtown needs service ASAP and must be 100% grade separated. SLU needs service ASAP as one of the fastest growing job centers in the country. Ballard-UW and "Metro 8" should also be added as high priority projects. The central district is one of the most diverse neighborhoods in the region, and ST should avoid the errors of other cities in under serving minority communities.</p>
NORTH KING COUNTY	<p>Ballard to downtown should be a priority and should be fully grade separated. This line will likely serve more riders than all other lines and should be completed first. Please make this line fully grade separated.</p>
NORTH KING COUNTY	<p>Look for ways to deliver new light rail faster!</p>
NORTH KING COUNTY	<p>Build light rail faster and ensure it has dedicated and fast service that is not delayed by surface grade issues like cars and pedestrians.</p>
NORTH KING COUNTY	<p>I need to understand the total amount of taxes I will pay for transit - not just ST3. It seems you are not forthcoming about the total amount of taxes for transit. At a minimum, ST should make clear the total amount of taxes it will collect.</p>
NORTH KING COUNTY	<p>stop placing the majority of cost on the backs of the property owner. Make it completely USER funded, ie tolls, business supported.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

<p>NORTH KING COUNTY</p>	<p>I have been a supporter and activist for rapid transit in this reason for over 30 years now, and I can honestly say, as a Seattle resident and property owner, that this is the worst possible plan any agency tasked with getting the largest number of people on to transit can possibly have come up with. It's as if you sat there and said "What's the worst things we can do for the most money in the longest possible time? Let's do that!"</p> <p>Your treatment of by far the largest city with the most transit users is frankly disgusting--a political line to West Seattle, which is not densely populated and has no linear route that serves all potential communities; giving the finger to the denser, more diverse and economically striated Lake City by not only BUILDING the 130th St station--which directly serves it--but turning the 522 on 145th instead of 125th; and ignoring the fact that a Ballard-UW line would serve more people, make for better transfers from all points north to all over the city, and would cost substantially less than Ballard-UW. Of course, based on past station placement (Northgate, Tukwila, Mt Baker, no First Hill or 520 station), any new work will be nearly inaccessible to buses and seamless transfers.</p> <p>This is a non-starter, and for as long as I have supported public transit in this town, it pains me to say that not only will I oppose this plan if it is what goes to voters, I will mobilize to get out the NO vote. We don't need a hundred miles of trains out to the far ends of the metro area just to say we have them, we need trains concentrated in areas that are high density and have high transit need. Build more in Seattle and to Bellevue. Build OUT from Tacoma and Everett, not TO them. Don't build sprawl-inducing lines that will do exactly what the freeways of 50 years ago did. Don't try to combine urban rail transit with commuter lines. Service-wise, don't be BART; be DC's Metrorail. Otherwise, let's blow this whole thing up and find a better way to fund, design and build a real urban transit system.</p>
<p>NORTH KING COUNTY</p>	<p>Decisive and swift work on this is greatly needed. We need to make it a high priority and keep it a high priority for future generations to come.</p>
<p>NORTH KING COUNTY</p>	<p>The Graham St stop was originally included in light rail and then scrapped. That means we have waited 20 years for service to our neighborhood. Now the proposal is to wait 20 more years! This stop would benefit thousands more will minimal cost and limited disruption. Bring back Graham St now!!</p>
<p>NORTH KING COUNTY</p>	<p>The Graham St Station needs to be prioritized. 20 years from now is FAR too long. The neighborhood it will serve is growing more dense by the day.</p>
<p>NORTH KING COUNTY</p>	<p>I'm just not convinced that we have the density and overall population size to really support all this light and heavy rail. Also, need better coordination between Metro and ST. Metro and ST should have worked together to get the Univ DISTRICT station opened at same time as the UW and Cap Hill stations, which would have allowed a much better integrated and useful system.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Unless you educate the public and promote state, county and city income taxes I do not support Sound Transit expansion on the backs of home owners and everyone through regressive taxes. We need to make this system more fair and equitable so that those with high incomes pay their fair share. Thank you.
NORTH KING COUNTY	I'd like to offer some clarification on my answers to 13-15: while I will happily support a plan to expand light rail throughout Puget Sound in the ballot, I'm very concerned by the regressive methods by which Sound Transit will collect revenue to pay for these improvements and expansions. Increases to sales tax disproportionately affect low-income residents, and with increasing housing costs pushing low-income residents outside of Seattle proper, more and more such residents are forced to rely on driving to and from work, such that the motor vehicle excise tax may also more strongly affect our poorer residents. By all means, tax property owners to pay for these improvements, but I strongly urge Sound Transit to consider less regressive means of funding these projects, so that all of our residents, including businesses that would benefit from greater transportation opportunities for their workers and commercial developers that will benefit by more people moving to neighborhoods and towns with improved transportation infrastructure.
NORTH KING COUNTY	Light rail everywhere, as quickly as possible. Underground, tubes, above ground, raised above the ground. Let the United Kingdom and Europe show us the way. Their cities are much more livable. We must follow the British/European methods of civic engineering.
NORTH KING COUNTY	Getting people from Capitol Hill, Ballard, Shoreline, and other neighborhoods in the surrounding Downtown area need the most support as that's where the majority of people are. Building bike greenways and trails is also a huge benefit. I just started biking and use both transit & trail. Happy to see some improvements coming.
NORTH KING COUNTY	Funding should be based on GAS taxes rather than land use or vehicle excise taxes. Let's align incentives to have motorists drive less and use mass transit more. Only gas taxes raise the cost of each trip, internalizing the costs drivers impose on others through traffic and environmental degradation. Tax gas, not land!
NORTH KING COUNTY	I'm really disappointed in the results of the March 26 reshuffle. Previous to that, my commute was approximately 20 minutes (5 minutes walking, 15 minutes riding). Now, as of March 26, my commute is an hour. It can be only 30 or so minutes according to Trip Planner -- if I walk a mile and a half as well as ride the bus -- for only 9 minutes. Please consider bringing back the #16 route.
NORTH KING COUNTY	Pass it in, if not sent to the correct agency. Bus changes beginning Saturday, 3/25/16 was poorly handled. Why? Updates on routes were not on the rack nor sufficient quantities, when done, available on the rack (Westlake, on buses). Worst was/is the maps at the bus stops were not changed out, showing deleted buses and routes. Noted yesterday in route from North Seattle, bus stops are NOT showing bus numbers stopping at those stops NOR the lighted reader boards. IF YOU WERE ON FOOT AND ATTEMPTING TO USE MASS TRANSIT TO GET TO AN APPOINTMENT, JOB, OR MEET UP, YOU WOULD BE PRETTY DISAPPOINTED IN THE COMPETENCY AND EXPECTATIONS OF LINK AND BUS SERVICE. CHECK ONLINE? DOES EVERYONE CARRY A SMARTPHONE? SOME EMPLOYEES NEED TO BE FIRED.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	build rail in seattle first, then complete spine and improvements outside the city
NORTH KING COUNTY	<p>Your survey failed to provide costs for this plan. You failed to provide construction costs and operating costs. You also failed provide sources of money for construction and operations. Taxing overtaxed property owners is not an answer. As the political elites love to state, "User Fees." Let the users of these services pay for the construction and operating costs.</p> <p>Secondly, you failed to provide detail on how you calculated the \$200 per year cost. In my 40+ years of life in the private sector, I have NEVER seen a capital intensive governmental project completed on-time/on-budget. Therefore, your \$200 per year is simply a pipe dream.</p> <p>Next survey: perhaps you'll provide some true financial facts!</p>
NORTH KING COUNTY	ignoring cars is not the answer
NORTH KING COUNTY	Costs too much to homeowners
NORTH KING COUNTY	I'm fully supportive of developing all types of transit, particularly rail service. Please be mindful of an area's historic and natural resources when developing transit. All three add to the livability of a neighborhood. And, thank you!
NORTH KING COUNTY	Please keep all light rail grade separated- speed and reliability. Going through Rainier Valley showcases the problems with shared corridors.
NORTH KING COUNTY	You should reroute the Sound Transit 512 Lynnwood/ Everett bus so it goes to the Husky Stadium light rail station instead of going to all the way to downtown Seattle. That way your busses won't be stuck in the gridlock that is I-5 at certain times of the day. It would also increase light rail ridership and cut fuel costs associated with the busses being stuck in traffic.
NORTH KING COUNTY	<p>well!!!! to stat with,, I am a disabled vet. I use crutches to get around. before your light rail b.s. started,,, I could get on a bus, pay \$1.00, get a transfer and get to the airport,, CLOSE to the terminal!!! now, it is a different story!!!! I get a bus for \$1.00, go down town. walk,, crawl climb to the tunnel, then the bus transfer mean jack sh++!!! and I have to pay \$3.00 more!!!now I am close (?) to the airport!!! I am about 1/2 mile thru windy, dirty parking garage to get to the terminal!!! all this while trying to control my baggage!!! sound like fun??</p> <p>so,, just tell me 1 thing about your transportation package that is a benefit to me or speeds up my trip!!! I ca give you more tips that are not quit ad hard,, but none are fun!! so, I have got an old diesel pick up truck!!! it blows black smoke!!! pollutes and all the nasty stuff you are trying to get rid of!!!,, but I get where I want to go!!!</p> <p>so guess how much support you are going to get from me for your stupid (my opinion) transportation package</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

<p>NORTH KING COUNTY</p>	<p>This plan claims to look at the future but looks exclusively to the past. Its very difficult to see the future when your gaze is so fixed on the past.</p> <p>All the questions of this survey are likely to become irrelevant with disruptive innovative technology. Artificial Intelligence and its outcome, Robotics, are rapidly approaching and likely to become influential at the completion time (Let alone its use time) of the projects of this plan yet I see NO evaluation of AI/Robotics and its impact on transportation. I've been searching my governmental agencies for any evaluation of AI/Robotics and I've found none because all my inquiries have been ignored.</p> <p>All the questions assume the continuation of privately owned family sized manually driven automobiles. When you examine robotic driving efforts they see car size matching to the trip (single person sized car for a single person trip) smaller size car with crash reduction/prevention, radically reduced car fleet and parking with continuous recirculating cars that are called to use for the trip, continuous train-like use with inter-car and car-cloud communication and management that prevents traffic slowing from congestion, and removes the necessity of transfers and complete stops along the trip to let passengers on/off where the robotic cars may pull in/out of the train-line for different directions of travel and passenger on/off.</p> <p>From this survey I get the overpowering impression that the plan depends on all these technological advances to be irrelevant. I assume its Sound Transit's plan that will be irrelevant, and its just the politics and money driving the obsolete technology over the cliff.</p> <p>I bought a \$600 typewriter in 1982 which became obsolete garbage in 5 years. The proper lesson is to reverse your fixation from the past and check the developing technologies to see if they might have an impact on your plans.</p> <p>Until such an evaluation this plan and agency so completely fixed on the past is best viewed as a threat to our future. Remember the huge project in the 19th century to build a system of canals? The train blew away that huge investment in just a few years.</p>
<p>NORTH KING COUNTY</p>	<p>I strongly strongly support mass transit and have been very impressed with the progress on the new light rail thus far. Keep up the good work guys, and please keep the ball rolling!</p> <p>I live in Renton and work in Mountlake Terrace- I dream of a day that I won't spend 1.5-3 hours in traffic every day!</p>
<p>NORTH KING COUNTY</p>	<p>Start close to the city and work outwards, Ballard especially is growing as a low car community. Help them.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>1) Build out faster! It sucks voting for a plan that won't serve me for 20 years, especially when the need is already there. For a greater cost, can't the network be built out faster in parallel, and if not, what transportation options can be added faster (such as street cars or monorail?)</p> <p>2) Run the rail faster! The current light rail is slow, and takes 40 minutes to get from downtown to the airport, because of frequent stops downtown and a slow maximum speed. Even in heavy traffic a taxi is faster for me than rail. BART in SF seems to run their trains a lot faster.</p> <p>3) I think more people will be convinced to build out public transit because it will get more cars off the road which will improve THEIR COMMUTE, not stop global warming (which it will also do).</p> <p>4) Can we make the downtown area more walkable? As someone who lives downtown, I would love to see more projects like the Bell St. Park, or Bellevue's Pedestrian Corridor. Having SAFE walkable areas separated from the noise and pollution is really nice, and a covered park for walking in the winter would be even better!</p>
NORTH KING COUNTY	Retired, fixed income, taxed out!
NORTH KING COUNTY	One of the main reasons I never use public transit any more is the safety factor. I used to ride the Rainier 7 bus downtown regularly, but wouldn't dare do so now. As for the light rail system, you make it sound like there will be a safe, easily accessible stop in every neighborhood, which is clearly not the case. From where I live, I would have to take two buses just to get to the light rail station, not an experience I would describe as "fast, reliable and stress-free". And since I wouldn't use the system, I resent having to pay for it. I am not simply being negative -- I have used public transport in London, Munich and San Diego, all of which seem better planned.
NORTH KING COUNTY	Light rail must also run after midnight. Link from SeaTac to University of Washington stops running early on Sunday night but many University of Washington area people need a return to the area on a Sunday evening from SeaTac. I had a problem with this when returning from O'Hare Airport to SeaTac the first Sunday night the new station was open. Why do we have a "Cinderella" system that does not function late at night?
NORTH KING COUNTY	This needs to happen sooner - particularly for Ballard and west Seattle!!
NORTH KING COUNTY	We need more road improvements. All of these new apartment/condo developments should be required to have parking. Seattle government's hatred for cars is crazy. Many people like myself have jobs that require them to travel around the city seeing customers. Taking the bus or light rail to client meetings does not work.
NORTH KING COUNTY	development planning should include positive and negative feedback for large businesses deciding to drop in the middle of the existing mess of a traffic transit system and causing obvious increase in problems for everyone. don't need more big businesses plopping in the downtown area, should be in the open outskirts.
NORTH KING COUNTY	The whole proposed \$50 billion design should be speeded up to something less than 25 years.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Adding more public transit to our region is essential. HOWEVER, I do not believe that our elected officials and those charged with creating/implementing our transit plans have the expertise to oversee such a project. The expansion of light rail to the U District and changes to city streets, especially Broadway, are disastrous. Why is there NO parking at transit stations? The only way I could support ANY additional plan is if we import experts from cities that have successful transit and put them in charge here.
NORTH KING COUNTY	please consider moving ballard closer up in the timeline. 22 years is a long time to wait for a bus.
NORTH KING COUNTY	I live in the Broadview neighborhood of northwest Seattle. There seem to be NO proposals that directly benefit northwest Seattle. I would have to either DRIVE to Northgate or DRIVE to Ballard or DRIVE to Edmonds to be served by any of the proposed projects or improvements of existing services. So.....none of the proposals would help me directly to get to work or get around the area. Also, express bus service to our neighborhood had been cut back to only certain hours, so I still have to DRIVE to a bus stop about 2 miles away from my home to take the bus during certain hours. No help whatsoever.
NORTH KING COUNTY	I think that sound transit needs to consider more street cars that would connect the neighborhoods i.e. Fremont to Ballard, Ballard through interbay to downtown, Wedgwood to U Village to UW station and up to Capitol Hill.....as examples.
NORTH KING COUNTY	Shoulder buses mean there is no where for break-downs/crashes to go. More traffic means more break-downs/crashes. The whole thing is a day late and a dollar short. How can it possibly take 8 years to put in rapid ride buses. That makes no sense. Stop paying for everything by raising property taxes. It really hurts those on a fixed income who own a house the most. Pay for this the way it should be - income tax!!! Build the link system faster. Get going in more areas at once. Get money from developers and companies to pay for moving the people they hire to move around!
NORTH KING COUNTY	The light rail system doesn't support the region efficiently. I would be using the light rail more if it served to the resident needs. I only use it whenever it need to travel to Seatac. There would be a station at all the major malls. I would love to be able to ride the rail from downtown to Southcenter, Northgate mall, or to Bellevue square. I study Washington DC system, they go where the residents need to go.
NORTH KING COUNTY	Making the eastlake buses connect to Capitol Hill or Ballard would be great! There's no easy way to get between those neighborhoods now because of the lake and freeway.
NORTH KING COUNTY	I don't see this as a coordinated effort with other transit systems, i.e. how does this fit into Metro plans or lack of plans as the case may be? Right now I clearly see tax payer money being wasted on competing systems or modes of transportation, Seattle Street Car which is some cases has been a complete waste of money given it's limited reach. Additionally, I am unwilling to fund any additional reach / plan when the City of Seattle spends \$1.4M on a failing bike share program, \$35K per month on homeless RV parks, etc. Additionally, the timelines are so long that by the time ST implements any of these they will be outdated. Thank you.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	To reduce traffic using light rail you need a way to get people to the stations. A network of feeder mass transit is needed that offers frequent and convenient transportation from anyplace to the nearest rail station.
NORTH KING COUNTY	<p>I am not happy with a lot of the decisions made with regard to transportation. The expense is astronomical and your numbers are not reliable. I can take a bus from my neighborhood downtown but you cut the service! You built light rail to Capitol Hill at a huge expense and the station is too far away for me to use it. The streetcar in south Lake Union is not used. Waste of money. The one on Capitol Hill is a total waste of money.</p> <p>I use the light rail to go to the airport. Why is it only a \$1? Lost revenue. \$2 would still be a bargain.</p> <p>You want cars off the road yet you skip a station at the Boeing plant where lots of people work. Makes no sense.</p> <p>Seems you are funding these expensive projects but have a crisis with funding the bus system. Make riding the bus a cool thing to do.</p>
NORTH KING COUNTY	You cannot, CANNOT, leave the Ballard line to wait for 22 years. You will kill the City.
NORTH KING COUNTY	Sick to death of you raising our taxes and spending it foolishly. LIBERATE!!!!!!!!!!!!
NORTH KING COUNTY	I find it interesting that Metro has recently cancelled bus routes that served several inner city neighborhoods. More of us are now driving and those who do not drive must now either walk or bike quite a distance to catch a bus, and then take a tour of our city before reaching our destination or rely on transferring to get to our destination. The cuts have only added to not only the traffic problem but also rider frustration. If the future draft plan is based on similar decision-making criteria I seriously doubt it will serve the public without creating additional problems.
NORTH KING COUNTY	Your plan makes no mention of how to reduce costs to riders. In fact, funding all these projects seems to only financially burden citizens more. These expansion project budgets are well beyond sound financial planning.
NORTH KING COUNTY	Your financial figures seem inaccurate. First, you say that it will only cost the average resident \$200 per year. If 3 million residents are included, that would raise 600 million dollars per year. However, my understanding is that you need to raise over 1 billion per year from taxes alone. The news report I heard on KOMO radio said that the project included \$50 billion more in spending over 25 years for new light rail, with new taxes covering a little over half of the amount (\$27 billion), and "costing the average homeowner \$400 per year". So it would cost \$360 per resident with 3 million people taxed, or \$270 per person if 4 million people were taxed, if \$1.08 billion needed to be raised per year (27 billion divided by 25 years). Second, I computed that the tax on my home would be \$150 per year (valued at \$600,000). Then the tax on my three cars (valued at only \$17,000 for all) would be \$136. (A more-typical household with \$50,000 in vehicles would pay \$480 in tax just on their vehicles.) Then I would pay an additional .5% sales tax on all purchases on top of that. So my cost would be well over \$300. PLEASE RE-CHECK YOUR MATH.
NORTH KING COUNTY	<p>focus on convenient commute times in neighborhoods around employment centers.. Don't waste resources dragging people across the region.</p> <p>Bring back the 43 bus. Travel times are worse in 98112 with light rail.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	No more sales or property taxes. Income tax, gasoline, and car registration taxes instead.
NORTH KING COUNTY	A link light rail station near Shoreline would help me.
NORTH KING COUNTY	A large percentage of middle class or retired property owners in Seattle cannot afford this proposal. We already have the huge local transportation tax and we are expecting housing and education taxes. The budget is not in any way being balanced through tradeoffs, but rather being taken out on property owners. This is NOT the way to fund transportation as it is regressive and discriminatory.
NORTH KING COUNTY	Taxes are already outlandishly high, and the thought of having to pay even more is extremely disconcerting.
NORTH KING COUNTY	People who use mass transit the most seem to be the people most struggling with finances. I think you should consider taxing people in upper income brackets to help pay for mass transit. I'm sure a lot of low-income families might struggle with an additional \$17 a month to help pay for transit options that they can't use until at minimum 8 years from now.
NORTH KING COUNTY	I am opposed any new taxes to pay for those projects until current City of Seattle levies are in effect.
NORTH KING COUNTY	the timeline is completely unacceptable. It took less than 10 years for the US to decide to go to the moon, develop the technology, and do it. How can it take more than 10 years to extend the Link? is this an april fools day joke?
NORTH KING COUNTY	I am opposed to this plan because now that the two newest light-rail stations have been opened, my former bus routes that I took to work have either been eliminated or changed to the point of no longer being worth the extra time it would take to use public transit. So, I'm angry that I'm back in my car. No thanks to any more mass transit.
NORTH KING COUNTY	The opening of the UW station has been wonderful, and there is good bus service to get from my neighborhood to the station...thank you!
NORTH KING COUNTY	More rapid timelines should be considered. It is not clear why some projects will take 25 years!
NORTH KING COUNTY	Should be faster timeline
NORTH KING COUNTY	Whether or not you admit it, transit centers bring homeless people into communities where they weren't before (see Northgate before and after the transit center went in). If I wanted to live in an area like that, I would have stayed in the Northgate area. I don't want mass transit stations invading the nice, quite residential area in which I now live and bringing with them all the druggies, prostitutes, and vandals. Been there, done that, done with that.
NORTH KING COUNTY	Please... STOP adding bike lanes and removing lanes of automobile traffic. Bikes should not be a priority and no additional tax dollars should be spent on bikes / bike programs. I'm in favor of my taxes supporting MASS transit (buses / rail). Bikes are not mass transit and only increase congestion and subsequently, pollution.
NORTH KING COUNTY	I would love to be able to walk/ride public transit (EXCEPT FOR BUSES WHICH ARE THE WORST) for most of my commuting/errand/socializing activities if it were faster than driving MOST of the time, frequent, safe and reliable. And affordable (less than the cost of owning/insuring/fueling a car per year, e.g.). I don't understand why everything takes so long.
NORTH KING COUNTY	Light rail connecting downtown Seattle and Lower Queen Anne to Ballard cannot come fast enough.
NORTH KING COUNTY	Too much in taxes. Should be user fees paid for by those who use the resources.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	This survey and information is very well put together. I am excited for the expansion of the light rail from DT to Ballard. Get that thing started!
NORTH KING COUNTY	Traffic in Seattle is terrible. Parking downtown is a disaster. Easy mobility is key for a healthy economy. Everyone should be able to affordably get where they need to go. Public transit is good for the environment. Please build the infrastructure we desperately need!
NORTH KING COUNTY	Seattle needs light rail that links all the neighborhoods to the down town core and east sides as soon as possible. Prioritize projects that accomplish this. Make satatlite park and rides all along the parameter of the city so that people can funnel into the city from light rail park and rides.
NORTH KING COUNTY	I feel that tax on property value is unfair. Values have skyrocketed while our income has decreased. Also I feel the timeline is too slow.
NORTH KING COUNTY	It would be great if there is a light rail from Shoreline through Bothell and Woodinville. Or basically, a light rail from city to city just like international subways. This would eliminate a lot of traffic at all times, pollution, car accidents, which all help to make commuting from place to place much faster and efficient. In the future, the population is going to rise at a high rate, so that is another reason why we need light rails everywhere to accommodate a more crowded life.
NORTH KING COUNTY	The pacing of this project is far too slow, embarassingly so given the needs and relative wealth of the community - it seems that most of these projects could be constructed simultaneously, if only the funding could be prioritized. A long-term vision for Seattle would need to include the capping of I-5 where it gashes the city, creating transportational concerns where they need not exist if that polluted cacophony of a freeway canyon wasn't such an obscene obstacle. As well, the vision of uniting Everett to Tacoma and the Eastside to the Westside will, I suspect, evolve new and exciting regional synergy.
NORTH KING COUNTY	Put rt 10 back it was, and return rt 39 from downtown to the VAMC. remove rt 50, i'm not going to Suc do field area for the rt 50, R u going to put bus back the VAMC. that will b nice.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>I oppose asking the average Seattle resident to pay for this with more sales tax, especially since it's expensive to ride transit. Tax the 1% and corporations who are bringing the new residents to Seattle. Our transit system was already sub-par and now buses are increasingly late and crowded. I challenge those who are making transit decisions to rely on transit for at least a month to see what's it's really like to use the region's transportation and get to all the places one needs to without a car. I say this as a Capitol Hill resident who frequently travels between Downtown, Capitol Hill and the U District, all neighborhoods that are in theory well served. It is incredibly difficult at times with late and crowded buses. And now routes to the U District have been cut with the new station opening up. Husky Stadium is far from most of campus and the Ave. Taking the light rail is not the best route. I have co-workers and friends who commute from northern neighborhoods and are regularly passed by as the buses are already full, but some of those buses have been cut because of the new station. It is hard not to feel frustrated at Sound Transit and Metro when it appears as if they are juggling poor service in an attempt to make it look like progress.</p> <p>Why is it going to take 25 years to get to Ballard?</p>
NORTH KING COUNTY	Find a more progressive tax than sales tax. Id gladly pay more knowing that those with less paid less
NORTH KING COUNTY	Since many of the light rail stations are underground, with platforms that can feel isolated, especially at night, it will be extremely important to have sufficient security features so that people, especially women, will feel safe riding on the trains, especially at night.
NORTH KING COUNTY	I think the improvements need to be paid for through motor vehicle excise taxes and gasoline taxes. Vehicles need to be discouraged so that more citizens are incentivized to use public transportation which will increase the sustainability of revenue for the public transit network and discourage the use of personally owned vehicles.
NORTH KING COUNTY	Need to add Graham St. station as an early deliverable system access project to help low income minority community access light rail.
NORTH KING COUNTY	The way you handled the current changes is abysmal. You changed 42 bus lines with almost no notice--the notices that were around were extremely vague. You've made very bus I ride more inconvenient. Right now I'm pretty mad at Metro although I tend to be hugely supportive of rapid transit. I do not know why you instituted that expensive ridiculous trolley on Broadway. The claim that light rail saves people time going downtown is RIDICULOUS. It takes about 12 -15 minutes to go downtown, so why do we have to spend billions of dollars to shave a few minutes off that.
NORTH KING COUNTY	\$200 in cost per resident per year is too low; I would not mind that number to be two or three times as much if it meant the project would be completed in a shorter period of time

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I would like to see the planned completion of the Ballard and West Seattle light rail lines moved much earlier in the timeline. These areas will continue to be disadvantaged compared to the rest of Seattle, and contribute disproportionately to congestion, until they have light rail.
NORTH KING COUNTY	Is there any money in the plan to improve the mudslide problem on the north sounder route?
NORTH KING COUNTY	Your survey is designed to get the answers you want not real answers. It's a waste of time. A transit plan that doesn't get rail to Ballard for 22 years, but asks me to pay ~\$800 a year in tax increases is an insult.
NORTH KING COUNTY	Until you guys figure out that even the upper middle class can no longer afford more property tax and sales tax and start going after rich people and rich corporations, I can't support any project anywhere for anything. Insted of continually nickle and diming people that live paycheck to paycheck show some balls and go where the money is. I used to vote yes for everything in the 80's before the Regan tax cuts for the rich have taken full effect. Now I vote for nothing because I can't keep pulling money out of my house to live.
NORTH KING COUNTY	I think the West Seattle and Ballard projects should be prioritized due to the growing population living in and around downtown Seattle.
NORTH KING COUNTY	As a retired senior, on a fixed income, I am among many who have had enough of all tax increases combined. Seniors need to be granted reductions or elimination of taxes for these projects. Enough already. We have spent our life times paying and should be excused from further "civic duty". We are being driven from our homes, by excessive property taxes!
NORTH KING COUNTY	Do everything faster!
NORTH KING COUNTY	I suspect it will be difficult to get good data from this survey. Perhaps the questions should be based on zip code. Most of us are only aware of the transit needs that pertain to our traveled route and are going to give this route top priority. The main reason I will oppose this plan is I will be near retirement by the time Ballard gets light rail. ST should consider alternatives to trains for the shorter collector routes. A gondola or aerial tram may be a better option to implement quickly and cost effectively. The shorter routes can sacrifice some speed. ST should think outside the box and come up with some creative solutions rather than digging tunnels and spending billions over the next 30 years. Self driving cars may beat rail to solving our traffic problems.
NORTH KING COUNTY	After riding subway and train systems in cities around the world, the implementation of rail in Puget Sound is disappointing. Riding the train to Seatac takes more than double the time that the bus used to take: that is a huge failure. Trains should be the fastest way to get around. Please study Paris and Berlin, for instance, and learn from them. Our geography is quite different than either, but surely those systems have things to teach.
NORTH KING COUNTY	I used to be a daily transit rider, but the long commute time makes transit unworkable for me. As all parts of seattle become more interconnected with transit I believe our quality of life will improve in the seattle area.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	One of the points of rapid transit is to preserve resources and prevent waste. With this in mind, why did the invitation to participate in this survey arrive on HUGE PAPER POSTCARDS (a waste of resources, pollution resulted from their production) by snail mail (however cheap, bulk comes with a cost)? Please be part of the solution by not contributing to the detritus in my mail box. Contact me by email, or if you must use paper mail, make it a tiny postcard printed in soy ink on paper made from close to 100% consumer recycled products.
NORTH KING COUNTY	No more taxes! If we didn't waste so much money on things like Bertha maybe I could support this. But this, on top on Ed Murray's socialist plans, is too much. I'll be voting no.
NORTH KING COUNTY	I didn't see anything for improving Federal Way to Seattle. With all those Weyerhaeuser people working in Seattle, they will need better transportation. We really need to discourage people from moving here We should be encouraging business to move to other states and eastern Washington in order to preserve the quality of life in Seattle., We need the high speed train to eastern Washington and the freeway along the foothills of the cascades as well as a light rail system under puget sound to Bremerton.
NORTH KING COUNTY	the oversight for any kind of transit plans in this city are absurd. i will support none of them until the leaders get a handle on the fiscal responsibility that needs to come first. this is nothing more than a blank check like the one just voted on 11/16. i'm sick and tired of way money is recklessly thrown away while i have to follow a budget and give up and sacrifice for what other's have voted in. this is utter BS!
NORTH KING COUNTY	Speed the timetable up! Getting rail service from ballard to downtown is needed now! 22 years from now is an utter joke. We will all be in gridlock by then.
NORTH KING COUNTY	As a survey writer, I feel this survey was poorly written. You didn't give us any basis to judge the projects except should it go to vote. Why shouldn't they all go to vote? It seems like it would have been better to ask either what would impact your life? Or let us know what the traffic stats are so we could make an informed decision about where the needs are. If we are being asked about personal preferences, it should also be phrased as would you pay to ride daily, not just do you support it.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>It's obvious to anyone that the most cost effective way to improve the movement of mass numbers of people is two-fold:</p> <ol style="list-style-type: none"> <li>1. Increase the number of buses in the ST fleet</li> <li>2. Add lanes to all major highways, including I-5 and I-405 and major state highways like 520 and 522.</li> </ol> <p>We (voting public) understand this solution isn't "sexy", which is what ST wants...sexy light rail, sexy trains, anything that's sexy. Buses are "old-school", in the eyes of the Sound Transit board and managers. So trains and light rail are pushed on us. We get it. It's coming and there's little we can do to stop it. But if the ST board had to conform to fiduciary rules, they'd be pushing the expansion of traffic lanes for buses (and autos). That's the most bang for our bucks! But ST isn't a fiduciary body. It's a political body and can spend taxpayer dollars with impunity. It's sad, really.</p>
NORTH KING COUNTY	<p>Prefer progressive forms of taxation (e.g. property tax) over regressive forms (e.g. sales tax). Please consider shifting that balance so the burden of paying for this plan doesnt hit lower-income individuals as harshly.</p>
NORTH KING COUNTY	<p>Tax corporations rather than citizens!</p>
NORTH KING COUNTY	<p>Need to add general purpose highway lanes. 52,000 new residents are not moving here without cars.</p>
NORTH KING COUNTY	<p>Light rail is a monumental waste of scarce transportation resources. Way too little capacity for way too much money taking way too long to build. Exxon's wet dream of misguided effort. With tens of billions of un-budgeted seismic and structural work badly needed and algorithm-based transit solutions being developed, continued investment in this obsolete boondoggle reeks of mendacity. Shame on you.</p>
NORTH KING COUNTY	<p>Without easy access to stations for everyone, including those with disabilities that make bus use difficult to impossible, the lights rail is of little to no use to many plus so much dependence on buses increases traffic and dangerous driving and biking conditions.</p>
NORTH KING COUNTY	<p>Hurry up. Seattle has neglected transit for far too long...Get with the times.</p>
NORTH KING COUNTY	<p>Since the Capitol Hill and U District light rail just opened, I don't yet know how that will affect me and other fairly-central Seattleites. Also I understand that my priorities (Ballard, West Seattle) are somewhat different than what's prioritized time-wise in ST3, but any rapid transit is the right step.</p>
NORTH KING COUNTY	<p>Please build as much off of the road transit as possible - subways, trains, monorails, hover cars, submarines, etc. I'm happy for the increase in property taxes because I've noticed a direct effect of the increase in property values in areas well served by public transit.</p>
NORTH KING COUNTY	<p>More bus service connecting to light rail stations</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Light rail should be the absolute priority in terms of funding and focus. Bus investment is cheaper and faster, but it is a band-aid that detracts energy, money and time from the real solution. Buses have frequent stops and will always have to share the same congested streets with cars. Having lived in cities like Boston where I did not even own a car, I am a huge proponent of mass transit and would choose it now for my daily commute (N Seattle to Beacon Hill), if taking the bus didn't TRIPLE my commute time. There are no great bus options (I've looked!) to get me to the new UW rail station from my home at 130th. Trip Planner won't even provide a light rail option for me ...? For these reasons, I continue to drive. Please focus bus investment on funneling people to major rail stations, and parking at major rail stations for us northside commuters. Make it easy for us to get to the rail, and WE WILL use it. Rail is the ONLY solution that will really have any effect long-term on Seattle's traffic, besides its many other unique benefits: connecting people, lessening environmental impact, and business growth at rail sites. Thank you for your time and considering my feedback.
NORTH KING COUNTY	Traffic is crazy in this city. For the size, we should have a better transportation system. I'm willing to pay for it with my tax dollars.
NORTH KING COUNTY	Keep expanding public transportation!
NORTH KING COUNTY	need service 24/7
NORTH KING COUNTY	These plans are fantastic! Seattle is a booming metropolis with a terrible transportation network. These changes should help alleviate future problems.
NORTH KING COUNTY	I have not seen that ST is getting a lot of use. Why build more? What we need dis more buses in areas that people actually take the miserable bus. If the plan is to get white folk a rapid transit method that does not involve riding with the riff-raff, well then continue on. I worked in the south lake union area for years and rode the bus every day. I never saw any of the men who worked in the area on the bus and very few women, mostly poor folk and students (more poor folk). We paid for a trolley for them and guess what, they somewhat used it. Yay! I am tired of getting on buses in Bellevue and seeing them empty or mostly empty. Why on earth build more transit for them and leave us in the city of standing room only buses? Not grateful people.
NORTH KING COUNTY	Go faster, better support for other neighborhoods such as Magnolia/Interbay which can take 4x on transit vs car. East/West travel in Seattle will get worse with Expedia and Google (and others) moving into the area.
NORTH KING COUNTY	Better transit within seattle is necessary. Busses are packed and often very delayed, making even fewer people want to take them. Better transit in slu world be great too.
NORTH KING COUNTY	Please provide light rail to Ballard the west side where residential growth is out pacing transportation services. That is what is really needed

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	When are you going to stop thing all thepeople have unlimmit amounts of money 200.00 here 200.00 there i am retired and am being taxed to death my ss checks do not cover all the increaes the gov seems to think they can just continue to add on. No one looks at the total amount people are paying.
NORTH KING COUNTY	I am retired and live on a fixed income. All I get from Seattle and the state of Washington is they want to tax me more. I won't live long enough to even put a foot on one of the trains why would I want to support it. If the taxing continues the way it is I will need to move form Seattle and possible the state just so my wife and I don't run out of our money before we pass on. Or we can stay here keep being taxed and become one of the homeless that I am paying for now. I have lived and worked in Washington for over 40 years and voted for and was willing to pay for mass transit and nothing was ever done. Now that I can't afford it you are stuffing it down my throats.
NORTH KING COUNTY	There needs to an emphasize on the city corridor. if you can't get anywhere in and around the city, it doesn't make sense to do all the work on the outside of it? People get stuck in traffic there!! There is NO east west transit plans??? And why oh why is there no service from Ballard to elsewhere unless you are in the commuting hours?? The 17 went away and nothing replaced it, so those west of 15th...have to hoof it to get anywhere. Think that who ever decided on all these plans live outside of the city. Too sad! And while I am at it. There needs to be a faster way to get home from the airport. Can't there be at least one train that doesn't stop at EVERY stop? On it's way to Seattle. I think it was faster to walk!
NORTH KING COUNTY	I would like to see some money added to add a few more buses on already existing routes in Seattle.
NORTH KING COUNTY	Cities are further impeding traffic by installing unused bike lanes, there by reducing lanes available for vehicles. YOUR TRAFFIC PLANS ARE DRIVING SENIOR CITIZENS OUT OF THEIR HOMES WITH INCREASED TAXES.
NORTH KING COUNTY	I would support the measure if the light rail to ballard came first. 22 years out is too long to wait.
NORTH KING COUNTY	This a politically motivated money grab. You politicians and Pollyana "transportation experts" have never yet delivered any of your previous projects on time or on budget. This one will be no exception, and you know it. Fixed track systems are confining and unchangeable. Investment in buses and bus routes is better, cheaper, and flexible, plus more people friendly and people-centric. Furthermore, you know darn well that today's \$50,000,000,000.00 will not be enough to complete projects 20+ years down the road. You will be back asking for more \$\$,\$\$\$,\$\$\$,\$\$\$.\$ç to finish the mess you started. And none of this includes maintenance. Buses. are less costly to purchase and maintain, unlike your little toy trains on tracks. The businesses that are bringing in all these new people should be shouldering the bulk of the costs, not the overbudened middle class property owners. Just \$200.00 more a year? You must think people are stupid. A married couple would be \$400.00; then add \$200.00 per child. Deceiving figures; but that is what you politicians are good at. It's the job you do best. Every money grab you make is the same: "It will just be \$XXX.\$ç more per year." State, regional, or local; it's a broken record. Scrap the rail, and get more buses. They will get people to the destinations they need to get to. Not everyone needs to go to downtown Seattle; it is not the center of the universe.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>Sound Transit should commit to trying to find the funding to complete these projects sooner, especially the highest ridership projects. Suggestion: Give alternate completion dates that would be dependent on additional federal, state, or local funding.</p> <p>The 130th street light rail station should not be provisional.</p> <p>The light rail extensions both south and north of Seattle should be Hwy 99 alignments, not I-5 alignments. Along 99 they could have much better TOD opportunities, also better bike, ped, and local bus access, also more opportunities for future stations.</p>
NORTH KING COUNTY	Will there be help for low income or senior property owners?
NORTH KING COUNTY	Seattle and the entire area is in such sore need of even more public transit—everything done to-date has been fantastic and should only continue, accelerate, and expand. It's great for the environment, the economy, and our collective quality of life. Keep up the great work!
NORTH KING COUNTY	<p>Car parking is vital to the plan so people can get to the train.</p> <p>Bicycle traffic may be helpful but less important.</p>
NORTH KING COUNTY	I favor light rail because trains are inherently cooler than buses, but more importantly, once rail is laid it is less likely that service will be reduced from later budget cuts. In a perfect world where future funding were guaranteed and dedicated bus routes/shoulders would actually be built and maintained instead of using existing traffic impacted roads, I'd be totally on board for buses where the long term economics make sense.
NORTH KING COUNTY	<ul style="list-style-type: none"> <li>- Please put new rail stations (of all descriptions) right where people live and work -- do NOT make people drive their car to take the train or bus. I realize it's a massive pain in the ass during the construction phase and that businesses and residents will likely fight you, but it's 100 percent the correct decision longterm. I live in Arlington, Va. for a long time and they thankfully fought the good fight decades ago to ensure people could walk from their apartment to the subway and from the subway to their office without massive "park and ride" behemoths next to Interstates and major highways.</li> <li>- Please no more "street cars" unless they have their own lane (so they don't sit in traffic) and an actual destination (the South Lake Union Streetcar is a 1.5-mile travesty).</li> <li>- Please add more lanes just for buses. I used to ride the 40 in the evenings from Westlake to Ballard, but now I drive every day because some evenings I'd wait for 45 minutes for a bus to reach me (they'd become indefinitely ensnared in traffic downtown) and, when they did reach me, they'd have so many people that two or three might pass me because they couldn't take on any more passengers.</li> <li>- I love that the rail system expanded to Capitol Hill and the University of Washington. I support any additional expansions, particularly to Ballard and to West Seattle.</li> <li>- Keep up the good work!</li> </ul>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	More bus service is needed and/or parking. For example, The Husky Stadium light rail station which just opened requires a bus from where I live at 107th and Lakeside Avenue NE. To use the light rail station there would take me a huge amount of time since there is no direct bus nor parking at the stadium.
NORTH KING COUNTY	Property taxes should only be applied to zip codes directly benefiting from the projects within three years. No direct zip code benefit, no property tax!
NORTH KING COUNTY	I have concerns most about the property tax assessed especially for homeowners who have lived 25+ years in their home and have higher taxes most years.
NORTH KING COUNTY	Hurry up!
NORTH KING COUNTY	Most of the complaints I hear are that it needs to be bigger and be completed sooner. Before 2018, the legislature needs to replace local school levies with state funding. ST should join the lobbying effort to shift education costs to a more equitable funding source, such as reducing or ending tax expenditures, a capital gains tax, and/or an income tax. This could free up local property tax capacity that could be used, while leaving local property taxes lower, to make the ST3 bigger and finished sooner.
NORTH KING COUNTY	I think the areas closest to the city center should be connected first so Ballard and West Seattle
NORTH KING COUNTY	Projects in the core of Seattle should take priority over other regional projects. In addition the West Seattle line should extend to White Center and Burien before there is any need for extensions to Everett and Issaquah.
NORTH KING COUNTY	There is already way, way, way too much Government and too many bureaucracies. Taxes are way, way, way, way, way, way, way too high. I oppose all new taxes and am in favor of decreasing taxes whenever possible.
NORTH KING COUNTY	The time for rail is past Too expensive and not flexible Bus option only feasible way without over taxing community.
NORTH KING COUNTY	Great effort should be expended to encourage people to live closer to where they work to reduce, rather than increase the need for more transit service. Employers should come onboard to help with this effort. I'm an 82 year-old retired Civil/Structural Engineer who spent a dozen years ( 1960-1972 ) building bridges on I-5, 520, 405, Spokane St., and even a railroad bridge in Eastern Washington. Get people to live closer to work and we won't need all these extra taxes that I can't afford at my age.
NORTH KING COUNTY	Charge for parking in parking structures as both a revenue source and way to encourage use of alternative modes of transit
NORTH KING COUNTY	Improve current bus schedules and routes. Do NOT remove routes or decrease service to push people onto rail. Not everyone has the ability to get to rail stations.
NORTH KING COUNTY	I strongly support increasing public transit in the Puget Sound, especially light rail and sounder service in the region. But you should pay for it by taxing the rich, not the middle and working class. If it is the working and middle class that have to pay for it, then I am opposed to it.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	To deal with ever increasing traffic, efforts should be made to accelerate the dates for completion of the transit plan improvements. ALSO, bicycles are an important additional ingredient in the plan to reduce the number of automobiles commuting. It will be important to assure that the transit facilities and the trains and buses can accommodate bicycles.
NORTH KING COUNTY	City council should be replaced and no more corporate recruiting be done in the northwest. Tax and license every bicycle just like cars so if there is any further expansion in this minority population which inherently discriminates against the elderly, handicap, obese, families with children etc..they can pay for it. Sound transit should be a self sufficient non subsidized bureaucracy. Any trains or buses or bike share programs need to be self sufficient and non subsidized. Like Uber and Taxi services and limo's and charter buses and Greyhound and on and on. Sound Transit is a tax dollar wasting blob of incompetents, spending tax dollars on back door studies, that needs to be dissolved. How many time do voters have to say go to hell!
NORTH KING COUNTY	Light rail needs to be a priority! PERIOD. No new bus lanes....no train improvements right now. We need light rail all over the region so you can go anywhere you want to go in this area by light rail. You need to scrap this plan and start over and focus and getting light rail built. NOW!! We have needed it for years. Buses are awful, noisy, big...should not be the foundation of service from the east side. Just like Portland and Bay Area, lets upgrade to Light Rail everywhere! PLEASE.
NORTH KING COUNTY	This type of transit is a complete loser, 90 percent one way 10 percent backhaul. I can't find any system in the U.S. that can pay its own way. Just another cash grab from the taxpayer. And always over budget. Another Bertha in the making.
NORTH KING COUNTY	Hurry up just get workers from china
NORTH KING COUNTY	Security plans. What kind of security will we have on the buses, trams and trains as well as the transit centers?
NORTH KING COUNTY	NO MORE TAXES!!!
NORTH KING COUNTY	Parking at the rail stations is vital. I'd love to use the university station but where am I to park????
NORTH KING COUNTY	I live in east Ballard & have taken the #28 for years, both the Local & the Express. You have recently cut out the Local 28 entirely thereby disenfranchising the elderly and disabled! If one is healthy enough to walk or has a car, great, BUT if NOT, you've succeeded in making it impossible for many people to take the bus to go anywhere the 28 Local used to go. If your intention was to get people to NOT drive & to take the bus, YOU'VE FAILED!!! I've been a supporter of public transportation for years & have always voted for it, but rest assured, I will NOT vote for it again unless you pay attention to those who really need it & for me that means EAST BALLARD!!!
NORTH KING COUNTY	1. Please define "average resident". 2. How would the cost listed in number 14 be collected? Your plan suggest the voters agree to a plan without defining how it would be funded. Much like signing a contract to buy a new car without knowing the price of the new car.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>A project to speed up the light rail. It's great, but since it runs about the same speed as a car, there isn't that big of a benefit to taking the rail.</p> <p>If that's not possible, then a more aggressive project delivery timeline is suggested.</p>
NORTH KING COUNTY	<p>Fully support the expansion of multiple transit systems to alleviate traffic congestion in the city. If we don't start now, it will only get harder and more expensive. Full steam ahead, especially if ST can maintain the ahead of schedule/under budget morale that it accomplished with Capitol Hill/UW - bravo!</p>
NORTH KING COUNTY	<p>Any rail is way too capital intensive and very expensive. And, riders aren't picking up enough of the costs and those costs are trying to be dumped on home-owners or car owners. Develop transit-only lanes on arterials. Much cheaper and gets the job done. While I LOVE to ride public transit while traveling (London, Chicago, New York, Berlin, Wash DC, Tokyo, etc., I don't want to have to pay for it with my taxes; it's too damn expensive a way to move people.</p>
NORTH KING COUNTY	<p>Recent changes to bus services haven't taken into account the impacts on people who lost their bus service. Also, transit needs to be at least as efficient as driving in order to get people to use it. I currently cannot use transit nor will I be able to under this plan.</p>
NORTH KING COUNTY	<p>This is such an important development to ease the increased populations in Seattle and beyond! Don't give people the \$ amount they will have to pay; it can only discourage progress on moving the projects forward. The area desperately needs these transit systems all over to improve commutes and reduce traffic.</p>
NORTH KING COUNTY	<p>This entire plan assumes we are all millionaires! Yes, the traffic is bad but such a massive undertaking is ridiculous. Heck, our legislators can't even pass a reasonable budget and every time you turn around we are being asked to raise taxes for this, for that and who knows what else. The people of Seattle have become pawns in this game and unfortunately bend over every time they are sold a bill of goods. Enough is enough! Time to react like most citizens are in this year's presidential election...throw out all the mums that can't get anything done and bring in people who work for us all and not the special interests. Lets get back to the basics like fixing all the pot holes on our streets that have been ignored, street paving, stop funding ridiculous changes to bike paths, etc. at the cost of other more important projects, and the list goes on and on. Seattle is already one of the most expensive cities to live it...and this plan is going to help that? More homeless people for sure, more need for handouts to survive. Get real. I find it unbelievable when you state that the average homeowner will see the bill for all this to be about \$200 a year. What a farce! My license tab fees went up \$75 this year alone and property taxes over \$200. Too much is not known, accuracy of proposals is highly questionable, costs are even more questionable and the extent of your proposals are wishful thinking at best with little if any regard for how the cost of all this is going to affect the people who live here.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	We LOVE the light rail. We want it to come up to Northgate as soon as possible! We do NOT like the "quick short payne light rail" plan to Everett just because they are whinning that they want it faster. We would like you to continue with the original plan for light rail coming in from University.
NORTH KING COUNTY	Although it may be difficult and lengthy, I suggest that more public meetings with community feedback be exercised. Get the word out on all social media sites and collect feedback . thank you
NORTH KING COUNTY	Should support where population has exploded not where the wealthy live
NORTH KING COUNTY	The Ballard route would be fed by changing bus routes to feed the station at Dravis requiring a transfer when I now go downtown in 25 minutes. The route would make 15 even more congested. Save money and drop the Ballard route. Your charge is to build a regional system. I will vote no if I will pay big bucks for worse service. Magnolia voted 18% for monarail to Ballard. If this route is to gain city support, don't be suprised if it loses it in the impacted neighborhood.
NORTH KING COUNTY	Way to expensive
NORTH KING COUNTY	increasing property taxes incessantly adds to the housing costs of living in Seattle. look into new funding sources.
NORTH KING COUNTY	Hello. There needs to be more effective coordination between the various players that provide transportation to our area. Metro has reduced the service on Route 43 from U-District to Capitol Hill & downtown. The new Sound Transit light rail station that just opened near Husky Stadium is cited as the reason. Apparently Metro assumes University students & staff will be willing to walk to Montlake to catch the light rail, then walk from whatever light rail station is closest to where they need to get. Sounds theoretically logical, with fewer buses resulting in less greenhouse-gas emissions. In reality, this change misses the likelihood that folks will now weigh whether it's actually cheaper/more convenient to drive their individual vehicles, parking at the U's large lot which may be as close or closer than the light rail station south of the stadium. Eliminating Route 43 trips between 3:47 & 6:11 puts many campus commuters in this dilemma. If the objective is to reduce # of buses, why not spread this reduction more evenly so that some of the 5+ buses that go every half hour or less between 6 - 7p.m. are dropped & buses are added back to the earlier 3:30 - 6 p.m. timeframe? I know you are not Metro but you are their partner in all this & that is my point: improve your coordination. Thanks for taking a look at this.
NORTH KING COUNTY	You guys are wasting tax dollars
NORTH KING COUNTY	Require parking minimum parking spaces to be build with each apartment.
NORTH KING COUNTY	Timelines are really slow.  Ballard/West Seattle would be nicer to have sooner.  Easy access to Georgetown is completely missing.
NORTH KING COUNTY	I strongly oppose increases to the sales tax in general and would favor finding less regressive means of funding ST3.
NORTH KING COUNTY	Ballard should come in 10 years earlier than 2038

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I would like to see less stations and much faster transit times on the link light rail and on the express buses and any other services that are covering long distances to serve the downtown and surrounding core in Seattle.
NORTH KING COUNTY	We voters in the Puget Sound Area made a huge mistake in the early 70's when we defeated our first opportunity to begin building mass transit in our area. I was one of those voters who voted against the (Forward Thrust?) proposal, which would have been 75% paid by the federal government -- and which would have been finished at least 30 years ago. We can't support enhanced public transit enough now, as the environmental imperatives are "in our face". So yes to ALL -- light rail, the longer we wait to start and more it costs and the less likely we are to see it operational. Yes to faster buses, more exclusive bus lanes on our freeways, more transit centers with more parking, more/easier access to bicyclists and pedestrians. Yes, yes, and yes again!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

<p>NORTH KING COUNTY</p>	<p>I was always incredibly supportive of light rail as well as taxes to support the expansion of this and other modes of public transportation. Living and renting in Seattle for 16 years I have voted yes for every single public transportation proposal. However I had no idea that with the expansion of light rail, bus rapid transit, etc. that local King County Metro bus service would be so drastically cut and modified in order to plan or pay for these other forms of public transportation. Many, many people in Seattle completely rely on the flexibility and reach of local Metro bus service in order to get to work, home, doctor's appointments, and more.</p> <p>I don't own a car nor do most people I know where I live in the U-District and work in Lake City. Metro bus service has been pretty much my only transportation option for at least a decade. Metro bus service has always been an *excellent* source of transportation in Seattle until the recent expansion of light rail to Capitol Hill and the U-District in North Seattle in late March of this year. Now almost every Metro bus route that I utilized daily in order to make my life workable has either been eliminated or dramatically cut / altered. (This includes routes on major city thoroughfares such as the 72, 71, 73, 66, 67, 48, 43, 30, and more.)</p> <p>This has been a disaster for me and for many, many other bus riders who live in Seattle and depend on Metro buses for transportation. Trips that used to require one bus now require two or three or a couple of buses plus light rail, and there is much more walking required. This has been a nightmare for many people I have spoken with especially for the elderly and those with mobility issues such as the disabled and those dealing with chronic illness. These changes also have a disproportionate negative impact on the poor in our city.</p> <p>As I mentioned I have always been a huge supporter of public transportation in our area including elements of this proposal. I am horrified however that this plan and further expansion of light rail may continue to have a devastating effect on local Metro bus routes that are essential in order for residents to get around our city. I and others I know are extremely reluctant to ever again support or vote for a similar plan because of this unintended consequence (unless there is some kind of assurance that Metro bus routes throughout the city will be preserved / restored in addition to the expansion of light rail.) Please stop the destruction of local Metro bus routes which provide vital access for residents in parts of the city that light rail never can.</p>
<p>NORTH KING COUNTY</p>	<p>The only way to keep this area liveable will be to build more transit.</p>
<p>NORTH KING COUNTY</p>	<p>In general, Seattle is DECADES behind every other (civilized) major city in the world, when it comes to mass transit. This is all WAY, WAY too late, but better late than never. And the more the better. To hell with cars, auto pollution and traffic jams.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>I am unable to determine how funds will be raised for this project. I am 69 and my mother is 93. I had to move in with her several years ago to help support her. She receives about \$1600 monthly in SS and already pays \$6K in property taxes!! My retirement income helps pay her expenses and provide a decent environment for her to live. However, it prevents her from getting any Senior discounts on taxes, etc. We never ride bikes, use transit. I drive 3K or less a year and only to buy groceries and make other minimal excursions. I believe that the users of services should pay for them. Property owners already pay too much for public services that they never use. Bike riders, train and bus riders, apartment dwellers need to pay proportionately for what they use. Property owners and car owners pay too much for what others use. The only transit improvement I would like to see is the reinstatement of free transit within downtown Seattle and the elimination of bicycles in the same area..</p>
NORTH KING COUNTY	<p>I'd like to see a bicycle commuter oriented station at 130th on the Lynnwood Link Extension that specifically serves the Lake City, Pinehurst, Bitter Lake communities. Ideally this would include a dedicated bike lane along 130th connecting to the Interurban Trail. Both 145th and the Northgate area are difficult to access for bike commuters, and this station would contribute to the overall quality of the proposed transit package.</p>
NORTH KING COUNTY	<p>It would be nice if there was greater transparency into how/why this project was proposed as well as more details on how the project will be funded. As an individual, I'm only aware of the traffic conditions in one small subset of the region, but you guys manage transit for the entire area. I know that I-405 and I-5 are a mess at times, but I have no idea what traffic is like specifically down in Tacoma, nor do I know anything about the transit options there. Seeing more data would help people understand why you guys make the decisions you do, and it would enable people who have expertise in the field to identify areas for improvement. Similarly, it would be nice to know more details on how the additional tax revenue you receive will be used to fund the project. Obviously projects like this require money, but it's easier to support a cause when I know where my money is going rather than dumping my money into a giant mystery money pool.</p> <p>Regarding buses in shoulders, that just seems like a bad idea to me. Where is a driver supposed to pull over if their car breaks down? Shoulders aren't built to be replacements for lanes. They're supposed to be an area where a car can pull over without hindering traffic. Driving in the shoulder just seems dangerous.</p>
NORTH KING COUNTY	<p>Seattle already has a strong record of supporting mass traffic while the suburbs less so, the buses in Seattle are all already over crowded. The Ballard line will help with that. There is already heavy gridlock in Seattle and more housing being built in Seattle than anywhere else and projects to move Seattle traffic should be the highest priority. For example I live 5 miles from where I work and it takes between 45 min to an hour and a half to get there via transit because it is so slow.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Every resident in the state of Washington should have to pay their fair share of this project and stop taking the king county and close home owners to the slaughter house. Enough is enough. There is no control over your spending, you are driving the middle class out of their already paid homes by over taxing those properties, don't leave it up to the upper crust elite to decide, they are laughing all the way to the bank, including some of those corrupted officials who are washing their hands in the profits. Your Berta Tunnel has become a world white joke and now you want to build another tunnel, are you out of your mind!!!! This city is spending the taxpayers money like the drunken sailors. You want a tax revolution in this state, you are working at it.....
NORTH KING COUNTY	Please take all measures to speed up development and construction of new service, including corporate sponsorship, federal lobbying, expedient environmental reviews, etc.
NORTH KING COUNTY	Too expensive!!!
NORTH KING COUNTY	Businesses that are bringing additional residents in droves should be paying for more of their share in the costs for transportation. The burden should not all fall on the taxpayer.
NORTH KING COUNTY	Any projects that Sound Transit wants to embark on need to be completed within the existing budget and Sound Transit needs to become more efficient. It should competitively contract out services just as Snohomish County does and as other cities like San Diego and London have successfully done.
NORTH KING COUNTY	I think the amount of money they are planning on spending on this transit system is obscene! It will only carry about 4% of the population and will never pay for itself. I personally, will never use it...so...why should I pay for it? You should be concentrating on maintaining and repairing roads and building new ones. That's what my tax money should be for.
NORTH KING COUNTY	Less dependence on long range light rail. You should focus on dense population areas. You are considering how automated cars and employment will change over 25 year horizon. Focus on bus and lower capital costs items.
NORTH KING COUNTY	If the Seattle area wants to remain a liveable and affordable place, upgrading our transit system is a must. I think most residents agree on this though there is a lot of "not in my backyard" [explicit].
NORTH KING COUNTY	Thanks for asking!
NORTH KING COUNTY	The project for west Seattle is all good, but there remains an issue for those of us who live in the Admiral district. The buses are over full and don't always show up. I'm not walking all of the way to the Alaska junction to catch light rail or the C line. What can happen for the Admiral district? The service from downtown Seattle to Admiral is spotty at best. I spent over an hour waiting for a 56 to show up downtown to go home after work and it never arrived. I finally had to take a 55 which was the long way home.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>1. Please prioritize light rail/rail to the North, South, East of Seattle (and West Seattle).</p> <p>2. We need buses but we just sit in traffic on them in traffic and rapid rides still do not appear to be a good solution with the exception of connection us to rail/light rail. Please do prioritize more buses in/out of the city. I do not want to pay for "rapid bus service" this feels very inefficient. However, I am willing to open my wallet for rail/light rail even for areas I do not live in.</p> <p>3. I have a home and I would pay more property tax for rail/light rail ( but this probable translates into rent increases as well ). Sales tax and motor vehicle tax seems light it would be burdensome for the poor.</p>
NORTH KING COUNTY	<p>transit is most important factor affecting quality of life here. we need trains now! I prefer NYC to Seattle because I can get anywhere without a car.</p>
NORTH KING COUNTY	<p>ST service is not accessible. I will not vote for ST3 unless ST provides TONS of parking at rail stations--and I don't like your new parking policies. I mean FREE parking and plenty of it. Otherwise, I will never be able to access any of your service--and I won't take a bus and then transfer. It takes too long and it's costly. I also think your price tag is too big. Seattle is already unaffordable--and part of that is due to increased taxes, esp. property tax. You are asking for me to support ST3 when I won't have access to it (without parking) and it will make my own home's taxes unaffordable. No, I'm NOT excited about ST3. AND, I am completely opposed to TOD and more stupid bike and ped projects. If you include that in your plan, I definitely won't vote for it. I've had enough of that kind of useless waste. I want my transit money to go to TRANSIT--not to bikes and sidewalks.</p>
NORTH KING COUNTY	<p>Too little too late. I would like to see independent studies of the likely positive and negative impact of all these projects. On the whole I'm skeptical than any of these programs will have a significant impact on the traffic situation in the region. At most I'd hope we could maintain status-quo with these programs.</p> <p>I'm also concerned that the plan is not trying to project future innovations in transportation and likely changes in living and working patterns.</p> <p>Plans that are more than 10-15 years out will almost certainly be sub-optimal by the time they come online due to inevitable changes in the underlying conditions.</p>
NORTH KING COUNTY	<p>I am a lifelong citizen of Seattle. Grew up in Magnolia and have lived in many areas of city including Madison Park and Green Lake. I currently live in West Seattle and without a doubt, we desperately need light rail. We have thousands of new apartments/condos being built in the area (and more coming) and traffic off West Seattle is terrible as it is. We need light rail asap to help current and future residents. West Seattle is a key neighborhood community for Seattle and light rail is needed and will pay-off in long run.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I'm sure you'll get your share of comments about timeframes. I'll simply add that I wish you could proceed with a less regressive funding framework.
NORTH KING COUNTY	Light rail works best when it is supported by a city/region's efforts to support density and urban centers. This program should be conditional on affected cities, regions, and neighborhoods submitting plans that support these travel hubs. This includes additional buses, bike lanes, and zoning laws.
NORTH KING COUNTY	I have major concerns about the timeline of the light rail projects. I realize that it does take time for projects to get completed. However, I do believe that this can be completed a little sooner than 2041, especially in places like Ballard that need better public transportation options and not just more buses. Also, there is no included light rail service between Ballard and University Village or Ballard to Bothell/Woodinville. Kirkland, Renton? Nothing, which is unacceptable. You also need to cover more of West Seattle. The idea is to get this going as quickly as possible so people can get to places quicker and not be stuck in traffic and for those that live outside of Seattle to have great access to light rail and be able to afford to live in the Puget Sound region.
NORTH KING COUNTY	The cost of this project cannot be the sole burden of Seattle residents but should heavily be put on the businesses who benefit from it and residents in suburban and non-Seattle cities. The businesses should not be benefiting from more tax breaks but should instead be paying their fair share of taxes to pay for good transit that attracts their their employees.
NORTH KING COUNTY	Ballard to downtown has become a nightmare - even on the buses its slow. The city allowed building to increase density in Ballard and in turn the increased number of residents are choking the streets in and out of the neighborhood - improved transit would be popular and highly utilized because most people here try to walk everywhere and leave cars at home - but we can't get out of Ballard effectively so the routes to downtown are plugged with cars. Many people here are using alternatives to owning cars - but they still have to drive these cars on the same routes so it's not really a solution.
NORTH KING COUNTY	The transit plan should not be funded by homeowners. I'm tired of having to pay for the infrastructure of this city just because I own a home. The people who use the transit (which includes me but doesn't penalize me), the companies that people are moving around to en mass should pay (Microsoft, Google, Amazon, Boeing, etc.). Find a way to fund this very necessary transit plan another way than homeowners paying. Get an income tax for this state, and let the state assess transportation taxes on everyone based on income level. That would be fair.
NORTH KING COUNTY	Sound Transit has made public transit in Seattle worse. The Metro 174 and 194, and ST 560 buses were more reliable and provided a faster and safer trip to and from the airport. Since those routes have ended, I now drive to and from the airport instead of taking public transit. East Link and the route to UW are just replicating trips that are already served by buses. The people who run Sound Transit are more concerned with creating careers for themselves and less concerned with improving transit in the Puget Sound region.
NORTH KING COUNTY	Fix the traffic....please.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I strongly feel that the West Seattle and Ballard Light Rail projects should be completed sooner than what is proposed in ST3.
NORTH KING COUNTY	For funding the projects, please ensure consideration of financial impact to low-income residents.
NORTH KING COUNTY	Any completed line must be self-supporting within 3 years. I do not support tax-payers subsidizing riders or PS operations.
NORTH KING COUNTY	Please ring fence any tax increases so that residents KNOW the funds will be going towards these projects and not diverted. I'm genuinely happy to pay more for transit but want to know that these increases truly are going towards transit.
NORTH KING COUNTY	It would be unbelievably short-sighted to waste the limited pot of ST3 dollars available on parking. Doing so would essentially be paying taxpayer money to undo the positive effects of expanding transit in the region.
NORTH KING COUNTY	<p>Within this survey I tried my best to answer well but often I wasn't really sure what to answer. For example on this (final) page the questions asking if I would support a tax of \$17/mo - it is hard for me to really tell you what I think without knowing what the alternative is, etc. Lastly, though a map was provided, it was hard to reference the individual lines and stations for the questions on the previous page. In the future, I think a great way to be able to take this survey could be in interactive video form. That way - for each question the video could show VISUALLY what the question is about, and there may be more options for hearing about the alternatives and reasons why things are being proposed the way they are.</p> <p>Either way - I am really hoping that Seattle can be an example for our country in terms of public transit. Already the capitol hill and u-district link light rail stations have improved my experience of living here enormously.</p>
NORTH KING COUNTY	As property values rise rapidly, homeowners are being taxed out of the area! We approved almost a billion dollars for transportation last year. Why isn't that enough?!
NORTH KING COUNTY	<p>The transit/light rail only provides minimal service to places only about 1% of the population goes. All this planning for more transit transportation is a waste of money which money would be better spent by improving the roadways for the population to travel on. 405 needs to be opened to 4 all purpose lanes as was advertised when 1st proposed for the population to raise money for.</p> <p>The riders will never pay full load for use of the mass transit system. It will have to be massively subsidized forever. This is not economically sustainable.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>Thank you for the new UW Link station. I work on Cap Hill and usually take the bus downtown and then walk up the Hill as the buses are slow.</p> <p>When I take the Metro 372 bus, from the Lake City area, to the UW Link, it actually increases my commute time by about 10 minutes, though it is generally a more pleasant commute. On sunny days, the view of Mt. Rainier as I walk to the Link makes it all worthwhile.</p> <p>Please continue to build these projects - for all of us stuck in long commutes for relatively short distances. It takes me about 1 hour to go the 10 mile distance from work to home.</p>
NORTH KING COUNTY	<p><b>NO NEW TAXES ON WORKING PEOPLE.</b> Working people always flip the bill for projects like this, while our local multinational corporations reap the benefits with little investment. We need to pay for this with high corporate income and capital gains taxes. If Jeff Bezos can afford to launch rockets into space and land them back to earth in another venture to make more billions he should be able to afford to invest in his states infrastructure. If Boeing is going to get massive tax breaks and have record setting profits while proposing to lay off Washington employees then they can afford to invest in the states infrastructure. If this project is to be paid for by the people then the construction of these projects should be completed by the state, employing Washingtonians with good high paying jobs and benefits, not allowing a bidding process with the undercutting private sector which will open the door to litigation when these projects inevitably going over budget and schedule. If the public sector (the people) are going to be paying for this then they should be the ones getting paid and paid well. The project should be ran at cost not with not with a profit motive and our public officials should be the only parties to blame, we don't need another Seattle Tunnel Partners fiasco.</p>
NORTH KING COUNTY	<p>We need more light rail service to accommodate the recent influx of people into Seattle. I think plans should be focused on expanding the current lightrail system to connect all of Seattle so people can leave their cars at home when coming in and out of the city. I think the focus should be more on lightrail than bus and sounder expansion.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I realize the major costs in this plan. However, the homeowners should not be the ones solely supporting these project. I work from home and my husband works 8 blocks from work. We are very limited users of public transportation. With the influx of new apartment complexes in West Seattle, Ballard, etc, I feel that those residents should shoulder a lot of the burden too. These companies are moving downtown and giving public transportation passes to these new employees. And, there are not enough parking to cover the thousands of new rental units being added in this city, so they assume these people will all take public transportation to work. Are they going to be paying on average \$200/year like you are proposing for home owners? What is their assessed value for living in a \$2000/month apartment? What about bikers? We are making all of these new roads/lanes for them and they don't pay any extra. You're punishing long time home owners and those who work close to home, and we aren't the target market for these new additions. It's the thousands and thousands of young millennials that companies like Amazon, Expedia, etc are bringing into the city and causing the overcrowding. The City of Seattle, as a supposed technology hub, should have made these provisions years ago. Not as a reactionary measure.
NORTH KING COUNTY	I am a proponent for the light rail and train systems. It has been proven in other cities that the investment in rail is consistent and the most economical long term for operations. This will remove more traffic off the streets. Busses are still on the streets and do break down. Rail is a better long term solution and should be considered more than the temporary solution of busses.
NORTH KING COUNTY	A combination of two comment types. I understand the need for proper planning and traffic mitigation during construction, but I would support anything that can be done to speed up the delivery timeline. That would include paying somewhat more for quicker delivery. I would also like authorities to consider light rail for the Lake City to Kenmore/Bothell corridor.
NORTH KING COUNTY	more transit only lanes
NORTH KING COUNTY	I'd prefer if the tax system was tiered based on income, rather than property value. I am capable of and willing to pay an additional tax to improve mass transit options, but \$17/month is a lot to ask of a low-income household (single or family) who are struggling to keep up with the spiking property values/costs.
NORTH KING COUNTY	A) Within Seattle, especially on the north end, the major "choke points" for traffic are East-West. While Ballard to downtown would be great, Ballard to UW would be just as useful. What about Northgate to Crown Hill/Greenwood? B) Also, I am skeptical of BRT. I have not seen much advantage to current efforts to make bus lines faster. The Metro D Line, for example, is often slower than alternate routes. BRT will only be useful if it can GET OUT OF TRAFFIC.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>After seeing the shortsightedness of the location of the UW transit station, I have no confidence in the transit leader's common sense or ability. That station is completely inaccessible to nearby neighborhoods to the north and east. It was chosen for its view location, not on practicality of location. It should have been located in the north parking lot, with drive thru drop off for northeast neighborhoods. under the new plan, here is what I have to do to if I want to use light rail to go the 6 miles to my office downtown. Walk to a bus stop. get on a bus, ride it to the uw campus. get off on campus. walk to the station. get on a train, ride the train to downtown, get off the train and walk to work. Easily an hour commute to go 6 miles! really? It this kind of lack of common sense that tells me I can't support paying more taxes for such short sighted thinking.</p>
NORTH KING COUNTY	<p>More bus routes along Delridge, perhaps a rapid ride, would be helpful. Ideally, I would like to see more bus service to connect High Point and Delridge areas to the West Seattle Junctions and downtown Seattle. Currently, supermarkets, shops, restaurants, etc. are only reliably accessible by car and buses are limited, particularly along Morgan, Sylvan Way, Orchard, Dumar, etc. Thank you for considering feedback.</p>
NORTH KING COUNTY	<p>Taxpayers are currently paying for ST2. When ST2 is completed the taxes currently being paid should then be voted on to pay for ST3. It looks like the taxes for ST3 will be added into what we are already paying for ST2. I want light rail but the numerous transportation/transit state and local agencies do not appear well coordinated in their use of tax payer money to improve transportation/transit in the region as a whole. Better coordination and prioritization with state and regional agencies would build my confidence in increasing taxes to pay for the system. The middle-class and low income people in Seattle are struggling to make ends meet here and \$200 additional a year will be hardship for many people. I want my taxes spen wisely.</p>
NORTH KING COUNTY	<p>In general, I am supportive of expanding public transit, but this package is far too expensive and does not deal with equity of benefits vs. costs to the region served. Worse, the timelines are so far out that the things that would be most useful to Seattle residents won't occur in time to deal with the projected growth you note. Thus Seattle voters pay for suburban improvements for 20+ years while most useful in-city transit gets minor or no changes. And (at least in the West Seattle proposal) the routing doesn't even get to where most Seattle residents and visitors want to go! (like the central W Seattle business district on California and/or Alki Beach.)</p> <p>But fundamentally the whole premise is wrong, not surprising given Sound Transit is a capital building focused agency. As was recently proved on Westlake, closing existing lanes to regular traffic to make exclusive, fast corridors for buses/railcars/etc. (with coordinated lighting signals) is far less costly, far more immediate, and far more flexible than fixed systems. It could be done in a year or two. That is what ST3 should mainly be focused on.</p>
NORTH KING COUNTY	<p>All stations need safe drop-off area. All stations need bike racks.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I am a liberal and a VERY strong proponent of expanding light rail service in King County. However, I can no longer support funding that comes from making our tax system--already the MOST regressive in the country--even MORE regressive by increasing sales and motor vehicle taxes. We need to stop funding capital improvements on the backs of our poorest residents. I strongly suggest you propose some alternative funding methods. I support the residential property tax component. I would also support a nominal income tax to help fund, even though I know it won't be politically expedient at this time. I worry that despite my support for light rail in general that if this is funded disproportionately via the poor then I must vote against ST3.
NORTH KING COUNTY	Light rail over I-90 that can connect to route going to Microsoft, overlake, redmond area.
NORTH KING COUNTY	need more shuttle or feeder buses to the link stations - now my bus to/from the Montlake station comes every HALF hour. no way disabled could easily catch a bus need bathrooms need parking and drop off areas no service for me to stations on sundays and holidays when I work or for families going downtown
NORTH KING COUNTY	I would love to see light rail go to Auburn and maybe even many of the community colleges in the area...
NORTH KING COUNTY	build it quicker!
NORTH KING COUNTY	New link light rail to UW is awesome!
NORTH KING COUNTY	We had monorail transit to West Seattle, the largest community in the city, but Mayor Nickels and his real estate development supporters didn't like it, so he had referendums three times until it was defeated. We had purchased the land, etc. then we had to sell at a loss. Now we're going through this again.  No one has explained why we have numerous transit systems in the Tacoma/Seattle/Everett area. It seems like a bureaucratic waste and top heavy. Why don't we combine them and eliminate a bunch of management overhead.  We don't mind paying taxes as long as there is efficiency and very little waste. As an outsider who moved here a number of years ago from the mid atlantic, it's that the transit systems in our MSA pretty poor.
NORTH KING COUNTY	Ballard and West Seattle stations should be 1st priority (urban centers are growing the fastest in our region). Ballard - UW light rail should be added. Metro Route 8 transit tunnel should be strongly considered.
NORTH KING COUNTY	Transit oriented development partnerships should become a significant source of funds for the projects so that the already burdened homeowner doesn't have to keep paying for business tax breaks.
NORTH KING COUNTY	I would like to see investigation put into the east/west line between ballard and UW
NORTH KING COUNTY	Busses are not the future. Transit off the streets is.
NORTH KING COUNTY	Too slow to deliver, too expensive and doesnt deal with reality that vast majority still need to use POV for portion of commute trips,

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	You cannot expect to charge \$50B through every available taxing source to the populace of our 3 counties. Try living within your current budget which is already a serious tax obligation to all of us.
NORTH KING COUNTY	light rail and improvements to transportation are essential for this area. Commuter congestion is impossible and needs to be addressed.
NORTH KING COUNTY	I would only hope that the light rail additions could be completed quicker.
NORTH KING COUNTY	This is a tremendous waste of money. While I agree that transportation is important in this region, building a fixed rail system is not the answer. By the time these projects are completed a rail system will be obsolete. Sound Transit has proved that it cannot stay on budget nor can it get a project done on time. Until such time that you people come up with a viable plan I strongly oppose any further expansion of the light rail system. Express buses are fine because routes can be adjusted and I have to believe that would be much less expensive than what is proposed now.
NORTH KING COUNTY	Would love to see ways to encourage existing car commuters to more strongly consider public transit.
NORTH KING COUNTY	Local corporations need to be footing part of the bill. I see no mention of this. Small businesses should be exempt and should receive benefits for providing transportation options for employees. For example, if a small business subsidizes some portion of employee transportation cost, they're able to write off the expense.
NORTH KING COUNTY	West Seattle needs to be a much higher priority. Rapid population growth and crippling traffic on the bridge. It CANNOT wait 17 years for light rail!!!!!! It needs it now!
NORTH KING COUNTY	Rail is extremely cost-inefficient and inflexible. Let's not waste any more money on it. Expand bus service instead.
NORTH KING COUNTY	What about improvements to the existing system? For example, the 372 bus to the UW station is stuck in the same traffic that snarls the road from Capitol Hill/Montlake Bridge to U Village. The 71 avoids that traffic, if you transfer to it, but it only runs twice an hour and never on Sundays. Where is the drop-off and pick-up areas for taxis and cars at the UW station? I want a system that allows for a car-less system for the whole Sounder Transit area, but inner Seattle has the worst problems and I don't see that it's been improved in my area (Ravenna-Bryant-View Ridge). Also, I don't agree with funding based on residential housing assessments. The absurd rise in housing prices is making taxes too high for some residents to keep their houses, forces landlords to increase rents which are already close to unaffordable, etc. Taxes on gasoline, car registrations and car insurance should be the primary funders of public transit.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Projects should focus mainly on central locations with bus transit expanding to and from those train locations. There is also a surge in rider safety concerns that have not been mentioned in these projects. How are these train and buses going to "policed" for crime or other rider issues? I commute by bus Monday through Friday between the hours of 6 AM and 6 PM. I have witnessed two men close to fist fighting each other over "space" on an over crowded bus. The driver was unaware because there was so many people obstructing the view of the driver. No one said anything or did anything about it, no camera on the bus either. I have been groped by a stranger on the bus as well, this time no crowded bus, driver did nothing about it, I was sitting close to the driver enough that myself, the driver and the man that grabbed me was out of view of the camera that was on the bus. If we, as taxpayers, are footing the bill for these projects we should also feel safe to use these services. I am all for expanding but rider safety is something that has been a big issue for a long time and it is getting worse along some of the express lines serving the downtown areas.
NORTH KING COUNTY	There has to be a way to make improvements faster.
NORTH KING COUNTY	I am strongly supportive of sound transit light rail service from Ballard (and beyond) to Downtown Seattle and from Downtown Seattle to West Seattle (and Beyond, i.e., White Center and Burien). I believe that these, as well as initiating service across Lake Washington, are vital to decreasing commute times and congestion, as well as decreasing the amount of residents who feel like they NEED to own a personal vehicle in order to live in King County. This is important to many of us, and I am tired of feeling like I NEED to own a car. As a resident of Capitol Hill, I am grateful for the new Capitol Hill link station.
NORTH KING COUNTY	When I have ridden the light rail, I notice that it is very ROUGH and very NOISY. I Prefer the bus. I ALSO DON'T APPRECIATE the never ending tax increases you have planned. You plan to tax us on yearly LICENSE PLATES, you plan to tax us with EVERY PURCHASE, you plan to tax us AT THE PUMP, on, and on and on and on , , , , , NOTICE: Democrats LOVE to spend other people's money without a clear plan i mind. This is just another one of them.
NORTH KING COUNTY	Please reconsider the original proposal for subways in Seattle. Also, please consider giving metro city buses their own lane AND removing stops that are within 3 blocks of another stop for more reliable service.
NORTH KING COUNTY	East to West links to the transit stations, as well and dedicated infrastructure (separate from automobiles) are extremely important in future planning.Thank you for your work and community involvement.
NORTH KING COUNTY	I strongly support mass transit build out but I don't support using property taxes for funding. Housing is already too expensive for most working people who would benefit from expanded transit, and we don't fund highways with property taxes.
NORTH KING COUNTY	There should be two different plans: one that can be implemented within a short timeframe and one that looks at longer term projects. Asking for input on every project is too complicated.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>*I wish you could overlay Metro bus lines onto this map to allow us to see where buses already exist - and see where integration of transit should be. Or at least two separate maps side-by-side. It drives me nuts that we are asked to look at funding and developing two separate systems.</p> <p>*Sound Transit and King County Metro should always honor payment from one system to another. For example, human services tickets used on Metro should be allowed on Sound Transit. Cash payment transfers should be allowed on Sound Transit. Again, it drives me nuts that we have 2 separate transit service providers - and that they don't mesh with each other! Illogical.</p> <p>*Funding for transit needs to also be the responsibility of businesses/corporations who benefit from reliable transportation that gets their workers to their jobs. Less reliance on property owners and sales tax - more effort at implementing an employer head tax. It's only fair.</p> <p>*This timeline is tough to make decisions about. In even just 7 years things could look totally different as far as where more transit is really needed. How flexible is Sound Transit? Is it feasible to check in every couple years to make sure project priorities are still reasonable?</p>
NORTH KING COUNTY	<p>I'd rather see a robust transportation core within Seattle grow outwards rather than what seems to be stretching the meager transportation core as far as we can north and sound before returning to the core of Seattle (Ballard and West Seattle) to make that system robust. Residents of major metropolitan areas such as seattle shouldn't have to consider driving to get around!</p>
NORTH KING COUNTY	<p>Faster</p>
NORTH KING COUNTY	<p>Thank you for all the hard work that went into this plan. I am a big fan of public transit and greatly appreciate that I am able to get around without a car.</p>
NORTH KING COUNTY	<p>I strongly support expansion of transit, train and bus transportation in the King County area; however, I will not vote for an additional property tax to fund that expansion. The last year of property tax levies have resulted in a \$2,000 plus increase in our yearly tax; and we are retired and on a fixed income. I expect this type of funding proposal will drive us out of our home.</p>
NORTH KING COUNTY	<p>I would want to understand the use of the existing funding before approving additional funding. I am not convinced the existing funding is being used in the most efficient and public beneficial manner. I am also concerned with putting buses on the shoulder of freeways, this does not seem to be a safe or efficient way to go. I would rather see the funding used to expand freeway capacity (i.e. more lanes, more efficient exits and on ramps. I do not think reducing auto capacity on major arterials is acceptable, Transit should be additive to capacity, not diminutive, transit (buses or light rail or trains) need their own separate rights-of-way and should not be displacing or disrupting car/truck rights-of-way, this does not add the capacity we need to handle increasing populations.</p>
NORTH KING COUNTY	<p>Speed up the time schedule!!!</p>
NORTH KING COUNTY	<p>Need bike path across 520 bridge</p>
NORTH KING COUNTY	<p>Stop putting the cost on sales and property taxes, even if it means starting an earnings tax.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

<p>NORTH KING COUNTY</p>	<p>My comments are about this survey. The projects themselves are quite clear via the map provided on the website.</p> <p>Rating a project based on urgency <i>*by itself*</i> has little meaning. What is not described is the impact of rating projects having an urgency of 1 against an urgency of 7. I assumed that the urgency is based on comparing the options provided and that rating them high means that they greatly effect me. Without giving a strict definition of what "urgency" means may skew your results because the people you are surveying may have a different interpretation of your words.</p> <p>A lot of the questions do not describe clearly what the impact of the project will be. Some of the projects are quite clear e.g. building a bus corridor between Lynnwood and Bellevue will enable those commuters to reach their destination faster. But some of the questions are extremely vague. For example, I don't remember which project it was, but one of the sub-points was: "Supporting transit-oriented development associated with transit stations". THIS COULD MEAN ANYTHING.</p> <p>On the discussion of cost of these projects, the survey elected to describe percentages using words and in a manner that is difficult to read e.g. "eight-tenths of one percent". Just write the damn number. 0.8% is <i>*SO*</i> much easier to read. Also, five-tenths is just one-half. The survey may have wrote it this way to keep consistency with "eight-tenths", but it's much easier to read one-half and then "eight-tenths". I would advocate writing the number and not worrying about this.</p> <p>On a positive note, I did like the structure of the survey in which the programs in the sub-projects were first discussed before pitching the sub-projects against each other because the participant then has deep context on what the details of the sub-projects are.</p>
<p>NORTH KING COUNTY</p>	<p>I'm retired and drive where I need to go. There is nothing in the plan to do something about the horrible condition of the roads, and will no doubt try to squeeze cars out of the picture. I will never vote for a plan like this, because if city and county governments had restricted growth to what the given land area could handle, there wouldn't even be a need for a plan like this. I will certainly be urging people I know to vote against this.</p>
<p>NORTH KING COUNTY</p>	<p>Anything that decreases travel time. And light rail is amazing.</p>
<p>NORTH KING COUNTY</p>	<p>While I think the projects need to be done, I have lost faith in the government's ability to execute. Bertha? Are you kidding? And the Lake Union Trolley - what a waste of money. And everything happens so slowly. I am reluctant to volunteer any tax money until I see better performance. Stop all the boondoggle conferences, for starters.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	25 years is far too long to be effective, this problem must be solved with the utmost expedience to be effective. We need critical infrastructure to accommodate growth and congestion in the present day, not two decades away.  Please consider 4-6 years as the optimal timeline for fixing this serious issue.
NORTH KING COUNTY	City, County & State tax increases are pricing lower income families out of urban environments.
NORTH KING COUNTY	The huge tax increases will not justify these wasteful government schemes.
NORTH KING COUNTY	This all needs to happen way faster. Light rail to Ballard taking 17 years is ridiculous. Do it all, and do it way faster.
NORTH KING COUNTY	Bike access, especially on light rail, is extremely important. The current setup only accommodates 2 bikes per car; not realistic if you expect bike commuters to access light rail regularly.
NORTH KING COUNTY	Seattle needs more east-west transit... Light rail from Ballard to UW, Fremont to UW/Capitol Hill, Northgate to Ballard/Crown Hill.
NORTH KING COUNTY	More busses need to be added on the weekends for students traveling from UW past lake city toward Bothell
NORTH KING COUNTY	I support paying through taxes whatever is necessary to make transit throughout the region cheap, user-friendly, efficient, timely, and comprehensive in geographic reach.
NORTH KING COUNTY	All these projects are aimed solely for commuters living in certain narrow corridors going to work at certain select industrial/ major business hubs. No flexibility is possible. These projects are at the expense of flexible neighborhood based transit. This plan puts me in mind of unchangeable ant trails. You want the ants (us) to conform to your pattern rather than conform your pattern to our needs. Over priced for too small a benefit. As a non-driver who relies on mass transit for much of my travels, I have come to have no faith in the reasoning of our transit planners. Oh, and a new tunnel project? Really? After the continuing Big Bertha boondoggle I just have to laugh.
NORTH KING COUNTY	Bellevue would be huge.
NORTH KING COUNTY	Something has to be done about the traffic situation as it will only get progressively worse year after year. Thank you for hearing us out but Government needs to make some tough choices and look to benefit EVERYONE and cost effective.
NORTH KING COUNTY	Bus rapid transit solutions tend to have a higher cost-benefit ratio and would allow more projects to be completed as compared to fixed rail investments.
NORTH KING COUNTY	Quite wasting OUR money!
NORTH KING COUNTY	What the [explicit] is "other transit development around transit stations"? And having to choose "Future planning and research" as one of the options for what I want most is a complete dummy option: you should do that anyway, and the problem with Seattle transit is never studies and research it's ACTUALLY GETTING [explicit] DONE. I don't want this to be another monorail vote and I'm sure it's not another downtown tunnel disaster, so just do it!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Question 14 is misleading. If this is a property tax we know that most of Seattle, Bellevue, Mercer Island and Kirkland would pay much more than the 200 per year. Sound Transit should be more up front with voters. I strongly oppose a property tax to fund ST3. If a property tax is imposed, the boundaries should include ALL properties that will benefit. The boundaries for ST3 are old and need to be revised to reflect the population today. In reality, all of King, Pierce and Snohomish will benefit if we can provide ways to reduce travel times.
NORTH KING COUNTY	I think transportation at the core of the city should be prioritized first and then the projects should radiate outwards. I oppose paying taxes for 17 years before my neighborhood is connected to the city with light rail. West Seattle and Ballard are choking in cars and traffic now. The city core will ntb virtually car free if we are going to keep Seattle livable, dense and meet climate goals. Overall I think the project time line is 10 years to long. Completing all segments within 15 years would be a better timeline. In 25 years this plan will be hopelessly out of date due to the changes in population, climate and co2 restrictions that will need to be in place due to global warming.
NORTH KING COUNTY	I'm probably preaching to the choir here, but I'm definitely in favor of improvements and expansions that functionally remove cars from the roads and streets during high-commute times. Riding the bus around town, and varying times of day, it seems like the biggest obstacle to expedient travel isn't high passenger volume or frequency of stops, but delays related to traffic congestion and/or car wrecks.
NORTH KING COUNTY	If the cost for the average resident per month could be reduced to \$10, more residents would support the plan.
NORTH KING COUNTY	Traffic congestion seems like it is reaching a critical level. I only see I-5 on my commute so, to me that is where it seems worst, but maybe I-4505 is worse. At any rate given the congestion we already have it seems like the timelines are too long for these projects.
NORTH KING COUNTY	Fix the existing roads. 25 years is waaaay too long. I'm 45 now and will be 70 before this is done and will have paid over \$25k on it. Hell no.
NORTH KING COUNTY	The continued increase to property taxes is making Seattle un-affordable. The cost of the tax increases is driving middle class home owners out of the area and landlords to pass on the expense to their tenants. STOP. All of the transportation initiatives (city, county and state) are too expensive and not coordinated. Bicycles are too highly prioritized for a minority group.
NORTH KING COUNTY	Too expensive. Strongly oppose open ended taxes. Projects should be more definitive and closed ended.
NORTH KING COUNTY	Graham St. Station would be the fastest to complete and benefit a lot of commuters.
NORTH KING COUNTY	Lumbering road crushing buses and trains are anachronisms. Sound transit is like a rotary party line phone.
NORTH KING COUNTY	Tax funding plans should be progressive to ensure low-income residents aren't overburdened by new taxes. RE: This survey, "male" "female" and "other" are not inclusive options for gender; use a fill-in field instead.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>Prove community-contributing use in the dispossession of Sound Transit property in South Seattle.</p> <p>Improve access to light rail by supporting city projects to improve the access and parking condition of the RPZs in South Seattle – there are too many incomplete streets lacking curbs and sidewalks.</p> <p>Accelerate Graham Street Station. With Move Seattle support it can be pursued now. Why the delay?</p> <p>Accelerate West Seattle to Downtown and Downtown to Ballard. Include South Lake Union and Upper, Lower Queen Anne, and Fremont.</p> <p>BRT Bellevue to Issaquah not light rail. Convincing public of demand for light rail to Issaquah is going to require more evidence. I can't support ST3 on this alone.</p>
NORTH KING COUNTY	The timeline is too long. We need light rail to West Seattle yesterday.
NORTH KING COUNTY	Since the UW light rail station has opened is has already transformed our commute choices and opened whole new areas to visit with convenience. Yeah I wish it happened sooner - but still it's so great. It reminds me of the Bangkok Transit System which now transports hundreds of thousands a day above the gridlock. Anyway - strike while the iron is hot. I am in the mood for paying for light rail when I can see such tangible benefits.
NORTH KING COUNTY	The time line for adding new stops to the existing is a bit long. Theses stops should be on the top of the list graham st. And Boeing access.
NORTH KING COUNTY	<p>I fully support expanding our mass transport capabilities. I believe we as citizens and tax payers should contribute to the future infrastructure of our transportation system. However, I also believe there are better transportation options, which are worth exploring. Seattle is a progressive city with little room for expansion in the rail. Buses traverse the same busy roads as other passenger vehicles. We should be looking for alternative transport methods which allow use of existing pathways. One idea I've heard and researched are gondola type vehicles and also a technology called SkyTran. Both should be explored in my opinion.</p> <p>[name and contact info]</p>
NORTH KING COUNTY	These plans sound good but the city also needs to force new apartment and condo units to have one to two parking spots per unit, they can rent out any that arent' used by tenants. It is important to deal with traffic but parking is also important.
NORTH KING COUNTY	The timeline is far too long. We need resources to act more quickly. I'd support a cost increase if it meant this would be done sooner.
NORTH KING COUNTY	Do what's best to combat global warming.
NORTH KING COUNTY	I just don't trust your figures. You people do not know how to do anything on time or with in a reasonable budget.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	The timeline is too long. Would like to see light rail from Renton to Issaquah.
NORTH KING COUNTY	Need a graham Street station ASAP. all of these plans are slated to take way too long , we need to expedite this whole process. Traffic is a mess now I can't imagine what is going to be like in 17 years.
NORTH KING COUNTY	Please don't raise taxes by 17 or more per month. We already pay too much. Find this thru other means. Please tax folks who can afford it. Maybe the large businesses that will benefit.
NORTH KING COUNTY	Where's the mention of new roads - for the new buses to run on? What are the boundaries of a Puget Sounf resident for taxation?? We need new roads alongside all this public transport - how do you think COMMERCE moves? Its moves on air filled tires.The Light Rail now goes way too slow...speed it up and fix the wheels that make noise or buy fdifferent trains. Ugh.
NORTH KING COUNTY	I fully support projects that work to turn the light rail into a comprehensive regional transit system. The bus service in Seattle has been fantastic, but rail is substantially faster and removes traffic from the already crowded streets. Light rail expansion should definitely be a priority!
NORTH KING COUNTY	In general, well planned and well done, but the timelines, order needs work. You have to infill seattle proper FIRST (Ballard to WS - it's the missing link to developing the core system. I would rarely if ever ride either line but imho this is the key to base-lining the system. I get why you've made this suburban focused (votes) and the timeline (again votes), but I'd rather you swing and miss than wait 25 years. I'm happy paying even more taxes for this. But build the system from core out.
NORTH KING COUNTY	Link Light Rail has one Major Flaw. It can NOT be versatile when any number of events occur. Mechanical break downs, Pedestrian accidences, Vehicle accidents, Earthquake/Natural disaster, Terrorism attacks, and any other number of events. Buses can be re-routed easily, and are Much less expensive. Please use our resources to achieve mobility for our region. Link Light Rail will NOT do this.
NORTH KING COUNTY	Could it all be done FASTER? That would be my wish!
NORTH KING COUNTY	Fixed line light rail may be outdated as smart, driverless and non-polluting cars come online in the next decades. They also cannot be altered as population shifts. This overly ambitious and expensive fixed-line approach is incorrect. Herding citizens into rail mass transit when exciting car options are on the horizon is purely ideological. Property taxes are killing middle- and lower-middle income workers and retirees in Seattle. We cannot afford more. I and most of my friends have started to vote no on most property tax levies. Sorry, but that is the reality. A significant discussion has started in this town as to why our leaders do not care about the experience of actual people - only ideology.
NORTH KING COUNTY	I fully support Light rail but when it comes to paying for it, I believe that it should be equitable (ie state income tax!) so that the hardship does not fall on many families disproportionately.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>funding should include fees paid by developers though new building fees and requirements to improve transit facilities near development in project cost (new traffic signals, park and rides, pedestrian overpasses, transit stops, additional transit capacity...)</p> <p>Funding sources should also include income taxation. All funding sources should have a sunset clause which requires voter review for renewal.</p>
NORTH KING COUNTY	<p>There needs to be more transit directly between neighborhoods in Seattle. It should not take 60min and a transfer to get just a few miles from Capitol Hill to Ballard.</p>
NORTH KING COUNTY	<p>Not adding Light Rail across the new 520 bridge was a horrible decision. It completely isolates commuters who live in North Seattle who commute to the Eastside for work. I'm sure after a "study period" (will cost tax payers) ST and WSDOT will end up designing modifications to the bridge (will cost tax payers) and then we'll (tax payers) end up paying millions to update the bridge which I'm sure will once again be obsolete by the time it opens 50 years from now.</p>
NORTH KING COUNTY	<p>Residents of King County are being taxed to death. As a senior on a fixed income, we can not continue to reside in our family home with this continuing increases in taxes! Let those who use the facilities pay for them.</p>
NORTH KING COUNTY	<p>West Seattle is one of the worst traffic nightmares. The core population has increased dramatically with the new condos and apartments. Rapid Ride is a joke because it only has a short bus lane and sits in traffic.</p>
NORTH KING COUNTY	<p>Make the rail travel faster if possible, some people I've spoken to claim google maps told them it'd be faster to catch 3 busses than to take the train</p>
NORTH KING COUNTY	<p>West Seattle light rail and ballard are a must!!</p>
NORTH KING COUNTY	<p>I support Seattle Subway's suggestions to ST3</p>
NORTH KING COUNTY	<p>The time line seems really slow to complete these projects. It seems like these projects could be completed in half the time. I see China doing huge projects to move people in just a few years. I realize China is a dictatorship but with our wealth it just seems Americans could do projects like this more quickly.</p>
NORTH KING COUNTY	<p>This has no thing to do with you plan. You are extremely deceptive on describing the costs. What are they based on? My current real estate taxes have gone through the roof with a 33% increase to be paid in 2016. Makes me furious.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>The plan is so slow as to make it insulting as a middle-age property holder to have to pay for something (expensively) I'll likely never benefit from. Washington State Legislature needs to fund more of this from new tax sources - otherwise it's just plain stupid to fund primarily from property taxes...especially since my home is nowhere near any of these rail lines.</p> <p>There needs to be light rail on Aurora - build it on the surface, reduce car lanes. Do it soon.</p> <p>All of these transit improvements would need to be sped up 2x for me to support this plan. I'm okay if you need the State to allow you to borrow more funds for this.</p>
NORTH KING COUNTY	Using taxpayer money to help you sell the transit plan to the public in the November election illegal.
NORTH KING COUNTY	I personally believe that these projects should not negatively impact the most vulnerable and economically disadvantage folks in our community. I think that the corporations (Amazon, Microsoft, Boeing, etc) that are benefiting from the influx in people moving to the city for employment should bare a bigger financial responsibility in bettering the area's transportation system.
NORTH KING COUNTY	Wallingford should not be viewed/dismissed as merely as a thoroughfare to Ballard/uw.
NORTH KING COUNTY	Please add whatever you can to improve air quality using vegetation that reduces pollution. I know that transit itself will help to the extent that it reduces the use of vehicles that pollute, but added environmental protection is crucial to our communities. Also, please use sustainable storm water practices such as pervious pavement whenever/wherever possible.
NORTH KING COUNTY	Supporting affordable housing (low-income rental units and permanently affordable for-sale housing) and other equitable development measures near transportation nodes should be top priorities.
NORTH KING COUNTY	I believe the timeline for the Graham Station should be moved up. The mayor has included \$10 million in his transportation levy for planning, permitting, and property acquisition. If the Graham St station is not going to be built for 20 years, much of this money will go to waste, given that planning will have to be redone by the time the station is to be built. The Graham St. station was in the original plan for Link light rail, and residents in the area need access to a station between Othello and Columbia City sooner rather than later, especially given the changes in bus service that Southeast Seattle is experiencing--these changes assume access to light rail. Many people do not feel safe walking over a mile to a distant station after dark. Please consider using some of the money saved on the Capitol Hill/Husky Stadium extension to build the Graham St. station as soon as possible.
NORTH KING COUNTY	<p>The drivers in our area do not choose to use rapid transit. Their needs require the flexibility of the automobile. What we need is politically incorrect and detested by the planners. We need more lanes for autos. The \$Billions you are spending could be more effectively used for enhancing our roadways to decrease the costs of commuting, reduce the frustration of the commute and to decrease idling-caused pollution.</p> <p style="text-align: center;">tb</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	when writing the initiative, please include an annual income level threshold where you become affected by this. i fear many people who probably won't be paying this tax (i will be) will vote against it, thinking the little they earn will be cut into more. if i only made \$30k/year and lived in seattle, \$17 would scare the crap out of me. at \$50k/year, it's not such a big deal anymore and i probably would. \$80k it's a no-brainer.
NORTH KING COUNTY	I strongly oppose this due to cuts in bus schedules and increases in fares. I have 10% confidence that planning 22 years out will still be applicable in 22 years and come in on/under budget. The 10% is only because the new extension actually did, but 2+ decade planning is just... wow. And then dumping in money to other places that aren't the already underserved population centers is idiotic.
NORTH KING COUNTY	I am strongly opposed to putting in more light rail and bike lanes. VERY few people use the bike lanes and the taking away road space to support a special interest has had a severe negative impact on the ability to get around Seattle. Light rail in the middle of the road is a terrible idea. We need to go back to the monorail - off the grid, no digging and predictable time to get to your destination. It is not a surprise that the line from Capitol Hill to the U is crowded - it's truly off the grid. The high cost of this proposal coupled with the inevitable mismanagement is a terrible idea. I realize some of it would be in tunnels but there will be more road space taken away to put a train in the middle of everything.
NORTH KING COUNTY	I'm a little concerned about the amount of revenue for this project being generated mostly by raising sales tax and property taxes. With marijuana sales encroaching a high-million dollar mark, could it be possible for some of the taxes generated by marijuana sales to be utilized for ST3 expansion?
NORTH KING COUNTY	I estimate the tax burden I would shoulder as a result of your proposed plan is 3-4 times the average, yet I do not find any element of your plan that benefits me directly. For me, it would be a sizable "charitable donation".
NORTH KING COUNTY	Please focus on making existing services as efficient as possible before expanding the scope of the plans. Once the current services are proven beneficial from a ridership and trip time perspective, then consider expanding services.
NORTH KING COUNTY	Reduce the time line!
NORTH KING COUNTY	Affordable housing is an essential component of an effective regional transportation system.
NORTH KING COUNTY	This is a ridiculous tax and spend program. If you want to improve transportation, widen the roads and put more buses to work.
NORTH KING COUNTY	I strongly believe that employers (such as Amazon, Google, and Tableau) whose workers put a large strain on public transit and affordable housing in the city should be contributing funding to public transit development and studies.
NORTH KING COUNTY	keep up the great work I just feel like this wont happen in my lifetime

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	This is insane.. I am going to retire in a few years and I will not be able to stay in the area because it is too expensive...Way to many taxes, housing is too high..costly transit projects...this city and area is not for people on a fixed small incomes, poor and elderly..YOU will be asking me to pay for something, I will not use...Way too expensive and then of course there will those cost over runs...You people just want to be unleashed and not have any accountability.. just like everything else in the area...
NORTH KING COUNTY	Light rail and trains are more favorable because they don't get stuck in traffic like buses.
NORTH KING COUNTY	It would make more sense for ridership efficiency for Ballard light rail to go downtown via University or Husky Stadium stations.
NORTH KING COUNTY	I think we need more transit station links with the bus grid. It's either that of more parking. Also, the time line is just to long
NORTH KING COUNTY	keep those buses rolling please
NORTH KING COUNTY	find a way OTHER than taxing home owners to complete these projects... make the taxes be more directly tied to the vehicles USING The roads or the commuters themselves... as a homeowner i am sick of having to foot the bill for every iniative the state takes... and especially when its something i dont directly benefit from! this is another example and allthough i GREATLY Support mass transit systems i do NOT support being taxes on property to pay for them. find ANOTHER way or you wont have my support AT ALL!
NORTH KING COUNTY	The metro Seattle plan is a makeshift uncoordinated network. A new more holistic, all encompassing approach is required. Starting with a clean sheet of paper. The only absolute necessity is the Seattle to Bellevue journey. The rest of the system needs a complete re-think.
NORTH KING COUNTY	Please consider using a progressive property taxes for this, and other proposals. Flat taxes are short sighted in their capacity to generate revenue and assume property values will continue to grow. A progressive property tax would, like federal taxes, limit the financial burden of the most vulnerable citizens, while allocating the larger revenue share from those who can afford these increased costs, modest though they are. Thank you.
NORTH KING COUNTY	I do not own a car. I rely on Metro transit for commuting along with lots of bicycling and walking. I rent a car occasionally. The expansion of the light rail system may allow me to live someplace more affordable outside of downtown that still has a convenient, quick, and reliable commute.
NORTH KING COUNTY	1. There is so much bureaucracy and waste in government as it stands. What/how do you propose to contribute to these projects? How will you cut spending and waste, rather than just asking denizens for more money? 2. You don't say as part of this survey, but what does the next 25/50/75/100 years look like for commuters based on current projections? Do these projects take that growth into account? 3. Trains. Trains. Trains. Focus on trains.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I was under the impression that the link light rail was going to 185th in Shoreline by 2023, and then to Alderwood (Lynnwood) area right after that. But the proposal above puts this now at 2036. I would think that if we were committed to getting mass transit throughout the Puget Sound area, we would look at getting Link all the way around Lake Washington, including the 405 corridor instead of relying on buses.
NORTH KING COUNTY	Shoreline, WA
NORTH KING COUNTY	Property taxes are too high inside Seattle as a very small extreme electorate, lead by extreme local leadership, continue to offer and pass too many levies. Keep property taxes under control so that the middle class can afford to stay in the region. Find another taxing source. KEEP PROPERTY TAXATION LOW SO THAT THE STAGNANT WAGED MIDDLE CLASS RESIDENTS CAN AFFORD TO STAY IN OUR APARTMENTS AND OUR HOMES. WE LIKE ECONOMICALLY DIVERSE NEIGHBORHOODS, IF YOU ALL INCREASE TAXES TOO MUCH, ONLY THE VERY RICHEST AMONGST US AND THE SUBSIDIZED POOR WILL BE ABLE TO STAY. KEEP PROPERTY TAXES LOW FOR THE LOWER AND MIDDLE CLASS. LIFE IS DIFFICULT ENOUGH OTHERWISE.
NORTH KING COUNTY	I am extremely upset over the cancellation of Metro bus route 66. This route served 5th Ave NE for more than 90 years. The elimination of route 66 has imposed a great hardship on me.
NORTH KING COUNTY	PLEASE IMPROVE THE TIMELINE. it is extremely disheartening that a comprehensive off grade neighborhood to neighborhood transit option won't exist until 2038. It needs to be done yesterday. I am an ardent supporter of transit and I balk at that timeline, so I can only imagine the hesitations felt by people who support transit marginally or not at all. This needs to be done ASAP.
NORTH KING COUNTY	1) The light rail system serves SeaTac International Airplane but the trains have no provisions for carrying luggage. This makes traveling to/from the airport uncomfortable for everyone, especially during commuting hours. 2) On-time and uninterrupted light-rail train service is relied upon by busy commuters. My experience on many occasions is that minor issues ( for example, an inebriated pedestrian walks into the side of a moving train passing through the station and falls on the platform and the train system shuts down for an hour, obliterating peoples' schedules all down the line. Robotic and completely unhelpful recorded messages 'explain' the reason for the delay while passengers' children are stuck in day-care centers, waiting relatives continue to wait, dinners aren't prepared, passengers feel increasingly helpless, frustrated and stressed at the end of sometimes long, difficult days. KEEP THE TRAINS MOVING ! ADD MORE CARS TO ACOMMODATE DEMAND FOR THEM !
NORTH KING COUNTY	I am only opposed to raising sales and use taxes for the funding. This puts undue burden on those with more limited income.
NORTH KING COUNTY	I think it is important to have overlapping transit options so that when one system breaks down, there is another system that can move people, at least for short distances. When the light rail broke down last week (just opened) a colleague of mine had to take an uber because his old bus route was either removed or changed (UW to capitol hill). I think redundancy in the system would be a good idea.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Instead of spending gobs of money to create light rail that is neither affordable nor fast, I think we should invest in more and better bus service.
NORTH KING COUNTY	Extend Seattle Light Rail in all directions as soon as possible!
NORTH KING COUNTY	Thank you for asking for community feedback! Increased mass transit is a requirement for our region and should be put into place as soon as possible. Keep up the good work!
NORTH KING COUNTY	Two comments: 1. The tracks along Puget Sound from Seattle to Everett are constantly washing out with mudslides. Given climate change models of rising sea levels and increased heavy rains in this area, are there plans a) to abandon this route eventually, b) to stabilize it massively, or c) ???? 2. Mass transit tends to do north-south well in this region, but east-west is lacking in places, making riders travel way south (for example) to get a connection and then backtrack north in a V-shaped travel route. 145th St (Seattle/Shoreline/Lake Forest Park) is an example. There is no east-west route that runs the entire length of this major street. With the proposed improvements to the 145th St corridor and a light rail station at 145th and I-5, are there plans to run regular bus service all day east-west on this street from 3rd NW or Greenwood to Lake City Way/522? This is a missing link!
NORTH KING COUNTY	I want this tomorrow.
NORTH KING COUNTY	Most of this was promised to us the FIRST time we voted on Sound Transit. It's funny how time and financial deadlines keep getting moved to support the flawed premise that you're ever on-time or under budget.
NORTH KING COUNTY	- Light rail to Ballard should be prioritized to the extent that it is possible. - Grade separation of rail is a requirement. There should be no train/car or train/boat interactions that could delay or disrupt service. - More ST3 funding should be put toward studying routes not currently included in the draft plan, including a Ballard-to-UW line and the so-called "Metro Route 8" line that would connect the Central District, Capitol Hill, and SLU. Sufficient funding should be provided such that these lines would be as close to "shovel-ready" as possible, pending additional funding (including a scenario where another transit authority could use the plans to build it itself). - I support a "big" plan for ST3 (including 25 years worth of funding), but plans should be better prioritized and all optimizations should be made to improve time-to-delivery of lines proposed.
NORTH KING COUNTY	Need to work faster on connecting Ballard and connecting all the way upto Lynwood
NORTH KING COUNTY	Please add in the Ballard to U District cross-Seattle connector. We do N-S well in Seattle, but E-W connections are crucial. Also, please do whatever you can to speed up the timelines for new stations and lines. I strongly support ST3, but I fear that some people won't vote for it because of the timelines. 25 years to Everett and Issaquah is far too long. You guys need to win this vote this year. Do whatever you can to speed up these timelines to get people to vote yes.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	What an awful survey. I support te plan. St needs the politicians to choose. This survey clearly devised by self serving bureaucrats. Stop it please. Keep working and coordinating. Tell the people the truth and get to work.
NORTH KING COUNTY	Ballard & West-Seattle Lines should be higher priorities and occur as soon as possible. Having to wait 20+ years for some of the most important parts of the plan (serving large rapidly developing close-in areas) is unacceptable and prompts me to disapprove of the plan altogether. Grade separated (elevated/underground rail) options should be used instead of surface level light rail/trolley/bus lines that conflict with motor vehicle, bicycle, and pedestrian traffic.
NORTH KING COUNTY	Prioritize rail and bus service, with ample parking in and near stations. Put NO funds into further bicycle-related projects.
NORTH KING COUNTY	What is needed in the area under discussion is improved access and capacity for automobiles. No mass transit "solution" can significantly impact the transportation needs of people in this area. Gridlock pollutes excessively. The key to easing gridlock is additional capacity for automobiles, not added transit.
NORTH KING COUNTY	Sound Transit cannot be trusted to responsibly and reliably manage any project of this scale, and has a VERY CLEAR RECORD of lying to the public. You routinely report project costs and schedules and scopes to be "under" and "within" which is a LIE. TRUE accountability and integrity are something I require of any public agency, and unfortunately, ST is yet another government agency that does not at all tell the truth and skews data and misinformation to the public in order to further its own agenda. I notice that nowhere in the introductory pages of this survey do you mention the FIFTY BILLION DOLLAR pricetag (like you'd be anywhere near that anyway, I know). Beyond this, light rail does not fit into most people's lives and this project would benefit a very few and cost virtually everyone, and provide VERY LITTLE RELIEF to our traffic congestion around here. Far MORE could be done with smarter bus routes and some expansion of commuter rail lines on existing tracks, for FAR less money. It's quite obvious that Sound Transit is all about grabbing more money and more power and more self-preservation. You should be ashamed of your never-ending deceptive misinformation practices. I WILL NEVER EVER SUPPORT A PROJECT PROPOSED BY SUCH A DECEPTIVE, UNTRUSTWORTHY AND UNRELIABLE AGENCY.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

<p>NORTH KING COUNTY</p>	<p>I like the plan for the future but what I do not like is how the bus schedules in the U-District have been changed. Since the new light rail opened my commute now takes 30 to 40 minutes longer. Because:</p> <p>A.) There are fewer Metro buses that service my neighborhood now. Just the 74 gets me to the International District where I work. But it only comes about every 30 minutes until 9:30 a.m. I used to have a but every 5 to 10 minutes at my stop until 11 a.m. And the 74 has been late nearly every day; it was 35 minutes late last Wednesday.</p> <p>B.) It takes about 25 minutes to get from my house to the Husky Stadium station and then another 15 to ride the light rail to work in the International District. I used to be able to leave my house, catch a bus (71, 72, 73, 74) and be at work in 20 minutes.</p> <p>When the U district station (on Broadway) opens my problems will be solved, but that's still 5 years out. I'm not liking my options until then. So great ideas for the future, I just don't like the options now.</p>
<p>NORTH KING COUNTY</p>	<p>I was excited, but then realized that I will probably be dead by the time the light rail would reach West Seattle. Guess I need to move out of Seattle to get better transportation to Seattle proper. ;p</p>
<p>NORTH KING COUNTY</p>	<p>Hello, I am a 30 year rider of Madison11 to work. I strongly believe financing of the plan should require higher rider fees. I have traveled in Europe where equipment and service are first rate, and rider fees are much higher. Your financing method guarantees second rate equipment and service. George Textor 206-324-9548</p>
<p>NORTH KING COUNTY</p>	<p>Cities north of Lake Washington, e.g. Bothell, Kenmore, Lake Forest Park, Shoreline, and Woodinville, have seen a major increases in traffic through these communities due to commuters trying to avoid the bridge and highway tolls! Please give priority to mitigating this situation ASAP. SR 522/NE 145th Street is a major east-west transit corridor that is key in connecting riders to the light rail spine and making the overall transit system work—building a complete network that ensures transit system success.</p>
<p>NORTH KING COUNTY</p>	<p>Would it not be cheaper to subsidize Uber or another like service instead of another multi billion dollar transit plan? SDOT taxes are already enough let alone piling this on. What was the cost to paint pretty red "bus only" on the West Seattle Bridge lane that already had signage? Good use of my tax money? Hell no! Millions spent on I 405, with my gas tax, then charge me to drive in the lane. Hell no! A tunnel nowhere near complete. If it ever does get finished how much will it be over budget, and to make it worse, lets put fewer lanes in the tunnel than what are present now. Explain how that improves traffic? I know, lets just raise taxes to an unbelievable amount and then maybe people will not move here, in fact maybe they will move away because it will be to expensive for average wage earners to live here.</p>
<p>NORTH KING COUNTY</p>	<p>Do it faster. Ballard in 25 years is absurd. Do it faster.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I do not support any proposals which place a regressive tax on those who can least afford it - ie. renters, seniors, working families. get the money from the federal government (too bad you passed up these generous funds some years ago, due to the usual short-sightedness in Seattle, as well as the unwillingness to make decisions about infrastructure without the constant input of voters) - or start making companies like, Boeing, Microsoft, Verizon, etc. pay their fare share of taxes for the privilege of using infrastructure in Seattle and doing business here!!!
NORTH KING COUNTY	Start charging for all day parking to help with the cost of garages. Build an underground tunnel from Ballard to UW for light rail. Build more south for the ending point in West Seattle to Burien for light rail. Build light rail all the way to the Tacoma Mall. Focus more on light rail then BRT. Reduce the amount of time for planning, environmental studies, 25 years from now I'll be in my 50's, I would like the timeline reduced by at least 10 years from the farthest projects out.
NORTH KING COUNTY	Ballard and West Seattle should be in Phase 1, to offset the removal of the Seattle viaduct
NORTH KING COUNTY	Fund, build and complete city of Seattle projects first, completing within ten years. Screw the east side.
NORTH KING COUNTY	Cost is too high for home owners, every year more taxes are required. trains to ballard and fremont are needed. Most of this concerns the east side which i rarely need to go to.
NORTH KING COUNTY	Bring online times down as much as possible. Don't underpromise by as much as you are. We need realistic estimates of the absolute fastest online times possible for Seattle to support this. Ballard must be the highest priority followed by West Seattle. Please also study "Metro 8" line to relieve East-West city (Denny) traffic nightmare.
NORTH KING COUNTY	The time frame to construct light rail should be accelerated. 12 years to 22 years as described above is not acceptable considering the rapid population growth in this region.
NORTH KING COUNTY	None of these projects show any kind of statements about how they're going to ease congestion. Are the buses going to use different exits? Are more roads going to be made bus only? This is a survey that says nothing about how it will help, just that it will look more messed up than the London Underground, will take a long time to build, and will rely on the taxes of people who are less likely to use it. Meanwhile, it is a gamble if I can find parking near my residence because people who take the bus already drive to the stop near me, park there, and bus in to avoid paying parking fees downtown.
NORTH KING COUNTY	Thank you for planning this! Sound Transit has improved my quality of life in West Seattle. We are down to one car and only commute in it three times per week. The rest of the time we use Rapid Ride and Link to get to work. Yay transit!
NORTH KING COUNTY	Is there a gas tax increase intended for financing ST3 project ?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I live in NE Seattle. All the bus routes to downtown have been eliminated. The funneling of buses to the UW station is extremely inconvenient, the trip takes much longer, and there is no place at the station to drop off potential riders ( I can't take a bus to the rail station carrying suitcases, walk the two blocks from the bus stop to the station, then transfer to the train to go to the airport. Forget it!). Routing suggestions from Metro have suggested that if I want a bus to downtown, I need to walk one mile, much of it down a steep hill, to catch a bus -- I used to walk two blocks on a flat street to a bus stop that took me downtown. The elimination of bus routes has been far too early in the process. I simply cannot support poor planning and disregard for a large section of the city.
NORTH KING COUNTY	My only complaint is that we needed this system built 5 years ago. Time is the issue. We are building a good system but it needs to happen faster. Rainier valley was built to meet the needs of the future residents and in order to keep attracting people to the south end where we can still build affordable housing we also need to build in easy access to stations. There are only a few ways in and out of the valley. Busses are slower and less predictable and are subject to traffic and weather. Build the little projects faster like graham street station first. They are no brained that can connect people to more resources like schools and an Asian market temple. If overall ride time is a concern and a reason for delaying the Graham street station then schedule trains to only stop at every other station. When one train is at Othello Station the one in front of it is at Graham Street Station. Each train runs the length of the line in almost half the time. If a traveler wants to go to the station in between they can just hop off and wait for the following train. They might add a few minutes to their ride but everyone else gets downtown or to the UW in less time.
NORTH KING COUNTY	Get/keep transit out of traffic. Trains are great, busses in dedicated lanes are ok. If it's not faster than driving, I won't use it.  Funding for this should not be regressive (not sales tax).
NORTH KING COUNTY	Use a gas tax. Tax all parking lots in the region per parking space, including shopping centers.
NORTH KING COUNTY	Bicycles should not be prioritized in any plans because in this geographical area with its hills and weather the users are a tiny fraction of all commuters. Prioritizing bicycles by City of Seattle, reducing lanes available for motor vehicular traffic by creating unused bicycle only lanes is a dismal failure that has exacerbated the congestion in the city. Bicycles are not ever likely to be a significant part of the solution for most commuters.
NORTH KING COUNTY	I do not support the inclusion of additional sales tax as part of this plan. The total average cost per person is fine.
NORTH KING COUNTY	Sound Transit should take over Metro Transit before extending service. Rail direct nonstop from downtownSeattle to SeaTac airport. If we pay 17.00 dollars a month we should ride FREE.
NORTH KING COUNTY	The Ballard extension of the light rail is the most important as this area expands.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Given the \$50 billion price tag, there is no way that the average resident would only be paying \$200 per year. I am greatly concerned that this region is becoming more and more unaffordable for those of us not making 6 figures and/or are on a fixed income. These transit options leave out families in particular. The cost of owning a car is, by design, becoming less feasible, and families who have to have two working parents in order to afford this area are getting squeezed to oblivion. Do you want families here or not?!? This proposal is beyond frustrating. And your monocular survey only highlights your contempt for working families.
NORTH KING COUNTY	We've lived in our house for 28 years and are retired on a fixed income. While we support light rail as something we have needed for many years, the additional cost of this proposal makes it more difficult to remain in our home. We hope there are tax-mitigating measures for low-income families.
NORTH KING COUNTY	BTW, if all our cars start driving themselves this whole thing might all be for not
NORTH KING COUNTY	Currently 42.7% of my property tax is levees. I will soon be on a fixed income where I will not be able to afford living in this region if it continues these type of increases. Between what is being asked for here and the levees that always pass in Seattle the middle income is being forced to move. Cost of living here is out of control here.
NORTH KING COUNTY	we should do it faster
NORTH KING COUNTY	Timeline for all projects should be shortened, especially those in the region's urban core. Priority should be placed on non-motorized access as opposed to building parking garages.
NORTH KING COUNTY	The time lines for Ballard and West Seattle light rail are so far in the future I likely won't live long enough to use them---too bad
NORTH KING COUNTY	I'm excited about the building of the Shoreline light rail stations, as a Richmond Beach resident!
NORTH KING COUNTY	My concerns are that light rail above ground competes with vehicular traffic and causes other problems. Now that we're in a panic and actually getting mass transit projects underway in earnest, it seems to not address crucial factors. And no, the timeline is not acceptable, but then we've lacked the will to do this sooner. There are many concerns. This is too late and too slow. What about business? Can incentives be developed there to facilitate faster completion times?
NORTH KING COUNTY	The opening of light rail to Husky stadium has resulted in the CUTTING of 5 bus lines that once served my neighborhood (Eastlake). I will vote "no," and urge my neighbors to do do, on all new transit until I see guarantees that fancy new projects will not result in cutting areas which they do not serve.
NORTH KING COUNTY	Until local government can demonstrate common sense and responsibility, I will not support further tax increases.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

<p>NORTH KING COUNTY</p>	<p>Priority should be given to densely populated places, which will significantly increase ridership at the earliest possible time (Ballard and West Seattle). Sound Transit should consider both ridership estimates based on density of people near proposed stations as well as the likelihood that riders who are already close to existing stations will choose to use the train to go to new stations (i.e. nobody is going to the suburbs unless they live in the suburbs, people will gladly take the link from the Space Needle to Ballard even if they don't live in either neighborhood because both places are attractive destinations and centers for housing, entertainment and employment).</p> <p>Taxes for the proposed Link should be focused on businesses instead of housing. Sound Transit should consider a graduated commercial real estate tax, which forces large corporations with significant office space to pay a higher percentage of the tax. Sound transit has failed to prioritize the most exciting destinations for voters (Seattle Center, Ballard, West Seattle). Instead, for political reasons, it has connected far off areas that will serve a lower number of people at a significantly higher cost. Moreover, the taxes are too high and aimed at renters and homeowners who are already struggling to afford living expenses instead of the large corporations like Amazon who benefit most from the system and have the most money to contribute. Therefore, at this point, strong transit advocates like me will vote against this system unless you change (1) the areas you prioritize for the earliest possible connections (Ballard and West Seattle should have priority over Mountlake Terrace because riders, like me, are more likely to actually want/need to go to Ballard or West Seattle for work or other reasons even if they do not live there); (2) the timetable and price you negotiate with potential bidders (is this really the absolute cheapest bidder you could find in the United States and the earliest possible time line? If so, show your work. How many companies competed for this project? How tightly area you managing waste? What penalties will they have to pay if they finish these lines even later than they currently claim they will finish them?) and/or (3) the focus of your funding strategy (i.e. Amazon, Microsoft, and large corporations with heavy operations near the LINK stations in downtown Seattle should contribute more to this project than middle class renters and homeowners who are struggling to make ends meet in an increasingly expensive city. The best way to balance the playing field would be to significantly increase tax funding for commercial real estate).</p>
<p>NORTH KING COUNTY</p>	<p>Why aren't there light rail lines extending through the south end of west Seattle? Service on delridge to white center needs to grow beyond just he 120 bus...</p>
<p>NORTH KING COUNTY</p>	<p>Review and expand current bus lines for connection to the light rail, et. Al.          Consider extending the Ballard #40 bus to Golden Gardens ... almost no cost effect but great advantage to citizens.          Consider a local bus along N. Lake Union by Gas Works Park and the many businesses - this would be minimal cost and great advantage to citizens working in that area and tourists going to Gas Works Park INSTEAD of using a car.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>I would be right glad to pay my share of taxes for these projects. Mass transit desperately needs more support and traction in this region. I would recommend, if it is possible, that payment of these projects should be born mostly from luxury car owners and wealthy people. The taxes going toward these projects ought to be commensurate with socio-economic status and income. In short, rich people should foot most of the bill, not the poor. Thanks.</p>
NORTH KING COUNTY	<p>This is a timeline question. When is the link light rail coming to North 145th street? I really need an estimate of this. I have been told it will come to Northgate in 5 years (on KUOW news), but there is no mention of when it will get to 145th.</p> <p>The word "timeline" is highlighted in blue on the web page describing ST3. When I click on it, I get a blank document. I.e., it opens a page for viewing a .pdf file, but there is no document. Would you please be kind enough to send me the Timeline document to JuliaRobinson14004@Comcast.net.</p> <p>The provisional station at North 130th street in Seattle is a really good idea because it is easier to reach on foot. I live on the West side of I-5, and the hill coming up 145th street is horrific, especially with telephone poles on the sidewalks, etc. 130th and I-5 is a much easier walk, even though it ads about 0.4 miles distance.</p>
NORTH KING COUNTY	<p>Special interests have eviscerated the efficacy of the plan. There is obscene pandering to regional (esp. affluent) riders who want to drive to transit stations and park for free. ST is not in the business of deal making with the suburban minority. If public transit options are limited in suburban neighborhoods, this should remain the case with an understanding that regional transitability and livability critically depends on efficient, compact, and dense transit connections. The long term success of our region is relying on ST to recognize that our current and projected growth is sustainable only through taking advantage of economies of scale: projects must be prioritized according to ridership volume projections. This means Ballrd and West Seattle connections must be 1 and 2. At least Ballard. Building free parking along transit lines out in suburban or semi rural zones is disgraceful. Overall the project tries to look comprehensive and extensive by valuing quantity of projects rather than quality. This is a disastrous way to plan for this absolutely critical and absurdly overdue public transit expansion. The leg. can be persuaded to expand bonding authority, and city councils are likely to bite at the offer to partner with ST to speed up projects favoring those munis. E.g., Seattle would very probably agree to approve a tax to help fund Seattle-focused projects, 10% funding, say, in exchange for beginning those projects immediately or In the next couple of years. This is achievable. ST needs to be bold and innovative. And in this region, such ambitions are actually possible.</p>
NORTH KING COUNTY	<p>Graham station please, it was on the map when I bought my home. Then it mysteriously faded away. This makes me a skeptic of any st3 plan.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I strongly support expansion of public transportation, however, I do not support its funding via property tax increases. The State of Washington must enact a state income tax (at least on high incomes). Property taxes are a regressive means of funding. Increasing property taxes only worsens the affordable housing crisis. It affects both renters and homeowners. As a progressive, I cannot continue to support funding for projects via property tax increases.
NORTH KING COUNTY	1. Projects should prioritize relieving congestion in Seattle first -- including Ballard and West Seattle -- which are the only rapidly growing areas that lack sufficient transit. Both areas need light rails immediately. As currently described in the plan, these are scheduled to come online last. They should be first. 2. Increasing taxes for transit riders and on autos make sense. Increasing taxes on homes does not. Is there a way to increase taxes on commercial real estate without requiring home owners -- in one of the nation's most rapidly increasing home prices -- to also pay more? 3. The rapid bus service throughout the greater Puget Sound region -- including use of shoulders -- is a great idea.
NORTH KING COUNTY	While it is outside of Sound Transit's control, I believe that the proposed funding creates an additional unfair burden on poor and working peoples. Those with the means should be bearing the greatest burden on taxes for mass transit.
NORTH KING COUNTY	I am strongly in favor of plans that help make it safer and easier for cyclists to commute.
NORTH KING COUNTY	Don't raise property taxes!! Old people can't stay in their homes. Mine went up \$2000 last year!
NORTH KING COUNTY	use an income tax rather than continually raising property taxes!!!
NORTH KING COUNTY	some consideration needs to be included for low income and senior home owners and renters. You say "only" \$17.00 per month. If the city/county/state keeps adding "only's. " we will no longer able to pay rent/ taxes/grocery/health care/ etc expenses. Has this been considered or does your authority think we are a blight on the area society?
NORTH KING COUNTY	The existing projects (Sound Transit 1 and 2) have been plagued by massive waste, lack of transparency, and violations of the public trust. In 2010, ST asked for its second expansion package & estimated that the 100+ miles of rail would carry 310,000 passenger trips per day. In 2012, ST estimated it would be HALF that amount - i.e. 164,000 trips per day. No one has been held accountable for misleading the public. (This is also called "lying"). ST is a huge tax drain that could fund other more worth initiatives. Why don't you FIRST finish your existing projects before starting on new ones. That would be prudent.
NORTH KING COUNTY	I do not the proposed funding sources. I believe fair box recovery needs to be set at a minimum of 1/3 of operating cost. Avoid property and vehicle taxes. Consumption taxes are ok, in particular add a tax on Junk Food (sugar tax).
NORTH KING COUNTY	I would like to see transparency and accountability on budgets and spending. Supporting mass transit in general is a yes, the waste of public funds is a big worry for me
NORTH KING COUNTY	We need more east-west options for public transit.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Transportation projects should be built ONLY with transportation taxes. No sales tax or property tax should be included in the funding. Raise the gas tax enough to fund transit and at the same time discourage driving gasoline cars. And make sure light rail goes to Burien Transit Center!
NORTH KING COUNTY	I believe that this st3 plan and all future projects should emphasize BUS RAPID TRANSIT instead of light rail, due to the gigantic expense of light rail compared to express buses. This S53 draft plan in its entirety would be the most expensive transit (taxpayer financed) program in the U.S. history, more expensive than the entire interstate freeway system, or San Francisco BART, and Boston's "big dig." Sound Transit's staff & board repeatedly say that this S53 draft plan WOULD NOT reduce traffic congestion, but state only that it "adjusts to traffic & population growth."
NORTH KING COUNTY	Other ways than those proposed to fund these projects need to be found instead of breaking the backs of the property owners in Seattle.
NORTH KING COUNTY	I worry a little bit about some of the problems the BART system in the bay area is facing (e.g. having a population that's too big to be accommodated by the BART). I wonder if there's ways in which we can safe guard around this, and perhaps the rapid rides are the answer?
NORTH KING COUNTY	We need then faster. Can the Rapid line buses not occure sooner then 8 years from now?
NORTH KING COUNTY	Seattle desperately needs something to help with traffic and improve our infrastructure because it is lacking.
NORTH KING COUNTY	I am very excited about the expansion of public transit options. I will be looking into buying a house in the next few years and this has major implications for where I choose to buy; it is now less crucial that I live so close to work in Seattle and am optimistic that I can find more affordable housing further north and commute without it taking a huge chunk of time and happiness.
NORTH KING COUNTY	I am strongly supportive of the scale and vision of the plan. I would strongly urge you to reconsider the tax structure. Sales tax is THE most regressive tax in our arsenal - and a half penny hike hits poor people, and even middle income folks, hard. Some of these people can't even afford to ride Sound Transit as it stands now. Moreover, sales tax revenue has been declining in our state over the last few decades - and that decline is expected to continue. Loading up on the sales tax is a recipe for a funding shortfall as ST3 moves forward. The worst thing would be to have to come back to voters asking for more taxes down the road. Please consider lowering the sales tax portion of the request to .02 or less.
NORTH KING COUNTY	I commend your foresight in in not providing any local input meetings in the north end. Evidently people who live north of the city do not rate having local meetings. It would also be an addition to show routes and highways such as I 5, 99, 520 to give a better idea as to the locations of the path of the various stations.
NORTH KING COUNTY	Thanks to weirdly revised and deleted bus lines (the 72, to be precise), it's actually more difficult to get to the UW light rail station from NORTH SEATTLE than it was before. I hope this model of "build great light rail stations, but no way to get there by bus without first walking a mile to that bus, and then often not on sidewalks" is not going to be the standard.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Accelerate planning, engineering and construction of light rail elements. Integrate TOD with station build-outs. Charge for parking to manage demand (use 95% occupancy target). Reject pressure for "fill-in" stations like 130th NE.
NORTH KING COUNTY	It seems freakish that we have multiple transit agencies in this region; surely, efficiencies could be realized by merging King County Metro Transit and Sound Transit. Metro already provides much of the staffing and management for ST. Why not make it official, entirely joining both and eliminating duplicative functions, services and staff?  Further, a sales tax is the most regressive of taxes, placing a disproportionate burden on those with the least ability to pay. Consider funding through other, more stable sources, such as an income tax and/or taxes on corporations that will benefit from improved regional mass transit infrastructure.
NORTH KING COUNTY	Quit splitting bus routes (increasing travel times), removing routes (increasing commute times) , and forcing people to ride Lt Rail. I like choices and when it increases the time it takes to get to work is NOT making me support more projects.
NORTH KING COUNTY	The only reason I don't strongly support these plans is that they need to happen on a MUCH FASTER TIMELINE!! This stuff needs to be done within the next 10-15 years with the way that the city is growing. GET IT DONE FASTER PLEASE. I'd be way willing to throw more of my tax dollars at it to get it done faster.
NORTH KING COUNTY	West Seattle needs to be a higher priority since we are locked over here by a bridge. I don't want to wait 17 years for Light Rail
NORTH KING COUNTY	light rail is not useful without parking at the stations. please find a way other than property taxes. we are getting taxed out of seattle.
NORTH KING COUNTY	This is not relevant to your question, but we need a state income tax to help fund these projects!
NORTH KING COUNTY	I work for a nonprofit being displaced by sound transit construction in Bellevue. While I strongly support the expansion of mass transit in our community I have been outraged by the way small nonprofit orgs and other businesses have been treated during this forced displacement relocation. The treatment of organizations such as the Pacific Northwest Ballet School and Eastside Heritage Center is completely unacceptable. Organizations like these provide a great value to King County. The financial compensation and "help" offered by sound transit to these orgs is laughable and would be unacceptable if these were for profit companies.
NORTH KING COUNTY	needs more breakdowns and costs of the tax gouging per project and a least some attempt at explaining of how anyone can claim choo choo train tracks can cost billions
NORTH KING COUNTY	Unless the funding comes from a more balanced way,...user fees.... I am totally opposed. No more taxes from residential property owners and car drivers. The retired are done with your ways.....raise fares, license bikes, raise sales taxes and impose head tax on companies....

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	This is nothing but a hodgepodge of bandaied transportation systems that will solve little. We need a comprehensive metro subway system like other cities, eg. London, Tokyo. Our transportation and road systems are a disgrace and this does nothing to solve that.
NORTH KING COUNTY	<p>You need to make it easier to get around within Seattle as well as help people in the outlying areas get into Seattle. It doesn't help people to take public transportation into the city if they can't get anywhere efficiently without a car once they're here. A light rail to Ballard should not take 22 years to build. Giving the Ballard residence reliable public transportation to get downtown to their jobs will help lighten traffic and make it easier for those who are still driving in from outlying areas to get from point a to b. The order of the projects should be put in reverse order. You have to start in the center and work your way out, not the other way around.</p> <p>I also don't see a lot in the plan that will help people trying to go east/west within the city. Currently Mercer, Denny and many of the east/west main arteries of the city are complete gridlock during rush hour. Going north/south, tends to be easier, but still very congested.</p>
NORTH KING COUNTY	Long [explicit] overdue.
NORTH KING COUNTY	Funding for these projects have been provided by taxes for decades now. It is absolutely unacceptable that we are only now, two decades and change after I first voted for light rail, beginning to see real progress on this matter. Where have the decades worth of taxes already paid for this gone? I understand, certainly, that some level of pre-planning and such is required, but the lack of progress for the amount already spent creates a significant concern that ST is capable of responsibly spending the public's money.
NORTH KING COUNTY	Obviously the South East part of the county has been greatly ignored.
NORTH KING COUNTY	Must have a sunset clause in any tax proposal that's put on ballot.
NORTH KING COUNTY	Consideration should be given to the speed with which projects can be implemented - perhaps by exploring delivering certain projects by way of a P3 project or other form of alternative procurement
NORTH KING COUNTY	it shouldn't be solely the property owners that need to pay for the improvements. It should be a tax on those who currently are use or plan on using the said systems. Or a percentage based fee on the miles car owners drive.
NORTH KING COUNTY	Yay for more public transport! \$200 more per year cost but huge time, gas and stress savings.
NORTH KING COUNTY	Timelines for these transit improvements are way too long. Why is this?
NORTH KING COUNTY	I'm very concerned about increasing sales tax another .5%. This is a regressive approach that unfairly affects the poorest members of our community.
NORTH KING COUNTY	The second tunnel through downtown is costly both in terms of money and time. The use of the convention place station to build light rail north needs consideration. This is a large space currently owned by transit partners that could be used to launch TBM machines north to Seattle center and Ballard, while having an existing connection with the current light rail line.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Project like this just need to happen. Be committed to; and completed. It's a good start. Go for it and implement. It will never be a good time but it will always become an even worse time down the line.
NORTH KING COUNTY	Whatever projects happen, I think the most important thing is accessibility for the riders, which means if they need to take a bus in order to get to a light rail, one form of payment (orca card OR cash) should be in place, so bus transfers should be able to be used for the light rail, or paying for the light rail should be able to transfer to buses. It doesn't make sense to me that you may have to pay twice, especially since add I the light rail has decreased some bus lines' availability. For example, with the addition of the U-link, the 73 no longer runs to downtown Seattle.
NORTH KING COUNTY	When asking about the cost per resident per year can you add in the duration. 8 years? 25 years?
NORTH KING COUNTY	The cost to residents should be a percentage. There are a lot of people in Seattle/Nw living in poverty who rely on public transportation as well as wealthy individuals. A person who makes 24K a year will be more impacted by the cost then someone who makes 100K.
NORTH KING COUNTY	West Seattle desperately needs more access to/from the area. It is a safety issue having only the two bridges to/from West Seattle from the north end.
NORTH KING COUNTY	Light rail train in desperately needed to/from West Seattle! I am hesitant to take a job at the UW, for the sole reason of the horrendous traffic from West Seattle. Seattle's horrible traffic hurts our economy. Please speed up the 17 year plan for West Seattle!
NORTH KING COUNTY	In the time frame of the plans, the population of people over 65 who want to get around will skyrocket. Therefore, along with safe bike and pedestrian access to the new transit stations, there will be a need for frequent, reliable buses running short routes getting people to the transit station.  By the way, I have been a frequent bus commuter most of my life, until bus routes changed in my area. They have changed back to being good, due to the changes made for the UW light rail station (Metro 373) and I like riding again.
NORTH KING COUNTY	WE NEED MORE LIGHT RAIL!!!!
NORTH KING COUNTY	Anything to increase ease of transit from West Seattle to DT would be great. Right now the Rapid C line is useful for a handful of citizens. Other routes are strictly during commute hours. Even then, it is impossible to take a route without a transfer to Belltown.
NORTH KING COUNTY	The BRT system doesn't do enough to eliminate the insane crowding on the busses. The BRT routes are often delayed and for those of us at the end of the line (who lost routes because of these "faster" routes it actually takes longer because of the long and winding routes the busses take.
NORTH KING COUNTY	Not necessarily feedback, but I'm really excited to see this all in its completion! The new Link station at the UW has honestly changed my life!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	The Puget Sound area's population is increasing and we have limited space for roads because we are surrounded by beautiful bodies of water and mountains. We need to build upwards. Adding bus lanes, routes and new plans is adding to the terrible traffic. Invest in the light rail. Why add more buses to the traffic mess? I personally would rather sit in my own car on I-5 for an hour than on a cramped bus. My choice for dealing with rush hour would be If the light rail flew over the traffic.
NORTH KING COUNTY	I think it's hard for residents to comment on transportation projects that don't affect them. For example, I live and work in Seattle, and I hear about through my work as an urban planner how badly Pierce County needs more public transportation. But I don't know what is important to Pierce County, or to the region. I don't want to be selfish and pick only Seattle projects, so I think your answers will be very skewed.
NORTH KING COUNTY	Riders should bear the full expense of construction and operation of all transit systems.
NORTH KING COUNTY	I like the light rail links out to the suburbs. It's badly needed. Please, no more above ground street cars in Seattle without dedicated lanes.
NORTH KING COUNTY	Seattle residents already approve the Billion dollar transit plan. The other cities that get light rail and will use it need to pay for it.
NORTH KING COUNTY	The more mass transit options, the easier they are to use, the better they connect to each other, and the cheaper the fares are....the better!!
NORTH KING COUNTY	I would like to see first hill street car extended upto 23rd and Jackson. Also need all city roads paved before any other project
NORTH KING COUNTY	What about drop off spaces for travelers to board the light rail at stations to get to the airport.
NORTH KING COUNTY	Can you get Seattle to limit housing density increases and allow park and rides at city light rail stations (possibly as part of high rise urban villages around stations)? I live in West Seattle and commute to Microsoft in Redmond. Can you make the Rapid Ride C the only bus that leaves West Seattle, move it off the Viaduct (WA-99) and have it take the reserved busway through SODO to downtown? Can you add a RapidRide bus stop under the West Seattle Bridge beside the park and ride? Can you make circulator buses in West Seattle? We used to have a 51 bus to get to and from the Junction, which is otherwise a 20-minute walk with some killer hills.
NORTH KING COUNTY	An income tax should support public transportation and this should all happen much much faster, prioritizing with a train transit/commuter rail system like one that exists in Switzerland or Japan.
NORTH KING COUNTY	This plan is wildly unambitious. The timelines are ludicrously overblown and conservative. 22 years? You're putting a high ridership line from Ballard to Downtown after a low ridership line and not grade separated? The Ballard line would carry the entire population of Bellevue daily. This line needs a dedicated tunnel and an expedited build. The Downtown tunnel is unnecessary and a waste.  Please include EIS for Ballard to UW/Ballard to Lake City, The Metro 8 line and W Seattle to Burien.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	The Seattle DOT seems to want to play a zero-sum game. Take away resources (money, lanes, etc.) from existing congested roads and dedicate bus only lanes or worse put bikes on the road when there is no safe way for traffic to move at existing speeds. This is not acceptable in any other country, except where the use justifies it, and here it does not. Places that are closed to vehicles have sufficient foot and peddle usage to justify it. Example 1: there are wide access bike paths on Duwamish head, and yet bikes are also placed on a road where no cars can get by (divided highways that are one lane, have both bike marks on the road and a ample bike / pedestrian path along side the road.
NORTH KING COUNTY	Already there is nowhere to park at the UW light rail station, which has been a huge inconvenience and reason for me to not take it regularly.
NORTH KING COUNTY	I would like to see these projects funded through a gas tax, motor vehicle tax, or another form of transportation-related tax. I especially am against using the sales tax and somewhat against using the property tax. I would also be open/supportive of an income tax for this. But in the end, people who use their cars should be paying for this transit so that the roads can be open / usable to non-commuters. Commuters should be using public transit and I hope the committee is strongly using research on commuter routes to prioritize here.
NORTH KING COUNTY	How about a new plan that considers what the people actually want instead of what you think they want. How about taxing the businesses that are bringing the record population growth. How about stop monopolizing public transit. How about clearly communicating your expectations for riders and making it easy to use transit instead of acting pretentious about it.
NORTH KING COUNTY	I am all for increased public transportation services, but I don't believe removing lanes of traffic and committing them to be Bus Lanes is an appropriate strategy. That only makes things MUCH worse in the several years leading up to the end goal of a better public transportation program. Please consider this factor in your urban planning.
NORTH KING COUNTY	We need the 185th Street light rail station in Shoreline. That station is needed to serve residents in central and north Shoreline, Edmonds, and Lake Forest Park. Building it would reduce traffic to the (already heavily congested) 145th Street Light Rail station. Currently the bus situation along north 15th is confusing and ridiculous.
NORTH KING COUNTY	Please deal with the homeless issue in the Seattle area before ST3.
NORTH KING COUNTY	Some projects need to be added and some projects need to be removed.
NORTH KING COUNTY	22 years to Ballard! that is ridiculous. get going already!!!
NORTH KING COUNTY	Prioritize the projects to bring it in at lower cost. Have more flexibility to adapt projects based on what actually happens with people movement over the next 25 years!
NORTH KING COUNTY	If this passes I will be taxed out of my home of 20 years. People should pay for their own ride, as I shall pay for my own one way ticket out of here.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Our buslines are becoming too focused on meeting the needs of business people. We are shutting down lines from 9 a.m. to 3 p.m., removing affordable transit to our elderly, shift workers, ailing, and poor. Neighborhoods become black holes with no public transit available during weekends and evenings after 6 p.m. Something as simple as going to a movie, grocery shopping, even getting to events in other neighborhoods or downtown become too expensive (taxi, Ubers) or too problematical. Stop cherry picking your riders and meet the citizen's needs.
NORTH KING COUNTY	If there is any way to make the cost of the ST3 plan less regressive, to reduce the greater impact on lower incomes, that would be ideal.
NORTH KING COUNTY	<p>You should make this entire package smaller and complete a few of the smaller shorter projects within shorter timelines so that taxpayers can see the result in their lifetime and so that there is accountability for the use of our tax dollars within the current Sound Transit Administration. I don't feel right about paying taxes to Sound Transit for the next 20 years when the Sound Transit Administration might go through 3 rounds of personnel changes during that time.</p> <p>Corporations should contribute money for these transportation projects. Corporations benefit directly from any transportation infrastructure that they can sell to prospective employees by showing them how little time they will spend in their commutes. All other cities in Washington charge fees which can be used on projects like this - lets use that money and tell voters how much Corporations will contribute and how much homeowner taxes will be reduced by using the fees and Corporate taxes to pay for transportation capital projects.</p>
NORTH KING COUNTY	Can you make it happen faster?
NORTH KING COUNTY	Support for this measure will be diminished by its heavy reliance on property taxes. We can't afford more and more big property tax increases. Use ST3 as impetus for widespread tax reform to stop regressive taxes and increase equity.
NORTH KING COUNTY	Most of my driving takes place within the Seattle city limits and I am increasingly frustrated by the amount of traffic on the roadways. So, while I don't have specific comments about each proposal, I feel it is absolutely essential that we develop solid mass transit plans NOW. Waiting will only increase these ongoing traffic snarls. I come from Boston where I ALWAYS road the T (subway). Since coming to Seattle 10 years ago I can almost count on 2 hands how many times i've taken the bus. That's just sad. Make it happen, people! :-)
NORTH KING COUNTY	We need to do this NOW!
NORTH KING COUNTY	Thank you!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

<p>NORTH KING COUNTY</p>	<p>Where does one even begin on the total mess that is ST3? First, the timelines are COMPLETELY unacceptable. The region needed the proposed transit 10 years ago, not 25 years from now. I'm just a renter that doesn't plan on staying in Ballard but I can tell you that Ballard absolutely cannot wait for light rail. The D line is a complete joke with way too many stops (it should NOT be routed through Queen Anne and needs dedicated lanes) that makes it take way too long to get downtown. I will part from most Seattle voters and say that I fully support parking at stations throughout the region. Ideally people would support higher density areas around the stations, but people living in the suburbs aren't going to move to townhouses and apartments. It would be better to have free/low cost parking that people will use for transit rather than drive. Commuter trains need to run a lot more often. Anyone who has been to Asia or Europe knows that our transit system is a complete and total joke. The cost is staggering (who's pockets are getting lined with all of this tax payer money?) and the timelines are so long that the system will be outdated before it is even completed. Oh, and a daily capacity of only 500,000 people? How much is the region expected to grow over the next 25 years? This is not enough, not by a long shot. If you want transit supported, you need to make a system that people will use before they're dead, and won't take away all of the taxing authority for the region. Shoot higher for the system, get it done sooner, and be more efficient with your costs. Learn a lesson from the rest of the world and stop wasting our time and money.</p>
<p>NORTH KING COUNTY</p>	<p>Ballard-UW line is very important, Ballard/West Seattle lines should be completed first and foremost because they have the highest ridership opportunity, and any at-grade options should be eliminated completely. At grade is never worth the cost savings. In addition, the rest of Sodo, the industrial district, Georgetown/Boeing field, Southpark and Tukwila should be considered as another line addition, with a possible future extension to Southcenter and beyond.</p>
<p>NORTH KING COUNTY</p>	<p>The light rail stations near to the Downtown Seattle core should not have parking lots; areas that are further away and less supported by transit need them.</p>
<p>NORTH KING COUNTY</p>	<p>Decisions and policies should prioritize developing in a way that is equitable for communities. Transit-oriented development and investment is critical and far behind the growth curve. But we have to invest in a way that allows current residents to benefit. Preventing displacement and supporting communities of color should be explicitly addressed and included in community engagement processes. The fact that the issue of equity is absent from your survey is a problem. Transportation planning is about moving people, not machines.</p>
<p>NORTH KING COUNTY</p>	<p>Increased coverage and affordability of public transit would greatly improve the quality of life and resident retention of Seattle. My carpool of 3 would be more open to using transit to commute from West Seattle to Bellevue if it were more cost effective.</p> <p>TOD is the most important part of ST3, as it paves a path for many of the other projects mentioned and for future projects.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	No Access to West Seattle that makes surface streets into west seattle bridge off ramps through residential neighborhoods 24hrs a day at high rates of speed as is in work for Fairview neighborhood now. This is a residential neighborhood not a transit center. No more public tax money for mass transit that doesn't go anywhere you need to be or east-west in western Washington. Stop wasting money with endless reviews, studies and votes that never achieve anything.
NORTH KING COUNTY	Current and future projects: Transfers from busses should apply to use onto a light rail line.
NORTH KING COUNTY	It is frustrating to pay for a system which will not be helpful to my personal transport needs. Past performance of transit in area is not encouraging (slow, unreliable, not arriving/departing at major employers at business start/stop times). I lived in Boston for years without a car and public transit was wonderful. I don't see that happening here, no matter how much money we spend.
NORTH KING COUNTY	For funding these very expensive, lengthy projects consider partnering with big businesses in the area, especially because these link stations will service several Boeing locations, Microsoft campus in Redmond and offices in Bellevue, and Amazon in South Lake Union.
NORTH KING COUNTY	Seattle / King county has almost NEVER met both budget or time requirements on their transit projects . Their idea is to get the people to vote for a project within a time frame and within a budget, BUT they are almost never met either. Both Seattle & King County idea of meeting both goals is to just revise the costs and completion date and after that was done brag how both goals were met, NEVER explaining how they meet these goals was by revising both cost and completion dates. Also these projected projects have an open ended date for completion and cost. Who in their right mind would vote for any proposed project with no guaranteed completion date or guaranteed cost when we see how poorly their performance has been on current voter approved transit and road projects. Example Seattle tunnel project BIG over budget screw up's !
NORTH KING COUNTY	I would strongly support as long as a closer look is done at the timeline. Transit to the Everett area needs to happen much faster than the next 40 years!
NORTH KING COUNTY	I am from Boston where the electric train system has a 100 years on us. The tunnels, tracks, and "bones" of those stations are still used today. This is the most important investment in this region even if tens of billions of dollars are needed. I am a political conservative moderate and I fully support this spending so long as no income tax is implemented. My commute from North Creek Park Bothell to Downtown Seattle on a Thursday evening can take as long as 100 min. This is only 23 miles tops- this is crazy for a metro area of only 3.7 million. Boston is 4.6 million and it is much easier to get around both by car or rail. Also, giant parking garages are a must at outer suburban stations to encourage use of trains. Parking should be cheap too.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Better bus service has been promised for decades, but has never been realized. Enormous spending on rail uses an unacceptable degree of the available public capital for minimal traffic movement. The use of localized shuttle buses to connect to express buses would get world class transit to so many more neighborhoods that are now under served, would not destroy more middle class homes for rail lines, would handle many more riders everyday, and thus would allow more people to leave the car behind more often. This could happen rapidly. Families need cars to get to schools, sports, appointments,etc.
NORTH KING COUNTY	The whole program is not responsive to our needs now and in the future. It is based an outdated "Vision 2040" which does not currently include any allowances for new technology that will Improved roadway safety by 80% starting now, and up to 35% by 2035. Driverless cars do to need park and rides! (2022) Current PR capacity could be increased today by contracting with Uber and others. Follow the lead of USDOT for timelines (Driverless vehicles common in 2025 in urban areas) Also: does not directly address congestion, climate change goals. Most importantly address these items at public meeting with real answers! Suggest you delay the ST3 until at least 2020. I will give you and your staff time to catchup with the industry and the public. Bring WSDOT along with you.
NORTH KING COUNTY	I hope that if the project/s go through that there is help for low income residents to be able to use the system.
NORTH KING COUNTY	Put stops in in busy areas. The U of W stop could have been on 15th and Pacific or 45th where there are sidewalks and buses to move people in all directions. The stop was placed near the stadiums for events and the hospital. To catch a bus northbound you have to walk to the middle of campus or to U Village. The Roosevelt stop was well thought out. I love forward to it. I am also happy to see things moving ahead of schedule. WELL DONE! Light rail like Portland running east-west in Seattle would be great.
NORTH KING COUNTY	I will always be in favor of developing more rail transit.
NORTH KING COUNTY	West Seattle light rail and enhanced bus service should be a priority. Segregated bike and pedestrian lanes to encourage more use free of fear of traffic.
NORTH KING COUNTY	Why are we funding this at the expense of the people who need to use it to survive only? Why has a Head Tax on Businesses and/or increasing the commercial parking tax been excluded? What is being done to help 40k, or less, a year earners with 20k, or more, Student Loan debt afford these tax increases? What about 20k or less earners? What about earners with 100k or more Student Loan debt? What is being done to prevent out-of-control rent from being increased by Landlords to pay for the property tax increase? What are you doing to make sure \$17 per a person per a month doesn't turn into a 48% bus pass price hike by employers and a 500% rent increase by Landlords?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	As someone who likes and uses light rail as I age (now 64) I see it will become more and more challenging to get to the station because of the approximate 1/2 mile distance with hills to a station for me. I am also about 1/4 mile from any bus line. I would be great if there were some way to have better access for neighbors not so close to light rail.
NORTH KING COUNTY	Minimal service provided to and from W. Seattle, and only to downtown. No projects bypass downtown to other locations. Downtown is too dangerous to be stuck waiting there.
NORTH KING COUNTY	It's very important to me that ST3 enable more people to live independently of car ownership. This requires not only good pedestrian and bike access to stations, but strong connecting bus service in nearby communities, including good off-peak and weekend service.
NORTH KING COUNTY	If you take the money, deliver what you say you will.
NORTH KING COUNTY	Rush underground link to Ballard. Least connected part of city currently.
NORTH KING COUNTY	Light rail station locations need to be much more comprehensively coordinated with car parking at stations, much better integration of Metro bus lines serving stations (more frequent service), and accommodation for transit-oriented development with much higher densities than currently allowed under Seattle zoning designations.
NORTH KING COUNTY	I think the timeframe and cost of the proposal should be less, to see if Sound Transit can actually do all that they are proposing. ST still hasn't completed all the projects we are paying for in ST2. A 10 year proposal that isn't double the current cost, that maybe doesn't give every jurisdiction what they want, but moves toward the long range plan would be better.
NORTH KING COUNTY	Anything to make it happen faster. The region messed up a long time ago in not pushing for mass transit and now we are dealing with the consequences today. I just spent 1 hour to go 8 miles via buses.
NORTH KING COUNTY	I'd pay more to see this happen faster, and I congratulate you on the depth of thought and long-term vision evident in the plan.
NORTH KING COUNTY	Please do not tax property owners. As it is close to 50% of taxes are voter approved. And it is unfair that most of these voters are not property owners.  There should be a fair system of taxation.
NORTH KING COUNTY	The city council is overwhelming the levy's put on our property tax causing financial stress especially to young and elder families. Find a different way to get the money - Municipal bond sales. Most of these projects are promoted by ignorant people who just guess how much it will cost and provide for tax payers. They keep saying the average price house in Seattle and now those houses have tripled in value because of our tech boom so these projected costs for families would more likely be tripled or more. Shame on most of you - I'm planning on voting against my councilman Johnson who supported this without first checking with his voters and citizens in his district - again shame, shame!
NORTH KING COUNTY	PLEASE do not ad a station at 130th - either MOVE the 145th station OR do NOT build the 130th station.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>I am a strong believer in less is more and think the focus on shunting people to and from work on fixed transit is short sighted, expensive and doomed to failure (remember the trolley tracks that were pulled up which we are now laying down again?). Mass transit doesn't mean massive. Smaller buses, jitney services, on and off ability, more frequent service with smaller capacity is better than articulated buses that run so infrequently. Want me to take transit to work, fine, but figure out how I can jump on the bus/train/tram and 1. pick up the dry cleaning 2. stop at the market 3. grab the kid from the sitter 4. make it home when I leave work. If you focus on the point A to point Z you are never going to get the majority of us to hop on because we can't make transit work for us. With our geography, running everything in and out of downtown is nuts. I can walk to work- 3miles, faster than I can take a bus (it requires 2 buses and if I hit it right- it takes 22 minutes, wrong and it takes 45) .Why not have a morning and evening university-madrona-leschi-mt baker run? Why not have shorter routes and more frequent buses. I know it costs more because you have to have drivers. Great- helps unemployment at the same time. So I am not at all in love with these massive &gt;decade long projects. PS_ I ride my bike to work from Madrona to Capital Hill, sometimes putting it on the bus, to the University, and to the Montlake station every friday where I put my bike on a bus and commute to the eastside and back for work. My partner drives to the University because of the poor bus connections as noted. Were we still a household with young children, my remarks would still stand. If you can't get working mothers/fathers through their errands, you won't get them out of their cars.</p>
NORTH KING COUNTY	<p>The funding for this project is totally unacceptable. No sales or property tax increase. Fund the expansion 100% by taxing Boeing, Microsoft, Starbucks, Amazon, Adobe, Google and other large corporations. I will never vote for a play that makes working people pay. Never!</p>
NORTH KING COUNTY	<p>Consider bringing back some of the bus routes that were cancelled due to the light-rail line expansion in the meantime. I work at a hospital on Cap Hill and as there are an older populous of folks living on the former 10 routes that frequent our facility we've seen an increase on them having to taxi in which is more expensive than an ORCA pass because these patients are unable to walk over due to health concerns. Cutting off certain routes has cut off access of care and mobility to folks who need it and you should strongly consider re-opening these routes or you may find votes for future projects not as forthcoming from these members of the community. Thank you for your time.</p>
NORTH KING COUNTY	<p>We in the PNW are already behind the "eight ball". It's time to catch up with expanding cities everywhere and build a world class public transit service.</p>
NORTH KING COUNTY	<p>Please make sure that Ballard-Downtown is grade-separated at all points!</p>
NORTH KING COUNTY	<p>light rail is the place the tri-county should focus on.  bus lines are fine the way they are at present.  remember you turned down the federal money years back and it went to ATLANTA. SHOULD have taken it then. Would not be in this mess now &amp; way ahead of the curve!!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>25 years are you kidding. Raise the taxes now and get this show on the road - or make Jeff Bezos pay for some of this since it is his company that brought so many people here which made the traffic ridiculous. Otherwise every one else will leave this city and it will be like the factory towns of China - one city filled with Amazon employees only. I also have very mixed feelings about supporting all this light rail planning since I have tried to use the light rail and it is seriously flawed. I would never recommend it to a tourist - it is far too confusing. While on the rail from Seatac the signage was awful and the security cop guy was very rude when we asked questions. The signage on the rail was even worse - there was one scroll sign that said the stops as we got to them and for some totally bizarre reason there was one that said the final destination but without any indication that it was the final and not the one we were at. At one point that sign said "University of Washington Station" and the other two said "University Station" how incredibly confusing even for someone who lives here. Another thing I can't understand is why in the world you don't have a sustainable way to take tickets. The way it is set up now is just asking for people to take advantage and not pay. We kind of need people to actually pay for this stuff don't you think!? Why in the world didn't you just do what NYC does? Or Atlanta. I am all for paying my share of taxes to help this transportation nightmare we have going in this city but it is hard to get behind things that are so flawed. It is also hard to approve when we are talking about more than two decades before things will actually get better. I am not kidding when I say people are going to leave. The ones that are leaving are the ones with some shred of character and it is depressing to think of what this city will be like by the time this plan completes.</p>
NORTH KING COUNTY	<p>wish that transit to and from west Seattle would become a higher priority, especially with the possible annexation of white center.</p>

NORTH KING COUNTY	<p>Very disappointed to see that the most dense areas with the highest potential ridership numbers are not going to receive anything from ST3 for 17 and 22 years. As indicated by the recent Seattle Times editorial most suburbanites are predisposed to be skeptical of expensive mass transit systems like the one to Everett, so they shouldn't be counted upon to approve this measure in November. Residents of urban Seattle, on the other hand, have been asking for these extensions for a LONG time. Making them wait another 17 years to get these lines risks losing Seattle votes which ST3 will be heavily dependent upon to pass.</p> <p>I would like to see ST3 prioritize the Ballard and West Seattle lines with the highest potential ridership first, and then focus on building the central spine to Everett and Tacoma.</p> <p>In addition, I'm generally skeptical of the very long light rail lines like the eventual ones from Tacoma to Seattle and Everett to Seattle. Most suburb to suburb commuters will be likely to drive since their destinations will likely not be within walking distance of a station, and suburb to downtown commuters will be impatient with slow moving lines making many stops along the way. It seems these commuters would be better served by expanded commuter rail or express buses. If we are committed to building long light rail lines like this we should consider building 3 track lines with the capability to run express trains.</p>
-------------------	--

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

<p>NORTH KING COUNTY</p>	<p><b>BUS CONNECTIONS:</b> My major concern with the new transit plan in Seattle is getting to the light rail stations from outlying areas within the city.</p> <p>For example, I live in northeast Seattle (98115) and my friend lives in northwest Seattle (98177). These areas are underserved by Metro. Neither of us has access to a bus that would take us directly to the stations. Instead, we have to transfer buses which adds a considerable amount of time to the commute and we find this very discouraging. In the time it takes to get there by bus from our neighborhoods, we can be downtown by car in half the time.</p> <p>So if you want to encourage more people to use the trains, you'll have to make it easier for people who live in outlying areas to get there. This would mean adding more direct bus routes from these areas to the stations (in particular the UW station). Otherwise, Seattle Metro should reinstate bus service from underserved neighborhoods to downtown Seattle (many bus routes were eliminated due to Prop 1).</p> <p><b>PARKING AT STATIONS:</b> I don't think having parking lots at stations is the answer to getting more people to ride Light Rail. However, you could have a pick up and drop off area at the stations (like at the airport) so people can get lifts to the station from areas that are underserved by the buses.</p> <p><b>PAYING FOR THE COST:</b> Can't we get more creative about funding these projects instead of continually raising sales and property taxes? What about the tax revenue from marijuana sales, or adding taxes at the gas pump since we're trying to discourage people from driving???</p> <p>I'm all for better transportation but there has to be a better way to pay for it.</p>
<p>NORTH KING COUNTY</p>	<p>Focus on Seattle light rail IN the city. Reliable commuter buses already exist and the majority of people outside Seattle have cars. I used to drive and take a commuter bus from Lynnwood, but in the city I am desperate for reliable public transportation. The buses here aren't practical or reliable. Getting from my home to Ballard is an ordeal and it's hardly more than a few miles. Seattle NEEDS public transportation urgently and it needs to be affordable and accommodating to people with low incomes and bikes.</p>
<p>NORTH KING COUNTY</p>	<p>Would be willing to pay 2 to 6x what is being asked if it would SIGNIFICANTLY accelerate the program.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	In general, I would be happy to pay taxes for this above and beyond what has been described above, especially if that means it could happen faster than the glacial timelines currently outlined. These are necessary collective infrastructural investments that, given the unique demographic and topographical attributes of the metro area as now emerging, will be vital to the continued vitality and sustainability of the region. I would love to see the conversation shift to include much more than how much this is going to cost taxpayers, but actually also (and more importantly!) how much different degrees of infrastructural investment are likely to save/benefit the average Puget resident in terms of reclaimed time, regained productivity, quality of life and increased sociability (not being in a car but being in a space where one can read/relax/interact with other humans), and shifting of the burden of risks (whether in the form of private liabilities, increasing commute times, all manner of environmental impacts and disruptions, and other social costs) from individuals to broader collectives. These are the things that it seems will be needed to prepare for and thrive in the near future, and the sooner agencies like yourself start to SHAPE that discourse rather than presuming to be merely polling and reacting to the clearly insufficient discourses that currently do exist around these things in this region, the better.
NORTH KING COUNTY	The link train do not always run on time and 107 and 106 do not sync with the train. A pedestrian overpass needs to be put in at Rainier Beach Station.
NORTH KING COUNTY	Accessible and extensive public transportation is key to a successful city structure. Please make it so!
NORTH KING COUNTY	Need quicker ways to get from NE Seattle to UW Station. Routing through campus takes too long.
NORTH KING COUNTY	I think 22-25 years is too long to wait given how bad traffic is currently and the number of new residents to Seattle
NORTH KING COUNTY	Thank you for supporting mass transit options for everyone! I do not own a car and am excited at the possibility to continue living in Seattle without one for the rest of my time in this beautiful city!
NORTH KING COUNTY	need more everything. common!!!!!!!!!!!!
NORTH KING COUNTY	Make it easier for people to pay for riding light rail and make it harder for them to avoid paying. I highly support light rail and its expansion, but it won't be a sustainable transit option if Sound Transit doesn't collect the fees it is due.
NORTH KING COUNTY	I think it is important that light rail move faster, perhaps at the expense of bus improvements. Also, developing transit options to Bellevue should take a back seat to projects related to Seattle's urban core, and linking Seattle to West Coast cities via a faster train than Amtrak (Vancouver, Bellingham, Olympia, Portland, beyond?) Bellevue is a place with a car culture, and doesn't have the sort of dense urban population that will take full advantage of public transportation (whereas Seattle has enthusiastic urbanists). Maybe Bellevue transportation expansion could come at the end of the timeline. Also, room for bicycles on transit -- including cargo cycles for families -- is important.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>It isn't clear how this will be funded. I see the projected amount, but is this more property taxes, sales tax, gas tax? If it is property tax, then I would mark strongly oppose.</p> <p>I am still puzzled as to why a line down the middle of I-5 is never considered. It is a proven route, has park and ride lots nearby, and no property needs to be condemned. I am confident the engineering can be done. After that, THEN look at spurs going out to different areas. Thanks.</p>
NORTH KING COUNTY	<p>West Seattle to Downtown: A LANE dedicated to Transit, from West Seattle all the way across The Bridge and to the Downtown Core. AND/OR Timed and Metro-responsive LIGHTS to allow buses the right-of-way in situations of merging/crossing traffic. There is currently no incentive not to drive. Waiting 17 years for the only plan that may benefit West Seattle certainly doesn't help...</p>
NORTH KING COUNTY	<p>The plan should be more geared towards people who will actually ride public transportation. The target places are not the type of people who will adopt ridership though they are the people congesting the ride for everyone else.</p>
NORTH KING COUNTY	<p>How about a regional tax on cars Or fuel</p>
NORTH KING COUNTY	<p>We retirees in King County who have been in our homes 30-40 years are being priced out of our homes by transit-funding, sky-rocketing property taxes. We do not mind funding schools and emergency services, but we're not the only ones who use the transit systems and we should not be the only ones funding it. Find another revenue source, PLEASE!!!</p>
NORTH KING COUNTY	<p>These changes should be made in addition to current transit (i.e. bus) options, not instead of.</p>
NORTH KING COUNTY	<p>Can it be accomplished sooner than 25 years? It seems that Seattle is running behind in transit oriented development.</p>
NORTH KING COUNTY	<p>Don't delay. We need these now.</p>
NORTH KING COUNTY	<p>Currently, I have to take four Metro King County buses to get SAFELY from where I live to my doctors at PacMed at 1101 Madison: Bus 345 from Four Freedoms House to the Northgate Transit Center; Bus 41 from there to the International District station; Bus 36 from there to South Weller Street and 12 Ave South; and Bus 60 from there to 1101 Madison Street. This takes up a huge amount of time, and I have to leave as much as 3 hours early to get there on time. Bus 12 used to go from a stop on Pine Street in front of the escalators down to the Metro tunnel all the way to Boren and Madison -- 1101 Madison, requiring that I only needed to take Bus 345 to Northgate, Bus 41 to the Westlake Center, and Bus 12 from there to my doctors. Why can't you restored that service? It was safe, convenient, and didn't take too much time? I am handicapped and must use a walker, so I can't catch Bus 12 at Marion and 3rd Avenue, which requires a walk down a steep hill with no handrails or anything else to hold onto to keep from falling -- a VERY dangerous matter. And even then, I'd have to take Bus 36 from 3rd and Pine down to Marion, requiring 4 buses to get there. PLEASE fix this!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

<p>NORTH KING COUNTY</p>	<p>Figure out other ways to fund all this. Make corporations pay their share. Destroy their ability to put offices in other countries that tax them at lower rates.</p> <p>Share the burden. But keep highways in good repair for people who use them. Promote electric cars.</p>
<p>NORTH KING COUNTY</p>	<p>I think it's preposterous that you want to collect such a broad swath of taxes from us for EIGHT YEARS before delivering any meaningful results. We've already voted for two (much smaller) tax levies to fund mass transit and the delivery against that has been tepid at best. Most improvements to date have felt more like a shuffling of deck chairs, not adding meaningful capacity or convenient, reliable service to additional neighborhoods beyond the Central/UW light rail. I fully support a better regional transit network, but your track record with what you've been collecting has been wholly disappointing, and the last two levies I've voted for aren't delivering on what was promised. If those were your audition for more funds, I perish the thought of how you'll piddle away a nest egg 50x that size without delivering real results. I'm sick of being late to work because chronically overcrowded C Lines blow past my stop in West Seattle when you won't add capacity to keep up with exploding population growth in major urban villages. We need help yesterday, not in eight years. "Buy into our vision when we haven't delivered on the last two paychecks" is a tough sell for me, no matter how much I agree with what the end result should look like. You. Need. To. Do. More. Now.</p> <p>And while I'm at it, you really should look at funding more of this through taxing corporations and developers who create the density problems that have led to our current problems. Reaching into Joe Taxpayer's pocket doesn't have to always be the solution to every problem, yet here we are for the third time in three years. Tax permits to turn a SFH on a half acre lot into 6 row houses or a 60 unit apodment building. Tax permits to build another Amazon, Microsoft, or Kemper Freeman skyscraper where there was once single story retail. Corporations and billionaire investors from China can afford this a hell of a lot better than I can, and you better believe it's their property values and bank accounts that will keep growing while my rent checks keep increasing.</p>
<p>NORTH KING COUNTY</p>	<p>I take the 120, 125, 55 &amp; C line buses and get on at the last stops in West Seattle. About once a week a bus drives by because it is too full. Usually I end up standing and some days I even have to push my way onto the bus. Is there any way that the Vashon Express or 21 Express can stop at the last West Seattle stop for the C line if there are people waiting and those buses are not full themselves (which they never are)? I understand they are express lines, but it is frustrating to see a bus go by a stop with many people waiting when there are empty seats available. I should mention I usually get on the buses between 7:15am &amp; 8:00am.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>This state is restricting its growth by failure to adopt an income tax. The current system is regressive and places too much burden on people that can least afford it. If we are not willing to pay for transit services in a planned and predictable manner we shouldn't waste our time an money on studies.</p> <p>I will have passed away by the time people see any improvement in transit in my area.</p>
NORTH KING COUNTY	<p>METRO 8 LIGHT RAIL LINE          BALLARD TO UW LIGHT RAIL LINE          LESS PROJECTS IN AREAS THAT DON'T NEED LIGHT RAIL AS FAST (ISSAQUAH/EVERETT). FOCUS MORE ON THE CENTRAL AREAS LIKE SEATTLE AND BELLEVUE.          ADDITIONALLY, BALLARD AND WEST SEATTLE ARE THE MOST IMPORTANT BECAUSE THEY ARE THE MOST DENSE. THEY SHOULD BE COMPLETED FIRST TO SERVE THE EVER-GROWING POPULATION OF SEATTLE.</p>
NORTH KING COUNTY	<p>Bus transportation and light rail should be increased around college campus's (such as SU, SPU, UW, Bellevue College) and near low income/reasonable housing. There is a housing crisis at more and more colleges such as SU, SPU, and UW. Therefore, students are being pushed off campus as colleges accept more and more students and have a limited amount of campus housing.</p> <p>I am Seattle University's Commuter Representative and I would love to collaborate with Sound Transit so that we can make public transit more student friendly. SU's Student Government and myself can also try to get more commuter students to contribute their feedback by taking this survey and attending meetings! Please feel free to reach out to me at <a href="mailto:sgsucommuterrep@seattleu.edu">sgsucommuterrep@seattleu.edu</a> or 425-444-8165. Thank you!</p>
NORTH KING COUNTY	<p>Connect Olympia!</p>
NORTH KING COUNTY	<p>Your last page on the survey is way too complicated to understand. The walls of text in questions 12 and 13 are extremely complicated and hard to read. These two questions are going to be skimmed by most people and answered based on incomplete understanding. I'm a UW graduate and had a hard time reading/understanding those two questions. Do better survey design please.</p>
NORTH KING COUNTY	<p>I do not feel that the sales tax should be adjusted, even to help pay for ST3 which I adore. Five-tenths of one percent is a teeny amount of money, however, the sales tax structure in WA already disproportionately affects people with lower incomes - the very people who cannot afford to live in the city, who could benefit greatly from Light Rail or other transit programs connecting them to city-located jobs and services.</p> <p>I wish I could have prioritized more than two options above, but please make priorities of the Ballard-downtown line, parking and development around stations, the 130th and Graham street stations, and other infrastructure designed to get people to light rail stations or transit hubs. It only works if people can use it easily. THANK YOU and GOOD LUCK!</p>
NORTH KING COUNTY	<p>Please make the Ballard line happen before I retire.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I understand that this all costs money and I am willing to pay my fairshare of taxes. I object to the additional burden of real estate taxes. Every governmental agency seems to look for funding thru increased R. E. taxes. Homeowners are not the only people who use or benefit from enhanced transit systems. What better, more fair ways can you suggest for funding?
NORTH KING COUNTY	<p>This hodge-podge of Rail, light rail and bus shows Rube Goldberg planning is alive and well. Seattle/King/Snohomish and Pierce counties need to come up with a cohesive plan more similar to BART in the San Francisco Bay area. It could be High speed Light Rail or even a bus system similar to Curitiba in Brazil, where wait times are typically less than 5 minutes and as little as 90 seconds.</p> <p>Much less than a systematic planned system will most likely fail, and will be modified enormously such that the Sound Transit plan plan will likely never be completed anyway.</p> <p>A cohesive system appear to be will be expensive; but comparatively cheaper (inflation adjusted) than major cities building their integrated Transport Systems such as Boston, New York, London, Paris etc. In the long run, notwithstanding complaints about cost, it will pay for itself over a 25-50 year period of time. In the end, the Hodge-Pdge Puget Sound system will end up costing more in lack of functionality and frustration.</p>
NORTH KING COUNTY	While I think light rail is great, to me, Seattle needs to come up with ways to help those that live in Seattle get around, and not just those commuting from outside of Seattle into the city. Right now, I can't take public transit because there are no options to go from where I live to where I need to go.
NORTH KING COUNTY	My main concern is funding a "Transit System for the 21st Century" using a 19th century tax scheme. Basing car tab fees on per \$1,000 "value" is like a property tax. Can I deduct that from my taxes just like I can on a piece of real estate? The tax should instead be based on gross vehicle weight and miles driven, both of which are available from the Washington State DOL. I don't see any reason why municipalities can't coordinate with state agencies to accomplish this.
NORTH KING COUNTY	please just don't [explicit] this up for all of us.
NORTH KING COUNTY	It was very difficult choosing only two options for question 11. Had I been allowed to choose five or six options I feel that I could have provided a more meaningful response. Re: question 14, I am assuming that the average cost is \$200 per year per household, not per individual person. I indicated strong support based on that assumption.
NORTH KING COUNTY	<ol style="list-style-type: none"> <li>1. Total timeline should be cut in half</li> <li>2. Prioritize grade separated light rail over any bus solutions.</li> </ol>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>I strongly support ST3 and I believe the metropolitan Seattle area needs massive investment in transit, infrastructure, and jobs.</p> <p>I do not support subsidizing the suburbs. Suburbs promote sprawl, destroy the environment, and encourage dependency on cars. We shouldn't build light rail on floating bridges. We should sink the floating bridges. Instead of enabling suburban sprawl, ST 3 should curtail it by restricting all mass transit improvements to Seattle only.</p>
NORTH KING COUNTY	<p>Project plans are too long. Getting buy-in for a project that is up to 25 years out will face opposition in itself. People cannot realize the benefits of a project that takes 25 years. People don't know where they will be in 25 years. Many of us will be retired in 25 years. I'll be 72 years old! I don't feel this plan will ever catch up with the growth of Seattle and King County.</p>
NORTH KING COUNTY	<p>Projects need more corporate funding.</p>
NORTH KING COUNTY	<p>I voted for the extension of light rail to Capitol Hill and the University. However, I had no idea that the Route 43 bus line would be removed in response. Unfortunately transit service for my area of Capitol Hill between 12th Ave E and 20th Ave E is now much worse than it was before. I used to be able to catch a Route 43 bus with frequent service at a stop close to my home, and exit the bus in the University District close to my final destination. Now I have to use either 2 buses, or 2 buses and a train, to make the same trip. Please restore Route 43 service. It is a vital component of transit for my neighborhood. I would not vote again for more light rail transit that comes at the expense of convenient bus service.</p>
NORTH KING COUNTY	<p>Just do it! Awesome, we need so much more transit here, and I'm happy to pay taxes for it to make it happen. Focus on getting it done on schedule and within budget.</p>
NORTH KING COUNTY	<p>you asked to choose just 2 of the many st3 projects, but this is too exclusionary of all of the projects and doesn't inform on the whole system</p> <p>also you need to find ways to speed up the overall delivery of the whole system</p> <p>examples would be early BRT and ST express routes and frequencies</p>
NORTH KING COUNTY	<p>Don't increase property taxes</p>
NORTH KING COUNTY	<p>My primary mode of transportation is bicycle. Please, whenever rail is put down, consider safety of cyclists in how and where it is laid.</p>
NORTH KING COUNTY	<p>Get people working on this asap! 22 years and I'll be retired! If there's appetite, get it done now!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<ol style="list-style-type: none"> <li>1. I would prioritize inter-city rail projects to help relieve congestion on arterial roads.</li> <li>2. Rail is superior as buses get stuck in traffic.</li> <li>3. Shorten the timeline (and costs) by looking at more surface or elevated routes through Downtown/out to Ballard and Northgate. It's not like Leary way or Sand Point way is pretty to look at now. I work near the Tukwila (unfortunately there aren't any stops within a couple of miles of there or I'd give up my car) line and it's actually cool to watch the trains go by and they aren't that loud.</li> <li>4. Find allies with people who want to change Washington's regressive tax structure. Homeowners are eventually going to get tired of seeing more increases in their property taxes.</li> <li>5. Go Light Rail! I love your new stations and can't wait for more!</li> </ol>
NORTH KING COUNTY	<p>My west Seattle neighborhood is completely ignored other than a "study". I cannot tell you how much I want to vote against paying an additional \$200 per year so I can maybe ride a study to work in 17 years. My love of transit and my hope that someday we could have transit reliable enough to use daily on 35th averse keeps me feeling like I will vote for it, but the reality is that I probably will vote against taxing myself for nothing but a study.</p> <p>When I go to Alaska junction I drive because there is no bus to take me there.</p> <p>Why would I use light rail in west Seattle when I have to drive to it? Makes no sense. Though I can see how it would be convenient for those who live within walking or short bus ride from the junction.</p> <p>I tried using the 21 for a year in 2014 and would've lost my job had I continued to any more. I had to go back to driving so I could be a more reliable employee. I realize that's KC metro, but it's all the same system, and it stinks in West Seattle.</p> <p>Show more of a commitment than a spur and a study and a greater sense of urgency that 15 years and you'll easily get my vote, and more.</p>
NORTH KING COUNTY	<p>I am supportive of all increases in transit infrastructure and would pay more as a home owner. What about expediting these plans so it isn't 2040 before the project is done? In 10 years, we will likely need a new plan.</p>
NORTH KING COUNTY	<p>Find a way to speed up the schedule. This is too long to wait.</p>
NORTH KING COUNTY	<p>Excited about this, but are you thinking big enough, and how do you expect car sharing and autonomous vehicles to impact needs? I may sound crazy, but this is a 25 year plan and I'd expect to see rapid adoption of ev and autonomous tech in that amount of time</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	My bus service in the North End has recently suffered massive cuts with four of my six routes being completely eliminated and another being drastically cut. I have always voted yes on ST before but I can no longer support a system whose expansion is making my commute so miserable. I am encouraging everyone to vote NO until my service is restored.
NORTH KING COUNTY	Didn't like use of "across Puget Sound" in this survey. I think you meant "across the Puget Sound region." Say that, otherwise it sounds like you're crossing the water.
NORTH KING COUNTY	Your plan is crap! Time line is too long. I will only vote if light rail in Seattle is prioritized and is done sooner. Why were elevated lines not considered? "Regionalism" is stupid. I don't care about the republicans and rednecks in the suburbs. They chose to live in complete gridlock. Let them suffer for it. Seattle first or I vote "no". If you spend one single dollar on parking I will vote "no". Park and rides only encourage sprawl and the destruction of farm land. Sprawl will keep happening but it should not be publicly subsidized. I REPEAT IF YOU HAVE ONE SINGLE DOLLAR ALLOCATED TO PARKING I WILL VOTE "NO". Let data on ridership be your guide for prioritization of lines, not politics. Your efforts to appease the suburban idiots will fail.
NORTH KING COUNTY	link from Seattle to Bellevue should be the number one focus
NORTH KING COUNTY	I think the schedule should be expediated. 8 -25 yrs,out is too long. Put more money in upfront to get it done. It only gets more expensive.
NORTH KING COUNTY	Make rich people pay for this.
NORTH KING COUNTY	Extend current light rail service hours to 3am to allow after hours bar patrons to take affordable public transit to go home, rather than using taxi or risk driving home.
NORTH KING COUNTY	seattle is getting too expensive for homeowners in the middle class. I'm already thinking of leaving seattle because I cannot afford a real state taxes. Therefore I strongly oppose this unless you can the pay for some other way.
NORTH KING COUNTY	Please highly consider the accessibility of our lower-income neighbors and students who need the ease of public transportation to surpass barriers.
NORTH KING COUNTY	FROM [name] IS NOT HIRE AS NO GOVERNOR TO SOUND TRANSIT 3 IN SEATTLE, KING COUNTY, DOWNTOWN, WASHINGTON STATE IN UNITED STATES OF AMERICA ON GLOBAL EARTH.NO GRANTS,NO MONEY,NO PAPERS CHECKS, END OF INVESTIGATION,CLOSE CASE. I'AM JUST CUSTOMER.
NORTH KING COUNTY	I live in Broadview. It's REALLY hard for me to support this plan without the 130th St station. Why should I spend so much money for people who live in other neighborhoods when it guarantees that I'll be dead and buried before my neighborhood gets anything?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	More Express Buses to from Seattle to Everett and Everett to Seattle. Don't need to stop at Lynnwood or Ash Way.
NORTH KING COUNTY	West Seattle and Ballard should be given higher priority!
NORTH KING COUNTY	There should be bus routes from Delridge and Alaska junction that go directly to light rail stations until light rail is built in West Seattle
NORTH KING COUNTY	There should be an express bus or train all day to and from Edmonds
NORTH KING COUNTY	This project is a decade behind the growth of the entire metro area. You can't get it done fast enough.
NORTH KING COUNTY	I would like to know how much of the cost will be shared by the many wealthy, thriving corporations in the Puget Sound area. Are residents alone footing the bill for these transit improvements? How can I find out this information?
NORTH KING COUNTY	Build this system faster. Light rail to Ballard is needed now; not in 22 years. I'd be willing to pay a lot more to get light rail built much sooner.
NORTH KING COUNTY	There needs to be more - and more sooner - for Seattle before I will support this plan. I am 53 years old and live close to Ballard. Under the current plan, I'll be 75 before I can board light rail anywhere close to where I live. That's far too long to wait - FAR too long! Light rail to Ballard and West Seattle should be the top priority. 22 years from now, the line to Ballard should have been extended to Northgate (and potentially Lake City), and the line to West Seattle should have been extended to Burien (at a minimum). And we need a Ballard to UW line with at least a preliminary plan to extend that line across Lake Washington. This plan serves the suburbs at the expense of the city. I cannot support your plan as is.
NORTH KING COUNTY	If not already allowed or if even feasible, work with car share companies (Car2Go) and TNC companies like Uber and Lyft to create a parking or transportation options to and from major stops for the transportation network. There could be spaces or drop off locations suggested for Car2Gos to be parked near light rail stations or fares that TNCs offer for transportation to the closest park and ride or light rail stop.
NORTH KING COUNTY	The timeline outlined in question 12 is way too slow. We need a faster completion of all of these projects to meet Seattle's needs.
NORTH KING COUNTY	<ul style="list-style-type: none"> <li>- Please consider taxing drivers more than home owners to acquire funds</li> <li>- Please consider adding express times to lightrail schedule from downtown to airport</li> <li>- Please consider adding shuttles from lightrail stations to common neighborhood locations (e.g. University lightrail to Children's Hospital or Metropolitan Market parking lot, or Cap Hill station to 12th, 15th and 19th Ave neighborhood "hubs")</li> <li>- Please consider partnering with bike program to have bike-share stations at light rail station locations</li> </ul>
NORTH KING COUNTY	I am most concerned about all the new systems not operating together smoothly, as we see now with the buses and the rail stations. It should be easier to access and to bike between stations.
NORTH KING COUNTY	Timeline matters. Speed it up if possible.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Find a funding source that is not incredibly regressive please. This state already has the most regressive tax structure in the nation and your proposal makes it worse. This work has to get done; Seattle is decades behind where it should be in transit infrastructure. Making it more expensive for low-income people to live in the region is not the right way to fund it.
NORTH KING COUNTY	I am very concerned about the cost of the program and the fact that it again is using sales tax as a funding mechanism, which is a very regressive tax. I'd raise the motor vehicle excise tax and cut the sales tax. Also, as a Seattle resident, I'm getting tapped out on property tax increases. I'm also concerned the the projects will take so long to construct. I think the need is great, but this proposal doesn't prioritize the projects very well. I would cut back on the scope and focus on lower cost projects and ones that have a shorter time horizon.
NORTH KING COUNTY	I don't support a transit system that requires hiring drivers.  I don't support fixed rail transit.
NORTH KING COUNTY	Expedite all plans ! 25 years is far too slow ! Fully invest your efforts to reward the masses that are needing this
NORTH KING COUNTY	Prioritize west seattle and Ballard. Ensure west Seattle light rail reaches Fauntleroy ferry terminal.
NORTH KING COUNTY	you are lying that this will cost \$200 per resident per year. 2.8 million residents X \$200 = \$560 million per year. That's not \$50 billion over 25 years.
NORTH KING COUNTY	Our tax structure is regressive and funding ought to be coming from a state income tax rather than sales tax and property tax.
NORTH KING COUNTY	tarjeta
NORTH KING COUNTY	I will not vote for any plan while there are two different bus systems that don't work together, and while it costs so much to use your services.
NORTH KING COUNTY	just get on with it - this is embarrassing
NORTH KING COUNTY	You have not shown any interest in improving access to light rail for those folks living near Sand Point Way in the Northeast part of Seattle. I am personally more interested in improving MASS transit...NOT bike traffic- within Seattle. I realize you have plans for Ballard, West Seattle and Graham Ave. But it seems you have totally forgotten my part of the city and I'm interested in that.
NORTH KING COUNTY	Parking and drop off are an essential part that appear to have been neglected.
NORTH KING COUNTY	Tax adjustments should be made available for those who fall under a certain income bracket.
NORTH KING COUNTY	With rapidly increasing density in Seattle neighborhoods it is imperative to provide transit in the city or traffic will reach critical mass.
NORTH KING COUNTY	I own rental properties plus my own home. My rents are low and already property taxes consume 1/4 of the rent. I would like to see the plan cut back somewhat so the tax burden is not so high. In addition I own three vehicles, two of which I rarely drive. Obviously the cost to me will be far greater than \$200. I would strongly support a somewhat less onerous plan.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	There needs to be lots of parking in order for people to use the transit without lots of parking available there is a problem in the surrounding neighborhoods as homeowner want to be able to get in and out of their driveways or a least park in front of their homes and also with garbage pickup it becomes an issue for that to be picked up as people come into those areas to park and then walk to the transit area
NORTH KING COUNTY	Scrap this whole [explicit] of nonsense.
NORTH KING COUNTY	We need park and ride parking and improved/increased bus routes on 522 to UW Seattle NOW, not decades from now.
NORTH KING COUNTY	Park and Ride on SR 522 must be added before anything else.
NORTH KING COUNTY	Build as much link support as you can
NORTH KING COUNTY	It would be nice if NE Seattle got some attention out of this plan.  Sales taxes are regressive, but I know it's hard to find other funding models in this state.  I don't like funding things with car tab fees--I own several vehicles even though I don't drive very much (I'm an auto enthusiast, but mostly commute via bike or bus), so I end up paying a lot more than a typical person in my situation would. At least the MVET fees are more progressive than the awful TBD fee that Seattle implemented.  Do not put any more light rail on surface streets--bury it or elevate it, but we're going to regret that decision in South Seattle for years to come.  In general ST seems to be doing a good job with transportation projects--keep it up!
NORTH KING COUNTY	Ballard to downtown should come first
NORTH KING COUNTY	It's time to push for income taxes in this state. I would strongly support this plan, but ST3 calls for a sales and property taxes boost. These fees are already forcing median income people out of Western Washington. These are the same people you'd be building transit for. <b>INCOME TAX NOW!</b>
NORTH KING COUNTY	After being the only major city in the country without light rail/mass transit, we have finally started to begin to catch up. We have a long ways to go, but it is finally happening. Thank you!
NORTH KING COUNTY	I strongly support these plans but am disappointed to hear how long it will take to complete the West Seattle and Everett projects.
NORTH KING COUNTY	Homeowners in Seattle are being priced out of their homes they own due to the cost of increased real estate taxes for EVERYTHING. Find other mechanisms to fund that more fairly spreads the tax burden to all citizens.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I used to live in Denver, CO for 10 years and I think they also have a good transit system which Seattle should check out for comparative study.
NORTH KING COUNTY	Please do not run the light rail at-grade through downtown. It will be constantly late.  Please also add more subway coverage within the city.
NORTH KING COUNTY	Sooner the better
NORTH KING COUNTY	The Vashon ferry traffic and the sluggishness over the west seattle bridge plus the unreliability of buses that connect to the C rapid line in west seattle makes it the most under-served neighborhood in the city. We need to focus on easy transport between neighborhoods w/in the city and not easier ways to get people in the suburbs in and out.
NORTH KING COUNTY	Faster timeline for Seattle light rail
NORTH KING COUNTY	The fast growing north Seattle communities are underserved with public transportation. A station at 130th street in 2023 is critical to the future growth of Broadview, Bitter Lake, Haller Lake, Pinehurst, and Lake City.
NORTH KING COUNTY	Please keep light rail focused on Seattle, Bellevue, and Tacoma. Provide the suburbs with rapid ride/express busses with exclusive right of way when needed and where possible.  Long trips take far too long, mostly because of too many stops. Both on rail and on express and rapid ride routes. Keep rail stops spread out and treat rail stations as transit hubs.
NORTH KING COUNTY	You should have thought about transit in the 50's or 60. Now it is just a mess. The Seattle Department of transportations motto ought to be ..... "if it is working well, let us know. We can completely [explicit] it up." Take the intersection at 24th and Market. What idiot, who has never driven or lived in Ballard, dreamed up that one? You have managed to back up traffic for miles, in all directions, with that brilliant redo. What a bunch of idiots. Our mayor belongs right there with them. Let him ride on the organ donor bike paths.
NORTH KING COUNTY	<ul style="list-style-type: none"> <li>• Thank you, Sound Transit, for listening and including the SR 522/523 corridor in the final plan;</li> <li>• BRT opens up the promise of light rail access to the north Lake Washington communities;</li> <li>• The parking garages are extremely important elements of access by our community to this transit corridor;</li> <li>• The sidewalks will, for the first time, open up safe access to this transit corridor for our citizens;</li> <li>• The early construction schedule is a win/win for the communities and Sound Transit, as it coincides with the opening of the North LINK light rail stations</li> </ul>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Continuing to rely on regressive sales tax levies to support any state funded items is not a good long term plan. It hurts the people whom many of the services in the plan are designed to support. The state must come up with a better, more reliable way of paying for projects. While I support the continued expansion of trains and light rail, additional buses are tough to swallow. The roads that many of the buses use all the time are not built for them, they are being destroyed. Additionally, on certain roads, you might as well be riding the bus if you get caught behind one. No where to pass or get around them. This leads to dangerous situations where Seattle drivers come up with many creative ways to get around them. My point is that you can't just put more buses on the roads, planning and adjustments to said roads must be part of the planning.
NORTH KING COUNTY	Your egos are costing us valuable family time and our children s future. Your system is only used for commute and homeless entertainment. Traffic only moves as fast as the bus as you have eliminated bus exits to pick up one or two riders. The system is not safe for persons to use open drug dealing and predatory persons trying to lure kids using the system to go to school off the bus. The drivers don't want to have conflict and fear for their lives. Persons looking for an opportunity are free to make it unsafe for the old and weak. Your system makes traffic flow worse and it is a dream that the sheepeople will all use if peacefully and orderly. You have robbed existing lines of traffic to cheaply support your dream. You have forced a few on the system and given away free ridership to bump up your user numbers. The system is costing valuable work time and taxes (sales/other consumption) as the public waits behind the nearly empty transportation device.
NORTH KING COUNTY	I don't have sufficient knowledge to comment on many of the specifics, but safe, reliable access to transit in the corridor from Woodinville to Seattle through Kenmore, Lake Forest Park and Shoreline is critical. This includes rapid bus transit, and also secure safe park/ride lots and pedestrian access to bus stops.
NORTH KING COUNTY	Please do all you can to remedy congestion in Highway 52022nd. It is a nightmare!
NORTH KING COUNTY	After poor judgement with Seattle's big dig, the poor results with the states money grab and increased congestion by trying to monetize (supplement tax revenue), and the clear disinterest by citizens for using light rail (with little exception), the motives for these projects are questionable and the financial forecasting seems suspect.
NORTH KING COUNTY	Why does it have to take so long? I'd happily pay \$100+/month if it was all done in 10 years!
NORTH KING COUNTY	We need the 130th Street station!
NORTH KING COUNTY	We can't wait 20 years to fix our transportation mess. The solutions have to be implemented faster.
NORTH KING COUNTY	Why are we not charging all the developers and corporations for theses expansions. They are the ones bringing people and reaping the rewards.
NORTH KING COUNTY	Light rail to major industrial areas such as Paine field need to be a priority over Ballard areas which serve a limited population. And don't forget Mountlake Terrace.
NORTH KING COUNTY	For the most part, the plan won't reach me or help me get around. Hopefully it will be of use to others in its surrounding area.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	The 130th station seems superfluous with the N-gate and 145th stations there as well. Prioritizing an East side train seems logical, as well as a Ballard spur, but I also think people in Ballard and West Seattle chose to live in places that are not easily accessed and am not sure how much of a priority it is to those communities. I would like to see the Light Rail out of traffic down South (MLK) for easier, faster, more reliable service to Seatac. This seems like a major destination for ALL of Seattle and rather than spend money on additional stations, etc., we should make sure our existing service is top notch.
NORTH KING COUNTY	There must be some way for people to park cars in order to utilize the rapid transit systems. You are putting the carts in front of the horses when those of us in the suburbs have no way to get to the rapid transit w/o taking our car there first.
NORTH KING COUNTY	You've forgotten South Park.
NORTH KING COUNTY	Build a rial system on I-405 from Lynnwood to Renton to connect with airport system
NORTH KING COUNTY	<p>ST3 planned cost ("approximately \$200/yr or \$17/mo") is very misleading and greatly underestimates the actual cost because of current and anticipated property assessments, vehicle assessed values and inevitable ST3 cost overruns spanning the life of the project. Other counties should be sharing in the cost since residents in those counties (especially commuters to/ from the Island counties will share in the benefits of this program). While more transit is needed, the cost of ST3 when added to King County property tax assessments and current and projected levies is overwhelming. Seattle residents, having just approved a 9 year, \$930 million Move Seattle levy (with no visible improvement in our rotten and crumbling streets), will soon be asked to approve a \$290 million levy for HALA and now ST3 is asking for \$50 Billion. As a result, King County taxpayers are being swamped with levies which currently comprise 42.70% of our property tax bill.</p> <p>ST3 will only exacerbate this dramatic increase in property taxes. And it will go on for 25 years. The project is too costly and will take much too long to complete (why can the Chinese and Japanese build comparable systems much faster and much cheaper??). Additional counties should be included in funding this project as should major businesses like Boeing, Amazon, Microsoft etc since their businesses and employees will be huge benefactors of the project. This website provides little information about the cost of the project (no cost breakdowns are included such as administrative costs, profit margins for contractors, right of way purchase amounts, cost overrun estimates, etc.) and a viable reason why it will take so long to build.</p>
NORTH KING COUNTY	We need a graduated income tax to support this. Then I would be strongly supportive. Also we need to do more sooner and the best way to accomplish this would be through income tax. Most unfortunately the people of our state don't currently understand this.
NORTH KING COUNTY	<p>I would be much more supportive if the north end, (Shoreline) was given more attention. I commute to SODO for work and would be so happy to take time efficient transit. I would also be thrilled to take light rail downtown.</p> <p>I know all of this takes time, but the timelines are too long.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I live in Seattle and only travel within Seattle because I cannot afford a car and the options for traveling outside of Seattle via transit are horrible. It is possible that adding light rail to all these places outside Seattle in for example Burien would cause me to know or care about Burien, but at present I have no opinion. I hope there are people who can intelligently prioritize these projects for greatest commuter impact, because I am not that person. I would be willing to support these projects that affect me in no way if someone laid out a compelling argument that people would use them and it would have a positive affect on the system as a whole. But given my current position, the idea of waiting 22 years to sort out a proper transit plan in Seattle itself while sending rail to suburbs where people have to have cars and seem unlikely to stop contributing to the SOV problem seems backwards.
NORTH KING COUNTY	Don't tax homeowners and car owners both as it is a double hit for many. Rail is preferable to bus increases. Perhaps BRT can be short term while rail projects are completed. Why such long wait? Build simultaneously out of question?
NORTH KING COUNTY	People use light-rails. Building the infrastructure for light rails will create lasting use of a system that expedites transportation across Seattle. BRT is more cost effective and will take fewer changes to the current infrastructure, but it won't fundamentally change the way people see transportation in seattle. People will still continue to drive because there is a stigma that goes along with a bus of any kind. Additionally, I am strongly for the construction of light rails across Seattle, however, we need to find a way to reduce the time to value people will see or it will be difficult to get a population to vote for it. Altruists will vote for the plan because it will be good for the community and will not effect them much financially. However, a larger percent of the population would vote for a more costly but faster construction of the infrastructure because they believe they would actually get to use it. It is hard for people to see 25 years into the future.
NORTH KING COUNTY	I would love to see a commitment to creating affordable housing in any transit-oriented development plan.
NORTH KING COUNTY	As a 65 yr old retiree with no children, I do not want to be taxed for services that will I will never use. Whenever a new project for anything - education, homeless, tunnels etc, is considered, it is the homeowner who bears the cost. Not fair.
NORTH KING COUNTY	Cut all funding! Cars Rule!
NORTH KING COUNTY	Please do not build more parking lots. Let's envision enough transit so that we are able to ditch the cars all together!
NORTH KING COUNTY	Make high traffic routes that already have mass transit toll ways!
NORTH KING COUNTY	Do it faster, even if it costs more! This will not keep up with population concerns. Why does the plan take so long?
NORTH KING COUNTY	Way, way too slow. Seattle is miles behind major cities. Add a damned income tax and get this done before everyone taking the survey is retired. Also, light rail between East and West sides is critical -- why was 520 rebuilt without this capacity?
NORTH KING COUNTY	Make it possible for 24 hour public transportation access to Seatac Airport.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	In order to make our transit system more efficient, bus drivers need to encourage people to exit through the rear of the bus. This is the norm in every other city with public transit, and really facilitates the flow of traffic. My commute time would be 20% shorter if this practices was encouraged and enforced.
NORTH KING COUNTY	Expedia moving to the Amgen building puts strong pressure on the Ballard to downtown corridor.
NORTH KING COUNTY	This project shouldn't be funded with sales tax.
NORTH KING COUNTY	Get rid of all buses and bicycles and our traffic would move faster. They are a waste of our m9ney.
NORTH KING COUNTY	BEFORE WE MAKE ANY NEW PLANS, FINISH THE ALASKAN WAY VIADUCT PROJECT!!!!
NORTH KING COUNTY	The Survey seems to not ask the question that should are on the table like if Elliott Ave to Ballard will be blow grade or not. This appears to be narrowly drafted to give Sound Transit a narrow range of result.s
NORTH KING COUNTY	Why so long to Ballard!!!! How can we support densification without transit??? Please Ballard sooner, or we will collapse under the weight of our condos!!!
NORTH KING COUNTY	Please do everything in your power to keep the cost for senior citizens as low as possible. I know we all have to shoulder some of this cost, but seniors really need to not bear too much of this cost. Thank you.
NORTH KING COUNTY	West Seattle and Ballard light rail should be prioritized.
NORTH KING COUNTY	Project does nothing to improve transit in the downtown corridor. People will still need their car once they get off the train, precluding them from getting on the train in the first place. One corridor through one part of the city is not sufficient to be the trunk of a system that needs to convince commuters that they will not need a car once they are downtown. Sounder rail improvements and city loops connected to the sounder terminals would save money and vastly improve accessibility once commuters arrive downtown.
NORTH KING COUNTY	A few things. I agree that the traffic sucks in Puget Sound area, but cost of living is SOOOOOOOOO high, that you have LOCAL people who are becoming homeless, yet this proposal to add more taxes, raise the prices of basic necessities to build a system that might NEVER stop needing MORE money is the solution to the problem? How about IN ADDITION to asking for this proposal and more money, is to building temporary work housing areas for the homeless people who want to be employed.... then employ them to build these proposed commuter changes (like FDR did with the great depression...), and fix the infrastructure, homelessness, and lack of housing/parking/affordable housing issues. THEN ask me if I want to pay more money for you to make traffic worse with more construction. All of these issues aren't separate, they can be linked by using the workforce without jobs or homes to build the services and infrastructure issues that are in need of updating. There's a homeless problem (give them housing if they agree to work), there's infrastructure issues like traffic and updating the roads/rails that are in place already, to include the water ways, sewers, and gas lines(use those homeless people who want a job and place to live), and then use the money you're asking for to pay the homeless/fix the infrastructure/improve this awesome city from an expensive and falling apart Gotham. The issues aren't separate, they can be linked, but it will require someone to get off their ass from asking for money and create these programs, and also keep from incarcerating the down-trodden.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I don't support your terrible tax increase with no accountability, which falls in line with everything "sound transit" has ever done.  Build some damn roads and get back to me.
NORTH KING COUNTY	Why is everything taking forever to build and tons of money. To Everett in 20 years is such a joke. It shouldn't tak that long.
NORTH KING COUNTY	The timeline is too long. Focus on the key projects, particularly light rail to Ballard and West Seattle, and get them built in 10 years or less.
NORTH KING COUNTY	Love the light rail. Keep up the great work
NORTH KING COUNTY	Hurry Up!!!! We are in a traffic crisis we do not have 22 years to wait!
NORTH KING COUNTY	I need more information.
NORTH KING COUNTY	This area is way overdue for more mass transit!
NORTH KING COUNTY	Need much more bus or rail service on SR 522 corridor It is very congested
NORTH KING COUNTY	Provision of parking at transit access stations is crucial. The commute becomes too long if patrons need to rely on public transit to arrive at mass transit stations.
NORTH KING COUNTY	Need more help for people of limited mobility
NORTH KING COUNTY	Build incentives to businesses to use public transportation. Carpooling doesn't work much in that regard.
NORTH KING COUNTY	Ballard line should a a number one priority due to rapid population growth. Also, why is the E-Line left out of improvements. It is terribly underserved and is over capacity at all time where the D-Line really is. This decision smells a bit of race and classism. The E-Line serves mostly low income passengers, so, it shouldn't be surprising that line gets nothing in this plan.
NORTH KING COUNTY	will Bus rapid transit on SR 522/523 connecting to Light Rail improve travel time from locations along 522 corridor to downtown compared to current bus line 522? Why not just convert line 522 to bus rapid transit to downtown with dedicated transit lanes?
NORTH KING COUNTY	Your survey is extremely poorly designed!!! Q12 is a perfect example --you have no idea whatsoever why I oppose it, what about it I oppose... go back to the drawing board and figure out how to do a survey BECAUSE THEY'RE IMPORTANT!
NORTH KING COUNTY	great job so far. very impressed. thank you
NORTH KING COUNTY	I would strongly support state income tax on individuals making more than \$250000 per year. I feel there are individuals in our area that may not be able to pay the additional \$17 per month for these projects. I realize that overhauling the state income tax is a thorny proposition but we have to do away with the severely regressive tax structure in our state.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

<p>NORTH KING COUNTY</p>	<p>This plan is outdated. It only looks at work commuters needs. The region needs underground rail service to most anywhere one wants to go. Manhattan, Paris, these cities get people out of their cars. You can go underground and even if it is raining, windy and cold you have a great system to get you out of your car, out of the weather and to where you need to be. There needs to be east and west running systems and even systems to replace the ferries (undersea). I strongly opposed because this is taking foolishly to long. All this should have been done in 1980. And needs to be done right away. The costs of freeways are more expensive than the cost of future rail systems. The cost of medical from pollution would probably save the region the cost of the build outs. And the savings in time of a reliable transit system that is on time would increase the standard of living in the region. By the proposed end date there will probably be an alternate form of transportation making this whole project obsolete before it is finished. And it will not be finished in time for me to enjoy it. I am moving from Seattle just because of how stupid Seattle is on transportation. As I age I want to be able to go out at night, feel safe, and not have to drive, yet get to where ever I want reliably and quickly. With the current Metro system I would not even consider using it. Too sluggish, gets stuck in game traffic due to some idiot who thought clogging sodo with stadiums was a good idea, and just plain unpleasant. It takes too long to get anywhere by bus. PERIOD. The model given needs way more east to west/west to east routes and smaller routes within neighborhoods as well. Look at D.C. commuter lines mixed with in city ease of movement.</p>
<p>NORTH KING COUNTY</p>	<p>Seattle is the most densely populated part of the state. For Ballard to wait 22 years for light rail service is absurd and with population growth, will defy the laws of physics (in terms of when physics kills economics).</p> <p>I also hear people from the east Side complaining that rail isn't proposed over 520.</p> <p>I'm stoked to see light rail coming to fruition in Seattle! I know sound transit has to weigh the pros and cons of various ideas, but I think you could go bigger. There are enough of us in gen X and y to out vote the chicken littles who are going to bitch no matter what.</p>
<p>NORTH KING COUNTY</p>	<p>The time line should be sped up! The more light rail we have available, the more people will use it! I live in Ballard and would love to commute by light rail but to bus to the UW light rail would take longer than. Just busing downtown. Connect Ballard to Capitol Hill via light rail. Two up and coming neighborhoods with lots of people moving in who live computer lifestyles and don't have cars.</p>
<p>NORTH KING COUNTY</p>	<p>We have to speed up the project time horizon. And completion of the originally contemplated spine from Tacoma to Everett HAS to be priority #1. We have to find a way for these projects NOT to take up to 25 yrs</p>
<p>NORTH KING COUNTY</p>	<p>We need it this yesterday not tomorrow</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Extending the light rail needs to happen sooner. Rapid transit is great, but the buses get stuck in the same traffic everyone else is in on the roads. Buses that take the freeway are continuously late, often by 45 minutes or more during workday commutes. We needed a light rail/subway system in place before we allowed for so much growth in our city. Now, we are frantically playing catch up. Light rail needs to happen now.
NORTH KING COUNTY	More light rail, faster please!!
NORTH KING COUNTY	The timeline is a total joke. Make it go faster.
NORTH KING COUNTY	Are ferry connections also a consideration? Additional foot ferries to connect and expand the west Puget Sound to DT Tacoma, DT Seattle, utilizing DT Bremerton in addition to commuter options at smaller ports like Port Orchard and northern options. This would be a rather easy addition and economically feasible option.
NORTH KING COUNTY	I totally support improved transit, but your plan made in private is not logical. - 22 years to Ballard is ridiculous! We need it MUCH sooner! - Putting light rail in with traffic and on a bridge (that must open for boats) over Salmon Bay, as opposed to a tunnel under Salmon Bay - adding 5 minutes to the average trip to Ballard - is a pretty frustrating idea. Really guys?!?!? - The way you do the vast majority of your Bus Rapid Transit is pointless. If the BRT does not have its own, continuous, complete right of way, it is just another bus stuck in traffic. Trying to do it cheaply makes no one happy. -Ultimately ST is taking a huge risk, putting out this extremely unsatisfying plan, hoping the presidential election brings out enough liberal voters to get it passed. It might. Or Ballard/West Seattle may revolt and say, "we want service now, not in two decades," and vote "No." - I am a strong supporter of mass transit and I have always voted for ST and other projects, but this plan makes me frustrated and angry. Please fix this plan so I can vote for it and ask others to do the same. Thanks!
NORTH KING COUNTY	I am deeply disappointed in the proposed West Seattle addition. Like the vast majority of your proposals, expansion has been designed to impact wealthy, white neighborhoods. West Seattle's expansion should include the southern portions of the neighborhood, where those with less means can be positively impacted by a regional system. your plan is to 'improve' busing. Of course, busing takes longer to get from point A to point B and Sound Transit believes poor/minorities can afford to waste their time on slow systems. Stop discriminating and give ALL of West Seattle a proper light rail system, not just the wealthy northern neighborhoods.
NORTH KING COUNTY	Start times for the link should be a minimum of 30-45 min earlier than they are now Bankers often start at 6AM because they work with east coast. Construction workers start between 4-6 AM. These two groups are not able to use the link because they are not able to arrive at work on time. For link to work the trains need to run 24/7 even if it is only every 30-45 min from midnight to 5AM. There are several businesses that run night and early morning shifts such as bakeries, coffee shops etc. I just worked a construction job in seattle on corner of senaca and 3rd. Over half of the 50 people on the job still had to drive in because the job started at 4AM because of lack of bus and link services.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Stop debating this so much as projects are usual done here before it's too late to do anything. Stop trying to be so "PC" about this subject and get the job done already. We need a Bloomberg-type leader to crack the whip and get people to follow orders. The public forum here in the northwest is antiquated and time consuming. Why is it always such an issue to get anything done in this town?
NORTH KING COUNTY	Keep up good work
NORTH KING COUNTY	Timeline is a concern. Needs to be done in half the time
NORTH KING COUNTY	I don't understand why every single thing in Seattle costs extra money to the tax payers. Where is all the tax money going to? Why are we building useless sports arenas to benefit only the rich developers and fundamental transportation projects will take decades and cost so much to tax payers? When are the manager and directors of over budget projects (Bertha anyone) going to be held accountable for gross negligence, if not criminal? When are giant corporations and all the developers going to be taxed to cover for all the benefit they rip? Why are all the average citizens paying for all the growth while having to endure ever worsening traffic and housing conditions?
NORTH KING COUNTY	We need direct public transit between Seattle and Olympia  Night time security on current Link service needs major improvements
NORTH KING COUNTY	No light rail to ballard.
NORTH KING COUNTY	I think existing express lanes on I-5 North and South between Seattle and Northgate should be converted to new light rail path. Where they end, utilize the carpool lanes for link light rail. This may expedite projected timeline for portions of ST3. Also, once built I think those sitting in gridlock traffic would be incentivized to ride light rail, when they see a train screaming by them. If the point of the express and carpool lanes are to move vast amounts of traffic, then it seems appropriate to dedicate that real estate to Link Light rail, which would better serve the community in this way.
NORTH KING COUNTY	You will need to find additional funding besides property taxes! We simply can not fund everything. And after the huge negative transit revisions of a month ago you will need to work very hard to convince Metro riders that this isn't taking \$ away from existing transit. We are all livid about the transit cuts and most people do not know the difference between Metro and Sound Transit.
NORTH KING COUNTY	Projects should be completed within 12 years (all of them). You should be focussing on density and not suburbs. Ballard is exploding, North Seattle is exploding, but you're screwing around with suburban lines that wont move many people or reduce traffic. I would vote no on the current project for these reasons.
NORTH KING COUNTY	ST3 seems to mirror what's wrong with BART without the benefit of its huge fast trains.
NORTH KING COUNTY	This plan is CRITICAL. The region can't delay any longer in building effective mass transit.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	The plan should include a flexible allowance for optimization projects, which are currently unknown, but very necessary to make transit work. The plan includes a couple of these, "capital improvements" for various bus and rail lines, and I approve, but ST should be doing a lot more of this. Incremental improvements can be completed on shorter time scales, and incorporate feedback from actual rider behavior. It seems unreasonable to expect that ST will perfectly predict 25 years into the future.
NORTH KING COUNTY	Embrace and listen to the thoughtful insights provided by employees of the Puget Sound Regional Council
NORTH KING COUNTY	I would advocate for a sliding scale of contributions to this plan based income. I would gladly pay more than 200 a year if it meant everyone could have better access public transportation. A good public transport system is what will make Seattle a truly great city.
NORTH KING COUNTY	The timelines are embarrassing, not nearly as aggressive as they need to be. Cut them in 1/2 to save face...
NORTH KING COUNTY	Key to any transportation plan is having transit be FASTER, and cheaper than alternatives - and to save money must piggyback on existing rights of way. Why should I take light rail to the airport when it takes me almost an hour from my Capital Hill apartment, including getting to the station, waiting for train, meandering through a circuitous route, and walking from station to terminal, when it takes 20-25 minutes with UBER or car? Dedicated express bus lanes or dedicated trains ABOVE existing freeways are what will make the most sense - and it should be POINT TO POINT (there is already park and ride infrastructure - build us FAST trains/buses to Tacoma, Lakewood, JBLM and Olympia that run ABOVE i-5 and/or same northwards to Lynwood and Everett and East to Bellevue, Microsoft and Redmond. It is INSANE that school buses and Microsoft buses are run separately from Metro - school kids should be riding Metro buses!
NORTH KING COUNTY	<ol style="list-style-type: none"> <li>1. A greater emphasis should be placed on EQUITABLE transit oriented development. How much of the land surrounding new light rail, BRT, and Sounder stations will be reserved for low-income housing? It is ESSENTIAL that these investments in transit do not undermine the ability of lower income folks to live in proximity to quality transit.</li> <li>2. Any BRT system needs to <i>*actually*</i> be a BRT system and not just a glorified express bus (which is what the C and D lines are in reality). If BRT is truly going to be an interim measure while light rail is being built, it needs to have all the trappings of a <i>*true*</i> BRT system: dedicated lanes the entire route (!), comfortable waiting platforms, etc.</li> <li>3. There should be a greater reliance on employer head taxes, luxury taxes, and less of a reliance on sales tax increases. ST3 should be funded in a more <i>*progressive*</i> rather than <i>*regressive*</i> manner.</li> <li>4. ST3 and its costs should be a launching off point for a greater statewide conversation about the need for an income tax to fund important projects like this one.</li> <li>5. Thank you for involving the public in these decisions; community engagement is crucial for good decision-making. Please be transparent about how this feedback will inform the final plan.</li> </ol>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>population growth is thru the roof,, love mass transit but seattle is way behind in handling this,, by the time these transit projects are done I'll be too old to care!!</p> <p>Too many single drivers on the road,,,,, good luck with that</p>
NORTH KING COUNTY	<p>Expanding the focus of the projects should be on extending/expanding the light rail system.</p> <ol style="list-style-type: none"> <li>1. Seattle to Redmond</li> <li>2. Add parking areas to current light rail stations.</li> <li>3. Add security to parking areas and current stations.</li> </ol> <p>**add additional fare enforcement officers. Everyday I see people not paying their fares. give the fare enforcement officers the similar equipment as flight attendants to process payments.</p>
NORTH KING COUNTY	<p>I didn't hear anything about the number of people taking light rail in these areas, the number of people who would take it if it existed. I didn't feel your survey was explicit enough.</p> <p>And then when you allow me two selections for the most urgent, you combine specific routes with generalities such as parking at light rail stations; and those generalities should be separate.</p> <p>How many people can't or don't take public transportation because they have no place to park their auto? I know a specific place that has inadequate parking, and that is under I-5 by the Ravenna Avenue freeway exit.</p> <p>Sounds as though you are asking me to define something's urgency when you have all the figures and I do not.</p> <p>I also highly resent having to pay more fees for my vehicle tabs and insurance when I am not using public transportation at this time. And now I hear you indicating I have to pay \$200 per year for public transportation. I am of the lower socioeconomic group; and while I feel this will benefit me in the future when I can no longer drive; what it does to me at this time in my life is take my airfare away for the year which I use to visit my family. I feel as though I am punished for being low income in more ways than one.</p> <p>When I was working I paid for my transportation, the general public didn't pay 200.00 per month for my transportation.</p>
NORTH KING COUNTY	NO MORE BIKE LANES
NORTH KING COUNTY	The reliabilty of Sound Rail from Seattle north is totally dependant on the slide-prone area near Edmonds. Until this is addressed and the steep banks stabilized our greatest transit corridor is subject to contractors and the weather.
NORTH KING COUNTY	That's a pretty high tax on property value. I would be more supportive of the plan if West Seattle was supported in a better timeline, as it stands I would be opposed.
NORTH KING COUNTY	How much are developers of big condo/apartment complexes paying for this? Also big employers like Boeing & Microsoft & Amazon? I'm tired of all tax increases being put on residential property & sales taxes.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	In addition to providing new and improved transportation options, attention should be given to bottleneck relief in the current heavy traffic locations in the Puget Sound area. In particular, reduce gridlock in downtown Seattle by providing all-way pedestrian crossing times, thus allowing cars making right turns to flow more efficiently instead of one car at a time when the lights turn green. This alone could significantly improve downtown gridlock. Another gridlock is the traffic inflow onto Seneca from I-5 North - perhaps regulating traffic signals to allow more inflow from the freeway. Currently traffic backs up for miles as a result of this bottleneck.
NORTH KING COUNTY	Do not increase the regressive sales tax portion of the funding. Find ways to be more progressive in the tax plans.  As retired seniors, we FULLY support the increase of rapid transit. We would take it frequently if it were more available. We will really need a way for pedestrians and bikers to get to the Northgate Link Light Rail safely. Really disappointed we didn't get the federal funding for the bridge across I-5 to the new station.  We also need greater police presence in north Seattle so we can go to and from the Transit Center after dark without compromising our safety.
NORTH KING COUNTY	Add more Route 107 buses and more service to the South Seattle/Skwyay/West Hill area.
NORTH KING COUNTY	Light rail stop in Georgetown
NORTH KING COUNTY	My concern is making lower income people pay the \$200 per year. Another concern is that the transit improvements will worsen the affordability issues for those of us that don't make 6 figure incomes. Also it's depressing how long the transit improvements will take; a lot can happen in 20 years. When plans are laid out for this long of a timeline, it's important to be able to be flexible to adapt to unforeseen circumstances.
NORTH KING COUNTY	Wish there was a way to implement it faster
NORTH KING COUNTY	Can we do it any faster?
NORTH KING COUNTY	Let's fix traffic for people who live and work in their own cities, before we accommodate those that choose to live and work in different cities.
NORTH KING COUNTY	The density in the downtown surrounding areas requires development of mas transit faster than 17 years
NORTH KING COUNTY	Adding a sales and use tax increase is disproportionately burdensome on low-income people. I would rather see a 1.3% increase in vehicle excise tax, or a combination increase in vehicle and property taxes.
NORTH KING COUNTY	Ballard and West Seattle projects should be expedited.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>Bus "Rapid" Transit has been a mis-nomer when I have taken the lines over in the Crown Hill and Ballard areas to downtown Seattle. Frequent maybe, but not rapid. As a resident of Lake Forest Park, it makes me extremely frustrated that BRT is the best we (and really Kenmore and Bothell, too) are being offered to connect with the light rail backbone. What I see in the plan is that the buses won't even have a dedicated lane from LFP to the 145th st. station and therefore will not be able to be rapid. This sucks mightily.</p> <p>Additionally, I am very frustrated with the current situation where the UW station opens but provides NO PARKING and NO BUS SERVICE coming from LFP. I guess there is the 372, but it does not go directly to the station - you have to lamely get off after traipsing half-way through UW campus and hoof it over to the station. Who came up with THAT plan? It seems like in the interim between when more of the light rail is available from other locations such as Northgate, you might try to come up with some special bus routes or parking at UW to patch over until we don't need that any more.</p>
NORTH KING COUNTY	<p>Projects should be funded by a higher percentage of property tax increase, not increased sales tax. Continuing to increase sales tax in Seattle disproportionately affects low incomes residents.</p>
NORTH KING COUNTY	<p>If the majority of the cost is placed on property tax assessments it would be a heavy burden for property owners, many of whom are on fixed income. I think a mileage driven assessment would be more fair. Those who drive the most pay the highest tax. I would also support businesses being assessed taxes based on their number of employees (hence road use).</p>
NORTH KING COUNTY	<p>24 hour airport service from Seattle is a must</p>
NORTH KING COUNTY	<p>You guys are too slow! please learn from other cities. I believe you waste time and money with your inefficient process in all stages (planning, design, construction). Please add a question on "how happy we are with Sound Transit's performance".</p>
NORTH KING COUNTY	<p>Takes too long. This is all needed yesterday</p>
NORTH KING COUNTY	<p>It is embarrassing how far behind Seattle is when it comes to public transportation. It's also obvious that many of the people who work for sound transit have never taken public transportation. Get it together guys!!</p>
NORTH KING COUNTY	<p>Personally I feel like light rail is the best solution rather than busses, but what do I know, I'm only a civil engineer studying transportation efficiency.</p>
NORTH KING COUNTY	<p>I would happily pay taxes to invest in ST3 over sports stadiums</p>
NORTH KING COUNTY	<p>I believe ALL projects should be supporting a 100 year plan of electric rail that has dedicated right-of-way + walking, biking and short drives. Do not skimp on this. The most important commodity we have is time and natural resources ... not money. I'm very afraid that if the approach taken in the Rainier Valley (with LLR sharing the street with cars, SLOW travel and constant accidents) it will be a huge blemish on LLR in the future. It needs to be FAST to travel ... not fast or cheap to build. Please invest the extra \$\$ and take the extra time to this is a system that we can look back on and be proud of.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Light rail, light rail, light rail!!! The rest is just a band-aid.
NORTH KING COUNTY	Parking garages at every other light rail stations in the outer stations is crucial. Light rail from Kent to Renton to Bellevue to Bothell is vastly needed. ...I 405 is total gridlock 5 days a week.
NORTH KING COUNTY	I think they should tax people that live within a 3 mile radius of downtown more. The tax should depend on the distance to downtown, being less the further away a person lives.
NORTH KING COUNTY	From 2007 to 2014 I chose not to own a car and commuted from Mukilteo to Laurelhurst using Community Transit and Metro (2009-2011 my commute was from Bitter Lake to Laurelhurst). The time and hassle involved with unreliable schedules due to area traffic and large events finally took its toll, and I purchased a car in early 2014 and have been driving by myself even since. If we had a reliable mass-transit system unaffected by vehicle congestion, I would be using it today.
NORTH KING COUNTY	Can't afford more taxes
NORTH KING COUNTY	Can parking be increased at places that currently fill up early almost every day?
NORTH KING COUNTY	The timeline for these projects should be vastly accelerated ... We shouldn't accept to wait 8, 10 or 25 years ... We need these much sooner!
NORTH KING COUNTY	1) I feel that the proposed routes are good, however the timeline needs to be accelerated greatly. As an engineer (regardless of type), I understand that you can't just throw money at the problem and expect it to be completed faster, even if it money were unlimited. However, businesses are booming, rents are skyrocketing, and people are forced to live further away from Seattle proper.  2) East-West transit is a nightmare. While I am very excited about Seattle / Bellevue / Kirkland / Issaquah transit routes, I wonder if UW / Ballard needs to be highly prioritized also.
NORTH KING COUNTY	I'm still bitter about the successful efforts to kill the Monorail. It should have been built! Seattlites do not seem to embrace public transportation and there will need to be marketing efforts to get them out of their cars. Fortunately, I'll be retired in a few years and can leave the area.
NORTH KING COUNTY	I support the plan overall but not the current timeline. I would like to see the next 8 years focus on in city transit (Ballard and West Seattle to downtown) and move some of the long distance transit out to the next 25 years.
NORTH KING COUNTY	what about using existing facilities: the rail line along the coast - why not use that to reach Ballard instead of a very expensive new tunnel? Altho, I realize the monorail is low volume and private, but would it be cheaper to buy it, extend it and increase train/station length?
NORTH KING COUNTY	More bike infrastructure, quicker timeline. Not sure why it would take 8 years to enhance bus service.
NORTH KING COUNTY	Where will I get this two hundred dollars? I'm poor now!
NORTH KING COUNTY	Where s capitol hill stop on the map you show here?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Components of the plan which depend on fossil fuels should generally be lower priority than electric solutions, such as light rail. The environmental impact of switching drivers to light rail isn't mentioned in this plan that I could see, and it's an additional vital reason two switch, not just reducing commute times. I have recently switched my commute to light rail (UW to downtown) and I love it! LINK light rail is awesome!
NORTH KING COUNTY	7 years for the first results?! we have to do something soooooooooooner! x
NORTH KING COUNTY	I think a major concern is the timeline implementing the ST3 plan. It would be great to accomplish many of these goals faster.  A major oversight that I believe has been neglected in all past plans is the implementation of a better east-west connection between West Seattle and South Seattle and more specifically, better cohesion between transportation options along Beacon Hill and their connections to neighborhoods like Georgetown. Now that the light rail is established in South Seattle, better connections needs to be implemented.
NORTH KING COUNTY	Don't forget the local buses. Not everyone works/has business along the proposed corridors. And more taxes... no way.
NORTH KING COUNTY	The time frame is RIDICULOUSLY slow!! We needed all this stuff yesterday. In 25 years we should have a 100% fleshed out system, but you have the vision only of a truncated one in that time. And, this vision completely ignores density--you're ignoring where all the people live in Seattle to offer service to sumner and Issaquah? What is wrong with you?
NORTH KING COUNTY	I feel strongly that enough environmental thought must be paid to the developments in question in order to ensure that indeed sound transit will have a positive environmental impact - and also a culturally sensitive one. No green spaces or cultural centers should be destroyed for sound transit to move forward.
NORTH KING COUNTY	If there aren't enough stations in the city of Seattle, people will still have to drive into the city to get where they're going. There should be stations all over the city of Seattle so that once you enter the transit system, it can take you where you want to go. No one wants to go to Orting. Zillions of people want to move East/West in Seattle north of the cut. Have you tried to get from UW to Wallingford or Ballard in the afternoon? Or from Northgate to Ballard? Improve transit *within* Seattle. Then people from the whole region won't need to bring their cars into town. Most subway and transit systems in most cities in the world are shaped like spider webs (spokes leading to downtown and ring routes). Ours should look like that. Currently it kind of looks like an old woman's prolapsed uterus. Let's tighten things up!
NORTH KING COUNTY	I believe it to be just as important for Sound Transit to be in complete coordination with all other transit's and not eliminate or compete in any take-over's, to enable riders to have options between different transits.
NORTH KING COUNTY	22 years to Ballard?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Please prioritize off-grade link rail to Ballard. Add off-grade east-west Link rail from Ballard to U-district stopping at I-5 & 45th, Wallingford, North Fremont, and Phiney Ridge
NORTH KING COUNTY	Having some stops/service to Sodo from west Seattle would enable more riders. Centralizing all stops to the Alaska junction assumes everyone lives centrally. Not everyone lives on the junction and not everyone works directly downtown.
NORTH KING COUNTY	Too expensive for homeowners. Get funding from the Fed. and make the riders pay.
NORTH KING COUNTY	Please keep the light rail off of the streets. Either underground or on bridges. Think big picture for Seattle's expansion rather than what is easiest/cost effective. NO MORE TROLLEYS/STREET TRACKS
NORTH KING COUNTY	allowing people to efficiently get to work while living in dense city neighborhoods reduces our carbon footprint because people in dense city neighborhoods drive LESS on the weekends. We are obsessed in this region with getting people who live in the suburbs to work efficiently but we rarely think about the other two days a week. the cap hill and husky light rail stations show the importance of thinking like a seven-day city. It is most important to efficiently link neighborhoods that are close to the city core. it is outrageous that it takes longer to get from west seattle to downtown seattle than redmond to downtown seattle.
NORTH KING COUNTY	The fact that Seattle - a major city - is missing a rail network is appalling. The lack of decent public transport options here is awful, all there is to rely on is buses. Traffic is terrible because everyone is forced to drive to get anywhere. The I5 and other highways at peak hour and on weekends are a joke. Seattle needs to step up big time and provide a rail network.
NORTH KING COUNTY	Since this is a 25-year plan, I STRONGLY request that Sound Transit merge with Metro Transit, Pierce Transit, and Community Transit (and maybe others). I want a single taxing plan that assures an integrated regional transit system. The bureaucracy of having separate county-based transit systems overlapping with the regional Sound Transit system has out-lived its time. I would be a much stronger proponent for ST3 if this political/organizational goal became a key strategy for this project list.
NORTH KING COUNTY	While I am all for providing unobstructed zones for buses, using the shoulder of the road seems like a less than perfect solution. How about just designating existing lanes for transit - isn't that done already? I am so tired of seeing single occupancy vehicles during rush hour. Given the current and projected growth in the region, people need to be encouraged to share rides or use transit. It would be helpful if buses could move through areas (especially downtown Seattle) despite whatever congestion exists - priority needs to be given to transit to keep it moving. People might be more willing to use alternate methods of transportation if they see others moving while they are stuck in their cars.
NORTH KING COUNTY	git er done

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I love transit and want us to invest in it—but I'm honestly concerned about the level of taxation. I'm worried that this will overburden the average taxpayer and crowd out funding for other important projects. Are we taking on too much in ST3? I want to support transit, but I also want to make sure people can afford to live here and that we can continue to fund other important things like education and parks.
NORTH KING COUNTY	It is taking too long to complete light rail to Everett and to Ballard I'm ok with the cost but it must be accelerated.
NORTH KING COUNTY	The timeline is sooooo long. Traffic is insane in this area. Isn't there a way to get more funding to build the system more quickly?
NORTH KING COUNTY	My biggest concern is with the proposed funding - what about bonds? What about INCOME taxes? Too much additional tax burden without regard for ability to pay.
NORTH KING COUNTY	There have been many large increase to my property taxes over the last few years and I feel like I am being priced out of the city. This is difficult for me as I live in Seattle but work in Mukilteo and there is no viable way to make transit work for my commute.
NORTH KING COUNTY	If the timeline for completion of each phase can be moved up, even if it means higher taxation, then it should be done.
NORTH KING COUNTY	Please request funding for only this project. I will vote no if the proposal contains any bike lane funding.
NORTH KING COUNTY	The rail from UW to Yesler is bad because it dumps people in the middle of a dangerous area. You have removed important buses (#25), saying we should go to Husky station.....far and in dark dangerous areas.
NORTH KING COUNTY	I wholeheartedly believe if you guys can continue to deliver on-time, within your budget, support for this project will just increase over time. Keep up the great work, guys, I personally can't wait for the Roosevelt link station to open, and I hope to see one day that Seattle and its surrounding metropolitan area have a great transit system, one to be looked at and admired
NORTH KING COUNTY	"Urgency" is an odd choice of theme for this survey, because the ST3 plan lacks urgency, creativity, and an understanding of the importance of bringing real mass transit to this region. But you will hear from many other people that ST3 proposes to move too slowly. I want you to know that elevated track in West Seattle on Alaska/Fauntleroy/California is a dumb idea. Elevated track built above the street will bifurcate and ruin the walkable community that already exists there. Elevated track will also prove so unpopular in West Seattle that it will foreclose the political possibility of extending this line south along California to White Center or Burien. Heading west from the vicinity of the proposed Avalon station, the light rail line should go into a tunnel and reach an underground station at Alaska Junction. Such a tunnel would also solve the problem of getting up the steep grade of this hill, while avoiding an absurdly tall elevated track at the bottom of the hill. I understand that deep-bore tunnels are expensive, but I don't understand why there are no proposals considering this tunnel or a cut-and-cover method. I also think it's deeply misguided for Sound Transit to make West Seattle wait so long for such an inferior elevated track.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Hurry up already. We are way behind on this.
NORTH KING COUNTY	We should find a less regressive taxation structure to finance these projects.
NORTH KING COUNTY	In general the plan is going to take to long to provide relief to the region. ST needs to find creative ways to get things done quicker. In addition ST needs to add additional items not only for study but environmental review so that future projects are much further along when funding becomes available. In ST2 I heard that there was money for future planning and all that was produced for ST3 was some lines on a map and general cost numbers. ST should be ashamed of themselves for the lack of detailed preparation for ST3.
NORTH KING COUNTY	Concern as to how this plan would be implemented in concert with King County Metro -- the current Metro changes implemented after opening of the ST University Station are horribly premature, throwing mass transit users in NE Seattle into a vast dark hole of mismatched transfers and long, dark treks to/from the few bus lines left. What used to be convenient and reliable, albeit not-necessary-swift, is now a mess. It truly negatively affects my votes on ST3.
NORTH KING COUNTY	Why 25 yrs? We cannot afford for it to take that long. This is my only reservation about not supporting it more quickly.
NORTH KING COUNTY	Whatever happened to using some or all of the rail bed running through Bellevue, Redmond, Kirkland and on to Woodinville? Whatever takes place will be strongly met by opposition (witness the NIMBY along 112th Avenue in Bellevue), but this grade is already in place.
NORTH KING COUNTY	Sounder ridership could improve with additional counter commute options-I cannot ride the sounder from where I live in Seattle to where i work in Tacoma because the last train of the day leaves the Tacoma station right at 5pm. Many people work until 5:00, and could benefit from one last train to get the last of the typical 9-5ers
NORTH KING COUNTY	I don't support a system that requires having drivers and their pensions.
NORTH KING COUNTY	Please consider building link stations more along where people live north of downtown. The UW station is awfully far out of the way to now force commuters to take a bus for 10 minutes just to get to a train that takes us 6 minutes further. The time of commute has increased significantly because of this transfer.
NORTH KING COUNTY	Make sure we have parking at rail stations
NORTH KING COUNTY	I support Rapid Ride expansion, but should be a interim fix until light rail is added on the east side.
NORTH KING COUNTY	Fully support all the rail projects. I do not support anything with bus projects
NORTH KING COUNTY	U DISTRICT TO BALLARD LIGHT RAIL
NORTH KING COUNTY	The south neighborhoods of West Seattle feel largely ignored in favor of other Seattle neighborhoods and the true suburbs in the north and south. Please do not forget these neglected working class areas for rail development (Highland Park, etc.). Thanks!
NORTH KING COUNTY	I want to use light rail and buses more frequently but I live in Meadowbrook and although their are several commuter options I wish their was a park and ride I could go to with buses that went directly to the UW lightrail station. I would probably travel by lightrail all the time if it was easier to get there.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	25 Years is a long ask. Breaking it up into smaller bites to prove good stewardship for tax payer funds would likely go a long way to getting further improvements.
NORTH KING COUNTY	Keep up the good work!
NORTH KING COUNTY	This should have been done YEARS ago. Homeowners (especially those of us older and who drive, are stuck paying for everything. Put some of this on not homeowners, who ride bikes, walk or rent. Enough is enough.
NORTH KING COUNTY	If any part of the plan includes any new "street car" addition or improvement, the plan should die. I will certainly vote against it and campaign against any street car use. And any cost for NEW coverage should be carry the financial burden in that new area. The Seattle core area has been paying dearly for it's coverage, it's time that the outlying areas to be drawn in and Seattle core get relief from taxation.
NORTH KING COUNTY	West Seattle and Ballard seem like the most heavily populated areas in which most people commute- these areas should be first on the list to receive better transit. Also, please fix the roads and bike lanes. I live in Ballard- there are so many intersections without lights/crosswalks and sidewalks that randomly end. This is unsafe.
NORTH KING COUNTY	Why not more street grade light rail? It could be built faster and cheaper
NORTH KING COUNTY	<p>We rarely use transit because it doesn't get us anywhere we need to be in a timely fashion -- if you are actually trying to live a life, transit doesn't cut it. Try getting to a class at Madrona, a printer in Northgate and the grocery store in the neighborhood all in one day if you have to commute to do it. Or get your child to basketball practice in Montlake and then Irish dancing in Phinney with a stop at Northgate to see the Orthodontist. That would take several different buses and way too many hours plus walking because the bus doesn't go to all those places. You can't get to the dog park without a car because there isn't on on Capitol Hill and not every bus rider is happy to have wet, muddy dogs on the bus after a romp in the park. We now chose not to go many places because of the parking issues and the fact that getting to and from the transit is just too time consuming. So basically, the transit options are hellish, and the transit people aren't really addressing the problems -- we are building a family unfriendly city, a transportation unfriendly city, and a tax unfriendly city -- it won't be sustainable.</p> <p>I find it very odd that it would take eight years to build out the bus rapid transit -- you can leave people on the side of the road, you don't need fancy bus stops -- you just need to get the bus pulled over. There are plenty of freeway exits with an entrance straight ahead. Your real issue is that you can't leave people anywhere because there is no parking and no transit to connect to. Commuters have to get to the bus or the train. Until you address parking, you will never really accomplish anything. Thankfully, by the time all this is coming on line I will have moved out of the crazy here in Seattle.</p>
NORTH KING COUNTY	I strongly feel that people will switch to transit when it provides service better than that of what their cars allow. For this reason, I think raising the top speed of the light rail system from 55 MPH would make sense. Since the trains have their own protected tracks, there should be little safety concern for raising speed to something much higher. This is especially true in tunnels.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Ballard to downtown is projected to have the largest ridership. We need some solutions is separate from auto traffic that does not take 22 years! It will be gridlock for everyone including the buses by then.
NORTH KING COUNTY	I rarely use mass transit, as I am within walking distance to 90% of my weekly activities (including my employment), having chosen 18 years ago to live in the neighborhood that I work. However, I strongly support all measures to improve mass transit in the Seattle metropolitan area. I appreciate having more than one option of going beyond my walking range, and use mass transit as I have the time (I most often use light rail to the airport).
NORTH KING COUNTY	I would appreciate if you could move the timeline faster. I also think it's important to improve bus service along 45th street. I am very supportive of growing the light rail everywhere!
NORTH KING COUNTY	Transit is important but there are other issues that are more important: affordable housing, harm reduction around the heroin epidemic, and services for people with mental illness. If it becomes all-we-can-pay-for-is-transit and the-only-way-to-do-it-is this-crazy-regressive-sales-tax....well, I'm out.
NORTH KING COUNTY	Is there a planned light rail station at 185th in shoreline? Is light rail going across 520 bridge or I-90 bridge or neither?
NORTH KING COUNTY	Defer 2nd downtown tunnel and use money to push the Ballard line. Through Interbay use west route suggested by community!!!
NORTH KING COUNTY	Stop screwing up traffic flows to enhance bicycle, bus, & light rail flows. If light rail will be buried or elevated I will support it, otherwise not. Additional bus service isn't the answer. We need more mass transit that doesn't compete at-grade with our existing transportation routes. The Sounder should be extended farther north & south with more stops, coordination with other mass transit, & parking along the way. Enough with the damm bus bulbs which back up traffic every time a bus stops. We also don't need bus stops on every block or every other block. Both block traffic (including bus traffic) & create, rather than ease congestion. I don't know how many times I've been blocked by 3 D line buses running back to back & each stopping & blocking traffic behind them. Plan more cost-effective solutions & stop throwing money around like there is no tomorrow. I am on a fixed income & my property taxes have already increased by 20% over last year.
NORTH KING COUNTY	JUST DO IT.
NORTH KING COUNTY	I have feedback onthe design of this survey. It's poor. POOR.
NORTH KING COUNTY	still uninterested in regularly using any rapid transit when stations are so far away and local (METRO) transit to reach them are inconsistent and inconvenient
NORTH KING COUNTY	As a wheelchair-bound transit user, the Seattle area transit system is very difficult to use and often leaves many areas unreachable or the transit times are too long. For many, like myself, this is our only lifeline as private transport is far too expensive for the necessary accommodations. With increases in population growth projected for the future, these transit projects are essential for keeping the Sound area livable and I fully support the investment.
NORTH KING COUNTY	Light rail expansion shouldn't take so long. Some projects should be removed

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I would rather invest in light rail or even monorail than in buses. they are better for the environment and more efficient. It would be great to have an East to West connector within Seattle - a Ballard light rail to the Husky Stadium light rail, for example, and not just North - South. Every great, vibrant, walkable city has a great train system. Buses just aren't the same.
NORTH KING COUNTY	It was a big mistake to prohibit parking structures near the light rail in Rainier Valley. If you make it easier to get on the train it will reduce the close in traffic. Please allow parking near the stations.
NORTH KING COUNTY	The implementation should be faster. Specifically, West Seattle and Ballard light rail.
NORTH KING COUNTY	The expansion to west Seattle, Ballard and Isaquah should happen way sooner
NORTH KING COUNTY	The need is more urgent. I do not support a plan that takes 25 years to complete. As a 48 year old I need urgency and would gladly pay far more than what is being proposed to achieve this but it needs to occur far sooner. I do not support any expanded bus service. We need cars off the roads. We need high speed rail in far greater quantities among the I-5 corridor and easy to west along both 520 and I90.
NORTH KING COUNTY	1) Salles tax is regressive and inequitable. Aren't there other ways to raise money? (Why. Do. We. Not. Have. Income. Tax. In. WA? What's wrong with this State?)  2) We are about to get a reliablr System of public transportation and a network of lightrail trains. Great! King County is about to arrive in 1930, hooray! BUT if that's the case, why do we already feeling the transportation - casualties from extending lightrail: re-routing & short- cutting buses!? Instead of one bus ftom South Seattle to norh Seattle for work (the 48), I am now taking 3. That is not what I hope the lightrail Extension would bring to my life!  A comprehensive train network mußt not come at the expense of the existing network of busses. It cannot compensate for them, but should add to the infrastructure already in place. Otherwise it is useless.
NORTH KING COUNTY	I'm so excited for the station in my neighborhood (185th). Thanks for fighting for this!
NORTH KING COUNTY	Do more faster! We are not keeping up with growth because we started so late.
NORTH KING COUNTY	It is imperative that there be sufficient parking at these stations. I read that there will be 500 stalls at the station at 145th, but 5,000 riders are expected per day.  The neighborhood will not be able to absorb that many vehicles due to the station's location between a golf course and I-5. Increased bus service will not be sufficient to absorb that number of riders. Having too little parking will increase traffic in the the area, take up street parking on quiet single family streets, absorb parking from the local park, and cause mishaps such as car accidents.  The same problem occurs at 185th, where I-5 and the school district stadium prevent plentiful street parking.  Don't turn our neighborhoods into commuter parking.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Bring down cost imposed on property owner and up costs on transit users. Tax the people who will use it more, and the People who may not, less.
NORTH KING COUNTY	When there was a stop planned for Greenwood Ave and 105th (or thereabouts) I was excited. Now it appears my neighborhood is completely ignored and I'm still going to be part of paying for a \$50 billion project that doesn't positively help my neighborhood. I'm really sad about that.
NORTH KING COUNTY	Do not build a 70 foot high bridge to Ballard. Tunnel under the ship canal!!!
NORTH KING COUNTY	Stop taxing the bejesus out of us for all this [explicit]! We can't afford it!
NORTH KING COUNTY	Focus where traffic is worst and ridership is highest.
NORTH KING COUNTY	<p>The whole idea for these ST3 Plans should be to lessen congestion, not create more congestion, as well as provide for more transit options. This must be a mandate and the plans presented should not exclude or restrict other current forms of transportation, especially vehicular transportation.</p> <p>I very strongly disagree with the alignment of the light rail running at grade along 15th Ave for the Ballard to Downtown Seattle Light Rail proposal. It should be elevated or run below grade along 15th Avenue so as to not disrupt this extremely important existing vehicle corridor. The proposed system would only aggravate congestion and the light rail should not be considered as form of replacement to current vehicular traffic, but as an aid or as an alternate to vehicular traffic.</p>
NORTH KING COUNTY	<p>The whole idea for these ST3 Plans should be to lessen congestion, not create more congestion, as well as provide for more transit options. This must be a mandate and the plans presented should not exclude or restrict other current forms of transportation, especially vehicular transportation.</p> <p>I very strongly disagree with the alignment of the light rail running at grade along 15th Ave for the Ballard to Downtown Seattle Light Rail proposal. The proposed system would only aggravate congestion and the light rail should not be considered as form of replacement to current vehicular traffic, but as an aid or as an alternate to vehicular traffic.</p>
NORTH KING COUNTY	VERY expensive and slow to deliver. ST needs to meet it's originally projected ridership and cost estimates on current lines first, and then prove there is a business model for this mode of transportation before asking for this type of money.
NORTH KING COUNTY	The light rail and busses we have should be maximized so that people don't have to wait for 3 busses because the one that stops is completely full Same goes for Light rail. Put more in circulation on busy nights (ie games, concerts etc). So many people want to use the system but it is not run properly. Why can't you look at what we ALREADY have and maximize its potential? Get smart about parking at rail stations, not everyone can ride a bike. There are families and mothers with children people who go to work with large bags etc.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Seattle is one of the few metro areas that is not served by an extensive light rail system. I was in Houston 5 years ago - at that time they had one light rail route. I returned last week and they have expanded to three additional routes in five years. And they are still building
NORTH KING COUNTY	Please continue to communicate updates as well as posting drawings of the plans throughout the city. Seattle will be in a perpetual state of under construction which will be wearing, the more the people feel involved the better they can defend inconveniences as well as political backlashes from those that oppose any improvements. Keep up the good work!
NORTH KING COUNTY	You are asking our family of five, to spend \$400 to \$1000 more a year as an "investment" for a service we might be able to use in 25 years. Government talks about helping the middle class, paying at least \$10,000 over the next 25 years doesn't help us today. Also, you are asking us to invest in an entity that is difficult to trust. The replacement of the viaduct has not given me a lot of faith in the ability of government entities. Bus service is much less expensive and more immediate!
NORTH KING COUNTY	Public transportation is extremely important and urgent in the success of Seattle in its exploding growth, which will continue well into the next 25 years.
NORTH KING COUNTY	For those of us over 70 with a fixed retirement income and living in an area where in order to take public transport, we need to walk almost a mile, up and down hills, we would like a 1st priority of providing commuter parking so that we can take a bus or light rail! There is little or none in the Lake City area.
NORTH KING COUNTY	autonomous vehicles need to be considered in what infrastructure we're building over that time horizon also, light rail between Seattle and the East side wasn't on the checklist for selecting the top two projects. that would make my top two.
NORTH KING COUNTY	And emphasis on general transit safety and a focus on general behavioral manners would be nice on the bus routes and light rail. Otherwise, keep up the good work.
NORTH KING COUNTY	I have read reports of much much higher property taxes than this shows, If the number is truly .25 cents per thousand of assed value, I think it is ok; however , If all of this is so great, what is wrong with the idea that those who use it should pay for it the same as vehicle owners pay gas taxes to pay for the roads used by their vehicles. I am old enough to remember articles and advertisements from Seattle Transit operating gas and electric street cars indicating they operated in the black. Why did we get away from that method of operating transit? I will add that we have a company that employs 500 in the area and provide passes for all who will use them so we already subsidize the system and do not mind doing that to help Employees and reduce the cost of bigger parking facilities.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>As much as we need this transit improvement, homeowners are continuing to bear an excessive amount of the cost of this. One of the main reasons we need this transit is because our population has exploded, in part due to plans set in place by our current community leaders. If we are going to continue luring businesses and new residents here, the cost of expanding transit also needs to fall to new construction. Impact fees need to be implemented as a funding source and we need to purchase land for transit stations, and then sell that land to be developed above the station as it seems to have happened on Capitol Hill. Otherwise there is no land left to put the stations on.</p> <p>We should not use the transit as an excuse to overdevelop our neighborhoods, otherwise people won't want transit in their neighborhood. Transit will be seen as bringing an excessive number of residents into a neighborhood and the resulting mess and noise from the transit will not be an asset to the community.</p>
NORTH KING COUNTY	<p>The time table needs to be greatly sped up. There should be a larger investment from the government with most projects completed within 10 years.</p>
NORTH KING COUNTY	<p>You haven't changed this survey in spite of requests for more comment space, and in spite of the fact the the questions o how you would vote were ruled illegal. Seems to be sound Transit has already decided what they want and to heck with what the citizens want.</p>
NORTH KING COUNTY	<p>The heaviest congested areas should get the most help. I don't live near JBLM but it always has horrid traffic when coming north on I-5.</p> <p>The loop from Kenmore -Bellvue-Kirkland -520 -Lake city seems like it would be a great northern loop to connect. Same with a Southern loop for Renton-Bellvue-Mercer Island-S Seattle/Georgetown-Downtoxn Seattle... Then a good line to connect those loops..or just a big loop around Lake WA and then a cross over to Bellvue/Seattle</p>
NORTH KING COUNTY	<p>Bus Route #66 being removed has made it extremely hard to get to work from Eastlake and Garfield to 9th and Stewert. 70 is never on time and I always have to stand due to bus being full.</p> <p>Thanks!</p>
NORTH KING COUNTY	<p>Ballard has taken on over 100% of the growth planned by being zoned an urban village. Multiple multi family projects included apodments have been allowed to replace single family homes with no parking required. In order for this to work we need to have light rail here now not in 22 years!</p>
NORTH KING COUNTY	<p>More of the project cost should be paid by high earning citizens. \$200 a year doesn't seem like much, but it's a lot if you're minimum wage.</p>
NORTH KING COUNTY	<p>Good job so far, keep it up!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>Seattle voters already voted a hell of a lot of sales tax to support transit and I am somewhere near a not one millionth of a cent more sales tax wall. I would like:</p> <p>--reward local jurisdictions that DO vote to tax themselves for projects that contribute to the ST#3 picture to exempt from additional sales tax.</p> <p>--Give voters choices about taxation mix for different transportation benefit districts.</p>
NORTH KING COUNTY	<p>I want to see simple solutions like dedicated bus lanes on the freeway. I would regularly use Metro if 1) dedicated lane on freeway 2) more frequent buses. Instead the bus is often stuck on the freeway or I take a standing only bus down Aurora which sucks.</p>
NORTH KING COUNTY	<p>Projects should prioritize ridership, not politics. Completing Ballard, the most dense and urban area in the draft plan, almost last in order to prioritize service in the suburbs isn't good transportation planning. I am generally very enthusiastic about transit and would canvass my neighborhood to build support for ST3. If a Ballard to UW line isn't considered and Ballard is built as a low priority item, I may sit out this round instead and lobby Seattle to build out light rail on its own.</p>
NORTH KING COUNTY	<p>There must be a priority placed on east/west bus service in Ballard and full time hours on 32nd NW. The east/west and west/east service will enable transit riders connect to the ST3 that will only go north:south.</p> <p>If there is no service connecting to ST3 people will drive their cars. Make the connections easy. Eliminate parking by offering street cars across 65th NW and 85th NW. I believe then there's more value fir use in this part of Ballard.</p>
NORTH KING COUNTY	<p>Why care about getting from Everett to Tacoma as slow as possible when a great is faster, already built,and more convenient? Why not go east-west,which is really [explicit] up now? Just to hard for you? Waiting for sdot to [explicit] that up too?</p>
NORTH KING COUNTY	<p>The current residents of Seattle and King County have no choice but to shoulder the burden of a transportation project that should have begun more than 20 years ago. Although rising costs in Seattle have made my own financial position much less secure than when I moved here in the 90s, I will pay via taxes what is needed for the expedient expansion of our mass transit system. For a region that touts itself as green and forward thinking, we are woefully behind in the development of mass transit that truly serves the public good.</p>
NORTH KING COUNTY	<p>why so long? 25 years? how about 5 to 10.</p>
NORTH KING COUNTY	<p>Tax based on income, the upper class businesses and wealthy folks should pay more for the project. Anyone under a certain income bracket should be exempt.</p>
NORTH KING COUNTY	<p>Inefficient and wasteful use of tax dollars on projects is a problem. No accountability.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Regionally there should be quite a boost in tax dollars received from all the construction. Are some of these funds being used for this plan? The burden of growth should not be placed on all the residents while all the contractors and local governments are pocketing benefits of all this growth.
NORTH KING COUNTY	For some of the "improvements" you will make people sacrifice home, business, way of life, preferred commuting style, etc. ST2 has created too many heartaches already. It's time to stop any further damage.
NORTH KING COUNTY	Include large scale secure bike parking for those living outside of a 10-20 minute walk of a transit station. 5 bike lockers won't be enough.
NORTH KING COUNTY	1. Downtown Seattle is built on fill. Obviously there are problems with the Seawall and the SR 99 tunnel. The transit tunnel under 3rd Avenue has always leaked. Do we really want to put more tunnels under Seattle CBD? 2. Light rail to Issaquah? Why?
NORTH KING COUNTY	The current light rail takes 20 minutes longer then the old routet bvg95 and the stops are farther away. Can we make sure the routes are not intentionally longer then they need to be.
NORTH KING COUNTY	I cannot, for the life of me, understand why we aren't looking into higher speed option than light rail. Do we think that's going to come anywhere close to meeting the regional needs in 25 years? Can we have a plan for our grandchildren rather than our grandparents' generation?
NORTH KING COUNTY	Ballard and West Seattle should be top priorities. Try do get some quick wins by adding stations to existing lines. This is a long plan; people like to see progress.
NORTH KING COUNTY	Thanks to Sound Transit for listening and including the SR 522/523 corridor in the final plan; BRT opens up the promise of light rail access to the north Lake Washington communities; The parking garages are extremely important elements of access by our community to this transit corridor, especially to Lake Forest Park; The sidewalks will, for the first time, open up safe access to this transit corridor for our citizens, especially in Lake Forest Park; The early construction schedule is a win/win for the communities and Sound Transit, as it coincides with the opening of the North LINK light rail stations.
NORTH KING COUNTY	Having light rail up into the Everett/Boeing area should be done quicker as that area is responsible for most of the traffic in Snohomish County. Rapid bus lines going from Boeing to Snohomish/ Monroe would be good too.
NORTH KING COUNTY	I am a strong supporter of public transit. My biggest problem is getting to my specific destination after arriving via light rail. Otherwise the faster you can get the Seattle metro area linked by non-car movement the better!! I have no problem increasing my taxes to help this measure.
NORTH KING COUNTY	Looking at Ashway P&R and 164th and I-5; why no north bound HOV ramp in center lanes? The route buses have to take to cross over all lanes of traffic to exit and enter p&R makes me question the transit ability to make smart decisions. Why would I trust you with more money/projects when I see how that one was done. You can't hold the people hostage by creating traffic issues so you can fix them.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	bring back 43 bus from 15th ave to uw campus at all times of day
NORTH KING COUNTY	Very glad to see this level of interest and foresight in the region.
NORTH KING COUNTY	Please provide free station parking. This is a high need at all stations if you want users to access the rail. Not all live with in walking distance.
NORTH KING COUNTY	Rather than only raising taxes on motorists, property owners, and businesses, couldn't there be a slightly smaller tax along with higher fares for these services? Maybe even just charge more for fares and make all tickets good for 1 day. The value of the fare would go up along with the cost then.
NORTH KING COUNTY	I am STRONGLY opposed to the expansion of multiple high density units in residential areas
NORTH KING COUNTY	<p>In general, I greatly support the plan and what it is trying to accomplish. That said, given the timeline on this, I know a lot of people-- in particular those who don't work ordinary commuting hours or who might have some accessibility issues (for example, physical disabilities, whether in a wheelchair or just unable to walk long distances without a lot of pain) end up getting the short end of the stick.</p> <p>My concern would be that in focusing on the great numbers of commuters, a lot of the more vulnerable populations who really depend on public transit are getting thrown under the bus, so to speak. For these people, I'd like to see more transit that takes travelers from one in-city location to another (what metro buses in Seattle have been doing for years) in conjunction with the light rail. Instead of having one come every ten minutes for light rail, but only during certain hours, I'd really prefer extended hours. In particular, the light rail that goes to Capitol Hill really needs to be running till at least 2am, because of the bar scene there.</p> <p>I'd also like to see more support for people with physical impairments.</p>
NORTH KING COUNTY	Let's just do this. We should have done it back in 1968 (Forward Thrust). I was too young to vote then but will vote for it now.
NORTH KING COUNTY	Help fund the project with an income tax imposed on the wealthiest 5% of residents.
NORTH KING COUNTY	I'm originally from NY. This should've been done decades ago. We need a subway or rail system that is separate from the traffic. Just do it.
NORTH KING COUNTY	Reduced weekend bus service is counterproductive - makes it harder to get to light rail. Continue to support both bus and rail service and bring back our weekend 71/72!
NORTH KING COUNTY	This plan focuses on commuters. There is a serious need to provide neighborhood links so that we can actually access mass transit. Also, there is never enough parking planned, essential because we cannot get to mass transit without driving in most areas.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I am generally not in favor of increasing the sales tax because it is already high and is a regressive tax. If projects could be completed more quickly, that would be better since the population in the area needed a transit system earlier. The Sounder train from Edmonds to Tacoma is good except that there are frequent mud slides on the tracks north of Shoreline so I wouldn't really count on the train as a commuter option.
NORTH KING COUNTY	I am a home owner in shoreline. I live a rocks throw from I-5. light rail will be running next door. my property values are going to be effected, without sound walls and safety measures implemented to mitigate any future issue's. I didn't buy this house to get caught up in all this, I just would like assurances that my little street will not become a causality of sound transit, therefor I don't support any tax increases.
NORTH KING COUNTY	It's unfortunate that this plan wasn't developed 15 years ago. Kinda late to the party.
NORTH KING COUNTY	Thank you for listening to the communities in along SR 522. Improving transit access will make our communities safer and more healthy. I would support this project being implemented in an even shorter time frame for a little more money.
NORTH KING COUNTY	too slow and too expensive to add transit. this should not take over 5 years to complete and by the time it's done it will be obsolete. I won't vote for any of this since they wasted the line by the airport anyway...goes by a big mall (NO STATION), goes by BOEING and the museum of flight (NO STOP)...heads to the WORST part of Seattle Rainier valley...why didn't they connect SCC and Georgetown to this and skip the ghetto side of the city??? I have a no confidence in this plan since I may be dead by the time they get any of it finished.
NORTH KING COUNTY	The circulatory system that is our transportation network runs on cars. I support mass transit, but cars are not evil. Park and rides that are secure and safe from burglary are necessary if we are going to keep the cars that people will own no matter what off the road at least some times. I like the idea of adding more lanes to existing highways. Double decker 405 and 5, that would be a game changer.
NORTH KING COUNTY	More light rail more places faster This area is too far behind to wait. Light rail should be everywhere and now
NORTH KING COUNTY	Go Sound Transit, go! :) Thanks for the work you do!
NORTH KING COUNTY	Project timeline is too slow. Complete projects as quickly as safely possible, with priority given to lines closer to downtown and urban villages, where transit ridership is highest.  Add light rail project from Ballard to UW, a very important transit corridor.
NORTH KING COUNTY	I think that these plans are grandiose and above your paygrade and abilities. Tax money is not infinite.
NORTH KING COUNTY	White Center light rail.
NORTH KING COUNTY	I wonder how much of our tax money was used on the 405 debacle and why we were paying for this (despite opposing it) and are now being punished for the decision so carelessly made by the WSDOT.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Make survey shorter.
NORTH KING COUNTY	<p>I have four basic concerns:</p> <ol style="list-style-type: none"> <li>1. Cost - \$17 per month is way too expensive and will hit citizens hard. What will it cost to take light rail, etc. in the future? Will the use of these projects leave out populations who cannot afford the fares or the taxes?</li> <li>2. There are areas not served well, not connected. What happens to these neighborhoods over time?</li> <li>3. Effects of re-zoning to meet transportation infrastructure. Will this leave families out who can no longer afford the rising property taxes near transportation zones? Will neighborhoods erode away and become business districts?</li> <li>4. We need more information on the impact to the environment - pollution levels, vegetation, birds, etc. Should there be more exploration on solar powered items?</li> </ol> <p>Thank you very much for allowing this feedback forum, [name and email]</p>
NORTH KING COUNTY	I am extremely supportive of light rail and rapid transit. I have had it with the money being spent on biking improvements. Money NOW needs to be spent on large scale transit projects that will only get more costly and disruptive to build over time. In city projects will be most disruptive. Biking enhamenys can be added later.
NORTH KING COUNTY	I STRONGLY SUPPORT ANYTHING GOING TO EASTGATE
NORTH KING COUNTY	<p>A few thoughts:</p> <ul style="list-style-type: none"> <li>- It is shameful that the 520 bridge wasn't planned to have light rail across it. The NE Seattle - Kirkland / Redmond connection is a glaring miss.</li> <li>- Bike access, especially family bike access, should be added to light rails through a flex car that accommodates larger bikes.</li> <li>- Bike lockers at stations is absolutely necessary to support multimodal commuters.</li> </ul>
NORTH KING COUNTY	Accurate overall budgets and realistic implementation plans are critical. Frequent public updates and effective oversight activities are essential for any of these plans to have a chance or gain support.
NORTH KING COUNTY	Provide lots of parking at stations. Stations should not turn every neighborhood into what Ballard has become.
NORTH KING COUNTY	It is unfortunate that instead of high-speed monorail service, which could be already operational and for less cost than light rail, we are still going 'full steam ahead' with an extremely costly rail system that when completed will be just as slow as taking a bus, and twice as slow as driving a car. "ST" = Slow Train.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>1. We in District 7 prefer the neighborhood proposed alignment West of 15th with a stop at Dravus and a tunnel between Dravus and Ballard</p> <p>2. We propose that a Ballard stop for Sounder be added so NW Seattle riders get something for their tax money sooner than 22 years.</p> <p>3. Please prioritize productivity (i.e. Number of projected riders to NW Seattle) and expedite Downtown to Ballard construction.</p>
NORTH KING COUNTY	Would like to see HER come online faster and would make connections for Ballard and West Seattle a priority.
NORTH KING COUNTY	There have got to be provisions for the poor and the elderly. They have to be included in the equation or it will be another project for the have's, leaving the have nots on the side of being left out..... as usual !!!
NORTH KING COUNTY	Less bike lanes please
NORTH KING COUNTY	I support the plans but not when they come at the cost of decreased access to bus access. The deleting of 71-74 bus routes to downtown and the new limited hours affect me greatly. The light rail also does NOTHING for me. It is a 30 minute walk to get to the station from where I live. If I took a bus down to the station it would be \$10 a day to get to work, which I can't afford. Taking 71-74 used to take me ~20 min to get to work now it takes me about an hour most mornings. The changes that are going on have negatively affected me.
NORTH KING COUNTY	The tax burden of this massive development project would be better funded by supplementing the current proposed funding strategy with other sources. I believe that a project of this size (and benefit to WA) should not solely be locally funded. In spite of the heavy political lifting involved, the state at large should be sharing the financial burden. Lacking a state income tax, the financial environment doesn't presently exist to support this kind of "dream big" project, in spite of its importance. Too many infrastructure projects are badly underfunded, or not presently funded at all. With sales tax, special fees and property taxes as the sole sources of revenue for infrastructure, WA does not have a robust and mature means to support projects like this, which are nonetheless critically important to our quality of life.
NORTH KING COUNTY	In your ideal world people get up walk to the bus stop wait for a bus to the light rail, wait for the train ride it as far as they can to wait for the bus, to get near their destination then walk to it. Here's a reality check, no one has that much time in the day, especially to do that both directions. Most people need to get their children to school, and at least once or twice a week have errands to run after work on the way home. If you had parking near the light rail stops I would fully support this project. You are never going to get people to completely get rid of their vehicles. Just having parking near a station people could get to the city and around without commuting in and causing congestion while still able to get home easily.
NORTH KING COUNTY	I am not in favor of regressive sales tax to fund sound transit.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	By the time you actually complete the proposed projects, the greater Seattle area will be totally immobilized by gridlock. You need to prioritize the light rail extensions to West Seattle and Ballard.
NORTH KING COUNTY	Connecting Universities to major cities
NORTH KING COUNTY	the joke is taxes to middle calss home owners and retirees. you have no middle class residents to pay for this- the homeless can not and the elderly will all be dead by 2022
NORTH KING COUNTY	I'm sure you hear this A LOT, but build the Ballard and West Seattle lines quicker.
NORTH KING COUNTY	The proposed funding continues ST 2 and adds ST 3 taxes that are very regressive (sales tax) and regressive (car tabs and property taxes). We have to find a better way to fund transit expansion in our region.
NORTH KING COUNTY	As a daily commuter to Seattle I'm concerned that our focus is on building mass transit as a solution and less of a focus towards commuters actually USING the services these plans would provide. For example, the last metric I heard about residents who lived in the Seattle area stated something in the ball park of up to 50% lived within 2-5 miles of their work place and they chose to drive their own car, not use the bus, walk, or cycle to work. When are we going to see initiatives/plans which focus on getting people opt-in to take the bus, cycle, or walk and using the current system in place today? I really have a hard time supporting these plans when the time, money, and effort is spent on building something new and not promoting the current use of what we have today. I've lived here 99.9% of my life and have yet to see a program which is effective in promoting the use of mass transit for the majority of commuters.
NORTH KING COUNTY	The overall expense is way too much.
NORTH KING COUNTY	Ballard to west Seattle via down town
NORTH KING COUNTY	It doesn't sound as though anyone but county taxpayers are being assessed for this mass transportation plan. What about assistance from the federal or state government? Washington State urban taxpayers cannot continue to foot the bill for the great engines of creativity, innovation, entertainment and growth in Washington by themselves. What about a state income tax that finally touches the 1% in our state? We need more financial solutions than those provided by this plan.  I think that it is more urgent to connect the Ballard and Crown Hill areas of Seattle with link rail before some 22 years.
NORTH KING COUNTY	You should ensure that Georgetown and Southpark are served well by the light rail. This part of town has both increasing residential density and ongoing daily commuters for work; the area is a go between for W. Seattle, Beacon Hill, Sodo and other areas. Light rail and better transit service and access will improve the development of this area. The transit maps should stop looking like routes to avoiding Georgetown and Southpark and start looking like they're serving those areas. Thanks!
NORTH KING COUNTY	It's all about that light rail baby! And make the monorail orca friendly!
NORTH KING COUNTY	I would strongly support expediting the plan. Cut the timeline in half.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Expansion of rapid transit to Renton is critical and it falls among the lowest priorities. So it should be focused on sooner in your list of priorities.
NORTH KING COUNTY	It is imperative that transit be convenient and faster than the alternatives. Ballard and west Seattle are heavily populated with people who would like to use transit but are heavily under serviced.
NORTH KING COUNTY	Need to do Ballard and outskirts of Seattle sooner. I can't use service today.
NORTH KING COUNTY	Drop "Light Rail" from the name and just call it "THE LINK" or " SEATTLE SUBWAY LINK", because technically it IS a Subway if the rail goes below ground, which it does !  Also more visible signage where the Seattle Subway Link stations are (and in future) because the "T" sign is way too small. Maybe lite up with a eye new catching design !?!?!
NORTH KING COUNTY	Ballard service must start sooner. Don't add stops to existing line, it's too slow. Prioritize faster service, less fancy stations. Current service to airport is slower that metro 194 route, door to door.
NORTH KING COUNTY	This is a terrible survey. It is way too complicated and your results are going to be very skewed to people who are already predisposed to heavy support and heavy taxation for mass transit in a region that does a terrible job in planning routes. No park and ride at any of the Sound Transit terminals in Seattle? Nowhere to even drop passengers off? How are they supposed to get to light rail, fly?
NORTH KING COUNTY	Over time I would also love to see light rail along highway 520 - from UW to Kirkland and then tying back in to Bellevue, or heading north. Light rail is essential because it is not dependent on road traffic - hooray for light rail!!
NORTH KING COUNTY	Stop forcing homeowners to bear the brunt of the transportation improvement costs via increases in property taxes. I am on disability and can barely afford to remain in my home much less pay hundreds more each year in property taxes to pay for a transportation system that should be funded by a state income tax similar to most other states in the U.S. instead of the kinds of regressive taxes that punish the poor and those living on fixed incomes. The property tax on my modest, 2 bedroom, 1 bathroom home exceeded \$6,000 this year, nearly 25% of my annual income! As much as I support mass transit, you simply cannot continue funding the process on the backs of homeowners like me and the poor who are being burdened with a disproportionate share of the costs of these projects.
NORTH KING COUNTY	What would it take to get this done in 10 years? Seattle is so overly congested already and the thought of waiting 25 years is ridiculous.
NORTH KING COUNTY	I don't trust that we have people competent in doing a project of this size with out a lot of waste and without stupid design. Just look at your track record. Just don't trust you with anymore of my money.
NORTH KING COUNTY	Light rail is inaccessible to me because there is no parking. Park and rides are linked to buses, and even they are miles away.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>General comments are:</p> <ol style="list-style-type: none"> <li>1. Transfer links should be better planned -- the distance that buses drop people off for UW link station limits ridership by people with luggage, families with children, older populations, and those wanting to move rapidly and conveniently from start to end point. Northbound bus stop at UW link is too far from station and stops traffic because it was not inset from roadway. Buses should go close to UW link.</li> <li>2. Buses need to get out of traffic!</li> <li>3. Parking at transit centers needs to be increased. Northgate center lot is filled by 8am every week day.</li> </ol>
NORTH KING COUNTY	<p>I am very frustrated that the Sound Transit projects seem to operate in their own silo, and don't connect well with other forms of transit. Take a look at the location of the Husky Stadium Link Light Rail station, for example. Very hard to transfer to/from buses on Montlake Blvd, and basically no transfer to buses on 520. You guys spend a lot of \$\$, and don't spend it particularly well. Very expensive, very slow construction. Why??? Makes me reluctant to vote for more \$\$.</p>
NORTH KING COUNTY	<p>The Rapid Ride seems like a huge waste of money to me. The 15 and 18 buses to Ballard were more effective and just as fast as the D line. We should be building a system that does not share the road with traffic.</p>
NORTH KING COUNTY	<p>keep property taxation low. seattle is run by liberal/progressive nutjobs who have increased taxation beyond what is reasonable. I am not in favor of this proposal b/c middle class residents of the city are living with stagnant wages and big government is unaccountable and very wasteful of taxpayer's money. If this measure passes, my family has to take a pay cut as the government redistributes our very limited income monies. KEEP PROPERTY TAXATION IN SEATTLE LOW. HELP THE MIDDLE CLASS OF THE CITY SURVIVE IN THE CITY/COUNTY. KEEP GOVERNMENT ACCOUNTABLE BY KEEPING GOVERNMENT SMALL. OUR COMMUNITY IS VOTING "NO" ON THE ST3 MEASURE. LET CONSTANTINE FIND ANOTHER LESS REGRESSIVE SOURCE OF PAYMENT FOR THIS PACKAGE.</p>
NORTH KING COUNTY	<p>Several questions give a 1 to 7 rating choice. In the written question it states, "with 1 being 'not at all urgent' and 7 being ..." Then, where a scale choice is to be made, #1 shows as "Not urgent," which to me is VERY different than "not at all urgent," making the 1 to 7 choices skewed and the survey invalid.</p>
NORTH KING COUNTY	<p>Seems more likely for this to pass if ST could provide more specifics about the proposed plans. It's a high cost for some pretty loosely defined plans. Also, these projects take time, but again, being able to shorten the delivery time might make this easier for voters to support. Many people might not support this if they're not confident they'll still live in the region in the next 20 years. Consider balancing the plan with more immediate benefits.</p>
NORTH KING COUNTY	<p>Sequence of projects does not match population needs. Even though most challenging Ballard-downtown and WestSeattle - Downtown should be done for populations that understand the greater urban need at this time. There is already traffic congestion in the central city that demands action.</p>
NORTH KING COUNTY	<p>I wish there were some statistics on who needs these programs the most, so I could make more informed decisions instead of only choosing what applies to myself.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	please bring light rail to Ballard NOW!! I own a business in dt ballard for over 20 years and there is no other area in King county then Ballard where there has been a larger exponential growth of people moving and working in Ballard and desperately rely on massive restructuring and adding mass transit to and from DT seattle and surrounding areas.
NORTH KING COUNTY	I know you love your trains, but they are just too expensive. The cost per rider is so high, they really can't be justified. If YOU want to pay for these trains yourself, please go ahead. Just don't burden the homeowner and car owner with taxes to make your fantasies come true. Why not look into making it easier for cars to access the city? Better roadways, better use of traffic signals and crosswalks. There are so many things that could be done to improve this, but you are probably unwilling to consider since this is unpopular for liberal Seattle.
NORTH KING COUNTY	Seattle should stop funding the construction of transit for surrounding communities that consistently vote down improvements. ST should focus on Seattle exclusively unless the surrounding communities agree to pay their fair share. Also for the love of god make a damn light rail line east-west from Ballard to the University light rail station.
NORTH KING COUNTY	This is all too little too late for Seattle but improvements must be done.
NORTH KING COUNTY	Light Rail plan should include EXPRESS service hitting major stops, or stopping once every 3-4 stops for faster service. A bypass rail line should be included to allow the EXPRESS train to pass existing trains. See how major cities like NYC handle this with their transportation systems. We need to be more practical in implementing the systems.
NORTH KING COUNTY	The entire project should be scrapped.  This will raise taxes on all of us, raise taxes on our landlords, who will subsequently charge us MORE rent because of it.
NORTH KING COUNTY	I just want to add that I currently commute by car because reasonable transit options from my home in Magnolia to my workplace in Tukwila are non-existent. The ST3 project would change that. I would be significantly more likely to commute via transit if these new projects were greenlighted. If there is any way to reasonably ACCELERATE the timelines proposed, I would be all for it!
NORTH KING COUNTY	Light rail expansion in Seattle has reduced not expanded my access to public transit (my one somewhat convenient bus - the 66 - has been taken off) and so my opinion has changed from "fully support" to "somewhat oppose."
NORTH KING COUNTY	I'm so impressed with Sound Transit. I use it on the days of the week I work in Seattle. Would use it more if not for a complicated work schedule that requires travel to Tacoma 4 days/week and need to pick up my child from school.
NORTH KING COUNTY	Because of its visibility, relative ease of execution, and potential ability to have a positive impact of the I5 congestion in the South end, the building of the proposed BAR station should be accelerated.
NORTH KING COUNTY	I live at 3847 24th Ave W (Magnolia) and getting into Ballard by bus takes two buses, so I'm much better off using my car. However, Ballard is extremely dense with cars. Please make it more convenient to get to and from Magnolia to Ballard on one bus!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Traffic in Ballard has become a nightmare. The plan to connect this important inner city neighborhood needs to take precedence over other proposals. We'll be dead by 2022!! Also there seems to be little consideration of east-west routes within Seattle in this proposal. Were they even considered? Thank you for the opportunity to give input.
NORTH KING COUNTY	Busses on the highway cause so much traffic. They go so much slower than cars and are switching lanes or pulling out of bus lanes into traffic that is going much faster. make a dedicated bus lane and it would so improve traffic. This is very difficult on 520 where the bus stops on the eastside of the bridge are on the inside lanes while the bus stops on the westside are in the outside lanes. slow buses moving across the lanes totally kills the flow.
NORTH KING COUNTY	Buses are a menace. I see them going through red lights all the time. The drivers are rude. I got hit by a bus on my bike. Light rail is a better option.
NORTH KING COUNTY	Build whatever you want, but I'm not riding on a bus with the dirties.
NORTH KING COUNTY	Bring back the 66express!!!!!!!!!!!!!!!
NORTH KING COUNTY	Sound Transit has a poor reputation - most people don't trust it. Pretty sure you'll do what you want - this survey and the various meetings are for show only. The Sounder rail is incredibly expensive on a per seat/per trip basis - what is the real world load factor? Buses and streetcars get stuck in traffic just like cars do (for example, see the mostly worthless South Lake Union trolley - the worlds biggest model train). These proposed projects are scheduled to take way too long - need to find a way to get it done quicker, while most of us are still alive.
NORTH KING COUNTY	Costs are too high - contracts need to be negotiated more wisely. Who pays the taxes? Just Seattle residents? Too many transportation bills and disconnected systems. We need MASS transit up and down I-5 at the very least from Boeing North to Boeing South, with LOTS of parking at the stations. JBLM is not a priority, nor out to Dupont. We need a MASS transit system up and down Hwy 167, up and down I-405, and Hwy 522, 520, and I-90. But we need MASS parking lots at the farthest ends of each system, and Light Rail and/or fast buses to points in between (larger buses aren't really the answer - but more frequent, more direct smaller buses). We need a system that isn't shut down by landslides, and operates 24/7 (people coming and going after 12pm have no transportation).
NORTH KING COUNTY	You haven't defined the length of time the taxes will be imposed. It's difficult to support something that will apparently go on forever. Also, what percent of the project is user supported versus tax supported?
NORTH KING COUNTY	Parking availability is critical. I would ride a lot more often if I could park.
NORTH KING COUNTY	Please stop eliminating current buses as you implement light rail. The current changes to the bus schedule after opening the UW and Capitol Hill light rail have been detrimental to my life.
NORTH KING COUNTY	I just don't understand why the timeline for west Seattle and Ballard light rail is so conservative. It's clearly needed.
NORTH KING COUNTY	Fares for ridership should take precedence over taxes/levies on the general population - pay for use should be the standard.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	This plan seems to be at the expense of neighborhood buses. Instead of consistent bus service in front of my house, bus route was cancelled last month and I now must walk 1.5 miles to the nearest light rail station. Not so great the older I get.
NORTH KING COUNTY	Must figure out a low-income ride option that is easily transferrable between Metro buses, light rail, and sounder commuter rail options.
NORTH KING COUNTY	Something needs to be done about the time it takes to use light rail between the airport and downtown. I live in Shoreline, and for me to use public transportation to get to the airport (or return from) takes two hours. That is bad. There is no incentive to use it. Perhaps "airport express" runs could be added from downtown or in the future, Northgate.
NORTH KING COUNTY	thanks!
NORTH KING COUNTY	All of these taxing sources are regressive and fall more heavily on the poor. Although it is no burden for me I oppose regressive taxation in general. We need progressive taxation like an income tax.
NORTH KING COUNTY	Bravo! Keep it moving. We cannot survive as the world class city we are becoming without it.
NORTH KING COUNTY	Sales and use taxes more heavily impact low income families and individuals. Please keep this in mind when raising funds for the project.
NORTH KING COUNTY	Build the UW-Ballard line
NORTH KING COUNTY	It's time that Seattle start adopting to the idea of light rail. Is it costly? Yes. Does it take a long time to implement? Yes. But you can only do so much with more roads. My understanding is that we increased in population by over 58,000 people in one year in the Seattle area. You won't be able to build roads fast enough to keep up. I am generally a conservative when it comes to government projects, but I see the value of light rail. There is a reason it has been used on the east coast, Europe, and Asia for a 100 years.
NORTH KING COUNTY	<p>I am a huge supporter of public transit, and have used ST express buses to commute to Everett for years, as well as light rail as often as possible.</p> <p>I am disappointed that Light Rail is being put forward as the solution for commuter rail to Everett and Tacoma, when we should have a proper regional rail network. Sounder fails to address this need because of high fares, lack of trains, and slow speeds. Light Rail will fail to address this need because it is an urban tramway, with slow speeds and frequent stops.</p> <p>It is frustrating to see these very necessary projects constantly funded by property levies. Development and real estate companies have seen huge windfalls from the growth in Puget Sound, while placing a crushing burden on the region's infrastructure. These corporations should be made to support the adaptation of infrastructure through development taxes and windfall taxes, as opposed to putting the burden on the people who can barely afford to continue to live in the region.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Any mitigation due to unreasonable and long term construction impacts should be included in ST3 and not depend on local crisis re-programming of existing programs and funds.
NORTH KING COUNTY	Pursuing all development with separated/dedicated bicycle access is critical. Empower cycling to be a major part of Seattle transit choices.
NORTH KING COUNTY	I am tired of increased taxes - and paRKING SPACES BEING TAKEN AWY FOR BIKES and no progress on making car transportation easier- peopl buy and need cars- I am alos tire of spending for the minority special interest groups and wasteful spending by gthe mayor of seattle and the city council ie all the money put in the stupid wasteful unethicla pronto bike progrma and aqll the \$ place on people breaking the laws and tax payers are payin gor people who break the law and live where it is illegal and use drugs illegally- why are we who work and are law abiding people paying for everything- we can barely get by as it is
NORTH KING COUNTY	There need to be a light rail directly from the Snoqualmie/issaquah/Sammamish area to Seattle. That are is becoming more and more populated and there needs to be a quick route to Seattle sooner than later.
NORTH KING COUNTY	Let's get a state income tax and start funding this stuff the right way!
NORTH KING COUNTY	Taking too long
NORTH KING COUNTY	Make Ballard to West Seattle a priority
NORTH KING COUNTY	1. why do we continue to have overlap with metro? both of whom ask for property tax increases? and in some cases work against each other (see new cap hill station and street car). 2. why are we trying to do light rail to everett when we have sounder train? 3. we need to build massive parking at north and south stations and funnel people into the system/off the roads that way. Why are we re-creating the wheel rather than learning from examples like Wash DC metro? 4. why is everything a property tax? it is disingenuous to say this will cost each adult...when it will actually cost each property owner. 5. why are we committing to technology/transit solution for 25 years from now?
NORTH KING COUNTY	Buses are not green and from a sustainability perspective are barely above single occupant vehicles with regards to carbon contribution per person. They are NOT the future. In addition, they take longer, cost more, increase noise, and create congestion by moving slowing, blocking lanes and taking lanes from traffic. Invest less in taking from cars and giving to buses. I fully support solutions like light rail, however if too much bus service is involed in the funding, I will have a hard time getting behind it. We already operate our buses in the red...
NORTH KING COUNTY	The taxes on home owners in the Puget Sound region are ever increasing in an area already dealing with a bruden of skyrocketing property values. Seattle does not need to follow in the footsteps of San Francisco. It would make much more sense to incentivize people who commute to take advantage of public transit by levying fuel and road use taxes. Property tax only serves to gentrify the region further, especially here in Seattle City.
NORTH KING COUNTY	Extend Sounder to the actual airport.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	You have ignored the problems of West Seattle. There is increasing density in West Seattle and taxpayers need the benefit of mass transit to reach jobs in the other parts of Seattle. Build a light rail along the Duamish hillside into Seattle.
NORTH KING COUNTY	Move as quickly as possible. Consider less regressive ways of finding the plan.
NORTH KING COUNTY	We need a direct line from Shoreline to Redmond.
NORTH KING COUNTY	The timeline is toooooo long. Get a bond or something! We need this before my 2 year old daughter is nearly my age!
NORTH KING COUNTY	Make sure you have a plan to improve trafic now, in addition to 8 - 25 years from now
NORTH KING COUNTY	Stop taking away bus routes or changing them for the lightrail. Yes the lightrail is a shorter trip but people already account for the bus times when making plans and we are fine with them. The stations are in awkward locations that are not for everyone and do not replace the busses that have been cut. A lightrail from Ballard to downtown is dumb and unnecessary, the D is already a good bus that comes often. The bus system is fine stop messing with it and stop building more tunnels!
NORTH KING COUNTY	ASAP--- build the light rails to West Seattle to Downtown and Ballard lines ASAP then Everett to Seattle and Everett to Smoky Point area stops at Marysville and Seattle Outlet mall and casino  Commuter rail to mt Vernon ASAP connect by express buses to ferry terminal in Anacortes to San Juan islands tourist need this route and local commuters very important foe state economy
NORTH KING COUNTY	You want to increase the usefulness, develop light rail in the city and make it so you can actually get to neighborhoods FIRST. Bring Ballard and West Seattle online FIRST; you'll get more people using the light rail and a much, much higher ridership.
NORTH KING COUNTY	The projects should be fast tracked or we will never get ahead of traffic in the region.
NORTH KING COUNTY	Reliable mass transit is so needed here. I live in Shoreline and only occasionally do I need to travel into Seattle for work during the day. It's a nightmare. We need reliable transit and we need to plan for people to walk on, park and ride, and to bring their bikes on. Let's get it right the first time (since I'm currently in a nice neighborhood that is unsafe for pedestrians due to lack of sidewalks and poorly lit streets.) Yes, it hurts to vote in \$400 cost for our family each year when we likely won't be using it daily. But Seattle and the surrounding neighborhoods really need it. It will also be an economic equalizer as people can live all over the area and still get to their jobs. Thank you.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	The taxation of landowners as the highest proportion of this project is unreasonable. I believe a state income tax should be considered. Property owners should not be penalized, ensuring property owners in all counties are charged as well would be reasonable not just Seattle homeowners who may actually only use local buses as their transportation over regional. People may have spent more on housing closer to the city in order to avoid commuting all together and now they will be assessed taxes for services they do not use. Make sure you do not penalize land owners only, realizing the majority of people living in Seattle are renters. Higher sales (but not on food or services) tax would also be an option, as people have the option to purchase non essential goods.
NORTH KING COUNTY	I think the stations are great. Congratulations to the architects.
NORTH KING COUNTY	With support for public transit in the 60's and 70's we wouldn't be in the dire traffic situation we face today. Every major city has strong transit. It's time for us to step up before it becomes even more expensive. We need to seize the opportunity to solve transit problems before it becomes cost-prohibitive to do so--and we are getting close to that point.
NORTH KING COUNTY	As exciting as these projects are for commuters there is a level of distrust that exists when talking about how the funds to make these routes get spent. When transit officials are paid well over the median income of the commuters they serve we are not solving for a problem that is relatable to those officials. They are paid to do a job just like anyone of their transit users. For them to be paid significantly higher than their riders means that they are capitalizing on a urgent need to the community. Just because it's in demand doesn't mean they should be paid more to do it. They are a civil servant afterall.
NORTH KING COUNTY	Seattle projects should be accelerated and prioritized because they serves more people faster, addresses critical capacity needs in the most dense part of the region. Suburbs are not really dense enough and don't justify being first in line (like Redmond or Everett)
NORTH KING COUNTY	Please make sure PARKING and car PICK UP and DROP OFF is included at the stations! It is ABSURD to think people won't drive to a station and park or let people off to use light ral and Sounder Rail.
NORTH KING COUNTY	25 years to complete?!! Speed it up! Ballard to Downtown taking 22 years. Start the the congestion in city to remove the burden of existing residents!
NORTH KING COUNTY	Without knowing projected cars removed from roads and levels of congestion, I can only prioritize these projects based on my own needs. I want you to put into place the projects that will have the greatest impact on traffic congestion first. The timeline is FAR too long, but what can we do now? Hindsight is 20/20 and Seattle screwed up years ago.
NORTH KING COUNTY	22 years for Ballard is just plain terrible. I would really like my future children to be able to use light rail. Please figure out how to get light rail to Ballard much sooner.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	The light rail run is too far from my home in the ranier valley which is why I catch the #7 metro bus which takes 45 minutes! to get into downtown seattle also it's very dangerous with all sorts of shady characters so added security guards would be appreciated. So all this rail planning is useless if it's not easily accessible. adding parking would be helpful and bathrooms too
NORTH KING COUNTY	I would like to see the light rail connecting Ballard and West Seattle to downtown Seattle in place as soon as possible
NORTH KING COUNTY	The tax burden is unreasonable. What keeps it all from being used is that we all need to keep a family car for flexibility and that makes it unreasonable to use mass transit since it is so expensive to use rapid transit and way too expensive to build it. Why would we need to increase what we are already paying to build the rapid transit? Tax the gas companies or car companies not us, people who can't even afford to ride. Also, the Sounder train and light rail seem to somewhat compete with each other, please coordinate them better.
NORTH KING COUNTY	No car taxes or property taxes for transit.
NORTH KING COUNTY	Please consider creating exit from express lanes I-5 northbound onto NE 65th St to avoid buses having to go through 42nd parallel to highway and then re-entering congested highway only to get off again at 65th. This can add 20 min to the commute on busy days and is one of my biggest pet peeves with road engineering in Seattle. Thanks!
NORTH KING COUNTY	My husband commutes daily across 520 to Redmond. Why? Because the closest bus to his office is over a mile away. He tried leaving a bike on the Eastside so he could bus, but it was stolen. So we pay a huge commuter toll for him to use 520. Meanwhile, our house has appreciated to 900,000 (we wouldn't be able to afford to buy it today), and we're supposed to pay .25 per \$1,000 of value???? As we reach retirement age and pay for college??? Much as I'd love to see transit improvement and expansion, I'd vote against that package.
NORTH KING COUNTY	bump up the Ballard light rail. at the rate Ballard is increasing in density, you'll regret putting it off so long.  also, stop relying on property taxes. improve efficiencies and stop wasting money on pet projects and politics. if you have to raise more revenue, focus on consumption taxes, not property taxes that drive poor old ladies out of their homes. tax the people spending money.
NORTH KING COUNTY	It wasn't laziness that prompted me to select "extremely urgent" for so many projects. Our region is clogged to the gills with traffic. If we don't support ST3, the congestion will further affect our economy and well-being. This is the right thing to do for our generation -- and the generations to come. I STRONGLY SUPPORT this work and would pay double, if it were needed.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	My comments are for all the sub-categories. The timeline is incredibly long. It seems unfathomable that even BRT could take eight years, let alone the decade plus for the better grade-separated light rail lines. Why the obsession with tunnels? Would not elevated lines be cheaper and faster to build? I marked strongly supportive of everything because all mass transit, everywhere, for everyone should be the major priority. It feels like I have to swallow the price tag and timeline, and going back to the drawing board to make it faster and cheaper is not an option, but it tastes bitter.
NORTH KING COUNTY	Would be good to just expand the current link rail to interbay/ballard/fremont - this will significantly help the bottle neck traffic you will continue to see on mercer/denny etc.. and make sure much safer transportation around the SLU/downtown area.
NORTH KING COUNTY	An integrated network of light rail and bus networks as part of transit-oriented development is essential to supporting people - not cars - move across our region. I strongly encourage ST3 to work with WA DOT, local government, community groups and other partners to ensure that pedestrian and bicycle traffic is prioritized so as to minimize the need for more cars on the road. A few specific comments on your consultation questions: - Please ensure that BRT projects move ahead alongside, but not in place of, rail. Both are essential to support development and maintenance of safe and integrated communities. - Question 13 suggests property tax is a key supplier of funds for this critical transit improvements. Sound Transit should work with State authorities to increase taxes on motor vehicles instead. Thank you for the public consultation. Please continue as these projects move ahead, in order to tap into developer and community opportunities for truly safe, transit-oriented communities.
NORTH KING COUNTY	I wish the West Seattle link was coming online sooner. I wish the light rail stations were color-coded on signage. I wish the city would help create areas near link stations to accommodate and encourage news stand and food cart entrepreneurs.
NORTH KING COUNTY	Your timelines for Ballard and west Seattle are way too long as those areas are densifying and the brt is not great. Also need to speed up construction of light rail projects. I don't think it takes this long anywhere else in the world.
NORTH KING COUNTY	This needs to move faster! Emphasis should be on transit that is not in the path of traffic.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>Light rail to West Seattle in 17 years, and light rail to Ballard in 22 years seems like the wrong priorities to me. I am fine with the cost of this plan, but not with the prioritization. Those timelines are just too long.</p> <p>Light rail to Ballard should be differentiated rail all the way through, and not include at-grade sections. Seattle needs a true subway system that does not compete with our existing congestion in order to make travel times faster via rail than by bus or car.</p> <p>For these two above reasons I would vote against this measure, despite strongly supporting transit investments in general.</p>
NORTH KING COUNTY	<p>Increasing transit options, in particular for communities of color and immigrant communities, is urgently needed. I strongly urge reviews by social and racial justice organizations and coalitions to ensure transit expanded transit services are developed with these communities in mind.</p>
NORTH KING COUNTY	<p>Prioritize Ballard light rail now</p>
NORTH KING COUNTY	<p>Sound \transit has ALWAYS MIS REPRESENTED it's value and offered disinformation about costs. In the 10years I've lived in 98115 time to the airport have more than doubled on transit at the REAL times one must be on transit to make or arrive at the times when most flights occur. You have to arrive at Seatac intake for TSA screaming and they also stager open lines poorly, so you have to get there earlier for the AM departures. When Metro had the 93 from tunnel to Seatac it was 30 minutes because there is NO traffic at 5 am. Now you must pay \$40+ to the the shuttle in order to make TSA, checkin, and boarding because Transit is too slow to gamble on and stops at all the questionable thug land stations.</p> <p>+</p>
NORTH KING COUNTY	<p>More bike infrastructure!</p> <p>Make bus rapid transit separated lane and/or grade and remove some of the stops on the existing lines.</p>
NORTH KING COUNTY	<p>Get federal funding. If they can spend 2.5 billion dollars on one military jet they can help repair the nation's infrastructure.</p>
NORTH KING COUNTY	<p>Can it be done more economically?</p>
NORTH KING COUNTY	<p>I think the entire plan is a good idea, however the cost is too high. The plan needs to be broken down into smaller parts and those funded now and other parts funded later.</p>
NORTH KING COUNTY	<p>I used to ride routes 56 &amp; 57 to down town from west seattles admiral area all the time with my kids. I haven't taken it once since the advent of rapid ride and the cut of service to west Seattle. It's ridiculous to have to take two busses for what used to be a 15 minute ride at nonpeak hours!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I'm a 69 yo man who uses a bicycle as my primary mode of transportation, cycling about 300 miles/month. I think it is extremely important that we invest more (1%) in the transit plan to make biking and walking a safe and convenient choice for getting to the train or bus. This absolutely must not be overlooked. As I age I will probably use more of a mix of bicycling and transit, but intend to keep using my own muscle power to get me around as much as I can, and I hope others will also.
NORTH KING COUNTY	I don't believe that there should be a sales tax levy because that unfairly disadvantages low income persons, instead I believe that there should be an increased income tax and captital gains tax as well as the proposed motorvehichle tax to levy the funds needed for ST3
NORTH KING COUNTY	Need ways to deal with traffic now. More rapid buses. A way to get from Ballard to capital hill.
NORTH KING COUNTY	The faster light rail is expanded the better.
NORTH KING COUNTY	Sooner!
NORTH KING COUNTY	Please focus on completing light projects in the core of Seattle i.e. West Seattle lines and Ballard lines first.
NORTH KING COUNTY	Ballard has taken on the biggest growth under HALA and 15th/Elliott is 30mph arterial that can take 45 minutes to travel via bus downtown. It deserves light rail before the suburbs. Our leaders can do better. I reject this plan as it currently stands-go back and make Ballard a priority.
NORTH KING COUNTY	Please focus on the city of Seattle where density is greatest. Connecting short well traveled neighborhoods will eliminate congestion effectively.
NORTH KING COUNTY	Fuzzy headed arithmetic 2 million adults at \$200 a year will raise 0.4 billion bucks a year for a project that should with proper management be paid off in 25 years at a cost of ~2 billion a year. Either you're misrepresenting the numbers, or you are unable to do sensible budgeting, neither is good.
NORTH KING COUNTY	I do think parking at the stations would help with ridership.
NORTH KING COUNTY	Do it right, within budget, on time. Otherwise, reduce the size of the project to something that can meet those criteria.
NORTH KING COUNTY	Taxing property, sales, and vehicles is NOT SUPPORTABLE for these projects! I support an income tax. It makes no sense to continue to rely on the exact same sources of revenue for long-term projects... especially the motor vehicle excise tax. Also, I live in an area that is represented by a dotted yellow line, indicating that my transit options will NOT improve, even though I am going to be taxed for them. This sucks. Why should I pay for something that doesn't benefit me in the least?
NORTH KING COUNTY	Why would you not start Ballard first?? This area got screwed when you all dumped density here w/o the means to move people!! Please fix this first!
NORTH KING COUNTY	Please, try to act as though there are no angry drivers that don't want to pay for us poor people and our public transit. Thats not how public transit is supposed to work. We all pay and we all benefit. Ignore them. At this point I'd be happy to see ANYTHING new being built (in terms of transit). Just build a lot... thanks!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	move faster and get more people using the system. Outlying parking is a much higher cost solution than greater access and TOD within urban areas, but if you are going to have parking, then it should be congestion priced -- charge more so that there are always a few spots.
NORTH KING COUNTY	The cost should not fall primarily on home owners. It should be borne mostly by the users. With the addition of light rail to UW, I have lost my easily accessible, fast commute to downtown. My commute time has increased substantially.
NORTH KING COUNTY	Stop with dumping money into buses. That is not very futuristic. If you want to fix the problem you need to high prioritize light rail/subways that connect all parts of Seattle as a top priority. I live in the city but I hardly travel around it anymore as traffic is a joke, parking is terrible and buses are not fast or convenient.
NORTH KING COUNTY	Completing light rail is of the utmost importance. Traffic is terrible in the city and surrounding areas. Pollution from greenhouse gasses is very high. We need a reliable light rail system yesterday.
NORTH KING COUNTY	Spend more money to get ALL of these projects done in 1/2 the time. I am willing to pay my share to make this area strong for future growth.
NORTH KING COUNTY	If the cost to tax payers is so high I would want to see the timeline of light rail executed faster.
NORTH KING COUNTY	It is necessary to think of our future. I lived 8 years in West Seattle and no live in Lower Queen Anne/Amazon - we are getting locked in and it's necessary to have a light rail that connects all areas of the city. I think it will be worth the cost to help alleviate our terrible traffic problems. Make it happen faster if at all possible. :) Thank you!
NORTH KING COUNTY	I would like lightrail from Shoreline to Kirkland.
NORTH KING COUNTY	Pursue funding outside PSRTA Boundary
NORTH KING COUNTY	Do this ASAP!!!
NORTH KING COUNTY	Please kick all of the buses out of the downtown tunnel. It's making my morning commute on the light rail messed up. My light rail - is late-, even though it's supposedly supposed to be reliable. It should not be 11 minutes to the next light rail when they should only come 6-8 minutes between (according to the hours). I have another bus to catch after that. I have work to go to. Please make West Seattle to Downtown a greater priority. West Seattle is becoming the next Brooklyn, NY. It's so important to have connections so I can live anywhere I want and not worry about the current hour and a half it takes to get home.
NORTH KING COUNTY	Combine all transit systems. Metro, Sound Transit, community transit ect. Seems to be a lot of waste in having redundant organizations.
NORTH KING COUNTY	The property tax increase you're proposing is outrageous. Outrageous!
NORTH KING COUNTY	This plan seems to help those who already live within walking distance of one of the main corridors or stations but it does not help those who do not. If I have to get into my car to get to a bus or light rail station which doesn't provide parking, I might as well stay in my car all the way to the office. I realize you can't help everybody, but I would suggest improving each neighborhood's means of getting to or from these stations or corridors, otherwise these plans are not helpful to a large number of residents.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Please work on 522 and the Seattle to Woodinville track! My boyfriend d and I use it daily and we can sometimes sit on 522 for an hour plus. Thanks for being amazing and trying to help our lives improve!
NORTH KING COUNTY	Functioning transit systems lead to an increased quality of life. I fully support the expansion. I'd also like to see more east-west accessibility within Seattle.
NORTH KING COUNTY	Funding should come from the source of the impact: big corporations. Big companies move in and they bring people with them. Traffic gets worse for the existing citizens through no fault of their own, therefore more public transport is needed. The big companies should pay for their impact, instead of taking all the money out of town with them leaving the small time worker bees with the task of figuring out (and paying for) the problems created. I'm talking about the companies who have put so many vehicles on our roads (amazon, microsoft are two that come to mind).
NORTH KING COUNTY	17 years to West Seattle and 22 for Ballard is ridiculous. Those should be 5 maybe 10 years out.
NORTH KING COUNTY	As an Architect and Urban Planner I have long been a transit advocate, but as currently proposed I cannot support ST3. The plan prioritizes suburban development and car dependence. Transit expansion should focus on the corridors with the highest potential ridership and that have the highest potential for transit oriented development. Aligning the current Lynnwood extension with I-5 and not highway 99 was already a missed opportunity, please stop the continued short sided transit planning. In the current form I will not be supporting ST3, as I feel it is a vote for more parking lots and more inefficient sprawl oriented development. Please consider your own research and support the proposed routes with the lowest cost per ridership.
NORTH KING COUNTY	Too slow! 25 years is ridiculous to complete this plan. I would be a reliable "Yes" vote if this could happen in a decade. It's embarrassing how long it took to get Light Rail to UW.
NORTH KING COUNTY	This entire proposal is obscene with the amount of money proposed against the failure of Sound Transit to mange smaller sums and promises in the past.  Fix the I5 bottleneck through downtown Seattle and reduce that daily predictable problem.
NORTH KING COUNTY	The city has managed to cram more an the planned amount of growth into Ballard. Ballard should have commensurate priority for the implementation of light rail service.
NORTH KING COUNTY	Finish this project faster. Focus on Seattle first and branch out from there. Don't be so quick to branch out and make the home base stronger first.
NORTH KING COUNTY	The whole approach is too linier
NORTH KING COUNTY	\$200/resident/year seems pretty steep to get the majority of the community to agree upon. What % of that \$200 is comprised of anticipated sales tax revenue per resident?
NORTH KING COUNTY	Move the convention center to Seattle center so you can open up I-5 thru Seattle. Better use of money
NORTH KING COUNTY	Anything will help....anything. Traffic here is at crisis stage, the \$\$ will have to coughed up by all
NORTH KING COUNTY	Thank you for your continued efforts to improve the transit in our city.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Seems that while you want to encourage bikers not enough provisions are available to bikers. Example --- only two bike holding locations on Light Rail cars. AND no bike storage at the University of Washington Husky Stadium location. VERY VERY awkward to access the UW Light Rail location. Walking over a mile to get on the UW Light Rail seems to defeat the purpose.
NORTH KING COUNTY	Students in other parts of the country ride transit for free during school hours which eliminates yellow bus traffic and grows another generation of transit users. Try it!
NORTH KING COUNTY	Thes options need to be integrated and integrated quickly. Also, are there plans to increase any capacity on I-5?
NORTH KING COUNTY	If all of these projects go through, I would no longer need my car.
NORTH KING COUNTY	Feel taxes on vehicles should be a larger source of funding for the plan.
NORTH KING COUNTY	Put west Seattle and Ballard together first. Those two are very much needed in Seattle where the highest car-less population is.
NORTH KING COUNTY	Please fast track these projects. I am willing to pay more taxes for faster completion date.
NORTH KING COUNTY	I wish there were more buses too--could be smaller vehicles on less-used lines
NORTH KING COUNTY	The I5 between Nisqually and Tacoma is has some of the worst traffic throughout the day than almost anywhere in the state and has a high rate of vehicle accidents.
NORTH KING COUNTY	<p>Unfortunately this survey is quite complicated and takes a large amount of study to understand the questions and choices. For me, as a retired transportation planning professional engineer, I understand the survey. But it took me way more than 10 minutes to evaluate and then understand just the system route map. Many of the questions required difficult alternate choice decisions. Again, not possible to complete in a modest amount of time.</p> <p>So in conclusion, I just scanned it and marked answers to just a few questions that serve my self interest, not a regional perspective at all. And, given I'm retired, I won't benefit from the ST3 directly as I'll be quite aged, if even alive at build out. But I'll get to pay the taxes.... but it's for the good of the region, so I'm in.</p> <p>But really now, who do expect to take this survey and provide meaningful input? Try harder. Do it a different way. Hire some good public outreach consultants. Ask riders on the buses and trains how they want to provide input, then fashion a survey based on their responses. But that's only a micro portion of the taxpaying population.... You need the non-users to buy into ST3, right? Good luck!</p>
NORTH KING COUNTY	We need light rail sooner. I will be retired by the time I would see any benefit. Long commutes lower our quality of life, I'm willing to pay, just hurry up already!
NORTH KING COUNTY	17 years for a solution to West Seattle's transportation problem is too long. I will not vote for any plan that takes 17 years to solve a problem that needs to be addressed now.
NORTH KING COUNTY	Please prioritize walking and biking to get to the new stations. It would be a waste not to. Make our streets safe for this to happen.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I believe that the businesses that are driving the increased congestion in our city should pay the lions share of the costs for all this transit we are putting in to accomodate their business growth.
NORTH KING COUNTY	I am not a rich Amazon Microsoft person. You are asking a lot of me to pay 400 bucks a year in our household.
NORTH KING COUNTY	Clearly, the big factor to all your lofty ideas of adding more disconnected pieces is the CONNECTORS. That is -- there needs to be bus transit from homes to get to lightrail or other modes. Parking at bus hubs or parking at light rail (for free or very low cost) is critical. And then, buses from light rail stops to all other areas is key. Otherwise, who would waste the time and cost to get from their homes to the hard to reach light rail stations or other hubs.
NORTH KING COUNTY	Project Costs: This tax, tax, tax song being sung in King County (Constantine) and Seattle (Murray) is getting to be a royal pain in the ass. There is absolutely no consideration given by these so called community leaders to the retired community and what this avalanche of taxes does to their year-to-year disposal income. You guys JUST DON'T GET IT! But we are living on a fixed income with NO to INSUFFICIENT cost of living increases to the fixed annual retirement benefits. Without taxes, we are losing our financial power because Pugetopolis has a much higher than normal cost of living. No or inadequate COIs mean we lose and when you add repeated major, never-before seen new taxes or increased levies, then it it damn impossible to support any of these fancy dreams. I'm not poor, but I'm not wealthy--I am retired military, so tax breaks if you are in the povety category don't help when you are dap in the middle of the retirement curve (e.g. 60K),
NORTH KING COUNTY	Howdy, I live near 145th and I-5. I am looking forward to light rail (2023, I believe) but pedestrian access right now is horrible... I hate walking over I-5 with just that low guardrail, and then the sidewalks along busy 145th are terribly narrow. All those signs that say No Radical Rezone? I'm like... go ahead and rezone it. Please! Thx.
NORTH KING COUNTY	Make it happen faster and push it towards zero carbon.
NORTH KING COUNTY	why does it have to take so many years?
NORTH KING COUNTY	WASTE of money.. Tired of constant property tax increases. Don't have the money!
NORTH KING COUNTY	Please, please let's get this going already. The traffic is so bad now - it doesn't matter what time of day. If I had light rail options to my office that didn't take 3 transfers and four hours one way (Seattle to Redmond/ Bellevue) I would use them!
NORTH KING COUNTY	We pay huge taxes already. This money should be found in there somewhere. We are spending millions on other projects which are not nearly as important. If all the projects, we think will be on the ballot, and involve higher taxes, pass, nobody will be able to even pay their bus fare!!! I suggest a survey on the many things people in this area resent having their taxes used for.
NORTH KING COUNTY	The Ballard and West Seattle lines should receive higher priority. Light rail is essential to travel in the region. Is there no way to speed up the process? We also need better cross city linkage, such as between Ballard and the U District.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Seattle City improvements (including Queen Anne, Ballard, West Seattle, Northgate) should be prioritized to happen much sooner than contemplated by plan.
NORTH KING COUNTY	You should focus rail and light rail on the areas where commuters are already using mass transit the most first. Ballard and west seattle should be priority 1. We need a fully connected city before suburbs. By focusing on suburban areas first you reinforces the idea of creating more Sprawl. When transit works best in urban areas it I forces more density.
NORTH KING COUNTY	Complete the Ballard line within the next 7-8 years. The population density in the Ballard, Queen Anne, Magnolia area is increasing rapidly with all the building of 4 story+ buildings and a light rail system will greatly help. Don't use the funds for busses, instead take the \$ and put it into more light rail faster.
NORTH KING COUNTY	The only way this works is to have dedicated right of way separate from private vehicles. Don't let foolish glamour projects like Seattle streetcars distract you.
NORTH KING COUNTY	22 years is way too long for rail extensions.
NORTH KING COUNTY	Seattle to Ballard higher priority
NORTH KING COUNTY	Perhaps because of geography, our Puget Sound region tends to be North-South-centric. We need more West-East modes (Ballard-Downtown, West Seattle-Downtown).
NORTH KING COUNTY	The timeline on this project is hideously long considering what has been know and what is happening in terms of growth in the region. Also there are virtually no east-west connections being considered across the city. This plan just retains the isolated E/W nature of the communities and continues to make it difficult to across the city in any way besides surface streets that have been over capacity and completely under designed for years ... wtf.
NORTH KING COUNTY	There are many riders who will benefit from expanded service but who, because they do no pay real-estate tax, will not share their fair burden. In addition, sales tax increases are about as unfair as tax collection can get. The proposed funding needs to be radically remedied.
NORTH KING COUNTY	Few of these projects actually benefit residents/property owners in the City of Seattle, yet due to the inflated property values within Seattle itself, higher responsibility for financing these projects will rest on these same residents. I haven't been opposed to increased taxes on my property to benefit the community at large, but as time goes by, I see less and less benefit to my community at small. I would like to see more equity.
NORTH KING COUNTY	I strongly support the effort to expand and improve our regional transportation system. I am concerned about the timetable for the projects. I believe many of them need to come online much sooner than what is proposed. Our region has been and continues to be woefully behind when it comes to its transportation system.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	The time line is EXTREMELY long. Technology will over take the light rail as it currently is proposed. Why not look at existing public right of way s- such as medians of highways or even the shoulders that you propose for buses - and incorporate light rail? The bus system here has been pushed onto computers as a viable alternative instead of true mass transit. Most bus trips require at least 2 if not more transfers and the down time on buses, besides the loss to investment, makes it an unattractive option. If you want to build a rapid transit system - then build it!!! Stop with the buses all the time and focus on a true system that should have been built decades ago.
NORTH KING COUNTY	Consider re-adding busses that you cut due to light rail expansion to Capitol Hill and UW. This especially applies to areas that are outside the light rail service area between UW and Capitol Hill (Lakeview blvd, Portage Bay, Eastlake Ave, SLU area). If not readding previous bus routes, consider making improvements so that busses that do serve these areas (the 70 in particular) is reliable.
NORTH KING COUNTY	between the hour's of 10:00am & 3:00pm - - I think the Rapid ride buses should stop at every stop there is a person waiting for a bus - - -I was waiting at a bus stop, in West Seattle, (not a rapid ride stop) and within a 20 minute period, 3 rapid ride buses passed me by - -the normal bus comes every 45 minutes = = = that doesn't make sense!!! - -[name]
NORTH KING COUNTY	Keep up the good work!
NORTH KING COUNTY	No more streetcars please.
NORTH KING COUNTY	[explicit] make more rail lines to the south, [explicit] the northern part of the city those [explicit] don't want rail in their neighborhoods because they are rich and racist.
NORTH KING COUNTY	The time is now! Seattle needs to come into the 21st century and build a solution to the growing population. People are going to come and the city will grow, it's time for a transportation solution to accommodate the city that we all love.
NORTH KING COUNTY	I think it is possible to do these kinds of projects fast and more efficiently. There are plenty of cities in other parts of the world who have done it. I think traffic and how we get around is THE MOST IMPORTANT thing we can do for the health, well-being and overall development of the Puget Sound region (especially for Seattle itself). Taking 12, 17, and 25 years to get this EXTREMELY important work done is just not good enough. I appreciate this survey and the ideas it contains but we can do better. I've lived in Seattle proper since 1996. We have had MANY chances to do a better job and back then it would have helped things alot today. Traffic in the last two years within neighbors let alone I-5 is horrendous and with the above timeline...I can't even imagine how we will move people around!, Thank you, Julia Wharton, Capitol Hill
NORTH KING COUNTY	I think the plans that I would support most strongly provide for more express service of outlying areas into and out of Seattle...we need more frequent, quick service for getting into and out of the city, with fewer stops along the way. For example, routes that have just a couple stops in them as opposed to routes that stop every two blocks or so. Thank you for your hard work on improving transit!
NORTH KING COUNTY	Fix the damn road infrastructure first. Our roads stink!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I would like to see the main focus on building lite rail and other transportation options that make using the freeway system less necessary. Our freeways, especially I-5, are way too crowded, and anything that gets traffic off the freeways would be beneficial. This even includes buses. More people will use lite rail if it's convenient and easy to use. For me personally since the new section of the lite rail going from Westlake to Capitol Hill and the University of Washington opened, I've used it frequently. It gets me where I need to go without having to travel slowly on an overcrowded freeway. This is something we need more of.
NORTH KING COUNTY	Property tax is a very regressive way of funding. Washington or the city of Seattle should have an income tax or other progressive tax. Just because we are fortunate to live in a valuable house does not mean we have high income. And think of retirees whose houses have appreciated, continued property tax rises push them out of Seattle. I'd happily contribute 17 per month, but .5 percent property tax is way more than that. Also, vast apartment construction in the area means they aren't paying
NORTH KING COUNTY	Please make improvements in Seattle as soon as possible! It's a mess out there!
NORTH KING COUNTY	I would like to see the 145th Rapid Transit included along with a project. While my husband and I don't currently use public transportation, we both did for our previous jobs for over 10 years. We changed jobs to work closer to home and improve our commute. I would love to see Seattle have an effective transportation system!
NORTH KING COUNTY	<p>-More light rail stations through capitol hill and at major public spaces like volunteer park, magnuson park, seaward park.</p> <p>-Parking at north seattle stations--or people will not get out of their car and into the rain to get on the light rail--- look at BART in the bay area--- everyone ride it because there is parking in the burbs. Most people in Seattle are not from Seattle anymore and we have to make it easy for them to give up their cars.</p> <p>Please connect the bike trail from under fremont bridge to ballard trail. Also, coming from the east bg trail UW, how am I supposed to get across the fremont bridge w/o killing myself(on a bike)? very dangerous for bikes.</p> <p>Traffic is so bad now, thank you for trying to do something about it.</p> <p>thanks!</p>
NORTH KING COUNTY	Seattle Downtown to Ballard transit is needed much sooner than 22 years from now. There is too much reliance on automobile excise taxes to fund these mass transit projects. Fares should be raised so that transit passengers pay more for their already heavily subsidized rides.
NORTH KING COUNTY	I can't read the comment titles on my phone. This survey is a little weird on mobile. Also I love the plan but 8 years for BUS SERVICE, 17 years to west Seattle, and 22 years to Ballard is crazy. There has to be a way to go faster than a quarter century time scale.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Ballard is being ignored.
NORTH KING COUNTY	I am concerned the non internet users that support the graham street station are not being reached by this campaign. They tend to be more reliant on public transportation and access. And there is a huge population that does have access to sound transit between othello station and columbia city station.
NORTH KING COUNTY	Higher frequency of the 132.
NORTH KING COUNTY	Run an elevated bus only lane down I-5 and I405. Connect it to transit centers with parking. Run busses down them every 5 minutes. My impression is that all these ST plans are over priced, take too long, and are ineffective.
NORTH KING COUNTY	You are going to do what your want this is all a big joke you do not care about the families that live close or next to the hi ways. I've been to several meetings on this and you already have your plans done. And when this was up for a vote the families that close or next to the hi ways should only had the right to vote then we would of seen if it pasted the families that liv more than a mile or so away from the hi ways done care.
NORTH KING COUNTY	Light rail and reliable speed transportation options are critical in the Puget Sound region and need to be moved forward even if there is opposition or resistance by the vocal minority.
NORTH KING COUNTY	Mandate/strongly urge Amazon to invest in Seattle mass transit and other improvements, given how much we have invested in them to make them a welcome addition to our city.
NORTH KING COUNTY	We need to have rapid transit, especially downtown to Ballard, sooner!!! 22 years from now is too late!
NORTH KING COUNTY	Different funding sources needed as property taxes are not fair! How many renters pay? Shouldn't they? Also funding for schools should be the priority for property taxes transportation is everyone and everyone should pay not just homeowners that is not fair. Look at other taxed fees whatever but not just property taxes.
NORTH KING COUNTY	When I moved to Seattle I had access to 5, 16, and 75, each one way, one bus for me. Now I take two to three buses to get to the same destinations. I hate transit centers. I will no longer support transit bills.
NORTH KING COUNTY	A major property tax increase is unfair, because many communities (such as mine) will not see increased transit service. Why should we pay more to see our property values actually decrease relative to those areas with good transit access?
NORTH KING COUNTY	Funding needs to come from single occupant commuters, not property taxes
NORTH KING COUNTY	The idea of a never ending tax is appalling. I am in complete opposition to this plan for the sheer size and cost as well as the non-sunsetting taxes which could go on forever without another vote. Completely unacceptable. Even if I liked the plan, the non-ending tax is alone enough for me to vote against it. I do not support permanent tax increases as they lower accountability. ST has a history with accountability in the past
NORTH KING COUNTY	I feel that light rail expansion should be first priority, and there should be more rail expansion to some of the other neighborhoods in Seattle like Fremont,
NORTH KING COUNTY	Light rail to West Seattle is needed now, not 17 years from now. Apartment buildings are rising everywhere. If you don't leave at 7 AM for an 8:30 appointment, you'll never get there on time.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	support this and anything that will help relieve the traffic which really effects quality of life here. Would prioritize as many options/stops in downtown corrdior itself. Can't we use some of this money to improve car traffic on 1-5 because even though would rather use light rail ideally, reality is will still need to use car large of the time
NORTH KING COUNTY	There is nothing in the plan that evaluates automated vehicles impact on transit.
NORTH KING COUNTY	I do not support an increase in sales tax to fund this, as sales taxes disproportionately weigh on the poor. Motor vehicle and real estate taxes are fine.
NORTH KING COUNTY	Light Rail Light Rail Light Rail  West Seattle !!!
NORTH KING COUNTY	In addition to traffic-separated light rail (which I strongly support and only wish we could spend more to build it faster), we should encourage more motorcycle usage by allowing additional benefits and safety allowances for motorcycles. Motorcycles are TINY compared to cars and you can get a lot more of them on the EXISTING road structures we already have. Let's talk about allowing lane splitting, let's talk about allowing motorcycles full time access to bus lanes, or maybe more out of the box things, like permitting them to go 5MPH over the posted limit in 40MPH or higher zones (this helps with safety, in my opinion and is an encouragement to use a motorcycle)?
NORTH KING COUNTY	I hope that future light rail trains and stations incorporate bike features (i.e. ramps, bike train cars, etc.). Thank you!
NORTH KING COUNTY	With the housing explosion in both Ballard and West Seattle, those lines should be completed now, not in 22 years. Additionally, I am not a homeowner. Between schools and transportation, Seattle homeowners are paying an enormous amount of money in taxes, while I pay little and use transportation every day. A more equitable solution should be created, Perhaps a user tax should be added to the cost of those that use public transportation, so that people like myself are not benefiting from improved transportation yet not actually making much of a financial contribution.
NORTH KING COUNTY	Transit now! Not in 25 years.
NORTH KING COUNTY	More active communication about the costs to a typical taxpayer would help more people be supportive. I think a lot of people perceive the tax burden to be very high because the program cost is high .... while the cost to each person is really very low.
NORTH KING COUNTY	an efficient, low cost bus service is the best plan.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	This survey was difficult to answer. I have no opinion on transit options for parts of Western Washington I <i>*never*</i> visit. I don't know what Tacoma needs or Everett - there is bias built in from that part. The questions are too long - I would give up on this type of survey in any other setting. Also, I can't support ANY bus "rapid" transit where there are not completely dedicated lanes. I live in Ballard and there is <i>*nothing*</i> rapid about BRT at this point. Sure, you can tap before boarding and it's faster to get a wheelchair on/off, but Seattle is dominated by single occupancy vehicles clogging the roads and the bus gets stuck. Until we commit to resolving that, I will not support BRT because the "rapid" part is inaccurate. Not connecting Ballard to the existing Light Rail to the east is frustrating. I love transit. I don't own a car. I bike everywhere. But I feel "meh" about this proposal in its current form.
NORTH KING COUNTY	Seattle projects should be prioritized to alleviate in-city congestion for everyone. Commuters going to or through South Lake Union from Ballard & Fremont don't have alternate routes to get where they are going, and that impacts people who commute from other cities & neighborhoods.
NORTH KING COUNTY	The timeline is too slow and is not focused on the corridors which yield the highest ridership. Link is a regional light rail system but the current plan doesn't factor in the equity of the communities it could serve. Continue to build the core in Seattle where residents have proven they are interested and willing to vote for and ride light rail.
NORTH KING COUNTY	You and Metro have cut so much east west neighborhood service - e.g. 25 and 43 in Portage Bay and Montlake. We elderly travelers have no way to get to the light rail stations - we used to be able to take 25 to downtown. We need to have more service on Eastlake. We voted in a tax to increase OUR service as well, i.e., east west service through the neighborhoods.
NORTH KING COUNTY	Perhaps it's too late for this, but I would like to see a greater emphasis on funding from sales taxes and property taxes than vehicle registration fees. Vehicle registration fees feel more regressive and only target car owners. However, <i>*everyone*</i> benefits from better transit, not just car owners -- thus a shift towards all residents paying tax feels fairer to me.
NORTH KING COUNTY	Thanks for all your work about this, I'm super excited about these plans!
NORTH KING COUNTY	Seattle shouldn't bear the property tax burden for improvements to the outlying areas. Infrastructure improvements in Redmond, Lynnwood, or Burien don't affect me in Seattle (for instance) and I don't care to pay for it. The tax burden needs to be applied to the localities that will benefit most from being connected with Seattle. Sales tax is not the best choice to fund this for a few reasons including that it disadvantages the poor.
NORTH KING COUNTY	Ballard light rail has been proposed to be completed over 10 years from now. I really hope this is prioritized/ accelerated to open much sooner (prefer in the next 5 years)
NORTH KING COUNTY	we need a progressive income tax now!
NORTH KING COUNTY	With the limitless expansion of tech companies in the Seattle region, how about they get taxed as well.
NORTH KING COUNTY	Really need state income tax so levies are NOT how we fund regional priorities.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>Rail should be prioritized above all else. While Bus service can provide quick wins, it's relatively cheaper to implement and doesn't address the long-term transit needs of our area as well.</p> <p>I strongly support ST3 and most transit infrastructure development. That said, ST3 is a massive plan with a massive price tag that should focus primarily on delivering long-term transit solutions.</p>
NORTH KING COUNTY	<p>This is a prime example of why this state could benefit from an income tax. The tax or fee per person should be based on income, not proximity to where someone lives. Public transportation benefits the lower income workforce greatly in their day-today lives, but being lower income should come into consideration. Public transportation benefits property owners in that their property values increase due to living in a city with public transport, and hence, if there is added value to their property, they should at least compensate more. This cost needs to be accurately floated across citizens and companies in a more fair way of monetary distribution.</p> <p>Public transportation will elevate this city from good to great and bring it up to more advanced cities. I hope we can make this happen</p>
NORTH KING COUNTY	<p>Please keep refining service already in place. We need to have northbound Route 512 running from downtown to the NE 45th Freeway Station on weekdays between 2:00 PM and 7:00 PM - a period when that service is currently unavailable.</p>
NORTH KING COUNTY	<p>I'm not supportive of adding extra sales tax onto our already extremely burdensome tax that pressures people to spend less. This proposal would push us closer to being the city with the top highest regressive taxation in the country.</p>
NORTH KING COUNTY	<p>Please stop wasting money on "faux" bike lanes.... painting a bike chevron on the street does NOTHING! It is unsafe for bicyclists and drivers alike. I doubt this region will ever become a huge biking area like Copenhagen or Amsterdam because it is TOO HILLY, it rains too much and we have long winter nights. I'd rather see funds spent on ROAD maintenance and BETTER ROAD SIGNAGE for drivers. The PNW has the worst road signage I've ever seen and I'm convinced it contributes to traffic jams as people are not forewarned of upcoming exits or even street names.</p>
NORTH KING COUNTY	<p>Light rail to east side and better north to east connections via mass transit are my top priority.</p>
NORTH KING COUNTY	<p>Why should we in west seattle wait so long for us to link light rail long with why should we cut it off at the west seattle junction there are people living behind there incase anyone has not notice by looking on the map.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>Bus service should have been increased 20 years ago. I'm concerned about new long term projects when historically we have spent billions on studies and that again on almost implementing mass transit like the mono-rail yet we have not seen any beneficial results from these and yet we are proposing more of the same.</p> <p>I need to get from West Seattle to Bellevue/Eastgate. This would be a 2 hour journey if all goes well and I can race several blocks downtown to my connecting bus. A simple addition of more bus service on more regular intervals would have alleviated much of the traffic issues and allowed us to build a light rail system that would take us well into this 21st century. Bus service is also movable to meet shifting demand. Light rail is not.</p>
NORTH KING COUNTY	<p>Where did "The ST3 draft plan would cost the average adult in Puget Sound approximately \$200 per year, or about \$17 per month" calculation come from? Why can't you just tell us that sales tax is going up X and property tax is going up Y?</p>
NORTH KING COUNTY	<p>It is essential to include park and ride options at (almost) all light rail stations! It is ridiculous to not include this and may remove my vote. Park and ride is an excellent way to manage traffic and to encourage environmentally sustainable commutes. A short drive on side roads to a park and ride station can make transit workable. Adding an additional 15-30 minutes to a one-way commute by waiting for the bus, taking the bus (which inevitably does not take the shortest route to the station) and then waiting for transfer to light rail makes it often untenable. Include parking to facilitate use or people won't use it or will fill the neighborhood parking.</p> <p>Also, this plan really takes too long. Do less, faster, for less money.</p>
NORTH KING COUNTY	<p>get them done faster, so we can use them before I retire</p>
NORTH KING COUNTY	<p>Review the findings of the University of Minnesota US study of public transit accessibility.  <a href="http://ao.umn.edu/research/america/transit/2014/index.html">http://ao.umn.edu/research/america/transit/2014/index.html</a>          Only 14% of the Seattle jobs observed in the study are accessible to residents on public transit in 30 minutes or less. Cities in the top quartile (19-20%) include Boston, Austin, San Francisco, Hartford, Providence, and New Orleans. What are they doing right?          I would focus on the cities adjacent to large waterways: BOSTON, SAN FRANCISCO, PROVIDENCE, and NEW ORLEANS, what strategies, specifically rail vs bus mix, and time of day bus frequency, contribute most to accessible transit?          I suggest an increase in bus frequency during commuter times would significantly improve public transit travel times and usage for the Seattle area.</p>
NORTH KING COUNTY	<p>Overall I support ST3 in concept. My concerns are around the slow timelines to implement certain things. Specifically the 20+ year timeline before light rail to Ballard and the East side.</p> <p>Thanks Eric Anderson</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>I absolutely think that buses should get their own lanes on highways in order to speed up bus commutes compared to driving. On any busy highway corridors where there is no bus lane, please add one!</p> <p>I also wanted to say that I am so excited and supportive of this plan - Sound Transit is the best! Thank you so much for the recent light rail expansions, and I greatly look forward to more in the future! I only wish that these projects could have received funding 20 years ago, so that I could use them now!</p>
NORTH KING COUNTY	<p>Love the new Link Light Rail access at UW Stadium. However, getting to it is difficult and slow and means a longer trip to downtown from my house than the old bus routes and/or driving. Now driving more due to loss of faster bus service.</p> <p>Also, Park and Ride at Northgate already overflows into nearby garages which are NOT designated for transit. This situation will get much worse when light rail opens at Northgate in 2021 unless additional parking is provided.</p> <p>Parking and drop-offs/pick-ups must be part of the mix!!!</p>
NORTH KING COUNTY	<p>My negative reactions to this are not to the specific plan, but rather to Sound Transit; this issue was not addressed in the survey. Sound Transit has such a miserable record--over budget, past timelines, massive screw-ups--that I don't trust the current management with anything. Have a complete overhaul of Sound Transit management, and then I'll consider supporting a plan.</p>
NORTH KING COUNTY	<p>Is there any way to increase the speed of the light rail train? Even when you catch the train right as it arrives, it runs much slower than a car. Driving from Seatac to Westlake takes 20 minutes in a car, vs. 39 on light rail. Service from downtown to Broadway and UW beats driving, but it seems like the train could go even faster. Is this a possibility?</p>
NORTH KING COUNTY	<p>The only downfall to any of these plans is Metro has re-routed their bus system to accommodate this prematurely and have eliminated many local metro neighbour buses to feed this lightrail system. It would be nice if they would stop such gun jumping and catastrophic planning implementation as now I am using a POV instead of the the transit system as I once did.</p> <p>Good luck!</p>
NORTH KING COUNTY	<p>I WANTED TO TELL YOU ALL: I am extremely supportive about expanding transit, however, as of right now, what you are doing with the bus system in the university district is absolutely HORRIBLE. My commute from the Udistrict to Georgetown area which used to take 45min - 1 hour one way is now atleast 1 hour and 15 mins! Plus we all have to take 3 transit items instead of 2 to get down there. I understand that the link up to the university district is vital, HOWEVER, transit should have waited to open up BOTH university district stations at THE SAME TIME. Not just a station that is far away from literally EVERYTHING in the Udistrict. I have to say I am disappointed, I really hope that you do something about this by the next time the schedule changes.</p> <p>Sincerely, A University District inhabitant and concerned citizen</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	As far as improvements to stations: please include greater access to ORCA refill stations. It can be difficult to find a place to refill your ORCA card immediately, especially if you don't have a car, and the 48-hour waiting period after refilling your card online can cripple a person's ability to travel.
NORTH KING COUNTY	Thank you for adding the Graham street station - it is vital to our underserved community in the south end
NORTH KING COUNTY	Better connection from Magnuson area to UW lightrail. More room for bikes on light rail
NORTH KING COUNTY	Worst 2nd page of "50% completion ever", it should have been split into multiple pages.
NORTH KING COUNTY	My neighborhood, Georgetown, continues to be poorly served by current service and left out of future plans. I also used to live in Ballard and West Seattle which all seem to be on the low priority list. Maybe you are missing the demographic of those who want to live in and near the city and be able to easily get around on transit and are instead reaching to the suburbs? I'll still have to drive downtown because it's way faster and cheaper than driving and parking at a light rail station halfway to my destination. Please focus on getting people around the core of the city before serving one or two neighborhoods in the exurbs. Thanks though, looking forward to the great future.
NORTH KING COUNTY	To call this a transit SYSTEM is a hoax. ANY transit plan that puts a large number of parking facilities at stations is a fraud. Most or all stations must have bus "terminals" built into them for taking passengers deeper into communities. Park 'n Ride stations belong ONLY at the terminus of the rail system. We need a fully integrated bus and rail system. We do not need what we have and is being proposed which will end up being numerous parallel modes.  I have lived and worked in cities with poor to great transit systems. Link/ST/Metro has all the makings of an incompetent one, every bit as terrible as Chicago and nothing at all like Toronto.
NORTH KING COUNTY	Sound Transit is like other government agencies who think that the taxpayers are ATM's with unlimited funds. Well they are not and I am sick and tired of all of these proposal from different agencies that keep asking for money. Well this taxpayer is sick and tired of these levies and Sound Transit can shove this whole proposal someplace where the sun doesn't shine and if you understand what I said I will put it plain language and that is shove this whole Sound Transit proposal up your ass.
NORTH KING COUNTY	Instead of spending such large amounts of money on building out extensions, focus dollars on maximizing ridership for the planned the programmed lines to Lynnwood, Overlake, Federal Way. Make greater investment on getting people to/from stations along the core system as opposed to extending lines.
NORTH KING COUNTY	I find that reliability is more important that speed. I don't mind if they bus/train/light rail/whatever takes a couple minutes longer, so long as I know that it will be on-time. More transit! Woooo!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	i strongly think that the city/state should further explore the option of extending the monorail to better support the Puget Sound area. expanding the monorail would be less expensive and take less space than building new light rail tracks (particularly less expensive than building tunnels, etc). i wish the city had expanded this years ago rather than building more infrastructure for buses and other transit that doesn't escape our city's bad traffic problem.
NORTH KING COUNTY	Graham street needs to happen, with a park n ride. so many people use it that as a connection to i5, having a park n ride might encourage more people to use public transportation
NORTH KING COUNTY	Build the ballard line first please
NORTH KING COUNTY	Our household would be much more open to this kind of high-cost long-range project if King County and the City of Seattle had not already passed what must be around 20 other levies, many of them for transportation improvements. We are retired and our Social Security income was not increased and the total bill onto of existing tax levies will be burdensome to us and I believe to many others.
NORTH KING COUNTY	Light rail for long distances (ie commute from north and south ends into downtown; seattle to east side) is tge way to go. Build more light rail stations and use bus service to go between these stations and into neighborhoods and along shorelines.
NORTH KING COUNTY	Raise the money by lowering or getting rid of Tax Incentives, Tax breaks for Businesses.
NORTH KING COUNTY	Just fix I-405
NORTH KING COUNTY	PLEASE BUILD THIS SOONER THAN PLANNED. I'm willing to pay more in taxes.  But I'll take this over nothing at all, so even if this is the best we can get - please give it to us!
NORTH KING COUNTY	Increasing taxes on property owners places extraordinary burden on property taxes, wh/ are already going through the roof for various reasons. A larger increase on car owners would seem more appropriate. We also need to grow up and place tolls on freeways entering Seattle (I-05, 520 and I-90), as well as along the extent of the I-405 corridor. Increasing bus service w/in the region would seem a first priority because it's cheaper and faster to build out. One never hears of building out the system using fares, wh/ must be calculated to increase over time; if not, forget about the program.
NORTH KING COUNTY	Excellent plan. Terrible timetable. I don't think it will pass with a 25 yr. timetable.
NORTH KING COUNTY	Improve disabled access and wheelchair riding
NORTH KING COUNTY	Please evaluate the impact of self-driving vehicles on Sound Transit. Thanks.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	How can anyone trust this BS? Why would your bring such a piss poor draft to the masses? ST1 was supposed to have light rail to Everett by what was that 2006? Come on get rid of the HOT air around ST aka DOW RON and probably everyone else on the board. How embarrassing 22 years from Seattle to Ballard. 25 years to Everett and Issaquah They built a rail system across the entire US in a few years. This whole thing just smells like fraud. Rail doesn't take that long to build. Your ridership numbers are crap. The subsidies per rider are off the charts. That sounder Train is a joke. Burn this ST3 draft plan and start over. OH and maybe fix the 520 I-5 I-90 interchanges and I might vote for it.
NORTH KING COUNTY	I am in NW Seattle and until recently worked in SE Lake Union-- now at UW. Need more transit options!! Light rail is best as it is independent of traffic
NORTH KING COUNTY	I would like to see the 130th St. Station changed in the draft plan from Provisional to Commitment to be Built. Besides providing improved access to residents in Bitter Lake (north Greenwood) and Lake City etc, it would be a wonderful opportunity to build a new urban community around it. Businesses, denser housing, etc.
NORTH KING COUNTY	Light rail expansion as opposed to buses is the most important thing for our city to focus on. To fix our traffic issues, more light rail is required. Also, more frequent stops downtown and in the capitol hill area of Seattle will improve functionality.
NORTH KING COUNTY	The scope of the survey is too large. How are people who live and work north of Seattle supposed to accurately assess and determine what Tacoma and Federal Way or Bellevue and Redmond need. We should be working out from the cores (Seattle/Bellevue/Everett/Tacoma) where the highest density exists. Providing access to the light rail gradually moving outward will likely match urban sprawl and urban fill. Providing places for people outside the cores to use mass transit once inside it will reduce the need for traffic in congested urban areas. Knowing the dominant patterns of workers and their commuting routes should be the driving force. Connecting Seattle to Bellevue or Tacoma or Everett may not provide the biggest bang for the buck. Giving people options to get to work from where they live should be the prime goal.
NORTH KING COUNTY	Emphasize the earlier attainable goals, such as engineering to increase the speed and reliability of Rapid Ride and express bus lines. These have more immediate pay off and then some of the more distant light rail and heavy real goals.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I think it's very irresponsible of your organization to conduct and structure the survey in the way you have. You have minimized the decision making so thr focus is on select project choices rather than openly discuss the true financial impact of what you are proposing. No [explicit] we need transit in the Seattle Metro, and every one of these projects will arguably benefit the region. What is unacceptable is the proposed total cost and your lack of framing other viable options. 50 billion ARE YOU [explicit] KIDDING ME!!! That would make our project the most expensive in the nation by a long shot at 463 million dollars per mile. That's blatant pocket lining bureaucracy at its finest and I ashamed to live in a city that wants to place the burden of such a ridiculous proposal on its residents. Cut the cost to 50 or 100 million a mile and it's still expensive but would place the entire plan in line with other light rail expansions around the nation. I sincerely hope my comments are taken seriously and posted where others can get an idea of how truly absurd this plan is but you liberal, Bernie loving hacks will just delete it or sit around your chai tea lattes giggling to yourselves how no one will be able to stop this madness.
NORTH KING COUNTY	Sound transit must change draft plan to that recommended by the North West Coalition...taking Light rail off 15th Ave and building new bridge over canal. My continued support of ST regrets this change. ST must listen to the community organizations and citizens along the downtown to Ballard route. They are represented by the NW coalition. Ignore them and support for LR will not be as strong
NORTH KING COUNTY	Build it sooner!!!!!!
NORTH KING COUNTY	Traffic in this city is only going to get worse, even with bus line improvements. Dedicated bus lanes and light rail should be the top prio.
NORTH KING COUNTY	The draft plan reduces total ST Express hours of service compared to today's service levels. This will have a severe impact on communities not yet served by light rail. In addition, the proposed timeline is unacceptable. Transit is urgently needed in this region and ST should be doing more to make it happen. Finally, ST should not be including Sounder station access and longer trains in the same question. Longer trains are urgently needed whereas station access is a "nice to have". Overall this is a mediocre planning effort and I will vote no in order to push ST to do better.
NORTH KING COUNTY	Prefer property taxes to sales taxes given income impacts and impacts to commerce.
NORTH KING COUNTY	With a limited income and the continually increasing costs associated with living in Seattle, the constant belief by the Sound Transit board that those of us who own property are an open ATM machine from which they can withdraw funds for transit is getting a little tiresome. As much as I do believe in public transportation this funding mechanism is becoming more than i can afford to carry on my back much longer, how many additional \$200.00 per year do you think I actually have. I'll tell you...Not as many as you may think.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	With increasing congestion and blockages on roadways Link to Sea-Tac has become increasingly interrupted and less reliable. And this can only get worse. Future light rail should not be mixed with car and bus traffic in urban areas.  No arrival times on monitors in downtown tunnel? Really? This should be fixed ASAP. I know you have the technology and rightly put it in the Capital Hill and UW stations. Cell phone coverage on the platforms would be an acceptable alternative.
NORTH KING COUNTY	If there is better bus connection to light-rail stations, I do not believe parking is necessary. If parking is to be provided, there should be a nominal charge to park there.
NORTH KING COUNTY	Ballard needs to be more of a priority (faster timeline and addition of a UW to Ballard line)
NORTH KING COUNTY	Tax the rich and corporations, especially Boeing. The Middle Class and Working Class are already carrying more than their fair share.
NORTH KING COUNTY	Plan is too costly and this survey gives scant, if any real information about the cost of this massive proposed expansion. Levies of this magnitude are always downplayed and the voting public is purposely kept in the dark about the real costs and cost overruns which inevitably occur. In addition, the time frame for construction is far too long. This reeks of a boondoggle waiting to happen and there is no information about oversight and who will be in charge of the project - and what their track record is for such a massive undertaking. The region does need transit but the cost of this is too high, to be borne by too few (only three counties) and the time to construct is ridiculous.
NORTH KING COUNTY	Taxes to fund ST3 should NOT include increases in sales tax. Taxes to fund ST3 should be motor vehicle, property, and/or gas taxes.
NORTH KING COUNTY	Please be as clear and transparent with the funding & timing. I voted THREE TIMES for the monorail, I do not want to go through that again. Thanks for all your efforts!!
NORTH KING COUNTY	only more taxes its only 17 per month you people are a JOKE the system in place loses money and you want to build more what JOKE
NORTH KING COUNTY	Please no link from University district to Ballard.
NORTH KING COUNTY	Timeline should be MUCH shorter. Would prioritize building out the light rail system. Buses are subject to the vagaries of traffic (even rapid transit lines) -- there's no way you're going to convince car owners to start taking the bus. I would leave my car at home if light rail was a viable option for my commute.
NORTH KING COUNTY	Better bus, bike and pedestrian access to UW station. Much of NE Seattle doesn't even have sidewalks. Consider stop along lake city way to increase access to NE neighborhoods. Density can be built there and its easier than Ballard.
NORTH KING COUNTY	I think they need to add to the study how to make mass transit more family friendly. I commute with a 1 and 3 year old and it is a challenge.
NORTH KING COUNTY	This is more of a question: curious about how the board arrived at the order of new light rail extensions?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Ballard light rail needs to be below grade and rethink the route in order to service Belltown.
NORTH KING COUNTY	The cancellation and changes of downtown Seattle routes has impacted my use of the bus system. I would recommend also looking at renewing investment in the core downtown routes.
NORTH KING COUNTY	<p>I am concerned about tunneling so much in our local soil. I have this concern because I have an understanding of how tectonic plates work, but i have also seen some correlation between "fracking" and local quakes. I understand that precautions are taken, and soil is frozen to ensure the safety of having rail tunnels underground - however, just like "fracking" messes up with the local foundation of the soil, I believe that tunneling in excess could lead to a weakening of our local foundation, too.</p> <p>I want you to consider how fascia (the web of connective tissue all through the human body, google Myofascial Massage) when torn in injury grows back in the form of scar tissue, hard, bumpy parts. Now think of our local foundation (superficial to below sea level) as similar to fascia. You're burrowing into it and cutting a long tube, think of that as a tube of scar tissue.</p> <p>In fascia, a pulling of the fascia or scar tissue deposits can increase the amount of pressure in pounds onto any given surface area of the body. What if tunneling like this is increasing the pressure in the earth's soil and encourages tectonic plate movement?</p> <p>I understand some of you might be laughing in your office right now, or you haven't even gotten this far - and if you have gotten this far and aren't laughing, thaks for humoring this massage student who really cares about not dying in an earthquake.</p> <p>Just some deep thinking after taking the time to fill out this survey. Int he grand scheme of things, my vote doesn't matter. What matters is the economic state of our cities and who is willing to spend the \$\$ on it. There are many of us in Seattle who rely on public transportation, and have no other options, who's vote will be washed away by the voices of the privileged and wealthy, who have cars. So they may not want our transit to improve.</p> <p>I value public transportation that is safe, reliable, and efficient (both for ease of use/access and for the environment). I wish there were another way to get the funds needed for this, but I also know that I have heard people talking about how getting the funds necessary would be difficult.</p> <p>Good luck to you guys.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Additional bus routes should be added, BUSES SHOULD NOT BE CUT TO FORCE PEOPLE TO USE LIGHT RAIL. Light rail access is not convenient enough to cut bus service to people more than a 15 minute walk away from any given station. The new UW station, for example, has forced bus cuts in my area and now forces me to take 3 different buses throughout the week to reach downtown. In addition, a bus downtown typically takes about 30 mins from my house while the commute to and from the light rail station totals around an hour, doubling my effective travel time. This does not promote use of the light rail, it forces me to consider ditching public transit and buying a car in order to subvert outrageous monthly fees for terrible service in my community.
NORTH KING COUNTY	would love to see all this happen. don't mind higher taxes to make it happen. if i had my way, id pay double now to get it done twice as fast.
NORTH KING COUNTY	Build more roads, less bike paths.
NORTH KING COUNTY	I am very supportive of expanding our public transit system and these issues address many of the problems traveling between suburbs and cities. What about focusing on the people who live within Seattle and addressing the overcrowded buses that slowly crawl through the city? I live 5 miles from downtown Seattle but it takes me the same amount of time to commute in as it would somebody from outside the city. Our transit options are always changing and service is often being reduced within the city. The new link stations have opened up some options but there are not great ways to connect from home to the link.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

<p>NORTH KING COUNTY</p>	<p>I view all of these initiatives as extremely urgent. The only reason I ranked some of them as a 6 is to indicate priority. The fact of the matter is, we are waaaay behind the 8 ball. The majority of these items should already be in the works. I've only been here for 20+ years but I've continually been disappointed by the area's lack of foresight in planning along with leadership's inability or unwillingness to make the difficult (and perhaps unpopular but necessary) decisions.</p> <p>If this is as good as it gets, I will support the plan. The reason I don't "strongly support" it is the loooooong timeline along with lack of connection from Ballard to UW. Getting across north Seattle is a nightmare at best conditions (now!). Knowing that the Ballard line is 22 years out makes the likelihood of a Wallingford line within 40 years pretty slim. And that's very shortsighted in my mind.</p> <p>No one likes paying taxes but I would happily have my property taxes doubled (the whole thing, not just the portion that goes to transit) if that meant the city lines could be built within the next 15 years. And as yesterday's breakdown of the Ballard bridge (which snarled traffic throughout Ballard, Interbay, QA, Fremont and Wallingford) so aptly illustrates, the Ballard line should NOT be dependent on an operable bridge. That's begging for problems and scheduling delays.</p> <p>As you reading this works in transit, I'm realize I'm probably preaching to the choir. thanks for doing what you do. Just please, do what you can to make it happen faster!</p>
<p>NORTH KING COUNTY</p>	<p>Build it and they will come. Look at Link ridership after opening UW.</p>
<p>NORTH KING COUNTY</p>	<p>PLEASE DO WHATEVER YOU NEED TO FIX THIS TRAFFIC NIGHTMARE. I DON'T CARE HOW MUCH TAXES IT COSTS.</p> <p>ALSO, SPEAK TO COMMUNITY TRANSIT TO SEE IF THEY CAN INTEGRATE BETTER. ALSO, A TRAM CAR (OR LIGHT RAIL OR BRT) ON 196th IN SNOHOMISH COUNTY FROM EDMONDS TO LYNNWOOD LIGHT RAIL MIGHT HELP.</p>
<p>NORTH KING COUNTY</p>	<p>As a Native Seattleite 62ys old, over development has lead to traffic congestion that now is shouldered by the tax payers. Rich developers walk away with \$\$\$ and pay nothing for infrastructure improvements.</p>
<p>NORTH KING COUNTY</p>	<p>...far too excessive and ambitious. And nowhere is there any discussion about the horrible condition city streets are in. Shouldnt providing reasonably smooth streets be part of any 'transportation' plan that's this enormous? Why are they binary?</p> <p>Futhermore we are being taxed to death! Improving and renovating is reasonable but a plan this enormous and expensive is obscene.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Implement BRT asap where feasible along proposed light rail routes in order to provide earlier solutions, build demand, pilot useage, encourage appropriate development.
NORTH KING COUNTY	Priority should be economic equity / social justice and utilization - ensuring light rail and other reliable transit options connect lower-income areas to core job and service areas.
NORTH KING COUNTY	Let's get going!
NORTH KING COUNTY	<p>Priority number one should be the highest ridership corridors and ways to make their build out faster. 22 years to Ballard is not acceptable. This region will be choking on it's traffic to an even greater extent by then. That HAS to change! Also, if cities want to build parking then they should pay for that themselves. We are paying to build better public transportation not parking for suburban commuters who choose to drive. They can take buses to their stations just like the rest of us. When demand is high enough their options will expand. We should not be paying for parking garages at the expense of better transit in the city and region. If you want those stations to perform better then work to ensure that zoning changes will bring more residents closer to the stations who don't have to drive. That is a colossal waste of our money and will further enable sprawl development.</p> <p>Seattle must be the first priority. The spine is getting to be too long for it's own good and the outlying areas would be better served by commuter rail. Building light rail all the way to Everett makes no sense as it would take at least an hour and a half to reach the airport from there. You should expand BRT to those areas as well as Sounder service first. When the density increases enough to support light rail then assist them in building that, but it is coming at the cost of building it where we need it most which is in Seattle. We have the highest densities, the most jobs, the most people living without cars, and the greatest need fro mobility options. We support the tax increases and if you prioritize the suburbs before the neediest parts of the city then we will vote this down. Other world class cities would not build their systems this way, so why are we? Build the projects based on ridership projections, cost, and need first and throw the politics of funding out the window or we will throw this proposal out. Simple as that.</p>
NORTH KING COUNTY	<p>Please keep in mind that parking is HUGE for people to take public transportation. If not parking, having very strategic bus routes and light rail stations will help. I can not express with words how frustrating it was for me to wake up at 4 am just to make it to the Tacoma Dome Station by 5 am just to get a parking spot for my 6:00 am bus just to make it to work on time by 8:00 am. And it wasn't even guaranteed I would even have a seat/standing space on the bus because it was so crowded. I would take the 586 from Tacoma to UW Seattle. I have always loved public transportation and support anything you plan. Just please think about functionality of what you are building and planning. Cost of living is driving people out of the city into the suburbs. You might help the economy more buy focusing on getting people in and out of the city more than transferring people within the city of Seattle.</p>
NORTH KING COUNTY	It's urgent that there better coordination/cooperation between ST and METRO. The recent demise of major bus transit service through NE Seattle is a disaster.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Please please please look at Ballard and do it sooner and do it the right way! We have to meet the highest demand first!! And it must be grade separated!
NORTH KING COUNTY	The #1 priority is to introduce a line connecting downtown Seattle to downtown Bellevue. Since this is not up for discussion, I assume that we all agree.
NORTH KING COUNTY	Build a very high speed transit system to Eastern Washington (Seattle to Ellensburg to Spokane).
NORTH KING COUNTY	Your costs look very low. Estimating \$5 Million for light rail to Ballard seems very deceptively low... I think the station alone would be more...
NORTH KING COUNTY	What concerns me is West Seattle being so far away from completion. Also, that more taxes are being added for property taxes. I'm on a limited income and concerned that my taxes are going to go so high as to eventually displace me. We need an income tax in our state to cover public beneficial projects like this.
NORTH KING COUNTY	The elimination /changes to many bus lines in have made what were simple commutes much more complicated i.e: from Capitol Hill to the University business (University Way) and from downtown Seattle to the U district
NORTH KING COUNTY	In all of these projects, you need to include funding for accessibility. There have been places where this is lax.
NORTH KING COUNTY	As one who grew up using a subway and elevated transit system in another city, I would love to see Seattle have the same.  HOWEVER, property owners (and their renters, who will absorb the additional costs) CANNOT afford yet another property tax. Our housing market is already one of the most prohibitively expensive in the US, yet we endure a constant barrage of proposals calling for yet more property taxes in order to fund those proposals. This compounds the problem and makes Seattle all the less livable. I can't see the benefits outweighing the costs for anyone but those who will make money from the project.  We must find another/DIFFERENT source of funding for this program. As much as I want a subway system here, I have to vote "no" if increased property taxes will fund the project.
NORTH KING COUNTY	Property taxes are unfair to the old and poor. My parents are paying 20% of what the house cost every year. Increased value only matters if you sell. I prefer sales taxes because if you can't afford it you don't have to buy. Car taxes punish people not using the system. The bus system feeding the stations should be free, just increase the light rail fare to compensate.
NORTH KING COUNTY	Something needs to be done about the inconsistency of Sounder to Everett. The number of times it is closed for slides makes it impossible to plan an everyday commute. You never know if your trip will have be timely or not.
NORTH KING COUNTY	Bus rapid Transit is a more cost-effective and timeframe effective. Light rail too expensive and timeframes too long!!!!!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I am concerned about the costs, particularly the "additional five-tenths of one percent sales and use tax"; in Seattle and some of the surrounding areas, aren't we already up to 9.6%? Wouldn't this increase make sales tax 10.1%? Anything over 10% just seems way too high, especially if we keep pushing it up a little bit at a time. We have to draw the line somewhere, and I think that line should be that sales tax is not higher than 10% (maybe even not higher than 9.99%). I am concerned about the property taxes as well, because we still have schools to fund, and I am concerned about the project completion timeline. 25 years is a big commitment; are we committing to the tax increase that will be in effect for 25 years? I am in favor of trying to get more people moving, but have there been usage studies? People in the outlying areas that we want to connect, would they use the transit?
NORTH KING COUNTY	Great job. Just be sure to keep rider fares affordable for youth, low income and senior citizens who depend on Sound Transit in greater proportion than the average median income regional residents. All this work is for naught if it is not affordable to use the system for those with limited cash flow just doing their best to avoid traffic and get from A to B.
NORTH KING COUNTY	given climate change, we need to prioritize public transit in a way that gets people out of their cars, e.g., encourage use of bus bike and pedestrian options, reduce use of cars -- creating more parking just encourages more driving.
NORTH KING COUNTY	The new streetcar service from Capitol Hill/Broadway to Chinatown is not cited. Its pleasant and occasionally-used by us, but not essential. Bus service along the same route might be more efficient and less expensive, but if its an asset to tourists, so be it. In general, I am very supportive of rail transit, as an ex-New Yorker, but understand it can be very costly and slow to implement. I'd be delighted with express bus systems which could be implemented sooner and cheaper, without the damaging impact to businesses in the meantime.
NORTH KING COUNTY	For what it is worth, I am tired of reading about Ballard people diminishing the importance of a line to West Seattle. There are many people of diverse incomes in WS and we need access, too. Please continue to build as proposed
NORTH KING COUNTY	I strongly support all of these projects over other Seattle transit initiatives. In particular, all funding for the street cars should be instead applied to these initiatives. The street cars do not have their own right-of-ways and therefore are no improvement to our transit infrastructure, and street car tracks are a serious issue for Seattle bicyclists.
NORTH KING COUNTY	In terms of prioritizing projects coming online, I WISH for those who struggle socio-economically in the south of KING County to continue to be PUT closer to the front of the line in terms of attention. I'm celebrating the access being provided with the current light rail, tracks already laid!! Let's continue to think of the 'least of these,' as we prioritize. It's the moral compass piece, right?!
NORTH KING COUNTY	We should be trying, by any means necessary, to get these projects done on a timescale that isn't geologic. Furthermore, grade separation for all light rail lines should be prioritized so as to keep light rail moving at a predictable schedule, unimpacted by traffic delays and road signalling.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	This survey is not well designed. Most of the questions I could not answer because I do not have information regarding what is needed in other areas. Question 14 says we would pay 200 a year but does not say how many years. It hardly mentions bikes and pedestrians.
NORTH KING COUNTY	I strongly support the ST expansion plans - they are all critical - but am much less sold on the timeline and financing. 25 years to wait for light rail is way too long! I would prefer a plan that is funded well enough to make the work go more quickly. To further complicate things, the proposed funding mix makes our already regressive tax system more so by relying so heavily on property and sales tax. Aren't there any other funding options? I know, the state leg. is totally dysfunctional and we have "no chance" of getting an income tax, or a carbon tax, or getting gas taxes dedicated towards "non-highway purposes," or getting rid of some of the tax loopholes and corporate giveaways, or stopping that stupid tunnel on the waterfront and redirecting some of that money to transit. But it would be nice if ST could put some muscle into lobbying HARD for those options (or others...I'm sure y'all know much more about this than I)! It's frustrating to hear that this plan is gonna cost me \$200 a year, and as much as I love the new Capitol Hill light rail, transit fares in this town are EXPENSIVE (and my financial struggles are minor compared to a lot of folks). So, bottom line is that a bunch of taxes to fund a system that I'm already paying quite a bit to use, for improvements that won't come around until I'm in my 70s, feels a little bit like an insult and makes it tougher to support - as much as I want to.
NORTH KING COUNTY	Sooner, sooner, sooner. We need this rail syste, 10 years ago. We are growing so rapidly and this will improve the live ability greatly. Anything we can do to speed up the process.
NORTH KING COUNTY	Please plan more rapid ride buses; so much cheaper to build, so much easier to change, and much more flexible. ALSO, please consider putting public restrooms in each transit center, and each station on light rail.
NORTH KING COUNTY	This project should NOT take 25 years! It should and can be done in 8 to 12 years. Employ more people to work and GET IT DONE! The trains/buses should run 24/7. Parking hubs at major stations. You can build and expand things AT the same time to expedite things. 25 years is far too long to wait. We need a massive overhaul of public transportation here in Seattle to the surrounding areas. You want to reduce car usage into Seattle and the surrounding areas, then make this happen in 12 years or less!! Make it Green, fuel saving, planet saving, mass public transit!
NORTH KING COUNTY	Build the [explicit] thing already! I've been waiting since the 90s! What's the hold up? Studies Studies Studies!!!?! [name] 4 year Tacoma-Seattle car commuter because the trains didn't run after work.
NORTH KING COUNTY	I think the more we consider bikers in all expansions, the better for all types of commuters.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	The highest priority should be put on the following:  1) Light rail that serves every neighborhood in the city of Seattle. This should be done as quickly as possible. The more Seattle develops, the more difficult it will be to build a world class mass transit system. 2) Express light rail to cities/towns in King and Snohomish County, particularly to low income/economically depressed areas. 3) A single fare system linking Sound Transit with King County Metro.
NORTH KING COUNTY	Please fund the Graham Street Station. It was promised as part of a previous package, voted on again as part of the "Let's Move Seattle" levy. Please do not use the South Seattle community, and provide us with the infrastructure and investments that we were promised.
NORTH KING COUNTY	Please seriously consider to add NE 130 St. Station because it makes sense as a connection point for buses that are coming from the northeast (along 522) if not more local buses.
NORTH KING COUNTY	Sound Transit is something I supported both in phase 1 and phase 2. With the changes in technology, and the poor management of Sound Transit, it is time to look at cheaper and more practical solutions. In particular, electric buses should be the primary focus for any future modes of public transportation. If the I-90 expansion of light rail is stopped, I'd be more receptive to approving funding of the north / south routes as well as routes around Lake Washington.
NORTH KING COUNTY	Build it faster. Service Seattle first (Ballard and West Seattle) where higher density and property values mean the bulk of payments are coming from Seattle.
NORTH KING COUNTY	Don't like to increase sales tax. Maybe gas tax could be used instead.
NORTH KING COUNTY	- 130th Street is the best spot to connect Haller Lake, Pinehurst, Bitter Lake, and Lake City to the Link light rail via a fast, frequent bus. Congestion on 145th and Northgate Way make connecting at those stations much more difficult. - These neighborhoods are growing fast and diverse, with below average car ownership rates and a history of missing out on infrastructure investments. - It's getting a lot tougher to travel North-South; travel times on I-5 are increasing quickly. This means this neighborhood is only getting more transit-dependent.
NORTH KING COUNTY	The sooner the better! Looking forward to more traffic independent Lightrail services extending out of Seattle, and catching up to other cities of our size.
NORTH KING COUNTY	Where is the East-West connection. How do we get from one side of the city to another. Buses are slow and stuck in traffic.
NORTH KING COUNTY	Less property value tax, more motor vehicle tax!
NORTH KING COUNTY	Please speed up this process! The lightrail is a saving grace to the citizens of Seattle, we need more public transportation now, not in 22 years!
NORTH KING COUNTY	Seattle is rapidly growing, spending on transportation. Infrastructure is essential.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	This is not a good way to get feedback. Nobody is informed enough to say how important such a wide array of options might be. It's also unrealistic to ask about general support for such a plan that include so many specific things. Finally, this timeline is MUCH too long.
NORTH KING COUNTY	Burien and West Seattle need some attention regarding commuting options! Please don't forget these areas
NORTH KING COUNTY	Funding should be generated through extensive road tolls and additional gas taxes
NORTH KING COUNTY	Todos los proyectos son excelente pero mas importante son los de bellueve y mas rutas y mas cortas para ir a bellueve por ahora Es de una hora 560
NORTH KING COUNTY	With viaduct project stranding those in West Seattle, the largest neighborhood in Seattle, light rail between West Seattle and downtown should be the #1 priority.
NORTH KING COUNTY	It is terrible I constantly try to park my car at the transit stations and I can never get a space so I am wasting time, gas and money since I then have to drive to work. We need more parking at stations! It's rediculus!
NORTH KING COUNTY	Conservation zones should be established to save single family housing near rail stations to avoid creation of dense oppressive workforce housing ghettos. ST3 should include mitigation funds to preserve single family housing and build community in areas impacted by high speed high capacity transportation.
NORTH KING COUNTY	Then lightrail up 405.
NORTH KING COUNTY	25 years? We need to make this happen faster. Are we really that short of construction companies?
NORTH KING COUNTY	Parking is a must at the link rail stations
NORTH KING COUNTY	Living in West Seattle I fear feeling like we are on an Island, with terrible options. When the Alaskan Viaduct is gone and a tunnel {if ever completed which will carry fewer cars and have no exits to downtown and probably have a hefty toll} it'll be awful trying to get anywhere. Also the Vashon/Southworth ferry traffic exiting onto the bridge, then add morning/evening traffic, the bridge is clogged and nearly impossible to get anywhere. We need a train badly!!!!
NORTH KING COUNTY	I really wish the Ballard light rail would be done faster and have a little more priority. 22 years is a long time and I think that if it were finished sooner it would really show everyone the progress that can be made. It might give a glimpse into the future, results will give people faith in light rail, a lot like the Capitol Hill/ Univ. WA Stations have done. It seems like it would be a smaller project than the rest and might show faster results and make people really believe in future ST projects and believe in the projects they're tax dollars are funding. Obviously we don't want things built too quickly, we want quality first and foremost, but building stations that will show operational results the fastest will keep ppl invested. I hope!
NORTH KING COUNTY	Ballard to downtown must be fully grade-separated and not subject to delays from boat traffic through the ship canal. This will be an extremely high ridership line that we are building for future generations. It is worth taking the time and spending the money to do it right.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Hurry up!!! We need this.  Make sure to remember to maintain access and equity for all members of our community.
NORTH KING COUNTY	There has got to be other ways to fund this much needed projects. It's time to stop putting all the burden on home owners. Maybe it's time to start talking about state income tax?
NORTH KING COUNTY	You really missed the boat. SeaTac airport with the third runway is at or beyond capacity. The region could have said, "lets use Paine Field in Everett for additional air traffic and connect Paine Field and SeaTac with the light rail. Then there would have been a reason and a route to connect Everett, Seattle and Tacoma with light rail. But no. We have competing and redundant systems which go nowhere for no reason while enriching the major engineering company's and taking tax dollars from the public.
NORTH KING COUNTY	it is quite clear that seattle is trying to eliminate car driving. good plan eventually, but can't be done until alternatives are in place. what is the point of the trolley car on broadway???? destroyed lanes of traffic and parking. uses the same 1 lane of traffic. stops at the same signals as cars. runs on the same street as a bus. big expense. little result other than made the street harder to navigate. huge waste of money. how is it better than a bus? why are there no light rails on the new 520 bridge? where is all the traffic going after crossing the new bridge? still one lane entrance to I-5 north. still no more capacity on I-5. another enormous expense with little overall performance. it would be nice to get on a light rail in shoreline, or anywhere and get to the airport. why doesn't the light rail go from the airport to the rental car center?? still have to run a shuttle bus. another missed opportunity.
NORTH KING COUNTY	Traffic is awful and only going to get worse. Please, build our infrastructure as fast as possible!
NORTH KING COUNTY	Reconsider subarea equity. Could counties/subareas go it alone with ST?
NORTH KING COUNTY	Thank-you for working on this. Something is better than nothing. That said: Please prioritize the Ballard line. There must be additional funding sources?
NORTH KING COUNTY	Be sure to include all when you levy taxes. Gas taxes omit taxes on electric and hybrid vehicles which also use the road. Bicycle commuters also pay no gas taxes but cost the city millions in infrastructure.
NORTH KING COUNTY	This is the most complete and interconnected system plan Sound Transit has developed. It does the best job of bringing the promise of mass transit and light rail access to the entire region, not just the inner core along the spine. It gives the best opportunity to allow Metro Transit and Community Transit to retool bus lines to support and enhance that access.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I have been thinking about how the massive highway bridges were built back in new York and the Pa turnpike...Bonds. I think Sound Transit should approach the state legislature about the issuance of bonds...a twenty year plan is a tough sell, regardless of the funding source, but we need an escalation of the time-line, and of course not all of the proposed options will be built, but why not? How do other cities do this? How does Denver? thanks for the opportunity to extend my opinion in this process...
NORTH KING COUNTY	I am concerned that the attempt to direct buses to the transit stations is a) ineffective and b) forces people back into cars. The loss of local bus routes, while understandable in the big picture (encouraging people to use rail) means that local rides are incomplete, ineffective or nonexistent. Busing across town has always been way too much of a challenge for such a small city, but the current changes negatively affect far too many residents. If you do not provide fast bus service to the rail stations, you must provide better/secure parking at the rail stations. And there is little excuse for the poorly thought out planning that took place with the opening of the station at UW.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

<p>NORTH KING COUNTY</p>	<p>The overall project timelines are far too broad, compromised and far too long. I am an very strong transit supporter, and would not vote for ST3 in its current format because the timelines are way too long and it has too many compromises. The current project is beyond the perceived value horizon of most people.</p> <p>I realize that this may be largely due to funding, which should be addressed by looking at different funding mechanisms. Given the current funding model, either pick Ballard or West Seattle and do them right, rather than create compromised solutions that will be a disaster for generations, such as at-grade on 15th (the only major North-South corridor in the west side of NW Seattle. It seems like Ballard is a better option based on ridership and opportunity to extend the line north (I'm not saying this because I live in Magnolia). The focus of the system should be to increase the number of people who do not need to use cars for commutes. It seems like the current plan it aimed at trying to please everyone for votes. How are projects that serve suburb-to-suburbs going to help this? Will park and rides help? Sure. Put them on the periphery of the system only.</p> <p>The proposed vehicle taxes are pretty significant, while the property tax levies are pretty small. What about fuel tax, which would actually be a measure of usage that would encourage transit use (people will drive less but they can't get rid of their cars entirely). (I'm not opposed to taxes, but let's try not to be as regressive.) It seems like the capital construction costs should be attached to longer term, localized and more stable funding such a property taxes, while operational subsidies should be tied to the types of usage that we want to discourage such as fuel taxes. Paying a sales tax increase now and paying for vehicle tabs now for something that people won't see a benefit for seems a little too disconnected.</p> <p>Another big problem with Sales and vehicle excise taxes is that it places the burden of the entire system on end users now for benefits later rather than on business and property owners that will benefit over the long term from the infrastructure that is created by this system.</p>
<p>NORTH KING COUNTY</p>	<p>Integrate the already existing transit systems (monorail, light rail, and bus) into one system with stations overlapping to allow for connection between them. It is frustrating as a commuter to have to get off one, walk several blocks, wait for some time, get on another, and repeat this over and over.</p>
<p>NORTH KING COUNTY</p>	<p>Get it done, our economic growth depends on how well we move people,products and services.</p>
<p>NORTH KING COUNTY</p>	<p>If Ballard and Magnolia neighborhoods manage to finagle a measure to up the cost at the rest of the region's expense in order to get their pet line with its upgrades onto the ballot I will be strongly opposed to the entire project and vote "No" in November.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	you should work with what \$ you already have, not charge everyone more \$ for projects that will only benefit some neighborhoods. the nieghborhoods that benefit should pay, not the ones that dont.
NORTH KING COUNTY	I do not live in these areas and nothing is being done with highways in my areas of travel. We cannot even get the ferry services we need. I oppose being taxed to pay for Seattle-centric projects.
NORTH KING COUNTY	As two people that NEVER use Sound Transit because it does not serve our needs at all, we are extremely opposed to this costly and wasteful plan in any form. ST3 only benefits a small percentage of the "average adult[s] in Puget Sound". Most do not live or work on ST3 routes and would receive no benefits. We lived in Japan for over three years and understand the benefits of passenger train travel. However, the big difference between metropolitan Toyko and Puget Sound is the concentration of the population in Japan along narrow, linear corridors. Puget Sound, despite traffic choke points, has a more diffuse population density. ST3 is a waste of money, to be funded by many but benefiting only a few.
NORTH KING COUNTY	The no time line and no limit of \$50 billion or more is ludicrous. You failed to finish ST1 on time and under budget and fraudulently lied by moving the timeline by 10 years and over budget by \$10 billion. And now allege to be on time and under budget by \$200M is an insult to us. Shame on you!!
NORTH KING COUNTY	You are using 19th century technology to build infrastructure that will make traffic congestion, which is already terrible, MUCH worse, at GREAT expense to the taxpayers of Washington state, especially financially strapped homeowners. Your \$200 per year "average" cost is extremely misleading.
NORTH KING COUNTY	Property owners can not afford to always pay the bulk of any and all improvements. If you have to raise taxes to pay for these improvements, raise the sales tax to whatever level you have to and keep the property owners out of it. We are already paying to much and with many of us either retired or approaching retirement you are pushing us out of the homes we paid for and hoped to live our life out in.
NORTH KING COUNTY	West Seattle should get priority over Ballard. WS is constantly cut every time they have to cut bus routes and is constantly pushed to the wayside.
NORTH KING COUNTY	What will it benefit the taxpayers, that cannot afford to have their taxes increased.
NORTH KING COUNTY	The Ballard and West Seattle lines must be given priority. If Seattle's transit system is not widespread in the suburban rail lines into the city will mean less.
NORTH KING COUNTY	QUIT RAISING OUR PROPERTY TAXES!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
NORTH KING COUNTY	The focus should be on Seattle and across Lake Washington to get an actual transit system up and running before modifying the existing system. The timelines proposed are a joke though because in 25 years these plans will be extremely outdated. The plans need to work on shortening the timeline, even if it costs slightly more.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I have no issue with any of these projects. I have issue with how you intend to pay for it and your track record with projects like this. I am being slowly taxed out of my home by all of these levies and I am against any funding that includes a property tax increase. At the rate that taxes are going up, I will no longer live in Seattle when light rail FINALLY gets to NE 145th six or seven years. Right now I get the privilege of paying for all of these projects and absolutely NO benefit because I do not live in an area of Seattle that is getting light rail any time soon. I have to wait, and pay for, seven more years before the true northend sees any benefit. Also, there is a lack of reality when it comes to how people are supposed to get to the light rail stations. A very small percentage of the population rides bicycles year-round here. There are very few sidewalks in the Lake City area. Walking is dangerous around here. You need to provide parking. I know that light rail will be useless in my neighborhood because we have very little bus service and the proposed station is too far to walk. If you want us to use the light rail, you'll have to give us someplace to put our cars.
NORTH KING COUNTY	I consider the lack of progress to date and the cost of ST3 to be a significant waste of money and resources. None of this project will improve traffic flow, in fact, will continue to expand the 20+ years of hindering the public traffic flow due to reducing road and highway traffic lanes and charging more for what the public has already paid for.
NORTH KING COUNTY	Improvements to the 145th street corridor and the SR 522 corridor are essential.
NORTH KING COUNTY	The amount of money you're asking taxpayers to fork over is beyond comprehension. You're nuts.
NORTH KING COUNTY	Interesting that you seem to only be seeking positive comments for the expansion, and huge associated costs. Currently the subsidies per rider are outrageous, and you want more? The worst possible piece of your proposal is to block shoulders for transit, when shoulders are there for safety reasons, including stalled vehicles, and blocking them would create greater safety and congestion problems. Personally I'm sick of hearing the typical planning solution is to change people's habits, implied in your documents, and building ever bigger systems with limited , highly subsidized use. What would happen if you looked at alternative ways to move people so that convenience rather than subsidy would drive the program? It would look different, without question. For example, instead of running full sized buses on scheduled hard routes, why not consider a jitney type service, perhaps even with private systems conjoined? It works well in other countries, and provides a far greater level of flexibility, that many current non transit folks would consider. And yes, WSDOT studied that very solution a number of years ago, the studies showing that it would work well, but it was shelved because the transit people didn't see their empire growing with it. Pretty sad excuse for those who claim they want to serve the people. Let's see if we can reevaluate and really look at ALL options rather than big huge grossly expensive ones!
NORTH KING COUNTY	Sound Transit and the DOT are so far behind time lines and over budget, they should not get any more money until they can prove they can be "on time and under budget"!
NORTH KING COUNTY	NO ST3 plan at all!
NORTH KING COUNTY	Why was South Park booted?? It needs to be in this plan!!

<p>NORTH KING COUNTY</p>	<p>You are proposing the greatest waste of resources in the history of state transportation. None of these proposals, including the small number that I have some sympathy for, are founded upon the end users' valuations of the services provided. Accordingly, following an increasing trend over the last fifty years, you will continue to misallocate transportation capital but this time on a truly massive scale. You are also not addressing the even more fundamental problem of exploding costs of infrastructure, any infrastructure. While I know that you lack both the imagination and the political courage to do so you should start over.</p> <p>Start with the economic demand for transportation, including the demand of individuals to reach specific destinations as well as the demand for personal flexibility in reaching any destinations, and start pricing transportation services to match that demand. Don't just rely upon consumer surveys either, the market itself is providing a lot of information if only you would pay attention to the data it provides. If you studied demand honestly you would realize that people demand much more flexibility and that means starting with roads, not rails. To apply this information you will have to stop subsidizing one form of transportation by another; leave subsidies for the poor as a part of the welfare system instead of building them into the transportation system. If you start with raising the fuel taxes and implement traffic load pricing of major highways (i.e. a price set to guarantee a regular flow at speed X), including having those fees being paid for by public uses of those roads, where the funds received go only into roads (not the general fund or other forms of transportation), the set of prices for that service will naturally set thresholds at which consumers will voluntarily carpool, vanpool, ride the bus, adjust work hours, or hire temp cars, at which time both individual cars and the alternatives to using cars will become self-paying for those services in those economic regions where they make sense. It's still not too late to complete part of the original freeway plan for this area: take SR99 and convert it into a freeway heading southbound and take I-5 and convert it into a primarily northbound freeway, duplicating on a larger scale what was done to the streets of Seattle in the 1950's. With traffic load pricing and proper connectors between these highways the efficiencies gained will have more immediate value than anything that you have proposed. Finally if you truly price transportation services for how people value them, population density and size will reach a natural threshold where rail systems themselves will be self-sufficient propositions. When people know that their payments are going into the services that they are consuming it will be far easier to earn those payments from them. Under your plan by the time that regional demand will be high enough to pay for rail services you will have to completely replace the light rail system that you are building with a heavier one to handle the load.</p> <p>Which leads me to cost. Until about 1960 the level of subsidies in most forms of local and regional transportation were relatively</p>
<p>NORTH KING COUNTY</p>	<p>Are neighborhoods of southpark and Georgetown forgotten completely?!!!</p>
<p>NORTH KING COUNTY</p>	<p>Please STOP spending my money past my lifespan. You will NEVER be satisfied. There will ALWAYS be the need for MORE \$\$\$\$\$\$ You HATE drivers. EVERY bit of SDOT SWDOT--all DOT legislation is negatively affecting drivers. It's like you think we grew some extra hours in our days to deal with the time YOU make it take to get from A to B. One party rule in Seattle is absolutely ruining our whole state. I just want you folks to stop--you don't always have to be doing something--most of the time, the results really stink--which means you ask for more \$\$\$\$ You never stop.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	The South Park neighborhood needs to be considered. We depend heavily on public transport and currently, there is only one bus that goes into downtown, and no other buses nearby that could be alternative options. The one bus that goes to downtown only does so every half an hour - and on days that it is late, there is no other option to consider. This community is not an affluent one where we can afford to pay for parking at work - public transport is essential to our mobility.
NORTH KING COUNTY	We have missed our window of opportunity for rail in the Puget Sound region. By the time the rail proposals listed in this plan come on-line they would be obsolete - replaced by cheaper more nimble alternatives. For example, imagine an autonomous electric bus system that utilizes coaches closer in size to commuter vans. The wait could be reduced to minutes. The buses would be more numerous and schedules and routes could change depending on the needs of the passengers. It would be a functional efficient system, not an albatross.
NORTH KING COUNTY	It is extremely upsetting that South Park is not on this list. As a neighborhood that is already underserved this just sucks! I don't let my daughter take the sketchy 132 or 60- they are long and literally people have been shot. It is not safe. Kids in this neighborhood are at risk for all kinds of trouble- keeping them isolated and disconnected will only make things worse. Why shouldn't west Seattle folks- who already have the fast C line- for once have to drive down to our neglected neighborhood to catch transit instead of the other way around. It would support our floundering business district and make it safer for everyone. Plus there would be plenty of space for parking. Please please reconsider. We pay taxes like everyone else but get no service. It is scandalous.
NORTH KING COUNTY	I did not see mention of adding reverse commutes from Seattle/Edmonds to Everett on EXISTING Sounder Commuter Train. The infrastructure is already there. i would commute from Edmonds to Everett every day. I only have one bus option to get me from NW Shoreline/Edmonds to Everett every day and it's highly inconvenient and doubles my commute. I did this for 3 years before giving up. I'd like to see the Sounder Commuter Train start this reverse commute before I retire in 15 years.
NORTH KING COUNTY	Plan take too long. Would like to see less surface trains that are more dangerous and overall transit time is longer.
NORTH KING COUNTY	You're building for at least 100 years.
NORTH KING COUNTY	Light rail should be maximized as soon as possible. The Puget Sound can't wait 25 years. Put mass transit, especially light rail, on the fast track. It is an investment that will pay off in the long run.
NORTH KING COUNTY	Absolute priority should be given to preserving and then expanding below market rate housing. It would be a shame to build all of this only to have it drive out the folks that need and rely on it most.
NORTH KING COUNTY	The priority should be moved up on the Ballard to Downtown Seattle. This should be moved to an earlier phase in the plan.
NORTH KING COUNTY	It's just too expensive and focused mostly on people who already use buses. You fail to factor in the needs of families who have to use private cars. I see nothing here about traffic improvement for people like us. And the \$\$ you're putting into Pronto bikes is unethical, weirdly expensive and unnecessary.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I strongly support that Washington has an income tax. This would be a progressive tax and would also bring in money for these types of projects.
NORTH KING COUNTY	The entire light rail plan is too expensive. Tax payers who will never have any need for any of these routes will be forced to pay for it. Improve existing bus resources instead of spending all this money on light rail.
NORTH KING COUNTY	The time schedule for expanding light rail to surrounding, densely populated areas around downtown Seattle, including Ballard and West Seattle, is way too long. These areas should be a priority before extending transit to less densely populated areas.
NORTH KING COUNTY	The population in Ballard is rapidly expanding and having a significant impact on East-West traffic on arterials between Lake Union and 80th St N. This light rail project should be scheduled earlier in the master plan.  \$17 per month seems like a fairly large amount of money per household and maybe too much for many households. Not sure where else the funds will come from, but I think that this amount will be a turn off to many people. The cost will need to be very transparently justified.
NORTH KING COUNTY	Expand lightrail as a priority in high density areas, population increase will only clog highways, and we need a sustainable plan to efficiently move commuters from dense suburbs to where the jobs are, downtown.
NORTH KING COUNTY	I am concerned about funding the plan. Too much revenue is collected from property owners. Other funding sources need to be considered to spread the cost more equitably.
NORTH KING COUNTY	The Ballard light rail should connect to Northgate via Crown Hill.
NORTH KING COUNTY	I'd use the train a great deal with a stop in South Park (haha) or even with the proposed Tukwila Boeing Access Road. However, I expect that prioritizing other improvements will help the system grow.
NORTH KING COUNTY	We have no money for this and the solution, somehow, appears to be add more of a tax burden to the average adult. Incentives could be given to businesses that encourage telecommuting. This would help to alleviate a lot of the traffic issues.
NORTH KING COUNTY	TAX BICYCLES BY LICENSE PLATING THEM
NORTH KING COUNTY	The north end of the county needs to be considered for more public transit. Many people who live north would take public transit if it was more available.
NORTH KING COUNTY	25y is a long time. Any way to speed it up?  Also link rail is slow. Car to seatac from downtown is way faster
NORTH KING COUNTY	Stop at 130th is critical.
NORTH KING COUNTY	Accelerate the plan wherever possible.
NORTH KING COUNTY	Boeing is one of the biggest employers in the area. Hundreds of commuters travel to the South Patk area daily. This area should be considered for a station!
NORTH KING COUNTY	Light rail to West Seattle and Ballard should be the first priority!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Sounds like a lot of thought went into the planning and developers are well aware of the holdups and problems in each community. All cities along the I-5 corridor need alternative transportation but many riders need to DRIVE A CAR to get to the stations. Don't expect senior citizens to take up biking or walk long distances to use light rail or rapid transit. The few times I have done this, the buses were very crowded and it was very unpleasant. I prefer to drive but that's not the goal, so make it work for everyone and provide PARKING so we have no excuse for not participating and supporting these systems. I wont live to see it all happen, but I'm excited about the prospect of what this will mean to our communities. Good luck and good job so far!
NORTH KING COUNTY	I don't understand why brt takes so long. That says to me the project has not been accurately described. I also don't understand how it varies compared to other buses.
NORTH KING COUNTY	North Capitol Hill! The only bus route is the 49. If the light rail extension to Broadway & Roy is possible, it would be nice to see that extended further north and bus routes that connect north Capitol Hill east to west.
NORTH KING COUNTY	Better manage budgets overall to fund projects.
NORTH KING COUNTY	Too much parking and timelines are too long.
NORTH KING COUNTY	I strongly support the addition of light rail throughout the region. Sorry to say this, but buses suck. If I have the choice between buses or driving, I will drive. Between light rail and driving, I will take light rail. I think many people feel this way. Delaying adding light rail just delays the inevitable and will increase future costs.
NORTH KING COUNTY	Ballard subway needs to be moved up in timeline!
NORTH KING COUNTY	Create a regional system. Metro, Sounder, Lightrail, all mass transit under 1 mgmt system for efficiencies.  Also, STOP WITH THE DAMN TROLLIES. What a waste of money, parking, etc. Nothing connects, busses would have been better.
NORTH KING COUNTY	MAKE BICYCLE LISCENSES MANDATORY FOR ROAD USE....NO FREE RIDES FOR BIKES....
NORTH KING COUNTY	Why should I pay over \$4500 for a project I will never see any benefit? Ballard and Seattle are increasing in density. Housing costs much more= higher tax assessments = higher costs for this plan for people who will not see improved service for decades. Costs of land and building in city are going up faster than in outlying areas making delaying the in city projects much more expensive.
NORTH KING COUNTY	I strongly support creating a truly regional public transit for Seattle and the surrounding cities. It's vital for the economic growth, equality, and environmental sustainability of the region. I'm fortunate to live near a light rail station and it means I don't need to own a car saving me money, time, and lessening my environmental impact. This opportunity needs to be extended throughout the Puget Sound reason and I strong support the financial measures it takes to responsibly build such a system. This plan looks sound. I understand this will take time and there will be problem that arise that could not have been anticipated. Three words: It's worth it.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Please make sure that bus service or transit options exist for people to reach the light rail and be able to park there. We live in Lake Forest Park, and would definitely be big users of lightrail to Seattle, but would need a place to leave a car at Mountlake Terrace or Lynnwood. Or, an easy bus route to access the station.
NORTH KING COUNTY	You should focus on light rail inside city connecting different neighborhoods. Primarily connecting Ballard and West Seattle and other neighborhoods to downtown and South Lake Union.
NORTH KING COUNTY	The 145th bus to UW Bothell should go from 130th Aurora ave up Aurora to 205th and then go down 205th/ Ballinger way and then up bothell way all the way to UW Bothell/ Cascadia College.
NORTH KING COUNTY	Adding new station to existing light rail line in Graham Street is an excellent proposal that needs to get it done. There is a Middle School there that is located in Graham Street and I strongly agree that this needs to get it done right away. Thanks!
NORTH KING COUNTY	The ST3 draft plan includes too many projects for an accurate cost projection that will confuse voters on a ballot for funding. I think it would make more sense to the voter if Sound Transit transportation projects/improvements are introduced on a ballot one at a time. Such as proposing the extension of Light Rail and Bus/Rapid Transit improvements as each separate ballot measures with individual funding.
NORTH KING COUNTY	Too slow!! These plans are already decades behind, waiting another 25 years is too slow
NORTH KING COUNTY	Dropping the Ride Free Zone was a HUGE mistake!
NORTH KING COUNTY	I am low income. This proposal would increase the sales tax yet again, which hammers low-income residents the most. How high is too high? 15%? 20%? SoundTransit is making no attempts at all to address this issue, or to keep costs down. I know the initial suggestion to the state legislature for the money needed was far less.
NORTH KING COUNTY	Please put in a station at 130th. It makes more financial sense to put it in now instead of after the building of the rail line. Thank you. I commute by bus daily and this would greatly impact the quality of my commute.
NORTH KING COUNTY	I cannot use light rail if there is no available parking. Failure to provide adequate parking will only create additional congestion and be a waste of money if you're losing riders. Not everyone can get a lift or walk or arrange a ride to the rail station.
NORTH KING COUNTY	Light rail to Ballard would be amazing! Please start on that first!
NORTH KING COUNTY	I love the light rail, it is faster for me to go downtown and catch a bus home than it is to catch 2 buses. I realize that the feedback I provide is based on my usage of transport and how it would best serve me, but I think that you should focus on where the most traffic is coming from and have those people served by rapid transit most immediately. I think it is more important to get the most people off the road that you can. That said, it is getting prohibitively expensive to continue to own a house in Seattle when costs are continually tacked on to property tax. You cannot fund everything this way, hence my "somewhat support", otherwise you would have my full support.
NORTH KING COUNTY	Please ensure that these new taxes, costs, and inconveniences during construction do not disproportionately affect low income communities and communities of color.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	As a Seattle resident, I'm not willing to raise taxes unless we repeal others.
NORTH KING COUNTY	Cost per person should be based on income, otherwise it's too high of a burden on the poor, while the wealthy can easily support higher funding. As it is it's inversely proportionate to one's ability to afford to support the work.
NORTH KING COUNTY	Build the 130th station. It makes no sense to build a station on 130th in Seattle and not have the 522 brt line run through Lake City at 125th and connect to it. You are forcing many minorities and working poor to drive to the station or head north to 145th. It's the second time sound transit has screwed north Seattle.
NORTH KING COUNTY	<p>It is VITAL that we discuss ST3 as central to the housing/affordability crisis in Puget Sound. If we expand rail transportation we ease the burden on low wage workers who have been pushed out to Lynwood and Everett and are forced to commute, and we ease the traffic and congestion that is strangling our major arterials. Having adequate public transportation is an issue of social justice and equity. With adequate rail systems in place, people are able to live in affordable areas without suffering 1-2 hour commutes each way.</p> <p>That being said, park and rides adjacent to major light rail stations are crucial to our success in this endeavor. Especially at major commuter stops on the far ends like Everett, Lynwood, and Tacoma, plus stops that are already popular for commuters like Northgate, park and ride must be an option. The reality is that we not have the infrastructure at present to act as if our rail/transit system should be a full on replacement for personal vehicles. It is unrealistic and will deter people who may otherwise be interested in public transit as a commute option. Not to mention, failure to create park and rides may create additional accessibility issues for people with disabilities and/or mobility challenges.</p> <p>Having lived in Chicago for 5 years and then moving back to Puget Sound, I'm constantly saddened by our failure to create and implement a comprehensive regional transportation plan. For a city and region that sees itself as "green"and relatively progressive, we are woefully behind in this arena. I understand we have unique geographic challenges that other cities do not, but we purportedly have some of the most brilliant minds in tech and development living right in Seattle - what is our problem? We should be embarrassed. I am embarrassed.</p> <p>ST3 will almost undoubtedly be good for our already booming economy. Can you imagine where people would go and what they would spend if sitting in traffic and paying for parking were no object?</p> <p>I have reservations about the funding mechanism for ST3. We already have the most regressive tax system in the entire country. We over-rely on sales tax to our peril, and at the disadvantage of poor people. I believe that the corporations who call Seattle home, who bring in out of state transplants in droves and put undue pressure on the housing market, should be responsible (at least in part) for funding the solution to the problems that their prominence and success have brought to the region. Our infrastructure has helped them be successful, and they should have to give back into that system.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	We do not need light rail to Everett. It is too costly and for the same investment, we could have regular high speed buses, and possibly high-speed rail, which would be a plus. Light rail, however, is slow and is a huge waste.
NORTH KING COUNTY	I'd like to see a gasoline tax levied to support this project.
NORTH KING COUNTY	I'd prefer to remove the sales and use tax increase and replace with something more progressive. Can we consider a tax on residential property valued higher than some cutoff, maybe \$650,000?
NORTH KING COUNTY	With all of the high density buildings being constructed in the Seattle neighborhoods (Ballard and West Seattle are great examples) it seems that those neighborhood should be first on the list to get train access to downtown Seattle. I live in Ballard but work in South Lake Union. There are currently no rapid transit options. Buses are stuck in gridlock traffic along with the cars (which is why I drive - it is quicker albeit more expensive due to parking and gas cost). The bus only lanes in SLU aren't working, since the buses get stuck in the same bottle necks as the cars. With Google and Amazon expanding in the SLU region, we can't wait 22 years for a traffic solution! It will be a disaster within the next couple of years.
NORTH KING COUNTY	You need to break these up into st3, 4, 5 and maybe st6, so things can be completed and people see the progress. Then as the population changes and shifts in the region the later st plans have a better chance of being modified to serve the current (at that time) population and just a projected growth model and work environment. Working from home or regional collaborative offices may eliminate some if not much of the commute time and directions.
NORTH KING COUNTY	You have done a terrible job of informing the public and yet are pressing forward with plans. There has been no community buy in. You have simply courted the temporarily elected representatives from the communities involved. You and they think you know what is best for us, yet we know very little of the plans or how our lives will be impacted.
NORTH KING COUNTY	I would pay 3 times the amount if you had a timeline that might be completed before I am considering retirement (I'm 30). I think lame quoting, over planning and a feeling that we may never see the system fully operational are the biggest pitfalls. How about doing like Europe and hiring many times to complete segments simultaneously? Who knows what societies transit needs will be in 25 years, but we know we could use this system in the next 5 years. Always too little too late in this countries government.
NORTH KING COUNTY	Skip bus options and get straight to rail. Your timeline is too long. Hire talented managers and get rail done by 2020. It's possible, will have rapid payback. I won't vote for anything that takes too long or uses buses. Become brave, and GET IT DONE!
NORTH KING COUNTY	Why have you STOPPED SERVICE ON THE WEST Side ON CAMPUS. I have to walk 15 blocks home everyday now!!!! I've called 10 times with no reply.
NORTH KING COUNTY	The plan is great. The timeframe is absolutely inadequate and embarrassing. The 25-year plan needs to be completed in 7 years or less. We have had 25 years of growth in 5 years. Please figure out a way to expedite your plans.
NORTH KING COUNTY	Easier access from northeast Seattle to northgate station and university station. More trains!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I'm so glad that West Seattle has now been included in the light rail plan. I would LOVE to take transit to work (UW) everyday, but it takes me 1 hr. and 45 minutes (!!!!!) to travel 13 miles using the current transit system. Even though the timing of when the WSEA light rail will arrive isn't ideal for me to get to work now...I'm THRILLED that it's going to be a part of the future plans. I took the light rail from UW-Downtown and then transferred to a bus to get home to WSEA, and the light rail shaved 30 minutes off of the normal commute time. It's only going to get better - hooray!!
NORTH KING COUNTY	This plan is too timid and does not open crucial light rail lines early enough.
NORTH KING COUNTY	It is too much money to commit today for the projects. It locks the region into a capital spending plan that leaves no room for other needs and exacerbates a bad tax system. There is no guaranty that all of the projects will be built, yet the taxes are committed forever.
NORTH KING COUNTY	I propose that the system be much, much simpler to use. Consider charging one low fee, say \$1.00, no matter where you go, no matter whether you're on a bus or a train or a tram. We are a driving city, so it will take a lot for folks to figure out how to get from home to train if there's no place to park a car at the station. Consider using private developers to provide parking at stations, at least for the next few years, while we figure out how to get to the stations without driving. Other cities are really good at these things. Please, please, please keep researching other alternatives so this system is truly state of the art and worthy of this amount of money and time. Thanks.
NORTH KING COUNTY	Find other ways to finance these projects than raising property taxes
NORTH KING COUNTY	The time frame seems so far out. Graham Station directly affects us as our departure point. We would love to be able to take the train all over the area. Is it possible to add a station more quickly than the proposed time. I know many people would love to see more train/bus options as soon as possible. :-) So glad it will be happening! Thank you!
NORTH KING COUNTY	I know this is totally out of the planning committees control, but it is a shame that public transit in Washington is always supported by regressive taxes. We need a more progressive tax system to pay for improvements like this that will benefit EVERYONE in King County and can be a model for improvements to be made throughout the state.
NORTH KING COUNTY	I think light rail should be the main focus as it is not in traffic whatsoever. To get more people to use public transit, it has to be much more convenient than a car and light rail is just a better, more reliable, and more comfortable ride for commuters.
NORTH KING COUNTY	Taxing for these projects should not be incorporated into sales tax which disproportionately, negatively impact the poor in our region. Your proposals make commuting easier for large corporations (BOEING) to support employees and cut down on their company transit programs. Larger corporations need to pay their share of building this system. We've given them tax incentives and loop holes, now it's their responsibility to pay their share of creating a transportation system that works for all.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

<p>NORTH KING COUNTY</p>	<p>I support public transportation including King County Metro Transit and Sound Transit, as have Seattle and regional voters. However, this current Sound Transit proposal is too big and too expensive. With the new taxes plus the existing Sound Transit taxes, the average taxpayer will be paying up to \$700 a year. (I got this number from the Seattle Times.) This is in addition to the substantial amount we are paying for King County Metro transit service. And these taxes do not sunset when the system is completed. This proposal is a financial hardship to many, and forecloses options in the future for other public services. The Sound Transit 3 (ST 3) proposal is a significant expansion of the original light rail system that voters approved adding a line to Ballard, Issaquah, Redmond and West Seattle. It is not easy to reconstruct the planning history from on-line information. However, my recollection of the original voter approved plan (or vision) was to bring light rail to Everett, Tacoma, Bellevue. ST 3 appears to be deferring, until late in the project, the extensions to Everett and Tacoma and moving up the lines to Ballard, West Seattle and Issaquah which were only in the planning stages in ST2. I think Sound Transit should build the original regional system before adding new lines which are predominantly in the city of Seattle.</p> <p>ST 3 requires a new downtown tunnel although I have seen very little information about the new tunnel and I would like to know the cost estimate for the tunnel. From your information on-line, I think it is required when the Ballard line is constructed. In the excitement about light rail and the increasing traffic congestion in Seattle, prudence and caution have been forgotten. I suggest that ST 3 at a \$50 billion price tag is simply too large. I urge that the proposal be divided into a ST 3 and a ST 4 in approximate equal amounts. Perhaps the ST 3 proposal could stop short of a new downtown tunnel and that could be included in ST 4. I don't think Seattle voters have been given a good idea of the costs, both capital and operating of this proposal, and bus alternatives to the project which may be cost effective.</p> <p>I urge the Sound Transit Board to:</p> <ol style="list-style-type: none"> <li>1. Divide ST 3 into at least two phases.</li> <li>2. Review the cost effectiveness of this proposal. For example, where would bus rapid transit be cost effective?</li> <li>3. Provide a cost estimate of the tunnel and when it would be needed.</li> <li>4. Provide a breakout of capital and operating costs. Why will these taxes be in perpetuity? I would suggest that the taxes should be reviewed and decreased with the completion of capital construction.</li> <li>5. Provide information about the future operating costs of this system.</li> </ol>
<p>NORTH KING COUNTY</p>	<p>Focus on rail, especially if it is similar to the Westlake to UW stretch that is completely removed from traffic congestion and doesn't remove car lanes.</p>
<p>NORTH KING COUNTY</p>	<p>This is something that should have begun 20 years ago. Now make up is toooo expensive. And I'm getting to old to care anymore.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>As Light Rail expands, bus routes region-wide needs to be adjusted so that virtually everyone can access the Light Rail system by taking just ONE bus from home. Currently, we live in West Seattle, less than 3 miles from the SODO station. But to get there from here requires 2 buses (neither of which come very frequently). This means that the Light Rail is not a practical option for going to the airport, for example. My husband could use Light Rail to commute to work, once the Mercer Island station is completed. But that would not be a practical option if he will have to take two buses from home just to get to Light Rail.</p> <p>Second, Rapid Ride and other "express" bus options may be cheaper than Light Rail, but they are of ZERO BENEFIT compared to regular buses if they share the road with car traffic. Every highway and busy arterial needs to have bus-only lanes. This would be my highest priority for ST funds.</p>
NORTH KING COUNTY	Light rail on 522 to Bothell and Woodville
NORTH KING COUNTY	We need more transit and more access to transit to offset the traffic issues in this area and for environmental reasons. Let's make sure to keep it very affordable, and so accessible that it's a no-brainer that people take public transit (as is the case in Manhattan, where we lived for many years). I am very much in favor of getting the area linked via public transit with accessibility for all!
NORTH KING COUNTY	I cannot understand why seattle bus service is still so bad. 26x and 62 revision is not working early morning. 26x is dangerously crowded. Also are seattle taxpayers paying for belveuve or is belveuve paying their fair share? Is the entire burden on seattle taxpayers?
NORTH KING COUNTY	More priority should be given to serving South King County and West Seattle-white Center by light rail asap
NORTH KING COUNTY	Will not support West Seattle portion if at grade need underground or above grade stations. Cheers
NORTH KING COUNTY	The problem with this proposal is the timeline. It's a huge need and priority for the region and it needs to be accomplished much quicker. I would gladly vote for and pay for a proposal that accomplishes the outlined goals in under ten years but 25 yrs is unacceptable. The traffic issues in seattle need to be fixed now. Not over the next 25 years. Priority should be focused on Seattle proper first and then expanded to outlying areas second. Ballard and west Seattle lines should be highest priority and west Seattle line should extend down 35th to Burien.
NORTH KING COUNTY	Our population density can never support trains. Please realize that technology and personal preference will drive transit toward smart highways and self driving cars.
NORTH KING COUNTY	The State Legislature should be encouraged to add ST3, as well as similar proposals elsewhere, anywhere, in the state, to the current transportation package. All aspects of ST3, as well as other, similar projects in Spokane, Tri Cities, Walla Walla, Yakima, Bellingham, Clark County and elsewhere, are an appropriate use for tax revenue generated by the state gasoline tax. In addition, the State Legislature should be encouraged to raise the gasoline tax yet again while market conditions, i.e. the glut of crude oil on the market, continue to keep downward pressure on the retail price of gasoline.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	The majority of ST3 is a duplication of Metro Transit. Is part of your plans a merger of both Metro Transit and yourself? That might not be a bad idea IF you want to accomplish all these. I am on Disability, am a homeowner, and do not own a car. As such, even though I take the bus most every day for my errands, I do not support new taxes. Very few of these routes you have proposed are routes I ever travel. I support Metro Transit. Esp. since multiple Metro Transit routes in NE Seattle were changed to accommodate your Husky Stadium Station, and you did not provide any "park & ride" spots at Husky Stadium, I am very wary of supporting you in your future projects. The majority of my travel routes, which are in NE Seattle, now involve the inconvenience of my transferring to an additional bus.
NORTH KING COUNTY	Listen to the people! Upgrade current bus system which serves the people right where they need to go! But then the yous/theys continue to push until YOU get YOUR way! You do NOT listen. THIS QUESTIONNAIRE IS A MOCKERY TO US! You think YOU know what is best for the citizens at their expense! SHAME ON YOU!
NORTH KING COUNTY	Rail to West SEATTLE
NORTH KING COUNTY	Let's do this!
NORTH KING COUNTY	Can we tax gasoline for this? Within reason, we need disincentives to driving alone. The biggest issue is that all of it is too slow. We need more help now. I also would like to see more businesses aggressively supporting alternate commutes. Seattle Children's a leader in this area.
NORTH KING COUNTY	It's making my commute worse! I used to catch one bus (the canceled #73) daily to work downtown. Now it's a total hassle. Transfers, etc. Now, I drive and park. Ridiculous. My teenagers were just learning how to navigate from their high school to home daily which used to be a straightforward trip that they were able to manage in their own. After their route was canceled and they kept being stuck in the rain in the UDistrict (with full buses skipping their stop because they are at capacity) I now drive them separately via multiple trips. Philosophically, I want to support transit but it's a tough pill to swallow when it just isn't working for my family.
NORTH KING COUNTY	Make improvements to existing bus lines and infrastructure, e.g., bus 8 is most of the time late. Improving what is there might be cheaper and more efficient than expanding low quality service.
NORTH KING COUNTY	You have seriously hampered the ability of people in Seattle to get from one neighborhood to another by cancelling so many bus lines that unite neighborhoods. Light rail does not interconnect either east-west, or north-south within the city.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Need improvements now for Mercer Street corridor, both in and out! Bottlenecks traveling east bound from 2pm-7pm daily on the weekdays. Morning traffic traveling west bound daily and Expedia is yet to come as well as more developments in South Lake Union and planned urban center density in Lower Queen Anne. The standstill of white collared workers who will loudly voice our unhappiness! Currently reason for not using public transportation more is that the buses frequently run late as well and stops aren't convenient.
NORTH KING COUNTY	Need effective campaign to persuade people to use mass transit vs cars. Most clearly don't feel compelled yet.
NORTH KING COUNTY	<p>1. Property taxes in King County continue to climb at a rate that far exceeds anything else that I pay for. I would like to see Olympia, the Puget Sound counties, and Seattle to seek ways to fund things that benefit the entire area by other means than always running to property owners. This is an incredibly affluent region and businesses and those who are in the stratospheric income classes should shoulder a bit more of the burden. This matters. It should have the same priority (perhaps higher priority) than, let's say, Safeco Field, as one obvious example.</p> <p>2. I'm confused about these timeframes. When you say 'urgent' and then you say '25 years' there's a bit of a disconnect. I don't think it took Portland that long to establish a regional transit system. It did not take Istanbul that long to create a far more extensive system in a city that includes dedicated bus lanes, shared ownership between private and public in developing and maintaining transit systems, a fleet of small boats, an extensive (and new) subway system, and shared taxis (dolmus, privately owned by regulated by the city). That city, like Seattle, has water on all sides and also is prone to earthquake. In addition, they have significant antiquities that had to be dealt with continually. And yet, they managed to build a world class subway system in a much, much shorter time than we are managing here. Why does it take us so long to do anything in this town related to transit?</p> <p>3. Finally, with regard to the survey, thank you for seeking public input. I have a feeling that those who respond are people like me who use and care about public transit. I know statisticians help you analyze the data, but it seems that people would be most concerned with the issues in the places they commute, which might give skewed results in favor of more populated parts of the I5 corridor (like Seattle). Just a thought...</p> <p>Again, thank you for allowing this input and for holding open house meetings for the public.</p>
NORTH KING COUNTY	Bus transit (transfers) to areas outside of major project plan needs to be augmented and synchronized. I live in North Admiral District, and buses/transfers are inadequate outside of commute hours resulting often in 18-30 minute layovers. Failing that, adequate parking needs to be constructed along major routes.
NORTH KING COUNTY	With regards to the taxes to support ST3, \$17 per month could be a lot for poor people. This is something to take into consideration.
NORTH KING COUNTY	The map is very, very busy. Can you separate into smaller chunks to mitigate confusion? It would be helpful to have a definition and acronym definition section. Infill? HCT?

<p>NORTH KING COUNTY</p>	<p>For one, all of this and more needs to be done yesterday.</p> <p>For two, SERIOUS CONSIDERATIONS NEED TO BE MADE ABOUT THE ECONOMIC LANDSCAPE OF OUR REGION, AND AFFORDABILITY FOR CURRENT AND LONG TIME RESIDENTS. Let's face it, the tech boom of the last several years has been very good for Seattle's economy as a whole, but rising costs of living- rising rents- and increased congestion in the region- are taking a big toll on people who aren't rising with this economic tide. The populations who are negatively affected by this current boom are varied: Senior Citizens. People with health issues, physical and mental. People with lower levels of education. PEOPLE WHO ARE MOTIVATED IN THEIR WORK LIVES TO GIVE TO THEIR COMMUNITY, AS OPPOSED TO EXTRACTING AS MUCH MONEY FROM IT AS POSSIBLE.</p> <p>As an example, people who have worked at the charity Childhaven for a long time tend to make less than \$20 per hour. That's over 10 hours of their wages to pay for their share of the \$200 annual tab. On the other hand, this amount of money is pocket change for those in the greater Seattle metropolitan area which Sound Transit 3 will serve (Everett-Tacoma, Puget Sound-Issaquah/North Bend). Furthermore, the digital revolution which is fueling much of Seattle's economic boom WILL have the unintended consequences (unintended? automation by definition eliminates jobs) of eliminating jobs in the Seattle Metropolitan area. Yes, these are bigger issues which are not necessarily within the jurisdiction of ST3, and yes, ST3 will need to move forward even if it isn't perfect (and the timing alone is a huge piece of that... ST3 will probably barely keep up with the growth rate of our region, if it even keeps up)... But, there is going to be ever expanding economic hardship to our regions most vulnerable residents. I personally believe that the funding of ST3 should be funded as little by the general population, and as much by the segments of the economy that are both making ST3 more urgent and making it's implementation more economically viable.</p> <p>People who are socioeconomically disadvantaged are being "thrown under the bus" by the current economy. I would like to see ST3 acknowledge that as much as possible, and do EVERYTHING IN IT'S POWER, AND MORE, TO PREVENT CAUSING MORE HARDSHIP TO THOSE PEOPLE THROUGH IT'S FUNDING STRUCTURE. I would much rather see funding based on income, and at MINIMUM, PRO-ACTIVE, COMMUNITY FUNDED ACTIVITY TO CREATE PROGRAMS TO IDENTIFY, REACH OUT TO, AND SUPPORT SOCIOECONOMICALLY DISADVANTAGED CITIZENS (I WOULD ARGUE THAT ANYONE WHOSE HOUSEHOLD INCOME IS LESS THAN A MINIMUM OF \$50,000 PER YEAR IS SOCIOECONOMICALLY DISADVANTAGED WHEN COMPETING FOR HOUSING IN OUR REGION) IN UTILIZING PROGRAMS WHICH PROTECT THEM FROM THE EXTRA TAX BURDEN WHICH ST3 WILL PLACE ON THEM.</p>
<p>NORTH KING COUNTY</p>	<p>Abolish the unaccountable, appointed Sound Transit Board of Directors and replace it with directly elected Directors on a countywide basis. We see the 'regional' approach to governance as a means to shield the elites of Sound Transit and other similar organizations from direct accountability to the citizens. This is one of the pernicious excesses of the 'progressive' school of government, strongly implying a lower class of citizens, and an exalted upper class of leaders. Such excesses warrant remedies ranging from tar and feathers to tumbrils.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	It's outrageous to me that it will take 22 years for the line to get to Ballard. I would be willing to pay double, triple, ten times, whatever it costs to make this happen in 5 years. Those of us who voted for the Monorail (repeatedly?!) starting a decade ago are fed up with these timelines.
NORTH KING COUNTY	In general, I'm very supportive of public transit. However, it's not clear that the plan addresses much needed space for bicycles on the Link light rail and other modes. The very limited spaces are now often taken with luggage or full. Bike-train commuting is an important aspect of the system. Also, the timelines seem long, especially the Graham Street station which was initially planned for in an earlier phase and held.
NORTH KING COUNTY	<p>"Sound Transit is authorized to assess an employer tax of \$2 per employee, but doesn't currently. To collect this tax, the agency would have to get voter approval."</p> <p>The above statement is from your own web site. If you put the employer tax on the ballot, you may get approval faster than hitting taxpayers with the same old regressive sales, MVET and property taxes. We need this funding to get these projects underway more quickly. Traffic congestion is beyond tolerable NOW. Please put the employer tax on the ballot along with your transit proposals and you might get this off the ground more quickly.</p>
NORTH KING COUNTY	<p>It is hard to know how to respond to detailed parts of the plan without being fully involved in the planning. It is clear, however, that rapid transit of people throughout the region is a vital project of the future of any metropolitan area. We cannot fail to do it, hopefully well planned, but done somehow. It is important that bus service be modified to funnel riders to these light rail and BRT lines. Busses should not be paralleling north south routes of these new systems, but be the feeders to them. The most unfortunate cost-saving mistakes of the existing lines is the lack of parking or even a pick-up and drop-off zone at several stations. Also, the line coming out of the Beacon Hill tunnel should have remained elevated all the way to the Stadium Station. The disruption of east/west traffic in this area is a nuisance that simply shouldn't go unaddressed into the future. Spend the money to elevate this section.</p> <p>Since I live in the Allentown area of Tukwila, I would naturally appreciate a station at the north end of Tukwila's residential area to serve Allentown and Riverton Heights. It seems there may be property along the line where it parallels 599 before crossing the Duwamish River at the north end of Allentown. A Station here would not afford a link to Sound Transit, but would be many times more useful to residents in the area. As it is, the Boeing Access Road location will not only fail to attract pedestrian traffic, but is also too far away from Boeing offices to be of much help to their employees on East Marginal Way. Better to have a station just north of the intersection of Macadam and Interurban, out of which comes a spur going north on East Marginal Way and then up 4th S. a ways to connect Georgetown and the entire industrial southend as long as practical before turning around to return to the new North Tukwila Station. Busses could also connect the north end of this dead-end line to, say, SODO Station -- or it could run to SODO underground. Taking a lesson from the Moscow subway system (one of the largest in the world) where I lived for several years, there was an entire fleet of 12-person vans that took people to the stations. We have made no, or little, effort to have such systems feeding our stations, from what I can see. So if the station is beyond reasonable walking distance, it becomes useless to locals without a ride to get to the station and back.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Don't hamstring yourselves with artificial minority/women owned business targets. Hire contractors who can do the job correctly and on time or faster.
NORTH KING COUNTY	Parking garages at all light rail stations would be a quick and easy way to make it easier for people to use light rail. It would get cars off the streets and freeways around downtown by allowing people to park at the various stops and use as a park and ride.
NORTH KING COUNTY	You have as a City group rearranged the Ballard demographics with land use changes but have neglected to address the transportation needs the higher density requires Shame on your bad planning and negligent governing!
NORTH KING COUNTY	The project rollout should happen faster. We need public transportation NOW.
NORTH KING COUNTY	This is a tremendous waste of resources and should be considered a low priority in the big picture of what's important to TAX PAYERS.
NORTH KING COUNTY	obviously, the ones I most strongly endorse are the ones I would most benefit from.
NORTH KING COUNTY	Keep and improve bud routes!
NORTH KING COUNTY	I can't speak to anything outside Greater Seattle area so I do not know if the other areas need more service or if this service would be used.
NORTH KING COUNTY	\$15/hour wages should be in place EVERYWHERE in WA state so people could afford \$17/month to spend on a long-term transit expansion plan.
NORTH KING COUNTY	Mass transit should never block traffic. Study BART and insert it here. Jesus, it's not like it hasn't been done in a lot of places decades before here. It's like you all are trying to invent the wheel all over again. Mass transit that stops traffic is insane.
NORTH KING COUNTY	Very important that Seattle Center station also serve the Uptown business district. Also important to include parking convenient to Seattle Center/Uptown station for access to Queen Anne residents
NORTH KING COUNTY	I think south lake union station is a big need with the current growth. Would be better if that station, even if not the full Ballard line, could be put online significantly sooner than in 22 years
NORTH KING COUNTY	For light rail, use as much elevated track and tunnels as possible to separate the rail from car traffic for safety, and least impact to traffic.
NORTH KING COUNTY	why 25 years, why not faster?
NORTH KING COUNTY	My biggest concern is the impact increased taxes will have on poor people. Rich people can always find ways to get around paying more taxes, poor people can't.
NORTH KING COUNTY	First: It is ridiculous to do it so slowly. Second: Too much tax increase for a service I will never use in my lifetime! Third: Current system is poorly designed and I do not trust Sound Transit to do a good job in designing or implementing the project...
NORTH KING COUNTY	We need this ASAP

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Projects for West Seattle and Ballard should be expedited. 17 years and 25 years is unacceptable with the amount of growth that is happening and will continue to happen in these parts of Sesttle.
NORTH KING COUNTY	I wish it could happen faster. . .
NORTH KING COUNTY	Just make sure you don't use the same contractor that was used for the viaduct tunnel project :)  Though I'm sure it's outside of sound transit's control, it might be wise to lobby against rampant development that will only conflate the congestion problem. I understand that more people will expand the tax base and help fund the project, it also makes the property and congestion issues worse - maybe to the point where the solutions proposed in the plan will no longer solve the issues we currently face.
NORTH KING COUNTY	Thank you for Planning! My wife and I appreciate your work and support your efforts.
NORTH KING COUNTY	This survey was too long
NORTH KING COUNTY	West Seattle should be the highest priority. I do not live there, but the one hour commute to leave and enter WS during rush hour is unacceptable.
NORTH KING COUNTY	The City of Seattle should NOT be allowing the elimination of on street parking, as private parking is cost prohibitive for most working people. Nor should the City or the County be limiting road lanes to Buses Only. These lanes should only be HOV designated during peak hours, not set aside for buses only at all times.
NORTH KING COUNTY	Our transportation needs are expanding at an exponential rate and although the plan looks great the timeline is too far extended out there. In 5 years we may be able to walk from Ballard to Seattle quicker than by car or bus. Due to the rapid growth in condos and apartments and 1000 new neighbors every week spec you published I believe the plan is good but it would be great if it could happen quicker. Out of the 1000 new neighbors a week many of them work in the trades and can be put to work on these projects. Please don't delay the plan. Best of luck with it. I am working as a CM consultant and am working right besides you all. Thank you [name]
NORTH KING COUNTY	Light rail needs to happen faster. A 15-22 year plan is not urgent enough
NORTH KING COUNTY	It is sad that we have waited so long to do this. I think it will be difficult for voters to want to spend this much money over such a long time frame, but it has to be done. We really don't have a choice.
NORTH KING COUNTY	Needs to move along faster, the region is growing fast & transit/rail service needs to catch up quickly!
NORTH KING COUNTY	Get to w Seattle faster

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Although we are not now frequent transit users, we would use transit much more if it were more reliable/frequent from West Seattle and if there were quick & easy connections to other parts of the city where we would like to go. My husband used to commute daily on the C Line to work downtown. He started driving again because the C Line is too infrequent & crowded during his return commute.
NORTH KING COUNTY	As a Ballard resident and a lover of transit I strongly oppose not prioritizing (& being transparent about) investments that would increase ridership the most, including those that don't replicate existing services (like Sounder trains from the north and south ends or S Lk Union trolley). I am unsurprisingly disturbed that Ballard is out 22 years when other far less densely populated areas are being served. I also think more choices should have been presented in the draft plan such as ranking whether folks would support the Ballard-UW station link (along with a station for Fremont/Wallingford) instead of the current massively expensive (bridge or tunnel over canal-who cares!!!) Ballard/Interbay & Smith Cove (where few people live)/S. Lk. Union/Uptown (which are already well served by transit and are almost all in walking distance of Westlake). I would scrap the current Ballard-Dtown plan for the Ballard-UW link. I also don't know why the tunnel has been strapped to the Ballard route when it seems that it could have equally been attached to the West Seattle concept (& why does there have to be a new tunnel under downtown? Couldn't all the new links stop at Westlake where you just jump onto another train?). I've voted on every Sound Transit levy (& many other levies) and am really angry about the politics-trumping-logic at play here. Of course social and geographical equity are important but so is ridership. \$400 a month for a service that I may never use seems like a huge ask. I wish I could support this levy because I love the idea of expanding transit throughout the region, but if this is the package & phasing plan put forward don't count on my vote.
NORTH KING COUNTY	The costs associated with ST3 and development timelines are both unacceptable. I will strongly oppose this plan unless costs are dramatically reduced. I will strongly and vocally oppose any politician who supports the plan in its current form.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>Why are we building light rail to Tacoma and Everett? Is some one going to take light rail from Everett to Seattle? Isn't that going to be too slow? Why not actually buy land and enhance rail to Everett and Tacoma with the sounder? The line from Everett is beset by land slides and the sounder overall is limited by not owning the tracks as well. For long distances why are we putting more emphasis on faster commuter rail? I do like the sounder train investments in the south.</p> <p>As for the light rail if the draft plan is built out it would have the longest miles of track from suburb to city center of any in the USA. I don't get why we would do this other than the politics. The Ballard light rail seems to be held hostage to the east side politics. Plus we aren't even building a tunnel to Ballard that would up ridership. The Ballard line itself would get the highest ridership of any of the lines too.</p> <p>I thought I would support this draft plan initially but from what I can see after looking at things closer this isn't even a system that makes sense to me. Right now I'm voting no unless things change drastically.</p>
NORTH KING COUNTY	URGENT NEED FOR MULTIPLE MODALITIES OF TRAVEL, INCLUDING LIGHT RAIL, WEST SEATTLE TO DOWNTOWN.
NORTH KING COUNTY	The use of surface streets to the airport was a mistake. It slowed the travel down going to the airport. That should be fixed as part of the plan. We need a quicker route going to the airport.
NORTH KING COUNTY	I would be more willing to support this plan if the expansion of light rail could occur more quickly and included parking. The UW/Montlake station is wonderful but we have already opted out of using light rail on several occasions when we wanted to due to lack of parking at the station.
NORTH KING COUNTY	I somewhat oppose the timeline mentioned in number 12, not the project. Whatever it takes, we need to get these projects done quicker than this proposal. Also, the parking situation at the train stations is ridiculous. They should be expanded and permitted.
NORTH KING COUNTY	Needs to be done sooner than the proposed time frames...25 years is too long.
NORTH KING COUNTY	Any opportunity to speed up the building and operating of new light rail would be great!
NORTH KING COUNTY	Speed up the process!
NORTH KING COUNTY	I don't really understand the trolleys they are inflexible and slow. Why isn't a bus better? I walk rather than take the trolley it's faster at times
NORTH KING COUNTY	We have to make the commitment for public transit to increase. The commitment is vital to the Puget Sound Region.
NORTH KING COUNTY	22 years to Ballard and West Seattle??? So my family is paying \$400 a year for 22 years before we see any direct relief from the congestion in our area? As much as I'm in favor of these changes, the pace is hard to support.
NORTH KING COUNTY	25 years is too long to wait for this plan to come to fruition. We are in crisis mode NOW. The density growth outstrips your plan.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	The transit plansystem are mostly about the commute to work. Would like to see the cost they share for the plan - how many are exempt and for how long - what the initial \$ buyin is for a new business construction - not just the individual's charges. Thanks for sharing the plan and I look forward to increased public transit!
NORTH KING COUNTY	Would like to see more light rail trains running now. I take it from Othello and ever since cap hill and uw stations were added the trains are very full in the morning
NORTH KING COUNTY	SOUTH PARK IS CRITICAL AND SHOULD BE INCLUDED IN ANY PLAN FOR THE SOUTH.
NORTH KING COUNTY	Thanks for this great plan!
NORTH KING COUNTY	I do not agree with the funding proposal. I feel motorists should bear the burden of this transportation plan. I do agree with these funds being raised via property tax and sales tax increases. These funds should be raised via gas taxes and vehicle taxes and fees. I also feel the most urgent light projects are being placed at the end of the 25 years, i.e. Ballard and West Seattle. The congestion on the roads leading to and from these neighborhoods to downtown is well beyond the road infrastructure in place. Also, in my opinion, adding light rail stations to communities further from the city and business centers encourages people to move to these areas causing more urban sprawl. We should be building up and not out and encouraging people to live closer to where they work.
NORTH KING COUNTY	Don't be like San Francisco: Keep building and don't let the NIMBYs ruin everything!
NORTH KING COUNTY	Seattle DPD should spend capitol improvement funds to accomplish maintenance for the crumbling infrastructure and roadways that are now becoming dangerous. Seattle City planning has lost site of their responsibilities and just keeps asking for more money for ulterior motive and personal agendas.
NORTH KING COUNTY	I don't understand why the property tax should be limited to residential. The financial burden should be shared by all stakeholders including commercial and municipal property owners, and users of the system.
NORTH KING COUNTY	Avoid increasing property tax burden. More tolls and vehicle use taxes.
NORTH KING COUNTY	I have little faith that this project will meet timing and financial goals
NORTH KING COUNTY	I wish that question 10 included "developing local bus service in snohomish and pierce and east King counties". I realize that ST3 dollars can't be used for this, but municipalities need to provide local bus service for the ST3 capacity to be adequately used. We can't build enough park and rides to make this work, and we can't build enough TOD quickly enough to make it work. It's astounding to me that this feeder bus service is not one of the things we are talking about to make the whole high capacity transit plan work.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>I moved to Seattle in 1983 after 5 years in NYC and 3 years in SF. I had visions of a world class monorail linking every distant corner of the city with downtown and SeaTac, DiscoveryPark and Microsoft. That didn't turn out so well. Neither did I. I was making \$130k/yr including stock option income @Microsoft when I was diagnosed w/AIDS in 1993. I will have to sell my fully paid for condo in 2 yrs when I turn 65 to pay off my outstanding debt and will be eligible for Section_8 rentals. This plan does not help residents of Seattle get around our own city. I was trapped in Capitol/First Hills for 28 years; now more so in Lake City. It takes me 1-3 HOURS each way to travel the *9 miles* from my home in LCity to my First Hill doctors, with my walker, at night, in the rain, without sidewalks. And it takes 2 bus systems (SoundTransit/Metro) that don't recognize each other's fares = double fares each way for 9 miles. This is a fractious cow town trying to put a vase - smashed in voter anger - back together from the pieces. It still lacks unified plan. I am expecting my first grandchild in August. I hope he leaves when he's 18 and lives someplace not run by the single-occupant car cartel mentality generated by the wealthiest man in the world.</p> <p>[email address] Lake City, Seattle 98125</p>
NORTH KING COUNTY	Pick up the pace. 25 years is too long.
NORTH KING COUNTY	West Seattle needs light rail prior to the 17 year plan!!!!
NORTH KING COUNTY	The additions to Ballard should be higher up as it has some of the most growth and Expedia is moving to Interbay area soon bringing in thousands more people to the roads. As well, this whole project will take a ridiculously long time, 25 years is absurd, and that's with no delays which there certainly will be. Because of that I am voting in down.
NORTH KING COUNTY	The plan must address adding park and ride options and/or community bus connections to rail stops.
NORTH KING COUNTY	Good service to West a Seattle and Ballard, where housing construction is overbuilt, is long overdue.
NORTH KING COUNTY	<p>After going through the pain of the monorail community feedback process I feel INCREDIBLY cynical and skeptical filling out this form. However, I firmly support a transportation infrastructure that connects Downtown Seattle with adjacent neighborhoods that are now problematic in terms of commute (West Seattle and Ballard). I also strongly believe in implementing a large scale transportation system that is an asset to our region and connects important employment areas (like Redmond) and joins our cities (Tacoma, Everett, Puyallup etc.). Having lived in NYC and traveled through Japan, I have experienced the wondrous ease and utility of having a functional mass transportation system and I would love to have that in WA state.</p>
NORTH KING COUNTY	Please bring back the 72 bus. Make sure all new rail development is grade separated. Expedite the extension of Link service to Ballard. Current construction should allow for future expansions such as addition of new lines and longer trains, even if additional expense is incurred. Expand off-board fare collection for buses.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I ride the bus every day from NW 60th St and 8th Ave NW in Ballard. This afternoon, I spent 40 minutes on the 28 express bus, which is typical. The bus was packed to capacity. Including walking to the stop and waiting at the bus stop, my commute is close to an hour. This is to go 5.7 miles. I've tried the D Line and it is also packed to capacity and just as slow. Ballard needs transit improvements NOW, not in 22 years. I have supported every transportation vote until now. This package needs to include significant short term bus improvements to get my support. How about some real express buses with limited stops? Speeding up the service will get people out of their cars. Ballard has seen tremendous growth since I moved here in 1999, and all projections say it will continue. What are we supposed to do for the next 22 years?
NORTH KING COUNTY	The sales tax increase should not be used to fund ST3; instead the tax increases should be greater for property taxes and/or car excise tax.
NORTH KING COUNTY	Regional development should encourage employment opportunities (office parks, high tech centers) in areas such as West Seattle to reduce need for long commutes. Current planning seems to encourage families to have hour-long commutes simply because of distance between moderate-priced housing and employment.
NORTH KING COUNTY	The 130th provisional station needs to be built to support a under supported transit area. Also, the 522 needs to service all LCW including 110th and 95th NE. The Ballard light rail needs to be completed in less than 22 years.
NORTH KING COUNTY	Current projects have not been completed within the original time frame. That is with the exception of the " reset " these projects need to be completed on time. I generally support flexible bus transit plans over the hard infrastructure projects.
NORTH KING COUNTY	This survey does not address the biggest problem with the plan which is the regressive funding. I am in support of increasing mass transit but with income taxes and NOT with sales, property and motor vehicle (since it is a flat rate for all cars this is also regressive) Washington State is already rated the most regressive state in the nation for taxes and this plan makes it even worse. I have selected a neutral a opinion, opposed,or no opinion simply because as I do not want my answers to go into some campaign showing people in favor of this levy. I would be in favor of many of these measures if they were paid for by a state income tax. This proposal would make Seattle have the highest sales tax in the nation, that is simply embarrassing. And at the same time this is asking us to pay more property taxes for transportation we are also being asked to double taxes to help with housing. If I have to choose I'd chose to help house the homeless. You need to look at the big picture of all of the increases we are being asked to fund and who is funding it. Currently Seattle is building upscale rentals for all the high income young tech workers moving. The large segment of renting weathy people causes these taxes to be even more regressive. I am tired of paying for bike lanes for these wealthy tech people while my roof leaks because I can't afford to fix it.
NORTH KING COUNTY	We live on SR522 in Lake Forest Park and are greatly concerned about how this will impact our home and lives.
NORTH KING COUNTY	Put somewhat support on 17, the west Seattle issues need to be addressed sooner than proposed!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	we need or accelerate the timeline for Ballard and West Seattle given the growth/excessive growth in density. Current buses from Ballard are stuck in the same traffic as autos. West Seattle has limitation of West Seattle Bridge which will not be able to handle the growth.
NORTH KING COUNTY	Property taxes should be the least changed/influenced by this. Pay more attention to motor vehicle excise, gas taxes, etc. Get cars off the roads. Don't penalize people more in their homes. Every tax in Seattle seems to be on property/housing.
NORTH KING COUNTY	Given where I live, I will rarely use any of these options. Moreover, it's taking too long to get these projects completed and the price tag is too high. Figure out a way to cut the price and deliver the outcome faster.
NORTH KING COUNTY	Please make West Seattle be a priority! It needs light rail asap.
NORTH KING COUNTY	Figure out a plan for Ballard to stadiums. And Ballard to Edmonds -connect the water fronts
NORTH KING COUNTY	STOP TAXING HOME OWNERS TO PAY FOR EVERYTHING!!
NORTH KING COUNTY	Local corporations should foot a bigger bill via new business taxes.
NORTH KING COUNTY	Graham street and Renton are the high priority. It's where the biggest needs are!
NORTH KING COUNTY	Please consider offering safe bike storage at rail stations or more room on trains for bikes. The combination is a perfect commute, but without safe bike storage and with crowded trains, bikes and trains are sadly incompatible. The UW station is a very shortsighted design, on behalf of UW in terms of allowing for safe bike storage. Pressure from ST would very much be appreciated.
NORTH KING COUNTY	Timeline unworkable
NORTH KING COUNTY	I honestly don't know what is most important - I trust your studies to figure that out. My priority would be first adding services that would be used by most people. I am lucky enough to live close enough to bike to work, and live near great bus routes, so I have no personal bias.
NORTH KING COUNTY	Light rail is a fraud and a waste of tax payer money. It has failed in every city such as Portland regarding ridership and financially. The cost per mile of light rail (tracks) is outrageous. My taxes will go up in Seattle \$400 a year and we do not ride buses or have plans to use light rail ever. FYI our work commutes (car) are during off hours and do not involve freeways. Our commutes are 20 minutes each so there is no problem. Keep your hands off of my wallet and keep your big government schemes to your selves. Up with cars.
NORTH KING COUNTY	The timeline for Ballard is ridiculous. 22 years?!! This corridor is extremely fast growing. This line needs to be prioritized and needs to be build entirely separate from traffic. It also needs to be build to allow extension and connections (for example, continuing north or connecting to UW) in the future.
NORTH KING COUNTY	You guys boxed out south park . thats cool maybe you can include a carpet that you could sweep us under at a cost of 69 billion south park will be swept under the rug forever.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>Light rail through out the region is critical! This needs to be priority number 1 and the projects completed as soon as possible. The timeline seems too long!</p> <p>Work on city projects first. Not only will it improve quality of life for residents, but it will also improve the tourists' experience. Make Seattle a real city with safe, easy public transport options so visitors can see more than just the downtown core.</p> <p>Whatever the government does- JUST START BUILDING SOMEWHERE NOW!!!</p>
NORTH KING COUNTY	<p>Abandon surface rail install monorail ELIMINATE BIKE LANES Cut sound transit</p>
NORTH KING COUNTY	<p>The Ballard line cannot be at grade.it needs to bypass lights and boat traffic and should not occupy car space. I believe it should be above grade.</p>
NORTH KING COUNTY	<p>Generally the timeline needs to be shortened. Investments should be made in the lowest income areas first. All TOD should have high affordability requirements for both rental homes and homes for sale for ownership. All affordable homes should be made permanently so. There is a way to do that that works. Community Land Trusts or other organizations that provide long-term stewardship of affordable community assets is one way to do this. This magnitude of investment should be kept to benefit the community.</p>
NORTH KING COUNTY	<p>I feel like these plans will be obsolete by the time that are done and we need a more immediate solution. Also something more forward thinking. We should look at elevated railways or other means to move more people sooner.</p>
NORTH KING COUNTY	<p>Why are homeowners (who pay property taxes) and (who will be paying very large 'penalty fees' for owning vehicles) be paying such huge taxes when apartment dwellers, who are discouraged to own cars but use transit will hardly be paying anything towards this levy? (I do not know how much of their rent will go to this levy). Why are they getting away without paying their share NOW. Living in Seattle is going to become unaffordable sooner than later for homeowners. I only drive about 7,000 miles a year with my car, which includes driving outside Seattle for hiking in the summer. I have an RV which I take out in the summer three times. That leisurely activity will probably become too expensive for me to enjoy as a retired 71 year-old....retired 4 years ago. I do not trust that these monies will be wisely spent and will be wasted, creating 'a need' for much more money. Seattle should have passed its transit levy in 1968, just before I moved to this state and city. I will not see the end product as in 22-25 years, I will probably be dead.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Keep light rail off surface streets to decrease congestion and to keep with a consistent schedule. Use either elevated or underground methods. Following this guideline will increase support for light rail. Keep projected urban growth in mind if considering placing light rail on surface streets in areas that are currently not very populated. These areas will look very different 25 years into the future. Planning to build above or under ground from the beginning will be the best plan to meet the needs of the population 25 years in the future. Folks who are against spending money will become even more disgruntled if it becomes necessary to increase costs to move planned sections of light rail under or above ground. Plan smart from the start.
NORTH KING COUNTY	Light rail is fine and all, but taking light rail from Everett to say Tacoma or even Seattle would take a long time. I wonder if there is any planning to do heavy rail e.g. subways or leave potential to upgrade some light rail portions to heavy rail. Yes there is Sounder, but it only runs during rush hour and shares the right of way with freight and Amtrak.
NORTH KING COUNTY	Need lower cost approach. Need improvements to be in service much sooner. For \$50,000,000,000 need to come up with a high-speed delivery system to move masses of people across the terrain that is disrupted by large bodies of water. More East and West bound options are better than more North and South options.
NORTH KING COUNTY	Prioritize west Seattle and Ballard lines first. City residents want to use transit now and some of us cannot in current state easily. Prioritizing these lines will connect up so much more of the city. It would absolutely get me out of my car daily.
NORTH KING COUNTY	Very poor planning that does not reflect reality. We are going through the biggest technological change since the automobile and PSRC and Sound transit want to go long!!!. Get the proper planning done. Technology update to Vision 2040 and come back in 2020 if we still need more light rails. Do not risk failure on an prepared for vote.
NORTH KING COUNTY	<p>Please continue to use buses. Buses are incredibly flexible, responsive forms of public transit. The stupidest, most idiotic infuriating waste of public funds that I have seen in years is the construction of the trolley serving capitol hill and first hill. This area was already well served by buses. For a fraction of the cost, bus service could have been increased. Instead we have a useless, utterly redundant, expensive service. I support building light rail more centrally in the denser areas of Seattle (west Seattle, Ballard, etc. However, building spokes of light rail going out to every suburb in King County will be so much more expensive and less flexible than improving bus service with frequent buses on dedicated highway lanes, with traffic light sensors to change lights in their favor.</p> <p>Also, please include frequent stops in the light rail. I know that this is more expensive. However, the current light rail could serve many many more people if there were stops at Graham and at Montlake between Capitol Hill and UW. Once you build it without these stops, it is very difficult to change. With few stops you are building a suburban commuter train. With more stops you are building a truly urban infrastructure that supports density and decreased reliance on private vehicles.</p>
NORTH KING COUNTY	I think it would be ideal for all buses within city limits to have a 1 seat connection to at least 1 light rail station

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Faster - 25 years is too long.
NORTH KING COUNTY	Where I support the funding and the additional lines and busses, I do not support the timeline. This is critical and should be completed as soon as possible.
NORTH KING COUNTY	The fact that this doesn't already exist completely boggles my mind. How does Dallas, TX have more light rail than Seattle?
NORTH KING COUNTY	25 years for light rail to Everett??!! Wtf guys- everyone talking this survey won't even live here anymore by then... Tech jobs are always moving. I know I won't be here...
NORTH KING COUNTY	I'm just going to put this here, but as a U District resident, I hate the ULink station, and hate that there are far fewer direct options from the heart of the U District to places like downtown, the CD, Capitol Hill, etc. The ULink station is a) confusing--it's very difficult to understand where to find your bus after you get off the light rail. There are no maps or directions, or if there are, they are hard to find/see. (I'm low vision, and spent a very confusing 20 minutes looking for my bus stop, only to find it finally and see that it was CLOSED for the weekend. I wasn't the only one confused, since there were all these people waiting for a bus there, right next to taped signs up saying the bus stop was CLOSED. And there was no map or way to find the nearest next bus stop. It was a stop full of confused people who just started ambling through campus because no one knew where else to go.) It's also VERY desolate/lacks density, and I don't feel safe there at night/early morning. I go out of my way to avoid this station now, and even take a longer bus (70) which is 40-50 minutes to downtown so as to avoid the lack of clarity/desolation that is ULink. I look forward to a better life with the Brooklyn station, but I think the next 4-5 years is going to suck, and I wish you a) didn't cut off so many bus routes and b) hired a design consultant with a friendlier view towards a) People with disabilities and b) Women wandering around alone. I'm sure you find this comment cranky, but in all honesty, I was so tired carrying multiple bags while wandering around for 20 minutes looking for the bus stop, then after the CLOSED fiasco, I just sat and cried on a bench, and then got up, and eventually just walked 30 minutes to home. For a PWD, it is a terrible, confusing layout, as well as feeling sparse and unsafe. I know Brooklyn can't come faster, but I wish ULink would be better, and I wish some of the bus routes came back.
NORTH KING COUNTY	We need mass transit now. Why a plan like this would not be approved by the community is beyond me. If we don't get on it now,
NORTH KING COUNTY	Why is Tacoma Community College a station but not Bellevue College?!?
NORTH KING COUNTY	A large number of state employees commute to Olympia from Seattle and Tacoma. The Tacoma traffic at JBLM and the Tacoma Dome is the worst traffic on I 5 in that 75 mile corridor. Yet there is no plan to extend rail down I5 as far south as Olympia. We do not need neighborhood stations as much as we need a rapid rail from Everett to Olympia. Utilize the I 5 corridor with stations along the way and bus service and parking. Please look at what other states have doneZ commuter rail should not service every neighborhood Along the way, but should support moving large amounts of people. Similar to exit ramps, people can get to freeway stations by bike, bus, or car.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	All projects need to be pay per use. You use the service, you pay for it. If you don't use it, one should not be taxed on the projects.
NORTH KING COUNTY	We can't wait. No more freeways. Build light rail now, not in 30-years.
NORTH KING COUNTY	The projects should be completed faster
NORTH KING COUNTY	These projects are critical to make a viable web of routes to transport lots of commuters to various locations in the Puget Sound area. I have visited several cities where these rail and bus lines have already been implemented and it's made a huge difference to the volume of traffic on the roads and the amount of pollutants vehicles are putting into the atmosphere.
NORTH KING COUNTY	<p>Your estimates about the cost per average adult in Puget Sound is misleading since homeowners &amp; car owners would pay significantly more taxes than renters &amp; non-car owners. So I guarantee you it will cost my household more than \$400 (we have two adults in it).</p> <p>And, as a 57 year old person, I would never invest my own money on something like this because there is no ROI for me...22 years to get light rail to Ballard? Christ, I'll be 79 years old (if I'm lucky) if the Ballard line is completely on time (unlikely). So help me understand why we'd want to spend (using your estimates) at least \$8.8K on something we will probably never use?</p> <p>If you were truly progressive, you'd put an age limit on who has to pay these taxes so, for example, in the case of someone like me, they should only have to pay for the bus service, no light rail. And only people who would be of working age at the completion of all of the light rail stuff will pay taxes for the light rail. As structured today, I'll be voting NO.</p>
NORTH KING COUNTY	Why is there an assumption that residential property owners assume the the cost burden of these improvements? Are these the people who are expected to be using these transit systems more often than people who do not own property? Why would we not also want to target people who are actually using the system as those who are willing to pay for it? What other sources of funding are there? Are federal infrastructure funds a possible source?
NORTH KING COUNTY	You forget about the safety at the stations for us having to walk several miles to your stations, rather than our closer former bus stops. I am not a scared person, having lived in dangerous countries, but Seattle HAS CHANGED, did you notice?
NORTH KING COUNTY	Speed it up! 7 years is too long.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	1) Project is too ambitious. Shorter term, immediate solutions are necessary, now. Population growth in the time it takes to complete, will outstrip the project scope. 2) Project is far, far too weak in working to connect Seattle areas specifically. Once again, West Seattle is left to over-development, over-crowding, crumbling bridge and to fend for itself, yet all the planning and money goes mostly- again- to Ballard, eastside, north and south ends. This "planning" has become tiresome and prohibitively expensive just at this stage. 3) I do not wish to continue to use my home and real estate as a bank for Pet Projects such as ST3 that benefit "the whole"? when quickly adding buses will do a lot of good in the 25 years it's going to take to implement such a plan that is likely to go the way of the monorail.
NORTH KING COUNTY	Along with the cost/tax picture, ST3 should quantify the effect on car ownership cost, which would go down a great deal.
NORTH KING COUNTY	We also need high speed rail intercity service, statewide linking all of the major cities statewide
NORTH KING COUNTY	we're going to be trapped in ballard with 15th street as the only connection to downtown. we need a separate bus lane or light rail.
NORTH KING COUNTY	Would be more inclined to favor light rail if time frame could be reduced
NORTH KING COUNTY	Not happy about losing bus service here in NE Seattle.
NORTH KING COUNTY	I suggest you reexamine the sequencing of the projects.
NORTH KING COUNTY	Although I support a public transportation, it appears that the Puget Sound area lacks a coordinated plan. Between Sound Transit, light rail, Metro buses, Tacoma Transit and Rapid Ride, local mass/public transit solutions are still disjointed. One easy fix: brand the various modals in a similar fashion. Best example: the red Rapid Ride buses appear to be the result of a quickly secured funding that was not well-thought nor part of the larger ST3 plan.
NORTH KING COUNTY	inter city bus transport still not ideal. plenty of places in town where it is hard to get downtown quickly. metro needs to be optimized.
NORTH KING COUNTY	You have removed many critical metro bus routes that I've used for years. Currently you have removed many east-west metro bus routes. Your future plans for ST regional service seems to push bus routes into rail, thus creating "legs" which would take forever. Your funding plans are ridiculous, you cannot tax homes as that makes living in the area unaffordable. I used to support transit, but recent changes in Seattle and King county have made transit useless to me, and your funding plans are horrible. I will vote against anything new and will be driving my car from now on.
NORTH KING COUNTY	I am opposed to funding the project through sales tax. It is an unfair burden to lower income residents.
NORTH KING COUNTY	Seattle to Redmond light rail.
NORTH KING COUNTY	I'm tired of wverything being primarily funded with property taxes. We're taxing people out of their homes! It's time to look at an income tax.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	ST3 is far too expensive and takes far to long. There is very little for NE Seattle, even though most homes are 2-4 times value and taxed more than the so-called 'average' home prices cited by ST. NE Seattle winds up paying far more for far less, in a time frame many of us won't live to see. They eliminated our neighborhood bus service. Yet W. Seattle has bus rapid ride. Very unfair. We should have neighborhood shuttles, expanded bus rapid ride, above grade monorail and/or cut and cover...less expensive and faster to build. Vote 'No' on ST3 as proposed.
NORTH KING COUNTY	LIGHT RAIL AT-GRADE ALONG STREETS IS DANGEROUS; TUNNELING, RAISED, AND/OR COMPLETELY SEPARATED RAIL ROUTES ARE SAFEST AND MOST EFFICIENT. BUSES ARE MORE FLEXIBLE THAN RAIL IN TERMS OF SHIFTING DEMOGRAPHICS. THE PER RIDE COST OR BOTH LIGHT RAIL AND BUSES IS DISPROPORTIONAL TO INCOME LEVELS OF PEOPLE WHO USE PUBLIC TRANSPORTATION, EVEN COMPARED TO OTHER BIG CITIES, E.G. L.A., NYC, SAN FRANCISCO. ORCA CARD E-MONEY PURCHASES SHOULD INCLUDE DISCOUNTS. NON-ORCA CARD BUS & RAIL PURCHASES SHOULD BE USBALE ON EITHER/BOTH MODES OF TRANSPORT INTERCHANGEABLY IN KEEPING WITH INTERNATIONAL STANDARDS AND OTHER U.S. CITIES.
NORTH KING COUNTY	Long overdue--- let's go!
NORTH KING COUNTY	I agree the plan should move forward. As a retiree whose property taxes are already nearly driving me out of Seattle, I also know that increasing my property tax gives me little/no benefit and only the cost. The Ballard line will not complete in my lifetime!
NORTH KING COUNTY	Gas tax?
NORTH KING COUNTY	There is no consideration given in any of the above proposals to increasing feeder transit to the major transit lines. If you expect people to use the transit and parking is not provided, then one has to be able to get to the major transit line somehow. The UW line opened up and while it serves a certain population well, there is not a quick way for many to get to the UW station. What good is any of this if you can't get to the main lines? I will not vote for or support any further transit unless this is addressed. I am happy to walk to a bus line to take me to a main transit point but the bus has to run frequently enough so that it doesn't add an hour on to my travel time. I would also like to see less of a hit on property taxes - this is too much along with school levies, social service levies, etc. etc. I would also like to see this broken up into smaller projects.
NORTH KING COUNTY	Need rapid transit crosstown from Ballard through Fremont/Wallingford to light rail at UW, and need it earlier rather than later.
NORTH KING COUNTY	Projects need to be sped up!!!
NORTH KING COUNTY	I strongly support the much-needed improvements, and I am sure a great deal of thought and research went into how to fund them. My concern is that \$17/month per taxpayer could be a stumbling block...some people genuinely could have difficulty affording that.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	22 and 25 years to wait to have this transit plan is crazy especially if we are paying for something we cannot use. By the time these are completed they will be obsolete. I believe a monorail project was to begin years ago in Ballard. Business were purchased and than the project was scrapped. Now there are vacant buildings were business once were and no new transit. I have no confidence that this plan will work. It's just too long and too much money for homeowners.
NORTH KING COUNTY	The timelines should be decreased where possible.
NORTH KING COUNTY	Projects should be grade separated along the entire lines and completed as soon as possible. I suggest stop building parking garages because they are a horrible investment of resources. If you have to build parking garages in certain areas to increase ridership the area probably doesn't have the density required for this type of transit investment and those areas can be served by bus. Please do not build another section with grade crossings like central link through the Rainier Valley.
NORTH KING COUNTY	Complete everything sooner. The traffic is already unbearable in many areas. >1 hr to travel 10 miles is unacceptable.
NORTH KING COUNTY	OUT of control development in the Seattle metropolitan area should be stopped until this transportation problem is resolved.
NORTH KING COUNTY	I do not understand why all these projects have such a long time frame. The Capital Hill link light rail was completed six months ahead of time. I don't like the idea of waiting 17 years for link light rail to come to West Seattle where I live.
NORTH KING COUNTY	Do it! I think it is important to move towards more light rail and other transit improvements for the greater Seattle area. Which exactly is most important, I don't have a strong answer, the above ST3 plan looks reasonable.
NORTH KING COUNTY	Prioritization should be made on high-density population areas (Ballard is exploding, even though on a side-branch of the flow) and high density of work opportunities (Microsoft campuses, downtowns, ?). It may make sense to go for the long reach, with the ability to add extra stops later, if there develops a strong need for a stop or a connection [the 130th St stop in Seattle makes sense only if there is a high-speed connection coming in from Kenmore/Bothell/Woodinville to connect to].
NORTH KING COUNTY	Put tracks right on I-5 and I-90 and soon! Traffic is awful! We need light rail now.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	As an environmentalist, I would like to use mass transit, but it isn't feasible for me. This \$50 billion wouldn't address why. I work at 6 different job locations (since no one has offered me full time work.) I can't get from one job location to another via mass transit in the short amount of time I have. As it is, the closest bus stop to my house is a 15 minute walk, and I need to carry lots of stuff to do my various jobs, so I use a car for hauling. For my closest job, I can either walk and take 2 buses, which takes at least 1.25 hours, or I can drive my car for 15 minutes. For 12 years I drove a VW Golf, powered by biodiesel. I used to be able to purchase biodiesel 5 places around Seattle. Now there is only one vendor. Prior to owning a car, I had a job that finished up around 9pm. Between walking from work to the bus stop, and from the bus stop to home, I needed to walk over 2 miles, in the dark, alone as a woman. Yes, I was stalked by a would-be rapist, but escaped due to my martial arts training. Also, most bus riders are fine, but many times I have been subjected to loud-mouthed riders spewing out vulgar obscenities. I've also had people reeking of poop, pee, and sweat sitting next to me - literally leaving fecal matter on the seat when they got up. I think it's helpful to know ALL the types of reasons why people take cars instead of use mass transit.
NORTH KING COUNTY	我觉得西雅图的北部很重要。我们Lake City 人口经常用公共共交站。所以我们需要520 和130 Station 的进步。(I think Seattle North is very important. Our Lake City people often use public pay a total station. So we need 520 and 130 Station progress.)
NORTH KING COUNTY	I want to see slower development that does not displace people, cause homelessness and contribute to general chaos. I want to preserve the character of our Neighborhoods.
NORTH KING COUNTY	i am opposed to more put on the backs of homeowners; I will be unable to afford my house in my upcoming retirement. Tax gas and cars and repeal effects of Tim Eymans . I do want the regions transportation system to function for my children and grandchildren a futures.
NORTH KING COUNTY	there is ZERO coordination between ST and Metro. There is ZERO thinking about the value of a strategic parking program. There is ZERO coordination between ST and locals regarding land use and zoning. But there are lots of planners. It is tough to support the laudable goal when implementation is soooooo uncoordinated and short sighted.
NORTH KING COUNTY	It is so offensive how the I405 south of Bellevue communities, are completely off your outlook. Ok not completely, we are thrown a bus in 8 years time you are you kidding right? and no open house to discuss anywhere along 405S. You are eliminating clearly the non-white communities. I will never vote for anything and I will make sure all of my neighbors and associates vote the same way. Again and again, we have no services to speak of in the South end along the 405. we do have light rail to Seattle with no parking along the route - who is developing these proposals? surely they don't live in my neighborhood. i promise you, I will campaign hard against this entire proposal.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	No funding should be spent on free parking. Any parking needs to have a fee. Light rail to paine field may not be necessary but a fast trip to paine field is still required for my support. Ballard to UW via Greenwood needs to atleast be studied and listed as a backup project. All projects need to find a way to get done faster, look how fast LA is building rail. A seamless connection to the museum of flight must be part of the plan. Ballard to northgate must be planned. All sound Transit trains and vehicles need to be upgraded with real-time data and the OneBusAway project needs to have additional funding added. Sound Transit needs to take better advantage of the local tech scene.
NORTH KING COUNTY	Let's get on with it - anything to reduce the # of autos. Strongly consider insuring that ferry terminal are well served by transportation system!
NORTH KING COUNTY	If u think I will vote myself \$8,000+ before seeing light rail from west seattle you are crazy. I will not be alive anyway. My experience with your wonderful tunnel project with no access to downtown, a toll, and less traffic lanes too boot, doesn't leave any confidence in your proposal to stay within budget or planning. The arrival of driverless cars will increase car traffic greatly which the mayor and his supporters see no need to plan for this increase. I recommend adding to your future questionnaires whether this coming technology will impact those trying to use mass transit.
NORTH KING COUNTY	Commuting is one solution, but what about building better neighborhoods in Seattle so people don't have to commute? Why not apartment complexes and more schools closer to downtown? Seems like you're proposing a solution for a problem, but not understanding the cause. (I understand this is a transit survey and you can only control what you can control.)
NORTH KING COUNTY	You should accelerate the development of mass transit in light of the evidence that climate change requires drastic progress now. Just because America is only now waking up, and that this public transport needed to be built 40 years ago, is no excuse to progress cautiously now. Get moving! Do more now, quicker, regardless of the push back from those dinosaurs who don't get public transit.
NORTH KING COUNTY	Bus service expansion is low cost and beneficial to many communities, this should be a priority for spending before additional light rail. Light rail going from Seattle to Tacoma should be prioritized, these are the two major cities in our region and we need good transportation options between them. The region is getting more and more populated, so transit friendly density zoning should happen around all major stations.
NORTH KING COUNTY	Find some other way to fund the plans besides punishing homeowners with heavier taxes. The burden should be more on car drivers to fund the transportation issue.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Another bridge across lake Washington starting from somewhere on the west between 145th and Sand point, and ending in Kirkland. Also Bus or light rail links that connect Seattle to South Bellevue Park and Ride and continue onto Issaquah. Why go up to downtown Bellevue just to come back down to I-90 again. Why not just run a "connector" line" from South Bellevue to Downtown Bellevue for "dt Bellevue riders". The other way seems inefficient and makes people who are not traveling to downtown Bellevue much less likely to take transit when it take 30 minutes longer just to sit on the bus to make that loop.
NORTH KING COUNTY	the link rail are just small trams. They will be overcrowded and unable to keep up with demand.
NORTH KING COUNTY	N/A
NORTH KING COUNTY	Please include linkage for South Seattle College campus. This is the largest employer in West Seattle and needs to have better support for the community to access the campus.
NORTH KING COUNTY	More protected bike lanes and bike paths in the area would be phenomenal.
NORTH KING COUNTY	It is very disappointing that this has taken so long to develop and hopefully move forward when government officials have known the city surrounding area is growing and traffic/ parking is a serious problem for over 20 years. We've lost opportunities for federal funding multiple times and wasted time...finally we have a 25 year plan. We vote for leaders and experts to make informed decisions and execute... not stall indefinitely. These kinds of major infrastructure necessities should not appear on the ballot every year - same issues year after year with action. Our current mess is a result of leadership failure. Just look what other cities have done while we stalled and debated about the monorail. Hopefully, we will actually follow through this time.
NORTH KING COUNTY	Two things: 1) Ballard has been zoned for density with very few options for transit moving people in and out of the neighborhood. Given it's limited proximity to highways and freeways, something else has to be done. If you're going to develop an area, it has to include decent transit. The monorail scuttle was shameful. 2) East / west traffic is heinous and it's nigh impossible to get anywhere except during very odd hours of the day. East / west must be considered in planning and get people off the roads, even with the new bridge. And, btw - I rarely take transit because it doesn't meet my needs, but would LOVE to have a good transit option that does. Skytrain in Vancouver sets a great example. They got it done. And not 22 years from now.
NORTH KING COUNTY	I think the city/counties need to find alternative ways to come up with the money instead of continuing to tax/levy its citizens, many which are already struggling with the extreme high living costs (such as those living on FIXED incomes) and many that are being forced to move, while developers are gobbling up the properties, improve upon them and make a killing in this red hot market.
NORTH KING COUNTY	I don't support any light rail or train service in the Puget Sound region and will not vote for any taxes that support them. Buses are much less expensive and more flexible. The state/county/city governments can't do anything on time or within budget. Don't trust ANY of you.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>Ballard and West Seattle should be moved to a sooner completion date.                  Some possible adjustment made for seniors and low income people "taxed out of their homes"                  Please keep in mind - the coming 2017 Legislative struggle with the State Budget and funding for schools. (Washington - one of the few states with the most unfair taxes)</p>
NORTH KING COUNTY	<p>Skip Paine field - go directly to south Everett. Ballard should also happen sooner.</p>
NORTH KING COUNTY	<p>I would like to see express buses/express lanes on route 44 from Ballard to UW. This route is very popular and slow with the numerous stops during peak times. I can drive and park my car then take a shuttle in a shorter period of time than taking the bus. I would like to hear that those who are renting apartments are contributing to paying for these services as they will be benefiting from them.</p>
NORTH KING COUNTY	<p>I do believe the current system should be more sensitive to differently abled riders. It takes me, walking with a cane, hours to not only get to the train to downtown, but also to find the train that connects with buses, and I also believe transfers from Metro should be able to be used on these new systems as well.</p>
NORTH KING COUNTY	<p>Most development on and around ST property should be dedicated to affordable/subsidized housing for Low-income Families.                   More of the funding from the project should be drawn from property and income tax so that it doesn't hit working class families too hard.                   Property in and around the stations should also be reserved for parks, green spaces and urban ecological restoration, such as raingardens, P-patches and stormwater filtration wetlands, to help mitigate urban pollution, food insecurity, lack of access to nature and stormwater runoff issues, as well as acting as an urban carbon-sink</p>
NORTH KING COUNTY	<p>I think it is very important to include the provisional N 130th street stop to the north light rail system to address the growing need for access to reliable public transportation in North Seattle.</p>
NORTH KING COUNTY	<p>The Ballard Line needs to be grade separated to increase reliability. The Rainier Valley line is subject to collisions the Ballard Line needs to be the most reliable as it has the highest ridership. It should also be completed before other lower ridership projects. Parking should not be a part of this package if I am paying taxes, I want it to go towards rail and transportation expansion. The 130th ST station needs to be included in the package for me to vote for it. Environmental impact studies should be done on other lines including the Ballard to UW line and the one past West Seattle to Burien. This would make them easier to build in the future and would not be very expensive to do so. The other provisional stations also need to be completed before 2036. They are easy to do and should be part of the early deliverables. The Paine field detour is completely unnecessary as it adds 10 minutes to the trip and will cause the project to take much longer to construct. BRT should be used instead of this detour. Finish the projects which will help the most number of people first.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I do not see any plans to have light rail crossing 520 or I-90! WHY????These are such heavily trafficked areas, and the need is very great. And where is the plan for light rail from ALL Seattle neighborhoods to downtown?? It's pathetic that this city has taken all these years to install light rail. It should have been done 30 years ago! We also need light rail from EVERY neighborhood that goes to other neighborhoods without having to go downtown. We are so far behind the times! It's unconscionable that the plan you outline here will take 25 MORE years to complete! What terrible planning!
NORTH KING COUNTY	Would like to see traffic congestion on I-5 north of Seattle to Marysville improved. Also, Ballard does need more mass transit such as a monorail.
NORTH KING COUNTY	Ballard is one of the fastest growing neighborhood and needs transport options
NORTH KING COUNTY	I believe Bus Rapid Transit is an oxymoron. Unless the buses have exclusive ROW, they will not be fast enough to entice commuters out of their cars and onto transit.
NORTH KING COUNTY	ST3 plan should be faster
NORTH KING COUNTY	Should not always rely on increasing taxes on house/property owners to fund projects.
NORTH KING COUNTY	A sales tax increase is highly regressive...do not use it. Tax parking at all commercial locations to make driving less attractive and to improve land use.
NORTH KING COUNTY	I believe that the regressive sales tax component should be dropped, the motor vehicle tax should be raised, and the property tax should apply to only people with incomes that can afford more taxes, so that such increased property tax does not cause people hardship or force them to move or lose their house. Also as more transit becomes available, the motor vehicle tax should be correspondingly raised.
NORTH KING COUNTY	I live in Lake City and my hope is to one day be able to take the light rail from the 130th St location to work and back home. Please consider 130th as a station. Thank you!
NORTH KING COUNTY	Other than the projects that are likely to benefit me, I've given very little priority. Hopefully you-all are more aware than I what's going to do the most good, per dollar, in the area of reducing driving, greenhouse gases, and environmental damage from road construction. I would like it if you'd prioritize accordingly.
NORTH KING COUNTY	I am totally on board with the idea that an aggressive mass transit strategy is necessary to keep up with the explosion of growth in our metropolitan areas. However, this is an expensive plan, and I must express my displeasure at the regressive taxation scheme being used to pay for it. I don't know why we can't follow the model of Portland, and assess an income tax for businesses and individuals in the transit district. For that matter, why are we we only assessing a residential property tax, and not a commercial property tax? Surely business owners in the transit district benefit from this plan. In my neighborhood (the area near the proposed 145th st. light rail station) aggressive rezoning will create a friendly climate for commercial properties...so why aren't we taxing them to pay for this? I don't mind my taxes going up, but I feel that an unfair burden will be placed on low-income residents, particularly if they are homeowners, and I feel that commercial developers and affluent renters won't be paying their fair share.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I would like to know the exact routes, the cost of purchasing land to accommodate the routes, and how many dwellings must be eliminated. An overlay of the proposed routes over a current map would better help me envision what is planned. As it is, I am a little concerned because in some cases it looks like the routes are planned to go through very expensive real estate, and that may not be as cost effective as other routes.
NORTH KING COUNTY	I think that adding more sales tax which adds more tax burden to lower income people should not be done. We are already very regressive in our tax policy and although I very much support everything else about this plan, I do not support using sales tax to help pay for it.
NORTH KING COUNTY	How can we do this faster? It seems so slow! Higher gas taxes? Luxury taxes? Local businesses adding optional \$0.05 on every beer/latte sold to fund this?
NORTH KING COUNTY	Do what it takes, including a higher tax increase, to make the light rail happen earlier.
NORTH KING COUNTY	Monorail along existing roads would be faster and cheaper. Why do you constantly reinvent the wheel and ignore the obvious?
NORTH KING COUNTY	I only support Rail projects not bus projects. I do not support any further increases in property taxes to fund ST3. I support a sales tax increase and an increase in motor vehicle tax. I also recommend a tax on all transit fares so the riders who use transit participate directly in the cost.
NORTH KING COUNTY	This plan seems to limit option for residents of NE Seattle, View Ridge, Sand Point. The UW station does not have parking. The 71 no longer goes downtown. Stations are many years away, Roosevelt and U-District. We will be paying for a system that we may never be able to use. We support this plan but it sees so far away.
NORTH KING COUNTY	I feel that this should be done in phases financially! Putting this on the taxpayers all at once is far to much. I went to the meeting in Ballard and they also had the planning for Metro to interact with Sound Transit that would be implemented a little later although they didn't want to wait to long because they wanted it to go along with the Sound Transit. That would be another and separate tax levy. How on earth can the public afford to pay for these out of their property taxes, auto and probably gas taxes plus where else? Many of us are on fixed incomes and wouldn't be able to afford the costs. Besides what about other issues like School levies? That would be more taxes!! My husband just passed away with no life insurance and I don't even know where I stand financially.
NORTH KING COUNTY	There is currently no responsibility for corporate tax to pay for the additions. They benefit. they must pay for that benefit. No more corporate freeloaders.
NORTH KING COUNTY	Have to find a way not to put too much tax burden on homeowners. They already carry the load.
NORTH KING COUNTY	Keep taxation on the struggling middle class resident low. Keep government small as government is wasteful and inefficient and corrupt.
NORTH KING COUNTY	If parking can not be provided at stations, at least pick-up and drop off areas should be.  Cancelling the daytime 43 has had a major impact on my life. Try to avoid stranding seniors. We pay taxes, too.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Need to analyze current budget to find all funds. More taxes is not the answer.
NORTH KING COUNTY	You are applying 19th century solutions to 21st century problems. Delusion would be the kindest way to describe what is being proposed.
NORTH KING COUNTY	Move the project along faster.
NORTH KING COUNTY	Higher priority should be put into getting service to major companies in the area. Boeing Renton has no service and Boeing Everett will be a long way out.
NORTH KING COUNTY	Be sure current infrastructure does not get overlooked. Sidewalks need a lot of help, as do many city streets!
NORTH KING COUNTY	Building a station at Graham is very important to the people in south Seattle!
NORTH KING COUNTY	Give me double the value of my house go and do what you want you already are, bike lanes are a waste of money plus to dangraue. On the next page what is the purpose of the survey what does it matter my age, rase this all crap
NORTH KING COUNTY	Too slow to West Seattle
NORTH KING COUNTY	Rail projects should serve high density neighborhoods, and should not duplicate existing Sounder commuter train service. Therefore, light rail development should be concentrated in Seattle, and should definitely not be extended to Everett and Tacoma. Instead, increase the frequency of Sounder commuter rail lines to connect Everett and Tacoma's own transit systems with Seattle's.
NORTH KING COUNTY	Light rail station at West Seattle Alaska Junction should be underground. Too much congestion already and elevated service would destroy and create barrier in neighborhood.
NORTH KING COUNTY	Really hope for improved SECURE parking at light rail stations. This is essential to encourage ridership.
NORTH KING COUNTY	Way too much money to give you at one time. Plan now, do the fund raising in stages. No way to have accountability for getting projects done on time and on budget if this passes. Plan now, fund raise as stages are completed to allow for accountability. Most of you will not be around to see this to the end but i will still be paying for it. And I have no confidence money will not be wasted and ten or fifteen years from now you will be asking for more money.
NORTH KING COUNTY	You should consider BRT to Payne Field area from an I-5 light rail station rather than looping light rail itself to that area. Payne Field area facilities are spread out and I think a single light rail station would be underutilized. A bus route would provide better access to widespread workplaces.
NORTH KING COUNTY	The Downtown Seattle to Ballard light rail segment is projected to have high ridership and should be made a higher priority and constructed much sooner than indicated in the plan.
NORTH KING COUNTY	I'm 65. None of these will be done for me to use in my life time. These projects should have a commitment like going to the moon. Get the lead out. There is consensus among multiple generations. Light Rail NOW!  In my life time we wasted time on the SST and various forms of hi tech transportation science fiction while ignoring the basics of transit for all.
NORTH KING COUNTY	PLEASE accelerate the addition of 3-car and even 4-car trains on existing Link runs.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Planning for transit-oriented development at and around the new stations will be critical to the success of the transit system and the future of this region. ST plays a very important role in what should be a coordinated regional effort to assure great TOD communities are built and inhabited near transit stations.
NORTH KING COUNTY	If there is any way to prioritize the Ballard to downtown line without waiting 25 years, that would be ideal.
NORTH KING COUNTY	Thank you!
NORTH KING COUNTY	I am a huge fan and advocate of mass transit of all kinds. My comment is that bus services in each metro area should be strengthened in each stage of the plan. Bus service to areas not served well by light rail or BRT, and bus service that gets people to light rail and BRT cannot be neglected if the city is to grow and thrive evenly, and if the environmental impact of these transit decisions is to be truly felt. There are pockets within neighborhoods in Seattle where people would jump at the chance to use transit, avoid driving, save on the cost of parking, and enjoy the reasonable commute time if the service was reliable, frequent and not personally stressful. If the only people who use buses are the people who absolutely have to use buses, the service will not thrive. Not because those people are bad or less important, but because buses NEED people who choose the bus as a viable option so that people who NEED buses can depend on them as well. Please make sure that these plans are truly connected with the urban bus networks. And please speed things up, because asking people to vote on something that brings light rail to Ballard in 22 years seems like an uphill battle... too long for people to feel invested in!
NORTH KING COUNTY	There should be a plan to include Belltown so we could easily access the Ballard line.
NORTH KING COUNTY	West Seattle is a total bottle neck everyday. More and more housing is being built there and this problem will only become worse. I am grateful that I don't need to leave "the rock" for work. Please prioritize light rail to West Seattle.
NORTH KING COUNTY	Far too slow. Find a way to speed up the implementation. And move the cross-town light rail from UW to Ballard to the top of the list. But I do like the big thinking in the proposal. We are very late in implementing transit, so half-measures are not sufficient.
NORTH KING COUNTY	I believe that the rail from Bellevue to Seattle would be a high priority, and out to Issaquah.
NORTH KING COUNTY	Reduce the lead times on these projects. This is completely unacceptable.
NORTH KING COUNTY	Use sales tax increases to fund expansions and/or find ways to tax bike riders who are also benefiting from transit improvements.
NORTH KING COUNTY	\$50 billion? Are you kidding me? That is an absurd cost. We are already carrying most of the costs of the existing services versus those that actually use the limited services. Let the riders pay! Obtain federal funding! Use the absurd amount of taxes you already collect! Fix our roads! Quit taking road space away, creating more traffic and false demand for pay-to-use lanes (which we've already paid for!!!)!!! Where does all the money you already collect go?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I strongly oppose any transit proposals that add bike lanes and narrows streets. The city has irreparably harmed the city and caused further congestion in the area. Any train in the street that takes away parking and road space from cars is fool hardy. I would support a monorail. In order to solve the transportation issues in the city it needs to be off the grid - and not at the expense of existing roadspace. That is why the light rail from Capitol Hill to Husky stadium is so successful. The city has made a mess of the rest of Capitol Hill with the train in the street and the little used bike lanes. The city is systematically creating congestion through the narrowing of streets, widening of sidewalks and construction of bike lanes. It defies common sense.
NORTH KING COUNTY	Taxes should be imposed on those that can afford it the most. Tax avenues that more adversely affect the poor should be avoided. Also, Look at the beneficiaries in determining route implementation. I don't have all the facts, but I suspect the Redmond light rail will be filled with passengers that could afford other modes of transport.
NORTH KING COUNTY	It can't take 22yrs to get a light rail to Ballard. That is absurd. I want more transit improvements but I oppose your plan because of the timeline. Also, why can't you ask Jeff and Bill to pay a billion each. After all, they are getting richer by the day and are the reason traffic is so bad.
NORTH KING COUNTY	Save money by not gold-plating transit assets as if they were works of art
NORTH KING COUNTY	I support it all in theory but I'm 62 and paying for it with property taxes when we are retired is a concern. Besides which I could be long gone before its completed.
NORTH KING COUNTY	Good money management and accountability is of the utmost importance!
NORTH KING COUNTY	We have been taxed, taxed and taxed. We just spent a lot of money in city to improve buses and now you want a HUGE some of money for ST3.
NORTH KING COUNTY	The only thing I would change is the priority of the projects. Seattle and the surrounding areas can't wait 17-22 years for light rail expansion to West Seattle and Ballard. In my opinion, those should be the top priorities because light rail is a more reliable form of public transportation. It would have the greatest impact to our infrastructure.
NORTH KING COUNTY	Way too expensive and waste. ST is awash in schedule failures and gross cost overruns. More bus service in the sane, cost effective and flexible path. It's the obvious one. Take it !
NORTH KING COUNTY	With all the new condo construction on going in Ballard that doesn't allow for parking on site in garages, the Ballard light rail needs to happen sooner rather than later. The housing is here the people are coming but the infrastructure for these people to commute with out vehicles in mass isn't here.
NORTH KING COUNTY	With the growing number of people moving to Seattle at record rates, the transit situation is a crisis especially from the Ballard neighborhood, which is having 40+ unit apartments completed every month.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

<p>NORTH KING COUNTY</p>	<ul style="list-style-type: none"> <li>- The timelines for Seattle transit are far too long.</li> <li>- There needs to be funding to study a Ballard to UW line to make it shovel-ready.</li> <li>- There needs to be funding to study the Metro 8 line to make it shovel-ready.</li> <li>- By the time the Ballard line is complete, will it be necessary to retrofit Rainer Valley to be grade separated?</li> <li>- There needs to be outreach with the City of Seattle to expedite the planning and approval of these lines.</li> <li>- Seattle really needs more lines and a means to develop those lines like Muni. Perhaps out of scope for this Bart-like project.</li> <li>- The ORCA card situation is pathetic and very unfriendly to new riders compared to nearly every other transit system in the US. Pathetic considering the high level of local tech. I recently visited Portland and was able to hop on and off buses and trains using an app on my phone. Total download and purchase of tickets took about 3 minutes.</li> </ul>
<p>NORTH KING COUNTY</p>	<p>Usability is horrible. Signage is nonexistent or inadequate. Information online is unusable/irrelevant. Trying to figure out how to use the various forms of public transit here requires deciphering information on various systems that are each treated as smokestacks. Each website/information sheet ignores the other attaching systems. There is no place to look at an entire trip in one place. Each system seems to go out of the way to prevent someone from seeing the other systems.</p>
<p>NORTH KING COUNTY</p>	<p>I use to use Metro to commute to and from work. Bus route was cancelled forcing me to drive solo and now carpool in my personal vehicle to and from work. Expanding the trains and having the schedule more accessible to all instead of only running during commuting hours is a must for improvement to reduce the traffic issues and if you do this more people would consider using the trains. I also am a full time student at Evergreen College in Olympia and the commute sound is horrific! Expand the trains to run to more locations on a 24/7 schedule would make it attractive to thousands of people for so many reasons. plus the timeline for the projects expansion is ridiculous, start using more common sense and not offer outrageous timelines that for many people will be too late for them to use as they may not be around to use the completed mass transit as they'll be dead. Really 25 years!!!!!!! Come on. Plus reduce the salaries of your upper management as this is a waste of the funds needed to procure a working, reasonable, functioning mass transit system. Other states have done this and Canada too. Please rework your plan and make it work for people and not the other way around.</p>
<p>NORTH KING COUNTY</p>	<p>The plan should include more more supporting projects to improve bicycle and pedestrian access to rail stations! For example, ST2 did not provide enough supporting projects at the rail station in the U-District (Brooklyn), which is slated to open with very poor access for bikes and pedestrians coming from Wallingford and Greenlake (e.g., across I-5).</p>
<p>NORTH KING COUNTY</p>	<p>The timeline is much too long. We need all of these improvements, and particularly light rail, immediately. Speed up the time line! Also, getting to Everett via Paine Field is a mistake. Drop Paine Field from that route.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>Sustainably powered, high speed transit on regional waterways (i.e. Puget Sound, Lake Washington, Lake Union). A region that lacks for (affordable) land to develop transit projects necessitates thinking outside the box in order to effectively and proactively address the underlying issues such as lack of sufficient paved roads and immense costs of capital improvements associated with expanding the rail systems. Barring any unforeseen stunt in our communities population growth these issues will continue to hinder Puget Sound transit well past the 25 year timeline of ST3 unless a multiple angle approach is taken in building out options and links for travel. In tandem with a massive bicycle transit initiative and the current scope of ST3 I believe within twenty years we could realize a revolution that would see communities thrive without the pollution of crawling vehicles on bottle necked roads. We can achieve a future where it makes more sense to use public/private transit due to cost and time savings. The key to bringing this future to fruition is enabling the community to envision this future and quantify the positive impacts it would have on their daily lives, thereby empowering people to strive towards a people and planet health oriented existence.</p>
NORTH KING COUNTY	<p>The need is West Seattle is off the charts. We're stuck on either the Upper or Lower West Seattle Bridge. It's a horrible bottleneck and we have no other options if there is congestion or an accident. We need this more than any other part of the region.</p> <p>In the mean time, is there a way to get a COMPLETE bus-only lane to bypass the mess that is the West Seattle Bridge and 99 interchange? "Rapid" buses are totally over capacity and stuck in traffic. It's a mess, and only getting worse with all the new development up here.</p> <p>Everyone wants this faster. I understand the reality of financing constraints, but please work with the feds to find a way to get it here faster. Go straight to them, propose a low-interest mezzanine loan, and build it all at once. Get our congressional delegation to go to bat for this. It would take a miracle, but you can do it!</p> <p>Please help us! We need you!</p>
NORTH KING COUNTY	<p>When University Link opened recently all my 70's buses disappeared and now I'm cut off because I have to carry heavy things between bus and train. This is a total negative for me. I don't want to pay for more of the same. I guess they think we old folks will die soon and stop bothering them.</p>
NORTH KING COUNTY	<p>Parking facilities (park and ride) are very important along BRT lines as well as near rail stations. This is especially true along SR 522.</p>
NORTH KING COUNTY	<p>I take the lite rail from UW to downtown. Can there be improvements to the frequency and the reliability of the buses to the uw station coming down 24th. The 48 is frequently late and doesn't run often enough.</p>
NORTH KING COUNTY	<p>West Seattle light rail should be earlier than other projects.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	At one point East Queen Anne and Westlake were included as options. I voted for these. It would be nice to have a station that follows 99 or at least goes to Fremont via Westlake or East Queen Anne and then to Ballard. Many people live in these areas. It would also be nice to have taxi stands at the stations that are not downtown, such as the proposed station in South Lake Union.
NORTH KING COUNTY	I think it is necessary that we be willing to pay to develop the needed transit. Without it we will strangle the growth of the city. However, I am opposed to paying \$200 a year for a system I will probably never get to use. In 22 years I will either be dead or living somewhere else. We study, we revise and we delay. In the mean time we continue to build and turn a lovely city into one choked by lack of public transportation and make it unaffordable and unpleasant to live in.
NORTH KING COUNTY	The state needs a new taxation system to fund this kind of development.  Also, I would like to see the numbers regarding the number of adults paying for this project vs the number of those adults who would actually use this project.
NORTH KING COUNTY	I am not sure any of our suburban residents will make any more use of light rail than they currently do of bus service. Most are proud of driving large vehicles and disdain public transit.
NORTH KING COUNTY	Absence of parking at light rail stations, not even a kiss-and-ride drop off, is a deal breaker for me. I'd love to use light rail, but I must (due to age & health) be able to drive to the station and park. I have no trust in the ability of ST management to deliver the full range of projects on-time, on budget. Providing \$50Billion up front just makes it easier for overruns to be ignored until it's too late to make corrections. There's no effective accountability place don the politiians & managers to perform to plan. Experience suggests we'll actually see 1/3-1/2 of the actual projects delivered. Ballard & W. Seattle will never happen in this plan.
NORTH KING COUNTY	Downtown mobility needs to be a focus and with the 8 years of 17
NORTH KING COUNTY	Put less emphasis on rail and more on dedicated bus lanes and other bus projects. Buses are cheaper, more flexible in routing, and quicker to come on line. Rail costs too much.
NORTH KING COUNTY	The cost of this project should not be funded through a regressive sales tax increase. That will limit my support for the plan. There needs to be an alternative way to fund this that removes the burden from lower income families.
NORTH KING COUNTY	Move projects to deliver light rail in and between key urban areas much faster than the plan proposes!
NORTH KING COUNTY	There should be high capacity transit in the eastside rail corridor rather than 405. It can be built quickly and in a dedicated right of way.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>Proposed LRT projects emphasize reliability over speed. Need more emphasis on speed. Riding a fixed rail train in dedicated ROW, with sophisticated monitoring systems should not take longer than the time it takes to drive a SOV the same distance.</p> <p>25 year plans should include a high-capacity, rapid transit system for SR 520 corridor, directly linking heavily travelled centers of Downtown, UW, North Seattle, Bellevue, &amp; Redmond?</p> <p>It appears that current LTR plan, as depicted, would involve a transfer for all riders travelling from North Seattle (and beyond) in order to reach Sea-Tac airport. Not ideal for travelling to/from the north end.</p>
NORTH KING COUNTY	<p>50 billion dollars? Way too expensive and grandiose. I have been a strong supporter of transit, but this is ridiculous. We need a breather to assess whether or not the existing investments are worth the extremely high taxes. (We are on a fixed income - and I have limited mobility).</p>
NORTH KING COUNTY	<p>Equating cost with any approximate assurances of ease of traffic congestion (not travel time) could help the costs of this project appear reasonable to voters worried about govt spending. \$17/mo for _____.</p>
NORTH KING COUNTY	<p>"I want a #TunnelToBallard and the #WestIsBest route in Interbay."</p>
NORTH KING COUNTY	<p>Your pricing suggestion is ridiculous and untrue. Stop with the darn trains and tunnels already. Wasn't the idea of dense development to enable people to work close to home? If that's the case then none of this is necessary. Stop pricing us out of our homes and leave us alone.</p>
NORTH KING COUNTY	<ul style="list-style-type: none"> <li>- I applaud that ST is setting a big vision, and I'm excited how far we have come in the region to be able to propose such a big transit vision.</li> <li>- ST \$ should not be used for free parking to store cars.</li> <li>- ST funding should be more progressive. I'm sick and tired of every government agency in WA shrugging their shoulders that the state does not (currently) allow an income tax. If we all the agencies seeking taxes worked together to get an income tax in WA state, everyone - residents and the agencies - will be better off.</li> <li>- This plan is quite complex. I'm in the industry and I'm a transit advocate, and I find the plan hard to get my head around. This will be very hard for the average person to get their head around. You should include the summary description form Q13 at the beginning of discussions about ST 3. The map is too complex to stand alone as an intro to ST3.</li> </ul>
NORTH KING COUNTY	<p>Please consider adding procurement systems that would enable you to prioritize domestic content including based on the lifecycle carbon emissions of the materials used during the building process. This will improve the environmental impact of the project and support US jobs. I also support the use of Targeted Local Hire during the building process.</p>
NORTH KING COUNTY	<p>Light rail first. Seattle first. Buses later</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Asa long as the transit agencies continue to have multiple redundant bureaucracies and fail to address abuse of the retirement system I have trouble supporting the waste. Also any trains at grade are just plain dumb. Downtown to SeaTac and beyond going down the Airport Road right of way would make it faster than the bus service it replace.
NORTH KING COUNTY	We need to build ST3 from Seattle outward.
NORTH KING COUNTY	It makes more sense to implement a state income tax to fund this long term, large scale transit project. Continuing to increase sales and property tax is an insufficient solution that impacts low and middle income individuals unfairly
NORTH KING COUNTY	I think additional costs for retired, older people should be less than those still earning much more money than most older people earned when working themselves. Housing property taxes have gone way up in the last 5 years, and more \$200.00 for transits is too much more taxes.
NORTH KING COUNTY	I am a longtime transit user who has lived in Seattle and Chicago. I strongly support Seattle Subway's proposals to improve the ST3 plan. I think ST3 should be delivered on a faster timeline if at all possible. I think it is critically important to develop to shovel-ready status 1) light rail from Ballard to UW/Children's and 2) light rail from West Seattle to Burien/White Center/SeaTac, in anticipation of future funding becoming available. PLEASE DO NOT BUILD AT-GRADE LIGHT RAIL THROUGH INTERBAY. The at-grade section in Rainier Valley never should have been built; elevate if necessary. Elevated works fine in Chicago and New York, it can work here. Freeway alignments are a TERRIBLE idea; they waste walkshed and are unpleasant stations to wait at. I'm very disappointed in the decision to go down I-5 in Federal Way as opposed to 99. Thank you for what you're doing, but please plan for what will work best in 40 years, not what's politically popular now.
NORTH KING COUNTY	What about highway 99 corridor? Light rail or more busses at rush hour. This is a whole death of central Seattle that doesn't seem to be in the plan  What about light rail over 520 to Redmond
NORTH KING COUNTY	How can we complete this all sooner than 25 years?! Traffic is insane in Seattle and the Eastside as you know.
NORTH KING COUNTY	This is a ridiculous plan that encourages urban sprawl and people living far from work. Focus should be on central Seattle area before ever going so far north and south. This plan only benefits those who live very close to a station. We have no service between Broadway and Husky Stadium stations right in the center of Seattle. Ridiculous.
NORTH KING COUNTY	I only somewhat oppose #13 because I am not happy with our state's tax structure. but if that is what we have ...
NORTH KING COUNTY	We're decades behind construction of fast, convenient and reliable mass transit system. Not mentioned, but should be incorporated into the mass transit plan are shopping and social gathering plazas for MT users. These are used to attract drivers from their automobiles in Europe and help finance the MT system thru commercial rental fees.
NORTH KING COUNTY	Needs to be done in West Seattle sooner

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	This is the first time in my life that I will vote against a transportation funding bill. It is time that all those pie in the sky planners start thinking about new revenue sources such as a State income tax. This piecemeal funding of important infra structure is not working. We already have a 9.6% sales tax which hits the poorest people the hardest. All those skyscraper millionaire developers have to either put up or shut up. In the future variance and settling for a pitiful number of affordable housing should come to a sudden halt. Until the Chamber of Commerce realizes that they too need to support tax reform, they will not get free ride on the cost of infrastructure. It will take more than a small percentage added on to the already burdened people to make Seattle a world class tourist attraction.
NORTH KING COUNTY	I'm sorry to see that this project would be so heavily funded through regressive sales and vehicle excise taxes. I would like to see funding for projects such as this one supported more heavily through property taxes, gas taxes, and tabs that take miles driven and age/value of the vehicle into higher consideration.
NORTH KING COUNTY	The plan could easily be outdated by the time it's able to be implemented. We need a transit solution now as well as seeking options for the future that fit with the technology we will have at that time.
NORTH KING COUNTY	You are offering service all over the place, while the service to Northeast Seattle has been ruined. Yet, the lion's share of the cost has come from neighborhoods like mine in View Ridge - Wedgwood, Bryant. I continue to pay with no added benefit. And in the end, I will lose my home to horrendous tax increases. If you are a Seattleite trying to get even from downtown Seattle to a Seattle neighborhood, it takes you longer than if you live in Kirkland, Bellevue or Redmond. And these bicyclists you cater to are thrill seekers and speed demons, with no laws and codes to follow. I oppose it all, until you can come to your senses and be logical about my money that you are throwing away.
NORTH KING COUNTY	Faster faster faster even if it costs more.
NORTH KING COUNTY	I selected "very urgent" for all questions for a reason. We have a transportation crisis in Seattle right now. The city is growing fast. Traffic is getting worse and worse. Buses are packed and standing room only. We should have been doing most of these proposed projects years ago but it's better late than never. We need an all-of-the-above strategy.
NORTH KING COUNTY	See whether some projects can be dropped and timelines tightened. But overall, this is an important project. Public communication needs to emphasize taking action now because it will only be harder later.
NORTH KING COUNTY	All sounds great
NORTH KING COUNTY	Need to add WIFI support throughout light rail! It's crazy to think people will want to be disconnected during tunnel transit....

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Light rail is a great service in the long-term, continued improvements in BRT are needed throughout the City and region in the short-term and long-term. The light rail to Ballard is flawed and should include a station in Fremont. The Sounder rail system seems of limited utility and potential especially with the frequent disruption due to landslides and rail issues. The use of property taxes to fund this measure is not ideal, and make this more regressive and further amplifies the housing affordability issues. We live in a very small, sustainable house in Seattle and have two orca cards and one car for our household that we drive less than 3,000 miles per year; however, we will be paying twice as much as someone living in a significantly larger house with multiple cars driving 10X as many miles per commute (our commute is 3 miles). Why not use a standard fee per household rather than based on assessed value (assessed value is pricing people out)? Why not impose many of these taxes on developers and employers? Why not charge a nominal fee for parking at Park and Ride stations (daily or annual permit)? I cannot park anywhere for free and pay almost a dollar per mile for my commute, our household pays subsidizes other's unsustainable lifestyle choices. There are many people (even dual-income professionals, let alone elderly and families) that will be priced out of Seattle if the property taxes are used to fund EVERYTHING!
NORTH KING COUNTY	1) is it REALLY going to take 25 years to finalize 2) what is AVERAGE adult? What income bracket?
NORTH KING COUNTY	Lightrail speed is #1 priority
NORTH KING COUNTY	Light rail should be heavily prioritized.
NORTH KING COUNTY	While I support this plan I don't see a remedy to existing neighborhood traffic congestion or a method to improve access to it. Due to very low housing density, topography, weather and distance to services or jobs, most will still choose to drive a car. I would contract with Uber to operate shuttle buses at a cost similar to Orca card rates to bridge this last mile. The big bus system run by Metro simply doesn't meet the mobility requirements of most to reach ST3 lines. The social equity bonus would be the elimination of food deserts for those without cars.
NORTH KING COUNTY	Completing the Graham Street station should happen sooner, since a large portion of the south end of Seattle is not being served and it is an historically under-served community.  Secondly, ST3 should line up with Metro better. The south end buses do no feed into the light rail. The number 50 bus is the only bus that feeds the light rail and it actually loops to West Seattle and is constantly delayed. We need more REAL feeders. For future planning I hope that you work in tandem with Metro and come up with coordinated and well thought through connections.
NORTH KING COUNTY	I want a #TunnelToBallard and the #WestIsBest route in Interbay. But 22 years is way to long!
NORTH KING COUNTY	Why aren't there more park and rides along light rail?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	You should keep light rail in King County before putting a token effort in Snohomish and Pierce county. West Seattle, Ballard and East Side picking up Renton and other large cities along 405. I suggest you drop this total plan and break it into three different plans unless you want to have the whole concept fail! Have King, Pierce and Snohomish fund their own plan and what they are willing to pay for.
NORTH KING COUNTY	I am noticing, there is no easy access between Ballard and Northgate. We should not go backwards to access the link. Time-time-time
NORTH KING COUNTY	I daily rode over-crowded smelly buses daily from Fremont to Downtown Seattle for over a decade. Now that I'm 65 years old I can no longer ride a bike nor get groceries or to the Dr. without a car like many aging Boomers --- just stop reducing many 4 lanes roadways to 2 lanes or into bike-lanes & increase more flexible cost-effective Uber car & bus service. WSDOT is an incompetent joke & SDOT has trouble filling the patches on top of the even older potholes. Let's increase taxes & our country's wasted 18 Trillion \$ debt to our grand kids instead of spending tax \$ prudently!
NORTH KING COUNTY	I am very excited about these improvements
NORTH KING COUNTY	The potential to have dense urban development and produce more housing around our light rail corridors is crucial for our region to grow and accommodation the needs of the current residents. Not including any of the provisional stops along the currently planned service would be a misstep in creating more housing affordability and reducing our regional dependence on cars. Bypassing these opportunities is a loss in terms of the value increased development will create for the county in property taxes alone. While there is a cost to install these stations initially it's significantly lower than not building provisional stops in the first pass and realizing the need to add them later. Seattle is on the path to grow and become a much larger city. We need a transit system like other "real transit" systems. Building a system separate from vehicle traffic that works like New York, Paris, or Berlin is crucial to our future. It's silly to miss these opportunities because of cost now when the potential benefit is so great.
NORTH KING COUNTY	Providing mass transit options for the greater Seattle area should be a priority. Right now, there is always traffic on 1-5, 1-405, and 1-90 because people just drive, but this could be alleviated if there were more reliable transit options. In addition, providing parking for the areas outside the Seattle center is critical. I live in Seattle and for the most part don't need to use a car to get around, so there's less of a need for parking. But people who live in the suburbs will likely drive to the transit centers and need a park and ride to park their cars. It should be free parking, too.
NORTH KING COUNTY	It was always intended for Ballard to have improved transportation along with their development over the years. The transportation has gotten worse, while development continues on a large scale.
NORTH KING COUNTY	Any property taxes should be based on property value not a straight per person/property amount. Million \$ homes should pay more than \$200K properties, etc.
NORTH KING COUNTY	I will be unable to support a plan that takes as long a this one does to get service to Ballard and West Seattle

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	To build confidence and support for the plan, address promptly deficiencies created by recent changes in transit service. The new Link stations at Capitol Hill and Husky Stadium, while desirable and certainly appreciated and heavily used, have had a negative impact on transit between the University District (west of the UW campus) and downtown. The express bus service that ran on University Way was eliminated. Route 66 was eliminated. Sound Transit's northbound Route 512 does not stop at 45th between 2:30 and 7:00 on weekdays.  If efficient transit service could be restored promptly for travel between the University District and downtown, my confidence in the planning process would be enhanced and I would be happier to support the draft plan.
NORTH KING COUNTY	You ruined my commute to West Seattle after you separated the C line from the D line. Now I have to take 3 buses in order to get to work in the morning from Queen Anne to West Seattle.
NORTH KING COUNTY	I'd pay more to have it built faster!
NORTH KING COUNTY	The reason I indicated that I never use public transportation is because where I live it is cumbersome. I would absolutely use the light rail system regularly if there was a station at NE 130th! Thank you!
NORTH KING COUNTY	Item 4 above misleads - actually says that "Light rail operates in its own right-of-way, separated from traffic." But some proposal from Ballard to Downtown would be on surface streets. The route from Ballard should NOT NOT NOT be on surface streets. Needs a tunnel under ship canal and the alignment that avoids destruction of limited roadway. And if you're going to do it do it sooner.
NORTH KING COUNTY	Property taxes already too high. There is no sunset clause. This plan is taxes forever. Insane usage of taxes with no end in sight.
NORTH KING COUNTY	I strongly oppose using property taxes to pay for this proposal and will oppose the proposal should it rely so heavily on this means of funding.
NORTH KING COUNTY	Please speed it up. Seek expedited SEPA and permit review in each city. Put Light Rail where the people live, not in the middle of I-5. Follow thru on the Graham Street Station which was originally part of Phase One. Please.
NORTH KING COUNTY	I hate the Seattle bus system, it costs as much to bus round trip as it does to park downtown. Busses are never on time, standing room only after the first few stops and take twice as long to get anywhere. I'd rather take light rail.
NORTH KING COUNTY	I feel there is no mention of housing units at all stops. The 130th street stop has no space for High rises .If those were not in the plan I feel it would be more compatible with our neighborhood as we will be seriously impacted by traffic from Bitter lake , Broadview Blue Ridge on the West and Lake city on the east
NORTH KING COUNTY	bad decisions on top of more bad decisions. re-take the "rail" lines from the dog walkers. Set up a fund: If it the dog walkers and bikers want it back, they can donate to the fund. Place back the rail lines that were in place: re-take the land that was sold to developers at a loss for the people that NEED park and ride. Replace viable bus routs that have been removed, and straighten out the BAD MESS call "u-district".

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	It needs to be completed FASTER! 22 years before light rail is available in Ballard is unacceptable.
NORTH KING COUNTY	<p>Ballard to Downtown:</p> <p>&gt;Running LRT at-grade between Expedia and Dravus is unacceptable. Traffic disrupts Central Link on MLK every week.</p> <p>&gt;A movable Ship Canal crossing is also unacceptable. We need to invest in a transportation alternative that is never subject to the delays that movable bridges cause for all the Ship Canal bridges in Seattle.</p> <p>We must not repeat the mistake of hamstringing a regional line (like in the Rainier Valley) with at-grade stretches and movable crossings. We must preserve the ability for Link trains to run uninterrupted and at 3 minute frequencies for the future. This stretch will eventually carry ridership from the 45th corridor, Crown Hill, Lake City, and the Lake City Way corridor to the city center. No sense in value engineering here.</p> <p>Everett:</p> <p>When moving forward with different option treatments of Paine Field, keep TOD potential in mind, as well as the lack of walkability between stations and employment sites in the S Everett Industrial Center. In order to be effective, any employment or commercial density that a transit line seeks to serve needs to largely be within walking distance of the station in question. For most industrial employment in S Everett, there would have to be shuttles run in order to make a transit commute viable. At that point, why not just run LRT on Evergreen and have Boeing or whoever run nonstop shuttles? That would be a solid compromise. The nature of industrial development is that it is designed for truck and car access, making it closer to suburban than urban in terms of transit use character. The product of this kind of planning can result in the disappointing performance of Santa Clara VTA's light rail, which for the most part doesn't feature very much employment density that is within walking distance of its stations. In contrast, the North Everett LRT extension features a plethora of trip origins and destinations within walking distance.</p> <p>The I-5 alignment would save money and time, but would reduce the number of potential TOD areas by avoiding the redevelopment space rich Evergreen corridor. I understand that the Everett Mall area is has good redevelopment potential though. Also, when considering a Paine Field spur, work to avoid the operations and frequency pitfalls of BART to SFO that resulted from making that line a branch instead of part of a unified line with a transfer to their air train. Requiring a transfer at Everett Mall instead of making it a branch from the spine would help avoid that problem.</p>
NORTH KING COUNTY	Increased bus transit in Seattle is destroying streets; there is need for more money for street maintenance and repairs.
NORTH KING COUNTY	ST3 needs to rely more on user fees and less on property taxes to finance this expansion especially since the proposed plan is highly linear and does not grant equal access/ease of access to all users
NORTH KING COUNTY	Bus rapid transit needs to be faster, more convenient with as many dedicated rights of way as possible.
NORTH KING COUNTY	please add light rail to connect West Seattle sooner than later!!!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I would like to point out that the overall plan mirrors historic Seattle racial biases. Both routes and modes of transit are preferential toward white communities. Washington DC subway system developed the same way - designed to service all surrounding areas, but mysteriously the route to the black area of town lagged far behind. I choose to live in the south Seattle / Renton area where I could enjoy a more integrated environment. I work in Bellevue and have the misfortune of tolerating overcrowded buses, scarcity of routes I am sure is in part due to the color of my transit partners skin. The cost of the plan would be much more tolerable, in fact I would gladly pay more if it weren't for the fact that I am paying for better transit for a population that is already more advantaged (higher socioeconomic, predominantly white) than my neighbors. I will pay the same as a Microsoft traveler so that s/he can enjoy a lovely train ride to work while I wait for my late, overcrowded, aging bus. The racism here is blatant - I am ashamed and angry.
NORTH KING COUNTY	The amount of and expense for parking structures in proposed plan is completely ridiculous. I'm not going to pay \$80,000 a parking place so someone in the burbs doesn't have to take a bus.  The proposal delay all the Seattle projects to build massively underused service to Everett and Tacoma. The city would be better off going it alone.
NORTH KING COUNTY	Graham Street NOW!
NORTH KING COUNTY	I think at some point in time, Washington state needs to embrace change in the tax system- you cannot expect property and sales tax to fund everything.
NORTH KING COUNTY	My concern is for income levels below \$30,000 salary annually being able to support the tax/and or afford to use the necessary transportation. I believe their should be written into the plans a graduating scale for those who learn less that 30K to be exempt from added taxes outside of sales tax such as property or auto tax, as well as discounted fairs. The Seattle Metro has been in need of an effective affordable transportation system that catches it up with Western Europe.
NORTH KING COUNTY	Please visit dc and ride their metro. This what Seattle should have done. The double decker bus is great no more tandem busses, they are slow and are why the traffic is so bad. They cannot make turns with out backing up the traffic. The transit link cars are badly designed for travelers going to and from the airport. No space and place for luggage. The small place assigned for luggage allows luggage with wheels to move around car, while link travels. Check out the luggage racks in trains going to and from London airports.
NORTH KING COUNTY	Ballard should come first
NORTH KING COUNTY	The 25 year timeline is absurd. Seattle and the metro area continues to grow, traffic is always congested. We should have had the foresight to improve transportation decades ago but we didn't. Now we need to move ahead quickly to try and ease the transportation problems in the area. Many major metros have well developed light rail....but not us.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	How's it take 22 years to get a subway line to Ballard?!
NORTH KING COUNTY	Needed light rail 10 years AGO. Waiting 22 years for light rail to Ballard is UNACCEPTABLE.
NORTH KING COUNTY	I really think we need to focus on the downtown corridor before moving farther south or north. The Ballard to downtown and West Seattle to downtown are the most crucial components and should be prioritized as the next steps
NORTH KING COUNTY	Major businesses that employ and utilize our business friendly environment in the Puget Sound benefit greatly from these proposals to improve transit yet there's no mention that there will be any sort of financial contribution and commitment on their part when these entities are some of the biggest stakeholders with a much larger resource base to help support these infrastructure projects. Why are the local residents always being placed on the hook for footing the bill with property taxes all the time? I'd like to see more language in these proposals that proportionately divides funding between all the stakeholders and not place the financial burden solely on local residents through property taxes.
NORTH KING COUNTY	The time line is way to long. There are doctors who will ride the first runs of these that haven't even been born yet.
NORTH KING COUNTY	While I no longer live in Seattle, I maintain a property there and have a strong interest in the future of the city. Public transit will never get cheaper to build, and it is the only way to "save" the region. It must be comprehensive and connect every point. Otherwise it will not attract the riders needed. After all, why take the bus/train when I can drive there just as fast? Or worse: take the train to Station X, only to be stranded because there is no connection to my final destination?  I currently live in an area with excellent public transit, to the point where it has been three years and I still do not feel the need to own a car. I have great hopes that Seattle can be a shining example of how urban density, well-connected transit and outlying towns can all work together to create a unique and liveable environment.
NORTH KING COUNTY	Lower income households are moving further and further south in King County and into Pierce County, with longer and longer commutes. Transportation services should prioritize this population. Developers are making a financial killing in the current housing market. Property tax increases should come with the proviso that they cannot be added to rent.
NORTH KING COUNTY	Would the Seattle Streetcar not be an option anymore if the Ballard to Downtown light rail is approved? A Ballard to Fremont to Downtown Streetcar would be something that could be done faster than the Ballard to Downtown light rail project and get people moving sooner.
NORTH KING COUNTY	I think that connecting west Seattle and Ballard should be prioritized ahead of some of the other projects.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>I'm not convinced population justifies light rail for the portions beyond Seattle. Bus rapid transit seems better suited, quicker to implement, more economical and less vulnerable to blockages or terrorism at stations.</p> <p>I'm also unsure of effects of this on promoting urban sprawl and wonder if it will contribute to that.</p> <p>And I'm also concerned about growth reducing quality of life and suspect this of being something which will lead to more growth and just worsen things. It might be better to find ways to limit growth and influx of more people.</p>
NORTH KING COUNTY	<p>I prefer a bus rapid transit expansion to light rail. I still cannot get from my east Shoreline home to Edmonds without taking 3 buses. I can't get to Lake Forst Park or to Kirkland without driving. It is difficult to get to Greenwood on bus from my house. I am committed to not driving b/c GLOBAL WARMING IS HERE, so I do not go anywhere except to local Shoreline stores and library 2x/week. THE METRO BUS SYSTEM IN SHORELINE IS WOEFULLY INADEQUATE AND HAS BEEN SINCE SHORTLY AFTER I MOVED TO THIS SMALL CITY,</p>
NORTH KING COUNTY	<p>Stop with the increased property taxes!!</p>
NORTH KING COUNTY	<p>I strongly feel that the plan should be focused on building a legitimate rail system within the city of Seattle. The Ballard and West Seattle lines should be the first projects to receive time and money, not the last. Once the city has a decent system, traffic will be reduced, it will be the envy of the region, and there will be much more suburban support for the funding of light rail extensions and bus extensions outside of the city. I fear that with this plan, it will lack the momentum to really transform the region.</p>
NORTH KING COUNTY	<p>Keep going! I encourage you to persist though you'll encounter opposition. The Puget Sound area needs your leadership and vision to continue to make this one of the most wonderful places to live in the US!</p>
NORTH KING COUNTY	<p>Cost is way too high on a per mile basis and take too long. why not bid some of the lines out to the private sector?</p> <p>sounder transit will not work unless later trains can run. last train from downtown at 5:45pm... seriously</p>
NORTH KING COUNTY	<p>Just do it. We've put this off too long, and now we're in crisis mode.</p> <p>My only concern is that this not be a regressive tax. How about using money from those 405 express lanes to fund this? If someone has enough money to waste on those, then they should be putting in an equivalent share.</p>
NORTH KING COUNTY	<p>Make sure light rail gets to West Seattle.</p>
NORTH KING COUNTY	<p>Look at Atlanta's Marta rail stations. Plenty of parking. One of the most frequent complaints i hear from co-workers why they won't take the light rail is that there's not enough parking by the stations and taking a bus to the station would add an unreasonable amount of time to their commute.</p>
NORTH KING COUNTY	<p>Find another funding source. License bikes and raise fees. Do not count on home owners for everything !</p>
NORTH KING COUNTY	<p>Go back to the drawing board and identify essentials that are cost-effective.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Prediction: if west seattle is not helped soon, don't count on our support of still more plans that never seem to consider our increasingly difficult situation.
NORTH KING COUNTY	No open-ended tax plan, it should be limited to 20 years. The parallel tunnel in Seattle is inefficient and wasteful, and if built should be farther away from the existing tunnel. Ballard is very well served by transit now, and can wait for ST-4, the north/south corridor to Everett is much more important and deserves more service.
NORTH KING COUNTY	It's all important! We need to have better transit in the great Seattle area for environmental reasons, traffic congestion and safety. Please keep this movement going for the health of our city and state.
NORTH KING COUNTY	Get it done faster.
NORTH KING COUNTY	Please find a way to build NE 130th Station in ST3 . . thanks!
NORTH KING COUNTY	We need a station at 130 Ave ne please don't disappoint us.....
NORTH KING COUNTY	I believe that a fitting source of revenue for these and other mass-transit and capital-improvement projects, which benefit everyone, would be a new slate of taxes that match today's economy. For example, state or regional income and capital gains taxes; a tax on financial transactions; a tax on personal services; taxes on obesity-causing soda and candy and wasteful bottled water; and a carbon tax. I urge PSRC to propose and vigorously pursue tax reforms like these.
NORTH KING COUNTY	Roads are cheaper
NORTH KING COUNTY	Don't offer free parking in some counties/cities for mass transit and make others pay. Residents are already paying a Zone fee every year just to park at our own homes due to a LARGE amount of congestion by commuters parking on our blocks to take mass transit.
NORTH KING COUNTY	I believe that there is an over-emphasis on public transit initiatives and spending, and an extreme under-emphasis on improvements to the existing old, obsolete, and crumbling infrastructure that makes up our public roadways and bridges. I am appalled at the amount of public money being spent on such projects as the tunnel to replace the Alaskan Way Viaduct. This was a very expensive solution to a transportation project when there were cheaper, and likely more effective solutions such as just replacing the viaduct with a newer more modern elevated roadway. I can only assume that the tunnel project, along with these proposed light rail expansions in ST3, have more to do with politicians' legacies than with efficient, effective solutions for improving transportation throughout the Puget Sound area. I also feel that there are more important issues for my tax dollars to address, such as education, even filling in a few potholes once in awhile. I would urge Sound Transit to withdraw its proposal and let the taxpayers money be put to other uses.
NORTH KING COUNTY	Thank you for adding the BRT options to the plans. I would love to use transit more often but getting to the stations and the time involved in transit becomes too much. We love the link between the UW and downtown and have used it several times already. I am so ready for this expansion to public transportation!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Not a fan of the increase in sales tax, as all sales tax is regressive and disproportionately places a burden on lower incomes, and would rather see other taxes increase, but I know that's a battle that's been going on for ages.
NORTH KING COUNTY	I strongly support transit development throughout the region, but as a senior citizen on a fixed income, I worry about increases in my property tax. Seniors need a break and we need to improve our transit system. Please find a balance for senior citizens!
NORTH KING COUNTY	Please raise the funds via income tax. This ensures that the poorest amongst us are not hit as hard as the wealthiest.
NORTH KING COUNTY	We in the North of Seattle need light rail near 130th Street. I also work in Kenmore so I need to take a bus from Lake City to Kenmore everyday!
NORTH KING COUNTY	Figure out a way to pull in your timelines. We need these projects now.
NORTH KING COUNTY	Building a massive suburban light rail system seems sort of bizarre. You're counting a lot on Metro to provide the useful service in Seattle. The map makes this look basically like commuter rail, just on a different platform. I guess it's not really what I thought light rail was 'for.'
NORTH KING COUNTY	More east/west transit IN SEATTLE. More north/south routes that cover & connect King, Snohomish & Pierce counties for ONE LOW FARE rather than the current county separation that costs riders way too much. Fire Mayor Murray and Seattle Transpo Director Scott Kubley. Get rid of STP and ANYONE associated with them. Reduce cost. MOST of all: IMPROVE CURRENT DRIVING CONDITIONS FOR SEATTLE DRIVERS. The region CANNOT survive on transit and bicycles alone.
NORTH KING COUNTY	Cost of living is so high and on the rise in Seattle - increased taxes are really going to hurt lower income families and individuals.
NORTH KING COUNTY	There needs to be parking at every major rail station. There also needs to be a local shuttle service to take people near rail stations directly to those stations. Relying on existing bus routes is not working. Also, you need to consider removing buses from the tunnel downtown seattle as this doubles and tripples the train travel times.
NORTH KING COUNTY	Don't spend \$ on parking or parking structures. Buses to stations are a better investment than parking garages.
NORTH KING COUNTY	Ballard is one of the fastest growing neighborhoods in Seattle. We cannot wait 22 years for better transit service, particularly when our roads are not being updated to accommodate the increased car traffic, due to all the new residents and horrible transit service, in our area.
NORTH KING COUNTY	Two comments: 1) The timeline is too long to meet the growth needs of the area. It has to be sped up with more projects being done in parallel. 2) We need a graduated income tax to support this initiative to ensure that we don't add yet another regressive tax burden to those who can't afford transit as it is.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

<p>NORTH KING COUNTY</p>	<p>I STRONGLY support us going to the ballot with a bold and ambitious ST3 plan and like ST2 I want to campaign hard to make sure it passes. But the current draft makes that very hard to stomach.</p> <p>NE 130th St Station needs to be fully funded in the plan. It's cheap compared to other parts of the plan and can better serve Lake City and Bitter Lake. These are areas that NEED transit service badly and it's an equity issue.</p> <p>The order of the projects is crazy. Ballard needs to happen first. You need to prioritize projects based on ridership and need.</p> <p>Ballard (and everything else) has to be grade separated and built right. If you're not doing that you might as well not do it at all. We should be building a mass transit system that will last 100 years and not cutting corners.</p> <p>When we're looking at a new line (like Ballard) you should strongly consider automated trains.</p>
<p>NORTH KING COUNTY</p>	<p>Please if possible do not build future light rail to be in conflict with automobiles, as was done on Rainier Avenue South, where there have been a number of accidents. Another lesser concern is the slow speed at which light rail can travel on those routes.</p>
<p>NORTH KING COUNTY</p>	<p>The roads that the Rapid lines are on were not built for buses. The buses are destroying the roads and the homes along the road. I support buying buses that are designed and built for the roads they are on. I am sick of the buses shaking homes. I am concerned that the building support for roads is to have the buses "go faster". Please purchase buses that are designed for roads, you would not put a heavy train on a light rail system why is it OK to put a heavy bus on residential road</p>
<p>NORTH KING COUNTY</p>	<p>It seems like an awful lot of money and an awfully long timeline for the small subset of people who are committed to riding mass transit. I understand that more people would use it if it were even easier in certain respects. But our region is so geographically constrained that virtually any trip is bound to confront odd "moves" that require time-costly transitions between forms and lines of public transport. Metro Transit's recent upheavals of bus routes are a disaster. I would frankly rather see Sound Transit help fill in the BUS gaps here and now, rather than invest so much time and resources into improvements that might not buy many of us very much at all WRT simplifying and speeding our trips around the region.</p>
<p>NORTH KING COUNTY</p>	<p>I think development of this is great BUT the eroding of single family neighborhood through upzoning areas around these stations is terrible and worsens crowding</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Where I live in lake forest park it's a 1.2 mile walk (bike) with no shoulder and no side walks and poor enforcement of traffic speed limits to catch any type of transit... Therefore I have a hard time supporting any transit taxation especially considering I am close to retirement and will be on a limited fixed income... You will tax me out of my house and not provide with an alternative transportation method. Here's an alternative... CHARGE MARKET RATES FOR STREET PARKING... IN SEATTLE WHERE I WORK 2/3's OF THE ROADS AND SIDE STREETS ARE BLOCKED BY FREE AND/OR HEAVILY SUBSIDIZED STREET PARKING... THOSE STREETS SHOULD FOR TRANSPORTATION....
NORTH KING COUNTY	<p>West Seattle needs to be the highest priority for light rail completion. Our transit options have been severely limited in the Admiral district for people wanting to get in and out of downtown outside the commuting hours.</p> <p>It been very helpful to have a bus that delivers people to the West Seattle water taxi, especially given the hill in the Admiral district. With the light rail station planned for Delridge area (under the West Seattle Bridge) it would be incredibly helpful to have a similar bus that would serve the Admiral district and bring people from the light rail up Admiral to Olga and other bus stops currently in place to the Admiral Junction.</p> <p>Having to go to the Alaska Junction for a transfer up California to the Admiral junction adds 20 to 40 minutes to your commute.</p> <p>Living less than 2 blocks from from a 56 and 57 bus stop on Admiral, I've been able to get downtown during the day in about 20 to 30 minutes. Since the major changes to buses in the last couple of years, if I want to head downtown to appointments, I can't get back to the Admiral district during the day unless I add about 45 to 50 mins to my commute. In order to get downtown outside commuter hours, I now have to walk a 1/2 mile to Admiral and head south (the opposite direction I want to go) for a mile to the Alaska junction on the 50 and then transfer to the rapid ride. This can add almost an hour to my commute.</p>
NORTH KING COUNTY	To long, shorten the time period. 25 years is to long to wait for something that should have been done decades ago!
NORTH KING COUNTY	Brt on shoulder sounds very unsafe.
NORTH KING COUNTY	There should be a gas tax for the project rather than property taxes.
NORTH KING COUNTY	That timeline just seems really long
NORTH KING COUNTY	<p>Populations move--rails don't. Just look at where downtowns used to be!</p> <p>Buses are flexible--rails are not.</p> <p>Rail lines cost more, serve less people.</p> <p>Taxes are for GENERATIONS--yet NO service!! that's slavery!!!!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I moved to Seattle in 1968! And every year these same questions have been asked and answered ... West Seattle is like the forgotten child. Think I'll jus' might be Dead by the time anything really happens in Seattle. Which one of you voted in the 'Boston Tunnel aka Seattle Tunnel ??? And wash't there a much better way to achieve the solution without excavating soft clay/sand glacier ....?? You answer to the money + developers. Our urban village on California /Alaska Junction now have canyons of no sunlight.
NORTH KING COUNTY	This survey is poorly done. You talk about importance but measure urgency. These are very different concepts. Also, instead of having people rate routes, there should be more focus on the types of transit and better information on their relative costs.
NORTH KING COUNTY	I feel like the timelines are too long. 25 years to complete the project seems like priorities might not be the same at that point. I understand that building the lines takes time but I feel like it could be looked at to be finished faster somehow.
NORTH KING COUNTY	Try to make connections possible ASAP so cars are NOT needed. Building more parking lots just encourages more car use. We need service that gets us from home to our destinations without use of cars.
NORTH KING COUNTY	More provisions for lower income access, now and in the future.
NORTH KING COUNTY	N/a
NORTH KING COUNTY	With the speed that the Puget Sound region is growing, we cannot afford to complete the ST3 plan in the 25 year timeline. It needs to be decreased significantly - 10-15 years max. Also, perhaps a state income tax ought to be proposed if we are wanting to fund the project in the decreased timeline. No increase in the sales tax or property tax, both of which have been proven to put more of a burden on the poor.
NORTH KING COUNTY	Bike infrastructure needs to be a priority. All of the work within the city of Seattle must happen much faster than outlined in the draft.
NORTH KING COUNTY	replace old rail systems w/bullet trains and i'll agree to property tax increase. the gov't. has been laboring on this and collecting taxes on overkill the last 50 yrs along with all the funding the fed. gov't has supplied there is no reason for NOT upgrading our infrastructure NOW>
NORTH KING COUNTY	1. I have heard many complaints about the recent reduction in Seattle bus service, and the difficulty of taking mass transit to the UW Link Light Rail Station, which combine to make mass transit a less favorable option than previously. 2. We are being asked to fund a plan that has a very long timeline. So much will change in that time period, including, most likely, the adoption of autonomous vehicle systems.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	We need to prioritize the poor & working people over shopping trips to Redmond. There are HUGE stretches in URBAN Seattle with poor-to-no transit connections. Take care of the low-hanging fruit of the needed south Seattle stations then work on cross-city and suburban access to urban jobs/schools. And since Seattle Public Schools is relying on Orca cards to get kids to school, how about making sure they can get there without taking multiple, infrequent buses with a mile walk on steep hill to get there (Columbia & Hillman City to Asa Mercer Middle School, which is 10-15 min by car and an hour+ by bus-bus-dangerous walk last time I checked)! Thank you for doing such a great job seeking community input on these projects.
NORTH KING COUNTY	Ballard and West Seattle need a better system into the city.
NORTH KING COUNTY	Much too expensive--taxes too high for too long.
NORTH KING COUNTY	I will not support a project that leaves Ballard commuters-- the area with the highest users of public transportation--and therefore the tax payers that have most consistently subsidized public transportation--to wait for a long time before light rail or Sound transit improvements come to Ballard. I will vote against this proposal unless significant improvements are made affecting Ballard and West Seattle and bringing light rail and faster public transportation to these neighborhoods. The Rapid C and D--which are not rapid at all and which have been plagued by poor planning on the part of Sound Transit--do not count at all.  significant improvements are made affecting Ballard and West Seattle.
NORTH KING COUNTY	Get it done.
NORTH KING COUNTY	\$200 is a heavy tax burden for less affluent residents, so make sure some of the major improvements will reach areas that service all types of people and not just the increasingly congested but affluent Seattle neighborhoods
NORTH KING COUNTY	The light rail should be the highest priority and the bus service should be the least priority. The bus system here in the Seattle sound area SUCKS ASS. Only a rail system makes sense. All components of the rail system should be connected.
NORTH KING COUNTY	how can you get light rail to west seattle since we go over the water, is what i would like to know, and how is the traffic going to be effected while it being done, we are screwed with 99 is closed , it effect us more then anyone , how are you going to not screw with the commute if that is being built , It takes me an hour to get home from the Sandpoint Area to West Seattle and I already work a 11hr day not counting the commute.

NORTH KING COUNTY	<p>Our region is predicted to grow a lot. I'm strongly in favor in general of measures that would increase non-car options and enable us to grow in a healthy way. I'm not very excited about anything included in the current ST3 package.</p> <p>Ballard -- Ballard to downtown is huge. There's clearly a lot of demand for service and improvements in speed, frequency, experience, and dependability would provide value to a lot of people. Changes that should be made to this plan:</p> <ol style="list-style-type: none"><li>1. Have Ballard/UW as part of ST3. Ballard-downtown has greater ridership, Ballard-UW improves the network. Most fast/frequent transit around here is oriented north-south.</li><li>2. Completely grade separated. Make this fast, dependable, and keep it from messing up surface street traffic. For Ballard to downtown, do a tunnel rather than a bridge.</li><li>3. 22 years is way too long. Clarify what happens if we don't wait for the second downtown tunnel to hook in Ballard. Are there work arounds?</li><li>4. Plan this for the future (seconding what Seattle Subway said on this). Design with the assumption that you might eventually expand north and/or east-west.</li></ol> <p>West Seattle -- How would you get from west Seattle light rail to Alki beach? Please partner with Seattle to make sure an inviting pedestrian connection is built into the plan.</p> <p>Issaquah -- If we need to cut something, I think really good BRT would be acceptable for Issaquah right now.</p> <p>1. I'd love to eventually have Issaquah/BellevueCollege hooked into the light rail network. I'm really glad the current proposal has been updated to have Issaquah go to Bellevue instead of Wilburton. Station should be in downtown Issaquah. Since the bulk of the proposed light rail line follows freeway -- I think in the short term we could provide similar value at a much lot lower cost if we did dedicated bus infrastructure right and spent the extra money on greater frequency, longer service and/or other projects. I occasionally catch the bus from Issaquah and the things that would really make a difference to me would be -- Frequent, dependable, fast, easily understandable, comfortable service that includes downtown Issaquah. The ST3 proposal doesn't include downtown Issaquah currently and everything except for comfortable service could be met by really good BRT.</p> <p>2. Maintenance -- What do maintenance costs look like long term?</p>
-------------------	--

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

<p>NORTH KING COUNTY</p>	<p>I am very put off by the time line. I will retire before the plan is finished. I will likely move from the area because of the expense of living here. While I think Seattle really needs something of this scale, I am not inclined to add \$400/yr to the \$160/yr that we just approved through car tabs for something that I will not see the benefit of.</p> <p>Futhermore, while I have strongly supported for the past 23 years, I am tired of paying more for transit while sound transit makes my commute worse. Last fall my bus was kicked out of the tunnel because of sound transit. This change should not have been made until the northgate link opens. Thanks to sound transit, I am spending an extra hour in transit each week, which equates to 50 hours per year. In regard to the ULink, I feel that sound transit is forcing NE Seattle to serve it's needs, by forcing buses through the very inconveniently located Husky stadium. Not efficient. Sound transit serves itself, not north seattle.</p> <p>Finally, I have found enough of the sound transit staff arrogant and rude. Specifically, I am referring to the closures around the Roosevelt station. Sound transit was a very poor neighbor in suddenly blocking left turns from E-bound NE 65th 12th. Sound transit obliterated the bike lanes without safe alternatives. These closures were done with very minimal outreach. A friend who works in the area has had intolerable shaking of her workplace/home, again with no or minimal notice. NOTE: A great webpage is not outreach and is useless when no one knows they need to look at it. (Northgate has good outreach.) Finally, I had a co-worker on the East-side along the route who lives in a house along one of the proposed lines. Sound transit was only proposing to buy 1/2 of his lot and would have run a train very close to his house every 3.5 minutes. In addition, this plan made it impossible for him to sell his house. In this last action, sound transit came across as a sociopath.</p> <p>Finally, both the NE 130th ST station and parking garages near the link stations are necessary for me to even considering a yes vote. However, right now, I only feel like sound transit serves itself, not the people who actually need to get places.</p>
<p>NORTH KING COUNTY</p>	<p>Light rail from South Seattle to UW has transformed my commute and cut the uncertainty of traffic out of the equation. I no longer have to wonder if I have to leave an hour early to make it to lab on time because of traffic. I previously had to rely on the bus which is subject to these irregularities. Rail expansion and express bus lines/shoulder lanes, assuming they would equally impact other commuters, should be top priority.</p>
<p>NORTH KING COUNTY</p>	<p>Who benefits the most? They should pay.</p>
<p>NORTH KING COUNTY</p>	<p>I would like to eliminate the additional Sales Tax since it further harms low income people (I'm wealthy) who must spend their entire incomes on essentials to their living -- and instead put a business tax on all businesses doing over 2 million dollars a year in gross business since they benefit so much from being able to move their employees, stock, goods, products, etc. We truly need to fund this in a more equitable manner -- please!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	As an interested person and without accurate knowledge of the current and anticipated demographics of our region I do not feel qualified to comment on specifics of the ST3 plan. From my home in Lake Forest Park I would love to be able to move about the Region without the need of my car. Thank you for your hard work. This is an incredible undertaking.
NORTH KING COUNTY	I would support funding through car tabs/gas taxes that in some way push the cost onto those that choose to drive in single occupancy vehicles to work every day.
NORTH KING COUNTY	We should tax business and industries who benefit from these infrastructure improvements that move employees around to pay for this, not increase property tax and car tabs tax.
NORTH KING COUNTY	This survey is misleading, I used to use sound transit daily but due to safety concerns at both Henderson and Othello, I have switched to driving. Safety isn't even part of this survey. The closest thing is parking. If there were parking available near these stations then there wouldn't be quite as much walking needed through "hotspots" identified by the Seattle Police Dept. I am a transit supporter and am profoundly disappointed by the loss of the 7 express bus and the inability to use light rail relatively close to my house because of safety (shootings and muggings).
NORTH KING COUNTY	Why it will take so long? Light rail should be prioritized and completed within the first 10 years or less, it will Make Seattle a greater city for living
NORTH KING COUNTY	Instead of funding through sales tax increase, fund more through vehicle and gas tax increases. I don't own/use a vehicle. I think like funding for public transit should come fro those that choose to contest the streets with private vehicles. Vehicle taxes could be pro-rated based on vehicle value and gas efficiency.
NORTH KING COUNTY	I'm concerned about funding. The \$200 per adult AVERAGE is misleading. As a lower income home owner my costs could be over \$75 a month, \$900 a year. I'm also concerned about sprawl from consolidating the entire region via transit. I would prefer more local transit improvements so people can meet their needs closer to home. It is already quicker to get to the jobs on First Hill from the suburbs that it is from the south part of Seattle via transit.
NORTH KING COUNTY	Build Ballard and West Seattle light rail first. I work in the MLK Corridor keep light rail of the street, either put in the air or under ground. The MLK neighborhood suffers greatly from the on grade service you put there, don't make that mistake again.
NORTH KING COUNTY	Build it now, fast, hurry! Look how crowded all the buses are already now everywhere
NORTH KING COUNTY	Why is it taking so long to complete even the first leg of this plan? 17 years is a very long time.
NORTH KING COUNTY	Our use of light rail now is limited due to essentially no vehicle parking near the stations. We are not within walking distance and bus access is very limited. How does an individual start ones trip. We would use rail to the airport if there were long term, moderate priced parking adjacent to the station. We know parking lots aren't popular to build, but until we find more alternatives it's very frustrating . Thank you.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Please look at all possible ways to improve the bus network, not just create a light rail network. Having a reliable and comprehensive bus network, with separate bus right of way, preferential bus treatment, BRT, etc, seems to me to be more cost effective and more quick to implement than a full light rail network and could meet our transit needs more fully as a region, rather than relying on expensive rail capital projects. Additionally, it is essential to use a racial equity lens and ask communities what they want in terms of transit and transit oriented development when prioritizing and creating projects to ensure that our transit network is truly serving the needs of all communities in the Puget Sound. Thank you for the work you are doing to build our very essential regional transit system.
NORTH KING COUNTY	Reliance on residential property tax is fair to a point - other economic interests who benefit from better traffic flow, access to employees and added value to their property in denser areas also need to find the expansion to keep incentives aligned. I'd love to know more about how commercial and multi family property taxes or payroll taxes on/near the systems catchment area contribute to the \$50b total. That's not discussed a lot.
NORTH KING COUNTY	Ballard to Downtown light rail must be grade separated along its entire length, not run in the street's median at grade like through Rainier Valley.
NORTH KING COUNTY	Future plans should include funding from businesses and the large and growing "renter" population versus continually relying so heavily on residential property owners.
NORTH KING COUNTY	I just want to make sure there are more stations in Shoreline specifically for the light rail, as it would be so nice to have for this community.
NORTH KING COUNTY	What serious consideration has been given to using the recently abandoned 520 bridge for light rail and buses? We might regret tearing something down that is an existing lake crossing.
NORTH KING COUNTY	The timeline is a complete joke. The projects are glacially slow. I will retire before these projects are done. Get federal or state funding and work with Boeing and Microsoft to strong arm the legislature.
NORTH KING COUNTY	The Freeways are inadequate for the traffic we have now, none of this is going to ease our traffic now. We need solutions. I'm tired of paying for partial solutions. Please come up with a real solution to moving people to and from work in a faster manner. Instead of tearing up the roads and increasing congestion for 1 HOV lane in each direction, how about you take our money and add 2 or 3 lanes in each direction and then maybe by the time you finish the mass transit solutions, traffic won't be so bad.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>I am a "senior senior" and a property owner, who once had a bus line past her house, My services go down, my taxes, up. I believe that there needs to be some relief in these and constantly other additions to the taxes of elderly property owners especially in areas like West Seattle which is really getting paralyzed with in the influx of new people, cars, people walking not the streets, etc. Though this proposed plan sounds thorough, it is long over due, and the costing is unfair to those of us who will never see these in action, yet our taxes go up and up. The former pleasant ambiance of our districts, like WS and Ballard, which I have enjoyed all my life, is already being jammed with newcomers overloading transportation, and jamming our streets, yet not paying their share. Something is very wrong with this picture. Minimally, I believe that the costs, if this huge thing passes, need to be more broadly spread....like big fees to the developers who are eating up our views and sunshine with their huge, largely unsightly buildings with minimal inside parking. What are they adding in exchange for what they are taking away from us? If I were to select a place to live again, much as I love so much about Seattle, especially West Seattle, I would never buy here. When I can no longer drive, I will have to walk more than 2 miles up and down hills. to get to a grocery store or to a bus line, and don't know how I would get to my down town doctor's office. This new program would not alter that, so more thought needs to go to the neighborhood transportation infrastructures, not just these huge, expensive, many years long projects. How about, minimally, in the interim, giving us back some of the small, feeder bus routes eliminated in exchange for huge, expensive, traffic clogging C busses, always jammed...which is why I use them so seldom...also...they don't serve my home area nor go where I need to go. It's bad enough to have to deal with this stupid tunnel and the discombobulation that is accompanying it including other activities being allowed to continue (like special "runs" and ball games, when the viaduct is out of use.) This city does not coordinate its potentially conflicting programs well. Just considering the additional driving confusion that will go on with the years of construction of this huge set of plans outlined in the proposed program, besides what we already have, is simply impossible to comprehend. Too late to move to one of the islands now!</p>
NORTH KING COUNTY	<p>\$200 annually is an extremely conservative estimate. The cost is probably much more than that, especially by year 25.</p>
NORTH KING COUNTY	<p>I live and work on Vashon island, a 10 minute drive from my workplace, so rarely have personal need for mass transit. However, I strongly support improvements for the economic, environmental, and social health of our region. I have a son in his 20s who is in need of improved transit to commute and survive in the metropolitan area.</p>
NORTH KING COUNTY	<p>The light rail is priority, as it does not share the road. However, the phasing should start in downtown Seattle and move outward from there, and downtown Bellevue moving outward from there.</p>
NORTH KING COUNTY	<p>Should work to do this faster--17 years is too long. And why no discussion of Bellevue to downtown Seattle or Redmond to downtown Seattle?</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Not only do we need to build mass transit, we need to be sure that people have many ways to get to the stations besides driving. We need to be sure that people can not only commute but that we create a region where car ownership is optional, particularly for people in poorer neighborhoods.
NORTH KING COUNTY	Please also consider to implement earlier times of the Metro buses on weekends. I have to be at work at 7 Am and the earliest bus on Saturday and Sunday is 6:41. I have been late occasionally due to the bus being late. Thank you.
NORTH KING COUNTY	If you wanted light rail in this region, you SHOULD have done this YEARS AGO!!! Today it is way to expensive, HEY ST why don't you RAISE everybody's wages to \$75 / hr I mean EVERYBODY!!! AND get EVERYBODY JOBS!! INCLUDING THE HOMELESS!!! That way we can afford all your [explicit]!!! And we can afford all the skyrocketing rents! And we can get people off the streets into these Hoity Toity apts. That cost \$20000 a month STARTING!!! That is NOT AFFORDABLE!! The word Affordable is a SNAFU!!
NORTH KING COUNTY	We DESPERATELY need more parking at the Montlake Terrace station! If the plan is to have more ridership there HAS to be additional parking, LOTS of additional parking at that station. It is full by 8a.m. already. It's hard to imagine the strain on that neighborhood streets would be in addition to the riders of the train and buses. The footprint for adding more parking to the existing garage + adding another garage to the parking lot are baked in. I'm not sure what the issue is (besides money of course) but it is a HUGE oversight.  Also the timeline for the Ballard - downtown Seattle + West Seattle - Downtown really needs to be looked at and shortened drastically. The negative impact to the areas economy if it isn't will be enormous.
NORTH KING COUNTY	The project should take half the time. This is urgent for our region and we need to double down now.
NORTH KING COUNTY	I am not in favor of paying for a transit system I will never use. We live in King county only 5 months out of the year, spending 5 months in Arizona and 2 months traveling in our RV or around the world. The increase tax and government interference has caused us to consider seriously to sell our home in Shoreline and move our summer home outside the Puget Sound area where it is less expensive to maintain. As much as we have loved the area, you have priced us out of our home.
NORTH KING COUNTY	1. Much much faster/earlier implementation of LR link to Ballard.  2. UW-Ballard LR extensu N/spur  3. 100% dedicated and barricaded bike lanes.  4. Expansion and support of pronto bike service, ditch the helmet requirements and add electric assist bikes. Very inexpensive to support this relative to all other transit investments, even if it operates at a loss.
NORTH KING COUNTY	Get shoreline light rail done before anyone else!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Stop adding more bus lanes at the expense of drivers. We pay for a significant portion of the roads, don't make them unusable for cars.
NORTH KING COUNTY	please add some way to keep the worst of the bums under control, one reason why several people I know will not ride the buses now.
NORTH KING COUNTY	<p>There should be less focus on bus transit, and a full-on focus on rail services. Bus transit should be limited to shorter regional loops, or run east-west only to connect parallel rail lines running north-south. Buses are also a huge part of the issue with traffic - mixing large vehicles, with smaller vehicles, wreaks havoc on the roads in Seattle - speaking from experience.</p> <p>22 to 25 years as the longest part of the expansion seems highly unreasonable. These projects, if focused on fully, should not take that long. If the bus transit was not an aspect of this project, the timeline could potentially be cut short, drastically.</p>
NORTH KING COUNTY	Too much continued added property tax only proposals. This places unfair burden on property owners whose values have escalated will beyond their income increase, and particularly retirees on more fixed income. State needs to get it's act together and develop income tax instead of so much property tax. There will be even more requests because of the courts order to the legislature to fix school funding. I and many friends will continue to vote no for any more transit increases for based solely on property owners. thanks for the opportunity to express my feelings, shared my many others.
NORTH KING COUNTY	We need to invest in high speed rail from Everett to Portland!
NORTH KING COUNTY	Timeline too long and tired of everything relying (partially) on property taxes. I was a bus rider for years when lived in Ballard and Eastlake in Seattle, but now I am in West Seattle and the bus commute became hard with transferring downtown to get to South Lake Union. Not until recently did the Rapid Ride C show up next to my office. But with a sick elderly mother, I feel the need to drive to be available to her quickly when needed.
NORTH KING COUNTY	Charge higher ticket for transit instead of levy for home owners
NORTH KING COUNTY	<p>Balled to downtown light rail needs to happen much, much faster. The neighborhood has added or is about to add some 5000 units of housing over the last 8 years, and bus service has been about even, with some areas severely reduced. If Ballard were to get significant improvements (not just fiddling on the margins with Rapid Ride) before I reached retirement age, I'd be a strong supporter of this program.</p> <p>I don't get the value of link between Federal Way and Tacoma. It's a lot of distance to cover, with few people living there. Development has already outpaced growth in many other areas. I would put this one off for ST4.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	I'm concerned about how a link light rail will get to West Seattle. If it uses surface streets and the existing bridge then that's terrible because it's going to really hurt people who need to drive, especially on weekends. The RapidRide C works for now - if there were more of those for now until a more comprehensive light rail expansion could be made to WS via digging underground I'd be more supportive of that. Also: I'm concerned about access to downtown from West Seattle when the viaduct goes down - aside from maybe the light rail expansion, I don't see what addresses that.
NORTH KING COUNTY	Costs should be paid for my corporations and businesses not from the middle and working class
NORTH KING COUNTY	This survey is super tedious, but I think public transit is important.
NORTH KING COUNTY	I'm concerned by the proposal to add new permanent taxes to fund these transit options. I believe we should be (1) assessing temporary taxes to fund the transit build-out and (2) gradually shifting a share of existing transportation taxes that maintain legacy transit (vehicle infrastructure) toward maintaining the new transit infrastructure, and (3) supporting operating costs primarily through use fees, which for riders replace their vehicle gas, insurance, and maintenance costs.  Also, I didn't see any options for mass transit between the Eastside and Seattle, which is where the greatest unserved need is.
NORTH KING COUNTY	REMOVE parking lots from suburban stations, it is a huge waste of money compared to the benefit provided per transit rider. ADD more rail projects in the urban core of Seattle. REMOVE transit from places that whine about it. I would also fully support efforts to remove cars ENTIRELY from our roadways in favor of any kind of transit, whether it's bus or train. Kick them off the road and literally force them to use transit if they want to get to work. Sorry, not sorry.
NORTH KING COUNTY	West Seattle bears the brunt of other traffic that's important to the region including ferry traffic from Vashon & the Peninsula, industrial traffic from the Port of Seattle and SODO (FedEx, etc), yet Sound Transit has not deemed West Seattle a priority. As a home owner I already paid for a monorail that didn't materialize and which also destroyed part of my neighborhood as small businesses were displaced for it - for nothing. If West Seattle is low on the list then we need to be given preference in other ways - ie: reduced fees for the water taxi until light rail is in place.
NORTH KING COUNTY	Please build the West Seattle rail faster! And Ballard's too! Also please add an extra lane on the East bound West Seattle Bridge on ramp that connects to North bound 99 for buses only. That single on ramp takes forever. At the very least, let the buses drive on the shoulder on that on ramp. Thanks and keep up the great work!!
NORTH KING COUNTY	Build it faster please. Thanks!
NORTH KING COUNTY	Please consider having the 21X or 116 stop on Avalon & Yancy when the C line is too full to stop. Especially when both the 21X & 116 have empty seats.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	Why aren't corporations that are causing the influx into Seattle paying into the transit expansion. Why do the poor and working class have to pay for this expansion? If major players: Amazon, Google, Tableau, Expedia were to contribute to transportation, perhaps the time for expansion could be decreased by 1/2.
NORTH KING COUNTY	Because of the timelines of these projects and the aging population in the years ahead, every effort should include enhanced access for disabled riders including shortened walkways, ease of access, increased handicapped parking at stations, etc, nowhere in your draft proposals do I see any increase of services for disabled. I think this should be considered and included
NORTH KING COUNTY	Very ambitious and I hope it gets done sooner rather than later!
NORTH KING COUNTY	More train and light rail please!
NORTH KING COUNTY	The addition of new stations on the light rail has increased issues related to timeliness and reliability. There appears to be a significant increase in delays and interruptions in the service. It has made it so that I think twice about using the light rail on situations when I am required to be punctual, like going to the airport. I would like to see a plan to address these issues, especially if link light rail will keep growing. In addition, I do not understand why the # of cars have not been increased on the trains now that more people are riding. The small # of cars together with the delays make it so that some trains are so incredibly packed that it does not feel safe to be on the train. I am in support of growing light rail, but I am starting to wonder if that growth can be sustained after witnessing what has happened after adding just two stations.
NORTH KING COUNTY	Light rail should extend all the way to Burien from West Seattle.
NORTH KING COUNTY	These projects should be done in half the time proposed at a minimum.
NORTH KING COUNTY	\$17 is a lot to ask each person to spend - what if they don't use it? how are low income people supposed to be able to pay for this?
NORTH KING COUNTY	let's get with the future seattle!!
NORTH KING COUNTY	Why can't the money come from somewhere else besides my property taxes? I have had my taxes go up by about \$2K in the past 4 years and I won't vote or support anything this is going to continue to increase them I may lose my house if they continue to go up to pay for these transit expansions. Every year there is something new added to them. Instead of adding more bike lanes and variable speed signs get the WA DOT to allocate some of that money to these projects. I am planning to retire in 5 years but if I can't afford my property taxes because of all these transit expansions I will not be able to do so. I would show more support for these projects if you would find the money somewhere else. The state and city waste a lot of money on unnecessary projects.
NORTH KING COUNTY	I would prioritize infrastructure within the city limits first, and then expand to outlying suburbs and nearby cities.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>The city of Seattle is in dire need of transportation improvements in the IMMEDIATE FUTURE, not 20-30 years from now. Slowdowns downtown affect everyone, and congestion on the roads makes it difficult for people driving, walking, cycling, and taking transit. Since the highest concentration of people is found in downtown Seattle, focusing on improvements here should be most important, and prioritized first. For transportation improvements in the suburbs, I would recommend implementing BRT or ST Express Buses in the short term, to connect transit hubs to existing light rail infrastructure.</p> <p>Finally, transit oriented development is very important and parking is not. Parking should be minimally subsidized by this plan, IF AT ALL - providing parking is a HUGE cost, and those who drive should pay to park, at least a few dollars a day. I support limited free parking at transit stops because it takes up space that could otherwise be used for development, which could increase tax revenue, development, and housing supply!</p>
NORTH KING COUNTY	<p>An elevated light rail to Alaska Junction would have to wind between several 'walls' of condos along Avalon and Fauntleroy, effectively running trains through several dozen living rooms and bedrooms. Has the resulting drop in property values been factored into the tax revenue projections?</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

<p>NORTH KING COUNTY</p>	<p>Projects that should be added to ST3 plan:</p> <ul style="list-style-type: none"> <li>- Planning for and construction of a light rail transit line (dedicated r.o.w., or on-street, but NOT in mixed traffic) in a corridor connecting Mt. Baker Station with Capitol Hill Station via Little Saigon, First Hill/Seattle University, Broadway corridor.</li> <li>- Planning for and construction of a light rail transit line in a corridor connecting Mt. Baker Station with University of Washington Link Station, via the Central District (23rd Ave E, or MLK, with stops at Jackson, Cherry, Union, and Madison).</li> <li>- Planning for and construction of a High Capacity Transit (Light Rail, or BRT with dedicated lanes and off-board fare payment and comparable service frequencies (6 min. peak) connecting the Lake City Hub Urban Village in Seattle, with the North Link Light Rail Line (options include connections via 125th/130th to a new North Link Station at 130th, or via Lake City Way, Northgate Way, and 5th Ave NE to the Northgate Link LRT Station. This second option could be extended with available funding to connect with the Ballard Hub Urban Village and Ballard-Downtown Seattle LINK via Greenwood and Crown Hill).</li> </ul> <p>Projects that should NOT be included in ST3:</p> <p>Sound Transit subsidized commuter parking. To the extent that it is valued by transit patrons, parking accessory to stations can be funded by local governments, the state, or user fees. As Sound Transit is the ONLY state created agency dedicated to funding mass public transportation, and the region's appetite for transit service vastly exceeds the state authorized funding authority of the agency, the agency should dedicate the entirety of its available funding to its primary mission of moving people (not storing private vehicles). One key question the Sound Transit Board should ask in considering the merits of budget line items dedicated to parking facilities and services is: For that (X) amount of funding that might be spent on parking, how many additional ST express bus service hours could we put on the street each year, and how many additional public transit passenger trips could be provided?</p>
<p>NORTH KING COUNTY</p>	<p>Spending a gazillion dollars on parking is a huge waste of money. The whole point of transit is to give access to people who can't afford to drive and to discourage people who can from driving by giving them other options. Spend more on actual transit and perhaps promoting car pooling or coordinating local bus service to planned stations. I strongly support transit, I don't drive at all, but if ST thinks that putting in a ton of parking is a real solution for ridership, I would strongly consider not voting for ST3 and certainly not phonebanking, etc., as I did for the MoveSeattle levy. I will not pay \$200 for a plan that prioritizes private storage for people who refuse to consider the other options they have.</p>
<p>NORTH KING COUNTY</p>	<p>Quicker.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - North King County

NORTH KING COUNTY	<p>Advance the West Seattle new bridge over the Duwamish River design and construction. Pull it out of the long range project and start it ASAP. Use it for BRT then convert to light rail. Share costs with the Port of Seattle who could use it for T5 trains.</p> <p>If light rail goes to the West Seattle Junction, the terminus must be under ground or stay at the Junction edges. Do not impact the historic fabric of the West Seattle Junction.</p> <p>I support the Delridge option previously listed as a candidate project in Dec. 2015.</p> <p>I support the shaving time off of projects, including transit as permitted use. TOD is not a permitted use and needs corresponding review.</p>
NORTH KING COUNTY	FASTER. PLEASE!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

Subarea	Additional Feedback - OTHER
EAST KING COUNTY	The Ballard/West Seattle projects are way too down the pipeline and should take priority over Paine field and especially link connection to Tacoma. And I live in east / southeast king county so they wouldn't help my commute. But supporting greater density in Seattle should be a regional priority
EAST KING COUNTY	Sounder rail is convenient and effective for commuters on the suburban periphery, such as southeast King Co. But many of these commuters face two issues: (1) can't reliably find parking at rail stations and (2) can't get to rail stations by car due to traffic bottlenecks at the urban edge. Must address both issues to capture more commuters as rail riders.
EAST KING COUNTY	<p>ST3 spends too much money for too little gain too far in the future. A substantial chunk of the money is wasted. Link to Everett and Tacoma is pointless. Link is too slow for long distance travel and too few people live anywhere along those routes. Similarly, Bellevue to Issaquah is equally a waste - after Factoria most of that area is forest! Buses, with improvements to direct access ramps, would be substantially more cost effective.</p> <p>Additionally, as a resident of East King in Bothell, I see zero reasons to vote for this plan. 405 BRT is just increasing frequency and adding lipstick to the current system. I would never use light rail to Issaquah. There are no good projects here. And while East king revenue is close to that of North King, the sum of the projects here (including all of 405 BRT and 522 BRT) cost less than the extension to Everett. So much for subarea equity! I see zero reasons why Link to Everett would benefit me.</p>
EAST KING COUNTY	I drive everyday as a full time realtor. WE NEED THIS EVERYWHERE...sooner than later please
EAST KING COUNTY	Light rail is a waste of money and is a poorly planned out solution. It is commonly used by people for free meaning the burden once again sits on the tax payers. If you look at what people are using a light rail to/from the airport is heavily underutilized due to its frequent stops and improperly managed security. We continue to throw money at poor solutions versus working on expanding and solving how people choose to commute.
EAST KING COUNTY	I would happily pay double or triple of the proposal per year per household to get a robust and reliable transit system in Seattle and surrounding areas.
EAST KING COUNTY	Do it faster! Fewer people will vote for a measure that they'll pay for now but not see the benefit of for decades. People will pay more to expedite building.
EAST KING COUNTY	<p>I do not support the use of property taxes for ANY transportation plan.</p> <p>If it has a property tax element I will vote NO every time.</p> <p>I do not support a transit system that requires hiring drivers, their salaries and their pensions.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	This package is really too expensive for the perceived benefits (with respect to light rail you are just substituting bus customers to light rail) and the period of time way, way to long. Most of us will be dead by the time the work is completed even though we are paying for it!
EAST KING COUNTY	Once again, NE King County, specifically Bothell and Kenmore is left out of any decent improvements in service. The plan is to put buses on 522, which I commute on a bus daily right now and it is miserable. The cities of Kenmore and Lake Forest Park have been allowed to close the bus lanes for months on end due to road work and the buses get stuck in general traffic lanes. I see no advantage to BRT on 522. I will still be stuck in the same lanes as always. Why don't we get a choice of light rail or a train? We didn't even get the promised park and ride garage in Bothell. None of the buses leaving from the Kenmore or Bothell park and rides take advantage of the toll lanes to go directly to Seattle. We are forced to use highway 522. Unless someone can convince me that there is something new and better in this package for NE King County I probably won't vote for it. You aren't even holding a meeting about it in NE King County - the nearest meeting is in Redmond. I'm so tired of being ignored by the transit planners. My buses are stuffed to the gills everyday so I know that there are plenty of folks like me looking for a better option. Please, please take another look at NE King County and try to do better for us.
EAST KING COUNTY	What frustrates me about the current system is when mass transit gets stuck in traffic (busses, Seattle Street Cars). Mass transit should have dedicated lanes and traffic signals on highways and municipalities.
EAST KING COUNTY	I currently take an express bus from Canyon Park to Bellevue but there is not adequate parking. Lots of money was spent constructing the walkway over the freeway from the parking lot to the area to catch the bus to Bellevue but if you can't find parking, what was the use. Need to build a parking garage
EAST KING COUNTY	Bellevue (especially factoria, eastgate, areas) need more options to downtown, Chinatown or capitol hill. I used to catch the 211 on the freeway busstop near factoria mall to capitol hill with other employees that works on the hill (Swedish hospital, harborview and SU) but the services times were cut and then the 211 was cut. Now I ride the 550 at S Bellevue P&R which is always crowded around 6am-8am and walk to cap hill.
EAST KING COUNTY	We should increase the capacity of park and rides to enable more use of public transportation and vanpools.
EAST KING COUNTY	I have just located a job closer to home so that I no longer have to commute via ST 545 each day. The traffic is so horrendous and the buses so packed, that I spend upwards of 2 hours each evening standing in a dangerously packed bus. We need to get shoulder driving for buses approved ASAP, so that we can keep people moving.
EAST KING COUNTY	Need more high rise parking (fee and no fee options) for those using light rail but require a small commute to get there can choose to park near a transit center and utilize the mass transit systems for a bulk of their trip. You cannot eliminate auto use 100% and shouldn't try. If there is traffic congestion due to automobiles, address the current roadway issues to improve auto commutes. Look at other cities who improve their traffic flow with highways designed to actually flow traffic swiftly into and out of high volume areas. Widen the roads for autos, add light rails in the center of the highways, and bus lines in the shoulders. Puget Sound's traffic issues are not caused by excessive autos, it is poorly designed and maintained highways and roadways.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	If the plan was so cost effective you would not be required to take road use money and additional bonds to pay for it. When we get the 405 mess with tolls because they want to force us into in efficient, slow, time consuming, dangerous mass transportation so Everett Metro can up it's ridership I don't want any part of it.
EAST KING COUNTY	When are you going to add light rail to Renton and Kent
EAST KING COUNTY	Please add light rail that connects to Kirkland. At a minimum to downtown Kirkland near 85th but Juanita and Totem Lake, especially with the new development happening in Totem Lake would be great.
EAST KING COUNTY	I support the need for increased transit but do not support the means you propose to finance it. Too much of the financing is being placed on the backs of home owners, many of whom are senior citizens, retired and on fixed incomes (like me). Spread the burden by increasing sales tax more. Those who can afford to buy more will afford the sales tax. People like me are already trying to make ends meet and stay in our homes while we are overburdened with escalating property taxes, and ultimately forced to sell and relocate from our long time homes.
EAST KING COUNTY	Ridiculously slow and way too expensive.
EAST KING COUNTY	The ST3 plan should cancel the Sounder from Everett to Seattle because it is always blocked by landslides. The money saved should be redirected to getting light rail to Everett faster.
EAST KING COUNTY	You're building a whole new bridge across 520 and there's no room for a train to Kirkland?... Rapid buses? Super fail.
EAST KING COUNTY	Park and Ride lots for BRT are most important. Park and Ride for Light rail stations are most important. ST must be accountable for spending. Audits are necessary. Must be transparent in votes. \$200.00 per year is not true. It is much more. Tell the true story
EAST KING COUNTY	Please also prep for upcoming self-driving cars. Humans are now way to distracted which is one of the key reasons why traffic is so slow. People in all vehicles constantly change lanes which slows traffic. Also, way to many semi-trucks constantly change lanes too. Semi-trucks should never be allowed to be in the fast lane which right now they constantly are in that line. Thanks!
EAST KING COUNTY	For many years I opposed transit taxes for projects like this, but in the last two years I've come to realize I was wrong. I'm a HUGE supporter of this plan. Full steam ahead!
EAST KING COUNTY	Please prioritize parking. My community is not currently served in ST3, so I would need to drive to a parking lot to use transit. Please keep this top of mind, otherwise people like me will continue to be stuck on the roads.
EAST KING COUNTY	This plan is ambitious and complex for the average citizen to comprehend. I wish it was more clearly broken down. I think top priority should be given to fast light rail links between major hubs. Second priority should be given to key bus routes, ensuring service is frequent and can bypass other commuter traffic snags.
EAST KING COUNTY	25 years? even 8 years is way too long and shows this plan can't be taken seriously.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

<p>EAST KING COUNTY</p>	<p>I am deeply concerned with the timeframe and the lack of projects. I would prefer fewer projects delivered more quickly, prioritizing those that do the most to offer alternatives. For me, that is UW to Ballard light rail in a tunnel within 10-15 years, Ballard to downtown in the same time frame but without elevated sections that interlines with UW-Ballard, all-day expansion of Sounder including at least some weekend service, adding 130th and Graham stations and working on integrating express and BRT buses on corridors such as 522. On 405, a branched BRT implementation that served more endpoints would be better than a 405-only system. Lake City deserves something (like making 522 BRT go along 145th, or even a light rail branch). There needs to be medium-term relief for Belltown and South Lake Union. 20 years is too long for these commitments. Spend more to get stuff done quickly.</p> <p>Getting to Everett is not important to me. Rail should not divert to Paine Field. Light rail to Tacoma is inferior to buses and Sounder and should only be considered if subarea money is left after those priorities. More light rail is a waste on the Eastside, but if built should interline with East Link through Bellevue and serve suburban downtown cores rather than wastelands like Totem Lake.</p> <p>If the timeline and project list are not drastically improved, I will vote no on this package. I have voted Yes for every transit proposal going back to 1988. This is too much money to not make better priorities, among them doing the right things much faster.</p>
<p>EAST KING COUNTY</p>	<p>I would love it if the 542 ST Express bus started at the Bear Creek P&amp;R. Since many of us commute to UW from the Sammamish Plateau we have to clog up downtown Redmond to catch this bus. Even better would be more reliable service off the Plateau straight to UW. I have to drive to the Redmond transit center in order to make my hours/commute work.</p>
<p>EAST KING COUNTY</p>	<p>25 years is way too short of a time span. I understand the need to construct, test, and roll out these transit systems but the demographic that will use these light rails aren't 5-year-olds, they're middle-aged. If there was some way of cutting the time in half or less (maybe double the funding?) it should certainly be done. I will happily pay \$34 per month if it meant a faster light rail, and I am sure others will too.</p> <p>Another thing: rail should not be at-grade. It should be above or below, but not on the streets. Do we want to keep traffic as it is or are we truly trying to solve traffic issues here in Seattle? Hopefully, I'm just misunderstanding what at-grade means here.</p>
<p>EAST KING COUNTY</p>	<p>I only wish that there was an under-60 minute option (other than single-occupancy vehicle or vanpool option) included in the proposed ST3 plan to get me from my home in Kirkland (98033) to and from my work in (west of I-5) Mountlake Terrace (98043)!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>Please consider improving freeways in addition to this. The biggest issue with the freeways are forced merges. If roads could be retrofitted so that no two lanes are ever force-merged drivers will have less opportunity to brake which means less potential for traffic buildup.</p> <p>Also, please improve parking first where possible because that is easier to do and can incur all the pain up front.</p> <p>Also, please consider funding with as little interest as possible. People might pay more if they know it's to save money. Maybe even potential to kickstart fund some of these projects which could gauge interest? Like "if we meet this dollar goal on this portion we will bring it to the public 12 months earlier" or something.</p> <p>Also, consider the possibility of near field communications within a bus so that riders with the app can "tell" the bus driver things like "rear door" or "please turn on the AC" without the awkward yell etc. it would make for a more inviting experience for many potential riders and there are many things that could be done to curb and disincentivize abuse of such a system.</p> <p>Good luck!</p>
EAST KING COUNTY	<p>I resent the priorities that always focus on Seattle as getting the best and the most. Seattle already has a fully functional mass transit system whereas outlining suburbs don't. There are more people in Seattle who function quite well without using or even owning a automobile. Therefore, I am more in favor of development of mass transit (not just buses) between suburban towns than within the City of Seattle. I think this will provide businesses the opportunity to locate elsewhere than downtown Seattle. In general, I'm in favor of more even distribution of commerce activity in the Puget Sound. I think having Seattle as the central attraction is outdated. The ST3 plan needs to be revised to better accommodate such development. I also think that nothing I've said in the above is worth a plug nickel to those development the plans. They have already decided what they want to do and information from these survey's is used in such a way to validate their I intentions. Sorry for such negative views, but those are the realities I see in this process.</p>

EAST KING COUNTY	<p>My commute is pretty good as is with the commuter bus. I mostly face troubles when I'm trying to get around town with the local bus services. I would love to see more done to improve reliability of the local services that will really benefit more people for all kinds of trips. Also, I've heard buses will start getting cut as the light rail finally makes its way north; I get the sense that will only make my current commute into Seattle longer if I have to change to the light rail. Why not make the buses faster! They are pretty good once they get into the express lanes and the carpool lanes.</p> <p>Thanks for asking my opinion on this stuff! It feels nice to know someone wants to know about your experiences and what could make things better for you.</p>
EAST KING COUNTY	<p>This survey was difficult for me to fill out because after living in Kenmore for 48 years I have seen builders come in and fill the area with multiple family dwellings to enlarge the tax base without any regards for our road capacity, or park and ride parking capacity. Adding bikes lanes on Juanita Dr has made things even worse. Money hungry investors have caused overcrowding in this area and there is no going back so we are forced to go with rapid transit which I do not want either but now there is no choice :(</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>I agree with the principle of fast and smart transportation. But, I consider the 'light rail' options that we already have in King County a bit of a joke. They are NOT fast, not well connected, don't have good/enough parking in many stops. -- I'd like to see all main cities to have large central areas w/o car circulation, trams or buses circulating around those areas and connecting commercial and major employment areas, and well defined nodes of transportation within and between cities. FAST BRT between cities on all main highways, and on large and comfortable buses. Additionally, buses should have priority to cars during about 2 hours of each rush-hour period. // I am not convinced that TOD next to freeways is the best way to do urban development. TOD along Bus lines or Tram lines near commercial areas seems a better choice to me. Check Tram lines in Montpellier, France. // Finally, provide fast alternative North-South transportation EAST of I-405, and multiple East-West connections on the Eastside. -- AND, preserve and create new safe non-motorized routes, ideally very green, around the Puget Sound areas. So far, many politicians seem to be hypnotized with using the ERC right next and parallel to I-405 sometime in the future, as a solution to future transportation congestion.</p>
EAST KING COUNTY	<p>Light rail is not the transit solution of the future. Asking for funding and planning for adding light rail 25 years into the future is a mistake. Light rail is much more expensive and takes more time to implement than BRT, and it does not allow for flexibility if needs change.</p> <p>And I am appalled that Sound Transit still wants to run light rail across the I90 floating bridge. The tunnel is narrower than what would be allowed if a new tunnel were being created today. Loss of the center express lanes will cause more, not less, congestion. Narrowing the car lanes across the bridge to allow for HOV on an added outside lane will make travel more hazardous. Then there's the potential damage that the weight and vibrations of trains can cause to the bridge - I have yet to read that your engineers have solved all of the remaining engineering obstacles, not to mention the fact that this has never been tried before on a floating bridge.</p> <p>BRT in the express lanes across the bridge is the best choice - it can accommodate buses and cars and carry more people than light rail. This plan would be much less expensive, more flexible if things change in the future (no tracks needed), and could be put into operation much more quickly with much less disruption.</p>
EAST KING COUNTY	<p>I am considering supporting ST3 as a direct result of ST3 activity being on 405 vs the Kirkland Trail...thank you for listening to the public.</p>
EAST KING COUNTY	<p>None of these projects is self-sustaining. Until all of them are, no expansion of the existing system should be undertaken. We are already extracting too much money from the automobile to finance public transportation, so that moneys are not available to maintain the existing system of roads.</p>
EAST KING COUNTY	<p>I don't think it should cost that much I do think we need it</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	At the beginning of the survey you defined what light rail was. This made the responses to that section done with knowledge. Since you did not define Sounder Commuter Rail or BRTs the responses for these sections were skewed due to many people responding without the necessary knowledge.
EAST KING COUNTY	Building the 'spine' from Everett to Tacoma should not be a central priority nor should the construction of additional parking structures. There must be an increased focus on delivering high quality transit, quickly, to existing corridors (Ballard, South Lake Union) as well as pursuing an East-West rout connecting the UW to the Ballard line. No Paine Field diversion. All further light rail investments must be grade separated. The plan must not be so focused on geographical scope, but focus on achieving maximum ridership and greatest levels of efficiency. Further focus should be given to improving rapid ride to bronze, silver or gold service standards.
EAST KING COUNTY	I would love to see rail down the 405 corridor. Not sure I want to invest so much in Seattle and not the east side. 405 makes sense as it is visible and commuters see trains and are more inspired to ride. Bus, not as much. I was not a fan of the old proposal for bus on the Kirkland trail as all it did was move people past where I live. With the original proposed stops, I would still have had to drive to the s Kirkland P&R to take a train to Bellevue rather than walking down to the trail to catch a bus or train.
EAST KING COUNTY	<ol style="list-style-type: none"> <li>1) There is not plan to provide last mile access to some residential areas in Bothell (like the north creek area where we reside).</li> <li>2) There is no mention off expanding existing and adding new park and ride options near Bothell (near north creek which is exploding in terms of new houses). This is the primary reason (the inability to park our cars near transit) why we don't take mass transit and it is most cheap and common sense option to facilitate more people from using mass transits.</li> <li>3) The timeline for these projects doesn't even make sense. The economy is going to be drastically different in the coming 25 years (with UberCommute like options). Whatever is chosen to be implemented, should be implemented in the next 10 years.</li> </ol>
EAST KING COUNTY	It's simply too expensive. My property taxes are already outrageous. I'm retired and can't afford more taxes. Property, sales, and excise taxes put too much burden on low income people. We need an income tax. Even if we get more transit, the fares are too high. Buses are better than light rail. Cheaper, faster to bring online, and more flexible routes and response to future technologies. This plan is too longterm. I might be willing to pay more for a few years, but I'm not willing to sign up for 25 years' worth of high taxes. I'd rather put my money towards Metro buses. ST's plans and infrastructure are too grandiose and expensive.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	As a home owner, I keep getting taxed to fill the various needs of the community/state. We as a state don't have enough money for our educational mandates, to repair and replace roads and bridges, etc. The infra structure of the state is in very sad shape. Look at our parks. We now have to charge people for their usage. Our city, taxes home owners via levies to make up the lack of state funding. We did that in the 1960's for schools back then too. It caused disparity then and it still is a problem. Don't get me started on how the state universities are hurting for funds. We need a state income tax and not all these additions to the property tax. If I buy a new car that is more efficient and produces less pollution, I am punished with a high tax. As you have probably guessed by now, I don't care for the way this next Light Rail expansion will be paid for. I lived in the suburbs of Boston for 7 yrs. and know that rail and buses work well. But the way you want to pay for this expansion doesn't sit well with me. I am a native Seattlite who now lives on the Eastside.
EAST KING COUNTY	Get it done faster. 25 years is UNACCEPTABLE
EAST KING COUNTY	It should be explained why the plan calls for the Renton/Tukwila areas, which have lower income/minory populations ,to be served by bus whereas the Issaquah/Bellevue areas with their wealthier neighborhoods are being served by light rail.
EAST KING COUNTY	This should have been started about the time I405 was being considered. It was talked about but shelved because it be too expensive and take to long. Now the price is astronomical and will take forever.
EAST KING COUNTY	I feel that grade separated light rail lines must be essential for all projects in order to receive the full benefit of their capacity, speed, and reliability.
EAST KING COUNTY	This survey didn't mention connections to the ferry system which is how I get to work.
EAST KING COUNTY	Increase taxes now to generate funds so that we are not waiting 25 years to complete this. We need it now.
EAST KING COUNTY	Pedestrian bridges or tunnels accessing rail stations can be built to conclude more populations and ease their access
EAST KING COUNTY	Do not put Light Rail on the Cross Kirkland Corridor now or ever. This corridor is critical to quality of life issues for the people of Kirkland. Light Rail would kill the view corridor for so many homes (many of which are in the 1-3 million dollar range) along the corridor. This would be the only Light Rail system in Seattle which would be within 50 feet of many residential homes and would be within feet of a bike and walking path. This would present tremendous liability to life and property.
EAST KING COUNTY	Having used public transportation in countries like Japan, I just want a reliable and speedy system. The most important issue is that the system is fast. Trains must be able to match or beat driving times or people will not see the purpose of it. Having taken the light rail from the SEATAC to the International District, I found the first half pleasantly fast but the latter half too slow(in town).
EAST KING COUNTY	I have supported all the other votes for light rail can not support the new plan for the following reasons no plan for light rail that support Renton, Newcastle areas we already have tracks along 405 let utilities the track and give Eastside light rail. I am tiered paying for the west side time to support the east side with light rail

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	I do not want transit on our Kirkland Trails. I feel we have the freeways and we need to utilize that. Please keep the trails for people and bikes. thanks
EAST KING COUNTY	I truly support mass transit and a variety of plans. However I am sad to see that an additional light rail station near Boeing Access Road is not immediate. For those of us who live in Southeast King County options are few in terms of a rapid ride to downtown Seattle. I work at UW and it takes me 1 hour and 45 minutes to get to my location on campus (this includes 10 minute walk) if I don't use my car at all. This is a distance of 21 -24 miles based on the distance I might travel by car. If I take my car I must go very, very early to get a parking space at my preferred transit parking lot in Renton. If I have my husband take me, so I can go later to work, then he comes and picks me up because I am never sure that the bus I ride home to Renton from UW, will get to the Park and Ride lot where I can pick up the last bus of the day that goes within several blocks of my home. I would like to take the Light Rail downtown but our closest station in Tukwila also fills up rapidly. Is there any plan to build a garage on the two open lots? I wish we actually had a station nearer Southcenter. In a city it may be okay to build around the Light Rail station and discourage use of cars but some of us still live outside of Seattle, etc. and I truly feel we are overlooked. Maybe it is due to how many of us use mass transit but we probably don't use because of the time involved. I have been away but am going to try my bus from home to the tunnel and then light rail to UW since it is close to my work location. I will be checking out the time for this system.
EAST KING COUNTY	What about the rail line that runs along Lake Washington? Could that be used for transit in the future?
EAST KING COUNTY	The most important thing I see is a light rail system between East Side and Seattle. There are only bridges or going all the way around the lake and it's strange to me that there wasn't anything built on the 520 bridge as the bridge was being built for light rail transit.
EAST KING COUNTY	Bellevue College is an important factor in the light rail expansion. It should be referenced instead of Eastgate. There are more than 30,000 students who attend Bellevue College. Sound Transit utilize access to UW and Tacoma Community College. It is poor marketing to ignore such a large population.
EAST KING COUNTY	I live in Kirkland, the population of Kirkland will pay as much as \$350,000,000 into ST3 over the next 15 years, my share of that personally is significant to me! In exchange we will get a parking garage, a bus stop in the middle of a freeway that no one can use, and bus lanes that will require displacing businesses all along 85th in downtown between 3rd and 6th and possibly taking space from Peter Kirk Park. SOT's single minded pursuit of preserving the trail, however admirable, is going to come at tremendous cost to Kirkland's tax payers. We need light rail to move people through Kirkland and get the cars off our roads.
EAST KING COUNTY	NA
EAST KING COUNTY	Light rail: too little, too late, too expensive, too inflexible - classis 19th century technology. 25 years? Really?! Washington DC Metrorail (entire system) took 10.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	As a community would there be other opportunities to help raise some money for the project. How many business would be willing to help create ST3 with the amount of attention ST3 is receiving? Can we make commercial space available to certain type of business to operate at the stations (food, espresso, bakery, convenience store. etc.) I'm sure companies would love to support or buy sponsorship of trains to help reduce initial costs or long term maintenance costs. This survey is about the planning of the project but it is important to have the full expectations of maintenance costs going forward as part of the expansion. The real goal is to bring together the communities of the Puget Sound region for a healthy, exciting, vibrant local economy that extends beyond Seattle.
EAST KING COUNTY	Please consider increasing the priority of East-West light rail along the I-90 corridor. Eastward population expansion is dramatic (take a look at Snoqualmie Ridge, Issaquah Highlands, North Bend) and it's only increasing. Now is the time to address this, not 25 years from now. East-west traffic on I-90 affects everyone in Seattle, just as I-5 traffic does ... I-90 is one of the main corridors for commercial traffic into and out of Seattle.
EAST KING COUNTY	Need to find ways to speed up design and construction.
EAST KING COUNTY	I supported ST1, recognizing that we were way behind the curve in using mass transit to get people around the region and even though there was nothing in it for my city. I also, grudgingly supported ST2 and again was greatly disappointed that there was NOTHING for Renton and the 405 corridor between Renton & Bellevue! I cannot support and will argue against ST3 because there is ABSOLUTELY NOTHING in it for the 405 Renton/Bellevue or Renton/Seattle routes. We have been paying in for years and have nothing in return. BRT through Renton is a joke! It doesn't go into Seattle or Bellevue. I am appalled that you choose to do NOTHING in the most congested area of the State!
EAST KING COUNTY	An underground light rail link along the 522 corridor is necessary. The east-west traffic between 405 to I-5 is a nightmare since the tolling of the 520 Bridge. The weekend traffic is even heavy as people are going even further out of their way to avoid paying a toll fee. I don't see this as something that will resolve itself with time. The tolling of 520 has been imposed for some time now and traffic just gets worse. An underground light rail link would alleviate this problem. I know the cost of going under ground will probably send many laughing but light rail along surface street is a terrible idea for efficiency & safety. The cost cutting measure to put the light rail on surface streets in south Seattle is a prime example of a not so good decision for long term betterment of the community. Our region is growing faster than planning can keep up. Action sooner is better. Surveys are appreciated but improvement projects need to happen sooner. Thank you!
EAST KING COUNTY	I lived in NYC for 15 years. I appreciate the importance of an excellent public transit system. Ours needs to have parking tied to it, and the sooner built, the better.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	this should have been done 25 years ago. As a country we should have had high speed rail from Tijuana to Victoria 40 years ago, and all across the country as does every other developed country. We should have had a circumferential highway around Seattle through Issaquah 15 years ago, so that all of the North South traffic does not go through downtown Seattle. Unbelievable lack of planning, foresight, responsible government and responsible voters. This is a nice plan, just decades too late. Toll ALL local highways.
EAST KING COUNTY	Parking structures that provide suburban residents (who don't have easy access to local transit) the opportunity to access and utilize BRT along 522 is a critically important component of the plan. Thank you for being bold in laying out a truly regional plan/solution to our traffic gridlock.
EAST KING COUNTY	A mass transit system should have been built at least 50 years ago. The puget sound region must incorporate a total regional system now before the region turns into a Los Angeles parking lot and before it is impossible to build a complete transit package due to costs and existing structures.
EAST KING COUNTY	Make sure the Ballard-Downtown line is not subject to traffic in Interbay, such that if it's a surface line, it doesn't deal with any intersections. Otherwise go grade separated. Ballard to UW line should not be studied, it should be a priority. Seattle needs transit yesterday. Opening of U-Link shows the demand. "Fast track" Seattle projects over suburban projects, which will have far less ridership
EAST KING COUNTY	Light rail system in next 7 years, if not forget about it. Who cares about 25 years from now. My children may also not use it. Its 7-10 years of nothing. Dump the 25 yr plan.
EAST KING COUNTY	Time lines for the heaviest density areas should be accelerated even if that mean increasing taxes more
EAST KING COUNTY	None of the proposed projects are useful to me. I won't be getting anything for my tax dollars. Voting no, as of now.
EAST KING COUNTY	25 years to complete? Are you kidding me? Why so long?
EAST KING COUNTY	This package costs too much and takes too long for the few worthwhile projects it has.
EAST KING COUNTY	Honestly do whatever you want as long as more light rail gets built
EAST KING COUNTY	Parking is most CRITICAL thing right now. You can't accommodate the riders that want to use ST train and light rail in the south end as it is because you haven't allowed for enough onsite parking. I have a hard time showing support for expanded services when you're not addressing the parking issue that you have right now. Temporary parking plans need to be in the works and put into action before anything else.
EAST KING COUNTY	Stop inviting people to the Puget Sound! It is crowded already and we don't need more people in this region. Why should we pay more and more taxes, because you are exited about welcoming more and expanding the population? Enough is enough!!! NO MORE TAXES!!!
EAST KING COUNTY	Insufficient attention to bicycles: routes, safety, etc. Make bicycling to work, shopping, and/or school a safe option for everyone - male, female, all ages - more than just the current enthusiasts, and you reduce how much heavy transit we have to build.
EAST KING COUNTY	Light rail along 405 between Lynnwood to Tukwilla

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Light rail costs too much per passenger served, takes way too long to build, is way too slow (unless it's in a tunnel or fully elevated but those of course are very expensive) and can't serve very many people. It's a huge waste of money.
EAST KING COUNTY	I am still hurting from the loss of the monorail project that could have been done by now with less of a traffic impact than light rail has. I hope that a limited monorail project can be integrated into this to serve areas too dense for light rail, such as west seattle and ballard.
EAST KING COUNTY	The need for more bus routes that are along I405 and I 5 make the most sense to help with the transit, less costly and can happen much faster. We need more parking to make it easier for commuters to use. I take the 255 from South park and ride twice a month, but don't have to be downtown early in the morning. I end up having to park in private home neighborhoods due to no parking spots at the new parking garage. Obviously Sound transit did not allow enough extra parking for that spot. It needs another tower of stalls at the spot. I am sure there are other bus stations that are in need of this too. We are better off evaluating the BRT and getting that right first before spending huge amounts of money on light rail. It needs to be accessible to freeways so it is easy to park and get on and off. We are so far behind with rail that it will take us 20 to 30 years to get this done. Lets try and see if we can come up with a fabulous bus transit system first. We are already taxed very high in our state and this is a big burden on home owners who may not use it on a regular basis.
EAST KING COUNTY	Sounder Rail should be expanded with much larger parking lots and more frequent trains. Buses should go to the Sounder Rail or light rail stations, not to downtown Seattle. We need fewer cars and buses on the freeway. Light rail is already overcrowded and dangerous. Light rail should be elevated and automated with more cars running for longer hours. Buses should be community buses meeting light rail, here again, not driving into downtown Seattle. Not more buses, smarter use of the system we have. Buses should be for local transit to shopping, medical and rail stations.
EAST KING COUNTY	Light rail is extremely expensive and a waste of taxpayers money. Puget sound does not have the central destination core population anyway near those on the East coast. We are too spread out for it to work. In Los Angeles the taxpayer subsidy for each and every light rail passenger trip is more than \$23. At \$7,900 per inch of light rail, it is way too expensive and will not deliver any reduction in traffic congestion.
EAST KING COUNTY	Complete the ERC study and support using for rail or bus option to serve eastside communities
EAST KING COUNTY	Light rail needs to Renton from MLK needs to happen for Boeing employees. Boeing is a major employee. The plan includes Everett and Boeing field but not Renton. Loop rapid transit trains around the end of the lake up to Bellevue
EAST KING COUNTY	Get light rail to Monroe....
EAST KING COUNTY	UW to Ballard!!!! Are you guys [explicit] stupid? This would be unbelievably useful! Also, if you do insist on Ballard to Downtown, which would also be great, at least make sure the line is completely grade separated. Waiting 22 years for a low quality light rail line to Ballard would be awful. Also, light rail extensions any further north, south, or east are stupid. Everything that far away is extremely low density, with very low transit ridership. It does not make economic sense to build a light rail line out there

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	We should have done this decades ago. We blew it when we had the chance to get light rail decades ago, and now we are paying the price. I have seen the traffic increase dramatically in the last few years and this has decreased my quality of life as well as making me consider leaving this area.
EAST KING COUNTY	Although I love buses, light rail is needed because it is separate from car traffic. Buses get delayed by traffic. Until we can have BUS ONLY lanes throughout the city, I vote for light rail.
EAST KING COUNTY	Please improve BRT by giving it its own lane and priority through traffic lights.
EAST KING COUNTY	Please complete as soon as possible. A light rail system is already way overdue in our area.
EAST KING COUNTY	If you build it they will come. WA, King Co, Seattle, has spent enough money on STUDYING the process, problems, environment etc. It's time to start building.
EAST KING COUNTY	Transit in Issaquah is pretty horrible, and can be improved. I feel Issaquah Transit Center is way under utilized, mainly I feel, for the fact that it lacks easy transport to Bellevue, and very sparse coverage by bus to Seattle. Having a light rail system in Issaquah will improve this greatly that I may be able to take a bus every day to Bellevue. Currently, it takes me 90 minutes instead of 15 minutes to commute from and to Issaquah to Bellevue.
EAST KING COUNTY	Parking parking parking! If you want people to use the sounder and light rail systems the way they are designed, you need about 3-4 times more parking spaces than we currently have. No expansion of the lines until you expand parking first!
EAST KING COUNTY	Issaquah to downtown and downtown to the airport! We need light rails!
EAST KING COUNTY	Timeline to completion is making me strongly oppose this as I will most probably be too old to use the system by the time it's done! Also, very disappointing that just a handful of years ago Issaquah not only pulled it's tracks from Issaquah to Redmond but also paved the area and now, we want to add more trains? so much for forward thinking in city planning...
EAST KING COUNTY	Hate to see a 25 year delay in getting Light Rail to Issaquah. Why bother waiting that long? By then, you'll need it all the way to North Bend. Waaaaaay too long a wait to reduce traffic in the I-90 corridor.
EAST KING COUNTY	Make it easier for east side commuters to get to and from Bellevue
EAST KING COUNTY	More busses are desperately needed from eastgate P&R to/from downtown Seattle. They are standing room only, and often some waiting for the bus can't board due to overcrowding.
EAST KING COUNTY	Need to do a much better job of serving all of Renton and it's outlying communities such as Fairwood and Benson Hill with this system. If we don't have neighborhood business to get to the rapid transit lines and there isn't parking available so we can commute to a station then how are we supposed to utilize the rapid transit system?
EAST KING COUNTY	Less drunk drivers on the road if rail was easier to use
EAST KING COUNTY	Projects should be respectful of existing green spaces. I believe that expansion can be achieved without losing and/or using existing natural spaces. Leaders must be mindful that once a green space is altered to accommodate mass transit that it is lost to future generations. This is important as our region is identifiable by its natural beauty and I don't want to be associated with the loss of this beauty.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Huge waste of money. Light rail will be barely used.
EAST KING COUNTY	Please expedite light rail to Issaquah. 25 years is way too long to wait, and Issaquah's growth is exploding.
EAST KING COUNTY	Light rail to Issaquah needed way sooner than 25 years!
EAST KING COUNTY	We desperately need a light rail on the Eastside connecting us to downtown Seattle. Especially Bothell and surrounding cities.
EAST KING COUNTY	I've looked all over the website and can't find a definition of "Bus Rapid Transit." What is the difference between that and ST Express buses? I love the idea of light rail and commuter trains, but the buses aren't that great/frequent/reliable, especially on the sprawled east-side. People won't give up the freedom/flexibility of their cars until there is an easy to access (including many times to hop on transit) option to get them where they are going. I have no idea if BRT does that because I can't find anything that tells me what it is or how it's different. The 405 corridor definitely needs something, but I was hoping for light rail, not more buses. How would BRT actually help?
EAST KING COUNTY	We are seriously considering selling our home in Lynnwood and leaving the Puget Sound area due to the traffic. We are in our late 20's / early 30's, we leave for work at 7am and get home at 6-7pm 5 days a week -- what kind of life is that?
EAST KING COUNTY	If Portland can do mass transit as efficiently and ahead-of-the-curve as they have, what's been the hold-up for King County? There isn't even bus service in my area (Sammamish, E Lake Sammamish).
EAST KING COUNTY	The problem isn't transit, it's growth! The area is full. Done. Stop the growth. There's no more room for more people here. We don't have the housing to support more people. We don't have a stable electrical supply as it is. We don't have surplus water (see last summer) for more people. We don't have access to high speed internet if one chooses to not live in uber high density urban communities. Schools are full. The livability of this area is non-existent and the traffic situation is simply a system of a much bigger problem. And even if one agrees with this misguided plan, it needs to be put through and executed today. Not eight to 25 years from now. Need more busses? Why the heck does that take eight years? And finally, this may come as a shock to guys, but those of us who live outside of the city limits here on the Eastside don't exactly live in the boonies. When it comes to services, we get next to nothing. But when it comes to funding, we're expected to pay up. I'd love to be able to take transit now and then, there is no service available to reasonably get me anywhere outside of early morning and evening. I can't take transit to an appointment in Woodinville late morning or early afternoon. I can't take a bus on weekends. When I checked on bus service to get my son from Redmond to U Village last summer, I proved to be faster to drive. I could get him there and come back home in less time than it would have taken him to have taken a bus.
EAST KING COUNTY	How about we stop adding capacity to the transit system and stop building so people can't move here. Let's pay people to LEAVE the area.
EAST KING COUNTY	Why can't we speed up the timeline. Why does it take 25 years to get light rail to Issaquah?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	I am frustrated with the lack of adequate parking at the Tukwila/Long Acres Park and Ride. The parking spaces are filled daily by 7:20am, making it nearly impossible to consider catching the 7:40, 8:14 and 8:49 am morning trains. This is unacceptable as it puts me in the position of having to drive as a single occupancy vehicle on average twice a week. I'm considering giving up my fully paid Orca card and taking the parking subsidy option offered by my employer. Sitting in traffic is not ideal, but it beats the frustration of being forced to drive due to inadequate parking at the Soundef station. I know this is also an issue at other Sounder locations.
EAST KING COUNTY	Punishing only taxpayers by charging large fees for use, in addition to high taxes for development for the services that will be used by low income passengers for free is not fair. Your idea that you can tax me out of my car is ridiculous. Transit service will never get me to work in the same (or less time) than it takes me to get there by car. I routinely check transit service when I need to cross the lake. It takes much much longer on the bus and costs much more than driving and paying for parking. Why would I want to take the bus at higher cost in time and fees? That's just silly.
EAST KING COUNTY	Repurpose vanpool budget towards mass transit.
EAST KING COUNTY	I saw a ratio of 10 out of service double decker buses to 1 bus in service on my way home from seattle to lynnwood. What's with all the empty buses? Also, I think we need more 511/ 512 buses from lynnwood to seattle. It's like riding a tuna can in the morning, and when the bus gets to edmonds , there's no more room for people on the bus. Also, if you are going to charge more, can you guys build a bus shelter at westlake center? There's always someone smoking there or pouring down rain and tons of people.
EAST KING COUNTY	All your projects cost too much and take too long to implement. The problem with buses, trains and carpools is that they don't stop by your daycare it schools, etc in your way to/from work. Our lives don't work in a bus or train schedule. Give us better roads and stop tolling us to use them.
EAST KING COUNTY	Look at Boston. Why are we not up to speed with that system?
EAST KING COUNTY	25 years is way too long to wait. I would be more supportive with faster timeline even at increased cost.
EAST KING COUNTY	Please make Issaquah a priority in the next 10 years... Not 25 years!
EAST KING COUNTY	This plan does NOT reduce congestion on our roads even by Sound Transit's own analysis, so stop advertising that it will. It will cost MORE than 200 per year for most families. I would rather see a focus on improving bus service and routes such as double decker buses and increased parking capacity at Park and Ride's. Let Seattle pay for more trains if they want them. I do not see a need to have trains going to Issaquah or Redmond. ST1 was a disaster and poorly planned. ST2 was a very large tax increase and ST3 is absolutely ridiculous. Why can't Sound Transit stay within the current budget to make improvements and get Federal Funding? Seattle and King County both have 5 year 2 billion dollar shortfall to repair and maintain its roads yet there is NO plan and when I ask the my elected Council Member Dembowski he has NOTHING to say. Last, why does the Everett to Seattle Sounder still run? It is a giant money loser and closed 50+ days per year and it farebox is about 15%. Please kill this proposal now. I will absolutely be voting NO!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	you show us a map, but the freeways aren't on it. I do not want the bus on the kirkland trails. We have the freeways and we need to utilize them for transportation. Leave the trails alone!
EAST KING COUNTY	BRT is acceptable for Eastside, but rail would be better. New Renton Transit Center should ultimately be served by rail connection. Maybe in ST4? Also, 25 years to get to Everett is unacceptable!
EAST KING COUNTY	I have tried the current light rail. It is a failure. It is slow and there is no parking at the stations. Show me a plan that has FAST and FREQUENT trains with plenty of access to the stations and I will listen.
EAST KING COUNTY	It is absolutely unbelievable that the decision was made to go across I-90 instead of starting with the primary North / South routes of I-5 and I-405. I absolutely oppose anything that does not include light rail between the intersection of the airport going all the way up I-405.
EAST KING COUNTY	PLEASE Include Issaquah!!!!!! I drive to work because I work in Sodo and right now it is easier to drive - but I HATE driving and would love public transportation
EAST KING COUNTY	Bothell Kenmore area traffic 24/7 is a mess!!! No parking at Kenmore park and ride, so please add spaces. We all avoid 405 it's a mess!!!!
EAST KING COUNTY	Any transit plans should keep buses and rail on established roads/freeways.
EAST KING COUNTY	Would like the timelines sped up. I will be retired / dead by the time several of these proposals will be implemented.
EAST KING COUNTY	I do not support more people moving to this area. you have failed to support any efforts to provide for more cars to move more quickly with more freeways or widening roads for cars. if fact you keep reducing the number of lanes on many roads. I will never support your raising taxes for high priced low capacity transit projects including your overpriced and poorly managed tunnels and your inept management. you have lied to the public twice about the costs and timelines of your projects and I will not support another until you are held accountable for your failures.
EAST KING COUNTY	A key premise for supporting ST3 seems to be the goal of a life without cars (see several of the support statements above). I think this is very unrealistic. There will be cars on the road far beyond the completion of ST3 or ST4. They may electric, or they may be hydrogen powered, but they will exist. Parking needs to be expanded and also not priced so high that it cannot be effectively used. Also, don't sell "products getting to market" as a reason for light rail and BRT.
EAST KING COUNTY	Washington State has never finished one project on time, on budget, with reliable contractors or leaders! I've lived in many places with light rail and fine public transportation. They (the government) did not "hound" the residents about "environmental causes" everyday, paying out of sight taxes (we the middle class always get Hit!), it never ends. We are paying for all your mistakes on projects like the "Tunnel", 520 bridge, the constant light rail breakdowns now (and slides), no one takes responsibility, just increases the taxes. A lot of us are tapped out paying for all of your causes!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Timetable is WAY TOO SLOW!!!! Other cities like Dallas have build larger systems much faster. What is wrong with this city!??
EAST KING COUNTY	No transit on the cross kirkland corridor please.
EAST KING COUNTY	we should move ahead and make the first phase 4 years instead of 8 years. This is taking too long and it is long overdue.
EAST KING COUNTY	Replace the BRT system on the plan with an additional Light Rail line going South-North along the Eastside from around Ashway Station to Sea-Tac. We don't want a bus system, we want Light Rail too. The traffic on I-405 is abysmal during rush hours, and many residents of the Eastside actually also work on the Eastside and rarely venture into Seattle. Sound Transit needs the support of the populated Eastside (Bellevue, Renton, Kirkland etc) and as it is, the current plan only offers us a new bus service, which hardly seems attractive, given the increase in taxes we will have to pay. Also, many major companies have their headquarters/offices in the Eastside, such as Microsoft, Boeing, T-Mobile, and passengers from Sea-Tac would appreciate a direct line to these areas, instead of having to Light-Rail to Westlake and transferring to the Eastlink line.
EAST KING COUNTY	Please move the vanpool designated parking spaces to closer to the train platform at the Tukwila Sounder Station as the vanpools don't use them way in the back of the lot. They only park up front so 5 spaces get blocked and unused every day.
EAST KING COUNTY	We have many people living at Redmond Ridge that need a reliable weekly all day bus service now. At present the bus service 224 only operates 5 days each week between 6:00 am and 7:00 pm. Limited bus stops, no park and ride at the ridge. Between Duval and Redmond park and ride that takes in some of Trilogy.
EAST KING COUNTY	Please keep developing our community and remembering all the people who commute in the Eastside. Redmond to Bellevue can sometimes take 2 hours, and that's just ridiculous! Thank you for your efforts!
EAST KING COUNTY	The disabled community relies heavily on public transportation, and as I am a person that uses a wheelchair and absolutely loves how accessible the light rail is, strongly supports immediate expansion of every aspect of the light rail system so myself and others belonging to the disabled community have better access to our our state.
EAST KING COUNTY	I would like to know statistics on how many people actually ride per day, and what the cost per day of the light rail is. No point in spending billions more on something no one uses.
EAST KING COUNTY	We need relief now, please consider expediting short and long term plans aggressively. 8-25 yr plan sounds brutally slow for the current situation.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>Thank you for adding projects serving the SR 522 corridor!</p> <p>Suburbs and less dense communities need parking at the transit stations. Reducing parking may work in very dense areas in Seattle where walking, biking and/or bus service to transit hubs are more viable. But in the suburbs these options are much more limited. People won't use public transit if they have difficulty getting to and from the transit hubs. And every car that parks at a transit hub is a car that does not clog up the freeways, and brings people into the transit family.</p>
EAST KING COUNTY	<p>Do NOT ever put rapid transit buses or light rail on the Cross Kirkland Corridor. This is totally unacceptable. Keep these on 405 where they belong. If you put them on the Cross Kirkland Corridor I will completely oppose these projects and vote against any funding for them. But put them on 405 then I will support them. The Cross Kirkland Corridor is off-limits to Sound Transit in any form.</p>
EAST KING COUNTY	<p>You state the reasons, you describe the projects. But the latter doesn't solve the former</p>
EAST KING COUNTY	<p>Just BUILD IT ALREADY! We voted YES in the sixties!</p>
EAST KING COUNTY	<p>I believe there will always be vehicle congestion on our roads, regardless of how much transit gets built. So I disagree that there will be fewer cars on the road if ST3 projects get built. Cars will always fill the roads they are given (author Jeff Speck calls it "induced demand"), and therefore there will always be traffic congestion. It's really about creating alternate modes of transportation like BRT and light rail for those of us who don't want to sit in traffic.</p>
EAST KING COUNTY	<p>My opposition is based on the absolute lack of credible and believable budgets and proposals. Most of the projects that are proposed are boondoggles....over budget, under delivered, hugely wasteful and horribly planned. We need smart people, who actually drive on the roads to plan this stuff. SoundTransit3 needs to be rethought, rebid and redone in order to get something that makes sense. How come we can build rail lines and not roadways? Have I missed something???? You know, my last visit to Santiago Chile was somewhat of a surprise. Yes, they have mass transit, BUT they've added new freeways in just a few short years. What's their secret? Has anyone visited Chile to ask?</p>
EAST KING COUNTY	<p>YOU guys need to do a better job of sending info about this plan into the community. Position is as keeping up with modern cities, as we are an extremely technologically advanced city, why is our public transit system such a joke? This project also needs to get this out of publicly elected officials' hands, as every time its voting season, the support behind this project will change. It needs staunch supporters who are in it for the long haul.</p>
EAST KING COUNTY	<p>Roads are the ONLY answer. Your project is a money sucking scam and an attempt at engineering all of our lives. It will cost over \$300.00 per vehicle for car tabs under your plan. Our property taxes will go up. The sales tax will go up. Your plan is doomed to fail because we want roads, not mass transit. Your financial figures are inaccurate and in general you are lying to us. I will fight this with every breath I have, I will preach your deception to all who will listen. We will prevail and your project will be religated to the dustbin of social engineering where it belongs. Roads, roads and more roads. That's what makes America great. Always has, always will.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

<p>EAST KING COUNTY</p>	<p>In general, this whole plan addresses ALL areas/regions, and I feel like when you ask individuals for their opinions, they will want to talk about their own areas. I've been wondering if each "area" (however you are to define that) should be addressed separately? Like, instead of the ST3, it could be the "South End Improvements," "East Side Improvements," "Seattle Improvements," "Seattle to Eastside Improvements," "North to South improvements - on the eastside and westside separately," etc. Then each "area" would be paying taxes based on what "area" they are in and what the relevant improvements are to their area.</p> <p>I would be much more likely to jump on the "campaign" bandwagon for improvements to my "area" or "areas" which concern me: "Eastside Improvements," "Seattle to Eastside Improvements," and "North to South Improvements - on the eastside." I would whole heartedly (strongly agree) with those improvements and be willing to pay for those improvements. But, you through in stuff I do not care about at all (especially the south end stuff and the seattle side stuff), I don't want my taxes to go up for that, you know?</p>
<p>EAST KING COUNTY</p>	<p>The plan is too large for the average person to comprehend. The cost of the plans appear to be understated. There are other factors that will mitigate long term traffic patterns that include relocation of employment and residence. Much of the urban growth has been mandated by the State's Growth Management Act, which discourages "urban sprawl." Local governments continue to approve high density residential development without adequate parking for cars. Will the ST3 plan serve the need, or will it be the designer of the future of growth of the three counties? Already, real estate prices are going up in the areas where ST3 transportation is planned.</p> <p>What I would like to see, is the plan broken down into a series of smaller projects that will be presented to the voters for approval. If the complete project is approved in November, Sound Transit will have almost infinite autonomy to do what they want without much accountability.</p>
<p>EAST KING COUNTY</p>	<p>A complete disappointment as a resident of Kirkland. Kirkland does not get anything other than a bus in our lifetime. Based on project timelines even the next generation of of residents of this city will not have anything. So why should Kirkland (or even Bothell) support this and be taxed more - we are already being taxed for ST2 without anything to show in Kirkland? While this urban part of the city will not have anything yet we are considering remote locations like Issaquah for rail link - why?</p> <p>Also ST should not call a bus service to be a rapid transit. I travel a lot internationally and do not see other cities of Seattle size/potential around the world using buses as a predictable means of connectivity. A plan that describe bus service as the only future means of rapid connectivity for Kirkland into 2040 and beyond makes it impossible to vote yes. I might as well start bicycling to Bellevue to get lightrail from there and for that I do not need ST3 or new taxes.</p>
<p>EAST KING COUNTY</p>	<p>None of these plans address the desire to have freedom to change personal commuting plans as we please, when we please, where we please even if it means taking longer.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Vehicles using roads should be metered just like utilities, the more you use the more you pay. It is time to realize like it or not we are going to have to pay out of our pockets to relive this gridlock.
EAST KING COUNTY	I would like to see more consideration of PRT options (Personal Rapid Transit) through suburbs as feeders to light rail. I would like to see MORE attention to bicycles. I would like to see Sound Transit support light rail along the 405 corridor instead of BRT. Light rail from Renton to Everett or even Marysville would be fabulous (yes, I know it would be expensive). You would double the cost if we got projects in half the time, at least as far as I'm concerned. You MUST provide parking and better alternative ways to get to stations.
EAST KING COUNTY	why doesn't someone support building affordable housing closer to where all the people work???
EAST KING COUNTY	The people in Issaquah really need light rail sooner!
EAST KING COUNTY	I moved to Seattle from Chicago. I rarely drove in Chicago -- I hopped on the "L" or I hopped on a big train. Could be a blizzard and I knew I could get to work. It opened up the options I had for changing jobs -- I didn't worry about transportation or long commutes. There is going to be a battle -- the rich people on Mercer Island are going to fight tooth and nail against having light rail go through their area. The same thing happened in Chicago when they wanted to extend the Blue Line from Jefferson Park to O'Hare through Park Ridge (wealthy community). They delayed but they lost. Guess what? Murderers, robbers and rapists did not come out from downtown Chicago to their pretty little community to wage mayhem. Seattle is in desperate need of great transit. It can't grow without it and quality of life will suffer.
EAST KING COUNTY	Just do it. As soon as possible so every one will benefit from saving time and money.
EAST KING COUNTY	Buses are not that efficient for long distance travel. For Bothell and Kirkland areas, I would support light rail over bus with the light rail taking a route to SeaTac. If I have to take luggage to SeaTac airport, it is easier on light rail than by bus. Right now, the bus system does not meet my needs for long distance travel.
EAST KING COUNTY	The cost is too high. When are we going to start making people riding bikes pay for road improvements, i.e. bike lanes. Lets make the people riding the buses/light rail, etc pay for the improvement instead of adding more cost to property owner. It appears we are already paying too much for bus service and the service is getting worse as they continue to cancel bus services and routes.
EAST KING COUNTY	Provide less parking the cities and maybe the single occupant driver will realize that taking transit is cheaper and easier.
EAST KING COUNTY	It would be nice to have light rail instead of buses to connect Bothell/Woodinville/Redmond to Bellevue and Sea-Tac. Just like in Europe or Washington DC. You don't need a car! How wonderful that would be!!
EAST KING COUNTY	the better the transit system is, the more that people will use it and the less traffic there will be. needs to be easy and quick. beefits everyone regardless of if you commute via mass transit or sit in your car
EAST KING COUNTY	I believe that biking trails and transit should be separate due to safety issues.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Stop the Waste and Lies that are SOP from sound transit. Worked for st and know of the waste and LIES. We the people can't afford to keep the Gravey Train Going. From what you first proposed many years ago, to what we have has cost way to much. To many overruns. We can't Trust You Anymore... We can't afford You anymore...
EAST KING COUNTY	<p>Since you were sh shortsighted as to give up the rail right of way from renton to woodenville I will never support spending tax dollars to support acquiring transit corridors you gave away.</p> <p>Also work on your mail program to get the name of the resident correct. mailing to my father in law who has never lived here seems like one more example of your inability to master even small tasks. why should I support giving you billions to waste?</p>
EAST KING COUNTY	You now want to raise taxes again to do some of the things you promised to do years ago, but didn't do, and still ran ridiculously over budget to do poorly. What about doing what voters over and over again day we want, which is NOT to force us to give up the flexibility and convenience of cars, and improve the roads? Is "raise taxes to build expensive systems people don't use" your only answer? For every passenger riding, for example, light rail, what was the cost to build the system? I believe it cost taxpayers something like \$40 for every person riding today, each time.
EAST KING COUNTY	The Seattle Times & news on T V stations said you want 50 billion dollars for this 25 year plan & the average increase on our property taxes will be about \$400.00 per year. You want to add an increase on license tabs. I am retired & on a fixed income. I cannot afford this \$400.00 per year increase on my property taxes & I am sure my taxes will go up for schools too. I am tired of out of sight taxes in this state. I am also sure the price tag will go more than 50 billion dollars before this project is completed. I will not benefit from the 25 year plan, I will be dead. If you need 50 billion dollars over 25 years, increase the price for those who ride the transit. Those who use it should pay for it, not every Tom, Dick & Harry.
EAST KING COUNTY	Please build in phases and tax the residents in the region you are building for. I don't want my taxes to pay for development in places I will never likely go. This plan is too monstrous to set a tax for all at once. Happy to pay taxes for improvements in my area (Bellevue), but why should I pay for Tacoma or Everett?
EAST KING COUNTY	<p>We've lived in Bothell for 42 years and have NEVER been able to use public transportation for work. My wife taught off of Rainier Ave. S. and I taught in Shoreline. Buses would have added three hours to our day and with meetings 2-3 times a week both in the AM &amp; PM how late we would have gotten home, plus coaching after school. Metro stopped seven blocks away and hasn't run that route in decades. Community Transit started four blocks north of us going north only and quit that decades ago also. Our property taxes just went up \$42.50/month and now you want to add another \$17.00/month. We didn't receive a COLA again this year from SS. Two years ago a transit vote was soundly defeated despite the threats, crying and fear tactics of Dow Constantine. Funny how money was found and everybody survived. We will work very hard to defeat this boondoggle. [name and phone]</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>Is it feasible to put heavier costs on those persons who choose to use their cars, even when transportation services are available in their areas? I believe that getting this up-front right from the start will encourage people to begin thinking about the entire carbon overload from our roads. Quality of life and our hope for remaining alive on the planet should be extremely important parts of this message.</p>
EAST KING COUNTY	<p>I like the idea of public transit but am disappointed in this plan.          There needs to be some sort of transit between Renton and Seattle. I spend 2 hours a day on that commute, as do lots of my coworkers. Taking the current bus would double my time going to work, and it doesn't run late enough to bring me back. (And I work 12.5 hour shifts, so I'm already losing sleep just spending 2 hours in the car).          I'm also frustrated that Renton is just (hopefully) getting a better bus. Everybody I know who has tried the Rapid Ride has thought that it isn't worth the money spent on building it.          I'm a little confused how Sumner, Puyallup and Fife are getting the Sounder or Light Rail and Renton is just getting a better bus (that doesn't go to Seattle). Do we have less money?          Also, I think that your fliers were probably too expensive. We didn't need two of them, and it's thicker paper than all the mailings from my union and the political ads that I get, and I'm guessing that the thicker paper cost more money.</p>
EAST KING COUNTY	<p>Would like to see the cost born more by users than just property tax, and/or to place more burden on drivers/cars/trucks. Also the notion that folks that live closer to the city, generally have higher property values, so will bare the expense more, while it is FOR the folks who have added to urban sprawl that this is being built for i.e. I-90 not so bad until Sammamish and beyond got built out. When I moved to Kirkland there was 4 lanes to I-405, and now there are 10. The extra lanes have not been built for me, I was satisfied with 4. Employers should contribute, too. I'd like to see a move to mandatory use of public transport for any workers who just leave home, go to work, and return home day after day. Lastly, Seattle has enjoyed the benefit of the Burke-Gilman trail for years, and yet, I have heard of NO PROPOSALS to convert to light rail. Finally Bellevue, Kirkland, Woodinville have an opportunity to be linked by a pedestrian SAFE TRAIL and there is only talk of motorized transport on the corridor. I see the corridor as an asset if maintained for pedestrians and considered an extension of parks, and an inconvenience if used for public transport based on the number of crossings of major transportation linking surface streets/avenues. Let the pedestrian corridor be the vehicle for getting folks to transit stations on better routes. THANK YOU!!</p>
EAST KING COUNTY	<p>In the beginning of this article you say that this service will cost the individual about \$17.00 per month which I find to be hardly true!!! Right now I only ride 2 days a week and I spend \$40.00 a month easy on Sound Transit services, including Metro, which is ridiculous! That's why I oppose this plan! The voters passed the Monorail years ago which would have meant clean air, no traffic, fast connections, no congestion! Did Seattle learn anything from the voters? No, they never do!!! This whole survey and article is a joke as far as I'm concerned and I don't like being deceived!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Increase the levy and do more faster! Light rail should come to Kirkland - all the tax revenue that would be generated for companies wanting to be near Google it's ridiculous not to. 22 years to get light rail to Ballard??? I really think you could sell a higher levy - this is light rail not funding a bus system with \$80k a year average employee salaries - this is something people want and want now!
EAST KING COUNTY	I'm opposed to using sales and property tax increases to fund the expansion.
EAST KING COUNTY	Service to Issaquah is needed now -- gridlock on I-90 every weekday. Move it up in prioritization. Furthermore, reconsider the route through Bellevue and place a direct I-90 route from Issaquah to Seattle in addition to Issaquah to Bellevue. As the region expands on the Eastside to Snoqualmie Ridge, the population base is employed in both Bellevue and Seattle. Update your needs survey to capture current data for residents of Issaquah/Sammamish/Snoqualmie Ridge/North Bend. The buses are currently full, the need is great for expanded service.
EAST KING COUNTY	Do not do it.
EAST KING COUNTY	Disappointed that Renton, East Kent, and even North into Woodinville are left with just bus service, and even outlying areas (such as Fairwood, Maple Valley) are left with nothing. After 25 years, I've never seen a plan that can motivate me to take transit to work (I can drive twice as fast and mass transit can get me there).
EAST KING COUNTY	No rapid transit on the Cross Kirkland Corridor. Don't destroy wetlands. Don't pretend the access can handle buses, rail and also walking and biking safely. It cannot be done.
EAST KING COUNTY	I would strongly support taxes or levies to increase funding in order to complete this expansion in a shorter time frame
EAST KING COUNTY	We need something NOW, not 25 yrs from now, BEFORE all the construction goes in infrastructure should be in place! What good is a busline if there is no road for it to drive on from the neighborhoods, got to get to the transit center somehow. Infrastructure first before more housing developments. Live off Filbert rd in Lynnwood, estimating with all the planned development with no changes to roads that it will take an average of 5-8 minutes to get on to filbert during commute times. Can't see where any of these projects will help.
EAST KING COUNTY	We already pay a lot of taxes. Snohomish County sales tax is now highest in state. Why do you need to charge increased tax. Spend money you have now more wisely and efficiently.
EAST KING COUNTY	Focus on improvements for automobile transportation, trains are a 19th century solution to a 21st century problem.
EAST KING COUNTY	I live North of Woodinville off of Highway 9. We have no bus service along Highway 9. I would take the bus to Woodinville and Seattle if I had service on Hwy 9. Why can't service be extended along Hwy. 9 North of Woodinville to Snohomish?
EAST KING COUNTY	There is a strong need to solve transportation issues in this area but I will not support the initiative if it includes, yet another, property tax increase.
EAST KING COUNTY	Until the users pay the majority of the costs I strongly oppose any plan.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>Renton was not even mentioned in the brochure received in today's mail. There appears to be no strategy to ever include Renton in light rail; bus rapid transit is a weak long term alternative. You need to provide details and commitments on how the Renton rapid transit solution will speed residents' trips to primary employment centers including Downtown Seattle, Everett Boeing plant and the commutes of other folks into the Boeing plant in Renton.</p> <p>I never use transit to get to work because it would take 1-1/2 hours from home to Eastgate in Bellevue (a 20 minute drive). There needs to be a companion plan with Metro for eastside commuters heading up and down the I-405 corridor.</p>
EAST KING COUNTY	<p>Microsoft, Amazon, Expedia, Google should pay for the extension to their companies. Or you should call this a "tax to work". Just like the stadiums, do these multi-billion companies have nothing to contribute except "providing jobs"? They have created this traffic congestion!</p> <p>An alternative that might be cheaper would be for tax payers to "give" hundreds of acres in Snohomish, Mt. Vernon, Puyallup, Sumner, Issaquah, to these companies. These companies can use computers any where. Wide distribution of major employers would make use of the roads in every direction, north, south, east and west. Not everyone wants to commute to Seattle or the Eastside. Directors, how do you know you are right? Was building I-5 through The middle of Seattle the right thing to do, 50 years ago? Cramming everyone into high rise Seattle or Redmond the right thing to do?</p>
EAST KING COUNTY	Light rail in bellevue should serve Bellevue Square Mall
EAST KING COUNTY	People want individual transport. No one wants your stupid light rail.
EAST KING COUNTY	More 268 bus frequency is needed from fall city to Seattle. On Every single 545 bus in the morning and afternoon, please are standing and bus is jam packed. Need more 268 express buses in the morning and evening during office hours.
EAST KING COUNTY	Need to include rail along the I-405 corridor
EAST KING COUNTY	I would prefer it if money was to be spent on highways. I don't think enough people will use this to justify the cost.
EAST KING COUNTY	<p>One very important factor that hasn't really been touched upon in the current proposal is how people get to mass transit. Public transportation to mass transit has to be improved as well. Yes, adding additional parking is one way of doing it, but space will always be limited, and there isn't enough parking at the mass transit spots even today. The major reason why we currently do not use mass transit more frequently is that it is always extremely difficult to find parking (unless you go really early in the morning) at the transit center. We live in North Redmond. To walk to the nearest bus stop, at a brisk pace, takes about 15 minutes. The bus runs infrequently and it is hard to know when it is going to be at the bus stop and then it takes an additional 15 minutes to get to the downtown transit center. So, optimally timed, it takes over 30 minutes just to get there, best case scenario. Too long to make this a feasible transportation alternative for us. So please consider improving the transportation infrastructure to the mass transit centers to make it possible for more people to take advantage of the new proposed transit plan. Thanks.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	I moved to the Seattle area in 1990. There was talk then of a regional rail system that just never got off the ground. I grew up in the New York City with subways and commuter rail systems. It takes a generation to grow up with this to see the value in it. Unfortunately, it's 26 years later and we're still debating the creation of a world class light rail transit system. If we started then, it would have been completed by now and at a fraction of the cost. I support whatever it takes to get us out of cars all the time and into a safe, clean and comfortable mass transit system.
EAST KING COUNTY	no matter how many buses and /or light rail train you add, it will not be enough to compensate for the continued growth of passenger cars using the interstate and state highways. WE NEED MORE HIGHWAY CAPACITY FOR CARS EVERYWHERE. I-405 from Tukwila to Bellevue has been at/above capacity for years, yet no additional capacity has been added or - it appears - is even planned for. Same comment for I-90 driving to/from Eastern WA; on any summer weekend it is awful, we need more lanes between the Pass and Ellensburg NOW. Rapid Transit can at best only benefit a relative few, we need capacity added to the Puget Sound area highways NOW.
EAST KING COUNTY	There is not a majority of the people in all these areas that would use of benefit. Acknowledging there is a traffic issue, this transit system would not answer the problem. the cost of 50 billion is outrageous, especially when Seattle has not finished projects in allotted time or been fiscally responsible in the past. Too much money especially for those retired , elderly or fixed income trying to live in this area.
EAST KING COUNTY	Really more opinions than I'm allowed according to your drop down menu. 1) Why on earth are you not including the Renton Highlands? Why just busses and not light rails? Where do you think the poor folk who need this very service actually live? I'm 50/50 in support as you are not considering this. We have a minimum of 3 mile travel to get to the nearest bus to Bellevue. That is insane. Have you ever tried to get a teen, let alone a child to walk 3 miles to catch a bus to school? 2) Though I'm pleased to see that Renton is on the plan AT ALL you aren't thinking it through. Again, the 50/50 commitment. Why is this going to take so long? When you were going to get money for the transit lanes it happened virtually over night. But when it actually helps the citizens you drag your feet? I'm not convinced you are in it for the people.
EAST KING COUNTY	No one can project costs etc and plan that far out. This is more of a good guess. If your wrong who pays. Yes, we the tax payer. No one is ever accountable for lack of performance. Your current track record of being on time on budget is very very bad. I object to so much money on a project projected out that far. Issues change over time as well over such a long period. These are the reasons I will not support the project. Come back with something more palatable.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>I dont see relief on 405 northbound even with the use of rapid transit. North and Southbound 405 needs more creative planning to include more than just buses. Rush hour traffic from Everett through Tukwila is overwhelming. I dont see people out of their cars using buses.</p> <p>Also 167 north and southbound is a complete mess during rush hour too. I can appreciate that Sounder trains run but they too are full and not always convenient. I'd like to think that all of King County is considered not just Bellevue, Ballard, Issaquah, Kirkland and West Seattle.</p>
EAST KING COUNTY	<p>I understand the believed need for light rail, but I would like for the committee to be more open and honest about actual costs of not only building out but also operating. Why not have this system pay for itself, like the toll road on SR16, by having those riders that use this system pay for it vs. those who do not. I use to be a very heavy rider of your system and found the buses to work just fine (even on a busy transit route like I-90). Replacing this with a priority line that will require separate infrastructure, equipment, etc. makes little to no sense. Unless you can better explain the ridership on the existing lines and how much those riders pay for the total operations of the rail line, I see no reason to have tax payers fund another program like this.</p> <p>Also -- I would like to see much more transparency on question #14. Please tell me ([email address]) what an "average resident" in puget sound is?</p>
EAST KING COUNTY	<p>The sooner the better!</p>
EAST KING COUNTY	<p>Are there no available federal funds to help pay for this? My house, like neighbor houses, is high enough in value that it is a struggle to pay for tolls and a much higher property tax and increasing bus fares on Social Security. Unfortunately I've had to skip too many events because of the toll on 520 and the bus fare, given the amount of waiting time and lessened bus service to Bellevue in evenings and on weekends. I hope I can move back to Seattle, but moving is also a huge expense, so it's feeling like a constant dilemma. I know Bellevue is changing and the wage discrepancies are getting wider, so it feels worse for me and others in the same situation who try to stay active after retirement.</p>
EAST KING COUNTY	<p>I would support transit if the organization in charge had a reasonable track-record of efficiency and effectiveness. Sound Transit does not, therefore I do not support giving them additional revenue to squander</p>
EAST KING COUNTY	<p>Explore other methods of financing the work, so we don't keep increasing sales tax to pay for everything.</p>
EAST KING COUNTY	<p>Although I support light rail, what you have planned does me absolutely no good. I live in Newport Hills and all we get is BRT? It would be nice to have light rail to take me to the airport, downtown Seattle and Bellevue, and Issaquah. The timeline is horrendous. I'm retired on a fixed income and won't live long enough to see any benefit. I find it difficult to support paying taxes on something that I will never see the benefit.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	The plan for light rail expansion does nothing for those of us living South of Issaquah and East of hwy.167. Maple Valley, Covington, and Four corners are not even on your map. Four Corners is one of the fastest growing areas in the county and your plans are reaching out 25 years. We can't even get a four lane highway from Covington and Maple Valley to Four Corners. The light rail expansion is strictly a Seattle, Bellevue, Tacoma, Everett program with a few others along the way. As I received your survey request I assume you are expecting people in my area to help foot the cost. This is totally unfair. Those cities receiving the so called benefit should bear all the cost. According to the Seattle Times the property tax hike would be \$400 for a \$ 400,000 home. This is a far cry from the \$200 your putting out there.
EAST KING COUNTY	Shuttle routes should be included going from light rail depot to neighborhoods reducing need for parking lots and single car occupancy once the station is in place.
EAST KING COUNTY	All of these improvements should NOT be funded by property tax. They should be funded by the very people that use the roads and various forms of transit. The taxes should be paid by gas tax and transit ticket sales.
EAST KING COUNTY	It is extremely important that Renton is connected to light rail in Seattle as well as to Bellevue as commuters live in Renton but go to Seattle, Bellevue, Redmond, & Everett. Renton and south king county must be included.
EAST KING COUNTY	With the increasing growth in the Puget Sound area, I don't think BRt can meet expectations. A more effective use of buses might be to service the light rail stations.
EAST KING COUNTY	Add a link light rail station in Renton TC, and have the link route go between Renton and Bellevue TC.
EAST KING COUNTY	I feel that buses driving on the shoulders of highways is very dangerous. Where would cars that have broken down or are involved in minor accidents go? The shoulders of highways are strewn with debris that could be kicked up by buses and tossed into the driving lanes and possibly into open windows of cars. Then if someone in a car sees a bus do it they are likely to try and drive on the shoulder themselves creating confusion and more dangerous situations.
EAST KING COUNTY	Finance of construction should come from revenue generated from shipping, aviation, trucking, commercial rail, oil industry and other businesses. Not the pockets of Washington citizens. Our budgets are already strained from a mindset of solve revenue issues by taxing citizens.
EAST KING COUNTY	Keep trains and buses off of the the Kirkland Cross Corridor Trail. This should not be a part of "mass transit" Maintaining greenways in communities is critical to a healthy community. Enhance the use of I405 and existing high volume traffic corridors to satisfy mass transit needs.
EAST KING COUNTY	The timetable to complete this is just ridiculous. Bonds should be issued ASAP of this passes to ensure funds are avilabke to pay and begin to build Light Rail sooner. In 17 years, I'll be retired and won't need light rail to take me to work!! King County needs rapid transit NOW!!!
EAST KING COUNTY	Light rail south from Bellevue to Renton is missing. It's so obviously a need!
EAST KING COUNTY	Lets build faster! Need car drop-off lanes at stations, and more bike access on trains, buses and trails to connect transit to regional trails

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	I am not opposed to increased taxes to fund transportation projects. I am concerned with the shown lack of proper budgeting, proper planning, and oversight.
EAST KING COUNTY	You all already wasted tax payer money with the toll lanes on I405 and charged us after we payed for the road development with the tax money, which came from us...figure out a better way to pay for these projects. Also, if we don't use the service why is everyone responsible to pay for it when the tax money is badly spent already...wages are not keeping up with the costs of the taxes...which again only slightly improved the traffic...
EAST KING COUNTY	I don't even have bus service in my neighborhood - I have to drive 5-10 miles to get to a bus. Bus service needs to expand to the rural areas to be useful and not just commuter. Maybe on-call or something. Mini vans.
EAST KING COUNTY	I feel pretty strongly that we need to prioritize the highest areas of traffic in the most highly populated areas, which I would think would lead us to needing to solve our west side to east side traffic first, and then north/south through Seattle, vs extending from the edges of Seattle and Bellevue to even farther out, where driving is more common and less impactful on traffic.
EAST KING COUNTY	We need a good and fast rapid transit system, with trains and or buses running every 5-10 min. Just like in every big city in Europe.
EAST KING COUNTY	To date Sound Transit is over budget, poorly thought out and in conflict with other plans put forth without a comprehensive tie in. Wasted money better spent on other option to date. Riders moved per dollar spent is ridiculous
EAST KING COUNTY	I strongly support better public transportation.
EAST KING COUNTY	Get it done!
EAST KING COUNTY	I come from a major city in Canada and do not own a driver's license, so I strongly rely on public transportation. I think it is great that the ST is pushing hard for these plans and encourage more growth throughout our wonderful expanding region. I do think that the RT from Lynnwood to Renton really should be light rail since the 405 gets really crowded throughout the work day. Light rail might be more expense and takes longer to complete but it is really the best option for multiple reason in the end.
EAST KING COUNTY	This plan is the most ridiculous plan. If you believe that no light rail is needed from Renton to Eastside try driving 405 any time of the day. there should be at the minimum light link light rail not in Tukwila but near the Boeing plant. What job base is Issaquah that needs this service? This is about appealing to the most likely voters nothing else. This plan is short-sighted and I will get out the vote against this sad proposal.
EAST KING COUNTY	Be sure to build enough parking at light rail stations so people can actually use them!! Otherwise coordinate local buses well. For example the #196 bus in Edmonds gets to the station 20 min before the train leaves in the am. Too early.
EAST KING COUNTY	Get rid of HOV lanes and open up more driving lanes! get rid of buses and light rail
EAST KING COUNTY	No plan for light rail from eastside into Seattle?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	I'm in Renton. This is apparently the no man's land of transit. I would take the bus, or rapid transit, every single day if there was an option. However, trying to get from Renton to Boeing on Marginal Way, across from the flight museum, is ridiculous. I'd have to drive to a park and ride, take a bus to Seattle, or to the Tukwila Station, and then take a bus to work. Instead of 15 minutes it takes me to drive, it would take me an hour+. I have seriously considered moving to either the Tukwila station area, or downtown Seattle just to be able to take public transit.
EAST KING COUNTY	The board decided to spend millions upon millions for the Seattle to uw project. Light rail belongs above ground no matter what the disruption. With the money wasted already you could have built an additional 10 miles if not more of light rail above ground. The corridor in downtown Seattle, underground, is even suspect. But that is done and so is UW. Now place more above ground. you cannot always appease everyone and we seem to want to be politically correct and listen to our voters but sometimes you h\just have to do what is right for everyone and not just a few. Put together a real cost effective plan and I do not mind paying the freight. I have not looked at the boards salaries but I would assume they are outrageous. Place light rail above ground where it belongs and more people will ride it. Look at what other cities have done and it works. Get off your liberal butts and do some good work. Inconvenience is part of life deal with it. 1 hour in traffic stinks. The more people see light rail whizzing by them the more likely they will change there the way they look at things. Light rail in Seattle is 50 years late. BART took the initiative and received horrible feedback at the beginning but it works. People are lazy let's do something about it. Everyone proposed health but everyone stays in their cars.
EAST KING COUNTY	RE: Question 8. I think building commuter rail "across Puget Sound" would be a bad idea.
EAST KING COUNTY	Why oh why is there not light rail for the 405 corridor?
EAST KING COUNTY	We need light rail everywhere. Even the rapid rides for buses are a joke. Do long of routes. Takes forever to get anywhere.
EAST KING COUNTY	projects should be funded and built sooner
EAST KING COUNTY	The easier it is for people to access transit, the more they will use it. It needs to be convenient. This includes knowing that parking will be available at P&R's and frequency of transit. Once they use it, they will love it!
EAST KING COUNTY	ROADS ROADS ROADS.
EAST KING COUNTY	You need more meetings to spend more money to decide to have more meetings? Get nothing done! I voted years ago for light rail and now 25 years to get anything done. Heck with you , I've been here my whole life. I'm moving.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	This plan is extremely flawed. Rail is very old technology. It is restrictive, expensive, and is not worth the time and money. There are better solutions. The statement about trains not taking away from roads is a lie. I-90 is being taken over, build your own bridge. By the time all this is done it will be completely obsolete. WSDOT and SDOT are politically controlled by the few. Its goals are control, tolls, extortion and survival. Trams, monorails (does not take hardly any land) ferries, roads and even air are more efficient. The money and time ST 3 requires is robbery. Nothing you do comes under budget or within the time frame. I can move out of the county, but the younger generations are going to be burdened with your short sighted, expensive, out of date, solutions. The whole agency is a failure. I used to work and drive in Seattle for thirty some years, now I avoid it like the plague that you WSDOT have turned it into. I and my friends will vote hell no.
EAST KING COUNTY	We need to pay for this if we ever expect real, reliable transit service in the greater Seattle/ Tacoma/ Eastside area.
EAST KING COUNTY	As usual, Newcastle and Renton Highlands and Factoria seem to be missing in all this grand scheme of things. Notice the blank area on your own maps. I need a bus and parking for trips to Seattle during various times of day and not just early morning going and home at 5 pm. I need bus service to SeaTac Airport so I can leave my car at home, safely in my garage for a week or two. I need the Eastgate and Mercer Island transit centers to actually HAVE parking. In my mind, People in Tacoma or Orting live there because they want to and I do not want to subsidize them. I live close to 405 because I worked in this area. I resent subsidizing those who end up having better commuting options than I have and at my expense.
EAST KING COUNTY	We take the ST 545 bus to Mariner and Seahawk games. We appreciate the fact that we can leave the driving in our crazy traffic to the good folks of ST!
EAST KING COUNTY	In general, the Puget Sound area should have had much more rail service along time ago. I live in Renton and work in Bothell. As things are now, it isn't worth my while to take the bus. I would have to get up much earlier than the already early time I do get up. If you develop a bus system that can get me to Bothell by 6 am or so, I might be interested. But if it takes 8 years to develop it, I'll be retired by then. My preference would be rail from Renton to Bothell.
EAST KING COUNTY	Focus on bus transit which is dynamic and can change with the times. Rail is static and many times as expensive. As we are learning from the BERTHA tunnel the most expensive solution is not necessarily the right decision.
EAST KING COUNTY	not interested in making it easier for the area I live (mercero island) to be a more convenient target of big city crime. we have enough burglaries and theft as it is.
EAST KING COUNTY	The taxpayer / voter would be downright crazy to vote for \$50 Billion in taxes for a 25 year project. If it has to be done in phases, then fund in phases. Perform first! Prove yourselves with the money already voted!

<p>EAST KING COUNTY</p>	<p>The plan is entirely Seattle-centric. Those of us living on the eastside are expected to pick up the bill, but will not have light rail or any other "real" transit service for a quarter of a century or more? If you were serious, the light rail system would have been built along the eastside first in order to encourage and promote mass transit. After getting the suburbs connected from Everett, down the entire eastside to Tacoma in the south, then you'd build spokes into Seattle. You'd build major amounts of FREE public parking at each stop. This would encourage people in the suburbs to use the transit when going into the city for work, shopping and entertainment. As it stands now, like usual I watch my taxes go up, and my services go down while those renting, and not paying property taxes in Seattle reap all the benefits. I've lived and traveled in major cities with excellent mass transit systems. What is proposed now is a line-your-friends-pockets "non-public transit" system. I see politic and massive waste taking place. The tree hugging mentality that everyone can and MUST ride a bike or walk is not realistic. Even the new 520 bridge should have been built miles north, not just four miles north of the 90 bridge... but that would mean upsetting the wealthy elite on both sides of the lake. The county government and port authority both want to social engineer people out of their cars. I'm sorry, but it's not realistic. Some of us must travel for work to locations not served regularly or reliably by mass transit. Every time it rains I hear on the news how the rail system is shut down again from another mudslide. On 405 the idiots think a toll road taking two lanes makes sense, all it did was make traffic worse. Open all the lanes up... 5 lanes flowing would get us where we need to go in good time. Your proposal to let buses drive on the shoulder... what if a car is broken down and in the area. That simply means the buses will have to keep forcing themselves back into another lane, further slowing traffic. Based on the biased manner in which the questions were written (they were very leading and pointed towards only one "politically correct" solution. I know those who wrote it want the result to justify their poor decisions, poor planning, and bloated offices. I actually support the idea of affordable mass transit, but as long as you keep playing politics, picking my pockets and making it clear you are pandering for Seattle city votes, you can be sure I will not support your plan. So much so that I not only recently sold a property I owned in Seattle, but I am in the process of selling my two remaining properties in order to relocate out of Washington State. I've been here for 20 years and during that time all I see is the "we know better" crowd try to force their ill-thought-out solutions down everyone else's throats. If you keep this up you are setting up this great area to become the next Detroit, where everyone thinks they can get everyone for nothing and those with the ability to get out before the collapse will do so faster than you think. Brag about the growth, but you know Boeing is leaving the region within the next 10 years and the hightech companies are all building outside campuses. Seattle is overly impressed with itself and thinking they can create a west side rail system and leave the rest of the region out in the cold will only fuel the brain drain that has already begun.</p>
<p>EAST KING COUNTY</p>	<p>Plan will take too long - due to age, I will not be able to enjoy the benefits of the program. There has been talk of this for over 20 years and now another 27 years to complete. Why have trains and buses. Train should be added and sooner than planned</p>
<p>EAST KING COUNTY</p>	<p>All I hear is talk, surveys, excuses, etc. The problem is this topic has been talked about for the last 50 years and not much has been done about it, and now development is such that new transit development becomes incredibly expensive. How about we actually build some of these projects?</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Make sure that opportunities for those with disabilities (DART, ACCESS) are part of your planning--many of these individuals cannot use "traditional" mass transit but need to have and are entitled to have equal access to transportation options. I see nothing in your plan about this population. The current system is already stretched to the max...please include them.
EAST KING COUNTY	Too expensive.
EAST KING COUNTY	Don't trust you with the money
EAST KING COUNTY	I think this is a poorly designed survey, how can I possibly know what people in Tacoma will need for transit, when I live and commute in the north sound? You should quickly hire a proper survey company to design this and get a better handle on things. It appears to me that you are more interested in knowing which areas will be the squeaky wheels, not necessarily who would be best served by improvements.
EAST KING COUNTY	The people who use mass transit should pay for all of this nonsense. STOP TAXING THE REST OF US FOR THIS [explicit]!
EAST KING COUNTY	Puget Sound needs more light rail. Buses are terrible. They are still competing with vehicles on the road and adding to congestion.  Why is there no plan for a light rail line to Renton?
EAST KING COUNTY	I think the BRT and light rail should be on 405 from Bellevue to Redmond.
EAST KING COUNTY	There needs to be more service to Sammamish, and more parking available at RTC since there isn't service to Sammamish.
EAST KING COUNTY	We need projects to improve roads and increase parking.
EAST KING COUNTY	Renton needs light rail!
EAST KING COUNTY	Why can't light rail go over 520 instead of 1-90? It really doesn't seem to make sense in the long run to support access to and from the Eastside into Seattle.
EAST KING COUNTY	The ST3 choices wrt the Cross Kirkland Corridor are appropriate given the dubious cost-effectiveness of BRT on the CKC, the risk of controversy affecting approval of ST3 and the risk of environmental / community damage. It's best to focus on the better transit proposals that have been included in ST3, without any BRT on the CKC. As Kirkland residents, our use of transit will certainly increase with ST3, and the regional impact of ST3 will improve Kirkland traffic movement.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	I think that we should include more trains than buses. I realize that the tunnels and tracks involve more investment. However, more people would be willing to board a train to take them around than those who would board buses. Buses can also get stuck in traffic. Trains won't. Also, I imagine that the region will likely add more than just a million people in the next 25 years. However, if it is a million, I imagine that that will be an addition of, conservatively, 350-400k cars. If that's the case, there will be much more than 500k people riding trains. Also, the buses we are discussing adding will be stuck in traffic that is much worse than now. 350-400k more cars would make traffic unbearably impossible especially as one would enter into downtown Seattle as well as Bellevue.
EAST KING COUNTY	the expansion to Issaquah should be extended to North Bend; it's already a location for commuters who can't afford closer real estate.
EAST KING COUNTY	Quit taxing my house for the lazy people who rent and will not work.
EAST KING COUNTY	More parking at transit centers-- this is important because the transit system getting riders to the transit stations is not well developed--and until that happens, potential riders will be driving to the transit station hubs to participate in transit options.
EAST KING COUNTY	Why the fuss over Boeing Access road? Very few employees at Boeing work in Seattle for riders to support rapid transit. After all most of the plant has been torn down.
EAST KING COUNTY	alleviating the traffic from Bellevue south on 405 is a huge area of improvement needed
EAST KING COUNTY	We desperately need light rail over rapid buses. We need to get more cars off the roads and encourage people to use mass transit. Right now buses still sit in traffic on the freeways and is not making a significant impact on congestion.
EAST KING COUNTY	We understand that approval and payment will need to start 20 to 25 years before anything is built. However, if the approval for the funding of the project includes mass transit on the Trail, we cannot and will not vote for the ST3 proposal in November 2016 and will actively work to defeat the ballot measure. We support mass transit on I-405 including an 85th Street inline station and ask you to not put a trail segment in your plan or on the ballot.
EAST KING COUNTY	Stop taxing the property owners! Start taxing the people that do not own property and the people that use mass transit or any other service. Your budget should include funds for the future held in a separate fund on the books and be used for projects like transit. It is all about budgeting and being conservative with other peoples money.
EAST KING COUNTY	The timeline of this is far too slow for me to support it. I'm all for the expansion of mass transit, but not at this pace.
EAST KING COUNTY	Put this total package away and build roads for cars. This transit system comes from nowhere and goes nowhere and will not serve many people. It is a total boondoggle.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>Your proposal while helping the commuters who live on main corridors and commute into the most populated areas does nothing to help those in the more eastern parts of the three counties. No matter what you do many, many people will still find it necessary to commute by car due to time, lack of convenience of transit availability, lack of parking at the transit lots, and the necessity of having a car available for work related requirements. You can only carry so much with you on transit, so transit is not convenient for running errands, shopping, etc. We still need highways to move people as it will be many, many years before we will give up our cars. Your tax proposals as usual will put the burden on the middle and low income people, and when all is said and done, we will still have to pay to use the transit, and at what cost. We are already being taxed to death in King County, and especially in Seattle, how much more can we us middle and low class citizens afford. Every utility bill, property tax bill and auto license already are accessing us for TRANSIT. TRANSIT is not the only agency requesting us to commit more tax dollars. How much can we all afford? The powers that be really need to look more at these lofty plans before coming to the people to ask us for more. Of course, it is the voters with nothing that will support your lofty goals, as it costs them nothing in taxes - it just costs the rest of us to support them. Sorry, but you need to consider the needs of all of us that live outside the major city limits. We are tired of paying for the needs and wants of those that choose to live in the major cities. Oh, and have you considered the cost to retirees, and soon to be baby-boomer retirees who live or will live soon on fixed incomes, and in most cases will not even be around or capable of making use of these transit projects when completed.</p>
EAST KING COUNTY	<p>East to west access in Seattle/Eastside is very important. Strongly support the future investment study (and later development) for the yellow dotted line on the map indicating a route between Ballard and Kirkland/Bellevue areas using 520.</p> <p>Any way to show early wins from this investment will help with additional asks in the future - delivering on BRT and light rail stations asap will show people tangible benefits.</p>
EAST KING COUNTY	<p>It would cost me much more than \$200 and I would not live to see the benefit</p> <p>Takes way to long, and Eastside is late in the process</p>
EAST KING COUNTY	<p>I think that your \$17 a month is way off, according to other figures. Light rail doesn't help me at all, I can't use it for my job and shouldn't have to pay so that others can ride it. If they want to ride it let them pay for it. This plan will be late, over budget and a failure just like the NEW 405 mess, the tunnel project and most everything else that has been proposed lately. Widen the freeways and get rid of the metered ramps!!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Just please, please, get something done. I am embarrassed every time I travel to another medium/largish city with decent public transit and think what a mess it is to try to get anywhere, especially from the suburbs. Something has to be done or the quality of life here will continue to deteriorate with traffic. Don't get discouraged! Keep at it! Thanks for the opportunity for input.
EAST KING COUNTY	Concerned that the cost per passenger mile for light rail is incredibly expensive and capacity is incredibly low. Overall the entire plan seems to be inefficient and costly. Would support more bike friendly options and enhanced bus service.
EAST KING COUNTY	Too expensive, forced taxes on people who don't want it or use it. Taxation without representation. If this were such a great idea and supported, this would be privatized.
EAST KING COUNTY	Any kind of mass transit that can help reduce traffic is welcomed. LONG OVERDUE!
EAST KING COUNTY	The worst thing about using public transit in our region is trying to make connections from north/south routes to east/west routes. This plan looks like all north/south, all the time. You've clearly decided to punish all of Bellevue for Kemper Freeman's resistance to transit, so 520 gets nothing. Sounder has been so unreliable due to landslides that it's next to worthless for daily commuting. Light rail from the airport to downtown, then switch to the bus to get to Bellevue takes 3-4 times the amount of time it takes to drive, including taking the shuttle to an outlying parking lot to get your car. Your reliance on property tax to pay for the project means that the folks who are least served by the proximity and availability of transit pay the most. You shrank the available parking at Evergreen Point P&R and made the Yarrow Point/Clyde Hill stop a smooch and ride instead of a park and ride. As it is, using transit to get from Bellevue to my job at the UW takes twice as long as if I drove my SOV. I do it anyway because it's the right thing to do and because it saves me ~\$3000/ year in parking, bridge tolls, and gas, but I still have to drive to the P&R to catch the bus.
EAST KING COUNTY	i LIVE IN THE NORTH AREA. IF YOU WERE TO BUILD A TRAIN LIGHT OR HEVY FROM MY HOUSE TO WHERE I LIKE TO GO WITH YOUR MONEY AND I RIDE FOR SUBSEDIZED RATES I WILL SUPPORT. TO DAT YOU ARE BUILDING IT SOMEWHERE ELS AND I DO NOT PARTICIPAT IN IT. YOU DO NOT HAVE FIRM DATES OR A FIRM BUDGET. IF WE APPROVE THIS MONSTROSITY YOU WI9LL OF COURSE NOT MEET YOUR DEAD LINES OR BUDGET. YOUR PAST IS SELF EXPLANITORY.
EAST KING COUNTY	These projects need to include East to West Seattle including everything from Redmond / Sammamish to West Seattle proper, and while North and South traffic is often addressed, we have conjection on the primary arteries and side roads on this side of the lake, too.
EAST KING COUNTY	Property taxes are already hurting seniors. I will oppose ANY significant increase in property taxes.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Sound Transit needs to demonstrate better accountability for tax dollars and better project management before it needs another dollar of taxpayer money. Seriously, continuous transportation projects create traffic nightmares, and completed projects don't seem to deliver the promised benefits. Transportation costs, either through direct expense, taxes or operating subsidies, keep going up while transportation continues to be a worsening problem. Let's see a master plan rather than a series of one-off and mostly disconnected projects.
EAST KING COUNTY	Why would the majority of revenue not come from fuel taxes? Secondarily sales and use taxes. Putting the burden on property taxes simply does not make sense.
EAST KING COUNTY	put rail on the Cross Kirkland Corridor. That is it's original use and what it should be used for now. We don't need to add to the mess that I-405 is already.
EAST KING COUNTY	A now-retired vendor who tried to do business with Sound Transit, ST did not demonstrate the internal controls or a decision making process to allow ST to efficiently use tax monies approved by voters. Cloaked behind an appearance of fairness, I found ST to be an "old boys club" that constantly talked about it's fairness, but ultimately always returned to do business with the "old boys". I make these comments not because I am bitter having not received ST work (it didn't affect our bottom line 1 way or another), but solely based on my personal observations. I doubt the culture of ST has changed.
EAST KING COUNTY	Where is the support for putting in these various short and longer light rail lines? I'm not for giving you the right to tax us without some control over how well the money is spent.
EAST KING COUNTY	Asking for billions of dollars for light rail is premature when Metro buses are standing-room only, no longer serve my minor arterial on the Eastside, and have unexplained hourlong gaps in the evening leaving downtown. MORE BUS SERVICE NOW! Also, I will vote against these REGRESSIVE sales tax and property tax increases until we have an INCOME TAX.
EAST KING COUNTY	I have seen no information about changes to the Sound Transit District. Will the taxing district be expanded?
EAST KING COUNTY	I would support even higher taxes to get this done more quickly. Additionally, ST3 should focus more on light rail/commuter rail and less on BRT. The proposed light rail should include tracks to Kirkland from Bellevue/Overlake to help alleviate the nightmare that is 405 at rushhour. In general, light rail will always be a better option than buses, and it'd be easier to support massive expenditures on developing the infrastructure for more light rail, because it ultimately yields a more reliable option.
EAST KING COUNTY	The basic plan is good. The problem is it's time line. 25 years is way to long. The time line should be around 15 years maximum.
EAST KING COUNTY	My neighbors and I are very disappointed that Kirkland isn't part of the light rail plan. It makes perfect sense to have it come this direction rather than veer off to Redmond first.
EAST KING COUNTY	Expand Bus service - not rail
EAST KING COUNTY	Traffic here is absolutely crazy. I feel trapped in my house

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	I live on the Eastside. I have lived in Seattle and Issaquah for 50 years. For years now I have paid taxes to support light rail, but I have only used it twice. Others in Seattle and the west side have been using it for years, but only paying the same as me. Now I am asked to pay another \$5K (\$200/year for 25 years) to watch others get big benefits while I get next to nothing. When the taxes finally stop (if they ever do), then I'll have had 25 years less benefit than someone on the west side so has been able to use these services for the entire time they were paying. The taxes are the same everywhere, so why are the benefits being rolled out over such a long time by area. If MS wants light rail why don't they pay for it? Why no BRT to Issaquah in the first phase? Tacoma has Sounder transit to Seattle now and will get Light Rail to Seattle (two rail solutions) before Issaquah gets anything. It seems crazy to ask people on the Eastside to continue to pay for services that are only really helping those on the west side. I'd love to take advantage of light rail on the west at times, but it is too much work given the lack of transit to Issaquah.
EAST KING COUNTY	Stations should have adequate parking for commuters. The Redmond Transit Center is too small and poorly designed with cars having to u turn/back up if lot is full.
EAST KING COUNTY	I have NEVER used Sound Transit...train or bus. Let those who use mass transit pay for it. I'm retired, living on Social Security, and my wife and I should be exempt on paying higher taxes on our home to subsidize others who are earning more than we get from Social Security, and have more money than we do. This is a common sense issue. However, Government, be it Local, County, State, or Federal only want to gouge us tax-payers and yet have NO accountability. The Tunnel downtown is Exhibit A for Government waste with no accountability...WAY OVER BUDGET...WAY BEHIND SCHEDULE. TRUE OR FALSE?
EAST KING COUNTY	To solve traffic issues mass transit options must be easy and convenient. A combination of buses and light rail is required.
EAST KING COUNTY	Renton contributes 40 million a year and all we get is BRT? And in 8 years!!! Come up with a better plan that can be implemented sooner.
EAST KING COUNTY	I have no faith that this plan will ever work or if so supported would ever be on budget. This would be a monument to a very few and never be paid for by the people using it (which it should) and would be so highly subsidized as is our ferries, bus, trains and go lanes . No faith at all in our current GOD FATHERS !
EAST KING COUNTY	PLEASE PLEASE PLEASE make these surveys easier to complete. You can write city and service names as many times as you want, but I've still been at work all day, I'm TIRED, and my reading comprehension isn't great. I want to share my opinion. I don't want to squint at my screen trying to make walls of text make sense. For a specific example: At the end of the day I can barely remember to eat dinner much less keep 20 options in my head at once. Accurately evaluating them and picking 2 is very difficult. Please invest in some user-experience experts to redesign your surveys.
EAST KING COUNTY	This survey is slanted / bias. Questions are based on the premised that I have support for the plan. I DO NOT SUPPORT THE TRANSIT GROWTH PLAN.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	De-emphasize dedicated rail for rapid transit. Instead, increase bus service and decrease it's cost to passengers. More people would ride busses if the cost were less. Plus, busses provide greater coverage for more people. Rail only benefits people who can afford to live close to a station.
EAST KING COUNTY	The connection between Kenmore P&R to South Lake Union is extremely poor. There are only 4 buses in the morning and 4 in the evening. Kenmore P&R needs to be expanded as it is impossible to park there after 7:30 to 8am.
EAST KING COUNTY	Please consider bringing light rail to the eastside sooner than 25years. It is extremely frustrating that with how much growth Issaquah and Sammamish have seen in the last 3 years that we are never considered as important as Redmond and Bellevue to get added service when the buses are incredibly full during rush hour and not as many buses as available like the 550. Why do I have to wait until my retirement to get light rail from Issaquah to Seattle?? Seriously frustrating.
EAST KING COUNTY	Why have you left Renton completely out of the mix. Sick of paying taxes and having absolutely no benefit. Tell me how any light rail is going to benefit me. No parking and would have to take 2 buses to stations.
EAST KING COUNTY	Thank you for asking our opinions. You have my full support for ST3.
EAST KING COUNTY	Accelerate the timeline for completing the Everett portion of the light rail plan.
EAST KING COUNTY	If you guys don't get this going ASAP stop all the building. I am all for growth but you have to find a way to get the traffic moving before you keep adding more people. It is out of control!
EAST KING COUNTY	<ol style="list-style-type: none"> <li>1. the existing service to Sea-Tac is terrible - try fixing that first - make it direct from Seattle to airport and faster than taking a car. I've taken it several times and ABSOLUTELY NO ONE HAS EVER GOTTEN ON/OFF on the Rainier Valley stations - why do you add 30 minutes of commuting for somewhere no one goes?</li> <li>2. the signage at the airport is confusing and terrible and I speak English - it shows no respect for tourists or immigrants - especially the buying tickets on 2nd floor to go to 3rd floor - move your pay stations</li> <li>3. the long, wet, ugly walk from airport to train station is shameful - and too long for most seniors - get moving sidewalk, paintings, heat</li> <li>4. Once you provide decent service for what you have, I would be interested in expansion - but not until</li> </ol>
EAST KING COUNTY	HOV lane extended to Issaquah Highlands Exit 18 on I-90
EAST KING COUNTY	I don't think this project has been fully thought through by all interested parties. For example I have seen no information as to how the users of this system are paying for it.
EAST KING COUNTY	Keep building parking garages large enough to handle thousands of cars. Many you now have are not large enough.
EAST KING COUNTY	I believe the numbers do not match the expense. The expense I also do not believe really know what it will be!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	The sales tax rate of .5% would increase the sales tax rate to 10.4% in Mill Creek, which is the highest sales tax rate in the nation. According to a 2008 article in the Seattle times, "Sound Transit's plan says the agency's board of directors would reduce the sales tax when Proposition 1 projects were paid off, but there is no legally binding date for the tax to end." However, rather than lowering taxes, those taxes continue and increase. I would like to see an analysis that compares the cost of light rail per mile vs other areas that are building light rail. I support the concept of light rail, but I think this is more expensive than comparable systems in other areas of the country.
EAST KING COUNTY	Stop TOD housing and get to moving people who already have moved to the outer parts of the various counties to afford to live. Get those people in from the edges of the counties to their working and shopping areas, don't continue to penalize them by taxing them to pay for others to live in new TOD housing. Leave the framework for TOD housing in place and only build those units after AFTER the transit systems have all been built and are operational.
EAST KING COUNTY	Let Microsoft, Expedia, Amazon and Google pay for this [explicit]. I'm not going to give it a [explicit] dime. Why don't you people get real [explicit] jobs instead of being nothing but a pack of leeches living off of people with real jobs. Everyone I know is voting no. [explicit] you all.
EAST KING COUNTY	A lot of us will not live to see the first or second phase yet we have to pay for it.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

<p>EAST KING COUNTY</p>	<p>I am a federal civil servant. I strongly support mass transit initiatives and expansion. I strongly oppose the ST3 plan and all projects because I live in Sammamish and commute to Renton; and in two years will have to commute from Sammamish to Des Moines due to reduced federal physical footprint initiatives (consolidating a number of federal buildings out of Renton to Des Moines). The light transit expansion from Issaquah to Bellevue was obviously designed for the tech industry and does not benefit me. I would have to travel west, then north, only to get south. Same with express bus service; ST3 does not work for my needs; as a result, I oppose the ST3 plan. As a result, I will continue to use privately owned vehicle; as painful as the 405 is.</p> <p>Has a study been done or can a study be funded to assess demand for light rail or express bus from Issaquah through Renton to Seatac. A southwest / northeast line that would serve populations, generally speaking, in these areas: Renton, Newcastle, Issaquah, Sammamish, Carnation, Fall City, Snoqualmie, North Bend, etc. You would forecast population growth out to the east and assess demand.</p> <p>There would be two (2) added light rail stations: Issaquah and Renton. I would have offered just one (1) new light rail station at Issaquah because you could run the line from Issaquah to Tukwila. But the Tukwila station and park and ride are over capacity and won't be able to accommodate growth. You could spill growth and demand from the Tukwila station, east to a Renton light rail station. Additionally, maybe this could provide a lot of relief on 405 from Tukwila through the Renton curve - a terrible congested area of 405.</p> <p>This new Northeast / Southwest line would serve eastern population areas for both personal and professional needs. SeaTac for personal and professional travel needs. For professional needs primarily Boeing but I don't know what other sectors such a line might support. It would help some federal government like me but this might be insignificant. In short, the study would assess, what are the commuting work demographics that clobber I-90 East / West (into the city) and I-90 East / West to I-405 South.</p> <p>To try and not be selfish, has anyone studied the work demographics commuting on N-405 in the morning (form Tukwila, Kent, Auburn???) and where does it go (Bellevue?). This traffic is opposite my traffic route but I feel so sorry for northbound 405 traffic in the morning and southbound in the afternoon. I would sacrifice all my suggestions just to implement a solution here. Maybe build a light rail bridge (elevated): Tukwila or Renton to Bellevue that extends over Lake Washington or follows 405 N /S.</p>
<p>EAST KING COUNTY</p>	<p>All I care about is adding light rail from Issaquah to the airport.</p>
<p>EAST KING COUNTY</p>	<p>Until you make the reduction of traffic congestion a priority, can handle the upkeep on current roads (potholes, painting, etc.), and make 405 lanes more useful without tolls, I honestly do not think you are in a position to request support on other projects.</p>
<p>EAST KING COUNTY</p>	<p>When describing the pricing as \$200/month, it's unclear if that means \$200/month while the project is being constructed, for \$200/month forevermore. I'd be more likely to support the project knowing that it costs less after the expansions have been completed.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Your plans have little to no consideration for disabled people .. or the elderly. There is NO way I can do all that walking .. or take a bus to get to a RT station. The consideration is for the young and healthy. As for your completion dates, I'll either be dead and gone by the time you get the first part done or on a severely limited income - so why should I give up that sort of increase in taxes??
EAST KING COUNTY	The continuously increasing tax burden from the cumulative total of many resources the government takes advantage of to tax are regressive to business and oppressive to individuals. We need state legislators and county and city leaders who are willing to slash the fat from current budgets, and work creatively to re-purpose revenue streams to enable, evolve, and grow various rapid and mass transit projects. Over 40% of my extremely high property taxes are supposed to have been voter approved. I personally know of no one who voted for programs which raised their taxes, and I know many people in industries from all over the Puget Sound, so it must be government, education, and social services who are voting to approve their own self serving programs.
EAST KING COUNTY	Stop syphoning our tax base and pay your own way. Sound Transit should exclusively fund itself.
EAST KING COUNTY	Like most surveys, you construct it in such a way to support whatever you had wanted to do anyway. 1. What does it mean to ask people in Redmond if they support service to Ballard. It becomes a popularity contest. Of course Ballard will vote for Ballard and Redmond for Redmond. 2. Questions like 12. & 13. have something to like and something to hate for everyone so how do you use results - garbage. 3. Biggest issue is coming clean on cost/benefit. \$200 per person per year is \$400 per couple per year. If you assume 25 years to complete and likelihood of some inflation (3%), this is over \$14,000 outlay for program that will be done after many of us after we will be gone. So question becomes what benefit will 70 year old Eastside resident get for the \$14,000 we would shell out?
EAST KING COUNTY	Either more parking for those of us that use transit or additional neighborhood buses that will get us to the bus stations. The frequency of #550 from Bellevue to Seattle is greatly appreciated.
EAST KING COUNTY	Seattle to the eastside is a must!
EAST KING COUNTY	I think if this is something we should have done 20 years ago. We do not have money and the tax payers cannot afford anymore taxes! The government needs to start living within their means.
EAST KING COUNTY	Issaquah should not be last in line. The I-90 corridor is important yet is always last on the list. It should be moved up in time

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Thank you for sending me a notice about this survey in the mail; I just can't figure out why you sent it to me. Maybe it was a mistake. You see, I'm a white male and from the pictures of people on the flyer, you only want the opinion of people of color. Let's see: We have a black ,male in a suit and tie, an Asian woman with her Asian child and on the flip side you have a brown skinned woman with a completed survey. Under the rules of the "new racism" you score 100%! Congratulations! I don't see myself represented at all. So, I guess I was right. You don't want my input at all, do you? In fact you probably just want all white males to disappear - just like on your flyer.
EAST KING COUNTY	I strongly support light rail and subway type transit instead of investment in buses. Every other major city that I like has superlative train or subway service, and Seattle lags behind for reasons that elude me. I feel that over time, Seattle should have a system comparable to New York, London or Paris, that makes cars less important to the average person. This is a big picture opinion, not an opinion about specific projects.
EAST KING COUNTY	Your plan shows nothing about light rail coming through Renton. Our section of I-405 through Renton has been designated as the most congested section of freeway in our state. Why does Renton always get excluded from a mass transit plan and you still want us to pay for it?!? A rapid ride bus service won't work unless you're going to build a separate road for the bus to travel on that can go as fast as light rail!
EAST KING COUNTY	Please don't discontiue service into Lake City. I transfer there to my job. Cutting service would mean a 20 block walk at 6 in the morning!
EAST KING COUNTY	Exactly how much higher do you think property taxes should be. There has to other ways to pay for projects that the average person can not expect relief until 20-30 years hence
EAST KING COUNTY	please don't raise our property taxes any more! fund this from bonds that get paid back through fares collected by riders of the new transit system.
EAST KING COUNTY	I know that this will not matter one single iota, but I must say it anyway. These, and all previous, Sound Transit projects are a complete waste of taxpayers money! Sound Transit is a corrupt organization in my opinion and any construction activity is politically motivated. The original light rail project was and is such a waste of money that further extension or continuation of it exemplifies that corruption and political motivation. This goes along with the STP. The viaduct should have been fixed and monorail systems should have been put in place rather than creating (what has already been) a disastrous tunnel and light rail (vastly cheaper and lower overall impact)! Projects such as these that, to people whom you haven't fooled, are clearly for profit, NOT for the public's benefit!!!
EAST KING COUNTY	Please lets stop talking about it and just do this, this is been a painfully slow progress. Portland did a much better job of getting light rail going.
EAST KING COUNTY	We are relatively new to the greater Seattle area and are constantly amazed at how area has expanded with housing developments everywhere but very little having been done on local roads to accommodate increased traffic load. It appears developments just happened in a very hap-hazard fashion with no local planning or consideration on the traffic impact. From what we understand there is no assessment associated with new developments to help funds the associated increased traffic congestion. This has been a common practice in some communities for years.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Much of the cost has been given to tax payers who seldom use or even have access to most of the light rail. Why should those same tax payers have an additional tax to pay for still more light rail that will not really benefit them. There needs to be another way to pay for this, it is not fair to make those tax payers who cannot benefit from the light rail responsible for its cost.
EAST KING COUNTY	I have lived here 25 years, and I have yet to see anything that seems to come in on schedule and on budget. I find that leadership pretty much does what it wants and doesn't really consider the consequences or the cost. I have also watched projects that never were explained until they were irreversible, like the Mercer Mess- prettier, but no increase in capacity. Light rail across I-90, So far only decreasing capacity. Also, no re-guard for the wetland or the trees, that were supposedly protected by ordinance. Downtown parking- also decreased capacity. Big Bertha- need I say more. I don't trust the process or the financial accountability.
EAST KING COUNTY	Your number don't add up. If it cost \$48,000,000,000 divided by residents in the benefit district of 3,000,000.00 equals \$592.60 per year for every man, woman and child in the benefit district. This is only for the project links and does not include the annual operating subsidies. As of 2015 you are only recouping 6.285% from the fare box The remaining 93.715% comes from federal grant or taxpayer subsidies. The economics don't work for the the tax paying public.
EAST KING COUNTY	Explore other funding options than generic sales and property tax increases, such as adding a fee to license tab renewals or adding an extra tax to new car purchases.
EAST KING COUNTY	There's plenty of economic viability in Seattle to support improved transit infrastructure. Traffic is one of the greatest problems this area faces - the sooner we acknowledge this and invest, the sooner we begin to solve the problem. The ST3 plan described above takes place over 8-22 years. That's disappointingly long. Look around: there's plenty of money building high rises all around us. So there's plenty of money here. Transit infrastructure shouldn't be lagging 10-20 years behind this growth. It should be in pace (or ahead) of it.
EAST KING COUNTY	It is CRITICAL that you provide quick & easy mass transit options from downtown Seattle to SLU, otherwise, all the other investments in rapid transit to downtown will not be useful to the people commuting to the companies that are growing the fastest. Try to figure out ways to implement this plan faster, since we are incredibly behind on needed investments, and make sure you are thinking about the ultimate convenience of the rider. My previous experiences with Sound Transit have been terrible (slow, dirty, unreliable, many stops) compared to riding Community Transit. Make sure you are ultimately providing a service that is significantly superior to cars, because you are asking commuters to give up independence & convenience to ride the light rail/bus system.
EAST KING COUNTY	with all the gas taxes I already pay, 520 bridge tolls, 405 and 167 road tolls I pay, it's going to cost me another \$200 a year? I see road projects near my house take much longer than planned and going over budget, we need better leadership and accountability for our money.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Both the stations and the transport vehicles should be accessible to people with disabilities; beyond mobility, clear communication access should be implemented including both induction hearing loops and captions. One must be able to see the captions for them to be effective and people must be able to know how to access and be able to benefit from hearing assistive technology. There is no 1 solution; an integrated approach must be taken. Additional supports include ADA signage, maps of stations, highly visible station signage and way finding information. We are facing a huge demographic shift. We need to be designing with accessibility in mind as it benefits everyone. Workers will be in the work force longer and need to be able to commute easily and independently. Design for the population of people with disabilities vs the singling out a few. Consider multiple people will be accessing the ramps at the same time, that many people will be on the transport vehicle, platform or station at the same time.
EAST KING COUNTY	I-405 must be given priorities....it is impossible now and i really don't see a resolution here.
EAST KING COUNTY	Two words. Light Rail, Light Rail, Light Rail, Light Rail. You are so far behind the curve in this regard and I feel an aggressive and comprehensive plan needs to be made to address it.
EAST KING COUNTY	Fixed rail is an antiquated inflexible technology. Using rapid buses/vans accomplishes the stated goals better and cheaper.
EAST KING COUNTY	I am retired & on limited income - I CANNOT AFFORD ANY MORE TAXES ON MY HOUSE!
EAST KING COUNTY	Since I live on the Eastside, none of these projects mean much to me. I would be much more interested in light rail that will take me from either Redmond or Issaquah (Eastgate) directly to the sports stadiums. Other than that, I avoid Seattle completely due to traffic congestion and parking frustrations.
EAST KING COUNTY	Connect Redmond to the light rail line faster
EAST KING COUNTY	We NEED BRT on the Cross Kirkland Corridor!
EAST KING COUNTY	It would have been helpful if the survey included a concise rationale for the various projects. I don't believe that the average resident/transit-user has sufficient background information to make an overall, informed judgment about the comparative urgency of these projects.
EAST KING COUNTY	We need light rail across lake Washington thank you for getting it done as soon as possible.
EAST KING COUNTY	More ORCA stations!! There should be at least one at every park and ride. Difficult to refill your card with so few machines available. SIMPLIFY the system overall. Your online public transportation search SUCKS. It is way too slow and often says routes don't exist when they do. Look at Hopstop. Overall, make it easier and friendlier to use. You need to push on this. Seattle is way behind other major cities when it comes to public transportation. And traffic here continues to get worse every year-- 8-15 years is way too long to implement this system. New York City's public transportation is stellar compared to Seattle.
EAST KING COUNTY	Bring light rail to the east side!
EAST KING COUNTY	Additional parking needs to be addressed NOW. The bicycle issue is nonsense - this is not a bicycle friendly city as much as Clown Town wants you to believe.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	There is no way to improve 405 traffic and bothell is totally left out only option left is to pay daily \$20 toll to use it. Its not a fair plan for Bothell/Mill Creek paying extra on top of 405 tolls.
EAST KING COUNTY	Western Washington roads need far more improvement than Mass Transit currently. The transfer of funds from road/infrastructure category to Mass Transit has severely affected the usability of the current arterial road framework within the state.
EAST KING COUNTY	Quit wasting money on the horribly inefficient soundtransit boondogle and silly bike provisions. Instead, build roads to accomodate the growing number of cars.
EAST KING COUNTY	We just moved here, but I have been around public transportation for most of my life (NY, Boston, European cities). I also lived in Denver area for the last 15 years. We built a successful light rail system. We loved it!  I would visit definitely visit more places and go to downtown Seattle more often if we had more public transport. Traffic hinders us from doing a lot here.
EAST KING COUNTY	\$50 billion? You're out of your minds. And the tax to pay for this boondoggle <u>never</u> expire? This is criminal.
EAST KING COUNTY	Any transit plan should focus on encouraging drivers commuting to big employment centers such as Boeing Field, Microsoft Redmond campus to give up driving and instead take the light rail.
EAST KING COUNTY	I would like to see more Park and Ride lots and/or more parking at the existing lots. Currently, they are usually over capacity at peak times and fill up way too early.
EAST KING COUNTY	I prefer local buses to nearby transit stations, and bus connections from there to outlying areas (we already have that and it works well for me). Why have a commuter train when I have to take a bus to get to it. I've never had the need to take a commuter train.
EAST KING COUNTY	I'm a big advocate of transit so I want to see ST3 pass, although I would say I'm only somewhat supportive at this point because the cost seems high, especially considering the long (25 year??) timelines for some of the projects. So my suggestions to gain support are: 1) try to decrease project timelines 2) use marketing to show that we had a chance to build this infrastructure in the 60's and like us now, we have to consider the benefit vs. the cost. If we don't bite the bullet now...when will it happen? Would we not jump at the chance to go back to the 60's and re-vote? 3) give us a timeline of when these taxes would end. I feel like you're adding at least \$400 per year to my taxes but I have no feeling those taxes will ever end. They must, right?  Another reason I'm only somewhat supportive is that I live in Issaquah so at \$400 per year * 25 years = \$10,000 before I see any direct benefits? I'll also be 71 years of age before that project is delivered.
EAST KING COUNTY	Widen the highways to allow for more passenger vehicles and limit the ST3 to 1/4 the cost proposed.
EAST KING COUNTY	BRT is a stopgap, Light Rail is the solution. No BRT investment should ever cause Light Rail projects to be deprioritized or cut.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	All parts of this comprehensive plan are extremely important for the continued growth of our state. I have a bias based off of my location but I feel the areas of Issaquah, Issaquah Highlands, Sammamish, Downtown Bellevue, Eastgate and Downtown Redmond will benefit massively from opportunities to use modernized light rail. The rate of growth in the areas seems to rise every year. I will continue to spread the word about this plan amongst family and friends.
EAST KING COUNTY	The Seattle area is distinct and different from areas like SF, NY, Boston, Chicago. Light rail should NOT be added - it takes up space that should be used for car traffic to reduce congestion. The only benefit of buses & rail are for people who work in downtown Seattle. All of the proposed projects in ST3 will not significantly increase ridership and decrease freeway traffic. Freeway traffic MUST be addressed by adding additional non-toll lanes!
EAST KING COUNTY	Nothing should be done unless you figure out how people can park closer to these stations. Right now I cannot take transit as the lots fill up by 7:15. I cannot be to a lot by 7:15. You would have a lot more riders if you made more parking spaces and/or garages.  People want to take transit and cannot!
EAST KING COUNTY	Please consider bring light rail to the Eastside sooner than 25 years. That is very disheartening. There are many folks who commute from Sammamish/Issaquah to Seattle and it takes more than an hour and 45 minutes to get back home at night. I dream of light rail getting me home in an hour like it takes me for my morning commute. Trust me, if it was affordable, I would be in the city. I realize the politics of the folks with money in Bellevue/Kirkland are making it very difficult but I am from NYC and I miss light rail because I know how good it can be!! Please bring light rail to the Eastside sooner!! There has been a great deal of growth south of Bellevue and the buses are very crowded. Light rail would help this congestion and bring more work-life balance instead of spending 2+ hours commuting. Mucho thanks for letting me voice my frustration for all the people who has no money/no say.
EAST KING COUNTY	You should indicate where the light rail or rapid bus lines replace/preempt abandoned rail lines that currently or in the future will serve as pedestrian/bike trails (e.g. Kirkland Connector). What is going to happen with the Bellevue - Renton railroad? Why no light rail on the existing rail bed from Bellevue to Renton?
EAST KING COUNTY	I live in King County. Why should I be taxed to benefit Snohomish and Pierce County commuters ?
EAST KING COUNTY	Renton should be added to the light rail plan. Yes there is "rapid" transit but here is no true rapid transit unless the buses get their own lanes. If there is a plan for rapid transit to include its own bus lane between Bellevue and Renton then it will work. "Rapid" transit gets stuck in the same traffic as everyone else so unless it has its own lane, it's fake rapid transit.
EAST KING COUNTY	No resolution on getting to transit centers/link rail via bus routes, such as several cancelled in Sept 2014, such as route 250.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	The need for more lanes for cars is a greater need then forcing people out of their cars into mass transit. Not everyone's life and careers mesh with mass transit. It hasn't worked on 405 with the paid commuter lanes. The state is wasting taxpayer money on paying for the few to ride buses from the eastside to Seattle.
EAST KING COUNTY	Why add more, when what's there isn't even being used? In Bellevue, Sound Transit isn't adding helpful infrastructure, it's messing up our city.
EAST KING COUNTY	To be honest, i am not likely to support anything that doesn't include light rail from the Eastside to Seattle. To not even address this is short-sighted, irresponsible, and foolish. Don't believe me? Take a drive in traffic sometime. This should have been done prior to building the new 520 bridge.
EAST KING COUNTY	Bring light rail to Issaquah
EAST KING COUNTY	My family and friends use sound transit daily. I strongly oppose increase in property tax, sales tax, and the unending taxes. NO! NO! NO!
EAST KING COUNTY	Seattle is way behind the progress of cities such as Atlanta, San Francisco, San Diego and Singapore. The city of Naha Japan has been building an elevated rail for only about ten or so years and is likely far ahead of the late coming efforts of the King county transit system. I have first hand knowledge of these systems and can attest to their efficacy and utility. The automobile is an American aberration and any progressive municipality is striving to make them obsolete.
EAST KING COUNTY	There needs to be more parking in the Tukwila station for the Sounder train. The parking fills up by 7:30am. It needs more parking so more people can use the sounder train at a later time in the day. Basically more parking at all station (sounder, park and ride and light rail)
EAST KING COUNTY	Get it done, or this will become a less desirable place to live for everyone. We want to be on the forefront of urban management, not the laughing stock.
EAST KING COUNTY	None of the proposals are something that I could ever use to get to where I work or shop. I am simply being asked to subsidize someone else's transportation.
EAST KING COUNTY	It's vital to have proper bicycle paths for safety near all stations and major roads. I hope this is included in the final project plan.
EAST KING COUNTY	You will be driving senior citizens from their houses. You should exempt anyone over the age of 65 from having this cost added to their property taxes. Chances are considering how efficient you people are that we will never get to use it. There will be cost overruns, delays, and mismanagement on every project. Look at your track record. You people are not to be trusted. I don't see any taxes on bikes--let them pay instead of being freeloaders.
EAST KING COUNTY	The Eastside is growing like crazy - new neighborhoods are popping up in our area like mushrooms! I think it would be important to connect the Bellevue station with Seattle as soon as possible to help reducing car use to commute into the city. My husband used to commute by bus, but gave up because he got so frustrated with busses running late and being overcrowded at his station.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Multiple alternative plans should be provided which removes less popular portions of the plan in order to deliver the more popular portions sooner. Then survey the support for these alternate plans in order to determine which plan to put on the ballot.
EAST KING COUNTY	Please make a light rail from Lynnwood to Seattle ... Sooooo many commuters live in Lynnwood and commute to Seattle , Lynnwood needs a light rail very bad.. I would STRONGLY support this... Thank you !!!
EAST KING COUNTY	Unfortunately, I live just outside the proposed expansion area. I would have no way to get to any place on the plan unless bus service to the expansion area is improved. Steep hills and unsafe roads rule out biking to the expansion area as does time of day (too dark) or bad weather. Since I live outside the expansion area (and work outside the expansion area) I would not be very happy having to pay an extra 200 a year. Though I support the project, it's going to take too long, I doubt bus service to the expansion area will improve, and I don't understand why it is so expensive.
EAST KING COUNTY	We are strongly opposed to any plan to put bus or light rail on the Kirkland Trail. The Kirkland City Council has Been ignoring the largest majority of Kirkland citizens in our intention to maintain the Kirkland Trail as a recreation Trail without any bus or light rail service. The 20 million dollars that Sound Transit has offered for an "Evironmental Study" To the city of Kirkland should be withheld and used for other ST3 projects.
EAST KING COUNTY	I'm more supportive of busses than light rail. Buses are cheaper and more flexible than rail.
EAST KING COUNTY	I think the most important part is light rail that links the eastside with downtown Seattle.
EAST KING COUNTY	Not a single thing being proposed will help traffic where I live or provide any additional transit opportunities beyond the few that are useless today. By the time anything gets to Redmond, my kids will have kids and I'll probably be dead. not much use then. All this is much too little and will be way too late to help anything. I've lived here for almost 20 years, and in that time, almost nothing has been done to alleviate congestion. You should be ashamed. Putting your head in the sand not a good option. Oh, yeah, and you want to impose taxes on the same people that you've slapped huge fees on to use bridges and freeways to as a fund raiser. something in all of this really stinks. seems to be over indexed on a small minority.
EAST KING COUNTY	Add a light rail to renton
EAST KING COUNTY	I have a problem with funding. It sounds like only homeowners would be paying. Many non homeowners would be utilizing the services. Do not base monies on owned homes but residents of the state instead to include renters, store owners, manufacturers etc. All those who benefit from a work force should pay a share of this funding as it is for their benefit as well.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>The major issue I have with any rail option is it fundamentally inflexible. If there is a cause for the train to stop (eg - accident, breakdown) there is no alternative route in where a wheeled vehicle can reroute to a different ROAD. If traffic patterns change because a business moves or is created that draws commuters to a different area that the rail does not go, then you have empty trains and no easy way to reroute vehicles on rail where as vehicles with wheels (eg - buses, cars) can quickly and easily use existing roads.</p> <p>By restricting general purpose lanes you are constricting traffic flow causing jams. By implimenting tolls you are restricting use. A prime example is when you tolled 405 you "forced" traffic to I-90 adding 20mins to my commute !</p> <p>I also have a fundemental problem with you creating lanes for buses (eg - 2nd and 4th AVE in downtown Seattle) and the buses weave in and out into the general purpose lanes causing backups and lack of flow. Either confine the buses to their lanes or open them up to general purpose. Or fix the problem that causes them not to stay in their lane. The problem is general traffic stuck in their lane attempting to turn right while pedestrians are crossing - the fix is to either have all-walks that then allow the right-turner to freely turn when it is green or give them a free right with a green-arrow. Plus the buses have all of 3rd AVE to themselves. Why do you not just move all buses to 3rd AVE from 2nd / 4th ???</p> <p>Actually looking at the causes of our traffic problems will go much further than just building rail or tolling or variable speed limits on freeways because it costs a ton of tax payers dollars and sounds cool, but doesn't solve any of the true causes !</p>
EAST KING COUNTY	<p>Make it happen sooner than later so that once people have the good experience of using light rail and bus transit they will support future development. It is vital important for the future. Short sight in the past resulted in today's mess. Don't repeat the same mistake.</p>
EAST KING COUNTY	<p>I think the focus should be years ahead of where we are now, instead of just trying to play catch up. At the rate Seattle is growing we need to think years ahead of these plans. To me light rail is the smartest investment in that as it will continue to allow our area to expand without causing commute issues.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>What a terribly designed survey! Many of the questions require a single response for very different transport systems, and seem designed to force either support of light rail or rejection of all mass transit solutions, so that those who oppose light rail but support other more sensible transit solutions have no voice. It seems designed to force responses that can then be used to claim much more support for light rail than is really the case. Light rail? Hmm...lets see. Do we want a 19th century rigid transportation system that is literally set in concrete and steel on only one very narrow route, that requires the population to adjust to it rather than adjusting to the population, and is astoundingly, astronomically expensive to build? Or do we want a road and highway system that can better accommodate flexible transport (i.e. buses) that can adjust to population trends and needs, is quicker to implement at a tiny fraction of the cost per rider, and that will accommodate the real future of mass transit, which is individualized smart/self driving vehicles that can be used by all citizens, not just fit, young adults transporting only themselves? There is really no question on which way to go - for what has been poured into a light rail system that actually costs hundreds of dollars for each rider per trip (if the data was presented honestly), a completely free bus system could have been provided that really serves the public. But that would not satisfy the "edifice complex" of the transit planners, and would not make us "just like London, New York and Paris" (whose systems were built before modern bus transit was possible.) But I waste my breath...</p>
EAST KING COUNTY	<p>Local corporations should pay for the bulk of the ST3 cost. They benefit the most by having quality, fast transit. Citizens should pay at the most \$50 a year. Microsoft, Boeing, Amazon, etc, should pay the rest.</p>
EAST KING COUNTY	<p>it makes more sense to invest in buses since they can be moved to where there is demand. Using fixed rail is too expensive and takes too long. Further, taxpayers end up subsidizing it FOREVER. if memory serves, there are only 2 or 3 rail systems in the WORLD that show positive cash flow. Try charging fares that recoup the cost of service!</p>
EAST KING COUNTY	<p>Multiple bids should be assessed and looking for opportunities to decrease the time of construction.</p>
EAST KING COUNTY	<p>The vast number of different systems in place now, IE Metro Transit, Community, Everett, Sound all operating and eating taxpayer money and with appears to be overlapping services I question this along with the missteps in planning that took property for the West side rail extension then sold that property. I have paid RTA taxes and road use taxes on vehicle registration along with gas taxes and had nothing to show for it for years. I live in South Snohomish County and the available transit schedules have NEVER fit my needs.</p>
EAST KING COUNTY	<p>Focus on proper light rail / subway. Buses are a band aid.</p>
EAST KING COUNTY	<p>Keep buses and rails off the trail. The trail should be used for bikes and pedestrians only. link this with the Burke Gilman and you can have an amazing network. Incentive bicycling to work.</p>
EAST KING COUNTY	<p>There does not appear to be any parking access to light rail stations in Bellevue. If this is the case, you have just eliminated good access to the light rail system of one of the largest cities in the state. If this is the case, it is very disappointing. Good parking in many locations is essential to support use of light rail.</p>
EAST KING COUNTY	<p>My only concern is that while many in our area can afford the \$200/year taxes, there are many who are living at or below the poverty line. My hope is that those folks would be excluded from the additional taxation</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	I strongly support any transit especially lite rail/ Sounder. My daughter is blind and having to rely on the Access Shuttle because the bus or train routes don't go where she needs to go, which is exhausting. She lives in an adult family home in Bellevue and works in Seattle. all her doctors are at Virginia Mason in Seattle so it would be nice if she could have transportation that would allow her to use some of their satellite offices. I live in Spanaway in Pierce County and the Sounder has been wonderful for her to come home on the weekends. I have to drive her back up to Bellevue because there isn't a train on Saturday or Sunday's. It would be great if the train could run more than weekday rush hours. One of the reasons my daughter lives in Bellevue is because the transportation where I live south of Spanaway has only one choice-a car. I was especially excited to see on the plan that Orting may be a possibility. It is still far from me but we need a way for those commuting from this area to Seattle to get there without driving. I bought a Chevy Volt-electric car, because I have to drive back and forth to see my daughter in Bellevue. That helps with emissions but I am still another car on the road. thank you for listening.
EAST KING COUNTY	Look for other funding opportunities to reduce the tax burden per person, such as increasing the fare or selling access to bus lanes to certain, very limited, commercial vehicles.
EAST KING COUNTY	Do not feel that the dollars spent are being spent wisely. Cost per mile is too much. If you have to have light rail, run it down the existing freeways/ right of ways and run busses to the stations. More bang for the buck. Tired of paying for something that I don't use now, and probably will never use.
EAST KING COUNTY	I am old. I would never got to or return to a deserted bus stop. I would be comfortable departing from & returning to a well lighted rail station like they have in in San Fran, Sacramento, Dallas, etc. The Eastside needs to get on board.
EAST KING COUNTY	Main concern is the size of the overall project package. I also have never understood why we need light rail, commuter rail, and BRT all serving similar areas between Seattle and Tacoma. Why not pick one mode and do it well rather than piecemeal.
EAST KING COUNTY	PARK & RIDE LOTS SHOULD BE BUILT FIRTS ASAP. Especially along I-90. They are needed now, especially with South Bellevue P&R closing and Eastgate and Issaquah P&R ALREADY over capacity. Freeway flyover stops for busses/rail should be a must and the P&R lots should be designed with that being the main way transit will serve the P&Rs.
EAST KING COUNTY	Good, clear web site. Sounder, light rail, rapid transit, metro... they all use different lines but the same road? It can be confusing, so thanks for making it all clear. For example, 522 from Seattle to Bothell UW. Metro is expanding their lane now through Kenmore. Where would light rail go? Above ground? Add yet another lane next to it?
EAST KING COUNTY	On phase 1 Sound transit had to cut miles and doubled costs. The Brooking Institute rates Sound Transit as one of the top 10 most inefficient light rail providers in the nation. The north Sounder line reportedly costs \$98.00 for a \$3.00 fare. This organization has continually had a history of mismanagement, cost overruns, and total disrespect for the tax payers of Puget Sound region. I live on Tiger Mountain. I have no bus service and must travel the gridlocked Hobart Issaquah road anytime I need to go someplace. Traffic congestion improvement by road improvement should be the top priority for this region.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	I support any projects that enhance our way of life and make getting around our area easier and more timely. Ideally, I would like to see light rail used all around the sound, with buses taking people into neighborhoods from the stations. Why can't we use highway medians for light rail traffic with pedestrian bridges at stations. I've watched our traffic increase and roads get wider, without any benefit to commuters. Build it and they will use it!!
EAST KING COUNTY	Taxing vehicles / property. If you increase vehicle registration fees - this will cost more than estimate above. I have multiple vehicles - many for recreation / seldom used and this proposal does not benefit me
EAST KING COUNTY	Currently, Park N Rides (I can speak for Lynnwood and Mountlake Terrace) are overflowing , buses crowded, and getting worse. More parking at transit centers and at least for me would like 1 more 413/435 bus to leave from Mountlake Terrace at say 8:15 and 8:30. Would like a similar bus route to leave from Lynnwood that starts dropping off in the International District and heads north.
EAST KING COUNTY	Probably won't live to see it all.
EAST KING COUNTY	Too much money is spent on transportation, meanwhile our quality of life suffers. No money for education, mental health, etc. I strongly disagree with your estimates of cost. I believe the average taxpayer would be paying substantially more for this outrageously expensive and time consuming plan. I'd like to see your math.
EAST KING COUNTY	We are a few decades behind the times for non-car transit options. I am glad we have a region-wide plan.
EAST KING COUNTY	Emphasize light rail over buses. Take buses off the roads in favor of light rail. Defund buses and put the money to work building light rail systems.
EAST KING COUNTY	add Samammish City connections to light rail plan
EAST KING COUNTY	Buses don't belong on Kirkland cross corridor. Light rail maybe if they can still provide for walking trail and biking trail. Those have to stay.
EAST KING COUNTY	This is way to expensive for who it serves. many paying the most won't see the improvement or be able to use it in 25 years when it's done.
EAST KING COUNTY	The timeline is too long. I'll be dead in 25 years.
EAST KING COUNTY	Issaquah-Sammamish areas should be prioritized earlier in the plan
EAST KING COUNTY	We need these improvements sooner. North Eastside (Kirkland and up) needs light rail. Absence of East-West light rail leaves Ballard and West Seattle isolated for too long.
EAST KING COUNTY	No rapid transit, no rail, no buses on kirkland trail. Will oppose st3 if trail is impacted.
EAST KING COUNTY	I do not support any plan that raises property taxes.  I do not support rail infrastructure.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	while I support light rail in general as a long term solution, I think routes need to be located along and in major freeway corridors and then link from there with buses to neighborhood. I strongly disapprove of any transit along the CKC trail in Kirkland, or from Bellevue to the South Kirkland Park and Ride, ever. The cost vs. benefit is just not there. Remove the environmental study from the ST#, this is a waste of money. Any expenditures at this time exploring or designing routes along the CKC and Bellevue to Kirkland trail would be a reason I would vote AGAINST ST3
EAST KING COUNTY	Please find a way to make the project done by at least 2020
EAST KING COUNTY	Puget Sound is rich in business -- from biotech to high tech to aerospace. Should not these companies, who profit from the workers who commute along these routes, help pay for the plan? Boosting sales tax places too much burden on poor people. For example, Boeing received 8.7 billion in tax cuts to keep the 777 production here. But no one thought to tie that to job numbers? Boeing jobs bleed of Puget Sound to states with "right to work" laws. Businesses, like Boeing and Microsoft, should help fund infrastructure improvements like this. They are huge beneficiaries of improved transit.
EAST KING COUNTY	Talking about bus transportation....not enough people use the buses!! Takes a lot of money for a few. Figure something else that would work better. You have that capability. Get someone with VISION and ALL THIS COULD BE DONE MUCH FASTER IF EVRYONE WOULD JUST WORK AT IT A BIT HARDER!!!
EAST KING COUNTY	Bicycle integration is great for me.
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail Remove the environmental study between Bellevue and Bothell via the CKC Trail Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride If all of these are not removed, I will actively work to defeat ST3 in November
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail Remove the environmental study between Bellevue and Bothell via the CKC Trail Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride If all of these are not removed, I will actively work to defeat ST3 in November
EAST KING COUNTY	Do NOT disrupt the Cross Kirkland Corridor. It's hard enough getting people off thier butts to work out and removing easy access for them to get out and about would have endless negative effects for a lot of people.
EAST KING COUNTY	The light rail across Mercer Island is an unmitigated disaster and is unfair to Mercer Islanders.
EAST KING COUNTY	The biggest barrier to transit use now, for me, living in Sammamish, is lack of parking at transit sites. The Iss Highlands P&R, Iss TC, and MI P&R are all completely filled by 9:00 am. I have heard the same is true for Eastgate. As retiree, I would prefer to use transit whenever I travel to downtown Seattle or Bellevue. But now, when I try to find parking at 10:00, it's a hunting process. Please keep this in mind as stations are planned.
EAST KING COUNTY	Need to see transit improvements quicker. Support improving BRT and utilizing existing infrastructure.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	taking too long to implement these projects
EAST KING COUNTY	The survey covers too many projects, especially the part where the respondent is asked to pick the two most important. There are simply too many choices and not enough information to make an objective selection. I would suggest to put projects into categories and then asked to choose the two most important categories. The individual projects within certain categories could be ranked based on their survey responses.
EAST KING COUNTY	I'm OK with busses using the freeway shoulders to stay on better schedules. However, these shoulders should have much better signage and unique striping to warn/notify motorists avoid accidents. People do not currently expect to get passed by a big bus from behind on the shoulder and sometimes wander over or use the shoulder assuming nobody is barreling down it. Also, your survey asks how many members of my 4 person household use mass transit. My answer is currently 1 - however with a better proposed system, the answer would be 4. You might want to ask the question "how many members of your household would use mass transit should your priority improvements get implemented".
EAST KING COUNTY	This plan may serve the typical commuter, but it does little to serve the general population or those without other transportation in outlying areas. It would be much more cost effective (much less than 50 billion!) to make buses free, add service routes and times, and allow buses to use the carpool lane and shoulder. Free service and more routes would result in more riders and less traffic.
EAST KING COUNTY	I am all supportive of expanding and extending public transit system, which is long overdue for our growing city and should be developed sooner than later. However, I'm NOT supportive of compromising our natural beauty to make way for new transit routes, such as having transit stops on or near Cross Kirkland Corridor - it's one of the best feature of Kirkland where residents, families, kids, pets can enjoy for many recreational activities without the concerns of passing by cars and fumes. The Cross Kirkland Corridor should be protected and alternative sites are to be explored for such expansion.  Sincerely [name]
EAST KING COUNTY	Rather have better and more effective road network with cheap parking. Much lower overall cost and much more convenient.
EAST KING COUNTY	The Issaquah plan should be on a faster plan. I90 is a parking lot most of the time now and we need improved services before 25 years.
EAST KING COUNTY	Get more funding. DO more trolleys, streetcars and fewer buses. Raise auto rates higher.
EAST KING COUNTY	Allow folks to donate to building the improvements
EAST KING COUNTY	I dislike having a general sales tax to pay for transportation. I agree that traffic is bad, but for that amount of additional money, I need some guarantees that it's going to help traffic. I want to see an accounting for every penny that we're currently spending on transit to make sure that we raise taxes by the absolute minimum, and priority should go toward raising taxes first on gas, car purchases, road tolls, etc., not general taxes.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	This will take too long. By the time the project is finished we will need to expand them again. Tax us! let us get things done.
EAST KING COUNTY	Kill ST3 completely because it's just another taxpayer money pit. Sound Transit has never delivered anything of value to the residents of South Snohomish County or North King County and never will.
EAST KING COUNTY	Keep buses on 405 not on the Kirkland trail. I will support the bond issue providing there are no buses or trains on the trail
EAST KING COUNTY	We are both retired and will probably be dead by the time it is completed. A waste of tax dollars for us.
EAST KING COUNTY	It's about time we got serious about transit. Should have done this thirty years ago, develment might have been different.
EAST KING COUNTY	Forget Bus and focus on cost effective,fast efficient rail services.
EAST KING COUNTY	Just think we should get the rail up and running along 405 and 5 corridor and across the bridges... I 90/520
EAST KING COUNTY	Do it faster!!
EAST KING COUNTY	Protect our trail!!!!!!
EAST KING COUNTY	Please...no transit on the Kirkland Trail. No train between Wilburton and South Kirkland....this makes no sense
EAST KING COUNTY	I'm fed up with subsidizing a system that does absolutely nothing for me at a tax rate that's punitive given the value of my house. Your estimates of what it'll cost are deceptive. How about telling us what the actual cost will be per \$1000 assessed value. I cannot afford this. I'd like to be able to afford to retire.
EAST KING COUNTY	I am OPPOSED to ANY Rail between South KirkInd and Totem Lake on the CKC
EAST KING COUNTY	By the time you idiots figure this out we will have self driving uber cars everywhere and won't need any of this
EAST KING COUNTY	Capital spending on improving bus access, number of buses and improving travel times by bus should come first because they cost less and buses are more flexible in all ways. That is why most cities got rid of street cars ( light rail) decades ago.
EAST KING COUNTY	The sales tax increase is the hardest part to swallow. WA is already ranked as the state with the most regressive taxes in the nation ( <a href="http://www.itep.org/whopays/WP5AppendixB.pdf">http://www.itep.org/whopays/WP5AppendixB.pdf</a> ). The additional sales tax will hit lower income people the hardest, making us even more regressive than we already are.  I think it would be much fairer to have it all collected as property taxes. (Even better would be an income tax, but until we follow Oregon's lead and replace all our existing sales taxes with an income tax, nobody will go for a new income tax just to fund one program.)
EAST KING COUNTY	It is hard to take the survey when we don't have info on the amount of congestion in the different areas to prioritize so I selected I don't know most of the time. If you really want our best informed opinions, could we get more information on this? We see cars "parked" but don't know where they are coming/going and which lines would be more advantageous to build out first - except our own experience which is what would benefit ourselves most.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	I think it will be critical for the ST3 package to show early wins for the communities on the east side of Lake Washington to gain their full support. I also think demonstrating the implementation benefits will be crucial for all people. Our park and ride lots are getting full and that can be a very real disincentive for new riders. We need to make sure our P&R lots are built to accommodate the growth. We need to show people how great the bus and rail system really is for everyone.
EAST KING COUNTY	I think for this area to really turn into the modern tech hub that people want it to be, the light rail projects are the most critical.
EAST KING COUNTY	STOP!
EAST KING COUNTY	Low income families should be exempt from bearing the cost of any of these projects.
EAST KING COUNTY	Buses are not rapid if they are stuck in traffic. They need dedicated lanes. We need more light rail on the east side of lake. It should be higher priority than going to Everett or south of Tacoma.
EAST KING COUNTY	No transit in Kirkland cross corridor trail. Ever.
EAST KING COUNTY	Need many more parking spaces at Tukwila Intl light rail station.
EAST KING COUNTY	This is such an important plan for our region. Traffic is worse than ever before, and while we have a robust network of buses, rail systems and trolleys, they don't actually connect with each other, which makes it challenging to get around the city of Seattle and from the city to the Eastside (on some days, I can ride up to 6 bus routes!). In my opinion, this can't happen soon enough!
EAST KING COUNTY	The time line is way too long. We are choked and businesses are suffering. Finally, I understand hwy 9 will finally have bus service. Please consider a connector between Bothell-Ev hwy and hwy 9 on heavily traveled 228th St. SE.
EAST KING COUNTY	There is a huge gap of transportation down Maple Valley Highway which would greatly improve access from suburbs and ridership I believe.
EAST KING COUNTY	We need to use all reasonable methods to help reduce traffic in our region. We are 25 years behind on this and should move as quickly as possible.
EAST KING COUNTY	Some of the questions on the survey are very misleading. Lumping bus service expansion with light rail is a perfect example of this. Also, your cost estimates are way lower than everything else I've heard. Just look at your figures. A 1% vehicle excise tax on a \$30,000 car is \$300 per year, 50% more than you say the total tax will be, on average. I think investing billions in a 19th and early 20th century technology is absurd, especially as numerous companies are logging millions of mile in self-driving vehicles. New technology will leave these trains in the dust.
EAST KING COUNTY	Plenty of parking and access to transit stations must not be overlooked. Spend a little now to make things more convenient.
EAST KING COUNTY	Please find a way to speed up this plan...I am 65 years old and can't wait this long!!!
EAST KING COUNTY	More and better transit is needed between Redmond and Downtown Seattle

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Looking at the time frame for completing light rail projects leaves me in dismay. It didn't take nearly this long to build I-5 from Seattle to Everett including buildings being demolished. More people would be enthusiastic about this if they thought they would still be working or going to school or university by the time it was completed. I am all for the light rail project but much sooner. People in this region have no attention span. Use some urgency like it was Century 21 or I-5 or Metro; the cleanup of Lake Washington.
EAST KING COUNTY	Abandon the light rail and improve bus system. Light rail is too expensive. Light rail should have been implemented 30 years ago. Now Atlanta has our system (rapid transit). Do a better job of spending tax dollars. How about a tax decrease?
EAST KING COUNTY	Unfortunately I've watched the gov. overspend on so many "priorities", coming to the now defunct middle class for more money and having the projects either fail or cost much more than anticipated. I watch the few morning buses that have people in them and then they are almost empty. While you are cramming more people in for tax purposes, we the public are suffering with traffic so you can boast your reasoning for more transit. No parking at transit entry's (this isn't Paris where we can walk a 1/2 block for access), it's so shortsighted and this whole thing is a mess. I'm not willing to pay more for light rail into our small towns. Let high tech companies pick up the costs....they are the ones bringing in so many people! Go get the companies that are hiding their tax dollars out of the country but us middle class don't have the money to add to your "wish lists".
EAST KING COUNTY	Do not put any transit on the Kirkland cross court or trail if you do we will actively work to defeat the ballot measure
EAST KING COUNTY	We need income tax. We need to stop regressive taxation.
EAST KING COUNTY	I live in Kirkland - I get nothing but higher taxes - why should I support this? For years we have had crappy bus service and getting to downtown Seattle on the bus SUCKS - overcrowded and more often than not late - especially going home. Need to see better service before I support something like this. Sorry - WAY too expensive.
EAST KING COUNTY	I'm very concerned about the constant noise the trains will make in my now peaceful & quite neighborhood in Bellevue as they run from about 4:30 a.m. to 1:00 a.m. I'm dreading the construction we will be dealing with for the next 8 years too. I wish it wasn't happening. I think the above ground rails are going to be an eyesore too.
EAST KING COUNTY	Light rail. Not buses.
EAST KING COUNTY	We need to catch up to other large cities... thank you for attempting to do that.
EAST KING COUNTY	1 Why will old 520 bridge not be used to reduce congestion? 2 Rduce all tolls to \$1 so traffic patterns will return to normal. 3 stop adding bike lanes in seattle. This bogs up all traffic. Seattle's weather isn't conducive to bike riding most of the year.
EAST KING COUNTY	I live in the Alderwood Manor area (ZIP 98021). Progress has brought us close to 100 closely-packed new Homes in the past 5 Years, yet we only have one bus line (the 120) and while 120 service has vastly improved, it could be expanded to include the new neighborhoods - currently, anyone wanting to take the 120 from our now densely populated Suburb must walk 15 minutes to the nearest bus stop. We need a bus that serves the everyone out here - that 15 minute walk is awesome in Summer and dreadful in Winter. Please consider it...

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>Parking! Parking! Parking! At the transit hubs.</p> <p>In order to change behavior, eliminate the uncertainty of not being able to find a parking place after 6 am, so people will drive to the park n ride instead of clear downtown. One missed appointment (frustration and damage) due to a full PnR, and that person will never try again - they know parking will only get worse. They will pay the money and drive downtown.</p>
EAST KING COUNTY	<p>Train technology is 150 years old. It is expensive to build and has not met initial projections. We need to think progressively and realize that technology can be utilized to reduce traffic. For example, employers and employees should both be incented so that employees live near their work locations. Government employees should show leadership by using 'Go To Meeting' or similar technologies instead of traveling to meetings and conventions. Our public facilities should offer free conference rooms equipped with technology so that video conference meetings can be facilitated. All of these technologies, and more, are available or rapidly becoming available and are more environmentally friendly and less costly than building more trains at an incredible cost for years and years to come.</p>
EAST KING COUNTY	<p>the 522 corridor badly needs rapid transit and better access to rail--and much expanded parking at the PNRs.</p>
EAST KING COUNTY	<p>Need to accelerate! Bus improvements need to happen now. Need to charge bicyclists for using roads to commute. Should require a special license. They are out of control!</p>
EAST KING COUNTY	<p>no mass transit from Bellevue to So Kirkland Park and Rise; remove the environmental study between Bellevue and Bothell; No high capacity transit. If not removed then I will work for the defeat of the STS in November</p>
EAST KING COUNTY	<p>Tax me and all the other well off people in the area. Spend enough to help us catch up with many other areas in the USA and around the world. Develop much more bus service to all communities and between them.</p> <p>Increase ridership and reduce pollution and traffic.</p> <p>[name] Kirkland, WA</p>
EAST KING COUNTY	<p>I'm slightly disappointed that it's going to take 12 years to get the light rail to the east side. I think that should be a priority especially with the amount of tech jobs on the east side.</p>
EAST KING COUNTY	<p>Washington State is in dire need of a progressive tax structure. Those that most depend upon efficient infrastructure, should shoulder most of the tax burden</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Taxing all residents in the region is excessive for projects they will never use. Those who use the systems should be the ones who foot the bill. I vote against excessive spending and the resulting addition to our taxes quite regularly - and I'm a liberal voter! Yes, it's become that bad! I won't vote republican anytime soon .. this seems like a way for taxes to pay for things that corporations should be taxed for! If people were able to afford to live and work within the same communities, traffic would be reduced. Let these corporations build nearby parking and provide bus services for their employees. A free ride for them at the expense of the communities they should be supporting! At least Microsoft provides some buses for their employees!
EAST KING COUNTY	The funding is weighted too heavily on property taxes. This excludes renters in their fair share of the expense. The average \$200 you quote per adult is misleading. Using your numbers, I calculate significantly higher cost per adult in my household when factoring in the property tax increase.
EAST KING COUNTY	Projects are costly and should be planned out and paid for by the business that use them and even the sporting events that contribute to the congestion. Why should every taxpayer pay for those things that only a few people use.
EAST KING COUNTY	This may be alleviated with the light rail plan but I would use public transportation more often if I knew it would not be a hassle to get home in the evenings. Currently when I attend events in Seattle I often drive because if the event ends at the wrong time or the bus is too full I might have to wait an hour for the next bus.
EAST KING COUNTY	South section of 405 is overloaded. Rapid transit buses are not the solution. Build light rail.
EAST KING COUNTY	We need this in the Puget Sound area as traffic has gotten out of control. The taxes will hurt but the longer we wait the higher the cost will be.
EAST KING COUNTY	You fail to support those who live in the Kenmore, Kirkland, Woodinville and Bothell areas. And don't tell us we get busses!!!! I used to be for sound transit but their decision making and past track record of promises is worthless to my generation... point being the federal way extension.
EAST KING COUNTY	How about building some roads to increase capacity! Not everyone can ride the bus and most do not want to subsidize others who do. Make the riders pay for their own transportation and see how many ride the mass transit.
EAST KING COUNTY	Fund transit via the gas tax - that way you reward carpooling. Taxing people who own vehicles turns the transit debate into a non productive class warfare argument. And the reality is that everyone needs to own a vehicle.
EAST KING COUNTY	I strongly support increased public transportation. However, it is abundantly evident that there is a great deal of corruption in the spending of the tax dollars allocated to this cause. I would support an increase neutral third-party auditing of where this money is going, and what it is used for.
EAST KING COUNTY	Need high capacity transit on old rail right of way east of Lake Wash soon.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Thanks for the efforts. I really feel this program is 25 years too late. There has been too much immigration into the US. We should have expanded the freeway system and limited immigration long ago. Quality of life is seriously on the decline due to overcrowding. We should integrate rail where efficient, and it should be self funded. The motorways also need to double capacity. Progressive cities like in Texas take action quickly. I would like to see us do the same. Thanks.
EAST KING COUNTY	The reason why MOST people strongly oppose paying for any new anything, is because most of the money ends up in the pockets of crooks, costing too much, and never completed on time if at all (i.e. Monorail expansion project, etc, etc). Your questionnaire did not attempt to address this lack of trust and the tax payers getting their money's worth. Too many see our nation heading towards a 3rd world corrupt nation (fascist democracy) where bribes and cheats are a way of life while tax payers are forced to pay more.
EAST KING COUNTY	Though buses are cheapest and easiest to institute people are less likely to ride them then the link or train. The bus is for poor people. It's a stigma, true or not, it will keep people from using the bus. Also, using a bus in traffic makes me want to be in my car. At least it's mine and I choose the passengers. I hope it works but I want the light rail. I would use that everyday, even get rid of my car. I won't for a bus.
EAST KING COUNTY	WASDOT King county government create projects with huge overruns costing taxpayers billions of dollars politicians and government officials along with corrupt contractors filling their pockets you guys are 30 years behind
EAST KING COUNTY	Add light rail over 520 bridge
EAST KING COUNTY	Do not put any motorized transportation on the Kirkland trail. Please take this off of any further proposals..
EAST KING COUNTY	I want Light Rail to connect to Renton.
EAST KING COUNTY	I support most of the objectives, but I do not support financing transit with a sales tax. Washington State has the most regressive tax structure in the country. Financing transit with sales tax revenue will worsen the situation.
EAST KING COUNTY	Where are transfers among trains required? How to tell how long total trip would be; for example: from Issaquah to downtown Seattle during morning rush hour? In this example, how many changes of vehicle are required?
EAST KING COUNTY	Timeline needs to be shortened significantly
EAST KING COUNTY	Would like to see the sounder run on weekends. At at least during the summer.
EAST KING COUNTY	Please do NOT use the CKC trail for any high capacity transit! Remove the environmental study between Bellevue and Bothell via the CKC trail. It would be a waste of money. ANY transit would disturb the environment. Also remove the proposal of mass transit from Bellevue to the South Kirkland d Park and Ride if it even touches the CKC trail.  I will actively work to defeat ST# if these are not taken off the table, even though I do believe strongly in transportation improvements. They are needed, but not at the expenses of the CKC Trail and the environmental destruction using this trail would casue.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	It is very important that the financial analysis of this project be correct. At this point I have lost faith that projects can be built on time or on budget. I would rather you under promise and over deliver. Cost overruns and delays make me and others less likely to fund mass transit projects. The \$200 per adult seemed low given my perception of history.
EAST KING COUNTY	Please reconsider Kirkland and going forward with plans on the Kirkland Corridor Trail. I use the trail daily for my commute but strongly support a mixed use. I've met with some on the "save our trail" folks, and I don't think I met one that has to be anywhere in the morning. Please don't let a group of self-interest retired people sway plans away.
EAST KING COUNTY	Build more freeways for those of us who use CARS and do not rely on public transit , for a number of reasons... Stop taking away freeway/ roadways / parking for "CARS" in favor of tains, buses, bikes! Not everyone can ride a bike to work or get to their work destinations public transportation routes... Safety on public transportation is a very big concern for many of us. That is another reason many prefer to provide our OWN transportation and not rely on public subsidized transportation... Thank you.
EAST KING COUNTY	Asking east king county residents to pay increased sales tax to subsidize a system that disproportionately benefits downtown Seattle (in economic terms), and does not deliver meaningful service improvements for 25 years (or ever, if previous ST initiatives are a guide) is totally unreasonable. Issaquah is woefully underserved already. Offering no improvements until an imaginary 2041 light rail extension is foolish and remarkably short sighted. Redmond continues to grow explosively and its major employer (Microsoft) is the most sustainable driver of our region's economy. The proposed service extensions again fall a day late and a dollar short. I am a consistent supporter of public infrastructure projects, but this plan is pathetically short on real value for my community, and in its current form I cannot support it.
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail Remove the environmental study between Bellevue and Bothell via the CKC Trail Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride If all of these are not removed, I will actively work to defeat ST3 in November

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>The failed I-405 Express Lanes project MUST be rolled back. It has done nothing but cause trouble, take money away from our region, and unfairly hit those who are already poorest in time and money. The very idea of running bus service on the shoulders of I-405 is a stopgap measure that is dangerous and inappropriate. The 405 Express Lane project needs to be completely re-evaluated, the HOV allowance changed back to 2 person, and the usurious toll schedule reduced to reasonable levels.</p> <p>Additionally, more parking is needed at nearly every Park &amp; Ride and Light Rail station. If these locations fill up early in the morning, people are then unable to use the mass transit options available and must drive themselves. Insisting that by limiting parking people will walk or ride their bikes is a fool's gambit, given the hills and weather in this region - I'm not about to walk 1.5 miles in the rain to get on a bus to head downtown to a professional job, and few others are willing to do that either.</p>
EAST KING COUNTY	<p>Do not place light rail on the eastside rail corridor - this area is well served by a bike path and not a light rail.</p> <p>Get bus rapid transit (BRT) service on I-405 between Lynnwood, Bellevue and Renton live ASAP -- waiting 8 years for this is far too long the traffic on I405 needs to be addressed now.</p>
EAST KING COUNTY	Bike and pedestrian services must be included
EAST KING COUNTY	I don't understand what factors are involved with how long it will take to complete these proposed projects. Is it merely just an issue with funding? I would support increased funding to shorten the time needed to complete these needed projects and expand them further around Puget Sound
EAST KING COUNTY	<p>It really troubles and distresses me that we continually operate in a defensive mode rather than proactive - government and our medical field. Putting "band-aids" on things or "putting out fires" is such a waste of time and resources - and usually doesn't even solve the problems! If more forethought had gone into original planning, we would not have to be doing so much expensive backtracking. Like how about limiting developers so that we don't later have to deal with ridiculous amounts of traffic??!? The numbers of condos and apartments going up is crazy, AND (at least in the outlying areas) probably many occupants have 2 cars to a unit. We need to STOP THAT!. We obviously need to move forward with where we are, but I think that needs to be looked at, too. Along the same lines, asking to reallocate the Kirkland Cross Corridor after the fact is ridiculous on so many levels. First, if the land belongs to Sound Transit, why in God's name did they allow a walkway to be built on it??? It is a pretty standard principle of getting people on your side, not to give them something and then take it away. Better not to ever give it. I am so tired of wasted dollars on wasted and poorly used planning time and the big hindsight need to react. I sometimes wonder about the IQ of the people on these committees...</p>
EAST KING COUNTY	Tired of the Eastside getting short-shift and low-priority re light rail projects compared to the Seattle/Westside projects.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Costs are completely out of line with fiscal reality, the timetable is too slow, and the department doesn't have a good track record in delivering projects on-time and on-budget. Before voting in favor of an initiative like this I would have to be comfortable that the funds will be managed responsibly.
EAST KING COUNTY	Parking is extremely important if people are going to use these services. Having no available parking at transit centers forces people to drive and negates the purpose of the system. I have lived near and used 6 different transit centers (Ash Way, Lynnwood, Canyon Park, Mountlake Terrace, Renton TC, and the Tukwila International Station and all of these locations are lacking in parking and often fill up before 7:30am with many people still looking for parking. This is unacceptable if people are expected to use this system. No one wants to add an hour or more to their commute by taking surface busses just to get to their main line.
EAST KING COUNTY	More rail will not solve the congestion problems of densification and will cost billions that could be used for road expansion.
EAST KING COUNTY	No transit of any kind onCKC Remove environmental study btw Bellevue and Bothell via CKC Remove proposal of mass transit from Bellevue to S Kirkland P&R If not removed I will actively work to defeat ST3 in November
EAST KING COUNTY	It isn't clear exactly where in Bellevue this station would be (I'm sure it's listed somewhere in the documentation, it just wasn't obvious). That would impact my perception of the plan, given Bellevue's size.
EAST KING COUNTY	Light rail is definitely not compatible with pedestrian/bike trail on the abandoned eastside rails running parallel to I-405. Combining rail and trail has not worked elsewhere including Europe. The best place for light rail transit is on pylons down the center of I-405 where it can connect with fly-overs at the various P&Rs. Light rail can efficiently go 60 mph along with other traffic on I-405.
EAST KING COUNTY	Sound Transit should pursue stronger penalties against people who violate laws that impede public transit. Several times a week along Howell St and Olive Way, cars block the bus only lanes. A bus full of dozens of passengers can't zip down these streets because of one person failing to obey the law.
EAST KING COUNTY	I cannot express how totally ineffective Sound Transit is. I have lived in many cities with rapid transit that works so well. Your uneducated plans for an area that is so broken up physically is unbelievable. Your plans for funding \$50 + bil. is out of sight and with no timeline for ending the taxation, is criminal!! I am so glad to learn the Federal Gov. is investigating ST for fraud. (talked with an agent) I am embarrassed how other states are viewing our totally inept DOT and Sound Transit fiasco. Is there a "sound head" at all in Sound Transit???

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	I will have to move is any of this Bull dung passes as my taxes will be too high for me on a fixed income to keep my house. I know, you do not give a damn about little things like that.
EAST KING COUNTY	I support getting effective mass transit in the Puget Sound region. I will rely on the people who have intimately researched the traffic flows to make the best decisions.
EAST KING COUNTY	I would be more supportive if I had confidence new money would actually go to fund the project.
EAST KING COUNTY	More and expanded park and ride lots are needed throughout the current transit system now.
EAST KING COUNTY	Please do not consider putting any High Capacity Transit on the CKC Trail. Also, could you remove the environmental study between Bellevue and Bothell via the CKC Trail? I would definitely ask that you remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride. I plan to do what I can to work to defeat ST3 in November, if the above are not removed. Thank you.
EAST KING COUNTY	ST needs to slow down, stop for a moment, and ask the basic question of the evaluation of a 'Do Nothing" Alternative, or a BRT/bus only alternative. You have not asked the basic question.
EAST KING COUNTY	I moved here in 1975 and there was talk of rapid transit then. I felt then, and still feel, that rapid transit (rail) should run along I5 ( at least Everett to Tacoma), and along 520 and I90 from Seattle to Redmond and Issaquah. Bus transport should support this by going from stations outward. This is logical and covers the major transportation routes. Look at Japan, Europe, Boston, N.Y., Philly, and San Francisco. It works. Why are we making up other routes?? And buses on the shoulder?! Horrible! What about breakdowns and police work!!!! Where are they to go?
EAST KING COUNTY	Really want light rail from Bellevue to Seattle!!!
EAST KING COUNTY	Need more buses and less light rail. Buses cost less and routes are flexible.
EAST KING COUNTY	It needs to be completed quicker. The region is growing at a much faster pace than whet you have planned for.
EAST KING COUNTY	Renton needs more frequent, more reliable and quicker bus service!!! I take a Bellevue bus most days because Renton bus service is so horrible

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>I support ST3 (E02) Rapid Transit on I-405. I am absolutely opposed to any motorized HCT (bus or rail) on the Cross Kirkland Corridor. I urge Sound Transit in offering \$20 million dollars to the Kirkland City Council for an environmental study to use this money to evaluate the feasibility of putting HCT (bus or light rail on I-405. The citizens of Kirkland want the Kirkland Trail to remain as it is for our local enjoyment. Again we will support ST3 on I-405 but not on the Kirkland Trail.</p> <p>We do not support ST3 HCT Bus or Rail on the Kirkland Trail. The \$20 million dollars that Sound Transit is offering to the Kirkland City Council for an environmental study should be used to evaluate the feasibility of putting Bus or light rail on I-405. We agree to support ST3 for the ST3 E-02 - Bus or Rail on I-405, but together with many other local Kirkland citizens we will vote against ST3 for any plans to put motorized, HCT, transportation on the Kirkland Trail.</p>
EAST KING COUNTY	<p>The plan is too slow in providing needed services. In 25 years, the proposed modes of transportation will be outdated and obsolete. Very poor planning!</p>
EAST KING COUNTY	<p>light rail is needed on 405 Renton to Bellevue its pointless to leave that gap.. buses do nothing to help and add to the already epic traffic congestion. it is consistently the worst traffic mess in the area</p>
EAST KING COUNTY	<p>I have seen other metro services add light rail at a much faster pace than this state. I have heard about light rail since before moving here in 98. Bellevue and Seattle still don't have services that support building the structure for parking to catch light rail or bus schedules that make it easy to navigate the system. Web support and navigating change of services, buses and times need to be made more user friendly. The few times I have used services were confusing and hard to navigate connections if you could get service at all coming from the eastside. Even the 'experts' had a hard time finding ways to get me where I needed to go.</p>
EAST KING COUNTY	<p>I strongly suggest to finish and pay for current expenditures, Then look at what has happened, and then make plans. Look Listen learn...</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Light rail is slow. Cut the northern and southern most routes. Need to get heavily populated Ballard and West Seattle online more quickly. Not utilizing Kirkland connector is a waste. Immediate need to expand and build parking garages at all major park and rides. Should include public/private with lots becoming multi-story garages with apartments/market rate through nonprofit housing groups. Think south Kirkland. Include more parking than S Kirkland. It could use another garage in lot space.
EAST KING COUNTY	<p>I understand that the various stages of bringing about transit projects like this take a long time and that there really aren't many places where the time frame can be shortened, but the Eastside needs decent mass transit now. It shouldn't take an hour to go from near the Totem Lake area to Tukwila and vice versa, but there are several times during the day when traffic gets so bad that it easily takes an hour to travel that distance. I've had to go through downtown Seattle if I want to take mass transit from the near Totem Lake area to Tukwila on the weekends, which is frustrating and generally leads me to borrow my wife's car instead. The most convenient bus route for me to take from near the Totem Lake area to the University of Washington is the 277, but it only goes Westbound in the morning for a few hours and Eastbound in the afternoon for a few hours. That makes it difficult to stay after classes and participate in activities as a commuter student. The 540 has a better range of times, but requires me to take the 238 first, which adds more time to the commute. The 255 is even better with the times and goes much later into the evening, but then I have to get picked up at Kingsgate Park &amp; Ride because other buses have stopped running, not to mention it takes the longest. And so I am desperately wanting better transit options now, but am stuck knowing that it will be over a decade before they really come to me.</p> <p>I didn't use to think so poorly of Seattle's mass transit system because I came from a small town. But after living in Yongin-si, South Korea just off the Bundang subway line (about an hour south of Seoul via the subway), I've come to realize that Seattle's mass transit system could use a lot of improvements in reliability, coverage, and operating hours. Between King County Metro and Sound Transit, you at Sound Transit have done the better job with service expansions, especially the light rail. So please keep up the good work. But please also do what you can to bring transit improvements sooner rather than later. Because the Seattle area needs these improvements now and the growing population will only make the existing transit problems worse.</p>
EAST KING COUNTY	The only reservation I have is for the sales tax. Sales taxes are regressive and we already have some of the highest in the country. I'd be happy to see that tax come from anywhere else (though not increased bus fare).
EAST KING COUNTY	Loose all plans for anything bus related. Step it up and just lay the groundwork for anything rail related. Especially on the eastside. Renton to Lynwood line would be nice. Run another line across 520 as well. Move the timeline up. Cut it by 2/3. Get it done. Kick a [explicit] hole in it if you have to.
EAST KING COUNTY	Keep buses and light rail OFF the East Rail Corridor and Eastlake Sammamish Trail - there are few Greenways left in our backyards and tons of cement roadways-use them for light rail and buses as SAVE our endangered species, these greenway trails!! People move here for nature, not transit!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	We can't keep putting off light rail in favor of buses just because it is more expensive. Our region wouldn't be the transit mess it is today if people had been willing to spend the money 30 years ago
EAST KING COUNTY	Parking needs to be addressed at future stations and current park and rides. As it is, there is not enough parking at the Kenmore park and ride or the Lynnwood park and ride. People can't use the transit service if they have no way of getting to it (because there's no parking!).
EAST KING COUNTY	There is no good connection from Kirkland to Seattle! Light rail should reach Kirkland!
EAST KING COUNTY	timelines are too long and they need to consider improving highways and roads too. Also, they should relook at their plan to use express lanes on I-90 bridge for light rail only. There should be a way to keep the existing highway and have light rail on top.
EAST KING COUNTY	I'd like to see folks come up with other means than property taxes to help fund these types of projects.
EAST KING COUNTY	Remove ASAP the Transit Center from downtown Renton. Makes downtown unsafe, especially after dark. Has increased the costs of our police department and our local and Property taxes.
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail. I believe the HCT should be run along I-405 instead. <ul style="list-style-type: none"> <li>•Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>•Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> <li>•If all of these are not removed, I will actively work to defeat ST3 in November</li> </ul>
EAST KING COUNTY	2 Things: I believe the region would support a higher 'levy' or tax, if it meant a quicker completion of the projects. If a new station opened once every 18-24 months, the excitement, in my opinion, would garner additional support. Lastly, I would like to see more coordination with all the different transit services.
EAST KING COUNTY	Stop spending so much tax money on traffic/transportation programs that hardly work (i.e., 405 tolls, unnecessary light rail routes, etc)
EAST KING COUNTY	Increase parking for the rail systems that are in place (especially the Sounder in Tukwila) and extend the rail system to Renton & Maple Valley.
EAST KING COUNTY	Any way to speed it up would be beneficial. We are grossly under performing in the area of mass transit for a city of our size and employment make up.
EAST KING COUNTY	I am against mass transit on CKC trail. I want to remove the environmental studies and oppose mass transit via CKC trail. I will actively work to oppose any of the above actions in November.
EAST KING COUNTY	CHANGE THE NAME OF BELLEVUE/WILBURTON STATION BACK TO "HOSPITAL" STATION!!!
EAST KING COUNTY	I am pleased that the Cross Kirkland Corridor is not being considered for development in the ST3 package. It makes more sense to have buses running on shoulder lanes of 405 for a rapid transit plan.
EAST KING COUNTY	It seems expensive, but we desperately need it. Go for it.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	It's wonderful that the ST3 plan is so extensive, but we need more! After the ST3 plan is approved and work begun, further research and planning should be done to fully connect the greater Seattle area through light rail. The rapid bus plans are a good stop-gap while waiting for rail to be built, but not sufficient long-term as Seattle grows. Please work hard to develop plans for further expansion of the light rail with additional stations, parking, and bike/pedestrian access.
EAST KING COUNTY	Stay off the trail!
EAST KING COUNTY	No High Capacity Transit on the CKC Trail
EAST KING COUNTY	The train projects should include restroom facilities on the trains or on the route. The trip from SeaTac to downtown Seattle is difficult for those with medical conditions. We are asked to pay for a system that we cannot practically use.
EAST KING COUNTY	I am most in need of northeast Bellevue to university area in a timely manner
EAST KING COUNTY	<p>I am strongly opposed to Sound Transit destroying the CKC Trail by adding High Capacity Transit. The argument that the trail won't be affected is bullcrap - a nice walk with your family and dog will be ruined by the rushing and noise of a disgusting polluting transit car.</p> <p>I strongly support removing the environmental study between Bellevue and Bothell via the CKC Trail, as well as the proposal of mass transit from Bellevue to the South Kirkland Park &amp; Ride.</p> <p>If the above items are not removed, and the high capacity transit on the CKC trail is not removed, I will ACTIVELY work to ensure that CT3 is defeated in November.</p>
EAST KING COUNTY	I wish this timeline could be finished sooner due to the rapid growth of the region and the giant quagmire that has become traffic in the region. I know there are many projects to consider but I do hope you take particular consideration at expediting rapid transit on the HWY 522 corridor even prior to light rail coming to the Shoreline area. The traffic has increased exponentially along this route due to toll-fee avoiders. Having a rapid transit system thru this corridor with service to downtown would have a huge impact on the traffic in this area and along both 405/I-5. We residents of these fast-growing regions appreciate the acknowledgement of this traffic influx and do hope you will take measures to reduce the traffic here! Thank you!
EAST KING COUNTY	I am against light rail and buses on the CKC.
EAST KING COUNTY	Do NOT (NOT) include the Cross Kirkland Corridor in any plan. It is a TRAIL, not something for mass transit of any kind. No light rail, no buses. Period. If it is included in the plan, we will vote NO in November.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Funding: WA state and local regions need to fairly tax and collect corporate taxes instead of giving corporations tax breaks and other incentives to lure corporations to our state. Also we should subsidize via lower interest loans to worker coops knowing that loans to these businesses will result in company paybacks and future taxes paid to state and local regions. Continued higher taxation of citizens of this state only exacerbates the transfer of wealth from the middle class to the wealthy. Many of us are seeing our incomes decline and cost of living rise. I am retired on social security and I did not receive any COLA this year.
EAST KING COUNTY	Please do not use the CKC trail right of way for any TRANSIT. DISCONTINUE the study of Bellevue to Kirkland via the Trail Right of way.
EAST KING COUNTY	JUST BUILD IT!!
EAST KING COUNTY	Please do not put any trains on the cross Kirkland corridor trail and do not spend ANY \$\$ on the environmental study between Bellevue and Bothell using our trail. This is an awful idea and I will mobilize to fight it. So also please remove the mass transit proposal from Bellevue to South Kirkland Park & Ride. If this bad idea continues I'll continue to fight. Loudly.
EAST KING COUNTY	Do not put any High Capacity Transit on the Cross Kirkland Corridor (CKC) Trail Delete the environmental study between Bellevue and Bothell via the CKC Trail Do not consider mass transit from Bellevue to South Kirkland Park & Ride Do not fund with sales tax or property tax
EAST KING COUNTY	I know you are limited in your funding options given our state's archaic tax structure, but I wish more burden could be put on the developers building huge multi-unit dwellings on the Eastside and less on the proportionately shrinking home owners. Property taxes are already very high, and those huge apartment buildings add lots of commuters.
EAST KING COUNTY	Emphasis should be placed on expanding light rail.
EAST KING COUNTY	I am concerned there is a shell game here. I don't take bus to SLU any longer because there aren't any. The i90 busses to downtown are standing room only and keep getting reduced. Where did they go? Money being revoked and a lack of planning for expidientual tech growth in Seattle...this growth isn't happening at the same pace in Tacoma and tech folks aren't moving there. Stop revoking funds just to ask for more later. You can ask how the voters "feel" in studies like these but where are the actual commuter numbers? All I see is bike information and parking reduction notices flowing from city transportation teams... Your citizens are families too, not everyone can ride a bike and there aren't busses to take. I have little to no trust in the analytical abilities shared thus far, no demo data has been shared in this survey either, how are your voters supposed to support it??????

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	This is very expensive if it will add \$200 a year per person on an ongoing basis. Especially if we don't all benefit relatively equally from it. Also, when will the expense be charged to residents? I will oppose being taxed \$200 for at least 8 years with no service while waiting for projects to be completed. That's is entirely too long. There has to be a better & faster solution. I'd be willing to pay more for a quicker solution, but 8 years is entirely too long to wait. Our priorities and needs will have changed by then. This is not a helpful solution if it will be 8 to 12 years. Additionally, it's unreasonable that Kirkland to Lynnwood would not get light rail when that is one of the worst commutes.
EAST KING COUNTY	I would pay more to speed the project up even more.
EAST KING COUNTY	light rail ON 520!
EAST KING COUNTY	I lived in San Francisco a long time, and everyone used public transportation. It has been a shock to move to Kirkland and see how dependent everyone is on their car. I think there is a stigma against using public transportation for them. I suspect it will be difficult to get people onto the buses, like it will lower their status. They'd rather sit in an expensive car in crawling traffic on 405. On a different note, I'm glad to see the mention of bicycles, I just wish you'd mentioned it more. I ride my bike to work within Kirkland.
EAST KING COUNTY	Please stop increase in homeowners taxes for public rail projects. People who use these services should pay for them.
EAST KING COUNTY	We need light rail and it needs to be built as quickly as possible.
EAST KING COUNTY	Should have put light rail on the 520 Bridge to ease congestion. In addition, people using the 520 bridge should not have to pay such high amounts if they are sitting in traffic. The tolls should be lowered when in congested areas because what the heck are we paying for if the new roads aren't providing us a freedom from congestion?? The rates should reflect the congestion of I-90 bridge. When that bridge is congested, the rates go up on the 520 bridge...but if you're sitting in congestion on the 520 bridge, the rate should be lowered reflecting a very poor design and inability for the 520 to handle the congestion, with reason.
EAST KING COUNTY	Would like to see rail to Renton; spend far less time and money on buses and focus on rail.
EAST KING COUNTY	There is no scenario in which I, or residents in my area would see tangible benefits from any of these proposals. None of these are destinations I would benefit from. As it is, transit service takes 2 hours to get to my most popular destinations that take 20-30 minutes by car, requiring multiple transfer's. Fix that and I would be more willing to support these expansions.
EAST KING COUNTY	I will never use this--so don't want to pay for it!
EAST KING COUNTY	Consider the building of subways instead of surface projects that crowd out roads, other forms of public transportation, and land. The greater Seattle Area only have so much land. Put subways in your long term plans. Better invest now with our tax dollars instead of waiting for cost to go up in the future. Eventually, with a crowded population, we will need to build the subways; better start thinking and talking about them. They're also very convenient and fast.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	I-405 through Kirkland is a quagmire during rush hour traffic and even mimics rush hour on weekends. With 600 homes going in off 160th and another 200 west off 132nd, this is going to get worse.
EAST KING COUNTY	You people are morons Take out the express lanes and make them buss only lanes. This way there is a reason to take the bus, busses would run on time and be a viable option. Or, take out the express lanes and put a light rail system in its place.  Way to go this long without thinking about how to handle traffic, especially with the large number of Asians that can't drive in this area.
EAST KING COUNTY	we need more busses to get from sammamish to seattle that come as far as the sammamish park and ride
EAST KING COUNTY	The projects should be completed in the next 5-10 years.
EAST KING COUNTY	Run main lines from Olympia to North of Everett 405 167 520 i90 explain to the people that the cost may seem high but when you have these projects the workers spend much needed revenue in these areas. Everyone from business owners to dish washers get a bit of the action. Fuel stations ect ect
EAST KING COUNTY	Serve Snohomish County sooner.
EAST KING COUNTY	later buses to the east side (after midnight). Then I could mote reliably bus into the vcity in the evening for karaoke/clubbing and not have to leave early.
EAST KING COUNTY	There should be an optional bond that people could approve to accelerate all the building options.
EAST KING COUNTY	Build new lanes on the freeway to increase capacity. Light rail is a waste of money. I will be dead by the time your thru.
EAST KING COUNTY	1. Do NOT turn the Wilburton Rail Right of Way into a mixed use corridor. Per the FEDERAL RAILS to TRAILS ACT, this corridor is intended for TRAIL purposes only. NOT mass transit, trains, buses, or utilities. 2. Do NOT run light rail near the WILBURTON TRESTLE (a protected site), or near the sensitive estuary at the confluence of Richards Creek, Kelsey Creek, and Mercer Slough. These are sensitive tributaries to Lake Washington and home for bald eagles, numerous waterfowl, terrestrial wildlife, and delicate vegetation. 3. If ST3 wants to run light rail to connect Issaquah to Seattle and Totem Lake, run the train along I-90 and connect to ST2 near the South Bellevue Park & Ride. 4. Remove the environmental study between Bellevue and Bothell via the Eastside Rail Corridor. 5. Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride.
EAST KING COUNTY	Issaquah

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	First improve and upgrade the roads on I-5 especially in the Federal Way, Fife, Tacoma are. The roads are in disrepair. And the corridor between Newcastle and Redmond is a messes. Improvements need to be made to the S curves in Newcastle and at the 167 interexchange. The so called improvements in Bellevue with the new Toll roads have worsened the commute not improved it. Not everyone rides a bus. It is an inconvenience in my perspective and in my career.
EAST KING COUNTY	If you want cars off the road and are trying to socially engineer residents you need to make it easy to use and a time saver. If you want people to use link light rail - they have to be able to find parking. Link Light Rail needs to be available for all King County. KC is way behind in creating a viable transit system that is user friendly, not only for publicity.
EAST KING COUNTY	25 years is too long to wait. Promises made now will not be kept in a quarter-century. Reduce completion time for your plans to 5-year plans and provide light rail service connecting East side cities. Stop trying to connect small outlying towns to Tacoma and Seattle, or designing light rail to serve big companies and institutions only. It needs focus on general use between cities, mostly on East Side.
EAST KING COUNTY	Speed it up. Even at higher costs. Parking should be private. There should be housing above P&R's & retail on the sides.
EAST KING COUNTY	I would prefer a higher priority on the I-405 corridor. Why not light rail from Renton to Bothell (or Lynnwood)?
EAST KING COUNTY	The CKC Trail is not environmentally suitable for the increased burden of transit (or light rail).
EAST KING COUNTY	I don't support a full package bill by taxpayers - I might support a package that includes: contributions from those companies with direct access (boeing), taxpayer component, developer contributions to help with transit oriented development. I don't want to see just a taxpayer package.
EAST KING COUNTY	Could you please include plans to promote more people to bike to places? Thank you.
EAST KING COUNTY	Please make sure that parking at stations/park & rides is a priority. It does no good if people cannot find parking at the park & ride. Additional buses at least from Snohomish county are needed badly. I catch the 532 in Canyon Park at 6:15 in the morning returning to the transit center for the ride home around 4 or 5. I have not had a seat in over 6 months. We are standing room only and turn people away because there is no more room on the bus.
EAST KING COUNTY	I will vote against ST3. I live East of I405 and South of I90, which gets left out except for a bus route I would never use. I am retired, on fixed income, my property tax is twice what I paid per year for mortgage, tax and insurance when I bought the house, and will not live to see any of this completed.
EAST KING COUNTY	No bus or trains on CKC Trail, keep as pedestrian and bike Drop the environmental study between Bellevue and Bothell via the CKC Trail Drop mass transit proposal from Bellevue to South Kirkland Park & Ride If all of these are not removed, I will actively work to defeat ST3 in November
EAST KING COUNTY	why should I pay for something that I will never use?
EAST KING COUNTY	Fix the freeways and highways for cars.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Light rail to Renton. ..
EAST KING COUNTY	The timeline for completing the proposed projects are ludicrously long and way to expensive! I will NOT be voting to support this expansion.
EAST KING COUNTY	Too bad tax can't be based on mileage per year through DMV tab renewal so users fund rather than property taxes
EAST KING COUNTY	ST3 is a waste of money, just like all of the other ST levies. deliver nothing on time, everything over budget, and full of [explicit].
EAST KING COUNTY	This is extremely important for the health of the region. Make it happen.
EAST KING COUNTY	You simply cannot be trusted with this project or the high sum of money involved. All the leaders of this fiasco should be fired and replaced with competent elected replacements.
EAST KING COUNTY	#1 priority should be the light rail connecting Seattle and the Eastside!
EAST KING COUNTY	\$200 annually is a Lie. First, tell the truth about the real cost and then ask the survey. Car tabs alone will be \$200 per car. Now add in increase in sales tax and property tax. Let's not overlook the cost of inflation and the overrides between now and 2041. The transit authority will come a beggin' at least 5 more times before it is done. Speak the truth...just once. PLEASE.
EAST KING COUNTY	No to light rail on Kirkland corridor, yes to busses on 405!
EAST KING COUNTY	STEAMROLLER OVER EVERYTHING! Keep expanding transit options! we all win when it's easier to get around. Fight the NIMBY's!
EAST KING COUNTY	I-405 from Renton to Bellevue needs extra attention. A 10-mile commute from the Renton Highlands to downtown Bellevue can take 2 hours on a bad day. The bus takes an hour, at least, and doesn't run often enough to make commuting for work easy on a bus. More needs to be down to facilitate transit into Bellevue from Renton and Kent, and other lower income suburbs. Or give people who are simply traveling through Renton/Bellevue need to be given ways to travel and stay off of 405 to open it up for those that must make that commute.
EAST KING COUNTY	Rapid transit funding takes money away from maintaining our roads and freeways and I5 is in desperate need of improvement and the need is critical. Our transportation needs can not be met by ST3 only. It should focus only on the most traveled corridors and use an integrated solution that relies on both rapid transit AND improved freeways.
EAST KING COUNTY	Thank you for bringing additional transit to the Eastside. We are one of the fastest growing areas, and are eager to be connected.
EAST KING COUNTY	I think by not using current infrastructure of the current rail system that runs along I 405 from Renton north bound is a huge waste! BRT feels like a joke. The current tollway slowed commuters way down and made traffic more horrendous, so that buses could at least make their rapid transit speed of 45 mph. Didn't seem to meet the needs of the people. Seems more people would utilize a rail system than a bus system and now that bus stop locations have been Deminished it makes it harder to get utilize bus transit. Build a rail system on current rail path along I 405, it is highly necessary.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	I fully support adding better public transportation within Seattle and also it's suburbs. In the long run, I think trains and light rail should be a priority over buses. Train and light rail is easier to navigate, has no negative impact on traffic, and is more efficient.
EAST KING COUNTY	Consider shifting the construction schedule to finish projects more quickly. 25 years is too long of a wait to connect issaquah with light rail.
EAST KING COUNTY	By the time you get this 25-year plan built it will be obsolete. Build faster! Include light rail from Renton to Lynnwood.
EAST KING COUNTY	I can't read the descriptors on my phone so I selected other. Why the hell is there no light rail going up and down the 405 corridor?? The right away was there for the taking you stooges!! Now you suggest more busses to travel on lanes we don't and won't have. You guys are super lame. Just look at where traffic is the worse and add rail there!! Start from Seattle and Bellevue and work your way out. You can't even connect Renton to Bellevue in a sensible manner. Look at a map...the cities are next to each other. Stop worrying about the idiots that want to live 20-40 miles from work. Who care about the guy who lives in graham and works in Seattle? Not me...they should move closer to work. Don't encourage sprawl.  Don't tax my property. Make the riders pay a fair share and use gas tax for the rest. Tax the rich, tax the rich, tax the rich. You guys are a broken record.
EAST KING COUNTY	Are you trying to lay too much on the voters at once? Historically, the public seems to like a smaller pill more often rather gulping down the whole bottle. You will have more success laying this out over 3 different votes. Look at the history. This even applies to school district asks.
EAST KING COUNTY	The more, the merrier, the faster, the better. Seattle must lead in transitioning more cities to rely on public transportation and making green travel the norm. Thank you!
EAST KING COUNTY	Businesses will begin to leave the Puget Sound area if we don't commit to a plan. More Eastside projects would be good... Kirkland stop on light rail?
EAST KING COUNTY	I do not support paying for transit with property taxes or car tab fees.
EAST KING COUNTY	Rail and Light Rail need to be prioritized. BRT means more vehicles on the pavement - this is not viable in the long run. Seattle is a leader in so many things. Unfortunately, the voters are often selfish and short sighted. The individual car is not the solution, it's the problem. We must provide viable alternatives, sooner rather than later.
EAST KING COUNTY	I believe the state needs to find a different taxing authority for these projects. Instead of a regressive sales tax burden, there should be an income tax. Since these projects mainly benefit future commuters, not current property owners, a more creative tax on businesses or commuters needs consideration. It is unfair to put this tax on current residential property owners who will probably have moved or be too old to use anything but the shorter-time line on the shoulder-use buses.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	I live in Kenmore and my top three priorities for ST3 are: Bus Rapid Transit (BRT) on SR 522 and NE 145th Street ◦Additional 300 stall parking structures along SR 522 - one in Bothell, one in Kenmore, and one in Lake Forest Park - to provide access to BRT ◦Light Rail Study for future SR 522 light rail
EAST KING COUNTY	25 years is unreasonably long.
EAST KING COUNTY	I believe that improving public transit will only help Seattle/surrounding areas. If transit is more effective and more easily accessible, people (including myself), will be more likely (and able) to use it! I strongly support public transit improvements of all kinds!
EAST KING COUNTY	this plan should have been done adn completed 20 years ago
EAST KING COUNTY	Enough with the buses, build some rail along, I5, I90, and 405 (all of it!). I will not longer support measures that have bus as part of the solution.
EAST KING COUNTY	I really hope parking is a strong component at all stations outside the city. This is still a car dependent area. I know from personal experience that the south Kirkland and south Bellevue park and rides are useless after 8 am, as they are filled to overflowing with commuters. If you want people to use the buses, build more parking! Also please consider partnering with car to go, or a similar service. A city dweller could take a bus / rail to the burns, pick up a car, and continue the rest of the way to their destination (probably not easily on transit). Alternately, a suburban type could take the bus / rail into the city for an evening event, and afterward, take a car to go back to their park and ride in just minutes, instead of waiting an hour or more for a return bus home - late night service to the eastside is crappy, which makes sense as the volume isn't there.
EAST KING COUNTY	My concern is the cost. What is the ridership going to look like and cost of ridership? This plan is also very drawn out with little to no impact short term. As a resident of Kenmore it takes me 45 minutes to get 1 mile due to all of the tolls and construction. I see no benefit yet and would like this also addressed.
EAST KING COUNTY	I like light rail not a fan of rapid buses,I may not understand them though. Are they like light rail in the sense, only on Highway with hubs to get on off at not getting on city streets? I'm guessing staying on hov lanes. Whatever you do if there is no free parking at hubs people will not use them.
EAST KING COUNTY	Build all light rails first. Building them shouldn't take too long! We need them now!
EAST KING COUNTY	Increasing sales tax is regressive and affects poor people more than the rich. An increases in sales tax should not be used to fund ST3. Instead, increased property taxes and motor vehicle excise taxes should be imposed.
EAST KING COUNTY	I want a bus to replace the 250 bus from Overlake Transit to Overlake Park and Ride to Seattle
EAST KING COUNTY	Please provide secure parking at the UW station.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Why do we need links to Tacoma and Everett? We need more actual space on the light rail and more parking, not extended routes. It's already miserable now that we added a couple more stations. Renton needs more parking and transit, it's heavily utilized.
EAST KING COUNTY	The staggering lack of parking planned for rail as well as buses is a huge problem. The cost at \$200 per adult is far too high for the low level of services planned. In short, add substantially more parking immediately to all existing rail line centers, and add longer trains. Buy and run more buses immediately. Cost sensibility is critically important.
EAST KING COUNTY	consider using existing railroad right of ways that are now utilized as bike and walking paths
EAST KING COUNTY	I have a really hard time believing that this proposal will cost the average adult driver only an extra \$200 a year. I don't have any confidence that this will resolve our traffic woes. Invest in more buses and commuter trains while WSDOT should build more highway lanes. We need a balanced approach, not a fantasy of light rail. Residents are hurting financially just to make ends meet let alone pay for something so massively expensive. I vote "no".
EAST KING COUNTY	The oppressive government of this region will, of course, shove this solution down our throats. It doesn't really matter how we vote or what these surveys say. You will lie and cheat to get what you want.  I am looking very much looking forward to moving back to the eastern US once you make it too horrible to stay here. It's getting pretty close! Crack addicts everywhere, no values whatsoever. It's a fetid and horrible place to live.
EAST KING COUNTY	Remove multiple fees when changing buses or light rails in one journey. A quick bus ride down down can quickly turn more expensive than parking downtown for two people if you have to make a connection.
EAST KING COUNTY	I am all for these projects as long as they do not take away from great pedestrian and bike pathways that allow for outdoor recreation (i.e. I strongly oppose any transit addition to the cross Kirkland corridor).

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>Plan priorities, schedule, and construction funding: Let's be sure to consider (are these 2012 publications still current?):</p> <p>Thinking Outside the Farebox: T4 AMERICA (Transportation for America) Creative Approaches to Financing Transit Projects <a href="http://t4america.org/wp-content/uploads/2012/08/T4-Financing-Transit-Guidebook.pdf">http://t4america.org/wp-content/uploads/2012/08/T4-Financing-Transit-Guidebook.pdf</a></p> <p>Innovative Funding Sources for Transit September 10, 2012 <a href="http://www.apta.com/mc/annual/previous/2012/presentations/Presentations/Team-Two-Innovative-Funding-Sources-for-Transit-Final-Report.pdf">http://www.apta.com/mc/annual/previous/2012/presentations/Presentations/Team-Two-Innovative-Funding-Sources-for-Transit-Final-Report.pdf</a></p> <p>Beyond the above, don't forget the tried-and-true: lottery! Develop games for each of the light-rail segments, e.g., Redmond, Issaquah, etc., start them NOW, and let the construction scheduling formula be determined in part by each community's participation. Continue these games for the duration of paying for the segment, especially by selling the game pieces at the stations, and even on the rail cars.</p>
EAST KING COUNTY	<p>The current proposal is too focused on the city of Seattle and light rail. Pierce, Snohomish, and the east side of King County get little benefit but yet have to pay the same amount. Bus service is far cheaper and is much more able to shift as employment and housing areas shift and grow. Light rail should have a place but the cost and very long build out period make it impractical.</p>
EAST KING COUNTY	<p>Why do always go after property taxes instead of everyone that would be using it... All the apartments being built to jam up the roadways to begin with? I live the buses and transit but the years and property taxes suck!</p>
EAST KING COUNTY	<p>Accelerate the timeline. 25 years is ridiculous to wait for light rail in a region with these resources that is growing at this rate.</p>
EAST KING COUNTY	<p>Waste of tax payer money. Has yet to reduce traffic on I-5 or I-405. Even spending 155 million on north 405 traffic is still bad. The light rail system should have started going north as far as the money would have funded . Not making the first part go to the airport. Did nothing to relieve congestion, north or south . Really the airport? Paine Field would have made more sense.</p>
EAST KING COUNTY	<p>Keep mass transit on I 405 and I -5 do not put them on city trails especially the Kirkland corridor trail</p>
EAST KING COUNTY	<p>Do the Issaquah light rail line first!</p>
EAST KING COUNTY	<p>We need to speed this process up. We do not have 25 years to wait!!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	I strongly suggest you separate out the 3 issues; Light Rail, Bus Rapid Transit & Commuter Rail and make them stand-alone issues on the ballot for the voters of this State. I strongly oppose the expansion of Light Rail. It's a mode of transit that will be obsolete before it's finished and the cost vs. the benefit is staggering.
EAST KING COUNTY	I'm strongly for public funding of extensive transit options. I wish the greater Seattle area to not suffer some of the problems the San Francisco bay area suffered from in not adequately planning for growth, which disproportionately affect poorer folk. Good transit options and allowing for city growth are among the better ways of heading off some of these problems before they become too acute. Thank you for the work that you do.
EAST KING COUNTY	light rail from redmond to downtown seattle direct.
EAST KING COUNTY	Parking is essential at light rail stations, particularly on the east side. if one has to drive to the station, parking must be available.
EAST KING COUNTY	Raise taxes higher TEMPORARILY go get the funds to build out ST3 faster! Even the bus transit it too far out!!
EAST KING COUNTY	Light rail coming from the north (Northgate, Shoreline, Edmonds, Lynnwood) NEEDS to have stops in South Lake Union. Stopping at the Convention Center simply isn't good enough. South Lake Union will soon be the employment center of Seattle. It's silly that I'll need to ride link rail PAST my office building only to catch a northbound bus back to SLU.
EAST KING COUNTY	I have no faith in Sound Transit's ability to complete these projects in a cost efficient manner. Authorizing Sound Transit to raise our taxes in any way is a bad idea.
EAST KING COUNTY	Extending light rail to Redmond through Bellevue is the wrong approach. Why would anyone take light rail for 45-50 minutes when they could take an express bus in 20-25 minutes. Light rail is needed across SR-520.
EAST KING COUNTY	Better late than never. Let's do it.
EAST KING COUNTY	I do not notice anything particularly helpful to Newcastle. The South Bellevue park and ride is always full in the morning, as is the Mercer Island one. Those are our only options.. Most people just give up. A bus comes through on Coal Creek Parkway taking a long time to get to the Bellevue park and ride, where a transfer can take you downtown. And from the Newport Hills park and ride, you can get to the U district at certain times in morning. I wish a bus would come down Duvall and Coal Creek (same road) and just get on the freeway and go downtown.
EAST KING COUNTY	Please do not put transit running on the Kirkland corridor. Keep it on 405
EAST KING COUNTY	Do not put light rail or buses on the Kirkland corridor. Transit in that area should be run on 405
EAST KING COUNTY	Anything that doesn't go from Redmond to Seattle directly is pointless for many people.
EAST KING COUNTY	As a retiree living in the north end of Renton (3320 Aberdeen Ave NE) no bus comes anywhere near my home. The parking lots are full before I ever leave my home so I'm not able access mass transit. Worse, bus rapid transit forces my wife and I out of diamond lane to speed the bus. For me its a negative. When I look at where my sons live they won't have access until I'm long dead so there is no inducement for me to support this plan. Considering the car haters have reduced the number of parking lots there is no likelihood that I'll be able to benefit from the proposal

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	The whole plan is a day late and a dollar short. 25 years - seriously? Puget Sound's transit options are an embarrassment for a supposedly metropolitan city.... why does the plan not cover the new 520 bridge? The commute from eastside to Seattle is already intolerable, and this plan does not solve that unfortunately....nevertheless I am in favor as we need to do SOMETHING.
EAST KING COUNTY	Linking east side is crucial. Can't wait for 15 years to happen. We live in the US and projects in other parts of the world don't take this long to complete. Speed up or give up!
EAST KING COUNTY	- Extension from Overlake to downtown Redmond should be moved up.  - Bus rapid transit seems like a waste of money. Why bother? You're still mixing it up with surface traffic. I don't support BRT.
EAST KING COUNTY	I think light rail needs to go down I 405 from I 90. Then down Hwy 167.
EAST KING COUNTY	Bellevue to Seattle please
EAST KING COUNTY	What about Kirkland? Please develop the former BNSF railway to include light rail with bicycle/pedestrian access. I would love to be able to commute from Kirkland to Sea-Tac airport and Olympia!
EAST KING COUNTY	Needs to be completed much faster.
EAST KING COUNTY	Please remember those of us who use public transportation exclusively. Local routes are a necessity for us. I don't own a car... so if I go, it's on the bus, or the train, or...
EAST KING COUNTY	Can't afford this project - my taxes would be so high I would probably have to sell my condo. I would vote No!
EAST KING COUNTY	More parking at light rail stations. The parking at the Tukwilla station is a joke. It makes using light rail almost impossible at times, and if you can't rely on it, then why even try?
EAST KING COUNTY	get it going.....the puget sound region is behind 50 years compared to other major cities.....get big corporations to help foot the cost (msft amzn sbux f5 amgen etc.) because they won't benefit in the future if no one wants to move here because of gridlock
EAST KING COUNTY	The Cross Kirkland Corridor needs to stay unchanged, without buses running along it.
EAST KING COUNTY	Why so slow? Look what Los Angeles did in a much shorter time frame. You need to look for money from other sources, most transit users are not home owners but renters, yet you want homeowners to own the lion share burden to pay for regional transit. This is a heavy burden that adds to rising home prices making home ownership in our region unaffordable and disproportionately affects seniors and families with children. If you are going to also charge a tax on motor vehicle then you better create the opportunities for car owners to utilize transit. Not building adequate parking at light rail hubs particularly in the suburbs defeats the purpose to get us out of our cars and onto transit. Voters will not agree to pay for these urgently needed expansions if they cannot see the value in the associated cost. Be smart if you want voters to buy in to pay for these expansions, do not over burden vehicle and homeowners. More user taxes and a head tax (capturing renters) or the promotion of a Statewide income tax would be more appropriate and fairer taxing mechanisms.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	I am worried that the comprehensive nature of this plan will doom it to failure and we definitely need SOMETHING to help with congestion. Perhaps if you break off the pieces of greatest need (where traffic flows are currently the worst) into a separate package then folks would be willing to pay for it. By trying to give something to everyone the package gets even more expensive and, I think, is in danger of failing. I acknowledge that folks who would not receive service in their area are not going to be inclined to want to pay for it. So I am not sure what other alternative funding sources are available that would not penalize those folks.
EAST KING COUNTY	Light rail is the most expensive, least efficient and least flexible means of transporting people. Using railroads to transport people has always been a losing proposition. In the 19th century, when railroads were at their zenith, J J Hill who built the Great Northern Railroad said that "the passenger train is like the male breast, neither functional nor ornamental". Hill didn't use the word "breast", his term was far more colloquial.  Buses are practical as is Uber and jitneys. Rail is not.
EAST KING COUNTY	All of these plans sound great. However, what is frustrating for me is to live 6 miles from my job and not be able to take transit because to do so requires a commute of at least an hour when the very expensive drive only takes 20 minutes. This is because I live by the 520 bridge and work at UW. I cannot understand why there are no plans to put a train or light rail across 520. At present everything is centered on East Bellevue. It actually takes me longer to get to East Bellevue and the I 90 bridge than it does to just drive to work. There are no Park and Rides nearby that access frequent transportation options 7 days a week, meaning that no matter which way you slice it, you have to drive or Uber to get into Seattle evenings and weekends. I am sure these plans will be great for people who live and work in targeted areas. Meanwhile I will continue to pay hugely for "upgrades" on the 520 that have not benefitted me in the least.
EAST KING COUNTY	If you're going to increase service and want more people to use them. You HAVE to add more parking. Parking is a deterrent right now.
EAST KING COUNTY	We should focus exclusively on light rail to reduce congestion and environmental impact as a result of gasoline vehicles. Why such projects take decades when they took much shorter for countries like China? We should be able to do better than this preferably within 8 years to complete all the light rail projects proposed above. Take that as a challenge.
EAST KING COUNTY	Quit improving service to areas that are already well served e.g., Seattle and spend more on the eastside I 405 north south from Renton to Bellevue and beyond that are seriously underserved now. Put the old rail line from Renton to Woodinville to use for transit.
EAST KING COUNTY	I'm wondering if it would make more sense to invest that kind of money in automated driving systems and other improvements to hasten the arrival of  A viable self-driving transit system. Rail may become obsolete by the time these projects are done.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Not sure why ST has an all (Rail) or nothing perspective on the CKC in Kirkland. Seems disingenuous to suggest only trains will work. While Kirkland is expected to pay \$20M or more per year and AGAIN get nothing! How do we extract ourselves from the RTA boundary, please?
EAST KING COUNTY	Do not put the bus route on our walking path in Kirkland. I am Very Strongly Opposed to this as it has become a huge benefit for Kirkland Residents, making our area a healthy place to live. Exercise is good for the body and mind. This path helps everyone in Kirkland!!
EAST KING COUNTY	Sick of increasing tolls, REDUCTION of general use lanes on 405 is stupid and obviously not in the best interest of the majority. Even exit lanes were removed and it is worse than ever! In any event, it reflects very poor management and citizens are predominately pissed-off. 405 has been made worse and cause too many fender benders and accidents, which makes the lane reduction even worse! I passed FIVE on the way from Kirkland to Kent. The State is jeopardizing our safety so they can take away from us and add a new tax. We ALREADY paid for all of this now we are being punished? And you want more? No way! Most citizens can't afford the tolls. \$10 to go to Seattle is ridiculous. \$10 Kirkland to I-5 is bureaucratic abuse. WA has high taxes and I don't believe they have been used well. Taxes are ever increasing at a rapid pace. We are not stupid. I don't care what you call it, every increase to our cost of living imposed by the government is a tax. Officials do not respect their roles as fiduciaries and custodians of OUR dollars. I might be more supportive IF the State had not screwed up I405 and 520 so badly. This is just more taxes on top of decades of unsuccessful projects that do not service the citizens of Washington State. Don't build on our Cross Kirkland Corridor walkway and park. Noisy stinky buses will ruin it for everyone here. Unscrew the 520 and 405 mess and you might find less resistance to other "improvements."
EAST KING COUNTY	25 years is way too long to get light rail to Issaquah. By that time I will be retired. 10 years seems more reasonable.
EAST KING COUNTY	The bus routes detailed in the plan should be replaced with light rail. I believe the most urgent part of the plan is developing light rail between Seattle and East Side/Redmond!
EAST KING COUNTY	I don't think Sound Transit should have so much say in this project. These stations, either light rail or bus stations are not good unless there is a parking lot for cars. Otherwise, how do I get to one and use them? I live a long and don't have the luxury of someone dropping me off and picking me up. I think there needs to be more police at some of the more dangerous locations.
EAST KING COUNTY	Let's do this!
EAST KING COUNTY	Please share data analysis behind these proposals, and expected ROI. It currently appears made up. I'd love to receive it via ktropin@gmail.com
EAST KING COUNTY	Having a light rail option to Redmond would really help with 520 access issues.
EAST KING COUNTY	The build out will take too long. I would be willing to pay more money if it was done sooner. We have absolutely gridlock and need alternatives that keep us off congested roads.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Existing services are inefficient and poorly managed. Until Sound transit has a publicly elected board and the county level services are fully integrated I will not support any measure to increase funding to ST or any other transit.  WSDOT, ST and the others running transportation programs in this region have failed to take appropriate measures to implement projects to address real and pressing needs. Instead we get ideological failure and work-programs that do little but extract money from the community with little actual benefit.
EAST KING COUNTY	More East / West options with increased speed should be the highest priority. i.e. the link from Redmond to Seattle or making the bus system more efficient. All options need more parking availability.
EAST KING COUNTY	Make it happen faster!
EAST KING COUNTY	Light rail to Ballard should be completed within 5 years.
EAST KING COUNTY	Like projects to be done quicker. 12-15 yrs is forever. Traffic is killing us now
EAST KING COUNTY	Find some leadership and get it done!
EAST KING COUNTY	I will vote NO on ST3 if there is any mention that rail or BRT will be added to the Cross Kirkland Corridor. The CKC needs to remain a trail SOLELY for pedestrians and bicyclists. I strongly believe that adding the bus station on 85th St. and increasing buses on 405 will accomplish the transit needs of the area, so there is no need to ruin the trail that is enjoyed by so many people.
EAST KING COUNTY	Connecting the eastside (Kirkland, Bellevue, Redmond) is extremely urgent and needs to be recognized as a priority. 405 is the "other freeway" that parallels I-5 to move people north and south along either side of Lake Washington. There are major commuters that congest these areas that need to be dealt with to ensure the livability of these cities. What is going on with 405 between Lynwood and Bellevue is horrendous and cannot be dealt with with current means. BRT has to be functioning at higher levels and Light Rail needs to get established to start making a difference in people's transportation habits. Right now - it is so arduous to think about not driving a car that it doesn't make sense - this needs to change so people have choices. Right now, they don't.
EAST KING COUNTY	lets move forward!
EAST KING COUNTY	this virtually skips Sammamish, north bend, will not make it easier commute for those of us who live in Sammamish. At this point I work on first hill, I have to take 2 buses to get to work, a 25 minute commute by car, takes me an 1 hour and 15 minutes. The light rail should go straight along I-90 corridor from North Bend right into Seattle, no stopping in Bellevue.
EAST KING COUNTY	Sooner rather than later amigos; this is a long time coming
EAST KING COUNTY	The cross Kirkland corridor should be used for light rail and perhaps busses in the short term. Transit trumps trails.
EAST KING COUNTY	Rapid transit buses should be the priority. They are the most efficient and the least expensive option.
EAST KING COUNTY	most important is park and ride at light rail stations
EAST KING COUNTY	Better late than never.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Goods and services do not move via rail or bus. Everything stocked in stores is delivered by truck via roads. Plumbers, electricians, and construction workers needs to use stocked vehicles via roads. Sales reps with carloads of equipment to demonstrate and samples to distribute cannot use transit. Many thousands of people work in these types of jobs that will never be suitable to use transit. We need roads and we need them to be maintained. For those who choose to live far from where they work, buses are a better option and are more efficient and much less expensive than light rail.
EAST KING COUNTY	The walking, biking corridor just east of Lk Washington Blvd in Kirkland should be left as is. Thousands of residents use the trail for recreational activities year round and it would devastate property values and the quality of life for residents who enjoy the serenity it brings to urban living. I-405 is a far better solution.
EAST KING COUNTY	The only way I would support more transit for me to use is if it could get me from Bellevue to Bothell in the same 30 minutes it now takes me to get to work everyday. To get from my house to work takes 3 buses and several hours. To me that is not rapid transit.
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail Remove the environmental study between Bellevue and Bothell via the CKC Trail Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride If all of these are not removed, I will actively work to defeat ST3 in November
EAST KING COUNTY	Convenient parking so you could use the service. I have to walk about 3 miles. If I use your service there is no place to park a vehicle and have to park in reseed risk street and still have to walk a mile,
EAST KING COUNTY	What you should be planning is a railway system that people can take CONNECTED, if not from Everett, at least from Bothell, to Kirkland, to Bellevue, to Tukwila, to Kent. Trains are better than the buses which can get stuck in traffic. You need trains. But your current plan starts and ends partly somewhere only. Plan for having a REAL project for once and not useless ones like the stupid lanes on 405 that cause more problems than good. Learn people. A real railway transit are like the ones in NYC or Chicago. If you want to help us, help us and don't just spend money to think you make yourselves look good.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>The fact ST3 continues to maintain buses as an effective transit mechanism anywhere outside of the core of Seattle supports my contention that transit planners are hoping traffic gets so bad and if they dis-advantage 95%+ of the rest of the commuters (by making more not less transit lanes), residents of the Metro area will have to ride a bus or walk. I live on the Eastside and bus transit is so sparse and poorly designed, for me to take a bus anywhere I need to go would take 1 1/2 to 2 hours, one way. To perpetuate this as effective transportation is nothing short of moronic.</p> <p>The current ST3 plan SHOULD include major NORTH-SOUTH light rail on BOTH sides of Lake Washington; also, nowhere in this plan do major transit elements interconnect except at Seattle hub sites. I consider this to be an egregious failure for a 25 year plan.</p> <p>I find ST3 to be another ill-conceived and bungling attempt at transportation that (1) has not even a minute chance of achieving even minimal transportation relief nor effectively providing even a basis for future transportation needs, (2) will cost 10's or 100's billions of dollars in taxes that could be used for worthwhile projects and programs, and (3) only serves to bolster the opinion of many that those who are in 'control' of our transportation future should be re-assigned to more menial non-decision-making jobs.</p>
EAST KING COUNTY	<p>The light rail systems that are currently built are not being used enough and are costing more money to tax payers than they are benefiting. There is no current benefit to spending 50\$ billion on a system that will not reduce traffic. People don't want to ride mass transit.</p>
EAST KING COUNTY	<p>I live on Mercer Island. I cannot use Mass Transit because the Park and Ride is always full of off-island parkers. I cannot take the bus to a Sounders game because by the time the bus is always full and there is never room for even one islander to get on. We need better service NOW.</p>
EAST KING COUNTY	<p>Expansion should be covered with existing LR taxes/fees. Build extra lanes for vehicles!!! This state seems to do everything it can to punish drivers who actually fund transportation projects.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>Please stop... this is a boondoggle. Mass transit is used less today than in the '50s. Yes...we have growth but let the market decide how to best handle that. For example: if everyone worked from home ONE day per week, we'd reduce congestion by 20%. Or people move to be closer to their jobs. DOT spends plenty on the roads, there is a pretty decent mass transit system in place that is underutilized. Let the market figure this one out.</p> <p>If you must build something, find the money elsewhere. As taxpayers we are endlessly being nickel &amp; dimed. Our family estimates that between Federal and State taxes we paid about 38% of our gross income - it just never ends and you keep asking for more. This strikes me as a power/money grab for perpetuating 25 years of union jobs and Sound Transit 'make work' projects. And let's not even get into the governments inability to build anything on time or on budget. Frankly, it gets harder and harder to believe even the best intentioned of you.</p> <p>I vehemently oppose this proposal and will vote thus in November.</p>
EAST KING COUNTY	<p>Busses aren't going to do anything. Ridding the bus takes forever and the get stuck in traffic. I live in downtown Kirkland and hate taking the bus to seattle because it takes forever. .... We need the light rail up and down 405, I-5, 520 and I-90 Can't believe a new bridge was build and no rails were put on it.</p>
EAST KING COUNTY	<p>Why isn't light rail even planned for Renton and that general vicinity? It is quite a shameful slight for this area that needs the same transit options as Seattle.</p>
EAST KING COUNTY	<p>The timeline needs to be substantially shortened. Pick up the pace of development. Make sure the engineering, construction, and project planning provides internships and job training for state citizens of all ages. Look at the construction and engineering not so much as a sunk cost but as both a jobs creator (including job training) and infrastructure development.</p>
EAST KING COUNTY	<p>Issaquah rail needs to be higher in priority! Come on guys, 90 will not move by then.</p>
EAST KING COUNTY	<p>As a region, we need to do all in our power to make Metro work better before spending one more penny on Sound Transit, other than building out the I-405 north/south solution; we should create a wide range in end-point consumer interchange options at every Metro and Sound Transit stop, create extensive parking around every Sound Transit interchange point, and work to integrate car sharing, and bike parking to link to all Metro and Sound Transit buses.</p>
EAST KING COUNTY	<p>I'm not sure this survey really provides for meaningful feedback on the plan. It seems designed specifically to support the plan, and not to understand how people feel the ST3 plan will affect them. This project is enormous in scope (hooray!), but it also heralds years of construction-related congestion, increased taxes, and nightmare commutes that can have a profound impact on the quality of life in our area. The survey didn't address any of my immediate concerns - mitigation for the impacts caused by this expansion.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	I'm a strong believer of bus rapid transit on 405. That has to be a cheaper solution than developing a new rail structure on the Cross Kirkland Corridor. If transit were to occur on the Cross Kirkland Corridor, then I would no longer support for the above projects.
EAST KING COUNTY	whole plan need to be redone you mist the boat we on the east side are paying a lot of money to help make down town Seattle commute a lot better as we on the east side sit in traffic on 405. We have a rail road line running from Renton to Lynwood let put the bridge back in over 405 and start using it for light rail. No more support from this side of the lake until you start giving us the service we are paying for.
EAST KING COUNTY	I do not trust giving ST 50Billion in one vote
EAST KING COUNTY	These projects are way too far out. Get these going much sooner. Very strong supporter of transit, but waiting 20 some years for some of these projects, is going to hard to get support from the average voter
EAST KING COUNTY	The time planned to extend light rail service to Everett and Issaquah of 25 years is ridiculous. Those connections are needed now. A 5-10 year timeline is too long as well. The longer Sound Transit delays building the extensions the more diificult and expensive it will be to build and develop. Sooner is better. No reason not to start constructing north and east side lines serving Everett, Redmond, Bellevue, Issaquah now and link them to the main lines in a few years. Same in the south with lines serving to Tacoma and JBLM. Start building the lines now, and connect to the main lines in a few years. Demand is already here. Build now. A comprehensive network of light ail lines will provide relief off I-5 and I-405. A single north south line from UW to downtown and Federal way while useful for those who live along that line is not a comprehensive network and has minimal effective use by the broader populace in reducing vehicle congestion in the high density areas. I don't use transit now because it doesn't go where I need to go. A light rail along 405 corridor, Everett to Bellevue to Renton and connections to Seatac, I would use all the time.
EAST KING COUNTY	Sound transit plans are too expensive and take too long for something that is slower than buses in general. It might be worthwhile spending all this money on building bus only lanes.  I'd strongly support transit and call it a worthwhile investment if the speed of light rail was at least 60mph on average if not higher.  As it stands, we pay too much for something that takes too long to build and offers very little overall value; it is faster to bus it down, drive or take a cab/uber than to take the light & slow rail.
EAST KING COUNTY	waste of money
EAST KING COUNTY	You need to build more parking facilities so people can actually use your transit system that we all pay for. Your little rail system won't do any good if we can't get to it.
EAST KING COUNTY	NO LIGHT RAIL ON THE CROSS KIRLAND CORRIDOR! NEVER.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Light rail on the Eastside should be highest priority- not a 25 year wait.  Light rail in general should be the highest priority, with BRT as a stop-gap measure only that includes planned sun setting as light rail comes on line.
EAST KING COUNTY	Sound transit has proven to be an over zealous behemoth that cannot be trusted. The entire organization needs to be dismantled and redone with a structure that is representative of the all of the people paying for it - not just the socialists in Seattle.
EAST KING COUNTY	When will LR be extended from the University into Bellevue? This would allow my family and I to head to Seattle (from Redmond) more often.
EAST KING COUNTY	Spend tax revenue more wisely. Quit wasting money and there will be no need for new taxes.
EAST KING COUNTY	A joint plan that includes incentives for large companies to move operations into Renton, Tukwila and further south will help spread traffic flow and relieve congestion. If businesses continue to move into the Bellevue and Seattle core, you will see middle class and upper middle class workers pushed further out of Seattle and eventually out of the state.
EAST KING COUNTY	We're taxed enough already. What happened the money we gave you for this stuff?
EAST KING COUNTY	Thank you!. Its a bold and comprehensive proposal that will bring Seattle into the modern era!
EAST KING COUNTY	The plan should contain some wording, action towards evaluating the fitness of light rail in the 522 corridor, which is growing rapidly.
EAST KING COUNTY	I am a real estate developer now constructing Woodin Creek Village in Woodinville. Woodin Creek Village is located in the downtown pedestrian core adjacent to City Hall. It will include 1,000 new apartments and 75,000 sf of retail space when completed within 5 years. The first phase of 237 units is now partially complete and the first building with 75 rental units is now complete and totally occupied. When this project is complete, it will add about 1,500 new residents to downtown Woodinville. Right now, it is very difficult to access I-405 at rush hour and it will be getting much worse with Woodin Creek Village. I urge you to consider expanding commuter service to downtown Woodinville as soon as possible. The southern property line of the new development is adjacent to 171st Street, which is an existing bus line. Please don't hesitate to contact me at 425-885-1641 or at dreiss1947@msn.com for more information. Thank you for your consideration. Doug Reiss, Member, Woodin Creek Village Associates, LLC.
EAST KING COUNTY	In favor of rapid transit buses not in favor off light rail. Because you grouped these two together I have opposed most it it.
EAST KING COUNTY	I think it is all needed.
EAST KING COUNTY	More North-end light rail support for Kirkland, Bothell, and Woodinville would be great. Light rail should extend all the way around Lake Washington.
EAST KING COUNTY	This should have been done long ago. Let's get going!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	We are going to be driven out of our home due to ever increasing property taxes. We are on fixed income and we just cannot afford to pay any more. I assume all of these projects are going to have an effect. Just from last year to this year our taxes went up \$1600 from \$6300 to over \$8000. If this keeps up, in a couple of years our taxes will more that our house payment. We just cannot afford to pay any more!!!
EAST KING COUNTY	Need much more focus on rail and less on bus.
EAST KING COUNTY	Why isn't there a proposal for the Seattle to Issaquah-direct line? I ride the bus from the Eastgate Park & Ride and they are usually packed buses. This line needs to have improvements made especially with the expansion of houses and developments out eat of Bellevue. The proposal you have from downtown Seattle to Issaquah, doesn't help all the folks that use the I-90 corridor from Seattle.
EAST KING COUNTY	EXPAND SOUND TRANSIT DISTRICT TO PASS ALONG THE COST TO OTHERS THAT WOULD USE THE SERVICE. 25 YEARS TO EVERETT LINK RAIL IT WAY OFF BASE AND SHOULD BE REVISED TO NO LONGER THAN 15-17 YEARS IN LIEU OF THE OTHER ROUTES BEFORE EVERETT. EVERETT BOEING IS THE BIGGEST EMPLOYER AND EVERETT IS A MAJOR CITY IN SNOHOMISH COUNTY THAT SHOULD GARNER LARGER CONSIDERATION OF CONSTRUCTION TIME LINE. WHILE I DON'T USE PUBLIC TRANSIT I CERTAINLY WOULD GETTING TOWARD RETIREMENT AGE AND LYNNWOOD STARTING THE CONSTRUCTION OF A MAJOR DOWNTOWN DEVELOPMENT NEEDS TO HAVE MORE TRANSIT OPTIONS TO MOVE PEOPLE FROM THE ROADS TO THE PUBLIC TRANSIT (BUSES, LIGHT RAIL, EXPRESS BUS ETC). I AM FULLY APOSED USING PROPERTY TAXES TO THIS DEGREE BUT COULD BE SWAYED WITH MY MANY BOEING CO-WORKERS IF ABOVE WAS IMPLEMENTED AND SOUND TRANSIT BOUNDARIES WAS EXPANDED AND MAYBE COULD BE FOR PROPERTY TAXES IF HEAVILY REDUCED TO THE DEGREE IT CURRENTLY IS PROPOSED. ITS TIME TO LOOK AT BOUNDARY EXPANSION BIG TIME AND SPREAD THE COSTS. WHILE I DO FAVOR THE EXPANSION TO THE DEGREE THAT IS PROPOSED MAJOR TIMELINES OF SNOHOMISH TRANSIT (LIGHT RAIL/BUSES) MUST BE A PRIORITY FOR THE PUGET SOUND REGION TO GET MORE OPTIONS TO THE LYNNWOOD, EVERETT PATRONS.
EAST KING COUNTY	<p>Please provide realistic cost and timeframe estimates. The \$200 per year per person is wrong and misleading. For example, what would it cost for a family of four who has 3 cars, lives in a home valued at say \$800,000 with a combined family income of say \$150,000? I suspect the taxes would be significantly higher. I would propose you provide the taxes that folks would need to pay for all the various income levels, home values, car values etc. This way voters can make informed decisions versus being told a low-ball figure that really doesn't apply to many people.</p> <p>I would also recommend a gas tax as an alternative taxing mechanism. Gas prices are low and people would more likely support it. The Car Tabs is an expensive and flawed approach that is misleading giving its MVET based, the property taxes are unbelievably high and have nothing to do with transportation and sales tax are IMO the wrong way to go and will never pass. I myself would never support these taxes.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Get these projects ( all ) done quickly and under budget! Its time to get it done. If we do not Expand to all heavy traveled areas then mass transit fails. Get this light rail added to more citys and it will get people out of their Vehicles.
EAST KING COUNTY	There is a large population that lives in South King County (Newcastle, Renton, Fairwood, Kent, Auburn) that could easily be transported via commuter rails on an existing right of way. Now is the time to nix "rails to trails" and keep commuter transit available to these folks! How many folks could be taken off the freeway if rail transit was provided between these communities to commercial centers such as Bellevue, Kirkland, Lynnwood and Everett.
EAST KING COUNTY	Why does every plan always include increase in property tax
EAST KING COUNTY	Perhaps those that use public transit regularly could bear the burden of cost of such projects rather than forcing those of us that cannot utilize the transit system, due to home/work locations and commute hours, to pay for it will into the future.
EAST KING COUNTY	The survey does not discuss the light rail across Mercer Island which should be higher priority or light rail along I405 which should be done and skip the bus lines
EAST KING COUNTY	Denver was able to biold a great rapid transit system over the yeArs. it's smaller than Seattle but its transit system is considerably better. They're not charging individual citizens \$200 per year. Juust adding sales taxrs endlessly is not the way to go! Add a state income tax if you need to, but dont keep endlessly adding sales taxes.
EAST KING COUNTY	The Eastside / Redmond links need to happen sooner, Redmond should not have to wait 4 yrs after MS get their light rail
EAST KING COUNTY	Projects should be funded by big corporations that are changing the transit needs of the community they are growing in (e.g., Microsoft, Amazon)
EAST KING COUNTY	Light rail on the 405 corridor not mor buses.
EAST KING COUNTY	No investments in transit are necessary. Instead the State should partner with tech companies to pass legislation enabling use of self-driving cars and facilitate development of infrastructure for self-driving cars. That infrastructure should be funded through direct taxation of self-driving vehicles.
EAST KING COUNTY	Public transportation is a joke in Seattle. These plans are all great and greatly needed however with these times frames. I feel it will be to little to late as traffic explodes. Please expedite all of this.
EAST KING COUNTY	Timeline: completion sooner for environmental and traffic reasons.  Cost: \$200 a year is a lot for low income families. Perhaps this should be reduced.
EAST KING COUNTY	to BUILD TRANSIT ON THE KIRKLAND CROSS CORRIDOR IS A HUGH MISTAKE. ENVIRONMENTALLY IT IS SUCH A SENSITIVE AREA . THIS IS NOT A GOOD OPTION

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	some day mass transit might be more useful to more of us, but for to long, the whole north west has been in the mind set of "get in your car and go". especially since mass transit has always been so limited in where it reaches, & even w/all the new plans, its still years away. i'll probably be dead before its really useful (63 now). then, there's the behind schedule & cost over runs, & now "big birthda" is goin shut down the 99 viadut for two weeks. w/all the problems its had, how can anyone have a confidence that any public & private authority has our best interest at heart when we heard all the time about no accountability when it comes to where the money goes.
EAST KING COUNTY	Make sure that there are incentives to finish projects earlier than planned. More oversight to avoid misuse of funds and corruption.
EAST KING COUNTY	This is long overdue. I'm from NY and used mass transit my whole life. NY was smart enough in the turn of the century to foresee the importance of tunnels, bridges and train service. This area still likes to think that it's a "small town" and it's far from that. Let's face the truth that this is a major bustling city and in desperate need of alternative transportation to help alleviate traffic!!
EAST KING COUNTY	the traffic on I405 through Bellevue will not be resolved without ALSO tolling I90.....having one bridge tolled and the other not is a "head in the sand" approach.....why has traffic changed dramatically negative through Bellevue?.....it is the tolling inequity that sends more commuters south through Bellevue to get to Seattle and north through downtown Kirkland to avoid 520.
EAST KING COUNTY	Expand transit on existing rail lines and in existing transportation right of way. Tunneling is costly and time consuming.
EAST KING COUNTY	A express from Renton landing to Seattle
EAST KING COUNTY	This survey is extremely wordy - how are you getting input from limited English speaking populations?
EAST KING COUNTY	i AM ABSOLUTELY 100% OPPOSED TO ANY LIGHT RAIL USING THE NEWLY CREATED CROSS KIRKLAND CORRIDOR. EXCEPT FOR THAT I AM IN FAVOR OF ALL OTHER PROJECTS BUT IN PARTICULAR THE ONES ON THE EASTSIDE OF KING CO BECAUSE I LIVE THERE.
EAST KING COUNTY	First, I don't like sound transit. Not happy you're taking this on. I'd rather you go - anyway. The Broadway light rail seems painfully slow. I don't care that it's a "consistent" speed. It's also consistently annoying. consistently in the way. consistently a poor choice. These are baby steps for a fully grown city. We need to grow TFU and have regular modes of traffic vehicles like subways. I've been to other cities in the world that are challenged by hills, neighborhoods, and other obstacles- they handle it. Frankly, I'm hoping you fail so we can choose something else.
EAST KING COUNTY	Improved mass transit and in particular the significance of the light-rail in bringing the region together can not be emphasized enough. This is the way forward and I will happily do my part to keep it moving forward.
EAST KING COUNTY	The problem I have with the plan is (a) how slow it is to develop and (b) the tax NEVER ending.
EAST KING COUNTY	Let the people who ride the bus, train, light rail pay for any improvement. Better yet charge people riding bikes a fee.
EAST KING COUNTY	Drop the DANGEROUS proposal to put Light Rail on the I-90 Floating Bridge !!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>Pay off ST1 &amp;ST2 bonds before layering a third level of taxes for ST3.</p> <p>Avoid building new Light Rail lines/stations unless cities up-zone and improve streets to support increased density. For example, Issaquah is constrained by the urban growth boundary, narrow streets (Front Street, Newport Way, Sunset Way), so why are we spending billions of dollars for a dead-end light rail line?</p>
EAST KING COUNTY	<p>Tolls and usage taxes on roads are extremely regressive, because they punish working-class commuters disproportionately to the most well off. In addition, having to wait 20 or more years for many of these projects is absurd. It is time for Washington to institute a state income tax that can be applied as a progressive basis of income, and to put that money toward fixing our infrastructure and phasing out tolls.</p>
EAST KING COUNTY	<p>We've been paying for Sound Transit from the beginning. It was suppose to provide improved bus service to us before light rail became available. So far bus service has decreased so we have been getting less. Since light rail will never get to where we are and you are not planning parking to where we would have to go to get it, it is a flawed plan. We also won't vote for any plan which essentially writes a blank check where we would pay each year forever without any guarantees that anything will be done on-time or within budget.</p> <p>We have never understood why Sound Transit was separate from Metro and adds just another layer of government. Just is a waste of tax payer funds.</p> <p>The only time we ever use transit is if we have to go to downtown Seattle to go to jury duty. Otherwise it doesn't effectively get us to where we need to go. For example I tried to plan a trip from Redmond (not downtown) back to my house and the trip would have cost me over \$8 and would have taken 2 1/4 hours to complete because it routed me in toward Seattle and then back before routing me toward my house. I could have waked home in less time. So we are not in favor of any project or system which costs so much money and which we will rarely if ever use.</p> <p>We will be voting no and recommending others to do the same.</p>
EAST KING COUNTY	<p>Based on the past fiscal performance of sound transit, this plan is a complete and utter waste of money. Something must be done about oversight of funds before I will EVER support sound transit again.</p>
EAST KING COUNTY	<p>please stop lying, the UW station was years late and over budget. Resetting the schedule and budget does not mean you were ahead of schedule and under budget. I come up with nearly \$400 per adult, your numbers are not accurate. QUIT LYING</p>
EAST KING COUNTY	<p>please, make Redmond and Bellevue a priority!!!</p>
EAST KING COUNTY	<p>Coordinate projects with the East Rail Corridor proposals to develop the most effective, bang-for-the-buck mass transit system.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Please read my patented plan for transportation improvement using light rail (monorail) on elevated pylons down the center of freeway, and using platforms adjacent to Park-N-Rides, with passenger walkways from the parking lots already in existence to the center platforms for ingress, egress of passengers. This way, there are no Right-of Way issues, land purchases..just a simple, effective, attractive means of improving transportation, and usership. Allows connection at Park-N-Rides to public transportation, and bicycle use as well.
EAST KING COUNTY	Adding more lanes to the entire length of I405 would be of more benefit to more people at a much lower cost per mile and be more affordable, and take less time to construct.
EAST KING COUNTY	I think businesses should also share the cost of this proposal. No information was given about cost sharing for businesses. Does this mean all homeowners carry the burden of paying for this?
EAST KING COUNTY	Bring light rail sooner in the I-90 corridor from Issaquah to Seattle. Object to our area being included in the tax when we have no bus or transit service near us. 405 Renton to Bellevue should also be a great priority
EAST KING COUNTY	Transit in WA will always be hindered by our lack of a state income tax. Property taxes and sales taxes are regressive, and everyone who reads a few books knows it. I am VERY pro-transit. I do not drive AT ALL anymore. But I'm not too supportive of us continually, brutally taxing the poor when we need something new in this state. I feel a state income tax is something transit authorities should be vocally and actively supportive of.
EAST KING COUNTY	Light rail needs to go across lake wa to Kirkland to redmond. This is a massive failure to this point. Use the old bridge pontoons to get this done.
EAST KING COUNTY	Strongly support BRT (electric buses) and walking bike path along the 100' right of way along the previous rail corridor from Woodinville to Renton.
EAST KING COUNTY	Why don't you invest in high density affordable housing so people can afford to live near their work and not commute so far. It seems like a no brainer. I am opposed because of the construction/traffic nightmares this will create and the fact that by the time this is done in 25 years, I will be retired and won't care about traffic. Why so long? Can't you hire crews to work around the clock? I will support this only if the busses and light rail come every 5-10 minutes around the clock and don't serve as commuter services. Also, please invest in smaller busses that come more frequently. The only time they get close to fill is during the commute and on the way to games.
EAST KING COUNTY	This needs to be done, and I hope this is the right way to do it.
EAST KING COUNTY	234 bus used to go directly to downtown Seattle from Kirkland/Kenmore.Now it doesn't. Bring it back please.
EAST KING COUNTY	I think the value of connecting the suburbs is undervalued.
EAST KING COUNTY	Keep ST OFF the cross Kirkland corridor!!!!
EAST KING COUNTY	Get it done faster!
EAST KING COUNTY	We need rail now!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Suburbs really need additional support in terms of frequency and accessibility of transit services ie more express locations and times
EAST KING COUNTY	The plan has focused on North South routes and generally ignores the eastside. The car commute across the floating bridges has grown exponentially and the growth continues in Issaquah, Sammamish, Snoqualmie Ridge, etc, yet ST continues to ignore these areas.
EAST KING COUNTY	While I support the plan, the burden on tax payers is too high. Another financing option must be found or I will vote against it.
EAST KING COUNTY	Allow day passes across all transportation options. People shouldn't have to pay separately if they move from bus to train. That is discouraging to visitors and locals as they observe options for getting around the area.
EAST KING COUNTY	I am sick and tired of being left off the map, so to speak. The transit options in my area are horrible. I could catch a bus at the top of my street that would take me to downtown Seattle in 1.75 HOURS, or I could drive there in 30-40 minutes. Or drive to light rail and be there in 45-50 minutes including my drive time to the station. I feel like you keep adding transit in the same areas that already have pretty good transit options, while you completely ignore other areas. Your ballot measure is a big expense, and though I am pro public transit, I find myself so irritated that your planning ignores the Renton/Maple valley and Kent East Hill areas that I do not know if I can support it.
EAST KING COUNTY	1) The question about picking two top projects did not allow me to mention another that is critical - construction/completion of SR 522 BRT. 2) It is also important that the BRT system along 405 include frequent headways, several stations, and connecting Express Bus; 3) The LRT expansion to Everett via Paine Field needs to occur much sooner; 4) The Bellevue to Issaquah link is important to keep on the list
EAST KING COUNTY	London completed far more and far sooner. Do more, do more sooner.
EAST KING COUNTY	I find it difficult and very challenging to find parking at link light rail stations and would want more work and support on parking structures for the stations. What work is being done with current stations and future stations for parking. I know some of the current stations are in neighbor hoods but would want a solution or more options to park my vehicle.

<p>EAST KING COUNTY</p>	<p>1) Sound Transit should focus on light and heavy rail. If SoundTransit is going to get into the bus service through "express" or BRT routes than ST and the bus agencies in King, Pierce and Snohomish counties should be combined so that jointly they can be run more efficiently. I've never understood why my ST 545 'express' bus takes longer to get to and from Seattle than the 'regular' Metro 268 route. Seems odd to call a route express when it has more stops and takes longer.</p> <p>2) ST should focus on mass transportation and let the agencies and developers pay and be concerned about Transit Oriented Development. ST is spending enough on the transit infrastructure it shouldn't get involved in development. Besides with a fixed rail asset the higher density will occur over time, it doesn't need to be pushed or forced. With movable routes such as BRT and other bus routes TOD will not occur naturally and ends up being forced and may have a higher failure rate.</p> <p>3) Light rail is really needed along the I-405 corridor. More so than light rail out to Issaquah, Redmond, Ballard or West Seattle. While I know it would take longer (+20 yrs) to get the light rail ROW and infrastructure in place I think long term that the money is better spent on light rail, fixed infrastructure rather than spending it on improvements and stations for BRT that may or may not be required in 50 years when the light rail is built along the corridor. Think long term please. Your planning horizon should be looking at 100 years or more even though the phasing and planning may occur in 10 or 20 year chunks due to funding sources. The BRT expenses along the 405 corridor are a stop gap measure. Eventually light rail will be built along that corridor because of the volume of traffic (people) using the corridor 24- hours a day.</p> <p>4) I find it interesting that the BRT is proposed on the highway that is currently being tolled. Could it be that WSDOT doesn't want light rail along that corridor because it will take away from the vehicles that might be paying tolls?</p> <p>5) I think those that use transit should be paying more for it's use.</p> <p>6) Rather than telling us that the new funds will cost us about \$17 per month, state how much total we are paying since we are still working at paying off ST1 and ST2.</p> <p>7) With all the above said, I think that the light and heavy rail improvements you have made are excellent. I remember when ST was voted in and in danger of losing federal funding. I think ST has come a long ways. Congratulations and Good JOB!</p> <p>8) By the way, I remember as a kid going to an I-5 overpass in Mountlake Terrace in the 70s and waiting for a car to go by on the new freeway. I know what the traffic was like then, 40 years ago, what it is like now and imagine what the traffic will be like 40 years from now. 80 years from now if you quadruple the amount of traffic we have currently the only way we will be able to handle it is through a rail system or some futuristic air mass transit. Good luck with that!</p>
<p>EAST KING COUNTY</p>	<p>Parking at these park and rides is already pretty terrible. With the growth rate we are seeing, many people will not be able to utilize this system realistically. Mass transit really need to be rethought of as a whole and there needs to be easy ways for people to get from neighborhoods to these major transportation arterials. Otherwise there has to be a lot more investment into park and rides.</p> <p>It's pretty bad when park and rides fill up quickly after they were just redesigned. Almost like there was not planning for future growth.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	There is clearly the need and I want to get behind this but struggle to do so. I have very little faith that this type of project can be managed on time and on budget. All other recent project overruns prove otherwise.
EAST KING COUNTY	Kirkland is not included in these plans which would affect my family.
EAST KING COUNTY	Why is there nothing in these plans to increase parking at bus P&R lots???? So many of us would use ST rapid buses from eastside to Seattle but there is no parking after 8am at the latest on weekdays. This is really deplorable.
EAST KING COUNTY	This is an ambitious project but absolutely necessary to relieve congestion.
EAST KING COUNTY	i believe that busses are the best solution as busses can follow the population better than fixed rail.
EAST KING COUNTY	Your estimate on cost per household is MISLEADING! I love and use transit daily but you need to be truthful about the actual costs and the length of time you will be collecting these taxes.
EAST KING COUNTY	Absolutely opposed to the elimination of express buses between Seattle and Issaquah/Issaquah Highlands
EAST KING COUNTY	The bus lanes and commuter lanes operate on property that was taken buy eminent domain. The lanes belong to ALL commuters. The State has NO right to steal this property for "commuters" or people that can afford TOLL lanes. This is a penalty for the poor and middle class people. The transit project are NEVER done on budget or on time and never will be. Stop this nonsense. Get Elected People to oversee the Transit Authority.
EAST KING COUNTY	I think consideration of the culture of the greater Seattle area commuters would prove to help understanding needs without forcing underused services that costs a lot of unnecessary money.
EAST KING COUNTY	Privatize the public transportation system. Use the funds for law enforcement and teachers instead.
EAST KING COUNTY	The lead times are overwhelmingly long, the costs overwhelmingly high, and the benefits - miniscule and totally not worth the wait or the cost.
EAST KING COUNTY	The cost to the average adult is extremely understated and the timeline is 25 years for some areas, which there will be delays and cost over-runs. The tri-counties can even maintain the roads we have. My car is taking a beating every day going to and from work. The bridges and infrastructure is in terrible shape too. We road maintenance and a new direction on traffic congestion in Western Washington. This price tag, \$50B is way over the top!
EAST KING COUNTY	Purchase right of ways for future development. The cost of mass transit is stunning; both the initial investment and then the operational cost.
EAST KING COUNTY	As a bus rider, I want the region to focus on building additional roads and lanes. This will help improve bus speeds. The items you have proposed arent going to get those darn single riders to adopt transit. focus on the roads and make bus a more compelling ride by having efficient routes and speeds.
EAST KING COUNTY	Sound Transit is a money grabbing parasite. Stop stealing from the taxpayers and funding your silly little trains. What this region needs is more FREEways to move people between home and work. Quit trying to socially engineer our lives with your boondoggles.
EAST KING COUNTY	Cost is way too high. Rail is not as flexible as busses.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	The WSDOT program is a fraudulent group and needs to be shut down entirely. Our State needs to hire and pay independent contractors to actually finish transportation projects and not continue to tax our citizens over and over again for services we have already paid for with our tax dollars. WSDOT has failed at every project in monumental proportions and they have the audacity to continue to put forth programs with unrealistic time lines (25 years???) and indefinite tax increases to pay for their mistakes and continued mismanagement of this outrageous tax and spend arm of our state government. Obviously we need good transportation management in the entire state but I wouldn't trust WSDOT/ Sound Transit or whatever name they go by with one more dime of my money! Shut them all down...NOW.
EAST KING COUNTY	First, the project is unnecessary. Second, the \$50 Billion projected cost is ridiculously low. It cannot be done for that price. Third, the TAX will become permanent just as have other taxes. When the will of the people to have Charter Schools cannot be supported, then do not expect ANY support from me for other projects
EAST KING COUNTY	Total waste of taxpayers money
EAST KING COUNTY	Outlaw LOOT RAIL !!
EAST KING COUNTY	by my estimate this represents project costs in excess of 50 billion dollars. One does not know if these are current day dollars we are proposing for projects or for taxes for that matter. Of course there is no mention of this in your proposal which tells me something about the business management skills involved in this proposed effort. I have seen little to support any confidence that projects can be carried out in any meaningful and cost effective way. Recent experience with waste water facilities, Bertha and the floating bridge serve to confirm this position. Show us how you will do it and forget the rosy sales pitches. We have heard it all before and been disappointed in the management competence and the resulting outcomes,
EAST KING COUNTY	Poor management of money. This costs too much! Boeing, warehouse and other large family wage companies are leaving Washington State; road tolls, high taxes, excessive business regulations this is a bad place to do business! This expensive mess created by mass transit. People want to drive their Cars!!! Build more roads and no road tolls!
EAST KING COUNTY	Work on the major suburbs specifically the eastside areas first and then fill in additional.
EAST KING COUNTY	These added taxes are a rip off to the citizens of our communities. The initial tax plan was sold as bringing light rail to Snohomish County. Decades later we are being asked for a third set of taxes to do what we were promised in the first place. This has been a poorly designed, politically driven, program that needs to have people (politicians and bureaucrats) held accountable.
EAST KING COUNTY	As always you concentrate on Seattle You ignore north south and east west action that actually helps the most people. I'm talking the bottlenecks on I5 from Tacoma to Everett. And 405 Renton to Everett. Fix those first. The address east west coming into Seattle with more than simply replacing a bridge

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	No raising property taxes and sales tax and tabs to pay for this. We are already getting taxed to death in this state and country!!
EAST KING COUNTY	The whole light rail plan is stupid. Even if it were magically built overnight at zero cost, the number of riders would even cover the operating costs.
EAST KING COUNTY	Trains are the past. Stop wasting our money and look to something that will really work. BTW....it only took 6 years to build a railroad across the entire nation. Why will your stupid plan take so long? Hopefully we voters will reject this incredible waste of money!
EAST KING COUNTY	Work that will provide the most needed transportation should be done first. Items that are easy to do and provide the biggest transportation usage should be done first. The greater Seattle area is behind in rapid transit options. To get to my job from home without driving my car requires three different bus routes, which have too much time between them and I still need to walk .25 mile. At one time I did this, but then routes and times were changed requiring too much time to get to my destinations each way and there is only one time each way that works, so I have only 1 time option each way.
EAST KING COUNTY	Overall, I support transit in Puget Sound area. However, I am living in Renton area and there is no direct benefit for me to take advantage of any ST3 projects. I disagree with raising the rate on my property tax. It takes at least 15 to 20 minutes to the nearby park and ride and ST express bus station. The connection with KC metro buses is very bad in my area. Why would a person who live in an suburban area without direct benefit from Sound Transit pay the same increased rate on property tax. The most taking advantages from the ST3 projects are the one who lives in Issaquah, Bellevue, West Seattle, Lynnwood, Federal Way and or Tacoma. Even though I support the transit plans in Puget Sound, I may not consider voting for the ST3 unless the financial package is re-consideration based on the family who has the most directly benefit.
EAST KING COUNTY	More bus service to and from Kirkland along I 405 and NO bus, rail or other motorized transit along the cross Kirkland corridor.
EAST KING COUNTY	Make it happen sooner, like have it done in the next two years (not 25 years out, WTF???). Triple the amount of parking you think you need as that is one of my biggest frustrations is not having somewhere to park as it is. Make sure the light rail is highspeed and not worthless like the slow light rail to the airport.
EAST KING COUNTY	It would be nice to have all electric busses. They are quieter and pollution is getting worse every day.
EAST KING COUNTY	Corrupt,
EAST KING COUNTY	Make the city livable. Add bike paths and pedestrian side walks. Cheap and effective.
EAST KING COUNTY	Has the committee ever considered gondolas such as the kind used at ski resorts for mass transit. Although unorthodox, they are cheap to consist and operate, are safe, efficient and fast, can traverse all terrain, easily cross roadways and rivers, and have virtually highly available continuous capacity. I'd like to offer more details if interested. [email address]

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Do not understand why including rail across the new 520 bridge was not part of the new bridge for a long term perspective
EAST KING COUNTY	I can't emphasize enough how important adequate parking is at transit stations. It can ve impossible some days for me to take public transit because I have yo drive there and then there is no parking when I get there. If I know that I will be time pressured I wont even try to go there first to park and will just drive instead. When I need to go to Bellevue I would love to take a bus, but there is no parking in Renton where I need to take the bus after 7am.
EAST KING COUNTY	Wa state is notoriously known for it's terrible public transit, I hope that these future plans are based on evidence and other successful transit models that will truly improve Sound Transit.
EAST KING COUNTY	Light rail should use existing freeway right of ways to maximize commuter convenience. 405 I5 and 522 would be routes I would use if I could jump on light rail. If I had to take a bus for 30 minutes to get to light rail I won't use it
EAST KING COUNTY	As a retired sr. I can not afford this project. Any help for seniors?
EAST KING COUNTY	Public transit in WA is always way over budget and behind schedule yet no one is criminally responsible. Transit is infrastructure (constitutionally mandated) and should be fully funded with all the other constitutionally mandated thing and then if anything is left over try to ask for taxes for the social services and homeless.
EAST KING COUNTY	The funding sources do not make sense - it should be a gas tax, so a consumer can pencil out the benefit of public transportation  There is zero connection with public transportation and 1) sales and use tax increase and 2) a twenty-five cents per thousand dollars of assessed value residential property tax increase
EAST KING COUNTY	The addiction to low capacity light rail is a huge flaw in this plan. We should be being on more flexible electric buses in the suburbs, which can actually reach neighborhoods where people live.
EAST KING COUNTY	I have tried to take express bus from MLT to Seattle to my office in Queen Anne. I am there 3x a week. 10 am-7 pm. I no longer take the bus. Here is why. 1. No parking in MLT park and ride. 2. Safety issues at Park and ride and Westlake Center. Drivers do not pull up close enough to the curb at Freeway Station. Bus floor is wet and have slipped trying to jump out. Driver said for me to come to front and she would lower gate. Bus is packed. I'm standing in the back of an overly crowded bus. So I am suppose to climb over everyone to the front? Seriously? 3. Cost is 12 dollars round trip. 4. Gas costs under 20.00 a week in my little car. Parking is free. No thank you. I'll drive.
EAST KING COUNTY	Stop with the social engineering already! I cannot afford to live here as it is with the continues unrelenting high taxes. If we needed all of this stuff, there would be a demand and that demand should be filled by the private sector only!
EAST KING COUNTY	Definitely add more parking spaces to stations, park and rides, transit centers, etc. Getting to the nearest hub is the shortest part if I were to commute by bus, and yet it takes the longest, but if the park and ride weren't always full I could bus much more easily to work.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Fund it without increasing the sales and use tax.
EAST KING COUNTY	This week, Sound Transit is holding a series of "open house" meetings and are advertising them as an opportunity for taxpayers to give feedback on plans for the \$50 billion dollar tax-grab known as ST3.
EAST KING COUNTY	This is very expensive. Let the people who use it pay for it.
EAST KING COUNTY	Time frames are to long. You would get more support if you speed up completion of light rail.
EAST KING COUNTY	WA rates as the WORST state in the country for low-income workers, who pay 2x what the wealthy pay. WA has a horribly regressive tax structure. Some of us do not even have the option for mass transit, yet we are being taxed to death for it. DOT took lanes and exit lanes away on 405 to add a toll lane. That lane should have been used to ease traffic. The charges are FAR TOO HIGH and hurt lower income Washingtonians the most. \$10 from Kirkland to Lynnwood. \$10 to get to Seattle. It is the worst policy imaginable and hurts us. You should ALL be ashamed of yourselves for continuing to target the poor to pay more taxes. See: <a href="https://wallethub.com/edu/best-states-to-be-rich-poor-from-a-tax-perspective/11257/">https://wallethub.com/edu/best-states-to-be-rich-poor-from-a-tax-perspective/11257/</a> National surveys rank WA the very worst state to be poor and the very best for the wealthy. Shame on all of you.
EAST KING COUNTY	The public is not hearing the whole cost story. This is billions of dollars for little improvement in anything. Please use buses to improve transportation and the road infrastructure to go along with those improvements. You are continuing the public distrust. You have not fulfilled promises which the public has believed and not have had fulfilled. I will do all I can to see that this ballot is defeated.
EAST KING COUNTY	Light rail just doesn't seem to be working well here and is too expensive
EAST KING COUNTY	I think parking is a huge opportunity for the link light rail service. I first started riding the light rail when you had to pay for parking spots between the hours of 6 and 10 am. I'm curious to know what happened to that study, I think you'd be more successful if you charged customers (a reasonable amount) to park in the tukwila/angle lake lots and used that money to help fund other projects.
EAST KING COUNTY	The plan has many strong points. However, the system needs to integrate well with Metro buses. The state and area needs to support upkeep of buses to keep the bus connections working. As I try to expand my use of transit I keep running into buses that are not running (maybe the driver is sick, maybe bus broke down). We need a reliable system that works together as a whole.
EAST KING COUNTY	Prioritize rail rail rail. Buses suck. They are terrible and unsafe, I hated riding them for years. Replace your buses with a damned subway like any other rational major city.
EAST KING COUNTY	Bus rotation is slow and lack of parking at park and rides. I stopped taking transit because there wasn't enough parking.
EAST KING COUNTY	Transit, especially new light rail across Lake Washington, is something I'm more than willing to pay for in more taxes.
EAST KING COUNTY	Stop wasting our / my money on stupid bike lanes and worthless train routes that nobody will ever use and why do you always ask the public what they think, then you'll do what ever you want regardless of our feedback. Get your busses and trains out of my way.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Yes - environmental study on CKC Yes - mass transit from Bellevue Wilberton Station to S Kirkland P&R Yes - high capacity transit on cross Kirkland corridor trail
EAST KING COUNTY	Fiscal accountability and legitimate project management is important to me. Some of the earlier phases of the rail transit system through Tukwila to the airport were not conducted with integrity. I know of one organization that created an agreement for a change in the route that disadvantaged another organization and dealing with the Sound Transit personnel left a bad impression on all involved.
EAST KING COUNTY	In the long run Puget sound Will be a better place to live with mass transit.
EAST KING COUNTY	I'm flabbergasted that you're suing south-east King County as a funding source, yet you don't give us any service other than some busses. I know we're not as [explicit] as Issaquah so that's why they're getting light-rail service, but at least pretend to be fair.
EAST KING COUNTY	I'm a full-time telecommuter, so I don't have to hassle with the "daily grind" of the commute. Nevertheless, I'm affected by terrible traffic congestion when I do drive, which is at least several times a week. People will get out of their cars when they see rapid transit actually being "rapid" (zooming along much faster than the car-bound traffic) and when it goes to places they want to go. Additionally, to the extent that transit-oriented development can be made part of master planning of all new urban and suburban civil engineering, then so much the better -- it will likely be used to a greater extent than if we continue with business as usual (planning that is not well integrated with long-term employment, population and demographic trends).
EAST KING COUNTY	What an idiotic approach. Why light rail from Bellevue to Issaquah? That would seem to be perfect for buses. What about light rail from the Eastside (Bellevue) to Seattle? I see it on the map but not in the questions. That has to be the highest priority. I understand that buses are cheaper than light rail but I think that it is a false economy. All that will happen is greater road congestion because of construction, lanes being removed, etc. it should just be light rail encircling the region like BART was supposed to in the Bay Area. And Bellevue to Redmond? Really??? Who needs that?
EAST KING COUNTY	People prefer trains over buses. Don't invest our money in crappy short term solutions. I'd rather wait for a better rail solution.
EAST KING COUNTY	Would like to see more done along 522, and to ensure less expensive options are available for people who receive low or no income.
EAST KING COUNTY	Sound Transit has not proven an ability to stay within budget and should start with a less ambitious list until it can get its act together and show that it can deliver on time and on budget.  ST3 allows continued taxation after completing all projects on this list. \$50B is false advertising.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	YES for bus rapid transit on I-405 NO for environmental study on the Cross Kirkland Corridor trail; instead do a study of light rail on I-405 No to high capacity transit on the Cross Kirkland Corridor trail
EAST KING COUNTY	It's not happening fast enough.
EAST KING COUNTY	retain direct bus service to Seattle from Issaquah/Sammamish. avoid/oppose travel to Bellevue then transfer to another mode to get to Seattle. No provision for direct travel to SEATAC airport from Issaquah/Sammamish. Proposed routes go to Burien. Requires 2 or 3 transfers to travel to SEATAC airport. This user will not support ST3 as written. Thanks for asking.
EAST KING COUNTY	Please keep all transit off the Kirkland Trail.
EAST KING COUNTY	I travel the I-90 corridor regularly and the bottleneck between Issaquah and 405 is terrible during the commuting hours and I strongly feel that some sort of rail system servicing that corridor will help to alleviate that. Growth on the eastside seems never-ending and it is only going to get worst.
EAST KING COUNTY	Bus Rapid Transit on I-405 No environmental study on the trail, instead do study of light rail on 1-405 No High capacity transit on the Cross Kirkland Corridor Trail
EAST KING COUNTY	Kirkland should also be included in the light rail plans
EAST KING COUNTY	Thank you Sound Transit for listening and including the SR 522/523 corridor in the final plan; <ul style="list-style-type: none"> <li>• BRT opens up the promise of light rail access to the north Lake Washington communities;</li> <li>• The parking garages are extremely important elements of access by our community to this transit corridor;</li> <li>• The sidewalks will, for the first time, open up safe access to this transit corridor for our citizens;</li> <li>• The early construction schedule is a win/win for the communities and Sound Transit, as it coincides with the opening of the North LINK light rail stations.</li> </ul>
EAST KING COUNTY	I wanted to express my support for BRT on Bothell Way to NE 145th. I live in Kenmore, and commute to work downtown on the bus. Addition of the ST522 route years ago helped dramatically, thanks for that! But it seems the buses are again at capacity--standing room only, no matter the time of day. BRT along 522 and 145th would connect the 522 corridor to the light rail spine and give public-minded and environmentally-conscious citizens an efficient transit option for getting to and from downtown Seattle and other regional job centers.
EAST KING COUNTY	Sound Transit is a huge government rip off of tax payer money and should only be used to improve more cost effective bus transit and save tax payers money. Quit lying to the public about being on budget and ahead of schedule. How about addressing what you originally promised but did not deliver
EAST KING COUNTY	Getting from (south, Fairwood) Renton to the city is miserable and takes almost 1.5 hours and multiple buses. Thank you
EAST KING COUNTY	Quit spending money on projects that have no value other than in your own imagination.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Leave alone the pedestrian/bike trail in Kirkland. This is a highly used trail and very much appreciated and supported by the community. This should be taken completely off the table as a potential route for light rail. Thanks.
EAST KING COUNTY	I believe in doing away with the HOV lanes and making them mass transit lanes. That would incentivize riders to use transit. Now the busses are just sitting in traffic with everyone else. Taxes here are already in sane and development is growing at a rapid pace. Follow some of Portland OR LEAD and make it worthwhile. Ask business to contribute as a way to reduce their personal parking real estate and costs. This could be funded with out major tax increase if you get creative.
EAST KING COUNTY	I strongly support adding transit along existing highways. I strongly oppose adding any forms of motorized or mass transits along the Bellevue to Woodinville old rail lines (I.e. Cross Kirkland Corridor) as these are a regional gem! The opportunities for folks to commute using bicycles, or walking thru natural areas such as these is irreplaceable! The trend across our country of the great USA is rails to trails conservancy (railstotrails.org) and we would be missing out a great opportunity to participate. What would our country be like if not for Presidents Roosevelt and Wilson and their insistence on preserving natural areas for all to enjoy? We cannot use every speck of land to develop, we must keep spaces of natural lands that are easily accessible to mass people's and the rails to trails is an urban way to allow access to many citizens that may otherwise not have an opportunity of exposure to nature. These areas are truly a gem and must never be developed, as they will never be again if they are. Please do not consider any developments for mass motorized transits on these areas. I will not support any proposal of such or any politician that does support such a plan.
EAST KING COUNTY	Light rail from Issaquah straight to Seattle would be better than going through Bellevue!
EAST KING COUNTY	Kirkland cross corridor trail is for pedestrians and bikes keep transit to freeways and streets
EAST KING COUNTY	I teach in the Federal Way school district and we are currently battling large numbers of homeless students. Under the McKinney Vento law, they are allowed to continue at their home school regardless of the temporary housing address. We have students traveling upwards of an hour and a half on public transit trying to get from Kent to Federal Way. I firmly support increased public transportation in all neighborhoods, but I do think that this is also an equity issue too. Better, faster transportation in areas like Kent will help homeless students stay on track for graduation and the sooner we have that, the better.
EAST KING COUNTY	My strong support is tempered only by concern that metro bus service to get people from suburban homes to the ST services needs to grow also.
EAST KING COUNTY	Just support.. the commute by car is too long, let's support public transportation !
EAST KING COUNTY	Almost all of these projects will do nothing, very little, for my city: Sammamish. There is a huge emphasis in most of these projects for Seattle and Tacoma, which are completely without interest to me or my family or friends.
EAST KING COUNTY	Do not get near our Kirkland walking trails with any of this! Maintaining clean, environmental, serene walking trails is the most important thing to me. No more transit presence.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>Light Rail needs to be the backbone of the system and do the long range - car traffic independent - connection.          --&gt; This is why I support the Tacoma, Bellevue and Lynnwood connection.          Within the city: Use buses to bring riders to the light rail or to the final destination.          Stations that are further out of the city: Use a combination of buses and parking for riders.</p>
EAST KING COUNTY	<p>I don't see why Issaquah/Eastgate has to connect through Bellevue to get to Seattle. I would take a bus or drive rather than have to stop in Bellevue, switch trains, and then backtrack. I think Bellevue should be a stop and the connection for changing trains should be at the 90 bridge. But overall- I support this plan.</p>
EAST KING COUNTY	<p>Project for light rail to come through renton should strongly be considered.</p>
EAST KING COUNTY	<p>Light rail takes TOO long to build, serves only a very limited part of the population and is not flexible. Tripling the car tabs fees and using property tax to fund transit will severely impact seniors who won't get much benefit from all the expense. If some sub-area wants light rail - let them pay for it. Bothell isn't getting [explicit] from all these taxes yet we pay through the nose. I'll be voting NO</p>
EAST KING COUNTY	<p>Expand highway lanes that the majority of people use and get rid of public transportation</p>
EAST KING COUNTY	<p>Not in favor of paying \$400 per year for 25 years for improvements that do not benefit the Eastside. Do the math....</p>
EAST KING COUNTY	<p>fix the service you have now before asking for more money. the route to the airport is slower than driving and completely wastes time going to locations that no one EVER uses in my 50 plus trips. get the sounder to the airport from downtown directly. Your failure to provide sensible service now makes me oppose your plans because you'll do stupid routes. Stay off trails and focus on I-405 where there is traffic.</p>
EAST KING COUNTY	<p>You need to establish more times and coverage of out lying areas, seven a week starting at 4:00am and finishing at 9:00pm. A separated route for Redmond Ridge to Redmond. Maybe Duvall - Redmond Ridge - Redmond only and a separate route from Carnation to Duvall then Woodinville. In Duvall both routes could transfer to each other. Several more bus stops and a better route is needed there.          Playfordba@msn.com</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>First priority should be light rail across/parallel to I-90 connecting eastgate to downtown Seattle and Bellevue to Sea-Tec Airport/Amtrak. Then make sure there are adequate buses connecting the 2 Issaquah P&amp;R and people along the 405 to Eastgate. Then 167 needs severe help with mass transit. This should all be complete in the next 5-8 years. In 10 years buses on 405 should be replaced with light rail.</p> <p>Please study BART in California. You are making the same mistakes. Pleasanton, CA = Bellevue, WA. People coming in from East of Pleaston want to take Bart straight across to SFO and San Jose via San Mateo (where it could connect with the light rail). Then their is a horrible misalignment in times at the station where light rail switches to BART on the way to SFO making it quicker just to drive despite the worst traffic.</p> <p>I would think it would be best to start this project where the money is from a business standpoint. Allow those that own luxury cars be feed first, then allow them to feed the rest of the growth. Tab fees on vehicles with values over \$50k should be 20% higher than those under and cars valued over \$100k should have fees 30% higher than non-luxury vehicles. (Busses and trucks used for business/organizations/non-profits excluded.)</p>
EAST KING COUNTY	<p>I live on the border of Kent and Renton. I use to work in Bothell and the drive on the I-405 is the worst. Anything that can be done to help get people out of their cars and into public transit should be done. The traffic on 405 is horrible. The more options and stops you give people North of Kirkland would be helpful. Also I would not ride the bus because it took me through DT Seattle to get to Bothell and took longer on the bus than it did in my car. Took me almost 2 hours to get home many times. I live only 30 miles from where I worked that is unacceptable. Something must be done a soon.</p> <p>Also it is so hard to find parking in DT Seattle, and I love taking the light rail into the city. However, if there is no parking at the Tukwilla station I am SOL. There needs to be more thought about building stations with parking. You want people to take the transit well how are they to get there? Take more transit with transfers that take longer no, that is not realistic. People need to have places to park. I feel that if there were more parking around light rail stations you would get more people and new people riding rail. Or if you had BRT to the rail stations that would be a start. Also no need to go around the lake to get up north that is insane and a waste of time.</p>
EAST KING COUNTY	<p>Do not put any High Capacity Transit on the CKC Trail          Remove the environmental study between Bellevue and Bothell via the CKC Trail          Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride          If all of these are not removed, I will actively work to defeat ST3 in November</p>
EAST KING COUNTY	<p>We vote on one thing, but then you ALWAYS change it into something we NEVER agreed to. Really tired of the deception, will not support future projects no matter how desperately needed.</p>
EAST KING COUNTY	<p>need to get to a full solutionsooner</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>Generally we support Bus Rapld Transit on I-405 , but do not under any case want Bus or light Rail on the Kirkland Trail.</p> <p>Sound Transit SHOULD NOT OFFER \$20 million dollars to the City of Kirkland to do an Environmental Study for rapid transit. This is simply an oblique tactic to allow the Kirkland City Council (KCC) to spend time and money trying to put Bus or Rail service on the Kirkland Trail. The majority of citizens in Kirkland are opposed to any thought of motorized transportation On the Kirkland Trail. The citizen distrust of the Kirkland City Council extreme.</p> <p>ST should recall their \$20 million offer for a "environmental study" and use this money on some other project.</p> <p>If ST3 includes any Bus or Rail plan on the Kirkland Trail there will be many citizens voting against ST3. Sound Transit should be clear to the Kirkland City Council that ST Plan is for Bus or Rail ONLY ON I-405.</p>
EAST KING COUNTY	I just want a train to take me from Overlake to the airport.
EAST KING COUNTY	Your plan takes too long to complete. 22 years, ha, yeah right good luck with that.
EAST KING COUNTY	Cost too high. Very little benefit in the plan for Issaquah residents commuting into Seattle.
EAST KING COUNTY	Institute a program of user fees. The users should pay for the projects not the property owners by way of increased property tax.
EAST KING COUNTY	My concern is based on the HUGE \$50 BILLION cost and Washington's regressive tax structure. I'd like to see the plan pared down and more cost borne by transit users. Are low income citizens and seniors on limited income bearing the cost for highly paid tech workers to get to work? I very much like the idea of more public transportation, but I'm concerned about the equity of the financing.
EAST KING COUNTY	We have paid and paid and paid. Think your wasteful and little to no device on EASTSIDE. Kirkland.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>I have yet to see anything in my zip code that makes it advantageous to use sound transit.</p> <p>When I want to use the light rail and get on in tukwilla there is no parking available.</p> <p>Taking a bus to the tukwilla station doesn't work during late night hours.</p> <p>Rather than building more rail on streets why not use the space between the freeway lane so everyone stuck on the freeway will see the train pass them and think about getting on the bus.</p> <p>I pay \$200 per year and get ZERO service I can use for my commute. I currently would have to walk a half mile to take a bus tha drops me off a half mile from my office. And the hours are limited.</p>
EAST KING COUNTY	<p>I use these roads infrequently, but when I do they are massively congested and I see the need for mass transit. My income is extremely limited. With the proposed tax increases, I would pay disproportionately higher for the improvements than someone who makes more money and uses these facilities every day for commuting. This state's residents comprise many extremely wealthy individuals and corporations that benefit enormously from the most regressive tax structure in the nation. It is time for a high-earners income tax and a closing of the loopholes and giveaways to corporations. This is the only equitable way to fund our desperate mass transit needs as well as infrastructure maintenance, education, and state parks. I am so sick of slipping further and further behind as I try to scratch out a living in this state as a self-employed individual with a disability that grows increasingly worse with stress. I need relief. One of my low-cost stress relievers is to go hiking, but I cannot drive to my group's weekday hikes because the TRAFFIC gets in the way. The last time I tried, 3 years ago, I was rear-ended on 405 in gridlock traffic and I lost nearly 2 years of productivity in recovery.</p>
EAST KING COUNTY	<p>Your missing a massive opportunity to not put light rail in sooner for the east/west commune from Seattle to the east side. Between Microsoft and Amazon you could take thousands of cars off the road monthly.</p>
EAST KING COUNTY	<p>Improve the cost/benefit of service.</p>
EAST KING COUNTY	<p>Please forge ahead and do not get discourage. You have my support and hope to live long enough to see this project reach my home.</p>
EAST KING COUNTY	<p>Please keep buses and other mass transit off of the Cross Kirkland Corridor</p>
EAST KING COUNTY	<p>increase bus service between Seattle and Snoqualmie Ridge &amp; North Bend</p>
EAST KING COUNTY	<p>Drop light rail and find better ways to move people with buses. Perhaps bigger buses, double decker or 80ft long buses. Buses are more flexible and less costly.</p>
EAST KING COUNTY	<p>The cost of this project is vulgar, as with EVERY project ran by king county, the cost projected is a lie and will absolutely run over projections as they all do, leaving the public to once AGIAN, get hooked paying an out of control expense, ran by politicians, crooks, cronies, and special interest groups raping the public coffers. This is nothing more than smoke and mirrors by sly greedy stakeholders ready to steal the max from us, the taxpayers.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	I am unsure if rapid transit will be enough to deal with 405 congestion. Wondering if light rail would be better long term solution. Also - parking structures need to be larger - issaquah highlands park and ride has already exceeded capacity... I don't think that planners expected it to be so busy. Build bigger than expected please.
EAST KING COUNTY	By t he time that you get all of this built, the technology will be obsolete and taxes will be out of sight for the average homeowner.
EAST KING COUNTY	Need to extend rail to Everett ASAP.
EAST KING COUNTY	The continued disposal of taxpayer money--MY MONEY!--towards commuter rail projects needs to end! It costs much too much, accomplishes nothing positive, and impedes travel which it purports to enhance. The only positive I see is that, if pursued, it might finally prove that the government does nothing well and lies to us while doing it! There is absolutely no way I will support these rail projects as I have lost what little trust I might have had in government due to what I have seen with Sound Transit, Tunnel Partners, Centurylink Field, Safeco Field, the homeless problem, hamstringing of the police, the Mercer Street project, and so on. If there were a way to vote NO more than once, I would stuff the ballot box. Not that we do that any more because it is easier for the elections to be stolen when we vote by mail!
EAST KING COUNTY	You've ignored our concerns every step before, why would we support anything you propose now? After the 520/405 & Bertha dig messes, we don't trust you in anything.
EAST KING COUNTY	Stop spending my tax money on this nonsense and fix the roads!!
EAST KING COUNTY	Talking per adult instead of the "normal" per household total cost allocation is an obvious attempt to hide the total cost. You should be using the Eastside Rail Corridor FIRST as it is now available and would be faster and cheaper to get transit on the 405 corridor. The Sound Transit track record is horrible -- over promise under deliver. Transit should have gone on the new 520 bridge versus taking away lanes on I90. We desperately need transit -- but those in charge are making pretty sad decisions...which is too bad.
EAST KING COUNTY	Given the history of Sound Transit to waste investments and delay expensive projects by years, it is my impression that the organization is bloated, expensive and irresponsible with its tax dollars. This money should be spent with upkeep and improvements on our existing highway/road system to cut congestion, improve safety and improve the intermodal interchanges and parking at existing ST locations. Fix this before you take another bite of taxes.
EAST KING COUNTY	In answering these questions, it is clear to me that I am not also hearing about plans to help cars get around. I love the idea of increased rail, but it seems secondary, or at least parallel to getting cars around better. Why is there no talk/campaigning around better freeways? We lost a lane on I405, not gaining lanes after a very costly highway 99 tunnel... need more then trains!
EAST KING COUNTY	Too expensive and not at all reponsive to need.
EAST KING COUNTY	Our region will never have the density to support light rail effectively so invest in BRT instead and let the State of Washington and our schools use the money to solve their unmeet needs.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>You may receive many comments and not want to read one more, yet I feel compelled to share my experience. I work in a school district where an average home costs about 800,000. As my husband and I have both chosen professions in education we can't afford to live close to work, unless it's a 1 bedroom apartment. So for now we commute, M-F and it isn't pleasant. Eventually, we will have to figure out where we can do the profession we love, and be able to have to cost of living line up with our salaries. If light rail was already a reality, we would not have to consider leaving a district where we've fostered community relationships and networks with other teachers to support our students to the best of our coordinated ability. Light rail expansion creates opportunities that I believe people have not, and don't consider. We will use light rail and fully support it, even if we never get to use if for the advantage of our commute, some one in the future can. Also, this possible reality brings tears to my eyes, for the above reasons, and because my father worked for CH2MHill 26 years ago when there were discussions about adding light rail. He would be upset and sharing at home that it was something this region needs, yet it isn't happening. To see this dream come true earlier than the present would have been a gift this area so desperately needs, but if we don't do it now, I can not imagine the amount of negative impact over the next 26 more years there will be from people who simply can't get to where they want and need to be.</p>
EAST KING COUNTY	<p>Why is there no direct route from Issaquah or Eastgate to Seattle? I take the bus from Eastgate to Seattle and it looks like the route does not follow I90 but instead I would need to transfer in downtown Bellevue. In 8 years if it's ever done. I might as well drive which I don't want to do. The bus works better. So don't waste my tax money. Thanks</p>
EAST KING COUNTY	<p>There needs to be a transit station near Hwy 18 and Issaquah Hobart Rd SE. Issaquah Hobart road is bumper to bumper traffic every morning and every night. There are many accidents on 18 going to I90.</p>
EAST KING COUNTY	<p>What a waste of money.</p>
EAST KING COUNTY	<p>WDOT doesn't know how to do projects right and with approved funding they are always over budget. Some of the stupid mistakes they made on 405 tolling is yet one more sign they don't know what they are doing. Putting photo access signs as soon as driver gets to bottom of on ramps was just plain stupid. WSDOT thinks they play by their own rules and answer to no one. We are tired of paying over and over for your projects. You are breaking the backs of low and middle class and seniors. We can't afford to keep taking the hit. Bertha is a great example... So if you want to do something put into place a yearly license tab fee for all these bike riders to pay for their bike lanes. Also, for the people that want all of these improvements and use the light rail, sounder, etc let them pay for it. Done being taxed to death for everything in this state go back to the drawing board and make it better.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Prioritize light rail and sounder service over bus expansion. These projects create permanent infrastructure based solutions that impact development and truly remove congestion from roads. Bus service is a band aid approach which does nothing to ultimately change habits or development patterns. As Portland discovered, Tri-Met had a lasting impact on overall development patterns and regional growth. My biggest fear is that by pursuing a short term strategy optimizing for bus service, voters will loose interest in funding the truly transformational rail infrastructure perpetuating the same old thing in the Puget Sound. I do not use public transit today because the current bus based solution is cumbersome, slow, and dangerous. By contrast, when I lived in Portland, I was a frequent user of Tri-Met light rail. In order for the system to work, it needs to have an adequate regional footprint, go big, go bold.
EAST KING COUNTY	Very little support for east siders like Lake Forest Park and Bothell. Let those that use it pay for it.
EAST KING COUNTY	You say approximately \$200 per yr. or about \$17 per mo. I believe these figures are WAY LOW and if this passes, people who can't afford \$200 extra per yr. will certainly not be able to afford what the REAL cost will be. We have good bus service in the Puget Sound area and I don't believe any of this is smoke and mirrors.
EAST KING COUNTY	I'm concerned about the Bellevue/Eastside link plan to buy city park property at the Mercer Slough and to drain wetlands. Seems counter to the notion of the public good.
EAST KING COUNTY	Would love to see light rail between Bothell & Bellevue.
EAST KING COUNTY	It's about time traffic issues and Transit was given priority.
EAST KING COUNTY	The area is expected to grow by another 1 million residents in the next ten years. It is extremely important that these routes get built as fast as possible. There is a lot of money in this area, middle and upper class residents will pay. Finding a way for lower income residents to contribute but not overcome a burden is important
EAST KING COUNTY	Just get it done
EAST KING COUNTY	Light rail from Kenmore to bothell/woodenville/redmond would complete and help aid the constant traffic that is I-405. Many of us commuters would love to take the bus or light rail but it reauires many transfers say from Kennmore to kirkland!
EAST KING COUNTY	Parking, there needs to be additional parking available at Light Rail stations. I find myself parking in neighborhoods but have to go beyond the "2 hour parking or by permit only" which is challenging. I would park at the Tukwila Transit Station but it is full by 6:40AM. Additional parking at the DT Renton transition station (off Grady) would also be very beneficial and it much needed. That lot also fills up before 7 AM.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>You need to include a way for Kirkland and Totem Lake to connect with the Redmond/Bellevue train line. The most obvious place is the Cross Kirkland Corridor. I recognize the many voices of Save Our Corridor but there is no reason why the trail and transit cannot coexist. As this community grows, we need alternatives ways to remove auto use from growing. Not just for traffic reasons but of larger issues like carbon reduction.</p> <p>I use the 255 bus 4-5 times per week roundtrip. The line is very important but additional routes/modes are badly needed in Kirkland. Thank you for all your excellent work. Personally, I would vote for higher funding to get these projects done sooner and more projects completed.</p>
EAST KING COUNTY	<p>Fix the Highways and boulevards for cars and motorcycles who pay for everything and subsidize every other BS alternative project! I move to my schedule.</p>
EAST KING COUNTY	<p>This should have started 40yrs ago .every one is way behind the times.</p>
EAST KING COUNTY	<p>Keep Senior Citizens in mind when planning all this. Many use Buses to get around neighborhoods for shopping &amp; Appointments so keeping these at times that run often would be great. Also please keep in mind that these same people would like benches &amp; covered bus stops. I've noticed that the covers &amp; benches seem to be going away. Same with The train stations. thank you</p>
EAST KING COUNTY	<p>Redmond/Microsoft area is getting left behind and our bus service is crap. Look at the growth in Redmond and there is NO EXCUSE to not make improvements now</p>
EAST KING COUNTY	<p>My highest priority is making bicycle commuting safer and more attractive to people.</p>
EAST KING COUNTY	<p>I strongly agree with the light rail expansion and improving existing rapid bus systems including better access to the improving transit system. As a commuter I utilize the light rail because it's the fastest user friendly means to getting downtown Seattle. However, coming from Renton this means I still spend time and money commuting by car and though the train makes the best sense (also helps me save on Seattle parking) access is not as friendly. I get lucky parking near the train but with no disegnated parking and with street parking changing so rapidly with population growth and others trying to access the train the question becomes why is there not a better system. Lastly, the only thing I hate about the light rail is that even though it rides in its own right away the light rail affects street traffic and congestion at stop lights. I understand it's cheaper this way in respects to a subway system being underneath ground or above like the Mt. Baker station; it builds more congestion in areas it operates on the ground with other moving vehicles and if there's a feisable to avoid being on the ground with moving traffic this makes commuting easier for everyone.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>Please look around transit-oriented cities around the planet and learn why they work, what could be improved and what lessons we (Puget Sound) can we apply here.</p> <p>Parking - do you want to devote (or mandate) space to the storage and movement of vehicles or space to homes, professional duties and leisure of people?</p> <p>Costs - these new Link projects have costs ranging from USD200 milion per mile (Angle Lake) to over USD600 million per mile (U Link). Light rail was supposed to be low-cost alternative to heavy rail. These costs per mile are higher than the recently opened USD15.4 billion, 140 mile-long Hokuriku High Speed Rail Line in Japan (USD110 million per mile). Please explain.</p>
EAST KING COUNTY	time lines are too long, most people aren't sure where they will be in 5 years
EAST KING COUNTY	Transit should encourage development near stations and along bus lines. Projects for additional parking and new lanes to highways that encourage urban sprawl should not be funded. Transit must be designed to reduce our carbon footprint, not extend the inefficient suburban model of development.
EAST KING COUNTY	<p>The plan looks good overall. The need to extend the schedule to build out the system is understandable, given the funding limitation imposed by the state legislature. Perhaps with additional federal funding or an increase in the allowed cap by the legislature, the time line can be shortened.</p> <p>The conceptual designs look like they minimize grade crossings. The ideal is to avoid pedestrian and vehicle grade crossing altogether. As plans progress, it would be preferable to make sure that any unavoidable pedestrian or vehicle grade crossings are designed to be made grade separated in the future if additional funding becomes available. Most important is to avoid compromised designs that can't feasibly be rebuilt later. That would include the 70' high drawbridge over the Lake Washington Ship Canal in Ballard. A tunnel under the canal will be a durable and much preferable design that should be adopted, even if it means extending the time line even further.</p> <p>It would be nice to see funding included to fix deficient designs in already-funded segments. That would include grade separating the entire line from downtown Seattle to the airport and building the downtown Bellevue station in the tunnel rather than just outside it. At the very least, the travel time from downtown to the airport needs to be reduced (and reliability increased!) through some redesign. Having the trains travel at 35 miles per hour along MLK Boulevard makes the trip too slow, and that will only get worse if two more stations are added on the route.</p> <p>Finally, one critical additional route – from Ballard to the University District – should be included in the ST3 plan. Again, extend the time line to accommodate its inclusion.</p>
EAST KING COUNTY	I find it really hard to support expansion of transit when the operating cost are so high. With a system as large as we have, why aren't our costs much lower? Why isn't our service level better? Instead of thinking about how to spend more money, why don't we focus on making our system more cost effective...

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	I live right on the trail. I STRONGLY OPPOSE putting a bus system on and around the trail. I have been in my home for almost 9 years and I won't be moving ever. A total overhaul has gone on the trail. 2when I moved the railroad was being used but eventually the railroad is done and taken the track out. The trail is WONDERFUL since then the trail was done and then the trail was redone and now it is perfect. I am on the trail all the time. My neighbors and I will get together and walk on the trail. I also don't want the bus on the trail because it would ruin the environment for the deer, birds etc. I live in Kirkland and I would hate out trail to be ruined on and around the trail. I live at 5404 Lake Washington BIVD. NE, Kirkland, 98033
EAST KING COUNTY	I cannot vote for a plan that effectively leaves Kirkland out. I do support HCT on 405 and I do support the spur from Bellevue to the South Kirkland Park & Ride. However, those proposals do not bring service to Kirkland, rather, you've abandoned us as part of the area's economy. I cannot vote yes for this proposal that effectively is taxation without representation. Kirkland has a brilliant master plan for use of the CKC for transit and you're yielding to the greenshirts. Shame.  Also note that the BAT plan for NE 85th in Kirkland is a complete waste of \$ unless you also fund the transit that goes with it, which is outside of your scope.
EAST KING COUNTY	even with improvements in light rail there needs to be greater support for people to actually get to the light rails. Currently in the plans people will still have to drive and park before they can get to a light rail. Even were I live now in Redmond there is no reliable access from my home to get to a transit station. I have to walk 3 miles or wait for a bus that only comes once an hour. That isn't not effective in terms of getting people to use mass transit.
EAST KING COUNTY	The region is long overdue in solving its traffic congestion and I strongly support these projects be completed as soon as possible. One of the highest priorities should be the development of transit oriented developments in conjunction with transit. People with lower incomes especially benefit from homes within walking distance of transit. Again--if at all possible, all of your proposed projects are essential for a thriving community and I would hope you could speed up your projected timelines.
EAST KING COUNTY	Light rail and sounder rail are great but expensive. If I have lots of money, I would go for it. Since I have limited resources, I think 75% of the fees should be pay by the people in live in that region and use them. 25% by the rest of the west wa residents. I live in Renton. I have been paying taxes for 15+ years and have not benefit from the light rail or sounder rail.
EAST KING COUNTY	I was a Safety Officer with KCM for over 30 years and very familiar with shoulder operation and not supportive. While collisions weren't the specific issue it was the "threat" of one that stressed out the transit operator. It may seem an obvious solution and not a "new" idea but it disregards the extreme effort on the professionals who are tasked to make it successful. Complete the REGIONAL elements (major capital improcements) first with supportive transit service "inside". Make business decisions not political ones.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Sound Transit needs to be dissolved, and everyone fired. Sound Transit is not capable of spending tax dollars wisely, and cannot come up with a plan that works. We have seen the results over the last 15 years. The best solution is to stop immigration, and growth in the northwest. Immigrants flood our schools, clog our roads, and cost taxpayers billions of dollars. We can also do nothing. Dissolve Sound Transit, and let the roads clog up. Eventually people will move away, and go somewhere else. The taxpayers will save millions!
EAST KING COUNTY	Sound Transit must maintain subarea equity for ST3. Since no overall financial details are provided beyond individual project estimates, there is no way to evaluate subarea fund use. However, I will say that I don't want a single penny of East King subarea revenue going to support projects in another subareas. This is an issue of fairness; Sound Transit has had subarea equity for both prior phases (Sound Move and ST2), and so it would be unfair to those who have paid for building the core of the system without help from other subareas. The sole exception would be for a new transit tunnel in downtown Seattle, since that is a project with clear regional benefits (it would help capacity in downtown Seattle and enable the rail expansions elsewhere).
EAST KING COUNTY	I'm concerned about passenger safety (from criminal activity) on buses & light rail, and waiting areas.
EAST KING COUNTY	Although it's expensive, we need to do this. It is at least 30 years overdue. If our transit system were convenient, I'd use it often. I'd like to get away from using a car, if possible. But every time I want to use the bus system, for example, it's very inconvenient (3 buses and then a 45 minute walk ONE WAY). The only remotely convenient bus for me is the early morning rush hour bus from East Renton Highlands to downtown Seattle, and home in the evenings around 6:00 p.m.
EAST KING COUNTY	make the Everett to Seattle light rail project the main priority and complete in 5 years.
EAST KING COUNTY	These projects don't necessarily reflect real needs. The I5 corridor north and south are very congested during commute times as is I405, whereas I90 coming out of Issaquah is not. Spending as much money as is proposed to build light rail to this area would not have as much impact as north south improvements.
EAST KING COUNTY	Plan for financing the project is grossly unfair to those of us who seldom, if ever, need to use mass transit. I live 4 miles from where I work and do not use major highways or freeways for commuting. Those who use the system, and businesses that employ large workforces that must commute should bear the brunt of the costs. No way, no how does this plan benefit me proportionately to the tax burden you plan to place on me. I've made choices in my career and my choice of neighborhood to minimize my need for mass transit. While I do recognize that the system to some extent will benefit all, financing these grandiose projects should recognize that not all will benefit equally and therefore not all should be assessed equally.
EAST KING COUNTY	It is a start, concentrate on projects that can be effective and do not deploy resources studying options that require too much resource for the benefit (Kirkland trail was appropriate to leave out for example).
EAST KING COUNTY	It's important to me that the steps taken are not for the short term but for the long run. Having quality choices will help people to look into their alternate options. The current light rail from Seattle to seatac is slow and therefore is under utilized.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>Parking is insufficient at the P &amp; R's! The success of our transit system is not fully shown or allowed as many of us that want to take the bus can not park at our P &amp; R after 7:30am as it is full with, in our case, off island users. Bellevue suffers the same problem. We want to use the transit system, we just can't find legal parking if we want to take the bus after 7:30 am. It is a big problem.</p> <p>BFS - Mercer Island</p>
EAST KING COUNTY	<p>Please utilize better technology to make it easier and faster to see how to use mass transit (schedules, routes, etc)</p>
EAST KING COUNTY	<p>It is embarrassing that there are no plans to run light rail across or around Lake Washington. The solution is very simple. Light rail from the airport to Bellevue via 405. Light rail across 520 into Redmond. Light rail across I90 to Issaquah. Eventually connect both Lynnwood to Everett via I5 and Bellevue to Everett via 405 and I90. How was not apart of the new 520 bridge? I don't even use 520 but how could we spend billions of dollars on a new bridge and think a bus system is the answer... Amazing.</p> <p>- Sincerely, a frustrated tax payer</p>
EAST KING COUNTY	<p>I am now 80 and still driving, but I am unsure that I still will be making my own transportation decisions at the time the first project is completed.</p> <p>However, in 1965-66 I was employed by Parsons Brinkerhoff Tudor Bechtel in San Francisco, the joint venture engineering consultants to the Bay Area Rapid Transit District (BARTD). I typed the specifications for the cut-and-cover subway on Market Street, and I was the reference librarian, gathering information from other rapid transit projects in other cities and countries. The Greater Seattle Area is 50 years late implementing light rail transit. It's about time! {;o)</p>
EAST KING COUNTY	<p>I think it's critical to add more transit options on the Eastside (Issaquah, Redmond, Bellevue et cetera) because now there is a lot of traffic that causes pollution, more likelihood for accidents, and waste of fossil fuel.</p>
EAST KING COUNTY	<p>I'm 69 and scraping by on SS. As much as I'd like to see improvements in public transportation, I can't afford even \$17 a month. I don't go out often, and when I do, I use my car. The ideal public transportation would be a system that allows one to get rid of one's car (not unlike New York's subways).</p> <p>Unless people can get to public transportation quickly and easily, they will likely opt to use their cars.</p>
EAST KING COUNTY	<p>Given the massive problems we face in the state - education and climate change we should focus on mass scale BRT with electric buses and redirect all other funds to education and mitigating climate change</p>
EAST KING COUNTY	<p>Expand current light rail, Seattle to the eastside</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	I support increased transit options, and will vote in favor of it, almost no matter what the details are. However, I feel the proposal needs modifying because it seems too expensive. The way you've presented it, two parents and a college student living at home would be paying a lot! Does the added tax burden start right away? Will it be phased in?
EAST KING COUNTY	No environmental study on CKC
EAST KING COUNTY	No bus or rail transit on Kirkland trail. We have to have open space SOMEWHERE. Use 405 for rapid bus.
EAST KING COUNTY	I welcome expansion of public transportation, and don't mind getting taxed for it. The problem I have with the plan is that the good stuff (light rail) is going where rich people live. Light rail across mercer island to Issaquah. Great, they have good schools and future light rail. Redmond, Bellevue...same thing. I live in Renton, I see rapid transit as a consolation prize for the rich areas getting light rail. If this passes, I will be getting taxed and still need to drive a car everywhere I go. unless I move I'll be subsidizing rich neighborhood convenience. I think the people that need great transportation are those pushed out of the city due to gentrification. Thanks.
EAST KING COUNTY	I have three comments: First: BRT should be changed to light rail for the affected areas. The bus won't have the kind of effect and will not get the return on investment that the light rail will achieve. It also has the appearance of favoritism. The Woodinville to Lynnwood corridor has received very little traffic investment (405 expansion lane expansion) already and then to give them buses instead of rail just looks bad. BRT should NOT be part of this plan! Second: The timeline is too long. The goal should be to have all of the projects done in the next 10 years. Third: I don't commute because I work from home, but travel a lot for business. I would definitely take the rail from my address to the airport and to sporting events given the opportunity. I now take the bus from Kirkland to UW games.
EAST KING COUNTY	I'm not a frequent transit rider now, but if light rail existed between Bellevue/Redmond or Bellevue/Issaquah, then I would be.
EAST KING COUNTY	Mass public transit is the route to reduce pollution, congestion and dependency on petrol. This is proven by all European countries, where we came from, and is best serving a growing city like Seattle. Investment now will solve huge problems in future.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>Rather than using all this tax (and debt) money for building buses and trains for an urban area with a population density 3 times lower than more relevant cities like Hong Kong, use the money to build huge freeways and remove government regulation so that we attract the massive population necessary to invest in all this infrastructure. Put a free trade, no customs fee zone somewhere around the Puget Sound. It worked for Hong Kong and other Chinese mega cities. Also, make our current routes more efficient. It was common for me (when I used transit) to see buses like the 240 crammed full and skipping stops, while huge commuter buses to Seattle go half empty. Get some sort of electronic tracking device on buses that measures ride capacity so that the big buses go on the routes where demand for their service actually exists.</p> <p>Hong Kong has a good infrastructure because they attracted a huge population that likes a business friendly environment. Do the business friendly environment first, then we can talk about increasing infrastructure.</p>
EAST KING COUNTY	WOuld strongly support the ST3 plan that benefits the most needy population.
EAST KING COUNTY	Find the money other places rather than taxing more. Make some damn budget cuts. Or how about our 10+ yr senators get some money from the fed gov.
EAST KING COUNTY	Although not included in the study, I am strongly opposed to use of the Cross Kirkland Corridor for either light rail or bus traffic!
EAST KING COUNTY	If what I could tell...you made no mention of building direct entrance and exits for buses. You can have all the buses in the world on I-5 and I-405, but if it takes them forever to get onto the freeway merging in and out of traffic you still have a problem. For example, the totem lake 128th st. direct exit for HOV/Bus works great. However, at Canyon Park it is a nightmare for buses. You need more of these designed for only buses & hov. Add that to your plan!!!
EAST KING COUNTY	I am not at all in favor of light rail because it cannot be moved once built and disturbs our beautiful environment and sensitive ecosystem. I believe in the use of more creative options with bus rapid transit which can be deployed more agilely as population densities change, and that can be moved or upgraded (wholely or partially) to an alternative fuel system -- for example electric or solar, and this gives us more flexibility. We can adapt to changing needs, adapt to losses of funding, adapt to increases in funding, respond to sustainability and environmental impact, make quick fixes to missing services, better serve a diverse and mobile population, etc.
EAST KING COUNTY	To long to complete (25 years)
EAST KING COUNTY	i went through this in the San Francisco Bay Area in the 60's. My advice - do it sooner than later. After Bart was completed, as it is now, many realized we should have done it sooner. I probably won't be around to use the entire project but do want to leave it for others.
EAST KING COUNTY	I support transit on the cross kirkland corridor
EAST KING COUNTY	I would only like to say that although this survey is important, I think it may be too lengthy, and might deter the people who you would most want to take the time to answer

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Do not want buses or sound transit on the Kirkland Corridor. Massive transit of any means must remain on main thoroughfares for human/pet safety and environmental impact to the city of Kirkland. It is too close to homes, elementary school and residential street crossings. The Kirkland Corridor is a precious jewel to our city and should be protected at all costs.
EAST KING COUNTY	I would prefer to see more light rail and less BRT projects although I recognize that light rail is more expensive and less flexible than BRT. I find from my experience in other cities that light rail is more predictable, reliable and faster than BRT.
EAST KING COUNTY	Extension of transit should focus on areas of high density population. Many of the areas listed do not have the population to support light rail and do not have growth potential to every support such an expensive transit option. BRT is a much better solution and does not require the significant infrastructure cost.
EAST KING COUNTY	The \$200/year cost is outrageous.
EAST KING COUNTY	Plan is not aggressive enough. It all needs to be completed in 10 years. There needs to be 2 Seattle to Eastside light rails. We already pay taxes on transit etc. We've wasted the last 30 years with weak band aid upgrades that do absolutely nothing. I405 from Bellevue to Totem Lake has been widened 3 times since 1981. It has never been enough. Now it's down to 3 lanes and the worst it's ever been. Please stop wasting our money and keep it in WA for our roads and not in the corporate pockets out of state. What needs to be done is simple if you have the balls to do it. I'd be happy to show you.
EAST KING COUNTY	I think light rail is a total waste of time, money and resources when you don't make adequate parking available at the stations. Using buses is a much more economical and versatile way to go. Bus routes can be changed as needed for whatever reasons - train routes are fixed and permanent, not to mention ugly! Buses can divert around catastrophes, trains cannot!
EAST KING COUNTY	I am in full support of increasing transit options and decreasing traffic with increased taxes, but I am NOT in support of any bus/rapid transit/light rail running on the Cross Kirkland Corridor...this should remain a commuting option for pedestrians and bicyclists ONLY.  Thank you!
EAST KING COUNTY	I find this survey to be very biased in favor of the transportation plan. On the Kirkland portion, you do not mention whether this is to be done on the cross Kirkland trail or on 405. I'm guessing you hid the fact that it is on the cross Kirkland corridor on purpose. I am OPPOSED to using the cross Kirkland Corridor for bus transit--expand 405 instead.
EAST KING COUNTY	Improved BRT belongs in the city of Seattle and surrounding urban neighborhoods. Light rail funds should be spent developing efficient serve for suburban commuters to get into Seattle.
EAST KING COUNTY	I would like to see light rail on the eastern side of Lake Washington to SEA airport

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>Break your plan into 15 year segments. A lot could change in transportation modes, employment and other factors in 25 years. It's good to have a long range plan. But trying to fund it for 25 years is too iffy.</p> <p>Thanks for all your effort. Good job.</p>
EAST KING COUNTY	Absolutely no new taxes. We already pay 2nd highest gas tax in US.
EAST KING COUNTY	<p>I support separately-graded light rail projects over increased rapid bus service whenever possible. I don't particularly see the rapid bus service as a long-term improvement, as we have seen recent political battles result in reduced bus service for our citizens when they have clearly voiced their desire for increased bus service many times at the ballot box.</p> <p>I don't see the benefit in building light rail out to lesser-populated and isolated suburban enclaves like Issaquah. Those resources would be better spent building out light rail in areas of greater urban density (like Ballard, Bellevue, and South Seattle).</p>
EAST KING COUNTY	Am too uninformed to vote on anything. Where I live nothing is within walking distance. Have to drive from Maple Valley to Renton for a bus.
EAST KING COUNTY	Please, please be forward thinking. We don't need stagnant rail designs. big changes are coming in the way we commute. you are focused on light rail, and bicycle transportation Quit trying to social engineer and fix the problem.. The majority would benefit with buses for now, fixing and expanding the infrastructure.. The future will be self driving vehicles. Vehicles that can adapt.
EAST KING COUNTY	I really just want light rail from the Eastside to Downtown Seattle. I don't know why that is so difficult to do. It would be great to have a light rail corridor that runs from Everett to Olympia across to Bellevue, Redmond, Kirkland. I do not want to continue to invest in buses but I am trying to be flexible to the needs of others. I say just build light rail and build it fast . 25 years is crazy.
EAST KING COUNTY	I'd like to see the use fees for current projects go up. Those that don't benefit from the existing projects pay for them.
EAST KING COUNTY	I put a high premium on having good, safe walking and biking connections to transit. In addition, I would like to see higher capacity for bikes on buses and trains. Too many times you have to wait (sometimes an hour+) in order to get on a bus/train that has room.
EAST KING COUNTY	Oppose rail, seems costly and not as flexible transportation option as buses. Would support more buses and capacity improvements to park & rides.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	ST3 funding model is wrong. Yet again, decision-makers have placed most of the funding burden on property owners. ENOUGH!!! Property owners are being taxed out of their homes by a variety of projects including ST3. This additional tax burden is especially hard on those living on a fixed income. This project should be funded by a STATE INCOME TAX, a higher gas tax, and a higher motor vehicle excise tax. Quit adding to the percentage of sales tax residents pay--it hurts those at a lower income level.
EAST KING COUNTY	Finish lightrail to issaquah and north bend along i90
EAST KING COUNTY	I would like to see improvement to the Seattle to Bellevue/issahquah area happen sooner, but overall, I strongly support the extension of the light rail throughout Western Washington. Thank you.
EAST KING COUNTY	get rid of the bike lane and build a double decker freeway
EAST KING COUNTY	More express buses! Also, buses running through city cores. I live in downtown Issaquah and can hop on 554 express (on foot) to Seattle, but can't get on a bus (on foot) to downtown Bellevue (right by transit center) for work everyday. Instead, I would have to drive to either Issaquah transit center. This defeats the purpose for living downtown. I would love to take the bus to work!! Too inconvenient to drive to transit center when they could simply come through downtown Issaquah like the Seattle express 554. Ridiculous. By the time I drive to the transit center and wait for bus I could be parking at my work in Bellevue.
EAST KING COUNTY	We need the light rail way faster than in the draft plan. Traffic congestion is horrible on the east side and it's getting worse monthly

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

<p>EAST KING COUNTY</p>	<p>I am a senior citizen on Social Security. I cannot afford to pay these car tab fees and property tax increases (which will become rent increases). I will have to vote no on these taxes out of necessity. They will fuel homelessness for senior citizen renters.</p> <p>Corporations must pay their fair share. Again: Corporations must pay their fair share.</p> <p>Currently there is no corporate tax under consideration to pay for this. Nothing at all. This transit plan is providing the means for large companies to get their employees to and from work. But they have no official responsibility at all to pay for it under the plan as it stands today. You could owe another \$80 per year on your car tab fee while corporations are asked to pay NOTHING in corporate taxes.</p> <p>Here is the overview provided by the Sound Transit: "The Sound Transit 3 Draft Plan would be funded through new regional taxes that the Washington State Legislature and Governor authorized Sound Transit to propose to regional voters. The new funding sources for ST3 include increased sales, car tab and property taxes. Other funding will come from federal grants, bonds, existing taxes, fares and other sources." Here is the breakdown:  <ul style="list-style-type: none"> <li>•Sales tax: .5% in addition to the current .9% currently collected for transit.</li> <li>•Motor vehicle excise tax: 0.8% of the vehicle value in addition to the current 0.3%. Another \$80 annually on a \$10,000 vehicle on your car tab fee.</li> <li>•Property tax: 25 cents on each \$1,000 of property.</li> </ul>                     As a percent of the total revenue needed:  <ul style="list-style-type: none"> <li>•Sales tax 16.8%</li> <li>•MVET 6.9%</li> <li>•Property tax 3.9%</li> </ul>                     Total of the above: 27.6                      Plus other sources, 22.5%, including 11-13% from the federal government. This also includes grants, bonds, fares and existing taxes. All of this comes to 50.1% with no information on what the other sources of funding yet.</p>
<p>EAST KING COUNTY</p>	<p>To help speed this up, I think that current funding for more roads/lanes should go instead to this project - however, with that, I think that using public transit should be free. I think smaller, more frequent busses would be helpful, and commuting from Duval to Seattle should be a lot faster than 3 hours each way.</p>
<p>EAST KING COUNTY</p>	<p>I'll be dead by the time it becomes useful for my transportation needs. Perhaps if it all could get done in 5 years max.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	20 years ago a UW Urban Planning graduate student put forth a plan to "hang" monorails over the shoulders of existing freeways. He proved it could be implemented faster, cheaper, safer, and more resistant to earthquake damage than any light rail proposal. It further eliminated the need to condemn and purchase countless miles of right of way access. And since the Seattle metro area, and all Puget Sound grew up around the freeways, it would put the people moving capacity directly where businesses developed. Bring that plan back. It's far better than anything that's being presented here.
EAST KING COUNTY	Stay off the CRC Trail with mass transit!
EAST KING COUNTY	25 years is a long wait. Can federal funding be used to speed up the plan?
EAST KING COUNTY	Please add additional bike carry options to bus system. Currently only 3 bikes allowed - need options to carry more bikes.
EAST KING COUNTY	Horribly expensive and won't even move 1/10 the additional new people expected to move into the area over the next 25 year. Huge waste of taxpayers money. Most expensive light rail plan in the entire country! Won't make roads any less congested.
EAST KING COUNTY	Do not use the Kirkland corridor for buses
EAST KING COUNTY	mist the boat
EAST KING COUNTY	without federal funding, this program is not commercially viable. The ridership and fare structure cannot pay for the capital costs of this system.
EAST KING COUNTY	No buses or light rail on the Cross Kirkland Corridor.
EAST KING COUNTY	25 years is a long time. I'm 35. By the time this is done, I will be retired.
EAST KING COUNTY	Pedestrian/ bike pathways are painfully expensive and often show little use which is a tremendous waste of tax payer dollars. For example, the pedestrian walkway constructed alongside Renton rd off of exit 15 of I-90. I travel past there multiple times a week and have seen 2 people using this bridge since construction. I don't mean the same two people everytime. I have only seen 2 people having once used that bridge. With how expensive that project was, and having it been approved, I think that extending public transport should have no problem getting funded despite the fact it is increasingly more expensive. Reducing highway traffic, and commuter emissions would be huge for our environment as well as reduced wear on our roads. Reliance on public transport would eventually be a huge benefit to our economy and is placing an importance on the future generations ability to succeed rather than making current generations comfortable.
EAST KING COUNTY	Please find a way to fund this without raising the sales tax. It puts too much burden on the poorest in our community. Tax tires or gas or lawn jockeys.
EAST KING COUNTY	Stick with buses not light rail, tracks are permanent, bus routes can be altered to fit need of population

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Please define what an "average adult" is in puget sound. COMPLETELY misleading that you represent your proposal under this approach. Why not offer a calculator that uses your proposal as a basis so the citizens can clearly understand for themselves the actual cost of what you are proposing. I have NEVER seen a government proposal like this stay within the parameters that the proposal defines. BE HONEST. The costs will most likely be 3xs what you are proposing here.
EAST KING COUNTY	Keep buses of Kirkland Corridor trail
EAST KING COUNTY	Make walking much safer! I'd walk one mile to and from my transit center if walking was a safe option. The same applies to biking.
EAST KING COUNTY	<p>Right now your service between Everett, Lynnwood and Bellevue is abysmal and insufficient at best. The Everett to Bellevue bus weekdays is only 16 trips in the morning, 4 trips in the afternoon and it does not make stops at I405 and Beardsley (southbound in the morning and northbound in the evening), which have many businesses in the Northcreek Business Park. Returning Bellevue to Everett 4 trips in the morning and 17 trips in the afternoon. There is nothing on the weekends.</p> <p>The service between Lynnwood and Bellevue weekdays should be 20 minute service at the least. These buses are crowded 6a - 9a and 3p - 7p. Also, there is no Sunday service.</p> <p>How do you think your BRT service would be any better? Buses would still be caught up in the congestion. You don't even address that congestion.</p> <p>Also, I don't think you should take eight years to start this service. Buses are easier to put on the road than putting lightrail in an area. I will vote NO as the plan is stated now.</p>
EAST KING COUNTY	Concerned there is no comment about expanding parking capability @ P&R stations where capacity is already an issue. By the time we get into the 25-year window, this will be a more serious problem, discouraging some people from using the system. I would have expected this to be a part of the discussion; or at least an explanation about why this issue is impractical to consider.
EAST KING COUNTY	Right now we don't use transit since no convenient options for the Eastside and from/to Issaquah Highlands area. Thankfully we don't pay the RTA tax since we live in unincorporated King County. As retirees we do not want to pay additional taxes or tolls for transportation options we probably would never use.
EAST KING COUNTY	The train from downtown Seattle to Husky Stadium is fast, but we need buses to get from Husky Stadium to 15th Ave NE or Univ. Way.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

<p>EAST KING COUNTY</p>	<p>I have concern with what you propose because of what you have done to [explicit] up traffic on the 405 corridor. You do not make it easy for those on the Eastside to access Seattle. I used your system once and because I did not have the correct change I had difficulty in buying a ticket. That was the last time I used the system. I do not know if you have made it easier to access the system, i.e. having a way to purchase a ticket at the transit stops, as they do in Europe. To use your system, I have to get into my car and drive to a park and ride which in some cases is as far as my destination, so I ask you, does that make sense to drive to the park and ride when it is just as easy to drive to my destination. There is no bus service in our neighborhood, there is in Seattle but not in Bellevue, why is that?</p>
<p>EAST KING COUNTY</p>	<p>Absolutely NO Light Rail or Bus on the East Rail Corridor or East Lake Sammamish Trail. You have endless miles of roadways already. You have destroyed much of our green space through concrete/development. It is imperative that you keep these Trails preserved as Greenways so that we have quality of live in our backyards. One of the main reasons folks want to move here is the natural beauty. If you turn the Trail GEMS into motorized transit ways, we become another industrialized cement polluted city. Cars are the past- repurpose your cement roads to light rail or BRT and NO TRANSIT on the ERC or ELST&gt; Save our Trails, Save our Greenways, SAVE OUR LIVES with fresh air, access to nature, access to our neighbors and wildlife for afterwork Joy, exercise, nature viewing. Do NOT SELL out our nature that we can never get back. You can build things in the space you have.</p> <p>Light Rail MUST go across 520- I am shocked that this was not built at the same time (what are you thinking?). Both 90 and 520 should have Light Rail running.</p> <p>Get those buses OFF onto their own lanes, on the side of the road! NEVER ON the ERC or ELST.</p> <p>We should be able to list our location and our destination and time of travel and receive back a report of exactly what bus and light rail combination we need to take and how long it will take- if this exists, I can not easily find it as I am not a regular commuter, BUT I would commute more if I did not have to spend so much time trying to figure out where to go and how to get quickly from one location to the next during the time I need to travel. Please send me a link If this easy user solution exists.</p> <p>Absolutely imperative that you provide ample parking, bike and ped access, bike storage at stations to prevent theft, ease to take your bike on bus or rail. If 2 of us are traveling together, trips are drowned if there are not 2 racks on the bus- we have to wait for the next bus and that usually means we can not go.</p> <p>Have more demo classes at Farmers Markets so we can practice how we put our bikes on the bus racks, including if a bike is already in the front rack.</p> <p>Have excellent Way Finding to the Bike Storage, Access pathways, Rail Entry- I get really nervous if I do not know how to properly and easily do something-it makes using the services feel "culty" like only insiders know how and the rest of us feel dump hoping we understand what we are to do</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Public transportation in this area is completely behind the population growth. All these issues are extremely urgent. Constant gridlock makes this area difficult to live in. Compared to any European city, public transport in Seattle is a complete disaster. There is no planning - how come the new 520 bridge does not come with a train??? It's completely backwards.
EAST KING COUNTY	<p>I am strongly opposed to Light Rail or Busses on the East Rail Corridor or Eastlake Sammamish Trail! These must be national standard Bike and Ped Trails ONLY. We have very limited greenways left in the backyards of our cities (easily accessible after work). We have miles and miles of cement roadways and development that can be repurposed for Rail and Bus Routes. It also costs MORE to use these greenways, and I would challenge the cost to the environment and our mental psyche to take away these continuous GEMS to make yet more industrial looking transit ways. I might as well live in Detroit or downtown Seattle industrial area- the only reason MOST of us chose this area is the natural beautiful quality of life. If you destroy all greenways in the city, we are not special, we are just as ordinary as any over built cement hell.</p> <p>Make bike and ped access, wayfinding, storage a priority in the development plans&gt;&gt;Make it easy to be healthy physically and get cars off the road.</p> <p>Give me a technical solution to plug in my location and destination and time of day and send me a quickest, easiest route so I do not have to waste time figuring out how to get from A to B.</p> <p>Lower the cost of a ticket. 2 people 2 ways cost \$10. By car, \$1 plus usually faster and more convenient, so I drive- Very Bad and I have the means, imagine poor people.</p> <p>Use alternative energy for lights, signs, walk ways&gt;&gt; this system must be futuristic, artsy, NW branded and proud as a leader in alternative thinking. Fun and wise.</p> <p>No Busses or Rails on the ERC or ELST, I can not say loud enough have important this is to my family. We want our green spaces and our ugly developed spaces to be absolutely separate, please.</p> <p>Ensure restrooms, clean water for drinking.</p>
EAST KING COUNTY	All of the park and rides are full. They will continue to be full, light rail or not. Build new park and rides with feeder, small busses going to the hubs. On the east side the traffic is getting worse, but the bus service is worse. In other countries small busses pick up riders and take them to hub where large busses or trains take the riders to another hub, not here.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

<p>EAST KING COUNTY</p>	<p>I think you are ignoring the needs of the Kirkland and Houghton areas.                  The Kirkland transit center is not well connected to the north/south corridor along 405 and no parking is available. Also access to Houghton Park and Ride is limited due to the fact that the transit lanes are now in the middle of the freeway and many buses no longer stop at the freeway flyer stops there. You should seriously think about designing a station in Kirkland that includes a parking structure and better access to the station for pedestrians where 85/Central Ave crosses under the freeway. There was talk about ST buying the Lee Johnson Car Dealership property for this purpose by Sound Transit personnel several years ago. The plan also included ways to better connect Houghton Park and Ride to a transit facility at 85th provide. There was also talk of improving access for Houghton pedestrians and park and ride users to the center of the freeway for bus access instead of the current flyer stops. I am concerned that you will do away with the existing flyer stops that allow workers to get to Boeing and other places of employment without finding an alternative solution. People in Kirkland will be paying a lot of taxes and getting very little for it. If you want us to support this plan financially ST needs to come up with a better facility with parking and access to the freeway for downtown Kirkland and Houghton.</p>
<p>EAST KING COUNTY</p>	<p>I think there should be more things connecting, like busses to sounder, sounder to the airport rather than having a complex, separate system. It shouldn't take 2 hours on the bus to go to Everett from Kenmore</p>
<p>EAST KING COUNTY</p>	<p>Reliability and speed are the two things that keep me from riding transit. When I commuted from New Jersey into NYC it was the fastest but I knew exactly when I would leave and when I'd be there. By nailing reliability first you will get more ridership. Then increasing speed will serve to retain those new riders and gain additional.</p> <p>I would also like to see how public/private arrangements could be made to, for instance, allow Microsoft to lease space in these new transit lanes to offset costs to the taxpayer. If done with efficient scheduling software it should have no negative effects on riders on any Sound Transit or Metro fleet vehicles. Note: I do not work for or with Microsoft.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	ST3 is a very, very bad idea. It is too expensive. Light rail has been built in other regions for a fraction of the proposed cost, and you know that the inevitable cost over runs will be given to the tax payer. ST3 is a fixed system with limited flexibility. (You can not move the tracts where you can move a bus line). ST3 takes too long to build. It does not take into account the expansion of the population. In 25 years the traffic issues will be worse not better. By the time this project is completed and paid for we will need another colossal change to the system. This survey asks questions about how BRT can be used to support ST3. If BRT is so great in support of ST3 why should we not consider expanding BRT alone? I would suspect that a large fleet of Uber electric commuter vehicles would effectively support an expansion of BRT. It would cost less, be more flexible, and likely have a greater impact over a 25 year period. Finally, why are we having a congestion problem in this area? Would it be because people need to commute into the city for employment? What if we looked into moving business out of the city or giving tax breaks to businesses that are located where the employees live? If 20% of the commuters that travel from Everett to Seattle can stay in Everett because their place of employment has moved to Everett then we do not need to have a mega expansion of the system. But, I'm sure that King County would be more concerned about it's tax base rather than improving the system.
EAST KING COUNTY	Delete light rail to Everett and Tacoma and focus on Sounder improvements. Delete Issaquah line to reduce costs (invest in BRT.) Add station in Redmond at NE 51st.
EAST KING COUNTY	Add more parking
EAST KING COUNTY	Sounder service to Everett should be cancelled because of landslides and the money should be spent extending rail faster. The alignment should maximize redevelopment near stations.
EAST KING COUNTY	The reason I don't take the bus because there is not easy bus access from Kennydale near McKnight Middle School after the hours. The entire Renton community is very disappointed that ST is not putting light rail at Renton on the ST3 plan. Renton is one of the key facilities that Boeing produce airplane in the Puget Sound, along with other business like Valley Hospital, IKEA..etc. You need to have good transportation so people can take tor work and leave their cars at home. Renton is close to Seatac airport; you need to create a parallel light rail path for the east side people to get to airport so that not all the traffics have to direct to one light rail.
EAST KING COUNTY	Increase carpool/transit parking!!! Parking garage maybe?
EAST KING COUNTY	Adding more buses or a faster rail from Redmond to Downtown Seattle.
EAST KING COUNTY	Don't ruin the nice laid back feel of bellevue. Why fix a window that is not broken. Please don't put this down bellevue way
EAST KING COUNTY	Most important to me is light rail or rapid bus from Kirkland to downtown Seattle and sports stadiums.
EAST KING COUNTY	we desperately need better DIRECT and more frequent transportation between mercer island and the university of washington...not just that dependent upon "peak hours" but, rather normal, far more reliable and direct service both daily, and weekends.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	There is currently very limited transport options in the kenmore/ lake forest park area and this I think having a link to the more major transit stops to be able to go towards Bellevue and downtown Seattle should be done. The 522 is a major bottleneck of traffic and this having an easier public transport would be immensely helpful.
EAST KING COUNTY	Other sources of revenue should be tapped rather than increasing the sales and use tax. This tax is incredibly regressive and harmful to lower income individuals and families in the area.
EAST KING COUNTY	The entire state benefits from Puget Sound transit developments. Citizens statewide should pay for the expenses.
EAST KING COUNTY	Express bus service at peak times and priority bus lanes or bypass ability appears to be more flexible and more cost effective than light rail . Especially to the outlying areas.
EAST KING COUNTY	<p>I want to see transit be as competitive as possible for as many people as possible to make as many trips as possible to address our commitments to environmental sustainability and providing opportunities for economically diverse households to have a place in our region. To that end, ensuring Sound Transit projects are considered alongside the rest of the planned and existing transit network and that ST works with these agencies to come up with a comprehensive vision for how the different pieces work together is essential. Additionally, the transit solutions need to be scaled appropriately to the contexts they serve to be useful to as many people as possible. This might mean investment in a single corridor where there is a high concentration of people along the corridor or it might mean investment in a more spread out but coherent way. Please don't choose the tool (light rail transit) before understanding what the problem is. I don't see a clear connection between local and regional goals and the way Sound Transit service is being expanded. If we are trying to remain or become a more sustainable and affordable region, building light rail in freeway medians where the ability to generate a new community around transit over a generation or two is severely limited. It does nothing to make our cities and suburbs more productive places. In the case of the light rail "spine", building it next to the highway has a similar effect to increasing the highway's peak hour capacity and does little to change the surrounding land use situation.</p> <p>Sound Transit needs to shoot to be a transformative and widely relevant force in the region. The ST3 package is not transformative and will not be relevant to enough people to make them vote for it or to meaningfully move us in the direction of our shared goals.</p> <p>Thank you for listening!</p>
EAST KING COUNTY	Nobody takes light rail from Seattle to the airport because it makes so many stops and takes so long. Light rail needs to be a viable alternative to car transport, meaning transit time must be prioritized over giving every neighborhood developer their own station (i.e. countless stops creates excessive transit time, creates lack of use).
EAST KING COUNTY	Please consider additional parking or alternative parking solutions (passes or reservations maybe?). I love be able to take the bus every day, but hate that I have to drive 25+min away from home in order to find parking.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Yes, all these projects have a lot of good things about them. But don't lose sight of what needs to be done now, and is a short fix, but especial for the people here. I'm talking about Redmond Ridge. We need a bus route that takes in Duvall, Redmond Ridge (That takes in Trilogy's Club, QFC shopping centre, the route around the school areas that bus number 224 takes now between Duval and Redmond only. Route 232 could include 224 before Duvall, so between Duvall & Redmond is route 224. Also, the bus schedule would be for seven days and have a wider day spend so more people could use it to go to work, shopping and functions. More stops are needed along the entire route and a park and ride somewhere near the QFC shopping centre. Most of us at Trilogy are 50 to 90 & above. We as old people should do, what to take a bus have a life without driving when we really shouldn't. We will not be around when your projects get even close to finishing and we have definitely paid and still are paying our taxes. Thanks, Bruce
EAST KING COUNTY	THE TRANSIT ORIENTED DEVELOPMENT PLANNING PROGRAM SHOULD BE SUPPORTED TO REDUCE DEVELOPER SPECULATION IN PROPERTY SURROUNDING STATIONS, AVOID LOST OPPORTUNITY COSTS AND CAPTURE INFILL OPPORTUNITIES FOR AFFORDABLE, BELOW MARKET RATE HOUSING.
EAST KING COUNTY	Further delaying the substantial investment will cost us all more in the interim and in the long run - move ahead!
EAST KING COUNTY	I would always support trains over buses. Huge subsidies to allow a few to travel on transit are not acceptable: we need to have the routes that people are going to use.
EAST KING COUNTY	I am a woman who rides the bus and light rail as often as I can. I strongly support adding more evening bus and light rail trips to/from downtown, to enable people to safely attend evening activities in that area without the need to drive or to wait outside for long periods in order to catch a bus home.
EAST KING COUNTY	Any step forward is better than the system we currently have. I travel around the world and am completely amazed at how easy rail transits facilitate movement without having to drive somewhere. It's embarrassing that the Seattle area tax payers are so short sighted in this--I support any extension of the transit system to bring us into the future!
EAST KING COUNTY	We could have a lot more streetcar trolleys. Why are they so expensive?
EAST KING COUNTY	Why is RENTON left out of the high speed rail picture? How about connecting Renton to the MLK line to Seattle. How about a line from Kent and Renton to Bellevue college?
EAST KING COUNTY	Let's walk before we run, and get people to the idea of public transport sooner and cheaper. Throw out ST3, Institute a regional BRT WITH traffic control preference with both lights and lanes and equal destination availability , eg Woodinville to Boeing field in 45 minutes or Mukilteo to Puyallup in 90. No tradition centers, just bus stops, and do the hard work of quick enter/egress and culture change to both use public transport and make it safe and quick.
EAST KING COUNTY	since I am not too familiar with the details of the plan, I think the priorities should be of a combination of which items would help congestion the most first, and which items could be completed the fastest. There should be emphasis on establishing easy ways for people to walk, bike and park to use transit.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Parking and access to light rail and bus routes is extremely important. Right now I drive because I cannot find parking close to bus stops or ANY of the light rail stops. Consideration must be made for easy access, or folks will stay in their cars. You have to make it EASY before folks will switch!!
EAST KING COUNTY	Cost too much and projects not completed on time!!! Put transportation money in smaller buses which will be a lot more flexible in future! NOT in rail! Too costly on property tax, sales tax and car taxes! PERMIT taxes!!
EAST KING COUNTY	Fast track it!
EAST KING COUNTY	I'm all for mass transit but not happy with your plan. My question to you is, why did you not want to include lite rail on the existing Burrington tracks that were abandon. By using an existing right-of-way it would be much cheaper since you already have a clear line. It makes no sense to put in a walking trail when we have a mess on our roads. I would be 110% behind this project and willing to pay my share if we could have light rail around Lake Washington Blvd. I live in Lower Kenndale where the closest bus is 1 mile away, we have no buses running in our neighborhood NO PUBLIC TRANSPORTATION.
EAST KING COUNTY	Light rail is only as good as a person lives near the line. I would still have to drive to a place such as a P&R to catch a bus to get me to a light rail stop. At that point, I might just drive or catch a bus. Buses reach out further geographically and are better people movers. The infrastructure is there for buses to expand out whereby light rail is limited to only where it has been built. You can rave all you want about light rail and its people moving capacity, but if you don't give buses the chance to get more people to use public transportation, I can't see spending more money for light rail.
EAST KING COUNTY	Prioritize Bellevue transit improvements  Look at equity implications for all investments
EAST KING COUNTY	Why don't the have more buses running more frequently and forget all the construction costs that will take 25 years.
EAST KING COUNTY	expand sound transit foot print to add additional paying supporters. do not use or lower the property taxes unless spread out of the current transit foot print. i fully support the expansion but strongly want to spread out paying people in the existing sound transit foot print. i would like to have the board utilize taxes for those that rent cars/hotel taxes to help pay for these projects. other states/cities utilize this and i strongly urge the board to utilize others that visit and use our transposition to help off set the cost in stead of only citizens that live in the area.
EAST KING COUNTY	V

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Not sure I fully understand how this is to be funded, but I for one, would not likely use any of it very much; however, we need it as traffic SUCKS and will only get worse without something being done. I think the main thing is to provide good transportation solutions to the current major employers whose employees are some of the major causes of congestion (not necessarily their fault). Employers like University of Washington, Microsoft, Boeing, Paccar, Starbucks, etc....., should shoulder a larger % of the cost since they and their employees are going to benefit. Plus, I think that the users of the transit system should also shoulder a high % of the costs....kind of a "user ury" tax. Definitely need to reduce traffic congestion down both I-5 and I-405 in both directions during peak traffic times. Having said all this, I do believe we need to have our crystal ball working and planning NOW to solve a problem that is only going to get worse....."Pay me now, or pay me 'more' later". Also, speed up the time line.....seems to be taking too long. And finally, PLEASE figure out some other alternative to using the new Kirkland "walking/biking" path corridor. Don't ruin a good thing. Thank you!
EAST KING COUNTY	I think there will be good support for the project if the trains and buses can be built in the area. The Puget Sound region certainly has the manufacturing skills to accomplish it. I think many people won't be as pro-transit if they don't see a benefit for the area beyond simply building a bus-train system. This could be a chance for good paying green jobs in the area for working class folks.
EAST KING COUNTY	analysis that I have read indicates the light rail system will REDUCE the number of people making trips across 405, while adding to congestion. Poor planning.
EAST KING COUNTY	Fix Issaquahs commute!
EAST KING COUNTY	Build it as extensive and as quickly as you can. We cannot become a major urban powerhouse without it. Critics be damned...full steam ahead.
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail Remove the environmental study between Bellevue and Bothell via the CKC Trail Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride If all of these are not removed, I will actively work to defeat ST3 in November
EAST KING COUNTY	I only wish ST had some qualified expertise in it's projects. I have worked on committees in other cities And Seattle ST is an embarrassment and obviously corrupt.
EAST KING COUNTY	ST3 is "Stratospheric Taxation Cubed"! Choo-choo trains were big in the 19th century. When we you propose stage coaches?
EAST KING COUNTY	It is difficult for me to respond as I am not a frequent user of the system now as I live in a location in Bellevue where mass transit has been inconvenient and it isn't even easy to take a bus to downtown Bellevue. Taking transit to serve on a jury at the Regional Justice Center in Kent required me to devote 4 hrs. round trip each day. As a senior citizen, I fear I will not be able to go grocery shopping or to my medical appointments once I am unable to drive. I will not be around to enjoy the majority of the improvements proposed but I certainly hope expansion of the system becomes a reality for younger citizens.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	I consider myself an intelligent person, but all of this is just too confusing. I hate to be selfish, but I don't see how it would benefit me, and I don't have a feeling for how much it is generally needed. So it is REALLY hard for me to give answers to your questions.
EAST KING COUNTY	the project does not address how people will be able to access the various rapid transit options to take advantage of them - i.e., how would someone from unincorporated King County access the rapid transit to downtown besides driving their vehicle and parking? Also, to pay for these projects, various taxes and fees would be imposed - thereby creating further financial difficulties to those who would benefit the most from rapid transit. Finally, I do not understand why Seattle is so far behind in adapting to the needs of commuting - especially when other more advanced cities, like SF and Chicago, have had these in place for decades.
EAST KING COUNTY	the timelines are pretty sad, especially given the work that could have been done alongside the 520 floating bridge replacement to put public transit in there. the costs, like all govt managed projects seem excessive, and will of course go over... so for once it would be nice to see contractors penalized for overages in expenditure or time. after the mismanagement of tolling on the 405, the debacle with motorcycle lane splitting and other failures to implement a cohesive transport policy in the State of WA I have very little confidence in this making any real difference in a timeframe that will support the growth of companies like Microsoft, Amazon and Boeing...
EAST KING COUNTY	KEEP BRT AND LIGHT RAIL OFF THE CROSS KIRKLAND CORRIDOR
EAST KING COUNTY	Good job of making the difficult tradeoffs -- if you need to cut the price to sell it to the voters, you could postpone Downtown Redmond and Issaquah ( save \$2.5B of high \$/rider)
EAST KING COUNTY	This does nothing for residents of Sammamish, yet is going to cost my family almost \$1000 per year. I don't buy the "indirect benefit" line, either -- this isn't going to relieve congestion along I-90 even after it's finally operational, and it's going to be a horror show during construction.
EAST KING COUNTY	Faster! Time frame is too long. Need this now!
EAST KING COUNTY	Please include limiting semi-trucks to one line. Their overall poor quality of driving causes huge back-ups. I see many semi-trucks everyday in all lines which should be illegal.
EAST KING COUNTY	The price tag is stunning. Voters recently approved a tax increase for early education. Legislature still has to fund basic education as required by the Court. I am not willing to spend such a huge amount for transit until we know what the financial impact the Court's requirements will have.  I could only support a more incremental approach.
EAST KING COUNTY	Bus service in our are is poor. I would take the bus or train if there were more options. Currently, there is no service to/from our neighborhood after 7:30AM.  I've tried parking closer to town to catch the light rail but there aren't many parking options. I would welcome more public transit from the Renton area!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	The timing of the project to get the next phases complete is too long. 8 years to complete the first phase is unacceptable and in 25 years the changes that will be made are likely to not be the solution needed tomorrow rather an answer to our traffic problems in 2016.
EAST KING COUNTY	Like I have said in the past, this has taken way too long to get these projects into the working phase. Didn't we look at the Bay Area, Portland, and Vancouver, BC. Even LA has a rail system through out the county. Wake up Seattle area. It will now cost us all many times what it would have when this was first thought about. We are now retired and the only use we would ever use is maybe the free toll times on 405. Our neighbors say they never use the freeways anymore. Good luck!
EAST KING COUNTY	Would like to see Light rail along the eastern side of Lake Washington from Renton to Kirkland....
EAST KING COUNTY	Too little, too late, too costly.
EAST KING COUNTY	Responding via smartphone and can't fully read categories. Please pay more attention to projects in the Bothell/Woodinville area. We are completely underserved. Bus schedules don't change at all or services are cut while ridership is increasing. Bus is always packed/standing room only. Service only for brief periods each day. Needs expanding!!!
EAST KING COUNTY	Funding of the project is the issue. How to fund and from the appropriate sources. It should NOT be funded through property tax increases. It should be funded through gas tax, higher fees on bus tolls, rapid transit and light rail. Those that choose to use light rail and bus services should pay for the services, as they will save on gas and parking costs. It should NOT be subsidized by the general public.
EAST KING COUNTY	Provisions for neighborhood parking impacts adjacent to all transit stops and stations for rail and bus needs to be included in the plan. With few stops spaced too far apart to walk, informal parking lots will appear along streets, and illegal parking will happen at public and commercial properties. The metro 255 route through Kirkland is a good example of this. Develop micro transit network in cities- shuttles, ped and bike ways- to get people to the stations.
EAST KING COUNTY	I would strongly support light rail on 405 corridor. Also, would support an accelerated time line for all east side projects.
EAST KING COUNTY	Access to transit centers: I am retired and live in Issaquah, so I avoid peak travel times but I am having trouble finding parking at the transit centers after 9AM--I can no longer find parking at the Issaquah Transit Center and the Issaquah Highlands parking structure is filling up rapidly. People are starting to park along neighborhood streets blocks from the bus stops. Massive new development projects are planned in Issaquah along Newport Way. Newport Way needs sidewalks, safe street crossings, and a frequent shuttle-service to the Issaquah Transit Center. Additional frequent shuttle services from other population densities will also be needed. Consider eventually placing the Issaquah light rail station on a lid over I-90 in a central location.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	I strongly oppose Sound Transit's expansionist, tax and spend policies. Puget Sound residents need more roads, not more half-filled busses and trains. This is merely a parking subsidy for people who work in Seattle, not to mention a way to further increase ST's bloated bureaucracy, and it will cost us in additional property taxes and sales taxes. I will vote NO on this measure in fall!
EAST KING COUNTY	Renton is left out in the cold in this plan. Why is it that the "rich " professional communities (Issaquah) , and others get rapid transit via rail or sounder, but Renton gets nothing except bus. The I405 corridor is always one big traffic jam and has resisted many efforts to improve the drive time- that corridor needs light rail, especially through the s curve where it all bogs down, and between Bellevue and Renton. Renton should be included in the light rail plan.
EAST KING COUNTY	The plan for the eastside must be moved up. We pay the tolls. We have almost no transit support. There isn't even enough space at the park rides to take what buses are available now.  Moreover, the failure to add parking adjacent to the new UW line forecloses even the option of fighting the traffic in, paying bridge toll and then being able to park at UW to get off city streets to get into Ballet, Symphony, dinner etc,
EAST KING COUNTY	Why isn't the Eastgate station called Bellevue College like the Stranger article had it. You have UW, TCC, you should also have BC. I and fellow students would likely be more supportive of a BC named station. Just saying there are 10s of thousands of us. :)
EAST KING COUNTY	The plan does not clearly define the streets and specific areas that could be affected by this proposal.
EAST KING COUNTY	I do not support transit-oriented density, but we do need adequate parking for mass transit to work.
EAST KING COUNTY	I would love to see light rail along 405 from the airport to Lynnwood as long as we could connect to a light rail to take us to Seattle. I would be on it every day.
EAST KING COUNTY	Underestimating how much parking will be needed at light rail stops north of Seattle would be extremely detrimental to the ability of folks to utilize this service for commuting purposes. The park and ride I use currently is full so early that it causes a lot of stress on not only riders but street parking/traffic in the surrounding residential areas. I would use light rail from Lynnwood into Seattle the second it is available, but if I'm not able to park there easily throughout the day, it's not worth much to me as I don't live in a neighborhood that's walkable to the Lynnwood P&R area.
EAST KING COUNTY	No more taxes for this system you are kill9ng us
EAST KING COUNTY	I think the Everett to Seattle commute should be a priority because the north end is experiencing so much growth and the commute gets worse all the time. I to from Lynnwood to Northgate and there is no direct bus, so I must drive or spend too much time commuting.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Why are Corporations who get huge benefits from Light Rail not paying any taxes? Why are homeowners and car owners paying for this while Amazon, Microsoft and Boeing freeload at the expense of the individual tax payer. Time for those freeloaders to step up and pay their fair share. Unless Corporations start paying taxes for Sound Transit I will vote no on ST 3
EAST KING COUNTY	I recommend not routing light rail or Rapid Bus Transit on the Cross Kirkland Corridor trail.
EAST KING COUNTY	This is unnecessary. We can burden tax payers for something most will not ever use.
EAST KING COUNTY	<p>The fact that this program costs \$100,000 per mile and other successful projects cost as little as \$15,000 shows the misguided extravagance of the plan. Simple is better, bike paths, small buses to more places, such as anything going east and west, and more often.</p> <p>Don't displace people for this project.</p> <p>On the east side it is almost impossible to carpool to work due to diabolically few park and rides. Where would we park to take the train?</p> <p>The toll on 405 makes very little sense for commuters, poor access, eliminating 2 person car pools during the day, (just try to get three people where you work to carpool, It is hard enough to get two).</p> <p>\$4,000 tax on the people that will own this house over the next 20 years is unexceptionable unless the funds are used carefully and frugally to reduce the congestion caused by people getting to work. Mass transit moves people BUT NOT TO THERE JOBS. What are we supposed to do, walk miles to the buss then walk miles to work????</p> <p>Get the planners out of there offices and onto 405 from I 5 south to I 90 almost any time of day, ask the commuters why they don't use mass transit, THEY WILL ALL SAY THEY CAN'T GET TO WORK ON A BUSS OR A FANCY TRAIN, they need more general purpose lanes on the existing freeway.</p> <p>Think a bit about the guy that takes 2 buses and light rail from north Ballard to the airport, it took more than two hours... ridiculous!</p> <p>I am a Manufacturing Engineer that had to drive 405 for 15 years, the lack of intelligent planning is stifling the lives of the working people that have to finance these short sight ed programs.</p> <p>Look closely at the proposed plan, picture working anywhere there are jobs east or west of the main freeway and see if a person could actually get to work. You can't get there without a car.</p> <p>FORGET THE TRAIN PROJECT,,, MOVE PEOPLE IN BUSSES ANND CARS.</p> <p>[name and address]</p>
EAST KING COUNTY	I strongly oppose the resistance to adding transit to the Cross Kirkland Connector, as publicized by saveourtrail.org. I believe this is a special interest group of affluent homeowners in the vicinity that want to protect their way of life while disregarding the much larger importance of reducing carbon emissions. I will caveat this statement by saying that any adverse impact to large scale environmental heal (watersheds, salmon runs, etc) would not be acceptable, and would challenge Sound Transit to find a solution to preventing this.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Oppose building light rail structures in Bellevue before a design is approved to bring rail across the floating bridge. Oppose supporting transit related development through changes in zoning, etc. Oppose losing an important park and ride during construction of a rail station that won't be in use for years. Support Bus Rapid Transit in dedicated lanes. Instead of building rails, put buses in those dedicated lanes.
EAST KING COUNTY	Focus on light rail development instead of buses. This is a more permanent solution that move many more people and reduce traffic. Buses are often slow and cause highway congestion, not to mention the additional pollution they create, especially in dense areas like Seattle and Bellevue.
EAST KING COUNTY	The other ST projects have never meet their goal and have been way over budget. Why should I give part of my fixed retirement income for a project that will not be useful for 25 years and something better may be developed in the mean time?
EAST KING COUNTY	I think we should have additional parking at the Park and Rides along the I-90 corridor. It is difficult to use a bus when there is no place to park. Also, I think the I-90 corridor should be planned and built first as it is a fast growing region and buses during peak hours are crowded beyond capacity often with standing room only.
EAST KING COUNTY	All plans should specify projected commute speed and how many people it is will move in comparison with need, also transit should openly compete with car based transportation.
EAST KING COUNTY	Could not the old 520bridge be revamped for train instead of recycled concrete?
EAST KING COUNTY	25 years is too long to wait for light rail. Accelerate the build out
EAST KING COUNTY	The population of the North King County area will continue to grow, quickly, as it is becoming (over)developed. The daily commute through Kirkland on 405 is worse due to the changes to the HOV lanes. With more people and more jobs (hopefully), there will be more cars, unless viable, easily-accessed commuting options are made available. As much as the transit options are needed, just as necessary is a good marketing message to encourage people to take part in safe, reliable, friendly? public transit. We love our cars too much here. On the East coast the transit authorities finally stopped building roads to accommodate everybody all the time, and it made public transit a more popular option. Invest in the future of eco-efficient, safe, easily-accessed transit!
EAST KING COUNTY	learn from the Bellevue's nonsense impediments to progress that set you back for a decade, and try to out-maneuver similar Kemper Freeman efforts elsewhere.
EAST KING COUNTY	Businesses should pay a majority of the costs. Additional funds should come from capital gains and income taxes. The project schedule should be shortened considerably.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	My concern is that nothing is being done to address the increase in traffic flow around the Lynnwood station. Traffic is already terrible along 200th and 44th (traffic will back up along 200th all the way back to Aurora ave at the worst times now) between 4-6:30 with the addition of more busses and cars leaving traffic will be at an almost standstill. Did you ever consider a parking structure on the northeast cornering 44th and 200th where the hotels are. It looked like there the hotels might have to be removed for the track anyway and a sky bridge for foot traffic from the southwest where the station is over 44th, to a parking structure would get cars past that intersection by having them already park there to the other side of 44th without having to go thru the intersection of 44th and 200th. I really support mass transit but I feel nothing is being done about the impact on the surrounding areas. I went to a local meeting in Lynnwood about 2 years ago and brought up the traffic concern and the person for the transit said "that's not our problem!" I thought if that's the attitude why am I wasting my time! Please take these thoughts into consideration and good luck because traffic sucks out there!!!
EAST KING COUNTY	Why not add more lanes on the highways, or build more highways so there are more options for driving my own car? I don't want to ride a bus, train, or anything else. I want to be in control and drive my OWN vehicle. I pay large sums of taxes and I should have more roads to pick from.
EAST KING COUNTY	This whole plan is a nightmare. Rail service will have limited reach, and it will take extremely long to build. And while it's being built, it will significantly inconvenience people who are unlikely to benefit much from it in the near future.  Scrap it, and start over.
EAST KING COUNTY	Lanes should be added to many freeways in the area, I-405 in particular, to alleviate the severe traffic issues. Not all people are able to use public transport and options alleviating traffic for those using cars should be explored first.
EAST KING COUNTY	The Kenmore Park and Ride needs a garage to increase parking capacity. I commute along 522 with MANY other parents who cannot use the P&R after they drop their kids at school. It is always full by 9am.
EAST KING COUNTY	Stop wasting tax payer money. I would be more supportive of this if you were more responsible with the funding you have been given. It's like you have no idea what you're doing. Shameful up to now.
EAST KING COUNTY	This is a colossal waste of money. Improve the roads and quit spending money on toll lanes and bike lanes. If there was a chance light rail would come to the Bothell area in my lifetime I might consider supporting it. As a retired person I see no reason to tax myself when the tax dollars if contributed to transit have been so badly mismanaged and wasted.
EAST KING COUNTY	Develop faster Fund with income tax on couples earning over 500k

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Existing railroad tracks in Renton and Bellevue could be used for a commuting rail line between Renton, Bellevue and Redmond and would be an advantage in saving money instead of building a completely new rail line. This existing rail line should be considered. There would have to be some adjustments due to some of the rail line being removed, but what is still existing can still be used.
EAST KING COUNTY	Buses are the way to go. Light rail is a big mistake.
EAST KING COUNTY	You are proposing a solution to a problem of the past. Distracted and incompetent drivers clogging our roadways. Auto drive cars will eliminate this issue long before you build a train solution that will not be used. Spend these dollars adding bus service immediately to help mitigate current traffic issues and start planning for self driving vehicles which will eliminate the traffic congestion and parking issues caused by human operated vehicles.
EAST KING COUNTY	I am so very glad you are trying to do this and to establish a vision for the future. 50 years too late is better than not at all. But surveys like this are NOT the way to prioritize. Results will be extremely biased based on who responds. People will vote for the service that they need themselves. And you have no idea if the survey is a sufficiently representative sample to know if this is consistent with ridership expectations. You really need to base these recommendations in scientific studies of traffic and commuter driving patterns
EAST KING COUNTY	Is it true that Sound Transit is only contracting companies that have union workers for all of these projects? If so, I think it's better justified to use 'prevailing wage' and open the bidding options to more contractors and workers through the state. We are all paying for these projects through our taxes.
EAST KING COUNTY	NOW is the time for mass transit here!
EAST KING COUNTY	All ST3 subprojects need an increased focus on bicycle access -- bike parking at rail stations, expanded bike capacity on rail cars, etc.
EAST KING COUNTY	This is what I learned about how Light Rail proposals work. The agency sends out to voters one proposal, we vote yes giving you more tax dollars but you then completely change the route from what was voted in. Then with your power Sound Transit intimidates all other governing authorities making them comply to your will. You say you are trying to address traffic issues but in reality it is all about development. It is all about the regions growth but little about the quality of life that we are losing and you sell us on the farce that mass transit will improve our quality of life. It is not!
EAST KING COUNTY	The plan is too big and too ambitious. New technology may well provide other alternatives (driverless "pod type" cars may significantly increase utilization of highways, etc.). I would recommend a more focused, "one step at a time" effort that can then shift and adapt over the next few decades.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>I am completely against transit in this area. The main problem I have found with transit (Sound Transit or Metro) around Puget Sound is that it is only good if you are going between two major points, for example Bellevue Transit Center to downtown Seattle. If you don't happen to be near one point and going to another point it is pretty much useless. I live in Bellevue and used to work in the Fremont area of Seattle. Before they started the tolling on 520 I had a 2 hour a day bus commute on Metro. I could get a bus a block from my house that took me directly to the U District where I caught another bus to Fremont. After Metro brought in the B Line my commute went to 2 1/2 hours then after six months they made another change that took my commute to almost three hours a day. So I bought a car and drove to and from work and I only spent an hour a day commuting. Sound Transit is even worse in that they only go between major hubs in the area. Until that kind of problem can be solved I will be voting against anything to do with mass transit in this area.</p> <p>Another problem I have is that they don't always have enough transit available when needed. I go to 5 to 10 Mariners games a year and I would ride transit more but when the games get out it can be harder to get back to your car at the park &amp; ride when riding transit than getting out of Seattle when driving to Safeco Field. I have seen long lines waiting for the ST 550 bus going to the Eastside but at 10:00 at night they only run every half-hour</p>
EAST KING COUNTY	<p>In the short term, the more that can be done to make existing transit more reliable would be the most helpful. Express busses should run more frequently on major routes, with frequent feeder service through neighborhoods. Having dedicated bus lanes so busses (even express busses) aren't stuck in traffic would be a great starting point.</p> <p>I support the system-wide expansion of a connected regional rail and bus system, but there is much room for improvement with our current system(s) in the meantime.</p>
EAST KING COUNTY	<p>We do not need anything that would bring more development to the eastside. Traffic getting terrible as it is.</p>
EAST KING COUNTY	<p>Do not put any High Capacity Transit on the CKC Trail - this is a community treasure and we need to keep and preserve these spaces. Remove the environmental study between Bellevue and Bothell via the CKC Trail - don't waste our money on this!</p> <p>Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride, this makes no sense.</p> <p>If all of these are not removed, I will actively work to defeat ST3 in November</p>
EAST KING COUNTY	<p>Light Rail over runs in the past were obscene. Buses provide the most flexibility and lowest cost. I feel safer in a bus where I can see the driver than in a light rail car with dangerous troublemakers.</p>
EAST KING COUNTY	<p>The schedules for building ST3 are far too long to be of any use. Renton needed to be addressed in the plans. The cost to taxpayers is far too high.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>Light rail is idiocy. I use the bus services already provided and they are great. Buses should be expanded. They are more flexible with lower capital investment, the roads can be used by other vehicles, the replacement cost is lower. EVERYTHING about buses is better. If Sound Transit actually had a brain they would stop expanding this boondoggle. But then it is an unelected bureaucracy and doesn't listen to people...just does what it wants...because...light rail is "good". Anyways, I have no hope to stop it, they'll just build it and keep building it and it'll cost 50 billion and they 100 billion and ... god how depressing.</p>
EAST KING COUNTY	<p>This survey was difficult to complete. I reread most questions multiple times in order to confirm my response. There is much room here for an improved, concise presentation.</p> <p>Selecting light rail as the solution to our transportation needs says you are making a bet on perfect knowledge how the community will grow over the next 25 to 50 years. The monorail was seen as Seattle's light rail transportation solution in 1962. Transportation growth plans since the Seattle World's Fair did not progress as predicted. Why should we believe you are better forecasters of 25 to 50 year transportation solutions today compared to the 1962 prognostications?</p> <p>To begin with, a serious plan should address how Park &amp; Ride Lots (PRL) support the transportation system. Currently PRL generate no revenue from users. Institute a graduated user-fee linked to riders Orca Cards and Automated License Plate Readers (ALPR) to support the transportation system.</p> <p>Vehicles parked less than 4 hours would incur no fee. Vehicles parked up to 6 hours are charged the Low Rate parking fee. Vehicles parked over 6 hours would be charge the High Rate parking fee. Plug in your own numbers, at 80%, 25,000 total PRL spaces would provide 20,000 potential daily revenue sources.</p> <p>At an 80/20 Pareto split, a High Rate of \$10 and a Low Rate of \$5 will generate \$180k per day, \$900k per week and over \$45M per year. Odd my proposal of \$45M raises the same amount of revenue passed by 2015's Proposition 1.</p> <p>Solve the transportation parking issue first, be it a light rail or surface transportation solution.</p> <p>I am against light rail because of the permanent, risk adjusted high fixed costs. Read those words again.</p> <p>Permanent – Light rail is not quickly adaptable to changes in demographics and community growth patterns.          Risk adjusted – What happens when light rail suffers a Single Point of Failure? I refer to the mudslides experienced on Sounder Transit. The sinking of floating bridges in 1979 or 1990. What happens if the viaduct is damaged from the Bertha tunneling? What</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Add a light rail that runs parallel to 405 and 5 connecting north and south in both eastside and westside. Also, introduce light rail to connect eastside with Seattle area. This would solve 90% of the commute problems. Trust me I am an engineer so I know what I am saying,
EAST KING COUNTY	I was wondering about the cost, time and lack of associated highway construction. I am from Vancouver and travel down here on a regular basis. For half the price (\$25 billion) and half the time BC has built (or are working on completion of) 5 "Cadillac" elevated and driverless light rail lines. At the same time they tore down 8 old lanes of bridges across the Fraser river and replaced (replacing) them with 26 new lanes (including the widest bridge in the world) and replaced and widened all the associated freeways including tearing down all the old interchanges and rebuilding them along with completely new freeways. Traffic does not slow down on the Port man bridge at rush hour any time now What are you folks doing with \$50 billion?? My other concern would be that you are proposing a \$50 billion 20th century solution for a 21st century problem. In the next 10 years there will be fleets of smart car size autonomous electric cars picking up and dropping people off for 25 cents a mile. Never stopping or parking packing 5+ cars in the space of a single old style private car and the limitations of human drivers in traffic At this kind of per mile cost in a point to point vehicle will any body want to "walk and wait" for old style mass public transit? Thanks! [name]
EAST KING COUNTY	12 years to hook up Redmond, where one of the states largest employers is? Seems ridiculous. I'll have moved out of state before I can even use public transit.
EAST KING COUNTY	I think the rail routes should follow the freeways to better serve commuters from the suburbs. Rail routes such as UW to downtown do not serve the vast majority of workers that commute into Seattle from suburbs.
EAST KING COUNTY	Being a native Seattleite lifelong living Washingtonian I have seen a lot of State, County, and State construction project proposals and initiatives that were offered to be voted into existence that required residents to pay taxes on that were voted into existence (I can be specific in my next message sent but not right now only because of time constraints). To summarize what im getting at: Some of these measures were presented to the public right when the public was most aware of the problems (in this case transportation) being in their worst state. This swayed taxpayers who were willing to take risks on spending for community, City, County and state needs only to spend large amounts of money on projects overly beneficial to small areas and classes of people and trades. The south Lake Union Trolley is the first project that comes mind but not the only. This wasteful spending i have seen discourages taxpayers into conserving and not voting on future taxspending initiatives when the ( Seattle in this case) Washington State taxpayers intelligence is insulted and assumed to be easily fooled into spending.
EAST KING COUNTY	Invest in better bus service not light rail. Busses are cheaper and more flexible to adjust their routes when needed. Light rail is too expensive.
EAST KING COUNTY	Large businesses that require these levels of mass transit (ie Boeing, Microsoft) need to contribute financially to these plans as well.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>I feel strongly that the costs associated with these proposed solutions should be borne by the users just as the users presently pay for their use of the 520 bridge. Taxing the general population for the benefit of a few users is nothing more than wealth redistribution and has no place in these considerations.</p> <p>I also oppose any consideration of wheeled transit on the Cross Kirkland Corridor. The residents of Kirkland supported the cost of acquiring and developing the CKC on the promise by Kirkland politicians, of a pedestrian/cycling path NOT A TRANSIT CORRIDOR. A bait and switch by politicians after obtaining increased taxation approval may be indicative of the present state of politics in this country but is totally inappropriate. KIRKLAND, KEEP YOUR PROMISE AND DO NOT SUPPORT ANY FORM OF VEHICULAR TRAFFIC ON THE CKC.</p>
EAST KING COUNTY	<p>There really needs to be more parking at the park in rides, I get to the one in down town Redmond at 830 and it is usually full. The bear creek park in ride is a joke, so small for the amount of cars that travel in this area. More people would use the bus system and not be on the roads if there was always parking for us to use.</p>
EAST KING COUNTY	<p>As a Renton resident, I am disappointed that light rail will go to Redmond and Issaquah, despite a greater population in Renton than those two cities combined. The traffic on 405 around Renton is always congested and needs immediate attention. Moreover, I have a hard time voting to pay the same taxes as residents who will benefit more. Perhaps you can charge communities that benefit more higher taxes (ie--a sliding scale tax based on proximity or access to services). Usually, I highly support public transit and infrastructure, but, quite honestly, living in a large city that is highly underrepresented in this plan, I am not only hesitant to support it, but I may encourage other people to vote no, too.</p>
EAST KING COUNTY	<p>One aspect that is not in the current plan is adding bus lanes to the Kirkland CKC. I am greatly opposed to this. The population growth in Seattle and Eastside is much to fast. We are on the verge of losing much of our green space. We need to take a stand. Please exclude this project from future plans and take more aggressive positions to curb the growth.</p>
EAST KING COUNTY	<p>Please no motorized transit on the Cross Kirkland Corridor... I believe if you want to get people out of Cars we need safe places to walk or ride free from cars. The CKC is one of a very few places where one can walk/ ride without fear of getting hit</p>
EAST KING COUNTY	<p>There appear to be no service improvements between Sammamish and Seattle. Currently, there are several express bus options between Sammamish and Seattle and these routes are often crowded already.</p> <p>While the plans are not clear, it appears that express bus service between Sammamish and Seattle will eventually end once light rail becomes available in Mercer Island. If that is correct, I think this plan is limiting--express bus service between Sammamish and Seattle should remain an option even when light rail becomes available.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	Work with other WA agencies to improve air qualities of the Puget Sound area by promoting and providing programs to encourage electric vehicles on the streets, carpool programs with businesses/corporate/private entities, and encourage safe transportation system for residents in the Greater Seattle area.
EAST KING COUNTY	Asking people to support a proposal 22 years in the future makes little sense. spend the extra money to build these ASAP so we can benefit WHILE we are taxed. Also- parking at stations is critical unless you have a plan to leverage Self-driving cars that can pick passengers up. Otherwise, it's another 30-45 minutes to our doorstep (deal breaker). Transit oriented development can take place above parking stalls. Good luck
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail Remove the environmental study between Bellevue and Bothell via the CKC Trail Remove the proposal of mass transit from Bellevue to South Kirkland Park & Ride If all of these are not removed, I will actively work to defeat ST3 in November
EAST KING COUNTY	Please leave the Cross Kirkland Trail free of any mass transit plans. Also, do not put mass transit into the South Kirkland Park & Ride.
EAST KING COUNTY	No transit on the Cross Kirkland Corridor, No light rail on Bellevue spur, No environmental study on the Cross Kirkland Corridor
EAST KING COUNTY	just be sure to have plenty of parking at any park and ride or transit centers. now there is simply not enough
EAST KING COUNTY	They should not take away the walking trail that exists thru Kirkland. The public enjoy the trail and it will disrupt nature and the peaceful trail. The 405 area can be used instead!
EAST KING COUNTY	Please do NOT put transit on the Cross Kirkland Corridor!!!!
EAST KING COUNTY	To promote the use of mass transit, projects need to allow for large amounts of parking at major light rail stations, for example Eastgate for the proposed Issaquah to Bellevue line. If people can't access the light rail stations because the parking fills up between 8 or 9 AM or even earlier or if parking is only available to carpools, then light rail becomes too inconvenient. Parking is already problematic at the Eastside and Mercer Island P&Rs and the train stations from Auburn to King station. If residents are going to be supporting the large price tag of this project, then it shouldn't be problematic for them to access it.
EAST KING COUNTY	To expensive a d not well designed. Strongly oppose most of the proposed actions.
EAST KING COUNTY	Concerns for the cost of the projects. There are many adults who could not afford the \$200.00 a month additional expenses. How would this be assessed? by property taxes, sales taxes?
EAST KING COUNTY	Projects should be prioritized to move people N - S and S - N, then E - W, then neighboring areas like West Seattle etc.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - East King County

EAST KING COUNTY	<p>Don't even consider extending Bellevue Wilburton to S. Kirkland P&amp;R - too expensive, overlaps with environmental study, park&amp;ride already too crowded. Instead, re-direct funds to build light rail extension from downtown Redmond to Totem Lake - cheaper, shorter distance, and serves the growing businesses along that route and connects neighborhoods in Kirkland, Woodinville, and Redmond. For long term, I would support light rail on I-405 vs BRT (not sure why the plans can't be changed just because a federally funded record of decision document that doesn't make sense now, was approved a long time ago). But BRT on I-405 is a more economically feasible choice at this point and an early deliverable. It should be enhanced to include stations on 112th and NE 70th (that were on the original plan) and scrap the very expensive NE 85th St in-line station.</p>
EAST KING COUNTY	<p>Bus connections are an inherently unpleasant experience. There is no obvious way to fix it, but please research it anyway.</p>
EAST KING COUNTY	<p>Keep buses off the rail corridor</p>
EAST KING COUNTY	<p>Oppose light rail or bus use of the cross Kirkland corridor; support bus rapid transit on I-405 serving the various eastside communities, Renton, and Everett. The cross Kirkland corridor was "sold" to the local population as a walking and biking trail, not a precursor to light rail or additional bus service. That additional service would damage or eliminate environmentally sensitive areas along the corridor (so market by Kirkland), erode the value and quality of life of houses and related residential property adjacent to the corridor, and violate the original premise upon which the City of Kirland spent money removing the rail line and upgrading the pathway for pedestrian and bicycle use.</p>
EAST KING COUNTY	<p>I wish ST3 was more about building a sustainable region rather than emphasizing miles of track and enabling commutes that shouldn't be happening. Lobbying for more housing in all of Seattle and the inner suburbs, while not under ST's scope, would be a better use of money than track to far-out places.</p> <p>Get rid of all of the parking. If a station depends on parking for ridership then it shouldn't be built. Not only do park and rides not scale to fill high capacity ridership, they poison their surrounding areas.</p> <p>It's incredibly disappointing that ST never proposed any kind of solution for downtown Kirkland. Rail on the CKC missed downtown - it's hard for pro-transit folks to give support against the saveourtrail folks when the proposed plans lack useful stops. 405 BRT with a connection that doesn't actually get into downtown doesn't count either. If you want to make 405/85th work, 85th needs less car access. Just adding transit lanes and trying to build ped/bike infrastructure around what is essentially another highway isn't going to work.</p>
EAST KING COUNTY	<p>NO SOUND TRANSIT ON THE CROSS CORRIDOR KIRKLAND TRAIL!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!</p>
EAST KING COUNTY	<p>The timeline is ridiculous. That is way, way too long to complete these items. 25 years to get light rail to Everett and Issaquah? I'll be almost 70! Just nuts.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

Subarea	Additional Feedback - OTHER
SOUTH KING COUNTY	I hope serious consideration is given to increasing parking options with the expansions. I currently commute from the Federal Way TC and it routinely fills every day. I arrive before 7am and the only parking will be located on the top level of the parking garage. If the light rail is expanded to the TC, where will all those people park? Has Sound Transit considered seeking more spaces at the surrounding retail lots? Even now there is a lot behind the movie theater across the street that is always empty. Why can't Sound Transit lease spaces there?
SOUTH KING COUNTY	We are so far behind on building mass transit, cannot hit budgets or deadlines on projects. People are tired of tax increases and I do not support this big one as it never ends around here.
SOUTH KING COUNTY	Please put Burien rail back into the plan. This town is poor and needs support. Please look at where the need is too.
SOUTH KING COUNTY	If you are in Federal Way it will take you longer to get to Downtown Seattle since the plan for light rail did not include any ability for express trains. It currently takes 45 minutes to get to downtown on light rail from the airport. How long will it take from the Federal Way Transit center? The whole idea of light rail was ill conceived and did not take into consideration the need for express service from locations more than 20 miles from the city. All that has been accomplished with my tax dollars being in South King County is poorer bus service and no hope of having a quicker commute once light rail is extended to Federal Way. All my tax dollars have done is to support easier and more affordable commutes for the citizens of Seattle. Why am I not surprised.
SOUTH KING COUNTY	Who was so stupid as to put in the light rail and have "open" stations whereby passengers board the train via the "honor system?" How out of touch can you be? This encourages homeless, druggies, drunks, etc... to ride the trains. The idea your random security patrol asking for ticket validation is effective is just beyond clueless. I rode the light rail from the station just after the airport on a "slow" Saturday morning, no games or special events happening anywhere down town. The parking lot was almost full at 9:30 am--I got the last of 2 available spaces. The rail cars were overflowing with people by this stop (the first after the airport), no seating was available, luggage was everywhere, by one stop later there was no room for anyone to board--people were trying to cram their bicycles on board. It was chaos. Everyone I rode with who were from out of town were amazed at how awful this service is! They could not believe there were no station turnstiles, ticket validation requirements before boarding, why were the cars overflowing on a Saturday during a non rush hour time, etc...---it was embarrassing to be from our city.
SOUTH KING COUNTY	A large portion of your work force lives south of seattle die to cost of living. They need the public transit! Your wealthy neighborhoods like ballard belleveue do not take the transit as their only means of a job. We do not take it for looks or ease it is our lifes blood and standing room only is what i have experienced for thr last three uears commuting from Kent. I have few options 5:15 is the first bus out and headed back from down town last option is 5:20 back to kent. We need more reliable transportation and faster routs.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	I am a strong supporter of this project, and I understand that it takes time and a lot of money to build such a massive system like ST3. However, is it possible to have huge businesses like Amazon and Google (who are practically the reason for the economic boom/traffic mess that our region is experiencing) help pay for part of the cost? Property, sales, and vehicle taxes in our state are already pretty high, especially when coupled with fee from HOV toll lanes, SR520, SR167.
SOUTH KING COUNTY	<p>I am not qualified to answer many of these questions without much more personal research. However I do think we need to look at other places that have high population and use mainly public transit see what we can do to be more like them i.e. Tokyo and Amsterdam.</p> <p>Also we need to find another way to get the funds and stop using or strongly decrease the use of sales tax which is hurting many low-mid income people in our community.</p> <p>On a more personal note I believe that our big businesses in our area can afford to pay a lot more than average low-mid income people. In other words places like Microsoft, Boeing, Amazon and Google could help with "projects" like the ones suggested in ST3.</p>
SOUTH KING COUNTY	The increases in sales and excise taxes are regressive and will burden individuals with low-incomes and senior citizens more than high-income earners. It's time for a state income tax to more equitably fund huge projects like this.
SOUTH KING COUNTY	LIGHT RAIL EVERYWHERE!!! Like Japan! It's the best system because it's fast, easy, and never any traffic! Busses use the same streets and are slower than cars, not much benefit...
SOUTH KING COUNTY	<p>I am not qualified to answer many of these questions without much more personal research. However I do think we need to look at other places that have high population and use mainly public transit see what we can do to be more like them i.e. Tokyo and Amsterdam.</p> <p>Also we need to find another way to get the funds and stop using or strongly decrease the use of sales tax which is hurting many low-mid income people in our community.</p> <p>On a more personal note I believe that our big businesses in our area can afford to pay a lot more than average low-mid income people. In other words places like Microsoft, Boeing, Amazon and Google could help with "projects" like the ones suggested in ST3.</p>
SOUTH KING COUNTY	Item 11 the Federal Way project is left out. It needs to be added into the selection.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	Parking at light rail stations REALLY needs to be added. I would use the light rail MUCH more if I knew that I could reliably find parking. I typically use the Tukwila station and it is always full by about 10:30 am on Fridays (the day I usually take it). I either have to park BLOCKS away in a residential neighborhood, or just drive up to Seattle and park.
SOUTH KING COUNTY	Light rail should have been built long ago, but better late than never. As a daily light-rail commuter, please improve your signage regarding putting luggage under seats, or in your lap. The number of people putting luggage on seats or blocking the senior/handicap seats is very high. Something like: LAY LUGGAGE DOWN, UNDER SEATS.
SOUTH KING COUNTY	Metro should consider adding new routes around Kent/East Hill area, specifically areas with new residential development. It would free up parking spaces at Kent Station and surrounding area.
SOUTH KING COUNTY	Please, for the love of god, add parking at seatac station for residents. I would use it daily if I could park, but you discontinued the pass program, and parking is all gone by 6am. What good is it to live near a station if we can't use it?? There isnt even scooter and motorcycle parking!
SOUTH KING COUNTY	Why a light rail station at Boeing Access Road, but not a Sounder station.
SOUTH KING COUNTY	Focusing on expanding Sounder south service is extremely important. Adding an additional later train in the morning and an earlier train in the evening would allow more people to ride.
SOUTH KING COUNTY	Im 100% behind all light rail options, very much against bus only options.
SOUTH KING COUNTY	None of the proposed plan will help my situation whatsoever. If you offered to add more trains going southbound early at 5:30 AM in the morning and northbound in the evening at 10:00 PM and regularly on the weekends, I might be happy with the additional changes. But to ask more funds from me when you are not even considering my needs as a rider is undeniably outrageous and is infuriating. For these reasons, I do not support this plan nor would I be willing to pay for any of it.
SOUTH KING COUNTY	Reliability of current bus and light rail service should be a priority now. Two years of riding King County Metro Transit, and I'm disillusioned by this big plan, only because I see improvements that are attempted, but the volume of people using public transportation isn't being accounted for. What's the point of adding new light rail stops if there aren't more trains to hold the people crowding on to them. Don't underestimate the volume of use.
SOUTH KING COUNTY	We need more parking options at light rail and commuter rail stations. Existing lots are full all the time. Transit would see more use if we were able to drive to a light rail or commuter rail station and reliably park. Metro service in the outlying areas is slow and spotty at best.
SOUTH KING COUNTY	Plan doesn't discuss adding more light rail trains or extended light rail hours. Extending hours would be crucial to allow more people to take public transit.
SOUTH KING COUNTY	Adding service is great but the infrastructure needs to be there as well i.e. adequate parking, buses timed to train or light rail departure or arrival, etc.
SOUTH KING COUNTY	It appears that south east king county will receive no additional sound transit support. It is odd to see such a large section of king county completely ignored.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	Move up West Seattle light rail to top of priority list don't want to wait more than 5 years & add a light rail expansion to Burien too with same urgency
SOUTH KING COUNTY	Please don't continue to create a situation of environmental injustice regarding those living in poverty. All people should equally share the burden of light rail development - the poor, who are being squeezed out of the housing market already, cannot afford to lose more housing to make room for your trains, nor should we be the only ones subjected to them being in our neighborhoods. ST's plan to create affordable housing is nice, but the family of four/80% poverty level projection I read in your plan (\$65,000/yr) is well above what the very poor make. So that means we will even be priced out of the "affordable housing" that ST plans to include in their property development in the future. We poor very much need more transit options, but the trains also are more expensive than busses, so please consider how to make it accessible, and fair, for all. Thank you.
SOUTH KING COUNTY	Too expensive. Users don't pay their fair share. No sunset on taxes. And you have no accountability to the public and take a billion years to build anything and you usually have to come back to the public for more money. Scrap this plan and fix the current network and get the users to pay and leave the taxpayers alone.
SOUTH KING COUNTY	you need to check the people who park in the handicapped parking spaces at Tukwila. Most of them are NOT handicapped - they are using the handicapped badges to park closer to the elevator. Only one man I have seen is actually handicapped - they are young able bodied men and women.  Hopefully we will get to choose the parking spot we are assigned when we have to start paying for parking and why is it limited first to 3 people in a vehicle.
SOUTH KING COUNTY	If you really want people to use Light Rail and bus service, rather than drive their cars, YOU MUST PROVIDE MORE PARKING AT PARK AND RIDES, AND HAVE PARKING AT EVERY LIGHT RAIL STAION. Many times, I would prefer to park my car at a Park and Ride to get to downtown Seattle, and other locations, but don't bother because there are no parking spots available at the Park and Rides. I never even bother to try to park at the Tukwila station anymore on a weekday, since the parking lot is full by 7:00 a.m. I lived near MLK when Light Rail was being built, but was 7/10 of a mile in either direction from a station, and didn't feel comfortable or safe walking on MLK or the neighborhood at night to get home. I couldn't believe it when I heard that there would only be 600 parking spots at the Tukwila Park and Ride. WHAT WERE YOU THINKING???????? If you want people to use mass transit, you have to provide Park and Rides!!!!!!
SOUTH KING COUNTY	These current measures seem to only address the current mass transit issues for the next 10-15 years. But in 15 years we will have out grown the current plans. Why not begin light rail extensions now to meet the expected growth to neighborhoods in the south end like NE Tacoma or Puyallup or an extension to gig harbor. The current plan seems narrow in its scope and seems like it will be easily out grown in 10-15 years.
SOUTH KING COUNTY	Light rail and commuter rail should be the most important! But we CANNOT wait over 15 years! We somehow need to get it done quicker! Many others share my thoughts that it needs to get built quicker!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	With no back up plan when the South Sounder Commuter Rail is down, there is no additional bus service provided like there is when the North Sounder commuter Rail is down. There is very little in this proposed package for the South Sounder Rail Commuter Rail. If is all about the north end and east side.
SOUTH KING COUNTY	The idea of using I-5 to connect Federal Way to Seattle Tacoma is poorly thought out. It is kind of like the master planner's wise vision of taking a 4 lane highway in the 1960s and reducing it to two lanes through the heart of Seattle and being surprised when a bottle neck occurs every single morning since that day. When you plan with the thought of helping your business friends rather than for the convenience and good of the people of the community, things oft do go awry. A little money saved today is waste as the future has to deal with it.
SOUTH KING COUNTY	I do not support ST3 because TOO much focus on expansion of light rail which takes more than 8-yr to complete. Mean while, traffic continues to get exponentially worse. ST3 must balance CURRENT needs while building for the distant future. The more transfers required for commuters to get from home to work the longer it takes, which is what light rail is doing. Light rail forces commuters who had a straight-shoot commute to now get off and transfer in order to get to their destination. Commuters already spend hours traveling and ST3 is extending travel time unnecessarily. Express BUS routes can easily started, adjusted and discontinued as needed and seems so much more efficient. And it serves taxpayers current commute needs. I support a more balanced approach.
SOUTH KING COUNTY	costs/taxes imposed should be targeted on zones/regions serviced by the improvements. allow voters in each affected zone to vote on the improvements they want to pay for. expecting someone in the Kent area to pay for enhancements or services to Everett or DuPont is unreasonable and unfair.
SOUTH KING COUNTY	Transit needs to focus on areas other than Seattle and Bellevue.
SOUTH KING COUNTY	Sound Transit has used the bait-and-switch approach before. It isn't a very trustworthy organization. What controls are in place to ensure that they will really follow through on their promises?
SOUTH KING COUNTY	Do not force transit users to also pay for parking. It's a thinly disguised way of increasing transit revenue without increasing fares. It's punishing the people who use the system.
SOUTH KING COUNTY	We can't use your system(s) anywhere if you don't have parking because not everyone lives within walking distance to transit (think hills and elderly!) so as you build the rails, you must increase parking where there are lots (garage high rise) and allow for drop off locations in dense areas. (not a place at the new UW anywhere!) There must be EXPANDED parking at all park and ride lots. Currently, it is like a feeding frenzy to get a spot and if you aren't there at the crack of dawn, forget about a spot. Why must one go in early to work, just to get a parking space to use the transit system!?! It's all out of whack on the parking problems. THINK PARKING WHEN YOU PUT IN THE STATIONS, PLEASE!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	Although I support the vision, sometimes the answer isn't just light rail, for example a direct bus (committed bus lanes) between West Seattle, even just at commuter times might get a lot of cars off the road. It's just too much time for me to take 2 busses to get to the east side. Also, we can look to promote car sharing as iCarpool and Uber are doing. Most cars at commute time have just 1 driver, and with technology now, this doesn't make sense, especially if there are place were it can be easy to pick up drop off carpoolers. Seattle is a visionary place, and we should be creative and think of things and try what may not have been done before elsewhere. I also support bicycle lanes. Thanks!
SOUTH KING COUNTY	I think the Sounder train is the best way to go. It needs its own track so it doesn't have to share with other BNRR trains. That way there can be more trains put on the tracks throughout the day. Expand the train tracks to go east and west, south to east, south to west and so on... Light rail is the second best option to the train. The buses can't be counted on when the traffic is as bad as it is. (I've been riding the bus now for 37 years to work first from Kent to Seattle and now Kent to Bellevue)

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

<p>SOUTH KING COUNTY</p>	<p>The timeline is outrageous. I'll be 50 before its all completed, all my young years where I'll be able and willing to walk to things will be done, and its not that I see myself slowing down on purpose or anything as I age, but Like, most of the people you want to vote for this will be old by the time its done. I was raised in Kent, and I come back for lengths of time every year, and I guess I intend to some day return to Seattle (I currently live in Istanbul Turkey, where they can build a full subway line in 5 years)</p> <p>Also, I think this plan is spending way too much on the exurbs, and far flung places. Honest to god, you will never be able to take the train from everett to Seattle as fast as you can take an express bus today, so why would anyone ride it that far. Take the train to mountlake terrace now or something, and build good bus service to it from further away, or focus on the express bus network, and build proper subways close to the city. Ballard has to be subject to a movable bridge? seriously? and Everett gets a full grade separated line. Please show us how that makes any sense at all? People who live in the city actually want to take transit. I'm not going to say no one in the suburbs wants to take transit because there's plenty, but to be worth going that far? No. Seattle needs crosstown lines, and such before everett needs a second train line (it has sounder, as does Tacoma). Also, make the sounder run frequently all day already. It's clear that the ridership is there. Also, look at Chicago's BNSF line, and San Francisco's Caltrain, Both of them run frequent enough all day, and have huge ridership (60K/dayish) This train line already exists, just run it like a real transit line, not a commuter toy. And scrap the rail to tacoma thing for now, do that later. put in good bus service to the sounder for now, and a good I-5 express bus system, improve it, make it run past 10PM. (It took me 4 hours to get home from Tacoma one night because there were no busses that stopped in the Kent area after when I decided to go home, I had to go all the way to SODO and then take the 150 back to Kent....) If the sounder ran all day like it should, it should pretty much never take me more than an hour to get places in Tacoma (which at rush hour, it doesn't take more than an hour).</p> <p>So in summary, build things faster, you're not going to get anyone excited about something opening in 25 years. Just ain't gonna get the votes.</p> <p>Build city crosstown lines, and full grade separation. Ballard/Crown hill subway. Crosstown 45th st subway. MEtro-8 replacement. Build an awesome bus system in the suburbs, they're not concentrated enough for rail past Federal way, Redmond, or MtLk. Terrace yet, nor will they likely be anytime soon because of zoning.</p> <p>Please, rethink this whole thing, and come back with a proposal that will benefit people who will actually use it.</p>
<p>SOUTH KING COUNTY</p>	<p>Please extend the hours/days the Sounder trains run. They are not as helpful as they could be.</p> <p>More parking at the outlying light rail stations. The Tukwila station fills up early every single day.</p>
<p>SOUTH KING COUNTY</p>	<p>Why don't the increased taxes expire after a stage is completed?</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	With every plan you make, PLEASE overestimate parking! Right now in Tukwila, the Sounder station and the Park and Ride on Interurban fill up past capacity. The Tukwila Sounder station needs a parking garage, if only to take care of population growth. I can no longer utilize the Sounder because my work schedule starts at 9, and the parking lot, the Amtrack spots, and all surrounding street parking is filled by 8 on most days. This is frustrating, and discourages anyone wanting to utilize any transit coming out of that station. Same for the Interurban link light rail station. Angle Lake is a good start, but ANY light rail station should have parking included. Otherwise, it's useless to most people, especially with Metro cuts occurring in the south sound.
SOUTH KING COUNTY	All of the above rationale is sound, but in my opinion many of the specifics in the proposal aren't very good. West Seattle to Seattle makes sense, because of the big bottleneck across the West Seattle Bridge. But it seems a HUGE issue is Boeing traffic between Everett and Renton. Boeing shows no mercy in transferring employees back and forth between these two locations, and most cannot afford the more expensive residential areas in the middle. So, they tend to live way South, or way North. It seems to me the highest priority should be frequent, reliable, light rail between Renton and Everett Boeing locations, with secure parking at each end.
SOUTH KING COUNTY	Ballard to down town and west seattle to downtown need to be done within eight years. Your time table is a joke. This region is exploding at an unsustainable pace and you are offering solutions...in 2038.... that is pathetic. We need help now, if you can't provide solutions quickly ST3 will fail, I am a huge supporter of rail transit and have supported all transit projects (despite your horrible design with trains running at grade) but even I am lukewarm on this proposal because you are asking us to wait 20 years for the full system. That is unacceptable, we are at crush load and relief in 20 years helps no one, even eight years for BRT is pathetic. Do something, treat it like it's an emergency, just find a way to get it done faster.
SOUTH KING COUNTY	Existing rail needs to increase # of runs, and run 18 hours a day. More parking needed at most stations.
SOUTH KING COUNTY	Need more transit coming from maple valley Covington area
SOUTH KING COUNTY	I strongly support Sound Transit, King County Metro, and any other mass transit system in our area. Its needs to happen sooner than later. less than 20 years for all of this.
SOUTH KING COUNTY	Fix the budget on how to make this happen. Shorten the timeframe
SOUTH KING COUNTY	The driving on shoulder project should be removed. Shoulders were designed for safety and not for through traffic. Also, there should be more focus on East to West commutes and neighborhood to neighborhood commutes. If ST worked with the floundering County based buses (metro, Pierce Transit, ect) to develop a plan where they focus on getting people between neighborhoods and to ST stations and ST focused on inter-metro Transit then even more people would win. (Said by someone who is losing their home to this project and receiving zero benefit for the pain).
SOUTH KING COUNTY	please expand to less privileged neighborhoods first. this will have the biggest effect on quality of life for the people who are giving the most in comparison to any monetary returns.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	The priority placed on high-income neighborhoods like Ballard and West Seattle does little in the way of serving those in low-income neighborhoods who are in greater need of public transportation. Ballard and West Seattle are densely populated and are popular areas for folks to visit, and transportation to and from these neighborhoods is necessary but never a priority. All these plans with ST3 still leaves those in White Center, Rainier Beach/Rainier Valley, South Park, Skyway, and Georgetown at the mercy of slow, unreliable, and crowded Metro bus routes. It is also designed to serve specific companies, e.g. Boeing. While the ST3 expansion is necessary in many facets, there is still little regard given to low-income neighborhoods who more richly deserve and need mass transit expansion.
SOUTH KING COUNTY	Our politicians need to develop a backbone and stick with adding more light rail service. West Seattle, while geographically close to downtown, is cut off from major centers elsewhere. Due to the reduction in lanes on major thoroughfares such as 35th Avenue, it takes longer and longer just to get downtown, while this traditionally affordable area is growing rapidly. There's rail and transportation infrastructure everywhere else in Seattle, but West Seattle. Our bus services have been cut, even as many buses are frequently standing-room only and during rush hour, a bus will often pass commuters because it is too full. Commute times are getting longer and longer. We need a subway system here! We needed it Seattle 20 years ago, but everyone balked at the price tag. Time is a living being's most valuable resource. WE MUST HAVE MORE TRANSIT NOW
SOUTH KING COUNTY	huge increase to taxes is not appealing to anyone, great concept but long lead time to create with tax increase is nothing to be excited about
SOUTH KING COUNTY	Trains are inefficient and extremely costly, by the time you get everything up and running, you will have virtual offices where people are working from home. Free up the market so UBER can create bus / mass transit, they will be able to provide a better service, lower cost to everyone.
SOUTH KING COUNTY	don't tax me bro
SOUTH KING COUNTY	We have no room for more roads, and no room for more cars. Portland invested in comprehensive transit system---that still works today---in the 1980s. Let's get this thing moving already!
SOUTH KING COUNTY	Make the people that use these forms of transportation pay for the convenience of using them by charging more for them to use the services of these proposed lines. It's way too much money all at once to the taxpayers. But not every citizen/homeowner will have to pay for this, only the middle class and higher will be taxed on this project, whether they would use it or not. The people who are for this are non taxpayers and low income individuals that want everything given to them on a silver platter and don't offer up a dime to pay for it.
SOUTH KING COUNTY	Build or expand the existing highway system that works so well but is underfunded. Buses can use it and do everything the light rail does for much less. Also, Eliminate that stupid Rainier Ave Light Rail that runs on the surface streets and instead reroute it along Boeing Field so it goes directly to downtown Seattle.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	I feel this region should expand the Metro Rapid Ride System to all areas of the Regional Puget Sound Area. It is a less expensive system to expand, very flexible, and we can get this system expanded in a shorter time. This is whole ST3 plan, with all the taxes, just doesn't seem feasible. Count me out!!!
SOUTH KING COUNTY	To get more people to use bus service until rail is complete you need to make bus service on time and have bus only lanes at peak travel times. It shouldn't take more time for transit to get to Seattle or Tacoma or Everett than one person in one car. The transit bus rider should not have to stand during peak times or wait 25 minutes for a bus that is late because of car traffic in downtown Seattle. Buses should have designated lanes. Ways to add riders. Faster than driving.
SOUTH KING COUNTY	At this present time with EVERYTHING being so costly and jobs being lowered, why in the world is this being considered at this time? When will the higher taxes be stopped and allow people to remain in their home instead of taxes being so high as they are now to push people out of their homes. What in the world is going on? We need to have a break of higher taxes on gasoline, property and all the taxes that are being raised. I being a senior citizen can not understand this. And it appears that no one who passes and suggests these taxes care. Shame, shame on all those involved!
SOUTH KING COUNTY	This is a complete waste of time and money. I strongly oppose giving Sound Transit a penny more than what is in their existing budget. You have budget, you need to plan capital improvements with that in mind.
SOUTH KING COUNTY	Keep parking in mind....because sometimes we weigh using link light rail by access to parking. If parking isn't available we frequently choose to drive. Paid parking isn't an option.
SOUTH KING COUNTY	405 traffic is a mess. Is the proposed bus service sufficient to motivate people out of their cars and onto transit? Is there thought of rail service along the 405 corridor?
SOUTH KING COUNTY	I live in Federal Way. I've been paying for transit improvements for years even though there has been virtually no benefit in Federal Way. By the time this plan is completed, I'll be dead.
SOUTH KING COUNTY	Thank you for the opportunity to respond!
SOUTH KING COUNTY	Sound transit has historically shown that it can not manage projects with cost or schedule. What is different this time? I remind you that the first light rail project cost twice as much as promised and only laid half the promised track.
SOUTH KING COUNTY	The plan is too slow. You are too focused on giving the areas that already have great service even better service, versus expanding service. You cut bus service to my neighborhood and not one item on this list will change the fact that I have to drive to work. And to make matters worse when you cut my service you spent a fortune putting in Rapid Ride. Once again, only to give those who have service, better service. You focus too much on the north and the west. The coverage and timing of service in the south is terrible and I don't want to pay one more dime until you improve the service area of the south end.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	We live on the west hill, Kent and isn't a way to get to Pac. Highway other than car. But parking at 260th. or other stations either doesn't exist or has inadequate parking. That is also a concern for the UW new station. We will be moving to Montlake in a couple years, and the pedestrian safety from the south side of the 520 bridge to the UW station is very difficult.
SOUTH KING COUNTY	There is nothing included in any of your plans that would serve me, anyone in my family or anyone I know. Your trains, rails and buses don't run at the times or to and from the places that we would be able to use them.
SOUTH KING COUNTY	I know many who work just outside of the downtown core which makes using transit inconvenient. Better systems in the areas just around downtown (Queen Anne, Belltown, South Lake Union, Fremont and the Eastlake neighborhood) would make transit a more viable option for those working in these areas. I would love to use transit but it simply isn't feasible where I work, which is a pocket missing reliable and quick transit routes.
SOUTH KING COUNTY	My main concern is parking availability at light rail stations. The parking at Tukwila station is always full; I have never been able to park there when wanting to travel into Seattle. It is pointless to have so many stations if there is not ample parking.
SOUTH KING COUNTY	Should be better bus service in the south for people to get to JBLM
SOUTH KING COUNTY	How are you paying for it? I pay enough property tax and would prefer a sales/car tax instead.
SOUTH KING COUNTY	LIGHT RAIL FROM BURIEN/DES MOINES TO ISSAQUAH
SOUTH KING COUNTY	I think that what is being proposed is very much needed, but it will take too much time to get it all implemented, by then the population will have increased by a few millions and traffic wise, we will be dealing with the same grid lock . This has started too late. San francisco and Chicago started a rail system decades ago. New York started theirs at the turn of the last century!!!
SOUTH KING COUNTY	need lite rail to run with 3 cars rather than 2 cars for over crowding on trains and need additional parking at Tukwila and other lit rail stations
SOUTH KING COUNTY	I am a senior living on a fixed income. Where am I going to get the money to pay for this? And, where is SOUTHWEST SEATTLE??? Where is the connection to the Fautleroy Ferry? I have lived here for 35 years and this part of town always gets little attention from the City. Your proposal doesn't even have SW Seattle anywhere on your map. The costs are excessive and the timeline is outrageous. I worked for a bureaucratic organization for many years and I believe, reminiscent of the failed Seattle Monorail, this plan will fail. It is not well thought out at all. Money poured on this project will not make it work - all it will do is fund contractors and government bureaucrats who will constantly be changing the plans. Where were the forward looking visionaries in this City who somehow forgot to consider GROWTH?? GIVE ME A BREAK. Make the plan smaller, more affordable and include places like connecting to the Fautleroy Ferry connection.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	I find it interesting that the poor people who have been moved to the outskirts of the city to places further south are not being considered for additional transportation to the city where their jobs are located. It would be smart to actually include more transit options and availability for the south transit customers that live in the kent/auburn areas that work all hours of the day and need to get home. I don't see any plans effecting those customers but more help being offered to customers who do have transportation already in place. It seems ridiculous and not well thought out. I mean, west Seattle already has rapid rise service. Lines dedicated to those customers to get downtown and now we want to give them a rail system too! Do you know most of the people that live in the outskirts of the city came from west Seattle and could no longer afford the cost of living and now you want to continue to reward those that can more. WTH
SOUTH KING COUNTY	my concern is relying on light rail exclusively. currently I use the 577. If I use light rail to seattle from the airport, it is 3 minutes slower than my current trip from federal way, which is at least 5 miles further. why should I increase my commute time by taking a method of transportation with far too many stops that increases my commute time. as it is my commute time is too long as I must transfer to a C or 40 to get to 1500 Westlake ave North daily.  in my opinion this isn't something that screams "better"
SOUTH KING COUNTY	My property taxes have sky rocketed with every city proposal that touts the false premise that it is only a few more dollars per year tax added to my annual tax bill. Year after year you say the same thing! My annual property tax bill has doubled for the same house! As a retired senior living in our home, my taxes for schools, mass transit and everything else continuously coming out of Olympia every year will cause us to have to sell our home and move because you are bound and determined to get every penny I have to pay for your never ending projects that I do not need or use. All seniors 65 and older should reach a twilight time when they are exempt from all your schemes and dreams and be left alone.
SOUTH KING COUNTY	I have not been impressed by the Rapid Ride buses implemented by King Metro. They are not rapid. Riding the C line from West Seattle to downtown is a crowded and discouraging experience. Many of my coworkers whose routes to downtown were consolidated to Rapid Ride line started driving to work instead. Routes not aimed at downtown like the F line between Burien and Renton seem to work better.
SOUTH KING COUNTY	Additional parking at transit centers is extremely important. They're already at max capacity.  I can't wait for the light rail to get to Federal Way! :)
SOUTH KING COUNTY	trust you a far as i can throw you. fix what you have, not what you think i need

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	Let's use the money to get people to not come to our State to live. If we are adding 41,000 cars per year now stop it . All the added busses only help,those who can walk to them. The bus routes Increase crime along the bus lines. The light rail has no parking to speak of. Saying Kent has the Sounder is a joke. It sounds like Kent has been cared for, when most of the people live on the East side and would have to drive 8 miles to find there is no parking. Let's increase the values of houses in Kirkland, Issaquah, Redmond by letting them step out there front porch and hop on a bus or rail. We get scraps out of this service were I live and I'm tired of subsidizing it. Turn metro into a private company like taxi cabs and we might be able to afford it.
SOUTH KING COUNTY	None of these help me in my area. I am in unincorporated King County where I get one bus to Downtown (which takes an hour) and one bus to West Seattle, which also takes an hour. These plans may take away my access and not give me another option. I would very much like to see more done in my area, and areas like mine, where we're often looked over and made to be re-routed and cut buses and hours thanks to these big projects on access where there are already ample opportunity for patrons to get from one place to the other.
SOUTH KING COUNTY	With the increase in the senior population, the plan should have easy access for those of us living south of Seattle. There should be a connection plan if you need to utilize both the bus and light rail. Since I am over 70 I probably will not live long enough to see these plans completed but I feel that the transportation infrastructure in the Everett to Tacoma areas has been neglected and needs to be addressed ASAP.
SOUTH KING COUNTY	I won't forget being told that the powers that be are committed to Sound Transit, and then, thinking that I was being asked about how to spend existing funds, was clearly asked "how are we going to fund this?" I keep wondering what else you're going to pull on me. I also seem to be being subtly led to bus solutions here. If a big collision or a really bad traffic jam happens, how are your buses going to efficiently zip through that? You can't seriously believe that the HOV lanes will be free at a time like that, can you? I really want trains, and trains to be different. I, like a lot of other people who respond to all this, found European trains to have character; to have style; in other words, I'd like to travel on them; not just have to, but find Sound Transit trains to be very like buses. Could existing or increased numbers of tracks and more conventional gauge trains be used, European style? And, could this possibly go all the way to Olympia, covering the whole I 5 corridor? Right of way does exist, doesn't it? So, I'm enthusiastic about trains, but am concerned about you.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	<p>West Seattle does not need light rail. Fixing a few bottlenecks for buses will provide West Seattle much improved transit service much faster than light rail and much less cost.</p> <p>1) Build a transit only ramp between west bound on the West Seattle Bridge and northbound on hwy 99. The slowest part of my transit ride is my bus stuck in traffic on this ramp. There already exists transit only lanes on the bridge and on NB 99, all we need to do is connect these pieces, which can be done cheaper and quicker than light rail.</p> <p>2) Improvements to Avalon Way - Spokane street transit access. Again there are already transit only lanes, but buses can be stuck at a few chokepoints.</p> <p>3) Improvements for transit access will be needed once the 99 tunnel opens, but investments made there will also benefit buses coming up 99 from further south.</p> <p>Also, I assume if light rail is run to West Seattle that all current bus routes to downtown will be then be rerouted to drop passengers off at the light rail station to then transfer to the light rail. Even a very efficient transfer system is implemented, a rider will still have to plan on an average of 10 minutes to make the transfer, including time to get from the bus to the platform, plus waiting for the next train (which if they run every 10 minutes user will average a 5 minute wait, sometimes no wait, sometimes just missing the last train and waiting 10 minutes for the next one). In addition, one must assume that any street parking within a 5 block radius (including neighborhoods) will have to be turned into a residential parking zone.</p>
SOUTH KING COUNTY	<p>Free Parking at Light Rail stations is needed. If I cannot find FREE parking at my location station in Tukwila, I just drive to Seattle. I would rather pay parking in Seattle and rather than pay for parking at Light Rail to make it a faster and quicker trip.</p> <p>Remove bike lanes and replace with car parking.</p>
SOUTH KING COUNTY	<p>More parking at light rail stations is imperative. I am unlikely to take a bus to get to a station. Currently the parking in Tukwila is full at an early hour and is used by carpoolers not light rail riders. That should somehow be monitored. I would love to take light rail but adding a long bus ride to get to the station is not an incentive.</p>
SOUTH KING COUNTY	<p>I'm just grateful this plan is being considered and that Sound Transit is making it easier for people to get to major cities and educational institutions to build a strong region. I'm thankful I can take the Sounder from Kent to Seattle. I live in Federal Way and there isn't enough parking at the Auburn station. I'm looking forward to eventually taking the Link as an option. Thanks, ST!</p>
SOUTH KING COUNTY	<p>Additional parking is needed at the Tukwila light rail station. Currently I would gladly take it but by 7:20 a.m. there is nowhere to park. If the parking structures can't support the number of riders you can offer as much public transportation as possible but people won't be able to take it if there is no where to park their vehicle.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	All the plans mentioned below doesn't really help with anything. Wrong priority on wrong thing. One should focus on getting commuter trains between Federal way, Tukwila, Kent, Renton, Bellevue, Redmond and Bothell. Need more commuter trains not stupid light rail or buses.
SOUTH KING COUNTY	Complete waste of my tax payer dollars. Use all this money to upgrade our freeways and roads. People in our area like to commute by car.
SOUTH KING COUNTY	All in favor, but tired of taxes and being subsidized for projects such as this. Quit asking the public and finance on your own, meaning state and local governments !
SOUTH KING COUNTY	The West Seattle Light Rail link should not only go to downtown Seattle, but also continue through Burien Transit Center, and then terminate for transfers at SEATAC Airport.
SOUTH KING COUNTY	The cost. I don't think anyone that has drafted this plan is retired and living on a fixed income. A lot of retired people I know do not even use transit! To put such a tax burden on us is a bad idea! One example, I own a 16 year old motorhome. The tax increase on it would be about \$400. That is on top of the over \$200 + I pay now. You are taxing me like I drive it on the streets everyday. When the motorhome moves, it is driven out of the RTA taxed area in under an hour. This plan will cause hardships on seniors and forces them out of the area so that they can live within their means. The plan is too big with huge costs to us!
SOUTH KING COUNTY	I will not vote for any project for which the taxes are imposed in perpetuity. IMO Sound Transit has determined that there is going to be a light rail system here, cost be damned, and that you can just force it down our throats. I don't believe you have seriously considered all the transit options, especially when cost is considered. I live in Federal Way. I pay a lot of money for Sound Transit. What do we get? Two buses per hour to Seattle, with a few more during rush hour. The few times I've rode them, including 8.30-9 o'clock at night, they have been standing room only. Ridiculous for the taxes I pay. As for light rail, in 8-12 years you're offering light rail on your one and only line through S Seattle. Judging by the current schedule my estimate is that except for a few miserable rainy/snowy rush hours per year a bus would be faster. But you want me to pay taxes - forever - for this plan? Forget it. And you expect people who live in University Place, Bonney Lake, Covington, much of Kent, etc., who will get nothing at all out of this plan to pay taxes forever? Ridiculous. There is not a chance in hell I will vote for this plan.
SOUTH KING COUNTY	You took away the passenger pickup from Arbor Heights. I'm on 40th and used to catch the bus a short two blocks south. Now I have to either walk all the way down to 35th which is uphill all the way back or drive to Westwood Village and catch the C line. I hear that you have made that so I will have to transfer just to get downtown. By the time you connect light rail to West Seattle, I may very well be dead, so why should I pay taxes to support it? I wish you would let the #21 bus pick up passengers again when it makes its end of the line turn around in Arbor Heights. Why is West Seattle always treated like a misbehaving stepchild?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	The money for this project should be spent on the kind of transportation most people use: automobiles. If it were not for the road congestion created by the diversion of moneys appropriated for road improvement to projects such as this inefficient socialist dream, there would be no road congestion. Light rail or buses can never get people to where they are going as fast as automobiles, as long as traffic is moving on the roads. We the people believe that you socialists have deliberately let the roads get dilapidated in order to force us into your mass transit schemes. We hate you for what you have done. We are going to do our best to remove you from office.
SOUTH KING COUNTY	Expand the hours in which the Sounder and Light Rail systems run. The only reason I don't use the Sounder and Light Rails often is because they stop running about three hours before I intend to leave, and this is the reason I hear most people give when they explain why they don't use public transit.
SOUTH KING COUNTY	I think until you can properly use the tax payers money much more efficiently you don't deserve to have more of my money (retired and trying to live within my means) or any other tax payers money. The tunnel project is a perfect example of your wastefulness. My property taxes have increased eight hundred dollars from last year. I don't want you to have more of my money to waste on something I will never use.
SOUTH KING COUNTY	We can't afford this and with the State's current climate of complete and total lack of fiscal responsibility there is no chance of receiving any funding at all for this project.
SOUTH KING COUNTY	Transit has already isolated many seniors and yet we are expected to pay \$200.00 a year out of social security that doesn't go up \$200.00 a year. I used to have a bus a block away and now I have to walk at least 5 blocks to catch one. Needless to say many of us feel you just want us to pay for something from which we will get no benefit
SOUTH KING COUNTY	I am an older person and the time frame for completion of these projects seems unrealistic to me. I think there should be some reduction in cost per year for seniors.
SOUTH KING COUNTY	Your cost estimate for the "average" resident is way too low. This will be especially hard on elderly home owners and retired persons on fixed incomes.
SOUTH KING COUNTY	Please consider access to Link light Rail from the east side of I-5 to 240th street at Highline College. Kent/Des Moines Road and 260th are already overburdened east/west connections between Military Road and Pac Hwy. Adding Stations in those intersections would add to the already highly congested situation.
SOUTH KING COUNTY	More planning needs to go into parking at the stations. And if there is not enough parking how it impacts the local neighborhoods. Also the impact of crime in the neighborhoods near the light rail stations.
SOUTH KING COUNTY	I strongly support expansion of light rail to South King County and Pierce County immediately. The locations that it would serve are being sidelined by attention given to cities and neighborhoods where wealthier and squeaky-wheel advocates get the attention. Please, please consider "going south" versus all the attention given to the rest of King County north of the airport and east of Mercer Island.
SOUTH KING COUNTY	Better transportation is needed. This plan cost too much.
SOUTH KING COUNTY	Just get it done. Traffic has taken too much of our lives.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	Your figure of \$200 (above) is a fabrication. The project (s) is/are way too expensive and way too far reaching and will destroy the working "poor".
SOUTH KING COUNTY	question 14 how long would the average resident pay cost ? years ? I think long term that would be too costly for the resident. thank you
SOUTH KING COUNTY	If there is any way, the whole timeline should be moved up. We should have done this a long time ago!
SOUTH KING COUNTY	There are many and more important ways to improve the roads and highways that would benefit both transit and cars/trucks. Adding light rail that competes with existing bus service is not a responsible use of resources.
SOUTH KING COUNTY	Parking at light rail stations! West Seattle should connect to Burien
SOUTH KING COUNTY	While I haven't used these services in the past, traffic has become so bad that other options need to become a reality. The Seattle/Tacoma area is very late in providing these options.
SOUTH KING COUNTY	Whenever possible existing right of way on freeway medians should be utilized to construct the light rail systems saving on acquisition costs of land. A regional wide use tax should be placed on every studded tire used in the State and that money should be used to repair the existing roadways and pay for transportation enhancements and maintenance/upkeep costs.
SOUTH KING COUNTY	COST TO HIGH, RENTS WILL INCREASE PUSHING MORE WORKING CLASS PEOPLE OUT OF THIS REGION !
SOUTH KING COUNTY	Stop spending all of our money on new transportation projects when the majority of the populous does not and will not use it. Come up with better road situations so the 90% of the population will benefit like expanding roadways. Not to be tolled like 405. DOT has spent billions out of our childrens future trying to force the population to use transportation they don't want. Sounds criminal to me.
SOUTH KING COUNTY	Please explain how/why you are illegally using my tax money to promote a political agenda!!!
SOUTH KING COUNTY	More parking, shorter time frame to complete ST3 plan, feeder light rain lines to Renton, Kent, Covington other cities
SOUTH KING COUNTY	What is being planned to ease traffic in Kent as we wait for all the trains? Why should retirees who will NEVER use this service pay and pay and pay?
SOUTH KING COUNTY	I think service to Olympia is important and not in this plan. Many people commute from Olympia and the traffic congestion on i5 in the morning going into Tacoma will only get worse. Also I wish the timeline was faster. And I wish there was better service to point defiance park. That is a popular summer attraction. All these projects are important to reduce the impact on the environment of so many people driving cars.
SOUTH KING COUNTY	I Opose all this because we as Seniors get taxed and we are already taxed to the hilt and do not use the Light Rail. This needs to be a charge for the people that use this Transportation not us poor Seniors, we have hardly any savings left because of taxes that need to be paid every yeard it is more.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	<p>more buses on 167 are a joke, they will be stalled just like all the other traffic..</p> <p>Almost the entire east side of King County is completely ignored, except for Issaquah, there needs to be cross valley ight rail to Maple Valley, Covington, Auburn, and Sumner, linking to the Light rail corridor along I-5.</p> <p>Sounder Commuter trains should be shorter NOT longer and should be reduced until at grade crossing problems in the Kent Valley can be resolved, currently the Sounder trains are causing huge traffic backups because of all the at grade crossings they are blocking and because they block many crossings extra long while the train is loading or unloading...</p>
SOUTH KING COUNTY	<p>make riders pay more of the cost themselves instead of taxing all of us who own property.</p>
SOUTH KING COUNTY	<p>I love these ideas and I think it's absolutely crucial to the continued development of our area and the improvement of the lives of citizens here. However, I grow tired quickly of people constantly trying to increase homeowner taxes to pay to these improvements. Just because I own a home doesn't mean I'm financially better off than someone who rents and I believe taxes should be shared. I'm happy to pay my portion, but it needs to be fair and not penalize the struggling middle class. Thank you.</p>
SOUTH KING COUNTY	<p>I would like to suggest to the planning team that they think differently in making the short term plans and the long term plans. Right now it appear the team try's to include every stop they can think of between each destination. I think if the team would think in a bigger picture of getting service to the widest area first and then filling in the gaps that it would benefit more people faster. Instead of building stations at every intended stop as you go, go ahead and make connections between longer stretches and then add the stations later. This is how the interstate highway systems were built. The goal was to get a person from point A to point B as quickly as possible over a long distance so only a few exits were built. As traffic and population grew then more exits were added. I think doing this would allow that system to serve more people faster. If you go straight from the new Des Moines station to say South Federal Way and only build the track and the one station then you can fill in the other stations later but many more people will be able to get from point A to point B faster and leave their cars at home.</p>
SOUTH KING COUNTY	<p>All additional rail/link stations should have multi level parking options - unlike the Tukwila (international) Link station near the airport or all other stops from Tukwila to Seattle that have no parking at all. Useless to promote using public transportation when there is not sufficient parking.</p>
SOUTH KING COUNTY	<p>Sumner and Puyallup need parking now. Auburn shoud not be parking city cars in the parking garage.</p>
SOUTH KING COUNTY	<p>there is not mention of federal subsidies to fund these projects. Middle class continues to be taxed on everything. What about the feds contributing to what is a huge infrastructure project? Most people I know get hardly any pay raises, boeing where I work continually talking about lay offs, and now you want us to fund these huge projects. I agree strongly that they are needed but what about the federal government chipping in before I check a box to strongly support. You are talking about increasing our already high sales tax, increasing my property tax which went up over 500 this year and I live under the third runway!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	Please explain how taxpayers are going to fund these projects. It seems money has already been wasted and squandered enough on several large projects in the region. A better plan to speed up the projects and get them in under budget and how the funds will be raised should be published along with the plan.
SOUTH KING COUNTY	Definitely worth it although the time line seems really long and I'm not sure about the cost of \$17 per resident per month... I know it has to come from somewhere and I'd support it I think but for a family of 4 that is like \$70 a month and coming from where we are in Kent... very few changes would apply to us or be very useful on a day to day basis.
SOUTH KING COUNTY	The parking for the light rail from Tukwila to Seattle is horrible. How did you ever expect people to use it if we can't find a place to park? Tried to use it for Mariners games during the week and had to drive to Seattle anyway--wasting time and gas!!
SOUTH KING COUNTY	PARKING PARKING PARKING!!!! Not enough at Tukwila and our only South Sound option!!
SOUTH KING COUNTY	The current cost per passenger is poor and before any significant dollars are spent the ridership should be increase to warrant this kind of expense. If you had more parking to access stations (free parking) it would help. I think the main two approaches should be (1) extend light along I-5 thus to Federal Way and Tacoma transit stations and (2) more use out of the sounder, work on increasing ridership and expand this on existing tracks where ridership will be increased significantly.
SOUTH KING COUNTY	This is the biggest boondoggle ever. I will never have a use for any type of transit and even if I did, where I live it isn't close to any bus lines, train rails, etc, so again, I would never use it. I don't feel I should have to pay for something that I will not ever use. Let users and commuters use it. I walk or bike to work, except on very cold days then I drive which is one mile each way!
SOUTH KING COUNTY	Sound Transit has proven to be most incompetent and asking for \$50 billion to expand a rail system that is so far behind on the promises that they have made...25 years to reach Ballard, RUFKM! The state of Colorado, city of Denver has circumnavigated the entire metropolitan area including the link to DIA in the time it took Sound Transit to get from Tukwila to Angle Lake / 200th St. I also heard you'll ask for more tax payer money to get to Redmond in 38 YEARS!!! You're a bunch of criminals taking advantage of the bleeding heart liberals who are obviously brain dead. It's because of your organization, the Socialist Seattle Council and an equally incompetent Governor that I will be moving from this beautiful part of the country...unfortunately, idiots like SDOT, WADOT and Sound Transit are driving myself and many other people out of here, GOOD LUCK with your efforts to bilk more money from the residents, who are obviously as stupid as you! The fools and their money will soon part...I hope not for the sake of WA State!
SOUTH KING COUNTY	Funding/Development of ST3 should not even be begin, nor sent to voters for approval, until ST1 and ST2 are finished. Sound Transit needs to finish what voters already approved; and yet behind the original schedule, before asking for more money.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	I wish there were ways to incorporate Covington& maple valley. Currently we only have one bus to get down to Kent station.
SOUTH KING COUNTY	The proposed highway margin bus lanes should emulate the bus lanes in use in Curitiba, Brazil and Quito, Ecuador.
SOUTH KING COUNTY	You need to make the people using transit pay for it and not the people that don't use it. It's a damn business for crying out loud. Raise the damn fairs to pay for it.
SOUTH KING COUNTY	I resent the tax on assessed property values. Homeowners continue to be asked to bear the largest part of transportation growth costs. Additionally, I do not believe that the need for a \$50 billion dollar project exists. The advance of new technologies such as driverless cars, and telecommuting will reduce the need for mass transit in the region. I feel that the \$50 billion project will leave us with a dinosaur using old technology that will be under-utilized. I would prefer that the region focus on a smaller plan that addresses the need to reduce traffic from Everett-Seattle (and I live in the southend and don't drive there) as well as addressing some of the main bottle necks in our region such as the 167/405 and 405S/I5N interchanges which add considerable travel time to commuters. My feeling is that no matter what the populace states, you will spend the \$50 billion and do what you want anyway
SOUTH KING COUNTY	All this requires 24/7 service or forget it.
SOUTH KING COUNTY	Please have available P&R lots at most\all stations for light rail. Current parking opportunities at Tukwila Station are totally inadequate and limits a riders ability to use Link to go to Seattle unless very early or very late during the week. It was poorly planned. Please
SOUTH KING COUNTY	I feel this is vital for the future of our region. This will help the transportation problems we now have. The sooner it happens, the sooner people can/will change their habits.
SOUTH KING COUNTY	Save money and remove all HOV restrictions. Would speed up commutes without major infrastructure investments.
SOUTH KING COUNTY	This boondoggle does nothing to alleviate congestion on the roads. I support increased bus use--your light rail is 19th Century technology; it is static and cannot be modified once in place. Nowhere in this survey is information about the \$50 billion this will cost. The future will belong to driverless cars, not something that went out in the mid-20th Century. Why don't you concentrate on buses? The light rail concept is stupid.
SOUTH KING COUNTY	I live in Kent East Hill and there is little to no service here, with bumper to bumper traffic at many times of the day, many new developments of large homes, which will average at least two vehicles per home, with no transit system to help. It's fine to make things even better for communities who already have bus service, but do something for the ones who don't.
SOUTH KING COUNTY	More transit options are needed in the Kent area; especially express routes to/from Seattle.
SOUTH KING COUNTY	Adequate parking at the outlying stations is the one thing that I currently see as a problem. How is this going to be addressed?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	The tax increases proposed for these projects would be immediate, far too large and are projected to show results too far into the future. This is a pie in the sky boondoggle of the vilest type.
SOUTH KING COUNTY	Make the transit system users fund the improvements, not the general taxpayer!!!
SOUTH KING COUNTY	Transit to Pullman, WA
SOUTH KING COUNTY	Waste of hard working tax payer dollars. Fund with riders or don't fund at all.
SOUTH KING COUNTY	I think not tying in the light rail directly to the Tukwila Sounder station was a big mistake, people from the south (kent, auburn, etc) can easily ride the Sounder to Tukwila but then how do you get over to the airport from there. and the light rail access to the airport needs to be closer, I'm not going to make my 89 year old mother walk the distance that it is now.
SOUTH KING COUNTY	Do you realize that \$200 per adult for the costs of this that will impact all. Rent, shopping, gas, etc. Will King County taxes being so high as it is, you want the public to accept this? For a light rail, bus, etc, that most Will Not use at all! People are car people, they don't want to count on a system to get the to work, school, shopping etc. I suppose if you would downtown Seattle or Tacoma you would use it, as parking costs are high. But most won't! Please do not tax people out of their homes, or Washington area! We will probably move out of Washington within the next 10 years because of the taxes!
SOUTH KING COUNTY	The current Sounder service needs to be expanded on frequency and number of train cars available for passengers. The reliability of the North route is not dependable - that is a priority. The expansion of Bus service is not as efficient as investment in the Sounder / Link rail systems. There needs to be a plan to integrate these various transit systems. The Link from the airport should be connected to the car rental stn / platform and stop the bus service to the car rental depot. That was a MAJOR BLUNDER!! Figure out how to work together with the Ports {Seattle and Tacoma}. The customers care about end service product - not your individual egos. Car parking needs to be free - remain free for all transit users. It does need to be safer. It does need to be exclusive to transit system users.
SOUTH KING COUNTY	Thank you for your non-stop fight to provide the citizens of Puget Sound with alternative forms of transportation.
SOUTH KING COUNTY	1. The southern part of King county badly needs better transit of all kinds. This area of the county should get stronger emphasis, and earlier completion dates. 2. Parking at rail stations is very inadequate. Light rail isn't useful if you can't get to it. More parking is essential!
SOUTH KING COUNTY	I think all of the timelines should be accelerated.
SOUTH KING COUNTY	I will be paying for something that I will never use, and the proposal will have a negative impact on my family financially. What is needed is road improvement, especially through downtown Seattle on I-5.
SOUTH KING COUNTY	We need the light rail extension from Sea Tac to Federal Way Transit Center ASAP. Also, the extension from the FWTC to the Tacoma Dome station is urgent.
SOUTH KING COUNTY	We need to improve our existing roads and hiways. A better use of our taxes.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	Sound Transit has never brought a project in "On Time or "On Budget". I don't trust Sound Transit to do any better with this \$50,000,000,000 proposed project. This is the 2nd largest transit project ever in the history of our country only surpassed by the NATIONAL Highway system. It is just another big "Hole in the Ground".
SOUTH KING COUNTY	This project does not seem very efficient the money can be use on other projects to improved highways I use sound transit a few times a year and really i see most carts empty. The cost is too high my property taxes are too high as we speak cant afford to pay anymore.
SOUTH KING COUNTY	In 25 years I don't expect to be around and if I am I would be 98 years old and not using the transit system. However, I use the Rapid Ride and light rail whenever I go into Seattle and out to the University. Also I would like to see the system expand to the Federal Way station a lot sooner, since it would make it easier for me to get around Seattle and Tacoma.
SOUTH KING COUNTY	Go back to the drawing board, educate drivers, enforce current carpool regulations.
SOUTH KING COUNTY	additional taxes are unacceptable. Federal tax funds should be provided for transportation in lieu of funding weapons of war.
SOUTH KING COUNTY	<p>1. I oppose the plan to authorize construction and fund the entire thing in one fell swoop. That is reckless for the taxpayer; great for the bureaucrats! Ask for approval of the plan and funding for the first 15% or 20% or so then have another shot at funding more of it in a few more years. If the plan doesn't hold up then maybe it should not be continued. If your so sure that it is a foolproof plan then you have nothing to worry about then.</p> <p>2. Lets have a little more attention paid to the cost of the elements, particularly the rail systems Everything about the light rail system has been inordinately expensive. Virtually all of the track is either on high, expensive bridges or in even more expensive tunnels. Use Portland, for example, where almost all of the rail system is at grade level and frequently shares existing rights of way. It has cost only a fraction of the per mile cost of our system and they have been able to build a lot of it.</p>
SOUTH KING COUNTY	Add in additional run times for the Sounder train! People who get off work at 5pm and miss the 5:12pm train by 2-3 minutes shouldn't have to wait until 5:50pm each day for another train to come! Add another train between longer times, especially if you are expanding to more places and plan on commuting more people.
SOUTH KING COUNTY	<p>Light rail expansion - the sooner the better</p> <p>Must have last mile connectors including more frequent bus service and not just during commuter hours</p> <p>Prioritize connecting the region vs serving specific neighborhoods in Seattle</p>
SOUTH KING COUNTY	Stop worrying about the bike plans, BRT, bus in general, etc. that take more lanes from commuters and focus on alternative plans that create other avenues of travel so the streets clear up a bit. The Viaduct plan shows that to improve people's property values we should make it harder to commute by removing means to get to downtown Seattle. In order to create some weird expansions we make it harder for commuters - oh and we tell them to ride a bike to commute. Garbage, if you ask me.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	It would be great if economically struggling homeowners weren't entirely responsible for the funding of this project, which is sorely needed.
SOUTH KING COUNTY	Far too much of a burden on tax payers. How about user fees? Should be paid for by the users!
SOUTH KING COUNTY	Stop all transit programs and cut our taxes!!
SOUTH KING COUNTY	Seems ST is promoting growth but it doesn't seem to be addressing the already very crowded cars it currently has. Yes, it is fast and has it's own track, but the cars are already packed. Expanding will only add to the already no standing room left during the highest used times of rush hours.
SOUTH KING COUNTY	Gas tax should be funding this effort.
SOUTH KING COUNTY	I strongly support mass transit systems for large urban populations. When well done, these systems offer an easy, affordable, and efficient means of getting around town. I believe trains are better than buses. Trains are more comfortable for passengers, civilian traffic is less of a concern, and they can travel at higher speeds. I would absolutely support my tax dollars funding improved mass transit for Puget Sound.
SOUTH KING COUNTY	I can NOT afford to pay more taxes. I am already paying more property tax than I can afford. If you had any money to spend you should spend it on widening and adding MORE LANES and on/off ramps to the major freeway and road systems where 99.999999% of the people ARE trying to commute and WILL BE trying to commute even if you built ALL your crazy transit projects.
SOUTH KING COUNTY	Already paying way way way way way too much property tax!!!! Don't have time to take mass transit. Want the time and flexibility to watch my kids play baseball, run track, get to music lessons, etc. There's more to life than sitting on a bus or train to work, but you're sucking all the money out of me so that all I can do is work!
SOUTH KING COUNTY	Recently I've Had To Drive In To Work 3 Days In One Week Due To The Parking Lots Completely Filling Up AtThe Tukwila Park & Ride. It Feels Lile it's Taking The 200Th St Station ForeverToComplete. I Keep CheckingOnlineForAn Update OnThe Anticipated Completion Date. Late 2016 Is Not Soon, Which Is WhatThe Marker Sign Says InsideThe Ligjt Rail Car.Can We Get A Month?
SOUTH KING COUNTY	This is in regards to the parking at Tukwila International transit station. The parking is horrendous there, and it get full by 6am, with that many people using that specific light rail station, there needs to be a multiple floor parking structure built there and at the one across the street, or extend the light rail service to Burien. If light rail service cannot be extended to Burien, then please have the Rapid Ride that runs from Tukwila transit to Burien Transit center run more often than every half an hour to sometimes more than that. Thank you.
SOUTH KING COUNTY	Serving the sound end should be as much a priority as serving the north end.
SOUTH KING COUNTY	The project is too expensive because most people do not use any of the transit systems. Additionally, any government or public entity that uses taxpayer money to fund their projects do not spend the money wisely and are usually way over budget.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	I addition to my strong support for parking at Link Light Rail stations, I have heard that the parking structure at the upcoming 200th street Angle Lake Station may be a paid structure. I am strongly opposed to this idea. Although I do get a subsidized Orca Card however others do not and the added expense of parking would deter people from using it and continue driving. My Vanpool is planning to switch to Light Rail once that station is open but if it becomes a paid parking we will not use that station and continue to Vanpool.
SOUTH KING COUNTY	What takes the plan so long Can this be done faster
SOUTH KING COUNTY	The lack of park and ride spaces prohibit me from using the light rail very often despite the fact that I love it. Airport employees park at Tukwila and I suspect the same will happen when the 200th street station parking opens. As someone who does not work downtown and lives beyond walking distance to a light rail station, parking is important. (I grew up in Seattle, but I've lived in NYC and DC and a variety of other cities and LOVE public transportation. Unfortunately, having to take multiple modes of transport that isn't always reliable in terms of connections - buses not having designated lanes so they get tied up in traffic - makes a car a necessity here if you live in the 'burbs where housing is affordable.) It would be really nice to also have "LIMITED TIME" spaces at the Tukwila/200th stations; say for 5 hour parking. Then you would allow people who want to patronize businesses in downtown (as opposed to communities) a chance to find parking. Seattle is so unfriendly to cars now that those of us who can't afford to live on the transit lines are pretty much SOL.
SOUTH KING COUNTY	I think a progressive income tax would be a fairer way to fund our government, including this proposal. As a homeowner in the suburbs who depends on her car and who also does not have much income (none right now), I find the funding burdensome. Nevertheless, I will vote to support the proposal as 1) it will help mitigate environmental damage, 2) it will help mitigate traffic congestion as our regions continues to grow, and, 3) it will help the transit user population (meaning lower income, environmentally conscious, disabled, and others).
SOUTH KING COUNTY	Tax payers who do not use public transportation on a regular basis, should not be responsible for footing the bill for 25 years. \$200 a year times 25 years=\$5000. I'd rather have that \$5,000 to invest in my own family or own vehicle needs then pay for the construction of public transportation that we don't use and do not plan on using.
SOUTH KING COUNTY	Change the funding for project (s). Find source other than property taxes and use existing funds more efficiently.
SOUTH KING COUNTY	no where does it mention any thing about where I live yet I am expected to pay for it if I can not use it why should I pay for it
SOUTH KING COUNTY	Please, we need busses that run east/west to Burien, to the 200th light rail station, MILITARY ROAD, to Kent industrial!! And the bus 180 needs to be a rapid ride!! It is too slow!
SOUTH KING COUNTY	There needs to be light rail going across the valley South of the airport. Covington, maple valley, auburn, bonnet lake gets left out.
SOUTH KING COUNTY	I love the light rail, I want it to go anywhere it can so I can use it more!!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	I would like to see lifestyle sounder trains from South King county to Seattle, not just commuter trains. I want to go downtown shopping or to restaurants but commuter trains limit what times I can go into city, which means that I drive if outside normal commuter schedule.
SOUTH KING COUNTY	Existing HOT/HOV enforcement is horrible. What is the point of lawfully using the lanes when there is so much illegal use that transit time is now no better, and at times, worse than regular lanes? This is a part of our regions transportation plan and with crappy enforcement (SR167 in particular) I am less likely to support other mass transit improvement efforts. Sorry, but this is a big deal. This is a mass transit example of an unfunded mandate. This is no different than buses breaking down, rail service continually being disrupted, etc. Get this enforcement issue solved or redesign the lanes to minimize the ability of people to cheat. Otherwise, I will do my best to lobby for elimination of HOT/HOV lanes and not support other transit measure. If you can't do it right, it's a waste of taxpayers money and a false promise to the public.
SOUTH KING COUNTY	No way from my estimate of taxes imposed will it ever be 200.00 per year.....it is more like 1000.00 to 1500.00 per year.
SOUTH KING COUNTY	I would be more supportive if the West Seattle line was in the 8-10 yr plan vs 17 yr
SOUTH KING COUNTY	I used public transit almost exclusively when I lived in north Seattle (Queen Anne, Fremont, Ravenna, U District) but now that I live in unincorporated King County (White Center/Shorewood) the public transit system in practically unusable for me. The park and rides are full by 7:30 am. The buses take long circuitous routes to my neighborhood. The safety level on the 120 is extremely poor and the 113 stops running early in the day. Overall, I feel the public transit system has failed me and my children. I no longer support these projects and will vote against tax increases that do not serve my area.
SOUTH KING COUNTY	way to expensive!!!
SOUTH KING COUNTY	I HAVE LIVED HERE IN SEATTLE MOST OF MY 61 YEARS,I DONT DRIVE SO I DEPEND ON LIGHTRAIL AND BUSES TO COMMUTE TO WHERE I NEED TO BE,SOME OF THESE PROPOSED SITES AND PLANS WOULD BE NICE TO SEE THEM DONE,I WOULD BE ABLE TO GO TO ALOT MORE PLACES IN OUR BEAUTIFUL CITY WITH THESE IMPROVMENTS.ESPECIALLY ON LIGHTRAIL
SOUTH KING COUNTY	I would strongly support spending twice as much if it could be done faster. Eight years to add a Rapid Ride????!!!!!!?????
SOUTH KING COUNTY	Not only will I oppose this tax but any other tax you socialist try to impose on the people. This advertisement that you sent is illegal and I will make sure this is voted down in November. 15 billion in new taxes. You people just have no clue about managing the resources much less being efficient. If big Bertha is any indication of the way this will go the bill will probably rise to 30 billion.
SOUTH KING COUNTY	I think you are leaving something out.
SOUTH KING COUNTY	Trains are 19th century technology.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	Why does South King County and Pierce County always come in last. We also pay taxes. Why should we always pay for everything going North of Seattle and East of Seattle. Try to drive I-5 in the afternoon from So. King County to Tacoma. It's a parking lot Monday thru Friday.
SOUTH KING COUNTY	I am a strong supporter of the all the options for transit. As a frequent rider I want to know I am safe though. Not always do I feel safe. I understand the questions didn't ask about police or transit patrol I would like to see a lot more of that as well.
SOUTH KING COUNTY	I think that buses on the shoulder is a great idea and needs to be implemented right away!
SOUTH KING COUNTY	i don't see much benefit from this plan for the residents who live in Kent and Covington area.
SOUTH KING COUNTY	Expand Sounder train service to bi-directional trips throughout the day and on weekends to serve the large numbers of shift workers at warehouses and manufacturing facilities throughout the rail corridor (Kent, Sumner, etc.). Run direct shuttles between Sounder stations and nearby major employment centers (e.g., Kent Station to Amazon/Boeing buildings at 212th and 64th) -- the employers will gladly help pay for this service to alleviate stress on their parking lots and traffic on surrounding streets if Sound Transit would provide the vehicles and drivers.
SOUTH KING COUNTY	We need better parking options at existing light rail facilities. I can't use it if there's no parking or if i have to fear being towed.
SOUTH KING COUNTY	You want me to spend \$200 a year for a service I never ever use. Let the people who use it pay for it. Raise the usage fees. When you put the bridge in you charge tolls. You charge fees to use commuter lanes. Rapid transit should be self supportive not have to be bailed out by tax payers. I would rather have my tax dollars go to IMPROVE ROADS.
SOUTH KING COUNTY	None
SOUTH KING COUNTY	I live in Kent and am extremely disappointed to see the lack of additions that would help my area. I have used the bus when on special work projects and been in a vanpool for many years, so I am someone who supports community transportation. When I look at this plan, I see my taxes going up with less benefits to my community than to all the other surrounding areas.
SOUTH KING COUNTY	The money should all be obtained from a sales tax increase only. I believe this is the best way to keep the costs under control.
SOUTH KING COUNTY	Bus service has already been cut to where I live (Star Lake, North Federal Way). As a commuter to downtown Seattle, I BEG you to do everything possible to extend the light rail to Federal Way as son as you can. Thank you.
SOUTH KING COUNTY	Please add connecting routes from Burien to downtown Seattle.
SOUTH KING COUNTY	Love everything just wish it could be faster.
SOUTH KING COUNTY	This plan for commuter travel sounds ambitious and hopefully reliable. The question I have is: with a lot more people commuting, how is the gas tax going to be paid? There is a problem with gas tax being collected with more tiny cars and electric cars. Will Sound Transit contribute to the gas tax for our roads and bridges? Will our licence fees go up due to less cars on the road?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	25 years is too long and 50 billion is too much. It shouldn't take that long to build and shouldn't cost that much. And lets be honest, that estimate is probably too low. Everything our gov't officials do seems to always cost more than we're originally told. It would probably end up costing closer to 100 billion than 50. Plus you want to raise taxes to build it? When is our tax dollars that we already pay going to be enough? Always more, more, more. Wouldn't it be nice if our officials learn to balance a budget? The tax dollars are already there you just need to learn how to not waste it like you do year after year. Every year its millions of dollars wasted. And besides, has anyone looked at whether or not this will actually be needed 25 years from now? The way technology is moving our cars will probably be smart enough to drive themselves soon, thus taking out the human factor of driving which will drastically releave traffic congestion. Please quit wasting our tax dollars. If you use it wisely the money will be there already. What will the population be around here in 25 years? I would think it will increase by a couple million. Thats a couple million more people paying taxes into our local gov't. Its tax dollars you never seem to add into the budgets
SOUTH KING COUNTY	Have no problem paying for services but it looks like no additional services are even on the long range plan for Kent.
SOUTH KING COUNTY	Remove Bike Lanes - add free parking in Seattle - include free, ample and safe parking at all ST/Light Rail and Sounder locations.  I am a regular commuter to Seattle but I do it an illregular times, I stopped trying to use light rail in Tukwila or Sounder in Kent as the lots are filled early. So, I end up driving; it takes far less time and if I used ST, I would have to pay for off site parking or park in an illegal spot for commuters.  I do not want to be car free and it bothers me that ST is set up to make it work for 20 something tri-athletes rather than folks with families and jobs that support them.
SOUTH KING COUNTY	I support adding a line from West Seattle through White Center to Burien
SOUTH KING COUNTY	Just make sure you add real multi-level park & ride facilities; one stinking surface-only parking spot in Tukwila for the light rail serves to get practically no cars off the road and so the whole project only serves people who were already commuting via mass transit anyway. If I actually had someplace to leave my car so that I could get on a main bus/rail line instead of wasting hours making connections then I could keep my car out of downtown Seattle. Talk about snatching defeat from the jaws of victory...
SOUTH KING COUNTY	Need to construct more than one project at a time. Light Rail works, get it going!!!!
SOUTH KING COUNTY	How does ST3 fit into the overall transportation plan for the area? What are the plans for improvement that don't involve mass transit?
SOUTH KING COUNTY	In twelve years, I'll be 72. I hope construction from Federal Way to Seattle will be done more quickly. I'd like to still be in my 60s when I ride the Link into Seattle or Everett the first time.
SOUTH KING COUNTY	Spend funds on roads not rails to nowhere.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	The roadways need repair. This should be done but a very large amount of damage is being ignored & has been for YEARS!
SOUTH KING COUNTY	We are way behind rapid transit in this area. Stop studying and surveying and just get 'er done!
SOUTH KING COUNTY	More bases 560,566
SOUTH KING COUNTY	Would like a link to current travel figures (travel time, peaks/lows, costs, projected population changes, common effects of new integration of TOD - pros / cons. The value / weight of an opinion is much more when facts and data can be considered as part of the opinion.
SOUTH KING COUNTY	Adding parking at commuter train and light rail stations would allow more service to the community. Kent Transit Station parking is daily full by 7am - I would be willing to pay Kent Station for parking rights. Tukwila Light Rail is also consistently full on work days.
SOUTH KING COUNTY	No transit changes should be made unless they can be 100% supported by ridership. DO NOT place an additional burden on the taxpayers.
SOUTH KING COUNTY	I am 63 years old and would be paying for something I would never use
SOUTH KING COUNTY	Investment in public transit is very important especially when we consider population growth in the Puget Sound region. Most other cities are investing in their transit systems making them more attractive to future investment. We have to do the same to remain competitive.
SOUTH KING COUNTY	More parking at light rail stations. The small amount at Tukwila and none at others is ridiculous.
SOUTH KING COUNTY	I do not believe parking additions are necessary. However, KC metro and ST need to find better ways to link buses to neighborhoods and light rail/train stations. Currently there is only one bus that connects Kent/Auburn area to SeaTac light rail. Really bad access to such a great resource.
SOUTH KING COUNTY	It is money wasted.
SOUTH KING COUNTY	Property tax should NOT be a means of revenue.
SOUTH KING COUNTY	Many are frustrated by the lack of connectivity between all these wonderful modes of transportation. Better coordination between buses, trains, trolleys, etc. would allow more people to use what's presently there. It currently takes me 30% more time to ride the train into the city than to drive. Assuming of course there's parking at the station. One big question missing is WOULD you ride transit more if have the opportunity?
SOUTH KING COUNTY	The system needs to be more accessible, starting today. Other major cities offer all modes of public transportation in early hours of morning and later in the evening. The fact that light rail is not an option for most working people due to the hours it runs makes no sense to me. That seems like an easy fix.
SOUTH KING COUNTY	This survey is too long do not think you are going to get a cross section of results due to length of this survey!
SOUTH KING COUNTY	Light rail is inappropriate for commuter service over long distance. Priority should be on commuter service via Sounder and enhancements that get express bus and BRT out of mixed traffic situations.
SOUTH KING COUNTY	We are a rapidly growing city with limited space for new roads. Public transportation is the best way to go to add the capacity to quickly transport people from one part of the city/region to another part. It's time to do it!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	Timeline is too long. Need more immediate improvements
SOUTH KING COUNTY	Just wanted to add the suggestion, regards to the system set up of all these transportation routes ect... is there any intentions on developing WiFi operated vehicles? This would avoid a lot of cable and electrical handwork...just a thought...I also observed that we don't have enough highways and /or alternative routes to get from city to city in the entire king County area..yes I agree with building other types of transport...but we Ali DESPERATELY NEED MORE HIGHWAYS, AND ROUTES TO GET TO OUR DESTINATIONS WITHOUT DEPENDING ON ONE FREEWAY TO REACH SAID PLACE. IV visited other states and they have fantastic road techniques, such as Texas for example. Hardly any traffic in certain areas because you can get to your destination various freeway routes. Please consider the expansion of our freeway routes and connections...adding more ways of transport is great but adding more TRANSPORT SPACE IS CRITICAL. thank you for reading.
SOUTH KING COUNTY	For aligning Link Light Rail with I-5 from the Angle Lake station to Federal Way, although saving time and money, you are missing an opportunity to truly transform Pacific Hwy into something great the same way that MLK way became something great. Low-Income Housing opportunities, educational opportunities and businesses flocked to join the hubs along MLK way... granted, it did take a while... I promise you, the same can happen to Pac Hwy. You are missing out on an opportunity.
SOUTH KING COUNTY	I support rapid buses with frequent runs over same frequency of light rail, as I think it's cheaper than rails and gives more flexibility for the future, and hopefully in future all buses will be electric. But in order for them to be useful they need to have right of way , high frequency and be as fast as light rail. I do not have the facts if that is possible for less money than light rail.
SOUTH KING COUNTY	The addition of light rail from Tacoma to Des Moines - linking it to the existing line - would be what I need to choose transit over driving into Seattle. Although I use the buses some, the speed and convenience of light rail is far preferable. I don't just support this for myself. I especially want to see more efficient options for lower income workers to get to jobs and tourists to get to/from the airport. I am absolutely willing to do my part via taxes to bring this area into the 21st century (even the 20th century) in terms of light rail!
SOUTH KING COUNTY	For transit to work, you have to have transit services that connect from housing areas to major light rail/train stations and then quick access to major work locations. People don't take the transit because it takes them 2-3 times longer than driving due to connection wait times or having to walk to/from a station.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	There have been, in our regions recent past, excellent rail lines that connected the South end of King County to Seattle. This was the inter-urban line that went unused for years. This line was equipped to handle heavy trains far in excess of those used not for commuter only transportation. What happened to these lines? Well, the County (working with other "partners") decided to convert them to pedestrian and bicycle traffic only thus tearing out what would have been a cheap and efficient means of providing space for light rail and other rail transportation. Then, along comes Sound Transit asking for multiple millions of dollars to re-invent rail lines. This does not pass the common sense test. Based on the fact that the planning for how these rail lines would move across this region was so ill-planned and ill-conceived by all involved "partners", I cannot support any further funding for such projects. So strongly do I feel about this monumental mess will be shown by my moving out of King County in the coming years to either Thurston or Mason County to avoid all of the associated costs for this boondoggle of a project.
SOUTH KING COUNTY	Parking. More people will use the projects if there is a place for them to park at the stations.
SOUTH KING COUNTY	Link rail parking and reliability
SOUTH KING COUNTY	in des moines run rail line along I5 and not Pac Hwy.
SOUTH KING COUNTY	I personally think we should find the most supported project, fund it and see if it works. This way we aren't committed to everything if we don't find the traffic relief we are seeking.
SOUTH KING COUNTY	The Puget Sound region is way overdue for an outstanding mass transit program to help people get to where they need to go in a timely manner. It's called progress. And, with the number of people moving into the area, we cannot continue to keep our heads in the sand about how this entire region needs affordable, reliable, dependable, convenient and safe public transportation.
SOUTH KING COUNTY	White center does not have a quick way to get to light rail, and many younger people are moving here. We need light rail sooner, or at the very least rapid ride options to the light rail. The 131 takes too long.
SOUTH KING COUNTY	This plan seems too expensive for the benefits conferred.
SOUTH KING COUNTY	I would use the Sounder more often, but I don't want to get stuck in downtown until the train comes back starting a 3 in the afternoon! Please add more times to the schedule.
SOUTH KING COUNTY	No more property taxes
SOUTH KING COUNTY	Stop taxing those of us who live in the South East for Seattle, Tacoma and Everett. You do NOTHING for us and expect us to pay equally???? Tax your damn ridership
SOUTH KING COUNTY	No more tunnels. Too expensive! Condsider above ground monorails to Ballard & west Seattle
SOUTH KING COUNTY	I just returned from a trip to 4 European cities. They all had multiple modes of mass transit. Berlin: bus, rail, light rail, street car. Warsaw: bus, rail. Street car. Krakow: bus, street car. Prague: bus. street care. Public transit was heavily used in all four cities.
SOUTH KING COUNTY	Taxes should only be added to those cities who benefit from Light/Heavy Rail and bus service. Those who live in citties or unincorporated areas with no bus or rail service should be forced to pay for ST Service.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	<p>I like the idea of a light rail station at boeing access road. It would give future possibility to provide an additional more steamlined route for light rail service through sodo.</p> <p>The downside to the existing light rail from SeaTac to Seattle for me is the extra time it takes to detour through Rainier Valley and under Beacon Hill. I understand the need to service that high population area, which is good And, with future expansion it would be even better to have an additional route, so people who work at Boeing Field (Georgetown), and throughout Georgetown to Sodo have access to light rail to get to work. A light rail line/ bike path along Airport Way and/or 6th Ave would increase ridership.</p>
SOUTH KING COUNTY	These timelines are ridiculous.
SOUTH KING COUNTY	I'm willing to pay higher taxes (average adult pays \$25/month) if it meant quicker completion dates. I'm also willing to pay higher taxes for increased services around the region. Basically - I strongly support this project and think that it could go even further.
SOUTH KING COUNTY	I am a student at university of Washington Tacoma. There's many students traveling from the seatac/federal way area at the moment. Having the light rail go there would be so convenient. Especially with all the traffic on I-5.
SOUTH KING COUNTY	They need to extend the express from Bellevue to auburn again, makes it hard to work nights and get home to auburn. Also the buses need to be on time !!@
SOUTH KING COUNTY	To get my financial support I want to be able to use the services - don't really care about it when I'm dead!!!!
SOUTH KING COUNTY	I live in Federal Way and commute from Auburn Sounder Station and sometimes Federal Way Transit Center. I need my commute time improved now, not in 12 years. The improvements sound great and will make life better but take so long.
SOUTH KING COUNTY	Quit spending so much money for so few people!!!! Spend more on roads, and downtown parking.
SOUTH KING COUNTY	<p>If this plan is going to cost an average adult \$17 a month then there needs to be a revision to the good to go program. Paying a high-toll in addition to a tax increase to expand mass transit doesn't sit well with an average adult. Also the different "rules" for Highway 167 and parts I-405 need to stop. If you are going to toll single occupant carpool toll the whole highway not just parts of it and then also change the number of occupants you can have. Or an idea would be to toll coming into the city but not leaving. Is there going to be a toll set up for the express lanes on I-5? Seems that would be a good way to make a buck to support the cost, especially if the toll was a buck. I support mass transit and have used it in the past six years quite a bit but I don't like the additional transportation costs AND tax increases. Our family has two vehicles both hybrids to lessen our personal cost and pollution to the environment. It seems counter-intuitive to pay higher taxes for transit we only use once a week (we work from home now) and pay a high toll to avoid traffic jams when we do go out.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	The proposed plan calls for an average of ~\$17/month for each Puget Sound area adult. To-date, neither Sound Transit nor King County Metro have shown any ability to manage a budget. While I support public transportation, and ride a combination of Sounder rail and Metro bus in my week-day commute, I am tired of funding programs that have no oversight or fiscal responsibility to the taxpayers. So, while I am mostly supportive of ST3, I am adamantly opposed to paying for it unless and until I see someone who can actually manage a budget and manage a project take it on - not just a union crony or two who are of the liberal tax and spend school.
SOUTH KING COUNTY	If the average citizen will have to pay \$17 a month for expansions, its important to me that fare enforcement has a greater presence. All the time we see people who have not paid their fare, but who benefit from these expansions that cost money-- and get nothing more but a talking to by tired looking fare enforcers, who know the person is lying about "not knowing" they have to have fare, but have to go through their speech anyway.
SOUTH KING COUNTY	500,000,000 per mile is RIDICULOUS. Funding should come from those the use it. STOP the 90% subsidiaries given to users.
SOUTH KING COUNTY	Start and finish all projects earlier! We don't need to waste any more time!
SOUTH KING COUNTY	Unfortunately by the time all of the extensions are completed I will be in my late 80's to early 90's!!
SOUTH KING COUNTY	More commuter parking needs to be available at Federal Way transit center. I go to work an hour earlier, to assure myself I get a parking space.
SOUTH KING COUNTY	The pathetic politicians need to present a credible transportation system that serves the largest employment centers like Boeing factories. We are decades behind Asia and Europe in public transit. This so called plan won't close the gap.
SOUTH KING COUNTY	I desperately want light rail. I grew up in DC when they were building the Metro system. It can and should be done. I would rather see a faster timeline in which the connection from Tacoma to Everett was made and the connection from Seattle to Redmond were made faster. We are way behind. I don't like there only being 2 stops in Federal Way, but I'll take whatever I can get at this point. Build something and stop making excuses!!
SOUTH KING COUNTY	lack of parking keeps us from taking the light rail. Looking forward to garage by SeaTac. Only transportation that makes sense keep up the great work
SOUTH KING COUNTY	The mid day 578 bus from Federal Way to Seattle runs every 1/2 hour, and is consistently full or standing room only. I would propose that the frequency be increased to every 20 minutes, and that it run later at night by at least 1/2 hour. There is also an extreme need for additional parking at the Federal Way Transit Center, as it fills up by 7:30 AM on weekdays. In conjunction with other transit agencies, I think more feeder buses to transit centers and light rail stations would be helpfu.
SOUTH KING COUNTY	South King County pays taxes along with everyone else for these improvements, but we see little increase in transportation services.I have used public transportation only when I don't have to worry about the time Involved, as the routes are infrequent and involve walking long distances to get to a stop.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	The main problems are the bottle-neck on I-5 through Seattle and issues with the focus on the limited SeaTac airport. We need a bypass for commercial and long-distance traffic out around Seattle to the East - like was done in Portland with I-205. We also need another airport to serve the Bremerton and/or Olympia area. This is much more important than promoting the extensions to the Light Rail system.
SOUTH KING COUNTY	Please ADD MORE convenient, safe parking for commuters at Kent Station. Thank you!
SOUTH KING COUNTY	This is so over due
SOUTH KING COUNTY	I have unlimited ORCA card from my employer MultiCare & go to Seattle frequently but since there is NO place for me to park after 9 am, I usually just drive car & park. There is limited bus service from my home area and prefer reliability of light rail over buses but there is such inadequate parking on South end to access light rail that I don't use it except for events such as Seahawk games. The Puget Sound area will never be car-free as it is a sprawling area. Be realistic & build adequate parking at access points like light rail stations.
SOUTH KING COUNTY	Hurry to Federal Way!!!
SOUTH KING COUNTY	I totally support the expansion of light rail. However, the only way that light rail will be successful is if there is adequate parking. You need to provide parking garages at the various stops. Otherwise, it will not work in the suburbs.
SOUTH KING COUNTY	Since I was a kid growing up in Burien, born 1977, I have heard about proposals to improve public transport, decrease traffic, give incentive for people to use cars less and have more walking/biking area in downtown Seattle. The city has not managed to get it's act together or even put into action proposals that the public has voted yes on, until now when it is a nightmare situation. The city has somehow managed to continue building high rises for the wealthy. THEREFORE, middle and lower class families should not be financially penalized for these overdue projects, and really should be apologized to as well. Thank you.
SOUTH KING COUNTY	Transit definitely needs improving, but do NOT raise taxes!
SOUTH KING COUNTY	Better access for disabled
SOUTH KING COUNTY	The light rail service in Tukwila to Seattle does not start early enough in the morning. It's first run is a little after 5AM. Needs to be earlier for those who work at hospitals, etc. (Perhaps have first run at 4:40?) The load of people from Sea Tac airport who have been waiting all night for it is heavy too.
SOUTH KING COUNTY	I live in Arbor Heights West Seattle. I'm 70 years old. I can not wait 17 years for light rail to come to my area. Also you have pretty much taken away bus service from my neighborhood. When I do drive to a light rail station there is no parking close by. You need to move faster with the development of light rail, add parking and service ALL areas of Seattle. I don't see much bang for my buck so I don't vote for any transportation bills as they are.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	<p>1. Regarding the location of a light-rail station near the Boeing Access Road area, the area around the SR599 interchange with South 133rd Street is a prime location for so many reasons: a) Many business parks, b) residential areas west and east of the interchange, c) plenty of existing parking areas that can alleviate and even replace the Tukwila P&amp;R, d) easy accessibility off I-5 and near Metro bus barn, e) public transit access to the Tukwila Community Center complex.</p> <p>2. Whether light rail runs from Everett or from Tacoma, there should be a 3rd track constructed to allow "express" service for am/pm commutes and special service situations, which increases the cost.</p> <p>3. The Issaquah extension should have a study to expand to North Bend, not just because of population that does commute to Seattle, but a short bus run to Snoqualmie Summit from North Bend could provide impetus for an affordable solution for skiers in the winter and mountain bikers in the summer.</p> <p>4. Increase the length of platforms on south-end Sounder and add a few more runs. It's high time this needed to be done.</p>
SOUTH KING COUNTY	Way too much money.... way too long to wait..... poorly thought out projects that serve mostly Seattle. Why should Pierce County want to pay for any of this?
SOUTH KING COUNTY	I believe the cities closest to Seattle should have light rail first then build to Tacoma at a later date.
SOUTH KING COUNTY	The reason I don't use public transit is because it is too difficult to get to my final destination. right now I work in Georgetown and live in federal way.
SOUTH KING COUNTY	There is not enough parking at the tukwila station. I have to circle the parking lot for an hour at least. Easier just to drive into town because if I kept circling I would be late. So very frustrating!!!!!!!!!!!!!!!!!!??
SOUTH KING COUNTY	Light rail should have stopped at Boeing field for those employee's to have direct access to it. Light rail needs to provide parking everywhere - I've never been able to use it as the limited parking lots are full every time I've tried. All trains thru Kent and Auburn, including Amtrak and BN need to be better spaced out. I sit thru 3 trains every morning and evening during rush hour. Downtown Kent train station is dangerous as it closes both main roads going across the valley. Emergency crews are trapped by the same issue. I will not support more or longer trains that threaten the welfare of the community until an overpass/underpass is built OR realistic scheduling is imposed that provides at least 4 mins clear passage across the tracks between EVERY train.
SOUTH KING COUNTY	Too aggressive of a plan to have future generations paying for this life long tax!! Very Poor idea
SOUTH KING COUNTY	Your plan is too slow. The city population is growing and you need to build transportation infrastructure much faster.
SOUTH KING COUNTY	Lets fully understand how to use our current structure more efficiently - right now seeing poor traffic light cycles on ramps - unfortunate failure of I-405 car pool lanes - two lanes for carpool and they aren't being used as traffic still backs up on the mainline

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	Lets begin using what we have more efficiently - higher taxes is not the answer to solve transportation issues. Especially party taxing - that is a fatal flaw. You have now awoken the beast and mostly likely a VOTE NO on all fronts is in order to get control of this 'monster'
SOUTH KING COUNTY	We Desperately need a light rail station in the Des Moines area right off of 99th or pack highway. There was one planned or one-stop planned to be right in front of Highline community college. The Des Moines's area is increasing in population however transportation options are very limited. We are in dire need of the light rail to come and open up opportunities for travel in the Des Moines area thank you
SOUTH KING COUNTY	\$50 billion is a price tag that will suck all of the financial oxygen out of the region, and foreclose any effort to improve highway throughput. But I suspect that is why ST3 is being proposed to aid in making traffic congestion so great people are forced out of their cars and into urban villages. Hopefully ST's passed performance will wake the regions voters up, and they will vote down this costly boondoggle.
SOUTH KING COUNTY	Complete 509 from Burien south!
SOUTH KING COUNTY	Light link and rapid ride busses should be the highest priority. A lot of bus lines stop too frequently making them useless to travel. Their needs to be more parking at more locations outside of downtown Seattle so that more people can reliably access the system.
SOUTH KING COUNTY	Need to speed the whole thing up ,we need more light rail and parking at stations now!!!
SOUTH KING COUNTY	I will be dead long before any improvements reach where I could use them, since they're not even in this plan. Try 5 hours of commuting everyday via 6 buses and see how you like it.
SOUTH KING COUNTY	Light rail is the future
SOUTH KING COUNTY	Tying approval of transit plans to areas that will receive no benefit is ludicrous. You have disappointed many who are lacking and given those with the most the opportunity to deny of plans to keep your original promises. I support your ideals but distrust your ability to execute.
SOUTH KING COUNTY	Instead of a property tax, please consider a gas tax or even better, a gas sales tax. I live in Burien where we will not see ST3 but for a study. We need to build new schools. Our voters will pit one against the other.
SOUTH KING COUNTY	Please consider including EV charging stations at all park and ride locations. The Tukwila Sounder station is a great example. Thank you for your time.
SOUTH KING COUNTY	It would be nice if there was a ST - from Kent to Ballard, not everyone works in downtown Seattle.
SOUTH KING COUNTY	Please increase the times for Sounder service to accommodate trips into and out of Seattle between 10AM and 3PM. I am retired and would go into Seattle more often if I didn't have to adhere to commuter hours.
SOUTH KING COUNTY	Lets slow down before we go taxing our property to support transportation - that is completely unnecessary!! From what I've witnessed we could be doing a much better job using our existing structure to it's fullest - many of the ramps to the freeway aren't timed properly. Many of the backups currently are from construction works.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	Ever increasing taxes hit senior citizens the hardest. Not affordable! Make riders pay with increased fares.
SOUTH KING COUNTY	We in Federal Way have paid for light rail since the beginning and probably will not see it in our user lifetime. Why do we have to keep paying for the benefit of others?
SOUTH KING COUNTY	If ridership can't pay for the project, then you need to go back to the drawing board.
SOUTH KING COUNTY	How can we coordinate transit and Land use. Only 1 question looked at development. Issaquah is a sprawling low density city for the rich. Transit needs to focus first on improving inner city and first ring before massive expansion to the outer regions. These plans need an equity analysis to see which income levels would benefit most and then a true prioritization can occur
SOUTH KING COUNTY	Ridership will increase if there was parking and/or more convenient ways to get to the train stops.
SOUTH KING COUNTY	I've taken Light Rail from the start and over the last year, I've seen the parking lot in Tukwila filling up earlier and earlier. Others have caught onto that fact. I've been displaced and have been forced to drive my car more times than not recently. I get to the Light Rail station at 6:30am or 1 1/2 hours before I start work for a commute that only took 20minute 8 years ago. You desperately need more parking. I suspect I'm not the only one being displaced. The solution cannot be to add a shuttle and another 25 minutes and more expense to my commute.  I'm also wondering what you're thinking by not using extra train cars during rush hour especially on the way out of the city. Do any of you know what it's like to ride day after day standing in a car packed like cattle where everyone has to struggle to get out or move for others? What would we do if there were a fire or earthquake while we're on these trains packed like sardines?
SOUTH KING COUNTY	You should compress the plan. 25 years is too long. 10 - 15 years is more appropriate. Also look at where people are moving.
SOUTH KING COUNTY	Parking and access to existing light rail stations must be improved. Timelines should for light rail expansion and parking should be bumped up for earlier completion. eliminate the tolls on 405 and 520
SOUTH KING COUNTY	Add buses. The trains are a scam, but you already know that.
SOUTH KING COUNTY	I'm not a big fan of buses except in the city. Light rail seems to be the best way to get around quickly. In order for light rail to work parking lots like the Park & Ride need to be built to get people to use the rail system. I have ridden the rails in San Fran, San Diego and DC systems and was impressed. I think light rail is the way to go not as much as bus.
SOUTH KING COUNTY	Why do i have to pay tax on something i will never use? Renewing my license tabs and see this \$51.00 charge for sound transit, really makes my skin boil. Highway robbery
SOUTH KING COUNTY	I feel that there is a significant need to focus on expanding parking at sounder and light rail stations. Transit services are limited in SE King County, even in typical commuting hours, as it is and when I have tried to use light rail, I have a terrible time finding parking and have ended up driving into Seattle anyway.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	It's extremely important that additional expansion occurs on I-405 in order to alleviate traffic conditions on that road. A light rail from Federal Way/Renton or an Overlake/Seattle will help commuters.  Seattle is a major city and needs more reliable (currently, the Sounder is NOT a reliable form of transportation) transportation like you would expect to find elsewhere.
SOUTH KING COUNTY	Rail and light rail are seldom used. Cost to use ratio is way out of balance. Most can't use system for good reasons, but must pay very high cost. Waste of tax dollars
SOUTH KING COUNTY	Any project Sound transit does runs way over on cost and does not produce what they say it would. Sound transit can not be trusted with 10 cents.
SOUTH KING COUNTY	Anything that helps with I-5 congestion should be priority at this point. All areas between Seattle and Tacoma have experienced a rapid growth in population just over two years and more cars are on the road than ever. It almost feels unsafe to drive at the busiest times because it is so chaotic and frustrating.
SOUTH KING COUNTY	Extremely unfortunate it takes so long to complete the project for a slow moving transit. May have to look at other (developing) countries where these can be done in few years. It is hard to ask people to support the project when the fruits of the project may not happen in their life time 😊
SOUTH KING COUNTY	The concentration really needs to be focused on transportation south of Seattle. It is the fastest growing area especially with residents leaving Seattle due to high rents. ST Express buses still do not reach Federal Way in a timely manner. Riders still miss connections. Creating BUS ONLY lanes during peak times on I-5 would greatly increase reliability and give a great incentive for people to ride transit. I also believe in a few years when the construction boom wanes in Seattle, you will have enough workers to build out this system faster. Taxes a fine but the State, counties, and cities should really be getting the Federal Government to help fund this more than they are. The King, Pierce, and Snohomish county area IS the business center of the State and should be getting the transportation dollars.
SOUTH KING COUNTY	In the past, I have tried to use the link at Tukwila/SeaTac. But there is no parking available so I just stopped trying. I would rather not need to park in Seattle.
SOUTH KING COUNTY	It needs more free parking space
SOUTH KING COUNTY	We don't need any of this. We need better highways. By focusing on this you are destroying the environment. Cars going speed limit produce less toxins than big buses and cars that have to constantly stop. Also, driving is freedom to go where you want to go, when you want to go. Why are the poor being priced out of this option by all these mass transit projects? Let's not focus our personal preferences and limiting the freedom of the poor and work together for the good of all.
SOUTH KING COUNTY	No new taxes! Disband this entity and stop spending what you don't have!
SOUTH KING COUNTY	The total incompetence demonstrated by the people in charge of other projects has only convinced me that these projects would simply add to the list of complete failures.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	I live in the Black Diamond / Male Valley area of south King county. Pretty much nothing helps me, but a lot of my money could be taken. Why not build BEFORE they come, where there is available land now, and at better prices. Growth is here in the south, and more, many more are coming. Waiting for a huge population and transit mess before acting is ridiculous. What mess to build in already built up areas! Needing to imminent domain congested and expensive places to build is so hind sited. Finding money to buy out expensive properties is pretty hind sited, too. None of the above will assist in my traffic problems at all. Help those of us who get up every day and go to work whether we want to or not.
SOUTH KING COUNTY	The cost is prohibitive. Other cities have expanded their transit systems for a fraction of this proposal. My children will be retired before it is completed. I'm on a fixed income and \$17 a month is prohibitive. It will also drive up rents for the people who can afford it the least.
SOUTH KING COUNTY	This is not going to move people off of freeways. You will not move people off freeways because that is the way they want to go. Put the 50 Billion into freeways so buses and cars can rum smoother, that we may catch up a little.
SOUTH KING COUNTY	One more tax grab that provides almost no value to the taxpayer
SOUTH KING COUNTY	Metro has excellent service in Seattle for in city residence, it has terrible service elsewhere. I tried to take the light link rail at the Tukwila station and there was no parking. The same thing happen when I tried to take the Sounder train and there was no parking. I took the light link train once when I parked in the Sea Tac Airport Parking Garage and it was nice, but I was surprised that the train stop for street light in South Seattle - That should not happen. In other cities, the train has priority. I took the Metro bus once into Seattle and it took 65 minutes that is too long. The people of Renton, East Kent and Auburn and all cities south should all vote NO, because Metro has no intentions of providing any reasonable service. Why should we pay for something we will never see?
SOUTH KING COUNTY	Be sure to have the extra money lying around to pay off the 19 trillion dollars in national debt and Jay Inslee's FUBAR debts.
SOUTH KING COUNTY	I would use the transit system daily if I could just fine reasonable parking. The parking at the Tukwila rail system is a joke. There should of been a parking garage put there instead of a parking lot. Adding a few thousand parking spots hopefully should help if at all possible. Otherwise the system will be almost useless. It's not worth the money to spend 2 hours hopping on busses to get to the trains to get to Seattle when you can make it to Seattle in an hour n half in rush hour.
SOUTH KING COUNTY	There needs to be express options between S King Co and Seattle outside of traditional commute times.
SOUTH KING COUNTY	Roads and highways move goods and services, rail and buses are not the solution. Super highways and massive road investment is the only solution. Tolled bypass highways, tunnels and major infrastructure investment projects. Current bridges and roads are falling apart.
SOUTH KING COUNTY	More emphasis is needed on bus service improvements and less emphasis on light rail and Sounder service.
SOUTH KING COUNTY	The timeline needs to be moved up. These transit projects should have been completed ears ago!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	Sound Transit is seriously out of control, over budget, and off schedule. Wide usage of buses if the best way to go along with reducing road congestion to permit automobile and truck travel.
SOUTH KING COUNTY	How much longer can I afford to live in King County? Property taxes go up every year. Income is fixed and Social Security says there is no inflation. I have always supported schools and other capital projects. It is beginning to look like the only choice is just vote no more tax increases.  If parking is not a priority at the stations, what is the point? People who cannot park at the Park and Rides have no choice but to drive the freeway. More parking at the existing stations should be #1 priority.
SOUTH KING COUNTY	Sounder trains should run more often, not just at peak commute times. Very wasteful not to be available to non commuters.
SOUTH KING COUNTY	don't build it, and tax us for your plan
SOUTH KING COUNTY	Too expensive and the cost per average adult will be much higher than proposed. We will not support it and do not want to pay for it. Taxes are already extremely high.
SOUTH KING COUNTY	All of the previous projects have increased my utility bills and with this project I suspect the same will happen. ST has NEVER completed an on time project or stayed within the original budget for a project. I have no confidence that ST will meet budget expectations nor time schedules and voters will get less than what they thought they were promised like every other ST measure that has passed.
SOUTH KING COUNTY	light rail is extremely expensive, under used, and loses money in almost every city it has been developed. I am opposed to light rail as it is a poor use of available transportation funds. Light rail took an additional 10 years to build light rail to UW, and the estimates for future light rail expansion are ridiculous! I will be dead by the time your planned expansions are completed and opened to the public! I am in favor of expanding bus services and expanding our highways to meet the needs of commuters, to decrease commute times, and to most efficiently use our transportation funds.
SOUTH KING COUNTY	I'm paying for a garage promised in ST2 that hasn't been built, yet you talk about building garages on the north end early. Why should I feel like throwing more money at your empty promises?
SOUTH KING COUNTY	TO EXPENSIVE ,TAKE TOO LONG TO COMPLETE
SOUTH KING COUNTY	As a homeowner in King County property taxes are consistently burdened with carrying major parts of these types of projects. As someone who lives in Burien where I will not be receiving service for the near foreseeable future I don't agree with how this is going to be funded -
SOUTH KING COUNTY	I-405 from Renton to Bellevue should be prioritized. It is ridiculous that we haven't expanded the # of lanes there. It is crippling. Spend money on road lanes!!!
SOUTH KING COUNTY	Stop trying to force mass transit down our throats!
SOUTH KING COUNTY	Parking is a major issue not only at rail stations, but at ALL transit centers, and I hope that this will be addressed as well.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	I will not vote for anything that Extends rail service bus service should be on separate ballot you're trying all or nothing so it's nothing
SOUTH KING COUNTY	This mode of transportation COSTS TOO MUCH. I do not want to pay for it. How about the people that use it pay for. More oversize needed regarding costs. Regular audits. None of the projects thus far have been completed in a timely manner. I say scrape the whole thing.
SOUTH KING COUNTY	Given the timeframe (25 years) that this project would be going on for, this plan seems incredibly short-sighted. This solves for a lot of the current transportation crises but doesn't seem to account for the rapid growth that will inevitably continue over the next 25 years. There isn't any plans to expand out toward southeast Auburn/Covington/Maple Valley, which is one of the fastest-growing areas of King County right now. I'm also curious if there are plans to expand Sounder service beyond commuter hours as part of this development plan. I would love to take the train to Seattle from the Auburn station, but the service is so limited it seldom fits with the timing of when I need to go. It would also be nice to have Link access along the southern Sounder corridor if there aren't plans to expand service operating hours, or having a place where the Link and Sounder meet up to allow for transfers for easy of transportation to say, the airport, other than all the way up in downtown Seattle. I understand buses can come on line faster and cheaper, but buses will only add to the congestion. We need to invest more seriously and heavily in rail for both the current transportation issues as well as the inevitable future issues due to the region's rapid growth.
SOUTH KING COUNTY	You cannot continue to get blood from turnips. Until you change the entire tax base in Washington state taxes should be frozen
SOUTH KING COUNTY	I have attempted to take the Light Rail from the Tukwila station. I drove to that station on a weekday, at 10:30 am. There was no parking available, so I then drove to the parking structure near Seatac Airport, again no parking available. I then went to a 3rd Light Rail station and again, NO PARKING. So unless you are commuter, your only option is to take the bus. I don't always want to take the bus, so the only option is to drive my single occupant car, which I will do in the future. Whoever planned these transit centers only planned the parking for commuters, what about the rest of us????? There needs to be long range planning done, not just for commuters.
SOUTH KING COUNTY	A possible future consideration for rail service, maybe looping from Renton through Maple Valley then through Covington to Auburn.... Thank you
SOUTH KING COUNTY	Major mistake was not building parking at the light rail stations. I live by the Tukwila station, and while there is parking there, you'd better be there by 7:00 or you're left out. More parking equates to more ridership, they go hand in hand. Give people a place to park, so they can utilize the light rail.
SOUTH KING COUNTY	Speed up Everett to downtown Seattle light rail AND Federal Way to downtown Seattle light rail to be completed within 4 years. The stress on workers (can't afford to live in Seattle, must live farther & farther away, thus causing exhausting commute times and expense) is killing us.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	I am a strong supporter of public transit. I think that these projects should have been started 20 years ago however the support for them would have been minimal at that time. By all means, let's go forward with public transit.
SOUTH KING COUNTY	The area is way behind the times in providing appropriate systems to move people around the area. Service is needed throughout the day and evening, not just at "commuter" times. Because it is so needed it has my support across the board.
SOUTH KING COUNTY	Too expensive.
SOUTH KING COUNTY	Start running the sounder train on the weekends. We would love to go to the Kent station, take the train to Seattle for shipping and dinner. Otherwise, we avoid going to Seattle like the plague because driving downtown is ridiculous.
SOUTH KING COUNTY	liars and misappropriation of prior money grab
SOUTH KING COUNTY	I would like to know what the user numbers are for the light rail, because every time I see one of them, there are not very many if any people in them, I have been a Washingtonian my entire life, I lived in Renton and Kent, I do not see alot of transit help, which most of us have been paying for, for many years, I would much rather see more commuter trains from the north to south, now those trains are always full, with our horrible traffic situation, the trains should be running 7 days a week, and we should just tear down the Viaduct build a new one, make it so one lane on each side is dedicated to sounder train rails, how much money has been wasted on the ridiculous tunnel, scrap it and dedicate the rest of the funds to fixing traffic issues, there is no way I will ever use that tunnel. Someone needs to be better stewards of taxpayer's dollars, because alot of people are really fed up.
SOUTH KING COUNTY	Consider light rail/sound transit directly to Queen Anne
SOUTH KING COUNTY	I feel a set annual fee would be more preferable to a tax based on assessed values or added sales tax that could be effected by a down economy. Using multiple taxing mechanisms looks like government slight of hand. I do not wish to pay for something that gets cancelled due to a down economy again. Please get this right, our region needs rapid transportation options to keep up with growth. Thank you
SOUTH KING COUNTY	I cannot vote for something that taxes home owners more highly than other parts of the population because then I will not be able to support school levies. Home owners cannot be expected to pay for the majority of everything.
SOUTH KING COUNTY	Keeping Boeing and Microsoft in the Puget Sound Region is critical. The ST3 projects that would benefit all the major Boeing and Microsoft facilities should be highest priority. This will send a strong signal to both companies that their presence is valued and citizens of the region appreciate them.
SOUTH KING COUNTY	If the parking for Sounder and light rail stations are not adequate, people will not ride it. Please focus on parking facilities for light rail (especially as you move south) and the Sounder train. Thank you!
SOUTH KING COUNTY	Build along hwy 99 to give access to Des Moines and Federal Way residence.
SOUTH KING COUNTY	We need to continue expanding light rail service. We cannot stop and take a breath. It will only get more expensive. If we build an extensive light rail plan, folks will use it!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	The main reason that I don't use light rail for my daily commute is that I cannot find parking at the light rail stations near my house in Des Moines. Parking at light rail stations is essential for light rail's success. Also, please consider how the tax may affect those in our community who are low income. It is easy for me to pay \$200 per year for transit improvements, but may be a burden to those who are very low income.
SOUTH KING COUNTY	Sales tax in King County is RIDICULOUSLY HIGH, and yet our roads are crumbling and overcrowded. WHAT ARE YOU PEOPLE DOING WITH THE MONEY?????
SOUTH KING COUNTY	There are virtually no connections between Seattle and Tacoma. Peirce transit is a joke and I'm very glad sound transit will change this.
SOUTH KING COUNTY	We should have done this 30 years ago. People in this region are notoriously selfish and short-sighted. I hope that they wise up this time.
SOUTH KING COUNTY	Light trail from Tacoma to Seattle! Especially if it stops in Kent or surrounding area. Double my taxes, don't care, needs to happen!
SOUTH KING COUNTY	We use the Federal Way Transit center to downtown Seattle bus and the bus service is so effective that the 1,000 plus garage is always full. What a great success story.
SOUTH KING COUNTY	As part of the large number of retired baby boomers, I now live on a fixed income and new, additional taxes in what is already a highly taxed state is frightening. Additionally, I think the plan extends too far into the future, committing me to taxes for a plan for 25 years, which will no longer be applicable as time goes on. I would strongly suggest you look at the editorial joke in the Federal Way newspaper on 4/22/16 labeled "In the Distant Future" depicting a couple flying over a transit train in a small, personal air transport vehicle and commenting, "It's called a light rail train. They're building it to Everett, Tacoma, and Issaquah for some reason..." I thought it was quite appropriate as representing the folly of planning so far into the future. While I am just one person responding in this manner, I hope you keep in mind that for every person who takes the time to respond that there are many more who think the same way but do not take time to express similar opinions via the survey.
SOUTH KING COUNTY	Commuters will not use transit systems as long as transportation via their car is quicker and cheaper. Why would anyone want to use mass transportation when the commute time is over three times longer and much more expensive? You solve these questions and you will gain support for your expensive projects.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	<p>1. Timeline is FAR too long to be actually helpful to commuters. Eight years for bus service??? 2. PARKING, PARKING, PARKING. I currently rarely use ST because I have to drive halfway to my destinations with the nearest station being Tukwila; additionally its parking is full by 7-7:30 so good luck if you want to take the train up at any midday time. 3. Why don't Sounders run on weekends? Better locations, better parking... 4. Newspapers, politicians, and transit all fail to consider SE King county important, despite the population boom in Maple Valley/Black Diamond. Almost every family I know here has someone working in Renton, Bellevue, Seattle or Redmond, many are gone 12 hours a day due to traffic. Many also air travel frequently for work. SE King county needs transit options!! I'd be far more willing to pay for this if it would be relevant to my life more than 2-3 times a year that I go to Seattle on ST.</p>
SOUTH KING COUNTY	<p>Parking is a issue I deal with every day! If I don't get to the parking garage at Kent Station before 7 am I'm not going to find a parking space. Now I see that the spaces have been numbered, so I'm going to assume that Sound Transit is now going to make us pay to park. What about those that are just going to Kent Station shops and restaurants; the garage has always been advertised as FREE PARKING. Please include parking garages/spaces a priority at all stations.</p>
SOUTH KING COUNTY	<p>King County needs to stop spending and lower taxes. This sound transit plan is expensive to build and expensive to maintain; the public will pay and pay and pay; and, will pay again when the equipment and facilities become old and outdated. My husband tried using light rail from Auburn to Renton in the AM to commute to work and found it did not save time or money. And, Boeing was subsidizing light rail by offering employees a cash incentive to people who would use it. While rail transit was quick, the bus ride from the Renton terminal to Boeing's Renton facility took so long that he found he could drive his personal car to work in almost the same amount of time.</p>
SOUTH KING COUNTY	<p>You need to study on how to maximize the traffic flow on existing roads i.e. bus lanes along the shoulders, add more lanes, eliminate bike lanes which restrict traffic flow. Lightrail does not make economical common sense per mile of rail versus buying, maintaining and using buses and/or expanding freeway lanes for car traffic. Look at feasibility of double deck express lanes over existing freeways for thru traffic/ truck traffic. The Alaska Way Via-Duct should have been seismically upgraded by encasing the existing columns with rebar, concrete and/ or steel and the bridge decks should be redone and widened . This could have been done for a fraction of the cost of the Big Bertha tunnel project. The tunnel does not expand capacity and is not economically viable.</p>
SOUTH KING COUNTY	<p>I disagree with the upcoming parking regulations for the Sounder Train Stations. Open/free parking should be maintained without restrictions. If additional parking is needed, shuttle from local parking lots like Emerald Downs to Auburn.</p> <p>Granted, you need to review items for the greater good. As for myself, I travel from a remote area and carpool is not an option. However, I do take the train into Seattle and then a bus to Bellevue College where I teach.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	Technology, smart cars, driver-less cars, make all this tax money spent on hard routes mutt. And if you had half a brain you would know this. Individual freedom and movement is the heart of why we have accomplished where we are at. Why are you so intent on stuffing everyone into some kind of box? Remember THX 1138, is that really what you want?
SOUTH KING COUNTY	<p>The priority should be roads. The vast majority of commuters in the proposed Sound Transit corridor do not and will not use mass transit. Their transportation needs require the flexibility that can only be provided by automobiles. The HOT and HOV lanes need to go, they do nothing to relieve congestion other than for those who can afford to pay the exorbitant tolls (especially on I-405 between Bellevue and Lynnwood. I tried commuting on the Sounder from the Auburn station to Tukwilla. Although the speed was quick on the train the remainder of my trip required riding a bus to my office, a trip which was usually 30 minutes one way, but often took an hour. The bus small and crowded, and late just often enough to dissuade me from riding.</p> <p>In short, some people can't afford an automobile and so riding a bus makes sense. Same for densely urban areas like Seattle. But light rail is a boondoggle, it's too costly per rider mile, it cannot be sustained by ticket sales, it requires constant funding by taxpayers who will never use it, and once built it will require constant costly maintenance. I am very strongly opposed to light rail. Build more roads!</p>
SOUTH KING COUNTY	Stop wasting public money on mass transit.
SOUTH KING COUNTY	I feel like I am being taken advantage of to pay for a system that is meant take my taxes and pay for things that people who do not pay taxes to enjoy. Charge a use tax for bicycles. I feel like I am a tea party member of the 1700's.
SOUTH KING COUNTY	<p>I am a supporter of public transport as my disabled son will never be able to drive and he will need access. I moved to the 98032 area code not because I liked it, but I wanted better access to public transport for him in the future and me now. Moreover, I am a regular commuter to Seattle, but I do it at non traditional times. At this point, I simply do not even consider The Sounder/Kent or Light Rail/Tukwila as the parking spots are gone when I need one. So, I find it cheaper, faster and simply better to drive to Seattle.</p> <p>Sound Transit needs to understand that I am not a 27 years old anymore and my triathlon days are behind me. I need access to FREE parking in a safe location for me to access public transport. It has to be better to jump Light Rail than it is now.</p> <p>To be clear, I will never ever use my bike to get to a Light Rail station or Sounder station or Bus stop.</p>
SOUTH KING COUNTY	Prioritize light rail to West Seattle and Burien to the top of the list.
SOUTH KING COUNTY	The plan is far too expensive when the majority of commuters never use and don't want to use mass transit. Money could be better spent increasing road space for vehicle traffic.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	There has to be some other way than property tax as the major way to pay for this work. There needs to be some sort of "transit tax" assessed to every citizen in the region to pay for these projects instead of forcing property owners to bear the brunt of the work.
SOUTH KING COUNTY	Extend the taxing boundaries. ST services are being used by thousands of people who live outside of the ST taxing districts. Either extend the boundaries to include more of these people or find a way to charge users who live outside the taxing area. For example, at Commuter Rail parking facilities, instigate a hefty parking fee which could be reduced to a nominal fee if the car is registered with a ST parking department and that registration proves that the owner lives within the ST taxing district. Another thought would be to have a separate ORCA card issued to people who live outside the ST boundaries. This ORCA card would be more expensive and help to cover some of the costs that are being avoided by people now. This could also be easily enforced by employers who participate in CTR and other trip reducing programs since they know the home address of all of their employees. I do understand that although most of these people who live outside the boundary probably work and spend money within the boundary they are still avoiding vehicle license fees and will avoid the new property tax. Find a way to capture the benefits these people enjoy and make them share in the costs.
SOUTH KING COUNTY	Why is bus running late at sea tac airport?
SOUTH KING COUNTY	You people have constantly under reported the costs of doing what you projected you would do! Been quick to issue long term bonds and delivered poor quality services for high cost. YOU suck at your job. Please go out of business. Thank you.
SOUTH KING COUNTY	I would like SOMETHING to be done to improve rapid transit from Renton South and Kent East. At the current time, NOTHING is being planned except more of the same which is insufficient. WHY IS THIS AREA BEING ignored?? I also oppose strongly the incredible expense for doing nothing!!!
SOUTH KING COUNTY	You shouldn't have "stakeholder meetings" that exclude the public. The stakeholders are all government people. The Highline College station should come to Highline. Who do you think is going to be using it?
SOUTH KING COUNTY	PLEASE don't forget about west seattle between burien and the Alaska Junction. White center matters too!!
SOUTH KING COUNTY	I know our region needs help with transportation, but I feel this plan is not equitable. When you look on the map there is nothing planned in the area where I live and travel. What about east/west transit out in Maple Valley, Covington, and Fairwood. The southeast end is constantly ignored. We don't have adequate park and rides or bus service. Our roads (Maple Valley highway, Kent Kangley) are very congested and getting worse every year. Why should I pay to support transit that has no benefit to me? The area where I live is affordable and many people commute into Seattle or other places with very little assistance on east/west routes. I am recently retired, and wonder why I am being asked to support a program that provides services to mostly the north end of King county and virtually ignores SE King county. At this point, I think I will be voting no unless the plan is improved and made more fair to everyone in King County.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	Expanding bus service makes SO much more sense and is so much more cost effective than any of the Light Rail options. Of course, the MOST sensible solution for this region's transportation issues is the need to expand the freeways and STOP punishing drivers by adding tolls!!
SOUTH KING COUNTY	We just need to get going on Light Rail, especially. Don't let the city of Tukwila railroad us anymore.
SOUTH KING COUNTY	light rail stations have brought parking problems to our residential neighborhoods, we need MORE PARKING at the tukwila international blvd station and at the 200th street angle lake station. we need to fix our existing stations before building new ones that will introduce even more parking problems.
SOUTH KING COUNTY	We voters are all a bunch of idiots, tens and tens of billions of dollars, perhaps as much as \$100 billion and traffic will be no better. Public transportation is not a cure all, never will be, we are all just a bunch of fool. But I do know this is how you make your living at my expense.
SOUTH KING COUNTY	It is important to me for ways to be developed for those who live in West Seattle, White Center, Shorewood, and Burien to get to Downtown Seattle, Bellevue, and the U District.
SOUTH KING COUNTY	Given the terrible traffic conditions in the Puget Sound Area I believe that a massive effort should be to complete all projects in ST3 within 5 years. A second reason is that GLOBAL WARMING could do an enormous amount of damage everywhere it is vital to get FEDERAL AID to complete this ST3 in 5 years. We all pay considerable FEDERAL INCOME TAXES and they should be used to help this country to markedly reduce carbon dioxide and methane pollution in our atmosphere and to meet the intent of the Paris, France Accords.
SOUTH KING COUNTY	In addition to adding on to the main lines that primarily support I-5 and I-405 corridor there needs to be improved access from southeast King county; Kent, Covington, Maple Valley, Auburn. We need ways to get to work and I to the city as well.
SOUTH KING COUNTY	Studies have already shown that the worst traffic is on I-5 between Tacoma and Seattle. Why money is being spent ANYWHERE ELSE doesn't make sense. (Remember that Federal Way already voted and approved funding back in 2008.) More and more people live in the south end because it's more affordable than further north, and that impacts I-5 and 167. Every effort and dollar should be concentrated on getting this corridor updated with light rail. Adding buses will just add to congestion. If an accident happens in Ballard and commuters can't get to Seattle, do that many people care? But when an accident happens on i-5 or 167, THOUSANDS of people are impacted and care. Put the money where the need is and fix the I-5 corridor!!!
SOUTH KING COUNTY	Concern about funding - I'm supportive of paying my fair share to move people to and from work/home, etc., in a more efficient way. But I have concerns that the money will get misspent by accident or intention - with delays and additional costs driving taxes up way higher.
SOUTH KING COUNTY	Existing central link light rail service needs either increase the number of coaches on each train from 2 to at least 3, possibly 4 during really peak commute times, *and* increase the frequency at which they run during peak commute times.
SOUTH KING COUNTY	Twenty years way to long to benifit most people in traffic now

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	<p>There is no urgent and perhaps even any pressing future need to connect Burien to West Seattle with Sounder rail funding and development. However, Burien should have had a short rail connect line to Sea Tac rather than this Express Bus. Burien is one of the communities that has experienced the most damage and loss to its environment and tax base because of the Sea Tac expansions. It has the largest amount of affordable housing in the King county area and one of the poorest and most diverse working populations. It is the community that most needed the connection into the Sounder rail system. Sea Tac has almost killed the land values in Burien and now you would have the nerve to not even connect Burien to Sea Tac and the rest of the Sounder rail line. But your committee initially proposed nothing for Burien at all in this ST3 plan. Only the complaints of the Burien City Council even got you to consider a bus. This means that Burien will again be left off the grid from desirable development because it doesn't have a Sounder rail site. The idea that in the next future plan any communities will support further development and additional taxes for a Sounder rail site in Burien is absurd. They will all have gotten their "goodies" and Burien, which is supposed to be one of the PSRC transit points and growth centers, will be short changed out of a rail site. Of course you will want Burien residents to pay the full share amount for all of these other Sounder improvement while it only gets a crumby bus. Where was no plan for Social and Economic Justice in the ST3 for Burien. This ST3 plan only helps to make the already rich Puget Sound communities richer, easier to get to and more desirable to live in. Frankly, I think your plan stinks and don't intend to vote for it and I will encourage others not to vote for it. Shame on you. Additionally, your presentations out to the communities to get their support is boring and shallow. Sounder is the most expensive rail system that has been built in the USA and you make no efforts to reduce the unneeded overhead-like 3-4 Sounder staff members sitting on their rears at public meeting on the public's dime. I'd like to see Sounder Transit employ some lean management principals. Sound Transit's approach reminds me much of the Monorail's approach to how management uses money.</p>
SOUTH KING COUNTY	<p>As a union labourer, I strongly support all projects projected by Sound Transit</p>
SOUTH KING COUNTY	<p>This project will take too long for me ever use it. The BRT should be completed sooner than eight years! As usual, Burien is getting screwed again. First it was the impacts from the Airport and now it is light rail. The benefits associated economic growth and development that follow the placement light rail stations are bypassing Burien and the city will economically fall even further behind the other cities in the South Sound. Even though Burien has been designated as growth center by the PSRC, there seems to be a concerted effort by the region to do whatever possible to limit resources flowing to the city.</p>
SOUTH KING COUNTY	<p>Although I support the intent of ST3 to provide better, bigger, faster transit options, I oppose the method of funding because it continues to grow our regressive system of taxation. Instead, I propose ST support efforts to change our system of taxation starting at the state level. A large portion of funding for these projects should come from state and local income taxes on individuals and corporations. Given the long timeline for these projects social forces will require that other of forms of funding be used for this other large programs in the future.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - South King County

SOUTH KING COUNTY	Mass Transit should be a better steward of the public's money. I will no longer support transit expansion or any increase in funding as they do not have the best interest of the public as a priority. How can ridership go up over the years and you continue to ask us to pay more while subsidizing more. I am tired of supporting others with my hard work and tax dollars. I'm done! Your trains no longer meet my needs. Your schedule no longer meets my varied schedules.
SOUTH KING COUNTY	25 five years is too long to wait. Speed up all aspects of all projects.
SOUTH KING COUNTY	Too expensive for the commute improvements
SOUTH KING COUNTY	Faster. Faster. Speed up the work by a factor of 10.
SOUTH KING COUNTY	Forget all this mass transit nonsense. It's always delayed and over budget. We need wider roads, free parking, easier highway access, and better maintenance of existing roads.
SOUTH KING COUNTY	I-405 corridor needs improvements for sure. Some parking needs to be increased, Kent Station for example fills up quickly Tues - Thurs. I wouldn't support the idea of paying to park there though.
SOUTH KING COUNTY	The main issue for the southend transit lines (Seatac Lightrail, Kent Sounder and Tukwila Sounder) is that there is no parking after 7am. Need more free parking.
SOUTH KING COUNTY	This survey and your meetings are a sham. You've already made up your minds. Yet, I doubt more than a handful of people working on these projects ever take the bus, train, or light rail. People want roads; I want roads. You've spent money on bicycle lanes to handle less than 1% of the people. Nice for them; costly for us. The money should be put into improving the roads.  Your system is very Seattle-centric. It does nothing for those of us in SE King County. We should not have to pay for your folly.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

Subarea	Additional Feedback - OTHER
PIERCE COUNTY	I WOULD LIKE TO SEE MORE OPTIONS TO USE LIGHT RAIL/SOUNDER SERVICE DURING THE WEEKENDS
PIERCE COUNTY	<p>Sounder trains are getting quite full, looking forward to the possibility of adding additional cars, potentially additional trains to accommodate.</p> <p>Parking in Sumner is full by the first train in the morning, looking forward to potential parking solutions for this Sounder Station as there currently isn't many options here.</p>
PIERCE COUNTY	I am tired of paying taxes when the Orting area of the state is ignored. Highway 162 is a parking lot. It takes forever to get to a transit station.
PIERCE COUNTY	This plan is a huge rip off to Pierce county and Soun Transit cannot be trusted. pierce county should not get misled by you guys again!!!!
PIERCE COUNTY	Parking for the sounder train stops. As well if planning on extending the light rail that far either restrooms in the link or each station needs to provide restrooms.
PIERCE COUNTY	Please bring any type of transit to Orting. We would greatly appreciate it. Thank you.
PIERCE COUNTY	We don't currently use ST because it isn't feasible. The comiter rail stops running before we generally leave work.
PIERCE COUNTY	<p>We need to get back what was here in the 30s and 40s.</p> <p>I live out side the taxed area, but I use the service daily.</p>
PIERCE COUNTY	There should be more options for people to the south/east of Sumner/Puyallup/Orting to allow them access to the sounder train, such as running a bus (or a small train on the tracks that are already along 162 between Orting and Puyallup) from Orting or Graham so less parking space is needed.
PIERCE COUNTY	Stop the buses and focus on rail!!!
PIERCE COUNTY	<p>The amount of investment, time and money, required for light rail, I don't feel that is the solution. The Seattle area would benefit from more bus options that extend to more places and run regularly. That being said, having a bus lane would benefit the freeways tremendously. I haven't read much about the buses on the shoulder, but perhaps that would accomplish the same thing. Parking needs to improve at many of the stations in order for any changes to take effect, even if they are buses. Buses can be put on the roads quicker and can benefit a number of people, as long as there is parking available. Most sounder lots fill up fast, so I would prefer parking situations are solved before we invest in light rail over the next 25 years.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Funding should be provided by the communities that benefit from the services. As a resident of Lakewood, I heartily resent hundreds of millions of \$\$ being spent on projects with my tax dollars that have absolutely no benefit to me. I'll pay for the projects that benefit me and my community - such as South Sound to Seattle Sounder Rail and Express Bus services, but I'll be danged if I can support the outrageous cost to me for services that support only Metro Seattle, Bellevue/Kirkland/Redmond, or Edmonds/Mukilteo/Everett. If I wanted to live there, I'd move there. If I wanted to experience the dubious benefits of living there, I'd live there. Don't make me subsidize those who make those choices because the cost of those choices belongs to the people who make them!
PIERCE COUNTY	Public transportation should be abolished
PIERCE COUNTY	I think there are huge safety concerns with the bus bypass on the freeway. Before any construction takes place figure out the parking problems.
PIERCE COUNTY	Don't do this. I don't want Seattle sprawl to increase, I don't want downtown to be busier with more commuters coming from further out, and most of all I don't want higher taxes. Please don't do this.
PIERCE COUNTY	I am tired of being taxed for project that mostly benefit other counties. The bus service in Pierce County has gotten worse and less reliable in the last decade. Sound Transit has not made the current system reliable enough to deserve further funding for other projects. And the parking for sounder trains in ridiculous.
PIERCE COUNTY	This work needs to be done sooner rather than later. 25 years is to long to wait for systems to be in place. We needed light rail 10 years ago. GET THIS DONE NOW! I would like to see much more light rail rather than busses.
PIERCE COUNTY	Would like a system that involves more of the East Pierce County plateau. Would like more frequent rail service that will connect north and south, rather than the band aid approaches. My job only allows me to use transit during my days off, which I would if available. Just need more frequency of what we have available today.
PIERCE COUNTY	I really think that parking at stations is a huge issue, especially during the dark winter months. I often have to park in an unlit neighborhood 6:45 and walk several blocks to be able to use the Sounder train. Since I'm forced to park out in neighborhoods, my safety is of concern to me, especially since I have been approached several times by intoxicated people during those dark early morning hours. I would much prefer being able to park closer to the Station in a lit area with security.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	<p>The plan is a good one, however I have disagreement with the way the different components are scheduled and funded. Additionally, there is never enough consideration given to how commuters will reach the station. Maybe 20 years from now, the web of community transit will better connect people with the stations -- but, currently, there is not enough parking for those of us who choose not to spend an extra 2 hours per day (TWO HOURS PER DAY EXTRA) commuting to and from a transit center or train station. I do not live near a train station, light rail station, transit center or park and ride. However, in the spirit of reducing SOV trips, I used to take the train, until parking became ridiculous. I then drove much further to reach a light rail station, only to be quickly daunted by lack of parking there, too. Now I'm using a transit center, where the available space fills up quickly, often leaving me no real alternative but to drive SOV 30+ miles into Seattle. "If you build it, they will come" and I'm one who truly wants to use public transportation. Not at the expense of the extra 2 hours out of my day for rural commute to a transit center, though. And not if I must risk a parking ticket someplace because the transit facility underplanned its parking.</p>
PIERCE COUNTY	<p>parking is a mess at all of the south sounder stations. You have to be at the station by 5 a.m. in Sumner or Puyallup to get a parking spot at all. It is extremely frustrating to be looking at over an hour commute and for the solution to be to park in a satellite lot and catch a bus. That breaks down like this:</p> <ol style="list-style-type: none"> <li>1. Drive to park and ride lot (most south pierce county locations have no neighborhood bus service) (15 min)</li> <li>2. Catch a bus to the train (15 min)</li> <li>3. Wait and take train (60 min)</li> <li>4. catch a bus in Seattle to get to downtown (10 min)</li> </ol> <p>so drive - bus - train - bus - walk</p> <p>this is a lot to ask for people. And most people I know are willing to pay a surcharge to have a parking spot.</p>
PIERCE COUNTY	<p>I would use transit more if there was a light rail system that ran more often then the Sounder for example from DuPont to Seattle. I think expansions of our transit system would be beneficial to everyone!</p>
PIERCE COUNTY	<p>We need to find ways to fund this other than simply charging the average commuter more to use public transportation. Rather than raising fares, maybe we should just raise reduced fare prices or eliminate them all together.</p> <p>Another good way to do this would be to increase gas taxes or raise toll fees so these funds could go to these projects.</p> <p>The idea is to encourage people to use public transportation. Increasing fares suddenly will only prevent people your everyday commuter from using this form of transportation.</p>
PIERCE COUNTY	<p>It this had begun 30 years ago as it was proposed, just think, it would be all done by now. Hopefully people won't be so short sighted this time around.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Before we spend millions on this great plan, let's make sure the existing things are working at 100%. The South End needs more parking structures (i.e. Sumner, Auburn). Sound Transit has promised to build new parking garages but it has been years now. It discourages people from taking the train if there is no where for them to park. Please make sure you complete already existing projects before going on to something new. Thank you.
PIERCE COUNTY	Bring transit to Orting we really really need it
PIERCE COUNTY	Stop wasting money on light rail. Instead improve bus service, car pool lanes, car pool vans and more expanded park & ride lots
PIERCE COUNTY	Any transit in or close to Orting would be appreciated . The reason I don't use it...it was taken away and now we have none.
PIERCE COUNTY	<p>Re: Light rail expansion, I am concerned that trips on the finished line may take too long for it to be feasible. It currently takes quite a long time (35 or 40 minutes?) to get from Tukwila to Seattle. That dissuades me from using it as often as the Sounder train. A trip from Federal Way, even Tacoma seems like it could be prohibitively long... 60 minutes? 90 minutes? Long trips won't work unless speeds can be increased.</p> <p>Re: Sounder service, I strongly support improvements to Sounder rail and surrounding infrastructure. But trains are already near capacity during rush hour, and I am concerned that extending it further South will add more riders without longer trains or better infrastructure, and could cause issues.</p>
PIERCE COUNTY	<p>The low hanging fruit is added busing. Bus routes are flexible and don't require nearly the additional infrastructure that light rail does. Light rail routes are inflexible and the added right of way and infrastructure is expensive.</p> <p>I feel it is disingenuous to make statements like, "There simply is no more room for roads," but imply that adding right of way for light rail is the obvious solution. The property used to build rail could be just as easily, and more cheaply, used to build expanded roads for commuters.</p> <p>I support optimizing existing freight rail with added commuter train service. That seems a wise use of existing infrastructure.</p>
PIERCE COUNTY	I use the sounder south rail every week day and lately I've been frustrated by the lack of maintenance, delays and available parking. I finally ended up paying for parking in Auburn, but it shouldn't be like this. 5 years ago, I had no problem finding free parking and train seemed more reliable. Fix the small issues here and add more parking is my biggest complaint. I am totally for expanding the light rail, but also here maybe not more stations but more speedier ways of getting there. SeaTac to Seattle used to take 25 min from Intl. District, but with the rail and all the stops it takes 35 min. Love to see a connection to the East side with light rail, and up to Redmond / Kirkland. Then expand to connect Renton and Lynnwood. I think it is correct to assess property taxes on this as home owners receive higher return on the investment with improved transit. Thank you for all that you guys do!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Auburn Transit station needs more parking. Also the sounder should run all day.
PIERCE COUNTY	One thing that's important to me is to see an easy way to get from Tacoma to Seattle on the weekends and throughout the workday
PIERCE COUNTY	I'd like to see Tacoma have a higher priority. I feel Tacoma is way behind in being able to access the transportation system. Tacoma needs light rail to the airport.
PIERCE COUNTY	Draft plans sound great. The biggest issue I see that parking for all of these additional stations must be created to support the people using transit. Also with increasing terrorist threats has sound transit looked into the safety of the riders. We don't need to be another Brussels. Anyone can board these trains. You never know what someone could have in a backpack.
PIERCE COUNTY	My problem is money raised in Pierce County has always been used to support projects in King County/Seattle. I will never vote to support ST.
PIERCE COUNTY	Parking at the Sounder stations that already exist must be a priority. I pay \$70 a month to park on a gravel lot. Once they sell that lot, I will have to find alternate transportation and everyday I see at least 5 frustrated potential riders leaving the inadequate parking garage at the Auburn station. That is 5 cars leaving at just one station in the 3 min. it takes me to walk from my overpriced parking to the train. Think 5 cars leaving every few minutes at all the Sounder stations. Those are your potential riders that are now driving. Parking is pathetic at all the stations. Are you going to be equally short sighted at all the new stations? Good luck growing your ridership when people are leaving because they can't park
PIERCE COUNTY	ST can't complete on time and on budget now, why should tax payers trust you with more of our money? It would be illogical to give you more.
PIERCE COUNTY	Cannot wait 17 years for light rail to come to Tacoma. Will support higher taxes if projects can be done in 7 years. Otherwise NOOOOOOO. Too slow.
PIERCE COUNTY	yes, yes, and yes. Let's get serious about a region-wide, viable alternative to driving.  I would like to add that "last mile" connections from transit centers to actual destinations is an issue. I take the sounder from sumner to seattle daily. It takes me about 35 mins to make the trip to seattle, and it takes another 35-40 mins to get from the station to SLU. Getting commuters to the city is only half of the challenge. Getting people to/from their final destinations and transit is critical for people to change behavior from driving to riding. That's why I rated the Seattle projects as highest priority. We need to make it easier to get people around the city.
PIERCE COUNTY	Do it Now!!!!
PIERCE COUNTY	For the love of God, please consider parking and running trains past 6 pm. Without these considerations, there is no point in proceeding, because people will continue to be forced to drive.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	North line sounder wouldn't appreciate comments like "regardless of weather" based on how often it is canceled, and this is coming from someone who doesn't use it. Also, 25 years sounds like a crazy long time. I just joined the workforce 4 years ago and plan to retire shortly after the whole system is finished. It's gonna be hard to drive home the point of the bigger story here when people are going to feel like they are paying for someone else's benefit. Kinda like my generation and social security. We're paying into it, but I'll never see it.
PIERCE COUNTY	There needs to be more stations added to the South Sounder Commuter Rail and more parking at rail stations.
PIERCE COUNTY	Something else to consider is more frequent ST Express busses running on the weekends, especially later into the night. Like at least until midnight or 1am.
PIERCE COUNTY	More Govt Boondoggles...over budget and over schedule
PIERCE COUNTY	DO WHAT FALLS IN PLACE POSITIVELY AND KEEP GOING FORWARD THANK YOU FOR GOING FORWARD
PIERCE COUNTY	I live in Tacoma and work in Seattle. Last week I had to attend two day-long meetings in Ballard. Day one I took transit, day two I drove. On both days, the one-way 35-mile journey took at LEAST two hours. Gridlock is becoming the norm as opposed to the exception. We need to do something now. I support ST3, but I question why I am paying \$200 a year for something that's not going to be done for decades. Why not issue bonds and get started now, especially with historically low interest rates.
PIERCE COUNTY	Stop wasting money on light rail. Instead improve bus service, car pool lanes, car pool vans and more expanded park & ride lots
PIERCE COUNTY	Needs to be sooner!!!!!!
PIERCE COUNTY	You can run light rail down the middle of the freeways, between the opposing lanes. Elevate it and do it. Alternatively, you can pick a side and run it down the side. Light rail is a better long term solution than increased bus routes. It would also be great if you could somehow get WSDOT to pull their head out of their ass and stay out of most of this, but that's just a pipe dream of mine:-)
PIERCE COUNTY	All of my working years I paid my own way to work and lived close to work. Have today's people live closer to work and pay their own way. I had to pay mine and I should not have to pay theirs.
PIERCE COUNTY	I fully support all mass transit initiatives that extend light rail, the Sounder, and buses. Having traveled extensively in Europe and the UK I know what it is like to have affordable and extensive mass transit. It is better for the environment and it is quick and much easier than driving...fewer drinking and driving issues because people can walk or take mass transit to restaurants and bars. We need that here in the Seattle area...and I am more than willing to pay for it. For everyone! We also need lower income and seniors to have subsidized ridership so that they can also use mass transit and reap the benefits. One of the reasons Europeans are more fit and less fat is because they use mass transit...you have to walk and move. I am more than willing to pay more in taxes to fund mass transit!
PIERCE COUNTY	buses are much too crowded even late into the evening, I have to stand on the 578 every night

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Nothing has been mentioned regarding the Express buses from Tacoma to Seattle. There is no rail or light rail that can even compare to the express buses from Tacoma to UW Seattle. If these buses are removed then we will be forced to sit uncomfortably on a train and would have to take several modes of transportation to/from work, adding at least 30 minutes to our already long commute. I'm all in favor of adding more opportunity to those who need it, but do not take away our only direct route to/from work/school. Thank you.
PIERCE COUNTY	Get some parking on sounder stations and add cars. There is 0 useful parking unless you're on first train out. Cars are fuller every day almost maxed out.
PIERCE COUNTY	Please don't use the funds for any commercial development. Let the developers fend for themselves. Make sure that art projects in the route have at least a 50 year lifespan. Sound Transit has paid for a lot of interesting stuff that has become junk in 5 years. You could pay artists over a lifespan and incentivize long-lasting art over fragility.
PIERCE COUNTY	I know lack of parking at the station prevents people from taking the train
PIERCE COUNTY	We need more roads and transit to and from Orting. Make use of the train tracks for light rail, or transportation to the sounder. I own a rental home in Orting and the renters work in Bellevue and Seatec airport. Most of the population in Orting have a commute of 2 hours. We need to get on this soon.
PIERCE COUNTY	I recommend a twice day express Sounder train between King Street Station in Seattle and Lakewood, with stops only at Tacoma Dome and S. Tacoma Station, and then Tillicum and Dupont when they come on line. The reduced commute time would encourage additional riders and reduce commute time. It could run once in the morning and once in the afternoon.
PIERCE COUNTY	The transportation system proposed is a convoluted mess.
PIERCE COUNTY	Are you kidding me? Where the heck is the parking garages promised in st2? Auburn, summer, even Kent. I might vote against it cause your insane to leave out. Also, why so long. You need to go back to the drawing board projecting things 25 years out. Insane!
PIERCE COUNTY	A very high priority should be put on expanding use of the sounder train to support more than commuters. It should run the same hours as light rail, and provide a train every 30 minutes going North and South. There's so much to do in the area of each of the Stations. I would never drive to Seattle or Tacoma again. Today, I always drive because there's no other option.
PIERCE COUNTY	It would be great to have some sort of transit that goes thru Orting.
PIERCE COUNTY	The cost of this expansion is prohibitively expensive. The majority of the benefits are in King County while the vast majority of Pierce County will see no benefit but will incur the higher taxes. We can't afford this package. If it just added light rail to Tacoma and Everett without all of the additional stations in Seattle I could support it. I have no interest in supporting expanded mass transit for King County.
PIERCE COUNTY	for consideration in ST 4 all of these are light rail shorline to woodinville, redmend to lynwood, east line to todem lake, tacoma dome to dupoot, angle to lakewod via the valley=arbut, kent, summer, puyalaup, parkland s. belvue to a station on valley line. expand the Sound Tranit Boundries to include Thurston and Kitsap Counties

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Expand the roads, get rid of bad traffic spots such as all the left lane entrance and exits on the freeways, add transitional ramps between freeways from carpool lane to carpool lane. Observe traffic where there's a carpool lane but not carpool-carpool transition between freeways, it's always worse as cars attempt to get from the far left to the exit. Spending obscene amounts of money on transit systems that still leave thousands of daily commuters outside transit service areas for more than the next 25 years (as in, they aren't in the plan) does nothing to improve the current situation. People that live out here still have to drive at least to the nearest train station where there is insufficient parking, such a drive can take as much as FORTY-FIVE MINUTES (it's only 7 miles). At a minimum, expanded roadways to service outlying areas are a must.
PIERCE COUNTY	Please consider including the Orting extention beyond a we will look into it. Traffic congestion in and out of Orting has become a HUGE issue. Additionally, it is putting a lot of strain on the transportation center in Sumner. Lack of parking at the Sumner station than creates additional challenges and headaches.
PIERCE COUNTY	Find another way to pay for it other than taxing the people.
PIERCE COUNTY	I am strongly against this. Current projects have not proven to be effective or able to be completed on budget.
PIERCE COUNTY	Focus on what will work best for the buck. Lower taxes not more. More lanes on 167. Right lane busses like neighbors in BC. East pierce bus srvc to/from sumner station and south hill mall. Less bicycle only lanes and more car lanes. Open up 405 lanes to all drivers. Quit taxing the entire state for transit that affects puget sound area of state only. Quit trying to punish drivers; we're not the bad guys.
PIERCE COUNTY	The Puyallup sounder station is in dire need of a parking structure.
PIERCE COUNTY	Please extend the light rail system into south King and pierce county. Please keep the jobs local, build our economy by hiring locals to do the work. We need this income too.
PIERCE COUNTY	We also need more freeways and better roads. Not every one has a job that works with mass transit.
PIERCE COUNTY	Light rail won't work if the train has to stop at traffic lights, stop for cars, stop for pedestrians on the tracks.
PIERCE COUNTY	Encourage business growth outside of Seattle core. Add light rail to Alaka Way - Elliott Ave corridor.
PIERCE COUNTY	Wi-Fi on all rail cars
PIERCE COUNTY	I would have a hard time supporting any of the projects as there seems to be no consideration for the mass number of vehicles that will need to park at transit outlets. Currently, the available parking at Sounder rail stations is unacceptable at best. For example, recent upgrades to the Tukwila station accomodate ZERO growth and inadequate from the start. This is a tucked away industrial area and instead of utilizing all available space or building a parking structure we have wasted space serving as planter boxes. Assuming the city of Tukwila has such a code for industrial area zoned parking then the project should have included a parking structure. No common sense!
PIERCE COUNTY	Bertha has wasted too much money already.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	You do know you bias your surveys? Your "reasons" for the plan lead a survey taker to your conclusion, your facts are somewhat stretched and you don't take into account any safeguards when the next drop in the economy and jobs occurs. You completely ignore SE King County with the only real issue that matters and that is frequency and availability. I can't get to Seattle before 6am using the Sounder. Don't you find that amazing?
PIERCE COUNTY	Seattle currently gets a lot of attention for transit systems and transportation -- many buses, MULTIPLE streetcar lines, light rail system, downtown tunnel, etc. Tacoma has a very short light rail system, only moderate bus service, no streetcars, and is just now getting HOV lanes in I-5. While I support the overall ST3 plan, it's time to stop treating Tacoma like a second-class city. More transit in Tacoma means more industry, more business, and more jobs. Tacoma needs a lot more attention in terms of public transit.
PIERCE COUNTY	I love Sound Transit. I use the sounder train everyday. I could literally use public transportation for my entire trip. The problem is that Pierce Transit has many of there buses starting at 7 a.m. If someone works in Seattle or Tukwila and starts at 8 a.m., they cannot get to work on time if they were using Pierce Transit. Sound Transit cannot be utilized if the connections do not occur to get you there.
PIERCE COUNTY	Project funding - Not a fan of increasing the sales tax. As a homeowner, vehicle owner, and shopper, I believe I will be paying far more than \$200 a year for transportation that will benefit the folks up north long before the south end sees benefits. I'd like to see a component in the funding proposal which includes businesses having to contribute and share in the financial responsibility. The funding package is relying solely on the people to pay for transportation services which certainly benefit businesses as well so why shouldn't they contribute? I work less than 5 miles from where I live. It would take me 55 minutes if I took public transportation vs. 15 minutes, so I'm not a user public transportation. However, I understand the need for public transportation for those that aren't as fortunate to live so close to work. Let's just share the financial burden with those that are benefiting as well...the businesses.
PIERCE COUNTY	<p>Our region needs better road/highway infrastructure, not more mass transit. If we are so bent on spending money on mass transit, how about we instead focus on fixing the existing problems with our mass transit system? For example, we have two rail systems which have extremely limited parking at all stations. The station I use (Puyallup) doesn't even have enough parking to accommodate the the first two trains of the day! Continuing to expand the rail systems without first addressing shortfalls at existing stations is ridiculous.</p> <p>How about we address issues with our highway system, which includes the need to add capacity, fix issues with bridges and expansion joints, and so forth? How about we finish the 167 freeway from Puyallup to Fife? No matter how much mass transit we have, most people are still going to want to drive to work. I would much rather see this \$50 Billion go towards issues that will actually benefit the majority of people in the region, not just the small portion who will be riding the train.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	The leadership of Tacoma, Pierce County, and other cities in the region have failed to encourage economic development. I would be happy to work in Tacoma, but after four (4) YEARS of looking for work in that city, a mere 8 miles north of my home, I have no choice but to commute to Seattle. Something is wrong when citizens have to commute through SEVERAL CITIES to get to work. I am planning to escape this region as soon as I don't have to worry about a paycheck. I am mystified as to why more companies do not set up shop in lower-overhead cities outside of Seattle, but the myth of "Best and Brightest Only" is a sacred cow to corporate leadership.
PIERCE COUNTY	Despite what the Republicans said when they fired Lynn Peterson this spring, Washingtonians DO support public transit. Our quality of life would be better if we were less reliant on cars and roads.
PIERCE COUNTY	WE NEED TO DO ASAP... THIS PLAN TAKES TOO LONG TO GET TACOMA TO SEATTLE
PIERCE COUNTY	My biggest concern is that the projects aren't actually big enough. Looking at the timelines and the growth, I worry that the system will be too small to accommodate the need when the projects are completed, and hence will fail. Specifically, at the Sumner Sounder Station which I use every day, currently have about 1,000 riders/day, about 2/3rds of which drive and park near the station, so about 650. There are currently about 350 parking spots available, which are gone really early, leaving 300 people to find street parking. You plan on adding 505 new spots, but expect growth to be 600 riders. You have a shortage, and are planning an expansion that is less than your expected growth. Unless there is an ST4 coming, this seems too small.
PIERCE COUNTY	I take the Sounder Train from Sumner. There should be parking garages available rather than making people park great distances in order to walk to the train platform.
PIERCE COUNTY	I would love to be on a PR/Marketing board/committee. I STRONGLY support Sound Transit and its plans for new opportunities for public transit. It is a personal passion. Beyond that, for me personally, I would be traveling to Seattle all the time if I had reliable, safe public transport. As it is, I hate the drive so I go see family and friends once every two months at most. This is frustrating for me. Additionally, not wanting to drive to Seattle affects my ability to hire clients there, which affects my income.
PIERCE COUNTY	Commute daily from Tacoma to downtown Seattle via Sounder, as do many of my colleagues. Use of this service have visibly grown in the last two years and improved local economies, and will continue to do so with these improvements! Very exciting!
PIERCE COUNTY	It would be nice for Tacoma to not be ignored in all this.
PIERCE COUNTY	Large employers and University's should have more input into the role transit growth is dictated.
PIERCE COUNTY	You didn't ask the right questions. Instead of asking about vague South Sounder investments, you should ask about frequency versus larger trains. Instead of asking about station access, you should ask about parking and pedestrian and transit access separately. You also should have asked about whether Boeing needs to be on a line to Everett or if it's better to skip it. And you barely even asked about timelines at all. This seems to be the biggest issue people have.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	I currently commute to from Puyallup to Renton via the Sounder and Rapid Ride F Line. I don't think the F line meets the sales pitch of BRT. I like the concept of BRT as a lower cost way to deliver rapid transit, but the current implementation falls short. It takes me 30 minutes to go 5 miles, it has too many stops to be real rapid transit. If ST3 is going to push BRT as the earliest phase, it needs to focus on the "rapid". A lot of times the F line feels like any bus, just with a fancy paint job. I worry that it doesn't deliver enough perceived value to voters and users.
PIERCE COUNTY	I am really sick and tired of seeing all of the transit orientated projects being built around Seattle. Why do I have to pay for something I can't even use. It is time that the South Sound is put as a Higher Priority than Bellevue, Redmond, and Seattle. Traffic in the Tacoma to Federal Way area won't improve until someone realizes that they need to start building from South to North with Light rail.
PIERCE COUNTY	As a user of the current system that is not maintained well, I'm hesitant to endorse a huge spending bill to provide new services. Maintenance on trains and stations is lacking; designed lighting for architectural and safety purposes is not operating, and there is a general feeling of disrepair. I'm not really inclined to support further expansion when there is little evidence to support that the current plans (unfulfilled parking garages, etc.) will be finished timely.
PIERCE COUNTY	Those that use it can pay for it.
PIERCE COUNTY	Thanks for your work!
PIERCE COUNTY	Forget the busses. Not reliable. Light rail and sounder expansion the best way to go and as soon as possible. Would use light rail all the time to Seattle if it was to Tacoma now.
PIERCE COUNTY	More buses in areas like Kenmore,by Inglewood HS. More parking near light rail stops.
PIERCE COUNTY	Stop wasting money on crap nobody wants
PIERCE COUNTY	Project costs too much money and takes too long to complete. Taxpayers are already taxed enough.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	<p>1. We need more aggressive timelines for extending light rail to Tacoma. We in Tacoma can't wait another two decades to connect to SeaTac and Seattle! Pierce County should receive higher priority because our air quality is among the worst in the nation.</p> <p>2. While I am eager to pay for transit projects, I do not support another raise in our regressive sales taxes in the region. We must find other ways to pay for this!</p> <p>3. To insist that our "quality of life" in this region depends on traffic alone is hopelessly reductive. Try this instead: motor vehicles are polluting our air and water, causing harm to human health and the local environment, including Puget Sound.</p> <p>4. Transportation accounts for roughly 50% of greenhouse gas emissions in the region. Therefore, building a complete and connected mass transportation system that works for all residents is among the best ways we can reduce our climate impacts.</p> <p>5. All new projects should prioritize bicycle and pedestrian access, not the construction of more motor vehicle parking.</p> <p>6. This infrastructure should be funded, at least in part, by the largest polluters in the region, including the fossil fuel companies that are A) making huge profits and harming the planet through our continued reliance on their products and B) polluting the air and water at no cost to them. Sound Transit should lead the way by putting a price on carbon in the region and using it to fund these projects.</p>
PIERCE COUNTY	Housing taxes in Tacoma are considerably higher than in Seattle. What may appear to be reasonable for someone in Seattle is back-breaking in Tacoma.
PIERCE COUNTY	Strongly support long-term plan for completing light-rail in the area, but in the interim need more trips on ST Express buses between Tacoma and Seattle. Buses are packed to capacity and often standing room only, particularly in the evening rush hour. This isn't comfortable or safe for passengers. An additional 2 trips in the latter half of the morning commute (between 9:00 and 10:00 a.m.) would also be helpful, as those buses are often too full as well. Would also like to see more trips on Sounder Southline train (running later in the morning and later in the evening).
PIERCE COUNTY	It would be nice to see the light rail extend down to tacoma much faster than in 17 years
PIERCE COUNTY	Charge additional fee to transit users to support initiatives, people that can't use it shouldn't have to foot the bill.
PIERCE COUNTY	While focused on this project it is important to note that transit is a form of accessible transport for individuals that cannot afford cars or are unable to use cars. This plan needs to be cognizant and acknowledge that this transit plan should not stop individuals from having access due to cost. The plan needs to include ways to allow low income individuals and families the ability to utilize these public services.
PIERCE COUNTY	Hours should be expanded into the afternoon, the evenings, and weekends
PIERCE COUNTY	I would like to know why Seattle and surrounding areas seem to get all the light rail first and from Sea-Tac south are always last on the list
PIERCE COUNTY	Way too expensive!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	These sorts of projects have proven to be a drain on taxpayers wherever they have been attempted. They are not self-supporting, do not break even, and require continual taxpayer subsidies to operate. People have shown, and continue to show, a distinct preference to enjoy the flexibility of transporting themselves in their own vehicles, and have rejected governmental efforts to herd them into mass transit. As taxpayers, it would be much better to use our money to improve the system of roads to relieve congestion rather than throwing it into the black hole of mass transit. The only people who will benefit from this project are the contractors who have connections to elected officials, along with those officials who will benefit by handing out the contracts.
PIERCE COUNTY	The packet to include highway shoulder usage, must strictly be for Buses only, to eliminate the possibility or temptation for car utilizing the shoulders.. build an 18 inch high lane divider. Just high enough to deter cars and trucks from moving onto the authorize shoulder lane.
PIERCE COUNTY	I answered "opposed" to question number 12 because I think we need to cut the 25 year proposal in half. I've traveled extensively and know first hand how important and effective a good mass transit system can be. Many people choose to drag their feet because of the cost. They don't realize how much they would actually be saving in both time and money by using mass transit. You need to work harder at selling the program based on how much it would save people in terms of both time and money. They just don't have a clue.
PIERCE COUNTY	<p>What a phony survey, just read your last batch of questions.</p> <p>Pierce transit is a social welfare program. And as long as you continue to try to grow your authority and power I will be here to fight you.</p> <p>Look in the mirror and spit in your eye, as you are an. overpaid, under-worked and coddled 'workforce' of which the majority of, could not make it on their own. I would like for you all to stop sucking the life blood from society and give our economy a chance to grow.</p>
PIERCE COUNTY	<ol style="list-style-type: none"> <li>1. I would like to see existing problems fixed before creating new projects (how many times does the Everett line get shut down due to slides, etc?)</li> <li>2. Not happy that Sound Transit money is being used to build improvements for the Amtrak route through Lakewood (any plans for sound buffering?)</li> <li>3. Not excited to see a 166% increase in the motor vehicle excise tax collected, a 55% increase in the sales tax collected AND a property tax implemented only to see money collected in Pierce County shipped to King and Snohomish County.</li> <li>4. The accessible after-standard-work-hours transportation is still lacking. Tough to go up and spend a casual afternoon in Seattle and still be able to get home.</li> <li>4.</li> </ol>
PIERCE COUNTY	Include plans to assure personal safety of all travelers--lessening opportunities for criminal activity and promoting sense of healthy community.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Pierce county is extremely congested and needs bus service orting, Bonney lake, puyallup and sumner toward Seattle.
PIERCE COUNTY	Your average taxpayer cost per year is not realistic.
PIERCE COUNTY	You people are out of your minds. Maybe you don't think that \$50 billion is a lot of money, but I do. I am appalled that your proposed tax increases don't have an end date. Is this just so you can keep taxing and paying yourselves salaries that are out of line with the private sector? We have had one fiasco after another with various transit projects. Ever heard of Big Bertha? Do you have the faintest idea of the costs of running the public ferry system? Do you know what the heck has gone on with multiple DOT projects that are over budget and under performing?
PIERCE COUNTY	Please run the sounder more times a day and on weekends. Then people in the south end can come to Seattle and get home without impacting the traffic on the freeway.
PIERCE COUNTY	Extension of the Sounder southbound from Lakewood to DuPont would be extremely beneficial.
PIERCE COUNTY	It would be nice to ride the light rail on weekends to Seattle. In most large cities, they continue transit on weekends. Why not us?
PIERCE COUNTY	I think a 25 year plan is too long. Too many things can happen in that length of time. The projects should be voted on and completed in 8-10 year increments, not 25 years. I would vote for it if it was for 10 years, would not vote for it if it is for 25 years.
PIERCE COUNTY	50 billion in taxes is too much. I will not support it. Mass transit does not fit for me and my family.
PIERCE COUNTY	Without the infrastructure in place to support any of these proposals (adequate parking, frequency of service, total trip time investment ), nobody will use them except those that have to. Basically, if it's a hassle or makes the day much longer, it won't be appealing to the people. Whatever it is.
PIERCE COUNTY	I do not favor a property tax increase to pay for something I do not use or planned that many years out !
PIERCE COUNTY	Enough is enough already! Have you "great and wise" bureaucrats not nickel and dimed, or FLEECED residents enough? Letting people keep their money in their pocket is what spurs economic activity, NOT something as absurd as a ridiculously expensive light rail system. If congestion is your REAL concern then build more damn roads! It's far less expensive than this pie in the sky monstrous plan. If you want this then make the users of public transit pay for it with their fares. I for one am tired of paying for services I don't use. I'm tired of seeing half empty buses and rail cars already in use. Who's to say there won't be market driven innovations in transportation over the next 25 years that will render these types of projects obsolete? Go ask France about their Minitel boondoggle. The REAL bottom line is that you want to CONTROL the population. You won't be satisfied until the only people who will be able to own a car are rich elites (like yourselves) while the rest of us are subjected to a mediocre inefficient state run system only a Soviet could be proud of. Stop stealing from we who work the hardest to provide services for the laziest and least productive amongst us! You want more bike lanes? Charge cyclists a registration fee. You want more buses and rails? Increase the fares. Build roads. Leave us be. When you see a taxpayer you just see a large pink ceramic pig with a coin slot on it's back. Pathetic.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	The emphasis has always been on Seattle. I have been paying to Sound Transit for years and so far have received nothing in return. If you are going to emphasize Seattle as a priority, which you have been doing, then don't include us South Sounders in your levy. Let the Seattle area pay for it. They get all the benefits now.
PIERCE COUNTY	Bus and Transit service does not allow much of us South enders working in construction to utilize Mass Transit. The 5am Start times cuts it too close from Tacoma Dome Station to Downtown, unless the project I am on is closer. I typically work starting at 5am-2:30pm, or 6am-4pm, six days a week. My commute in is packed, but not too often is it stop and go. I currently work in Northgate, and it is stop and go from here to Mercer, and Boeing Field, all the way to Kent Des Moines Road, and then again, from HWY 18 to HWY 16 every day. I typically get home at 6pm, thanks to carpooling. I cannot afford to live in Seattle, thus why we commute, as so many others do to, LOL. Looking forward to the Future, just wish Bussing started earlier on the 590 route, and the site for my phone does not work well showing me the earliest time. Thanks and Good Luck!!!
PIERCE COUNTY	North pungent sound tax payers should pay more than those from the south. Tacoma development is 20 years the north sound. We pay for improvements and rarely receive benefits.
PIERCE COUNTY	I have never used sound transit or never will
PIERCE COUNTY	What about expanding the hours of operation>
PIERCE COUNTY	Please clearly address your disabled riders program and procedures for drivers. ST is the only transit system I use where drivers will not ask patrons to please move from seating meant for elderly and disabled riders and consistently tell me my only choices are to stand (I have a doctor's orders stating not to on buses but the driver says he doesn't care about that). I have had to sit on the floor between the seating meant for elderly and disabled riders before (it was both painful and demeaning). My family has attempted to get some support, response, anything from ST and we are told someone will call us back but then nothing happens. If a bus is full and I am unable to sit I cannot wait in the hopes that the next bus will have room as I'll be late for work. I end up having to get myself back to my cat at the parking garage and drive into Seattle. That means one more car in traffic. :(
PIERCE COUNTY	Light rail down the middle of the I5 corridor from Olympia to Everett would be great to see.
PIERCE COUNTY	1. Parking at Sounder stations is abysmal. Not enough capacity. Most days I take the bus, but when I have to drive, there is nowhere to park after the 4th train. 2. I am surprised there is no express bus from Auburn to downtown Seattle.
PIERCE COUNTY	Any transit project needs to be funded solely by those who use the system.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Of major concern in this proposal is the fact that those communities who most need the services will be - as is the usual case - the last to get them. Specifically, it applies to those communities in the South Sound region. The old "them that has, gets" philosophy is very much in play. The wealthier east side and west end suburbs of King County get the lion's share of service, and sooner, while the poor step-sister county to the south gets what's left, and by mid-century. Naturally this will elicit the notion that the first recipients will be better able to cough up the revenue required. In the meantime, the 167, 99, and I-5 corridor to the south, which is already a gridlocked nightmare, will become even more a parking lot. With regard to completion schedules, it is tragic that 160 years ago an entire transcontinental railroad system was completed with more primitive technology and in less time than a mere several tens of miles of system can be put in place today. Today's infants to thirty-somethings may benefit from this, but those forty years old and older probably won't live to see it completed. As selfish a notion as it is, most people very much dislike paying for something that will not benefit them at all.
PIERCE COUNTY	This is not so much about the ST3 plan and more about Pierce Transit in general. I would love to leave my car at home, but in order for me to get to the nearest Sounder station I still have to drive about 30 minutes depending on traffic. I live in Graham, and our communities out here get no bus connection at all. There is one line that runs from Spanaway, but it takes an hour and a half to get to TCC, and I already commute 2 hours a day from Lakewood. It would be great if there could be some express lines put in that would connect us to the Puyallup, Tacoma or Lakewood stations so we could truly leave our cars at home and not add to the traffic. Thank You. The UW station is great and shaves 1 hour off my daily commute.
PIERCE COUNTY	Anything that promotes transit access between Lakewood and other cities is a boon. Because Lakewood is an unincorporated area with mainly small businesses, any transit that helps move people in or out is highly desirable. Better connections between Tacoma and Seattle are welcome too!
PIERCE COUNTY	I just want to thank Sound Transit and say that I support everything. I spend half my time in Tacoma and half in Seattle, I don't drive, so I use Pierce, King, and Sound Transit systems. REGIONAL is best!
PIERCE COUNTY	I live in Graham. There is no bus service here thanks to Pierce Transit eliminating the bus route. I don't want to pay for King County to expand their services when there is no return for the south end of Pierce County.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	<p>Sound Transit has never completed a project on time or on budget and has continued to squander tax money in its never-ending agenda to create a transit system that fits neither the demographics nor the geography/typography of the Puget Sound region. The unelected transit board members remain tone-deaf to the wants and needs of the area's residents(except the agenda-driven social engineers) and they and their cronies are never held professionally, personally or economically responsible for their ineptitude, failed management and the never-ending costs to the taxpayers and citizens.</p> <p>Once (if ever) Sound Transit completes a project it has repeatedly made promises to finish on time and within budget based on the original plans and representations (not the ever-increasing 'cost projections' and 'postponed/re-analyzed time frames'), THEN and only then will they get support for new 'pie-in-the-sky' projects, proposed 'enhancements' or continued tax dollars. This ST3 is merely a reworked proposal for things promised decades ago for which millions of tax monies have been expended already and should have been up and running years ago (for the previously provided and spent taxpayer funding).</p> <p>Sound Transit trying to repackage prior 'promised projects' as something 'new and expanded' and at the same time demanding expanded taxpayer funding on a 'never ending' basis (no end date) is simply insulting and a further example of more 'just give us more and more and more of your money and we promise to give you 'something' in return 'sometime' (wink wink nudge nudge). The only ones benefiting from Sound Transit's expenditures for years and years are those directly on Sound Transit's payroll, those who are doling out taxpayer's funds and those who are connected or friendly enough to the Sound Transit insiders to be the favored recipients. The U.S. freeway system of over 40,000 miles was constructed in less time than Sound Transit has been draining our State's taxpayer's pockets in exchange for ever-changing promises and ever-increasing spending.</p>
PIERCE COUNTY	This is the biggest taxpayer rip off in Washington State and possibly in the country
PIERCE COUNTY	Moratorium on all new bike lanes. Small vans/buses with better coordination are much cheaper and much more flexible for changing areas of employment and population density. Light rail is too expensive and disruptive to existing populations and businesses. There should NOT be 3 person carpool lanes - only 2 person mandatory.
PIERCE COUNTY	For those of us near retirement we cannot afford all the tax increases. Instead of increasing sales tax and property taxes - tax those using the system.
PIERCE COUNTY	The amount of congestion this will reduced does not justify the cost to benefit ration that is asked of the tax base.
PIERCE COUNTY	Full steam ahead!
PIERCE COUNTY	The plan should look at the areas largest employers & put together a plan to move their employees to & from their workplace. If you could take 40%+ of Boeing traffic off the road, that would make a big impact.
PIERCE COUNTY	Stop wasting our money.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	To help with funding, consider a congestion charge toll. Drivers who clog the roads with their vehicles should be funding efforts to reduce the congestion.
PIERCE COUNTY	Have you considered that perhaps if we moved some jobs away from Seattle and into neighboring communities commute distance could be shortened. What if folks living in Sumner, Puyallup, Tacoma etc could all work there too. That coupled with good transportation systems would go a long ways toward alleviating traffic woes. Too many folks are commuting to far to get to work. Think smart density where people can truly work, live and play within a few miles of home.
PIERCE COUNTY	Taxpayers need some compensation or relief for shouldering so much of the cost of these transit projects that are many years out from being completed - what about providing free or greatly reduced-price ORCA cards for taxpayers or households (could be based on their tax contribution). These ORCA cards would be available to them immediately upon starting to pay these increased taxes. That will get people to start using transit more if they don't already, and as transit projects are completed they will be able to take advantage of the improved network. Sound Transit is asking a lot from taxpayers with ST3 - it needs to go both ways; there needs to be a shared investment in our future and I think an ORCA card program or something similar could really help with buy-in from taxpayers.
PIERCE COUNTY	Please do this fast, i think we need to follow San Frans strategy of expanding transit within the city, i would love to see the link rail connecting tacoma dome to tacoma community college and maybe expand further to titlow beach.
PIERCE COUNTY	Funding, especially state and federal is NOT guaranteed, but taxpayers would be on the hook for shortfalls. Taxpayers would be on the hook for paying all cost overruns, and there is NO enforceable spending ceiling. Outlying areas receive zero benefit for their additional taxes, which was why the tax boundary was repeatedly adjusted until it passed.  I would support this plan only if there was a mandatory-minimum sentence of ten years for all board members if any project is not completed on time and within budget, with and additional enhancement of five years mandatory for each million dollars of cost overrun.
PIERCE COUNTY	Too slow. The train to tacoma should be done in the next 7 years not 17
PIERCE COUNTY	Light rail would become more useful if bicycles could be carried.
PIERCE COUNTY	We South Sounders are tired of waiting. The #1 reason I would use Mas Transit is to go from Tacoma to the airport. And I have to wait another 17 years? Quit buying neighborhoods and use the right of way that exists. I remember using BART in 1980 and it was pretty dialed in. Portland the same. Why is it we are so far behind? We are all tired of waiting. I'm sure somewhere buried in the original proposal was Tacoma getting light rail to the airport long ago. But like everything the government does.....It all ends up being lip service.
PIERCE COUNTY	I think there should be a light rail system directly from Tacoma to Seattle.
PIERCE COUNTY	What ever it takes light rail should be extended to Olympia to the south and Bellingham North. Since I am 64, this whole process should not take as long as it is planned to. I will pay for this and may never be able to use it. Truly do not understand WHY this state does not pull from every resource possible to make this happen sooner than later.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	I used to take the Sounder to work and loved it. When I started working in Fife, using mass transit became impossible, so we bought a 2nd car.
PIERCE COUNTY	This is the plan that Puget Sound has been waiting for for years. Grand and visionary, this plan, if implemented, will make Seattle/Tacoma a world class city that others will look to emulate. Bravo! Now the hard part is convincing voters to invest in something that many will not be alive to see to completion. Thinking even further ahead, could we one day see Sounder train service to Olympia and Bellingham, and light rail to North Bend? Perhaps the Sounder train system could be eventually be retrofitted to become high speed rail connecting Olympia all the way to Bellingham/Vancouver.
PIERCE COUNTY	Parking at existing light rail facilities is woefully inadequate, I always resort to driving from Tacoma &/or Federal Way to Seattle because parking is just not available!! Sounder is too infrequent for anyone not "commuting" to work, many older South Sound residents would like opportunity to enjoy Pike Place Market, & all Seattle has to offer but Rapid Ride is our only option ... IF YOU CAN FIND A PLACE TO PARK YOUR CAR !! OH & I should mention NE Tacoma bus service to anywhere desirable or useful is FICTION.
PIERCE COUNTY	The project timeline should be quicker going South and more emphasis placed on building to the South than worrying about to much of the North since they already have enough options for getting around.
PIERCE COUNTY	I will campaign against this with all my efforts. Spend the money on roads, not trains because none of this will help the daily commute for all of us that won't be using this.
PIERCE COUNTY	Mass transit on all levels is a total failure. Need to dissolve all current transit plans and start over from square one. Sad to say the more "improvements" are made the worse it gets. Selecting improvements based on surveys and decisions of incompetent managers has not worked yet and never will.
PIERCE COUNTY	The only funding that ever seems to be planned for transit support and expansion is taxation. Unfortunately, there is never a really good approach to taxation that will not meet significant resistance, especially from those who perceive that they will not benefit from the expenditure of their funds. This resistance creates both costly delays and public anger (on both sides). More creativity in funding of public transit is desperately needed, whether that means expanding commercial funding (e.g., I would not mind catching the Allstate express bus to Tacoma or riding the Coca-Cola line into Seattle) or otherwise. And, naturally, maximally efficient use of funds is critical for project completion as well as public support.
PIERCE COUNTY	I strongly oppose investment in this 19 century invention to solve our traffic problems. Light rail is not the solution. New and innovative technology involving self driving cars is a more intelligent approach to this evolving problem. Investing in old technology such as a train is going to prove to be a waste of more tax payer dollars. Sound Transit has proven to be a ineffective solution to our transportation problems, wasting tax money and creating a system that only serves a very small percentage of the population. Continuing to sell this idea with inaccurate data and dishonest selling tactics is an irresponsible and dishonest practice. Please don't move forward on this project, it will be a total failure.
PIERCE COUNTY	We need light rail from Tacoma to Sea-Tac more than anything else

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	TAXING is not the correct method of funding. I would support bonding with users fees being the sole method of bond retirement.
PIERCE COUNTY	Projects should not be done at all! We all know what a drain the trams are on our economy and how ineffecient the system itself has become. They are in the way of our commuters and waste our money. Just fix the roads!
PIERCE COUNTY	money should not come from property taxes, everyone should help pay for it . . .
PIERCE COUNTY	Access and parking are major issues for those of us living in the South Sound area. I would use the Light Rail regularly if I could access it. Parking at Tukwila is filled on weekdays way too early for those of us who are retirees. More and better parking facilities need to be considered particularly at the further from Seattle city center stations. When I have accessed the Light Rail, I have found it to be a clean, safe and pleasant way to reach medical needs, museums, and shopping.
PIERCE COUNTY	Sound Transit has proven it cannot manage projects of this scale. Previous projects are billions over budget and years behind schedule all at the tax payers expense in addition there has been little impact to traffic congestion.  The money would be better spent on highway and bus improvements.
PIERCE COUNTY	Citizens across our region can see how badly transit is needed. But the one thing, in my opinion, that can hurt the plan is if Sound Transit staffs salaries soar above what the average citizen makes. I'm willing to be taxed more, but I don't want to see salaries get out of control. I also don't want to see contractors taking advantage of Sound Transit for these projects. Please address these issues during the expansion and retain our trust.
PIERCE COUNTY	I feel that one of the biggest helps with congestion in the Seattle area I see was not addressed is the short commuter train operating hours. I have ridden the sounder many times and feel if the train operated just a few hours longer per day, you could easily free up traffic on 167 highway.
PIERCE COUNTY	Being able to get from Tacoma to North Seattle reliably without being stuck in traffic is my desired outcome.
PIERCE COUNTY	I understand the emphasis on the northern area, but I am mainly concerned about the south sound. I don't see the point of paying an extra \$200 per year to expand the Sounder only to DuPont when you have so many commuters in the Tacoma area who are state employees commuting to Olympia/Tumwater. I stopped riding transit from Tacoma to Tumwater because it took too long; I would be willing to pay that amount if you were going to extend the Sounder to Tumwater.
PIERCE COUNTY	\$200 per year sounds like a lot at first, but it's cheaper than driving (gas, maintenance, etc.) and parking in Seattle.
PIERCE COUNTY	The cost of Sound Transit programs far exceeds comparable transit projects in other parts of the country. It is obvious that Sound Transit does not budget well and therefore they should not be allowed to waste anymore of our money. Most definitely not to add on additional over funded and expensive projects that will add further tax burdens to the citizenry.
PIERCE COUNTY	i personally don't think we can afford to wait 25 years to finish the proposed plan. costs will escalate and traffic is at near stand still levels now.
PIERCE COUNTY	Taxes are too high now for retirees. Enough already!
PIERCE COUNTY	Add Saturday and Sunday service to the Sounder train schedule.
PIERCE COUNTY	Not completed soon enough and it's silly to have light rail stations with inadequate parking i.e. Tukwila..

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Thank you for coming up with a really balanced plan to expand our transit around the Puget Sound. I hope that these new constructions will keep with nature, as is our WA pride to have plants and life incorporated into our stunning architecture. I see that this plan may cost us some money, but will benefit all communities with better transportation and create new jobs to fill these positions, as well as do the construction work required. Bravo!
PIERCE COUNTY	Frequent transit options between Tacoma and Puyallup is needed.
PIERCE COUNTY	These plans still do not connect Tacoma to other major areas north of here.
PIERCE COUNTY	Our state has never finished a project on time or at the proposed budget. It fails to ever do the right thing to really help our problems. This is a complete waste of our tax payer money and will not solve our problems. People just don't use it enough to justify this kind of expense.
PIERCE COUNTY	It shouldn't take so long. Common sense states 24 hour work on the system (including weekends) due to population growth and forecasted population growth. Wouldn't a "Monorail" system (which was discussed years ago) running from Olympia to Everett AND Everett to Olympia with the ONLY STOPS in Olympia, Tacoma, SeaTac, Seattle, and Everett make sense and whereby, those 5 stations would be the main hubs for the Puget Sound transit system? The monorail would be fast enough as well as ease traffic jams at the airport as well. Also some aspects of the transit system should be ran 24 hours - especially to and from the airport - directly into the departure/arrival terminal, centrally located between all the terminals.
PIERCE COUNTY	We would use the commuter train more frequently if there was a mid-day and early evening option, as not everyone commutes at the same times....
PIERCE COUNTY	When fares revenue grows to 90% of existing operating cost you may want to consider expanding the system. You have a Long Way to go. Those of us who do not use public transportation are growing weary of subsidizing other peoples rides.
PIERCE COUNTY	St3 draft plan Will Screw Business ALL OVER the Area! So Far You Transit People Have Given Everyone The Big Middle Finger, Like These Plans Came From GOD and You Don't Owe ANY Explanations or Do ANY Planning To Assist These PEOPLE to Stay IN Business! SHAME ON YOU!!!! These SAME People Help Pay For This Project, As Well as The People They Serve! They Assume The Waterfront Tunnel Fiasco is Number 1 Example of YOUR PLANNING! PISS-POOR! Great Ideas, Hopefully Adjusted As Timely Changes are Needed! GOOD LUCK!
PIERCE COUNTY	As a taxpayer, I am sick and tired of paying for programs that not one person in my home or even neighbors use. Raise the cost of the services to the people using them! If you want to help people, bring back the bus service for people in unincorporated pierce county. We have people walking long distances on the very narrow shoulders of the road because they have no other options.
PIERCE COUNTY	I'm just tired of taxes upon taxes without any relief in sight. I agree that transit is necessary, but show some real data that the system would actually pay for itself and not add more taxes to support it in the future. Please stop with continually adding taxes on top of existing taxes.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Buses and light rail are nothing more than an attempt to get me out of my car. This progressive utopian society the political elites want to build is a failed plan and it always will be. BUILD MORE ROADS! The economic engine of this society relies on roads, commerce relies on roads, millions of pounds of goods are transported via 18 wheeler on roads, not light rail and buses.  I could go on but I am sure this is like every other BS pie in the sky pipe dream, I will end up getting the bill.
PIERCE COUNTY	Those who are going to use it should be the ones to PAY for it.
PIERCE COUNTY	I have a carpool now from NE Tacoma to Renton. If only light rail were available, I would take it. I can get to work much faster by carpool
PIERCE COUNTY	I'm opposed to anything that raises my already too high property taxes!
PIERCE COUNTY	I was a regular Sounder passenger when I worked downtown, but I was fortunate enough to live within walking distance of the Puyallup station and to work within walking distance of King Street Station. I'm not sure how well you can encourage ridership if people's commutes are a multi-transfer ordeal.
PIERCE COUNTY	The faster Tacoma and Seattle are connected via Light Rail, the better! Get it done sooner than 17 years!
PIERCE COUNTY	Sound Transit has never completed a project on time. Never. Cost more than any other mass transit system than those who are the same size or larger. I am tired of paying for a system that offers me no value. I opposed any new funding.
PIERCE COUNTY	Parking is a huge problem at the Sounder South stations (Puyallup & Sumner). There would be a lot more incentive to take the train everyday if there were available parking spaces closer to the train station. The train should also run later in the mornings and later in the evenings.
PIERCE COUNTY	Parking at all stations needs to be expanded on.
PIERCE COUNTY	The proposed plan is absurdly expensive. The costs greatly exceeds the benefits.
PIERCE COUNTY	Thank you for all the hard work you are doing and for submitting this proposal for comments.
PIERCE COUNTY	The most effective way to induce people to use mass transit instead of driving is to make it more costly (both in time and money) for people to drive to work than to use rapid transit. The taxes listed seem to make it more costly to use rapid transit, which will likely result in LESS people using rapid transit. Rapid transit should be MORE convenient than driving. It is not more convenient to sit in a bus and have to transfer buses when you can drive point to point in the same amount of time. Though bus plans are cheaper and faster to implement, they are unlikely to encourage people to use mass transit instead of driving. The money should be used to improve train systems around Puget Sound. Adding buses will NOT reduce congestion on our roads.
PIERCE COUNTY	I have lived in the Tacoma area my whole life and felt that transportation issues should be improved here as well. A lot of focus is placed on Seattle and the North Sound when Tacoma traffic and the South Sound traffic is horrific as well. I would totally support and use mass transit if there was more of it in my area. Please don't forget those of us in the Tacoma area and the South Sound. The traffic here gets worse and worse on a yearly basis. Thank you!!!!
PIERCE COUNTY	Give me my money that I spent on taxi when last bus didn't show you legal gangsters! !!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Highways should generally be open to all traffic. Bus stops should not interfere with traffic flow. The technology of computerized self-driving vehicles is far superior to the plans you propose. Security is a major issue, and with the uncontrolled borders and mass importation of refugees that are not properly vetted, this issue will certainly only become more vexing.
PIERCE COUNTY	I'd like to see some Sounder trips to and from Seattle/Lakewood outside of commuter times of day. There are none now that fit this description.
PIERCE COUNTY	I would like to see the tacoma link connections done as one of the first projects. This area is in desperate need of help. I hate being stuck in traffic for over an hour each way, to and from Seattle
PIERCE COUNTY	I am new Tacoma Washington and live Lakewood. I am disabled with fixed income. Need to propose to keep bus passes permonth as rate is.
PIERCE COUNTY	We need pierce transit bus route one route longer over night . Peoplework for tacoma dome we need bus run longer
PIERCE COUNTY	With all the added taxes that the state of Washington charges on gasoline - why are these taxes put in the general fund, and not used exclusively for road repairs and adding lanes to the freeways? Not all trips can be accomplished on mass transit!
PIERCE COUNTY	Sorry I won't live long enough to see this happen in Lakewood.
PIERCE COUNTY	Please look into ways to make the construction quicker and less expensive.
PIERCE COUNTY	I love this entire proposal, my only concern is that the timeline seems slow considering the mass population influx the region is experiencing.  Also, please consider the region's seismological activity and plan for earthquake-proof infrastructure. I would strongly appreciate public acknowledgement of how this is being addressed in the final plan.
PIERCE COUNTY	With the amount of growth in the south end of King County in Federal Way, and the need for transportation in the South Sound for the JBLM base ---we have MASSIVE TRAFFIC now, why would anyone who can support --not want to get more cars off of the freeways and major. I have a job which requires me to commute from Lakewood to Fed Way, but I need my car to travel to 12 schools where I teach the blind in 10 schools. Even the blind need transportation. The plan looks reasonable now but of course, costs will go up, that is my concern.
PIERCE COUNTY	I'll vote no and all my friends will too. Property taxes to pay for transit is f ing wrong.
PIERCE COUNTY	I'm sick of seeing my taxes go up to pay for King County based projects, don't forget I still have to pay Priece Transit. Odds are I'll be dead before all of the projects are complete, stop trying to take my money. The are too many transit agencies in the Seattle metro area, all wanting to raise taxes on the citizens, there should only one transit agency like Denver with RTD or the DC metro area.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	We have a long way to go toward a sustainable, sane, place to live. \$50 billion (or \$200 per year per resident) is a drop in the bucket. If anything, more progressive taxes are better. Make wealthy families like mine (e.g. \$120,000+ gross) pay more.
PIERCE COUNTY	Ridership on the South line Sounder Train is currently far above what was estimated years ago. With increased ridership comes increased revenue. However despite having ridership increases above what was expected Sound Transit still seems to be lacking funds. I'm somewhat opposed to the \$200 per year because of the poor planning and 'lack of funds' currently despite increased Sounder ridership. Where is all the revenue from the increased ridership going?
PIERCE COUNTY	Build it in my lifetime.
PIERCE COUNTY	I've lived in the Puget Sound area since 2002. I relocated here from Houston, Texas. The comparison between the two urban areas is stark. Houston, with much greater population and much more traffic, does a much better job of planning and managing its traffic than does Seattle. I've grown fond of saying that in the Houston area, leaders project their vision twenty-five years into the future and begin activities focused on the future reality. In the Seattle area, the focus is on reacting to a present that has taken twenty-five years to develop. Seattle remains twenty-five years behind where it needs to be. It's not related to Sound Transit, but in a way, it is....SeaTac Airport is a facility limited by geography and demography. It's three runways are its maximum potential for air traffic. Every projection for the area indicates a continuing rapid growth in population. Such population growth implies a commensurate growth in air travel. At least as far as is publicly known, there is no plan for an additional commercial airport in the Seattle metro area. The upshot is that SeaTac will continue to become more "overstressed" in the future. The impact of this will extend directly to the ground transport in the area. Sound Transit appears to operate in a vacuum unto itself. While it may consider the impact of the overall regional transport challenges, it does not appear to be part of an integrated overall transportation scheme. Such a scheme would recognize that there are other elements of transportation that need to be coordinated with the Sound Transit plan. One of these would be to have a plan--at least twenty-five years into the future--for managing automobile traffic in the area. Altruistic projections based on the idea that people will become convinced that bicycles are the priority for future transport are not much in touch with reality. Alternatives to Interstate 5 for north-south traffic in the region need to be determined yesterday. So far as this resident knows, no such planning is currently being done. Finally, the current plan presumes that people like me have some need to get to Seattle. I don't. I avoid going there for many reasons, not the least of which is that every time that I go there, I feel that it is tantamount to taking my wallet and emptying its contents to the ground. I go to Seattle a couple of times a year...only when there's no option. The spending attendant to this plan will only worsen that situation.
PIERCE COUNTY	When will we have rail service from Tacoma to SeaTac Airport? I don't see it as one of the core pieces of this proposal. I think this investment is the most vital of all of the south sound improvements.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	There are no provisions other than bus service to the city of Renton. Renton next to Everett has one of the largest manufacturing concentration of people in the entire region and it was largely ignored. The commuter rail line supports Auburn and Kent well, but the corridor goes west before coming to the city. A link between the main line, Tukwila commuter rail station and Renton manufacturing center would be nice. Buses don't cut it.
PIERCE COUNTY	The greater Puget Sound region deserves the type of public transportation found in other great cities!
PIERCE COUNTY	Scrap the project the project
PIERCE COUNTY	all I've ever heard and seen is about Seattle. Nothing about Tacoma or south. Its like we don't even exist. I don't want to pay for Seattle. I live in the Tacoma area and want to pay for this area...NOT SEATTLE ONLY!!!! And so far its been all about Seattle.
PIERCE COUNTY	we are retired and will never use soundtransit let alone have to pay for it . we strongly oppose this project unless you can come up with a reasonable plan that would take the burden of ever rising property taxes that we can't control.
PIERCE COUNTY	Upgrade our freeways! Our region's development has been based on freeways, NOT mass transit. Get over it.
PIERCE COUNTY	No more taxes !
PIERCE COUNTY	Using rail is obsolete as all of the track that was laid in this area was removed years ago and to lay track is a waste of time and money. Concentrate on new technology and go forward. Electric buses came and went so today CNG is the fuel and you can change routes as needed to match demographics. This is nothing but another boondoggle at taxpayer expense with long term unaffordable costs.
PIERCE COUNTY	It seems like every time there is a proposal like this, the Seattle / projects in the north are always the first ones built / implemented. And, when cost overruns delays happen it seems like it is always the projects in the south that are delayed or eliminated. I am tired of paying for projects in the Seattle area when we have so many needs in the south Puget Sound area that aren't being addressed quickly enough. I will not support this proposal with my vote.
PIERCE COUNTY	Developing affordable mass transportation accessible by all is one of the most urgent needs in our area and throughout the country. The use of individual automobiles for transportation is not sustainable. We cannot afford it.
PIERCE COUNTY	Why don't you put the cost in terms of what it is going to cost a household or a family, with 2 or 3 vehicles? You downplay by saying 'average' resident... Most people in the district will pay LESS than average, and a few will pay a whole lot more than that. The car tabs alone will break most people... 1.1% of value...? You have to be frigging kidding me... Keep your liberal BS.. I'm changing my address to another county so I don't have to pay your [explicit].
PIERCE COUNTY	Sound Transit can't manage money they get. Sound Transit reset(s) equals over budget to me. I will never vote in favor of Sound Transit until everyone responsible for wasteful spending and poor planning is fired
PIERCE COUNTY	Light Rail to Snoqualmie pass.
PIERCE COUNTY	A clean sweep of the ST board. Get rid of all the career politicians. You know who you are.
PIERCE COUNTY	I am 80 years old living on a fixed income. \$200 dollars a year on top of school and fire dept levy's are a bit to much.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Railroad is very old technology. Kill it now and put it out of it's misery
PIERCE COUNTY	Taxing three counties to provide ninety percent of new service in only one county. Unfair taxes for the two counties.
PIERCE COUNTY	It's ridiculous to have a Sounder Station in downtown Puyallup and Sumner where parking is extremely limited. One station could have served both communities if it had been placed between the two towns where adequate space was available for parking and would have eliminated one stop, saving time and money. If this situation is indicative of ST3 planning, then I cannot support it until the most efficient plan is in place.
PIERCE COUNTY	As a former commuter on ST Express, I believe that speed (peoples travel time) is essential to the success of any transit system. If I can drive somewhere faster--I will drive. Light Rail is too slow to attract riders from Tacoma to Seattle. Think outside the box and consider much faster forms of transit. The rest of the world is way ahead of us in fast rail. I grew up in the Bay Area. Bart is packed because it is fast--they currently lament not making enough track ROW to add capacity and express trains. What ever we spend now will be in use for the next 100 years--we need to be reducing travel time, not relying on old technology that will be bypassed in the near future!
PIERCE COUNTY	Build a new bypass freeway around the congested areas. People will not leave their cars. Stop spending all of the money on mass transit. Stop trying to four runs people into mass transit. Only a small percentage of people want it.
PIERCE COUNTY	Most of these improvements are needed NOW. I will literally be dead by the time improvements come to Tacoma. Nobody wants to pay taxes but choking on traffic isn't desirable either. I will pay taxes for these project but will likely never benefit from them. We have all but given up going into Seattle because the traffic is impossible. These projects are essential. Go for it!
PIERCE COUNTY	Very few are currently using the light rails. Anyone with a car wants to use their car. You do not stop at the seven places I had to go to the other day. It's a mile just to get to a bus stop from my house. I can not walk that distance. I actually can only walk ten steps before having to rest and catch my breath. Cars are more convient. They are used as minny offices. Quit pouring our taxes into failed programs!
PIERCE COUNTY	I would increase my support of the plan if the Federal way extension of light rail was completed within 8 years
PIERCE COUNTY	I commute to Bellevue from Puyallup using the Sounder, express buses, and a carpool. It's not ideal, but the number one improvement for my commute every day would be more parking at the Puyallup or Sumner Sounder Stations.
PIERCE COUNTY	I strongly oppose any of my money being spent on transit I do not use or can use because it does not run near where I live or work! I should not have to pay the astronomical RTA tax fees implemented onto our vehicle tabs for something I can not use! I do not nor do I have the option to use transit to commute to work as there is no transit where I work or live! this will just impose more astronomical RTA fees or other fees I and others should not have to pay. STOP THE SPENDING
PIERCE COUNTY	Please consider the South Sound (Pierce County) as a TOP priority. Because more & more people can't afford to live north and are moving south for affordable lifestyles, they need the public transportation the most.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	<p>1. Charge commuters to park their cars in Sound Transit parking areas M-F from 7:00 a.m. until 6:00 p.m. Initially, I would encourage a modest charge to park at existing or proposed facilities. Over time, I would encourage Sound Transit to increase parking fees to reflect market rates. The purpose of the parking fees initially is to remind commuters that there is a cost to provide this "free" parking. Later, the parking fees may become a revenue source for Sound Transit and will hopefully encourage commuters to carpool, bus, bike, walk, etc to where they get onto Sound Transit.</p> <p>2. Accelerate the pace of buildout of ST3. I understand this is easy to say and super difficult to do but asking Puget Sound people to pay for services that are 25 years out is a daunting proposal.</p>
PIERCE COUNTY	I work 2nd shift, I would definitely use public transportation, if I was able to get back to Puyallup after my shift ends. so far it's not possible to do that.
PIERCE COUNTY	Please do not charge for parking at the Sounder Rail stations. Charging people to park does not increase the number of available parking spaces. It didn't work in Sumner. We need more parking spaces in Sumner and Puyallup.
PIERCE COUNTY	I want to be able to have fast dependable access to Seattle from Tacoma with a time table that makes it possible to enjoy the wonderful cultural and theater life of this city. This means being able to travel home at late hours. I-5 is a living hell and stops us from planning to travel to King county and further north, feel cut off from the rest of our state. The traffic log jam is destroying the quality of life we have treasured and now feel life is a California nightmare.
PIERCE COUNTY	Your past projects have proven that ST, esp. its light rail component, simply does not care about its impact on the communities it purports to "serve," nor about the concerns of its actual riders. The damage ST has done to the businesses and neighborhoods it has already expanded into, and its total denial of responsibility for that damage, proves that ST is the largest & least accountable semi-government agency in the entire region, concerned only with its own perpetuation and expansion. If I thought for an instant that these new projects would be built with any different levels of responsibility, to the affected communities or to the actual costs, I would probably support them. But I've seen first-hand that is only a dream. And btw, I rode ST's buses and trains regularly for over 15 years, commuting between Tacoma and Seattle. I will not offer another dime of my taxes to your "boondoggle" programs.
PIERCE COUNTY	Please extend Sounder service between Lakewood and downtown Seattle to times beyond commuter hours. I would like to use this service mid-day, in the evenings and on weekends. I think you would get a lot of ridership if you did this.
PIERCE COUNTY	I would use the sounder train on the weekends if it ran for tourism and shopping. Please can we add more travel on the weekends via the sounder?
PIERCE COUNTY	Should have started 25 years ago!!! Start now!!!
PIERCE COUNTY	Current RTA taxes must retire before any new ST3 taxes/fees be implemented.
PIERCE COUNTY	Where does all the gasoline taxes paid go to? Many citizens purchase 1000 gallons of gasoline per year - use our tax dollars for what they are intended first before asking for more dollars.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Because self-driving cars will be an important transportation component within 17-25 years, how will this interface with ST3? Perhaps it will reduce the need for parking garages close to trains. Will my Orca card work across all platforms? I would love to take a self-driving car service to Tacoma Link to Sea-Tac and would gladly pay \$20-15 for the privilege.
PIERCE COUNTY	As a resident of Dupont, I would be absolutely thrilled to use a light rail service to visit Tacoma, Seattle, and Bellevue for work or pleasure. Two hundred dollars annually per taxpayer is absolutely a worthwhile investment if it means that we can avoid the pollution, stress, and chaos of driving on I-5 north of JBLM altogether.
PIERCE COUNTY	More people would use Sounder trains IF: there was adequate parking, extended hours, better connections. Greater use of the train would reduce the need for light rail and buses over long distances as lengthy light rail takes too long and buses are greatly impacted by road traffic. I do not support expanding train service North of Seattle as that line is FREQUENTLY closed due to landslides.
PIERCE COUNTY	I would like to see commute rail expand to Olympia and with a shorter wait time connecting the South Sound lines to the North Sound lines (Everett, Lynnwood etc.)
PIERCE COUNTY	I WANT THE BILLIONAIRES AND MILLIONAIRES TO HAVE THE SAME PERCENTAGE OF THEIR INCOME TAXED AND GET RID OF THE FLAT REGRESSIVE TAX WHICH TAKES A HIGHER PERCENTAGE OF THE POOR AND MIDDLE CLASS ! WASHINGTON STATE HAS THE MOST UNFAIR, UNJUST TO THE POOR TAX REVENUE IN THE COUNTRY. THE BILLIONAIRES IN WASHINGTON GOT FILTHY RICH OFF THE WORKERS AND THEY HAVE A SOCIAL RESPONSIBILITY TO MAKE IT EASIER FOR THEIR EMPLOYEES TO GET TO WORK! I AM SICK AND TIRED OF THE RICH GETTING AWAY WITH GETTING ALL THESE TAX BREAKS AND OUR STATE AS A WHOLE SUFFERING! USE YOUR IMAGINATION AND GET A CAPITAL GAINS TAX OR A TAX BASED ON INCOME OTHER WISE THIS STATE WILL TURN INTO A THIRD WORLD OLIGARCHY!
PIERCE COUNTY	late night and weekend train and bus service should be available with safe areas for parking and walking to your car, police presence, lighting etc. Safe parking areas for commuters is a high priority.
PIERCE COUNTY	The funding for this project should only be raised by user taxes, do NOT fund this project by increases in Sales, Property, or Motor Vehicle taxes. Let those who use the systems PAY for the system and not have non users be the "golden calf" or "deep pockets" to pay for it. We have huge taxes now, do not increase them for what is seen as a "social engineering" project just so Seattle can have the Olympic games some day. Concentrate on improving the roads for all to use. I will be voting to reject the project and encouraging all to reject the project. [initials]
PIERCE COUNTY	I strongly appose any and all projects included in the ST3 draft plan!
PIERCE COUNTY	Sounder Trains should run all day and into the night. The limited hours don't work for many of us. The infrastructure is already in place and needs to be used to its full potential.
PIERCE COUNTY	I am a senior citizen who recently retired. I only travel north from Pierce County about twice a year. In the last week Tacoma increased their sales tax rate and my electric rates increased 5%. My wife and I cannot afford another \$400.00 per year in taxes for something that we won't use. You will force me out of my home. I strongly object to the TV advertisements that I seen from Sound Transit advertising new services. This is a total waste of MY money.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	<p>Do not ask " leading " questions in your impartial ( hah ) survey.                  Fill the seats on all the present lines, which were sold to the taxpayer as vital years ago. Again, fill the seats! Only ask for more when that happens. Taxpayers voted in on good faith, but the trust is broken. At the open houses, how many minutes out of the 120 will be for voter comment, and how many will be monopolized by transit " salesmen "?</p>
PIERCE COUNTY	<p>I applaud your efforts to get mass transit going in the Puget Sound Region. However; a couple of points, from my view...</p> <p>1) What is the goal? Are you trying to get commuters out of cars and onto trains? If so, why not design the system to travel N to S and E to W along the actual commuter corridors?. I don't feel that running people from the airport to downtown via the Rainier Valley accomplished as much as getting people from the Tacoma/Kent Valley areas to Seattle &amp; beyond.</p> <p>2) One of my pet peeves is why Sound Transit doesn't work with the Federal Government in getting "right of way access to run light link down and already existing transit corridor. To my "layman's" mind, it would seem quicker and less expensive to get the major N/S and E?W commuters to and from.</p> <p>As an example I look to the Chicago Blue Line"; getting people from the airport to downtown, and not trying to be a neighborhood transit system. Further, I don't recall ever hearing a the "Blue Line being delayed because someone turned left in front of the train causing delay to commuters.</p> <p>3) This survey seem somewhat superfluous as trying to prioritize some of the questions posed depends greatly on what phase(s) of the overall program gets completed accomplished first.</p> <p>Other than these thoughts, I wish you luck. Whether I fully agree with how you went about the process, at least you are doing something...</p>
PIERCE COUNTY	<p>Quit taxing me to death!!! The fact is these improvements will help a limited amount of people especially the light rail. How about add more lanes to the freeway. Now that's something I'd support.</p>
PIERCE COUNTY	<p>Sound Transit needs to finish projects planned for ST-2. Those of us who use the Auburn Parking Garage were very clearly promised by Sound Transit Staff that if we voted for ST-2, the second Auburn Parking Garage would be built. Not might be built, would be. WE ARE STILL WAITING! To add insult to injury, this year half of our parking spots in the existing garage will be turned into carpool only spots. In order to get a parking spot, I have steadily moved to Three trains earlier. City of Auburn has recently posted all street parking within walking distance 3 hour parking or less. I feel we are being forced to stop riding the train. Why?</p>
PIERCE COUNTY	<p>complete boondoggle</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	I "supposedly" live within the RTA taxing zone. Years ago we have a bus that came within about a mile of our home. That line was discontinued. Now the closest transportation is 5 miles away. None of the proposals will help my neighborhood in Graham at all, yet we have to pay for them. I think you should re-write the RTA boundaries to only include areas that are impacted by the proposed improvements so we are not paying for other people to use mass transit that is not available to us.
PIERCE COUNTY	As usual, empires in the future trump and obscure failings in the past and present. I would be *far more* impressed if the existing buses reliably ran on time and picked up waiting passengers, than any grandiose plans for expansion. But that doesn't concern you, because, after all, those who rely on the bus have nowhere else to turn to. So eff 'em.
PIERCE COUNTY	Your projects say nothing about running Sounder Trains more frequently between Dupont and Seattle. This was promised years ago. Now it isn't even in the plan.
PIERCE COUNTY	The Sound Transit Authority continually incurs cost overruns, and there should be a different entity in charge of this project.
PIERCE COUNTY	Parking so you can use the bus or train, the Tacoma Dome lot, SR512 lot are full too early for those of us that want to use SoundTransit in "off times" such as after 9AM weekdays. When Amtrak comes to Freight House Square, there will be NO parking.
PIERCE COUNTY	If you want a great transit system, have one that is available for everyone, all hours, not just for people who work M-F, 9-5 in the downtown Seattle area. I never use transit because it doesn't run 24 hours a day. There are many people who would like to be able to get places, to work, etc, who do not work in downtown Seattle, 9-5. Many people work swing and graveyard shift. Being able to take the rail or train to work and home, anytime day or night, is something that is needed. Until that happens I strongly oppose my tax dollars going to add services that I cannot ever use.
PIERCE COUNTY	Not proposed but important for the future of the region and moving people around is introducing something along the lines of bullet trains. Getting people moved at a significantly faster pace than could be done with other forms of transit or driving will increase ridership, particularly if convenient, clean, and reliable. It's a choice based upon economic theory. The more benefit one receives from an alternative, the more likely that alternative will be chosen. Bullet trains could move people around not just a region, but the state. Imagine an express train from Tacoma to Seattle that takes 20 minutes, or less. People will choose that option as it is a much faster alternative.
PIERCE COUNTY	FASTER !
PIERCE COUNTY	Stop being big-government worshipers and fire most at WDOT employees, eliminate all HOV lanes, forbid big truck on the roads or make them pay their fair share (\$450/gal fuel tax), and then reduce taxes. Also, increase the requirements to have a driver license to the point that the 50%+ of folks out there on the road who possess zero driving skills are taken off the road. If you do all the above mentioned things, the congestion will vanish. Make all buses and "transit" be self funding rather than point a gun at my head and steal my money to subsidize other people.
PIERCE COUNTY	Cost to much & takes to long to finish.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	It seems as if you are focusing more on the central and north sound areas and leaving the south sound out of the mix. One of the reasons I don't use transit is because it is not convenient where I live in Bonney Lake.
PIERCE COUNTY	We saw what happened to certain bus routes that were deleted due to the extension of light rail. These bus routes were paramount to most of us utilizing them. What will happen in the future to more bus routes as light rail is extended? Lots of complaints from commuters working Hutch Cancer Hospital, bus routes were removed! Not cool! Just one example! Too far to walk up hills utilizing light rail for us that can't walk great distances, especially up hill!
PIERCE COUNTY	It saddens me that a comprehensive plan was rejected so long ago. widening roads for more cars isn't the answer. there must be a strong and continuous communication plan to inform people of the reasons this is necessary. We don't want traffic like they have in the Bay Area. Mass transit is the key.
PIERCE COUNTY	\$200 a year sounds like a lot of money for each household. I am for providing alternatives to increased traffic congestion. I feel public transit also supports people of all income levels to reliable transportation. My household does not use public transit very often per year so the bill seems high to me but I realize that I live in a community and need to support all members.
PIERCE COUNTY	<ol style="list-style-type: none"> <li>1. There are numerous taxes in place that fund worthless projects which could easily be diverted to support better mass transit. This would lessen the burden on taxpayers.</li> <li>2. We have used rail from central areas to central areas on two continents and it has shown to be extremely effective for decades.</li> <li>3. The current system is worthless to us. The existing rail system goes to several of our destinations, but terminates quite a ways from us and we won't move North just to take advantage of the rail system.</li> </ol>
PIERCE COUNTY	<ol style="list-style-type: none"> <li>1. Europe, Canada and some major metroplexes in the USofA, all use light rail systems to connect towns to and throughout urban centers and countries to countries efficiently and effectively -- without costing an arm and a leg.</li> <li>2. Major tax reform and crackdowns on fraud will go a long way to decrease the overall costs of WADOT projects.</li> <li>3. the disconnectedness of the current system{s} preclude us from using the system at all. Check with California's systems.</li> </ol>
PIERCE COUNTY	Either provide better options to east Pierce County (Bonney Lake/Buckley) or remove us from the RTA
PIERCE COUNTY	Be honest with the voters about the cost of light rail vs. more buses.
PIERCE COUNTY	There are other solutions to the traffic issue. We could build more capacity on roads. People who don't like traffic could live near their job.
PIERCE COUNTY	Plan totally does not support any of my community or any of the areas that I would normally go to. This strictly supports Seattle activities only, Tacoma routes are limited anything south of Tacoma is irrelevant to this study and not even planned. The idea it would be 17 years before anything reaches the 98371 area is ridiculous. Olympia is no where in the plan.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	50 billion way to large for all tax payers which many non commuters will never use. Also we are here because commuters will not leave their cars, one car one person will not work any further. Bus transport will relieve many problems cheaply and efficiently, if routed directly to destinations no transfers. San Francisco had jitneys in the 1960's operated by private owners and worked very well and cheaply for local drop offs in the city proper. They ran without scheduled times like random taxis, and the operator absorbed all costs and licenses. This method would provide jobs for many people and no tax load on property owner- think about it!
PIERCE COUNTY	Endless tax! You have never completed a project on time or on budget. INCOMPETENT AND THIEVES!!!!
PIERCE COUNTY	More parking for the Sounder train and the light rails as most people are not close enough to walk to the transit stations.
PIERCE COUNTY	Sounder hours should be expanded to run all day and into the evening. South Sound projects should NOT be the last ones constructed!
PIERCE COUNTY	This is the biggest waste of money that I have seen in my lifetime. These services are used by a small minority of people. If you spend money on building and maintaining roads like you are supposed to, the majority of people would benefit.
PIERCE COUNTY	Why didn't we do this thirty years ago when it would have cost \$50 Million instead of \$50 Billion?
PIERCE COUNTY	Talk about taxation without representation! No! No! No! Why should I be forced to pay for something I will never use. Giving money to the incompetents who run this is ridiculous! Based on their history of managing transportation projects this will go way over budget, be completed way past the deadline, and be under used. Once again, No! No! No! But I doubt anyone will listen because this survey is just being used to sell this stupid plan.
PIERCE COUNTY	Generally, I'm OK with this plan, but let's not forget that people still like to drive their cars, and some have to drive their cars. All this money being spent on mass transit is not necessarily the wise route. We need several freeway improvements in the region. Let's not build mass transit so much and then discover that no matter good it is, people won't use is.
PIERCE COUNTY	Better coordination between modes heavy rail, light rail and bus
PIERCE COUNTY	Costs for the work are overly inflated because contractors have learned the hard way how difficult it is to work with Sound Transit. Sound Transit needs to swallow their ego, learn how other agencies administer contracts, and adopt some of the practices.
PIERCE COUNTY	I would like to see more runs of the Sounder train from Lakewood to Seattle. I would use it on the weekend or during the middle of the day, if it was available. Also on Friday afternoons I go from Lakewood to the University or Washington and return after 9:p.m. I would love to be able to make than trip easily on public transit.
PIERCE COUNTY	Are you NUTS? This proposal is absolutely crazy. I will be dead by the time any of this plan comes to be. I have no intention of burdening future generations with this tax. You have not proven the ability to complete tasks on time (or even close to on time) and within budget. This is GREEDY. Try working on improving traffic flow by increasing the number of lanes. We love our cars and have no intention of giving them up.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	The improvements to Tacoma/Federal Way are last and it seems as if the south end always gets the short end of the stick. As I am in my 60's, I am not going to benefit much, if at all, from any improvements by the time they are completed. I travel frequently and would love to take rapid transit to the airport. I love to use other cities' systems when I travel.
PIERCE COUNTY	Suggest a bicycle license/tax to pay for bike paths and increase transit user fees rather than increase vehicle taxes which should be used for road maintenance/improvements or property taxes which should be used for improving community services and security.
PIERCE COUNTY	I'd like to see more transit buses on the "back roads" in Graham/Puyallup/Sumner like we use to have. Walking five miles with kids to a bus is crazy
PIERCE COUNTY	Your survey is way too kong
PIERCE COUNTY	Rapid busses in South Sound that I see on I-5 and 167 are always empty, or only have a few riders on them and clog the freeways, cutting off traffic, changing lanes into carpool lanes, etc. These busses should immediately be removed from the current system and no plans for increasing these should be implemented as no one uses them. This was/is a bad decision and those responsible should be fired.
PIERCE COUNTY	Keep moving forward!!! Get it done!
PIERCE COUNTY	The tax plan is completely unbalanced. The plan to increase taxes on vehicle and home ownership is extremely unfair. Many who will use the system do not own motor vehicles or homes so they will not contribute as much. A much more logical solution will be to incorporate more into the sales tax and look for contributions from private businesses that will be benefit more from the system. Unfortunately this survey is not set up well for this issue. The way the question reads makes it sound like you disagree with the entire plan if you disagree with the way the funding is structured and in this case, that isn't true. In the end this entire plan would be much more efficient if it were to be turned over to private industry as opposed to a government bureaucracy.
PIERCE COUNTY	Routing the light rail up Rainier was stupid (mostly due to lack of parking). Don't repeat that stupidity elsewhere. Parking for train use is the most important rail effort you can do especially Tukwila Intl, Sumner, Puyallup and additions in Auburn and Kent. I would like a light rail stop with a bus pickup near 112th and E. Marginal.
PIERCE COUNTY	We WA residents pay the highest gas taxes in the nation. Yet, our politicians constantly take our money (those of us who drive) and lavish it on bike lanes, light rail, and other relatively useless projects. Rail projects are a HUGE waste of money. They are mostly underused (ride largely empty). They SOUND good on paper, but cost a bundle and do not actually do much to help congestion. Start by recognizing that Americans are not Europeans; we do not thrill to use public transport but want the freedom that our cars provide. IF you're going to build these projects, make them entirely paid BY the folks who will use them--not the rest of us who will never use them. THEN see how popular they are! Throw the ST3 draft plan out and start over with something that will actually meet the needs of those paying the bill!
PIERCE COUNTY	The plan should ensure an equitable distribution of funds between the geographic areas of the Puget Sound (i.e. South, North, Seattle, East).

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	run times should be around the clock. If you want people to ride you need around the clock. I work from 4am to 12:30pm there is no transit running for these times. In todays world we run around the clock.
PIERCE COUNTY	Are segregated bus lanes a part of the proposed BRT service? If not, I think the focus should be on light rail.
PIERCE COUNTY	I am not interested in bike paths or light rail. You can do away with all of them. I don't use either one and think they are a waste of time and money.
PIERCE COUNTY	<p>\$\$\$ Accountability. This is a much needed and far-reaching project. As a retired engineer type, I know two things: 1. My wife and I will not live long enough to enjoy the full benefits of our investment in this. 2. Strict accountability and transparency is needed to avoid/minimize waste/fraud/abuse that unfortunately occurs in major projects. Informed citizens make better partners and help maintain the needed trust. The news only reported tunnel problems with Bertha and I had to dig deep into Google to read about successes of Brenda &amp; Pamela, so I'd love to see a PR campaign to keep the progress &amp; milestones front &amp; center. So many feel the negative when stuck in traffic; keep us in the loop of what is being done and do NOT sugar-coat it. Otherwise, we only hear the Dori Monsons of talk radio distorting what is actually happening.</p> <p>Thank you for providing this survey; I was involved in city planning decades ago and feel your pain. Keep up the good work.</p>
PIERCE COUNTY	Currently it is cheaper for me to drive from Tacoma to the airport, I need incentive to use public transportation. Hearing that I'll be financially supporting it regardless of whether I use it does not seem fair based on its unaffordability.
PIERCE COUNTY	<p>I think one of the biggest issues to helping alleviate traffic issues on the highways is to get as many people off the highways as possible, including the busses. That means getting people the rail system, either the Sounder or light rail. The mass transit in this area is embarrassing, for as green as this community wants to be.</p> <p>I am also disappointed in how the southeast portions of the sound are being neglected. We do have the Sounder, but since it doesn't run all the time it's not a practical option for using it to go downtown to shop or hang out. So midday, evenings and weekends we have no rail transit to get downtown. (Yes, I understand there is transit on game days but I likely wouldn't use it then.)</p> <p>I also feel that parking at the transit facilities needs to be bigger a priority. I have driven to the Tukwila station numerous times at around 730am with the intention of riding the light rail downtown, but there is never any parking. Even by 730! (Unfortunately I am not able to arrive any earlier due to childcare.) I have been told by locals that airport employees will use the free lot and ride the rail back to the airport. If that is true, then doesn't that defeat the purpose of providing transit options to all people in order keep cars off the highways? In each instance, I have had to drive into downtown when I fully intended to use transit. It is very discouraging.</p> <p>Thank you for your time.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	An increase in property tax when I live in an area (South Hill) that sees zero benefit from any of these projects? No Thanks. An increase in the vehicle and sales tax I am fine with because I get benefit from the relief businesses and transport get from this congestion relief and hopefully that will be reflected in overall economic gains.
PIERCE COUNTY	We need more parking at Auburn and Kent stations and more daytime Sounder trains.
PIERCE COUNTY	I am happy with this plan and am excited to see how it improves regional transportation in the coming years. I would only stress that once these new lines are in place that their operating times are extended past 10pm. Many people (including myself) do not have the luxury of a 9-5 job and instead work late into the night and would like to take public transit to and from work. If the services stop running at 8pm then they are left stranded at work and are forced to use cars instead even if the transit lines exist.
PIERCE COUNTY	Impose additional taxes on companies along the development corridor that benefit from the ST3 project development.
PIERCE COUNTY	It would be great if all the money we already pay in taxes could be better utilized. I'm not willing to vote for anything that asks for more money out of my pocket.
PIERCE COUNTY	More light rail, fewer buses. Light rail is PERMANENT and operates even in ice/snow; carries more people.
PIERCE COUNTY	The plan execution of light rail is too far in the future as the housing costs have increased causing more middle class residents to move further north and further south with no reliable rapid transit and thus remain car dependent.
PIERCE COUNTY	As usual, everything benefits King County. People get it through your heads, life exists south in Pierce county. Yes, you have projects for Tacoma, Dupont, but they are way down the priority list. King county has adequate transportation and infrastructure to accommodate all those people who need to commute to work. The people in Pierce County pay taxes to subsidize all of pet projects of that do NOT in most instances benefit Pierce County residents. Most of the people who use the transportation resources do not own homes and therefore are not affected by the constant property tax increases. Try putting Pierce County projects first. Also, more people would use the train, light rail if there was infrastructure to get from the station to their work or home and vice versa. Take a page out of the efficient transportation systems in Europe. Example, how ridiculous is it that the train cannot go directly into SEATAC without everyone having to walk through the parking lot sleeping their luggage, kids, and folks. I understand the deal that was made with the taxi union to enable the train to go the SEATAC, but it's a total waste of money and totally for the benefit of the unions and again zippo for the people. Realize that property owners get taxed to death for other things too.
PIERCE COUNTY	A single \$50 BILLION project is a terrible idea.
PIERCE COUNTY	I strongly support the Phase 3 plan, but somehow the light rail to Everett and to Tacoma should be accomplished considerably faster than proposed.
PIERCE COUNTY	Do it. Do it all. All of this and more should have been completed 30-40 years ago. The Seattle metro area should be a standout leader among top US cities with regard to mass transit. Instead, it is shamefully behind the times. Rail systems work with tremendous efficiency throughout all of Europe and US cities like Wa DC. I applaud current efforts to expand Seattle metro area's mass transit system and hope to see this plan completed within my lifetime.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	One thing to keep in mind is ACCESS to these forms of transit, especially light rail. Our neighbors to the south in Portland experience high numbers of "free-riders" because there is not a checkpoint for commuters who have paid to ride the trains. Homeless persons use the trains as shelter, criminals even use the train as getaway transportation, and there are countless other issues. Ensuring that trains are monitored by some form of security and that transit platforms are enclosed and require pre-paid tickets to enter is extremely important to keep riders safe and free-loaders out. New York City and Washington D.C. both have systems like these that seem to be pretty effective.
PIERCE COUNTY	I would close Pierce Transit and eliminate all such bus/rail traffic. Bus drivers are inconsiderate and drive any way they choose. Today, I observed a bus in Lakewood run a red light just to beat traffic. In addition, the rail service is an incredible nuisance blocking traffic in areas it crosses public roadways. I will NEVER vote to support public transit let alone to be taxed to support its expansion.
PIERCE COUNTY	There is no point of adding more rail and buses without increasing the current parking situation. If I cant park, I cant ride the train. Fix that first then maybe you can have my money. For now I oppose.
PIERCE COUNTY	Get it done!
PIERCE COUNTY	We should have the link built mildly faster. And parking especially at the tukwilla station! Build a parking garage!
PIERCE COUNTY	Sound Transit AND WASHDOT need to first ensure that they are not wasting money on poorly designed projects. road repairs that do not last, poorly timed projects, (I wont dwell on state problems such as ferry boats that will not dock, generators that will not work, offramps to nowhere &tc.). When I feel that tax dollars are being wisely spent, I may reconsider my opposition to Sound Transit schemes. Furthermore, I feel that plans asking for money now to commence projects that will not be finished in my lifetime, and which will most likely cost a LOT more in 20 years than we project today, is foolishness.
PIERCE COUNTY	Mass transit needs to be separated from vehicular traffic. Does no good to be stuck with everyone else.  To lower costs and speed up activation, rubberized wheels should be considered. Same style cars as light rail currently has but with tires. This would also make it safer for cyclists who would no longer have to interact with rail tracks.
PIERCE COUNTY	I'm retired and living in Puyallup. We need the Sounder trains to run on weekends to Seattle and Tacoma and during the day and for sporting events including the UW and Professional teams. I agree with improvements but the scheduled times is critical for a mass supported transit system that will replace individual ownership of automobiles. I am also considering an Electric Vehicle but would ride the Sounder if it were available more often other than commuting hours.
PIERCE COUNTY	I understand that by doing all of these improvements that you are hoping for less of a need for parking at stations, but I think with how rural you are going, driving is a major concern as well as parking. I am sure that you have heard, but to be able to drive to Auburn Station and park, you must be there by 6:30am. I am a short commute away from Auburn and taking a bus would prolong my commute by over 45 minutes each way.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Build more trains and faster...I'm not supporting a 20 year project...I live in Tacoma...I would do more shopping in Seattle n surrounding areas if there was a reliable n consistent train...What we have now is not enough n not consistent..The runs are to infrealquent...How about a commuter train right down the center of I 5, with connections inland...That would be something with parking alongside highway...They do it in California, They do it in Canada...Keep is and easy to use and people will ride....
PIERCE COUNTY	Faster implementation!!
PIERCE COUNTY	Please look closer at orting
PIERCE COUNTY	The most important thing to do was not even listed -- increase the number of Sounder trains that run and extend the times of day they are available.
PIERCE COUNTY	The tax funding structure is flawed. Sales taxes are regressive. It should be funded by property and corporate taxes. Or an aggressively progressive state income tax.
PIERCE COUNTY	Build the spine from Tacoma to Everett before worrying about west Seattle. Ballard should also have a connection to UW along 45th or another corridor.
PIERCE COUNTY	I used transit in the Bay Area for eight years as a commuter and if I had my way I would use transit to commute here in the Puget Sound.
PIERCE COUNTY	Please spend the \$\$\$ to expand freeways and fix roads. I want to drive and not mass commute.
PIERCE COUNTY	Build it now, please. And, thank you.
PIERCE COUNTY	This plan should have been completed 25 years ago.
PIERCE COUNTY	Free fare for senior citizen
PIERCE COUNTY	The last major plan included light rail to Tacoma. This was scrapped for light rail to Bellevue. I commute daily from Tacoma to Tukwila - which is approx. an hour each way due to heavy traffic. I am in favor of public transport to alleviate the traffic. What's to say you will not be taking my money again with little in return?
PIERCE COUNTY	Please prioritize light rail in Tacoma and from Tacoma to Seattle. Please please please.
PIERCE COUNTY	fix rail is a total waste of tax payer money !!!!! the city of Tacoma got rid of fix rail in 1940's because buss could cover a lot more area & do it for a lot less money.
PIERCE COUNTY	Nearly all of the plan's offerings offer no help to me or any of my neighbors. I think the timeline/phase points are unrealistic, expensive and not helpful to areas outside of King County. Rail is a very expensive option, bus improvements give more bang for the buck.
PIERCE COUNTY	I realize there must be priorities, but I would love to see light rail expanded on the east side in a major way. I live in Auburn. Light rail would be a vast improvement over buses. It is a bit disappointing to see that there are no planned projects for light rail connecting Auburn to other areas (i.e....auburn to seatac airport).

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	I think that it's important to remove single occupancy motor vehicle traffic off of the highways for multiple reasons (CO2 emissions,deaths and injuries due to emissions and direct accidents,cars occupy too much space use too much infrastructure and by the mid 21st century there will be petroleum depletion issues).Motor Vehicles push destinations farther apart (twice as far) as over half of a cities land is used for parking or larger roads for personal vehicles. Better public transportation can better mitigate these problems
PIERCE COUNTY	After telecommuting for 9 years, I was forced to return to the office several days a few years ago. The stress of driving I-5 was affecting my health. After 1.5 years, I finally discovered a shuttle bus connection from the Kent rail station up to my office, so I'm now a regular South Sounder rider. 1) the connections from the rail stations to office locations is very poorly searchable on the Metro and your websites (e.g. Metro 913)...this keeps interested commuters from trying transit. 2) I have been thoroughly blown away by the volume of use on the Sounder trains. When I share this with family, friends and acquaintances, most had the strong impression that the Sounder trains are only lightly used...which is really not the case if you ask all the folks standing for their rides between Auburn and downtown. Making the public more aware of actual usage on existing runs should be part of your awareness campaign. 3) I had my friend at work convinced to start taking the train right up until he couldn't find ANY parking at the Puyallup station in the morning. The South-Hill bus service that meets the train in the afternoon needs to be doubled...I see people race to get on board. 4) I've enjoyed the train so much, I wanted to take my family up to Seattle on Saturday via the train, only to find it doesn't run. Has this option been explored from Lakewood to Seattle on Saturday? It would be nice to be able to ride up there and arrive around 10 a.m.
PIERCE COUNTY	One word... money!
PIERCE COUNTY	As retirees we cannot continue to afford tax increases resulting from schools, transit, and federal taxes. This year we were forced to withdraw our savings to pay tax bills. With taxes increasing more next year, we don't know how to survive. Our savings are gone and retirement income is fixed. Since we both have health issues the ability to return to work to remain in our home may be the only option. It seems entities think residents have an endless supply of money to support more taxes. That is just not the case. We need some controls and more cost effective plans
PIERCE COUNTY	We need more Sounder service- more trips throughout the day. More trips are more important than longer trains. There's a built in ridership market for Sounder south that's more impactful than light rail to Ballard or West Seattle, you're just not accessing it without more Sounder trips

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	1) Project completion timelines are too long and will not benefit many taxpayers in their lifetime. People cannot get to work NOW. 2) The biggest problem is getting from the north end or south end to either downtown Seattle or Bellevue. This should be the top priority. 2) Whatever the method of transportation, we need to get from point A to point B without having to transfer. 3) Any project moving people very short distances like from West Seattle to downtown Seattle appears frivolous and as if it's catering to big money, while normal people cannot take jobs in Seattle or Bellevue due to the impossible commute. 4) Add strict camera speed enforcement on I-5 so the changing electronic speed signs can actually work to improve traffic flow. Currently nobody adheres to the posted speed, so why have it? Proceeds from these fines could support this proposed project.
PIERCE COUNTY	Not sure why it cannot be built faster and for less.
PIERCE COUNTY	Maximize what you have now. Parking at Sounder stations and park & rides is inadequate. Trains don't run except very early and late-afternoon/early evening. Enhance security on buses, trains & parking lots.
PIERCE COUNTY	Tacoma should have light rail to airport. Why isn't transit to Olympia included?
PIERCE COUNTY	I don't like how the questions are bundled together. I don't think enhancing access for bike and pedestrians should be included with extending platforms for longer trains. What needs to be done regardless, and especially instead of light rail, is increased rail capacity with longer trains and more frequent times. There needs to be trains in the middle of the day and later in the evenings.
PIERCE COUNTY	Transportation from Federal Way to JBLM is a mess
PIERCE COUNTY	No more pricey "studies." It is apparent that traffic is horrible due to bad planning. Other cities have taken care of this many, many years ago. Stop stalling. I use a van pool 5 days a week and it works, takes my car off the road and saves me money.
PIERCE COUNTY	Too big a property tax increase.
PIERCE COUNTY	I'm all ready over taxed
PIERCE COUNTY	As I live and work in Pierce County, I would like to see my ST3 assessments going to projects locally; rather than having to wait 17 years before I could see any benefit. Tax King/Snohomish Counties for their portions, and Pierce County for its; I don't want to be responsible for both.
PIERCE COUNTY	Transit also includes cars but you have never proposed additional lanes. I will never support Sound Transit until you support an expansion of I-5.
PIERCE COUNTY	It is a great plan--ambitious, bold, and necessary
PIERCE COUNTY	It always feels like south King Co. and Pierce Co. get left behind yet we have lived here 30 years and have seen so much growth, as more and more people move south for more affordable housing. Please don't leave us behind!
PIERCE COUNTY	Get it done sooner than later
PIERCE COUNTY	Should have been done years ago.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	More attention should be paid to road conditions, new roads, safe parking at venues, to provide easier access to work and tourist sites. People own cars to enable transportation at their convenience, rather than wasting their day waiting for transportation. You cannot meet everyones schedule, and people do more than one chore on every trip. A car is the cheapest mode of travel in money and time. We need government to maintain and provide road access, and eliminate congestion as much as possible! Please build the cross-base highway ASAP to alleviate I-5 and community congestion.
PIERCE COUNTY	You won't get this done in 50 years at 5 times the budget. What accountability will there be for delays and cost overruns? Will people be fired? What about protection for the taxpayer? The last 25 years have proven beyond any doubt that the admin of this project is full of incompetence. This type of project along with building more roads should have been done by now. Good luck.
PIERCE COUNTY	Light Link service that connects Tacoma to Seattle is very important to me. As is the expansion of more bike friendly access across all cities. Look at Calgary or Ottawa for their bike plans. They have a path that is dedicated solely to bike and foot traffic that is a central hub for anywhere you want to go in the city. I would love a bike-only path in Tacoma as it is much, much safer to ride than sharing the streets with distracted drivers.
PIERCE COUNTY	Extending to JBLM and DuPont is the most important expansion you can do from Tacoma to DuPont would get more cars off the road then anything!!!! Please extend south!!!
PIERCE COUNTY	Do it now. Do it faster.
PIERCE COUNTY	AS A HOMEOWNER I AM TIRED OF PAYING FOR THESE THINGS. IF YOU WANT THEM SO MUCH MAKE THEM SELF SUFFICIENT.
PIERCE COUNTY	Busses on shoulders may have a more negative effect because they would remove areas for disabled cars. These cars would then cause massive traffic jams.
PIERCE COUNTY	We would use the sounder much more if the evening/night routes were extended so we can dinner then come home ( heading from seattle to tacoma in the evenings)
PIERCE COUNTY	Flexibility is the key to me. People that don't ride public transit (I do everyday) state that the complaint is the lack of flexibility in schedules. For example I take the sounder train everyday north into Seattle, south to Kent. But the trains only run during peak times, and the express buses only during peak times. So, if one has to leave mid-day, or is only working a partial shift, or just wants to go downtown to shop, you are stuck all day in Seattle, with only milk-run buses as an option to get home mid day. I would strongly suggest a mid day running of the train or express buses. Wouldn't even have to be all day, but provide a noon window of a couple of trains or express buses. I know that is a scheduling challenge, but I believe it would provide flexibility that currently doesn't exist and attract more riders.
PIERCE COUNTY	No Property Tax, or higher valued properties say 2 million and higher, or just commercial property tax.
PIERCE COUNTY	More focus on linking Pierce County to King County, mainly Tacoma to Seattle.
PIERCE COUNTY	My experience with light rail is very positive-smooth travel, seating, reliability of pick up and delivery. Rapid bus lines from Tacoma to Seattle didn't give me that same experience - no seats going home-less predictability as traffic affected buses and cars alike

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	One big freaking rip off, the entire transit system is a joke. Charge what it actually costs to ride it, if it costs the system 25 bucks for a sounder ride, charge those using it 25 bucks. (or whatever the charge would be). For tax dollars to be funding anyone to ride the transit system is a joke.
PIERCE COUNTY	no new taxes please
PIERCE COUNTY	SCRAP EVERYTHING GO BACK TO THE DRAWING BOARD SHOW SOME RESPECT TO PEOPLE WHO LIVE IN THE SOUT SOUND AND QUIT RUNNING EVERYTHING THROUGH SEATTLE. YOU SHOULD HAVE BUILT THE LIGHT RAIL DOWN THE MIDDLE OF I-5 WITH PARK AND RIDE STATIONS ON EITHER SIDED AND CATCH ESCALATORS DOWN TO THE PLATT FORM. SOUND TRANSIT BUSES OR ANY BUSES SHOULD BE TRAVELING FROM MCCHORD TO SEATTLE OR VICE VERSA THEN BRANCHED OUT EAST AND WEST. SO WHERE DOES OLYMPIA OUR STATE CAPITOL COME IN. PEOPLE IN SEATTLE SHOULD NOT BE RUNNING THINGS IN TACOMA, LAKEWOOD DUPOUNT OLYMPIA. YOU GUYS SUCK.PEOPLE IN THE SOUT SOUND DON'T EVEN LIKE GOING TO SEATTLE YOU CAN'T EVEN GO TO CANADA OR LYNDEN, BIRCH BAY ECT.BASIC YOU GUYS SUCK AND ARE MAKING IT WORSE
PIERCE COUNTY	This is unsound policy. Most people drive to work. This is not going to fix the congestion problems in our state. Cars will continue to be the main form of transportation to and from work. Moving cars and buses on the freeways should be the main priorities for a sound transportation policy. The state continues to allow building outside of he cities to bring in people, but does not take care of the infrastructure to handle all the new commuters. Trains and tunnels are an unsound fix for this problem, so is making lanes for the rich. Your policies are unsound.
PIERCE COUNTY	If they ride it, they should pay for it. It does not fit my work schedule or location, does not benefit my spouse in their work schedule or location so we would never use it. Plus we did not get what we were promised on ST1 or ST2 and that thereis no guarantee that ST3 will be fulfilled as promised. Costs are way too high for projects plus light rail cannot be strategically moved like bus routes can. I have payed enough over the years for this debacle and have received no benefit, direct or indirect, from it and refuse to support this anymore.
PIERCE COUNTY	The taxes that fund this should reflect the area that is getting the commuter help. For example, I live in University Place and would use the light rail in Lakewood/DuPount. I should then be taxed appropriately for that section of rail or when the development of that area comes up.
PIERCE COUNTY	Why is linking with Tacoma such a low priority? It is a MAJOR CITY, the Oakland to Seattle's San Francisco, and you're trying to prioritize Redmond and Tukwila?!?! I don't really see why South Sound voters should support a plan that so clearly sees them as second class citizens. If we weren't so busy building the strongest cluster of universities in the state while kicking the Port of Seattle's ass, we might have time to get genuinely angry about it.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	<p>Several comments:</p> <p>1) This will be useless unless using the transits being proposed is affordable and accessible. What we have now is neither. To try to take public transit to and from work or even the nearest park and ride, would take me \$10 and 2 hours to get to work--if I drive, it would take 45 minutes and less than a quarter tank of gas. I'm watching low income folks who need public transit to get to work and back, being squeezed out because the buses are raising their prices to the point where those people would not be able to afford it.</p> <p>2) Many of our bus stops have been deleted and/or the timing to meet up with another bus makes taking public transit too complicated and/or inconvenient. The proposal is nice and all good, but what plans are in place to maintain the efficiency of travel in the future.</p> <p>3) 8-25 years is a long time to complete these projects. Has there been a study done on not only the inflation of cost and the amount of people who will be using this transit system. We don't want to pay for a system that is outdated by the time it is built and/or is unable to accommodate the amount of people using the system.</p>
PIERCE COUNTY	All rail and light rail projects should be dropped from the plan. The plan should focus on improving bus capacity and speed.
PIERCE COUNTY	<p>The light rail to Federal Way or Tacoma needs to happen also parking is a huge issue</p> <p>I am handicapped and we rarely find the handicapped parking open at Twaqulia Station</p>
PIERCE COUNTY	<p>These plans require a state income tax...to raise the money required. Property taxes, sales tax, B&amp;O taxes are not sufficient as is to fund current state budgets, and those taxes ensure the public will reach a point of opposing all plans that clearly do not begin to tax people with incomes protected from or hidden from taxation, and instead place that burden on the remaining full time employed shrinking "middle income" residents of the state.</p> <p>The plans are needed, solely because more illegal, legal migrants and citizens will move here over time, benefitting mostly those whose incomes escape proportional taxation, while those who are burdened by added population, pay for it in property taxes.</p>
PIERCE COUNTY	Please explore extending the sounder train hours through the evening and weekends. I would take the train every time I went to Seattle if hours were longer.
PIERCE COUNTY	25 years is too long to wait for these proposed changes.
PIERCE COUNTY	Get the system built more rapidly....find the federal grant money or any other source. This can't wait!
PIERCE COUNTY	<p>I don't want to spend \$200 per person per year for changes that will never be used by anyone in my family due to lack of projects that are useable to me and the time line. If King county gets all the improvements now, let them pay for it. I just want to be able to use the sounder on a weekend to go to Seattle. Where is that in the plan? We don't have any bus service in my area and I don't see bus service helping anyone I know. I only can support the sounder going from as far south as possible, to the airport and on as far north as possible. Everything else is fluff.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	The current plan will take way too long for many of us to see the completion of projects. It should not take until 2044 for Tacoma to have light rail bisecting the city or connecting us to the airport. Even if it increases taxes in the short run, that is fine, so long as transit oriented projects in the south sound are actually built in a timely manner. Please consider a model that will build useful light rail lines in Tacoma in the near future.
PIERCE COUNTY	I Would really like to see strong consideration of rail service to Olympia.
PIERCE COUNTY	Sound transit has lousy service now. Your train from Tacoma to Seattle is slow, using the bus is faster and that not saying much. There is services to Tukwila but nothing to take you to the Airport. The bus drivers used on these runs are hit and miss. I was told if a bus gets on the freeway it is considered an express bus however the 574 sits in traffic like every other single car driver so what's the use. I can't support spending more money on services that are substandard at best. Also you always seem to focus on Seattle and the North end but you have a lot of commuters that come from the south end. 17 years.....really.
PIERCE COUNTY	I would support the cost If more people would be willing to use the services.
PIERCE COUNTY	You have been repeatedly informed the parking at the rail stations is insufficient. Fix it.  Trains are overcrowded, and often dangerously cluttered with bicycles impeding movement in the aisles. Fix it.
PIERCE COUNTY	This should have been started 30 years ago. We need more sounder transit during day, not just AM/PM north /south. The train should run during the day as well.
PIERCE COUNTY	why should i pay for transit trans and bus's when you took them away from graham wa. thats not right. i some times take the sounder to og to foot ball game. all the way in puyallup... still
PIERCE COUNTY	PLEASE expand light rail service to Tacoma and Everett. Non-highway/car transit expansion is the only way to sustainably grow commuter capacity without vastly increasing our carbon footprint. The recent growth in bus service utilization shows the willingness of Puget Sound workers and travelers to use public transportation, and this must be supported through smart growth that looks beyond buses. Sounder and light rail expansion of train size, operating hours and frequency will promote use of non-highway modes of transportation and help grow our economy. Given the opportunity for convenient transit services I would gladly switch from car commuting, as I found public transit highly effective and much less hassle than driving in other urban areas that I've lived.
PIERCE COUNTY	Access to the airport via light rail is my main desire. Also just seeing the traffic congestion makes me concerned for everyone!
PIERCE COUNTY	Too long to wait for improvements.
PIERCE COUNTY	Build link to Tacoma to airport then fan project out
PIERCE COUNTY	Need to start sooner the light rail to Tacoma. Instead of 17 years reduce it to 7 years.
PIERCE COUNTY	We as taxpayers pay too much and taxes already near 10% sales tax as well as high property tax, and excise tax on cars.....Enough is enough with misuse of taxpayers money.....Use tax payer money right.....

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Plan to very comprehensive, therefore too expensive. I would support putting more of the cost burden on users (somehow considering the needs of fairness to low-income users) and less on retired persons and non-users. Drop the property tax portion; increase the vehicle tax portion as an incentive to use transit over private vehicles.
PIERCE COUNTY	The south sound needs to be a stronger focus.
PIERCE COUNTY	I think that most people who work at JBLM don't live any farther north than Tacoma. I don't know that they would realistically ride the Sounder to go that short of a distance and realistically I think those people would keep driving their cars instead of using public transport. Don't think it's a priority to extend public transport there. Seems like it would be so much cheaper to focus on the faster bus routes via lane additions/improvements than to extend the light rail so far. Keep the light rail concentrated to the city of Seattle, which would be awesome, and just work on creating better, faster more reliable buses to and from the light rail to the connecting communities.
PIERCE COUNTY	My family has never been able to use LIGHT RAIL, and very rarely Sounder. We in Tacoma are still stuck using the buses that can't be fully used, and we are still paying the light rail RTA tax since early 90's, when we were to have Light Rail, here in Tacoma. RTA Tax is still being collected! What happened to our rail. Guess it went to North and above from SEATTLE! Hope all those that have used light rail in Tacoma enjoy their short ride. All we get is the bill, still paying. What a ripoff for Us and those who live South of Federal Way. Neither my wife or myself, WILL NOT VOTE FOR any more funds for SEATTLE!
PIERCE COUNTY	Why is it so difficult to get rail transportation from Puyallup to Redmond? I would need this 2-3 months out of the year!
PIERCE COUNTY	Paint more bike lanes and connect bike routes.
PIERCE COUNTY	Would use transportation from Tacoma to airport. The pay off for Tacoma is too far in the distance. Seattle and King County have seen all of the benefit. I am unlikely to support this until I see a breakdown of what was accomplished in detail from the previous transportation bond. Would like to see what was 'promised' versus what was provided.
PIERCE COUNTY	Funding proposal relies too heavily on new taxes.
PIERCE COUNTY	Pierce County, in particular Bonney Lake, is lacking in public transportation.
PIERCE COUNTY	Nothing to provide transportation options for East Pierce County communities of Bonneylake, Buckley and Orting.
PIERCE COUNTY	It needs to be done without increasing taxes. Tired of people coming up with these ideas and always want more in taxes. People cannot afford more and more taxes. Look at the number of families losing their homes. It has to stop.
PIERCE COUNTY	i commute from fox island area to downtown gig harbor.. I have never ridden a bus or light rail in my life.
PIERCE COUNTY	These plans come at to high of cost to the non-transit rider. You need to push more of the cost on the the users of transit. Adding costs the vehicle registration will not provide the long term money needed. As vehicle registration decrease your revenue decreases. ST3 is a complete waste of tax payer money!
PIERCE COUNTY	Where is all the toll money going, 25 years seem a bit ridiculous, Boston did it with snow in way less time. But highly needed at jblm.
PIERCE COUNTY	Sounder should run all day!
PIERCE COUNTY	I need options to Issaquah asap

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	The time lines are too long for projects the region needs transportation solutions now not 10 to 20 years from now. Be innovative, find cost effective solutions for transportation that can provide value sooner rather than later.
PIERCE COUNTY	Too high an impact on property taxes
PIERCE COUNTY	There needs to be an increase of the quality, quantity, number of routes and availability of Para-transit.
PIERCE COUNTY	It's about time! Increased transit increases jobs, tourism, quality of life, increased family time.
PIERCE COUNTY	Pierce County and the South Sound tend to be overlooked. If we're expected to pay the same to support transit, priorities need to shift to address the areas equally. Tacoma ought to not be an afterthought. I suppose connecting Gig Harbor is too much to ask...?
PIERCE COUNTY	We need to be able to move people from where they are to where they need to be. We can not afford to wait. Now that my employer is supporting employees using the whole public transit system I can see myself using the system more that I currently do.
PIERCE COUNTY	With these improvements I would love to see expanded hours of operation - especially with the Train and Light Rail options. My family would opt to ride the train or light rail to Seattle vs drive, unfortunately the hours do not usually line up with when we leave for Seattle.
PIERCE COUNTY	I ride the Sounder from Puyallup to Tukwila 4 days a week. It would be great if it ran midday, even one or two times.
PIERCE COUNTY	You expect people in Pierce County to pay, but all the money is getting sucked up into the Seattle area. Go in a straight line between Seattle and cities to the North and to the South, but don't waste all the money on spurs until you have a usable commuter rail line.
PIERCE COUNTY	Management needs to cut the budgets to complete as many projects as possible with minimum expenses. Drop all high cost options and work harder to find economical solutions to the transit problems. Always increasing taxes to improve a system seems like a bad plan, Better utilization of existing resources seems like a better way to go for everyone.
PIERCE COUNTY	We need to cut the projects completion dates by at least half the time. People are not likely to pay that extra taxes if they may no longer be alive to benefit from it. They are hefty taxes too.

PIERCE COUNTY	<p>Living in East Pierce county I use to be able to use ST to get to work but after the PEOPLE of Pierce county voted down a tax increase for Buses 7-8 years back; and the main areas impacted when routes were eliminated were those in Eastern Pierce county -- we are paying for ST as well as for Pierce County Transit -- You now want to add bus rapid transit (BRT) projects to offset the taxes they (Pierce county) did not receive? I say not... The voters later learned that the Pierce Transit was still making a profit with the routes cut and yet they have not brought routes back -- I cannot see adding their routes to the +\$25 billion being asked -- ALSO -- when ST originally setup there was to be a station at South end of Boeing Field - as Boeing left the area - HQ - that station never materialized and when I use to take ST to Tukwila I would have to catch a vanpool to get to work as the buses were running once or twice a day -- I spent more taking ST than driving and so I am back to driving --- IF ST would have operated like a true light rail system - running every 30 minutes, people may have taken the train -- BUT the logistics of parking was never thought out - ST thought people would ride the bus to work (REMEMBER - East Pierce County had bus routes ELIMINATED) -- Yet if parking had been in place for hundreds of vehicles then it would attract more people -- ALSO -- Van Lierops offered their land to ST for a station but politics got involved and a station at Sumner and Puyallup cost \$\$\$\$ when farmers were offering land for free -- Sorry but I cannot support this effort... If ST had been designed as it originally was thought of in the 1960's the tracks would have followed I-5 - with offshoots to main roads and locations (Why was Southcenter left out?) allowing people the ease of using the train and not having to switch numerous times... With the Overpass being closed in the future I see that the SOUTH end will be neglected in order to move people from North of Seattle more quickly even though the South rarely has its' rail system closed after heavy downpours.</p>
PIERCE COUNTY	<p>Why all this investment when current Sounder trains run for such a short period in the day. Many many people would prefer to travel from the Tacoma area to Seattle on Sounder trains and avoid crowded buses and stop go traffic. I have traveled a lot and never encountered a rail service so poorly scheduled and under used. It must also be possible to run smaller self purpelled trains on this line but my guess is riders would build up quickly.</p>
PIERCE COUNTY	<p>The plan has my potential commute option coming up 2 years after I retire :(</p>
PIERCE COUNTY	<p>Need more service to Olympia.</p>
PIERCE COUNTY	<p>Stop talking about it and just DO something. Connect the cities in which we live with the cities in where we work. Make Washington an easier place to live.</p>
PIERCE COUNTY	<p>I think the only way any additional rail or bus system should be put into effect is if the rider themselves pays for the whole thing. I will never ride a bus because it's not safe with all the transient and others the regularly ride. Also, I can't bring my dogs, I'm not going to a specific spot that the bus goes and don't want to have to carry anything I might buy onto a bus or train. I don't want to pay for others or for an empty train. \$200 a year is freaking ridiculous when no one will widen the freeways and if they do there is a toll or more freaking taxes. Use the stupid ridiculous Marijuana revenue that you so love. Since a bunch of lazy pot heads is what will be riding the bus or train. Your encouraging laziness and decency in this state. It's a sad sad sad world we live in now and I'm sick of paying to many taxes for a bunch of beaurcrats to give themselves a raise. Need I go on? I think you get my drift. NO RAIL NO MORE WE NEED MORE FREEWAYS!!!!!!!!!!!!!!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Projects should be prioritized by ridership numbers on busses first. The higher the ridership should get light rail first. Ballard / west Seattle should be built first.
PIERCE COUNTY	Tacoma needs light rail ASAP! Thank you.
PIERCE COUNTY	Why so long? Our infrastructure cannot handle the traffic we have NOW, and the Seattle Metro area is one of the fastest growing in the country. 22 years is WAY too long!
PIERCE COUNTY	Improve roads. Cars are the only necessity.
PIERCE COUNTY	Our region is in dire need of a more extensive and sophisticated regional transit system. The highways currently do a poor job with the current population in terms of capacity, not to mention road quality; with the current population expansion we need to have other, more extensive and more frequent options for commuters. As Seattle continues to boom and the housing market continues to out-price average citizens, the population of the outlying areas will continue to grow, and it is in our interest to keep people off the highways for safety and for quality of life.
PIERCE COUNTY	Stop increasing property taxes! Most users of mass transit don't own homes. Increase fares and make the users pay for it. I wouldn't be opposed to a small increase on car tabs.
PIERCE COUNTY	When will existing roadways and signage be improved? As an example.. State Highway 161 through South Hill in Puyallup WA. Also many intersections have either missing, faded, blocked or very small signs that are very hard to read. A good example is the major intersection just before you go over the bridge to go to Destination Harley in Tacoma. No where in that busy intersection is there a sign telling you where the hell you are. How stupid is that?
PIERCE COUNTY	I will be dead before this is completed. Should have been done years ago.
PIERCE COUNTY	The sounder needs to operate longer hours so it is actually accessible for inland folks to make it to seattle/downtown during the evening
PIERCE COUNTY	Quit focusing so much on King County other counties that will pay are not getting a fair share
PIERCE COUNTY	Parking at Sound Transit lots is at a critical level. I don't know how anyone trying to catch anything after the second A.M. train can find parking. I live in an area where there are no buses going to the station so have no choice except to drive. I hope parking is addressed sooner rather than later.  Thank You
PIERCE COUNTY	Light rail is an expensive debacle! Worse, funds were diverted illegally from road funds to pay for it! See WA constitution for clarification! I am totally against subsidizing public transport in any way. People who use it should be paying for the costs! As it is busses use infrastructure paid for out of the road fund.  When demand shifts you cannot shift a railway but you can easily change a bus route.  Also, you should really try double decker busses like they have in london, they take up a lot less space at the stop, and in storage.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	There is no mention of extended bus service in the Puyallup-Graham-orting-sumner area. This is the greatest need. East Pierce is cut off from transit service. Timeline is way too far out for needed use now. More buses and routes would solve that problem in a reasonable time frame. Pierce County should not be fitting the bill for King and Snohomish counties.
PIERCE COUNTY	I don't want to pay any more taxes!!
PIERCE COUNTY	I don't understand why the I-5 corridor is not being used as a major conduit on which light rail can be built (e.g., elevated or median strip).
PIERCE COUNTY	Many times we've turned away because of no parking. Please make parking available at all stops.
PIERCE COUNTY	We have to drive from Buckley and would love to take light rail from Tukwila, but too often we can't find a place to park.
PIERCE COUNTY	Build roads
PIERCE COUNTY	Light rail is MUCH MUCH TOO EXPENSIV for what it provides. If it cannot financialy support itsel we should NOT SUPPORT this mass transent foolishness.
PIERCE COUNTY	You guys have run a boondoggle with all your little cronies and wasted previous dollars promised for one thing but never done, lied, and are corrupt
PIERCE COUNTY	light rail is fixed and not able to adapt to changes in the economy in the region without major spending on new projects. Sound transit has not delivered on past projects on time or within budget by ANY stretch of the imagination. Why should we trust you now???
PIERCE COUNTY	Need to cut construction costs, maintain what you have now and in the future. Emphasis on maintenance and upkeep of real property, equipment and transport has been overlooked or underestimated. Building must be built on a longevity, and maintenance view to save cost and reduce the necessity to rebuild and repair.
PIERCE COUNTY	Make the users of the system pay for a much larger share of the cost. The percentage of transportation dollars spent on mass transit is way too high considering the number of people it serves. A larger percentage of dollars needs to be spent on EXPANDING road infrastructure and I don't mean some tunneling boondoggle. We are way behind other states in expanding our road infrastructure. It doesn't appear the people making these decisions "get it" and keep pushing this transit expansion and making those of us who will never use it pay for it. I value my time way to much to be herded onto mass transit and tripling my commute time.
PIERCE COUNTY	Public transportation should become self-supporting via fares at least to the extent that personally owned vehicles are self-supporting due to gas taxes and licensing and purchase taxes. Personally owned vehicle taxes on fuel and plates should not subsidize public transportation

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	I've always felt that limited parking at stations is a strong deterrent to using transit, especially Link & Sounder (vs buses/park n rides). My experience with commuting via Link is at the Tukwila Intl'l Blvd Station and with the Sounder from Puyallup or Tacoma. I've never had parking issues in Tacoma, but have found that I have to be at Puyallup Station probably about 5:30, or 6 at the very latest, to park anywhere near the station. I live on South Hill, and a commute that involves driving to a park n ride, taking a bus to the station, taking the Sounder into Seattle, and then bus/Link into Downtown.... Gads, cumbersome to say the least. 7:00 a.m. used to be the cut-off to get a parking spot at the Tukwila Link Station. Now if I get there past 6:30, chances are excellent that there will be no room in the lot. So, longer platforms to support longer trains implies, to me, MORE NEED FOR MORE PARKING.
PIERCE COUNTY	None of the capital improvements mean a thing unless people can ride them when they need them. If a person cannot get home from work taking the same transportation they took to work, then what good is it to have that transportation available at all?
PIERCE COUNTY	Light rail needs to go from Tacoma to the Airport! Commuter Rail needs to extend to DuPont. Consider other exclusive pr non sysytem connecting lihht rail projetcs in other high traffic Pierce County areas like Puyallup and Graham.
PIERCE COUNTY	As many have said THE TIMELINE IS TOO SLOW!
PIERCE COUNTY	The time line is far too extended. We need these projects to be completed far soon, even given the realities associated with such an expansion. 25 years is totally unacceptable.
PIERCE COUNTY	I would like to see a full schedule on the train from Tacoma to Seattle, with light rail connections from downtown Seattle to the East Side. Now it is a commuting nightmare to get from Tacoma to Seattle really at any time of day. We need serious mass transit here, like they have in NY.
PIERCE COUNTY	Projects should be built and run cost effectively with Transportation actually being the goal.
PIERCE COUNTY	Projects that support working poor access to bus and light rail to work
PIERCE COUNTY	This should have been done years ago when costs were not nearly what they are today.
PIERCE COUNTY	The system is unwieldy. Each city needs to step up with light rail connections to these regional projects for them to be used properly. If I have to either, drive across town and pay to park, or spend 1.5-2 hours getting there on public transit in order to use the system, there is something wrong. Sad to say, but It needs to be lazy/idiot proof.
PIERCE COUNTY	Increase frequency of existing light rail from Tacoma to Seattle, allowing for mid-day travel.
PIERCE COUNTY	Stop this ridiculous waste of money it's the biggest joke in the world

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	I don't feel I should have to pay an RTA Tax for a system I don't use. If I used it I would expect to pay for it with higher fees. It is bad enough you did away with using Transfer to get more money. I already pay a RTA tax and work where it is of no use to me. Now I have to pay for a Ferry system that I don't use either. Why should I a Tax payer have to keep helping everyone else. It is there choice to ride the bus, train or ferry. Just like it would be my choice let the riders pay an extra 50 cents both ways that is an extra 5 dollars a day times 48 weeks this is a whopping 240 a year extra times number of riders. If you have as many riders as you claim that would overfill your pockets. The same goes for the ferry system they can do the same thing. I would pay 5 dollars to ride to Seattle and 5 dollars back as I only do it a couple times a year.
PIERCE COUNTY	An additional sales tax for road usage for high end high gas consumption cars (just a little).  Also, most importantly a gas tax rather than a property tax. The property tax should be added to apartment buildings with more than 6 units and to commercial real estate buildings that have more than 100 employees. Not residential homes. And factories with parking for more than 100 employees and visitors - ie, trucking, warehousing.
PIERCE COUNTY	I understand the importance of BRT, but light rail is a priority. I used to live in Portland, OR, and while I used the buses a lot, I switched to the MAX once it reached my area, and used it far more extensively.
PIERCE COUNTY	This project is great but the timeline is too long! Buses on roads experience the same mess as cars unless you develop bus lanes and other on/off ramps for them. Look at NJ transit. Light rail and mass transit is so over due in this area! The developers have come in increased density, made their profits and skip town. What happened to impact fees for them??? The taxpayers can only keep paying and paying. What a racket!
PIERCE COUNTY	It is hard to get behind something I will never be able to use. As far as the timeline, I will probably be dead before I can use it to any degree. I live in Sumner and would like to be able to go to Seattle or visit my family in the Marysville/Arlington area. I would love to be able to use the system but I can't. The only thing that comes out here is the Sounder and it only runs about 40 hours a week and can only get me as far as Seattle even though the lines run from Tacoma to Everett. The Sounder should run 24/7. The lines and trains are already there why not use them NOW to help people get around. Based on the past and the future plans I have seen, I do not have confidence that my money will be spent in the best way for all citizens to support this.
PIERCE COUNTY	To much money for value received, not enough oversight. to easy to waste tax payers money without having to be accountable to the people whose money you are spending

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Survey comment: My biggest interest is in light rail between SeaTac airport and TDome. The survey choices for this are confusing. In question #5, the answer is: BOTH "Kent/Des Moines to Federal Way Transit Center", and "Federal Way Transit Center to Tacoma Dome". In question #7, these choices have been collapsed into "Kent/Des Moines to Tacoma Dome light rail". To be consistent with the map of projects, "Kent/Des Moines" should be called "Des Moines", otherwise it can be confused with Sounder Rail service in Kent. This may confuse other survey respondents as well.
PIERCE COUNTY	I dream of light rail from the airport to Tacoma Dome station.
PIERCE COUNTY	Hurry up. Just make it happen.
PIERCE COUNTY	I will not strongly support anything that doesn't involve prioritizing light rail to Tacoma, 17 years to accomplish that is ridiculous!
PIERCE COUNTY	I do not take transit now as I am able to telecommute. Before that, I took the Sounded into Seattle for 10 years from it's inception. Best way to go. Now I ride light link into Seattle instead of driving
PIERCE COUNTY	Hong Kong built an island, the largest airport in the world, a free way, suspension bridge, a tunnel and all in 5 years. Why is this taking so long besides it being in Seattle, who has about the worst record for transportation programs in the country?
PIERCE COUNTY	I am frustrated that I am in the regional tax zone to pay for transit yet we have to walk or drive several miles from our home to access a bus. There was a bus stop on my block when I bought my home which was a major deciding factor. It has been removed. I realize this is a Pierce Transit issue, not Sound Transit, but the impact is significant for my family. What can be done to improve getting people to the trains??? Thanks!
PIERCE COUNTY	Need to put in a stop in Milton for the rail!
PIERCE COUNTY	In my opinion, light rail and buses are good to have but they don't effectively reduce traffic congestion. We've spent billions and traffic still doesn't flow. Maybe its time to add general purpose lanes and program traffic lights so that they don't intentionally impede traffic flow. I would happily pay for that.
PIERCE COUNTY	It needs to be completed more quickly
PIERCE COUNTY	I oppose the plan only because 17 years is far too long to have to continue to rely on I-5 to get from Tacoma anywhere North! You are talking 2033 at the earliest!! You should push south and north of Seattle ASAP! I-5 south has been expanded as much as possible -there is no more room to add more lanes, no shoulders to drive on...17 years of continued growth south of Seattle means more and more cars on an already unreliable and overcrowded freeway. Buses are not the answer!
PIERCE COUNTY	Needs to be a good plan when a train has to be stopped for any extended length for emergencies. Not just for Seattle commuters, people going to other places need a good back up plan. The train hitting various things (people and cars) has made me late numerous times and makes it so I can not use this if it causes me to get reprimanded for being late.
PIERCE COUNTY	Have services that serve communities in the 167 corridor and south including Bonney Lake

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	I don't use transit because I live only 4 miles from where I work. My wife uses a bus to get into downtown Seattle often times for work. We would both use busses and transit more if the fares were high enough to keep stinking (yes they smell bad) homeless off the system and away from the stations. Also, it would be nice to have enough security at the stations and on transit vehicles that we felt safe and didn't have to carry our firearms while riding.
PIERCE COUNTY	Suspicious of how it gets paid for. Please don't put burden on home owners. Please don't let something happen like the Narrows Bridge toll for life & increasing rates with every blink.
PIERCE COUNTY	Get cars off the street!
PIERCE COUNTY	No new taxes, ever
PIERCE COUNTY	This plan sounds very comprehensive and well thought out for current congestion data. Where this plan lacks is in the foresight of the next 10, 20, 30, and even 50 years down the road. By the time this design would be complete, 25 or more years from now, we will have a entire new set of problems with extensive data to better analyze the situation and to provide a suitable response. In summary I feel the plan decent but could be better and the timeline is surprisingly long, both of which include many problems to overcome. Let's plan this right and fund it correctly too. \$17 per month is a lot, there has to be other means of finding this project without taking so much from the hard working people of the Pacific Northwest.
PIERCE COUNTY	The fact that the tax increases never sunset is why everybody I know will vote no.
PIERCE COUNTY	I think it's lunacy to propose light rail to bedroom communities in Seattle (Ballard, West Seattle) before bringing it to Everett, which hosts the largest manufacturing hub in the state. That makes no sense.
PIERCE COUNTY	The money required for this and previously approved and constructed (completed and ongoing) projects is too much compared to the small benefit and limited population served. The same money used for roadway & existing bus service improvements would provide a greater benefit to more people for less money in a more timely manner.
PIERCE COUNTY	We live in rural Pierce County. Why should our taxes be raised to pay for something we will never use and will be paying for for the rest of our lives????
PIERCE COUNTY	I'd like the timelines to be a little more aggressive, knowing it's difficult to raise money, do the planning, enviro studies, etc., I still think ST should do everything possible to make this happen faster. I'd like to see more Sounder service from Tacoma to Seattle during the day and on weekends, not just for sporting events. And until Pierce Transit can match my 12 minute drive to the Tacoma Dome parking lot (right now it would take me at least 30 minutes)- we need more parking for commuter rail.
PIERCE COUNTY	Move up schedule for Tacoma-Lakewood expansion. The growth and current impacted commutes warrants this as a priority!
PIERCE COUNTY	Make people who use transit pay and not those who won't have it.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	The cost of riding the bus or train should be lowered so that everyone can afford it I do believe we (the whole community ) should have a a bus train and shuttle transportation like the state of Oregon has what they have really works well for everyone in the whole state I think that we should look into what they are doing there and consider doing that hear in our own state because it work effectively for everyone.thanks for considering my opponnet in this very important matter of public transportation at hand
PIERCE COUNTY	Sounder should increase service for reverse commute times and weekends.
PIERCE COUNTY	The south puget sound area - Tacoma, Puyallup, Sumner are ALWAYS at the bottom of the heap. Improvements happen everywhere else first and here last!! It takes almost 2 hours to drive into Seattle between 6am and 9am in the morning and the same going home. The Sounder Train Hours are too limited. Simply increasing the hours the train runs would help dramatically and the parking situation at the Puyallup station is abysmal. It is filled to capacity by the second train. There is no street parking in Puyallup for long enough time to ride the train into Seattle without being ticketed. Highway improvements are just now being done on 167 and completion won't be done for more than a decade. Where is the relief for the population of south Puget Sound? I would be forced to vote no on this project as once again we are going to be asked to supplement and support better travel options for the more affluent areas of puget sound. The southern region has a more desperate need for transit if you look at the demographics of the citizens. We can't afford Tesla's and aren't given Microsoft buses to drive us to work. We are working for \$10 an hour trying to make ends meet. To have the opportunity to work in Seattle at \$15 an hour requires transportation options that are affordable and viable. Try paying your rent or your other living expenses - food, utilities with a take home paycheck of \$950 a month. This plan should be used to implement transportation where the options are limited first by the lack of transit infrastructure rather than focusing on the areas that already have multiple options such as Seattle and the Eastside - Bellevue, Issaquah, Redmond. Come on - wake up and help those in need first not last. Stop scooting us down to the bottom of the priority list. Yes, I know you want the votes but why should we always be expected to sacrifice?
PIERCE COUNTY	I love the link railas they run moe frequently i dont do sounder cause it is not reliable up north and no weekends and times are not all day.
PIERCE COUNTY	How about a connect from the sounder from the south end that can connect to seatac airport with out having to go all the way to Seattle ?
PIERCE COUNTY	More promises as before...with ST only under delivering! Oh, and you expect me to pay for it...
PIERCE COUNTY	You need 24 hour trains running between Lakewood and ending in Everett. With expansion to Olympia
PIERCE COUNTY	We have spent enough money on mass transit. It is time for more general purpose lanes and new highways.
PIERCE COUNTY	I wish that the improvements wouldn't take so long to complete as the traffic and congestion are already bad.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Find a different way to fund this. Use property taxes for people who live in million plus dollar homes! Also, extend services to people who live far from Seattle because they can't afford to live in Seattle first! The people living in the city that haven't been forced out yet due to cost are typically going to drive for the luxury and convenience despite the cost. Those forced to buy homes away from the city typically can't afford the cost of paying for the commute as easily and have to travel a further distance. Make it more convenient for these people first.
PIERCE COUNTY	No one likes buses; they're sketchy, dirty, and take too long to get anywhere. We need something like a bullet train...a big lot to safely park our cars, get on a fast train with minimal stops, that can go from Tacoma, stop at seatac, and continue on to Seattle near major landmarks.
PIERCE COUNTY	The project should include development of local transportation options around the regional stops/stations. It does me no good to ride the sounder from Tacoma to Auburn if I don't have coordinated transportation services from the station to where I need to go from there. Buses, trains and light rail seem very fragmented and uncoordinated at this time, prompting people to opt for their cars instead. Public transportation will be used by more people more often if we can develop a network of transport options that work together. People will need to see a clear benefit of switching to public transport, such as savings in time or money and much more convenience. For now, it costs me more money and takes more time to use my bike to and from the station and the Sounder from Tacoma to Auburn than driving in rush hour traffic. Exercise and 'being green' don't make up for the current inconvenience and added expense.
PIERCE COUNTY	unless it is all dependent on collection of funds to do the work- I think with the number of people willing to work the time lines seem to be too long to make a good portion happen sooner, especially in possible areas where work could go on with minimal impact 24/7. Also what about an alternate route north for Sounder so there is less impact due to the constant slide incidents on the current line.
PIERCE COUNTY	The project needs to be completed faster
PIERCE COUNTY	More light rail options for South Sound and sooner! People in Pierce Cty deserve reliable transit to SeaTac sooner!
PIERCE COUNTY	Light rail to Everett and Tacoma Sounder rail improvements to DuPont also sounder to Orting would be good
PIERCE COUNTY	We don't need to pay any more in taxes. Enough already. We have been bled dry. Spend what you already get more wisely like expanding road infrastructure with perhaps using private contractors instead of the bloated and poorly managed WSDOT.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	<p>I skipped a lot of the survey because it all seems so pointless. I'm in Tacoma and STILL waiting for the last promised light rail. Oh, wait, I think it's gonna be in Fed way sometime NEXT DECADE. But there's a shiny rail that goes back and forth downtown. Pretty sure you could make more money renting it out as a mobile party train, like the do in New Orleans. It's all pointless because of the underlying inability to get it 1)done as promised 2)done on time and 3) useful in everyday life. Until you fix these underlying problems, it's just money down a rathole. So I favor widened boulevards with less on-off ability, between cities; and rapid buses on existing roads; 24hr standby towing on existing roads; and money spent on a study (!) finding out why you're so incompetent at transportation compared to other cities.</p> <p>Seriously. I spend my summers in Vancouver BC. Wanna know how many times I drove in 1mo? 6 times. SIX. I talk to the bus drivers. They oohhhh and ahhh at our facilities and feel inadequate. My response? I don't use our facilities. Why? THEY DON'T GO ANYWHERE PEOPLE WANT TO GO-in a timely manner that is. People don't go from a downtown center to a downtown center. Only on a density hub map. They run errands, they visit friends in (hopefully thru zoning) other dense neighborhoods, they need transportation other than rush hour times. In greater Van BC I can walk from an apt in White Rock 45min away and effortlessly zip to Vancouver, go to a beach, eat dinner. In the city I can catch a night bus at 3am. And they've added multiple light rail lines in the time you've spent strangling the roads to get us so pissed at driving we decide to take your inconvenient, SLOW, awkward system. By the time you're done I still won't have light rail in Tacoma, will have paid thousands for something I can't ride, and will get around on a technology that surpasses yours by 2035. What? I'm just ranting? Let's take Tacoma as an example. The old trolley widened roads still exist. If anyone truly CARED, all you have to do is run a circular system and hit all relevant neighborhoods (downtown, stadium, proctor, west end, 6th ave, hilltop, UW)-including downtown-so people could work, shop, visit....you know, live. Anyone could zip off the route to express buses to Seattle for dinner and back at night. IF you ran a #\$\$@! late bus. And Seattle families could see AAA baseball at Cheney for the cost of 1 seat at Safeco. Oh, but that wouldn't be expensive. Or new technology. And no one in K county would want to see a concert at the Tacoma Dome...because...I-5 south is such a clusterF. So let's just muck up I-5 until we hate everything so much we pay taxes for some far off system. oh. wait. I already do.</p>
PIERCE COUNTY	<p>Stop asking for us to vote to raise our taxes! Busses should be self supporting and if they aren't, they aren't needed badly enough! Let the people who use them pay for them!!!</p>
PIERCE COUNTY	<p>The timeliness for the proposed expense is unacceptable. Charging for parking at transit centers and sounder stations should not be considered as it takes away the perk or free parking for those of us who choose to use public transportation and reduce traffic. Most transit centers do have insufficient parking. Additional quick routes for buses would be extremely helpful.</p>
PIERCE COUNTY	<p>We can't continue to herd all of western Washington into the overcrowded Puget Sound region. How about doing research on bringing industry to the outlying regions so that workers do not have to commute over great distances to get to work.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	We need link light rail across the sound now! Not in 17-25 years. People may not have the foresight to want to pay now, please don't let this area make the mistake the previous generations have made. Build/expand light rail and do it now. As soon as possible!
PIERCE COUNTY	Levying a property tax in order to pay for transit does not seem wise at this time.
PIERCE COUNTY	Please don't forget the south sound! King County is too heavily represented in the STP 3. The plan is out of balance.
PIERCE COUNTY	disappointment! To consider using property tax to fund transportation future - not very responsible
PIERCE COUNTY	Although I only occasionally use mass transit now, I want to be able to use it more.
PIERCE COUNTY	Cost is to much and no sunset provision on the taxes.
PIERCE COUNTY	I can think of unfruitful things on which to spend \$200/year! Seems like a speck of dust on the grand scheme of things to come. While I don't presently get to utilize transit services due to our particular circumstances, it would be great to know that there will be a way for my family and I to take in a show at the Showare in Kent without having to drive or park there. Driving there from Lakewood is typically not bad, but it would make for a much more enjoyable outing if a rail option was available. Speaking of our particular circumstances, how will DA civilians on JBLM get onto the base once the Tillicum and DuPont rail stations exist? This has always been my greatest hurdle. [I've explored carpools, vanpools, bus routes, etc. while comparing those options to my work schedule and haven't found a generally successful plan yet.]
PIERCE COUNTY	As well as more routes we more times available for using these new routes. Especially from Tacoma to Seattle commuter train and light rail trips.
PIERCE COUNTY	It should be be paid for those who us it not by taxes on people who don't use it this is not a socialist state!
PIERCE COUNTY	I feel like you and others don't think about South and east Pierce County enough when looking at transit opportunities. The amount of people that live south of 512 and east of 167 always get left out of the conversation on opportunities to grow transit. It's like we're the redheaded stepchildren
PIERCE COUNTY	Hurry
PIERCE COUNTY	I believe the priority should be light rail, period.
PIERCE COUNTY	I am a senior citizen living on a limited income and I am not in favor of paying taxes for something that is of no benefit to me or for that matter will not be available to me if I wanted to use it. Until this state decides to start helping it's senior citizens who for years have been taxed for everything that they no longer use I will never support any increase and that includes schools. Fire districts are a different story.
PIERCE COUNTY	I LIVE IN TACOMA WA BY NARROWS BRIDGE. EVERYTHING SOUNDS UP TO DATE IDEAS GOING FORWARD. HAVING PARKING WOULD BE IMPORTANT FOR ALL STATIONS. I RIDE THE PIERCE TRANSIT DAILY WITH MONTHLY PASS. COULDN'T SAY WHICH IDEA WOULD BE FIRST EXCEPT PARKING.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Mass transit is vital to the continued growth and productivity of the region. At present I have not used mass transit here but have systems elsewhere. The costs to put this together are huge and purposed system of taxation seems like blood letting. Going after a bit here and a bit there will gain this program far more than it needs and there will be no checks and balances. KISS keep it simple s---- ad your word. At the end of the build the toll booth will open and the collection of fares will continue to fund this system and all these little bites will never be allowed to heal so the funds will continue to roll in but the next project will require yet another hike in the taxes. There are people in the area that do not have the \$200 a year to support this. There is no mention of assessed taxes on commercial property so that would imply that there is no gain for businesses in public transit. Try harder.
PIERCE COUNTY	Way too much of a tax increase for seniors to shoulder. Living on a fixed income we are being hit with increases in utilities, food, and other costs on a daily basis. This is just way too big of an increase. Social Secutity says our costs are not going up. Very wrong!!!!!!
PIERCE COUNTY	it would be great if there could be a light rail connection between the light rail/bus depot n Tacoma and the SeaTac airport, helping passengers avoid the traffic between these destinations.
PIERCE COUNTY	There needs to be more sounder trains in the evenings in both directions...especially on the weekends to support downtown seattle visitation.
PIERCE COUNTY	25 years is way to long to have the light rail go to Tacoma , especially when we will be paying for it now. It could even be longer en 25 years to finish! More sounder trains during the weekend, week nights later into evening and during the day.
PIERCE COUNTY	This is a big waste of money. I would rather have more buses than light rail. You can change bus routes as needed you are stuck with light rail lines. I do not ever ride light rail or buses.
PIERCE COUNTY	This is a complete mismanagement of tax payer money. In addition to more than tripling my car tab fees, you are increasing my property taxes and increasing sales tax for projects that will be used by less than 5% of the population and not be done for 25 years.
PIERCE COUNTY	I would like to see Puyallup/Sumner area included in more plans of development, and more emphasis on trains in general, not busses. The buses would have to use the roads that are already clogged and a horrendous headache. Focus on a rail line that would not cause any road closures and road construction on our major streets and highways. We need to expand our roads for the current car traffic, not expand our roads for a bus that will eventually end up on another clogged road. Bypass all of that crap and focus on a train!
PIERCE COUNTY	All types of taxes are on the rise in the greater Puget Sound area. All public entities are attempting to raise their particular fees/taxes/assessments/admissions. Most retirees and low income earners have no way to increase their incomes, every new or increased tax means more of a fixed income being syphoned away. It is very unreasonable and unfair for government entities to continue to squeeze fixed and low income families for more and more tax dollars. Many of us have paid taxes all of our adult lives and continue to due so in retirement. Sound Transit needs to find much more cost efficiency in what they do and how they do it.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	TacomaLink to TCC doesn't make much sense beyond maybe some political considerations. TCC already has a Pierce Transit bus hub. And with UWT downtown, the focus should be on getting more viable options for students traveling downtown. As is, TCC's needs seem to be met with a bus system that covers their service district AND parking lots (a luxury note afforded UWT students). I'm a Tacoma resident, a donating supporter of both UWT and TCC, and a staunch advocate of Soundtransit...with that, I would offer that the downtown-to-TCC-TacomaLink project seems to be a bit of a boutique project...
PIERCE COUNTY	Stop taxing us!!!!!!
PIERCE COUNTY	Rapid transit won't move the amount of people you will need to to make a difference. We need more roads not transit.
PIERCE COUNTY	Tacoma!! South Sound.
PIERCE COUNTY	why don't you team up with the state ferry system and get some ferries from like Tacoma and Gig Harbor area to Seattle since that would take some cars off the roads.
PIERCE COUNTY	The whole transit plan is the costliest form of transportation for any of us who seldom or never use it. We get nothing out of our tax dollars. If these dollars went to build more roads, we would better traffic freedom in the Puget Sound region. I know my voice doesn't matter because all those who want those of us not using it to pay for it far outnumber us.
PIERCE COUNTY	Sound transit has a history of extremely poor management of taxpayer resources. no new capital investment money should be given to that organization.
PIERCE COUNTY	Its important to provide Pierce county connection to the light rail system or better sounder service earlier in the plan. Pierce county does not feel it receives enough benefit for the taxes.
PIERCE COUNTY	One obvious problem is capacity. Due to the geography of Puget Sound (hemmed in between water and mountains, with a bottleneck in Downtown Seattle), transit needs its own dedicated space in order to provide any meaningful way of moving people. We should look at major cities around the world for examples. Many are using elevated systems - same light rail, but elevated. And in order to protect the beautiful views, dig two tunnels: one right underneath the present I-405, and the other under Puget Sound connecting Tacoma, Seattle and Everett.
PIERCE COUNTY	You are to be commended for your vision and ongoing work to transform Puget Sound into a world class city. We will never get there without a robust transportation system. Also, i love the idea of allowing buses to use the shoulders. BRT will never work unless they can stay on schedule, they have to be able to navigate free from congestion to gain widespread support. I won't use ST buses going home in the afternoon because the commutes are too unreliable and delayed frequently. That needs to change.  Good luck!
PIERCE COUNTY	I think this is a sensible plan that invests in some big-ticket items like the light rail extensions, but also recognizes the value of the other lines that move people like Sounder and Regional Express. As a person who lives in Puyallup and works frequently in Seattle I greatly value Sounder service. It saves much time and frustration. I'm a fiscal conservative but very willing to pay the additional taxes to improve transit service.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Connecting the south sound with Seattle is incredibly important. I am in favor of rail, light rail, and anything that isn't bus or car related. Mass transit by rail in our region needs to continue to move forward as a critical aspect of our localized economy.
PIERCE COUNTY	Revision of transit fares must happen, only charge when all the seats on the bus are taken. Otherwise the purpose public transport is defeated.
PIERCE COUNTY	I appreciate that some(including legislators) feel that increasing our bus options will solve the majority of problems. As someone who frequently uses transit options in the I-5 corridor, I find this very short-sided. Currently, traffic of all kinds moves sluggishly in the corridor 7 days a week. We keep trying to squeeze more lanes into the same space and it actually is counter-productive. I believe this is detrimental to economic growth in the region because we can not move goods easily to and from our ports. Light rail projects need to superscede commuter traffic until the existing issue between railroad traffic and commuter traffic can be solved.
PIERCE COUNTY	future planning for a coordinated system is what we need, and Thurston county should be compelled to participate. It is shocking that the Sounder does not serve Olympia, where thousands of state workers are employed.
PIERCE COUNTY	total waste of tax payer money
PIERCE COUNTY	Sounder would be more useful with expanded service hours. I've been told the rails can only be used for sounder during certain times. Would you consider adding and publicizing sounder express bus service? You could offer an off-peak hours bus that run maybe just hourly during less popular times, providing service to sounder stations. I am hesitant to use sounder rail service because I work non traditional hours and I am afraid of being stranded.
PIERCE COUNTY	When I drove to work before retirement I lived close to work and paid my own way. If people want light rail, the people who use it should pay for it, not me.
PIERCE COUNTY	This looks like a well-organized and cost-effective plan - nice work! Something has to be done- nice work! I take the bus all the time to the airport and to Seattle and it is fast easy and affordable. I would take it to work in Olympia but it is not convenient and adds extra time to my commute.
PIERCE COUNTY	Expand highways. Not buses and Choo Choo trains
PIERCE COUNTY	Our taxes are already creeping up and NOTHING is being shown for it (in regards to the tolls on the bridges and the express lane on 405), additional taxes seems excessive and unnecessary.
PIERCE COUNTY	These projects were needed 10 years ago. I would be willing to support all these if the timeline was not after I'm dead and buried. Can't these projects be speeded up????
PIERCE COUNTY	You are already getting plenty of my tax money and are way overreaching. I am still paying RTA taxes that were supposed to end years ago. I doubt that even with all you want I find it impossible to believe you will not come to voters for more money in the future.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	<p>Your plan sucks. Let's avoid beating around the bush and get right to why your plan sucks. Very simply, it's mostly building or improving transit links between one set of rich white people to another set of rich white people. Meanwhile, a significant population in Pierce/King county do not have cars, and have terrible transit links to the areas that have all of the jobs, some of which REQUIRE A CAR to even be considered for employment. I don't see this plan addressing this problem in any way (running the link to TCC is a pathetic waste of precious tax money).</p> <p>Given the present state of public transit, it is UNBELIEVABLE to me that the FIRST project you plan to complete is along I 405. This is just a bunch of rich white people stuck in traffic. If they are so bothered by this, they can fix it themselves without any government money or action, CARPOOL! They have a diamond lane, USE IT!</p> <p>Yes, these rich white people are the main voters. So it's obvious that this whole plan is just one big bribe to them so they will vote for it. And that is what makes it a waste of money. The only plans worth completing are ones that connect low income people, many without cars, to job rich locations, so reliably that no one can blame transit for being late or absent.</p> <p>Also, building new Sounder stuff is way less important than extending the hours of the already existing lines. On can't use it to go to Seattle for any entertainment because the last run is at 6:30PM and it doesn't run at all n weekends. Pathetic.</p>
PIERCE COUNTY	<p>WE NEED AS MUCH PUBLIC TRANSIT INFRASTRUCTURE AS POSSIBLE, AS SOON AS POSSIBLE!!! I know that Sounder commuter trains run on BNSF tracks, but there needs to be more frequent trains during the day as traffic is only getting worse for those with abnormal schedules, and those who simply want to utilize their free days to experience what seattle has to offer. Sounder trains on the hour to the rest of the sound would be HUUUUGE</p>
PIERCE COUNTY	<p>In my opinion, as a Seattle native and Tacoma dweller, these projects are 30 years behind. Please finish them as fast as possible so that I may enjoy them for part of my life.</p>
PIERCE COUNTY	<p>If this is so important and will be so cost effective, then let private industry do it. Anytime government taxes it's people for giant projects the biggest amount is wasted and only directors get rich. Don't tax this retired person to death,</p>
PIERCE COUNTY	<p>More train service to the south sound</p>
PIERCE COUNTY	<p>Parking at light rail stations. Most have no parking and Tukwilla is useless because there are never any spots open. Expanded south sounder times would help also.</p>
PIERCE COUNTY	<p>It would be nice if the map graphic repeated for each section. I had to scroll up and down a lot on my iPad mini.</p>
PIERCE COUNTY	<p>Assess tax increases by region corresponding to those who would directly benefit from projects in their region.</p>
PIERCE COUNTY	<p>Parking is a big issue in Sumner we had a golf course along the river that could be a great place to park &amp; get on public transportation. Large parking garage &amp; station is needed this would service the while valley!</p>
PIERCE COUNTY	<p>Public transportation needs to be more aggressive and needs to reach all aspects of major cities</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Think about Pierce County and not always King County. This area is growing at an exponential rate. The transportation here SUCKS compared to other states and countries I have been too. Learn from Portland, they are only 150 miles away. Why is it that if you live in Tacoma/Puyallup/Graham and surrounding area, a car is absolutely necessary. Our geography prevents adding many roads, so we need to make public transportation attractive and abundant to reduce traffic and emissions. Thank you.
PIERCE COUNTY	Keep light rail going to Everett and Tacoma also Commuter rail to Du Pont also no taxes on property
PIERCE COUNTY	More parking in sumner station
PIERCE COUNTY	We need an integrated mass transit plan that will be comprehensive like in the major cities of Europe. We should consider Seattle "Area" Transit as Olympia to Everett including the East Side communities. It is time to make commuting via automobile a thing of the past. We need to invest in this infrastructure.
PIERCE COUNTY	I totally oppose anymore tax increases for Sound Transit, already being taxed for Sound Transit 1 & 2, and since not one route helps me and that it'll take decades, just not worth it. Also, placing the light rail along S. 19th St. in Tacoma would further increase traffic congestion as it is currently the ONLY 4 lane road (2 lanes each direction) east and west of downtown Tacoma. If light rail would have originally had proposed to be along 6th Avenue, I might have gone along with it, but it's been almost 20 years since Sound Transit started and all Tacoma has is a 10 minute light rail and commuter rail which I don't use do to my working on swing shift.
PIERCE COUNTY	The plan favors King county at the expense ONCE AGAIN of Pierce County. We have been waiting too long for light rail ( other than our dinky Link, made to simply placate Pierce County) while light rail is built all over King County.
PIERCE COUNTY	Need to set priorities better, connect airport to Tacoma next 5 years and then branch out , this is a crucial link of most of the people. IS is backing up worse and people want a useful link
PIERCE COUNTY	why do I have to fill this out? i'm not interested and suddenly this stupid thing popped up on my computer ... PEOPLE GET A LIFE!!
PIERCE COUNTY	The Sounder needs to run more times throughout the day in BOTH directions and on weekends. If ST cannot secure property for a completely separate line consider tunnels in areas on congestion so ST can bypass the commercial rail issue. The original plan that got approved offered more than we have received yet and while better than at first it is still only a work commute tool for the day shift and still lacks weekend travel. As for your cost info in #14 you might want to indicate a time length for that fee. Property taxes are going up and while people find transit important, getting squeezed on all the items in property tax and other tax avenues is getting to be oppressive.
PIERCE COUNTY	This was supposed to be completed already. We passed a major RTA car tabs tax in the late 90s to bring light rail to tacoma by 2020, and you want more money? Where is the accountability?
PIERCE COUNTY	Make sure Tacoma is not over looked in the rail routes, and we get our fair share of the new routes.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	You cut off our services & I've learned to be GRATEFUL to be "off the bus line" for so many reasons to list. Though I do feel you've impacted my property value & have considered a lawsuit for some time. It's my 10,000 neighbors in Prairie Ridge, without choices who are impacted.
PIERCE COUNTY	I would like to see the sounder run southbound more often in the evening. I've taken it north in the late afternoon but then figure out how to get back to Tacoma.
PIERCE COUNTY	As a Pierce County resident, I recognize the need for more mass transit due to the heavy traffic at JBLM and Fife. It worries me that the advertising for this survey that I have seen only includes expansion to Redmond and Everett. By excluding Pierce County in the advertising, this survey may not be reaching enough voices in Pierce County to make the improvements that are needed.
PIERCE COUNTY	It's just too high a tax rate and too many different types of taxes. I mean really, those are MEANINGFUL additions to taxes on Sales, Vehicles AND Property. In addition, I understand that those taxes are basically indefinite in nature; they go for at least 50 years for capital, and are authorized for longer to support operations. That's just too much. Honestly, I don't believe your \$200/year estimate. And if I did, that's actually quite a lot of money for EVERY SINGLE HOUSEHOLD, whether they can use transit or not.
PIERCE COUNTY	Get it going!!
PIERCE COUNTY	I don't think that the transit system is a good use of the money we are already being taxed. I can't afford even \$17 a month extra for something I won't use. I think there should be better management of the taxes that are already collected!
PIERCE COUNTY	I'm frustrated with all of these plans!!!! At this point, I'm finding that it has not been feasible for me to use any transit system due to the length of time it takes to get to where I need to go and lack of options. In the past twenty five years I've taken the sounder 3 times, and the bus 5 times. I do not feel the cost is worth it. I could hire a driver and a car for less cost than I'm paying in taxes to fund this system. Now you want to raise my taxes even more for a service that is likely not going to meet my family's needs. In addition, if I find that I would benefit from using mass transit, I would/will have to shell out even more money to pay for a ride that I've already paid for. It's ridiculous!
PIERCE COUNTY	Too high of price to pay.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	<p>Get moving on mass transit!!!</p> <p>I have waited my whole life for the Puget Sound region to adopt and complete a system wide mass transit project! In the mid 1960's there was discussion of mass transit in Puget Sound, and no one acted. Again discussion in the 70's, 80's, 90's, 2000, and now it is 2016!!</p> <p>I have lived in South Sound Steilacoom and JT Base Lewis McChord, Seattle/Ballard, Bellevue/Clyde Hill. I JUST moved back to Steilacoom after retirement because I CANNOT stand the traffic in Seattle/Bellevue area And the I-5/I405 corridor any longer.</p> <p>No more talk!</p> <p>No more surveys!</p> <p>No more town halls!</p> <p>Yes it is expensive!</p> <p>But it is more expensive NOT to make e forward!</p> <p>And people are leaving the area because the traffic is making this area non-livable!!</p>
PIERCE COUNTY	Expansion of light link rail is critical for our region!
PIERCE COUNTY	It is all too expensive for what we get in the end. More focus should be placed on enhanced bus service.
PIERCE COUNTY	All this does is put fixed income seniors at risk. We seniors have paid our "dues" so to speak. Enough is enough.
PIERCE COUNTY	Parking is a huge problem right now that needs to be addressed immediately.
PIERCE COUNTY	I support additional bus express service.
PIERCE COUNTY	Motor vehicle taxes: We have two cars: one used daily, a truck used periodically. We also have a travel trailer & a boat with trailer. I think the tax on motor vehicles should be by miles driven or use. It should be a blanket amount per vehicle. That is UNFAIR
PIERCE COUNTY	This is a very large, very critical investment for our region's future, affecting livability and economic competitiveness for decades. It's critical that early actions demonstrate the capacity of ST to deliver; and emphasis on BRT and quickly-implementable capital projects impacting reliability (such as bus shoulder-use improvements) ought to be at the forefront for delivery within the first five years. Sooner is better.
PIERCE COUNTY	Connecting light rail from Tacoma to Seattle should be a priority.
PIERCE COUNTY	Stop this tax burden.
PIERCE COUNTY	Need is in all directions. Completing service to JBLM is vital for Pierce County's largest employer, military families, single young soldiers & service providers. Make them a priority sooner. Then add our state's Capitol into the 25 year plan! 🗳️
PIERCE COUNTY	With the budget that our state DOT has, there is no reason to raise taxes for this plan. The state needs to do a better job of managing their projects so they do not continuously run over budget.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	I feel the Sounder train needs more runs each day. Using it only for morning and evening commutes is a waste. I would use it to travel to Seattle quite often if it ran on a more convenient schedule and the city of Seattle and those in between would benefit from it as well. It is a shame to only run it twice a day for a couple of runs.
PIERCE COUNTY	Much of this light rail was promised in 1995. Since then billions have been spent and still no light rail in Federal Way or Tacoma. Running trains through Rainier Valley rather than Marginal Way where the jobs are is purely political. I do not trust Sound Transit with 50 billion dollars. ST has previously fallen short of it's original goals even with extra funding.
PIERCE COUNTY	I live in Tacoma so my primary interest is in projects that affect Tacoma.
PIERCE COUNTY	More buses in Tacoma!
PIERCE COUNTY	Finally time to get going on this project. I remember voting in the 70's to expand mass transit, it passed but all the money was spent on feasibility studies and consultants. I probably wouldn't be around in 25 years but my grandchildren will benefit. Make it happen and get rid of I-5 gridlock.
PIERCE COUNTY	Sorry but the projected costs to taxpayers are just too high. Examples of projected cost to taxpayers are not true---they will be much higher due to increasing home values.
PIERCE COUNTY	I have been paying taxes in Orting since the start of Sound Transit, and have no representation or voice to reflect the fact that the Sumner-Orting Highway is a 6-mile stretch which routinely can take an hour to traverse. This represents one of the worst commutes in our region, and you people are thinking about considering starting to study what to do about it at some point in the far future. When I try to use the Sounder in Sumner, I routinely must drive as far away as Kent to find a parking spot because there is no connecting transit options from anywhere in East Pierce County or south of Puyallup on SR161 (which means that many of these drivers are also using SR162 to bypass the South Hill Nightmare). There is an existing rail line from Puyallup to McMillan which presently serves one small cargo train per week. Why can you not upgrade the old decrepit rails and put in some crossing guards, and start a new light rail connector from the McMillan Industrial Park to the Puyallup Sounder Station to alleviate a huge amount of congestion on SR162, along with parking pressure at Puyallup and Sumner? Why do I continue to pay into your system, with neither representation or benefits?
PIERCE COUNTY	Buses and trains run almost empty. Fill them and maybe then there would be a need to improve service!
PIERCE COUNTY	Busses are not the key to our transportation issues. We need to expand light rail services. The state also needs to add more capacity to freeways by adding more lanes.
PIERCE COUNTY	I think the cost is outrageous for the supposed benefit. Billions of dollars will be taxed per year for something that won't be online for decades. I think that Sound Transit is moving ahead because politicians feel we can't be a big-boy city without light rail transit, not because it is the best/most efficient/least costly way to get people from a to b.  There isn't a bus line within 1/2 mile from my suburban home, yet you want to spend billions on light rail that isn't within 10 miles of my home.
PIERCE COUNTY	Puyallup station NEEDS better parking!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Build more road lanes. Make 167 a true freeway..not just two lanes with a car pool lane. Who ever approved that plan should be run out of office.
PIERCE COUNTY	You should remove everyone living on the Peninsula (across the Tacoma Narrows Bridge) from any taxation on this project, the ST3 does not benefit us at all - unless we pay a \$5.00+ TOLL just to access the ST3 propositions, or pay to take a bus and then transfer to take light rail and pay for that service. It is unfair to tax us for a project that will not extend to our community (Gig Harbor and Key Peninsula) even though we reside inside the Pierce County taxable area. In addition, to pay a tax for 17 years before the service is available in the next town over from ours is undue and burdensome taxation. Totally unfair and everyone on the Peninsula side of the bridge is disenfranchised.
PIERCE COUNTY	Until there is complete accountability from Sound Transit you should not receive another red cent.
PIERCE COUNTY	People who do not live close to where they work should pay their own way to work. I had to pay my own way when I was working.
PIERCE COUNTY	To costly
PIERCE COUNTY	The need for public transit will go away within 10 years, so it's a waste of money. Self driving cars will become highly reliable and will become the only way to get to congested areas, because they will be able to communicate with each other and travel much faster and closer together. If you double the speed of traffic, the number of cars on the road at any time is cut in half, assuming the same number of trips. Since self driving cars won't crash, they won't need to protect their occupants and hence can be smaller and lighter and go much faster, also providing their occupants with free time to do other tasks, or even sit back and have a drink. I for one would like to see the carnage on our highways caused by drunk drivers ended. Transit is a waste of money and NOT the answer. Robert Hawkins, Bonney Lake, WA
PIERCE COUNTY	You can't maintain the equipment you've got now why saddle is with more that you'r
PIERCE COUNTY	Asking way too much of the taxpayer!
PIERCE COUNTY	1. Faster would be better. We need this yesterday. 2. Even through the winter, there are often more bicycles per train car than the cars are designed for. During summer it gets worse. A relatively inexpensive modification would be to create racks to store bikes upright. Same is true for light rail. 3. Integrate bike lanes/paths with train/light rail stations. (Maybe that's what you mean by "increase bike/pedestrian access?" It's unclear)
PIERCE COUNTY	Rail is entirely too expensive and moves to few people. Forget the rail projects and build more vehicle lanes.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	The first priority MUST be Rail, Rail, Rail. I was born in the UK that manages traffic in and around London mostly with trains not anything that drives on the roads. Buses will only work when the London Transport system is studied by anyone who is or will be involved in developing a plan for our transit improvement. Once you have better parking at train stations and more trains running and the public except and use this new system then you are throwing money away. Once a system is in service and people start using it then and only then you start looking at restricting traffic entering areas such as Seattle. I get the feeling that people trying to plan transport for the future have no idea of what it takes to make this work. Lastly measure, and measure again before you cut, if you stop cars then you need a system up and running before you do.
PIERCE COUNTY	The speed of this project is far too slow, thus can get done within 10 years, probably in 5. Push the time line up alot. Rail commuting needs to be the priority now. Thankyou.
PIERCE COUNTY	THIS IS ANOTHER STATE BOONDOGGLE TO SEPARATE EACH TAXPAYER FROM THEIR SHRINKING INCOME. THE STATE NEVER EVER THINKS ABOUT ALL THE SENIOR TAXPAYERS WHO ARE ON FIXED INCOMES AND WHO HAVE NEVER HAD AN INCREASE IN THEIR RETIREMENT INCOME IN OVER TEN YEARS. ALL THE OTHER EXPENSES THAT SENIORS MUST PAY, HAVE INCREASED OVER THOSE TEN YEARS AND A \$200.00 EXTRA TAX EACH YEAR, IS A BURDEN THAT SENIORS SHOULD NOT BE REQUIRED TO BEAR AFTER PAYING THEIR FAIR SHARE OF TAXES ALL OF THEIR LIVES!
PIERCE COUNTY	1. Overpriced. 2. Users should bear the financial burdens. 3. MVET is ridiculosly high. 4. Seniors who don't use transit system are penalized just by living in the RTA district. 5. The people don't want it - turned down in past elections. You are against the will of the people. 6. Sound Transit projects have never completed on time nor on budget. They are unworthy of stealing our hard-earned money for non-performance. 7. I haven't found anyone in favor of paying higher taxes forever for this boondoggle (no sunset clause on proposal, thus unlimited forever excessive tax burdens).
PIERCE COUNTY	STOP IT ALREADY.....
PIERCE COUNTY	Keep it moving!
PIERCE COUNTY	Please stop waisting our hard earned money.
PIERCE COUNTY	Taxation of WA populace is destroying our lives. Transit runs Empty buses - clogging traffic lanes on major highways. WA highways are littered with dangerous debris and frought with Potholes. WA roads and freeways maintenance, repair and restructuring more urgent than any of ST proposals to rape taxpayer bank accounts.
PIERCE COUNTY	Most people in Pierce county never use Sound Transit. Let Seattle take care of their own mess. I don't want to pay one penny for trains. Bring the jobs to Pierce County and we can take care of our own problems. Sound Transit has wasted billions and has never finished projects on time or budget. They have never correctly predicted rider volumes . They are one of the most subsidized transit systems in the country Privatize it and if can't operate on a budget without subsidies, shut it down. Enough is enough
PIERCE COUNTY	How much over budget will this be? How often does government over promise and under deliver? Almost always. What is the chance that this will be completed on time. I give it a .000001%
PIERCE COUNTY	Stop this crazy tax grab.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Please stop stealing and wasting taxpayer money on projects designed to create union controlled government jobs. Nobody rides and nobody will ride the boondoggle system you have now and are proposing. Stop taxing everyone to death.
PIERCE COUNTY	If you want immediate improvement, increase the parking at existing commuter rail stations. Adding park and rides and increasing buses to transport commuters from there to the train station is an effort in futility and stupidity. I won't use the train because there is never anywhere to park. I gave up even trying. The last thing I want to do is add time to my commute by adding the extra time to get on a bus. More parking at existing stations leads to more train commuters, putting fewer cars on the road.  Furthermore, adding BRT is ridiculous. It adds more vehicles to the road, negating the very reason Sound Transit exists. Pierce Transit no longer runs in most of Pierce county because of lack of riders. Buses have already proven themselves to be a complete waste of time for commuters here. What we want is somewhere to park near the station we use. Parking garages, either above or underground, would be the most fiscally responsible step to take with the tax dollars Sound Transit is being entrusted with.
PIERCE COUNTY	The Seattle commuter issue will never be solved. Money would be better used to develop employment centers away from Seattle in Tacoma and Everett and outlying urban centers like auburn and Kent. Because of our topography we have an extremely difficult problem in moving north-south commuters. This will not change and the 50 billion will turn into multiples of that figure.
PIERCE COUNTY	The whole plan is way TOOOOOOOOOO EXPENSIVE!!!!!!
PIERCE COUNTY	The vast majority of drivers in the Western US will seldom or never use a project like this because it simply is not practical for people who value their independence and time. I am extremely opposed to spending scarce public dollars to benefit a small percentage of the mobile population who might benefit from this boondoggle with a heart-stopping price tag.
PIERCE COUNTY	Can't wait 17 years can you do it faster?
PIERCE COUNTY	The focus should be on rail systems, NOT MORE BUSES!
PIERCE COUNTY	I live on the Olympic Peninsula. I don't even cross the Tacoma Narrows Bridge because of the tolls unless absolutely necessary. This project doesn't benefit us at all yet you want us to pay for the Seattle gridlock? I pay enough property taxes and car taxes and gas taxes and... give it a rest!
PIERCE COUNTY	you idiots are running a gigantic scam--HELL NO to ST3
PIERCE COUNTY	I could not tell which light rail option would connect Tacoma to SeaTac airportbut that is the one I would give highest priority. All of the optuons that affect Peirce County would makeme more likely to use mass transit.
PIERCE COUNTY	Stay out of my property tax !!
PIERCE COUNTY	I do not use it, I live in the south sound and it does not serve my needs. I will not support this, and NO NEW TAXES!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Our area is too sprawled out for rail to be cost effective. Expanding road and bus service is a proper use of funds, not wasting money on trains with too limited of access
PIERCE COUNTY	Paid parking at public transit stations... what? This plan will loose you support and encourage people to drive themselves. This plan will make it more difficult to utilize public transportation.
PIERCE COUNTY	They will never help me in graham
PIERCE COUNTY	If mass transit is so beneficial, it should be capable of being self sustaining without tax payer funds.
PIERCE COUNTY	Nothing is mentioned regarding the ST Express bus from Tacoma Dome to UW. Currently, it takes 40-50 minutes in the morning to get to UW. As long as taking multiple modes of transportation to get to UW from Tacoma in the morning, I'm all for paying more for extra services. But if the plan is to remove this Express bus, then I am not for any of this. I'm probably the only person who will write in and say this to anyone, but there are so many people who agree with me. Please figure out a way to either keep our bus from Tacoma dome to UW - or plan to deliver a better mode of transportation that will get us there in less than an hour max.
PIERCE COUNTY	Raise my taxes. Really, I'm serious. I don't ever want to hear it said "Well, nobody ever said 'please raise my taxes'". Because I just did. This is all for the public good and this is why we have government, to provide services to people.
PIERCE COUNTY	I'm all for transit and more transit options as I do not drive. However I do own a local small business and I'm opposed to sales tax continually being increased. In my business already I lose a lot more customers to online retailers based in other states than I do to the local brick and mortar shops. Between the minimum wage increases in Washington and the ever-increasing sales tax, trying to remain competitive in my industry and also keeping our doors open is a constant struggle. I'd love to see some non sales tax options considered to fund these projects.
PIERCE COUNTY	Another waste of tax payer money!
PIERCE COUNTY	I am in favor of more user friendly options(transfers throughout the Sounder Transit System/Pierce Transit) Also, Pierce Transit Timetables should include more buses to Sound Transit Centers(Lakewood) as a security precaution(In the case of Pierce Transit Route 51, the arrival/departure times are not with buses to Seattle). Also, for sporting events, more buses should depart from key sites instead of one bus that initially leaves from Sounder Lakewood Station, eliminating crowded buses with passengers enroute to downtown Seattle.....more Express Buses that make fewer stops.
PIERCE COUNTY	If money was funded differently I would be on board. The state should look within and it would see that we waste enough of the tax payers dollars. If there was a better use of the current money u wouldn't need more
PIERCE COUNTY	Please consider income, and race, in developing priorities and strategies.
PIERCE COUNTY	None
PIERCE COUNTY	There needs to be more parking, similar to Tukwila station, at the light rail stations. Also, the sounder train needs to run from Lakewood all the way continuously to Everett. Same with Everett to Lakewood. It's ridiculous it stops in Seattle each way without going further.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	This survey is written in such away that it drives wrong solutions and inaccurately paints a picture of current and future services. Bikers can pay their own way and charge the users of these services, not those of us that have no need to go to Seattle.
PIERCE COUNTY	I would like to see links built into the survey for each question, that explain the main considerations and estimated costs for each project. As it is, there isn't sufficient information for me to readily understand, for example, what the benefits vs cost (in \$ and in longer travel times for everyone else) of a new station at NE 130th or Boeing Access Road are, or whether these projects can be revisited later. \$200/year for the average adult located WHERE? in all of Pierce/King/Snohomish counties? Uniformly assessed irrespective of the level of benefits this service offers to the particular location? Is the 0.8% motor vehicle excise tax IN ADDITION TO the existing 0.3% excise tax, making the total 1.1% excise tax? A large portion of the use of these services is to enable people to transport themselves to employers, to collaborate on work. Yet all of the funding sources described are private individual citizens, taxed broadly. Where is the funding from business sources that will benefit from this expanded network? Where are the federal contributions described? The expanded network serves federal agendas on reducing carbon emissions & dependence on foreign oil, among others.
PIERCE COUNTY	Would use rail system of it was more available in my city and would be more supportive if it helped my traffic more than other cities.
PIERCE COUNTY	I am RETIRED. The TAXES are already too high, and I have never benefited from mass transit, and have had to support this boondoggle for many years. It is a burden on SENIORS, to pay more for things that start in SEATTLE and never get delivered as promised to the south sound.
PIERCE COUNTY	You have a rail line that goes from renton to Everett already. It should be developed and put in service right away to show you are serious about providing a good rail service and not just spinning your wheels waiting money. You need reader boards at stations telling commuters what track the train, is coming on. In today's electronic age there is no excuse for not having an easy way to tell where the train will be. I would take the train to work if there was parking but since there is not it is easier to drive. I feel that until you do something about these issues you are just wasting money and don't really care about moving people efficiently.
PIERCE COUNTY	This was one of the most awkward surveys I have ever taken. So many long winded questions about geographical areas I have no interest in. Not enough "Neutral" options.
PIERCE COUNTY	Funds should be used to improve general purpose traffic flow before a lot of these projects. Mainly bus flow. If all traffic is improved bus flow will improve also
PIERCE COUNTY	Please bring transit to Orting somehow we desperately need it!!!!
PIERCE COUNTY	This needs to happen in a shorter amount of time. 20 years is a ridiculous goal as we needed these transportation options a decade ago. Why not stay ahead of the game instead of always playing catch up? Also - traffic lights should be adjusted to commuter flow. Merging roads could be thought out better. Invest invest invest!!!!!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Need unbiased 3rd party data showing daily of available capacity versus ridership for light rail. Compare to same for busses. Publish this before voting begins as part of ballot measure information.
PIERCE COUNTY	Need more outlining areas in Pierce county with better bus service. Why did you take it away!
PIERCE COUNTY	Train to Orting, bus service to Orting
PIERCE COUNTY	Put accessible rail to outlying areas. Orting, wilkinson, south praire
PIERCE COUNTY	WHEN YOU HAVE TRANSPORTATION THAT GOES TO WHERE MOST PEOPLE WOULD USE IT AND BEING ABLE TO SUPPORT 24 HR SERVICE TO LARGE BUISNESS STOP WAISTING MY TAX DOLLARS!! YOU FORCE ME TO PAY FOR MTS AND I CANNOT USE IT!!
PIERCE COUNTY	Cost to much, overrun will be extremely costly. I am 76 years old, this project will not effect me, but I would have to pay taxes on project until I die. So how will this project benefit me!!!
PIERCE COUNTY	My concern with these plans is that the current system is not working well ..... transit should be to alleviate traffic on our highways which means providing ample parking for those using the facilities. Currently, if you are not at the transit facilities by 6am you will not find parking and are forced to park in the neighborhoods. Improve the current system first...
PIERCE COUNTY	We're not able to continue to be taxed at the rate we are being taxed. Adding more expenses to your citizens in such an economic downturn is foolish. Especially for a program that will not support it self. It will continue to be a pit of money as our current bus systems are. Work to make the current system self sustaining before we work on adding to it.
PIERCE COUNTY	Prioritize Tacoma to spread economic impact of improved transit
PIERCE COUNTY	Taxing property owners to fund ST projects is an inequitable practice. There should be a tax on other dwellings like apartments as well.
PIERCE COUNTY	Where I live on 66th and Tacoma mall blvd, the closest bus is a 20min walk. I have to be at work at 6am on Sunday's and 7am on weekdays. I've had to call and arrange cab rides. I wish that there were more buses in my area. So that way I don't have to call for a cab or walk 20mins or have to walk to the tacoma mallin the early mornings when it's still dark. My mom has to call cabs on the weekends which I sometimes help to pay for because buses stop running from Tacoma to Lakewood at relatively early times. I honestly don't think that it is a big necessity to improve the light rail system. I believe that the bus routes and times need to be improved.
PIERCE COUNTY	I would really like to see light rail go into Thurston county.
PIERCE COUNTY	Need something that takes you from spanaway to Seattle.
PIERCE COUNTY	There should be more trains throughout the day, and into the late evening for people who want to get to Tacoma and Seattle. One of the major complaints that I hear about Sound Transit is that it runs as a commuter service only. I believe that it is missing out on MAJOR revenue by restricting its operating hours to the extent that it does. If there were a feasibility study done that looked at extended hours with more trains in conjunction with more available parking at stations, I think Sound Transit would shift part of their focus.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	<p>Light rail has been a tragic, disastrous boondoggle in Washington state, costing billions more than promised every time, with time and cost overruns sometimes being double or more of the initial promise.</p> <p>We need 2 more lanes on I-5, 512, 405, 167, and 4 more land each way bypassing Seattle. The planners who ONLY offer us more bloated and costly light rail no one wants, rather than more lanes which everyone wants, are working AGAINST the needs and desires of the residents of Puget Sound. I sincerely hope we can obliterate all future light rail money pits and create better car and bus service which is more flexible, more efficient, more affordable, and more ecologically sound than letting our citizens waste hundreds of hours of their lifespan in traffic every year, and letting cars pour out thousand of metric tons more emissions by sitting in traffic jams.</p> <p>Light rail is the most irresponsible and idiotic waste of money in Washington State.</p>
PIERCE COUNTY	<p>Charging everyone for services not everyone wants to use is morally wrong and I will do my best as a citizen to end the employment of any public officials who support it. Sound Transit should have zero services not totally paid for by fares.</p>
PIERCE COUNTY	<p>Tolls on HOV lanes and raising taxes on everyone who can not use the current services is just wrong. Charge the people who use mass transit and leave everyone else alone. Why should I pay for someone else to ride at a discount. You are trying to force everyone into mass transit but don't provide service to all. You make those you done not provide service to pay double for a commute. When public transportation was available to me it would have added 2 hours to my commute time. Price per mile is more for public transportation than personally owned transportation.</p>
PIERCE COUNTY	<p>More commuter times for Sounder trains to Seattle, night time service.</p>
PIERCE COUNTY	<p>Connecting Tacoma to SeaTac airport and Seattle via light rail is the most important part of this plan.</p>
PIERCE COUNTY	<p>Expanding service is important, but so is incentives to use the program. Education on the light rail topic seems to be lacking. Get the word out there and educate people about why they should use the system. I feel like so much time is being spent looking at the bus system, but the truth is that people either take busses or they don't expanding the system is going to be hard to convince people to give up their cars for a bus. A train feels less trashy. I would never commute on a bus, but I would a train!</p>
PIERCE COUNTY	<p>Bus service from Orting to Sumner train station is desperately needed</p>
PIERCE COUNTY	<p>Cost seems too much to ask for something a long ways off. Would like the state to pick up more of the funding and give less tax breaks to large corporations such as Boeing. Close loop holes.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	<p>I-405 is already overcrowded with multiple bottlenecks worse than I-5. Putting additional busses on them is only going to compound the problem. Furthermore, there is insufficient supporting public transportation from I-405.</p> <p>Additionally, patrons are dropped off at many Sounder Stations with insufficient bus service forcing them to walk for miles.</p> <p>Washington cannot wait 25 years for this mess to be straightened out.</p> <p>Main problem is that I-90 intersects I-5 in downtown Seattle, the biggest Washington city. Intersection should be near Seatac which would take the load off I-405. I-5 lanes in downtown could be utilized to relieve I-5 congestion. Maybe get Federal funding to pay for it at little or no cost to taxpayers. All the rest is too little/too late.</p> <p>I-5 has many other problems which are slowly being corrected. Very poorly designed</p>
PIERCE COUNTY	<p>I would be a frequent transit user if mass transit could conveniently get me where I need to be and back, with as few transfers as possible.</p> <p>For example, in order to take the bus from 72nd &amp; Pacific to downtown Tacoma, I either have to walk 4 blocks, which could be dangerous at night in this area, or walk 2 blocks to 72nd &amp; Yakima, then take a transfer to 72nd &amp; Pacific. Hardly seems worth it, most times. I don't know what could be done about the situation, but that's my 2 cents.</p>
PIERCE COUNTY	<p>As an infrequent user of Sound Transit, my only personal problem has been finding parking near the Sounder station in Auburn, and near the light rail station at the airport.</p>
PIERCE COUNTY	<p>I am not opposed to paying for better transit if it benefits more than just a few select regions. It also needs to give relief to commuters on our interstates/highways. Bus service needs to be extended to areas like Orting. Small towns weeks residents don't have easy access to public transportation.</p>
PIERCE COUNTY	<p>Heading south to Olympia is a huge factor for many Tacoman's please consider this factor. Going from TCC to St. Martin's university or the Capitol would be the best thing to happen to our area for public transportation.</p>
PIERCE COUNTY	<p>instead of charging the people for it, pay our state government less</p>
PIERCE COUNTY	<p>Being 77 years old and probably will never see or use any of the Tacoma additions I resent having to pay for them out of my retirement funds. The only one of your proposed tax increases I would be OK with would be the sales tax. My property taxes are already out of sight thanks to the school levies and other charges. The excise tax on my vehicle is already more than the people voted for thanks to the lawmakers adding charges and fees on it without having to have a public vote. Why light rail to the community college when we already have bus service going there. Your new proposal adds thousands of dollars to the average home over the life of this or until someone comes up with another idea to stick it to the little guy.</p>
PIERCE COUNTY	<p>Pierce County needs to put a stop to building or support transit!!!!!!!!!!!! Orting does not have any transportation help and we are left to commute everyday with one lane in town and one lane out. Stop building in Bonney Lake; Tehaleh until they can support the infrastructure. Everyone uses hwy 162 to get to Graham, Bonney lake, Spanaway etc. HELP!</p>
PIERCE COUNTY	<p>Stop focusing on buses because they're cheap! They cause congestion because they're fighting for space with cars. Focus on rail!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	<p>The amount of money you are asking and the time to complete seem way too out of sync. If you are going to charge more in Taxes to complete these projects, we need to have them started and completed quicker. The longer you take to complete the transit project and the more tax you want to create, increases how much I am going to Oppose any efforts.</p> <p>Currently these improvements have not helped and they have hindered my commute. Traffic needs to be fixed now!</p>
PIERCE COUNTY	<p>How do you possibly look at the regional traffic models and not add a express bus route from Tacoma to Bellevue immediately. This isn't even on your list for 25 years down the road! Unacceptable.</p>
PIERCE COUNTY	<p>This will cost Pierce Co. residents a lot of money for all the valuable transit options to be up North. Why would we vote for something that will provide very little value to Pierce Co.? Transit needs to go in a straight line from Tacoma to Seattle and Everett, once that is complete and runs like REAL commuter line, not just a few train in the AM and then nothing all day until the return in the PM, should Sound Transit to be looking at little spurs that benefit a select few. I'll be voting NO.</p>
PIERCE COUNTY	<p>Can't read the drop-down on my device.</p> <p>Pierce and south king county were bait-and-switched on ST2. Due to that, I am opposed to proposals that don't make up the difference by finishing what was approved in ST2 prior to beginning new ST3 work for areas that have already seen ST2 improvements. Based on the plan that I've seen so far, I'm a "no" vote on ST3.</p>
PIERCE COUNTY	<p>Greedy waste of money. Sound Transit is a big money suck and always over spending and past deadline. Stop it.</p>
PIERCE COUNTY	<p>Bus service hours need to be extended in many areas to support members of the work force. Many jobs have hours of operation which are longer than bus service in many areas. Being a woman 58 years of age, I have had to walk 3 miles from home when getting off work after 8 pm due to bus service not being provided after that time.</p>
PIERCE COUNTY	<p>Expand 167 Hot Lanes from Renton to Puyallup North &amp; South. Carry 167 to connect to I-5 and 705. Expand Sumner and Auburn to Bellevue &amp; Seattle Rapid Bus service</p>
PIERCE COUNTY	<p>Please make South-bound Sounder route run later each day</p>
PIERCE COUNTY	<p>Need lightrail connections from gig harbor to seattle</p>
PIERCE COUNTY	<p>Stop putting the taxes on the the people who own automobiles. The amount of time to get the light rail to Tacoma is absurd.</p>
PIERCE COUNTY	<p>speed between major stops needs to be priority with bus and or uber/taxi service from there, big trains and what little light rail we have over paid for already should be used to get the most people moved the fastest way possible.</p>
PIERCE COUNTY	<p>Rural zoned areas in Pierce County where there is no transit allowed should not be included in voting for RTA projects that have no direct benefit. You are taking away the opportunity to ask voters to support other projects here at home like sorely needed new school facilities that will be completed long before any of the ST3 projects in the Pierce County area. And, because of the RTA, the population of King County carries the vote and the outcome.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	This plan is budget high....and until I can see motivation on the part of Sound Transit to serve the public - in the advertised schedules - I will not support this measure. I ride the Sounder from the south. I take the first train. It is chronically late. There are chronic mechanical failures. There is chronic lack of communication with the passengers as to why the train arrives late or what has broken down. We see no maintenance done on the train until it breaks down. We have just absorbed a substantial fee increase for fare and what do we get? Late trains...very late trains...damn late trains and the attitude we are on the receiving end is that we should be grateful that they even show up. This is not rocket science. Our employers expect us to start work at 6 am....not 6:15, 6:20, or 6:45....you are a service connected organization....for the love of God, just get us to Seattle on the time schedule so that we don't have to run against red lights to make our connections and so that we can get to work on time....I see the South Sound is getting short shrift of services - and I see that we are the ones that are supporting the whole infrastructure. The train - at any given time - is full to capacity. Lynnwood has a huge parking facility and lots of buses.....give them a shoulder lane on I-5 and call it good. Seattle has King County Metro to serve the needs of King County residents. It is those of us in the further out cities of Puget Sound that need the services of rapid transit. We don't need more stations. We need adequate parking garages, longer trains, and timely service.
PIERCE COUNTY	Can't wait to jump on a link light rail vehicle here in Tacoma and get all the way to Everett.
PIERCE COUNTY	I would like to note that I have just used the rail system in Boston during the Marathon and found it to be both quick and affordable (even during a major event). I believe a rail system is much more important than additional busses, which could suffer from freeway congestion. The light-rail (subway) in Boston made a major city accessible. If bus routes ran to and from light-rail stations instead of complicated routes, much congestion and time would be saved.
PIERCE COUNTY	I'm curious about the timeline for the Orting extension.
PIERCE COUNTY	I have no confidence that the project will be done on time and within budget, therefore I will oppose. Also I understand there is no expiration on the property taxes. So no way.
PIERCE COUNTY	I think even more buses should be added between Tacoma and Seattle at peak hours, particularly Seattle to Tacoma in evening. This as well as other bus service should be added soon after taxes are raised and bus service should decline as other improvements are completed.
PIERCE COUNTY	I am very happy to see parts of eastern Pierce County included. I live in Orting and the traffic congestion is getting noticeably worse and worse. As I see the communities of Bonney Lake, Orting and South Hill Puyallup continue to grow I know it will do nothing but get increase. Also happy to see plans in the works to address JBLM. I dread driving from Tacoma to Olympia more than Tacoma to Seattle.
PIERCE COUNTY	All of the existing transit plans do not have any buses that go into the Boeing plants at Auburn or Fredrickson. Also there is no bus service to Orting or Graham anymore although they continue to pay RTA Taxes. The promises of the past have not been done so why should we pay more taxes for something that will be changed in the future.
PIERCE COUNTY	Na

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	I lived in Europe for 4 years and truly value the efficiency and effectiveness of good mass transit. We need to get gas-guzzling cars off the roads. It is essential to have good, reliable transit .
PIERCE COUNTY	I do not use any of these transit options, because they are not a convenient and/or cost effective way for me to travel, they do not impact me, because they do not serve my area readily. Do not tax me to pay for something I do not use.
PIERCE COUNTY	Traffic to Tacoma from Seattle is awful. With so many commuters being forced to move to Tacoma and South puget Sound in search of more affordable housing, I would strongly urge a harder look at getting the trains and light rail to Tacoma sooner. It would have the most benefit at alleviating traffic woes to commuters who could seek to ride the trains during both rush hours.
PIERCE COUNTY	I don't use transit at the moment but there is an 80% chance that I will be taking a job in Seattle in the next month or two that will require me to commute from Fircrest to Seattle daily. I have always strongly supported light rail and transit even when working at home and knowing that I will have improved transit options to look towards in the future will be of great interest. I am very open to add'l tax levies and bond issues to support this and will be glad to support transit expansion.
PIERCE COUNTY	I would love to use public transportation, but it is not available where I live.
PIERCE COUNTY	I live in Orting there is nothing in the way of buses or rail comming or going from my community. I ride the train into seattle everyday. Love it the best commute. In order to get a parking spot in sumner i end up having to leave for work around 4:30 in the morning just so a can beat the others trying to park there. It would be good to have some type of transit that would go through the orting community taking riders to the sounder train. This would help with traffic on 162 and parking at sumner and puyallup train stations.
PIERCE COUNTY	This project should be Federally funded. Taxing the average person as much as these proposals are asking for is wrong.
PIERCE COUNTY	I know, for many, there's a need for commute alternatives to driving. I personally don't have to deal with a daily 15 commute but might have a need in the future. My problem is with the completion dates. By the time any of the projects is completed I, hopefully, will be retired. So, I'll basically be paying \$200 a year or more for something I will probably never benefit from. That's a sobering thought. I would really rather put that amount of money towards my mortgage, taxes, insurance and retirement.
PIERCE COUNTY	Light rail or sounder from Orting to Sumner to help ease traffic on HWY-162

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	I have lived here in Seattle/Tacoma area for a while. I notice that you really do not take into account the urbanization plans you decide to privilege at the expense of neighborhoods and their inhabitants, seeing the population abstractly and concentrating on speed rather than accessibility. You also do not realize exactly how many of the population you have forced into isolation by your decisions. You do not listen to complaints (I have made many and have been treated rudely and lied to about complaints. I have also talked to many bus drivers who indicate that you do not listen to their reports for fine tuning routes or schedules. As someone who has become increasingly arthritic, I have noticed that your speed-goal system is particularly vicious as I have to walk long stretches where I used to be able to make connections but can no longer do so, sometimes up to half an hour of walking. And I do not always get a bus driver to accommodate me in lowering the entrance/exit at a stop, which slows me down even more than gimpy legs do in themselves as I have to be careful I can negotiate the distance between the bus and the street (not even the sidewalk sometimes).
PIERCE COUNTY	administration costs should be kept to a minimum with a focus on schedule.
PIERCE COUNTY	The auto excise tax increase could be a deal breaker.
PIERCE COUNTY	Light rail from tacoma to SeaTac is my priority
PIERCE COUNTY	I recognize the importance of this plan as the traffic congestion gets more intolerable by the day, and also to combat global warming. In these ways, I support it, even though I likely will no longer be alive by the time it is completed. I have never liked using public transportation, and I would only use it in an emergency, or if my license was revoked. I oppose supporting the plan because as a retired person, my income is so small that I can barely afford my necessities, and my income will never increase, however, all the bills increase every year. I am drowning in debt, and I cannot afford another \$200 per year.
PIERCE COUNTY	These projects should be moved forward even MORE QUICKLY than planned. The freeways are crowded to the point of stopping traffic on most days. These should not be optional plans. They should be included as normal in the state budget.
PIERCE COUNTY	We do not have any mass transit available with useful stops near where we live. There are few bus shelters, and those that are in place are often in use by people who are not going to use the mass transit; they are usually easy to identify as they wait in the bus shelters for their drug dealer to pick them up. In addition, the weather here does not lend itself to waiting in bus shelters in the dreadful winter and early spring rain that pelts us every time we step out. We do not take the bus for this reason, and because the buses are unpleasant.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	There should be a better system in place for getting from Seattle to Sumner Station when there is a problem with the trains. The suggestion that's been posted on the website in the past is to take a bus from Seattle to Federal Way, wait for a bus from Federal Way to Puyallup, and wait for a bus from Puyallup to Sumner...a process that takes about 4 hours. That's completely ridiculous. If there are complications with the trains, all 577 busses should automatically become 578 busses so that it only takes 1 1/2 hours or so to get between Seattle and Sumner. For one reason a lot of people who take the Sumner train have to catch a bus from Bonney Lake Park and Ride to Sumner and those busses only run when trains are supposed to be running. If it takes you 4 hours to get back to Sumner station, there's a great likelihood that you won't be able to get a bus back from Sumner to Bonney Lake.
PIERCE COUNTY	light rail to tacoma ASAP.
PIERCE COUNTY	I DO NOT WANT TO PAY 400 DOLLARS A YEAR MORE ...MORE!, on my taxes already. I am being taxed right out of my home! I moved to a rural place in Orting BECAUSE I WANTED TO LIVE IN A RURAL AREA....WITHOUT all the trappings of a city. I AM VERY MUCH OPPOSED TO THE RAIL
PIERCE COUNTY	Take property tax out of the funding option. I have some control my sales tax and motor vehicle excise tax expenses but not how much property tax I pay.
PIERCE COUNTY	Rail provides the least bang for the buck in public transportation in the modern world. Technology is rapidly transforming our metropolitan area with automation coming online in automobile/truck/buss technology, along with more flexibility on where we work from. The only rail projects that ever made any sense in this area was the Sounder service because that rail already existed and running a high speed rail to a bedroom community beyond the Puget Sound region. The next house I buy WILL BE OUTSIDE THE RTA because these taxes being used to serve so few do not reflect my opinions.
PIERCE COUNTY	Your proposing too little to late ... I fully intend to get the hell out of Puget Sound within 3.5 years when I retire ... and never look back ... The so obvious problem is politicians encouraging industry to the region then giving them tax breaks when the opposite should happen as all the new industry creates the traffic problem, construction makes a mess of our roads and makes the area unlivable for those of us here!! The politicians are a greedy bunch relishing in all the tax revenues created by new housing that in turn creates a bigger mess (and bigger government) crappy traffic ... we never bother to go to Seattle anymore was a traffic nightmare and over priced everything ... Your killing the wildlife(Puget Sound mammals) and polluting the atmosphere you need to start promoting ZPG not encourage more humans to live work and reproduce in the narrow strip of land between the Cascades and Puget Sound ! Ps: I work in govt and am nowadays embarrassed to admit it !

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	We absolutely need more public transit in the South Sound. Development is already too car-oriented and this is hard to correct. But, I look at how much more will be added to our taxes, and I balk. Yes, it's just a few hundred extra a year--but this is on top of the "few" hundred extra for the parks, for schools, for road maintenance in Tacoma, etc., etc. To me, this is the proverbial straw breaking the camel's back. And of course, Tacoma and the South Sound reap the benefits of the plan WAY down the line. What we need most of all is to fix the state tax system in Washington. We cannot keep nickel and diming everyone through property taxes. Lobby for an income tax. That's how state's with good infrastructure operate (property, sales and income tax!)
PIERCE COUNTY	I see light rail as overly expensive and not necessary. Stick with buses and commuter rail.
PIERCE COUNTY	I know projects were dropped from ST2 due to funding, particularly in suburban areas. I don't see anything here that addresses restoring and completing the package from ST2. You will not have my support until those shortfalls are clearly addressed in ST3. You couldn't deliver the complete ST2 package, why would I trust you to deliver ST3?
PIERCE COUNTY	Until this project more directly affects Tacoma in a more timely manner and eliminates bus improvements I am opposed. We need and want the rail we were promised in Pierce County not the tidbits and scraps of rail we get after King County is serviced.
PIERCE COUNTY	We need to act now to relieve congestion and carbon emissions. It will never be cheaper to do so than it is now. Let's get it done!
PIERCE COUNTY	Light rail needs to be expanded immediately, buses should be a last priority. Light rail connecting everett and Tacoma with Seattle and Bellevue should be highest priority as people are forced to commute from these areas due to rent hikes and lack of rent control, low and middle income people are forced to commute an unreasonable amount of time to get to work. By the time these proposed projects are completed they will already be out of date and too narrow in scope to be beneficial. We need a reliable commuter train system with secure parking structures ASAP.
PIERCE COUNTY	Rail transportation is an outdated method of mass transit, and will barely make a dent in mitigating the traffic accompanying the masses of people expected to move into this area, over the next 25 years. Increasing efficiency and maintenance of the existing highway/roadways would leverage expected technological advances, in autos and personal conveyances. Stop the attempts at social-engineering our society, in the hopes of getting the public out of their cars.
PIERCE COUNTY	A mini station on existing rail line near Orting to serve East Pierce County cities, communities and scheduled developments, would delay total gridlock on SR 162, 410, and 167. Thanks for having it on the Planning list.
PIERCE COUNTY	Although I selected rail to Tacoma Dome and Sounder from Lakewood to DuPont as top 2, I also encourage support of downtown Tacoma to Tacoma Mall. These three are critical-critical expansions. Appears to be long-range to construction; earlier is better. Up to 17 years for completion seems to be a long-time.
PIERCE COUNTY	More light rail/sounder connections in the south! Tacoma/Puyallup all the way down to Olympia.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Why extend light rail to DuPont, a "city" of fewer than 10,000 and not invest in a solution that would have real substantial impact by extending it farther south to Olympia, where tens of thousands of government employees commute to 5 days a week...!?
PIERCE COUNTY	So you're asking us to fund a project that our children get to make use of. Please finish it for them.
PIERCE COUNTY	1. Tacoma to Redmond - fast train. 2. Timelines too far out in time. \$200/year for 25 years? 3. Focus on train lines. Mass transportation system for the region and the execute swiftly. 1/4 current timelines
PIERCE COUNTY	Just friggen do it already. Quit studying, start building.
PIERCE COUNTY	Don't know if respondents would interpret this as a "threat", but I would find it helpful to share how much the failed mass transit proposals would have already accomplished and at what cost if they had been approved -- compared to what we now have to spend and the likely even higher cost of further delays. I would argue, therefore, for a quicker timeline
PIERCE COUNTY	I absolutely will not support ST3. As a Piyalup resident, you are asking me to vote to raise my taxes when we have been completely left out of this package AND we still haven't received a darn thing we were promised under ST2. Not only will I not support ST3, I will actively campaign against it.
PIERCE COUNTY	The timeline is to long. By the time it is finished it will be already over crowded. The need is today, not 25 years from now. There needs to be better forethought put into the expansion time frame.
PIERCE COUNTY	Please run Sounder train all weekend besides games.
PIERCE COUNTY	Why don't you utilize the Sounder train you already have in place by adding more train times, specially earlier so that workers who start early in Tukwila Renton area can utilize the service. Hwy 167 is busy @ 4:30 am since you train times to not accommodate the many worker who start early in those areas. Also if you ran trains on the weekends to Seattle I think many people would use that service as well. You just want to spend more money to upgrade which will take 25 years, but by using the train system you have now it would provide immediate relief.
PIERCE COUNTY	More sounder train runs from Tacoma. Ending at 8am is far too early.
PIERCE COUNTY	Light rail is cool, but expensive and inflexible. BRT seems like a similarly static option (especially with dedicated separated lanes) at a fraction of the cost. The best value for the entirety of the transit system seems to be the mass movement of the regional authority (Sound Transit) to move people to the local authorities (Metro, Pierce Transit) so they can move folks within their systems. Sound Transit's continued and increasing demand for limited resources has been harmful to their local partners, especially in the South Sound where the perception remains that Sound Transit is not spending resources commiserate to the need or promise. The timelines for the projects in the South Sound in ST3 helps to reinforce those perceptions.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	<p>Yipes. For my participation in this survey to be meaningful, I have to have a knowledge base that greatly exceeds what the average citizen possesses. How can anyone living in the Puget Sound Basin know all the detail that would allow them to distinguish between the value of the various geographic and transit options you offer? That said...</p> <p>I don't know how this survey result will be used. Should I select "strongly support" for everything? That's how I feel. But that response doesn't help you prioritize. Or should I just choose my local projects, since those will benefit me? But that makes it a beauty contest.</p> <p>I want all of this transit improvement done, and I'm willing to be taxed to pay for it. Our highway system is a mess, everyone knows it, but nobody wants to undergo the pain and inconvenience of paying for replacement. So how should I answer the survey to encourage you to craft a voter authorization that actually has a chance to pass? I want it to pass, so I'm happy to go along with whatever works to get that voter approval. I just don't know what that is. I hope that you do.</p> <p>Lastly, I indicated "somewhat support" for payment, because I'm concerned that payment will fall on the backs of those who can least afford it. Who may well be those who need the mass transit the most. Our sales tax is regressive. I know that's an entirely different can of worms, but it plays out here in a big way. I believe the work should be funded, but especially by those (like me) who own property, and by those who own cars. Car tabs should be a major chunk of the revenue, since a reduction of traffic will benefit them the most.</p> <p>But I fear that step would discourage voter approval. It won't happen without voter approval. So at the end of the day, I support whatever steps the people who actually are good at politics believe will be necessary in order to get the project approved.</p>
PIERCE COUNTY	You must be out of your mind. The cost is prohibitive.
PIERCE COUNTY	These projects need to be completed before 25 years. We need rapid transit in Pierce County to Seattle NOW. NOT BUSES. I don't want to be paying for something that will not benefit my family or the area I live in. Get something going in the south end NOW!!!!
PIERCE COUNTY	Why is it taking so long? I'll actually be dead before there is direct light rail to SeaTac Airport. This is America! Bring back the CCC---get these young men off the street and building infrastructure!
PIERCE COUNTY	I am TOTALLY opposed to this boondogle and it's accompanying monstrous tax requirement. UNTIL THIS STATE STARTS RECOGNIZING THAT WE WANT ROADS FOR CARS RATHER THAN TRAINS AND TAXES, FOR THE BENEFIT OF THE MINORITY WHO WANT TO LOOK LIKE EUROPE, then I will oppose any further proposal for such a project.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	If the public views the plans as too Bellevue helpful I don't think they will support as much as the feeling is that the Bellevue/Redmond areas have the more wealthy people that will only drive their cars anyway (and may not vote for it). We need good, reliable, SAFE transit in areas where the regular workers live and work. There seems to be a economic disparity in some of the plans that should be removed so ALL can utilize and depend upon transit as they do in the east.
PIERCE COUNTY	Huge overreach on money
PIERCE COUNTY	With Tacoma being the 2nd or 3rd largest city in the state, there should more priory linking Tacoma up to the light rail.
PIERCE COUNTY	It's a shame that there isn't a shuttle bus that comes to homes that have people who have disabilities. I have a daughter who has autism spectrum disorder and works on Weds and Thursdays and it makes it hard with us have 1 car to be able to make appts when it comes to working around her schedule. If shuttle buses were still working to where they could come and get her and take her back come, it sure would make things a lot easier especially if she should change jobs in the Puyallup area.  Thank you [name]
PIERCE COUNTY	Link the sounder with the light rail, this will get cars off the interstates.
PIERCE COUNTY	Need to go south faster. That is where people are moving too
PIERCE COUNTY	I see the core of the plan to be to provide light rail service AND strengthen commuter rail service for the highest traffic routes, i.e. Tacoma - Everett. These routes must be supported with adequate parking or good feeder local bus services -- most of us do not live within easy walking distance of the stations, and while I admire and support the growing number of cyclists, a large proportion of our residents aren't going to get on a bike. And there is the timing -- 25 years for Issaquah and Everett? Surely you joke? That is more than a generation! I try to use transit as much as possible, mainly to the airport and downtown Seattle. But it takes two buses to get as far as my closest station, which nudges me back to driving in a single occupant vehicle for these trips.
PIERCE COUNTY	At \$200 per year per adult that would mean a retired couple on a fixed income would be paying \$400/year which we and a lot of other retired people simply cannot afford.
PIERCE COUNTY	More transit now
PIERCE COUNTY	HOW DO YOU PLAN TO PROTECT THE CARS PARK AT THE STATION, I HAD MY TRUCK STOLEN TWICE
PIERCE COUNTY	I am and have been opposed to the extreme cost of link light rail and it's very limited rider access. The same amount of money could have been spent to double or triple the bus service through out the entire ST area.
PIERCE COUNTY	I understand that the federal government made a large contribution to the transit system. This should be reflected visibly in the community. A little PR goes a long way.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Why not use bus rapid transit early on sounder and light rail projects until rail projects are operational, then move to permanent bus rapid transit Routes? By any measure future rail projects are most critical so provide some relief there ahead of rail Portland and Vancouver BC both did this and it worked well!
PIERCE COUNTY	The 3-pronged approach to taxation without a sunset clause is unfortunately doomed, particularly because many in non-Seattle centric areas won't see ST3 improvements until after 17 years or more. Most people have a hard time fathoming that long of a wait. Past performance for meeting deadlines suggests that the wait time could be much longer. Also, there needs to be more of a discussion of austerity. 2014 figures show 6 people employed by ST3 with incomes exceeding \$200K, 22 who made > \$150K, and around 200 who made \$100K. Seems very top heavy with high-salaried people. Why? What cost-saving measures did Sound Transit take during the recent recession? Not much info on this. Much more transparency is needed here to build trust.
PIERCE COUNTY	Try to use something other than sales tax. Our state's tax system is already inequitable due to sales tax!
PIERCE COUNTY	Currently, emphasis should be on adding buses to the transit system - it'll be cheaper and available more immediately.
PIERCE COUNTY	If the state can't find a way to fully fund public education the outlook for enhanced transportation in and out of Seattle will always take a back seat. Over time most of us find a way to live without Seattle. In fact, avoiding Seattle except for selected entertainment opportunities, becomes a way of life.
PIERCE COUNTY	How about we just build a hyper loop (yes I am serious). Our transit is already behind current need. My fear is that if we spend all this money, and if light rail and other rail and bus expansion is not completed for 20 years, by the time it is done it will be way behind the need and there will e new better transit technology like the hyper loop. Or maybe there could be a ferry from Tacoma to Seattle so people don't have to drive or take rail. Thanks for considering my comments,
PIERCE COUNTY	Increase Sounder Train operating hours to all day, instead of just commuter times. Thank you!
PIERCE COUNTY	Connect Tacoma to SeaTac sooner
PIERCE COUNTY	I can support these kinds of taxes if the fares remain affordable
PIERCE COUNTY	Building additional capacity for Sumner commuter rail station is extremely important. Extending bus service and/or rail to communities around Sumner (e.g. Orting, McMillan, South Prairie, Bonney Lake) is extremely important. Hundreds of commuters from those communities drive SOVs to the Sumner Station; need bus additional bus or rail options to get commuters to rail stations further north.
PIERCE COUNTY	Project should be delivered faster even if that means higher tax. It is needed yesterday.
PIERCE COUNTY	The plan is ridiculous. We should be building more lanes for vehicles and encouraging affordable housing so that folks can live where they work and not have to commute.
PIERCE COUNTY	More parking at existing rail stations needs to be a priority. There is road rage in the parking garages.
PIERCE COUNTY	Traffic sucks!
PIERCE COUNTY	Everett through Tacoma need to be connected via light rail. Stop worrying about bus expansion, focus on light rail.
PIERCE COUNTY	Make Sounder train available on weekends from Puyallup to Seattle.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Concentrate on light rail
PIERCE COUNTY	If you don't speed up the construction in Pierce County, they will likely not vote for the projects.
PIERCE COUNTY	It would be nice if there was Sounder Train service to Olympia. Currently I have to take the bus from Lakewood station to and from Olympia everyday along with MANY other state workers. Lots of people drive themselves to Olympia from Seattle, Tacoma and Bellevue. So another train going south to Olympia would also cut down on the Fwy traffic in the mornings and afternoons by JBLM.  Thank you for your consideration.
PIERCE COUNTY	Timeline is very spread out. Maybe too spread out to be appealing. Eight years to extend bus service? There are already too many incomplete construction projects on freeways that CAUSE traffic.
PIERCE COUNTY	I am tired of the King County centric plans. I am pleased to see an increased focus on Pierce County as many people are moving South to take advantage of more affordable housing options. We need transit to keep up with commuting patterns.
PIERCE COUNTY	We need a train service from Orting to tie into Sumner or Puyallup..
PIERCE COUNTY	The need for parking at train and transit centers can not be over emphasized if transit plan is to be successful. Sumner parking is nonexistent by 5:10AM. Consider other parking options please ( soon)! Ridership could increase considerably with available parking. Thanks
PIERCE COUNTY	Why is everything so tilted toward north end as opposed to south? South End has very little to show for years if transit support when compared to what north end, Eastside and of course Seattle gets.
PIERCE COUNTY	NO RAIL PROJECTS. BUSES ARE CHEAPER WITH FLEXIBLE. ALL PAST SOUND TRANSIT PROJECT HAVE BEEN TEN YEARS LATE AND GROSSLY OVER BUDGET. RAIL PROJECTS LOCK IN 1920'S TECHNOLOGY. I FORSEE IMPROVEMENTS IN TECH WHICH WILL BRING TRANSPORTATION TO THE USER NOT HAVE THE USER GO TO THE TRANSPORTATION.
PIERCE COUNTY	I know many people ride the bus routes, but I feel we need to concentrate on our trains and light rails. We need to move away from gas fuel and use cleaner energy.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Folks - this plan is not perfect. But we are in a PERPETUAL MOBILITY EMERGENCY in this market that threatens the environment, the quality of life, economic development, prosperity, equity, education, mental health and EVERY other axis of human measurement you can think of. 50 years of dithering have made this ALL URGENT. In fact, this plan is HALF the size it should be. There are limits to ST's funding mechanisms, but I think they need to be lifted to double the proposal. It's not pretty. It's expensive. It's inefficient. But that's what happens when an ENTIRE REGION fails - fails to plan - fails to take responsibility - and fails to spend the political and social capital to prevent EMERGENCIES. This is management by crisis and now the piper has to be paid. This ALL should have been accomplished in 1980. Our growth isn't surprising. This crisis wasn't unanticipated. The region just FAILED to face reality and start work when the other major metropolitan areas of this country were doing so. Atlanta has our subway - and now we have to build our own system with all the associated right-of-way, policy and technical barriers that come along with trying to do something in 2016 in a process-obsessed market like the Seattle/Tacoma region. We deserve what we get, and now we're going to have to pay out the rear to get it done.
PIERCE COUNTY	This survey was cumbersome to take with the map at the top of the webpage. Also, I question the validity of results for numbers 12 and 13 because they did not allow a neutral answer, while number 14 did allow a neutral answer.
PIERCE COUNTY	I am in favor of this plan but not the schedule for which Tacoma comes online. The plan should include A TACOMA extension within 10 years. This is a huge growing community and deserves better than to be placed is a third or fourth priority. I have intentionally not answer questions 13 and 14 because it is not clear if my support of taxes to finance the plan would include such a long wait for the Tacoma area. My answer will change if You articulate a much swifter timeline for Tacoma's involvement.
PIERCE COUNTY	There needs to be significant protection for the current residents, particularly black and brown folks, who may be at risk for displacement as a result of the light rail expansion.
PIERCE COUNTY	Need to have a station in Orting
PIERCE COUNTY	Too much money and too long to complete. Ridiculous to collect Pierce county taxes and see any benefits for a decade.
PIERCE COUNTY	Project timelines and cost seem unreasonable. Why not run high speed rail along I-5 on an elevated platform?
PIERCE COUNTY	Find a way to increase Sounder trains frequency and parking at the stations. I don't want to take a car to the bus to the train to the bus to work and reverse that to come home. I would rather sit in the god awful traffic. And find another way to pay for this instead of making me pony up even more money. Maybe have the powers that be look at the total budgets and find savings in other areas. I am tired of the only way to pay for improvements is to make me pay even more money. I don't get to do that in my own budget, if I want to spend more in one area then I need to cut back somewhere else. And last but not least I will be dead in 25 years and will not need transit. This is a problem now, fix it now. Look at 5 year plans not to death do we part plans.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	<p>Like parents needing a babysitter to be able to go to work, Washingtonians need state-of-the art mass transportation. Sound Transit has the vision, and our future needs methods of transporting masses of a growing population of people. Sounder Train and Link Rail make so much sense. Cars have to stop for pedestrians, and very rarely are trains or link are behind schedule.</p> <p>People should pay for their fare on buses, like people have to pay for link fare and train fare in advance. This way, it keeps people moving quicker. It makes being on time more reliable.</p>
PIERCE COUNTY	<p>I have seen these plans and talked with one of your engineers at a public meeting, who told me all he cared about was getting people to ride public transportation, and that he didn't care one bit whether it was convenient for them or not.</p> <p>Our family certainly cannot afford this proposal in this economy. Unless our economy and personal income significantly increases this increase in taxes and fees would cause us to have to move out of state. Our local school district passed new levees last year for new construction and are now asking for public bonds to be issued. We have had no pay increases in a long while government taxes and mandate fees are strangling us. This is total madness to ask people of Washington State to pay these kind of fees, especially with the newspaper stating that most employees across our country will not receive raises this year, and Boeing having announced lay-offs.</p> <p>Additionally I believe the majority of people feel vulnerable to personal assaults on public transportation, especially buses. I am fully aware of the traffic congestion in our region, which has been exacerbated by poor planning by WSDOT, and restricting lanes on major roads and bridges from the citizens who have already paid for them, unless they pay additional fees. Public Transportation officials can not be trusted to keep their word, nor do I believe they truly have the best interest of the public in mind.</p>
PIERCE COUNTY	<p>In our current economy, with little improvement in sight for a long time; we don't have the money!! We need to get rid of the impediments to traffic right now by dispensing with these preposterous "hot lanes" which are nothing but a funding source for the DOT. They make traffic worse and act as a form of coercion--eg. "Do I want to pay \$25 on my commute today or do I want to risk being late to work?" Requiring 3-person carpools throws 80% of those who used to use the carpool lanes to lose the ability, thus there is no further incentive to carpool. They figure that they might as well get in line with everyone else in the reduced general-purpose lanes. This social engineering is killing this economy and will correct itself when we all leave the state because the government won't let us get to work!!</p>
PIERCE COUNTY	<p>I would support and appreciate extended hours and weekend operation for the Sounder train. If the train offered weekend, midday and evening service, as well as service for events like Bumbershoot, ECCC, games I would choose to ride it every time. I think expanding this train and making it available would be an awesome addition.</p>
PIERCE COUNTY	<p>Light rail to Tacoma and Pierce County needs to be expedited. Tacoma's Comprehensive Plan has adopted goals of 80 million square feet of new development in its South and North Downtown Planning Areas and Tacoma is identified as one of the regions major growth centers under the Puget Sound Regional Council's 2040 Regional Plan. Seattle has exceeded its growth targets at the expense of surrounding communities and should not be rewarded with additional projects that are needed to let these other identified growth center actually have a chance of growing.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	Used to live in Boston for many years and the subway or "T" is used extensively by Boston and Boston metro residents. I know that Seattle will never be able to have the extensive subway network of older cities as Boston and New York, but an improved light rail would improve traffic - but it needs to be reliable and frequent. I used the T all the time when living in Boston and almost forgot that I had a car. Thank you for planing for the future!!!
PIERCE COUNTY	Would love to see light rail expand From Federal Way to Airport ..
PIERCE COUNTY	If you'd started building Light Rail in the earlier 80s when approached by the folks who built Vancouver BC's Light Rail system, most of this would already be done. Stop dragging your collective feet and get on this!
PIERCE COUNTY	I believe more support could be garnered among non-users of Sound Transit if the ad campaign emphasized how transit reduces congestion for drivers and facilitates visiting restaurants, museums, and music venues in Seattle. I stopped going to the Intiman Theatre, Seattle museums and restaurants, and other Seattle venues because the traffic is so bad. Commuters for whom transit doesn't work, and trades/sales people who can't use transit still benefit from transit. Help these commuters and help the restaurant/museum/club owners to understand how they benefit from transit.
PIERCE COUNTY	Sumner station has hardly any parking, this needs to be expedited on the list. Also a noon train should added to the Southline so people can work a half day in Seattle then leave early. Thanks
PIERCE COUNTY	No more taxes I already pay almost \$200 a year for tabs!! Make the riders foot the bill!!!!!!!!!!!!!! Bus drivers have almost nearly hit me several times this year I say do away with busses!
PIERCE COUNTY	Raising money for the project from property taxes, sales tax and vehicle excise tax is too much! Choose one and go with it. Taxing all aspects of our lives is not the best practice. Taxes should relate to the commuting problems like a gas tax, yearly mileage tax, taxes on new vehicles etc.
PIERCE COUNTY	It seems like this is going to take a long time to complete. We need to start somewhere!!! I want to use the sounder in Sumner but there is no parking there. I spend 2 hours daily commuting and would love to see improvement in the traffic situation which has gotten dramatically worse over the years. It would be great to have a station in Orting area. I will be retired however before any of these improvements come into place. It makes it hard for me to want to support the effort when it is taking so long for it to happen. My son is looking at commuting from Graham to Everett every day. Horrible commute!!! The Sounder does not go early enough in the am to benefit him. Why is the idea of the buses using the shoulder of the road going to take so many years to institute? That would help dramatically if more people would take the rapid transit bus.
PIERCE COUNTY	Safety at stations must be a priority. Also, get reliable and fast bus service going first to prove it can be done and offer incentives to ride. I'll take a while to get us trained together leave our cars at home, so trust will be vital . . . Safety Andy reliability and incentives are vital.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Pierce County

PIERCE COUNTY	AS A RESIDENT CLEAR UP ON SOUTH HILL PUYALLUP WE ARE VERY UPSET BEING TAXED EVERY YEAR ON THREE VEHICLES FOR A SYSTEM THAT DOES NOT SUPPORT OUR COMMUNITY IN THE LEAST. IT'S IMMORAL IN MY OPINION TO FORCE TAX PAYORS TO PAY FOR A SYSTEM THEY DON'T USE, CANNOT USE, AND DOESN'T HELP LOCALLY. ALL THIS IS IS A TAX GRAB TO SUPPORT THE HIGHER MASS/DENSITY POPULATION. MAKE THE RIDERSHIP PAY THE FULL AMOUNT- IF IT HAS THE RIDERSHIP IT'S SELF-SUPPORTING, IF IT DOESN'T IT FAILS- JUST THAT SIMPLE!!!!!! STOP TAXING SO FAR OUT. BY THE WAY, PIERCE COUNTY IS REALLY BIG ON ISSUING SFR AND MULTI FAMILY HOUSING PERMITS TO INCREASE TAX REVENUES, AND WOEFULLY LACKING ON GRABBING ANY OF "YOUR" FUNDS TO HELP THAT MASSIVE TRAFFIC ON SOUTH HILL... IF YOU ARE GOING TO STEAL MY MEONY AT LEAST USE IT TO HELP ON A MORE LOCAL LEVEL... WE HATE THIS STUPID SYSTEMATIC METHOD OF EXTRACTION.
PIERCE COUNTY	Parking, parking!!! Why is it always an afterthought for planning. You want to encourage mass transit, but for those that have to dront live in city area and therefore have to drive to a rail station, there is ALWAYS a parking issue. Which deters the use of mass transit!!! The rails are great, but how about making it even more accessible for the commuters that actually have a real commute, from kent, aubur, federal way.
PIERCE COUNTY	Tacoma has affordable housing & community. You must connect us to Seattle & better job markets with efficient light rail service. Our city is a city of commuters and I-5 hinders both the mobility of talent and economic development.
PIERCE COUNTY	All southbound sounder trains should stop at all stations (i.e. Lakewood). Please stop the practice of having only certain trains going all the way to the end. Transit options between Tacoma and Lakewood are lacking.
PIERCE COUNTY	Much more parking needs to be made available for light rail system, right now it is not utilized enough because there are not enough parking spaces, driving people to hit the freeway instead of taking the train.
PIERCE COUNTY	Seattle and Tacoma are major cities and public transportation is for everyone, we should all be doing our part to support it.
PIERCE COUNTY	The biggest problem with rail stations is little to no options on commuting once you step off the Sounder train. How are you supposed to get from the train station to your work/play location without transportation?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Subarea	Additional Feedback - OTHER
Out of District	<p>People are most excited for light rail, speeding up delivery timelines for light rail access instead of BRT would increase support for the ST3 proposal. The current proposal to include a new downtown Transit Tunnel is critical, however I'm not sure going to Ballard via Interbay is worth the very expensive cost of crossing Salmon Bay, not to mention the delays from not having a right of way (assuming the bridge across is too low). A Ballard to UW station would allow for more work to be completed for a lower cost. Any cost savings would then go towards studying the creating of another loop, to "replace" the Metro route 8. Please see this diagram: <a href="https://www.theurbanist.org/wp-content/uploads/2016/01/Ballard-Spur-and-Metro-8-overview.png">https://www.theurbanist.org/wp-content/uploads/2016/01/Ballard-Spur-and-Metro-8-overview.png</a>.</p>
Out of District	<p>ST should have omitted the schedule of projects in this draft plan. Let people begin to like the projects and accept their cost -- THEN figure out the construction sequencing. Instead, you have people fighting already over the schedule.</p> <p>Also, the BAR station has no business in this plan! Way too much cost to serve way too few riders. "But Tukwila wants it" is not an excuse to do something this expensive and non-productive.</p>
Out of District	<p>If you want people to ride the train or buses you need to make it worth their while. Make the HOV lanes from 3-6 buses only. That way we wouldn't be in traffic so long and cars would see the advantage of taking the bus. Also add more stops on the sounder train like at Pike Place Market area. Too many people are too far south for a lot of people who work in the core of downtown.</p>
Out of District	<p>Less studies!!! More construction!!!</p>
Out of District	<p>Please consider future inclusion of northern Thurston County (Olympia/Lacey) into the Sound Transit Benefit District.</p>
Out of District	<p>Sounder Rail to Olympia</p>
Out of District	<p>Fort Lewis traffic is absolutely terrible in both directions (I-5N and I-5S) during certain hours and I don't see any viable option other than extending the Sounder train service to Dupont and Tillicum to make this any better in a cost effective manner.</p> <p>I am very excited about the possibility of more train and light rail based mass transit. It actually puts us closer to our peer countries and the developing economies which all have enhanced mass transit. Hoping that we can get ST3 Sounder train moving quickly!</p>
Out of District	<p>I live in Gig Harbor, so mass transit is of very little value to me. There is one express bus from Gig Harbor, but is not useful because of the extremely restrictive schedule. Even from Tacoma, your options are limited. For those of us who live in the south sound, there is really no option but to drive your car to Seattle or Bellevue. I have always wanted to take some form of mass transit and have never been able to because the south sound seems to get ignored by Sound Transit. I hope this changes, just try and drive through Tacoma/Fife on I-5 and you can see the urgent need for a solution.</p>
Out of District	<p>Just make sure whatever you do that you provide plenty of parking</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	Many thousands of people who work in downtown Seattle live on the Kitsap Peninsula, and their options are very limited. I have a 2.5 hour commute every morning and every night. Rail service to park & ride stops would dramatically reduce commutes and open up a lot of opportunity.
Out of District	#bringbackashley The new light rail voice is not as good as Ashley. Bring her back!!!
Out of District	NO MORE TAXING US. MANAGE THE MONEY PROPERLY AND CUT SOMETHING ELSE OUT OF THE BUDGET. 17 BUCKS A MONTH?? ARE YOU COMPLETELY OUT OF TOUCH?? PEOPLE HAVE NOT SEEN THEIR SALARIES GO UP IN YEARS. GET REAL.
Out of District	I strongly support extension of Sounder rail to Dupont. With the Amtrak Point Defiance Bypass Project underway, the track will be there. This seems like low-hanging fruit and will take a lot of South Sound (Olympia) commuters off of I-5.  Widespread fraud is occurring which allows vehicle owners to avoid paying RTA and TBD fees by registering their vehicles outside of the Puget Sound area. As of 2015 DOL and DOR were doing very little about this. Please hold DOL and the licensing agents and subagents accountable to ensure registration records are accurate and everyone living in the RTA is paying their fair share.  I live in Thurston County and I support our inclusion into the RTA.
Out of District	Find another piggy bank other than property owners.
Out of District	Light rail to Lynnwood!
Out of District	To support this plan, the costs need to be shared by everyone. We do not want our property taxes raised. We need all to pitch in equally. When you raise the property tax it forces people to loose homes if the property tax is hit with all these new taxes. It is sad when the elderly loose their homes due to increase on property tax. You must come up with s better way to get every renter to pay this tax as well.
Out of District	Please consider adding a small additional Sounder station in Ballard. Riders from the north need a way to get off before reaching the downtown bottleneck. Nothing fancy. Just another stop!
Out of District	Until Light Rail can reach throughout the region, work diligently to increase the frequency of Sounder Trains into non-work times so they can be used for getting to and from Tacoma/Seattle/Everett for appointments and shopping, and entertainment.
Out of District	I really think it is important to focus on dense area first, if we could take thousands off the streets in the city first that would help with traffic much more than suburban areas. Ballard, west Seattle should come first.
Out of District	Hey how about some trolleybuses and streetcars in this
Out of District	The system needs to balance reach to outlying communities AFTER building a robust availability of mass transit within the core.....if not far reaching lines will not serve the diversity of potential users.....  Also PLEASE HURRY!!!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	Although cars on the road will be reduced by people who choose transit, those spaces will be backfilled with new drivers willing to tolerate the commute. Given the option people will opt for driving if new lanes continue to be added. Growing a tipping point of transit users by making it easier/faster than driving would only help future transit projects in getting approved.
Out of District	Sound Transit is the biggest scam in our state's history. It is nothing but crony "capitalism" (read Fascism). To continue to push the use of 150 year old tech to solve our problems is nonsense. We don't need ST or any of its proposals. This nothing more than an insider scheme to fleece the taxpayers and enrich the parasite class.
Out of District	Get to Everett.
Out of District	Why punish the people who don't use transit to be paying for this. Absolutely ridiculous.
Out of District	If there was any way to improve transit to Snohomish, I would support that particularly, as I live around there of course. In general, I much more support rail than bus just because of the dedicated nature of its pathways.
Out of District	Many of us, even living in Seattle, need to use our car just to get to transit. You also have the transit hub next to Rainier Beach High school, over four blocks from the light rail, why isn't this Hub at the Rainier Beach Light Rail Station?
Out of District	Light rail is an enormous waste of money. All previous estimates of ridership have been significantly overestimated. All light rail is doing is transferring riders from bus service to light rail. It is not reducing the number of cars on the road.
Out of District	Put pressure on Thurston County to participate please!
Out of District	The transit system needs to be fast tracked. 25 years is way too long. What are you going to do about transportation in Kent? Specifically the east side of Kent. When I try to use light rail I have to use the Tukwila station which is always full. How am I to use public transit when you don't acknowledge people outside of Seattle need to drive to the stations?
Out of District	I think buses driving on shoulders is a dangerous idea because if a car is broken down and on the shoulder, it could create a major accident. I ride a bus between Lynnwood and Seattle everyday and would rather sit in traffic than risk our bus hitting a parked car at 50+ mph. Many times people are standing as our buses are over capacity and this would be DEVESTATING.
Out of District	Ballard is not a priority.
Out of District	Charge more money to ride, not more taxes. Need better enforcement of free riders taking long and short hops, put in body turn tiles, can,t jump over only entry after paying.
Out of District	Many people, self included, would pay more in tax IF it meant faster completion times, esp. Across lake Washington to connect east and west sides.
Out of District	You are all leaches on the productive members of the community. Sound Transit is putting good people out of work via emanate domain. Go back to California
Out of District	Please prioritize the transit improvements that will allow demographics with less resources to get to their jobs and school reliably, in order to help them succeed.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	None of this will help traffic. Othing that sound transit wasted money on (that is everything they have done) has helped traffic. Sound transit is a waste of money
Out of District	Dupot access from Tacoma, and Bellevue access from Auburn area is my greatest interest currently.
Out of District	I like in Lake Stevens and commute to Downtown Seattle on the water front every morning. There are no bus services that serve the waterfront on Alaskan Way, so that is not an option for me. I would have to walk from 5th and Pike through scary unsafe areas. The Sounder is also not an option because there is no stop in Belltown, I have to take it all the way to King Street Station, and then have the unsafe walk. I would love to be able to take a bus or the train but as there are no stops on the waterfront I am unable. There are many employees at the Port of Seattle who would take advantage of this, in addition to now Expedia coming, Amazon and Google...I think that a quick win would be to build a stop for the Sounder train where there is currently and old trolley platform on Bell/Wall Street. I am currently unable to take advantage of transportation because it currently takes me 1.5 hours each way by driving, and it takes over 2 hours to take the bus or train with connections/walking. It must be faster in order to take advantage. Many of the people voting for this will be retired by the time they will feel the effects. Quick wins are necessary to achieve the buy in.
Out of District	I am very excited about the expansion of the light rail system and would use that system today if I could.
Out of District	this entire expansion plan should move MORE QUICKLY; parking needs to be available at ALL STATIONS outside the city---and don't charge for it !! make the number of parking stalls ADEQUATE; more express busses are needed from outside the city from south King County, like Renton and Burien, SeaTac and Des Moines. Increase the number of parking stalls at Tukwila by finally building a garage. Put in pocket parking lots in Sodo, for example. I'd drive from SeaTac and park in Sodo and then hop the Link. Make it easier for us !
Out of District	Please, please consider the availability of parking at transit centers. Or look into ways to shuttle people from surrounding neighborhoods to the transit centers, which would lessen the demand for parking at P&R transit stations. Parking at Park & Rides, oddly enough, is a commodity and quickly is gone (e.g., all the parking spaces are used up) by 10am weekdays.
Out of District	There needs to be Sounder Train all the way to Marysville with more time spots there just isn't enough trains North bound and with mud slides it makes it hard to commute on train so most people North drive and traffic is a HUGE nightmare.
Out of District	There are not enough Sounder cars on the Seattle Everett run. There should be additional morning and weekend scheduled runs. Otherwise there truly is no improvement to quality of life or flex work schedules.
Out of District	As a commuter (wasting over 2 hours each day in traffic) I'm desperate for a mass transit system that works! Im supportive of increased taxes to support the plan however 8+ years is too long! We need this much sooner!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	Your plan is too heavily dependent on expensive light rail. If you can build 'right of way' tracks for trains, you can build 'right of way' roads for express buses at less expense - and construction will be considerably faster. Light rail tunnels are good for within city projects where there isn't room for bus only lanes - like Ballard and West Seattle. For long freeway commutes, 'bus only' lanes make more sense. ALL freeway shoulders/bridges/overpasses should be adjusted to accommodate a 'bus only' lane. Planners need to pay attention to small adjustments that could be made NOW. The morning backup to get into downtown at Stewart from the express lanes is ridiculous! Buses should have their own lane in, or, be given right of way to bypass the lineup and cut in at the front of the line. The commute no longer ENDS at 9:00am. Parking along bus lanes should not be allowed until after 10:00am. Restricted downtown 'bus only' lanes should be provided during the evening commute as well so that buses can run on time. ALL routes should have ample parking provided in each neighborhood. People will not use transit if they cannot park close to a station. People will not use transit if they have to make inconvenient connections. The survey you need to send out, is what has to be done to get commuters who DO NOT currently use public transit, to start.
Out of District	Add more lanes to the roads
Out of District	Light rail needs to move ahead quickly. Public transport in the Puget Sound is worse than anywhere else I've been. It's unreliable, unusable, and doesn't exist in areas it needs to. However, the system also needs to pay for itself. The system needs to be developed with no cost to tax payers. It should be a user pays system and it should be profitable. Other transportation systems can be profitable, there's no reason why this one shouldn't be. However, it requires upfront investment to make the system usable. However, it's ridiculous to expect residents to foot the bill, especially considering the public transit system has not serviced them in the past and it's questionable whether it will in the future.
Out of District	Additional transit needs to be affordable for low-income residents and accessible by low-income neighborhoods.
Out of District	commuter rail along I-5 corridor makes sense; if people knew they could get north or south along I-5 without sitting in traffic, they'd use it.
Out of District	Need a rail link like the sounder from Tacoma to Bellevue, or a direct express bus that does not go through Seattle first. The lack of being able to bus between Tacoma to Bellevue direct means longer commutes for bus travelers, leading them to use their cars instead which is not as good as using mass transit.
Out of District	Why no expansion of Sounder North? Why will it take until 2042 to bring light rail to Everett? I see nothing in this plan to benefit Snohomish county north of Lynnwood. I'm all for transit projects, but it seems to me that King County is becoming the biggest benefactor of Sound Transit.. I can't vote for Sound Transit since I live in Island County, but I do use it.
Out of District	If this all of this were put in place tomorrow, I would still not be able to get to work without driving my car at least five miles. Even given more reliable/faster transit times, the commute would still take longer then the just driving but without access to a restroom. Please include restrooms! (Go European! If the citizens of Washington state are willing to pay to drive on a road/bridge, we can pay to use restrooms with attendants)
Out of District	My main frustration with the light rail system is the slow above ground segment in South Seattle. It makes it a lot less attractive to use, and to expand a system with that handicap. I think it reduces ridership.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	Ah, ST3 takes 25 years to fix any transit woes we have in Tacoma. I will be canvassing hard to defeat it, so Pierce Transit has a flying chance in Hell of passing a levee for better LOCAL bus service. Go away Sound Transit, we do need your \$\$\$\$\$\$ light rail
Out of District	<p>Avoid using property tax to fund transit. This tax should be used to support other societal priorities like education which shouldn't compete with transit for funding or reduce the likelihood of voter support for additional property taxes to support those priorities.</p> <p>Accelerate project &amp; service delivery as much as possible, but don't sacrifice good public involvement or funding partnerships (e.g. FTA \$)</p> <p>SR 522 BRT: this is a great next step beyond the good bus service there today but needs to be carefully planned. It should only be routed to the 145th St LRT station if there is a fast, reliable pathway along 145th, and the replacement service for the Lake City-Downtown market is provided (e.g. operate Metro Route 41 between Northgate Station and Lake City Way/145th St)</p> <p>Lynnwood-Everett LRT: it should be a high priority to complete the LRT spine to Everett (and Tacoma). Snohomish and Pierce Counties have been supporting and enabling LRT to be built thru Seattle for decades in anticipation of extension to their communities, and it is time for Seattle to reciprocate. However, the Paine Field deviation makes little sense since most employees at Boeing and nearby aerospace firms live east and north of Everett, not south. Getting those workers to/from Paine Field from those areas can be done more efficiently with dedicated, express bus service from Everett Station and/or surrounding communities. Light rail from the south will not serve these riders, and an LRT connection is overkill for the rush hour demands of those employers. If Boeing wants light rail to Paine Field, they should pay the extra cost to get it there v. routing on I-5.</p> <p>Ballard &amp; West Seattle LRT: these lines are critical to serving these burgeoning areas and providing alternatives to driving in the constrained corridors that connect them to downtown. Further, connecting these communities with LRT should be paramount over other ST investments in Seattle like infill stations at Graham, 130th or Boeing Access Road.</p>
Out of District	One of the most important projects on the book is the Dupont Sounder Station and extension of the South Sounder System
Out of District	Parking at existing sounder stations like auburn and Kent are critical. Your ads say ride the sounder but many don't because they can't park. Fix this first. Parking at existing stations comes before building anything new.
Out of District	Please do it sooner. Let's go on a war footing to make this happen before I die!
Out of District	If you could do it before I retire in 25 years, that would be great.
Out of District	I don't like the words , 'finish the system' I don't see ST3 as finishing the system, I see it as not a bad start to ST4.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	I am extremely thrilled at the thought of reliable public transportation across the Puget Sound area. The ability to travel seamlessly to/from communities would be a great benefit. It would also be nice to also incorporate light rail options across the 520 bridge.
Out of District	Need to focus first and foremost on completing north south light rail from Everett to DuPont. This proposal is too Seattle Centric. What about us poor and disadvantaged people in Pierce County? This is not an equitable proposal. It's for the rich people in Seattle and Bellevue. Where is the social justice and equity for those of us who have no voice. Please build light rail that me and my family can access in the South Tacoma and Lakewood area.
Out of District	25 years is way too long to complete this. And it isn't a very comprehensive plan. I'd like to get from Snoqualmie to Puyallup without having to go through Seattle or Bellevue. Or several other places along the way. If I'm going to use public transportation, I don't want it to take 2-3+ times longer. The timeline of this plans seems like something that should have been done 25 years ago.
Out of District	Build uw to Ballard in ST 3; build the system sooner! Don't mind paying for it but needs to happen soon
Out of District	By 2050 when light rail is expected to be finished, we'll have self driving cars, drives delivering packages, and who knows, possibly jet packs. Technology will advance faster the WA State Govt and these projects ever will!
Out of District	It will be one massive failure at huge cost for no benefit except to the contractors and unions who build and maintain it. It costs too much, will hurt our economy by raising taxes and is even dumber than our Governor.
Out of District	Please add in planning for express TRAINS instead of only busses. It will take too long to commute to Seattle on the currently planned system from the North or South while stopping at all stations.
Out of District	25 years is to long. We need these done in half of that. Strong transportation system equals continued strong economy!
Out of District	I work in the Issaquah area and am moving back after a 17 year absence... I remember voting to support Sound Transit when it was first formed and would have hoped to see more by now, but money is tight and nothing is free. I get it... let's just get started so I can commute to Seattle before I retire in 25 years.  Back in the olden days, private railroads and landowners would work together to extend commuter service to new suburbs... it upped the value of the land and provided a steady stream of fare paying customers. I would like to see an investigational study into tying increased density to additional private funding for infrastructure. We require builders to cover the cost of street improvements at their sites, why not also require them to shoulder some of the burden for transit improvements.
Out of District	Parking at Light Rails is a quality of life issue for both those who can afford to buy/rent near a station as well as those who cannot. .

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	PLEASE do not lump bicycling infrastructure and pedestrian infrastructure into the same question. There is a huge difference in user base for both (95% of people are pedestrians. 100% of people using transit are pedestrians at some part of their trip. Cyclists are seasonal, single-digit share of commutes). There is a huge difference in infrastructure disruption for both. (Pedestrian infrastructure almost never disrupts transit or vehicle operations. Bicycling infrastructure almost always does.) Ask the questions separately and you'll see the difference in support with cycling infrastructure getting less support than pedestrian infrastructure.
Out of District	We are so far behind on mass transit. Anything we can do to get people off the road would be great. What about having the Sounder trains run more often during the day and on weekends.
Out of District	Projects further out of downtown Seattle should be completed sooner. Such as Ballard, west Seattle, Lynnwood, and Bellevue.
Out of District	Well. If I'm going to be paying for the system (in \$200 a year) then I want to USE the system. We need this done quicker. Before I'm too old. We need the timeline condensed. In 10 years EVERYTHING needs to be done. If I could be guaranteed use in my lifetime, I'm more agreeable to spend more tax money on it. Any thoughts on asking for 'donations' and people could then get 'free fair' tickets when the system is complete depending on their 'donation' amount?
Out of District	It is very disappointing that the eastside light rail extensions are factored for 25 years out when that is where some of the largest gains in population have been seen. Every morning I drive I-90 and sit in traffic staring at the blank space of grass and trees between east and west bound. The space for rail is already available, why 25 years, and why can't local fundraising efforts be made to move projects up in time?
Out of District	Your over budget, Late on what was projected time to open many stations. And you want more Taxes to cover your incompidance. Keep your hands out of my pocket.
Out of District	It's about time. This has been needed for a very long time.
Out of District	Ballard to U district!
Out of District	costs are way to high and falsely stated at only \$200. The cost should be simplified to a flat cost of \$100 per year per adult.
Out of District	Attention & consideration needs to be made for people who have mobility issues and cannot walk for several blocks to rail stations, bus stops, etc. Some people HAVE TO USE their cars as part of their transportation needs. Many people are not in wheel chairs but still have significant mobility issues. Some people's vision of ultimately a "car free" society is scary to folks like me who have mobility issues.
Out of District	South seattle would benefit from the graham station (and general lite rail development) because of low income housing, distance from downtown and current growth trend. Attention needs to shift to this area to encourage growth in a direction that the community agrees on while promoting effective development in transit.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	Self-Driving Vehicles are around the corner: Tesla has some SD features today, Honda has announced 2017 models with some SD features, and full-autonomous vehicles will be common by 2020. Instead of building special-purpose rails, self-driving vehicles -- with capacities ranging from 1-2 people up to 50 or more -- will make much more efficient use of existing roadways, dramatically reduce congestion, minimize door-to-door travel for individuals, and be dramatically less expensive than current bus/car/taxi/parking solutions. Contemplating the build-out of rail system in the face of this technology is an utter waste of time and taxpayer dollars. Let the free market work its magic.
Out of District	This costs too much, and won't do a thing to end road congestion. The only thing this extra tax will do is cause people and businesses to leave our state.
Out of District	50 billion dollars? Are you kidding me. I don't use public transit. Since I'm 66 yrs. old, you're asking me to spend my own money on something I'll never see completed. What about people on fixed incomes? I could go on and on how offensive this proposal is. What's scary about this State[like Cal,] people seem to have no problem every project that raises taxes and fees without any accountability. Try finishing a project on time and on budget.
Out of District	Taxpayers get throttled by the inefficiency of the Sound Transit system.
Out of District	No traffic lanes should be toll lanes or exclude traffic with the exception of one HOV lane. Anyone coming from any area in the state needs to be free to use the highways for which they also have been tax. Parents with small children or the handicapped and elderly need access to all hwy and streets without toll or exclusion. Parking for businesses should not be limited by bus lanes, bike lanes or excessive handicapped parking.
Out of District	What about more roads for cars?
Out of District	There should be an express bus from the eastside Kirkland [kingsgate area] to Seattle. Taking Metro 255 takes too long and there are no ther buses that run directly from kingsgate to Seattle
Out of District	Ridership of light rail is not high, please enhance the current road system. Stop tolling I405 Bellevue to Lynwood.
Out of District	I think it needs to be seriously taken into consideration that as you expand along the freeway, putting in the light rail and station that you are displacing people. Since these homes are tight next to the freeway they are mostly low income, people of color, and elderly people who have no where else to go. Please consider the communities and neighborhoods that you are breaking up. Have some plan in place to support those whose homes you are taking. And please, grow slowly and with community input.
Out of District	It is time to stop building freeways and get mass transit running
Out of District	Instead of offering just two choices of a field of 10 or more, why not 5? By the way, I strongly support Light Link Rail and Sounder Transit.
Out of District	I am very willing to pay my share of this project, but this timeline is ridiculous. I, nor anyone I know, will ever support this with a completion date of 25 years from now. 15 years max for full completion or I will vote no.  This is going to fail big time...

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	While a few projects have been completed as expected (Yay 520!), a few have been "bait & switch", (the 405 HOT lanes. The tax fund approved in the early 2000's was supposed to give us an additional 405 GP lane with the HOV lane) and just a waist of resources (the 167 HOT lanes). There does not seem to be any guarantee, implied or otherwise, that any of the assorted subsets of the plan cannot or will not be changed at the whim of some political social engineer in a position of authority. The agencies involved are also masters of significant cost/time overruns. Considering past behaviors it will take a A LOT of convincing for a project list of this magnitude to get my vote.
Out of District	I am extremely upset over the cancellation of Metro bus route 66. There has been bus service on 5th Ave NE for the past 90 years and now it doesn't exist any longer. This imposes a great hardship on me. Eric Stegman
Out of District	Sound Transit - Underwhelming, Over Budget, Bloated and Blowing past deadlines
Out of District	The costs indicated for the rapid transit system is way too much and the estimated tax increases do not warrant this system. The question is whether I want to pay \$2.50 per mile or 50 cents per mile of traveled. What do you think the answer would be? Under the current proposal, I believe my taxes would go up by over a \$1,000 per year and for what? A system that wouldn't be completed in my lifetime and would add a total of \$40,000 to my taxes over its construction phase.
Out of District	Please consider adding more passenger cars to the North Line Sounder Service
Out of District	Wait 25 years for at-grade light rail on 15th Avenue NW and Elliott Avenue West and a rail-only movable bridge over Salmon Bay? WTF?!?! It'll have no more reliability than a bus if there's a drawbridge giving right-of-way to sailboats and then it's at-grade along 15th Ave and Elliott (unless you mean 100% grade separated - with no crossings where cars/peds will get hit on a semi-regular basis).  And the Ballard/Downtown route includes a tunnel through the Uptown neighborhood into Downtown Seattle - bypassing the dense but poorly-served SLU area?!?! Traffic on the 'new and improved' Mercer is a mess, and yet there's ZERO transit on this major east-west corridor! Why not route the light rail tunnel under SLU between Westlake Station (or Capitol Hill) and Lower Queen Anne?  Between this and the light-rail extensions in Tacoma that will also be stuck in traffic at-grade, there's NO WAY that I would vote for this - especially if I'm waiting 25 years!  I'd pay twice as much for a system delivered twice as fast - but I'm not willing to pay anything for a cobbled-together system full of half-measures that will be obsolete by the time it's finished.
Out of District	It would be great if one day in the future Puyallup and Sumner would be included in the light rail project. Thank you.
Out of District	retired people on fixed income can not afford < approximately > \$200 per year so people on the I-5 corridor can go to work faster!!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	Plan does not appear to add bus service to areas in unincorporated King County just a few miles outside outside the service area of Metro or Sound Transit, but there do not appear to be any planned exceptions for the property tax increases for properties located outside the public transit service area. The bulk of the property tax increase (at least 2/3rds) should be collected from properties located within the service area given that they are the primary benefactors of the improved service.
Out of District	The planned projects would be great! I have a disability that prevents me from climbing stairs and sometimes affects my ability to see well. There is bus service in my area but I can't climb the steps. There is train service not far away but I can't get to it without driving. Best for me is a combination of light rail and Swift bus since they are level with the curb (no stairs). I'd love it if I didn't need to keep a car. \$17 a month plus my ticket price would still be far cheaper than keeping a car. My biggest worry is that the plan will get watered down to the point where I'm still paying the \$17 /mo for service that doesn't reach me. Then I'd still need to support a car that sometimes I'm not able to even drive.
Out of District	Help for outlying communities like Duvall, Carnation, Fall City, Snoqualmie, Monroe, North Bend to be able to utilize transit.
Out of District	None of these projects would help the people where I live and would cost too much and take too long. We need to focus on limiting additional housing development UNTIL the roads are built to support additional growth. WE NEED MORE LANE MILES, not light rail which does not pay for itself.
Out of District	I want to select all for number 11 I would like to see service to Lacey wash
Out of District	Hello- Everett would not be willing to wait until 2040--what 2045 ?? those voters will vote it down and help kill it altogether.. Think: why would they tax themselves for 20-25 years to achieve a thing so far into the future... Tighten up your time line this will fail The next expansion should be from the Lynnwood transit center to the Everett industrial center and to the Everett station in 10 year period 2030 at the latest
Out of District	Light rail has failed in reducing traffic. It only makes congestion worse because it siphons off funds that could actually be used to improve traffic.
Out of District	Trains=19th Century Technology, weekly closures for mudslides, NO ability to drive around problems, NO ability to change routes, massively expensive, massive taxpayer subsidies, make train users pay actual costs, and watch the people run away, take all trains and drop in Puget Sound, to form artificial reefs.
Out of District	The additional cost per resident would put a real hardship on low income and fixed income residents.
Out of District	why don't Bonney Lake have any services????I have to pay for nothing.....
Out of District	Go back to your original plan and build the backbone of the system all the way north to Paine field and Everett. NOW!!!!!!!!!!!!!! If you don't get here ASAP you do not deserve any additional support.
Out of District	I'm in full support but only if you make it take less than 25 years to reach the biggest employer in the state of WA and largest exporter in the country.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	\$50 Billion for trains? Really?
Out of District	SEPARATE TRANSIT FROM AFFORDABLE HOUSING. If there is "excess property" surrounding stations, keep it for future parking, etc. Once you build housing there, it will never be torn down. This would also be a waste of money. DO NOT USE TRANSIT LAND FOR AFFORDABLE HOUSING, AND DO NOT SELL IT, ESPECIALLY TO ANOTHER GOVERNMENT PROGRAM. Even planning this has diverted money from transit to another social program. Save this for future parking, etc.
Out of District	I want to be able to get on a bus within 2 blocks of my home and go downtown or to transit station to connect with other routes. I find the current bus service essentially unusable. At 89, I would rather "leave the driving" to someone else, the bus driver. I feel trapped at home, would like to go out a lot more, including evenings, if I could get there by public transit.
Out of District	I don't think Sound Transit/RTA has done much at all for the City of Everett or Snohomish county in general over the past 20 years. Its not clear to me at all any more what material/significant benefit any of this is to the City of Everett going forward. Why is any of this good for residents of Everett and/or Snohomish county that live and work in Snohomish county?
Out of District	The central Seattle city neighborhood hubs need to be served and connected before the outlying areas some 30+ miles away FIRST. Ridiculous that it would take 22 MORE years to get rapid transit to Ballard. BEYOND ridiculous.
Out of District	I think more early emphasis on bet and enhancing and expanding sounder.
Out of District	I'd much rather see commuter rail than the slow light rail. At an average speed of 30mph, light rail would be no faster than driving down I-5. That's a losing proposition
Out of District	you have no money. get real
Out of District	We need the Graham station now
Out of District	The whole plan should be accelerated. I would be willing to pay 3 times as much per year in taxes to have all these programs implemented more quickly.
Out of District	<ol style="list-style-type: none"> <li>1. Need to finish the projects closest to Bellevue and Seattle first (especially light rail to Ballard and west Seattle), so less people who are living closest to the cities will get on the freeway. If the people living in the boundary lines of these two cities have a viable option to go downtowns, that will free up some space on I-5 and I-405 for people who are commuting from outside.</li> <li>2. Need to add express routes on the light rail, otherwise it is not efficient for people from lets say Tacoma to take to Seattle. There are already too many stops on the sound end of the current line.</li> <li>3. Need to add additional parking at Transit stations and Rail stations. When there is no parking available, like many other people I tend to drive to work.</li> <li>4. Its ok to raise the fare instead of just taxes on everyone.</li> <li>5. Need to think about how better to connect South lake union into the downtown tunnel system/light rail.</li> </ol>
Out of District	Buses make much more sense than light rail. Light rail is too expensive.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	Light rail throughout our state is the way to go and it needs to be accomplished at a much faster pace than the proposed timeline. As a taxpayer I voted for light rail back in the early 90's and was very disappointed on how things turned out.
Out of District	Speed up the timeline. 25 years is too long a wait
Out of District	Dont need anymore.
Out of District	There should be some way to apportion the costs to the businesses and users of the services being provided rather than blanket the costs to all.
Out of District	Seems as if always the cities north of Seattle get more transit methods and have frequent methods to travel, but south areas of Seattle are left on their own. One prime example is on I-5 - Fife Hill on Thursday or Friday afternoons, heck anytime of day for that matter - it is ridiculous! No where in this state is traffic backlogged like that on a continual basis! It is time for areas below Seattle to get some needed attention and quit catering to north of Seattle and Redmond (Microsoft) areas. My personal goal is to have transportation from Kent/Auburn to Tukwila as I live off the beaten path of I-5 corridor so must travel to via car each and every day solo! Even cutting the trip to Kent or Auburn would be extremely beneficial..
Out of District	no transit on the Kirkland trail. Put more busses on 405 where they belong. kill the environmental study re the Kirkland trail. If the above is nt done I will oppose st3.
Out of District	Need to identify revenue other than continuing to increase property taxes
Out of District	I think establishing light rail from Everett to Tacoma on I-5, the light rail from both Tacoma to Redmond and Everett and or Lynnwood to Redmond is crucial.
Out of District	Buses cannot move faster without more lanes and their own on/ramps. Why add BRT when traffic is at a standstill already? There are too many agencies that really do not serve in an efficient manner. Add more freeways instead. Problem solved. Or, add above ground continuous gondolas above trail systems. They are quiet and people would actually use them.
Out of District	The long timeline is a SHOWSTOPPER!
Out of District	More parking!!! People won't take transit if they can't park.
Out of District	As stewards of the environment, we need to improve and use mass transit more frequently. Although project completion is years away, we must go ahead with plans to increase and improve mass transit. Transportation accounts for close to 50% of the state's pollution. We must continue to decrease car usage, especially single occupancy.
Out of District	You can't add additional stations for light rail without first building out parking at critical existing stations. youve got to expand the parking and improve existing stations before creating the same problem at other new stations.
Out of District	I lost my commute bus last year, 215 between Seattle and North bend. I was able to commute with car, bike and carpool. Really hated going backwards. Please include North Bend in your transit planning!!!
Out of District	Burien residents will apparently never be provided any additional service, rarely is. Why should I keep paying for everyone elses improvements? Sure there are some minor benefits but most of us avoid downtown Seattle and other congested areas and will continue to do so.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	There should be more emphasis on light rail and less on buses. The longer we wait to get a system going, the more it will cost. I lived in Dallas, TX and could take light rail to all areas of the surrounding cities. Plus, it cost a LOT LESS than this proposal. There was an increase in the sales tax, but that's all.
Out of District	Your bike lockers seem to be unused. I have a plan that I believe would get those lockers full. And would get more people interested in riding busses trans. Using key card'sor another system where a person renting a bike locker could use any open locker. This way the opportunity to go further and do many othe things near commuting centers. Time to think outside the box I.
Out of District	Light rail is too expensive to serve all the people. We grew as a car community, and you decided somehow to disenfranchise large percentage of citizens from a car-less future, which is a vision of an imaginary past that could have been in a make- believe world. The rail projects will never serve me unless I move into that mess and become car-less. Not me.
Out of District	Please focus on projects that will releive traffic congestion the most.... Some of these projects will take too long. Our residents need multi modal alternatives now. What can be done rather quickly with the resources we have at this moment? Why does the sounder only run during the week and only in the mornings and afternoons. Use sounder to accommodate the users by offering a sounder ticket when purchasing event tickets in Seattle. The sounder should be available seven days a week and support those going to events in Seattle.
Out of District	Complete the projects faster even if it means a higher upfront cost with taxes.
Out of District	Even though I have retired to Newport Oregon, I still own property in Pierce County and have two children that use mass transit in Seattle. So the ST3 projects are important. I would like to see the light rail connection from the Tacoma Dome Station to Seattle be speeded up by 8 to 10 years. Pierce county residents have paid RTA taxes since 1995 without much to show for it.
Out of District	We need accessible transit here in WA. What was once a 20 min commute has turned into an hour and a half. More people are moving in. Implement these plans NOW!
Out of District	Please still pass parking in Edmonds and more train cars to the Sounder as soon as possible.
Out of District	Publish original plans for light and commuter rail, including miles for each, projected ridership, projected completion dates, and current progress.
Out of District	Get on with all of it. Make it happen sooner. We've waited for so long to have decent public transportation.
Out of District	I will vote "no" for any plan that devotes funds to do any type of feasibility or environmental study involving our cross Kirkland trail. My friends and family will do the same.
Out of District	Crazy and insane people ride the bus why would I want to do that?
Out of District	What about connecting our state capital to the rest of Puget sound community by rail!?
Out of District	Wrong approach. Improve roads instead.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	<p>In all probability, this is something I will never use. It looks like you're trying to build a New York style subway system. So why don't YOU move to New York?</p> <p>I think this project is more about you being able to continue feeding at the public feeding trough then it is about anything else.</p> <p>I can hear the renters screaming already when they find out that they are going to have to pay for this.</p>
Out of District	These need to be completed sooner, spend more money if needed they need to get done quicker or I will vote no.
Out of District	Need more parking for light rail
Out of District	I can't give an opinion because it is so frustrating that it's all chopped up with bussing continuing to be the plan for the E. side. Why was there no inclusion of light rail on the 520 bridge to Redmond? It should have linked to the Husky stadium station! I will support your efforts because progress is as delayed since the worlds fair show casing the monorail when light rail could have prevented sprawl and been part of I5 and 405 and really made the difference but please do continue. Just tie it together so real people can actually get somewhere.
Out of District	It is not fair to expect homeowners to foot this bill alone. Get rid of the homeowner assessment and raise the tax amounts of the other categories to make up the difference.Or how about taxing businesses with more than 15 employees. Seeing as how we use transit to get to work its only fair that employers pay something.
Out of District	You are building a mass transit system "backbone" without the infrastructure to support it. If you don't allow people to a place or means to get from outlying areas to use, i.e., places to park vehicles - bikes included, bus services, etc. people will not use it. A mass transit system MUST use all of these, people, bicycles, cars, buses, taxi's, trains, light rail, subways. People will use it if they can get from they live to one of these. Look at Japan if you want to see how an efficient system works. I used it in Japan for 7 years and never had to drive to work for 7 years.
Out of District	I'm am so glad to see Something happening in regards to our horrible traffic situation. I don't understand why this didn't happen 20 years ago, but here we are. Being in Olympia 16 years ( but from Tacoma), I feel strongly that this project should extend to our state capitol. Start all this ASAP please. Thank you for asking for feedback. Onward!
Out of District	We support ST3 Bus Transpotation (EO2) on I 405. We are very STRONGLY OPPOSED to any Bus or Rail service on the KIRKLAND TRAIL (CKC). We hope that Sound Transit will not offer any financial support to the Kirkland City Council for any plans to put Bus or Rail service on the Kirkland Trail. WE WILL VOTE AGAINST ANY SOUND TRANSIT PLAN (ST3) TO PUT ANY BUS OR RAIL TRANSPORTATION ON THE KIRKLAND TRAIL.
Out of District	These projects were needed 5 years ago. The time frame and cost is astronomical and unacceptable. I will not support current timeframe/cost proposals.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	The damn plan is so fragmented and confusing it needs to be streamlined and simplified. Build two rail tracks, a primary and alternate, from Everett to Tacoma. Done deal. Forget the bus pollution. Forget the coastal picnic expanding BNSF land ownership. Follow the damn plan developed for the highway system. A primary, and alternate; that's it. Your plan is going to be a management nightmare & riddled with fat. Cut out all that bs fat.
Out of District	The cost off public transport per rider is exorbitant. All projects are over budget on years late on completion.
Out of District	I think the developers of our Sound Transit system underestimated the volume of usage for both rail systems. The parking for both systems is grossly lacking. I think the light rail system to Everett needs to get working ASAP as the Sounder service is constantly disrupted with slides over the tracks. It needs to get done quicker than 20- some odd years. I am 70 and do not want to be driving all over the place until I am 90!!
Out of District	Hurry
Out of District	Maybe if these trains paid for themselves they could expand themselves to cover more customers and keep the business growing, oh right, just vote in more tax increases to pay for it.
Out of District	Sooner than later. We are behind compared to other large cities. We have some of the worst traffic in the country. Look at what cities like Denver have done. Seattle need more transportation options. Also consider more Service for cities and towns that are growing rapidly that serve the city as an example Maplevalley
Out of District	Additional parking at Train stations is desperately needed to accommodate growth in passenger numbers.
Out of District	Hello , They allow buses and double 2 Or More Person Veh in Car Pool Lanes and 2 or More bypass Lights at on Ramps which defeats the whole purpose this would just make it worse . I'm an owner only Business and I'm being Panelized for being an Owner Only they don't factor us in all this .
Out of District	I don't support any plan that raises property taxes.
Out of District	In general, I'm not impressed with the piecemeal approach to rapid transit. If you have to drive your car to a station, most people will just keep driving. Bicyclists are not paying their fair share for all this crap they are getting. I am tired of the cost of all this being piled on the backs of homeowners. I believe we are nearing a breaking point that will blow up the way it did in California in the 1970s. Get behind an income tax that is part of an overall tax reform program to get us off the list of most regressive tax states in the country.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	Remove the train from Everett starting it instead from an area not prone to slides if you must keep it. It is a complete failure and has too many times it fails to operate due to slides. The money could be better spent on buses plus putting a station in a place like Mukilteo with NO parking but where you are paying private businesses for parking spaces is wrong. When you put in rapid transit you HAVE TO GIVE US A PLACE TO PARK OUR CARS so we can access rapid transit otherwise it is just a perk for the people living in the neighborhood where the station is with all of us paying for it but not able to use it. It is absolutely NO from me for your time frame to Everett and the expense plus you admit you don't have to use the money for that link if you choose not to. Everett was originally promised light rail and we have been paying for that for what 15 years now. Make it work with the money you have. Suggestions: Look at your infrastructure. There are too many people getting too big of paychecks; remove things that don't work, i.e. the train in Everett; put in writing that the money is to be dedicated to each specific project. In other words, no robbing Peter to pay Paul like you do now. You want way too much money. You still collect the same money you have been all along but have completed projects. That money can now go to continuing to build out the system with no new costs. Please stop taking advantage of us!!!!
Out of District	This survey is lying about the average cost... ST3 will drive up rent and cost of living... it doesn't add any more seats it just moves the seats from buses which are already over crowded to light rail with no increase in rider capacity... also only Washington state business should be mandated to be used.
Out of District	I currently live in Kittitas Co, but work M-F in downtown Bellevue. My commute includes driving 48 miles one way, parking at a P&R, and riding a bus to work. I have many neighbors who do the same. Sometimes I take night classes in Seattle (program not available in Bellevue/Eastside) and often have to wait 30+ minutes for the first bus to come that goes EB once class gets out at 9. I realize that the plans are projected pretty far into the future and probably won't matter to me as much at that point, but leaving at 5am and getting home at 11pm is rough, especially when at least one of those hours is spent standing at a bus stop because the ones going to the P&R only run once an hour. This also impacts me heavily when working OT.
Out of District	Projects should be funded by the riders, not property owners or car owners.
Out of District	Light rail South center mall
Out of District	I am concerned that the length of time in which the light link rail will come up to Lynnwood/Everett. This area is experiencing great growth right now and need this now, not 25 years! also, be sure to take into account the infrastructure on the surrounding roads to accommodate more traffic at transit centers. Living near a park and ride that might get a station, the traffic as people are leaving causes excessive gridlock. While i would love to have the p&r become an even better lifeline to the city, something has to also be done to ensure that increased traffic flows.
Out of District	Should be built sooner and go further south
Out of District	Ballard should be first.
Out of District	I am so glad public transit is expanding! Very much needed for those of us who want to have the Seattle metro area accessible but find car situations limiting our mobility.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	My job as a government lawyer requires travel from Olympia to hearings in Tacoma, Seattle, Everett and Bellingham. Over the last 25 years, the traffic has gotten so bad that we often have to go up to Everett or Bellingham the night before at taxpayer expense to ensure that we arrive in time for hearings scheduled at 8:30-9:00. A few weeks ago, it took 3 hours to get from Seattle back to Olympia after a hearing- 45 minutes of which was just trying to get from the parking garage to the exit ramp in gridlock traffic. I've considered taking the light rail from Tukwila to Seattle but there's not enough parking during the work day. Also, the JBLM traffic has gotten so bad that it's impossible to accurately plan my commute and ability to get to the light rail in time to get to court in Seattle on time. We desperately need a reliable rail system.
Out of District	Don't say something with ST2 and lie with ST3. You will get voted out of office.
Out of District	I would travel to Seattle and Everett more from Olympia if the train schedules were more accommodating.
Out of District	With the housing prices soaring in Seattle, many residents are being forced out of the city. Their rent is being increased 25% or more. Until affordable housing can be restored, many residents will be pushed out along the 1-5 corridor rather than across I-90. It is my belief that focusing on a better/faster transportation tunnel between Tacoma, through Seattle, and to the northern neighborhoods should be prioritized.  Thank you for listening.
Out of District	I support more public transit in the Puget Sound in every possible way, regardless of the cost. \$200 a year is more than reasonable.
Out of District	Be sure to carefully think about those that are poverty level income/very low income who only have public transportation for everything--- everything. Many, many Accessible routes, frequent transportation in non- commuter hours, costs to ride. Elderly and disabled have suffered much under Metro's new "plan", I hope that is not true with ST.
Out of District	Light rail to safeco, century link, Husky stadium. It would reduce traffic on game days, and it would be easier for people who don't want to drive, and who live far away.
Out of District	Make light rail sound proof.
Out of District	Run these trains more often! Would be nice to have a "REAL" transit system that runs 24/7 not just for morning workers in & around Seattle! Buy the lines & run trains & make money instead of asking for money! Didn't your mom & dad teach you anything?
Out of District	Prioritize I-5 corridor
Out of District	I live in Redmond and own rental housing property in Seattle. My concern is that property owners will once again be asked to shoulder a huge tax burden, while a rental population continues to grow and plays no significant financial role. Renters see the obvious benefits of such a plan and many will believe that they will incur none of the costs and vote for it. Land lords will of course impose rent increases and renters will howl about the unfair housing climate in Seattle.  You must find ways to bring this growing renter population (now more than 50% of the residents) into contributing to this needed project beyond rider fees.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	Part of the info in the plan should be the current taxpayer cost of each trip made by a user. Wasn't a full system planned twenty years ago.
Out of District	Have another sip of Kool Aid. This is such a waste. Half of these items were promised twenty years ago so why should we say yes again? Waste waste waste. Taking food out of homeless peoples mouths. Do you ride transit like you preach?  Why do you need gender, income, ethnicity???. How can that possible matter in a survey about transit?
Out of District	I only wish to point out that I live in Bellingham and would not have to pay the proposed taxes, but I visit the greater Seattle area fairly frequently and try to use transit whenever possible. I truly believe that transit is a defining feature of a city and one of its greatest quality of life factors, and if I lived in your taxation area I wouldn't blink at supporting the proposed taxes. Thanks!
Out of District	Build more roads. Give tax incentive to companies who offer offset working hours to reduce rush traffic. Stop spending millions for a selected few that use bikes and still drive as soon as it rains. IF (!) voters and unions are able to get more light rail approved, shut down bus lines and open commuter lanes to everybody.
Out of District	The west Seattle project should be put forth to the top of the list. There are no express buses or rapid transit options to downtown Seattle or the udistrict from West seattle.
Out of District	I will continue to vote against every proposition to add on to our property taxes. Period. WA needs to figure out how to budget the money that they are already getting from us. The fire fighters want more property taxes, the schools want more property taxes ... everyone has their pet project, with the burden landing unfairly on middle income property owners.
Out of District	Also - Kent is the 6th largest city in WA. I find it curious that there are no meetings here - you want our support by listing Kent as part of the proposal, to get the large population that we have here to vote to increase property taxes.... and yet no meetings here, interesting.
Out of District	I ride sound transit everyday for my graveyard shift in downtown seattle from tacoma. About an hour bus ride. If therr was a light rail system from tacoma to all the other major transit stations then to seattle then all the other major transit systems then to everett. It would lower my 1hr commute time to <30minutes
Out of District	Sound Transit should demonstrate a concerted effort to accelerate the delivery of light rail projects in ST3. The initial timelines presented are way too long. Surely we can make this happen much more quickly, as other communities have done. Go to Shanghai for some lessons in building effective rail transit quickly.
Out of District	I am not local, therefore my opinion isn't really relevant but I had to complete this quiz in order to read articles.
Out of District	The plan takes to long to develop. Please speed it up so I can enjoy what I'm spending money on..

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	Light rail is incredibly expensive to build and maintain per mile. BRT is more cost effective since it uses existing infrastructure and has more flexibility to adjust to meet demands of current and future riders. How did you determine the \$200 cost to the "average adult" in Puget Sound? Is this a transit rider? Does this distinguish between those that have vehicles? Employed persons? Perhaps this is stated else where in the plan. A summary on how these projects would be paid for would help those taking the survey
Out of District	Ta coma has a big sounder ridership so i feel that light rail in the south sound should be earlier
Out of District	Protect Open Space, creeks, wetlands and steep slopes with any expansion of Light a Rail.
Out of District	The efficiency and effectiveness has been terrible in the past. Thus I have little confidence in the projects being completed on time, effective in solving problems, and coming in at or below budget. The program has not been a good steward of the taxpayers dollars. Special interests have consistently had disproportionate influence. Combined with the State's transportation failures it is very difficult to support any transportation measures that are proposed - especially those with the lack of accountability that such long range measures will result in.
Out of District	Given the Puget Sound Regional Council population and shipping expectations, I urge the light and sounder rail projects to be the priority so we can handle not only the commuter volumes but the freight of our businesses and the shipping activity of our ports. We need both commuter and freight trains on the I-90 to Seattle Cooridor as well as I5 From Everet to Olympia or Portland.
Out of District	We need to increase frequency on south sounder commuter rail, we need to start thinking about more than just commuters but also entertainment activities. Thank you for allowing additional comments.
Out of District	Transit in this area is simply not adequate. It should be a high priority.
Out of District	Whether bus or light rail, mass transit needs to be separated from traffic and the the 100% priority for keeping the Seattle area moving.
Out of District	Get it built fast! I don't want to wait 20 yrs!
Out of District	Right now round-trip transit between home (98065) and work (98102) takes at least 350 minutes, vs. 70 to 90 minute RT by single-occupancy vehicle. Recently it took me over 4 hours to get home JUST ONE WAY - totally unacceptable. Regional transit authorities have a hell of a lot of work to do, to get me out of my car, but get the (bleep) job done already. PLUS: Level 2 and Level 4 charge stations (did you notice how many people made down payments on Teslas? 200,000?). AND: In case you haven't noticed WHERE ARE THE P&R FACILITIES INSIDE CITY OF SEATTLE LIMITS?!?????
Out of District	I can't afford my property taxes now. More taxes will cause me to have to sell my house and move.
Out of District	Dying in Tacoma. Why do we have to wait so long while up north has had all the projects. Gonna vote against it and then NO progress will occur!!!!
Out of District	It would be nice to have transit in Snoqualmie and North Bend WA
Out of District	Find another way to pay for light rail from Everett to DuPont and from Seattle to the east side. \$200 per adult is way to much! Too many people living paycheck to paycheck.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	Timeline is too long
Out of District	Why do we not have a bus line from Gig Harbor to Tacoma Dome for SeaTac airport connections ? From the Key Peninsula, gig harbor, Olalla and even Bremerton , our area is growing faster than anyone imagined. But the only bus either takes us nonstop to the city of Seattle which is great,, but a route to the TCC leaves us stranded. Please consider a route from Gig Harbor to Tacoma Dome station that so many of us would frequent instead of driving in ourselves.
Out of District	It seems to me that most of the development is in the South Sound, yet those of us in the North Sound are hit with the same tax burden. Why should we pay for Tacoma's light rail when we are getting so little of it in the North end? I love the idea of mass transit and have used it in Europe. Unfortunately it seems this project is not moving in the right direction for supporting the North end. When I worked for Boeing in Everett I had always hoped for a quick and reliable way to use mass-transit to get around, both for my commute and to other Boeing sites, but it never showed up, and it does not look like it will be a reality anytime soon.
Out of District	More north sounder runs
Out of District	Extending the light rail system should be top priority. For a fast growing reigion we must have a rail system that links the major city to the popular subarbs.
Out of District	1. Needs much more park and ride spaces. I often go to work stressed when i cant find a parking place and am forced to drive. 2. The commuters from the se everett park and ride should should be able to use the outer lanes of the silver lake parking for overflow. There is no reason these should be forbidden as they are always empty even in the summer
Out of District	The projects for Everett and Lynnwood can not wait for 25 years
Out of District	This is a necessity to keep up with the areas growing population and to keep the Seattle area a prospering US city.
Out of District	Ballard to U W!!!
Out of District	ST has a history of being over budget and behind schedule for years. Can't support increased taxation without some demonstrable improvement in managing and operAting hate system. As a general comment, the south Sound has been particularly short changed .
Out of District	Faster
Out of District	I'm glad washington is continuing to expand it's transit service. I enjoy being able to ride the bus to work instead of driving.
Out of District	I want to travel from Kirkland to downtown Seattle without a transfer.
Out of District	The funding costs fall too heavily on homeowners. If I support this, I have to not support a local levy, which I will not do.
Out of District	I believe the community transit bus system is failing to work. Recently I've seen them block lanes slows traffic and with current laws allowing them to be even more daft.
Out of District	We need more focus and urgency to rapid transit (rail) and less focus on buses.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	There should be something in the works to improve bus transit in Magnolia. Especially the Interbay area. Transit its horrible in that area. Especially for us disabled/handicapped people. Very few routes to get around if you can't walk up/down those extreme hills or walk for 15 blocks to catch the nearest bus. I would take transit so much more often if there were better options available. Also would be nice if there was a bus stop on the south side of the street right at the magnolia bridge so you don't have to go blocks out of your way going southbound direction and then have to cross the street and a few blocks north to catch a bus up the bridge. Its so aggravating and time consuming. It would also be nice if the magnolia buses were ever on time.
Out of District	Es muy bien cuando el Tren a Nh
Out of District	No new taxes and no more bloated government. No more sound rail.....The people of this state are up to their ears in taxes, defund Sound Transit. I don't know what it's going to take to make this government wake up? We're done.
Out of District	We need more roads!!! This will not help me at all.
Out of District	I am concerned about using the shoulder as a lane for buses to allow them to pass. People and cars end up in the shoulders and at freeway speeds there will be devastating accidents when a bus hits a disabled vehicle. Leave the shoulders in place and DO NOT use.  Where the on ramps from WA 524 connect southbound to I5 there is a sholder that is also a carpool lane during peak hours. Those cars travel at much higher speeds and are a hazard to the other cars in lanes when the light regulating entrance to the freeway are on. I feel strongly it is an accident in the making for a collision from a carpool car hitting a car that received geen light and is at 10mph whne th carpool shoulder lane car comes in at 50mph. Leave the sholders alone. There needs to be a semi safe place to pull over if in an accident or a medical emergency.
Out of District	who cares. too little, too late, too expensive
Out of District	When the Fare box comes closer to paying for these things the more I will support them.
Out of District	Too bad King County didn't think into the future and Atlanta received the transportation package
Out of District	Tim Eyman already slaughtered auto excise taxes. Historically, the excise tax was very unfair because it was 1) excessive and 2) did not adjust to reasonably represent the depreciating value of automobiles. This tax component is setting yourself up for failure at the polls.
Out of District	Redmond to SEATAC is most important to me!
Out of District	I 5 Danes
Out of District	No no no

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	The costs should first be transferred to those who use it in lieu of all people in the areas. I used to use the sound transit from Ash Way to Westlake because I worked a couple blocks from there. I changed jobs and now work a couple blocks from the space needle. To use sound transit would cost me 2.5 hours each way because I'd have to use 3-4 different transfers. Please look at providing more than one route on the commuter buses. The current routes are the same except one runs N to S in Seattle and the other runs S to N. I know a bunch of people who do not take transit because 5 hours travel for 8 hours work is RIDICULOUS when you only live 18 miles from the office.
Out of District	Hurry up.
Out of District	Whatever you come up with, I am going to support with my tax dollars.
Out of District	My concerns with the plan are, it's too slow of a timeline, puts too much of a burden on homeowners and drivers, who the state sees as a cash cow, and doesn't go far enough on building up rail services. How about speeding up and expanding rail services to decrease the amount of buses on the roads, and increasing the sales tax rate in the affected counties so as to not just rely on property and car owners, who this state seems to think has an unlimited amount of money.
Out of District	Ballard and West Seattle grade separated light rail lines should be a top priority. 22 years is not practical considering the increased urban density we are seeing year after year. The suburbs should be a lower priority than the city of Seattle in my opinion.
Out of District	Sound Transit has been and will be the biggest waste of taxpayers hard earned income in the history of the State of Washington and probably the entire Northwestern United States of America. And you people don't see this?
Out of District	Improving transit within Seattle (such as east - west from Ballard) is more important than shoring up links to Tacoma. Seattle proper is rapidly becoming unlivable and I, for one, am seriously considering leaving the UW if transit within the city does not become more usable. I am also having difficulty recruiting faculty to join the UW because of the congestion.
Out of District	too slow
Out of District	As usual there is nothing for Renton to downtown Seattle. Currently there are only two routes that serve this 101 and 106. Both of these are TERRIBLE. Frequent cancellations due to whatever lame excuse and the busses are completely over crowded to the point of being unsafe. There needs to be express or at least limited stop service between the south Renton park and ride and downtown Seattle. I used to ride the 101 to and from work and finally gave it up because of the awful service and now drive 5 days a week and pay to park. This is because I never really felt safe on that bus.
Out of District	ST is the regional provider and should focus on regional mass transit solutions. Less focus on BRT and more focus on rail. Extension of service to Capitol Hill is already a success - please let's continue that success!! WSDOT should fund HOV improvements on their system. Local transit should fund their own BRT and bus service improvements.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	This has taken far too long and hundreds of millions of dollars over budget to accommodate a small percent of the population. We voted on this twenty years ago and how much of that was completed as promised and on budget? And now you want to tax us to let you mismanage and bungle more projects that won't be completed in my lifetime? No thank you. You should be ashamed for the incredible cost overruns and the asinine Bertha debacle. Someone should be held accountable, Mayor Murray and Governor Inskee, for the gross incompetence of this project. Hmmm, maybe it should be you!
Out of District	Thank you for working on this critical issue for the future of our region! Good transit is the only way that we will be able to accommodate growth without paving over all of the natural beauty that draws people here in the first place.
Out of District	Change the entire concept to user pay. The present plan taxes property and vehicle owners which subsidizes those using the system. Have those that use & will use it pay the entire cost through ridership fares.
Out of District	increasing frequency of current Sounder routes (Lakewood to Seattle + returns), parking options at existing Sounder stations (increasing busses to + from existing park and rides and currently under-utilized parking areas)
Out of District	Quit wasting taxpayers money!
Out of District	I strongly oppose extending the light rail the 3.7 miles from the Redmond Technology Center to downtown Redmond. Enhanced bus service from downtown Redmond and a larger park and ride in downtown Redmond would accommodate Redmond ridership on the light rail.
Out of District	I believe there should be efforts made to spread the cost of the transit system in a more equitable. For instance someone living or working on the outskirts of the system or proposed additions to the system will have less opportunity to use transit and thus in my opinion should pay less of the costs. At a cost of \$200 annually or \$17/ month, is a lot to pay when I will not have the opportunity to use the system because it does not yet reach my destination and will not by the end of ST3 implementation. Really the only justification I can find for the cost then would be the potential decrease in the number of vehicles/ congestion along the routes that I will drive in my car.
Out of District	Build rail. Enough said. And, if you have people, developers or other entities who get in the way in opposition to this, tough cookies!
Out of District	Please speed up construction so I can get on light rail from Ash Way to sports arenas such as CenturyLink and Safeco.
Out of District	it is critical that people living in the south sound have rail access to seattle and points further north. I-5 has become a dangerous nightmare to drive.
Out of District	I strongly favor rapid transit improvements. I am very disappointed that Sound Transit does not support/coordinate integration of Washington State Ferries with these improvements. We have a very valuable, existing resource in the ferry system, but it is not integrated with other transit - not even the Orca cards. We need to take advantage of all of our transportation resources.
Out of District	I would strongly support expansion of the Sounder Train service thru Renton, Newport, Bellevue, and Redmond using existing rail lines and bringing back those that were removed for recreational purposes. Priority one should be our mass transportation and efficiency, not recreation.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	The entire plan is already outdated due to new and innovative alternatives.
Out of District	ST is the biggest and most corrupt fraud in our state's history. I am weary of the outrageous taxation in King County. STOP!!!
Out of District	Project is to take too long to complete, to reliant on buses and too expensive from a tax perspective, the state and Fed's have money for these types of projects perhaps if we used the existing funds wisely we could diminish the costs.
Out of District	<p>Snohomish County has the fastest-growing population in the region but these transit plans give preference to East King County which has already been pandered to with the relatively "rapid" expansion of I-90, SR-520, I-405, SR-167 as well as other city, county, and state roadways. Pierce County has many more trains going back and forth between Tacoma and King Street Station (along with more frequent opportunities to ride the rails) as opposed to the limited Sounder service - 4 trips in the morning, 4 in the afternoon - between Everett and Seattle; plus, Pierce County is closer to any light-rail options whereas Snohomish County commuters must travel to downtown Seattle before utilizing any light-rail service.</p> <p>The lack of equitability in serving the future needs of Snohomish County commuters along the I-5 corridor is very obvious. If a whole new floating bridge (SR-520) - a marvelous technical achievement in itself - can be built and completed in 5-years then there is no valid reason why it should take 25-years (or even 8-years) to provide light-rail, additional Sounder-service, and enhanced bus services to the North Sound.</p>
Out of District	Taxes need to be shared with everyone in the Puget Sound. Do not just tax people who live in Seattle like you did when the monorail bill was passed. Even if an individual doesn't live in an area near a station, they will benefit by having less people on the road.
Out of District	Needs to come North to Everett and extend Bellevue to Redmond
Out of District	Per trip cost of fixed rail infrastructure/ operation way too high. System is not flexible enough for Puget Sound demographic.
Out of District	I understand from reading the Herald (not your survey) that there is another option to go up I5 to everett and serve paine filed n& boeing by BRT. I wish you had an option to vote on that . I would strongly support that option.
Out of District	I am impacted by the traffic, but 40% of our commute is just outside the project. There is no reliable public transportation for us, it is much, much faster (even in traffic!) to drive. I would love to go from a two-car family to a one-car family, but until more of the suburbs have connections that are viable for either my husband or me and my kids, it isn't a high priority for me.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	Once again you are ignoring the North East side. I work in Everett. I commute Southwest from the Hwy 2 corridor - one of the worst in the state to next door to Boeing off of Seaway. If I took public transportation it would take 1 hour 20 minutes because of the ridiculous Everett Transit - versus Community Transit bus system. That has to be fixed. I am responsible enough to live close (12 miles) to where I work. Community transit built a station in Lake Stevens, but if you are commuting to Everett you are [explicit]. Someone needs to pass a law to eliminate city transit systems completely in favor of a statewide system. I should be able to get an express bus every 15 minutes from Lake Stevens to Seaway where there is a TON of business between Boeing, Fluke and the other businesses in the Seaway/Merrill Creek area. You just don't get it.
Out of District	I wish there were solutions offered that actually affected the majority of commuters rather than these wasteful mass transit options. How about solutions that benefit the majority of people who enjoy the freedom that single passenger cats offer?
Out of District	Spend the \$50 Billion on roads! Not trains.
Out of District	DO NOT appreciate having to fill out a survey when I click on KING5 story.
Out of District	Please remember you need affordable housing in these transit oriented areas.
Out of District	I would hope it would run (light rail) later. As of now, I use the light rail when I can, but my work schedule frequently ends after the last train is done for the night. Overnight service would be convenient.
Out of District	The Sounder commuter train and the light rail should be the top priority of any transit plan. They are the future for Northwest area transportation.
Out of District	since 1996 10 years late billions over budget and all those lies we the taxpayers cannot trust anything you say or do...time for you to RESET and start telling the WHOLE TRUTH on your record of work
Out of District	We live in Eastern King Co., near Carnation. Because of our location, we are not able to use mass transit. The only times would be to go to downtown Seattle for special events. We have to drive to a transit center and find parking.
Out of District	You must, must, must prioritize projects in the plan that will most immediately reduce carbon emissions of the region.
Out of District	I have used the electric battery test buses. I have been very pleased with their performance as a passenger, and proud to see my government impementing CO2 reducing projects. I hope the use of electric buses is expanded in the future.
Out of District	I think you are on the right track! I currently spend 4 to 5 hrs min each day commuting round trip from Olympia to Downtown Seattle everyday. The worst part of my commute is the leg from the Lakewood station to Olympia. I stopped riding the bus from Lakewood to DuPont or Hawks prairie because I would rather sit in my own car on the freeway rather than the bus. Not to mention getting off the bus and having to get back into traffic once I got to my car. We also need more options from the train stations. When a train breaks down, the further you are from your destination, the harder it is to get there. I hate that feeling of hopelessness. Better yet better maintenance for trains and buses should also be a priority! Thanks for asking and listening!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	Transit between belie an Seattle should be a lowere priority than that between tacoma and Everett and along the I-5 corridor. St3 should also include more light rail veins through the Tacoma and Everette/Lynwood suburbs included in the long term plans.
Out of District	Invest in self driving busses NOT rails! Way more capacity opportunity and it will come online earlier!!!! 21st century technology NOT 19th century stuff. Idiots please pay attention to the changing world around you and buy everyone a Lionel set who wants to play with trains.
Out of District	faster
Out of District	Current plans do have insufficient capacity to allow express service. Foregin light rail systems allow for express service and local service. Rail engineers should examin the Yokohama>Tokyo public rail line which did not incorporate an express service and the private system which does. Designing the light rail/commuter rail to encompass a bypass or express line would increase ridership. The Ports of Seattle and Tacoma require a below grade cargo rail line similar to Port of Los Angles to remain competitive. This would segragate cargo rail service subgrade freeing up automotive traffic in urban areas. Chris Rasmussen MV Kodiak Chief Engineer
Out of District	West sound connectivity / Ferry to sounder / Feeders and parking to west ferry terminals. Long term maglev HST Vancouver BC - Edmonds - Seattle - SEA-Portland/PDX ---SFO Feeder from Port Townsend - Bremerton - Tacoma - SEA Seatac.
Out of District	Seems extremely far out at 25 years for Tacoma completion dates? But we would be paying now?
Out of District	I'd really like to see better access between Everett Transit Center and Boeing Field. I can do the drive from Skagit County in 60 minutes. Via transit, it takes 150 minutes; drive from my house to bus, bus to Everett Transit, Sounder bus to bus stop on 99, walk .2 miles, catch another bus, walk .5 miles. \$11 per day round trip. Gas cost less and takes less time. I'd love to take the bus so I don't need to drive and can study during that time but it costs more and takes a lot longer.
Out of District	The funding part of this is very mis-leading. What is the geography of the additional households paying for this exhorbitantly expensive plan? The cost for this plan should be paid for by the households that will actually use it, not by all households in the region. My guess is that you are playing financial games by having all households pay for it which dilutes the cost for the households actually using it. THAT IS NOT FAIR! By not being clear about who is being asked to pay for this reduces your credibility to near zero
Out of District	You already screwed it up by not going down I5 and instead going into Rainier valley. At least [explicit] have a free ride in/out of downtown
Out of District	Having worked in Public Transit in the Puget Sound Area, it is blatantly apparent that it is nothing but a political boondoggle and patronage jobs program.
Out of District	Tax payers do not want their property taxes to support your plans

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	The whole project is a waste of taxpayer dollars! The return on investment is never! You would be better off offering all transit for free and dropping the light rail concept. It does not make sense!
Out of District	Why should I pay for services that will never reach my location? I should not be taxed on services not provided. Fall City residents cannot even get to Issaquah via a bus. This service was removed by Metro a couple of years ago. So, I am opposed to any Sound Transit expansion of services if my zip code has to pay for it as it does not have any benefit to the Fall City community.
Out of District	Leave us alone...use the monies that you already get in taxes for transit for this. That \$ has been misused for decades. No new taxes. No taxes on miles driven. NO MORE TAXES FOR DRIVERS ONLY. TAX BIKE RIDERS. MAKE THEM LICENSE THEIR BIKES and GET INSURANCE LIKE CAR DRIVERS.
Out of District	I am not a user of any transit in the Seattle area but I do oppose any increase in taxes. When they can-not stay on budget or on time it is a waste of tax payer money. Yes I agree that something has to be done but not with the people who are running it now.
Out of District	The ST3 Plan is a never-ending tax increase on everyone in the transit district. My town of North Bend will never benefit from any Sound Transit implementation, yet I will be taxed to the same level as another district resident who gets a light rail station built next door to their home/business. I strongly oppose tax increases for projects that will never benefit me. I also strongly oppose projects costing in excess of \$30Billion when Sound Transit has a dismal record of delivering projects either on-time or on-budget. Further, light rail is a highly restrictive form of transportation and contains no provisions for flexibility, as opposed to bus lines which can be implemented or changed virtually overnight.
Out of District	Sound Transit officials should be brought up on RICO charges. We are sick of the hype and the ridiculously high property taxes in King County. STOP!!!
Out of District	The entire Transcontinental railroad was built for less than the amount (in today's dollars) that ST is asking for . The perception is that ST is incapable of completing a project on time, or on budget. And finally the rail systems that we have are a disaster, there is no parking at the limited number of stations, and the Sounder is either next to empty, or shut down from mudslides. I see it as dismal failure, and a waste of my hard earned dollars.
Out of District	Rail transit ST3 shouldn't be built
Out of District	Stop stealing our money stop the waste. All we need is more roads for single occupancy cars
Out of District	What about those of us west of Puget Sound? More cross sound bridges, highway improvements, new highways, new bridges and maintenance of existing infrastructure should take precedence over light rail.
Out of District	You have cosistently been over budget and late in the completion of projects. ST is a boondoggle we can live without.
Out of District	Your board needs to be accountable to the voters. They should be elected.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	For work, I drive between Lynnwood & Boeing Field (East Marginal Way) and really don't see any efficient means of a commuting solution within this plan. Current bus schedules/times take far too long and are highly inefficient. As Boeing employee, I strongly suggest linking up ALL of Boeing. This means installing rail directly linking ALL major Boeing locations including Everett, Renton, Boeing Field, and Tukwila. Now, more than ever, Boeing employees are consistently having to travel between buildings & cities for work. This an extreme need which is long overdue and hope will be considered.
Out of District	I would live long enough to see any of this completed.
Out of District	There is no .plan to relieve congestion from south snohomish county (eastern portion) to King County. Not everyone in Monroe, Gold Bar, or Sultan work at Everett. Only one bus 424 goes from Southern Snohomish County (eastern portion) and only runs 3 times to Seattle. Pathetic
Out of District	Too expensive , and knowing governments dismal performance in executing big projects on time and on budget (i.e.- Bertha tunnel); I have little faith this behemoth project would come anywhere near \$50 billion. More like double or triple that cost. Unacceptable to put yet another tax hike on the citizens of this area, for dubious results in 25 years.
Out of District	People who own homes and cars should not be getting taxed to build transit for other people. Their should be an optional tax and those who want or support the plan can choose to contribute people should be forced to pay for things that are not going to affect their daily lives
Out of District	[Explicit] ALL THE KING COUNTY SOCIALIST LYING [Explicit] DEMOCRATS. TELL KOMRADE INSLEE TO [Explicit]. ONE CAN ONLY HOPE THAT ALL THE LIBERAL STUPIDITY BRINGS LOTS OF CRIME TO THE [Explicit] IN WESTERN WA STATE GOVERNMENT [Explicit].
Out of District	Enough, enough,enough. Unending and additional taxes are not called for, and should not be tolerated. Stop now!!
Out of District	I think ST's major role, and therefore focus, should be building up a "spine" network of services, along all major roadways, and allowing the local agencies to build/provide supplemental service to the main network.  I see ground transit as somewhat similar to air; ST should be the major airport or airline, while everyone else should be doing feeder service and/or operate as a smaller, connecting airport.
Out of District	If you expect to raise property tax 25cents per 1000 dollars of assessed value and then say that it will cost the average home 200 dollars a year that would mean that the average home has an assessed value of \$8000. I can not imagine that any thing in King county has an assessed value that low.
Out of District	A Penalty should be awarded to employees/contractors who waste or cause cost overruns.
Out of District	Stop spending money you do not have on hand.
Out of District	390 dollars per average household x 25 years. Almost 10,000 dollars per household over next 25 years!!!!!!  you have got to be kidding on top of our already insane taxes!!!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	I travel to from SEA airport to Downtown and North Seattle frequently. The light rail cars are very cramped when traveling with a suitcase. The seats are too small and often occupied by only one person because use they are so small and cramped. This leaves many others to stand. I like the cars and seats on the Washington DC Metro.
Out of District	No to permanent tax increases.
Out of District	easy access to mass transit takes cars off the road. Secure parking is needed
Out of District	Would love for it to move forward faster even if it meant more money from taxpayers
Out of District	Rail cost us not worth it. The routs are Not Flexible. Buses are able to respond to changing needs as population shifts. Buses are far more affordable.
Out of District	I also realize you will never come in under budget, nor do you care about preferred transportation choices (auto).
Out of District	Quit bleeding me to death with taxes.
Out of District	Project completion times lines are way too long. Also, kitsap county is beginning to feel the pains of growth in the other three counties. As a commuter from kitsap to Eastgate everyday please don't forget about other surrounding counties on the sound.
Out of District	Sound Transit is an Inefficient use of public funds all around.
Out of District	So something I will never use will cost my family \$400 a year for the next 20+years? to put it mildly I strongly oppose this.
Out of District	Too expensive and no new roads and it hard on the people that will not use it. THE POOR ARE GOING TO BE SHAFTED,
Out of District	In addition to east Pierce RBT there is interest of Enumclaw residents who currently use ST to connect in an efficient way there as well. Due to poor metro connections they still commute to Auburn or Bonney Lake. A local RBT sinked with Sounder may be more beneficial than Metro's connection, and cut down temporarily on parking issues at nearby stations. There has also been complaints of the lack of transit between south King to east Pierce. Perhaps if ST had input there the loop from Auburn and Bonney Lake locations to Enumclaw and Buckley could also alleviate some st. rt. 410 congestion.
Out of District	Make users pay for it Instead of taxpayer.
Out of District	It benefits everywhere to keep any car off the road. The connections between transit and ferry service are really poor. I can't get from the Kingston ferry to UW by transit so I must drive. Also, transit between Boeing Feild airport and everywhere else is rotten. Again, this makes a car necessary.  Covered Scooter/bike rentals at the stations would be helpful.
Out of District	Stop raising my taxes, I am retired
Out of District	We really need bus service between Buckley and Enumclaw.
Out of District	Light Rail to Everett should be made more of a priority!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	I have watched the incompetence of the State Engineers for DOT. The Freeway in Tacoma, HWY SR 16, and the horrendous mistake made that cost well over 1 million to fix, and no one GOT FIRED, The second arrows bridge steel came and was too high to get under the first bridge. It all had to go back and be remade. No one got FIRED. Big Bertha, the Main contractor told DOT the machine could not be started because the cutter was out of line. Since the Governor was coming for the starting ceremony, DOT said run it. It went a short way, then cost 192 million plus to dig up and fix. No one got FIRED. Now you want me to approve something that will undoubtedly run WAY over budget, and let it run till 2040? You must think I am crazy.
Out of District	I don't live in area any more, but visit quite often and ALWAYS use transit when possible. Nothing ruins a visit more than being stuck in traffic, then worrying about where to park. I work for transit system in eastern Washington and believe rail is the only solution for the mess that is westside traffic!!
Out of District	I would 100% support these plans if West Seattle and Ballard rail were a priority within 8 years. If they were, I would agree with the tax costs, because we desperately need this in the areas more densely populated around downtown Seattle. We have needed a form of public transportation like rail from West Seattle, Ballard, and NE Seattle that does NOT operate on the current roads that are shared by buses and car traffic. We needed it 5 years ago, and we desperately need this now.
Out of District	Stop wasting our hard earned money on projects that are not needed or run thousands of percent over budget.
Out of District	Since its inception this bond deal has waste all of the money (tax) it has received. No accountability!!!
Out of District	I strongly support mass transit, however, I believe this plan needs to be finished MUCH faster and with MUCH less funds.
Out of District	There is no way in hell I am voting for any of these additional taxes. I'm not a big fan of the RTA tax we already pay. If Sound Transit thinks there is any chance at all that the voters are going to approve these new taxes then they are sadly delusional. I do not support rail transit at all. It is far too high a cost for too few riders. I have some support for bus transit, which can reach many more riders for much lower cost.
Out of District	What about additional bike lanes in metropolitan and suburban areas, like Tacoma, Puyallup, and Bonney Lake?
Out of District	Accelerate implementation to 20 years
Out of District	I think Sound transit should seriously look forward to the boom out the Hwy 169 corridor. You could be the hero by planning to relieve the congestion before it becomes gridlock. Forward thinking a few projects will lend to credibility which is seriously lacking
Out of District	Service to the Maple Valley needs to be expanded. There is extensive construction of new housing in that area and there needs to be better transit coverage to mitigate the impact of the additional residents.
Out of District	just trying to watch the news! Really think advertisement is complete [explicit]!!!!
Out of District	What about access in Maple Valley...there's land and space to expand
Out of District	Please pressure Boeing to support this. Giving Boeing employees the ability to take transit to the Everett site would take a large number of cars off the road.
Out of District	25 years to complete is insane..... Get it done ASAP

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	I strongly support all improvements to make bus service faster and more reliable, such as BRT improvements in all of the ST3 BRT corridors, using highway shoulders (how about making express lanes carpool and transit-only during rush hour), signal prioritization, transit-only lanes, and anything else that facilitates ST Express, and making good bus connections to rail facilities. Light rail and Sounder are wonderful, but fast, frequent bus service to rail stations is needed to open up rail service to most residents. And fast, frequent bus service is desperately needed in high-traffic corridors that don't have rail.
Out of District	Sales tax is a terrible, regressive tax. I strongly oppose increasing sales tax (would gladly have state income tax instead), and nearly all the mass transit proposals I can recall always involve funding through sales tax.
Out of District	It would be great to have light rail service come all the way to Everett station but if it's going to take 25 years to accomplish this why would I want to vote for something that isn't going to be completed in my lifetime. I'm over 50 years old and I'll be retired or dead or I'll have moved away by the time 25 years go by.
Out of District	We need a rail system that goes from Everett to the Airport and Tacoma to the Airport.
Out of District	As a resident in Dupont, I feel the extensions the commuter rail is important, and I would agree to a raise in taxes to pay for that. But that one extension is a small percentage of the total plan, and my taxes should be raised proportionally.
Out of District	Faster timeline and link light rail to Everett moved up in the timeline.
Out of District	Look as usual all of you people are so missing the problem. We need a main high speed rail system from Marysville to Olympia. Any adjoining stations can feed off of this corridor. Buses should not be allowed to be in the carpool lane period. They back traffic up. The car pool lanes are a joke to begin with. Children are not licensed drivers so they do not count. The speed should be faster in that lane as well. And if a vehicle is traveling slower than the posted speed limit for the car pool lane. Ticket. And it should be enforced. The speed limit should be raised in the adjoining lane as well. And upgrade the pavement on these roads. They are terrible. The tressle between I-5 and Hwy 2, is a total joke. It's dangerous and old. It is in serious need of being torn down and replaced. Bottom line. Upgrade roads. Major high speed rail along I-5. Kick buses out of the car pool lane. Up the speed limit in the car pool lane and adjoining lane. Up the speed limit in outlying areas. Widen Hwy 2. Two lanes East and West bound. Two lanes both directions on Hwy 9. Good day.
Out of District	I strongly feel emphasis should be made on light rail. Personally, I would rather see light rail used along the I-495 corridor than rapid transit by reusing the old railroad lines that ran through Renton north.
Out of District	Everett earlier
Out of District	What about transit options for cities like Maple Valley to the Bellevue/Redmond area? I don't take mass transit as there is no option available. Also, what about Hwy 169? The congestion is so bad I no longer travel on the road.
Out of District	Light rail expansion from downtown Tacoma to Tacoma mall. Light rail expansion from Tacoma to Olympia (urgent!!!)
Out of District	expand the rta taxing district. It makes no sense to have major cities in Sno. County not included like Marysville, Lake Stevens, Arlington etc.
Out of District	To costly and to long to complete

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	Dedicated Bus Lanes throughout the system would be a must for increased riders on the BRT - perhaps using toll lanes on I-405 as it's ridiculous that buses should toil in already crowded traffic lanes. Having recently ridden Sound Transit into downtown Seattle from Everett Station, this is a wonderful means of travel.  Paying increased taxes for senior seniors on a fixed income is quite harsh, however! Please use our road use taxes already being collected for this project.
Out of District	How about moving up the timeline for Everett. And what about North Snohomish County...Hope i'm not in the district!!!
Out of District	PLEASE ADD A STATION IN THE CENTRAL DISTRICT, IE 23RD AND UNION OR EAST CHERRY STREET. BYPASSING THE CENTRAL DISTRICT COMPLETELY IGNORES THE IMPORTANCE OF MASS TRANSIT IN OUR CITIES MOST CENTRAL AREA!!!!!!
Out of District	Looking forward to Federal Way light rail to 272nd
Out of District	Need to extend either train service to McMillan or bus service to Irtng.
Out of District	I have been a Kirkland resident for 19 years. I do not understand why the rail corridor which parallels I-405 from Woodinville to Renton and beyond is being left out of the light rail plan. This line should be less costly to build than those in Seattle as the rail corridor already exists! I for one will not vote for the plan until it includes north/south rail service on the eastside along the existing rail line. [name]
Out of District	Stop prioritizing our transportation tax dollars for bikes.
Out of District	I think consideration of the hwy169/hwy 18 corridor for an additional line or stops should be looked at as expansion and commuting from this area into kent, bellevue, Redmond and Seattle is significant. And current roads can not handle the traffic. If I had transit options I would take them.
Out of District	Residents in Snoqualmie Valley contribute \$5 Million in tax revenue annually yet it is difficult to find a bus, and when one is found it takes a ridiculous amount of time. Metro and Sound Transit need to do a better job of leveraging existing resources. We need practical solutions including transit hubs and making it enticing enough for people to trade cars for buses. It's not about the fares being charged, it's the practicality of getting to and from work. Out of the 10,000 local jobs, more than 5,000 people drive to work from South County (Renton, Covington, Black Diamond, Maple Valley) per the 2013 US Census, and it would be safe to assume the majority of those are in single-occupancy vehicles.
Out of District	Another huge boondoggle for the taxpayers to fund. I am strongly OPPOSED to any increase in taxes for this. If those who use the system want to expand it, let them pay for it by the fares they pay.
Out of District	A commuter train that goes all the way to Olympia is strongly needed.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	If you want to relieve traffic congestion, add 33% more capacity by making carpool and HOT lanes general purpose. If you want to implement cost-effective mass transit, look to the old railroad beds that were turned into bike paths, such as the trail that runs parallel to SR-169 from Black Diamond to Renton. I don't believe traffic congestion relief, or cost-effective mass transit are the goals, because your behavior would be different if those were the goals. Finally, taxation without representation: I live outside the transit zones so can't vote on this, but I have to travel inside the zone to make anything like a major purchase or to eat at a restaurant. Excluding some citizens is immoral since we end up paying higher tax rates for things we should have been able to vote on, but are not allowed to. Not very democratic of you.
Out of District	ill conceived and overpriced while leaving out Enumclaw, Covington and Maple Valley areas. Build and maintain highways first NOT light rail. bike lanes, etc.
Out of District	Since there is no mention of Monroe and highway 522 from 405 to Monroe the only improvements i am interested in in would be on 405. Since they are NO buses from Monroe to Redmond and NO light rail either one is forced to drive everywhere. Start looking there as that us one big, long bottleneck.
Out of District	These projects as proposed not to mention the cost to Puget Sound economy and individuals is an insane make work not relieve congestion boondoggle. The current systems do not serve the taxpaying majority, so expanding same before showing much better results of current mass transit systems is outrageous! Give it up!
Out of District	WHERE'S THE MONEY THAT PIERCE COUNTY RESIDENTS HAVE BEEN PAYING FOR OVER A DECADE NOW. WHY IS IT THAT KING COUNTY HAS LIGHT RAIL STATIONS AND THERE IS NO RELIEF FOR THE I-5 CORRIDOR. PIERCE HAS BEEN KEPT OUT OF THE LOOP AND NOW, YOU WANT MORE TAX MONEY AND WE MIGHT SEE LIGHT RAIL IN 17 YEARS???? ARE YOU OUT OF YOUR [explicit] MINDS????
Out of District	Crazy as a bedbug in hot ashes.
Out of District	Projects should be paid for by users of the transportation system, not just every adult. Tolls have obviously worked and people are willing to pay them to travel more efficiently on the roads. In my opinion, tolls should be used to help raise the funds. Not everyone is served by this system but those who would most use it should pay. Also, we are embarrassingly behind on our transportation system. Anything we can do to move the timeline of completion up should be done. Everett connection in 25 years? That is absurdly late to address the needs of a growing area. More creative funding should be explored so we can move more quickly.
Out of District	You people are out of control!!! Your survey is biased in favor of ST3. We don't have \$50B (1 Billion a mile) to spend on light rail which is highly inflexible and does NOT recognize that in the next 50 years most manufacturing and business centers for the area will rapidly change and most likely a significant number people will be working from home or on their cell phones anywhere. This ST3 will be an Albatross around everyone's neck without the population base to support it. The pendulum will swing back against the AGENDA 21 "Stack-em and pack-em" and that movement is just beginning. The best thing you can do right now for traffic is to fix all the stupid bottlenecks the environmentalists have intentionally put in the roads to make traffic bad. You should focus on shoulder use for more frequent busses and build more drivable pavement. This would be cost effective and RESPONSIBLE use of the taxpayers money.

<p>Out of District</p>	<p>Please stop sucking our wallets dry with projects that will NEVER END, as well as never make a profit!!! Your system will forever need to be subsidized!!! (This is also called corporate welfare in the private sector.) This hurts the elderly, the poor, as well as everyone else! DOT and our elected officials has MESSED the road system up with there so called forward thinking, or what ever you want to call it. I suggest you cut the system down to where it supports it's self, lift this GIANT TAX BURDEN OFF THE PEOPLE and manage it like responsible individuals!!! Then maybe you'll get my support!!!</p>
<p>Out of District</p>	<p>This relates to all available options in the drop down.</p> <p>Everett is not cost effective. It does not have the density, ridership or funding to justify the light rail investment. BRT would provide better and more comprehensive service from Downtown, past Paine field on 99, then through Lynnwood and on to Kenmore and Bellevue along 405.</p> <p>Spine to Tacoma is also not cost effective. Both routes already have Sounder service that can be improved at much lower cost and without crippled freeway alignments that ignore the major commercial districts that are chock full of excessive parking in favor of Park &amp; Rides that displace proper TOD and bike &amp; ped access. All day Sounder service makes much more sense that dropping billions on new light rail infrastructure that cannot recoup the costs.</p> <p>Similarly, expanding rail to Redmond, Kirkland and Issaquah is a money sink that most locals are fighting tooth and nail to oppose, crippling what little effectiveness it may have on the drawing board. They need BRT, not rail, and it needs to direct them to their destinations, not via roundabout routes that complicate their commutes. If their politicians won't lead the charge, so be it. Subarea equity be damned. let's invest where it counts: in the areas that want it the most and can be properly served by well designed transit.</p> <p>While I live in the north, I recognize the densest areas close to downtown would be much more cost effective to serve. I don't want the region's money wasted on pipe dreams that don't make sense to the experts.</p> <p>Focus light rail on Ballard first. The cost may be high but it benefits a much greater number of people than super expensive new commuter-oriented light rail to the hinterlands. The new downtown transit tunnel can be built first and be served by local and regional buses while rail is built, or perhaps, the tunnel could be built last and let the rail lines share the Center City Connector on 1st Ave with the Streetcar. Proper BRT, with dedicated lanes and signal priority, is currently much better suited to West Seattle than light rail and can also use the tunnel until the area densifies and light rail funding becomes available. Whichever the case, rail to Ballard should face minimal disruption crossing the ship canal and if a bridge is necessary vs a tunnel it should also serve bikes and pedestrians. Ballard's station should be located as close to the center of the commercial area as possible, closer to 20th than 15th, and the line should turn East at Market to head toward the U District's Brooklyn station and U Village, so it can collect and funnel riders to and from north area buses on 15th Ave NW, 99, I-5 and North</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	The technology of rail is outdated, expensive and costs too much to upkeep. Our weather and threat of earthquake, land slide and wind storms would lead to frequent outages and repair. Private industry innovation will step up and fill the obvious gap in the planning and execution by our transportation leaders especially considering the time frame given by this plan and the history of delays by our leaders in past endeavors. The money being thrown at light rail will be seen as a huge waste in the near future and a true lack of vision when considering other engineering options and value based market options such as ride on demand.
Out of District	It needs to come to Snohomish County first before you extend outside...we voted for this before...only to be put on the bottom of the list...we won't be that stupid this time around..good luck.
Out of District	Please spread cost to all citizens of King county. A state income tax is much needed for different projects in Washington state.
Out of District	25 years to the Eastside is too long, hope this will move up in priority.
Out of District	Not enough thought to east side like Maple Valley, Covington, Black Diamond, Auburn.
Out of District	light rail up 90 asap
Out of District	If I am paying \$200 a year in taxes for transit, I hope they wouldn't charge me a fare. As in, can you send me an unlimited transit Orca card? If so, you have my unlimited support! And I have no problem w/the tax. * Additionally, please make a bus that goes from 272/i5-West side Federal way to 277/108 Ave SE... East side Kent. This area is underserved. Please and thank you
Out of District	I was born and raised where the first Abomb was made in less than three years, so 25 years seems almost ridiculously slow.
Out of District	I just moved to Seattle from the Netherlands in September of last year. I doubt that this plan will do anything in the near future to alleviate the stunning levels of road congestion, or to encourage people to use transit. It is frankly overpriced, and inconvenient to use, since the busses are all stuck in the same traffic. I also do not understand why there are more plans to build more tunnels. In an earthquake it seems like they would be quite unsafe, not just for the people inside, but also for the people who are above the tunnel system.
Out of District	This project is a complete joke and is nothing more than a jobs bill for the special interest Unions to buy and extort votes from people who are too ridiculous to recognize this fact and that they are mere pawns. The train has been repeatedly rejected by the commuters for years now, but the over compensated desk jockeys at Sound Transit and it's board continue to be in denial and refuse to do the honorable thing and put a stop to it. The corrupt politicians refuse to acknowledge this pet project of theirs is a disaster. This agency needs to be thoroughly audited, people fired, fines issued, and restitution made to the tax payers for having their money and time stolen from them. It is obvious that there are going to be big bonus given to people who don't deserve it, union employees rewarded, and politicians and their buddies taken care of by laundering money thru this agency. Pathetic!!! But of course when confronted with this truth, the blithering fools at this agency have the same old worn out line "It's complicated". Too bad the public is not as stupid and gullible as you need them to be, but thank goodness for Sound Transit that many of the Union members are.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	Why wasn't the old 520 bridge kept and used for light rail. Seems it could have saved some \$\$\$
Out of District	Better bus service from Enumclaw to a sounder station . Options for multiple day parking in Enumclaw
Out of District	Govt continues to tax the hell out of the common man and this plan is pure proof. GovtSt spends money with billions of cost overruns wit zero accountability. I'm sick and tired of being [explicit] and what little money I can put away is taken faster than I can save thanks to liberal spending policies. No thank you.
Out of District	JUST IMPROVE THE TIME LINE FOR A FASTER COMPLETION OF ALL the projects
Out of District	I would hope that the project plan is designed to optimize for increased usage, reduced congestion, and greater convenience. The reliability in schedule and timing of light rail is a truly important feature.
Out of District	The projects need to be funded by the people in each geographical area. Eastside taxpayers do not need to be paying for improvements to the Seattle area while dealing without having access to local improvements on the east side.
Out of District	Mass transportation is important and developing ways to offset the use of carbon producing means of travel (natural gas buses) and solar power to help power these new stations and facilities.  Connection JBLM / Tacoma with reliable means of transportation will help greatly
Out of District	Wa State has a very bad record of on time and on budget. This and the STUPID viaduct tunnel are boondoggles.
Out of District	I think this should be done faster and at a lower cost.
Out of District	If we do not invest in rapid transit now, we will face the same budgetary restrictions created by not implementing changes back in 1968. Waiting only increases cost or eliminates action completely by making the cost prohibitively expensive.
Out of District	fund buses and more routes. Use old railroad tracks for sound transit.
Out of District	Snohomish county light rail must be implemented MUCH EARLIER than the 25 year timetable.
Out of District	I will only vote for more buses on the road.
Out of District	Include more Sounder runs from Puyallup to Seattle.
Out of District	25 years to wait for transit improvements to the north end is ridiculous & hard to support. Why all the focus on the south end?
Out of District	The funding mechanism needs to be a progressive tax. Regressive taxes and added on property taxes need to stop. Tax carbon emissions and tax the wealthier more in a state taxing plan. Close the corporate tax loopholes now.  It's time to change the way we fund our much needed transportation projects.
Out of District	Like to see the Everett and Lynwood expansions happen sooner than in 25 years.
Out of District	If the cost of the plan will come from tax money, it should be income tax, not the same or similar amount on everybody.
Out of District	I would also like to see better connections from the ferry terminals to light rail such as tunnel access to nearby downtown stations as I commute daily from Bremerton to the UW.
Out of District	Light rail connection to Seattle from Tacoma should be a high priority since this is a major commuter problem area. 17 years is too long to wait!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	Every community can do these major projects for less than half the costs except ours. Big Bertha ring any bells?
Out of District	Please do everything within the relative legislative restrictions and Sound Transit powers to consider and expand tax funding sources. It would see that the large majority of people in the Puget Sound region are for a large comprehensive plan such as this, and appreciate the thought and logic that have been put in place thus far, AND know they need to do their part to help pay for it. However, utilizing ONLY Sales Tax, Motor Tab Tax, and Property Tax as the avenues to raise the necessary funds seems too narrow. How about potential payroll taxes? Tolling taxes for bridges? Potential B&O taxes? In other words, I'm advocating for spreading the tax burden to as many stakeholders and as equitably as possible BECAUSE we will all benefit from terrific transit infrastructure improvements in the relative short-term (10-30 years) and long term (50-100 years).
Out of District	Light rail to Tacoma needs to happen sooner than the proposed time frame. People in Tacoma have supported Sound Transit for years without the benefit of projects completed in other areas.
Out of District	Sounder/light rail service to Olympia, pleeeeeeeeeeease!!
Out of District	Stop the entire plan until the public has much more time to consider the expense
Out of District	With the money we're spending on rail we could make buses free for a couple lifetimes. Stop building expensive, fixed infrastructure that doesn't reflect the dynamic nature of our geography and commuters.
Out of District	I spend \$1600 dollars a year to use transit three day a week. I don't need more expense or even higher property tax than we already have. As it is we just took a \$200 a month loan payment increase on our home due to inflated tax assessments. Perhaps the Amazon and Boeing set can afford the endless increases, but for the rest of us you are crushing us under the taxes we already have.
Out of District	You still have not addressed any transportation issues for the Downtown Seattle Waterfront. We need a Sounder Rail Stop at the north end of the Water front. There is no "easy" way for commuters in the Alaskan Way North Water front area (Broad Street to be specific) to be able to access transit to allow for north end commuting!!!
Out of District	Using existing railroad routes/tracks has the lowest financial impact. Building light rail is extremely expensive. Driving buses, especially articulated ones on freeway shoulders would be extremely dangerous to other vehicle traffic. In all cases, all public transportation should be 100% user pay.
Out of District	It shouldn't take 25 years. Come on. It's the 21st Century. We need better transportation options now. Not in 25 years.
Out of District	Rail in hilly country is stupid. Do bus rapid transit with a lot of dedicated right of ways on freeways and major highways - it is cheaper and faster. if you can prove later that converting it to rail makes real sense on a 50 year cost per seat mile basis then you can convert it to rail. So far I have not seen a third party analysis of the cost per seat mile for anything you are doing. No I do not trust you do the analysis because what is left out of the calculation determines the results. For instance the transit tunnel under down town was originally funded without including the maintenance costs. Those that asked about were escorted from the room and later marginalized.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	Huge corporations that benefit greatly from this plan need to help with the tax burden, especially since Washington already gives them astronomical tax breaks. A lot can change in 25 yrs. Some of these large employers that would be greatly served by these transit proposals, may have moved out of state or overseas in 25 yrs. I'm a major supporter of transit, but the plan is too large, doesn't seem to be functional enough for riders in various areas, cost is too high to tax payers, and will most likely be outdated by the time of completion in 25 yrs. Maybe looking to Vancouver, BC's transit system would be helpful?
Out of District	If you cannot manage current state budgets properly, then why would we want to give you any additional money. You have been late on every project the state has ever done. You have been over budget on every project the state has done, and now you are wanting to impose more taxes. I am sure this survey will not matter in the end and you will use the data that supports your agenda.
Out of District	I think that Seattle over analyzes all city projects, spends too much time on this part of the project, doesn't really listen to the public, moves on and makes huge mistakes. I think it is insane that there is no rapid transit system to speak of.
Out of District	Scrap the plan entirely. Add massive increases in bus service - it is more flexible. Do not max out our bonding capacity for the next 25 years.
Out of District	I enjoy taking transit, but it is hard to justify the return to my wife who usually prefers to drive. In areas that are low density, easy parking, you're never going to get people to adopt transit. I think your design mentality should be of hubs where there is high density and a real cost for driving in terms of time and money (parking, tolls), and connecting people to the hubs. Within the hubs (i.e. within Seattle inner neighborhoods) you should have ubiquitous transport and smart links so that you can get anywhere (e.g. Ballard to Cap Hill) within 30 minutes. Then you need to focus on providing access to the hubs from outside. This could literally be a big parking lot next to a light rail station.  Without this ubiquitous transit within the hub, people outside and inside the hubs will still drive because the transit isn't convenient enough. Running transit all over the region as this plan proposes without firming up transit within the hubs will fail.  This is obvious to a casual observer, transit user and supporter such as myself.
Out of District	No station at 130th.
Out of District	In 1915, by hand, an electric train from Everett to Tacoma was built in 2 years. If the Democrats are removed, it could be done again, in 2 years, at almost no cost.
Out of District	METRO & SUBWAY, Ballard to UW subway. Lines that serve the most riders need to be delivered FIRST!
Out of District	I don't think getting to Boeing in Everett and to downtown Everett should take 25 years to be done. That is a joke. Building a line to Everett and Tacoma should be number #1 priority and all other branches should be secondary. Connecting the major cities would be the best option, not just suburbs and neighborhoods.
Out of District	None

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	Metropolitan Puget Sound is 30 years behind in producing a viable mass transit solution. I'm all for shoe-horning all elements of the master plan into a 20 year window. Keep in mind that a very large number of your most ardent supporters will be dead by 2041.
Out of District	Need to speed up the completion of the projects
Out of District	Any new Link Light Rail lines should be fully automated and driverless whenever possible. This means that any at-grade alignment should be removed from consideration.
Out of District	Need UW to Ballard! Why would implementing these services take so long?
Out of District	My question for the very beginning of this project is why do we have to build new rail lines on the East side when existing rail lines existed joining Monroe, Woodinville, Redmond, Issaquah, Bellevue, and Renton? The trackage could have been updated and we the people could have avoided several billions of dollars in needless expenditures. I do not support Light Rail for this reason!
Out of District	Considering 25 years there needs to be something done quicker.
Out of District	We need light rail everywhere fast
Out of District	I am not paying any more taxes for Sound Transit, until they stop wasting the money that they already collect. I have already registered my vehicles out of the Sound transit taxing area. I will drive to Oregon to purchase items needed, so as NOT to pay any additional sales tax.
Out of District	1. All transit plans should take into account a growing move toward telecommuting. 2. The Sound Transit rail line between Edmonds and Mukilteo should be shored up against slides.
Out of District	No transit, rail or bus, on Kirkland trail. Would oppose ST3 if money spent on study or transit on trail.
Out of District	I live in Stanwood and work in Everett. We need shoulder lanes on I-5. This was never mentioned. Our property taxes are already too high compared to other communities. We just had 2 more school levy's placed on us. I am against any property tax levy for any reason.
Out of District	Keep up the good work. We need more transit options on the Eastside....and everywhere I guess.
Out of District	Parking at the park and rides has become unbearable. I have to be at Ash Way Park & Ride no later than 6:45 to be able to park. Other close-by transit stations (Swamp Creek P&R, for example) has such limited service, that commuters like me who work until 6 or later most days, can't park there unless we want to wait an hour for a connection between Ash Way and Swamp Creek. The new paving at both park and rides was great, but we need another building like Mountlake Terrace Freeway Station; otherwise, not as many people are able to utilize the service and curb the congestion.
Out of District	1. Fiscal responsibility is necessary. Financial consequences are required for errors by any party. We the public trust the organizing entity to ensure honesty and integrity across all aspects of this project from workmanship and materials to oversight and accounting. Get this right!!! (i.e.. know where the "hidden" pipes are which stopped Bertha) 2. Since local cities are participating, they must facilitate this project, not hamper it. (ie. help with permit process)

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	The Tacoma transportation issues need to be addressed much quicker than the 17 year plan. Traffic due to JBLM is crippling and a daily mess. This needs to take a higher priority than it has been given.
Out of District	There seems to be no provision for spreading the cost of the project to communities dependent, but less so that those in King County. Island count is an example. I live in Island county and would support some portion of the burden. \$50/year would seem fair (I pass through Seattle occasionally and sometimes work in the area on contract).
Out of District	Totally opposed to ST3 only because it means layoffs for public / government employees--otherwise strongly support the plan.
Out of District	1) Drop the regressive sales tax component, 2) increase the vehicle excise tax (cars, after all, are the problem), 3) lower the property tax portion (we must stop forcing young and middle-class people out of the housing market), and 4) significantly tax businesses (100 or more employees?) that will benefit greatly from this investment.
Out of District	average adult is subjective. Many users are renters who do not pay property tax or do not understand its impact on their rent increase. Property owners are already squeezed to their breaking point with taxes.
Out of District	In order for the Puget Sound region to better accommodate not business and leisure visitors, it is crucial to complete a comprehensive rapid transit system that provides for easy and convenient access throughout the region. I always prioritize travel to destinations where I can use easy and reliable rapid transit.
Out of District	Why is it that the south sound is last for these important projects? We commute to Seattle to work.... We should not be the redheaded step children of the region. As someone who lives in Tacoma I feel we are not given priority.
Out of District	Seriously consider a route between the U-District and Ballard!! It would make for a great cross-city connection point so that people don't have to go all the way north of Lake Washington or downtown in order to cross east-west. It will also allow commuters (eg. workers, students) to bypass the traffic at the I-5 on/off ramps. The UW student population and its employees are only going to grow and many make their home in the Ballard/Wallingford area.
Out of District	I feel strongly that the transit light rail should be concentrating on getting people from the outskirts into and out of the city without driving. Those within the city could then drive easier and since they have less distance to drive, would save gas compared to having thousands driving in from Everett, Tacoma, etc. so why in the world would you run the light rail through the Ranier valley? And not to service the East Marginal way area with thousands of workers seems totally worthless. You need more stations. If they are 5 miles apart, only someone needing to go to existing stations within a walking distance will use it. Look at New York, London, etc. there are stations very frequently within the city.
Out of District	gov. operates at a loss and never answers for it, and the taxpayer bails it out every time. The cost is never what you say going in. And you know that. I call that dishonesty. Lucky for you the average Liberal taxpayer, being the majority, is full of your kool ade. I would love to see a map that shows all properties that will be taken by Eminent Domain. That would separate you from cowards. Until the gov. is expected to run like, and be held accountable like a business, you will never have my OK to spend money.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

OTHER - Out of District

Out of District	WE need a fair State Tax system based on income. We have all these wealthy high-tech companies that benefit from our city services. It's time they pay their fair share! That's why even though I favor all that I said I did for improved transit, I do not support the way of paying for them. Additionally, we could charge(as other states do) a fee to sports teams who play in the arenas we, the public, mostly paid for and support.
Out of District	Since the general and aging population in the Puget Sound area will increase dramatically the transportation is essential for the public.
Out of District	25 years! Hell, in 2018, Space X will launch missions to Mars! By then tourists will be able to take a brief ride in space around this planet. Traffic on I-5 will increase by 2% each year and by 2041 I-5 an I-405, were they human, would be entitled to retire on Social Security. Too little, too long, too late. This is that old political clatrap of half a loaf, half of the half of the loaf remaining, and by the time the last slice is delivered it is covered with mold.
Out of District	Consider using heavy rail instead of light rail for some of these lines, like Denver has done recently
Out of District	Please support additional structure parking on the 522 to 145th route, specifically in the Bothell/Kenmore area.
Out of District	Where are public comments published?
Out of District	Build it ,build it, build it! We should have voted for transit in 1970!
Out of District	If Sound Transt was on time. We would be taking light rail from Ash way. In light of STa inability to get things done I don't want to fund ST3
Out of District	Sound Transit is an expensive system that doesn't have any noticeable positive impact on traffic. There will be cost overruns as in the past and we are already overtaxed. After the first vote failed, the second cut out some stations, then were added in at an additional cost. The projected 4.6 billion was a joke and couldn't even complete the so-called route plan. The only aspect that makes some sense is Sounder, using existing tracks and not taking away other traffic lanes. I feel supporting Sound Transit is throwing away good money after bad.
Out of District	Light rail to Orting would be great.
Out of District	These all need to be done within 10 years...I travel the I-5 corridor every day; 92 miles one-way to Seattle for work. Believe me, this needs to be completed way, way sooner than 25 years. I will retire in less than five years by the time I'm 60 because I cannot continue to commute and I cannot move and I am not ready to retire. I want to continue to work here but there is no way...not without a better system in place. Thank you.
Out of District	what about coordinating with the ferry system?
