Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

Subarea	Additional Feedback - Comment(s) about project completion timelines
SNOHOMISH COUNTY	Project timelines are absolutely absurd. Running these projects sequentially is only wasting time necessary in building out a viable mass transit backbone. Work concurrently even if a higher cost.
SNOHOMISH COUNTY	Needs to be done in half the time proposed!
SNOHOMISH COUNTY	The focus is too much on expanding downtown and the majority of use will be N-S and E-W traffic. Connecting to Everett and Tacoma should be #1. Connecting Redmond to Bellevue #2. Issaquah should be last on the list because people chose to live off of the mainline and it is not a feeder location.
SNOHOMISH COUNTY	With such a large tax increase many would like the new service a little sooner. Either lowering the taxes or speeding up the timeline would likely assure voter passage of ST3
SNOHOMISH COUNTY	Get light rail to Everett as soon as Tacoma.
SNOHOMISH COUNTY	Would love to see more options going North of Seattle.
SNOHOMISH COUNTY	There is no reason for it to take 8 years to get busses driving on the shoulders to speed up commutes. This should be done immediately to give relief right now.
SNOHOMISH COUNTY	Light rail service to Everett should be fast tracked so we don't have to wait 25 years for it. People that may not be alive to ever use the service will be less likely to vote to fund it.
SNOHOMISH COUNTY	Priority should be placed on finishing light rail along I-5 corridor and associated parking expansion as quickly as possible.
SNOHOMISH COUNTY	It is really unacceptable to me that the proposed plan will take 25 years to get light rail to Everett. It seems that the South Sound already has so many more options that the North End, so why is going south prioritized over going north? I've been paying these taxes for over 20 years, with the "holy grail" of light rail in my mind. If it takes another 25 years, I'll have spent my WHOLE work life paying taxes for, and waiting for, something I will probably rarely use at that point. I'll be retired - possibly dead - by then. I feel like I've been doing my part, waiting somewhat patiently, and this is like a slap in the face. All we have to show for it up north is 2 - count 'em 2 - Sound Transit bus routes, and a commuter train that runs reliably only 3-4 months of the year. I will have really hard time supporting a plan that will cost me personally upwards of \$5000 that will not benefit me in time to fix my commute. I know it's for "the greater good" and all that, but that's what we were told before. What else you got?
SNOHOMISH COUNTY	I-5 desperately needs bus only lanes that serve those that are stuck in traffic from suburban areas. Busses are gridlocked in HOV with cars.

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	I have no idea about the reality of creating a timeline for these projects, but 20 years for the Light Rail to reach the Lynnwood Transit Center seems awfully long. The LTC is a major hub for people living on the north side to get to downtown Seattle, but the traffic is making it harder and harder to get there. I've all but given up trying to ever go into Seattle, at any time of the day or week. At the rate people are moving here and making traffic worse, and with the rate that technology is improving (things like self-driving cars), in 20 years the Light Rail system may not even make sense anymore for our region. Isn't there any way to build some of these projects concurrently, or some other way to speed up the overall timeline?
SNOHOMISH COUNTY	I would like to have these deadlines move up. It's silly that it takes us so long to get things done. I've ridden the Portland system and it is fabulous - gets you where you need to go in a timely manner and you can get all over town easily. We should be able to do the same thing and move along quickly.
SNOHOMISH COUNTY	Everett MUST have light rail earlier than in this plan otherwise I will not support it.
SNOHOMISH COUNTY	The time frame is completely ridiculous. There is no need for the most needed service, light rail, to take up to 25 years. High priority should be given to this portion of the project to bring it in in much less than 10 years.
SNOHOMISH COUNTY	25 years! That is how long it will take to get the rail to Everett? I assumed that if this project was approved, that segment would start as soon as the Lynnwood segment was complete. I love the idea of getting the light rail near me, but I will likely be someplace else in my life by the time it comes.....
SNOHOMISH COUNTY	Do the simple things now! Let the damn buses drive on the shoulders of 405 I5 and 90! Why get on a bus when you are going to sit next to the people in their cars that are comfortable not miserable like bus people.
SNOHOMISH COUNTY	Light rail needs to follow the I 5 corridor north south  and bus service should only go east west  Make it happen in 2 years or less, we are losing money every day we don' do not start
SNOHOMISH COUNTY	Right now the ST buses are some of the regular causes of backups on 405. Until they can go the speed limit (when there is no gridlock in front of them) going up hills you are adding to the backups. Your timeline is terrible. It's too long when your plan doesn't do enough. Unless you can actually turn these around in 2-3 years you need to stop, and then we might actually start supporting you again.
SNOHOMISH COUNTY	Honestly I would be much more likely to support these projects if they wouldn't be obsolete before they even launch. 25 years is too long and there is too much bureaucratic red tape.  It is ridiculous that it will take 5 years to implement a line between Northgate and UW.  Find a way to work smarter and more efficiently and get projects implemented faster and people will be more likely to support with their tax dollars. In 25 years these changes will likely barely even help.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	Stop cancelling northline sounder service multiple times each week
SNOHOMISH COUNTY	Per your own survey's words: "Mass transit is critical to the economy. If businesses know their employees can get to work and products can get to market, they will choose to locate and expand here." Everett needs light rail sooner than 25 years to sustain and promote the huge manufacturing hub there. Everett keeps getting pushed back. Make them next! Thanks.
SNOHOMISH COUNTY	This is happening way to slowly. We need to deemphasize busses in favor of light rail. Get the transportation system off highways. Busses have too much propriety. Light rail instead of busses need to be on the I405 corridor if you want to get people off highways.
SNOHOMISH COUNTY	I believe that an explanation is needed for the long time span, especially for the Ballard light rail opening date. Since this is Seattle's main project I don't think it should be pushed back so far without a very, very good reason, as every year it is pushed back delays the likelihood that it will ever be built...  Furthermore, I would like to hear the thoughts/proposals of ST on how this long BART-like system will be maintained over the years. Currently there isn't sufficient population near to the far-flung stations to possibly cover maintenance costs over the long term. Aggressive TOD, especially right next to the suburban stops, is the only way this system can hope to support itself and not be shuttered within 50 years of opening. Please give some thought to the long-term, too!
SNOHOMISH COUNTY	The completion timeline is too long, spread over 25 years, and addresses too many projects, such as buses, light rail, heavy rail, etc. My focus and preference is to expand heavy rail service, and while I support other aspects of this proposal I think each should be proposed separately and not a packaged deal. The scope and cost is also unwieldy and unlikely to be managed correctly in bulk, and is far more likely to be lower cost and controlled as separately managed projects.
SNOHOMISH COUNTY	Speed up the timeline considerably. The area can't wait that long for any phase of the project to complete.
SNOHOMISH COUNTY	25 years is not soon enough! More projects need to be completed more quickly.
SNOHOMISH COUNTY	I voted for the initial RTA initiative, worked for WSDOT at the time and have consistently seen ST over promise and under deliver. \$11 M for the PED bridge in Mukilteo was the last straw.
SNOHOMISH COUNTY	Too slow, traffic is getting worse at a much faster pace than these projects are scheduled to come online...
SNOHOMISH COUNTY	The amount of traffic from Lynnwood to Seattle is growing at considerable rates. What can we do to decrease the amount of time necessary to bring light rail from Seattle to Lynnwood? Our park and rides are at capacity. Our freeway is at capacity. Our back roads are at capacity. What would it take to expedite the Lynnwood to Seattle project?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	<p>25 years before the everett area is hooked up is too long. Some of the worst traffic is in about a 5-10 mile stretch between south everett and Marysville.</p> <p>I don't know why the other areas that already have more rapid transit, sounder and light rail should get the increased services first. They at least already have something. you need to work on the north end first.</p>
SNOHOMISH COUNTY	<p>Everett should not have to wait so long. I am not so sure about decades of taxation with minimum benefit. Also busses are NOT the answer. Get us out of traffic by giving us light rail and viable bike paths. The interurban is pathetic.</p>
SNOHOMISH COUNTY	<p>The timeline for advancing Light rail north of Lynnwood to even south Everett like Mariner P&amp;R seems to be a bit out of reason. With light rail suppose to get to Lynnwood in 2023 why wont it get any farther north for an additional 15 years. The buses/ park and rides are already at capacity now in this area, and are subject to frequent delays, and yes having some priority on I-5 would help, but is not what is needed. We need the light rail to reach farther north soon as oposed to later. This area has seen many massive developments in the last 3 years, and many around the Ash Way P&amp;R and all the way up to the 128th street area.</p>
SNOHOMISH COUNTY	<p>Because of the length of time the project will take, I will not vote on ST3. 2040 to Everett? That is way too long. I know quite a few people who feel the same way.</p>
SNOHOMISH COUNTY	<p>This is all great and it needs to happen sooner than later. While it's great we are thinking 25 years into the future, I'm guessing most of the people potentially benefiting from these improvements want them -right now-. I am just bouncing in my seat thinking about the lynnwood extension of the link rail, I just hope we have enough parking there! The LTC is already full to the brim before the main commute is even under way. We need twice the parking we currently have (and that's with just our current population) between the LTC and the Lynnwod Link Light Rail (LLLR).</p>
SNOHOMISH COUNTY	<p>I've lived in Snohomish county all my life and have been voting for Sound Transit since the first initiative decades ago. I think it's BEYOND RIDICULOUS how light rail to West Seattle and Ballard is more important than to Everett and Lynnwood. It's a travesty that Seattle residents ALWAYS get their way and their projects done first. Time to even the playing field and extend benefits to ALL TAXPAYERS. On the current timeline, light rail won't get to Lynnwood in time to benefit me or my coworkers. That sucks.</p>
SNOHOMISH COUNTY	<p>25 years to Issaquah?! Maybe if you spent less time [explicit] off, transit could improve at some point before I retire or die of old [explicit] age. We need improvements NOW, not 25 years from now. And on top of that, the people who are getting pushed out in into the suburbs because they're being priced out of Seattle (who are most in need of transit options) still aren't being served by this proposal. Nor does your proposed map serve the people who are being [explicit] every day by the 405 [explicit]. My area is getting [explicit], but you still want me to pay for it? You can take this proposal and cram it.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	<p>I believe that ALL these projects should be done NOW!!!It is a joke to think we will have to wait 10 to 20 years. What is wrong with you people. All of these light rail projects should have ALREADY been done!!! We are all miserable here. Traffic is always being talked and complained about. It is a HUGE stress to living in the Seattle Area.</p> <p>I HATE buses. I drive M-F and buses are a HUGE stress to my commute. It would make me nervous having them on the shoulder. Where would I go if my car breaks down? If there is an accident? Why are the average citizen paying every day for the LACK of PLANNING by your department. If you were a private business, having to make a profit every year, you would have been out of business. I have very little respect for how you have handled our traffic congestion. You knew the Seattle area was growing. You forced the stadium, when we said NO, you needed to force the tax payers on road congestion!!! Do not ALLOW the buses to take up the shoulder unless you have a plan for us people in cars that have to deal with the mess you have created due to your lack of planning!</p>
SNOHOMISH COUNTY	Need to rein in timelines-- willing to pay more if we can get it done sooner.
SNOHOMISH COUNTY	I commend existing light rail. I use it to travel to SeaTac. I support light rail. Would pay for expansion but really want to see faster implementation. Twenty five years to get to Everett is glacially slow. Good luck.
SNOHOMISH COUNTY	The timeline is WAY too long and the budget is way too massive at this point. I'll be retired by the time light rail comes to Everett and I can actually use it. That is way, way, WAY too long to wait for North Sound traffic improvements! There has to be a better plan and a quicker timeline.
SNOHOMISH COUNTY	The completion timeline for link light rail to Everett is way too long. I'll be retired by then.
SNOHOMISH COUNTY	<p>Most of these projects are great, and I'm very pleased with the finished product map. Light rail to Ballard, SLU, and a new downtown tunnel are fantastic. I'm also very pleased to see light rail diverting to Hwy 99 for the Paine Field deviation. As a Snohomish County homeowner, I'm one of the few who didn't think Paine Field needed to be served; I'm at least pleased to see it using the Highway 99 routing.</p> <p>But, my god, these timeframes! This is horrible, and way too slow. Way Way WAAY too slow. 22 years before we get rail in one of the densest urban centers in the state? I've got my cake for my personal rail endeavors (I live 2.5 miles from Lynnwood TC, and at the nexus of two bus lines that will go right to a Light Rail station at the completion of ST2), but I can't imagine that you'll get much support for this package if you're planning on making people wait so long for these projects to be completed. For the final version, if possible, please shore up the timeframe, and get it done more expeditiously.</p>
SNOHOMISH COUNTY	By the time you reach my area, I'll be retired and I'm only in my forties. whilst I support the plan, a timeline of 2041 for Everett does me no good. For the rest of my working life, I'll be stuck with a train that frequently doesn't run, and buses that don't run on schedule.
SNOHOMISH COUNTY	25 years to reach Everett is ridiculous!! I'll be 65 by then!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	This should have been done 30 years ago. I will not support this as I will be DEAD before I can see any benefit at all in my lifetime. There is no reason this region has waited so long to start implementing this and to just keep paving more lanes into the center median was stupid, that is where you should be putting the light rail in. Every metropolitan city in this country has had light rail for decades that has worked just fine, this region should have been a leader and could have had light rail and high speed rail from Vancouver to Portland years ago and probably further south by now to, no I won't waste my time and effort on this at this point in my life. I'm a big proponent of light rail but to see it in Everett in 2040+ forget it. And after the I-405 [explicit] where I had to get a chip for my motorcycle and got a ticket the first day I used it (when I shouldn't even have to have a chip) I can see that the 2040 pipe dream will really be 2080!
SNOHOMISH COUNTY	Most of this should have been done years ago. I believe waiting even 12 years will cause irreversible damage.
SNOHOMISH COUNTY	25 years before Everett would be hooked up is too long.
SNOHOMISH COUNTY	It seems that timelines continue to be pushed back. Earlier in this process I believe the timeline for light rail to Lynnwood was roughly 2023. Now it sounds like 2033. We need to make light rail from Everett to Tacoma a higher priority.
SNOHOMISH COUNTY	In 25 years this plan will be totally outdated and obsolete! We need the whole set of projects done now, not in stages in 25 years!
SNOHOMISH COUNTY	The plan for light rail expansion is too slow. BRT is limited by cars on the freeway at the same time. I would not be supportive of a 25 year plan for light rail projects completion.
SNOHOMISH COUNTY	The message is clear: Snohomish County is Sound Transit's lowest priority. Our highways are over congested now, the busses commuters depend on to get to downtown Seattle are slow and unreliable, the Northline Sounder runs too infrequently to be generally useful, and the timeline for completion of Light Rail to Everett is obscenely long. How can it possibly take so long to do? By the time this project is completed, traffic will be at a complete and utter standstill!  If you want Snohomish County to vote to support ST3, you are going to have to do something very real, very soon, to prove that you will use our investment in you to benefit us.
SNOHOMISH COUNTY	We need light rail to Everett in the next 5 years not in 25 years!!!!
SNOHOMISH COUNTY	Everett was promised light rail years ago. Now it is last on the list. Snohomish County is paying their fair share of taxes for this, but at the bottom of the list of priorities. At \$200 per year, the average Everett citizen will have paid \$5,000 in NEW light rail assessments before we get service. That's in addition to whatever we have paid in over the last few decades. It's simply not fair.
SNOHOMISH COUNTY	Focus and priority should be given to completing the backbone of the system along I-5 from Everett to Tacoma and east to Bellevue. Everything else should be secondary.
SNOHOMISH COUNTY	Everett first. I want to be alive to see it if you ask me to pay for it.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	Feel cheated. The original plan was to connect the "STEM" and then add other projects. Now the "STEM" is a sideshow to other lines proposed later and we in Snohomish County are shuffled aside for projects that are being pushed by those politically powerful forces in Seattle. The route to Everett requires no tunnel and appears pretty straight forward as opposed to Ballard for instance, yet it is now projected to be the last completed. It appears the route to Lynnwood will be completed and work north will stop until new additions are done. I will not support this. I feel like I am waiting for the shoe to drop and the next sideshow will delay the "STEM" further. You need to keep your word and finish the core route first.
SNOHOMISH COUNTY	I have no faith in your ability to execute.
SNOHOMISH COUNTY	If you think you are going to get a big YES support from Snohomish County you're all kidding yourselves. If it is going to take 25y to reach downtown Everett this plan WILL NOT PASS in Snohomish County. I strongly support light rail but will vote NO if the plan doesn't get to Everett faster. I-5 North is a parking lot now and there isn't enough Sounder Rail trains between Seattle & Everett.
SNOHOMISH COUNTY	It's taking too long. Huge supporter of light rail (it runs on schedule) but takes so long to implement.
SNOHOMISH COUNTY	The project timeline not does NOT keep pace with population growth! ST3 needs to be completed sooner.
SNOHOMISH COUNTY	The North light rail timeline is totally out of line. I needs to be much sooner. This should already have been done. Extending the light rail to Everett is more critical than improving pieces in King County right now. Those are important, too, but the north end needs to be an urgent priority!
SNOHOMISH COUNTY	This is much too slow. For someone who plans to move away for college, and live elsewhere for a few years after that before returning to the Seattle area, the fact that barely a dent will be made in the system to expand coverage to Ballard and also up to Everett by that time disappoints me. I will be almost 40 by the time light rail comes to Ballard, which is where I likely will live.
SNOHOMISH COUNTY	The entire package is desperately needed as soon as possible. If there are any opportunities to deliver ST2 or ST3 projects earlier, they should be accelerated where possible even if it costs more money.
SNOHOMISH COUNTY	Snohomish County has been waiting for many years. Keep promise to connect Everett and Tacoma first. Other projects fine but pushing Everett to the end of the program is another betrayal.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	<p>Traffic and mass transit should be considered an EMERGENCY and these timelines are WAY TOO LONG. Additionally, neighborhood in Seattle that already have transit will benefit before Everett. This is unacceptable. We need transit now. Sound Transit should cut their timelines but as much as possible and have an absolute war on traffic.</p> <p>Additionally, I'm assuming that the bonds are going to be issued over the course of 20 years and who knows what the interest rates will be then. This timeline is way too long for me. As a homeowner and car owner I'll end up spending thousands and thousands of dollars before I see one benefit, if I even live that long.</p> <p>These timelines are simply unacceptable.</p>
SNOHOMISH COUNTY	<ol style="list-style-type: none"> <li>1. Why so long to service Everett/Boeing? This is a HUGE manufacturing center, immensely impacted by road congestion. Major employment centers should be given preference over residential neighborhood spurs.</li> <li>2. Completing the N/S central line, along I-5, makes the most sense FOR THE REGION, and was what was implied in the 1990s.</li> <li>3. The expense of bringing light rail directly to Boeing Everett may not be the best use of funds if it DELAYS or replaces service directly up I-5 to Everett Station. BRT can service the Boeing area from I-5 adequately and economically.</li> </ol> <p>I HAVE VOTED FOR ST SINCE THE BEGINNING, but feel that Everett/Sno. Co. Residents have been thrust to the rear. ST3 should revise schedules in favor of the fastest growing area before transport runs further out of control to the north. We have fewer alternatives in place than closer in urban neighborhoods.</p>
SNOHOMISH COUNTY	<p>taking 25 years to get to Everett with growth of population in Snohomish county is shocking. You need to bring that in closer.</p>
SNOHOMISH COUNTY	<p>This timeline is unconscionable. All of these projects need to be done MUCH sooner than is being proposed here. I don't fault Sound Transit for putting together the package, but I must vote no. There is no reason to believe that ANY 25-year plan can be completed within time or budget in the capricious Washington political climate, and we mustn't be saddled with yet another doomed money hole. If transit is a priority in this state, then Olympia needs to put more priority into removing the kind of roadblocks that cause "planning" to last most of a decade. Other cities are building dozens of miles of transit lines per year. We're wasting dozens of years per mile.</p>
SNOHOMISH COUNTY	<p>Timelines are FAR too long. I know there's a lot that goes into developing these projects, but 25 YEARS? That just seems ridiculous.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	South of Seattle already has rail options, with a more reliable sounder, and light rail to the airport. North of Seattle unreliable and slow sounder, and no light rail. 20 years to get link to Lynnwood is an unacceptably long timeline. The Swiss dug a tunnel under the Alps in less time. We need to do better.
SNOHOMISH COUNTY	It needs to happen but the timelines are entirely outrageous. At these timelines it will be great for future generations, but I will be retired by the time we reach Everett. Technology will also no doubt have changed a lot in the next two decades, leaving us with a currently sub-par light rail that will be even more sub-par in the future.
SNOHOMISH COUNTY	I'm a big fan of ST2 and have been waiting patiently for light rail to come to Lynnwood. I have used the north sounder a lot in the past but eventually got tired of mudslides and freight traffic delays and lack of flexibility with only 4 trains. I still have to wait 7+ more years for the Lynnwood station so the thought of Ballard, Issaquah and Everett having to wait additional 25 years seems untenable. It is almost free to borrow money now so there must be a way to speed up the roll-out.
SNOHOMISH COUNTY	22 years to get to Ballard! Why is that not sooner on the list that is one of the fastest growing communities with in city limits...and no way out!
SNOHOMISH COUNTY	Why is this plan going to take so long to complete? Think of it this way, what did China look like 20-30 years ago. They have put in an incredible amount of infrastructure in that time and dramatically improved the lives of millions of people. This ST3 project is so much smaller in scope and yet it has a timeline and cost (\$50B!!!) that are far too great.
SNOHOMISH COUNTY	I think it's important to evaluate the order in which ST3 projects should be completed. In my opinion, Light Rail to Everett will have the greatest impact on the continued reduction of traffic in the area, taking area growth into account.  I do understand the idea of picking the low-hanging fruit. It would be worthwhile to publish the data that backs up the prioritization.
SNOHOMISH COUNTY	ST3 has too many projects, costs too much and will take too long.
SNOHOMISH COUNTY	Everett is having to pay for service after many of us have died. But we pay for it. Build the system, get it funded with bonds. Payback when it is completed. Eliminate sounder, way too costly for very little benefit. Use the savings to help fund transit along I-5.
SNOHOMISH COUNTY	I know construction takes a long time and uses a lot of resources, but the timelines for light rail seem extremely long. I'd like to be able to take light rail from Edmonds (Lynnwood) to the University of Washington and other sites MUCH sooner than 2020 something.
SNOHOMISH COUNTY	25 freaking years?! Should have started 25 years ago

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	<p>The timeline for light rail to Everett is too long (by a lot) and would cause a potential avid supporter like me to stay on the sidelines or oppose ST3.</p> <p>The diversion to Paine Field is a time and money wasting mistake. Community Transit is already building a Swift BRT line that will make this connection so the whole idea seems inefficient both from a capital and overall light rail travel time perspective.</p> <p>Please rework this and get it done in a timeline that will provide relief during our working lifetimes!</p>
SNOHOMISH COUNTY	<p>25 years is WAAAAAYYYY too slow. Linking all the cities with some kind of light rail should be done in five years or less. If your data is correct, the traffic from Everett to Seattle--which already travels at an average of 20 mph each morning--will be at a stand-still and it'll be faster to walk than drive. Cities like Hong Kong and Tokyo built entire networks of trains that are fast, efficient and cheap in far less time. Most people I know will be RETIRED before light rail comes to Everett. Kids born today will be finished with college and starting families by the time it's done. That is <i>*not*</i> a reasonable timeline. I wholeheartedly support the development of light rail and have been begging for it since I arrived in Washington state 25 years ago. We are generations behind other developed (and undeveloped) countries.</p>
SNOHOMISH COUNTY	<p>The completion of the system spine - Service to Everett - is vitally important and needs to take priority over extension of branches. The I-5 corridor starting north of Marysville is congested now and will only get worse with increasing population. Not getting these commuters off the road until Lynnwood until 2041 is ridiculous. This 4 hour per day commuter congestion will continue to impact Snohomish County residents negatively for 25 more years - both those commuting into Seattle, and those trying to commute within the county. This is a much higher priority and provides much greater benefit to our community than extending rail service to Ballard or West Seattle.</p> <p>The alignment to run Link Light Rail down Evergreen Way in Everett from Boeing to downtown Everett is ridiculous. This section of road does not have significant congestion, it is served by both regular bus and Bus Rapid Transit (BRT) already. From presentations, I understand there are options that have been reviewed showing it is less expensive to use a spur line of Link Light Rail or BRT from the I-5 corridor to serve Boeing directly, which also infers it would be faster to complete. Link Light Rail along Evergreen Way will increase congestion and difficulty for local residents accessing businesses on the corridor.</p>
SNOHOMISH COUNTY	<p>This will take too much time to complete. I live in Everett and by the time light rail reaches Everett, I will have long since retired. Why should I be forced to pay this much money out of my tight budget for something I will never use? The time line is completely unacceptable. It needs to reach Everett much sooner. This work should have started years ago. I agree that light rail is the best way to get people where they need to go. I just strongly oppose this time line.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	<p>Two broad comments:</p> <p>1) This is a once in a lifetime opportunity. Let's not [explicit] it up by making silly, short-sighted, compromises. Light rail to Ballard MUST be grade-separated.</p> <p>2) Build the light rail segments faster. Waiting 25 years to get rail to Everett and Ballard is terrible.</p>
SNOHOMISH COUNTY	<p>Finish the Everett line in 10-15 years, pick the cheapest and most time-efficient design. Do make this a 25 year project. It doesn't need to go to Paine field immediately, add that on later. Instead have rapid bus going from I-5 station to Paine Field. Also please refrain from excessive spending on accessories such as art galleries/parking, etc. Just build rail line and stations, then add the extra accessories at a later date.</p>
SNOHOMISH COUNTY	<p>This project needs to be completed in a much shorter time frame at a lower cost! I will vote NO as I will never really benefit from this project.</p>
SNOHOMISH COUNTY	<p>There is no way this should take more than ten years to complete; we got I-5 from Seattle to Bellingham in ten years including hundreds of bridges and interchanges. Make long-term contracts with capable contractors and hold them to it. We're better off making pillars and beams offsite, closing an area down for a few weeks to install them, then having it done, rather than closing a lane at a time as is typical around here. You talk a lot about getting people off the roads, but much of this plan involves buses. You mention that the rail is not at grade, but you have a long stretch of the SeaTac to Downtown at grade.</p>
SNOHOMISH COUNTY	<p>All the plans are too slow to make any difference. I used to support transit improvements but clearly transit is not capable of improving transit. Transit refuses to provide East to West transit over freeway overpasses so no one wants to use the bus system. We have the north and south SWIFT which is awesome but planners have failed in creating efficient east and west connections.</p>
SNOHOMISH COUNTY	<p>Is there any way to speed up the completion for the I-5 corridor? The commute from Seattle to Lynnwood is terrible and I would love to see a light rail in the next 5 to 10 years. Thanks!</p>
SNOHOMISH COUNTY	<p>This region needs light rail now - not in 25 years and not in increments to narrow to be useful until all is completed. I want priority removed from BRT expansion and placed on more efficient light rail. More busses is just more money and another large vehicle stuck in traffic at this point. They no longer seem to make a viable difference</p>
SNOHOMISH COUNTY	<p>Project completion timelines are too long! 25 years for the completion of some of these projects borders on ridiculous. The Los Angeles area is adding even more track to their light rail system in significantly less time. Further, demographic projections 25-years out are often way off base (where people will be, where they will be going, when, etc.)</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	<p>I will absolutely vote for this system. That being said, if you're making traffic and environmental justifications for the system, it seems odd that the project legs that have the greatest positive impact on these metrics, link to Everett, Issaquah, and Tacoma, are last to come online. I support the concept of West Seattle and Ballard light rail, but these populations spend less time on the roads as it is, burning less fuel and occupying less highway space than the suburbs. Additionally, the urban cost of housing is prohibitively expensive so less wealthy persons often have to live further away from the city. Link rail would have a greater impact on these people's cost of living and their quality of life than Seattle neighborhood lines as these people already HAVE to drive in many cases, and have to spend more time in traffic, burning time and fuel. 25 years is far too long to ask for these less wealthy populations to wait considering they will be paying the same tax rate as those who live closer to town who will receive the benefit they are paying for earlier. Lastly, removing traffic from near downtown will have less of an impact on overall traffic than removing traffic spending longer in a commute cycle. Expansion to Everett, for example, allows Everett commuters, and those between Everett and Seattle to choose transit. Transit to Ballard means that anyone further north must drive south to find transit. A Ballard resident could drive to Northgate (reverse commute) and catch light rail while an Everett resident would have to drive south to Ballard to do the same. While more complex projects, the impact of the suburban link lines is far greater than in town lines, and the timeline, based on an understanding of funding inputs from taxation, should be analyzed to speed up these lines or reprioritize them.</p>
SNOHOMISH COUNTY	<p>I work from home, so I don't fight traffic. However, my spouse works near downtown Seattle and in the Overlake area of Bellevue. I know the problems. There can be no more growth without doing something to move people better. And, moving buses on the shoulder of a highway is absolutely the wrong idea. I had a car still on SR-520 once, and that bus coming up to me on the shoulder wasn't comforting.</p>
SNOHOMISH COUNTY	<p>Seems to be taking too long to complete this. Is there another way to motivate, say perhaps fines for not completing on time, the companies working on these projects?</p>
SNOHOMISH COUNTY	<p>Timing to Everett and Eastside is too slow. Snohomish County is sick of taking a back seat to Seattle and King County. I would prefer that community transit get grants to build their own separate light rail to Lynnwood.</p>
SNOHOMISH COUNTY	<p>You compete with ridiculous bike lanes and pro-bicycle agenda. The bicycle and tolling agenda slows buses, access to rail and makes expanding light rail and increasing bus service more expensive. I completed an extensive research project on the regional RTA in 1995 and the agenda has changed and goals have not been met. I am still in my car because you have been hijacked.</p>
SNOHOMISH COUNTY	<p>I feel as if the proposed plan is just playing catch up. The projects need to be implemented quicker than proposed.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	25 years to get light rail service to Everett is ridiculous. I-5 between Seattle and Everett is arguably the most congested roadway. \$200 per year for 25 years for light rail to finally reach me? I'll be retired by then! This is way too long a timeline such that the people paying for it won't be the ones using it. We have plenty of buses and no matter what you do with them, they will always by nature provide inconsistent service. We need to get OFF the roadways. We need rail and we need it 20 years ago. I'd rather pay more per year and just get the light rail system done than fritter the money away on more and more bus stuff and dink around for decades before any real light rail work gets done.
SNOHOMISH COUNTY	the Lynnwood- Everett connection should be phased in sooner, rather than later.
SNOHOMISH COUNTY	As I am 70 yrs old this time line is for the birds, 25 years to connect Everett to Seattle or Bellevue. Its needed now not in 25 years. As usual by the time this get done around here they are out of date and something bigger and better is needed. Snohomish Co. has been paying for RTA on two different tax packages for what 20 years what have we gotten for it. Seattle and Tacoma has gotten everything. Fed up !!!!! I have asked that question to all 3 of my state Reps and not one will answer. What has this Co. gotten and how much have we paid???? I was a daily rider to Seattle from Mariner PR for 13 yrs until I retired, but would like to use the rail to go to events in seattle but the current rail system is worthless.
SNOHOMISH COUNTY	We need to figure out how get more funding to speed up this process. Our commute times and growth can't wait 8 - 20 years. we need change in the next 3-8 years.
SNOHOMISH COUNTY	The Everett light rail timeline is to long, we need a earlier completion date.
SNOHOMISH COUNTY	The Everett light rail link should be the FIRST priority and be completed in 7 years or less. Snohomish County residents will have been paying Sound Transit Taxes for years with limited results if this is not done. The proposed schedule places local Seattle centric projects far ahead of regional projects in high traffic congestion areas like I-5 north to Everett. Seattle is screwing up traffic congestion by designating traffic lanes for low volume use by bicycle riders (who aggressively ignore traffic laws and don't pay for use of roads) and Seattle should not be rewarded for this.
SNOHOMISH COUNTY	Get it done as fast as possible! Also adding a connection spur between Ballard and the WU with the potential to extend via a transbay tunnel to Kirkland/Redmond to complete the loop in the future.
SNOHOMISH COUNTY	The time line needs to be moved up for the north end where traffic is unbearable! Please consider the north end as an urgent need. The area has grown quickly and at times can take me an hour 40 minutes to get from 164th Mill Creek to Mercer street during morning drive. This needs to be addressed sooner than later. The light rail is has my support much more that bus. Help!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	I do not understand why we have to wait until 2023 to get light rail to Lynnwood. Why the ridiculously long timeline? I also do not understand why it has taken so long for any transit plan to consider the major employment site called Boeing Everett. For 15 years I could not find an adequate bus to get from my home in Lynnwood to my job at Boeing Everett without adding over a mile of walking on each end. The parking at the Everett plant has always been a nightmare. There should have always been public transportation to Boeing.
SNOHOMISH COUNTY	25 years is too long for Everett
SNOHOMISH COUNTY	Quarter of a century overall timeline is completely unacceptable and not helpful for the needs of Western Washington residents who are already now in great need of better commute options and efficiency.
SNOHOMISH COUNTY	I am going to be one happy person to see the project completed all the way to Everett, meaning the Everett Station. This should get a lot of cars off of I-5 both north and south bound, where people can use the light rail or the Sounder Train to Seattle each day. I plan to take a ride on the light rail someday with my brother.
SNOHOMISH COUNTY	Do it faster please.
SNOHOMISH COUNTY	I understand that money is slow to come in, but our region is drowning in traffic right now. This is killing economic growth. If we can build enormous stadiums that take decades to pay off, we should be able to finance faster completion of these mass transit projects!
SNOHOMISH COUNTY	These are necessary improvements. We are already well behind our capacity and development continues to add people to our area both for business and residential. The developers should contribute more to their impacts on congestion. The feeder roads that lead to and from all these transit improvement plans are maxed out in many areas.  This timeline is ridiculous and needs to be substantially reduced !
SNOHOMISH COUNTY	You will find little support for such a large undertaking with such long range timelines.
SNOHOMISH COUNTY	I strongly support Sound Transit's plans for the future. I only encourage Sound Transit and the supporting communities to move more quickly with the planning and development of these projects. ST3 is vital for the Puget Sound region—critical for both business development and personal enjoyment. Rail Transit and BRT are critical to ensuring the Puget Sound remains a competitive business region and in keeping with the environmental conciseness of the Pacific Northwest.
SNOHOMISH COUNTY	Proposed light rail expansion for Lynnwood / Everett should be completed much sooner. The area around DuPont/Lakewood/LewisMcCord should be a priority - traffic there is always horrible.
SNOHOMISH COUNTY	25 years is way too long to implement light rail throughout the region. I understand faster means increased costs, but waiting increases costs too.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	my issue is the ST3 project shows Everett gets the light rail in 2041, 20 plus years after the vote. I cannot support the timeline and it makes no sense. why should I vote for a project, knowing that I will not be able to use it by then? The project should be focusing on connecting job centers (including stops at Boeing plants, amazon, Microsoft, etc) along to move people to jobs and homes and everything else in between. This should get most of the cars off the freeways. due to the timeline, I AM VOTING NO for the ST3 ballot and I feel that I'm paying for projects in King County that have no benefits to Snohomish County (and to me) so far and Snohomish County not getting any benefits at this point. I urge Snohomish County leaders to allow a vote to pull the county out of Sound Transit taxing district since Residents of Snohomish County is getting the shaft by the sound transit board.
SNOHOMISH COUNTY	I would like to see Everett as a higher priority in the Link light rail expansion instead of a 25 year timeline.
SNOHOMISH COUNTY	I believe it would be more beneficial to prioritize expanding into Everett with link light rail as opposed to expanding east and west and into areas with closet to the transit already in place. The longer commutes such as that of north seem to have a greater impact on traffic.
SNOHOMISH COUNTY	The smaller goals should be done first so people see results quicker, such as additional stops, parking area increase, shoulder driving, etc. The public needs to see their money being effectively used to continue to have faith in the transit programs and support future projects.
SNOHOMISH COUNTY	Do light rail faster
SNOHOMISH COUNTY	Figure out a way to do it faster.
SNOHOMISH COUNTY	For the amount of money that is being spent, Everett should have light rail sooner that 25 years. I have reservations about the line going to the Paine Field Industrial area. We have no guarantees that the number of jobs will be there in 25 years.
SNOHOMISH COUNTY	I just wish the light rail would come to Everett sooner than 2040...
SNOHOMISH COUNTY	I moved to Puget Sound, from NYC, in 1989. You have been talking about this for more than 27 years. I commute from Maltby to Auburn 5-6 days/week and would use mass transit if it were more reliable and convenient. Convenient simply means that if a patient/family at the hospital is in distress I don't have to say, sorry, gotta go or I'll miss my only train home. For 10 years I commuted around Queens, Brooklyn and Manhattan without fear of being stranded, let alone at 6 pm. Time to make this work!
SNOHOMISH COUNTY	It seems that project completion, especially to Lynnwood and Everett will be way to slow . Growth will far outpace the project completion. We are already starting at a disadvantage. Is there any way to speed up the pace? The longer it takes, the more it will cost.
SNOHOMISH COUNTY	a faster timeline for reaching everett, and more BRT/local transit links to the light rail backbone Ballard and west seattle are metro/seattle issues and should be more heavily paid for by city residents, but coordinated to use ST type equipment
SNOHOMISH COUNTY	Ballard should be higher priority timewise.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	It would be excellent to see the light rail development happen in less time than scheduled along the I-5 corridor and north parts of the 405. I would gladly pay more taxes to see these improvements
SNOHOMISH COUNTY	I am 64 and would appreciate riding the rail before I am too old. I rode the rail in Melbourne, Australia and it was so impressive. They had parking in the neighborhood and we left in the morning and returned in the afternoon without waiting. It was wonderful and I hope the rail system in this area is the same.
SNOHOMISH COUNTY	It should not take nearly that long to build a few miles of train service. Find ways to expedite the project. Nobody wants to pay for something they won't be able to use for 20 years. It isn't human nature to think that far ahead.
SNOHOMISH COUNTY	I will not be voting for this plan if light rail to Everett is not prioritized. It is not fair for Snohomish County to subsidize transit in Seattle for decades. I would also encourage the Everett light rail to continue to Everett Community College. Thousands of community college students would be excellent candidates to take advantage of transit, yet will have to continue driving under your plan.
SNOHOMISH COUNTY	If the goal of this plan is to reduce traffic congestion, than the following always needs to be kept in mind: 1. Most traffic congestion is due to people commuting daily to and from their work locations. 2. People are only going to choose public transit over driving if use of the transit is convenient for them. That means the following: 2a. Having a station either within walking distance of their home or a short driving distance of their home with parking available at the station. 2b. Having a station location right at or within walking distance to the work location. 3. Two of the largest employers in the area are Boeing and Microsoft. 4. Given this, priority in funding, schedules, and construction should be given to the extension of the light rail to the Boeing facilities in Everett and the Microsoft campus in Redmond. The light rail extensions to Lynnwood, then Everett, and the extension to Redmond, should be put ahead of all other light rail extensions. Otherwise this will be a waste of time, effort, and money.
SNOHOMISH COUNTY	WHY DOES THE TRAIN JOG OUT TO BOEING AND THEN BACK TO EVERETT? WOULDN'T IT BE BETTER TO HAVE A SEPARATE LINE FORM EITHER MUKILTEO OR EVERETT TO BOEING? IS BOEING THROWING SOME CASH AT THIS PROJECT? STAY AWAY FROM PROPERTY VALUE TAXES. EVERY ONE THINKS THEY CAN JUST TACK ON ANOTHER 25 CENTS. THAT ADDS UP SO QUICKLY I CAN'T AFFORD MY HOUSE. TAX THE SEAHAWKS. THEIR NON-PROFIT STATUS IS BS
SNOHOMISH COUNTY	We need this ASAP
SNOHOMISH COUNTY	The timelines should be reduced to a maximum of 8 years for all projects, including light rail to Everett, even if it costs more, e.g. \$1000/resident/year.
SNOHOMISH COUNTY	The proposed light rail from Lynnwood to Everett needs to be accelerated. The current schedule of 25 years is far too long to wait for light rail service to Everett via Paine Field.
SNOHOMISH COUNTY	Redirect tax funds you already receive. Accelerate the plan.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	I find it amazing that these plans were not implemented many years ago. At the ever-increasing rate of expanding population in the Puget Sound area, with all the vehicles, this is an urgent issue. I commute from the north end of Mill Creek to Sea-tac for work, and have explored all avenues of trying to go with mass transit; but since King county refused to work with the outlying suburbs (I have read and heard in past years), there was a stalemate. My average weekday commute, without a car-pool partner, takes 55 to 70 minutes, but have recently been late to work leaving 2 hours ahead of my shift start! I study WSDOT daily, and listen to KOMO for the traffic updates, but many times, it is worse than they predict. This take the livability factor in the beautiful Puget Sound down to a 5 vs. the 10 it should be. Thank you for your work to get mass transit out to all the outlying areas.
SNOHOMISH COUNTY	Too little and too late. I will strongly oppose ST3 if light rail to Paine Field and Everett cannot be completed quickly (eg., 5-8 years out). All of the projects are important and equally important would be a mix of taxes to raise the money needed to get these projects completed in a timely manner. It is certainly expensive but it won't be any cheaper if construction is delayed for another 10-25 years. If it costs more now to get 'er done, so be it.
SNOHOMISH COUNTY	I consistently find that my options to use transit services in King County are fine to excellent, but if I want to go to Snohomish County or leave it to go to King County, especially to or from Everett, it takes me several hours to use a number of transit services to complete my trip. A 25 mile distance covered in 4 hours.  I would vastly prefer it if the line to Everett were prioritized higher and came online sooner. Between connecting the downtown cores of the cities in the Metro area, and connecting with the Paine Field and Boeing areas, this extension cannot happen soon enough.
SNOHOMISH COUNTY	The proposed extension to Everett needs to be given higher priority. I-5 between Everett and Seattle is already overly crowded and would be at a standstill by 2041.
SNOHOMISH COUNTY	With the lack of accountability for missing deadlines and going over budget on most if not all of projects, I accept your resignation.
SNOHOMISH COUNTY	This area needs a complete north - south light rail/mass transit system considerably sooner than a completion date in 25 years! I've been commuting on the I-5 corridor for over 25 years because there was no viable option (in terms of time and location) for me to use. I WOULD have loved to use it and WOULD have if one had been available (as was promised in 1962).
SNOHOMISH COUNTY	This timeline seems way too long. I'm hoping this is an under-promise/over-deliver plan. I would prioritize the rail to Everett ahead of several of the others milestones too. I think expansions of highways needs to happen as well as expansion of public transit.
SNOHOMISH COUNTY	Light rail from Lynnwood to Renton should be first priority. Traffic is always backed up from Alder wood Mall to Seattle area. We need this now.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	I'll be dead by the time this even gets seriously underway but if the geniuses who have been responsible for transportation planning had been paying attention they would have built a system similar to what is being proposed now 40 years ago. Further, it is my opinion that this plan may be too little too late and I strongly suspect that it may very likely suffer a fate similar to the current tunnels project - i.e., seemingly endless delays caused by poor planning, even poorer execution, bureaucratic ineptitude and technologically induced hubris. The longer I live the more I am convinced that the basics don't really change ergo neither do the results.
SNOHOMISH COUNTY	Maybe you should tax the areas that are getting the service. Since I live in Everett the changes will not affect my lifetime because I will be 75 yrs old by the time the light rail to Everett is complete. I am not hardly getting my moneys worth unless of course property values increase at that time. I support light rail, having moved here from Portland where they have a great transit system. But I would support it in my lifetime and in my area.
SNOHOMISH COUNTY	Timelines should be decreased despite additional cost. Significantly higher gas taxes should be used to reduce these timelines
SNOHOMISH COUNTY	The schedule and costs should be increased.
SNOHOMISH COUNTY	Project timelines should be shortened. With our climate already changing, these investments are urgently needed. Waiting 25 years for the I-5 and I-90 corridors to have an alternative to driving is simply not feasible. Residents already pay far more than \$200 per year to buy, finance, repair, insure, and fuel their cars, which have significant long-term environmental and public health externalities. A progressive taxation scheme should be used to finance these plans wherein the wealthiest people in Puget Sound pay significantly more as a way to ensure 1) the project is securely financed; 2) the project does not unjustly burden our fellow citizens who must prioritize paying their rent and feeding their families; and 3) to ensure the project remains politically palatable.
SNOHOMISH COUNTY	Earlier studies indicated light rail to everett in 2027. This plan says that would take another 25 years. That is unconscionable!
SNOHOMISH COUNTY	25 year timeline is not aggressive enough to combat the terrible traffic.
SNOHOMISH COUNTY	I really wish you would complete the Lynnwood to Everett light rail part of the plan much sooner than in 25 years!
SNOHOMISH COUNTY	Time line North should not take longer than going South. This project is 25 years too late, so we should expect to have the expense we have not been paying in those years added to what we will pay now for this plan, thereby giving the revenue boost for affordability in changing the timeline North. The previous plan had light rail in the Everett Area by 2023 (in 7 Yrs) not in 25 years. This is a bad plan Northbound.
SNOHOMISH COUNTY	Entirely selfish, but being as travel times from the north end (everett, et al) to downtown seattle are increasing faster than travel times from tacoma to downtown seattle, I think that there should be higher priority placed on increasing those abilities.  Also, the reason I don't use transit more often is because it takes so long from Everett to Seattle, and is so crowded. If it were less congested/faster, I'd certainly use it more

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	I have voted for every ST proposal. Waiting 25 more years for the north south light rail spine to be finished is not acceptable. Everett, Seattle, Tacoma, should be the first light rail priority.
SNOHOMISH COUNTY	Twenty-five years is far too long. We need solutions now. Busses between Everett and Seattle are already packed, and often run 20-30 min behind schedule several times a week. In addition, I favor motor vehicle excise taxes being based on the value of the vehicle, or on the number of miles driven.
SNOHOMISH COUNTY	I strongly support mass transit in the Puget Sound area. It is critical to moving people and products around the area. That being said, your timeline to bring light rail to Everett SUCKS!!!! I will vote against the ST3 proposal if it really takes you 25 years to bring Light Rail to Everett. We have been waiting patiently, while stuck in horrific traffic on I5 southbound to Seattle for you to bring a real traffic solution (light rail) to Everett. The fact that linking Everett to light rail would come after the proposed Ballard line is LAUGHABLE! Please don't [explicit] this up. Prioritize the Everett light rail line and I vote for this proposal. Otherwise, forget it.
SNOHOMISH COUNTY	Why should I pay for something now that I may not live long enough to ever see. The timelines for these projects are ridiculously long. 25 year to get to Everett is down right unbelievable!
SNOHOMISH COUNTY	Project should be completed sooner, and reduced cost.
SNOHOMISH COUNTY	Light rail should run to Everett Transit Station with Rapid bus service to Boeing/Paine Field and other locations. Snohomish county, specifically Everett, have been paying taxes for a long time without the promised light rail, now to postpone is like taxation without representation. Roads into Everett are now way too congested, if you don't believe this try driving from 164th St & I-5 into Marysville any weekday around 3:30 to 7PM. Again, light rail to Everett Transit Station should be the priority rather than Boeing/Paine Field and this project needs to move to the top of the list so that we see improvements for the taxes that have been paid and will be paid avoiding a potential tax revolt with litigation from this area.
SNOHOMISH COUNTY	I have voted in support of light rail for the Everett/Seattle/Tacoma corridor from the beginning but cannot support this latest proposal. The timeline to reach Everett is unacceptable. Other projects have taken precedence over what was promised to north sound tax payers since the approval of previous measures. I believe you can streamline some of these projects and stop building these grandiose tunnels and stations.
SNOHOMISH COUNTY	Project completion for where I live isn't for 25 years? I'll be dead by then, so I'm not terrifically invested in this plan.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	Sound Transit has failed to meet expected ridership levels at each phase. Now, you want us to vote on a costly, major expansion that will take even more money out of taxpayers' pockets thru substantial increases in our sales and use and property taxes. You don't even explain how the \$200 annually is arrived at. And you are purposely scheduling this important vote in November when people's attention will be focused on other things. Also, this important decision should not be made BEFORE we have the data on ridership levels from the opening of the light rail line to Montlake/U-District with the addition of the two stations at Capitol Hill and Husky Stadium. I feel like Sound Transit is pulling a play right out of Chicago Mayor Emmanuel's playbook. You know, let's not let the people see the tape (ridership data, in ST's case) before the election. Shameful. As a result I and everyone of my friends, family members and colleagues I can convince will be sure to vote a resounding NO on this measure in November should it be on the ballot.
SNOHOMISH COUNTY	This is too little too late!!! The flight of Seattlites north to Snohomish County and the influx of out-of-staters because of Boeing, make the northern end's part of this immense project all the more critical! The timeline of 25 years is unacceptable and useless! Come up with a better plan that addresses the North End now not so much later!
SNOHOMISH COUNTY	The timeline for getting light rail up to Everett is very concerning, with such a large manufacturing area not being served for so long. Also as Seattle becomes too expensive for many young families and young couples trying to get started, more and more of my peers (age 28-35) are moving to areas such as Everett, Tacoma, and Issaquah. Many of these same people are then commuting into Seattle for jobs and recreation. Providing light rail to these areas sooner would help ease the burden that I-5 currently carries for these groups. The Sounder is great, but it doesn't ruin frequently enough and the North Line is often shutdown due to landslides.
SNOHOMISH COUNTY	25 years is a joke, but less funny than being the stupid region with no plan.
SNOHOMISH COUNTY	Noting that the current light rail projects are ahead of schedule, I would personally like to see perhaps a few less projects with a more ambitious timeline. Our region has fallen behind in terms of public transport and now would be a great time (economically/politically) to aggressively push forward. That being said I would love to see priority placed on light rail service to the east side and to the Lynnwood transit center, as well as further studies looking at an additional line running from Lynnwood to Bellevue via Bothell and Kirkland. Thanks for all the great work you have done so far!
SNOHOMISH COUNTY	Projects should be funded so they can be finished sooner!
SNOHOMISH COUNTY	Completion to Everett must a priority and should be moved up on timeline - 15 years latest.
SNOHOMISH COUNTY	I believe the project priorities should be changed to address additional parking at the Mukilteo Sounder Station and a viable rail option for when the North Sounder train is unavailable (which happens way more often than the South Sounder train).
SNOHOMISH COUNTY	By the time light rail comes to Everett I will be 74 and will likely not live in the area to use what I would be paying for. I will vote NO on any ballot measure in November for ST3. Further, I already voted a few years ago to increase my taxes so light rail would at least be in Lynnwood. Where is this light rail? ST3 as it is, is FUBAR!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	I believe that waiting 25 years before any of these projects makes it north to Everett is unacceptable. The north end is where it should be started next to connect to the south end. As a shift worker I would like to add my two cents about the lack of transit from 11 p.m.-1 a.m. It may enlighten you to know the actual numbers of people that work 2nd shift and would love to be able to utilize the transit systems. Please consider this in your future plans.
SNOHOMISH COUNTY	No I'll vote for this. 25 years until Everett. I'll be dead. You people must be insane. Just build the [explicit] thing I. Can fix a bridge over water in Skagit county in a few months but not this. No [explicit] way.
SNOHOMISH COUNTY	I would like to see the extension of light rail to Lynnwood and Everett be placed as a very high priority and would like to see the timelines for those projects be compressed. The number of people commuting on that corridor, both going north to Boeing Everett and south to Seattle, is huge and growing constantly. We finally have improving transit options around this region and waiting 20-25 years for that extension is too long. Push for more aggressive funding and a more aggressive timeline to get that completed so that this region can really benefit from a strong mass transit system.
SNOHOMISH COUNTY	people in the north end have been paying the rta for years. they should be getting some kind of service now.
SNOHOMISH COUNTY	I support bringing timelines forward so services are delivered sooner, depending on how the additional funding would be raised.
SNOHOMISH COUNTY	It seems that the time to complete the Everett link is way too far out. My perception is that a lot of the traffic that ends up in Seattle passes south through the Shoreline/Lynwood/Everett area. I would guess that a light rail option and some good parking lots would go a long way towards intercepting a lot of traffic before it ended up in Seattle.
SNOHOMISH COUNTY	Why should everyone be forced to pay for projects which don't even extend to the regions in which they live? If I can't travel from Everett on light rail, for another 25 years, I will be retired and will be forced to pay for something that won't serve anyone I know in the north end. I don't believe any bus system implemented on any current highway can be considered rapid. All buses get caught in traffic and are a time sink. I can not be convinced otherwise. Only rail is a true resolution to relieving traffic burdens. But to pay for something that I will never see a return from? That is unfair.
SNOHOMISH COUNTY	The length of the project timeline needs to be addressed. ANY solutions to reduce the timeline should be evaluated. If transit were more reliable and easily accessible, I would use it on a much more frequent basis.
SNOHOMISH COUNTY	Would like to see it all sped up. I will probably be dead before I have the opportunity to take light rail from Everett to Downtown. Would like to get to do that in my life time. Any chance that we could increase funding and get this moving faster?
SNOHOMISH COUNTY	Timeline is too long. The light rail extension to Everett should be completed in the next ten years.
SNOHOMISH COUNTY	Everything needs to be completed faster. I live in Everett and the thought of having to wait 25 years is absolutely ridiculous and discouraging.
SNOHOMISH COUNTY	Completion should be expediated!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	I would be willing to pay more for faster completion. 8 years for the bus rapid transit sounds like a really long time frame. I am not sure that our current mass transit options are sufficient for our current population, much less our population in 25 years.
SNOHOMISH COUNTY	We were promised to finish the spine to Everett and Tacoma before starting on the arms for light rail. Yet the arms are starting and the final stage of the spine is being delayed. The arms could be solved by sprucing up the bus connectors.
SNOHOMISH COUNTY	Please finish it within the next 5 years
SNOHOMISH COUNTY	Finish light rail to Everett at least 10 years earlier!!
SNOHOMISH COUNTY	Light rail to Everett and Tacoma should be a much greater priority than Ballard and West Seattle. Ballard and West Seattle are far well-off financially and well-served with transit, while the working class of Everett and Tacoma suffer through traffic even in buses on the I-5 corridor. This quarter century timeline is an embarrassment.
SNOHOMISH COUNTY	This all just seems like too little, too late. By the time any of it materializes, IF it does, and if it does remotely on time and on budget, it will still be woefully inadequate, as far as I can tell from Sound Transit's own projections (on the mailing piece I received the other day). While I am in agreement with the need, I have a difficult time with financially supporting something that will never benefit me or anyone I know in my community for so many years. I do understand the need for this, but I am pretty sick of paying for the future needs of the county when I am already paying so much in time and commuting expense for the same routes. I realize that this is not so forward thinking, and that this attitude on the part of previous taxpayers is probably why I am in this situation, but I am not interested in supporting something that will maybe, possibly, remotely, almost benefit the region long after I have left the workforce, if it is not completely inadequate before it's even got a start.
SNOHOMISH COUNTY	These great options can't come soon enough! Unless they can come sooner?
SNOHOMISH COUNTY	Been a supporter of rapid transit for greater Seattle (and eastside) for years - since (pre) 1966; long overdue. Plan extensively; spend wisely; and move ahead as soon as possible.
SNOHOMISH COUNTY	As a world business person and traveler I strongly support public transportation. That said, I can only call Sound Transit as one of the most incompetent organizations I have seen anywhere. Poor leadership and thoroughly wrong technology choices have hampered light rail development and cost additional tens of millions of dollars. Schedules get worse with each passing year with no explanations. To have any chance of ST3 passing, Sound Transit and the regional politicians have to come clean with the voters on their lousy track record, and how it is going to improve before unnecessarily throwing away more money.
SNOHOMISH COUNTY	Timeline is far too long. Needs to happen much sooner.
SNOHOMISH COUNTY	The projects should be completed SOON, not 25 years in the future!!!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	This plan does too little light rail and takes far too long to complete. Given the time line you propose, we might as well just add freeway lanes and more car parking. Effectively, I want to see a plan where you are completing one-quarter mile of track per week, every week. Done at grade, this is possible. Additionally enough track and switching needs to be in place to run the system around the clock (at some level of service overnight) while providing for bypassing sections of track for maintenance. In short, not enough, not soon enough. We will be in gridlock before you have a solution in place to mitigate any of it.
SNOHOMISH COUNTY	Everett timeline should be a lot sooner than TWENTY-FIVE years! Are you kidding?!!
SNOHOMISH COUNTY	I do have a concern about the proposed additional subway underneath Seattle. Can this be built without structural damage to the existing subway? Does this really need to be needed, can the existing subway handle the traffic? Can none new subway options be explored such as keeping the route from Ballard to West Seattle surface level the entire way, or elevated? Can this second subway be delayed? Is there an option to not building it entirely? I am wondering if this second subway is needed at all, and if built, can this be done so as to not interfere with existing operations, and done so safely?
SNOHOMISH COUNTY	Speed up the timeline. Get rid of buses on the road that slow traffic.
SNOHOMISH COUNTY	I will not support this proposal if priority of light rail to Everett is lower than that of West Seattle and Ballard. I have been a strong supporter of ST over the years, knowing Everett would strongly benefit from light rail, eventually. I do not want to continue to subsidize development of transit in Seattle unless I see some benefit to Everett first.
SNOHOMISH COUNTY	<p>The completion dates for all the parts of the plan are too far into the future. The increase in population and congestion will occur much faster than the plan completion dates, and the increase will likely be greater than anticipated. There is a real risk that the plan will be inadequate to meet the actual existing congestion issues even before the plan is completed. Bus service could be added/expanded immediately to all the routes while light rail construction is begun. Then bus service could be phased out as light rail is phased in gradually on each route as the construction progresses.</p> <p>I would prefer to see</p>
SNOHOMISH COUNTY	Everett to Seattle in 25 years. You've got to be kidding!?!? In 25 years I wont be able to work in Seattle because the my commute will have increased to 5 or more hours per day and that will be far too unacceptable. We need this much, much sooner!
SNOHOMISH COUNTY	Timeline unacceptable. As someone who works in the public sector as well as has knowledge of construction and its constraints I understand that there is many issues that can cause for a long timeline. How ever something as important as creating a fast and reliable mass transit system needs to be created immediately, 25 years for a full build out is just to long and unacceptable to the citizens of this state.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	This has been needed for so long and should be completed as fast as possible - not 25 years. We cannot continue as a car-associated metropolitan any more. We need to encourage and make it easier for people to use mass transit, bikes and walking instead of cars.
SNOHOMISH COUNTY	<p>Back in the 80's, I lived and worked in San Francisco. At the time, I did not own a car and fortunately, I did not need one, because the transit system was so very efficient. I very much look forward to the day when light rail is finally a reality, and not just a dream. Thank you so very much for your hard work in getting us there!</p> <p>Sincerely, [name]</p>
SNOHOMISH COUNTY	Its mind boggling that building all this would take ~25 years. Having said that, it seems even more critical to get started. This region has had several tries at planning a regional transit system, and has fallen badly. I hope this one gets approved.
SNOHOMISH COUNTY	<p>Projects are better than nothing, but will take *much* too long. It does not seem it will be developed fast enough to curb the increase in traffic. In fact, seems like problems would continue to get worse, not improve, overall with the timetable. The Greater Seattle area has some of the worst traffic in the nation. We need to fix it fast enough and big enough to where the problems are actually addressed and solved.</p> <p>Tax should be greater and turn the transit system into free-use for all. That would drop traffic significantly, and then taxes that pay for roads could be diverted into mass transit.</p>
SNOHOMISH COUNTY	The timeline is entirely too late. We need light rail transit throughout the region now, and at the latest within 5 years. Not 25 years from now.
SNOHOMISH COUNTY	<p>I feel the projected time to accomplish this plan shows poor judgement. When I moved here in 1964 there were plans for light rail. While other cities have executed light rail plans we are continuing to discuss the possibilities. In this span of time Boeing has moved out of state and future companies have gone elsewhere to less gridlocked cities. Wake up! You could save time and maybe some money by using the HOV lanes on I-5 to run light rail as an example. What are you thinking?</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	<p>When voter approval was originally required for taxation to support ST1, ST2 and ST3, and I was a much younger man!, the selling points for this was a Everett to Tacoma rail system to provide rapid transit that operates separately from and alleviates pressure from the I-5 corridor.</p> <p>I believe the term 'spine' applies here.</p> <p>we were aware the yuppies of Seattle would reap the benefits of this program first, it made perfect sense to start in the middle, building lines gradually to the North and South as the tax revenue builds.</p> <p>Now it appears Pierce and Snohomish counties will be paying for neighborhood projects in the city of Seattle, long before we see any I-5 relief!</p> <p>Build the spine FIRST, then worry about the pet projects.</p> <p>Also a huge waste of funds.. routing the rail line thru Boeing Everett. It should go thru Lynnwood directly to Everett, with a separate rail line (or bus) to aerospace manufacturing, the future commercial airport and Mukilteo.</p>
SNOHOMISH COUNTY	<p>The congestion in the north end @ Everett and also continuing to Marysville is extreme! Something needs to be done ASAP and NOT in 2023.</p>
SNOHOMISH COUNTY	<p>Light Rail should be prioritized over Bus Routes and timeline should be greatly accelerated. 22 years to extend light rail to Ballard? 20 years to extend light rail to Everett? Really?</p>
SNOHOMISH COUNTY	<p>I am happy with the light rail is going through 128th st and Airport Way and Evergreen way. But the timeline has to been change, it needs much faster to Everett. should be sooner than any Tacoma, Federal Way because lots more people, grow much faster in Everett than Tacoma. Lots more employers.</p>
SNOHOMISH COUNTY	<p>25 years before light rail comes to my neighborhood?</p> <p>How long has the LIE existed on Long Island?</p> <p>We are soooooo far behind the times in mass transit in our region, taking another 25 years to even start approaching what most other major metropolitan areas have had for fifty or more years seems ludicrous.</p> <p>I support investing in our transit system, and especially expanding light rail, completely and totally. But I think the timeline for expansion is insanely slow and strongly suggest finding ways to make that happen sooner... I, for one, would be evangelical about your cause if that were true. Right now I just support personally and complain about your proposed timelines a lot... not probably helping the issue much...</p>
SNOHOMISH COUNTY	<p>Project timelines are way too long. Light rail to Everett in 25 years?? These services are needed now. In 25 years we will be in even worse shape. Time lines need to be more aggressive. Our transportation problems in the puget sound are severe and needing immediate resolution.</p>
SNOHOMISH COUNTY	<p>Stop building roads. Put people to work digging tunnels and making steel and laying rail and pouring concrete. Do it now!!! Not in 25 years, now!!! Put Uber out of business.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	Rail is the viable solution to traffic congestion on the road. We must be able to leave and arrive on schedule and get public transportation on rail. We need to encourage more bicycle commuting, and have facilities on the trains for bikes - Seattle is the most bicycle friendly city I know of. Let's use it.
SNOHOMISH COUNTY	I feel that something needs to be done more urgently to relieve the huge congestion on I-5 south from Everett to Seattle. It is entirely too congested.
SNOHOMISH COUNTY	Financing for projects should be paid for by those who will use and / or benefit from the projects. I'd like to see more toll roads and taxes related to transportation such as gas taxes.
SNOHOMISH COUNTY	The timelines are too far out. I would be supportive of measures to compress these timelines, especially for the BRT options which require much less additional infrastructure compared to light rail.
SNOHOMISH COUNTY	Light Rail to Everett needs to be prioritized to be completed earlier, in line with Federal Way and Redmond.
SNOHOMISH COUNTY	We need help now, not in 8-25 years. We need a plan that has immediate as well as long-term benefits.
SNOHOMISH COUNTY	The time tables should be moved up -- significantly. Our region is WOEFULLY behind on light rail and other transit options. Thank you.
SNOHOMISH COUNTY	If it takes 25 years for light rail to arrive at the Everett Boeing plant, Boeing may LEAVE by then. Everett Boeing earlier timeline needs to be a higher priority
SNOHOMISH COUNTY	I think that adding basically any new transit options would benefit me and Puget Sound in general. I would really like to see more transit opportunities north of Seattle to Everett though because there are basically big spaces without many transit options/lack of park and rides. Thank you for adding BRT along 522. I would one day like to not have to drive my car to work (in Kenmore).
SNOHOMISH COUNTY	The time line is way to long we need find other ways to help get light rail projects completed sooner than 25 years from now. I'm thinking more like 15 to 18 years to complete all work.
SNOHOMISH COUNTY	The timeline to Everett is absolutely unacceptable. Snohomish County needs light rail sooner rather than later. Also, I absolutely do not agree that you should serve Boeing. If they want light rail service, they can pay for it. In additional, there will be bus rapid transit service running that same corridor by 2018 that will connect Boeing to Mariner park and ride.
SNOHOMISH COUNTY	The I-5 links need to be completed sooner.
SNOHOMISH COUNTY	you should focus on the bus service first and foremost. It is way cheaper and can be completed much faster than the light rail. All of the park and ride lots in the north end are full by 7:30. To get more people out of their cars you need more parking at the hubs. Bus service up to Everett and down to Redmond is desperately needed and we cannot wait 25 years to get there. Add more busses and parking now to help the traffic on I-405.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	If the original timelines aren't followed, I will strongly oppose this plan. I was not able to answer # 13 and #14 because of the new timeline. I feel that Snohomish County citizens are being made to pay for King County Light Rail system. When King County gets what they want, then and only then Snohomish will get light rail. This is probably not the last time the timeline will be slid. Question, what happens if King County gets what they want, they go to their voters to pay for light rail and the King County voters say no? Snohomish County will get stuck with nothing and we will have helped paid for King County Light Rail System.
SNOHOMISH COUNTY	Finishing the mainline of light rail from Tacoma to Everett should be the top priority in the timeline. After that add the side lines to Ballard and West Seattle. If we are going to keep industry, such as Boeing, in the area then we need to focus on the core transportation routes first. I thought that was the original plan and was surprised that Bslsrd and West Seattle were moved ahead of Lynnwood and Everett. If that stays the plan I will have to reconsider my support. I would like to still be alive to ride the light rail from Lynnwood.
SNOHOMISH COUNTY	Honestly these projects should all be complete within the next 15 years not 25. But, something is better than nothing.
SNOHOMISH COUNTY	8 years is the first you'll complete something?! Seattle area is busting at the seams and it's going to take 8 years to start fixing it? You could easily get the rapid rides implemented on 405 within a year. The rapid rides for 405 should intersect with community transits new swift line that is going to Bothell for a transfer point as well.
SNOHOMISH COUNTY	First off I geel the project need to be completed sooner then later.  Second I beleive the money should come more from businesses then from residents. I continue to pay taxes for a transit system that I don't use due to living in a rural area and working hours that the transit system does not operate.
SNOHOMISH COUNTY	I strongly supposed the light rail coming to Everett but if it isn't going to be completed for 25 years, you're just going to continuously be behind on population growth. We need solutions now, not 25 years from now when those solutions are already outdated and won't support the volume.
SNOHOMISH COUNTY	The given schedule would have the work done when I am 98 years old. Given ST's record, I understand the need to build plenty of slack into the schedule, but this is going too far and will move people to vote no.
SNOHOMISH COUNTY	While it is better to do the construction and wait rather than not do it all, these times are too long. I'll be retired by the time I could benefit.
SNOHOMISH COUNTY	I STRONGLY oppose any plan that makes me pay for services I won't get for TWENTY FIVE YEARS. I probably won't even live in the area in 25 years.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	<p>First of all, 25 years of completion is a joke. If we properly align the resources or even outsource from other countries, we should be able to reduce the time half, while spend almost half the money.</p> <p>WA residents so many taxes, for energy AND sales tax. Major WA counties have one of the highest sales tax in nation. Why try to collect more taxes? For such high tax rate we shouldn't even have to pay for bridge tolls or express lanes. SR-520 construction is done but tolls will end after 2045? Ridiculous! And don't get me even started with viaduct. Basically you guys collect one of the highest sales tax, while dragging projects for 20~30 years, wasting our tax money to drill to the city where no space can mitigate the downtown traffic.</p> <p>My overseas friend or even a friend visiting from Portland laughs at our public transportation system.</p>
SNOHOMISH COUNTY	<p>I think a greater emphasis needs to be placed in rail in this region. Instead of adding lanes for cars to major roads, lanes for buses or future expansion to incorporate light rail into the road construction (like The El in Chicago from O'Hare to downtown). You need to make public transit attractive to the bedroom communities.</p>
SNOHOMISH COUNTY	<p>First of all, you're not being anywhere near ambitious enough with your time frames. Twenty-five years? That's dragging your feet and proceeding at a veritable snail's pace. All of this work is quite capable of being completed in far less time if you approached it like a New Deal public works project instead of the typical, protracted construction. Secondly, making up the funding out of increased sales taxes is about as regressive and short-sighted as can possibly be achieved. Sales taxes most strongly effect those who need these services the most and can least afford to pay for them. Washington needs a state income tax and to jettison most if not all of our state sales tax. Pronto.</p>
SNOHOMISH COUNTY	<p>All needs to get done faster. Everything within 10 years, not 25.</p>
SNOHOMISH COUNTY	<p>8 years to add a bus line?! If you expect me to pay for this, you better come up with a better plan! It is ridiculous to expect us to shell out for 8 years to just get new bus routes on roads that already exist. This smells like fraud and overly excessive salaries for people that do nothing. Do a better job or I'm voting against any funding.</p>
SNOHOMISH COUNTY	<p>Improvements to Everett service can not wait 20 to 25 years! By then it will be the I 5 parking lot not freeway. Too many of us can't afford to live in Seattle even though we work there. Either get rents down so normal folks can afford them or build more transit FAST.</p>
SNOHOMISH COUNTY	<p>I strongly support Lynnwood to Everett light rail, but would like to see it happen within 10-15 years, not the 25 years in the draft plan.</p>
SNOHOMISH COUNTY	<p>I do not want to pay now for a project that cannot be utilized / won't be completed for 17 to 25 years.</p>
SNOHOMISH COUNTY	<p>Light rail to Ballard 22 years, and light rail to Everett in 25 years? We'll have a man on Mars before these sections are done. Timelines need to be revisited.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	<p>There was funding provided years ago for rail projects that was turned down. I suggest you go back and review these plans. A home/business can be built in less than a year, but the projects proposed are slated for 25 years until completion. First, that time line is ridiculous. Second, by the time the project completes, new problems will already exist. Stop misappropriating tax money and excessive spending, we are one of the highest taxed areas in the states and have nothing to show for it. Taxing more isn't going to solve the problems.</p> <p>Utilize the existing rail plans, expand those, open up Paine field to commercial airlines and do us a favor! Stop taking and doing nothing with more and more taxing. You are no better than the vagrants on the off ramps begging for money!</p>
SNOHOMISH COUNTY	<p>It takes some nerve to tax us for something that won't be built for 8-25 years! Money would be better spent on buses vs. train or light rail, since bus routes are flexible and easier to expand carrying capacity.</p>
SNOHOMISH COUNTY	<p>The project should be finished within 5 to 10 years. Not 25 years</p>
SNOHOMISH COUNTY	<p>Snohomish County and Everett need to be connected to the light rail system before we connect to additional Seattle neighborhoods with already existing transit options. Snohomish county has been paying in, and will be last to obtain any light rail as it is. Please place a priority on the north end of the system.</p>
SNOHOMISH COUNTY	<p>Accelerate time table for northern segments to Lynnwood and Everett.</p>
SNOHOMISH COUNTY	<p>Focus should be on expansion to Snohomish county and South King County to alleviate pressure on I-5 and I-405. Build the North/South infrastructure and lines before expanding into neighborhoods like West Seattle and Ballard.</p>
SNOHOMISH COUNTY	<p>Please focus on the northbound corridor between Seattle and Lynnwood.</p>
SNOHOMISH COUNTY	<p>Light Rail to Everett needs to be the top priority.</p>
SNOHOMISH COUNTY	<p>10 years maximum to finish all lines, not enough urgency! This system should have been in place decades ago.</p>
SNOHOMISH COUNTY	<p>Needs to be faster. 20 years to Lynnwood is ridiculous</p>
SNOHOMISH COUNTY	<p>Light Rail to Lynnwood in 20 years?! I know construction takes a while, but 20 years is ridiculous!</p>
SNOHOMISH COUNTY	<p>Light rail I do support coming to downtown Everett but I don't support that route via Paine Field whereby feeder buses could do the job from Paine Field to the light rail stations on I-5. There has to be a direct route to downtown Everett which would take less than 25 years to build than by the way of Paine Field.</p>
SNOHOMISH COUNTY	<p>As long as you people plan on coming north after I'm dead and gone, I'll not only oppose this asinine plan. I'll actively campaign against it. You've already squandered and wasted enough tax dollars. I'm done. I believe you people don't have a clue what to do. This isn't free money, we work our asses off for our money. I think Snohomish county should pull out of this and work to solve our own local issues with our tax dollars. Everyone of you board members needs to be replaced by people that actually work for a living.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	What happens to the timelines during he next recession. As an additional revenue source will there be a tax on those who use transit, say a 10 cent increase per trip? Or a tax on the major companies that benefit from these projects ( Boeing, Amazon, Microsoft, JBLM, Sports Teams) I feel requiring them to pay portions wouldn't be out of line. My big issue is the expanded timeline. I would support a higher fee, fare and tax to get the timeline down to 10 years.
SNOHOMISH COUNTY	Overall, I believe this would have a positive impact on my community.
SNOHOMISH COUNTY	Needs to have rapid transit issues cleared up between Everett and Seattle much sooner.
SNOHOMISH COUNTY	There is immediate transportation needs in Everett area due to more people moving into Snohomish county and to accomodate a large workforce of aerospace supplier and Boeing.
SNOHOMISH COUNTY	<p>Given the intolerable traffic that limits access to travel north and south (i.e. to Seattle, airport) the most critical priority should be a dedicated north south line. This has the most potential to relieve traffic on the I-5 corridor.</p> <p>As a hiring manager, potential professional employees tell me that they cannot afford to live in Seattle, yet the traffic is a significant barrier to accepting employment with my organization.</p> <p>As a commuter from Mukilteo to Seattle, I have great access to my place of employment via Sounder + light rail, but the Mukilteo parking and overcrowded conditions on most of the Sounder trains makes the commute a challenge. Adding a few cars to the train will help with part of this - adding parking in Mukilteo doesn't seem like a costly investment but would take more cars off the road and encourage more ferry and north end commuters to take the train.</p> <p>Additionally, the design of the Sounder cars is not very efficient. The seats are too close to encourage full use - you have to cross knees with the person in the seat across from you to fit - not a pleasant option since the overlap is typically 6 inches. The result is the hallways on the car are difficult to pass because people sit sideways. This could be hazardous in the event of an emergency.</p>
SNOHOMISH COUNTY	I think that as a whole your services that connect Everett to anywhere else in the sound are not as functional and should be made a higher priority.
SNOHOMISH COUNTY	I have been paying excise and sales taxes for ST projects since the beginning - essentially my entire working career (how many years ago?). I will be retired before rail reaches Paine Field (my employment area). BRT to the airport will be the only ST-related benefit I see in my working lifetime. Please re-prioritize the project schedule to bring north - end rail on line sooner.
SNOHOMISH COUNTY	Waiting 25 years to get the LINK rail to Everett makes no sense, after we have been supporting and been taxed all along. You need to complete the "spine" between Tacoma and Everett before you begin building branches out to peripheral communities, especially more affluent locations. I am 62 years old and live in Everett - why in the world would I support being heavily taxed to create something I will not live long enough to ride on?
SNOHOMISH COUNTY	It is WAY to long to wait for Everett and Ballard to complete. The current wait for lynnwood light rail is already hard to live with.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	Light rail access in Everett is important to me. Also, I wonder if 8 years to add more bus service is really reasonable. I would really like to see the local transit agencies make more effort to work together.
SNOHOMISH COUNTY	Timeline is too long! Figure out a way to speed up implementation!
SNOHOMISH COUNTY	Need to go online faster. Traffic in Seattle is too bad to wait more than 7 years. Get federal govt help for infrastructure. These projects are needed to support a strong economy.
SNOHOMISH COUNTY	north of seattle to everett needs transit sooner rather than what, 2021?
SNOHOMISH COUNTY	It is hard to support something I need now but will never get to use, and may never see completed. These projects need to be completed sooner. Will there even be an airplane plant in Everett in 25 years? Hope so...
SNOHOMISH COUNTY	The rail system should be the first priority and should complete much sooner than 25 years. BRT using existing freeway may not work and it may cause more congestion if it takes away a lane from the existing freeway.
SNOHOMISH COUNTY	25 years is a long time.
SNOHOMISH COUNTY	Build it faster
SNOHOMISH COUNTY	25 years!!!! Too long. This should be done in less than 5 years. Look at Dubai or China for pace of improvement
SNOHOMISH COUNTY	1) Prioritize additional parking to existing park and rides 2) 25 years is too long; Complete light rail by 2023. use BRTs for the rest.
SNOHOMISH COUNTY	I am all for light rail, express busses, etc. However, I will have died of old age before you get around to providing light rail to me (Everett). I have been voting for any/all transit plans on a ballot since moving to the area in 1983, and I still have to wait another 25 years? I would strongly support drastically cutting the time frames to accomplish this plan, even it if means a higher taxes. JUST GET ON WITH IT!
SNOHOMISH COUNTY	Too slow. We have been talking about this for too long. Get it done. I would be happy to pay a lot more for this if I could get a guaranteed accelerated schedule to get the trains to Everett with a train ever half hour 7 days a week. You need to push and bend the rules. At the rate this is moving we get behind every day with population growth. By the time it is done it will be obsolete and over crowded and I will be dead. So why should I care if the finish date is after my estimated date of death. Stop studying and start building. Get it done!!!!
SNOHOMISH COUNTY	Seattle is way behind the times! Most major cities already have light rail in place. Just look at Portland, our neighbor. I know its expensive \$\$\$ We can't build more freeways? the 405 tolling Ain't not working out so well, just guessing ? The express lanes on I-5 thru down town Seattle, Get rid of them, open up the convention center. Who's idea was that to put a bldg on top of an under sized freeway ? Get rid of all the bottle necking from lanes that disappear? Continue them on through, keep the flow of traffic consistent. To generate income for some of these improvements, Have all Washington state drivers , once a year, take a common knowledge test. IE... freeway Left and Right lanes, what are passing lanes? on ramp speed, merging onto the freeway, changing lanes, proper distance between vehicles. Crack down on cell phone use when driving!!!
SNOHOMISH COUNTY	Hope to see the MLT stops at the Transit Center AND 220th street.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	There is literally no viable, reliable, timely transit option from North to south or back again. Sounder trains on the south lines are crowded; half of any given season, sounder lines on the north line are nonexistent because of mudslides or other track failures. Buses from outlying areas in Seattle and the east are slow, but buses to and from the north end are routinely standing room only and run on no reliable schedule at all. Any expansion plans that do not prioritize the needs of North end consumers who have been paying into these improvements for 20 years already with zero appreciable benefit are not only flawed, they are abusive of taxpayers funds and erosive of taxpayers trust. Signed, a former bus and sounder rider who has been forced to be a single car commuter because the patent unreliability of the existing system was endangering my job security.
SNOHOMISH COUNTY	Bringing light rail to the north end and adding to the Sounder service that already exists (including adding all-day service) are essential to making our region move. It is inexcusable that we've waited this long to help the transportation issues that have persisted in our region for many years. 25 years to reach the north end is TOO LONG! Have you seen the average daily commute time from Everett to Seattle? The toll lanes on 405 have not done enough to help the Everett to Bellevue commute. We need to act faster and add more rail lines linking our regions, so that people can live where they can afford homes and still go to and from work, without spending hours each day doing so. This problem puts our region in the dark ages compared to other metropolitan areas.
SNOHOMISH COUNTY	Please prioritize the Lynnwood to Everett light rail line! The traffic in this area is terrible, and I know that light rail can make a difference!
SNOHOMISH COUNTY	Paris is adding many more stations, more miles of service faster, cheaper, I've been supporting this here since first proposed when I was in teens should take til in my 70's to use!!! Timeline needs to dramatically shorten!!! I was a Seattle property owner sweezed out into the exurb of Everett!!!
SNOHOMISH COUNTY	Needs to be completed sooner!
SNOHOMISH COUNTY	Thanks for the opportunity to provide feedback. Getting light rail to Everett should be a priority over all other projects. The time frame laid out is beyond absurdity. The transcontinental railroad was completed in less time. I don't mind paying additional taxes, but only if light rail is operational to Everett within 10 years. Sound Transit needs to find a way to remove all NEPA and SEPA requirements. The goal of light rail is to reduce impacts on the environment. That alone should exempt all light rail projects from additional studies. Sound Transit also needs to find away to build light rail faster and cheaper. Also, light rail stops at 164th and 128th St on the I-5 corridor are a must. Again as a taxpayer and big supporter of high capacity our region is long overdue for light rail, but it must be delivered sooner to have any meaningful impact on congestion and traffic.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	the overall time line is WAY TOO LONG. As a Snohomish County Resident I was supportive of the first two phases and have paid taxes to support that expansion for years. To expect people to wait an additional TWENTY FIVE years to see service come to Everett is RIDICULOUS. I support Dave Sommers and other Snohomish County representatives in this view. Why would we build out in Ballard, West Seattle and other areas' before we get even CLOSE to anywhere in Snohomish County. Without changing the time frame (speeding light rail's arrival) in Everett (or even Snohomish County), I would not view asking for additional taxes as favorable. Also all of the information you mention in this and other articles doesn't show what we have already contributed, you only state what the additional costs would be... how much has the average person throughout the region paid to do with only a small percentage fo people able to use the "system"??
SNOHOMISH COUNTY	Too little, too late. I need better commute options, but I will no longer be commuting by the time this plan is implemented.
SNOHOMISH COUNTY	I live in North Everett so of course I would like the light rail to come here as early as possible. I would use it almost daily. I am a retired flight attendant. I have used public transportation in many countries throughout my forty year career and realize first hand how beneficial it is for not only the locals, but tourists as well. When there is light rail in my area I will sell my car. It's that simple. Thank you for asking the public for input. I enjoyed the survey.
SNOHOMISH COUNTY	I think this timeline is way too long. I would assume if we are paying for this starting this fall, that we would be paying the above mentioned taxes for at least 25 years. Like a school bond for building schools, I would like to see ST1 and ST2 paid off before you ask us to pay even more. At least ST1 needs to be paid off, and ST2 needs an end date showing us how much longer we will be paying that tax before it retires. I am super excited for light rail, but not with this long of a timeline, and not with these many taxes. We have been talking about light rail in Seattle for at least 20 years. Adding the 25 year plan on makes it 45 years total. We ride light rail all the time in Vancouver Canada, and I have ridden it in SF, Ca and Wash D.C. They all have excellent systems, and I have a really hard time believing it took 45 years to draw up plans and build that system. Why does it take that long for ours?
SNOHOMISH COUNTY	I'm retiring within the next 10 years or so and probably moving out of the area. a 25-30 year transit plan is worthless to me. Traffic is one of there reasons I'd be leaving. I'd be more likely to support projects that relieve congestion at points that historically have traffic jams during non rush hour, ie, southbound I-5 from northgate to downtown on a weekend afternoon. I-5 northbound from sr526- marysville just about any afternoon. I-5 in the lewis/mcchord areas. There's no good reason why it should take me 45 min to drive from mountlake terrace to downtown, it's only 12 miles.
SNOHOMISH COUNTY	Priority should be put on I5 and I405 corridor. Add train cars to the south rail on Sounder. Trains need to run later. That should be first step. Trains need to run till 9 and more people would ride them.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	Everett should be light rail's #1 priority. You steal taxes from Snohomish county to pay for King county projects. you should finally put money to SnoCo, and prioritize Everett above your Seattle pet projects. its what you said you'd originally do, and now you go back on your word?? Yes I'm mad, your stealing from me and my neighbors and then intellectualizing/justifying your criminal behavior. How would you respond?
SNOHOMISH COUNTY	Time lines should be moved forward. 25 years is too long to wait. The time lines need to be cut in half.
SNOHOMISH COUNTY	Will only support if Connection to Everett and Paine Field is done first.
SNOHOMISH COUNTY	Seattle traffic is currently practically unbearable. I spend over two hours a day in traffic commuting between Mountlake Terrace and Columbia City because the only alternative is to take three separate busses to and from work amounting to three hours per day. Our freeways are clogged. My only wish is that all of these projects could be finished sooner.
SNOHOMISH COUNTY	Twenty-five year completion of light rail to Everett is unacceptable.
SNOHOMISH COUNTY	Completion to Everett should be the number one TOP priority. I am tired of voting for transit and having to wait another 25 years? Unacceptable. Please change your priorities.
SNOHOMISH COUNTY	I am strongly opposed to any final plan that doesn't bring light rail to Everett by 2033. Everett and Tacoma were part of the original priority plans in the 1990s. Those commitments must be honored.
SNOHOMISH COUNTY	The timeline for BRT on 405 from Lynnwood to Burien seems excessively long. Is there a way to fast track this portion of the work? I find it hard to believe that it will actually take eight years to add transponders and buses. Especially since the HOV lanes have reduced lanes and increased commute times for low-income commuters, BRT should become a priority to fix the bottleneck. Thanks
SNOHOMISH COUNTY	Connecting the cities of the Sound with public transit to alleviate the burgeoning congestion due to the inevitable increase in population and commuters from area to area is integral to our future success and daily happiness as a region. So however long it takes to accommodate our growing need of transit plus our hopes to decrease traffic and pollution, is a necessary burden which should be started as soon as possible. As a resident of Everett who commutes to Seattle almost everyday, I appreciate the plan full-heartedly and only wish it could be done magically overnight. Thank you for your hard work towards the improvement of our lives.
SNOHOMISH COUNTY	Get it all done(including commuter rail) in no more than 15 years, and the light rail as soon as possible. Determine what that will cost and ask for it. THAT I will support. The piecemeal business is not something I'm willing to support.
SNOHOMISH COUNTY	Timelines need to be moved up!!! Using grants/federal money or using tax dollars as a last resort to shorten the timeline. 25 years is horrible.
SNOHOMISH COUNTY	Completing light rail to Everett must be a priority. Waiting 25 years is completely unacceptable. Boeing and the industrial base in Snohomish county need transportation improvements now! Not 25 years from now!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	I don't understand why you are making taxpayers pay for something that they will never be able to use and take advantage of at all. Taxpayers will suffer with paying the taxes, dealing with even more traffic while the construction is going, and not even be able to use the services because taxpayers will be retired or dead by the timw the whole thing is built.
SNOHOMISH COUNTY	This is the first time I have gladly voted to raise taxes on myself but the timeline proposed means I'll barely even get to use these improvements before retirement. These transit changes will be revolutionary for our region but we must act quickly. Further, the plan is becoming far too reliant on Seattle being a central hub. I'm sure due diligence will be done but overcrowding of downtown stations will hurt the appeal of the system. The addition of a link between Ballard and UW would help offload people bound for Fremont, Ballard, Queen Anne and SLU from the north and prevent needless trips in and out of the downtown corridor for individuals in those areas.
SNOHOMISH COUNTY	I hope they can get this done sooner!!
SNOHOMISH COUNTY	The people of Snohomish County were promised light rail when this was originally proposed. Now it is last. Light rail up to Everett should be the # 1 priority.
SNOHOMISH COUNTY	I feel the North end, including Lynnwood and Everett, are typically treated as an afterthought--after everything in the South end is considered. There are a lot of people who commute from the North end. I would make light rail to Lynnwood and Everett a priority. There is already significant transportation options for people in the South end.
SNOHOMISH COUNTY	Frankly, I don't see why adding bus lines will take years to complete. This is not as complex as rail and should take a tiny fraction of that time.
SNOHOMISH COUNTY	Please consider getting light rail service to Everett sooner.
SNOHOMISH COUNTY	I wish it could be completed sooner, but I won't make the same mistakes as the generation before me. I'll vote yes for any mass transit. Especially this plan that finally starts connecting the Eastside.
SNOHOMISH COUNTY	I will oppose any more Sound Transit funding or expansion unless you reorder your planned light rail build out sequence. It has to go to north to Everett at Paine Field and south to the Tacoma Dome PRIOR to going to West Seattle or Ballard. All the plans about buses and commuter rail are unnecessary distractions and delays from light rail. Commuter rail is toxic because it causes traffic delays (along with increasing fossil fuel trains) at Mukilteo and Edmonds signal lights. The second priority after Paine Field and Tacoma Dome light rail needs to be fixing the train delays to traffic at Mukilteo, Edmonds, and Marysville - perhaps with underground train stations or bridges over the tracks.
SNOHOMISH COUNTY	Get it DONE FASTER!!!!!!!!!!!!!! The "phases" approach is to slow!!! 25 years to get light rail to Everett??? You want me to support that??? How about 25 months??? GET ON IT!!!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	The main thing that I think all of these projects need to address (which the light rail inherently does) is the reliability and dependability of transit options. What I mean by that is having dedicated paths of travel for these modes of transportation so that vehicle traffic does not slow down transit commuters. I believe that is the most important thing for convincing people to take transit, because the problem currently with most buses is that they get just as bogged down in traffic as cars, so it offers little advantage. That is why I strongly support the light rail expansion as well as the option for buses to use shoulder bypass lanes during times of heavy traffic, which seems like the easiest way to give transit a boost now in terms of managing travel times and passing that benefit along to riders. Thanks!!
SNOHOMISH COUNTY	The timelines for all of these projects are WAY too long. Completing projects in 8 years? 12 years? The growth is happening now and we can't wait that long to implement these important transit lines. Public train transportation needs to be here and now. The Puget Sound region is so far behind other major cities with mass transportation options. It's disgraceful.
SNOHOMISH COUNTY	We can set more ambitious timelines to get voter approval. It's better to finish ahead of schedule, yes, but if timelines extend beyond 10-15 years the entire plan won't get off the ground.
SNOHOMISH COUNTY	25 years is long time here in Everett. Would love to see some ability to move this whole project faster. Cost be damned!
SNOHOMISH COUNTY	Why is an Everett light rail link not planned sooner? It is the governmental center for Snohomish County and should be a higher priority. Thank you.
SNOHOMISH COUNTY	We need these projects in place much earlier! 25 years until service extends to Everett will see my spouse and I close to retirement.
SNOHOMISH COUNTY	While I support the need for efficient transit options I feel the 25 year expected completion timeline seems extremely long. We are seeing changes in traffic patterns in much shorter timeframes today. How flexible will these projects be to adapt to necessary changes prior to 25 years?
SNOHOMISH COUNTY	I feel that the LLR to Everett should be of top priority, due to the additional new jobs and increased population projected for Snohomish county. SB traffic on I-5 in the AM and NB traffic in the PM is already some of the worst congestion in the state. Without the situation being addressed much sooner than planned as ST3 is currently proposed, the ridiculousness will cause people to choose to live elsewhere or locate their company elsewhere. Connecting Snohomish county to the rest of the LLR spine is mandatory for our region's economic success and continued growth!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	Seriously here, folks - you ABSOLUTELY NEED TO SPEED-UP THE CONSTRUCTION PROCESS OF CURRENT LIGHT RAIL PROJECTS. From what i'm reading, the city of Phoenix built their light rail system in two years - TWO YEARS!!! Stop dragging your feet and get on it. I lived on the Central Link light rail line for two years and recently moved to Mountlake Terrace, taking the bus is agonizing for me - they are smaller and therefore always crowded, they quite often get stuck in traffic. Light rail is the solution we need, but you need to speed up the construction. I'm a light rail supporter, but one way to very quickly LOSE my support is to be slow about constructing it. WE NEED IT NOW!!! God dammit, get on it.
SNOHOMISH COUNTY	Everett, Tacoma, and Redmond first. Complete the spine, then branch out.
SNOHOMISH COUNTY	25 years is a ridiculous timeline. Costs you are planning now will be greatly low to fund this project.
SNOHOMISH COUNTY	I live in north Everett near the Transit Station and I often commute to downtown Seattle. I currently take the 510/512 but it would be great to take the train as it is more timely. In addition, I fly out of Sea-Tac at least a time or two a year. There is no good way to get to the airport from Everett without inconveniencing a friend or family member. Expanding lite rail to Everett would allow North-enders much easier access to the air port as we could just be dropped at the Everett Station. Please reconsider the priorities and expand North first.
SNOHOMISH COUNTY	Sound Transit has been typically behind schedule and over budget on projects, has a history of promising much and delivering less, and therefore a huge disappointment thus far. To pour more tax money down the Sound Transit financial black hole is a big mistake in particular for Snohomish County taxpayers when they are on the tail end of the timeline to reap the benefits. You propose that we all pay equally but many of us get little or no benefit in the near term. I vote "NO" on ST3!
SNOHOMISH COUNTY	Due to the timeline of completion, ALL developers in all neighborhoods must provide proper parking spaces for new residential builds or fear the inability for non-residential customers from frequenting businesses outside the suburbs. This is where developers and city planners need to work together-- and not always side of the side of the developer. As a resident of Edmonds, I am finding it extremely challenging to visit certain Capitol Hill and Seattle neighborhoods to shop, dine and visit due to new builds that allowed for no additional parking. The new residents of these new builds have taken all of the parking for those visiting the neighborhood.
SNOHOMISH COUNTY	I don't care about the cost because you should be paying for it, not us. if you don't have enough riders to pay for the line, than shut the line down. you guys raised our prices due to high gas prices 2 years ago when gas went to \$4 gallon and guess what you did this year when gas prices are back down to \$2. yup, you raised our prices again. not logical and you losr all my support dud to your greed. I hope you go out of business. you're a poorly run business.
SNOHOMISH COUNTY	Everett/Lynwood to Seattle I believe is higher priority and should be completed sooner on the timeline. Overall it seems to me Snohomish county fronts a higher end of the bill and gains somewhat less than the other counties. Additionally I would like to see Boing pay for part of the plan if indeed the Paine field station will increase riding times from Everett Station to Seattle, oppose to directly from Everett station to Ash way.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	Everett light rail by 2020
SNOHOMISH COUNTY	Everett light rail piece to be moved up in time line and West Seattle and Tacoma lines moved out to later.
SNOHOMISH COUNTY	Light rail between Everett and Seattle needs to go to the top of the list. There is so much new residential construction that the bus system is maxed out. Almost everyday we get alerts from ST and CT about 25+ minute delays because of heavy traffic between Everett and Seattle. There is currently light rail going south from downtown. Get light rail going north, then expand on the existing light rail. Waiting up to 25 years for light rail to the north is ludicrous! The current Sounder train isn't easily accessible to the largest population segment in the north Lynnwood and Everett area. Plus, when it rains hard, the train is shut down because of slides on the bluffs of Puget Sound. It isn't a reliable alternative to immediate light rail going north. We need to improve the transit situation in the north end and make it top priority.
SNOHOMISH COUNTY	Accelerate the light rail to growing Snohomish County.
SNOHOMISH COUNTY	At 25 years out for Everett light rail service, which I will be paying for, find is unacceptable ! I will be at least 103 years old when planned start up is implemented. That being said I plan to use the service and will demand to be at the front of line for boarding on the first run !!!!!!!!. As I said time line is unacceptable.
SNOHOMISH COUNTY	I have been supporting Sound Transit from the beginning. However, I am very disappointed in how long it will be in this proposal to get light rail to Everett. This timeline keeps being pushed out. If the Everett link is not completed much sooner in the final proposal put before voters, I will vote against it.
SNOHOMISH COUNTY	The time lines should be shorter and Snohomish County and Everett neglect and long timelines is a disgrace.
SNOHOMISH COUNTY	Your timetable is far too long. That is why I only somewhat support the proposal. Mass transit is essential and your plan reflects that, but it will take too long. 25 years??? Hardly the solution we need NOW.
SNOHOMISH COUNTY	25 years to get to Paine Field? There's no current express service along I-5 that goes there, like there is along I-405. Getting from Lynnwood to Paine Field can sometimes take a long time on transit! Yet there are a ton of people that work there. If the rail solution will take that long, I think there should be a bus along that route in the meantime.
SNOHOMISH COUNTY	25 years, really? Not enough people in the past understand growth...the sooner the better.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	I'm a resident of Everett. Getting into Seattle has always been a complicated pain in the behind. Secondly, providing more transit options for people working at the large Boeing plant is better for the local residents because it would ease gridlock traffic that occurs in the morning and afternoon in the surrounding area. As I understand it, there aren't a lot of transit options at present. Additionally, connecting a sound transit route to the Mariner Park and Ride has been a desire of mine for a long time. As it is right now, if I want to take a direct route to seattle, I must either wait for peak hours and take an inordinately expensive Community Transit commuter route, or travel several more miles to other Park and Rides to take my preferred transit agency, Sound Transit. I love the idea of having the light rail in my neighborhood. I just wish that Everett weren't considered an afterthought. I mean 25 years? That's a ridiculously long period of time to wait for transit advancements. It's certainly an ambitious project, but I think you could do it in 10. I believe in you!
SNOHOMISH COUNTY	I have no idea what it is that you're waiting for - an act of God or whomever but Seattle is LIGHTYEARS behind. We had our chance in the 60s-70s to get a lightrail and we've yet to actually do it. It is inexcusable that you think waiting all of this time between projects. You say it's tied to the debt load amount that sound transit can carry from year to year - well find another way - because there is ALWAYS ANOTHER WAY! The more time you waste in doing more studies the more money you lose economically and more importantly fiscally. We needed this lightyear decades ago. Get off your asses and do whatever it takes to get it done in this decade! I don't want to tell my grandchildren or heaven forbid great grand children, "you know I used to live in Seattle but their transportation was the crappiest I've ever seen." MAKE SEATTLE GREAT AGAIN, if not make the transportation great. Time is of the essence.
SNOHOMISH COUNTY	I think that the timetable should be compressed, and all projects delivered more quickly.
SNOHOMISH COUNTY	Number 1 priority - Increase parking spots in Park&Ride locations. Most places on the eastside get full even at 7:30 in the morning. . Number 2 priority - BRT lanes should be started sooner, without encroaching on the existing drive lanes. In other countries, I have seen that BRT lanes usually eat up the existing driving lanes leading to congestion for drivers who are not taking the BRT lanes
SNOHOMISH COUNTY	The estimated timelines are extremely horrid. The requirement for most of these projects are now or are a year before. When the proposed projects are completed, it would be too late and we would have larger issues to worry about and as an example, a BRT on I405 would not be sufficient and the need for light rail will be a lot more crucial in this corridor.  I'd recommend a more accelerated schedule for areas that are suffering with heavy traffic such as I-405 rather than wait 8 years.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	Please, please, please identify ways to improve the timeline of these projects! 25 years to create a proper light rail system, with critical service in Seattle itself, is not going to cut it! We needed this service tomorrow! We simply cannot wait 25 years. The future health of the entire public transportation system relies on a more acceptable timeline. Please, revise this plan to prioritize service improvements within Seattle that we will see in 5-10 years, not 25!
SNOHOMISH COUNTY	only place I've noticed a deficiency of public transportation is along I-405 so I'm glad that is happening first. I don't know which routes would serve the most people most effectively so I hope someone did that research before setting the order of projects. Its all happening too slow. :(
SNOHOMISH COUNTY	25 years to complete is absurd. Sound Transit does nothing but waste tax dollars and now the want more.. We have nothing that we can use and ST has been collecting taxes for years and its never enough. What a joke.. stop the madness! I will never vote to support additional taxes with ST track record!
SNOHOMISH COUNTY	Git 'er done. The area is only becoming more congested.
SNOHOMISH COUNTY	The projects should time line should be shorter. The need is now, and if we take 25 years to build our transit to today's needs, the project's current plans may not fill later unknown needs allowing apposing parties to to say "see we did it, it didn't work, now get back in your cars". Furthermore the longer timeline allows for bureaucracy to bog it down or even bring plans to a stand still causing many of the same issues that the monorail went though with the make up break up routine that plagued that project, again leading to a "see improving the system wasn't possible, but hey you all have had a 2 hour commute most of your working life anyway"
SNOHOMISH COUNTY	This all needs to be expedited. 25 yrs to Everett is WAY too long.
SNOHOMISH COUNTY	I would like to see the Everett light rail completion time be sooner than 25 years.
SNOHOMISH COUNTY	I approve of the expansion plans but 25 years is an unacceptably long time to complete the projects especially Light Rail to Everett. Many of us will be too old to enjoy the use of Light Rail and by 25 years, traffic will be so congested that it will be a daily nightmare. It's been mentioned that Light Rail to Everett could be completed sooner if it ran along I5 instead of going to the Boeing plant. It would be worthwhile to consider doing this to serve the numerous other residents of Snohomish County who don't happen to work for Boeing.
SNOHOMISH COUNTY	First the people here should have voted to start this 50 years ago when they had the chance, but getting this done should not be dragged out as long as it is. Why is the Northgate link going to take 5 years to open after the tunneling has been complete?!? For me personally, I would like to see Sounder service go both directions and have the possibility of taking the Sounder from Edmonds to Mukilteo after Boeing moves us back to the Everett campus. This would require Boeing to operate a shuttle from the Mukilteo station, completely reasonable.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	Need to get north area better connected with the area and include lots more parking. I dont believe you truly realize how stressful it can be when you arrive at the bus station after 7:30am and there is no parking. We have been in Everett x30 years and myself and husband have had this problem trying to get to work and both of my sons when commuting to U.W. from Everett.
SNOHOMISH COUNTY	As most would probably agree. You are already 10 years too late for expansion so the timeline for this should be much faster. In the next 8 years people will go elsewhere if traffic doesn't get any better. With the amount of growth that is happening in the region this needs to happen quickly, like a 3-5 year timeline for the next phase...not 8-25 years.
SNOHOMISH COUNTY	Our household only used one car at a time in all the years we have lived in Puget Sound until recently (second household in Montana) and only because of public transport was I able to have a career at Boeing (retired in2012). I either used a bicycle exclusively or combined bike with community transit to work - without choice - at Renton from our residence in SE Everett. An automobile exclusively for my use to get to work was never an affordable option, even though I had a 25 year career at Boeing and was well compensated. New employees at Boeing make less money than I did for doing the same job, houses are more expensive and further away from work for young households and education is more expensive. The people the region wants to attract can't afford cars in the same number they did a generation ago. The benefits of living in the Seattle area are easier to enjoy if you don't have to drive the longer and longer distances to get to downtown and look for a place to park. And the hospitality industry and wonderful local breweries and distillers are easier to appreciate if you don't have to drive home. Period.
SNOHOMISH COUNTY	Mukilteo desperately needs more parking. It is much closer to me, but I have to go to everett for parking.  Also, the ability to bypass ferry traffic in mukilteo is a must. Its a huge hazard down there trying to get past all of the foot and driver traffic on and off the ferries... I would be more than willing to walk from one side of the tracks to the other if there was a pickup/dropoff zone on the other side, with a bridge over the tracks.
SNOHOMISH COUNTY	It seems counterintuitive to think that more people would be served sooner by completing any section other than the North/South section. Anybody who regularly tries to get anywhere between North of Lynnwood and South of Northgate endures excruciating frustration and economic waste. My last two trips to the Seatac airport took over 3 hours: once by car and once by transit. 3 hours for a 30-mile trip is unconscionable.
SNOHOMISH COUNTY	Let's just man up, issue municipal bins and do it NOW. It's not fair to ask the outlying regions to pay for years and years while their commute just gets worse. Get it done now and we'll all reap the benefits. I lived in an area poorly served by mass transit. Buses take forever being poorly connected. I want light rail. The Sounder is out of commission so often up north since development along the bluffs have lead to frequent landslides.

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	Light rail needs to go all the way to Everett as soon as possible, traffic is getting worse and worse and there is no end in sight. I would take it every day if i could and i know a lot of others would as well but we get ignored on the north end. we have "express" buses that are never on time or we wait 40mins to an hour to get on and then they are so packed you can't even sit down. Please please get light rail up here, right now by the time you get it I will be retired, that's crazy!!! It takes 2 hours right now to get from south Everett to Seattle in traffic, how bad is that going to be in 10 years, where is the fix for that? are we really going to wait for that to happen? 21 years before we get relief?
SNOHOMISH COUNTY	Speed up the construction. I'll die before it's done and never get to use it. Also, bus links from east (especially) and west of the I-5 spine in Snohomish County essential to getting people to the rail. Building robust, safe, dedicated, separated bike lanes on the major connecting routes (Cathcart Way, 128th, 180th/164 and Filbert Road. Better yet, find a "back road route utilizing power lines and "green belts".
SNOHOMISH COUNTY	Sooner the better.
SNOHOMISH COUNTY	Your plan takes too long to get to Everett and costs far too much. What the hell have you been doing in the past few years? I expected to see much much more progress by now!!!
SNOHOMISH COUNTY	Everett needs to be in 12 years not 25
SNOHOMISH COUNTY	This needs To Be done NOW not 25years from Now. Even the BRT is too late. Really 8 years we need this in less than that. I like these ideas they just need to be done sooner.
SNOHOMISH COUNTY	25 years is WAY TOO LONG to wait for light rail service to Everett.
SNOHOMISH COUNTY	The overall plan and all the selection of projects is perfect. The only problem is the timeline. It should not take 25 years to build this out. If other cities can do projects of similar scale with MUCH reduced timeframes, so can sound transit. Come back when you have a plan to accomplish all of these projects in 10-15 years MAX.
SNOHOMISH COUNTY	The Everett-Seattle corridor is one of the most congested lines in the Puget Sound region, that should be one of the first lines to be finished since it will put such a relief on area traffic. At minimum, a temporary BRT.
SNOHOMISH COUNTY	Make expansion up to Everett a higher priority. Lines serving west seattle and ballard would be nice to have in the big picture, but would ultimately impact fewer Puget sound residents than a line up to Everett. Same thing with the lines on the east side. Nice to have in the plans, but would affect fewer residents than the line up to Everett. Plus I don't see many people on the east side ditching their bmw or Mercedes for public transit. I live in Everett because I can't afford to live in seattle. Having faster more reliable public transportation to seattle gives me as well as many others in north Puget sound more options when it comes to finding good jobs. No one wants to sit in traffic for multiple hours every day. Priority should go to light rail and the lines with the biggest impact and potentially the largest gains in riders which in my opinion is most likely the north end up to Everett.
SNOHOMISH COUNTY	Everett in 10 years or my household does not support.
SNOHOMISH COUNTY	Make it happen yesterday.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	With the North sound area like Everett and Lynnwood growing and being a major hub for aerospace employees the 25 year timeline for completion is to long. Those areas should be reevaluated for importance in terms of commuters to get the projects done in the area much sooner.
SNOHOMISH COUNTY	I don't know a great deal about where the most congestion occurs, but am more concerned about the environmental footprint of all those cars in traffic jams. whichever projects will alleviate the most carbon footprint are the ones I think should top the priority list. I am of course, biased in favor of gaining light rail from Everett to Seattle because I will use that service, but not at the expense of relieving higher volume elsewhere.
SNOHOMISH COUNTY	Additional transit to everett is very important and should be given higher priority
SNOHOMISH COUNTY	Connect Everett sooner!
SNOHOMISH COUNTY	If you are really proposing 25 y for this, forget it. We will be building light rail on Mars by than. I am not going to pay higher taxes for anything I cannot use for 25 years, and that is, if all goes as planned. Time to wake up and see how third world countries do it....
SNOHOMISH COUNTY	You have got to find a way to speed up these time lines. At the rate this region is growing, we can't wait that long for transit relief.
SNOHOMISH COUNTY	i will NOT pay for a project that won't be completed before i die. what voter would? just go down to portland and look at their MAX line, then come back here and do that between tacoma and everett. why make this so difficult and take so long?
SNOHOMISH COUNTY	The biggest employer in the area (Boeing Everett) does not get rail service fore 25 years?!?? Are you [explicit] joking?!?????
SNOHOMISH COUNTY	Please consider the number of commuters driving to the Everett Boeing plant and nearby industries. This link to the Paine Field area needs to be built sooner than 25 years from now. Ballard people already have plenty of buses that can move the masses while they wait for light rail. The sooner the better for the Everett Link, traffic up here is terrible every workday.
SNOHOMISH COUNTY	More parking at MLT and Lynnwood transit centers
SNOHOMISH COUNTY	Need to move faster. 25 years to Everett seems excessive.
SNOHOMISH COUNTY	The project timeline for the Snohomish County light rail project is unacceptable. The freeway drive times have done nothing but increase in great leaps and there is no solution in sight. The degrees of infrastructure available in other areas is significantly higher than it is in the north region. In my view, an earlier adoption of light rail will help support a more sustainable infrastructure mass transit backbone and positively affect the transit service structures we we currently have in place.
SNOHOMISH COUNTY	Please do what you can to accelerate getting light rail running. Instead of opening stations in large groups, phase them in as they are completed.
SNOHOMISH COUNTY	I don't find 25 years time acceptable. This should be the number one transportation priority in the region, completed within half that time.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	<p>Light rail to Boeing Everett in 25 years??? Boeing might be gone by then!!                  Paine Field will probably become a regional airport so the rail system will still be a big benefit.                  I am very concerned about the total cost per year of the entire Sound Transit plans, not just ST3, it is a LOT of money for a lot of years.</p>
SNOHOMISH COUNTY	<p>Basically one of the original goals of the Sound Transit project was to clear the gridlock on Interstate 5. As part of that goal ST early on promised rail service to Snohomish County, including Everett. Those were the original promises made to bring Snohomish County into the taxing district. Yet under ST3 the Snohomish County links are being pushed behind newcomers to the list -- expensive tunnels to Ballard and West Seattle, Seattle neighborhoods that already have pretty good transit. In the meantime I-5 north is increasingly gridlocked with cars and buses. More of us up north would take transit if more was available AND larger Transit Center garages were available. A high priority should be construction of a multi-story parking facility at the Lynnwood Transit Center.</p>
SNOHOMISH COUNTY	<p>It needs to happen faster. I don't support any improvements to buses. All the money should go to light rail.</p>
SNOHOMISH COUNTY	<p>With the projected increase of population in Snohomish county, light rail expansion to Everett should be the highest priority going forward. Waiting 25 years for light rail is not an option.</p>
SNOHOMISH COUNTY	<p>As someone in my mid-Thirty's working at Boeing Everett I'm shocked that I could very well retire BEFORE light rail get's put in. The current bus service is practically non-existent, I see buses there all the time, they always have 'Out' lite up on the route signs. I'd love to take the bus, and live near the Mountlake Terrace Transit Center, the only route's I can find involve so many transfers it's on par with walking pace! (I'm not exaggerating, less than 10 mph average speed) Unfortunately this is the case at a great many locations in Sno-Co, I know plenty of people who have researched the buses to Boeing Everett and just given up. We were all holding our breath in excitement for this plan, and are now letting it out by shouting loudly!</p>
SNOHOMISH COUNTY	<p>You need to hire people from Chicago or Portland who actually know how to put a realistic plan together that people would actually use. Now not in 25 years. For the current plan, let's stop, and put no lanes on the road, that are already paid for..aka not toll roads. Come on of Portland can do it, how had seattle managed to [explicit] it up so bad. You ever came up with this current plan should be fired.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	It seems strange that cities that have to wait longer to get the light rail still pay the same amount as everyone else every year. That means the cities later in the plan have to wait more than 3 times longer to get the new light rail, and pay 3 times as much before they ever even get to step foot on the light rail in their city. Would you pay more for a taxi you had to wait longer for? I get that the taxi has to travel further, but if it's giving people people rides the entire way before it even gets to me- those people should be paying for their own rides. People should not be paying the same amount if they're getting less benefits. Why should the smaller cities subsidize the larger cities when the larger cities are already the ones with the more thriving economies? Frankly, I'm extremely nervous about how the order of this 25 year plan is going to effect the economies of the smaller cities. It seems like the already thriving and congested areas that will be focused on first will only be made worse with a further influx of population growth, parking problems, increased rents, home prices, and an over-shadowing of the smaller, already struggling outlying cities.
SNOHOMISH COUNTY	The timelines are too far out. 25 years to completion. You have to be kidding me. By that time the area will be in need of much more than what is currently planned. A day late and a dollar short as they say. Also \$200 per person per year. That is insane seeing that most of the people paying for the system would not be the ones using it. A simple solution to some of the transit problems is to have light rail follow the I-5 and I-405 either in the middle of the freeway or underneath it. No new land would have to be bought and construction could start immediately. All light rail should attempt to have a time table of less than 15 years. Good luck.
SNOHOMISH COUNTY	Do what you told the voters in snohomish county and all the tax dollars you took, finish the line to Everett first not last, or we will vote no.
SNOHOMISH COUNTY	Everett in 2041 is simply unacceptable. Sound Transit needs to keep its promises of making the spine a priority. It simply will not pass in November as is.
SNOHOMISH COUNTY	Timeline is too long. Need faster improvements. Also, cut waste instead of taxing us for this or to at least reduce the burden.
SNOHOMISH COUNTY	I would like to see an emphasis on excelerating the extension of the light rail projects moving North and South, and then focus on expansion within Seattle. I oppose the current plan due to the very weak timeline for development and the non expiring tax increases. I would like to see the light rail expand, and I'd like to see the city focus on this rather than add a bunch of non priority projects in the plan.
SNOHOMISH COUNTY	I would like to live to see the light extended to Everett. I won't if it takes 25 years,

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	<p>With the fact that we are planning out for 25 years and the technology with self driving cars and other types of systems are so close, are we planning something that by the time the projects are finished in 2033 and beyond are really not going to do what they could if they were able to be completed sooner. I want to know more about why the timelines are so long. I have lived in WA DC and ALWAYS used metro when I could. You need to have parking. We have expanded so much to get to rail stations, the parking has to be there. Not everyone is going to be able to ride a bike or walk. I don't even have a bus stop on my major street to get me started. With kids, you can't many times because there are not safe walking paths to anything. Snohomish county is being stupid with having developers finish sidewalks so there are bare spots on MAJOR roads that need to be finished either because PUD owns the land or there is an older home on the spot. There is need for better city planning in the areas that were more rural but with major expansion and THOUSANDS of homes in the suburbs people are in cars. I also don't believe in buses as MASS TRANSIT as many who are not from seattle are. They tend to be taken by people that you do not feel safe around. It takes 3x as long. I wish i could take mass transit from Bothell to Issaquah. In order to do that I have to drive and transfer and wait for long periods of time so that my commute would take me 2 1/2-3 hours instead of the hour in traffic. There are many reverse commuters that a Rail system can take advantage of helping because they have to go back to pick people up. I know a subway system can not work in our region due to topography, but a light rail system that woks like that is what is needed. I should be able to get on a train in Lynnwood or even Canyon Park and get to the airport so I don't have to drive my car to the air port and park. I support the costs with these things, but I am afraid that the state will not use the money the right way and really will just add buses, which I will not take, they are just adding to the congestion and they run as far behind as driving. We have lots of money out there that gets misused and lots of things that are just spend millions to study that wastes all the funding. I support something, but I am not sure this current plan is going to do it. I will have to watch to see my voting plan as November comes.</p>
SNOHOMISH COUNTY	<p>I know there are many logistical considerations &amp; obstacles, but as a Mukilteo resident (formerly of Everett), I wish there was some way of getting the light rail done faster. I would be willing to pay more personally.</p>
SNOHOMISH COUNTY	<p>Everett to lynnwood light rail needs to be done much sooner than proposed.</p>
SNOHOMISH COUNTY	<p>The transit available now that connects Everett, Mukilteo, and Lynnwood to Seattle is terrible. I wish that ST3 would consider prioritizing these areas to be completed in the very near future instead of in 25 years. Right now, the Sounder train is fairly unreliable because of frequent landslides when it rains. Even when the Sounder is running, there is minimal parking at Mukilteo and Edmonds (which is usually full by 6:30am). The buses do not run as frequently as they need to, and many buses stop running around 6pm on weekdays. The bus is so unreliable and often runs 30 minutes to an hour late in the morning commute. The I-5 commute south from Everett to Seattle would benefit from more mass transit. The sooner that can be accomplished, the better.</p>
SNOHOMISH COUNTY	<p>Projects need to be completed faster.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	In general I support more transit, because currently I can hardly ever use it because it does not go where I need and takes a long time. Hard to believe it would take 8 years to add BRT. How about 2 years to add buses and 8 years for light rail? I will pay the taxes. Let's get it done! Ben
SNOHOMISH COUNTY	These projects take time, but these timelines seem extreme. Perhaps if you show how population increases will affect commute times without your improvements people could get on board and fund/support them.  Also, I strongly encourage outreach demonstrating how traffic will look WITHOUT your improvements for the November voting. We have to keep improving our public transportation... The growth isn't slowing down!
SNOHOMISH COUNTY	Lynnwood/Everett light rail needs to be top priority....The population is in excess already!
SNOHOMISH COUNTY	If it'll take 25 years to build light rail to Everett, I will no longer be on this earth to enjoy it
SNOHOMISH COUNTY	Link first. With all of the tech jobs moving into downtown Seattle (shipping in talent from other states, as Expedia, Zillow, Amazon, Salesforce, Best Buy, and anybody who wants to compete is currently doing), traffic is going to get worse faster than everybody realizes. The only way to get people in and out of downtown and not be stuck in traffic for hours will be via something that doesn't use roads that cars will congest.
SNOHOMISH COUNTY	I, as well as most people I've spoken with, am concerned about the time it will take to complete these changes. Surely it can be done faster? We can all see spending the money, just not the time it will take. Also, as for cost, we feel since transit riders already contribute significantly to our transit system, perhaps we should get a break when it comes for paying for the changes. We aren't the problem... it's those that continue to use their cars that should pay for the mess they created!
SNOHOMISH COUNTY	It will affect me very little, but I am concerned that if Everett has to wait 25 years to be connected, voter support from that area will be low. I'm in favor of completing the spine first, making it possible for people to park at more stations, and covering 405 with a rapid bus.
SNOHOMISH COUNTY	22 years for a traffic problem that is happening now is unacceptable. I am currently turning down job offers in downtown Seattle as it can take me 2-3 hours to get home by bus. Right now it is a minimum of 90 minutes each way, and no service at all between 10am and 3:40pm (to Bothell/Mill Creek).
SNOHOMISH COUNTY	the Lynnwood / Everett light rail extension should have a much earlier completion timeline. You are asking today's commuters to pay for the commute 2 generations away.
SNOHOMISH COUNTY	Mass transit implementation has been dithered over for so long on this area, I will almost certainly be dead before the initiatives you are asking me to support are open for public use. The whole sorry odyssey 1970-2016 adds up to a shameful case of inept, myopic urban planning and whatever you try now qualifies as too little, too late. The metroplex is already paralyzed. In this emergency context your ongoing obsession with rail is singularly unhelpful. Rail takes decades to plan and implement; BRT takes mere years; everything you are pushing now was needed a long time ago. I'm sorry, but the halfhearted, erratic, slow-gestating transit mess in the Everett-Seattle-Tacoma-JBLM corridor is an excellent argument for moving away, which I am in the process of doing.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	Since I live in Everett, I'd love to see us much higher up on the list, even if it's just with more / faster buses. The 510 / 512 are great, but not especially frequent or fast. Although I understand that these projects take time, 25 years is a <i>*very*</i> long time to wait. In the mean-time, I'd love to see more / faster buses or <i>*much*</i> more frequent Sounder service from Everett to Downtown Seattle. At the moment, the Sounder is completely unusable for those who, like me, just want to go to Seattle on an evening or weekend.
SNOHOMISH COUNTY	Your organization has zero accountability and a history of bait/switch. You need to meet your current plans on time and under budget to come close to winning back our trust.
SNOHOMISH COUNTY	25 years link light rail to Everett is to long we need to get this down to 15 years max even if it means raising taxes.
SNOHOMISH COUNTY	Sad that light rail North takes so long.

<p>SNOHOMISH COUNTY</p>	<p>In General, I'm very supportive of the plans to improve the transit plans in ST3. However, the timeline is very slow to improve in major business, school and residential corridors. We have studied these projects and have delayed them to the point that a real sense of urgency is needed to meet the need and therefore a trade-off of funding versus priorities.</p> <p>From a big picture perspective, what is needed is a state level funding plan that rolls are the various projects together on a timeline that shows funding needs for each city in the greater puget sound area that shows the overall tax impact on each community and individual (Average household). A comprehensive plan that shows how everything ties together with cost / benefit analysis, impact, timelines, funding needs and tax impact for the entire puget sound and then by each major city with the expected growth rates. This will allow residents to see the big picture and how they fit in a the benefit.</p> <p>The problem with the current plan does not show a cost / benefit analysis. As an example, if the board of directors included in the study that the average commute time from Everett to downtown Seattle was 50 minutes in 2015, 45 minutes in 2014....etc. and the expect growth rate of commuter from Everett is expect to grow by 10 percent year over year. The proposed improvement projects of adding light rail, expanded sounder rail and RBT would bend the curve and improve the average commute times by 10% year over year starting in year 20xx. The average cost to fund this project is \$200 annually or \$17 monthly starting in year 20xx in tax impact and an average daily commute cost of \$\$\$. Then do this type of analysis for each city and each associated project. This then starts to give to give each person the WITFM and how I'm impacted by taxes, commute time before / after and my cost to commute daily/monthly/yearly for both work and pleasure.</p> <p>In a ideal world - I would like to commute from Everett to Seattle for work daily in less than a hour start to finish at less than \$10 / daily. I would like to get to the Sea-Tac from Everett for less than \$10 - directly into the station in less than an hour. I would like to get from Everett to Bellevue / Lincoln square area or downtown Seattle shopping on the weekends for pleasure again for less than \$10 in less than an hour. I would think that everyone in the Puget sound area wants the same thing- a transit system that enables business and pleasure the is convenient, reasonably price, relatively fast as compared to other modes of transportation. We want a transparent Total Cost / Price / Impact before and after analysis and then we will pay. Miss this type of analysis and transparency and we ill reject this at the ballot box every time, not because we don't want and not willing to pay for it - but because you did not do your job in presenting a proper, well thought-out business case.</p>
<p>SNOHOMISH COUNTY</p>	<p>Decades ago people voted for light rail to Everett, and have paid taxes toward that goal. Now we are told that it still is 25 years away. What a failure in the administration. Get it done! We are tired of waiting!</p>
<p>SNOHOMISH COUNTY</p>	<p>I've paid transit taxes for more than 15 years. Waiting another 25 for transit to reach Everett is absolutely unacceptable. Snohomish County has subsidized King County transit enough. Tax them to get light rail to Everett. I'm happy to pay my share but I never thought I'd be 85 years old when the first train reaches Everett.</p>
<p>SNOHOMISH COUNTY</p>	<p>Why so long? Again wemhave track that is not being used so why not connect the new with the old? It might save time and money. Someday I hope to see rail from the BC border to Oregon.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	I am very supportive of light rail, however this plan doesnt have the rail system come on line soon enough in the north end. The worlds largest aerospace manufacturing plant is located in everett. Clearly the priority should be to get mass transit in place quicker to ease the congestion in that area. That alone would significantly decrease the congestion on adjacent freeways.
SNOHOMISH COUNTY	Light rail extension to Everett should be completed earlier. It should take precedence over completion of Link from SeaTac to Tacoma. There would be much higher ridership on the Seattle/Paine Field/Everett segment.
SNOHOMISH COUNTY	I think it is absolutely ridiculous to make people up north wait 25 years to be connected by light rail to Seattle. The Everett station should be a much higher priority than it is currently.
SNOHOMISH COUNTY	25 years to get to Everett? Snohomish County voters voted in 1996 for light rail to come to Everett. We are still waiting. Your timelines are a joke and an insult! No money from Snohomish County unless we get the light rail we voted on almost 20 years ago.
SNOHOMISH COUNTY	Project completions estimated for 25 years into the future need to be accelerated by 10 - 15 years. Growth in the outlying areas are already experiencing rapid growth and the needs for improved rapid transit options are needed sooner than later. Why can't project run concurrently to expedite completion timeline?
SNOHOMISH COUNTY	I'm sorry our region is late to the game in funding and supporting these very necessary improvements, many of which should have been started 30 years ago. Thanks for all you do.
SNOHOMISH COUNTY	Its seems like by the time ST3 completes, the traffic growth and profile will have grown faster. Please think 3x-4x bigger and proactively plan!
SNOHOMISH COUNTY	If we give a damn about actually getting these projects done and if we're spending 50 Billion on it, it better not take 25 years to bring Light Rail up to the Everett area, that is a joke of a timeline. Either lower the cost if it's going to take 25 years, or get it done sooner, pay the people to get the work done, secure the land, and just get the damn thing done.
SNOHOMISH COUNTY	The Lynnwood to Everett light rail extension should be prioritized - the number of current and prospective commuters from Mariner and McCullum P&R are rising rapidly and 25 years is a really long time. The 405 bus corridor should start ASAP, not only in 8 years.
SNOHOMISH COUNTY	25 cents per \$1000 of assessed property values is excessive. On a home value of \$360k that would be \$90k!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	Living in Snohomish County?South Everett, I am appalled that even though we have been paying into this project for a significant amount of time, we will not see any return on our investment in the near future. This is a slap in the face to the people who have supported this and have been patient. My current commute to the UW takes anywhere from 90 min to two hours, when traffic is running smooth. If there is an accident on the freeway however, the commute can take up to 3 hours. I am using vacation time to make up the difference on the days when I can't stay late at work to make up the difference, due to family obligations. If I use the non-freeway option I need to leave my house at 4:30 in the morning to get to work on time with a combination of CT and Metro buses. This is ridiculous. Snohomish County needs relief NOW, not in 25 years after the rest of Seattle has been connected. Especially since we have been paying into it from the beginning and so far not receiving any of the benefits. I am severely disappointed in Sound Transit's priorities and I hope that they listen to feedback and carefully consider the impacts that this proposal will have on people. Seattle is too expensive for most people to reside in and yet if we don't live in Seattle we face being away from home for 12-15 hours each day when work time and commute are factored into the equation.
SNOHOMISH COUNTY	Earlier completion, especially for the Lynnwood to Everett light rail, should be pursued.
SNOHOMISH COUNTY	I think it is a mistake to focus so much to completing light rail to cities south and leaving Everett to last. As this is my daily commute, I know that the traffic levels are growing steadily higher very quickly with more people moving north to avoid the high housing costs of Seattle. Since Community Service doesn't play well in the sandbox with anybody, there is no easy way to ride transit from Snohomish/Everett/Mill Creek area to north Seattle or suburban areas north of Seattle (Shoreline, Lake Forest Park).
SNOHOMISH COUNTY	Completing the spine of LRT between Tacoma and Everett should be priority one and funded as such. Waiting until 2041 is unacceptable.
SNOHOMISH COUNTY	It seems like light rail to Lynnwood/Everett should be more in line with the timing of the Redmond/Federal Way extensions. Could both projects be underway simultaneously to get access to more travelers more quickly? Commuting from the north end is pretty terrible.
SNOHOMISH COUNTY	I think the plans look good, but the timeline of completion does not show the sense of urgency felt by those who live here with the current congestion in traffic and the negative impact that traffic has on our environment. We need to figure out how to speed this process up significantly, 25 years is far to long to wait for the arrival of mass community transit. The planet cannot sustain the pollution we continue to spew. Thank you.
SNOHOMISH COUNTY	We are now 77 years old. Obviously none of this will be of value to us and other people over 70 because 1. it will not be available or 2. when it is becomes available, we will be too old to use it. We are being asked to pay significantly more in taxes than what we have already paid for and for something we will not even see or use in our lifetimes. Up to 25 years, not viable.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	The timeline of 25 years to complete light rail to Everett is an insult and is negligent. Boeing is the largest employer in the state, yet lightrail to Everett/Boeing is your least biggest priority? That makes absolutely no sense. At the very latest, light rail to Everett should be completed within 12 years. You promised us as much in the past, but now you are ignoring that promise. Light rail to Everett needs to happen yesterday. GET IT DONE!
SNOHOMISH COUNTY	Light rail to Everett needs to happen faster than the 25 year timeline currently proposed. It is critical for the future of Boeing, Paine Field, and the health and expansion of the Everett and supporting Snohomish County cities.
SNOHOMISH COUNTY	Minimum 25 additional years for light rail to reach Everett is unacceptable. PRIMARY, FUNDAMENTAL GOAL should be to connect Tacoma, Bellevue, Seattle and Everett via light rail FIRST. Complete the trunk before the branches, please. SnoCo taxpayers are fed up paying for decades of KingCo transit improvements. Don't mind paying the taxes if the benefits are relevant and tangible.
SNOHOMISH COUNTY	The Everett line should move to the front of project timelines to provide meaningful investment in the regional system. Regional means it moves people with in all the regions taking tax monies to support it. That being said, and light rail being the center price of this system should move people in the region from Everett to Tacoma!
SNOHOMISH COUNTY	The project time line is WAY too long and overdue. The project needs to be sped up! Also light rail needs to be extended from Redmond through Kirkland into Bothell and up to Mill Creek to more fully cover the east side corridor where there is more growth and residential communities where people actually live.
SNOHOMISH COUNTY	I understand why it will take 25 years to complete the light rail Everett branch. However, I think that we have so few options into Seattle at this point and we at least deserve to have the adjustment for buses to drive on the I-5 shoulder be pushed forward faster. That corridor will be so awful, it already is, having to wait 25 years for relief of all of that traffic.
SNOHOMISH COUNTY	The timelines proposed for the new light rail to Everett are completely out of line. This needs to be done MUCH sooner than 2042! Not only does the north end need this desperately, but Sound Transit long ago promised it would be in Everett earlier than that. A 2042 timeline will force my wife and I to vote against this proposal.
SNOHOMISH COUNTY	12-13 years ago I traveled around a few countries in Europe. Berlin in particular had an amazing combination of elevated trains, subways and bus service that allowed me to get anywhere in a reasonable amount of time and to this day I have never been anywhere that can compare. The fact that America in general and Seattle in particular is so far behind in Mass transit is a disgrace. I have used mass transit whenever possible and would go back to it again if the times/locations were even halfway useful. I STRONGLY support expanding mass transit, I have no problem paying the taxes to build it and continue to support it, paving the world for many lanes of cars every direction is NOT the answer. Streamline the whole process, buses feed to rail stations, rail is fast and only stopping at key points and add parking structures (space efficient over a large lot) for cars also at key locations. Also having multiple mass transit systems (Seattle Metro, Community transit, Everett Metro, etc) seems wasteful to me. Have one mass transit system to make the most use of the dollar and everyone (people, cities, counties) contribute to avoid unneeded overlap.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	<p>The Lynnwood/Everett light rail should be prioritized to be completed sooner than the proposed plan.</p> <p>Also, additional plans to improve traffic along the I-405 corridor between Lynnwood and Bellevue should be considered, including removal of the new express toll lanes that have only made traffic worse.</p>
SNOHOMISH COUNTY	WHY TOO LONG OF A TIMEFRAME TO GET THESE PROJECTS COMPLETED!!!!
SNOHOMISH COUNTY	Expanding light rail to Everett in 25 years is unacceptably too long. Everett has a regional manufacturing center (Boeing), a newer transit station downtown (it will be old in 25 years), a new Washington State University campus under construction, thousands of new residential units planned and a revived waterfront with housing that is under development. Quite frankly, it's insulting, Seattle-centric and, as planned, will not receive my Yes vote.
SNOHOMISH COUNTY	The commute from North Lynnwood to Downtown Seattle is horrible, even on the Express Buses. To leave development north until the end of the plan is short sighted. If the north end Sounder rail ran consistently, that would help. It is unreliable due to the mudslides, so most of the planning seems to cater toward those in the South End and Seattle, which has seen a lot of the improvements already. Sound Transit should modify its plan so that it helps serve those of us in the North End sooner and more evenly distribute how our dollars are being spent. To date I feel that we have funded improvements for many other areas and we in the North have been ignored. Thank you.
SNOHOMISH COUNTY	I am NOT opposed to what you are trying to achieve. I'm opposed to a 25 YEAR timeline for completion. Think of how the population of PNW has grown in the last 25 years - if this takes 25 years to complete we are not making greater Seattle area remotely future proof - by the time it's built we will need to completely rethink transit. Also as a South Snohomish resident, I'm very apposed to my family paying for 'improvements' that are going to take 25 years.
SNOHOMISH COUNTY	<p>Rail service was promised to Everett area back in the 1990s and it is still not there. I have been paying the RTA tax for years and haven't seen any benefit. I live miles from the nearest bus route. Sounded service from Everett is never reliable. The train starts too late in the morning for it to work. It does not run on the weekends or for special events on weekend.</p> <p>Waste of money and the money I've paid in cannot be account for . . .</p>
SNOHOMISH COUNTY	I think light rail should run approximately along I-5 first to Everett, and after that branch out east and west. I think people from east or west could make it to the main line running north and south with minimal effort and more people would be helped by extending north and south quicker.
SNOHOMISH COUNTY	Please put priority on commuting between major employment hubs around Seattle, to the East, and to the North, e.g. Everett-Boeing, Microsoft-Redmond, Downtown Seattle-Amazon, etc. Generally speaking, there's a lot less interest in living / commuting South of Seattle toward Tacoma.
SNOHOMISH COUNTY	Need to do the section to Everett sooner than 25 years

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	I was commuting between South Everett to the UW until two years ago. My husband and I rode the express bus most of the time. I am essentially retired now and my husband will be in two years. I sometimes take the 510/512 buses from Ash Way to downtown. Why is there nothing in the plan between South Everett, Northgate and Downtown? Right now, there is no connection between South Everett and Mill Creek to Northgate. It's all a moot point because we are planning to leave the state in two years.
SNOHOMISH COUNTY	Snohomish County drivers know how crowded I-5 between Everett and Seattle is getting, with commute times getting longer each year. Extending light rail to Everett must be done sooner than later, with the ROW process starting as soon as ST3 is passed. Construction should start as soon as possible, even as the extension to Lynnwood is being worked on. Until then, the expansion of ST Express Bus service between Snohomish County and Seattle must be done, with more frequent service needed. Expansion of express buses on I-405 between Snohomish County and Bellevue, including all-day service from Everett and more frequent weekend service, should also be implemented until the I-405 BRT service begins.
SNOHOMISH COUNTY	Get this project done as soon as possible.
SNOHOMISH COUNTY	25 years is far too long. I very much support light rail expansion, but it is taking way too long. We need this now. In addition, it would be better to build light rail on Highway 99 where there is already commercial waste land available for parking lots as well as the opportunity to build affordable housing that could be over commercial shops and services.
SNOHOMISH COUNTY	I understand why it will take 25 years to get the light rail up to Everett seeing as there will be some major construction involved. But I wish it could be available sooner.
SNOHOMISH COUNTY	Chances are, given your absurdly long timeline, and likely of massive delays, I'll be dead before any of this actually reaches completion .
SNOHOMISH COUNTY	The time line is ridiculously long! Why can not we possibly work north and south simultaneously!
SNOHOMISH COUNTY	The North end doesn't get any improvement in the near future.. The entire plan serves every direction except north until 25 years from now.. But you want me to start paying taxes now!!
SNOHOMISH COUNTY	Completing the spine has been and must continue to be the top priority. Timelines for getting to Everett and Tacoma must be shortened substantially (completion of Lynnwood-to- Everett via job center by 2033), and should be placed ahead of Ballard and West Seattle to earn my yes vote.
SNOHOMISH COUNTY	Very happy light rail is getting focus, buses will not solve our long term problems.
SNOHOMISH COUNTY	Everett cannot be delayed as proposed. That simple. Thanks.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

<p>SNOHOMISH COUNTY</p>	<p>25 years? Come on.                  The whole system, all the light rail lines proposed, etc. should be able to be done in 8. 10 at the most. There are millions of Americans out of work. The labor is available to do the work. Why the molasses-slow process? We're already suffering with gridlock and not being able to get anywhere. Rip off the bandaid QUICK and get some light rail lines built to the north end NOW. The techies can all work from home for a year.</p> <p>How is it that EVERY other major metropolitan area managed to get functional, widespread and efficient train systems in place, with far less technology etc. than we have today, in a much quicker space of time? By 1890 many cities had functional, fast, efficient rail systems (el's and subways). Seattle acts like it is inventing the frickin' wheel and building the Great Wall of China with this big deal, 25-yr project. Bring in some planners from elsewhere who know how to get a train system going fast, efficient, and right. From Chicago, NY, Jersey, etc.</p> <p>Is Puget Sound government trying to punish Puget Sound residents for its not doing its own job, which is to plan and manage the necessary services for a functional society?                  If the population growth from the tech boom was not absorbable, then western WA should not have allowed and encouraged the planting of businesses such as the tech centers of South Lake Union, the Eastside, etc. here. These businesses have added hundreds of thousands of people to housing and traffic competition in the western WA puget sound area. It makes life MISERABLE for everyone. The techies get the best of it, because they can work from home at times and get the 6 figure salaries, so they are competing everyone else out of housing. Which means nontech, non-6 figure salary people whose jobs have to be done in person, have to move further out and spend even more time in traffic to get to jobs that can't be done by logging on to a screen at home. I get the feeling the state wanted the tech business but did not want to do anything to absorb the hundreds of thousands of people the businesses were going to bring in. Thus, from the early 90's when Seattle was called the "most liveable city" it has now become the LEAST liveable city due to atrocious traffic and monstrous housing cost. This is all due to NOT planning how to comfortably and humanely absorb the new populace coming in for tech jobs, and also, by not training locals for the tech industry. The whole population growth of Seattle could have been minimized if the kids of the population here could have been trained to do the tech jobs starting in grade school. Our school systems still aren't training tech workers either to the degree they need to be. Kids don't get any programming, etc. training in k-12 public schools. So the local Puget Sound population grows up not being trained in the high</p>
<p>SNOHOMISH COUNTY</p>	<p>The proposal is an abuse of the taxpayers in the Everett area of Snohomish County. It is inexcusable to tax us for decades yet not provide the core service. Sound Transit's people need to cleanse their minds of the Seattle-centric paradigm or, perhaps better it should be scrapped for a different approach that allows the regions to better leverage their tax dollars for what we need.</p>
<p>SNOHOMISH COUNTY</p>	<p>The current plan may be even more cost prohibitive by 2040. The plan should start immediately with an open RFQ and get the plan going.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	Traffic here is horrendous and the primary reason I don't go into the city to do business, that and parking, what ever can be done to support public transportation needs to be done. I would love to use public transportation regularly but it is not easy to follow. One of my main interests is transport to Sea-Tac. tourists and locals a like would love it if they could jump on a train to the airport. This would also resolve parking and other transit issues at the airport.
SNOHOMISH COUNTY	I would like to see the light rail system come north of Seattle sooner. I live in Edmonds and work downtown Seattle. I would prefer to take mass transit to work but because I work odd hours taking the bus is not a good option. Also, I would take the light rail to the airport every time I had to fly.
SNOHOMISH COUNTY	I would rather pay more to cut the timeline in half. The projects I care most about are 17-25 years off. I'll be paying for the projects over the next two decades and will be ready to retire before the access would do anything to help my commute.
SNOHOMISH COUNTY	All I can say is that I would LOVE for this to be completed as soon as possible :)
SNOHOMISH COUNTY	We have Been Paying for Light Rail to Everett for years, with the promise of an early time frame, and now it is being delayed, this is unacceptable. We should not be paying for a project that won't be completed for another 25 years!
SNOHOMISH COUNTY	Light Rail to Everett needs to be sooner and higher priority!!!
SNOHOMISH COUNTY	Suggest the projects start in several locations to speed up the completion in multiple areas. Starting at one end working your way to the end seems to be a waste of time.
SNOHOMISH COUNTY	I think light rail northward should have priority. Public transportation from Everett to Seattle and to Bellevue is very weak and traffic is getting worse by the month. I would put the northward light rail projects ahead of everything else.
SNOHOMISH COUNTY	Light rail needs to come to Everett ASAP
SNOHOMISH COUNTY	Completion takes a long time, but it is important to start as soon as possible as the population in the Seattle metropolitan areas keep increasing. There is a dire need for these modes of transportation (which should have been foreseen and planned long ago). Costs of the ST3 project is immense and efforts to keep this cost lower through distribution is advised. Thank you for taking consideration of these projects and beginning to implement them!
SNOHOMISH COUNTY	Everett to Seattle corridor (Boeing) should be bumped up if this remains a large employer (also the Everett Navy Home Port)
SNOHOMISH COUNTY	Would like to see buses on shoulders happen quicker. Seeing a quicker commute might encourage more drivers to take public transit before the light rail is finished.
SNOHOMISH COUNTY	Light rail to everett needs to happen earlier. The development in Everett is happening quickly and if light rail routes are planned then housing and services can be developed along the route. Look at Portland for guidance

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	We have an ever growing population in our area. I am happy to hear about the proposed areas of expansion and believe they will make a big difference. However, I am very disappointed that it will take 25 yrs to get these projects completed. We need these changes yesterday! Anything that can be done to expedite these changes the better! Also, with the expansion of the light rail please, please, please, consider adding appropriate amounts of parking to go with it. It is a waste of resources and will not be used to it's greatest potential if you do not provide parking for the commuters that want to use them.
SNOHOMISH COUNTY	The major issue is the timeline of this project! Yes it takes money to complete these projects but waiting 25 years for light rail to reach Everett or any of these projects is too long! Its not fixing the issue that people have NOW but fixing for generations to come - which has created the mess we have now as transit should have been a priority generations ago! So yes I support the ST3 project only if the timeline is shortened at least by a decade! Or it adds solutions that will help commuters now (as I spend nearly 4 hours a day commuting from Everett to Seattle)! <ul style="list-style-type: none"> <li>- Add more Sounder trains including reverse routes.</li> <li>- Stop the cities from allowing new buildings and businesses with tax breaks and have these big businesses help pay for the projects so completion happens sooner!</li> <li>- Charge employers for the number of commuters they have - many of the "tech" jobs don't need to have people drive into an office - force them to help fix the problem with creative schedules, remote work sites - open offices in Everett or Federal Way?!, and work from home.</li> </ul> <p>Add don't wait to finish the currently funded projects to start the new! Look at the original BART system - it took ONLY 10 YEARS to build!</p>
SNOHOMISH COUNTY	I would like to see a much shorter completion date to light rail projects for Everett.
SNOHOMISH COUNTY	If I could change 1 thing about the plan, it would be to prioritize light rail to Everett. 25 years is a long time to wait for something so transformative.
SNOHOMISH COUNTY	25 years to provide service to Paine Field?! It is 25 years overdue at this time and should have been a requirement for Boeing expansions. In the 1970's WVU and Boeing computing engineering designed and built a driverless, on-demand Personal Rapid Transit system to serve the University, Medical Center, Downtown, and Suburban hubs...it is still in operation today. Everett Paine Field service should be a priority.
SNOHOMISH COUNTY	Light Rail north of Lynnwood to Everett should not take 25 years!!! It needs to be moved up in the priority
SNOHOMISH COUNTY	Lightrail to Everett in 25 years is unacceptable
SNOHOMISH COUNTY	Projects need to be completed sooner
SNOHOMISH COUNTY	Downtown to Ballard needs to be prioritized.
SNOHOMISH COUNTY	Should finished the project ASAP since the traffic in Seattle greater area is getting worse

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	Everett needs to be a priority for light rail the sounder train is a waste of time its blocked many times and doesn't have any station in north Seattle so you have to go past all your destinations to the south - see how much more successful the sounder from the south is because it has south stations. You must prioritize the I-5 north connection - go to Paine field and then east along SR-526 then north along Broadway or I-5 to Everett - it must happen as soon as possible the north end has gotten the short end of the transit stick too long- expand ST area to include Marysville and Lake Stevens as they will be the ones using it and it will bring in more money to prioritize the north station- I only votes for ST1 and 2 because there was a promise to priorities Everett
SNOHOMISH COUNTY	Because of Boeing in Everett it seems that rail line should be given highest priority versus last to be built.
SNOHOMISH COUNTY	A majority of people who live in the Redmond/Issaquah area are from wealthy backgrounds and live close to their jobs. The people in the Everett and Lynnwood areas come from poorer backgrounds and rely on affordable commuting to get to jobs in the Seattle/Bellevue area because we do not have as many opportunities where we live. We have also paid for light rail services for over 15 years and has still not reached Snohomish county. Why should we pay these taxes if we will not see the effects for ourselves? If we are going to be taxed, put the cities in Snohomish county as a priority. If Redmond/Issaquah is going to be prioritized, I strongly oppose us being taxed because we have already given plenty.
SNOHOMISH COUNTY	There's no reason this project shouldn't cost about half what you're asking and take less than half the time you're suggesting 25 years is just too long
SNOHOMISH COUNTY	<p>25 YEARS IS TOO LONG</p> <p>I am a fan of mass transit and have always voted for it in the past.</p> <p>I will vote against Sound Transit 3 if you have 25 year delivery times.</p> <p>You stated in Project Timeline FAQs on your web sight that "a 25 year package is necessary for the afordability of all projects,with some projects coming toward the end." I would be willing to pay more taxes to get a more acceptable delivery time.</p> <p>Please plan the quicker alternative in Everett. Make the route along I5 with a bus rapid transit loop serving Paine Field.</p> <p>Please go back to the drawing board and do everything you can to improve delivery times</p>
SNOHOMISH COUNTY	Objects connecting Tacoma and Everett are priority north to south along the I-5 corridor. Locate should be emphasized on this light rail system in conjunction with rapid Transit buses to get to Rail stations quickly.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	The Ballard route through SLU should have a higher priority as there are no convenient options for people traveling from outside of seattle into SLU area, whether from Bellevue or Lynnwood, all transit goes to downtown and not to Eastlake or SLU area.
SNOHOMISH COUNTY	Would prefer to see the service to Everett in the earlier stages of the plan instead of at the end.
SNOHOMISH COUNTY	Everett light rail asap!!!!
SNOHOMISH COUNTY	Rapid transit is too expensive and very slow to come online. Focus on rapid ride or just more busses. They are way cheaper and can start running immediately. Traffic is at a standstill already. We cannot wait 25 years to solve the traffic mess we have already.
SNOHOMISH COUNTY	Light rail has to be accelerated even at higher costs. Build sections of the spine in parallel rather than linearly. The timeline laid out isn't remotely acceptable and will only drive higher costs in the out years.
SNOHOMISH COUNTY	I am not supportive of paying extra taxes for 25 years before being able to take advantage of the improvements in Everett. Most of my family travels in Everett and to Lynnwood and would not benefit from the other projects that are completed earlier. I would be very supportive if the LRT expansion around the SW Everett Industrial center was completed or operational much sooner.
SNOHOMISH COUNTY	Everett can't wait until 2041! We need the light rail now.
SNOHOMISH COUNTY	Please build Everett to Seattle line faster.
SNOHOMISH COUNTY	Given the timeframe I doubt that the service will extend to Everett ever. I've been through the this with BART and the last planned extensions were dropped due to cost, and other projects serving more affluent areas were pushed ahead. We never received the service promised. In addition, I see nothing in this plan that actually shortens my current commute. Based on the proposed bus route along the 522 my commute would actually lengthen and not improve due to transfer time Almost no improvements to parking are outlined which is a serious flaw to the bus rote plans. As is, it takes Less time to drive than it takes to ride the bus to work
SNOHOMISH COUNTY	Sound transit can't even seem to build a parking lot. Not sure I'd trust them with such a large tax increase.
SNOHOMISH COUNTY	Everett, NOW! We've been paying for this from the beginning, and were the last to get it?? I don't think so. My vote is not just no, but Hell No! How about get to Everett, and then worry about getting to Paine Field?
SNOHOMISH COUNTY	Needs to be done faster
SNOHOMISH COUNTY	Light rail to Everett should be of the highest priority. The Sounder rail is unable to support the demand. Lack of ridership due to mudslides and freight interference. Extremely long commutes and heavy traffic on the I-5 corridor. Light rail is a necessity in the north end.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	I believe the light rail extension to Everett should be much sooner than the proposed 25 years. There are over 50,000 workers at the Boeing Everett plant alone. For those that live north but work in Seattle, this is what is needed. Bus service takes far too long and there are too many accidents. A light rail is needed that can be independent from traffic congestion. This just makes sense for our environment too. Please reconsider the timeline for the light rail up to Everett. Thank you for your consideration.
SNOHOMISH COUNTY	All possible efforts must be made to implement these projects faster. Desperately need major infrastructure improvements NOW. We don't have 8 years, let alone 25 years to wait.
SNOHOMISH COUNTY	Snohomish county needs everything first, since they have been put on the back burner for decade's. We need LLR now. Not in 25 years. You people in King County don't crap about us.
SNOHOMISH COUNTY	I support anything that makes this happen - and makes it happen faster.
SNOHOMISH COUNTY	Speed up this process!! Although I work from home, when I do go out, the congestion is ridiculous. We need these improvements NOW. To stretch the completion 25 years from now is just plain stupid. Planners and committees need to work with urgency!
SNOHOMISH COUNTY	Light rail and sufficient service to Everett as the county seat and major manufacturing location of Snohomish County is part of the original spine. ST Express and unreliable (mudslides, minimal (4 trains/day, uni-directional) Sounder service to Everett are not sufficient, particularly in light of proposals (Ballard, West Seattle) that were NOT part of original 1996 ST plans. Light rail to Everett by 2041 is an abomination. Waiting 25 years to get to Everett is unacceptable. The greatest job growth in the region is projected to be in Snohomish County, and something needs to service users in a one-seat, one-ride system if it will be used in sufficient numbers to justify the cost AND the wait you currently project. I, my family, and my friends will NOT vote for ST 3 as proposed.
SNOHOMISH COUNTY	Light rail to Everett must happen sooner. I like the plan put forth by Snohomish County Sound Transit board members
SNOHOMISH COUNTY	I believe that 25 years to reach Everett is too long. Additionally, I believe there should be plans to include more parking at the transit/train stations.
SNOHOMISH COUNTY	Waiting 25 more years for light rail to Everett is unfair. It's already been 20 years, traffic is gridlocked daily, it's frustrating. If developing bus rapid transit is more economical and more flexible, lets expand that. But I really like, and occasionally use, light rail ( I'm retired), and would like to see it arrive in Everett while I'm still alive.
SNOHOMISH COUNTY	The time line to improve service to the North end, especially, Everett is too long. I am very much in support of improving public transportation but 25 years to get light rail to Everett makes me very disappointed. I commute via the train almost daily during the work week. We have been very pleased that we have been able to ride the train to more Sounders game this year than ever before. Just imagine how many more people would use public transportation if we had daily light rail (or even) train service. I am strongly in support of improving north end service in a timely manner.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	You've already taxed Snohomish County residents for 25 years. Enough is enough. And your \$200 per year statement is BS. The average home/car owners will pay about \$1000 per couple to build light rail at \$500,000,000 per mile.
SNOHOMISH COUNTY	<p>The Paine Field alignment would add nearly 10 years to the schedule for delivery of light rail to Everett. Once constructed, the detour would add 13 minutes to a trip from Everett to Seattle (and add fifty cents to the distance-based passenger fare). Further, the sprawling nature of the manufacturing center the Paine Field detour attempts to serve has so many "last mile" problems that most employees will continue driving to work, with or without light rail.</p> <p>A better alternative for Everett</p> <p>Build a direct rail alignment with a junction for later rail expansion to Paine Field. This is a similar setup to both the Oakland and San Francisco airports, which have 3 and 14 times, respectively, the air traffic that is anticipated at Paine Field.</p> <p>Serve the Boeing Industrial Center with a robust BRT connection integrated into Community Transit's popular Swift network, including Swift II, which is scheduled to begin serving Paine Field in 2018. Since the Boeing Industrial Center is so vast and dispersed, a combination of BRT routes would serve it better than a single rail stop. While the precise alignments require further study, BRT could allow new connections from downtown Mukilteo's ferry dock and Sounder Station, through Paine Field, to the light rail "spine."</p> <p>This option would:</p> <ul style="list-style-type: none"> <li>Reach Everett up to 8 years before an alignment with a Paine Field detour;</li> <li>Reduce the length of trips to Everett by 7-13 minutes, while providing better service to dense South Everett destinations that will increase light rail ridership;</li> <li>Serve more areas of the Boeing Industrial Center than the Paine Field detour would allow; and</li> <li>Allow future extensions of light rail to Paine Field if and when commercial air service increases in the future</li> </ul>
SNOHOMISH COUNTY	25 years is way too long for Everett to wait for light rail, if you expect local taxpayers to get behind this. We need to move people here in Snohomish county, and we need to move beyond carbon. Slow, incremental change simply isn't equal to the task before us. We have a climate emergency and I think it's high time we acted like it by cutting that timetable in half.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	As one of the many people that has to commute from Everett to downtown Seattle, I have seen the traffic get exponentially worse in just the past 4 years. I believe that these projects should be expedited considering the projected amounts of people that are expected to move to Seattle. These people will most likely have to move to the outskirts of Seattle due to increased cost of living. Therefore, opportunities for reliable and quick public transportation to and from major cities north, east, west, and south of Seattle should be a major priority.
SNOHOMISH COUNTY	Make light rail connection to Everett a priority. The current schedule is unacceptable.
SNOHOMISH COUNTY	The timeline for light rail to Everett should be accelerated. The traffic is terrible:( The buses are full:( The nonmotorized options are limited:( 25 more years is a long time to wait, to pay & to see no improvements.
SNOHOMISH COUNTY	I have lived in the same North Edmonds home for over 40 years, commuting to downtown core of Seattle to work for all of that time. For over half of that span I have been paying for promised "rapid transit" systems through my "enhanced" property, sales and vehicle taxes. Result? No rapid transit. I am too old to pay more taxes and wait another 25 years to see if there will ever be such a system in the Central Puget Sound. I will actively campaign against such a proposal.
SNOHOMISH COUNTY	7 years and 25 years is government [explicit]. Pull your heads out and get it done in 18 months, then I will support you. If third world countries can build entire cities in months you can build a train system! My brothers battalion of men built an entire highway system in months seriously get your [explicit] together, stop wasting MY money and build!
SNOHOMISH COUNTY	As a tax payer I am concerned without completion of the spine to Everett, that funding/voters from king county will decide against the taxes. Thus it wont be complete. The timeline is outrageous as a taxpayer. And a citizen in Everett, without completing the spine it does not address the traffic from Boeing from 128th to north which is high volume at 3 pm and because of that I will probably vote NO!
SNOHOMISH COUNTY	The Everett (Boeing) site should be pushed to priority one in the overall plan. There are about 33,000 employees at the Boeing Everett site each day, each employee pays taxes and spends large sums of money in the immediate and surrounding vicinity. It is unacceptable to push infrastructure development out by 25 years. Improvements should have started years ago!!!
SNOHOMISH COUNTY	I will not support paying higher taxes for a project that will take 25 years. The timeline needs to be shortened for me to support the measures.
SNOHOMISH COUNTY	I live in Lynnwood and want the ashway park and ride service there much sooner AND Everett wanting their service much sooner should force the issue as I figure.... Please consider adding Ashway to the 2023 timeline... This Would Gain the build momentum towards Everett the goal should be to show Everett that you feel their angst at having to wait AND your speeding it up NOW... make people happy .. Then THEY WOULD VOTE FOR IT !!!! ALSO REMEMBER: the carbon tax i732 will be voted down by everyong waiting forever for AN ALTERNATIVE....

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	While completing the easy projects (BRT, etc) first makes sense from a financial perspective, I strongly urge Sound Transit to accelerate the timeline for the Ballard Link extension. Of all the projects, this one seems to have the biggest impact on the largest number of people and would drastically improve ridership across the entire Link system.
SNOHOMISH COUNTY	By the time these projects are complete, regardless of which options are selected, population growth will have negated any traffic benefits. No matter what you do, traffic will only get worse. To get any real benefit for people, a much more massive effort should be undertaken. Build the entire light rail system over the next ten years. I'd be willing to pay 5 times as much as this plan calls for to make this happen. You can't do it all. You can't improve bus transit, improve transit parking, and 50 other objectives at the same time as building light rail. You need to focus resources on the most important strategic objectives. Unfortunately, Sound Transit is run by a committee which means too many stake holders, and no real focus. If Sound Transit was honest with itself and us, it would admit that it has produced very close to zero improvement by any measure of what its goals are. I'll be dead by the time the plan is finished, and the current dail gridlock on the roads will certainly get worse. So, I'm opposed to this plan and all its options because overall it is far too little and will arrive far too late.
SNOHOMISH COUNTY	These timelines are all very long. I live in Everett and I'm 30 years old. By the time the light rail reaches Everett (in 25 years), I will be close to retiring (~10 years left?). I don't mind spending \$200 per year on these projects, but why can't the timelines be speed up? The RATE at which our transportation problems in the Pudget Sound are getting worse is MUCH GREATER than the rate at which we are trying to fix them and come up with alternatives.
SNOHOMISH COUNTY	The time frame for North of Seattle support is extremely unacceptable. We do not have a consistent run for Sounder Train and buses are hampered by traffic to and from Seattle. Having another alternative would be very helpful for the region but the proposed time frames would mean that this would only benefit the younger generations. It is asked that we fund a system that the future will benefit from but what about the those of us in need of alternatives now? How would you feel if you were asked to pay for something that will be of little to no use to you because you have already retired and have no need to commute daily? Its infuriating. This would be an easier pill to swallow if we had better options in the north end. We have limited Sounder rail runs and for my families needs we have to drive to Lynnwood to access the buses so we can arrive on time to our offices. I would consider the limited bus runs in Mukilteo, walking distance to the stops, but they never allow for me to arrive on time to my office. I am left with driving to Lynnwood. Meaning a car still on the road.
SNOHOMISH COUNTY	Everett needs to be completed before 25 years!!!!!!!!!!!!!! I think to have the light rail go straight up I5 with improved and constant bus to Paine Field and Boeing would be a helpful and quicker resolution. this would replace the more time restraining route of going west toward Boeing.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	Light rail project to Everett should be moved up on the priority list. While the Sounder runs from Everett to Seattle, its service is often cancelled, and thus VERY unreliable.  Also we need LOTS more parking to enable more people to use mass transit. Currently unless I leave my house by 6 am I cannot find parking at my local Park & Ride!
SNOHOMISH COUNTY	Projects that help traffic on I-5, like Everett, should have a higher priority than projects like West Seattle, or Ballard which are already serviced by intercity bus routes.
SNOHOMISH COUNTY	Living on the north end and wanting to move further north for cheaper housing is problematic when you have to commute to a job in Seattle. Traffic is horrible and it would be nice if the light rail to Everett was built sooner than 25 years. I might be retired by then :)
SNOHOMISH COUNTY	I HAVE LOST ALL HOPE FOR THIS TIME CONSUMING MONEY SPONGING PROJECT! As a life long resident of Snohomish Co., I have been paying for NOTHING for years and I won't support expansion of any sort. I am now retired and would never use this wasteful system. Everyone in WA laughed at OR when they put their system in 20? Years ago. We are still fiddle farting around with this thing wasting billions of our money. Just like all political projects. WHAT A JOKE!!
SNOHOMISH COUNTY	1.) Build the LRT spine to Everett via Paine Field and to Tacoma FIRST 2.) Get rid of "early starts" that rob capital program dollars from building the rail spine 3.) High risk, expensive "Christmas tree ornament" Ballard project should be removed or be dead last, and W. Seattle second to last.
SNOHOMISH COUNTY	The schedule needs to be moved up. We must remove traffic from congested freeways and utilize light rail and expanded bus transit ASAP!
SNOHOMISH COUNTY	Why so long to reach Everett ? A lot of folks here now, aren't going to be by the time this route is ever completed !
SNOHOMISH COUNTY	Get light rail to the major employment hubs ASAP. Taking 25 years to get transit to Boeing Everett is unacceptable. Build the spine of the system first. Then the feeder systems.
SNOHOMISH COUNTY	I'll be dead by the time any rail project is completed to Everett where I live, but build it for future generations. Why was the Northwest Traction Company, the R/W used for Electric Transmissions, ever discontinued? It Parallels I-5 and predates interstate construction.
SNOHOMISH COUNTY	25 years to complete surface trams (light rail) is embarrassing. If Sound Transit can not complete projects faster than that some other agency needs to step in and do it.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	Light rail should be delivered to Everett much sooner and should be built before Ballard and West Seattle. Why? Because Everett serves a large city and region; Ballard and West Seattle serves smaller neighborhoods. Everett and Snohomish County have limited public transportation; Ballard has excellent bus service. Everett was in the original Sound Transit plan; Ballard wasn't. Everett is a crucial part of the spine of Sound Transit; Ballard is a feeder line to the spine; Everett is a very long car commute to downtown Seattle; Ballard is short commute. The Everett route would be relatively easy to construct; The Ballard route would require an expensive, difficult tunnel.
SNOHOMISH COUNTY	I am a resident of Everett, and member of the city's planning commission. I do not agree with the timeline of getting light rail to Everett by 2041, that is not acceptable. I understand that you have constraints placed upon you but many can be over come to create a more reasonable timeline for light rail in Everett. Please, and I want to emphasize this as passionately and professionally as I can, make the light rail spine a priority.  Thank you.
SNOHOMISH COUNTY	I propose a four-pronged approach so all areas will be simultaneously improved. We began part of the project in the North Sound area (Lynnwood-Everett) part in the South Sound area (Tacoma-Seattle), East to West (Issaquah-Ballard) and West to East (West Seattle-Downtown Seattle). We fill in the center as we go as well. The plan will take 25yrs but we are 25yrs late in making it happen.
SNOHOMISH COUNTY	Light rail should be delivered to Everett much sooner than 25 years and should be built before light rail to Ballard and West Seattle. Why? Because Everett serves a large city and region; Ballard and West Seattle serve smaller neighborhoods. Everett and Snohomish County have limited public transportation; Ballard has excellent bus service. Everett was in the original Sound Transit plan; Ballard wasn't. Everett is a crucial part of the spine of Sound Transit; Ballard is a feeder line; Everett is a very long car commute to downtown Seattle; Ballard is short commute. The Everett route would be relatively easy to construct; the Ballard route would require an expensive, difficult tunnel.
SNOHOMISH COUNTY	Light rail to Everett MUST be sooner than 2041. I'm willing to pay more money. The traffic on I5 is impossible and I cannot imagine what it will be like in 10 years let alone 20.
SNOHOMISH COUNTY	Why can't Sound Transit compete these projects on a faster timeline? Mass transit connecting all parts of Puget Sound should be in place and running TODAY, not 25 years from now.
SNOHOMISH COUNTY	The commute to downtown Seattle from the north has become more and more difficult over the past several years. I don't believe that enough resources are being allocated to the northern tier of commuters or the east side. I would happily leave my car at home if there was a light rail option from the north to South Lake Union.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	<p>First, I'm disappointed that the Everett link - which was sold as part of the initial spine is 25 years away. Why is Snohomish County getting the short end of the stick?! Besides the fact that Sounder service is spotty - we need light rail!</p> <p>Second, there is TOO much in this package and it is TOO expensive. Even though I don't use transit (not because I don't want to but because it's not a good option for me), I'm a supporter of transit and have voted for past measures. I want ST service to expand but PLEASE cut back this package (and make Everett the priority)! At this scope and timeline, I won't vote yes.</p>
SNOHOMISH COUNTY	Speed this up. Transit capacity needed more quickly than 25 years. This will be far behind regional growth and highways won't be expanded
SNOHOMISH COUNTY	Speed up timeline
SNOHOMISH COUNTY	A project scheduled for completion in 8 to 25 years is a waste of tax payer resources. 25 years from this date the needs of the region will be significantly different than they are now making all the planning, money, and time worthless since the plan would have to be redone or millions of dollars spent in constant revision to the plan. Of course, at age 70, I am likely to be dead before anything is built.
SNOHOMISH COUNTY	I will be dead by the time many of these plans come to pass!It seems it could be done faster--
SNOHOMISH COUNTY	25 years is too long to wait for light rail service to Everett and DuPont. It should have been put in 25 years ago!
SNOHOMISH COUNTY	Everett's timeline is WAY to long the city lacks transit options. Other cities have more options for transportation
SNOHOMISH COUNTY	Connections to north to Everett and south to the existing Tacoma line should be timeline priorities. A strong north-south trunk line would connect larger population centers with short bus or uber rides from stations to neighborhoods. A north-south line along the east side should also be considered for future proposals, possibly an eventual loop from Everett-Snohomish-Redmond-Bellevue-Renton-Kent connecting to the I-5(ish) north-south line on each end. How spur lines to West Seattle and Ballard are 8 and 3 years ahead of Everett is beyond me.
SNOHOMISH COUNTY	True to form our government projects are 20-40 years behind time. And projects should be completed a lot sooner. Like in half the time. We get tied up in politics, beurocracy and poor bid process' that end up in delays costing double the original projections. Look at the Viaduct project. We lack true leadership in the transportation sector.
SNOHOMISH COUNTY	25 years from Everett for light rail? That is ridiculous. It take up to 120 minutes to drive 18 miles to Seattle from Everett right now. You expect people to stay in Seattle and do that commute? We need more buses NOW.
SNOHOMISH COUNTY	The complete lack of north-side transit projects is a major shortcoming in this draft proposal. There is woefully insufficient transit along the 405 corridor from Lynnwood to Bellevue, further compounding the horribly implemented 405 toll system. Transit between Everett and Seattle suffers as well despite the massive employers in Everett.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	<p>Light rail between Seattle and Everett is needed BEFORE light rail to Ballard and West Seattle! There are already MANY public transit options in both those location where as there are very few available to the north. It is CLEAR by the congestion between Everett and Seattle during rush hours. People are eager for more transit option in the north end as evidenced by how full park and ride lots are. It was also "promised" to get here well before 2041.</p> <p>Also, is there a way to consolidate Metro, Community Transit and Sound Transit to increase efficiency, decrease overlapping routes and using tax payer funds more effectively? It seems silly for people to pay taxes for all three, all three to have extensive overhead and then to see all three going to the same places.</p>
SNOHOMISH COUNTY	<p>I'm stunned at the cost and timeline for Everett light rail. I am at the beginning of my career and would not see any benefit until the end. I love rail and have used it in other states where I have lived -- but with transportation technologies rapidly changing, it seems silly to spend this amount on the very expensive infrastructure for rail. I'd rather see something smart and innovative like BRT with dedicated right-of-way, perhaps where the lightrail is proposed to run.</p>
SNOHOMISH COUNTY	<p>In Europe, taking transit is faster than using a car. Right now, it takes less time to drive from Woodinville to the Everett Marina and back than it does to go one way via transit. This we only use transit when we having timing issues that leave someone hanging.</p>
SNOHOMISH COUNTY	<p>I would really enjoy using a Light Rail train from Everett to Seattle, however, I am 55 years old and in 25 years, I will have paid \$5000 and I will be 80 years old. I probably will never get to use this service. The timeline is just too far out. How can it take 25 more years to build a line from here to there!??</p>
SNOHOMISH COUNTY	<p>Traffic on 1-5 from Seattle to Everett is getting consistently worse and worse and drive times are ridiculously high. We needed a light rail system years ago. Are there any incentives in place to speed up the construction of the light rail between UW and Lynnwood?</p>
SNOHOMISH COUNTY	<p>Wish it could all happen faster.</p>
SNOHOMISH COUNTY	<p>I am not going to vote for an ST3 package that has projects ending thirty years from now. Big deal more busses on the roads in either years (???). And thirty years until there is convenient light rail in Snohomish county. The new bus routes and light rail will be obsolete by the time they are completed (if they are even completed). London is building four times the track in a quarter of the time. So we know that amount of work can get done in much shorter amount of time. Eight years to add more busses and thirty years to complete light rail? Really? You guys can do better.</p>
SNOHOMISH COUNTY	<p>Complete the Light rail from Lynnwood to Everett in 25 years is too long. I strongly support SW Everett Industrial Center station along Everett Light Rail line and having more parking at each station.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	I believe the extension of the light rail to the Everett area will be key to keeping jobs provided by the Boeing Company in the area as it will reduce congestion and increase productivity, lifestyle and happiness of all the employees of not only Boeing, but all of the other companies in the area. It will also allow people in the northern area to use the light rail as a method to reach SEATAC International Airport without having to commute much, if at all, thereby reducing I5 and I405 congestion and increasing the likelihood to increase tourism in the Puget Sound area by making all the touristic attractions more accessible and less undesirable due to vacation time lost in traffic.
SNOHOMISH COUNTY	I strongly believe that we need a well connected and well functioning transit system in the region, and all of the projects look good to me. I am just concerned with the timeline. Although I realize that we cannot get what we want instantly and must suppress the instant gratification of getting things right now because it takes time to facilitate such a massive-scaled project, a 25 year wait is a very long time. I know that we are setting this up for the younger generations and our children to have a great system at their disposal, but I would like to see the project completed sooner so that we can enjoy the transit earlier. And most importantly we NEED this done as soon as possible so that it helps relieve our stressed roadways and freeways, which will become more and more apparent as this city continues to grow. But nevertheless you have my support.
SNOHOMISH COUNTY	The schedule completion for light rail between Lynnwood to Everett is way too long. Sound Transit must find a way to reduce the 25 year time frame and build this section in the 12 year period (similar to Redmond and Federal Way). How can Sound Transit justify building light rail to Redmond, Federal Way, Ballard, West Seattle before the Everett section? This appears to be a political decision forced by King County politicians that will result in Snohomish County residents not supporting ST3.
SNOHOMISH COUNTY	Must go FASTER. The city is growing too fast and this plan is not aggressive enough. 25 years to get light rail to Everett will be a noose around the neck of our economy.
SNOHOMISH COUNTY	Leaving the Everett extensions until the end of the project when the other mass transit access from the north is limited is ridiculous. Everett should be a priority and especially when residents from Snohomish will be paying the same as the residents of Pierce and King counties.
SNOHOMISH COUNTY	What the [explicit] are you thinking??? 25 years for light rail to come to one of this states most valuable manufacturing facilities - Boeing? Are you [explicit] nuts??? Whose payroll are you on? Who bought you out? You on the take?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	<p>I am very strongly supportive of the ST3 projects, but I strongly oppose the sequence and prioritization. Sound Transit has always been plagued by a model that overserves and prioritizes Seattle, Bellevue and the associated 'new economy' employment centers, while delaying and denying service to the manufacturing hubs (Everett, Renton) of the region. Gary Locke called ST1 "pay as you go," but as a Snohomish Country resident at that time, I saw it as "We pay, you go," since it taxed us all but rewarded Seattleites first.</p> <p>ST3's proposed plan ignores the incredible value and job creation of the region's manufacturing hubs - how can the absolute, unquestioned largest American exporter be the last served in a transit plan? And, by ignoring dense travel on the Renton - Lynnwood - Everett/Paine corridor, further penalizes commuting and supply chain travel on the same routes.</p> <p>Meanwhile, if one works for Microsoft, or Google, or Amazon - ST2 and ST3 are fantastic - and yet, these companies' contributions to overall state employment and especially domestic and export sales pale in comparison to that of Boeing, not to mention the trickle-down effect of the massive supply base Boeing comprises in Washington.</p> <p>I'm all in favor of bringing Puget Sound Transit options forward. I even think ST1, 2, and 3 don't go far enough, and would support higher taxes to get shorter project timelines. However, I have a very hard time abiding ST's proposed timing and priority of projects - the manufacturing hubs of the region need priority - infotech employees are more apt to telecommute anyway - there's no technology that will allow someone who performs the vital function of creating value by manufacturing something to simply phone in their day's work - tacking a four hour commute onto an eight to ten hour day of doing that will further disadvantage Washington as a manufacturing center, and will help bid adieu to the real pride of Washington - Boeing Commercial Jet production.</p>
SNOHOMISH COUNTY	<p>The extension from Lynnwood to Everett should be prioritized so it is built much earlier; this is an important link to an important commercial area that supports thousands in this region, not to mention the world. We cannot afford to place this extension at the back of the line! Their presence in our community has been too tenuous in the past to jeopardize its future here.</p>
SNOHOMISH COUNTY	<p>Let's do this right. Let's do this right now.</p>
SNOHOMISH COUNTY	<p>The I-5 and 405 corridors should be the priority for moving people via transit. Housing costs are driving people who work in Seattle to move to areas outside the city, which is only worsening traffic on our freeways - which also need to have capacity to move freight and goods, other buses, etc. Ballard and West Seattle are already close in, and have bus access that is reliable, and should not be prioritized over projects which will have a huge impact for the entire region. 25 years to bring light rail north to Everett, and 17 years to get to Tacoma, are serious miscalculations and must be sped up.</p>
SNOHOMISH COUNTY	<p>Most of these project focus on service in the vicinity of downtown Seattle and southward. Improved service to south Snohomish County, and as far north as Everett, appear to be only afterthoughts.</p>
SNOHOMISH COUNTY	<p>Needs to be much sooner than 25 years!!!!</p>
SNOHOMISH COUNTY	<p>The main focus of the projects should extend from Seattle to Tacoma and Everett, first and then spread from there.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	None of this should take 25 years. The engineering is well established. Do it all at once. Lynnwood to Everett is 11 miles. 25 years is ridiculous. This need is 25
SNOHOMISH COUNTY	Complete the spine first. Spurs can be added, but not until after the spine is completed.
SNOHOMISH COUNTY	The project timeline seems to be extended out too long; short term plans are not enough to deal with the current problems faced by daily commuters. Our household would use the transit system if it reached our home area and are greatly interested in an increased timeline for these services, even if it were to add additional annual taxes.
SNOHOMISH COUNTY	The timelines are absurd. 25 years before we have a comprehensive system in place. I'll have given up and moved out of this city by then.
SNOHOMISH COUNTY	Projects should be accelerated both up north as Paine Field adds commercial flights and elsewhere. The current schedule is so slow that earthquakes could change the geography by its completion.
SNOHOMISH COUNTY	I believe that the projected completion date for the light rail to Everett should be moved up. Everett is a growing community that is home to many Boeing, military and other local business families. With the addition of the WSU campus in Everett and expansion of University Center, it seems as if light rail to this area should be more of priority. Driving I-5 from Everett to Bothell and Edmonds every morning (my and my husband's morning commute), as well as my husband's late afternoon commute North on I-5 from Bothell has gotten longer over the past two years. Light rail would expand commute options and hopefully decrease drive times for those who continue to commute by auto. Reconsideration of the completion date for this portion of the project would be greatly appreciated. Warmly, [name]
SNOHOMISH COUNTY	Raise my taxes for light rail!!! This is long overdue. The roads are insane. My time is worth the amount to get this done. It needs to be done YESTERDAY. I will be dead and buried and never get to use the light rail. I won't use buses and they seem underutilized in many respects and still clog the roads. GET LIGHT RAIL NOW!. Almost everyone I know would be happy to pay more taxes for it. My daughters use it regularly to the airport from downtown...and look how popular the UW extension is already! Also, I am in favor of the NB light rail going up I-5 and not to Paine Field if it gets it done sooner.
SNOHOMISH COUNTY	Thank you for all your hard work. this project will help us all but more importantly add need support to our communities.
SNOHOMISH COUNTY	finishing everett to seattle and continuing on the southern end to create full north south should be of the highest priority with east west circulators to serve the adjoining areas
SNOHOMISH COUNTY	Link Light Rail to Everett needs to be sped up. Putting it on a schedule that pushes it out so far is ridiculous. When I first moved here in 1999, Light Rail was planned to be in Lynnwood by 2005. The time line plans are crazy. You need to refocus your priorities and get the timelines moved up a lot!
SNOHOMISH COUNTY	Your completion date goals are wholly unrealistic. In 8 or 12 or more years, what you have on the drawing board will likely be massively insufficient for the growing need.
SNOHOMISH COUNTY	Can't we find a way to do all of this faster?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	Push them through. Our roads are being choked. Lets give our people more time to live, instead of commuting! Lets clean up our pollution by clearing out the all the cars that carrying single drivers!
SNOHOMISH COUNTY	Public transit in the greater Seattle area is appalling. We need to get off fossil fuels now, so I think we need to get it together faster. A usable system of light rail that connected all of the outlying areas would be such a boon to so many neighborhoods, and make the quality of life so much better. This needs to be a top priority.
SNOHOMISH COUNTY	Traffic is to congested now. Please consider a ten year plan to complete all of the projects.
SNOHOMISH COUNTY	The plan takes way too long. We need these projects completed at the most in the next 10 years. Stop dragging this out and get some guts and get it done. I will be dead by the time most of these projects come to fruition, and I am only 60 years old.
SNOHOMISH COUNTY	I full support this project but emlore sound transit to expedite the timeline to avoid a 11 year congestion problem. We need to get people out of cars and into transit on all major corridors faster than in the proposed plan.
SNOHOMISH COUNTY	Everett light rail connection with Seattle either needs to have a shorter timeframe or Sounder service from Seattle to/from Everett needs to be expanded to more hours and days of the week.
SNOHOMISH COUNTY	The Everett connection timeline should be greatly accelerated.
SNOHOMISH COUNTY	I oppose this because you are asking for \$200/year/adult person. My budget could not support that in anyway. I am a senior and most of the projects will be completed after my death.( i get no use for the money I paid) where the projects are located. where I live now only one maybe two projects might help me. As I see it as where my adult family lives they would most likely use any of the projects So we would be paying \$1000 or more for something we are unlikely to use. As for the taxes. Way to much from different sources? A tax is a tax be it income, property of what. I am not paying for project that are 70 miles away. I will not support anything ever that Seattle solely benefits from. These projects for light rail are elevated way to much. The transit people have done little in the 45 years I have lived in the Seattle area. The "should have" 55 yrs ago a monorail was built but nothing new since of any kind except fot the near worthless light rail line to the airport. I'm sorry it is to much fixing way to little at an astronomical cost. Unfortunately it just way too late. NO more money
SNOHOMISH COUNTY	Everett needs to be a higher priority because Boeing destroys traffic as is.
SNOHOMISH COUNTY	1. Light Rail to Everett sooner, please.  2. Limited 24-hour bus service?
SNOHOMISH COUNTY	While the projects in the plan are important, the timeline to complete the backbone to Everett in 25 years is ridiculous and completely unacceptable. The north-south backbone should be the first priority. The construction of Interstate 5 from Mexico to Canada took less time than that (1956 to 1979). On top of that, if the plan is 25 years, history shows that the schedule will likely slide. Sorry, we will vote no on this much needed project. Come back with a better proposal.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	The timeline is way too long and the funding options faulty. The need is immediate. And large employers should be primary funders. I am 67. I will not vote to pay for transit I will not likely live to see or to use. We currently have a transportation crisis in this area and crisis management is needed NOW. By the time this project is built, the need may have drastically changed. Large employers should be immediately asked/required to step up and insure adequate, non polluting transportation to and from work for their employees. The general public should not be asked to fund expensive, long term, transportation ungrades for Microsoft, Amazon, Boeing, etc, while the corporations reap the profits. The immediate need to get cars off the road, save fuel, reduce unnecessary and toxic pollution could be addressed if the large employers were required to have a set, high percentage of their workers arrive via van pool/carpool/bus or other non-auto mode. Government must get involved in creating and promoting the organization of vanpools/small neighborhood buses/carpools/bike lanes etc for all large centers.
SNOHOMISH COUNTY	Sooner would be great.
SNOHOMISH COUNTY	The puget souND region should not wait another 25 years to move ahead.
SNOHOMISH COUNTY	25 years seems like a long time to wait for something that might alleviate traffic. Bus service is nice, but I have no interest in ever taking only a bus, it doesn't save any time. It gets stuck in the same traffic I would be in anyway. Light rail skips the congestion.
SNOHOMISH COUNTY	<p>I understand the phasing probably depends on the completion of planned projects and the status of various studies/analyses. That said, I think it is more important to connect Everett to Seattle in 12 years than it is to connect Redmond to Seattle in 12 years. Not only are travel times from Everett to Seattle significantly more than just a few years ago, but Everett (including Boeing) needs the economic boost light rail would provide more than Redmond does. I would be strongly support of a proposal that switched these two completion dates.</p> <p>Regarding adding additional stations, in the long term, I think a connection to Olympia, though outside of Sound Transit's service area, is very important. Extending Sounder rail to DuPont gets the region one step closer to extending to Olympia - and to a truly connected, congestion-free and reliable Olympia-to-Everett public transit corridor.</p>
SNOHOMISH COUNTY	I believe that the projects enhancing transportation from West Seattle to downtown and north should be expedited.
SNOHOMISH COUNTY	Why should I vote to be taxed for ST3 plan that will not show useful results for 25+ years? I see no value in not completing the north and south light rail and then completing internal stops and lines. Your timetables are not viable.
SNOHOMISH COUNTY	25 years to Everett!! What a F*** you! Might as well just tell Everett they're out. I don't want to pay for anything that won't come to my community in roughly the same amount of time as the other communities.

SNOHOMISH COUNTY	<p>While I generally support Sound Transit and its ST3 plan, there are two major points that I feel are currently being alarmingly and potentially disastrously overlooked.</p> <p>I am disgusted that you consider it in any way acceptable to not complete the so-called "light rail spine" until circa 2040. You do realize, I hope, that achieving this deadline would make it roughly half a century between the concept's initial approval by voters in the 1980s–90s and the first possible conveyance of passengers betwixt Everett and Tacoma?</p> <p>By that time, all of the projected population change figures I have seen indicate that you will be meeting the needs of 20 years ago 45 years after the fact, and there will be significant increases in population in parts of the four-county area (King/Kitsap/Snohomish/Pierce) that do not even impinge upon Sound Transit's current frame of reference. (To a minor extent, this significant population growth in areas adjacent to but not figuring in the ST service area is already becoming apparent—I'm sure most of us are uncomfortably aware of the distressing near-exponential increase in rush-hour trip durations over the past decade.) Thus, important point 1: The Sound Transit service area no longer contains the entirety of the Greater Seattle area's urban sprawl! I have not closely examined areas beyond my current Snohomish County place of residence, but I can say with confidence that, at a minimum, Marysville, Lake Stevens, the city of Snohomish, and the unincorporated areas south of there (e.g. Maltby, Clearview, Cathcart, Grace) are now mainly bedroom communities for more urban areas and should therefore figure more usefully in regional transportation planning. I am quite confident that the only reason the incorporated cities among the ones I just listed are not heavily developed right up to the Everett city limits is the presence of the Snohomish River and its barely tractable floodplain, which represent a physical gap in the urban form which could easily mislead anyone from outside the area into thinking they are less integrated with the Everett-Lynnwood-Seattle conurbation than is in fact the case.</p> <p>Whether the ST service area should eventually extend all the way to Smokey Point, Granite Falls, and Monroe or points east should also be examined. Given the expected growth it seems entirely plausible.</p> <p>I find I am digressing somewhat. Let us return to the second urgent point: The timeline. My wife commutes from north Everett to the low-density office-light-industrial wasteland between Bellevue and Redmond, near what the Bellevue city planners have for some reason begun calling the "Spring District." In the absence of effective rapid transit, this trip takes a minimum of 1.75 hours by bus, or</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	<p>I transferred here as a Boeing employee 2 years ago. I eagerly looked forward to being able to use light rail to commute to the Boeing Everett factory. I was very disappointed. I had thought that surely Seattle would have the same level of mass transit in place as or major metropolitan areas such as Boston, New York and so on. With the lack of transit currently available, I commute using a personal automobile.</p> <p>I am further disappointed at the projected timelines for the infrastructure. It is as if it is not urgent, but rather something for our children or grandchildren. Perhaps I have not heard the rational for moving at such a slow pace.</p> <p>I am very supportive of improving the mass transit infrastructure. But for a area supposedly so "green" and environmentally supportive, it is baffling why it is not in place already.</p>
SNOHOMISH COUNTY	While adding the light rail, ensure to add more parkings as well to support the growth.
SNOHOMISH COUNTY	Everett timeline is too long. I would not support this plan due to that.
SNOHOMISH COUNTY	I feel that the link light rail expansion north to Everett should be on a nearer timeline than 25 years. Traffic from Snohomish County to Seattle is atrocious and is a serious impediment to expanding employment opportunities in the North sound region.
SNOHOMISH COUNTY	It is already difficult if not impossible to find parking at Lynnwood transit center and Ash Way park and ride parking lots after 7am most mornings. You can add all the light rail and BRT lines in the world, but no one will be able to access them if there is nowhere to park prior to boarding the train/bus. Expansion of parking lots and/or building multistory parking garages should be one of the highest priorities. Doing so would likely increase the use of the existing lines, and would entice more people to use mass transit as more lines come into operation.
SNOHOMISH COUNTY	This timelines isn't agressive enough. The entire project should be < 10 years.
SNOHOMISH COUNTY	Lightrail north should be more of a priority than lightrail to the east. The eastside has so much money the likelihood of them using alternative transportation is very slim.
SNOHOMISH COUNTY	22 years to get light rail to Ballard!? 17 years to get to West Seattle? why so slow? at that rate it will not positively impact me... it may be good for my children, however.
SNOHOMISH COUNTY	<p>Everett needs mass transit sooner than later. Currently off 128th Everett Transit (2) does not even run on weekends! From a major population hub to a mall and in between. With the inability of Everett Transit (ET) to change. Just something like that would greatly increase shopping and commerce.</p> <p>Please begin Community Transit (CT) bus service earlier on weekdays. Currently from Mariner P&amp;R the first bus is 5:15 to go downtown. Please link up major commuter buses to metro times.</p>

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - Snohomish County

SNOHOMISH COUNTY	I strongly support building the "spine" of the system first before moving east/west. Also, any proposal that would shorten the time period should be seriously considered. I indicated opposition on Question #13 only because of the long time periods involved. Snohomish County voters have supported this overall system for years and we need improvements soon, not 25 years from now.
SNOHOMISH COUNTY	I think it's utterly RIDICULOUS that this plan is going to take 25yrs to complete when promises were made for the past 20yrs that light rail was coming to Everett. I don't want a canned reply or a hollow empathetic response, whomever the powers that be are on this project, need to get off of their butts, cut the beaucroatic nonsense and get this thing done. Most of the people anticipating better commuter rail service will enter and exit the work force via retirement before it's finished. Once again, RIDICULOUS!!!
SNOHOMISH COUNTY	I think the link light rail to everett/lynnwood should be completed at an earlier schedule. Completion in 25 years? We need help NOW. Thanks!
SNOHOMISH COUNTY	As a frequent public transit rider and a paying customer for many years I strongly feel the project should be completed already. In the 70s I supported the rapid transit system that was to be Federally funded, but I was to young to vote. The elders thought a rapid transit system would bring to many people to our region, but they came anyway. I would recommend to the transportation planners to move quickly. We need our rapid transit system now, it's a health crisis i.e., stress, road rage, accidents, time, money and exhaust pollution just to name a few. Thank you

Comment(s) about project completion timelines - North King County

Subarea	Additional Feedback - Comment(s) about project completion timelines
NORTH KING COUNTY	I believe priority should be given to denser areas like Ballard and West Seattle. Also Fremont and Wallingford should get light rail in this package. Light rail from Issaquah is not as important as the amount of people is not that many that requires such an investment as light rail. I am very disappointed with the timeline how this will get built. I am aware that money is of the essence and how it is recovered from taxes but are there other financial resources where a bond can be taken out, federal grants, state investment and other avenues where this is built within 10-15 years instead of 25. We need this now. In less than 25 years seattle will have over 800k residents, we need the transportation now.
NORTH KING COUNTY	I'm guessing I'm in the minority, but I would support anything that can be done to speed up the timelines, even if it meant higher taxes.
NORTH KING COUNTY	Considering ST1 and ST2 were over budget and well over the timeline, I wonder how you plan on being within budget and on time with ST3?
NORTH KING COUNTY	It would be worthwhile to spend money early on to identify any potential ways to expedite projects - the overall list of proposed projects is fantastic, but the timeframe is so long that it's difficult to convince current voters that most of it will be done in time for them to see any benefit.
NORTH KING COUNTY	Quality, grade-separated mass transit is the most important thing we can do to help manage growth in Seattle. I am in favor of doing as much as possible, and am willing to help pay for it. I wish there was a way to make the tax burden more progressive instead of the current regressive tax structure, but we cannot let the perfect be the enemy of the good. Build as much as possible as fast as possible.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

<p>NORTH KING COUNTY</p>	<p>While I understand the scope of creating this light rail system, I believe that the ability to have this project pass through by voters would be greatly improved if timelines were in the range of 18-20 years maximum, especially considering the current rate of growth in our area and the state's unwillingness to provide major traffic improvements to our highway system. I also believe that lines such as the Federal Way station should be made a top priority, as this funding was initially approved by voters during ST2.</p> <p>While the second downtown tunnel system will inherently take a long time - thus increasing the timeline of the inner-city lines - I do not see any reason to wait so long to establish and create the Issaquah line. While this line will directly connect to the East Link which is currently not open yet, this seems very much a standalone line that can be further developed into a greater system. As much as ST1 created a spine for the entire system, I view the Issaquah and Bellevue Lines to be the spine for the east side.</p> <p>That being said - my greatest question is whether Sound Transit views this expansion as the final connecting piece of light rail for the area. I believe that there are many more lines possible that would drastically change the way we commute and travel (specifically for lower-income neighborhoods in Seattle, and lines connecting South Seattle and Renton on an east-west corridor), and I would be much less supportive of ST3 if this is viewed as the final step in their light rail plans.</p> <p>Thank you for all your work,</p>
<p>NORTH KING COUNTY</p>	<p>The timeline is very extended. I would rather pay more and have services that I will actually get to use in a reasonable amount of time. At the long range, 25 years is somewhat hard to comprehend and makes the project less relevant to me. Getting beyond 10 years, you're losing my interest more and more (and I hands down think we need this transit system). I'm sure it's not easy, but how can the timeline for these projects be condensed?</p>
<p>NORTH KING COUNTY</p>	<p>The timeline for this is absolutely ludicrous and I will categorically not vote for any proposal that involves getting light rail to Ballard in 2038! This proposed layout looks great and reflects our needs today (not in 25 years!). If it's built at the suggested glacial pace, the project will be completely outdated long before it's completed—we need a plan that helps people today.</p>
<p>NORTH KING COUNTY</p>	<p>The prioritization and ordering of the projects seems completely backwards to me. There's no objective reason why Tacoma needs a slow train to Seattle faster than Ballard needs a rail line. Ballard should be the first ST3 project to break ground, not one of the last. This list of projects, as is, does not seem like a remotely good value for the money. I will actively campaign against this thing if it doesn't give Seattle a much better deal. Don't take Seattle votes for granted.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Extending light-rail out to Tacoma before addressing transit congestion between downtown West Seattle/Ballard seems like missed opportunity, considering Sounder service (while limited) already provides faster access between Tacoma and downtown Seattle.
NORTH KING COUNTY	Light rail to Ballard by 2038 is unreasonable, as is the deferral of the Graham infill station to the 2030's. Also, the rationale for freeway aligned stations to the south and north is hard to understand, both in terms of travel times and TOD potential.
NORTH KING COUNTY	Completion timelines are too long to be of significant value given the magnitude of the congestion issues facing our region today. ST should take a hard look at current and future execution strategies to feed methods to accelerate. For \$50b, it should be possible to realize more immediate improvements.  Why does it take ST 1-2 years to dig the tunnels for each phase of light rail expansion, and then another 4-6 to put the rails and trains in? It seems like there is a lot of room for improvement on the systems installation schedules to date, And if not, maybe we should be building bus tunnels instead.
NORTH KING COUNTY	This plan takes way too long for the price. I've voted for previous transit packages but am leaning against this one due to the timeline.
NORTH KING COUNTY	Ballard asap!
NORTH KING COUNTY	Ballard should take priority before South sound and Everett plans
NORTH KING COUNTY	Increase use of bonding to complete projects sooner
NORTH KING COUNTY	Ballard needs to be a higher priority. 20+ years for lightrail to one of the fastest growing areas of Seattle? Ridiculous.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

<p>NORTH KING COUNTY</p>	<p>I am in support of ST3 in concept and love the addition of shoulder running for express buses to add a lane and remove buses from the HOV lane.</p> <p>I simply hinge my disagreement on the delivery schedule, it is abhorrent and unacceptable.</p> <ul style="list-style-type: none"> <li>-8 years for BRT that should be delivered in incremental steps.</li> <li>oI would rather have funding for increased bus routes in a year or two and when the NE 85th street interchange is rebuilt we switch the existing buses over to BRT.</li> <li>-Delivery of Ballard and West Seattle in 2033 and later is far too late to be useful for our growth now. I believe that ST has come up with the most expensive plan possible and as planners have not considered options that would be beneficial in the shorter term. I would rather a tiered approach for some benefit sooner.</li> </ul> <p>I find it completely unacceptable to propose additional tunnels for West Seattle and Ballard. For better delivery timelines and lower costs at grade is a much preferred option. Is it not much cheaper to build car overpasses versus tunnels, especially in the Interbay area?</p> <p>While parking is being improved at many centers the lack of parking in the UW area is a miss, this greatly reduces the usefulness for that area.</p> <p>I've read studies that have concluded that infrastructure projects with longer than five year timelines are subject to huge unpredictable budget overruns. Budgets for these projects are made using current the current economic climate and too much can happen in 20 years to make these n8mers effective and realistic.</p>
<p>NORTH KING COUNTY</p>	<p>The Ballard to downtown and West Seattle to downtown lines need the highest priority of anything in ST3. These need to be completed much sooner. 5 years to completion seems like an acceptable time frame. 22 years is ridiculously too long and significantly diminishes any enthusiasm for this proposal. Please do whatever necessary to revise the plan to make the impact as quick and immediate as possible. Also construction of the Ballard to UW light rail line needs to be included in ST3 also with a maximum of 5 yrs to completion time frame. All of the proposed time frames seem way too long. 8 years for rapid bus service? It's painting stripes on existing roads, make it happen in weeks to months. I think for ST3 to be successful it needs to have much more significant, decisive and quickly achievable goals. Even if this means much greater upfront cost, I think people are willing to pay more for service in the near future rather than paying for something that is decades away from reality.</p>
<p>NORTH KING COUNTY</p>	<p>In general, would like to see the timeline accelerated. It will be really disappointing having to wait 22 years for the Ballard/Downtown connection when it really needs it today.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The Ballard project will take too long. Some investments should be made earlier. Perhaps ST can partner with SDOT or Metro to move some planning & funding forward.
NORTH KING COUNTY	Light rail to Ballard should happen first, not last and it should not be at-grade because that completely defeats the purpose. Because of where I live and the cost of my house (which was largely to reduce my commute), I'll be paying \$600-\$700 per year for ST3, but almost nothing in it will impact my commute at all, which is primarily via Seattle Metro.
NORTH KING COUNTY	#12 - The reason why I selected "Strongly Oppose" is because the project would be built in phases over such a long period of time. I realize that due to capacity and funding restraints, all projects cannot be completed immediately and concurrently. However, I feel that this timetable is much too long. We are overdue for transit and I would be willing to spend a bit more, if needed, to deliver all of these projects at least 5 years sooner. Can we have this include the projects currently in progress, such as light rail to Northgate, Bellevue and Lynnwood? If resources could be included here to allow for each to be completed 1-2 years sooner and speed up ST3, people would be more willing to vote for this plan.
NORTH KING COUNTY	The faster these projects can be completed, the better.
NORTH KING COUNTY	Can this not be done faster? I know it takes a while to get things going and find funding, &c., but the timeline is so long and pushed so far I feel like it seems alienating to some. If people feel like they won't live to be here to see the benefits, it's harder to garner support, no? I'd support doing anything possible to accelerate the implementation phase.
NORTH KING COUNTY	West Seattle is and will continue to aggressively increase density. It is doing much more so than places such as Redmond and Federal Way. It does not make sense for light rail to West Seattle to be seventeen years out while light rail to other areas is to be delivered much sooner.
NORTH KING COUNTY	The timeline for the Ballard to Downtown line is insane- this needs to happen ASAP and would alone take a significant number of people off of roads. 22 years? I can't imagine living here if things don't improve much, much faster than that. It feels as though the timelines are in the wrong order of prioritization. The line MUST be separate grade - sharing streets does not work, and will only allow for creating a system that isn't reliable or predictable, much as the bus system is today. I don't want to drive, but am forced to in order to guarantee i can get to/from work within specific time frames. I'd gladly hand over a paycheck(s) if it means i could avoid driving...
NORTH KING COUNTY	The timelines are very disheartening, as is the lack of new lines in the city. With what appears to be overnight heavy usage of U-link it's clear we need as much light rail in the city of Seattle as we can get as quickly as we can get it. High density neighborhoods should be targeted as they'll move the most people per dollar spent. The current plan seems to focus too heavily on suburban/car-centered destinations.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>PLEASE build the light rail lines, especially those in Seattle, quicker. The currently proposed timeline is absurd -- 22 years before Ballard gets light rail? That's not good enough. I've already heard many friends say they're less excited about the proposal because they'll be seniors before they get to benefit the investment. Our region is growing too fast; we need to build this system faster.</p> <p>Overall, I'm really excited about the scope of ST3. I'm glad to see the proposal is bold.</p>
NORTH KING COUNTY	<p>It is absolutely critical that these projects happen much more quickly than you propose (particularly light rail within the city of Seattle). Is there no way to use debt to finance these projects so that construction can commence sooner? Ballard to downtown needs to happen within 10 years. UW to Ballard needs to be added to the list of ST3 projects. Sounder already provides train service from Tacoma to Everett. Building up the spine only sounds good in a vacuum. Use light rail for shorter-medium range commutes, particularly within the city of Seattle and NEAR suburbs.</p>
NORTH KING COUNTY	<p>To get the votes needed to pass, the suburbs had to be given something right away. You are counting on Seattle proper to pass this based on previous votes. Seattle itself is getting a raw deal when it comes to the timeline. I think there has been a miscalculation on the automatic Yes vote from Seattle. There is nothing to get excited about for a Seattle resident in this plan.</p>
NORTH KING COUNTY	<p>I'd be much more supportive if Ballard wasn't so far down the timeline. 20+ years?! That's a tad bit ridiculous. My bus (either 28 or D) is jam packed everyday. Light rail is necessary to support further support of SEATTLE. Too many people have moved to the suburbs requiring more focus/distraction on these projects that require much more distance to be covered. Amazon, Expedia, etc. are all moving to Interbay, SLU, etc. Put the focus on Seattle.</p>
NORTH KING COUNTY	<p>Is there no way to get this done sooner than later? I'm okay with hiring a bunch of illegal labor to get the job done quicker if that's what we'd need to do.</p>
NORTH KING COUNTY	<p>1) Ballard -- Downtown Seattle: The estimated completion date of 2038 is way too far into the future. In fact, the long delay for rail projects in Seattle makes me suspect that money is being siphoned out of Seattle to fund ridiculous projects way out into the suburbs (ex: the Paine field detour). This is probably my biggest concern because it diminishes the likelihood of the measure passing at all.</p> <p>2) Ballard -- Downtown Seattle should be GRADE SEPARATED. The fact that it's not is almost a non-starter for me. It is only slightly less concerning that point 1.</p> <p>3) I'm extremely disappointed that Ballard/UW is not included, at least as a provisional line.</p> <p>4) I understand that Kirkland has actively opposed rail, but of the eastside projects, Kirkland -- Bellevue seems more valuable than Issaquah -- Bellevue. My opinion is that, while this may appease some small number of vocal opponents (those that own land along the eastside rail corridor), this will cost many votes.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Takes too long!! Reduce these dates or folks will vote no.
NORTH KING COUNTY	Ballard & West Seattle should be prioritized over suburban areas!!! The timeline & the way this plan is written makes no sense.
NORTH KING COUNTY	<p>I've lived in Belltown and downtown Seattle for 8 years and am getting ready to move to Roosevelt. The project timelines for Seattle are unpalatable. I understand that there are laws and realities of funding that need to be considered, but it seems to me that the timeline needs to be condensed drastically to have people interested in voting for this plan. I posted the proposal to a group of 20 of my friends. They are very pro-transit and supportive of the plan until they heard the timeline. It was enough to get them to vote against it. If somehow, everything could be sped up (including current Northgate and east link extensions), people would be a lot more bullish about it (and even be willing to pay more).</p> <p>It is just too much to ask to wait 10 years from the arrival of Judkins Station to add another station in Seattle. Furthermore, not having grade-separated in Ballard is terrible when the wait is that long. I would be willing to spend more money to get a Ballard-UW line and a "Metro 8" line. As a Seattleite, I could do without the rest of the entire expansion and just have those 2 lines. Right now the proposal is heavily stacked for the suburbs. There's nothing very compelling on the horizon with this proposal that would make me feel excited about it as someone living in Seattle.</p> <p>PS: Why so long for Graham St Station?</p>
NORTH KING COUNTY	I like the final plan, but the timetable for light rail to Ballard and West Seattle is just too long.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>The current timeline ending in 2041 is absolutely unacceptable. Seattle deserves a better transit system in a much shorter time. Cities like LA have completed more light rail in 10 years than we expect to. Perhaps reconsider tunneling as the preferred option and reevaluate elevated rail for price and construction speed. Fantastic plan, just needs a much shorter timeline. The latest project needs to be done by the late 2020s, otherwise Seattle will grow by 2040 and we will be clamoring for more solutions. Build out the network NOW to encourage high-density growth around it, rather than waiting to build light rail through established lesser-density growth. All of my friends, family, and coworkers were disgusted by the unrealistic timeline and discussed not voting for it SOLELY because it's too slow. That'd be disastrous and an embarrassment to complement the failed 1970s Forward Thrust initiative, which screwed Seattle. Let's not make the same mistake and build this network faster. I know many people would support slightly higher taxes if the final Everett 2041 line was pushed back to the late 2020s, before it's too late. So I implore Sound Transit to please reevaluate the timeline before the November ballot to give voters options on how fast they want it done. We need people off the road now, not in 25 years after 1 million more people have come here. We have a good head start to solving the problems of the future, let's not make the same mistake we did 40 years ago, before traffic and congestion were a dire issue. The plan is great, but please, speed it up. It's good, but too late; it'll miss the mark with the voters.</p> <p>And also reduce the time of the Ballard-UW line study from 7 years. Really? We need that line in ST3 realistically. But 7 years for a study? I've heard nothing but criticism. Move that study to the top and get that line built. Ballard-Fremont-Wallingford is some of the most congested areas in Seattle with no easy east-west accessibility options. Even the buses are packed. If you at Sound Transit can get that Ballard-UW line coming much faster and decrease the overall timeline, then a vote against ST3 would be the most foolish decision a voter could make. I'm for the project as it stands; we need it. But we need to go further and make this a reality now, not in 25 years. I hope you strongly consider my opinion and those of my fellow Seattleites.</p>
NORTH KING COUNTY	Light rail to Ballard and SLU was needed yesterday and shouldn't be among the last items on the list to be completed.
NORTH KING COUNTY	<p>move ballard light rail up, 20+ years is too long to wait for this project and North Seattle has no real access to transit and we are paying boatloads.</p> <p>Also, i really like the east west route from Ballard to UW to the East-side --- that's critical to for businesses and life</p> <p>thanks</p>
NORTH KING COUNTY	Waiting until 2038 to complete the Ballard-Downtown light rail is unacceptable. The cost of living is rising most rapidly in urban areas where density is growing and housing prices are making it difficult for families to afford it. One of the ways we can mitigate these costs is by removing the necessity of car ownership. Getting light rail to Ballard and West Seattle should be top priorities, not last on the list.
NORTH KING COUNTY	It's just too darned long. By the time you get light rail to Redmond I'll have retired and not need to use it any more.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Would just want project timelines accelerated, so that light rail to Ballard happens before I retire.
NORTH KING COUNTY	Would like to see it much faster. Would also like to include Ballard to UW line in this round instead of a future study.
NORTH KING COUNTY	I'll start by saying the lack of an west to east line (Ballard to the U district) is a huge bummer. My biggest problem however with ST3 is how long it will take to get light rail service. Rail should be prioritized and funded over EVERYTHING else. Telling me that Light Rail is 12 years away for the most mediocre of options is not good enough. As someone who lives near Green Lake I walk past the stop scheduled to open in 2021 all the time, and I just don't get how it can possibly take that long after looking at the most recent details regarding the tunnel digging. Adding on to this with a huge amount of investment but minimal light rail expansion while traffic gets worse and worse is a bummer, and if people vote against this proposal I imagine this will be why. The plan focuses too little on light rail between the busiest areas of the city and the downtown core, and takes way too long to implement changes. I just can't understand how it can take 25 years to build a rail line. If these things can't be worked on at the same time maybe we should redesign the plan. I don't know I like transit, I want to use it, but I feel like we are constantly getting screwed or told everything is going to take so long to implement that it's just crazy.
NORTH KING COUNTY	I'm a big supporter of light rail but do not understand why it takes so long to build the system, and many people I have discussed this with have the same question. If Sound Transit has explained the reasons behind the long lead time, I don't believe it's widely known or understood, and it would be helpful to understand the reasons. And, how can it possibly take eight years to have I405 BRT online? I would like to understand that timeline as well.
NORTH KING COUNTY	Ballard line completion timelines are inexcusable, as is the rail being at grade. Traffic is already terrible in that region, and rail should not be forced to be stuck with it. This is not a forward thinking decision.  Light rail is not for suburban commuters. They should be using Sounder. We do not need to connect to Tacoma and Everett by Light Rail. That's what commuter rail is for.  The greatest benefit is within the urban areas. Removing the need for people to have a car when living within Seattle proper will free up roads and allow for slower expansion outwards.
NORTH KING COUNTY	Love the Light rail from Husky Station to downtown. Please hurry up and complete the UW and Roosevelt connections.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>Ballard and West Seattle to downtown first!</p> <p>I know you're trying to placate the suburbanites, but providing service to low-density areas first seems like a recipe for half-assing the entire thing, and quitting halfway through.</p> <p>In other words, taxpayers pay a bunch of money, and see minimal improvements for a decade. Tim Eyman swoops in and creates an initiative to quit because the project isn't doing much good, everyone votes for it because it isn't doing much good, the project dies, and gets torn down.</p>
NORTH KING COUNTY	Sooner is better. Thanks!
NORTH KING COUNTY	More funding needs to be given to these projects! The projected timeline is way too slow and we need these advancements much sooner! 25 years for the projects to be completed is insane.
NORTH KING COUNTY	These projects need to be executed NOW, not 20 years from now. This city could be great NOW, not 20 years from now. Proper rail transport should have been funded 50 years ago, so NOW is already too late. Seattle is rich, make it happen. The suburban whiners will stop whining when they can whisk to and from work without traffic (in their train, or in their car). Seattle is NOT A GREAT CITY thanks mostly to its miserable public transportation. This can be changed in a few years of heavy construction. The problem is political, not logistic or financial. MAKE IT HAPPEN NOW, not 20 years from now.
NORTH KING COUNTY	I wish it would be finished sooner.
NORTH KING COUNTY	Focus on completion of transit in the city first. Most people who are on the roads in Seattle live and work here. Ballard is at more than 300% of its 2024 growth target. That growth was supposed to be accompanied by infrastructure but transit is grossly lagging behind the development. If the timeline for completion of improvements to transit to Ballard are not significantly accelerated I am no longer supporting the project.
NORTH KING COUNTY	Would love to see Ballard -> Downtown be a higher priority
NORTH KING COUNTY	I am likely to vote against a plan that prioritizes expansion into far suburbs over expansion within city limits where most people live and work.
NORTH KING COUNTY	I believe Ballard and West Seattle light rail should be pushed up in time line and should be done in the next 10 years. Also, I believe that there should be more options for tunnels in Seattle for light rail (below grade).
NORTH KING COUNTY	The light rail timelines for Downtown Seattle, especially the Ballard line are absurdly long. I'd be happy to pay more to push those projects faster.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>The timeline for projects in Seattle (specifically the Ballard line) is FAR too long. It's already hard to get around the city today, we can't wait another 22 years to have a fast and reliable alternative.</p> <p>It's also disappointing that the draft plan includes the Ballard option with longer travel times and lower ridership. Seattle, uniquely in the region, has a significant need for transit alternatives that are fast, reliable, and grade-separated in order to get people where they're going throughout the region. This is not the place to cut corners to save a few million dollars on a project with costs in the billions.</p> <p>Lastly, the lack of studies for additional corridors in within Seattle is disheartening. Where are the east-west lines to connect homes and employment centers outside of downtown? Ballard to UW, for example, or Belltown, South Lake Union, Capitol Hill, and the Central District. The draft plan does very little to enable quick, regional transportation for tens of thousands of Seattle residents and employers and yet includes diversions and extensions to relatively low ridership areas in other parts of the region. Investments should be made where the need is most acute and the options most limited.</p>
NORTH KING COUNTY	The timelines seem way too long. Why will it take 22 years to build to Ballard for example? These projects need to be prioritized over at-grade, traffic right of way projects I keep seeing built.
NORTH KING COUNTY	Is there any way to make this happen faster? 8-25 years is a long time.
NORTH KING COUNTY	Petition the state to increase ST's bonding ability to speed Ballard timeline.
NORTH KING COUNTY	Don't take Seattle voters for granted. The delay in Ballard and West Seattle until the end of the project timeline means I will vote no as it is written. I get that you are trying to appeal to the swing voters in regions further because you think Seattle will blindly vote for any tax but you have lost me with this timeline. Accelerate the Seattle projects to the front and you get my vote back. Read some comment sections, forums, or Reddit and you will see I'm not an outlier in my thoughts.
NORTH KING COUNTY	Transit in West Seattle is desperate. Once the viaduct is gone, it will be the way the majority of people will get into the city
NORTH KING COUNTY	I love everything included - but wish it would be implemented much faster! Happy to help on this however I can.
NORTH KING COUNTY	Would love to see it done faster!
NORTH KING COUNTY	A 25 year construction timeline is untenable. Timeline should be revised and all projects should be started immediately. I may very well end up voting against this project in it's current form. 22 years to wait for light rail to Ballard is unforgivable. Not having a Ballard to UW through Fremont and Wallingford line is a huge missed opportunity. ST has proven they can oversee large projects, it's time to scale up, we don't have 25 years to wait.

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	If people want reliable and transit for more than commuting, they should move to Seattle.....if they live in the burbs, we should focus on transit for commuting. In other words...don't do what SF did and built BART everywhere...do what NYC did and built light rail only in the city.....and focus on using commuter rail and BRT to get people into the city for work....building light rail outside of Seattle is waste of time....those people have cars and they love em
NORTH KING COUNTY	I worry that people will be scared off by the length of time this will all take--have to help them understand it's not just about "what's in it for me". Also important people understand that improved transit will benefit everyone, whether or not they are/can actually use it.
NORTH KING COUNTY	I am a HUGE supporter of transit, but it absolutely cannot take 25 years... we don't have that kind of time. I don't understand light rail for 40 miles north and south of the city. I would have preferred fixing commuter rail (take it off that failing north end system) on ST owned rail lines and keeping light rail to city and immediate suburbs. Seattle needs more infrastructure in the city we need to be able to move east-west not just north south...  But mostly FASTER!
NORTH KING COUNTY	The timelines for light rail are too long.
NORTH KING COUNTY	The 22 year timeframe for light rail Ballard just seems so extreme. I would be more likely to support the project if something could be done to reduce that timeline.  I also think east-west travel in North Seattle needs to be given more priority. Wallingford and Fremont are ignored in this plan.
NORTH KING COUNTY	West Seattle would be an access point for further southern light rail and connections to Tacoma etc.  PLEASE PLEASE PLEASE add light rail to West Seattle. Because we are accessing the downtown areas via two main bridges we are always at the mercy of traffic and busses contribute to the traffic.  Light Rail Now!
NORTH KING COUNTY	I understand the constraints of tax-based financing, but please move heaven and earth to pull in the timelines.
NORTH KING COUNTY	The Seattle light rail projects have completions that are far too long in the future. These should try to be completed as soon as possible. Also grade separated if possible.
NORTH KING COUNTY	The timeline is way too long, especially for the Ballard and West Seattle rail. I had hoped rail would come by 2030 in both Ballard and W. Seattle. If ST3 goes to the ballot the way it is now (with a long timeline), then I am voting "reject".

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The timelines are way too long. Generations will have come and gone before being able to use transit effectively.
NORTH KING COUNTY	This timeline is absolutely repulsive. Ballard and then West Seattle needs to be done in the next decade if not sooner. Additionally, there needs to be light rail from UW to Ballard. Not a single one of these suburban projects will make a difference until these Seattle projects are completed first. Seattle is growing quicker than the Suburbs and that is only going to increase more as people desire living downtown and our traffic becomes unsustainable. Finishing these suburban projects first only encourages more people to live in the Suburbs. I will pay SIGNIFICANTLY more to get the Seattle projects done sooner.
NORTH KING COUNTY	I would prefer to see progress happen faster. Instead of starting 10 projects, start one and finish it 10x faster. Then show how much it helps and get a higher level of support for the next project. Maybe that will allow even more funding to go even faster.
NORTH KING COUNTY	It's all too slow. Go faster, even if it costs more. There are hundreds of thousands of seniors that will die, never being able to use these new improvements coming in 20-30 years. Get it done faster.
NORTH KING COUNTY	The timelines I've seen proposed for adding service to Ballard are too far in the future. Ballard needs improved transit now.
NORTH KING COUNTY	The most crucial elements are in the Seattle core. Connecting West Seattle and Ballard via dedicated right of way to Downtown ASAP should be a priority, and first items accomplished.
NORTH KING COUNTY	Please do it sooner!
NORTH KING COUNTY	This needs to be completed in half the time. I would gladly pay double (or triple) the tax to get it done faster. You should also work on public/private partnerships. I know Boeing is an asshole corporate citizen at this point in time, but if you are going to build a light rail spur to their front door, make them pay and get it done faster! We need this stuff NOW, not in 25 years!
NORTH KING COUNTY	Definitely hit up Amazon and other large Seattle companies to help fund the system. They stand to benefit as much or more than anyone else.
NORTH KING COUNTY	Raise the taxation amounts, implement an income tax, and finish the projects by 2030!
NORTH KING COUNTY	The timeline is way long. Needs to be much shorter to get more support.
NORTH KING COUNTY	I would prefer the ballard and west seattle light rail projects were given priority, but I support the plan if that isn't an option.
NORTH KING COUNTY	17-25 years of plan completion is way too long!
NORTH KING COUNTY	The downtown core needs to be the priority as this incentivises people to live in a denser fashion lessening the impact of ST3 completion in the outer areas.
NORTH KING COUNTY	West Seattle Light Rail Connections should be moved up in the schedule.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I strongly support light rail in Seattle. However, I am definitely voting no on this proposal. I remember voting on ST1 the year after I graduated college from UW, and thinking some day I'd be able to leverage light rail in Seattle. Here we are over 20 years later, and we barely have reached north of downtown. Now I hear that when I turn 67 we will finally get it out to Ballard? The same Ballard with density and population growth faster at a rate faster than the regional metrics you quote in this survey? 22 years to get a connection downtown? 40 years after starting work on the first line in Seattle? I know these projects are massive and complex, but 40 years to get a second line in Seattle built seems awfully slow. I think it may be best for Ballard and W Seattle to be pulled from ST 3, lower the cost, and let the people of Seattle form their own transit agency and taxing authority.
NORTH KING COUNTY	The ST3 Timeline is absurdly long. Congestion today will not be addressed for decades! The ST3 plan makes the dubious assumption that the needs of the area in 2038 can be predicted now, and that residents and industry can suffer until then. The ST3 plan fails to reduce the need for automobiles, by trying to serve too wide of an area. Sound Transit should instead focus on creating "car-less centers", where the population density is high, to provide a reasonable alternative to car ownership. For areas outside these centers (e.g. Issaquah), make entry into the public transport system easy, by providing park-and-rides on the periphery of metropolitan centers.
NORTH KING COUNTY	How can we accelerate this program? Lets try to cut the delivery time in half!
NORTH KING COUNTY	25 years to complete this plan is ludicrous. By then we need to overhaul the system again. This needs to be built NOW!
NORTH KING COUNTY	Light rail to Ballard, West Seattle and South Lake Union in 20 years is WAY too late. Tech companies such as Google and Facebook are opening offices in the next few years in South Lake Union for thousands of workers, yet the drive alone rate to SLU is more than 50%. This is choking our downtown roads and making life miserable for everyone in the city. We have to figure out how to get people from their homes to their offices in a reasonable way, and do it faster.
NORTH KING COUNTY	Please consider ways to accelerate the construction schedule for light rail projects in Seattle, especially to Ballard and West Seattle. Consider option to use ST3 revenue to leverage federal loans to expedite construction.
NORTH KING COUNTY	Do it faster than 25 years - I realize funding and engineering are important constraints, but there has to be a way to do it in half the time
NORTH KING COUNTY	I think it is absurd that it could possibly take 25 years for the key projects in this plan to be completed. Ballard/West Seattle/Issaquah should be on the fast track to completion as priorities.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The timelines for this project are completely backwards. The biggest bang for our buck and the people stuck in the most traffic are within the Seattle-Bellevue-Lynnwood-Renton corridor. The majority of this package is devoted to extending light rail to Everett and Tacoma, which are already serviced by the Sounder and do not have the density requirements that make light rail cost-effective. To increase ridership significantly, we should start from Seattle and work outwards, since the majority of the commuters taking the light rail are trying to get to locations Seattle in the first place. The projects to Ballard and West Seattle should be a 10 year goal with Tacoma and Everett a 20 year goal. BALLARD TO UW LIGHT RAIL NEEDS TO BE INCLUDED IN THIS PACKAGE AS WELL WITH A 10 YEAR TIMELINE.
NORTH KING COUNTY	I am concerned that the rapid bus plan will take 8 years. I don't see why it would take that long. Also, 22 years to connect Ballard is ridiculous. I understand wanting to connect the suburbs, but those of us living in the city want a connected city. Lastly, are you saying the system upgrades would cost 200 per resident per year? Is that starting now? Is that for all residents living in the Puget Sound? That seems steep.
NORTH KING COUNTY	Light rail needs to be a priority with getting to and from Seattle neighborhoods/city center being the priority versus one long connector from Everett to Tacoma. It takes far more cars off the road and eases congestion much more.
NORTH KING COUNTY	I'm a strong supporter of ST3 and would like to help campaign for it. I see it helping to revitalize my neighborhood in the long-run and enabling my friends and neighbors get better access to their jobs without having to drive. This is an important imperative for our region! I'm quite willing to pay additional property taxes, because I know the value of my property as a result of this collective investment will pay off huge dividends not only when it's time to sell but in time I save not having to sit in an automobile. Enhanced mobility will make me more likely to ride a bicycle to other parts of the city and my savings from gas and vehicle maintenance costs usually ends up getting spent in the local economy. This is an economic boon to our region!
NORTH KING COUNTY	ballard to UW is huge..why would we wait 22 years
NORTH KING COUNTY	I believe the Light Rail to Ballard and to West Seattle projects should be given higher priority and moved up in the timetable.
NORTH KING COUNTY	This is a plan that is 20 years in and won't complete for another 20 years. We've outgrown the original plans and we will outgrow this plan. Light Rails do not have the needed capacity and will do little to alleviat traffic since they go nowhere. In 22 years when they are finished, they will still go nowhere. Too hard to get anywhere. Where are the cross town trains? Where are the high volume trains? How will we accommodate urban growth? If we are spending 22 years building light rail, make new development provide ample parking spots.
NORTH KING COUNTY	Move Graham St up in the timeline. 2036 is too far away.
NORTH KING COUNTY	We need more focus on developing mass transit within Seattle sooner and less focus on providing regional transit to suburbs that don't even want it. Building a subway from downtown Seattle to Ballard should be the first part of the plan, not the last part.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	22 years to ballard?! Accelerate all of these timetables! Get more money from businesses--they're the ones that profit from having their workers commute to work. Amazon alone is the cause of so much congestion. We need light rail now, not in 2 decades! Make corporations pay!
NORTH KING COUNTY	they should work out an MOU with cities getting projects to use their bonding authority to make it happen even faster
NORTH KING COUNTY	Light rail to Ballard in 22 years is unacceptable! West Seattle and Ballard should be prioritized!
NORTH KING COUNTY	If the Graham St Station is to be added as promised by Mayor Murray at a Press Conference, it should be added as soon as possible to validate the integrity of his word.
NORTH KING COUNTY	This should have been done decades ago. I don't mind paying more to expedite the process, just get it done as fast as possible.  This better reach the people who need it and pay for it. Get it right the first time, we can't afford to not have a regional transit system by the time this is projected to be finished.
NORTH KING COUNTY	First impression is that the timeline favors those less likely to take advantage of the improvements. I understand the need for better options for those commuting outside of Seattle, but my observation is that those living in the city are more likely to use public transit. Perhaps it's cynicism on my part, but I get the sense that the proposal takes for granted that people in Seattle will vote yes and there is an effort to try to appease those in the suburbs who typically vote against similar measures by prioritizing the projects closer to their home.
NORTH KING COUNTY	I would pay much more to have this completed more quickly.  Also, we need to prioritize grade separated rail to maintain quick and reliable travel times.  We need a subway between Ballard and UW.
NORTH KING COUNTY	I feel the timeline for the Ballard extension is too far out. The city has approved significant increased density over the last several years which has caused the population of Ballard to explode. They have not kept up with providing services, especially transit, to support the density that has already been created. And we are going to continue to grow at a very fast pace. Waiting until 2038 for light rail is just ridiculous. Continued improvement in the bus line isn't going to cut it. I strongly support the overall vision and I'm more than happy to pay for it.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	We need more mass transit options FASTER. I'd also hope to see that equity and social justice considerations feature prominently in the decision making process-- I live in South Seattle and know that extending the light rail to W. Seattle or Ballard would improve my social life-- but I know folks in Kent and Burien can't get to work in a reasonable time because they don't have good transit options-- I'm willing to forego easy access to W. Seattle & Ballard to ensure that all of King County can get to work and school in a reasonable amount of time on reliable transit. ALSO-- I'm a fan of utilizing the most progressive taxing measures to fund all transit investments. WA has one of the most regressive tax systems in our country-- I'm not for the sales tax increase-- would much rather see it funded by a more equitable source.
NORTH KING COUNTY	West Seattle is Seattle's largest tax base. We pay a premium to live there vs. Federal Way. Why not let us get downtown faster than people in Federal Way? You are always worried about people who live far away, when we (west Seattle) can't even get a freakin' exit downtown on the new 99 tunnel. You should ride the C buses in the AM from West Seattle. We are standing 3 deep on the width of the aisle way. You need to look CLOSER to the city for the problems not further away. My IT guy moved to Kent because he can get to downtown faster than he did from West Seattle. I'm not paying for 405 or Kent or Tacoma. LOOK AT THE DENSITY!!!
NORTH KING COUNTY	Way too long to implement. City is stuck now. Figure out a way to cut timeline in half or better
NORTH KING COUNTY	Why one at a time? Work on in city projects at the same time as the extensions to the suburbs.
NORTH KING COUNTY	West Seattle needs light rail ASAP -- 17 years is too long to wait.
NORTH KING COUNTY	The completion timeline is simply too far out. The focus of light rail should be connecting the dense neighborhoods of the city first, not connecting the outlying regions. Light rail to Ballard, a region undergoing incredible growth, in 22 years? Who can support raising their taxes for something that might not finish before they die? Or before they move away because no one knows where they will be in 22 years. Also, the route for Ballard is terrible - the route should go through Queen Anne and Fremont where it will connect much denser neighborhoods and serve many more people, instead of duplicating the route of the current rapid ride line. Everett and Tacoma have the Sounder right now - they should be the very last priority in getting light rail. I want light rail badly, but this plan is just awful. I would never vote to raise my taxes for something I won't see for decades.
NORTH KING COUNTY	I support these projects, but the timelines are ridiculously long. Find a way to speed up the process.
NORTH KING COUNTY	Would love to see as much of this as possible completed sooner than the proposed timelines. I understand that it will take time, but it feels like this plan may not be enough 25 years from now.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>The idea that Ballard will not get light rail service until 10 years after Redmond/Fedway 5 years after West Seattle/Tacoma and 2 years after Lynnwood and Tukwila/Boeing Access is just plain stupid. There has been instant, heavy demand for the new UW/Cap Hill rail service. The same will be true of Roosevelt/Northgate Service. WHY THE HECK does this plan not prioritize rail service to centers or urban density like Ballard and other areas of North Seattle. Instead, it builds to suburban areas with little demonstrated demand ... probably for political/taxation reasons. I bet you that the people of the city of Seattle would be happy to pay extra to get rail NOW ... we need it, Please build it before 2038. I will be voting for this measure, but plenty of Seattleites won't unless we get more service from this plan outside of West Seattle before 22 years from now.</p> <p>It's also regrettable that there is no concrete plan for cross-town Ballard to UW service.</p> <p>TAX US MORE! Build the rail we need now!</p>
NORTH KING COUNTY	<p>20 years is way too long for the project to be completed. I would support even higher taxes if it meant light rail completed sooner!</p>
NORTH KING COUNTY	<p>This all needs to happen MUCH faster. Opening the UW link is good for publicity, but calling it "ahead of schedule" is a slap in the face to those of us who have supported light rail since it was on the ballot in 1994. If we'd had projections of 22 years then, it would be done now! But now it is too long to wait. It seems ludicrous that this can't be done faster. Imagine if we needed light rail as a war effort--it would be done in a year, no problem. Why can't we muster a little urgency? I think more people would vote for the plan if they thought it would be done in their LIFETIME. I mean, really. It's a whole generation! At this rate we will NEVER get on top of the transportation problem.</p>
NORTH KING COUNTY	<p>I understand that the most congestion is caused by people who live in the suburbs and commute into Seattle, however, ALL the people I know who live in the suburbs say they will never ride transit no matter how reliable. Meanwhile people in Seattle want more reliable transit and are being considered the lesser priority. I think unless ST can come up with a way to get suburban dwellers to actually use all the transit options then the priority should be shifted to Seattle/Tukwila lines. I've also noticed that people in suburbs south of Seattle seem to be more willing to look into riding transit than north side and east side residents (at least that's been my experience). I also don't understand why the light rail is being built on I-5 along the same route as the rapid ride option. Seems redundant, shouldn't we spread the options out so that we don't have traffic backups getting to I-5 and over-full park and rides along I-5?</p>
NORTH KING COUNTY	<p>Would love to see all projects completed within 15 years if possible (20 max). I realize this is difficult given the funding constraints, but I have a feeling being able to complete everything by ~2030-2035 will make ST3 an easier sell to voters given the high pricetag. Please know I strongly support ST3 and am extremely hopeful that it passes -- I live in West Seattle and commute to downtown every weekday by bus, so light rail would be huge. ST3 would bring a significant advancement forward in our region's mobility -- thank you for all of your work.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Simply, the light rail needs to be expanded at a much quicker rate. WADOT has proven they are incapable of making positive improvements to our streets and highways and public transit is the strongest solution to a booming city.
NORTH KING COUNTY	Spend more and do it sooner! 12 years for the earliest light rail is way too long, not to mention 25 years. This city will be shutdown with gridlock in the next few years.
NORTH KING COUNTY	As a resident of West Seattle, I would much rather see the West Seattle rail connection prioritized over Redmond. The emphasis on West Seattle being an urban village means we'll probably hit the limit of how many people can be accommodated by BRT well before 17 years from now, and the highway connections to downtown are already overburdened.
NORTH KING COUNTY	This timeline is a joke—22 years to get light rail to Ballard and 25 years to Issaquah? The entire region will be locked in gridlock for another generation while Sound Transit works to fix problems from the past. The timeline for all of the projects need to be cut in half or it is impossible to view the proposals as a serious attempt to improve how people move about the region and reduce the reliance on cars.
NORTH KING COUNTY	We need light rail to West Seattle MUCH sooner. Moreover, Admiral and Alki are completely cut out of all light rail plans and this is very troubling. As it is, there is minimal to no fast bus service to downtown from these neighborhoods except for very limited peak hours. It is unacceptable that it takes over an hour to get downtown
NORTH KING COUNTY	It's hard to support a plan that won't be implemented for 25 years, we need solutions now! There's gotta be a way to speed this along.
NORTH KING COUNTY	This takes too long, we'll likely leave Seattle next year. The two main reason are the subpar public schools which don't receive enough funding, and also the traffic gridlock that has just become unworkable. My wife works on the South end of downtown and regularly has three Rapid Ride busses in a row pass her station without stopping b/c they are at capacity. This plan is nice and comprehensive, but you need to add steps that can give some relief within 1-3 years.
NORTH KING COUNTY	Faster! Faster!
NORTH KING COUNTY	My only concern is that this needs to happen more quickly. 17 and 22 years for West Seattle and Ballard light rail is crazy! I'd say do whatever you need to get those projects completed faster.
NORTH KING COUNTY	The whole project doesn't go fast enough, especially to important places like West Seattle and Ballard. Tax me more, but get it done much faster!
NORTH KING COUNTY	Projects that serve more people should be prioritized. This means building in-city projects like a Metro 8 line, an east/west Ballard/UW line, and connections from Ballard and West Seattle to downtown first.
NORTH KING COUNTY	The timeline is too long. Twenty-two years to get to Ballard? Really? That's just crazy. The same goes for the other parts of the project that are projected to take that long as well.
NORTH KING COUNTY	I'd like to see Ballard and West Seattle service arrive before 22 years - it's highly dense and close to downtown, there's no reason people should have to drive.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	This needs to get done sooner! I understand that you can't really build Everett before you build Lynnwood, but West Seattle, a loop from downtown to Ballard to UW and the Eastside routes could get done simultaneously to other light rail expansions. I started riding my bike from Bryant to Sodo, taking the light rail from UW to Pioneer Square this week. It's great. More light rail, faster!
NORTH KING COUNTY	In general, I love the project list and hate the timelines. Many of the projects have been badly needed for a decade or more, and it's disheartening to know that we'll have to wait a generation for them to be complete.
NORTH KING COUNTY	My major complaint is the timeline is not aggressive enough. Personally, I am willing to pay more in taxes to get these items done sooner. My second complaint is that by the time you are done the city will have changed too much, I would prefer to fund a ten year plan. My third, and more minor of a complaint is you are missing neighborhoods like Fremont and Lower Queen Anne.
NORTH KING COUNTY	We need this stuff sooner - we should have the Roosevelt station up and running, expansion to Northgate and beyond.  Thanks!
NORTH KING COUNTY	Need more aggressive timeline
NORTH KING COUNTY	It feels like many of these projects are going to take a long time. For example, a light rail to Ballard in 2038 does not really entice me to want to increase taxes. However, the same thing by 2026 is more compelling. Shouldn't we improve the light rail capabilities within the city before we start branching out?
NORTH KING COUNTY	This project should have been completed 25 years ago, not finished 25 years from now. I believe this plan doesn't focus enough on the current situation or have an effective plan to deal with the increase in population and resulting use of mass transit in the future. The trains and platforms are already packed as is, if you expand mass transit then it will be all the more so. That said, link light rail should have bigger stations, longer cars and trains should come more often. Also buses should be removed from the downtown transit tunnel so that the light rail is not delayed. And it should all be completed in no more then 15 years. In 25 years we should be talking about further expansion, not a completed expansion. I feel the current timeline doesn't provide enough of an incentive for me, as I will be practically considered elderly by the time it is finished and even then, it will not be enough. There are plenty of unemployed and underpaid workers in this state that would gladly accept a position working on this project. Considering this, it should not be completed in phases but every portion of this plan should be implimented immediately and connected to other portions as completed. I will not be voting in favor of this plan without compromise.
NORTH KING COUNTY	FASTER!!!!!!!!!!!!!!!!!!!!!!!!!!!!
NORTH KING COUNTY	Build it faster!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Charge \$400/ year and lets just knock this out before I'm 53... How about 12 years. I don't even know if I will be living here in 25 years! Maybe Start "City of the Future, Today." Go Fund me for a Seattle Transit System? haha. Thanks for your Hard Work! This plan is going to be amazing!
NORTH KING COUNTY	Every effort should be made to speed up implementation of light rail. The biggest obstacle to this plan passing is the extremely distant completion times for much of it. Waiting longer than 12-15 years is going to cost a lot of votes.
NORTH KING COUNTY	I just wish we could get it all faster :)
NORTH KING COUNTY	Stated priority order spreads focus thin. The overriding goal should be intelligent enough to look at whole region impacts in the long term. Projects should be implemented in large part to increase density in the Urban Growth Area. Sound Transit's actions will be the biggest reason the UGA is constrained, allowing the Seattle area to move into a more efficient, economical and sustainable 21st century urban system. On the other hand, prioritizing regional transit will cause the UGA to expand, which will overextend the system and over tax the environment. Projects that will, in the long term, facilitate intelligent increases in density is absolutely essential. Abandon projects to places like DuPont and Redmond.
NORTH KING COUNTY	25 years is too long. This needs to be a Ten year plan. Ballard to US with real rail is a must
NORTH KING COUNTY	I was excited for the UW and Husky Stadium stations when first moved to Seattle. Now UW is open and U District is still 5 years away, but I moved out of the U District 3 years ago and it doesn't help me anymore. As a ferry commuter, I only really go to Seattle neighborhoods that I can get to easily on foot. I've already started visiting Capitol Hill now. I am very excited for the Ballard and West Seattle lines, and I hope for more horizontal connections, like U District to Ballard. But now it looks like my future children will be my age before that happens. Is there any way to bring these deadlines closer?
NORTH KING COUNTY	Plenty of parking and bus service to rail stations
NORTH KING COUNTY	Local government binding authority should be incorporated to speed up the timelines of projects.
NORTH KING COUNTY	I would absolutely support paying more in order to obtain a sped up timeline, aka enjoying this while I have a little youth in me! Also strongly support connections to White Center and Bellevue (Community, still?) College, which were on some earlier renderings. Also where is UW Tacoma? Is that even feasible?  THANKS!
NORTH KING COUNTY	I feel that the timeline for low hanging fruit projects such as the infill stations is much too long and any method that could be used to accelerate those should be put into place. It seems absolutely ridiculous to me that the timeline for completion of the Graham Street station, while not likely the highest priority item on the ST3 list, is a full 20 years away. It's the only thing that gives me great pause in supporting this massive project. Seattle needs to be a more agile environment for infrastructure change!
NORTH KING COUNTY	Extensions of the light rail system to Ballard and West Seattle are more important and should occur more swiftly than they would in the proposed project timeline.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	We are so far behind cities like Atlanta, or even Portland. Seattle is a fantastic city. Not sure why it has taken so long to catch up. Not sure why it will take 17 years to get light rail to West Seattle. The lack of convenient light rail is a drawback, and a disappointment. Park and ride so people can get to the airport conveniently would be great.
NORTH KING COUNTY	The timeline is WAY TOO SLOW. We need these connections sooner rather than later, especially along busy corridors like West Seattle and Ballard to Downtown, and Bellevue to Overlake/Redmond. ST needs to explore options to speed up the development of these lines, and to start building as quickly as possible.
NORTH KING COUNTY	Timelines must be compressed. 17 years for W. Seattle to Downtown is too long. Ballard to Downtown is also too long.
NORTH KING COUNTY	I think that if all this was completed tomorrow we would have adequate transit in Seattle, which means that when it is finished 25 (!) years from now it will be completely inadequate. You need to dramatically speed up the timeline for light rail.
NORTH KING COUNTY	We need GRADE-SEPARATED rapid transit to Ballard YESTERDAY. I'm not voting for any plan that runs light rail on surface streets through Seattle, that's obscene. I'm not voting for a plan that doesn't get light rail to Ballard in a ten-year timeframe. Period. I'd rather move to Portland- what's the point of voting for this system that won't help me until I'm nearing retirement? Absolutely ridiculous.
NORTH KING COUNTY	Can you speed up the completion? We'll all die in a traffic jam and be six feet under by the time it's completed!
NORTH KING COUNTY	Faster, please!
NORTH KING COUNTY	We need this to happen now, not in 10-25 years. The population boom is happening in our region now and unless mass-transit can keep up, we are going to continue experiencing traffic, congestion, fuel pollution, and overcrowded buses and trains which barely fulfil our transit needs. When can building begin? Yesterday is already not soon enough.
NORTH KING COUNTY	The timeline for projects within Seattle is extremely disappointing, and it will be difficult to get people to vote for a system that will take so long to get to them.  In addition, a Ballard to UW light rail line must be included in the final package, as east-west transit is a mess in the city and such a line would immediately have massive ridership. There also needs to be rail service to Belltown on the Ballard line, with SLU shifted to alight rail line based on the Metro 8. Finally, the Interbay section needs to move off-grade to ensure speed and reliability.
NORTH KING COUNTY	everything needs to happen faster. looking at portland and vancouver why cant we get it done quickly, too. think of max between 1998 and today!!!
NORTH KING COUNTY	I'd like to see information about what the package would cost if the timelines were shortened. I wish we were talking about doing more than one thing at a time, and get the whole thing done more quickly!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I really don't want to wait 20 YEARS for the Graham St station for LINK. The City of Seattle has made providing funding for the Graham St station as part of their Move Seattle levy -- I think given the city's willingness to chip in part of the costs, it would be advantageous for Sound Transit to speed up the timetable for this station, rather than waiting two decades. Presumably it takes less to build stations for existing track? Thank you.
NORTH KING COUNTY	The Seattle to Ballard line needs to be completed sooner!!
NORTH KING COUNTY	This proposal is suburban bloat. You should be embarrassed.
NORTH KING COUNTY	More projects, even if it's only segments of new light rail or BRT lines, should be opened faster (under 10 years from now).
NORTH KING COUNTY	22 years for light rail to reach Ballard is simply unacceptable, and as much as I support expanded transit, this could cause me to vote AGAINST ST3. We voted for and paid a lot of taxes for a light rail system (monorail) linking Ballard to Downtown to West Seattle that was supposed to be online almost 10 years ago. In fact, we voted for it four times! These lines should be FIRST to be complete not last, and don't underestimate how pissed off we all are still in Ballard and West Seattle. I will be 75 years old in 22 years. Just get it done! Ballard is filling up with huge new buildings. Our parking is paid, our streets are jammed, and our patience is gone. And while you are at it, how about INCLUDING the Ballard-UW light rail line NOW! It doesn't need study. It needs building.
NORTH KING COUNTY	Question # 12: I would strongly support a more ambitious (but doable) schedule. The sooner, the better!
NORTH KING COUNTY	The arguments made for why we should support ST3 are all great arguments -- but the projects don't correlate with where the problems are worst! Focusing on areas of intense congestion and demand will be more effective; limited projects benefitting Seattle not coming online for 20+ years is not acceptable. LRT is great for promoting car-free life only if it a dense enough system with connections where they matter. Focus should be given to where these connections exist and not to communities who have chosen to locate external to areas with transit service. This plan fails to make a difference where it can. Also - NO PARKING. You cannot promote car-free options and transit-focused, walkable areas while still discussing parking. That is a joke.
NORTH KING COUNTY	My main concern is this: We need faster implementation of light rail! I am especially concerned that stations to be built on the street along lines that ALREADY exist, such as the Graham Street Station, would take so many years to build. It is a relatively simple site, requiring property acquisition and construction of a station, which I would think could be finished more quickly. Also, it is in an area that serves a population that is greatly dependent on public transit and needs this alternative more easily available.
NORTH KING COUNTY	I think east/west light rail projects (Ballard, Bellevue, West Settle) should be prioritized above further north/south expansion. People living in already dense population areas are more likely to be able to rely solely on public transit if they had a more complete system.
NORTH KING COUNTY	Additions to the current line that connect the city are most crucial from a density perspective. I feel very strongly that the extension to Ballard and West Seattle should be the next two projects after the Northgate extension.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	It just takes too long. So many people I work with want these projects, but the timelines make them very skittish. I'm a regular transitblog reader and transit nerd who wants these projects to pass.
NORTH KING COUNTY	The projected completion dates are too far out. Speed up the construction by what ever means possible. ST takes too long to design and construct projects. Find ways to streamline the process. Similar projects in other parts of the country and the world are completed in much less time than ST seems to require. Do some pre-construction activities in parallel instead of sequentially. Give contractors incentives to finish work early. Pay bonuses for early completion.
NORTH KING COUNTY	I am appalled at the time line. As-is I plan to vote against the proposal. 22+ years for rail to reach Ballard and west Seattle is unacceptable.
NORTH KING COUNTY	I'm disappointed that this plan is so unambitious! We need far more connections within the dense urban areas, far quicker completion of the major projects, and far less attention to park-and-rides which turn rail into a sprawl enabler. I would be delighted to pay more for a plan that gives Seattle meaningful urban transit before I expect to retire.
NORTH KING COUNTY	I support whatever we can do to reduce traffic and commute times. We need to do this as quickly as possible. I would like to see the timeline for these projects reduced by at least half. If we could find a way to channel even a fraction of the \$ people spend on personal cars every year then I imagine we'd have more than enough money to build a world class transit system. We need to get people out of their cars now. Traffic is eroding quality of life. I recently have switched to using pubic transportation because sitting in traffic is "driving" me crazy! using transit to and from work is not easy for the areas I must travel but I am at the point where I am willing to spend a longer time in the bus then behind the wheel of a car. Thank you for addressing this issue.
NORTH KING COUNTY	Please speed it up. Maybe work 24 hrs, 7 days a week can speed it up. It would be great if the build out would take half as long as each project states.
NORTH KING COUNTY	First I wanted to add that east-west connections across Lake Washington and within the city of Seattle are important. The schedule is the main sticking point here. 22 years for light rail to Ballard? 20 years for light rail to Everett? With the rate of growth in the region being 50,000 people/year even if that is an average of 25,000 people/year over the next 20 years we are talking about 500,000 more people by the time most of these projects are operational. Not an aggressive enough schedule in my opinion. I believe people would be willing to pay more to see more immediate results.  As an anecdote, think about what China has been able to do in the last 20 years. If you're willing to devote the money, massive projects can be completed more quickly and efficiently.
NORTH KING COUNTY	I feel like the timeline is a little long, but under-promise, over-deliver, right? Also, there should be more of an investment in the link between Ballard and UW servicing Fremont in Seattle, otherwise it will become a forgotten community.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	More mass transit, sooner, please!
NORTH KING COUNTY	Ballard and West Seattle should be a higher timeline priority. Particularly Ballard, as that's already where a significant amount of new development is occurring. There is already more than enough demand in these areas to support exclusive ROW rapid transit. Seventeen years is far too long to wait for adequate transit in these neighborhoods.
NORTH KING COUNTY	<p>Ballard to downtown in 22 years is absurd. It is far and away the most important part of the whole system: it's the only project that connects places everybody goes to to the light rail network, as opposed to places people only go to who live there; it's the only project that connects high density, walkable neighborhoods, of the sort that support the volume light rail can carry, of the sort where people interested in living without cars choose to live; it's (almost) the only project where light rail will be time competitive with driving, which is the threshold where lots and lots of people will use it. Ballard to downtown (AND UW to Ballard!!) needs to be the top priority for ST3, and completed on a timeline that reflects that.</p> <p>I would not oppose ST3 on that basis alone, but the inclusion of miles and miles of light rail to places that can't generate enough ridership without parking, and the decision to build that parking and thus ensure that those palaces remain the anonymous suburban sprawl zones that they currently are, rather than developing walkable neighborhoods with a sense of place, and the absence of east-west projects (Ballard to UW) makes it so that I cannot support ST3 as proposed.</p> <p>I grew up here and love it, love it beyond words. The ability to live in a rich, diverse city, and still be close to nature unique and unmatched by any other city in North America. Since I can remember, though, the mountains have been growing further and further away, as the space between here and there has been filled with strip malls and walmarts and the traffic they produce. Done right, light rail can slow this trend by supporting urban life, helping people chose the richness of real neighborhoods over a big house with a garage. But ST3 is a package that will encourage the sprawl that is poison to our environment, our city's character, and our happiness.</p> <p>I cannot support a package that puts so little emphasis on transit within the city, so little on building urban character where it does go out into the suburbs, and so much on serving cars that are the problem.</p>
NORTH KING COUNTY	Ballard light rail should be moving up in the timeline, coming on sooner than the 22 year timeline noted. Ballard has seen explosive growth recently, such that bus traffic eventually will not be able to keep up, which will push more people to hop in their cars and create even more traffic for even busses. The Ballard line would serve Amazon (SLU), the new Expedia campus (Interbay) and many of the innumerable businesses that will start to pop up as Ballard and the areas between there and downtown take off. I would request that some more priority be added to the Ballard line.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The timeline is obviously frustrating. These projects shouldn't be 20 years out. They should have been started yesterday.
NORTH KING COUNTY	Move up timelines for Ballard and West Seattle expansion from downtown.
NORTH KING COUNTY	Speed up the construction timeline of the overall plan.
NORTH KING COUNTY	It's messed up that many of the people voting for and paying for light rail will be retired by the time it's in use. Look at all the statements above about why ST3 is so important, GHG gasses, traffic, quality of life etc. Are you telling us It's critical but not so critical that we can't wait 12-25 YEARS for it? There's a huge disconnect there, and frankly I can understand why people would vote against something like this if they personally will never benefit from it.
NORTH KING COUNTY	Timeline needs to speed up. 25 years is a long ways out considering how fast things are changing. Why not put in express bus routes along the proposed light rail lines in the meantime. Allow shoulder use and design signals to allow buses to have the right of way much like the light rail does down in the Columbia City area. Cars stop when a train is passing through - why can't that be the case for buses too?
NORTH KING COUNTY	I am in favor of more transit, but 22 years to get to Ballard? Seriously? It's the 21st century, we should really be able to complete these projects in a much shorter timeline. The statements above talk about no more room on our roads, and grade separated transit is a good way to go. I still want my monorail, less cost to go above ground, faster to build than light rail, never gets stuck in traffic like the new street cars do. Just because it's an old idea, doesn't mean it's without merit. It would have been built by now, had the mayor shown more commitment. Why can't we choose a faster option than the slow as can be light rail plan? 22 years, by the above figures, comes to 915,200 more cars on the road before the Ballard line is done. 22 years, in this day and age, is just pathetic, sorry.
NORTH KING COUNTY	I highly support this massive, but urgently needed investment in Seattle's transport infrastructure. It is frustrating that it will take so long for some of the light rail extensions to be completed. We're building a house in West Seattle right now, but by the time the light rail is there, I may be retired and living somewhere else and my kids are off to college. Your process in surveying people doesn't make a lot of sense for a few reasons: You make people compare the priority of low-hanging fruit that can be implemented in a year or two with huge infrastructure that takes a generation to build. Also, people will prioritize investments that benefit them based on their current home address, so as a result, your ranking will just reflect survey participation and not actual need or benefit. Third, most people's home address will have changed by the time the light rail is built so what's the point in asking them about their location and preferences? Instead, I would recommend to make decisions based on objective data of projected population distributions, cost/benefits to serve them and other factors.
NORTH KING COUNTY	I'm not sure what the current and projected growth is for each of these areas but the priority should be determined by that.
NORTH KING COUNTY	Why is West Seattle higher getting light rail faster than Ballard when both already have a rapid transit line?
NORTH KING COUNTY	Project needs to go MUCH FASTER. C'mon people let's get 'er done! We need a progressive taxation system (except for high taxes on gasoline) that enables us to move at real speed. The timeline is not at all acceptable.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Concentrate system development on the highest demand areas like Ballard and West Seattle.
NORTH KING COUNTY	Please build light rail more quickly! I don't want to be 65 when light rail gets to Ballard, though I'll probably need it then more than ever. Also, I am frustrated by this survey. Please don't ask me to evaluate a project in north King County against one in South King County - how am I (a Ballard resident) to know which is more valuable to our transportation network? You haven't provided any metrics (like number of riders who will change from car to transit) to help in the evaluation. I think this is a MAJOR flaw of the survey.
NORTH KING COUNTY	Timeline seems terrible. Light rail to Ballard in 22 years? Doing it in a very expensive and slow manner? Who cares about interbay which might be under water by the time this finishes? Why not connect Ballard to the light rail system via an EW connection from Ballard -> Fremont -> UW?  Emphasis on parking seems absurd given likely trends in next 20 years (automated vehicles)  Paine Field connection seems pointless and completely depends on Boeing. If Boeing wants it, they should pay for it. What happens if they successfully move to NC?
NORTH KING COUNTY	Yes I'm biased, but ST3 needs to prioritize certain improvements over others. Why will the Ballard line not be completed for 22 years!?! If the money is going to be spent anyway, work on the projects simultaneously, or if that isn't an option, prioritize the areas in most need... like Ballard!!!
NORTH KING COUNTY	The timeline is too slow for the regional growth. The Seattle metro is behind on public transit and needs to invest quickly to catch up. Light rail needs to be in Ballard sooner than 22 years or the neighborhood will become unlivable.
NORTH KING COUNTY	When I saw the plan and the timetable, I felt discouraged. I strongly support rail transit, but it works best in the densest areas. Trying to spread light rail from Everett to Tacoma should not be the goal. More light rail lines within 5-10 miles of the Seattle, Tacoma, Everett, and Bellevue city centers (in order of decreasing priority) should be the focus. And 2033 to reach Ballard and 2038 for West Seattle? Too little and too late. I may vote against because of these factors.
NORTH KING COUNTY	Timeline should prioritize Ballard and West Seattle Lightrail, I-405 BRT. Would like to see a decreased timeline for those project in more dense areas such as these. Priority should serve the most dense and increasingly dense areas as growth in the city continues to surpass those in outlying suburban areas.
NORTH KING COUNTY	Timetable for light rail is way too long. We need to accelerate at the cost of bus service.
NORTH KING COUNTY	St3 as it stands is unacceptable due to ridiculous timelines for certain projects like Ballard to downtown. Also, transit needs to come first to neighborhoods that have played by the urban density playbook and have the ridership to support it. Absolutely ridiculous that Ballard is last in line.
NORTH KING COUNTY	If the projects could be completed faster if focused on one extension at a time, I would strongly support it. The 10+ year time line is where you are losing support. Also, lack of public/affordable parking is a huge factor in people not currently using Transit.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I can't vote for a plan that doesn't put a 7 mile rail extension to Ballard until 2038. What will the population of Ballard be in 2038? These timelines are glacial and rather embarrassing for our region. If it costs more to do it sooner we should pay more, as traffic is only going to get worse but people born tomorrow will still not be able to take light rail to Everett from Seattle before they graduate college. Please dream bigger.
NORTH KING COUNTY	Ballard is growing so quickly that the 22 year timeline is far too long.
NORTH KING COUNTY	connecting neighborhoods within Seattle (ie: Ballard and W Seattle) should be done before building lines connecting neighborhoods that are both outside of seattle
NORTH KING COUNTY	20 years is way too long. Unfortunately we have behind the 8 ball for decades.
NORTH KING COUNTY	Would love to see improvements in City of Seattle limits sooner rather than later.
NORTH KING COUNTY	I agree with pretty much with the entire plan in its form. Trains *are* the future of transportation. However, I think the timelines for completion are completely out of touch with our today's reality. I don't think the city has 30 years to spare; we will lose our competitive advantage against many other cities that are catching up way before we have the first bus available. The city is already experiencing major transportation issues, and densely-populated but poorly-communicated neighborhoods are already experiencing worsening road congestion, even if taking the bus (just try taking route 21 or C-line from West Seattle before 9:30 AM, or returning at 5). I believe the Council should look for funding alternatives that could achieve a more aggressive timeline.
NORTH KING COUNTY	The West Seattle link rail should have higher priority on a sooner completion date! The amount of residential construction has exploded over the last few years and the developers are not done, the houses and apartments and condos keep popping up at an alarming rate. We have one bridge to move all those growing numbers of people in and out of West Seattle every day who go to the I-5, SR-99, and downtown! The numbers of drivers are skyrocketing by the day, and the result is that the morning and evening commutes are getting longer and longer (30-40 minutes to move 2 or 3 miles, and if there is an accident, even longer!).
NORTH KING COUNTY	I would gladly pay 5 times the amount proposed to have the system completed faster. The system proposed is what is needed today! In 25 years, it will be inadequate, needing further expansion. The entire proposed system needs to be complete within 5 years.
NORTH KING COUNTY	20+ years for this plan is silly. Self driving cars will make this all irrelevant in that much time.
NORTH KING COUNTY	THis needs to be done FASTER! By the time rail gets to us we'll be too old to use it and yet we are being asked to fund it and our commutes are literally killing us.
NORTH KING COUNTY	The project mix is just about right (add Ballard to UW, please) but the timetable is a major disappointment. 25 years is way, way too long a timetable, since we began approving taxes for light rail 20 years ago. I'm afraid this will badly undercut support for the proposal and, well, 25 years is just too long. 15 years?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>My family and I are very supportive of the ST3 plans. 25 years is a really long time to wait for all of this to happen. We need more light rail and improved transit NOW. West Seattle has grown a lot recently and getting better transit sooner than 17 years from now will be necessary to avoid traffic that is already really bad on the West Seattle bridge. Due to the high rates of rent in Seattle, many people have been forced to live in South King County where there are fewer jobs available. The utter lack of meaningful transportation connecting places like Kent and Tukwila to Seattle contributes to inequity and growing poverty.</p> <p>Net, we need these developments a lot sooner!</p>
NORTH KING COUNTY	<p>Ballard in 22 years is too long, we needed light rail 22 years ago, there has to be a way to complete this in 8 years or less, or they need to stop building 56 new units on lots that a year ago had only a single house, on practically every street in the neighborhood. 22 years is a long time to ask a homeowner such as myself to pay property taxes for a system I will be too old to use once completed. The buses in Ballard are unreliable and overcrowded as is. As much as I want to vote for this project, this timeframe is a huge disappointment. They built the transcontinental railroad in 6 years, why 22!! It's very upsetting.</p>
NORTH KING COUNTY	<p>Build it faster, 25 years is too long. We need to catch up and get ahead of the mess.</p>
NORTH KING COUNTY	<p>Please do whatever you possibly can to speed up these time frames. 20+ years until completion of some of these projects is absolutely ridiculous. 10 years would be a lot more reasonable. People paying for this should at least be alive to use it!</p>
NORTH KING COUNTY	<p>We have a massive problem TODAY! Waiting 8-25 years is too little, too late. This timeline is not acceptable! These plans will be irrelevant by then, and feel like a bandaid on a bullet wound.</p>
NORTH KING COUNTY	<p>Grade-separated light rail inside the city should be prioritized--if commuters from outer suburbs can't land inside the walkshed of their destination, the utility and the attractiveness of the system goes down significantly. I know that if I needed to transfer to a bus (which is may well be stuck in rush hour traffic) There's an good argument that the car will be more comfortable and take less time. Additionally, the impact of highly-reliable grade-separated transit is highest in the densest areas with the most congestion. Step 1: connect all the urban destinations and major school/job centers, and build park-and-rides at the edges. Step 2: build the lines out to hit the suburban sprawl as demand and funding comes on-line.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

<p>NORTH KING COUNTY</p>	<p>It is essential to the region for this plan to be expedited. 25 years is way too long, but it is a better starting point then not being planned at all. For building trust with citizens of the region, showing that Sound Transit is committed to developing our transit system with a citizen first approach and not encumbered by bureaucracy, you need to show year over year that the timeline for this is getting shorter and shorter. You need to show, not say, but show that Sound Transit is not satisfied with a 25 year timeline, but that this is a starting point. I personally recognize that a shorter timeline would be a civil engineering miracle to pull off in the current planning climate of this region, but the region is capable of it and it's what we need. Are you capable of shortening it? It's not enough to do the job and have a plan. Make it better. Show that not only is your plan the best, but you are the most committed to getting this done as quickly as possible for the region. Do not hide behind this timeline or hold it up as the culmination of the years of hard work and strategic thinking (even though it is), but that it's the starting point. Blow the 25 year timeline out of the water. This needs to happen in a decade and that is going to take sacrifices from us all. Show us you can do it. Show us how to make this a transit revolution with grass roots efforts and citizen campaigning. Public comments and the ballot box should just be indicators of movement, not the driving force. What more do you need from supporters of this to make this happen faster? To gather more supporters now? For the citizens of the region to own this and make it their own investment together? We need to know that this is the way you are thinking of this and we need to see clear ways to get involved and get as many people on board so this doesn't fizzle out in November. I want transit for my children and grandchildren, but I want them to know it was important enough to get it going for ourselves and the main reason I see this failing on the ballot is a timeline and people complaining that it'll take too long. And that would be tragic because 25 years is closer than our current never. Show us how the region can speed up the timeline even as we move towards November. What city officials do we need to call and write to? How do we do more than show our dissatisfaction of a long a timeline? How do we turn that into action to shorten it? A quarter century cannot be the only way. It very well may be the way we, as a region, eventually choose to settle, but we need to know what it would take to get this light rail expansion in 10 years. Today, in 2016, I will not settle for a 25 year timeline, but I will vote for it as a starting point in hopes that Sound Transit and the people of Puget Sound can work together to expedite the expansion of transit and be an example to other cities facing long term traffic problems.</p>
<p>NORTH KING COUNTY</p>	<p>I feel that if it takes 25 years to complete a systems to cut back on traffic, increase transportation through out the region, many cities will continue to be over congested before the system is ever complete. I would not want to invest in something that will take 25 years to complete, when, for the rest of my life, I am having to sit in traffic, even with light rail, and computer tail, cars will still be necessary to reach those stations, requiring more available parking. Putting in rail without additional parking will not help the system overall.</p>
<p>NORTH KING COUNTY</p>	<p>The entire plan needs to be expedited...the timelines need to be much shorter...more money needs to be spent (federal, state, local) to support the shortened timelines.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	22 years is too long for updated transit to Ballard. My husband takes public transportation every day to downtown for work but he rarely uses rapid ride because it doesn't come often enough to warrant the longer walk to/from the stop. The bus often runs late and is always filled to capacity. During the summer he has switched to biking as he can go faster on bike paths than the bus can go through South Lake Union traffic. Many of his coworkers live in Ballard as well and have similar commute experiences. We have lived here four years and continue to see many new housing development. As more companies open new offices in the city center this popular walkable family friendly neighborhood will continue to swell.
NORTH KING COUNTY	If service to Ballard will not be provided for >20 years than the city needs to stop allowing densification of the area. Twenty years is an embarrassment to this technology-driven city.
NORTH KING COUNTY	The time frame to get light rail to some very dense neighborhoods in seattle is so long. This is where growth will be coming, it makes sense to focus here first.
NORTH KING COUNTY	Extremely too slow to get Ballard and West Seattle online. We need service to dense neighborhoods faster than we need it to less densely populated suburbs. The general consensus I hear from the 25-40 (years old) demographic is that the slowness of implementation to Seattle neighborhoods is hurting their desire to vote this package in!
NORTH KING COUNTY	The timeline and cost seem far too much for widespread support. It's not that I don't support the plan for expanding ST, but we needed something yesterday and T3 doesn't accomplish this very well. I believe light rail should be expanded, but I also think metro definitely needs to be expanded for everyone to access public transportation. I don't believe we should be wasting large amounts of dollars for state of the art stations, we just need something that we can get going. The more non-grade transportation that avoids traffic, the better. These things will convince voters to support T3.
NORTH KING COUNTY	Raise taxes more and implement the plan faster. Why wait until we're dead?
NORTH KING COUNTY	Light rail must be the priority since it's the only system that doesn't get bogged down in the current traffic mess; everything else is a stop gap. The most common opposition I hear from light rail opponents is that it doesn't go anywhere - they don't feel like it can actually get them around. The faster light rail can be prioritized and developed the faster the region will support it until we hit a critical mass where the system can effectively support everyday needs for a large portion of the population. The overall network plan is great, but the faster the rail system can be developed the better.
NORTH KING COUNTY	Build the core before building the periphery to help stem urban sprawl.
NORTH KING COUNTY	Critical needs exist currently in Ballard and West Seattle - These portions of the project should be given first priority and the longer-range parts of the project (Tacoma, Everett, East side) should be given bus rapid transit. Ballard has experienced a huge increase in density in the past 10 years and the public transit infrastructure is not there to support it. If you wait 22 years to develop that part of the plan, that part of Seattle will be a colossal mess.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The current plan for completion to Ballard is too long. I ride the bus to downtown everyday for work but I rarely use rapid ride because it doesn't come often enough to warrant the longer walk to/from the stop. The bus often runs late and is always filled to capacity despite changing my work schedule to commute during off peak hours (11am-7 or 8pm). During the summer I have taken up biking as I can easily pass South Lake Union traffic. Many of my coworkers also live in Ballard and have similar experiences. As my company and other hiring competitors continue to open new offices in the city center this popular neighborhood will keep creating more housing to meet demand.
NORTH KING COUNTY	The West Seattle to Downtown light rail should be prioritized. In particular, access into and from neighborhoods with lower median incomes should be prioritized.
NORTH KING COUNTY	The Ballard line is simply too long. That needs to be the first leg completed, even if it costs the most with the downtown tunnel.
NORTH KING COUNTY	ST needs to take a serious look at shortening its planning and implementation timelines. They are far too long when compared to other places. Public participation should be robust, but let's work to front-load that work and use the ballot measure as a stronger mandate to plow forward. Work with state agencies and jurisdictions to accelerate and streamline EIS and other permitting requirements. Stretch your bonding capacity without seriously threatening your credit rating. If the measure passes, use the demonstration of public will to invest in transit to push for greater up-front federal support -- both in terms of funding and with help in aggressively pursuing completion. If a \$50 billion measure passes, you'll be able to easily say "people want transit now" -- so make it happen now.  Having said all that, ST has gone a long way in restoring its reputation as a government that can deliver on (revised) promises after its rocky start. The "under-promise, over-deliver" strategy has served you well. I wouldn't want you to sacrifice public confidence, safety, or well-thought-out design all in the name of finishing quickly.
NORTH KING COUNTY	18 years until light rail reaches West Seattle is ridiculous. We are expanding at such a rate that the West Seattle bridge will be a parking lot within that time.
NORTH KING COUNTY	Please prioritize the Ballard light rail project. 22 years is too long to wait.
NORTH KING COUNTY	17 years!? Why are we not acting with more urgency? I'm 36 and I'll be flirting with retirement by the time this current light rail plan will be rideable. I can't imagine commutes from/to west Seattle in 10 years without light rail as a component!  To a lesser extent but still important to note-- my family will pay for the improvements but will not have a rideable train before my infant is off to college.
NORTH KING COUNTY	Timelines are too far out. West Seattle and Ballard have a more urgent need than Bellevue and Redmond
NORTH KING COUNTY	As a homeowner without a car in Ballard, the 20+ year timeline sounds way too slow to me. Also, given WA's regressive taxes (no income tax, already high sales tax), I'd oppose increasing our already high sales tax.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>Mostly the timeline is way too slow. I'm afraid people will vote down something that is 20 years in the future! We need to solve this NOW!</p> <p>Also, I'm disappointed by the minimum light rail in Seattle. We need a lot more. Or SDOT needs to go it alone!</p>
NORTH KING COUNTY	<p>I hope that ST finds ways to accelerate funding for light rail, or considers RapidRide D "express" buses. Even with the current expanded service, too many buses are at crush load during rush hours with Ballard's increasing density.</p>
NORTH KING COUNTY	<p>Sooner!</p>
NORTH KING COUNTY	<p>The Ballard schedule is not going to fly if you want my support. The Ballard project, including an extension to 65th, needs to be built sooner (completion by 2028 or sooner). Otherwise, you can expect this measure to lose support from me and a lot of the people who have been consistently most willing to tax themselves for mass transit.</p>
NORTH KING COUNTY	<p>Zero confidence in Sound Transit to finish anything on time or on budget instead of constantly revising schedules / budgets to try and fool people into thinking they do. We NEED light rail - but 50 billion is an insane ask, and you will price people on fixed incomes out of their homes. Try building out light rail incrementally - and prove that you can be responsible with OUR money. Buses don't cut it.</p>
NORTH KING COUNTY	<p>I think we need comprehensive mass transit much sooner than this plan proposes.</p>
NORTH KING COUNTY	<p>Sound Transit should look for ways to speed up the timelines.</p>
NORTH KING COUNTY	<p>These timelines are SO far away it's hard to conceptualize how they will affect the region. What bus changes will happen in the meantime? What changes to car traffic will happen? These would be helpful for context, if any are planned.</p>
NORTH KING COUNTY	<p>Projects must be prioritized from a centralized zone and radiating outward. Improve the flow of commuters into the central commerce centers and neighborhoods FIRST so we're not funneling people from the hinterlands into an already gridlocked network of roads. Ballard and West Seattle light rail should be move to the front of proposed timeline.</p>
NORTH KING COUNTY	<p>I just cannot believe it will be 22 years before there is light rail to Ballard. That is far too long. I would strongly support anything to make that project happen faster</p>
NORTH KING COUNTY	<p>Ballard and West Seattle MUST be first and done in 5 years - the tunnel will (possibly) be done increasing traffic congestion with fewer lanes offered. Crosstown traffic has doubled in the past two years without Amazon Google Expedia as well as Weyerhaeuser having even fully moved in yet. Ballard to West Seattle must be completed first.</p> <p>Please also consider reopening, modernizing and extending the waterfront trolley from its old sculpture park location and start it in Interbay near Expedia and run to Pioneer Square.</p>
NORTH KING COUNTY	<p>Move up West Seattle in the plan and include the link from West Seattle to White Center</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Strong supporter, use Link every day. Project completion time is missing a hyphen. It needs to be 2-5 years, not 25 years. This needs to have significant urgency and 25 years does not cut it. The next stage to Northgate should already be open, its 7 years since the first leg opened. Why 20 years for a Graham Street station? My buddy and I could go to Loews and build it in a weekend. I love Link, but we need real urgency here. Theme must be Do It Now, Do It Now, Do it Now. Revise the plan, get it done by at least 2025 and you'll get your money.
NORTH KING COUNTY	Ballard to Downtown and the U District, as well as West Seattle to downtown, were voted as the top three priorities in your last survey, but you've slated them to be the last projects to be completed, and are only studying Ballard to UW. If this isn't changed in the final draft, then I will not be voting for this proposal. Ballard needs light rail five years ago. Also, the idea of the movable bridge is a non-starter. There needs to be a tunnel under Salmon Bay for this to work. And the Interbay section needs to be elevated if it is to be useful in the future. As much as I want to vote for more mass transit in Seattle, I will not vote for something that does not bring more services to Seattle for 25 years.
NORTH KING COUNTY	The time line is stretched way to far out. It needs to be delivered much sooner, especially the Ballard and west Seattle routes.
NORTH KING COUNTY	Overall I like the project. But 17 years for West Seattle? 22 for Ballard? That is too long. Those areas have been underserved for a long time, and ST3 should make those a priority. I would prefer paying more tax for a faster schedule.
NORTH KING COUNTY	<p>I realize that a larger and more time-aggressive package may seem unpalatable to voters, but we really need to be going big here. 25 years is a long damn time to wait for transit improvements, especially when other countries like Spain, Japan, the UK and China can make transit lines so much faster than us. I've seen many discussions wonder aloud just how much more money it would cost if ST increased their timeline so that I'm not 50 by the time everything is complete. Please investigate how to accelerate the timeframes.</p> <p>Additionally: Every person I have talked to cannot understand why a Ballard-UW line is not being funded. A provisional line could then cross 520, and would clear up one of the most congested East West passages in the city. A Ballard-UW line would be vastly popular with voters, and it is a terrible mistake to leave it out. <b>INCLUDE A BALLARD-UW LINE PLEASE!!!</b></p>
NORTH KING COUNTY	The proposed completion date for the ballard spur is WAY too far out. Ballard is being built out as such a rapid rate, with the limited transit capacity and no ability to have transit use non-car-clogged roads, Seattle is creating a traffic disaster for Queen Ann, Magnolia, Fremont, and Ballard. Seattle needs to put a complete hold on new construction in neighborhoods without sane transit options (like Ballard) until we can fix the mess we've created. Or go back in time and build the freakin' monorail already. So idiot that we didn't take advantage of that opportunity before traffic in Ballard became the nightmare it is today.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	There's two kinds of transit/light rail projects: inadequate and under construction. These projects should have been done years ago, but better late than never. At \$50B, it's probably not enough and we will probably need twice that amount, but let's get going!
NORTH KING COUNTY	17-25 years is WAY too long of a proposed outcome. Our area needs reliable transit yesterday. I fear we will only be even more behind if we complete these projects in 25 years.
NORTH KING COUNTY	Would love to see LR in Ballard sooner than 22 years!
NORTH KING COUNTY	West seattle has been voting for and funding ST for years, yet my bus 55 service was reduced. When do we get an improvement.
NORTH KING COUNTY	20+ years for Ballard rail is ridiculous. You screwed up the #28 local and left no decent alternative. I'm paying extra car tab for less service. Argh!!!
NORTH KING COUNTY	Light rail needs to be the top project priority.
NORTH KING COUNTY	Project needs to be completed sooner (3-5 yrs total).
NORTH KING COUNTY	22 years to get light rail to Ballard is not good enough. I will not vote for a plan that takes this long to connect light rail to more Seattle neighborhoods.  A UW-Ballard line should also be included.  I fight climate change for my children and grandchildren, I want to enjoy light rail in Seattle myself before I am 50!
NORTH KING COUNTY	This plan is great, but 22 years to get light rail in Ballard?! Those of us suffering through commutes right now will never see the benefits of that. Granted China's quality of construction is not generally as high, it takes them less than a year to build massive light rail projects so why would it take us 22 years? Please try to do something else to quickly prioritize Ballard and West Seattle and other light rail, as opposed to bus expansion.
NORTH KING COUNTY	West Seattle needs to be a priority. The viaduct is coming down and NO ONE has a plan for reasonable alternatives, even though they are developing and increasing the population rapidly. WS in 8 and I'd pay more. 17? Too long! We need help now and we are neglected.
NORTH KING COUNTY	I strongly support ST and believe in what the agency is about but there is no way I want to be taxed for so long and wait 20 years to see any benefit. There is no way I will vote for this plan in its current form. Projects shouldnt take this long to build. Also, some of the projects included make no sense (i.e. Bellevue-Issaquah LRT). Im also curious to learn more about ST Express service under this plan, it isnt entirely clear what happens to service and why investing in rapid ride setvice is higher priority than investing on STs own service?!
NORTH KING COUNTY	I worry about the scope, timetable and cost of completing this plan. It is so big and complex and so costly. I worry about accountability to meet deadlines and budget to complete such a huge plan. I will probably not live here long enough to enjoy most of these improvements but I do think many of these projects are needed. I'm not sure I will be able to afford my property taxes as they go up for every issue that needs funding.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I will probably be dead by the time you finish the light rail to west seattle and ballard. The length of time is terrible. Also light rail from ballard to uw is needed.
NORTH KING COUNTY	Ballard and West Seattle lines need to be prioritized and not built at grade. They should crucial connectors should not take 22 years to be built. We should be striving to build a functional dense network before sprawling out into the suburbs, sub-area equity be damned. Additionally, I am slightly appalled at the cost (both in terms of time and money) of infrastructure creation and improvements in this country compared to other countries. Related, 1 billion dollars for parking at these stations negates the entire concept of creating "liveable neighbourhoods," or the more accurate term, Transit-Oriented Development (TOD). Residential and commercial space should be near transit stations, not slabs of asphalt. Seattle has enough parking (and cars) as it is.
NORTH KING COUNTY	20 years to Lynnwood? Are you freaking kidding? I'd gladly pay twice as much to have it done in 10 years. Extend from Northgate to Lynnwood in 10 years or less or I WILL vote no. We need relief NOW! Not when our not-yet-born children are in college. This plan ignore I-5 gridlock. This is a complete joke.
NORTH KING COUNTY	TOO SLOW!!!! Light Rail to West Seattle within 3 years!
NORTH KING COUNTY	All wonderful and necessary for quality of work and personal life in our area. Happy to pay for it. Only wish it could happen sooner. Thanks.
NORTH KING COUNTY	I believe that there should be a look at completing the West Seattle and Ballard lines sooner as these areas account for a great deal of traffic on the overburdened N/S corridor. It will also mean less traffic on surface streets in DT Seattle, allowing for smoother traffic flow and less gridlock.
NORTH KING COUNTY	Oh god, please finish light rail to West Seattle and Ballard sooner. Both neighborhoods need it so badly.
NORTH KING COUNTY	Don't let organized labor unions drive up the cost of the transit services anymore than they already have.
NORTH KING COUNTY	I see no reason for Seattle residents to support this plan. Light rail should be used to connect the densest neighborhoods and then expand outwards. Park and rides encourage sprawl. I find it ridiculous that light rail to Redmond and Lynnwood would be prioritized over Ballard. I will not vote for this plan.
NORTH KING COUNTY	It is crucial to the success of the current light rail system that the proposed station at Graham St be installed much, much sooner than this timeline states. The last phase came in way under budget so there are resources available and the community of SE Seattle NEEDS this station added asap. I strongly urge you to push for adding this station soon. It is such a small thing that would make a HUGE impact to some of our most vulnerable populations.
NORTH KING COUNTY	West Seattle should be prioritized sooner than within 17 years!!
NORTH KING COUNTY	We need light rail NOW. From Everett to Tacoma, West Seattle to Downtown and Ballard to Downtown. This time line is too long. Build the Graham Street Station before I die. This is a priority for my neighborhood. Thank you
NORTH KING COUNTY	Ballard and West Seattle area developing faster than than they are receiving public transportation. Soon these neighborhoods will be impossible to get in or out of. In order to make them the urban villages that the city wants we need to have the transportation options available to make the density livable.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	It seems like the timelines are painfully long considering the traffic crisis in this city. They should be considerably shorter.
NORTH KING COUNTY	Graham Street Station should become a HIGH PRIORITY project. It was cut from the original lightrail plans, and in retrospect has proved to be a much needed station. The cost of implementation is relatively low and can be financed with funds from ST2 coming in under budget. A smaller project like this makes the current system robust and will quickly increase ridership.
NORTH KING COUNTY	Neighborhoods within Seattle should be the priority being that it is the most densely populated area. A Ballard to UW and Downtown line in a more timely manner is essential to reducing congestion within the city.
NORTH KING COUNTY	I am very supportive of the plan. The only reason I rated question 12 as somewhat support rather than super enthusiastically support is because the timelines are too long. The bus rapid transit should be online in two years not eight. Light rail to Redmond and FW should be done in five. West Seattle should be connected in eight and Ballard at the same time or ten at most. I'd pay three time the taxes for this and give the government significant leeway in environmental impact statements and use of eminent domain. This project should have been done in the 1970s or 80s but the idiots in charge of the city fell asleep at the wheel. The best time to have built all this was 40 years ago; the second best time is now. The only thing that could increase my support for this project is getting it done sooner so we can start work on ST4.
NORTH KING COUNTY	All of this needs to happen now, not within 25 years. The timeline is way too long. Start closer to downtown, serving dense neighborhoods like West Seattle and Ballard, and move outward from there. Increase bus service in outlying areas for now and eventually replace it with light rail. Convinve anyone who will listen to shut down the worthless tunnel project; take money from there and put it into mass transit.
NORTH KING COUNTY	22 years for Ballard? Seoul builds entire 10 mile+ underground subways in under 5 year. The timelines are unfortunately, laughable.
NORTH KING COUNTY	I know there are so many hoops to be jumped through and money to be raised but this needs to be done as soon as possible. Local buses just aren't the answer - they get stuck in traffic. In another 22 years my locale will be drowning in people.
NORTH KING COUNTY	The central region needs the most help, and needs it far more urgently than north, south, or east regions. The central region is so densely packed with Seattle at its heart that it is difficult to own a car and use that for transportation, without spending ages in traffic. Waiting 22 years for transit relief between Ballard, downtown, and West Seattle is 22 years of population growth without infrastructural support.
NORTH KING COUNTY	Please do whatever it takes to make this happen faster!
NORTH KING COUNTY	The timeline is pretty hard to believe. We need solutions for West Seattle/Ballard now, and I can't imagine how bad the situation will be 10 years from now. Or unborn children won't even use lightrail from our house in west Seattle until they're in college!! I talk to so many people who say they'd be willing to pay more to make it go faster. I hope ST considers ways to speed the process.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The projected timeline is not going to solve any problems now and won't be able to support the amount of people that would use the system after completion. Taking so much time isn't going to solve the problem it is only going to waste money. I will be voting no on this initiative unless the timelines are shortened and focuses on solving the transit issue inside Seattle.
NORTH KING COUNTY	Why is Ballard to downtown happening so late? Why isn't there a Denny Ave line? Why are we trying to put lightrail everywhere when instead we can focus on the fasting growing population centers like downtown seattle. Even with all the planned stops, people will have to drive to the stations. Why not focus on putting lightrail in areas that people can forgo cars altogether.
NORTH KING COUNTY	The completion timelines are far too slow. Transit is an issue of today and people are willing to pay for it. Please do whatever it takes to expedite the construction timeline. Is a 10-15 year timeline really that unfeasible? Also, light rail lines must absolutely be grade separated. Delays that currently occur due to pedestrian and motor-vehicle accidents on the LINK are unacceptable.
NORTH KING COUNTY	I'd support efforts to complete the project sooner, even if it meant higher property and vehicle excise taxes.  I STRONGLY support having parking incorporated into the new stations. After recently moving to Lake Forest Park from Seattle, I've grown accustomed to a long commute. It take about an hour by bus (route 308) to get to work in Seattle (factoring in walking to the bus, waiting for the bus, and then walking from the bus stop to the office), and about 45 minutes by car. With that trade-off, I drive half the time, and bus half the time. What I don't do is take multiple forms of transit. It's too much time to transfer between modes of transit, and with less then very frequent service, and short hours of service. If there were an easy way to drive nearby to a place to catch frequent transit, I'd never drive to Seattle. I strongly support having parking at the new mass transit stations.
NORTH KING COUNTY	The timeline is way too long. Why can't this happen faster?
NORTH KING COUNTY	I will be paying for a system I'll likely never use because I'll be dead. I'm all for doing my part but your timelines are MUCH too long!
NORTH KING COUNTY	START with projects in Seattle city itself and THEN expand outward. Forget bus and focus on light rail, subway, etc. Light rail to ALL Seattle neighborhoods, not just a few. We (in Magnolia) want to get out of our cars, too!!!
NORTH KING COUNTY	I am mostly concerned with light rail within the Seattle city limits. I would not take light rail to Everett or Tacoma. Traffic to and through our city make it impossible to get anywhere, and a Ballard and west Seattle light rail option in 22 years seems far too late. That's 22 years of northbound (out of Seattle) rush hour gridlock.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<ol style="list-style-type: none"> <li>1. Ballard and West Seattle must be done on an accelerated timeline.</li> <li>2. Seattle is not getting enough Light Rail in this plan.</li> <li>3. Waiting 17-22 years for light rail to West Seattle and Ballard is a huge problem.</li> <li>4. I'm sure a huge part of this cost and delay is a new downtown tunnel. Scrap the new tunnel and figure out how to run more frequently through the existing tunnel.</li> <li>5. Consider running Ballard trains via UW instead of to downtown to save money and accelerate the timeline of reaching Ballard. Make sure this ballard to uw line has an underground transfer between platforms, or better yet, interline trains into U District station.</li> </ol>
NORTH KING COUNTY	<p>17 and 25 years for light rail to West Seattle and Ballard respectively! That is ridiculous! We need light rail to these neighborhoods as soon as possible! I can't and won't believe that 25 years is the fastest possible timeline. I was highly supportive of ST3 but hearing this timeline makes me deeply suspicious of if these light rail lines will ever be completed. The political winds will change or we'll have another recession and we'll be left with the bus changes but the light rail will never be built. These priorities need to be seriously reconsidered.</p>
NORTH KING COUNTY	<p>We need more light rail sooner than anything else. The proposed timeline for light rail is too far in the future, we really need these lines sooner than later.</p>
NORTH KING COUNTY	<p>Please include Graham St Station as an early deliverable system access project. 20 more years is too long to wait for the Graham St Station. Graham St Station is critical to allow one of the region's most transit-dependent communities to have walkable access to the light rail system. A plan that spends \$1 billion on suburban parking lots and requires us to wait 20 years for an affordable project that would increase walking and biking does not reflect the values of Puget Sound. I and many in my community will not vote for the plan in its current form. We need Graham St Station NOW!</p>
NORTH KING COUNTY	<p>Light rail connecting Ballard and West Seattle to downtown *cannot* wait 25 years to complete. These projects need to be started immediately and prioritized in the timeline. Seattle is already buckling under the weight of population growth, and this is only going to get worse.</p>
NORTH KING COUNTY	<p>Timeline seems too long for growth of the region. Like the plan, but expediting implementation is critical.</p>
NORTH KING COUNTY	<p>Projects need to be completed faster.</p>
NORTH KING COUNTY	<p>This plan is designed with growth over the long term in mind. However, it is too broad and does not address immediate issues in the most dense areas, the backbone of the city. Light rail to Ballard, South Lake Union, Seattle Center, and Belltown is important. But let's get it done. Sitting in 22 years of traffic before it is built, does that sound reasonable? I may not even live in Seattle then. Let's build really effective, focused projects in the most critical parts of the system in a short timescale.</p> <p>I appreciate Issaquah has needs too - but let's focus on effective bus service in Issaquah, that connects to a central light rail network. Keep the costs the same, but focus on the next 5-10 years.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I'm shocked that the downtown to Ballard rail line seems to be such a low priority. Particularly with Expefia's relocation along that corridor, I had expected it to open much sooner -- that stretch of road is already notorious and is going to get far, far worse in the next few years. Waiting 22 years for relief just sounds ridiculous.
NORTH KING COUNTY	Build it faster!
NORTH KING COUNTY	Its too long. Your stations are beautiful, but I only spend 3-4 minutes in them. The stations don't have to be large palaces, they just have to be big enough to get the job done. I think that somehow a little bit of time can be shaved if you don't have to build so big.
NORTH KING COUNTY	I believe that the completion plans are too far out for light rail. There needs to be some thought and details provided on how much more it would cost to shorten the timeline for some the bigger projects. In particular, Ballard to downtown and West Seattle to downtown.
NORTH KING COUNTY	Sound Transit's current proposal calls for the Graham Street station to open in 20 years. After numerous previous delays, and a \$10 million down payment already funded, this is unacceptable. We need a station NOW! The existing light rail line in this underserved community should give it priority among the projects being considered by Sound Transit.
NORTH KING COUNTY	I wholeheartedly support light rail. However, this plan sucks ass. 2038 to Ballard? Are you kidding? We need light rail yesterday. Ballard is rapidly being developed as a dense urban village with reduced parking. The only way for that to work is with light rail as soon as possible.
NORTH KING COUNTY	Please prioritize the construction of transit projects in dense urban areas that will see the most benefit of additional transit capacity. Suburb transit service is valuable to commuters but does not serve the all-day demand seen in cities such as Seattle and Bellevue.
NORTH KING COUNTY	For crying out loud, 17 years for West Seattle improvement???? West Seattle's a parking lot as it stands TODAY! We went to the moon and back in a fraction of the time. I voted for the Mayor who's spent far too many scarce resources on bike travel in our city of hills and rain. I sorely regret my vote. Seattle is notorious for spending tax dollars on studies and plans, then scrapping them. We're in the hands of incompetents, and I wish I could relocate to a city lead by more progressive, intelligent minds. What a revolting state of affairs!
NORTH KING COUNTY	If Ballard and West Seattle are not built first I will vote no on ST3
NORTH KING COUNTY	Ballard in 22 years is insulting. The city has moved to drastically increase density in Ballard now but we have to wait 22 years for actual, reliable transit to arrive in our neighborhood? I do not understand how Tacoma and Redmond rate light rail before we do in this situation.
NORTH KING COUNTY	I have concerns about the ability to maintain roads if buses or other modes utilize the shoulders of current roadways. Can those roads support higher volume traffic?
NORTH KING COUNTY	FASTER, build it all FASTER!
NORTH KING COUNTY	Light rail from West Seattle to downtown needs to be priority number one given the current viaduct tunnel project. Please consider moving this forward on the time line.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	West Seattle is growing at an alarming rate. This fact in conjunction with there being only on major access bridge make me feel that they should get a true rapid transit solution BEFORE 17 years.
NORTH KING COUNTY	It is absolutely absurd how long this project is going to take to complete. 25 years in unacceptable especially at the costs predicted and I will definitely be voting this project down. In addition, there absolutely needs to be an off-grade light rail line from Ballard to UW. The plans for light rail expansion all the way to Tacoma are reaching too far. This is light rail, for everything else there is the Sounder. Tighten up the project, expedite the project, and we'll see how my vote changes. As it is, this project is too incomplete and convoluted for our once in a lifetime chance at building a good light rail system.
NORTH KING COUNTY	I didn't realize that it would take so long to implement these projects. I don't think I will ever benefit from them as a result at my age. No reason for me to support this as much as I would love to see some of the projects implemented.
NORTH KING COUNTY	Unacceptable that it will take 22 years for Ballard-Downtown. This plan needs to happen within 10 years (or sooner).
NORTH KING COUNTY	This timeline is way too slow! This plan taking 25 years is completely ridiculous and who knows what state the city will be in by that point in time. This needs to be completed as soon as possible. Also comprehensive lines need to be finished in Seattle first. There is way too much traffic in Ballard and SLU that needs to be alleviated.
NORTH KING COUNTY	Get better development deals from the tech industry and make them pay for mass transit!
NORTH KING COUNTY	You must be out of goddamn mind, if you think 25 years is an acceptable timeline for this project. Right now Seattle is growing very fast, and seems like it will for the foreseeable future, but we don't know when the city will become the new Bay Area and people will start leaving for another city with an easier housing market. At the very least, Seattle proper and the east side need to be completed within the decade, all with the right-of-way and not share any road with cars. As much as I support this project, I am of the mind to vote no if it will take over two decades and parts of the routes will share right-of-way with other vehicles. The current timeline is crazy and unacceptable.
NORTH KING COUNTY	The timeline for completion on these projects is extremely disappointing.
NORTH KING COUNTY	I rated question 12 as "strongly oppose" because the timelines are too long to complete light rail within the highest density areas in the entire system: Ballard-Downtown. Ridership on this segment is huge and must be prioritized to complete much sooner. For example SLU traffic is horrific and will get worse. We don't have time to wait 22 years!!!!
NORTH KING COUNTY	What the [explicit]? 22 years to get to Ballard and 25 years to Everett. That's stupid. My first reaction was "I'm not voting for that". I could probably use a transporter by then to get around.
NORTH KING COUNTY	The projects are overall good but the urban projects are underwhelming and the timelines are absurdly long. There needs to be something done with the downtown problem sooner.
NORTH KING COUNTY	The most population growth is coming to Seattle and the highest ridership likely will to. We shouldn't have to wait so long to get a Ballard light rail. BRT isn't s good mitigation -- people just view it as a slow bus that makes too many stops  Additionally a Ballard-UW light rail line would connect Seattle in very important ways.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I would hope to see BRT services used as a half-measure along planned rail lines. That way these routes can start connecting the communities more expediently and when the rail lines are actually finished, they will boon an existing commuter pattern rather than trying to serve one that doesn't strongly exist yet.
NORTH KING COUNTY	Ballard is overcrowded now and needs a quicker timeline with an option that links Queen Anne and Magnolia not just Interbay. East-West public transit in this city is a nightmare and it seems to be always secondary to North-South lines. Also, West Seattle has been sorely lacking reliable quick public transportation for years. This must be addressed before demolition of hwy 99.
NORTH KING COUNTY	The completion timelines are completely unacceptable. This region is in a transportation crisis already. The COMPLETE system should have already been in place by now. Light rail to Ballard and West Seattle should be the biggest priority. Increasing bus service in not effective because the buses get stuck in the automobile traffic.
NORTH KING COUNTY	i understand that these projects take time, but you need to figure out how to speed this up. nearly 20 years to connect tacoma to the airport and seattle? really? and i am not able to understand what goes into an 8 year plan for BRT along I405. Figure out a way to speed this up.
NORTH KING COUNTY	Ballard connection needs to happen ASAP!
NORTH KING COUNTY	- Timetables are far too long, things are already bad, and I wonder if these improvements will even be sufficient by the time they are complete - Ballard to UW light rail line is a puzzling omission - grade-separated rail should be on this plan - more rail in Seattle, we need a real rail system
NORTH KING COUNTY	As a retired ship builder, I am staggered by how long a land based project takes. We built the third of the WSF Jumbo Mark II ferries in 9 months, a \$100 million project including material. How many people will have spent their entire working lives on SR 520 between I-405 and I-5? A simple box house next door to us in Ballard took 15 months. Land side projects need much better supervision and planning.
NORTH KING COUNTY	Waiting 8 to 22 years is way too long to wait for transit options that should already exist in our region. Seattle east-to-west rail options are lacking, including light rail from Ballard to UW with stops in Fremont and Wallingford.
NORTH KING COUNTY	I will not support ST3 unless you drastically speed up the timeframes and prioritize Seattle grade separated light rail expansion. King county and Seattle proper is growing much faster than the rest of the region. Stop prioritizing suburban projects over the core city projects. We NEED subway to Ballard, west Seattle, and east west connections (Ballard to UW, etc). It's ridiculous that it'll take 25 years for Ballard to get rail. I can't support this plan with these outrageous timeframes and lack of focus on Seattle. There's around a billion dollars worth of park and ride stations in this plan. Stop encouraging cars and sprawl!
NORTH KING COUNTY	I think the Ballard project is the most critical. It needs to be implemented much sooner than proposed.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Is there any chance to complete projects concurrently? It seems like 22 years for light rail to Ballard is too long to wait.
NORTH KING COUNTY	I think it's ludicrous that West Seattle won't get light rail for 17 years and SLU/Ballard in 22 years. Both of these areas desperately need light rail now, and as soon as the routes currently under construction are done, these should be prioritized first (ideally, the construction would start before the Northgate extension is finished). I would be willing to pay a higher tax rate to get these projects done sooner, because SLU is already nearly entirely un-navigable during rush hour, and with all the new construction in SLU, it's only going to get worse. We cannot afford to wait 22 years for this!
NORTH KING COUNTY	What other considerations have been taken to see this work done in a shorter span, say 10-15 years?
NORTH KING COUNTY	I have comments about project completion times and projects that should be added. I'd pay 20 Billion dollars more if we could get West Seattle and Ballard done before I retire. This should be the highest priority and we should all be willing to pay a little more to have it done in ten years.  Also, I think you should take the Ballard to University district off the table as a planning project but as something that should be completed in the 25 year window. This is a painful traffic point and unobstructed rail service between the two would truly "complete" the system
NORTH KING COUNTY	It would be nice to have these light rail projects completed sooner! (Especially for west Seattle, but I'm biased of course)
NORTH KING COUNTY	Light Rail should be the main focus of the plan even though the expense is higher. You get what you pay for.
NORTH KING COUNTY	All ST3 projects need to be completed in 8 years or sooner. Traffic is too congested, and Seattle is growing at a pace that far exceeds the capacity of the current transportation infrastructure.
NORTH KING COUNTY	It said above that lightrail to Lynnwood would be completed in about 20 years, but I thought Lynnwood was suppose to be open in 2023, about 7 years from now under ST2, is there a major delay or something happen to the funding/planning of the lynnwood link?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>I am very disappointed in the proposed time table. 22 years for the center city, which needs light rail the most, to see any benefit is too much. I believe the project list, as a whole, is too large, and needs to be cut back to allow a budget that works in a 10-15 year timeframe, not a 25 year timeframe.</p> <p>We do not need light rail to Tacoma, Everett, and Issaquah, which will be substantially slower than the existing ST express service that it is intended to replace. Please cut of the projects that are not important, and using the savings to accelerate the projects that are important, in order to speed up the timeline.</p> <p>I would also like to see more concrete proposal about bus service. Capital improvements are all great, but if the I-405 BRT only runs once an hour, and not at all on Sundays, it won't be very useful. Please provide more details on what changes to ST express bus service we should expect if ST3 passes.</p>
NORTH KING COUNTY	Can the project be completed faster with more money?
NORTH KING COUNTY	Too long for Ballard.
NORTH KING COUNTY	It would be great if the light rail could be extended to Ballard sooner.
NORTH KING COUNTY	I would like to see the timeline for the Ballard-Downtown light rail and downtown transit tunnel improved,
NORTH KING COUNTY	Get the light rail extensions started ASAP.
NORTH KING COUNTY	These timelines are simply too slow. When possible, these projects should be moved up sooner, rather than later.
NORTH KING COUNTY	Light rail expansion to West Seattle and Ballard should not be 17 and 22 years off respectively. The timelines should be crafted to pull as many riders onto the system now and create a functional network.
NORTH KING COUNTY	Ballard in 22 years is absurd, we needed to have a completely connected grade separated mass transit system in this city 10 years ago. We need both Ballard to Downtown and West Seattle to Downtown PLUS Ballard to U District lines done in no longer than 10 years, can ST do it or cant they?
NORTH KING COUNTY	Highest priority should be given to light rail projects - specifically reducing completion dates. Bus rapid transit is not a long-term solution... Only bus projects that will not effect the completion dates of light rail lines should be considered as high priority.
NORTH KING COUNTY	Ballard to Downtown will impact the largest number of people, why is this not highest priority for early completion?? Expedia is moving thousands of employees to interbay by 2019 and other businesses and apartments are flooding into the interbay area as well. I'm not confident full and immediate consideration has been given to this part of the system
NORTH KING COUNTY	It's ridiculous that the plan is going to take 25 years. Nowhere else in the world would a project like this take so long. You need to speed up the timeline. I'd be willing to support a higher tax if it meant speeding it up.
NORTH KING COUNTY	This is a good plan, but it would be even better if it was on a much faster, shorter schedule. We need the system now, not 25 years from now. I would gladly double my household tax obligation in support of a shorter timeline.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Construction is stretched out too long. UW & Capital Hill are evidence that if you design a system to go where needed, it will be used now. The 25 year time line is way too long for our economy. That puts us 40 years behind other major cities.
NORTH KING COUNTY	You need to accelerate the schedule. This timeline is too long. 20+ years is ridiculous and reflective of this region's inability to get anything done at all or at least in a timely manner. Do the projects in parallel.
NORTH KING COUNTY	I will vote no on ST3 though I'm a big believer of public transportation. The timeline is too long for me to believe in ST3. I don't know where or what I'll be doing in 22 years. I need to have more tangible results within my lifetime. Otherwise I'll be paying taxes for 22 years and I won't have anything to show for it, I'll be retired by the time everything is running.
NORTH KING COUNTY	The project timelines are absurd. We can't wait more than a generation to have adequate transit expansion in Seattle. By far the most important project is Ballard to Downtown, and the current proposal does not estimate that opening until 2038! It would be far better to forgo other projects for now (even West Seattle, if necessary) in order to speed up the most critical projects. I see no reason Ballard cannot be accomplished in a decade. Furthermore, the Ballard line is poorly designed, missing Belltown(!!!), and crossing over, rather than under the Ship Canal. Other important Seattle projects, such as Ballard to U-District or Lower Queen Anne to Capital Hill, are not even being considered. The suburban plans are heavily reliant on freeway routes and parking garages, transit planning that belongs in past generations. This proposal is an embarrassment for the region. Though, and because, I am extremely supportive of transit expansion, I strongly oppose this plan and will vote against it should it remain the same when it comes to the ballot. I feel many other pro-transit Seattleites, on whom you are relying on for strong electoral support, feel the same. As is, ST3 will likely be defeated.
NORTH KING COUNTY	Project timeline is to long. Cut it down to more plans or run multiple projects at once. It's going to look like the tunnel fiasco after many years especially when people see that this was approved and the project in a certain area is not starting for 5 or 10 years from now.
NORTH KING COUNTY	I don't see much value in investing in more bus service. We've already funded more bus services in the past year with the Move Seattle funding. I'd rather see that funding all go into accelerating rail service.
NORTH KING COUNTY	25 years is an extremely long time to wait for ST3 completion. Seattle and the region can't wait that long for relief. I encourage the Board and staff to find a way to speed up the timeline. Traffic in the area will only get worst.
NORTH KING COUNTY	I have lived in West Seattle for 39 years, have commuted to work by bus my entire career, and paid, and paid, and paid my hard earned money to ST. I have received zero benefit. There is no service to West Seattle and the existing ST services travel along routes that don't even reduce the number of cars on the roads for my typical trips. I am tired of paying money to ST for nothing. Also, you don't need light rail. Dedicated bus lanes work just as well and for big events you can reroute the buses. The West Seattle alignment is too far in the future to be of any use to me.
NORTH KING COUNTY	Hurry up!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The timelines for completion of the Seattle projects are ridiculous. The Ballard and West Seattle lines should be the top priority and waiting 20+ years for completion is the number 1 reason I will vote no on ST3 and I will be strongly campaigning against ST3 unless the timelines are reconsidered.
NORTH KING COUNTY	The tag line of this proposal should be "yesterday's technology tomorrow". Light rail in Ballard in 22 years? Is that a joke? I strongly, strongly support transit-oriented development, but the timelines in this proposal are laughable. We can't wait 22 years. We need transit-oriented development with walkable, bike-able, car-free communities NOW. Under this proposal, it would even take 8 years to bring bus rapid transit online. It's inconceivable to me how it would take 8 years to set up a new bus line. 8 months maybe, but 8 years? What is going on here? The entire light rail system from Tacoma to Everett with all extensions should be FINISHED in 8 years. Instead, some bus lines will be starting to come online? Something went wrong in the development of this proposal. I'll support it because it beats nothing, but not by much.
NORTH KING COUNTY	Parking at rail stops will be the biggest component of commuter use in my opinion. I hope to see ample parking at all major stops. Also, I feel strongly that most of the growth in housing will now be forced to occur south of Seattle in areas like West Seattle, Burien, Normandy Park, Des Moines, etc. These areas still have substantial room for gentrification and increased density to support the Seattle economic center and its business constituents. It seems to me that the timeline ought to be accelerated for these areas so the cost for condemnation will be substantially lower and so there aren't as many constraints placed upon planning routes, stops, etc. It's a rare opportunity to get ahead of the crush and plan rather than react. Would love to see what planners can do when getting ahead, before there's a crisis.
NORTH KING COUNTY	The Ballard line should be prioritized based on the move of Expedia and the expansion of the tech companies at South Lake Union. More and more people are moving to these areas (Ballard, downtown, South Lake Union, Belltown, Greenwood, etc.) and congestion is already bad at these areas. It would be ideal if the Ballard Line could open shortly after the Northgate station opens to connect the entire area.
NORTH KING COUNTY	ridiculous timeline and cost
NORTH KING COUNTY	The timeline for the project is far too long. Tax us (young folks) more to get the funding and create support structures for the dense urban growth we want. The link light rail core, which should extend to Seattle city limits (including critical lines to Ballard and West Seattle) needs to be completed within 10 years. With the large influx of young professionals (of which I am one), the tax burden for these projects should fall on the younger generation who is most likely to use and want the dense growth it generates. ST3 should be more far more ambitious in its timeline and its funding requests. If we are going to transition to mass-transit, we need to commit and build quickly. A piecemeal mass-transit system is a broken one that people are far less likely to use than a single unified and expansive link light rail system.
NORTH KING COUNTY	17 years to get light rail to west seattle and tacoma is much too long , we need light rail yesterday!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The Ballard and West Seattle lines will serve the most people and help reduce traffic where it is the worst. These lines need to be completed in the first phase not 20 years from now. They should be up and running by 2030 at the latest.
NORTH KING COUNTY	<p>The time lines to connect West Seattle, and Ballard are too long to address the current and future influx of new people to the Seattle area. Yes ST3 is a regional proposal but the reality is Seattle is the economic engine of the region. If Washington is to thrive and expand and support all the new people moving to Seattle in the coming years, large scale rapid transit must come online in a 5 year time frame, not 15-25 year time frame. I understand the limitation is funding, but the only way to address the regions crushing car problem is to create a reliable mass transit system. Speed this up, connect the large areas of Seattle, then connect Seattle to the surrounding regions.</p> <p>thank you for your time</p>
NORTH KING COUNTY	I think that the timeline for lightrail is too lengthy. By the time the West Seattle and Ballard extensions are complete, they wouldn't even be up to date to support the city. It's ridiculous to think that those would open YEARS AND YEARS from now.
NORTH KING COUNTY	I urge you to consider bettering the timeline to add light rail to West Seattle. Our community is growing rapidly, in fact, it is one of the fastest growing in the US. While there are many ways "out" of West Seattle, having the bridge merge into one lane on I-5 North that is already at a dead stop from traffic coming in from the south is the most used way and is inefficient at best.
NORTH KING COUNTY	Ballard should be the first project completed. 22 years is much too long to wait.

<p>NORTH KING COUNTY</p>	<p>Public Transportation/Mass Transit is a problem in mathematical optimization. Input requires good information and/or reasonable assumptions about current and future population distribution, employment centers, and recreation.</p> <p>In the 70 or so years that I lived in Pierce County, I never saw anything that even suggested to me that Pierce Transit treated this as mathematical problem, or even understood that it was one. I imagine (and of course I admit this can be entirely wrong - I just see no evidence for that) a hoard of "planners" hovering over maps, drawing and redrawing corridors and densities. The problem (for at least a few jurisdictions, Miami and Hong Kong among them, I think) has been the subject of PhD theses. Again, I see not a whiff of evidence that ST has done this either in the press or in the questions I just answered. Nor do I see it in the timing at stops where routes intersect.</p> <p>I also see little understanding of the importance of communicating with transit riders and potential transit riders using maps, and with a route-identification scheme which carries at least a modicum of information about routes. Pierce is especially awful in this regard (my experience is primarily with PT, ST between Grit City and Seattle, and KCT). When I was much younger, I spent a summer bumming around Europe. Transit maps abounded. They were permanently displayed at numerous stops. We could easily figure out how to get from A to B. Here, not so much. (Maps on cellphones are problematic, given the tiny real estate and poor readability in bright light.)A tiny subset of this problem is the significant dead-time of electronic annunciators on ST buses (59x). All the thing says, I believe, is the date and time. ONce inside the bus, you have no way to see what bus it actually is (it would be easy to board the wrong one). You might, for example, announce an updated ETA at various stops. A 59x is scheduled to get to T-town at about 4:50PM, and the last 13 (or maybe its 14) leaves for 26th and Proctor at about the same time. When traffic is heavy, it would be nice for passengers to know if they might make it or not, and it is entirely possible with all the GPS technology you (apparently) already have on many buses and (probably) trains.</p> <p>Route planners refuse to allow one to get from A to B if either A or B is more than some distance X from a transit stop. Apparently they don't take into account bicycles, or the willingness of people to walk a mile or two. They also demand a start or end time, when they could draw a chart of estimated time-of-travel vs start time.</p> <p>Finally (though I could go on much longer), I cannot understand why we have about 5 agencies - ST, Thurston, PT, KCM, and probably</p>
<p>NORTH KING COUNTY</p>	<p>This timeline is outrageous. The fastest, cheapest, most meaningful thing that could be build would be Ballard to UW. Instead, Ballard has to wait 22 years? I really support mass transit, and that's why I'm going to have to oppose this plan. Locking us into an entire generation without any improvements in mobility in Seattle is not something I can vote for.</p>
<p>NORTH KING COUNTY</p>	<p>I am a strong supporter of public transportation but this proposal means that the system I am asking for and paying for will be ready about 2 years before i retire. 25 years to build something is completely stupid , this is 2016 not 1816. It took 1/5 this time to build a rocket to the moon.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I am 44 years old and have followed this plan very closely since moving to Seattle and specifically Ballard. I'm a big supporter of walkable communities and denser neighborhoods that have good efficient access to all modes of transportation but think that light rail is the key to moving a large population efficiently. I cannot understand why it will take 22 years to complete light rail to Ballard. This is completely unacceptable. I would support an elevated rail the whole way from Ballard to Westlake if this would complete the connection faster.
NORTH KING COUNTY	The timelines are WAY too long. Prioritize light rail and get it moving... like NOW!
NORTH KING COUNTY	Should be done sooner
NORTH KING COUNTY	I think the timeline and the schedule is absurd. I would be much more supportive of a plan that started in the center and worked wider then the current wide circle coming in tighter. I think it's unacceptable that the urban core would not have it's transit needs met before the suburbs who, by and large, are not very transit oriented to begin with. It's bananas that the plan for light rail to open in Ballard is 22 years away. BANANAS! We should be trying to make it easier for the people who choose to live in the urban core to actually live in the urban core. As a homeowner in the city and a daily bus rider, I would happily pay more than the projected \$200/year to see this plan with a significantly shorter timeline and an urban first schedule.
NORTH KING COUNTY	Completion timeline is PATHETIC. And this is all too little, too late. Still, I would support all of these things, even though they are very, very costly, IF they were done much, much more quickly. It takes way too long to complete these kinds of projects. If we are to maintain our quality of life here in the Seattle area, things need to change fast. Heck, I'll bet at least 1/3 of the people completing this survey will be retired by the time this work is completed.
NORTH KING COUNTY	Work on the light rail infrastructure should be the highest priority. Busses are good, but they aren't the solution. They're unreliable, and add to the traffic problem.
NORTH KING COUNTY	The projected timelines are ridiculously long and I don't understand the order of priorities. The suburbs voted to kill transit initiatives in Seattle and now they're getting the service first?
NORTH KING COUNTY	have the parts of the West Seattle plan/improvements out 17+ years is always a let down.
NORTH KING COUNTY	The plan takes much too long. Who knows what this area will be like in 15, 20 or 25 years. Transit is needed now. A new source of revenue is needed to amke this feasible.
NORTH KING COUNTY	The timelines proposed are unreasonable. These projects could be completed in a fraction of the time proposed. If the timelines don't reduce, I cannot support this proposal fully.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

<p>NORTH KING COUNTY</p>	<p>The proposed timelines for completion of ST3 are INSULTING to Puget sound residents. While we of course need these projects, we're paying taxes for a system that won't be fully realized until 2040? We'll all be old or dead by then. How can I be asked to pay for a system that won't be fully realized until I'm 60?</p> <p>Perhaps there is a way ST can publish scientific, peer reviewed projections of what kind of traffic relief commuters can expect to see throughout the completion of these various phases (travel times at peak hours from A to B via car/bus). Will supply even be able to keep up with demand? With our rapidly expanding population, we need more aggressive development to get relief to commuters much much sooner.</p> <p>The 130th St. Station deserves another look. A station being there would not only help the 10's of thousands of people along nearby existing transit lines but would also create more opportunity for development (like an urban village). This would create jobs and would create a more walk-able/livable neighborhood.</p>
<p>NORTH KING COUNTY</p>	<p>I think it is important to be mindful of service maintained throughout development. I have already seen valuable services reduced or eliminated due to light rail - I am a strong supportive of public transit, but with the new UW station, many of my available bus routes providing easy access downtown have been cut. My commute has actually increased with the lightrail, +10-15 minutes on foot and with a transfer (bus to lightrail), rather than having a more convenient option with lightrail.</p>
<p>NORTH KING COUNTY</p>	<p>Way too late to add Seattle metro extensions. Seattleites use the system and support it the most, and have the densest tax base, meaning we will pay for it more than anyone. I support extensions to the immediate suburbs Redmond/Issaquah but Everett /Tacoma should continue to use the sounder trains since they are actually in other counties.</p>
<p>NORTH KING COUNTY</p>	<p>Obviously this is a massive undertaking, but 25+ years just seems crazy to me. Is there no way to speed up the delivery of some of these projects?</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

<p>NORTH KING COUNTY</p>	<p>On the whole, as a Seattle resident without a car, I am quite disappointed.</p> <p>My comments are all regarding rail.</p> <ul style="list-style-type: none"> <li>* We need the Seattle projects (Ballard, West Seattle) *immediately*, not two decades from now. My toddler will be in college by then! I will hopefully be living in Hawaii (fingers crossed)!</li> <li>* The Seattle projects are actually pretty short and don't really serve that much of the city. Certainly the West Seattle line could at least hit some of the city and suburbs to the south of the junction.</li> <li>* I want to see more comprehensive rail projects serving other parts of Seattle (Fremont, Belltown, First Hill, other parts of Capital Hill, etc). Something more for the city!</li> <li>* Additionally, we need to be serious the quality of all rail extensions. Ballard should be connected via a tunnel under the ship canal and not be at grade through interbay like we did w/ the line from downtown to UW. The Issaquah connection should connect to DT Bellevue not that station on the other side of the freeway. Just look north a bit to Vancouver and see how amazing their Skytrain network is. We are so far behind them.</li> </ul> <p>As someone living in Seattle, without a much better timetable... and I mean starting on the Seattle stuff basically now I cant see supporting this. I'd rather it fail and then have a chance at a better plan in a year or two.</p> <p>Please tax the heck out of me to get it done. Lets make Seattle a real city with real transit. Take my money and get this done yesterday! :)</p>
<p>NORTH KING COUNTY</p>	<p>Priority should be given to reduce congestion downtown. Less drivers from within Seattle, and this can be achieved by prioritizing the Ballard and West Seattle light rail timeline. These are the people who are most likely to switch to public transit on a full time basis, since parking downtown is difficult and population density is greatest in Ballard and west Seattle. The current timeline is too long.</p>
<p>NORTH KING COUNTY</p>	<p>Ballard to downtown (~45 min) and Ballard to east side (~75 minutes) commutes are among the worst in the area by car or bus, despite having an extremely high ridership density. On top of that, local traffic is terrible and parking is limited. Please place this neighborhood on higher priority to ease congestion, improve quality of life, and lower our dependence on personally owned vehicles.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Expanding transit and light rail in the metro Seattle area, i.e. west Seattle and Ballard, is MUCH more urgent and critical to deal with soon and due to the density of those neighborhoods (and growing) should, well NEEDS, to happen much sooner than the plan outlines. Driving is not an option for most people coming from the areas near downtown, however the buses have become so busy that they are always running late, and so crowded during rush hour we often have to wait until another bus comes because no more people can fit on. It has gotten exponentially worse in the past year. In another year I anticipate it may take almost an hour each way to commute by bus from neighborhoods like west seattle or Ballard/North Ballard if it continues the way it has been going. I would prefer to bike to work, however the route along westlake is extremely dangerous. Bike routes through the city need to be prioritized as well, and are probably the most urgent issue. A clear, separate defined bike lane needs to be constructed through the downtown area between 2nd and 7th/Pine for people commuting to and from Capitol Hill - Currently bikes have to merge with traffic and busses for a number of blocks through this area and I have nearly been hit on numerous occasions. It is very dangerous and embarrassing that a city like Seattle doesn't have better bike lanes in it's downtown. A clear, separate and safe bike path also needs to be created along westlake - currently bikes are forced to ride through the parking lot which is very unsafe as well. All bike lanes need to be expanded and improved and is the most urgent thing that needs to happen in the city - and also the cheapest/easiest.
NORTH KING COUNTY	We need Downtown Seattle to Ballard ASAP. 22 years is way too long of a time to wait. As a whole we need more transit and light rail in Seattle proper sooner.
NORTH KING COUNTY	The project time line is not broken up to account for market cycles. Thus, that means things like the Ballard line will get cut due to downturn in revenue since they are the last to be built. Additionally, not having the West Seattle line connect to the South or the Ballard line connect to the north at Northgate means that the system fails to provide transit options from what already exist and that Metro will use these lines to cut services thus placing more single occupancy vehicles on the road and defeating the purpose of the transit system. In sum ST3 lacks vision and ambition. Statement have been made that you want this system to provide the accessibility of DC Metro, but so far I keep seeing a system that falls short. The original goal of connecting downtown and the airport was the correct solution. However, it seems moving forward that does not seem to be happening.
NORTH KING COUNTY	Please include Graham St Station as an early deliverable system access project. 20 more years is too long to wait for the Graham St Station. Graham St Station is critical to allow one of the region's most transit-dependent communities to have walkable access to the light rail system. A plan that spends \$1 billion on suburban parking lots and requires us to wait 20 years for an inexpensive project that would increase walking and biking does not reflect the values of Puget Sound. I and many in my community will not vote for the plan in its current form. We need Graham St Station NOW!"
NORTH KING COUNTY	20 years to complete the Graham St station?! That has got to be shortened by 75% at least!
NORTH KING COUNTY	What can we do at what cost to make this happen in less than the time currently forecast?
NORTH KING COUNTY	Can we build it faster. These projects seem to take too much time.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	my suggestions are to improve the core of the Seattle/Bellevue metro area, specifically Ballard (where I live) and west Seattle. I would also look at other funding sources including some sort of fees for bicycle users.
NORTH KING COUNTY	The plan only considers commuters getting IN to their destination, usually Seattle. There is a new and growing subset of people who live in Seattle and want good transit options to commute OUT to places like Ballard, Fremont, Bellevue, Redmond, etc.
NORTH KING COUNTY	Given the current state of the region, waiting 25 years to complete this plan is unacceptable. I'm 100% behind building out transit, but I'd like to be able to actually use the system I'm paying for before I retire.
NORTH KING COUNTY	West Seattle and Ballard light rail extensions should take precedence in the timelines. Far too many people live there and work downtown and beyond to wait 17 years for a better transit option. Especially if you plan on enacting a toll on the new SR99 tunnel and don't offer them alternate forms of transportation. That will adversely effect folks who are simply trying to get to work in the city in which they live.
NORTH KING COUNTY	We cannot possibly wait 22 years for light rail from Ballard to Downtown. The crosstown light rail line from Ballard to UW is also very important; I used to do that bus ride and it took 45 minutes, pretty ridiculous for such a short distance (and driving was not much better...it's just a lot of lights and heavy traffic). I drive from Ballard downtown today because the buses still take too long; I see a huge crowd every time I pass the 15th and Market bus stop, waiting for the D and 15X at rush hour, and the crowds are moving north because there's not enough room for them all. The city decided to make Ballard an "urban village" when we greenlighted the monorail, with the expectation that we would be getting mass rapid transit to handle the additional density. Well, that density has gone wild in Ballard as we all know, surpassing all expectations, and yet Ballard is almost the last project to be completed for ST3? Why would we prioritize less dense areas over this? Buses are not the answer; they still take a long time to move through downtown, and they are subject to traffic jams just like cars. Anything we can do to move the light rail along faster would be welcome. Thank you!
NORTH KING COUNTY	The timeline is much too long for the light-rail lines, especially in the Downtown and Ballard area. It should be built faster even at a cost of other parts of the system such as the bus lines.
NORTH KING COUNTY	If an area such as West Seattle were to take on additional taxation could the project for that area be completed sooner?
NORTH KING COUNTY	The completion timeline of the Ballard line is absolute [explicit]. Ballard should not have to wait a generation for Link light rail. Ballard is a densely populated neighborhood, and getting denser each year, yet all traffic is funneled over an obsolete bridge that prioritizes cars. Without Ballard Link on a more aggressive timetable, people there will continue to be car-dependent and less able to switch to walking, bikes and transit. Seattle Center, a substantial trip generator also along this line, will have to wait far too long.
NORTH KING COUNTY	Simply too long of timeline for light rail projects. Where is the urgency? I know this is expensive, and every region wants their project done first, but 17 years is a long time to wait in West Seattle...
NORTH KING COUNTY	Speed up the plan timeline!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	We are drowning in traffic. What we do, where we go is often determined by how much traffic we need to deal with in order to get to our desired destination. All the projects outlined in ST3 are very important..I don't think they would be itemized if the need wasn't there. Everyone in our region is dealing with traffic angst. A timeline of 25 years to complete light rail to Everett and Issaquah, 22 years to Ballard, 20 years to Tukwila at Boeing access road and Lynnwood, 17 years to West Seattle and Tacoma is unacceptable. We will be at a standstill on Northbound I-5 well before lightrail arrives in Everett in 25 years. The timeline needs to be shortened so that the entire region will see improved traffic flow earlier than later.
NORTH KING COUNTY	West Seattle needs the light rail before 2033. It has had a surge in population that is only going to increase with the new apartment complexes being built. There is too much traffic and not enough buses as it is. Both the C line and the water taxi are completely overrun during rush hour, making it impossible to get home at a decent hour.
NORTH KING COUNTY	This is needed NOW
NORTH KING COUNTY	Ballard connection should be pushed up in the timeline to happen sooner than 20+ years.
NORTH KING COUNTY	If there is a way to increase the amount of money that can be used in a given fiscal year to complete the projects quicker, I would support it. To me, the expansion of mass transit is the single biggest issue facing Seattle. We cannot be a world class city without world class transportation.
NORTH KING COUNTY	omfg. the time line is ridiculous (too long). if sound transit needs some legislation changed so we can build rail faster, we absolutely need it as part of this package. paying taxes for something that will be completed during my lifetime I support. paying taxes for something that is decades in the future, is really really hard
NORTH KING COUNTY	With the understanding that the City/Metro needs additional support and the region isn't beholden to provide service only within the city limits, it seems like a duplication of service to extend too far south and north. Look to Chicago for their integrated commuter rail/subway/bus network. I just don't see how there is a need for service outside peak periods to/from the CBD as you move outside the city. You'd be creating two commuter rail networks. There is a HUGE need for connections in town. You don't want to encourage people to move farther away. Increase service/headways in the most dense areas (there's nothing really even planned for BELLTOWN, the most dense area. Nothing planned for the east/west Ballard to UW corridor. Conceding the larger east/west 520/90 movements, the biggest need is in town. Paying billions of dollars for parking and large suburban style stations is what ATL did. Your director knows we don't want ATL. I lived there for 15 years. It's not the model to follow. People are shifting in town, not to the burbs. Thanks.
NORTH KING COUNTY	Would happily support increase in funding/budget if it meant project would complete sooner.
NORTH KING COUNTY	West Seattle and Ballard Light rail need to be done sooner!! These should not be delayed.
NORTH KING COUNTY	Timeline acceleration should be highly prioritized. 8-25 years is insane, when other comparable cities are light years ahead of Seattle in planning, development, and execution. This is a fantastic plan, but it should have been developed 5-10 years ago. Move faster, Seattle.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I don't understand why these projects take so very, very long to complete. Is it dependent on the revenue stream? I feel like I'll be dead by the time a lot of what's proposed is actually operational.
NORTH KING COUNTY	<p>My main objections to the proposed ST3 plan are around the timeline. I trust Sound Transit to know about effective project management, as the construction of the Central Link and the University Link projects have consistently come in under time and budget, but the expansion of light rail is a project that ought to be going faster, so that taxpayers voting on it today can hope to see the benefits of it within a reasonable time frame. The proposed timeline for the current plan has projects running consecutively, that could, with enough funding capability and workers and effective project management, be run concurrently. If there are legal or regulatory barriers in Sound Transit's funding or hiring capabilities that is adding years to this project, I would be greatly interested in there being additional legislation put forth that removes those barriers. If there is lobbying that needs to be done on the federal level to secure additional funds, I would want that communicated in the strongest terms to our elected officials. This is a project that needed to be started in the 70s, and we are playing catchup right now to have a comparable transit system to other metropolitan areas. Any unnecessary delay is intolerable.</p> <p>In addition to the comments above, I believe firmly that this undertaking should be pursued with the future of the area in mind. Seattle and surrounding areas are seeing a massive influx in population, growing housing prices, and a deepening wealth inequality. It's highly likely large amounts of people will be pushed into lower cost housing outside of major urban areas, and will depend on public transit to get to jobs. The higher quality that transit is, the quicker, the more efficient, the better. It is particularly important the rail be grade separated, to avoid either being impacted by, or impacting street level traffic, and construction having an eye towards of the possibility of future in-fill stations or rail expansions.</p>
NORTH KING COUNTY	<p>As a Seattle resident, I believe that it is more important to build the lines affecting residents of West Seattle and Ballard than the other lines.</p> <p>I am 80 years old. I may not live to see the completion of these lines, yet I will be taxed more every year for them to be built. I have family and connections in West Seattle and Burien, and would love to be able to travel there easily, especially with the demolition of the Viaduct, which is my favorite ride for the views.</p> <p>I also question the development aspects of the project, which would overwhelm and completely change the communities affected.</p>
NORTH KING COUNTY	I hope this project will shorten it's timeline as it receives more and more support. As someone who lives and commutes in Seattle, the number of cars on the road and the time it takes to travel to work is one of the largest reasons I have considered relocating. These plans will directly improve the quality of life for so many people who are forced to spend hours on the road because they cannot afford to live near where they work (especially for those who work in Seattle). This plan is extremely important and will impact lives positively IMMEDIATELY.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

<p>NORTH KING COUNTY</p>	<p>I am generally support more taxes for more transit.</p> <p>The concept of paying \$400 a year, as a household, for a connection from Ballard to downtown that won't be completed for 22 years(!) makes me question whether or not this plan makes sense. I'll have paid almost \$10,000 by the time that I actually get to use the services.</p> <p>On top of that, that the proposed Ballard connection is not going to go under the canal, and will have to stop for boat traffic makes me question if it's worth doing in the first place.</p> <p>I understand we need mass transit improvements, and I have voted for funding in the past, but, for me, this plan does not meet the basic requirements for my area, costs a lot of money, and takes more than 2 decades to complete.</p> <p>Step one would be dealing with the problem of a 7 year slated environmental review for the Ballard expansion. That's totally unacceptable. The plan should address WHY that was the initial expectation, and what steps have ALREADY BEEN TAKEN to shorten that timeline. If the worry really is about lawsuits, deal with getting buyin to prevent that first, and try to sell a plan after you have a reasonable timeframe secured.</p>
<p>NORTH KING COUNTY</p>	<p>The projects that connect to the existing system - primarily in Seattle, but also on the Eastside, are the most critical, and should be moved up in the timeline. You are going to lose the support of Seattle voters if you continue to take them for granted by prioritizing the north and south projects at the expense of in-city transit. You need to complete the Ballard and West Seattle lines within the next 15 years, or you will lose in November.</p> <p>Second comment - you need to include Ballard to UW, and a study of a Metro 8 subway, with the Ballard line going through Belltown.</p> <p>Third comment - Ballard line needs to be grade separated the whole way, either elevated or tunnel. Across the ship-canal, you need to tunnel to make these trips faster and serve more riders. Save money to make this possible by not building \$1B in parking at light rail stations, or by outsourcing parking at suburban stations to private companies.</p>
<p>NORTH KING COUNTY</p>	<p>The timeline for completion of projects is unreasonable. Many people who will be paying the additional increase in taxes will be unable to afford to live in the area in a few years and will have been paying for a system they won't use. There needs to be some tangible, near-term projects that people will be able to see come to fruition or this going to absolutely fail.</p>
<p>NORTH KING COUNTY</p>	<p>I would prefer a faster timeline, but hey, this is Seattle. Any progress is progress.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>This timeline is unforgivably laughable, especially for the proposed cost. These improvements were needed 25 years ago, not 25 years from now.</p> <p>If it means focusing on fewer projects to get them done MUCH faster, then so be it. At-grade transit is WORTHLESS, and I will never vote for at-grade rail in the city limits of Seattle or the urban cores of Bellevue and Tacoma. BRT is a pathetic band-aid, at best, especially with the way it has been half-implemented so far without dedicated bus lanes and removing parking from overloaded arterials and thoroughfares.</p> <p>The Ballard and West Seattle lines are far and away the most important transit projects to develop as fast as possible. We need them NOW, not in 2033/2038. And they must be grade-separated, be it in tunnels or elevated. Anything else is a waste of time, money, and political capital.</p> <p>I realize that planning, review, permitting, and construction takes time but this is just absolutely pathetic. The rest of the world is building more transit far quicker and far cheaper than this proposal. We are being left behind, and this proposal does not focus on the significant pain points nearly enough. In 2041, when this ST3 proposal is scheduled to be completed, we will look back at this moment with nothing but regret about how poorly we focused our resources.</p> <p>This proposal is trying to do too much and please too many people, and in the process will not accomplish nearly enough and will please hardly anybody. Unless the timeline is made to be much more aggressive I am strongly inclined to vote down this proposal.</p>
NORTH KING COUNTY	<p>10 years should be the maximum amount of time to finish these light rail projects. I would be willing to pay extra if it meant we could finish these projects within a reasonable time (which 25 years is not).</p>
NORTH KING COUNTY	<p>The faster it gets developed the better</p>
NORTH KING COUNTY	<p>Hello,</p> <p>The timeline is too long and the cost is far too much (\$50 billion?!?) for what is proposed. We also think that the more of the cost should be shouldered by the people actually using the mass-transit services. I am nearly certain Sound Transit could do it faster and with less money because I have followed mass-transit projects around the country and world.</p> <p>Come on, you can do it better!</p> <p>Thanks, [name]</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Ballard should not wait nearly 25 years for light rail. They need it now. Likewise West Seattle should not have to wait. I understand the region needs to support this plan, but extending the timeline for Seattle projects just doesn't make sense given the growth the City is experiencing.
NORTH KING COUNTY	Light rail extension to West Seattle should happen sooner. West Seattle is growing quickly and the people there should be included in the transit system earlier than 17 years from now. Also, It seems like a smaller project to complete than many other ones so it could have a faster return on the investment. Yes, the C bus connects you to the light rail but at what cost? If I'm trying to get South or East there is no timely way to do so from West Seattle. The biggest flaw in our current system is the lack of reasonably quick East-West transit.
NORTH KING COUNTY	The Ballard line needs to be moved to up in the schedule. The bottom line is literally about money - residence of Queen Anne, Magnolia, Ballard, SLU, and Belltown pay a huge portion of the property taxes for this area. Property values are extremely high in these neighborhoods and they denser than the outlying areas that are receiving light rail service first. The Ballard line should be first on the schedule even if that means the line does not initially tie in with the current lines.
NORTH KING COUNTY	I think the sooner the better for these projects. 25 years is too long to have everything finished. If we can somehow cut it down to 15-20 years that would be much better. I also think the Lynnwood/Everett light rail should be of higher priority. That corridor is one of our worst for traffic and 25 years is too long to wait for light rail to get there. I think it should be one of the first to be completed if possible.
NORTH KING COUNTY	I wish that the timeline was faster and that there was more of a focus on grade-separated light rail. This proposes some great stepping stones that I strongly support and I want MORE.
NORTH KING COUNTY	I realize Sound Transit has financial limitations as well as environmental regulations and government process steps that dictate the project completion timelines. I also realize ST would prefer to under promise and over deliver as far as schedule and cost. Please look for transformational opportunities to pull these projects to the "left", particularly those which will benefit the most citizens. Keep in mind projects in Seattle benefit more than just Seattle residents and taxpayers - they benefit anyone in the region who wants to travel to and within Seattle.
NORTH KING COUNTY	I wish the Ballard line was not the last to be completed. Also, the Ballard line should be connected to the north, not just a dead end line. It would also be nice to have a Sounder station out at Shilshole Marina somewhere.
NORTH KING COUNTY	It would be fantastic to get a light rail connection to Ballard sooner than 22 years... In general, I wish all these timelines were shorter, though I understand that there are good reasons for them to be as long as they are.
NORTH KING COUNTY	I'm 100% on board with ST3, but 20 years for light rail between downtown and Ballard is a very very long time.
NORTH KING COUNTY	Why does it take so long to get light rail built?! We're going to get to Mars first, and that is a shame.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>It is unfortunate that our populace did not have the foresight to choose to build this in the 70s when they had the opportunity. Now we are at a point of critical need. The timeline is WAAAAY too long. Get creative and figure out how it can be delivered faster. Also, the West Seattle proposed line does not go far enough. It needs to extend south at least to Westwood if not fully to White Center or Burien. The vast majority of people who would benefit from improved transit live south of the Junction and the terrain is West Seattle is not conducive to walking and biking for most people. Remember that West Seattle has the highest hill in the city. Only the most intrepid of riders attempt bike commuting from West Seattle. Finally, why elevated in West Seattle? You are proposing an elevated station at The Junction. This is a dense area, which has seen a lot of new development in recent years (and ongoing). Where can you possibly put an elevated station without tearing up something that just got built? Cutting into hill after the Duwamish crossing and going via tunnel would be a far superior solution.</p>
NORTH KING COUNTY	<p>Looking at the early deliverables it feels like Seattle is left out, considering our traffic woes in the city. I understand that improvements to bus transit can go online much earlier than new light rail lines, but speeding up the timeline on projects like the Graham ST infill station would make this much much more palatable for voters in Seattle. And it seems like that's something that might actually be a possibility if it were made an early budget priority. Right now, it feels like Seattle voters are going to be asked to pay for something that they won't see any gains from for decades. Speeding up the time table on the infill stations would seem like a good early deliverable for the city. And Graham ST would also serve a poorer community (relative to the rest of the city) that could make great use of light rail access. Also seems like it might make a good area for transit oriented development that could serve dual needs of creating affordable housing (another desperate need in Seattle) near light rail.</p>
NORTH KING COUNTY	<p>Extending grade separated light rail within the Seattle city limits should be the #1 priority. It should not be the second to last project to be completed. This plan seems to focus on getting people from elsewhere in the region into the downtown core. What systems do we have to move these people once they get to the downtown core? If their destination is not within walking distance of a transit hub, driving will still be chosen by many. The focus should start with making it easy to move within the city. Once people are able to move effectively within the city, we can expand the systems that feed people to the downtown core.</p>
NORTH KING COUNTY	<p>The timeline is far too long for providing light rail stations to the dense neighborhoods. I and others would gladly pay more in order to have the projects completed sooner. 20 years is far too long for a problem which will cripple the area in 5-10 years. This package appears to be too little too late.</p> <p>Additionally, More thought needs to be given to east-west light rail lines. A significant number of people live in central and north seattle and work in Bellevue/redmond where there is additional room for businesses to grow. The possible light rail line from ballard across 520 to redmond should be looked at for inclusion in this proposal.</p>
NORTH KING COUNTY	<p>The plan is too slow. Expedite ballard and west seattle.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>Prioritize connection from Ballard to Downtown, and West Seattle to Downtown.</p> <p>Prioritize creating denser living / denser communities near Downtown, rather than just extending transit farther and farther out.</p>
NORTH KING COUNTY	<p>I support mass transit and have voted for every transit project on the ballot since I moved here 6 years ago, but 22 years for light rail to Ballard and West Seattle is ridiculous. Unless these timelines are modified, either by additional funding from the city of Seattle or a change to the draft, I will vote against ST3 in November.</p>
NORTH KING COUNTY	<p>Is there any reason these can't be constructed concurrently? The 20 year timeline is something I don't know if I have the patience to stick around for.</p>
NORTH KING COUNTY	<p>The light rail needs to happen much faster. Maybe that's not possible. Our region is just so behind in light rail.</p>
NORTH KING COUNTY	<p>It deeply saddens me to see the project timeline for ST3 be so very far in the future. As a Ballard resident, I see everyday that transportation to and from the area is poor. I would like to be able to ride light rail from Ballard sometime before I retire, but as it stands with the current timeline, this isn't going to happen. Please consider doing whatever is possible to step up the timelines for the ST3 projects. The spine can wait (since we'll have most of it built), but the other investments are desperately needed *now*. They were actually needed yesterday, but there is no time machine to go back and approve Forward Thrust or RTA. Even if it costs us more, I for one will definitely vote for ST3 if it can deliver transit as quickly as possible. I'll still likely vote for it if the current timeline is continued, but I won't be surprised if thousands of other residents shun this plan because it will do to little too late.</p> <p>As an aside, I truly feel ST is missing a fantastic opportunity by only doing an "investment study" on the Ballard-UW line. This is an incredibly important bit of investment. Traveling east/west in Seattle is abysmal and needs improvements now. Light rail from Ballard to UW can make those improvements and hit some of the densest populations in the city.</p>
NORTH KING COUNTY	<p>Timeline for adding Graham station is completely unacceptable. Seattle voters already approved a Move Seattle levy that implied additional funding for this very station project, and not adding Graham light rail station for another 20 years erodes voter's trust in the system. Adding this station does not require extensive capital investments such as a second downtown transit tunnel. Why did Sound Transit decide to postpone the Graham light rail station project with the right of way and funding already available?</p>
NORTH KING COUNTY	<p>Cost aside, the proposed timeline is completely unacceptable and justifies every truism about government beauracracy. The entire city was regraded and terraformed in less time than this will take. I have voted for every transit proposal prior to this one, but this takes the cake with pure cushy government decadence.</p>
NORTH KING COUNTY	<p>I would prefer to see smaller projects with a shorter timeline rather than ambitious, multi-stage projects that take decades to finish.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Some of these projects are estimated to take 10+ years to complete. I understand that boring the tunnels and construction will take time but what would be the cost associated with expediting the work to more reasonable durations of time, given the current state and rate of increase of traffic in the greater Seattle area?
NORTH KING COUNTY	There has to be a way to finish the projects sooner. The timelines that are given are extremely disappointing. The demand exists today.
NORTH KING COUNTY	This solution has been needed for decades, but the implementation is on a time scale of decades. This is madness and needs to be built out much, much faster than the time tables proposed.
NORTH KING COUNTY	Light rail to Ballard needs to be moved up to sooner than 22 years for completion. I also do not see anything in these plans to improve travel from Ballard/Crown Hill et al to UW (west/east travel in North Seattle).
NORTH KING COUNTY	I would like to see the Ballard and West Seattle additions to the light rail system be done sooner than the projected plan calls for, ahead of the expansion to Federal Way.
NORTH KING COUNTY	The time taken for the suggested projects to complete seems like an impediment to generating broad support.
NORTH KING COUNTY	Connection to Ballard and West Seattle by light rail is the most critical aspect of the expansion of Link Light Rail. While this project is a region-wide effort, it is simply critical to connect two of Seattle's most important districts by Link Light Rail. I understand that it takes time to plan for connections to Ballard and West Seattle, but the fact that Seattle residents will have to wait so long for access to these districts is hard to swallow. The need for light rail in Ballard and West Seattle is already here; waiting so long for those essential districts to be connected will likely be difficult for Seattle residents to bear.
NORTH KING COUNTY	We need light rail as quickly as possible. Mass transit that is not traffic dependent is super important for our area. We need to act now because we should have done this decades ago.
NORTH KING COUNTY	The project timelines are just too far in the future for me. I am probably going to be moving away from the Puget Sound area because transit is so bad.
NORTH KING COUNTY	The Light Rail from Ballard to West Seattle via Downtown needs to be a priority, 22 years is ridiculous.
NORTH KING COUNTY	The proposed project completion timelines are far too long. Seattle's booming economy is not likely to continue at the same pace for a quarter century. The demand for these projects is already beyond the threshold for "build now" actions. I understand that financing, public support, and approvals are difficult to work with in a fast manner, but the more we can do to speed these projects up, the better. Urgency is key.
NORTH KING COUNTY	Do whatever you can to speed up all of it. I support the plan and think we should break ground today and build it all as fast as we safely can.
NORTH KING COUNTY	1) Both the Ballard to Downtown and West Seattle to downtown segments need to happen sooner than 22 years!!!  2) A Ballard to UW crosstown line should be more seriously considered.
NORTH KING COUNTY	I'm concerned about how long it's going to take this to happen. I would rather pay more in taxes to help complete this in half the time. 22 years to get rail to Ballard is crazy.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Love the idea of more lightrail, just wish it could realistically be completed faster. 22 years for lightrail to Ballard seems absurd.
NORTH KING COUNTY	The sooner, the better! Thanks.
NORTH KING COUNTY	I think that the in city routes are more valuable and will better serve the regions interests. Expanding light rail to less dense further reaches will make it under-served. Seattle residents need comprehensive subway sooner than later. This is where the density and parking issues already exist.
NORTH KING COUNTY	Timelines need to be moved up. The timelines are simply too long.
NORTH KING COUNTY	These timelines are ridiculous. It has already taken 20 years for the single line in use. I have voted for transit every time. However, I will not support this under the current timelines. People want transit, and will pay for it, but not 25 years from now. If there is no way to speed it up, this will fail. Ditch the second tunnel for now and extend the lines outward to Everett, Issaquah, Tacoma first to create a strong regional network that has high ridership.
NORTH KING COUNTY	The timeline for these projects is far too slow. These projects have been needed for the region for years. By the time these projects are done there will be a whole new set of unaddressed transportation problems that will be festering. 25 years to completion is simply unacceptable. Increase the price tag if necessary, but allow the transportation network to assist the region's growth, rather than cripple it.
NORTH KING COUNTY	While I have objections to some of the specific projects that were included and excluded from the st3 plan, this comment is about the brt lines on 405 and 522. I feel that these comparatively low effort bus projects should be moved to the very front of the line because they will have a large impact on an already congested route.  My second comment is that I am disappointed to not see an East-West Ballard to UW light rail connection. This is a huge pain point for Seattle already! I'd rather see this than light rail to issaquah, for instance.
NORTH KING COUNTY	My biggest complaint is the timeline. 25 years is too long to wait. We need these changes now. Reduce to a 15 year timeline, even if it means it will cost us more.
NORTH KING COUNTY	17 years for West Seattle and Ballard service is UNACCEPTABLE. I live in West Seattle and work in Ballard and spend hours commuting every day. We pay outrageous property tax and have been left out of service plans for decades. Enough is enough!!! I probably won't even live in Seattle in 17 years; why should I pay for transit improvements that I'll never get to see?!?! West Seattle and Ballard FIRST!!!
NORTH KING COUNTY	Ballard to Seattle needs to happen sooner, the current timeline is unacceptable, and I will not vote for this plan unless it's earlier in the timeline.  8 years for environmental inspection seems way too long. I will pay more to have it get here faster.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I feel like this is all well and good, but it should have been started years ago. It's another case of too little, too late. I do appreciate that ST is at least acknowledging that SR522/Lake City Way actually exists and that there are a large number of commuters there that need more transit options. This area, particularly south of 125th St., is regularly neglected by Metro when they are revising routes, and in fact they just eliminated the only all-day bus route that goes from Lake City to Downtown (72). It shouldn't take me 2+ hours to travel a total distance of 13 miles, from Lake City to lower Queen Anne!
NORTH KING COUNTY	We should connect to Tacoma quicker than 20+ years.
NORTH KING COUNTY	Really wish there was explication on why the timeline is so long, and if there is a way to alleviate/speed up the timeline.
NORTH KING COUNTY	Its unbelievable the plan will cost \$50 billion and take so long to build out the light rail. 7 years for environmental study is crazy. Maybe the project will be done so folks can take light rail to my funeral.
NORTH KING COUNTY	17 years is a long timeline. I'd like to see it happen faster.
NORTH KING COUNTY	Pedestrian bridge from North Seattle College to Northgate station should be prioritized and built as soon as possible. Northgate and surrounding neighborhoods do not have the parking capacity needed for users who live, work or go to school on the other side of the freeway. The current bike and pedestrian options are cumbersome and unsafe and will decrease transit usage if there is not a more reasonable way to cross the freeway without a car.
NORTH KING COUNTY	<p>The Ballard/QA line in 25-years' time is entirely too long to wait. Furthermore, there is no line to connect UW/U-District to Ballard. If the First Hill streetcar is any indication, a streetcar is just as untenable as the 44 bus route as a reliable and quick way to get from the U-District to Fremont and Ballard. (What I'm saying is that quick and reliable light rail is 10x better than a slow and stuck-in-traffic streetcar/bus.) The center of the city is growing at a record pace, and will continue to do so as long as the city remains affordable and millennials seek to live in lively, walkable, transit-oriented city centers (unlikely to change any time soon). One light rail line that completely neglects the entire west side (Belltown, SLU, QA, Ballard, Fremont, Wallingford, etc.) of the city center is not going to suffice for the next 25 years. Imagine Cambridge, MA without the T from Kendall to Davis -- that's what the north side (U-District to Ballard) is going to be like in 25 years.</p> <p>Additionally, I don't understand why bringing light rail to heavily suburban areas is seemingly more urgent than sufficiently connecting the central city. Light-rail in suburban areas with loads of parking is only going to reinforce a car-centered culture and encourage people to live in and move to suburban areas.</p>
NORTH KING COUNTY	These timelines are laughable (way too slow).

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>As described, this timeline is unacceptable. You can't talk about our growing region and how quickly traffic is getting worse and then offer a plan that addresses that problem in 25 years. I am a full supporter of mass transit and light rail expansion but the timeline as laid out is completely unacceptable and makes me strongly consider a no vote in November. The focus should be on more easily moving people around the city and region, not simply relieving traffic congestion so that you can drive around more. The lines to Ballard, West Seattle, and to Bellevue should be of first concern. Move people around the congested city more efficiently and open up opportunities to get to places people want to go. The next step should then be to connect different urban areas to help relieve suburban commutes. City focused light rail will benefit the city and region 7 days a week, 18 hours a day while intra-urban area light rail will benefit directional commutes 5 days a week for 2 hours in the morning and 2 hours in the evening. That's not city-focused urban renewal, it's a suburban growth enabler plan that encourages people to drive because "everyone else will be on light rail."</p> <p>Overall, I'm very disappointed in this plan and due to the timeline, a strong supporter of mass transit expansion is considering a no vote in November.</p>
NORTH KING COUNTY	<p>Ballard should be given higher priority in the timeline than Federal Way, Lynnwood and Tacoma. Work from the core of the city outwards.</p>
NORTH KING COUNTY	<p>I would rather see shorter timelines for some of the higher impact projects with removal or lag added to some of the lower impact projects. I love the plan as a whole and strongly support it, but with the state of traffic as it is, and rapid growth the area is experiencing, I would favor something even more aggressive. The plan is suitable to what the region looks like right now, as in we should have this system already in place. I feel like we are playing catch up to something that should have gotten going 20 years earlier than it has and unless we are more aggressive in planning and implementing these solutions we will always be lagging.</p>
NORTH KING COUNTY	<p>I am perplexed by the duration being floated here. We are 20 years into rail deployment, and you are asking for another 25. The final map looks good, but your timelines are flipping insane. You need to communicate with us why this is taking so long and what steps can be done to remedy this timeline and/or show that forward progress is being made!</p>
NORTH KING COUNTY	<p>The timeline for light rail to Ballard is FAR too slow. The downtown tunnel is a regional asset that will be used by trains from every single subarea. As a result, every subarea should contribute to the cost of the new downtown tunnel. The board should also eliminate funding for the Boeing Access Road station, which will have very poor ridership per dollar, and use that funding to speed up delivery of rail to Ballard and Graham Street.</p>

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The timeline on some of this is pretty ridiculous. I know it takes time to build this, but waiting until 2038 to connect Ballard to Light Rail is not good. I'm sure this has been pointed out, but a child born today would be done with college before that happens. Waiting until 2036 for infill stations is also ridiculous. These stations are needed now, not 20 years from now. I'm sure there's a reason, but if it's not made apparent it's really tough to support this package. I'm an enthusiastic transit supporter and will probably grudgingly vote yes on this, but waiting so long to connect the dense areas in the region so that we can build rail lines to the suburbs strikes me as ill-advised.
NORTH KING COUNTY	I feel that places that could benefit from better transit - like west seattle and ballard - AND have voted for the tax increases should get preference over the eastside which consistently votes them down.
NORTH KING COUNTY	I believe the framework should be built out from the inside, primarily starting in Seattle (i.e. start with the Ballard and West Seattle Lines connecting the hub of Puget Sound - Seattle). Once that framework is established then I feel it's appropriate to branch out into the periphery.
NORTH KING COUNTY	FASTER. Twenty-five years is far too long to complete this system.
NORTH KING COUNTY	If there is any way in hell to get this done sooner, please do so. i would also add the 130th Street Station. As costs of living gets more expensive in our city, more people are moving south and north. Seems short sighted to not include a stop where we know the population is going to be.
NORTH KING COUNTY	The plan is nice, the timeframe is ridiculous. The priority for this should be need based, not geographic. Light rail to Ballard and W Seattle should be far and away the number one priority, and should be constructed on an accelerated timeline. The other projects can be completed with the time and resources left over.
NORTH KING COUNTY	A timeline of ~20 years for a Ballard expansion is untenable by itself, and made even worse if the line isn't grade separated.
NORTH KING COUNTY	2038 is way too long of a timeline for the Ballard line, I'd support a higher tax to get it done sooner.
NORTH KING COUNTY	This needs to happen. This needed to happen years ago, and things like it were voted down consistently. The 25 year time frame is what's so depressing. That says to me, as someone who recently entered the workforce, that we won't have a fully functioning system in Seattle until I'm close to retirement. The city will likely grow tremendously during that time, and these problems will continue to grow worse and worse. Creating innovation such as buses having dedicated lanes, ideally on their entire routes, is what it will take to get us through the next 25 years. I'm talking shutting down certain streets so only buses, streetcars, pedestrians, and bicycles are allowed on them.
NORTH KING COUNTY	This timeline is way too slow. The light rail system needs to be fast-tracked and completed as soon as possible. A Ballard-Fremont-Wallingford-UW light rail line is obviously missing, and should be ADDED to the proposed plan.
NORTH KING COUNTY	West Seattle should have had monorail already; with the density occurring, we cannot wait 17 years to be taken seriously as a neighborhood. Areas of our neighborhood are already severely neglected and have no service to downtown outside of peak hours and there is no reason it should take two hours to travel 15 miles on main routes that are supposedly "well served."

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	This project timeline will be the biggest factor keeping the "regular" every day voter from voting yes on this plan. I'm a big transit supporter and advocate, and even I am struggling to support this timeline. Projects like Graham St. Station and Downtown to Ballard are projects that are needed TODAY and under this plan, they would not be completed for over 20 years from now. To get my support and the support of these "everyday, regular" voters, ST needs to do figure out a way to reduce the timeline of delivery for these projects, even if it means that at the end of the 25 years, we may still be paying taxes even though there is no construction left to do. There is capacity of design and construction firms to do many of these projects simultaneously; there just needs to be the funding mechanisms to get us there.
NORTH KING COUNTY	Currently I am planning on voting no for two reasons (1) the timeline on this is too long and (2) light rail is not an appropriate technology for a spine from South Tacoma to Everett. There is not the density to be building some of these rail plans. I get it, everybody wants rail because Seattle got it. Politically you have to do it. But light rail from Tacoma to Everett is dumb, and the city needs more transit options. If these plans were faster, I'd be willing to overlook some of the questionable rail decisions. (Also Paine Field, really? Is everyone going to walk from the station to their factory jobs?)
NORTH KING COUNTY	The light rail link through SLU and Queen Anne to Ballard is an essential part of this plan, and should not be put off 22 years. Lower Queen Anne *needs* to be prioritized as a destination for light rail. Queen Anne is the largest neighborhood in Seattle, as well as the home of the Seattle Center and multiple tourist and cultural destinations. With the huge expansion of business in SLU and lower Queen Anne (Google, Facebook, Amazon, Microsoft and Expedia) traffic has become a nightmare and parking is impossible, and will only get worse in the next few years. For example, at this time, it takes 45 minutes for me to drive from lower Queen Anne to Capitol Hill during rush hour - I can get to Everett as quickly, which is absurd. While there are quite a few buses that serve Queen Anne, they use the same roads and get stuck in the same traffic, and are frequently behind schedule. The gridlock on Mercer and new business and housing in our neighborhoods is increasing exponentially and need to be served by a reliable, fast light rail link. This is obvious to anyone who lives, works or visits the Seattle Center, and should make this a significant priority, rather than one of the last projects completed.
NORTH KING COUNTY	I think improvements to transit within the city itself are of greater import than in outlying areas, and warrant attention sooner than the existing plan (e.g., ballard station proposed in 22 years).
NORTH KING COUNTY	Ballard in 2038 is far too long to complete.
NORTH KING COUNTY	ST needs a plan to develop the fenced off parcels in southeast Seattle. They are a blight. Also, the landscaped area in the SE corner of the Columbia City station is full of trash and has not been maintained. What is the plan prior to expansion? Overall the plan is going to take too much time.

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>It was my understanding that prior funding methods were to be used to develop the "spine" of the lightrail corridor. That model may have made sense then, however, I don't believe that it continues to make sense at this time. There are other modes of transportation that can help supplement the spine (Sounder and ST Bus). Additionally, I don't believe enough investment is being made within the Seattle Downtown Core. I'd like to see a better core built that we can expand on. For example, ensuring that our downtown capacity can handle the volume of riders/trains is important.</p> <p>Additionally, the project timelines are not beneficial to those areas whose promoted growth policies are having an immediate impact today on the quality of life. Light rail lines through the communities immediately surrounding Seattle (Ballard, West Seattle, Central, Interbay, etc.) must be expedited. We have supported infill growth without an comparable investment in transit that leaves our communities stalled when it comes to mobility. I think we should be aggressive with our delivery of these high capacity/frequency modes (Light rail) and I'd like to see us build out as fast as possible that is not limited by the funding model that has been employed to date.</p>
NORTH KING COUNTY	22 years is just too slow for this price. scale back or get the capitol to remove some red tape. half of us filling this out will be DEAD before 22 years.
NORTH KING COUNTY	<p>Doing Ballard to downtown so far away is just insane. We have needs NOW, not when my kids are middle aged. It's fine to do light rail in the suburbs, but the bang for the buck we would get by prioritizing city of Seattle light rail is huge compared to doing light rail to Issaquah or Paine Field, or even Everett. Don't we have commuter rail already to Everett and Tacoma? Light rail/subways should be put in dense urban areas first. Let's improve commuter rail for Tacoma and Everett, and add more express buses to more suburbs, and put in more rail in the city of Seattle. I would say Bellevue, too, but they are getting good light rail service with ST2.</p> <p>thanks</p>
NORTH KING COUNTY	Is it at all possible to accelerate the timeline, especially the Ballard to Downtown light rail?
NORTH KING COUNTY	The light rail time line is depressingly long. Bring this service sooner.
NORTH KING COUNTY	Ballard should take precedence over some of these larger, longer-reaching projects. 22 years is way too far out.
NORTH KING COUNTY	Too slow.

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I love the idea here, but I can be honest that if it takes up to 25 years as proposed, I can't care about the project with enthusiasm. I realize it can't be done overnight, but I don't understand the prioritization or need for one fix more than the other. Example: I'll be over 70 years old by the time Ballard sees light rail a few miles into Seattle. Based on how the buses are overloaded now, I'd cheer and throw money at the idea of seeing far better transit (however accomplished) within 1-5 years. That's similar for nearly all plans between east side, north and south (Everett, Bothell, Bellevue/Kirkland and down to Tacoma). The mobility here feels crippled for the amount of people suddenly showing up within the past decade. I've enjoyed the Link rail immensely and see the benefit, but can't care if it's going to take even 8-10 years (if it remains on time). Maybe the bus systems are the faster improvement while the rail is going on. I'll chip in for whatever fixes the issue within five years or less, but encourage ways to gain funding and labor for reducing the 25 year plan. Signed, an ignorant lifelone resident that needs to get around the Puget Sound without big mobs and long delays.
NORTH KING COUNTY	It would be great to see the light rail lines into West Seattle and Ballard prioritized and put on a faster timeline, particularly since residents in those communities will likely be footing a larger portion of the bill for this plan (higher property values). The need there is extremely urgent and would likely result in some of the fastest relief of road congestion through the city, particularly at peak times. 17 years is way too long to wait for this.
NORTH KING COUNTY	Twenty two years for Ballard? As if. That's not a plan. That's Northwest Milk Toast (NWMT). Ballard to downtown should be on the 8 year time line at most. Maybe Bernie will gets us some Fed money. Alternatively, since Jeff Bezos alone is responsible for bringing 30K new employees to South Lake Union he should spend a some of his 49Billion in net worth. . .
NORTH KING COUNTY	It would be better for the light rail projects to be finished sooner rather than later. Traffic is already horrible, and by the time light rail comes to west seattle and ballard, it will be many times worse.
NORTH KING COUNTY	The "25 year" plan is not going to be fast enough. We are exploding NOW and we need this stuff NOW, not in a decade and a half... Things are STILL getting worse, there are still MORE people coming in and thats just going to continue to accelerate. At this rate, 25 years from now we'll have so many people that this entire project will have to be reworked ANYWAYS. All of the proposals discussed need to occur by the end 2030 for any of it to legitimately help this area.
NORTH KING COUNTY	Please build this faster... 2041 completion date is ridiculous. No one will agree to pay taxes and have to wait that long.
NORTH KING COUNTY	Whatever it takes to make this move faster, lets do it. We can't wait 25 years for all this.
NORTH KING COUNTY	Stop trying to finance everything using bonds (property taxes). Establish an income tax. Accelerate the development of light rail projects dramatically. Focus on integrated systems rather than disconnected services such as street car, light rail, bus, etc.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I really fear this package will fail if Seattle residents don't see new lightrail (beyond the Northgate extension) before 2033. I know other improvements will be made before then, but if people can't see their money making life in Seattle better before the Downtown West Seattle line is built, I think this will go down in flames.
NORTH KING COUNTY	The timelines are way to far out in the future, and you will not get my vote because of this. The explanations for why the timeline's are so far out have been inconclusive.
NORTH KING COUNTY	25 years is a ridiculous amount of time to expect the light rail to be completed. This needs to be a 10 year plan and resources need to be found to make this happen. Our region is expanding so fast that Sound Transit needs to follow a similar timeline to the expansion of the region. Ballard will look drastically different in 25 years and those living in the area will change drastically in that time period. Just look at the speed South Lake Union is changing. If you want people to vote YES in November you will have to lower the time of completion on this.
NORTH KING COUNTY	It's very tough to sell 10+ year projects. Any kind of incremental benefits, such as the University light rail station opening early are huge morale boosters. It's easy to look back and say "this should have been done years ago" but now, the people you're most relying on will be near retirement age when these networks go online. That's a tough sell. Small victories (and not [explicit] like bus "rapid" transit) for rail that won't get slowed by traffic are very important.  With all bus routes going through the U-district soon, it's very important to expedite the extension to Northgate and beyond.  Thanks!
NORTH KING COUNTY	We should be able to get this all done in half the time by increasing the amount we are taxed.
NORTH KING COUNTY	Waiting until 2038 for rail to Ballard? What a joke. I wonder if anyone of the planners tried to board metro #40 or #28 at peak time. Proposed measures and timelines for city of Seattle are inadequate. We need better transit now and not in 20 years.
NORTH KING COUNTY	West Seattle and Balard timelines are too slow considering they have some of the highest projected riderships. These should be completed quickly!
NORTH KING COUNTY	22 years for a Ballard connection seems really long. Connecting UW/Capitol Hill didn't take that long. What's up with that?
NORTH KING COUNTY	It's need to be done faster, otherwise when you finish the lines it will already need an upgrade!
NORTH KING COUNTY	I'm very supportive of this plan in terms of the services being added, but the TIMELINE IS WAY TOO SLOW. This reads like a plan to address the issues that we are having today. By the time 2030 and 2040 roll around, our issues are going to be so much worse, and this plan will probably be inadequate to address them.
NORTH KING COUNTY	PLEASE move Ballard and West Seattle UP on the timeline! Also, East West should move up-tough to get to Redmond or vice versa right now.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The plan needs to be in action sooner before the problem grows faster out of control.
NORTH KING COUNTY	Light rail to Ballard needs to be prioritized. There is much greater density in this area of Seattle than in any other area where light rail is proposed and continues to grow at a rapid pace. I understand it takes a long time to collect enough funds to construct the line and it will take years of design, engineering and construction before the line can be ready, but 22 years seems way too far out - a project as important as this should seek to get light rail to areas like Ballard first and should be in the 10 to 15 year time frame. Please consider moving this up in the timeline and changing the priority of other projects or trimming back other items. Thank you!
NORTH KING COUNTY	The Seattle Center and the surrounding neighborhoods of Queen Anne and South Lake Union are major destinations for both tourists and locals. This needs to be made a priority before the 20 year mark.
NORTH KING COUNTY	We need to build fast reliable grade-separated transit quickly to make up for Seattle's lack of highway access and geological choke points. Projects should be built in tandem so they can be completed quicker and create a complete solution to mobility problems in the Puget Sound area.
NORTH KING COUNTY	I know ST should under promise on delivery dates, but it is hard to see so many projects completed over 20 years from now.
NORTH KING COUNTY	I strongly support the project in theory, but the timetable is simply too long. A timeline of 23 years? That is not workable. I know this is a real challenge, but this IS the challenge: getting things moving NOW. In a quarter of a century, that's simply too long. And frankly, it is hard to support enormous tax increases with no more immediate benefit.
NORTH KING COUNTY	ST must improve the timelines for completion for each segment or risk a failed voter outcome. The region needs transit relief immediately and proposing a quicker timeline will draw better support. Think outside of the box to complete ST3 in 15 years by adding second shift and weekend construction. It can be done. Consult with private organizations to gather ideas on how to implement a quicker construction schedule. My sense is that the public will only support this large investment if the timeline is something they can vision and participate in for the taxes they will have to pay.
NORTH KING COUNTY	I feel the biggest priority should be to ease traffic off of the major corridors first (5,405,90,520) by building light rail along those corridors. For example, I can get from south Seattle to downtown or to north Seattle using light rail, but I cannot use it to get to Bellevue. As a result, switching to the bus to get to work turns a 30 or 35 minute commute into an hour and 15 minute commute. It almost triples my commute time. But, if light rail extended along I90, then I'd have only a single transfer station or two instead of having to rely on slow buses. Further, there are long stretches that are pretty much being ignored by alternatives to buses. Yes, buses help alleviate traffic, but they don't help enough as they are still on the roads taking up space. It's better to plan mass transit off the roads and either build it underground and create new corridors (which we cannot do) or build it above ground along existing corridors people already use. Link Bellevue and Seattle, West Seattle and Seattle, and expand light rail so that it's a better alternative to glacially slow buses.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I know major construction takes time, but this cannot come soon enough. I think it would be worth increasing taxes to increase the speed of construction.
NORTH KING COUNTY	The timelines to build out transit to Ballard and West Seattle are absurd. There must be a way to get more of the money upfront. Could you borrow it from the feds, and pay it back as the tax dollars roll in. Or could a public/private partnership with the companies in SLU be formed to front the cash. These aren't grants. These are low interests loans, similar to what the Seattle Arena owners are proposing for SODO.
NORTH KING COUNTY	The lengthy timeline to complete the Seattle-based light rail lines are simply unacceptable. Even once the Ballard and West Seattle lines are built, there will be absolutely no benefit to people going East-West in North Seattle. Not to mention that West Seattle's line is an expensive, gold-plated solution that won't even benefit most of that region, given how spread out the population living there is. ST3's current form is asking for too much time and money to create a symbolic "whole system" that will be a far flung waste. This November, I will be voting against any proposal that won't serve multiple, dense Seattle neighborhoods with a timeframe under two decades. A Ballard-UW mass transit line is exactly the kind of project that must seriously be on the table.
NORTH KING COUNTY	There's a good chance I won't vote for it given the long Ballard, Graham Street station, and West Seattle timeline combined with the focus on suburban park and rides. The park and rides ought to be paid parking only, or completely private parking and not funded by taxes.
NORTH KING COUNTY	The timelines are entirely too long. They are needed now to address current issues, 17 years is for babies not yet born. I suspect self-driving cars to be more viable than this plan.
NORTH KING COUNTY	Having West Seattle low on the priority completion list is absurd. It's one of the most populous neighborhoods and the transit options are very poor. I advocate for this project moving up the timeline for completion and/or adding park & ride at south end rail stations so those of us in the south end of Seattle can take advantage of the rail system without spending an hour on the bus just to *get* to the rail station.
NORTH KING COUNTY	Soon soon soon soon? When I was 16 and living in Seattle, we considered starting this kind of effort. I'm now 28. By that previous plan we would have actually had some stuff done already, and by this projected timeline I will be 53 by the time any significant effects are felt on the region... That's... a really long time. We shouldn't rush out a bunch of half-measures, but in 25 years things could be dramatically different.
NORTH KING COUNTY	This needs to be completed sooner. Housing prices and cost of living are only going to get worse the longer this drags out. Having the ability to live further away but still commute into the city in a reasonable amount of time is critical.
NORTH KING COUNTY	The lack of prioritization of inner Seattle neighborhoods is disturbing. Why is there no Ballard to UW line included in this package? The only bus available for that journey can take over an hour and tends to be a terrible experience. Why is the Ballard-Downtown line above grade? We need transit from that neighborhood that can't get held up due to personal watercraft.
NORTH KING COUNTY	It would be great if these projects could be completed *much* sooner.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I would happily support progressive taxes to increase the speed of construction
NORTH KING COUNTY	there's no reason these kinds of projects need to take more than two decades. by the time they're completed, they will almost certainly no longer meet our needs. we need to make the necessary investments to get these projects completed on a faster timeline.
NORTH KING COUNTY	The timelines are pretty horrible to look at on paper. Honestly, I'm wildly supportive of the package as a whole, but the timelines make even my support go down a few notches. If that's giving me second thoughts, it's going to be really hard to get random people. Sound Transit should emphasize finding ways to make the early actions more substantial - for instance, front loading the Graham Street Station, and the freeway shoulder BRT.
NORTH KING COUNTY	Would pay more in taxes to speed up the timeline, problem is just getting worse. Without quicker improvement I'll likely move out of the Seattle/Tacoma area.
NORTH KING COUNTY	The timeline is too long. I fully support Link Light Rail, but we need it as soon as possible. Taking 20+ years to complete is disheartening.
NORTH KING COUNTY	The timeline is too long! light rail to Ballard 22 years, and light rail to Everett and Issaquah in 25 years... these are ridiculous. These projects need to get done sooner.
NORTH KING COUNTY	Shouldn't take 40 years to finish these projects.
NORTH KING COUNTY	Transit to/from South Lake Union is needed NOW--not in 25 years. Capitol Hill to SLU can often take 1.5 hours at rush hour via bus -- which never comes and is always full, it's only slightly better by car. So many tech workers in SLU can afford cars--which jams up the roads, but they'd ride transit if it was available and not a frustrating nightmare. After years of riding metro and ST-- I specifically bought a car and now drive because of the non-dependable transit to my new job in South Queen Anne/SLU.
NORTH KING COUNTY	Light Rail to Ballard and West Seattle First! Further extensions to the suburbs are important, but internal congestion in Seattle is what is leading to widespread regional traffic problems.
NORTH KING COUNTY	Ballard to Downtown will be an even more major traffic choke point with the arrival of Expedia to Interbay and with continued SLU growth. Timeline, \$, and prioritization should reflect that. E.g.; Ballard > Lewis McChord in terms of urgency of service needs.
NORTH KING COUNTY	sub area equity seems to put the viability of this at risk. We should be starting with the most dense areas and then work outward. The obsession with the spine being very front and center seemingly puts adoption and long term overall usage at a much smaller amount than it would be otherwise.
NORTH KING COUNTY	Ballard and West Seattle service needs to happen much sooner than planned.  There needs to be a stronger focus on a density of lines and stations throughout Seattle. And I'm skeptical of the value of light rail service to a place like Issaquah. I feel like BRT would be more than substantial for a route like that, and save a lot of money that can be used for something like a Ballard-UW/Bellevue line.
NORTH KING COUNTY	need to do downtown to ballard light rail much sooner.

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>22 years for Ballard light rail? WTF??? That was needed yesterday.</p> <p>Also, I take light rail from my home downtown to the airport and back several times per week. Trains are packed, late and often times out of service all together due to "incidents" on the at-grade portion in SODO and down MLK. No more at-grade light rail!!! More three car trains and more frequency! Our transportation system here is a joke. It's getting better---but we are still decades behind where we should be.</p>
NORTH KING COUNTY	Take more money and build faster!
NORTH KING COUNTY	The timelines are too long in general, and specifically Ballard and Everett should be prioritized sooner.
NORTH KING COUNTY	oppose plan because it takes too long to build light rail through ballard and queen anne
NORTH KING COUNTY	Way too long!!!! Make the stations simpler unless they are a major hub station. Just get it done faster!!!!
NORTH KING COUNTY	Too long to get light rail to ballard. Need grade-separated light rail along interbay to ballard in reasonable timeframe <12 years or am opposed to project.
NORTH KING COUNTY	The time line for the Ballard connection to Seattle must be shortened. We have already voted and one time had property purchased for a monorail connection. I think 10 years is plenty long enough to get Ballard and West Seattle connected to Seattle by rail. Let's get going! I understand it takes a decade to get a new rail line extension to the next city. However we need to move the rail extensions along as quickly as we can now, because our population is increasing, and this next generation is willing to forgo automobiles if we can give them working transit.
NORTH KING COUNTY	Overall, I'm a huge supporter of the ST3 expansion plan. My main concern is the timeline: I don't think a package that doesn't deliver anything to Seattle for 20+ years will pass. I worry that the Board assumes that Seattle will vote yes on anything with "transit" in it; this almost certainly won't be the case with the current package. I think it would be worth ditching a few projects to speed up the timeline, or get the federal government to loan the money to ST while we wait for the tax revenue to trickle in (I think this has been done in the past). I don't ask that you necessarily put Seattle at the front of the line, I just ask that you try to speed up the timeline by at least 5 years. Seattle voters looking at the package will find a 20 year wait unacceptable, but 15 years seems more reasonable and thus will garner far more yes votes. Best of luck, and I hope you can improve the package now and not after a defeat in November.
NORTH KING COUNTY	Your plans tend to suck in every way, so I tend to have very little faith in you. 50 Billion in 25 years. Seriously, 25 years is far too long. Get it done or don't do it.
NORTH KING COUNTY	Light rail projects within the city of Seattle need to be completed on a much quicker timeline. 20 years is an unacceptable amount of time to complete these projects
NORTH KING COUNTY	Why will it take 20 years to add a stop to an existing light rail line (Boeing Access Road)? I would like to see all these projects happen much faster, and would support additional funding to see 10 years shaved off these timelines. I believe the biggest resistance to ST3 will be the timeline. Please explain why these projects will take so long!

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Ballard connection above ground from the u dist or through interval to decrease construction time?
NORTH KING COUNTY	You really need to find the funds to move up the completion dates before you lose my family to another city.
NORTH KING COUNTY	I would like to see light rail between Ballard and Seattle to be completely grade separated and done sooner
NORTH KING COUNTY	This plan is a good start. Yet it is missing a few key components, such as Ballard to UW light rail with the potential for expansion along 520 to the Eastside. If the line between Ballard and downtown is completed then the best alignment for crossing Salmon Bay would be grade-separated, ideally a tunnel, as a bridge would be subject to frequent openings and delays as the current Ballard bridge is. The timeline for this package is also extremely long. 25 years is a lot of time to develop this level of infrastructure, arguably more then needed to develop a more comprehensive mass-transit system. The timeline for this project should be closer to 15 years, as the region will likely continue to expand and many of these projects are badly needed now, not in the distant future.
NORTH KING COUNTY	30 years to completion dates is completely ridiculous. Why can't you run legs of the proeject simultaneously. It makes no sense why you can't build differently light rail lines simultaneously and it would create more jobs. I'd rather pay more to get it done sooner. I'll almost be ready to retire by the time the Ballard line is complete, and that's total BS. Also, we should be prioritizing the city. The traffic in the city if Seattle is completely outrageous and your bus lanes often make it worse. I tried to take the busy daily, but between waiting for delayed buses and traffic time, plus arriving early to catch a bus, my commute time almost doubled. I don't consider that a reasonable amount of time to commit to transit. Saying we have buses in the city is not a good enough answer. The buses don't work in the city. For example, the 8 through SLU to cap hill is a complete joke. I can always walk faster than the bus can get down Denny. We need reliable rail in the city not just the suburbs.
NORTH KING COUNTY	The Ballard light rail should simply not take 22 years. That is absolutely ridiculous and almost borderline offensive given how fast its grown in the last 5. I support for more concurrent development (e.g. Seattle to Lynnwood and Downtown to Ballard) being build versus waiting 22 years on the Ballard line.  Cut the 22 years to 7 years and I'll vote yes for this, otherwise I'm voting no until a package that provides adequate transportation within an increasingly dense (but overloaded) Seattle is being put to the voters.
NORTH KING COUNTY	The timetable is simply too slow. You brought the UW and Capital Hill stations online ahead of schedule and under budget. Continue to pressure to ensure contractors are giving incentives to complete projects early. Light rail service to Ballard simply cannot be postponed to 2038!
NORTH KING COUNTY	Finish Ballard to West Seattle in a crash 5 year program without a second tunnel. The current one, with signalling and no buses can support far greater thruput. The rest is fluff and can wait. Don't spend transit money on parking lots, turn that over to a private contractor who can charge for parking and make a profit. Don't expand the bus network, dump it all into rail.
NORTH KING COUNTY	Th Ballard to Downtown light rail link is the project I care about the most and would prefer that to be completed first.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>With suburban projects prioritized and Seattle's projects pushed off for 22-25 years, I am (despite being a huge transit fan) extremely unlikely to vote for this. The "spine" is something I am against in Sound Transit's plan, as a medium-speed rail line to Tacoma and Everett is inefficient and won't be as good of a use of money as connecting Seattle neighborhoods. I challenge Sound Transit to allot their money based on "population within one mile of the station," because those are the people most likely to use the system. We already have the Sounder commuter rail, and I am fully in favor of improving that where needed. I don't see the need to replace that with a series of park-and-rides to get Everett commuters onto a slow train to Seattle. I would like to see Sound Transit add a Ballard line, West Seattle line, Graham Street Station, AND a line from Ballard to UW via Wallingford / Fremont area.</p>
NORTH KING COUNTY	<p>Let's build it all now and not wait 25 years. That's ridiculous! I'm a big fan of light rail and I was shocked at how long this will take. Traffic is just going to get worse and the roads are already clogged. In 25 years, we'll be completely gridlocked. In fact, we are nearly gridlocked now! What are we waiting for? We tend to over-analyze routes, etc. Let's strike when the iron is hot. We know where this needs to go. Let's start building the whole thing at once and not in phases.</p>
NORTH KING COUNTY	<p>Given the current schedule of waiting until completion of the entire eastside line to open any sections of it, as well as the five-year gap from UW to Northgate, the phasing on ST3 should be geared to open parts of sections as soon as they are ready. 25 years is too long for most people to plan for in their everyday lives, and having the next two stations open in 7 years for example is much easier to support. In general, anything to push up the schedule for light rail would help, especially on the Everett and Ballard projects. Finally, anything Sound Transit can do improve spending efficiency or to push for tax reform to relieve the sales and excise taxes that provide the bulk of revenue in the state would be helpful. While absolutely worth the money in my opinion, this seems comparatively expensive and it could stress a region already grappling with a high cost of living.</p>
NORTH KING COUNTY	<p>It may seem that I indiscriminately marked everything very urgent and then marked only somewhat supportive of the time table. That is because the time table is too slow by my estimation! I have been voting for 30 years for mass transit every time I got the chance. It is an embarrassment that a city this size has not had a train/subway system. As mentioned in your material the traffic gets worse every day making the quality of life here such. But more to the point for the sake of our melting planet we have GOT to get all these cars off the road. I marked I only use it a few times a year....and that is because I live where it takes multiple buses and way to much time to get anywhere. I would LOVE to take the train that will not be built for another 8 years!!! It is too long - we have till 2020 to make major changes or face tipping points. 25 years is WAY TO LONG. why can't we work on all of at once and create more jobs while we are at it? Please tighten up the schedule! I am willing to pay my \$200 a month and I am not rolling in money.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	It seems reasonable to add the highest ridership lines first, which would include Ballard in addition to West Seattle. Moreover, the entire timeline should be accelerated. The design process can be considerably shortened, as is obvious upon considering other cities operating light rail systems, e.g. Portland, OR, which consistently designs and builds new lines in under a decade.
NORTH KING COUNTY	The timelines on this are MUCH too long. 20-25 years for Ballard and West Seattle? If all these projects can be completed in 10-15 years I believe voters will support it. With the current time frames it is not likely to pass- too much of a wait. Issue bonds and pay and build it now. It will save money in the long term- only more expensive and worse traffic the longer we wait.
NORTH KING COUNTY	22 years for LR to Ballard is ridiculous. This plan MUST address equity. Urban minority communities should be served before expanding LR to wealthy suburbs.
NORTH KING COUNTY	The timeline for completion is completely unacceptable. I will be nearing retirement by the time light rail is substantially expanded in Seattle beyond ST2. This gives me pause and I'm inclined to vote "no" on this basis alone - despite being one of ST's biggest supports and staunch advocates. Moreover, the programme wastes money on parking which does not deserve one dime of the public. Give us a transit, not pavement. On top of that, the proposal makes a grave error in directly serving Paine Field with an expensive alignment. The alignment is better suited to SR-99 saving riders time, enhancing TOD opportunities, and not duplicating very frequent service like Swift II. An alternative may simply be to designate a provisional spur if Snohomish County is so committed to a very low priority location.  In summary: I oppose this measure as offered. If Seattle doesn't get a new grade-separated alignment by 2029, I will vote "no".
NORTH KING COUNTY	Needs to be implemented faster. Makes no sense that light rail WITHIN seattle city (ballard, West seattle) will come AFTER lynnwood or the east side. People living outside of the city are more likely to own and use cars and not rely on public transit for their primary source of movement. People living in the city are less likely to own cars and therefore more likely to use transit, ST3 should focus on servicing the people who will use it. People living in the city rely on transit for every travel journey: buying groceries, visiting friends, etc, NOT just for commuting like people who live outside the city.
NORTH KING COUNTY	As quickly as possible! Quality of life is diminishing here because of the traffic.
NORTH KING COUNTY	speed things up. prioritize light rail in Seattle where it is most useful.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>I read in the news that a North Seattle legislator is unhappy that Northgate will only have one station- please don't give in and give them two. I find that North Seattle has the most efficient and higher quality buses than the other areas. One station is sufficient for their community. Leftover money should be used to improve safety and efficiency for the broader community.</p> <p>More improvements need to be made for the C line rapid ride. During 5:45 - 6:05 pm, a cluster of busses come within 2-3 minutes of each other as one is always 20 minutes late. The C route gets overcrowded- people are barely in the door and some frustrated people are left out in the street.</p> <p>Most importantly- the rt 7 needs an overhaul. There should be a security guards on very bus. Also some of the stops need to be weeded out- why is there a stop every 30 ft?</p>
NORTH KING COUNTY	Oppose project time line being too long, not scope.
NORTH KING COUNTY	While I reside in Tukwila, I work in Issaquah and strongly feel the 'burbs need that connection to downtown and the airport (amongst other towns/cities). I wish Issaquah wasn't at the 25 year mark in this project, though. I'll continue to support the project, but who knows where I'll personally be in 25 yrs.
NORTH KING COUNTY	Other cities build 50+ stations in 25 years. It can't take 7 years to do an study. We should be digging now!
NORTH KING COUNTY	Much of this should be happening significantly faster than planned or proposed. There is a great need for these improvements and more MUCH more quickly. The existing timeliness should be drastically reduced, even if cost is slightly higher.
NORTH KING COUNTY	It needs to be done faster. On Europe, wear my family is from, trains go on line within three years of a proposal. Our system is way too slow, and is not ready to handle growth. Companies should be paying for part of this and the community outreach needed to get it done.
NORTH KING COUNTY	The light rail to Ballard should be completed faster than the proposed 22 years. Some aspects of the plan don't seem timely given the growth of particular neighborhoods.
NORTH KING COUNTY	I think it's crazy that we won't get light rail to Ballard through South Lake Union for 22 years! I don't have a car and live in SLU and have considered moving up to Ballard, but the fact that I won't have reliable transit for 22 years makes me consider moving to a different part of Seattle or even away from Seattle to get away from this horrible transit problem. We need the city of Seattle to be better connected before we start expanding to the north, sound, and east.
NORTH KING COUNTY	We need Ballad and West Seattle sooner!
NORTH KING COUNTY	A comprehensive transportation system cannot come soon enough. 25 years is too long to wait for adequate public transportation. There also needs to be a Ballard - UW link in the proposal.
NORTH KING COUNTY	Please look into ways of speeding up these plans.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Prioritizing Ballard light over projects like Tacoma and Issaquah is vital. The timeline pushes wasteful projects like Tacoma and West Seattle ahead of Ballard. Also any proposal to Ballard with at-grade rail is as useless as the buses; West Seattle needs a subway much less than Ballard does yet West Seattle is proposed to have a subway while Ballard gets at-grade rail. Any proposal with insane timelines for Ballard or at-grade rail for Ballard will get a no vote from me.
NORTH KING COUNTY	It is very disappointing that this system will take 25 (or more) years to build. Can't this be accelerated? Does the system have to be built sequentially? Or, can the various parts be built simultaneously? We need relief today, not 25 years from now. What can be done to compress the timeline to 10 years? (Which is still a very long time.)
NORTH KING COUNTY	This is a great plan... It would be even better if it could be finished sooner
NORTH KING COUNTY	Do it faster and add Ballard to UW
NORTH KING COUNTY	I would more strongly support st3 if the timeline were more aggressive. I don't care about cost, the region needs this yesterday.
NORTH KING COUNTY	I realize these are huge infrastructure projects, but ANYTHING which can compress the timeline is vital. I'm not sure we can afford to wait 20 to 25 years for a complete light rail system.
NORTH KING COUNTY	i want to pay more to complete projects faster. Include a sliding scale of increased taxes and proposals and the estimated time reduction for it. For example does icreasing the proposed cost of \$17 dollars a month per adult to \$25 or \$30 significantly reduce the time of completion of projects. Can this still happen for ST2?
NORTH KING COUNTY	We need this so much sooner than 25 years from now.
NORTH KING COUNTY	I'd like to see the Ballard to Seattle leg of this plan finish sooner than in 22 years. We need solutions for this corridor sooner than that.
NORTH KING COUNTY	Many Ballard residents will be voting an emphatic "no" for three reasons having to do with the spur into Ballard: 1) alignment along existing commuting arterials that are subject to traffic congestion and streetlights, 2) a bridge over a heavily used waterway (when it should be a tunnel) and 3) the ridiculously long wait for completion, 2038.
NORTH KING COUNTY	Timeline is WAY TOO LONG
NORTH KING COUNTY	If it were possible to move the timeline up through concurrent-to-planned projects for the Ballard and West Seattle rail lines and other projects, that would be an important priority. We needed these solutions yesterday (or, 30+ years ago), and with the rate of increase in population and economic activity in the city center, we need to find ways to alleviate stress on the most important pressure points that spread to outlying regions.
NORTH KING COUNTY	I really think in city transit is very important and those lines should be done first
NORTH KING COUNTY	Faster, sooner
NORTH KING COUNTY	The timelines for ST3 are way too long, and I'm afraid that voters will reject the plans due to timelines alone. Also the suburban routes tend to favor freeway and highway alignment instead of serving regional neighborhoods directly.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I'm extremely supportive of the ST3 plan. However, it's hard to be excited about a plan that proposes the first improvements coming online in 8 years time. By the time any of the light rail expansion happens, I could very well be living in a different part of the country. I'll support the plan regardless, but it'd be an easier sell if I knew that I would reap the rewards.
NORTH KING COUNTY	A quarter of a century to complete these projects is completely absurd. The growth of the city outpaces the deadlines set by decades.
NORTH KING COUNTY	Connection to Everett must be completed quicker. Ideally 15 years.
NORTH KING COUNTY	What can be done to speed up the projects? Also, can these projects be ordered such that the ones which provide the highest ridership are started first? The Ballard to Downtown Seattle light rail is projected to have the highest ridership of any project by sound transit's estimates, but is scheduled to be completed after lower ridership routes.
NORTH KING COUNTY	Given the differences in population density along the routes, prioritizing West Seattle over Ballard is absurd. The drawbridge is a terrible idea too, if it's not higher than the existing one. I also think Ballard-UW would be a more valuable route, since the UW-downtown line is so fast.
NORTH KING COUNTY	Timelines seem ridiculously slow. This is what we need NOW, TODAY. We'll need so much more in 20 years when ST3 is complete. By then we'll be behind the ball again (still).
NORTH KING COUNTY	<p>25 years is too far out for a half measure. This has huge blind spots in Seattle proper while wasting a lot of energy on suburbs that, at least in part, are already served by the Sounder, or would be better served by cheaper, likely as-fast bus transit.</p> <p>I don't mind paying more in taxes, but a half-measure 20 years out will be cold comfort when the city's traffic system is broken in 5 (which is the time scale I need to plan on) especially when, even if it were done tomorrow, there are still huge gaps that would be left unaddressed. I'd rather pay more for a focused system that does just one thing (i.e. inner Seattle) really well on a ~10 year time span.</p> <p>Worth noting: While I don't use public transit much now (I live within walking distance of work) this is changing within the next year, so public transit accessibility and efficacy is important to me so I can avoid the cost and burden of a car while hopefully maintaining a sub 20 minute commute. With what Seattle has right now, my options are ridiculously limited.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

<p>NORTH KING COUNTY</p>	<p>I live car-free and paid a huge premium to be 1 block from a Sound Transit station.</p> <p>Unless you are proposing a system that builds rapid connectivity across ALL major Seattle urban villages -- and gets stations online within 10-12 years -- I will be voting a big fat NO.</p> <p>Light rail from Seattle to Tacoma is stupid -- that's going to be a 90 minute trip because of the plodding surface street routing you locked us into from Sound Move.</p> <p>Also, commuter rail sounds cute but you need a plan for how we're gonna have enough ridership to justify the money being thrown into that.</p> <p>Your current plan has me paying the cost of a Tesla Model 3 in added property taxes before a single station is built in Seattle. NO WAY!</p>
<p>NORTH KING COUNTY</p>	<p>TransLink built the entire Canada line in 9 years, so why would it take 20 years to get to Ballard? Are we automatically incapable of doing reasonable things because we're American? This is a ridiculous timeline for a neighborhood already far under served. Stop wasting money on tricked out stations and invest in getting people from A to B. It's simple, drill a hole, install stations where they're needed, run a train every 2 minutes. Stop [explicit] around and just [explicit] do it, it doesn't take 50B!</p>
<p>NORTH KING COUNTY</p>	<p>It seems completely illogical that this will take 25 years to build. We need all of these things NOW. Clearly this elongated timeline is not due planning and construction timelines. The skills, workforce, equipment, and knowledge exist to make this thing happen much, much faster. I don't understand why ST isn't using a variety of different approaches (e.g. more project happening simultaneously, having construction continue on nights and weekends, etc.) to make this happen much faster. This would bring much needed jobs to our area and get the needed transit infrastructure done in a timely fashion. I would like to see ST publish more info on why they are opting for such a slow pace of construction. The current timeline is the biggest thing keeping from voting in support of this ST3, even though I STRONGLY support public transit.</p>
<p>NORTH KING COUNTY</p>	<p>I wish it could be faster, but if this is truly the best we can do we shouldn't let perfect be the enemy of good. Said another way, if there is a way to get light rail expanded faster, do it, but the time will fly either way, so let's not let the long timeframe deter us from moving forward. (That said, putting the graham street station in sooner would be better, and light rail to the west neighborhoods and east side would be great, the sooner the better.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>This timeline is extremely long. I understand it takes time to collect the necessary revenue (or maybe just a higher tax to get it done quicker). I'd like to see innovative funding strategies employed such as P3.</p> <p>Spine concept makes no sense. Why are we prioritizing low density areas? Where is Ballard to UDistrict?</p> <p>Ballard and West Seattle should be top priorities.</p>
NORTH KING COUNTY	<p>Construction plans are way to slow. 25 years is unacceptable. It needs to match our influx of people. Asia has the ability to build entire cities in the time line proposed. Please review and consider expediting to encourage continued growth.</p>
NORTH KING COUNTY	<p>The faster, the better!</p>
NORTH KING COUNTY	<p>While I'm very supportive of the light rail expansion, the timelines (as far out as 25 years) makes me not want to support it. Knowing that it will take a quarter of a century is demotivating.</p>
NORTH KING COUNTY	<ol style="list-style-type: none"> <li>1. The most growth and transit oriented development is happening in Seattle. Why are the Seattle rail projects at the back of the line? I will have paid taxes for 20+ years and received little to no benefit from ST3 while rail is being built out to far flung suburbs. Why does it take 20 years to build a second transit tunnel?</li> <li>2. Why is there no E-W rail line planned for Seattle? Put the 45th st subway back on the agenda.</li> <li>3. Where is the Northgate ped/bike bridge? Nobody who lives there will be able to use this station otherwise. Makes no sense</li> <li>4. Why are you spending \$billions on suburban parking lots? Is this a good use of taxpayer money to make suburban commuters lives easier instead of serving the growing Seattle area? Or are you buying suburban votes?</li> <li>5. Mass transit doesn't help congestion, never has never will. NYC has the highest transit mode share and plenty of congestion. If you want to help congestion put congestion pricing on the agenda as a funding source. Of course once logical things start happening, people gripe and Olympia starts meddling.</li> </ol> <p>I support transit but cannot support this plan with the given agenda and timelines. Transit needs to support growth and density and not sell useless dreams of congestion reduction for the burbs.</p>
NORTH KING COUNTY	<p>Would like to complete Seattle light rail segments sooner. Seattle residents will also be willing to pay more.</p>
NORTH KING COUNTY	<p>The early openings of the light rail stations in Capitol Hill and UW show that these projects can be completed earlier than planned. I think we should focus on accelerating the timelines of these projects, especially the light rail completion timelines.</p>
NORTH KING COUNTY	<p>The timeline should be quicker than it is. Realistically, in 25 years our region will either be way beyond the scope of this project, or will have collapsed on itself with the overpopulation issues we face. Also, some priorities should be switched around. One in particular, The light rail from Lynnwood to Tukwila at Boeing access road seems much more important than connecting West Seattle &amp; Tacoma.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The UW and Capitol Hill stations were completed under budget and early. Does this mean that the other stations could follow suit? Waiting 20-25 years for full transit in the region is hard to get excited about because it means our traffic woes will get much worse before it gets better.
NORTH KING COUNTY	Just wish it was quicker!
NORTH KING COUNTY	Really, with the tunnel removing access from West Seattle and Ballard to downtown, you are planning to wait 17 years to provide relief. Not voting for that!
NORTH KING COUNTY	What can be done to make the timeline to Ballard faster? Also, Ballard to UW.
NORTH KING COUNTY	Light rail to Ballard and West Seattle should be moved forward in the timeline, supporting transit through and to high density population areas and increasing quality of life in high density population areas.
NORTH KING COUNTY	1. I used to work for the City of Seattle, Engineering Department, Traffic Division, in the mid-late 60s. -Some- of these "proposals" have been gathering dust -since- -then-! What in the hell is taking so damn long?! Yes, yes, you need to get "input" from the public on all of this .. .. but you don't listen to it when you get it, so what are you waiting for - Christmas?!  2. The one thing that almost everyone seems to "over-look"(??) is the topography of the Puget Sound area. Meaning it's relatively easy to go North-South around here, but (very difficult -- damn near impossible - pick one) to go East-West! Why hasn't anyone given serious thought to that?! Geez Louise, people!
NORTH KING COUNTY	The timeline is way too long; work should be done to compress the timelines significantly.
NORTH KING COUNTY	Timeline for st3 is crazy. 20-30 years to extend rail network does nothing to solve transit needs region has now and in the medium term future. Plan needs to make major changes sooner esp considering removal of the viaduct is going to put major hurt on very limited transport options for communities south of Seattle.
NORTH KING COUNTY	Moving to Tacoma this month so if you want to bump up light rail by a decade that would be nice :)
NORTH KING COUNTY	If I have to wait 22 years for my neighborhood (ballard) to get improvements, this package doesn't benefit me enough to deserve a vote.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>I understand regional politics are at play, but prioritizing a spine to far flung corners of our region with low density and low speeds at the expense of reaching our most dense neighborhoods with people who want to give up their cars (Ballard and Belltown) is a critical mistake, just like going to the airport before Capitol Hill was a mistake that resulted in far less ridership than would could have been achieved. I may not vote for this package if all benefits within my working life will go to areas that do not serve the densest neighborhoods that need rail the most. Ballard first.</p> <p>Unclogging the Seattle-Bellevue area (where people are more likely to give up their drives) will also serve the far flung areas, allowing them to drive down a freeway that is far less packed at its chock points.</p> <p>I'd also like to know what is being done to explore options to accelerate the construction schedule. Could the feds provide additional loans to allow construction to start sooner? Will any local philanthropists be willing to provide loans to the system?</p>
NORTH KING COUNTY	<p>I have reservations about the downtown transit tunnel taking funds away from other projects in Seattle. I think the tunnel should be built last for projects in Seattle. I like the West Seattle line to SoDo that opens first. I think the Ballard line should be similar and open before the tunnel is completed. I also like proposals to connect Ballard to the University of Washington, and I was disappointed that the line did not extend to the University. I was pleased to see the funding for improving the C &amp; D. I think there needs to be a greater partnership between local governments to separate transit from traffic. I wish there could be a holistic approach to transportation planning and traffic could be regulated to prevent bottlenecks around freeways from impeding the flow of transit. I think the infill stations should be moved up in the timeline.</p>
NORTH KING COUNTY	<p>Should be more ambitious and move faster</p>
NORTH KING COUNTY	<p>The estimated time is just way too far into the future. We need to shorten the timeline.</p>
NORTH KING COUNTY	<p>While I answered #12 as Strongly Support - I do NOT support these long, drawn out timelines! I know it's hard but it must happen faster - even if it costs more! We should be able to bring Ballard &amp; West Seattle online in 15/12 years - not 22/17! The time is NOW! It must be done faster to serve the City well. Instead of paying \$400 dollars a year, I'd be willing to pay \$600 a year - BUT ONLY if it gets done faster! Seattle needs better transit now.</p>
NORTH KING COUNTY	<p>I think people would rather pay more, a lot more, and cut the building times in half.</p>
NORTH KING COUNTY	<p>The most frequent comment I hear about the proposal is that it takes too long and costs too much. Many people feel that they will pay for something that they will never benefit from, having moved or died before the project reaches their neighborhood. Personally, I recognize that the cost and timeline are reasonable and will benefit the entire region for years to come. I just don't know how many people in our instant culture will be willing to pay and wait.</p>

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Seems like as usual, West Seattle is at the back of the line for bus and light rail systems. Meanwhile, please consider adding more #50 buses! And putting back a bus that runs from Delridge neighborhoods to beyond downtown, like the 125 used to do (went up to Capitol Hill). The more often we can take buses down here in this little valley, the more people will take them. (Especially the #50 that goes up to the junction. If that ran 4x an hour instead of 1x or 2x an hour, it would fill up.)
NORTH KING COUNTY	It's hard to support a plan that goes out 25 years. I will no longer be working or even be living in the areas anymore. It's frustrating to see projects beyond 10 years. Would rather pay more now for a short term timeline. Traffic is already bad so we might as well suffer more in the short term to get quicker long term benefit of mass transit. I would like to see more frequent bus service to the community colleges so high school students can benefit from more educational opportunities on their own in the suburban areas.
NORTH KING COUNTY	In-city projects should be prioritized over suburban expansion because they help everyone - even commuters coming from out of town.
NORTH KING COUNTY	Your building a system that barely meets today's needs, but delivering it in 25 years. The completion time frame needs to be faster. Also, there should be light rail across 520 into Bellevue
NORTH KING COUNTY	For the love, do not make us wait 22 years to get light rail. That is beyond unacceptable. I leave home and get to work two hours before most of my coworkers to avoid morning commute times. I lived in Sweden for a year, without a car, and was able to get all over Goteborg via tram and bus. It was incredible. it was affordable, always on time, easy, and it made me walk places. I have never been in such good health. I want all these things for my life in Seattle.
NORTH KING COUNTY	I would be supportive of modifications to ST3 (including tax increases) that sped up the implementation process, particularly for Link light rail extensions to dense neighborhoods/communities like West Seattle, Ballard, Bellevue, and Tacoma. The faster we can build out the skeleton of our light rail system, the more those communities will feel that they have a stake in funding, expanding, and maintaining regional mass transit.
NORTH KING COUNTY	<p>This plan offers an unhelpful timetable that handles the least-trafficked routes first, and yet still leaves the dense areas underserved until the end of the project in more than two decades (at which point it's not inconceivable that other advances, such as in driverless cars, may have begun to address congestion issues.)</p> <p>This plan needs to have an increased focus on our densest and most heavily utilized transit routes (e.g. Ballard - UW, Metro 8) and we need those within the next decade, not a generation from now. If the timelines are slow because of funding coming from taxes, then this plan needs to be based off grants or bonds in order to make this investment pay off while the people who vote for this plan are still in the workforce.</p>
NORTH KING COUNTY	We can't afford to wait 16 years for light rail to West Seattle. Thankfully, I work from home so I am not usually part of the problem. But when I go out, it can take me up to an hour to get through Downtown Seattle by car. Buses use the same roads as cars, with not enough special bus-only lanes to make it worth the extra time. We need to fix this asap - can we do it in five years? Let's do it!

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>There has got to be a way to speed this up. Look at what we were able to pull off in WWII. I think the record for building a liberty ship was something like three days start to finish. Or, if you prefer this example, the transcontinental railroad. If memory serves that took more like six years. I know it's a matter of finding the money up front, I'm just saying we need to figure out a way to do that, because getting people excited about paying for something they aren't going to see for potentially 25 years is going to be a tough sell, to put it mildly.</p> <p>I'm about the biggest fan of transit you could find, but even I have a tough time swallowing this given the timeframe.</p>
NORTH KING COUNTY	<p>22 years for Ballard light rail is WAY TOO LONG!!!! There has got to be a way to speed this (and other parts of the plan) along. Please prioritize the grade separated options that take transit OUT of traffic and make it happen fast! There is massive support for this in the area, we want it SOONER not LATER. There has got to be a way to do that.</p>
NORTH KING COUNTY	<p>I live in Queen Anne and take the rapid ride to Ballard and downtown often. It works really well. It will work better when the new Ballard Bridge is in place. So, while I know Seattle is a strong partner for ST, light rail isn't needed there as much as other areas that don't have the type of transportation infrastructure that already exists in Ballard. I think this timeline ignores the rapid growth on the eastside and should consider light rail to Issaquah sooner.</p>
NORTH KING COUNTY	<p>The Lynwood light rail should be moved in to less than 20 years! Also, I try to commute by train from Edmonds to Tukwila whenever possible. However, Sounder train link up between the North(Everett - Seattle) and the South(Seattle - Lakewood) gives me only ONE option either way to make a connection. Can we please have additional options to link up the train service as well.</p>
NORTH KING COUNTY	<p>Light rail to Ballard and West Seattle and the Graham St. Station should be top priority. Our congestion is far worse within these parts of the city than getting to the city.</p>
NORTH KING COUNTY	<p>Project schedule needs to be expedited. We cannot wait until 2038. ST3 really should be in place today.</p>
NORTH KING COUNTY	<p>Prioritize all Seattle projects. Growth is happening here now and the greatest need for rail is in Seattle. Ballard and West Seattle by 2030, with studies completed for West Seattle to Burien, UW-Ballard spur, and the Metro 8 line. All new Seattle projects should be tunneled or elevated only, no at-grade projects.</p>
NORTH KING COUNTY	<p>YOU NEED TO BUILD THIS DAMM THING MUCH FASTER THEN 25 YEARS. I WILL BE HAPPY TO HAVE THIS SYSTEM BUILD OUT FOR 15 YEARS!!!!!!!!!!!!</p>
NORTH KING COUNTY	<p>The Graham Street station was in the original plan and was dropped. It is not a huge expense to get it built compared to other items in the plan, and would allow people in the neighborhoods between Rainier Beach and Columbia City to get to the light rail more easily. It would also be a huge help to the businesses on Graham and MLK. I hope that you prioritize this one to be implemented soon.</p>
NORTH KING COUNTY	<p>West Ballard has lost bus service, grocery stores and parking while property taxes have doubled or tripled. Why isn't our neighborhood considered in this plan?</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The densest groups of people need to be served first, not last. Ballard and West Seattle. We have been literally paying the price to reduce sprawl, and we deserve improved service before fewer people who have paid less and contributed to sprawl. The timeline is backwards. Ballard and West Seattle should be first.
NORTH KING COUNTY	25 years is far too long to wait, and the situation will only continue to deteriorate in that time, rendering the proposed expansion less-than-optimal by the proposed completion dates - accelerate the schedule!
NORTH KING COUNTY	The Seattle LR project timelines are simply too long. 22 years to Ballard! Seattle voters won't go for this - we'll see something silly like another push for Monorail if the ST3 package can't shave down those timelines for folks who are already incredibly supportive of transit and are begging for more NOW.
NORTH KING COUNTY	Knowing how fast the region is growing and how congested we are becoming, taking 20+ years to finish these light rail projects is leaving us in the past still. With the new stations that took 6 years to open is an example of how slow the projects are. When they open, ridership was way over expectations. The faster we can get these projects done, the better the region will be for quality of life, congestion and allow us to adjust to future changes easier and not in another 30 years when ST3 is completed.
NORTH KING COUNTY	The timeline is way, way, way too long. 25 years will undercut support for the large increase in taxes. You should look for ways to decrease the timeline to 15 years. We voted on light rail 20 years ago!! Time to finish the job is now.
NORTH KING COUNTY	We need mass transit in the next few years, rather than in 20 years. If the region continues to grow as it has been doing, the region will be gridlocked. The pace needs to be faster than the proposed plan.
NORTH KING COUNTY	I understand that the biggest bottleneck to completing this in a reasonable time is funding.  I think more avenues should be researched to provide funding because this is a problem that needs to be addresses ASAP.
NORTH KING COUNTY	Ballard-Downtown line completion is altogether too slow. It is also disturbing that there is only partial grade separation in Interbay, as well as the use of a movable bridge when a tunnel is the only appropriate choice.
NORTH KING COUNTY	We need a station at Graham St NOW! An infill station should NOT take that long to complete. Many of us will be DEAD by 2036! Transit expansion is a huge priority for me as a citizen and a taxpayer (even though I have a car), but this timeline is absurd. We are a lower income area with fewer options than other parts of the city. If we are going to pay for this, we deserve access on a reasonable timeline.
NORTH KING COUNTY	25 years is a long time that I do not think I would benefit from the construction.

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	We honestly don't have 20+ years to wait for reliable transit. Amazon alone is hiring 20,000 new employees who will be working in SLU; add to that all the expanding companies and the ones like Expedia who are moving into Seattle. As a formerly homeless veteran, the ability to live and transit affordably is critical to mine and my peers' stability. Many people are moving further away from the city to more affordable housing, with either little transit, no transit, or with transit of questionable reliability. What can we as a city do to speed up the expansion, and/or can we put affordable housing near the existing and future stations? How can we strengthen the reliability of the existing transit options?
NORTH KING COUNTY	Bring it faster, even if it costs more. Make the taxes more progressive. Perhaps a graduated system where cars worth more than X or homes valued above zip code median are taxed at a higher rate.
NORTH KING COUNTY	I live in Belltown and my highest priority is helping people go back and forth between Downtown and Ballard. What helps Ballard helps Belltown. The farther someone lives from Downtown the longer I think they should have to wait - some of them are actually trying to keep away from the masses.
NORTH KING COUNTY	My understanding is that the Graham St. Station was part of the original light rail plan and, for some reason unbeknownst to me, not included in the final roll out of the light rail. The distance between the Columbia City and Othello Stations is too far. Adding the Graham St. Station should be an emergent priority for 3 reasons - 1. The station would serve a predominantly low income area that already suffers from a lack of transit options. This is an equity and social justice issue. 2. 10 million for the Graham St. Station has already been voted on and approved. 3. It is a low hanging fruit. The light rail already runs through, a station just needs to be made. Of course maps and schedules will need to be adjusted, but this is minor.
NORTH KING COUNTY	<p>Light rail is the most critical development on the entire project list. The timeline needs to be realistic, not pessimistic, so people know we can ride the light rail in our lifetime. I'm relatively young, and your timeline means I'll be able to join AARP before I'd have the chance to commute by light rail. It's awful.</p> <p>We need to make sure the light rail is grade separated, not at-grade, so we're not stuck with a bad system with built-in delays.</p> <p>Bus projects like ride-on-shoulder or rapid transit are discouraging measures that will be quickly overwhelmed by traffic volume. I am opposed to any component of the plan that delays or distracts from work on light rail. We need to focus on expediting light rail; bus improvements are secondary to that urgent need.</p> <p>I am in agreement with the light rail plan, but I want a plan that lays down a promising future while solving problems without delay.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I support building the Graham Street Station as soon as possible, funded in other ways if needed. It was a part of the original Light Rail plans and it's absence affects the people in my neighborhood greatly. We find ourselves stranded too far between stations to make use of Light Rail. The current proposal is to build it 20 years from now, which is simply unacceptable. Please make this an immediate priority and complete the Light Rail as it was supposed to be in South Seattle.
NORTH KING COUNTY	As a avid transit user/supporter, I will absolutely NOT support ST3 with the current timeline for the Seattle projects (Ballard/West Seattle) and will actively work to encourage my friends/colleagues to not support it. We need better transit NOW! I want to use these systems in my lifetime if I am expected to pay for them. You are proposing a timeline that is beyond the end of my working life. Also, I am appalled that the Ballard to downtown Seattle line is going to travel via Interbay - an area that has very limited pedestrian/bike access and smaller communities (Magnolia, Queen Anne) than the potential development in Fremont in the coming decades, which we are already seeing explode with new multi-story residential and business development along Stone Way and in the downtown Fremont core. Additionally, I am VERY concerned about the health of the small-businesses in downtown Fremont if light-rail transit bypasses this neighborhood. Bus service alone (which has been reduced to the downtown Fremont core w/the removal of the 28 & 26 local buses just this week) - making it appear to locals and visitors that getting to Seattle by bus is challenging. Light-rail transit to Capitol Hill, the U-District, Beacon Hill & Columbia City has made those neighborhoods easily accessible destinations for exploration. Please seriously consider the impact bypassing Fremont will have on this community and it's small businesses.
NORTH KING COUNTY	At-grade for Ballard is a horrible proposal. And you want to have it depend on marine traffic with a drawbridge??? Additionally, the timeline for West Seattle and Ballard are ridiculous. There should not be a priority for South King County or the East Side over a dense Seattle area with horrible east-west connections. Buses should solve suburbia's connections, not light rail at the expense of dense urban areas being snubbed.
NORTH KING COUNTY	ST3's timeline needs to be sped up. We need light rail sooner than 22-25 years from now.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>The timeline proposed for completing ST3 projects to West Seattle and Ballard are insane, and switch my vote from strongly support to oppose. Simple ridership statistics show that the need for reliable, fast transit to Seattle's neighborhoods is critical - and yet those neighborhoods won't be getting anything until I'm well into my 50s. That is not acceptable.</p> <p>In addition, the at-grade rail proposed for Ballard-to-Downtown flies in the face of what the community *and data* supported in the Ballard-Downtown HCT study completed by Sound Transit and SDOT. To take the 70%+ support for a fully grade separated, and ideally a full subway, and propose a project as flawed as this is a slap in the face. It speaks to a dangerous belief on the part of ST's planning team that the Seattle Vote can be taken for granted, while suburban desires that make little-to-no sense from a planning standing (The Paine Field diversion, etc.) are pandered to. This is, again, not acceptable - and will sink ST3 in November if not corrected.</p> <p>Ballard must be fully grade separated, either in a subway tunnel or elevated. Both Ballard and West Seattle services need to be delivered far faster than is proposed, and the insistence of building a BART-like system to Tacoma and Everett must be challenged in light of ridership data and rapidly changing attitudes towards suburban living and the long commutes that come with it.</p>
NORTH KING COUNTY	The timelines need to be accelerated, anything longer than 10 years is unacceptable.
NORTH KING COUNTY	I think people want better transit options much sooner. If there's a way to speed up the timelines, please do so.
NORTH KING COUNTY	I cannot in good conscience support any regional mass transit system that requires a 17 year delay to West Seattle and a 22 year delay to Ballard, two thriving sections of Seattle that are utterly disconnected from downtown. I will NOT be voting for ST3 as it currently is proposed. Move those timelines forward measurably and I will happily support it.
NORTH KING COUNTY	Can we do the projects sooner. We need transit solutions now
NORTH KING COUNTY	Ballard light rail needs to happen sooner! Let's get people around within the city before we expand so far south into the suburbs.
NORTH KING COUNTY	17 years for service to West Seattle and 22 years for service to Ballard is really disappointing and makes me less supportive of the plan. These need to be a priority
NORTH KING COUNTY	Light Rail projects need to be prioritized and completed as quickly as possible with grade-separation being mandatory for the success of the system. I will not vote for ST3 if these aren't prioritized more.
NORTH KING COUNTY	Ballard first.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Kinda bummed by how many Seattle neighborhoods are going to have to wait for a whole new generation of commuters to be born before we can get this service...by the time light rail comes to my neighborhood, I'll probably have already been priced out of it. Obviously I understand construction deadlines can be insane, but the U-District Link was completed so quickly, comparatively speaking--the long wait times for many other Seattle-specific projects on this proposal is pretty depressing. The traffic is horrible right now--at the rate it's going, 17 years is wayyyy too long to wait for light rail to a neighborhood that already encompasses a full fifth of the city's population. Is there no way to push some of these deadlines up? I would be fully prepared to pay higher taxes if it meant we could get this done way sooner. The traffic/population crisis is only going to continue to expand at an alarming rate; we as a city need to be ready to hustle to meet its demands.
NORTH KING COUNTY	I fully support expansion of the transit services - but it cannot take 25 years to complete. The Seattle area is already too far behind in terms of modern transportation options, and we at least need the West Seattle and Ballard lines sooner. These neighborhoods are two areas where numerous people are moving as more jobs come to the region, and will showcase the continued success of the light rail program when they are completed ahead of schedule and under budget as the capitol hill and UW stations were!
NORTH KING COUNTY	I think the timelines to complete the Ballard and West Seattle lines are not acceptable. Also, given the high projected ridership, I believe the Ballard line must be fully grade separated. Finally, more should be done to address cross-town traffic in North Seattle. (I live in Ravenna/Bryant and strongly support funding the extension from the UW to Ballard.)
NORTH KING COUNTY	ST needs to explain why the rail expansion will take so long. Also need to shift priority to Seattle and Bellevue. Remove Tacoma except for buses and Sounder trains.
NORTH KING COUNTY	The Ballard line should be the first priority, even more than West Seattle. I don't live in Seattle, I live in Shoreline, but I still recognize this fact because I go to Seattle all the time and work there. Many of us in the suburbs are going to be commuting to Seattle in the future to work and an effective Seattle light rail system is beneficial to all.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>West Seattle and Balard cannot wait 17 years form improved transit service. While Ballard has an emerging problem with transportation, West Seattle has been left out of transit planning or given routes that only make travel more difficult. (no path to West Seattle from South of Spokane Street. Poor access to I 5 North from the Spokane Street viaduct, no access to downtown after the SR99 tunnel) To ask these residents to wait this long is a non-starter for me. I will not vote for this plan unless access to mass transit is made at top priority. As an example, a trip from West Seattle to the hospital area is a 50 minute trip unless one is willing to walk from 3rd Ave and Seneca.</p> <p>The route rail route from West Seattle is way to elaborate thus making it less attractive financially. A link from W. Seattle to the 5th Ave S. rail corridor is enough. We can change trains. The link to Ballard can begin at Westlake Center and run on the monorail right of way and on to Elliot Ave W to Ballard.</p> <p>I know from experience that transit authorities don't utilize this sort of input. We citizens see this in poorly located stations that need additional funding and zoning to attract riders. If you put it in a place where people need mass transit they will use it. An example of this is the MLK rail corridor. A better location would have been Rainer Avenue that is more densely populated. Do what other the cable, natural gas and electric companies do. Build to the users then extend and branch. Remember, we do not need fancy stations with expensive walls and art. We need to get to our destination. All else can come later. Perhaps a look at Paris, Berlin, and Mexico City would help.</p> <p>Lastly, a small thing that helps people see where they are on a line is picture graphs, Embedded pictures on the station walls with the same image in each car make it much easier to find one stop.</p>
NORTH KING COUNTY	Timeline is too slow, a more aggressive approach is needed
NORTH KING COUNTY	"light rail to Ballard 22 years" and "light rail to West Seattle and Tacoma would be complete within 17 years" are laughable timelines. Work from the core outward. At least start a "core project" at the same time you start a suburb project.
NORTH KING COUNTY	Ballard and West Seattle deserve priority. People who live in Seattle already invest more money and capital in being close-in so that they do not have to commute by car. Those who live in outskirts enjoy cheaper cost of living but have to deal with a commute by that choice. I do not understand why this region spends so much on connecting its suburbs when the city is not yet fully connected in a modern fashion. Speed up the plan for Ballard and West Seattle. 22 years is a planning atrocity compared to what Portland was able to accomplish in less than ten.
NORTH KING COUNTY	The infill stations should be worked on separately from larger track extension projects. They are a different type of projects dealing with existing infrastructure and their own constraints. The infill stations could be bundled in one package and contacted out in a reasonable time-frame (within five years bid to build contracting). This would increase rider ship in areas already existing and provide additional revenue. Track extensions are seeking to provide service to areas that don't have it yet. The wait time to revenue generation is longer. Also, if waiting until 2036 for graham street, ST would miss out on the funding pledge of the city budget.
NORTH KING COUNTY	it is too slow. I don't even know if I'll be living in the area by the time this is done. I'm a recent college graduate, and by the time this is done, my kids will be done college. Collect more taxes if needed. Just get this done.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Timelines are way too pessimistic.
NORTH KING COUNTY	<p>The timeline for completion, especially for Ballard and West Seattle light rail, is waaaaay too long! Speed up the construction as both of these neighborhoods are dense and getting denser. They desperately need GRADE SEPARATED light rail as soon as possible. Also, please add the Ballard to UW spur line into the plan or at least budget for the EIS study in ST3 so when funding becomes available, we can start construction.</p> <p>But most importantly, in order to get my support and for the support of a super majority of Seattle-ites (which you'll need for passage) you must SPEED UP THE TIMELINE!!</p>
NORTH KING COUNTY	Light rail from downtown to Ballard and West Seattle needs to be completed within 10 years. Timeframes need to be accelerated for this package to get voter approval.
NORTH KING COUNTY	Ballard to Downtown and West Seattle to Downtown light rail ABSOLUTELY must be prioritized. The timeline outlined in ST3 is completely unacceptable.
NORTH KING COUNTY	Prioritize constructing rail lines serving Ballard, West Seattle, NE 130th to Shoreline. These will make the greatest impact for increased ridership. Please no more surface rail lines; above and below grade travel are safer and more efficient options. Elevated rail lines are great and cheaper/faster than constructing tunnels, people will support this option over ground level rail lines.
NORTH KING COUNTY	Please make the lightrail to Ballard a higher priority
NORTH KING COUNTY	<p>It's ridiculous that expanding light rail to Ballard and West Seattle is at such low priority that it won't be completed for 22 years. I have spent my entire life in Ballard, and up until a few years ago I had a reliable and easy way to get from Sunset Hill to downtown. It took a while, but at least it was a five-minute walk from my front door to the bus stop. With the reduction in bus service to Ballard, that same line is only available during rush hour, and if I want to leave my house I either need to walk a mile to the nearest bus stop or take my car. If I'm drinking in downtown Ballard, it is impossible for me to get home responsibly without calling a taxi or Uber.</p> <p>That is ridiculous. It needs to change. No one in Ballard is going to vote to increase their taxes in exchange for a promise that will be fulfilled after their newborns graduate high school. I know you need the support of the suburbs, but this package will fail unless you can promise immediate relief to the people who need it the most.</p> <p>Beyond that, it's important that the new light rail constructed in Seattle is not constructed at-grade. The efficiency of light rail loses its luster if the train is held up in rush hour traffic. Construct elevated tracks and the trains will ALWAYS be more reliable than cars.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>I'm an avid supporter of transit, but I truly fear that the timelines outlined in this plan could result in a failure at the ballot. If it's truly impossible to deliver some of these critical projects in less than a generation, then please get all hands on deck to explain to the public why this is the case. (Do these plans envision multiple projects being built in parallel? Will construction crews be working 24/7/35? Even for those of us who are very much inclined to support ST3, it's really tough to comprehend how things could take anywhere near this long.) Our current transportation system has degraded terribly in just a few years. I urge the board to address this head-on and consider if there are not ways to somehow deliver some earlier wins. (It seems that shoulder-running buses are a small effort in this direction, but not nearly enough.)</p> <p>A couple of other suggestions:</p> <ol style="list-style-type: none"> <li>1) The recent backpedaling by the legislature and governor on the 405 HOT lanes gives me great concern about the wisdom of investing in freeway BRT. Can the board somehow feel confident that leaders will take the necessary steps to build and *maintain* access for transit on a shared right-of-way? Without such a commitment, light rail seems like a much better investment.</li> <li>2) I have no principled objection to parking facilities, but I'd hate to see them built at the expense of projects that actually move people. Any public funds spent on parking facilities should be funded by parking fees paid by the users. As traffic conditions worsen, there's no need to "bribe" drivers with free parking.</li> </ol>
NORTH KING COUNTY	<p>I think the timeline to complete the light rail lines to Ballard and West Seattle should be prioritized to be constructed first. The length of the lines connecting the Eastside (Redmond) are more than 3X further in terms of distance. We should prioritize shorter term projects that will impact all commuters first rather than last (thousands of people commute from the Ballard and West Seattle neighborhoods into downtown Seattle everyday creating traffic for everyone, not just for people who do not live in the city). Also the timeline to complete the entire ST3 is too long in my opinion. If money is not the bottleneck keeping multiple projects from being constructed at once, then more effort needs to be allocated towards figuring out how to begin construction of multiple projects sooner and at the same time.</p>
NORTH KING COUNTY	<p>All light rail improvements should be built in parallel. There is no reason the Everett and Ballard lines cannot be built while the Issaquah and Redmond lines are under construction.</p> <p>For me to support, Paine Field and Ballard should be substantially complete within 10 years in 2026. Construction to Paine Field should be underway before Lynnwood is complete in 2023. Also, why build out entire segments at a time? Open each station along the way instead of opening 10 stations at once.</p>
NORTH KING COUNTY	<p>We need to reduce the amount of time it will take to complete the Seattle Link Light Rail Projects. Seattle voters are the key to getting this Draft Plan approved; yet we won't see many of the main benefits for almost 20 years....</p>
NORTH KING COUNTY	<p>We need light rail in West Seattle and Ballard sooner than 20 years from now.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	West Seattle should come online much earlier than proposed and the entire timeline needs to be greatly reduced as the needs are growing much faster than what current conditions can handle. Especially when you look at the decrease of traffic volume and disruption of access from the viaduct replacement fiasco.
NORTH KING COUNTY	I would be happy with paying for ST3 if the timelines laid out weren't so ridiculous. At that rate, my first grader living in West Seattle wouldn't be able to ride the light rail from his neighborhood until he was already graduated from college! Take 10 years off the timeline and you have my full support!
NORTH KING COUNTY	I understand that the ST funding model means that each package has to be pretty broad in terms of where projects happen, but for the cost this proposes to put on people in Puget Sound, the timelines are a joke. With traffic as bad as it is now, the idea that none of these projects will provide any relief from that until eight years from now (and more like 15 for anything that is grade-separated) makes it hard to take seriously.
NORTH KING COUNTY	Some projects like the graham station should be done quickly with less cost and disruption to service. It would be great to see that added quickly and not on an 8 to 25 year plan. That seems like a long time to get a station that was originally in the light rail plan. The stops between othello and columbia city are too far apart and the business center at Graham would grow and develop with a new station. In fact this station would advance the economic development of the south end faster than the columbia city station due to its proximity to the proposed station.
NORTH KING COUNTY	This needs to happen faster. The Seattle projects being tacked on to the end of the timeline makes sense in getting the suburbs what they have been promised for years but misses the point that the system starts with Seattle. We need complete transit options in our City, before we expand our system and our network out. Seattle residents CAN and SHOULD pay more for their system - they WILL be the main beneficiaries. \$200 a year is nothing to have a complete system in the next decade. Let's work on funding this project to where it is useful to the people paying for it. I'd happily support an increase in property taxes of .50/\$1000 assessed value. Please, PLEASE, don't let us compromise on getting this right, and getting it up and running ASAP. If it's funding that is an issue in getting light rail to Ballard and West Seattle, then let's fund it ourselves. In addition, the new downtown tunnel, while expensive, will work wonders in getting headways down, as well as creating options for times when there is a mechanical issue with a train, or a collision on the at grade tracks (which is almost daily now). It baffles me how adding this much capacity, but not adding an additional tunnel for when there is a conflict, could possibly work until 2038.

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Unfortunately, as a 21 year old West Seattle resident, I will be 38 when light rail makes it to West Seattle. Realistically I can't be certain I'll live in the city, much less the neighborhood 17 years from now, so it's difficult to be enthusiastic about the light rail, as necessary as it may be to make Seattle a real city. I understand that things like this take time but I find it unfortunate the timeline is so drawn out. I can only imagine what middle-aged residents might think. Further, I find it kind of pointless to prioritize which expansion portion I find most important. Obviously I think the biggest priority should be connecting West Seattle and Ballard to regular mainland Seattle -- I live there. I don't live in the eastside or Pierce county. But that doesn't make my preferences more important than anyone else's. Ultimately priority should be given via a utilitarian rationale -- whichever portion gets the most cars off the road/gets the greatest number of people on the train should be given priority.
NORTH KING COUNTY	Anything and everything that can be done to complete a traffic-independent system quickly should be done. 22 years to connect Ballard to Downtown via Seattle Center and South Lake Union is an extremely long wait. These areas are ready to support heavy ridership now and should be a priority. My personal wish would be to ride the rail from my home in South Lake Union to my job in Everett, but it looks like I'll be just about retired by the time that could be a reality.
NORTH KING COUNTY	I think people would be more likely to support the plan if they think they'll be able to benefit from it sooner. As it is, these are almost more like projects for my not-yet-born children to enjoy. I also think grade separation is important to keep trains running on time - more of these projects (especially downtown) should be separated from street traffic.
NORTH KING COUNTY	Faster! Faster! Faster! Please find a way to make these important projects happen sooner. I would support elevated rail if it meant we could have it sooner than tunneling.
NORTH KING COUNTY	Obviously the hardest part of the proposal to swallow. With these timeframes its almost like you're trying to get people to not vote for it.
NORTH KING COUNTY	The project completion timeline is a joke. Given 30+ years and 50billion, I would expect that Sound Transit could build a fully independent subway/ light rail system for Seattle. Instead what we are getting is a few more light-rail stops over 30 years and mostly in suburbia and not core-Seattle. I'm a supporter of public transit, but this plan is a joke.
NORTH KING COUNTY	Ballard needs light rail connections in less than 22 years!! Have you seen how many people live here now??
NORTH KING COUNTY	timelines are much too long. Seattle centric lines need to be quicker (10-15 years) and grade seperated. Proposal will not pass with 25 year wait time. Majority of the votes FOR this plan will come from Seattle metro, you need to have a big get for them if they are going to approve. I am strongly considering voting against in the hope that you will come up with a better plan with shorter buld times.

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>I think it is a waste of time and money to put more buses on the road. They are stuck in traffic and only contribute to congestion. Please stop wasting time and money. BUILD LIGHT RAIL. Grade separated REAL mass transit. Anything else is just wasting time and resources. Please build the system we should have had 50 years ago. I will vote against ST3 if it is still mostly more bus programs.</p>
NORTH KING COUNTY	<p>Given the level of funding allocated to ST3 the timelines are unacceptably long. We need to focus on opening GRADE SEPARATED light rail transit as soon as possible.</p> <p>Also, we need to have the core of the city linked much more tightly. It should not take a hour and 2 busses to go from Capital Hill to Ballard!</p>
NORTH KING COUNTY	<p>Ballard First, on separate grade</p>
NORTH KING COUNTY	<p>Ballad/West Seattle and Graham Street Station should be completed 1st they should be the No.1 priority. I love transit and am a strong advocate for light rail, but if these connections aren't given the priority they deserve I will vote NO and I will urge everyone I know and the organizations I support to vote NO.</p> <p>[name] [title] Rainier [organization]</p>
NORTH KING COUNTY	<p>The Ballard line should not be held out for 22 years.</p>
NORTH KING COUNTY	<p>It is critical that the link between Ballard and Downtown through Interbay be completed ASAP. Traffic has destroyed the quality of life that we once knew. The proposed timeline of 22 years to connect Ballard to Downtown via transit that does not require passing over Ballard Bridge is totally unacceptable.</p> <p>A program of incentives to promote donations towards building light rail as fast as possible (train car graphic wraps, employee rider discounts, product placement) directed at the largest companies who are drawing people to the area should be considered.</p> <p>The other day it took me an hour and a half to ride the bus downtown from Magnolia during rush hour. Half the riders got off and walked. I need a reliable means to get to my work NOW, not 22 years from now. I would gladly pay double the proposed tax amount so that the Interbay station could be implemented ASAP.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	There needs to be information about why the schedule is so long. Are the timelines long because of engineering constraints? Is it the lack of funding that delays projects? Is it that the density to justify transit will not have developed until some future date? I know the answer is different for each project, but it would be great to know what goes into the decisions to schedule things so far out. For example, Ballard has been growing like crazy and is expected to continue to, and all that has happened to respond is a winding, slow, RapidRide system that is half a mile or more from half of the new development, and a slight reduction in north south service on the west side of the village.
NORTH KING COUNTY	North Seattle at N 130th St is littered with cars and not too many options to go carless. A stop at 130th would dramatically change that, and allow greater density in the surrounding neighborhoods.
NORTH KING COUNTY	Twenty-five years is way too long to wait. The city needs this now and as soon as possible. There's so many elderly people who need this transportation and many of them will not live to see it but will be paying for it out of their hard earned money. I own a business on the light rail and we need more neighborhoods connected so we can broaden our reach of clientele. This light rail is the most important piece of legislation our region has seen in years, the people of our region needed this decades ago. Please don't have us wait any longer than we have to. Let's compete with China and other regions of the World and have the best public transportation system possible in the world.
NORTH KING COUNTY	I believe the timeline for transit improvements, like light rail, within the city of seattle is unacceptable. We need solutions now. BUS ONLY lanes (through downtown) that are marked in red, and carry a huge fine for violators, is probably the cheapest way to get things done in the city. We need light rail to ballard, west seattle, and the neighborhoods in close proximity. It should not take hours to get to west seattle or ballard, like it currently can (in the worst of conditions). It should be minutes. Consistently. Seattle, with larger population, larger tax base, larger transit needs should come first.
NORTH KING COUNTY	<p>Considering the pressures we face now and know we will face in the future, the current proposal is absolutely unacceptable as IT DOESN'T EVEN APPROACH MEETING THE NEEDS IT'S SUPPOSED TO MEET.</p> <p>It's a failed plan on the face of it. We need more transit faster.</p> <p>Frankly, we just need it faster, because we can add more plans year by year.</p>
NORTH KING COUNTY	Prioritize the Graham Street station. Waiting until 2036 on the EXISTING line is absolutely ridiculous. The mayor campaigned in this neighborhood for support of the levy promising that this was a priority and we should not be ignored. Get the damn thing built.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The cost wouldn't be an issue, if the projects were going to be completed before I retire in 20 years. If you can't do this through conventional methods, build the system through a P3 with a financing element so we can fast-track more of the system to give those of us who will retire in the next 20 years a chance to use what we pay for. If you can't do a P3, then prioritize urban parts of the system and skip the parking... so, so much parking!
NORTH KING COUNTY	Please find a way to get this done in a reasonable amount of time- with your current projections I will be long-retired by the time I have the opportunity to take light rail to work!
NORTH KING COUNTY	West Seattle has taken on so much density, doubling the number of apartments on the peninsula in ten years. Our geography makes it very difficult to get in and out of West Seattle. The West Seattle light Rail link should be moved up and occur within the next seven to ten years - not 17.
NORTH KING COUNTY	The Graham Street stop would have a dramatic impact in the area it would serve and be one of the fastest and most affordable projects in ST3 yet it has been put off until 2036, 20 years from now. A realivley simple project that was promised years ago now will not be available for another two decades. This should be an immediate project, completed in the next 3 years should ST3 pass.
NORTH KING COUNTY	Timeline should be reduced in time and completed mire quickly.
NORTH KING COUNTY	I'm turning 30 this year. Waiting until I am 52 before light rail goes to Ballard (and a substandard at-grade rail at that) is simply unacceptable, unless the city itself has plans to build its own version of the San Francisco Muni. I am a huge proponent of light rail, but it will be difficult for any Seattlite to vote to subsidize all the suburbs first before ever getting the lines we should have had in the city 15 years ago. The Ballard line needs to be prioritized over virtually everything else in this plan; it is already a dense neighborhood with poor transit options, and is growing at a rate far higher than many of the places that ST3 reaches first. In addition, I strongly support the addition of a spur line connecting the UW station to Ballard, through Wallingford and Fremont. These are some of the most congested areas of the city and the bus system simply cannot accommodate them any longer with any efficiency. Sound Transit did well to provide South Seattle with the light rail before everywhere else, but the time has come for the neighborhoods north of the lake to have light rail (but building a grade-separated line from downtown to Ballard should still be at the very top of the list).  -[name]
NORTH KING COUNTY	Would LOVE To see the Graham St Station moved up or the creation of parking near some of the stations in the Central District. This area has high crime and walking extended distances is not safe currently. Many residents live within walking distance to Graham and MLK, this stop was in the original plan and would make life better for many! Please consider.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I think these developments need to happen much, much faster. Our transit system, particularly light rail, is already far behind. I don't understand why it would take eight years to get Bus Rapid Transit routes online. My priorities are expanding light rail within city of Seattle and then to other cities for commuters (i.e. Bellevue, Redmond, etc). Also, I notice in the plan there is a lack of East-West corridors within Seattle.
NORTH KING COUNTY	Projects within the current light rail network, such as Graham Street station should be completed first.
NORTH KING COUNTY	We need light rail today and faster!
NORTH KING COUNTY	very disappointing to have to wait 22 years for light rail to Ballard.
NORTH KING COUNTY	The 25 year build out is too little too late. The region needs the proposed transit improvements and more today not 25 years from now. For our region to continue to prosper we need the infrastructure. Widespread fast and reliable mass transit is the most important thing we can do to ensure equity and address ever increasing housing costs. Planning mass transit to encourage and support walkable dense and active neighborhoods is good for the environment and our collective health and happiness. Build it now not tomorrow.
NORTH KING COUNTY	Because of the completion timeline for ST3, the city should reevaluate and prioritize to accommodate likely transportation changes such as the very likely possibility of autonomous taxi services and the like within the next decade. Expensive rail improvements to suburban areas should be reevaluated in favor of more flexible bus routes, expanded parking at median distance nodes to accommodate mixed commutes (car and rail/bus), and continued expansion of light rail to closer Seattle neighborhoods such as Ballard and West Seattle.
NORTH KING COUNTY	I think one of the most urgent needs is to improve the service to the existing light rail network. I find waiting 20 plus years to have a Graham street station ridiculous.  I appreciate building out the reach of transit, but it's crucial to build out the core and expand access for people already using the transit system. Graham street was in the original proposal and should be added as soon as possible.
NORTH KING COUNTY	I'm stunned, as are others in the Rainier Valley, to learn that you are not planning to complete the Graham Hill station for 20 years, which is why I "strongly opposed" the ST3 phase plan. As I understand it, the infrastructure is already present at Graham St. which means that to complete this station would be a relatively very small project. Given this, and given that it would benefit so MANY people in our neighborhood, please, please, PLEASE complete it on a fast track. Don't make us wait until most of are retired and our children departed from home. We supported the recent money-raising project on the ballot in huge measure so that the money would be secured to complete the Graham Hill Station. Please. Don't make us wait 20 years. Don't do this. We need it now. At this point, many of us take the Columbia City train, but this means we're driving into Columbia City, adding to the congestion of that increasingly over-packed neighborhood, parking farther and farther away from the train because there are fewer and fewer places to park. Build the Graham Hill Station. Let us leave our cars at home and walk to the station.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The timeline, particularly for Ballard, is far too long. We need this now, and can't afford to wait for decades. I am willing to pay, but only with greatly accelerated timelines. There is also far too much suburban focus. We should use sounder for Everett and Tacoma, and build light rail where there is sufficient density, like Belltown and Ballard.
NORTH KING COUNTY	<p>The Graham Street Station was originally supposed to be in the first phase of the lightrail. It was pulled after many businesses spent money to remodel so they would be able to accommodate more customers. It was then pulled. Expecting those of us in the Rainier Valley to wait another 20 years to put this in place is absurd. I hardly ever use lightrail because I live near Graham st, am a single woman and would never walk alone in the evenings. This station would allow me to frequent public transportation more frequently. It is over a mile walk for me to go to the Columbia City station as well as the Othello station. I am unable to walk that far and certainly not going to do it alone.</p> <p>Secondly, the fact that there weren't allocated parking lots provided for free to all the stations is ridiculous. I went to many pre planning meetings and got up to tell the mayor about why there should be parking provided. Mayor McGinn was all for me riding my bike to the light rail station. (Oh yes, a single woman, dressed up to go to a business meeting after hours, downtown alone.) No thank you. So.. Because of this, I hardly ever take lightrail. It is inconvenient. I live closer to Rainier Avenue and for me to get to the station, I have to drive anyway. Spending another few dollars to park downtown is worth it since I would have to pay for lightrail anyway. So.. Since parking is almost non-existent and zoned, it doesn't allow enough time for me to get what I need done. They won't allow us to purchase parking passes either, which is also absurd. I am fed up and really want the Graham Station so I can walk to the lightrail. Please don't make us wait another 20 years. We all spent years with flat tires while the lightrail was built. Let us have the station that should have been there in the first place.</p>
NORTH KING COUNTY	This timeline is terrible- no one wants to vote for something they can't expect to live to use. Ballard is huge and vital, and becoming untenable. It has expanded beyond belief, and transit needs to happen in 5-7 years, not 22. This is why I am against this plan. Slow, and going to the wrong places first. I agree with almost all of this, especially 1-3: <a href="http://seattletransitblog.com/2016/03/31/how-to-fix-st3-so-seattle-will-vote-for-it/">http://seattletransitblog.com/2016/03/31/how-to-fix-st3-so-seattle-will-vote-for-it/</a>
NORTH KING COUNTY	I agree with adding services and want light rail as many places as we can get it. I don't use public transportation because it would take me longer and be less convenient to do so. My biggest disappointment with the plan is the 25 year time line. I'd be will to pay 2x as much in taxes if the time line could be cut in half. With 800 cars on the road each week it seems like this plan really needs to be accelerated.
NORTH KING COUNTY	Really excited about this plan, and the transit investment for our region, but please move the dates sooner, especially Graham Street and Ballard/SLU.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	If every WEEK there are 800 new cars on our road, then how can we realistically plan a system to accommodate Seattle traffic in 25 years? The scope of this plan, while I love it, seems likely to change within the next 25 years and therefore investments in the longest term projects now, will essentially be lost. Is there a way to break it into smaller chunks? Thanks for all your hard work! I use the light rail almost everyday. Would love to see a graham street station in the next 5 years.
NORTH KING COUNTY	20 years is WAY WAY too long to wait for a Graham Street station that is practically already built. South Seattle is in URGENT NEED of improved public transportation and has been ignored for YEARS in favor of central and north Seattle projects. This is a social justice issue and I will fight like hell if the timeline is not moved up.
NORTH KING COUNTY	The project timeline for west Seattle is putting us last. Why? We are the largest neighborhood in the city, and have already been suffering for YEARS with the HWY 99 debacle, with no end in sight. The water taxi is orphaned on the city side, why is that? Why is the rapid ride C line standing room only and forced in and out of stop-and-go traffic half the time? regional transit planning has been so poor, so siloed and non cooperative with state and city planners. I am tired of west Seattle being last on all the ST project plans for light rail. Put the rail where the people are.
NORTH KING COUNTY	Can't we figure out how to pay for it in a way that includes municipal bonds or something to shorten the timeframe. We need these neighborhood connections through light rail as soon as possible. I'll pay for a faster timeline.
NORTH KING COUNTY	Getting light rail to Ballard and West Seattle are the highest priorities of this plan, but they are currently scheduled at the end of roll-out. These and on-shoulder BRT should roll out ASAP. Similarly, extensions like the Graham St. and 130th stations do the most to expand the utility of the light rail system as a whole by extending its reach and opening up new communities to inclusion in the system. These, too, should be prioritized first, since they can be completed in shorter time windows and be operational during the rest of the plan.
NORTH KING COUNTY	Voters are more likely to support a shorter timeline. We desperately want light rail to come to West Seattle but it needs to happen much sooner.
NORTH KING COUNTY	Ballard Link project is WAY too far out.
NORTH KING COUNTY	The 8, 12, ...25 year time lines are way too slow! That's why I only 'somewhat supported' the proposal.
NORTH KING COUNTY	If it's possible to trade money for faster timelines, ot would be worth cutting other projects in Seattle to get faster completion of the Ballard and West Seattle light rail lines. 18 years is too long to wait, especially given the recent and projected growth in the city. Reliable transit that is a true alternative to driving is already sorely needed, especially between current and future growth areas like Ballard.
NORTH KING COUNTY	Though I believe I would support this plan regardless of the 25 year timeline, I am profoundly disappointed at the amount of time it will take to complete the inner-city routes on this project
NORTH KING COUNTY	I think the timelines should be shorter for light rail.
NORTH KING COUNTY	West Seattle and Ballard need transit sooner than 17 years from now. That's a joke.
NORTH KING COUNTY	It amazes me that Ballard/West Seattle are not at the top of the list. Both places are full of people who commute, and both are inconvenient to get to via car. There would be massive ridership for a station in either location.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	It is unacceptable for the Graham Street station to be on a 20 year timeline. The station was in the original light rail plan nearly 20 years ago; we shouldn't have to wait an additional 20 years for it to finally be a reality. I agree that the public transportation system needs to be extended and expanded, but prioritizing suburban service over under-served urban communities doesn't make sense. The community where the Graham St. Station is planned has long been impacted by the light rail but we haven't enjoyed the benefit. This is a chance for Sound Transit to prove that equity plays a part in their decisions, and to deliver an early and visible benefit for the giant check they're asking us to sign.
NORTH KING COUNTY	Developing light rail access to West Seattle and Ballard should be moved much farther up in the timeline. Those two neighborhoods are suffering NOW given the amount of people who have settled in these "urban villages". Once the viaduct is down, the pain and frustration may well be unbearable.
NORTH KING COUNTY	With the current timeframe, I'm probably going to move to a city further along in their transit expansion as I want to enjoy it in my lifetime.
NORTH KING COUNTY	Push NW Seattle lightrail forward in the schedule. The young Ballard community is dying to spend money on transit - that will secure North Seattle as "home," a place to settle down, have kids etc. Cost of living here is so high that people can't wait to get rid of their cars. Help me help you.
NORTH KING COUNTY	I am very much ch in support of vastly expanding the link light rail system throughout the Peugeot sound area. My opposition to this particular plan is the schedule of the various proposed lines. Ballard to downtown Seattle and west Seattle to downtown MUST come first. And those two lines MUST be grad separated, either elevated tracks or in a tunnel. The Rainer Valley is prof of that. ST2 is already happening to the east side out to Redmond and that is fine. Build that ASAP. But the first lines of ST3 must connect Ballard & West Seattle to downtown. Change that order of the schedule and you'll have my full and vocal support! Also, hire some of the people involved in the Seattle Subway organization. They have clear thinking on this massive project and you need their good ideas in your organization. [name] in the Central District of Seattle.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

<p>NORTH KING COUNTY</p>	<p>Ballard needs light rail much sooner and completely grade separated. I also think UW-to-Ballard needs to be on the list. If you can't deliver Ballard-to-Downtown sooner maybe the UW-to-Ballard line would make more sense to get people from Ballard to downtown and back just as fast. Even if you don't build it first, I would highly recommend still building it in ST3. It would be cheaper as an extension of the Ballard-to-Downtown line because a O&amp;M facility would not be needed. There is no excuse for not putting Ballard-to-UW on the list. It's one of the highest performing lines in both studies and your own surveys.</p> <p>Read more about timeline problems here: <a href="https://www.theurbanist.org/2016/03/25/sound-transit-submits-suburb-heavy-expansion-plan/#comment-5825">https://www.theurbanist.org/2016/03/25/sound-transit-submits-suburb-heavy-expansion-plan/#comment-5825</a></p> <p>And don't let Everett talk you into the idiotic Paine Field routing. You're wasting billions of dollars to deliver inferior results.</p>
<p>NORTH KING COUNTY</p>	<p>It sure would be great to move these timelines up a bit! I'm looking to buy a home in West Seattle, and though I will gladly tax myself to no end to support public goods in which I believe, I think that there may be some reservations from others regarding a 17-22-year wait to get light rail to Ballard and West Seattle.</p> <p>I also think that at-grade construction is not a good idea in Ballard (or anywhere else, for that matter), as it will not only slow the system overall when mixed with traffic lights, it's also just not a good idea (as we've seen in the southern reach of the existing Link Light Rail). Above- or underground tracks and stations are far more preferable and versatile in completing a necessary piece of our transportation network that integrates into the communities it serves.</p>
<p>NORTH KING COUNTY</p>	<p>I want a system I can use before I'm dead. Not one that I pay for now and hope that my unborn baby can one day maybe use before they can legally buy beer.</p>
<p>NORTH KING COUNTY</p>	<p>Project completion timelines are too slow for our rate of growth. It's time to think innovatively for ways to bring these vital and needed projects to completion much, much sooner!</p> <p>Also, light rail or a Rapid Ride Bus needs to run from Burien to White Center and up Delridge. From there it could connect with the C, and later with the new light rail stop.</p>
<p>NORTH KING COUNTY</p>	<p>While I strongly support the ST3 projects goals and routes it takes way too long!!!          Waiting 22 years to get the light rail system to Ballard is unacceptable!!!          This system is already many years too late. There must be a better faster way to get these routes built in a far more timely manor.          We need it now!! Not in 22+ years!!!!!!!!!!!!!!!!!!!!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	ST3 is frankly not ambitious enough in its timeline and seems to neglect the seattle proper in favor the suburbs. I'm a Ballard resident so I am particularly appalled at how poorly thought out (at grade!) and slow to build (22 years!) the Ballard line seems to be. Thank you.
NORTH KING COUNTY	22 years to expand to Ballard is way too long. As Seattle Transit Blog points out, the line to Ballard is the single best project in the package, by every possible metric (Ridership per dollar? Check. Potential for Transit Oriented Development? Check. Potential for federal funding? Check.) Seattle needs the Downtown-Ballard line with grade separation prioritized, and we need to at least create the EIS for the Ballard-UW line. Getting across the northern part of the city from west to east is extremely inefficient right now.
NORTH KING COUNTY	I think it's ludicrous the way that you're scheduling your projects. Why don't you prioritize projects based on the projected ridership. This will help pay for the rest of the projects, so it seems like such a no brainer. Ballard daily ridership is higher than almost all the rest of your lines combined, why in the world would you put it last? It just seems so so silly to do that, and I can't even understand what your rationale would be. Build the trains where people will use them most FIRST. And don't put them on the roads where people will get stuck in traffic on trains, and where the trains will make traffic worse
NORTH KING COUNTY	The Ballard timeline is too long. 22 years?? Between traffic and geography, it's already particularly difficult to get in and out of Ballard, I don't want to imagine how much worse it will get over the next 22 years before light rail arrives. It's a very high density area and a popular destination for residents of other neighborhoods. It makes sense to get light rail service to Ballard earlier to get those people off the roads sooner.
NORTH KING COUNTY	This is a long time to wait for a light rail from Ballard to downtown. That needs to be a much higher priority and needs to be completed much much faster! Seattle is growing way to fast to wait that long for a more robust light rail!
NORTH KING COUNTY	ST should explain the rationale for the timing of different elements of the plan, including the prioritization criteria.
NORTH KING COUNTY	ballard needs to be sooner, and not at grade

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>A 22 year timeline for a rail connection from Ballard to downtown is completely ridiculous, this should have been in the works 10 years ago in order to be within reach 5 years from now, and it still would have been 10 years too late. You need to prioritize relieving congestion primarily in the areas the new influx of residents are landing, and secondarily where current residents are indicating they would use transit more frequently if access to transit were improved.</p> <p>Funding should come more from fuel sales taxes, parking taxes, construction and development taxes etc, (earmarked specifically for transportation development as opposed to simply funneling into the general fund), and lastly from property taxes leveraged against local residents. Property taxes are already burdensome enough given the state of Washington's educational system, Seattle police department, etc. There should be a direct disincentive for choosing to drive anywhere. It's clear that the traffic itself is not an effective disincentive, so it should cost people significantly more to make the decision to burn fuel if they are too lazy to walk, cycle, or use efficient transit. There should also be more participation from local mega employers to help offset the congestion their newly arriving employees are adding to the traffic strain in the region. Rather than simply overpaying their employees in order for them to overpay for their new homes and afford to drive to work and pay every day for parking, they should actively engage in this process as a stakeholder and offer real solutions to remove vehicles from our roads. Microsoft's Connector bus service is a good example.</p>
NORTH KING COUNTY	The proposed time frames are extremely long. Downtown to Ballard in 22 years? I'll be an old man by then. Surely it can be done faster.
NORTH KING COUNTY	Shorten the timelines; how does it take 25 years to lay some track?
NORTH KING COUNTY	It is ridiculous that any of this should take 22 years. You must do better if you expect current taxpayers to pay for it.
NORTH KING COUNTY	22 years is too long.
NORTH KING COUNTY	It's my hope that the light rail system will continue to expand until the Puget Sound region has a fully operational mass transit "subway" system (whether or not underground) that reaches all corners of the Puget Sound Region. Obviously that will take a lot of time and many more ballot measures. My timeline concern for this plan is that it will be 8 years before BRT can be implemented up the I-405 corridor. Really? Eight years to set aside bus lanes? I'd like to see that orange line on the map be a light rail proposal too....What would it take (and what would it cost) to accelerate this whole process?
NORTH KING COUNTY	22 years to get relief into Ballard is unacceptable. With the growth in our neighborhoods why do we have to wait so long!?
NORTH KING COUNTY	Any way to get Ballard connected faster will benefit everyone through less in-city congestion.

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Lightrail to Tacoma and Everett region should be given highest priority. People commute everyday from Everett to Boeing and Tacoma everyday. The traffic is terrible. If lightrail served these areas traffic would be reduced. The sooner it's built, the sooner people will ride.  Bike projects cost too much money and time.
NORTH KING COUNTY	I would like to see the Graham Street Light Rail Station established well before the current projected date. I think the ST3 Transit Plan should focus on improving light rail access within Seattle city limits and helping under-served low-income populations with their transportation needs, before expanding to the suburbs to help commuters who live outside the city limits.
NORTH KING COUNTY	Ballard's growth is exponential NOW. Light rail in 22 years? I won't vote for that. We need to be first in line for a solution, not last.  Also, you need to have park and rides at all the stations. It is unrealistic to think people don't need cars to get around.
NORTH KING COUNTY	Far too slow. I will not support this project unless the timelines move up drastically. Specifically Ballard and West Seattle. Build it in 10 years and then I will support.
NORTH KING COUNTY	Please make Ballard and West Seattle the next areas to get mass transit. The viaduct and Elliot way are not viable methods of transportation to get to downtown. We also need East -> West transit that is reliable and fast beside the 10, 40 and 44 bus lines.
NORTH KING COUNTY	25 years is too long to wait. This needs to get done in 10-15 years.
NORTH KING COUNTY	Fantastic plan, but the phases are not right. Put higher priority in the most dense parts, i.e. Seattle.
NORTH KING COUNTY	The Everett line should finish earlier, thanks,
NORTH KING COUNTY	When I look at the weather report on the news and they show a picture of Seattle skyline they say it's a beautiful day- I think who are they kidding! I see a haze around our city that I did not see 20 years ago and it is clear to my eyes that the air quality is bad. Tax carbon burning engines! Make it easy for people to not have cars. Those who insist on burning oil into our air can just wait in traffic and that is fine with me.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

<p>NORTH KING COUNTY</p>	<p>The timeline for the Ballard line is just too long. 22 years is crazy long. There has to be an opportunity to accelerate the schedule. Cost is tough to balance, but when you weigh against the option to accelerate the schedule, the choice becomes easier. I'd pay double if it cut the time of the project in half. Having this done in 11 years as opposed to 22 would be huge. I wouldn't miss the money as much as I would miss the years without light rail.</p> <p>Also, having Ballard line be at-grade is a waste. We may as well just stick with BRT, as light rail won't help commute time or volume.</p> <p>The Seattle Subway project's insights are spot on: <a href="http://seattletransitblog.com/2016/03/31/how-to-fix-st3-so-seattle-will-vote-for-it/">http://seattletransitblog.com/2016/03/31/how-to-fix-st3-so-seattle-will-vote-for-it/</a></p> <p>It feels like the prioritization of lines is set up to get maximum buy in from the county, while assuming Seattle will vote for anything as long as it gets more light rail eventually, even if it comes in dead last. However, I think you'll find suburban voters harder to sway even with their payout coming first, and Seattle voters to be more fickle of the fine details.</p>
<p>NORTH KING COUNTY</p>	<p>As a resident of Seattle, I strongly oppose this plan simply because there is no benefit to me. While the link desperately needs expansion, I would have to pay hundreds of dollars a year and wouldn't see a benefit for at least 17 years. If the lines to Ballard and West Seattle were completed sooner (like within 10 years), I could see myself supporting this plan.</p>
<p>NORTH KING COUNTY</p>	<p>Its great to see the Graham Street Station in ST3 is fully funded however, waiting 20 years for a station that was included in the original plan years ago seems to be an oversight. Graham Street Station should be pushed up in the timeline. A station at this critical Southend junction would support and anchor the small, largely immigrant and refugee owned business district at Graham and Othello - a community that weathered the construction storm when light rail first went in...anticipating to see the fruits of their struggle once the station was completed. They are still waiting. Pushing Graham Street Station ahead in the timeline is an equitable choice aligned with the City's commitment to race and social justice. Please consider revising the timeline to include Graham Street Station in the 1st phase. Thank you.</p>

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - North King County

<p>NORTH KING COUNTY</p>	<p>Light Rail in/around the population and employment centers MUST be the priority (Everett, Ballard, Overlake, W. Seattle). Traffic is hurting mobility TODAY. Waiting 10+ years to connect Microsoft and 20+ years to connect Ballard or the Boeing Everett complex is unacceptable. These are huge employers with tens of thousands of employees that are contributing to (and suffering from) congested roadways right now. ANYTHING that can advance that time line should be pursued. Alternatively, consider investment in BRT / RR lines along the future rail corridors as a stop-gap to improve mobility.</p> <p>Additionally, one of the most attractive things about Light Rail is the speed (Westlake to Cap Hill in 2 minutes is outstanding!). These new corridors should be elevated or tunneled where possible and on exclusive right-of-ways (like SODO busway or like Portland's MAX near the Convention Center) where not. Avoid at-grade road crossing (like MLK) and NO DRAWBRIDGES! Even if MLK-Style road crossing don't increase actual transit times, there's a significant popular perception that they do. Spending the extra money for elevated tracks will be worth the public perception and encourage ridership.</p>
<p>NORTH KING COUNTY</p>	<p>The timeline to support West Seattle with light rail is absurdly late and is the key reason I answered that I would strongly oppose ST3 as currently drafted. The plan is obviously drafted by Eastsiders for Eastsiders. Move up the West Seattle and Ballard timelines to the Redmond and Federal Way proposed dates and I would strongly support. Ballard in 22 years?? Absurd!!</p>
<p>NORTH KING COUNTY</p>	<p>Timeline is way too long. I would rather pay more now to speed up the project.</p> <p>The focus should also be on more dense, in-city neighborhoods rather than connecting far out suburbs. Priority should be given to Ballard, West Seattle, and Shoreline rather than Everett or Federal Way. The transit would have much more usage.</p>
<p>NORTH KING COUNTY</p>	<p>Why 25 years? This needs to be a priority or broken down into 5 year chunks to say by x date we will do this and by y date we will do this. If the traffic keeps up and with Google and Expedia projects coming in he next 4 years this needs to be fast tracked or Seattle will stop growing as no one will be able to get around.</p>
<p>NORTH KING COUNTY</p>	<p>I live and work in Seattle in areas where there is no light rail options. The neighborhoods within Seattle should take priority in the next Sound Transit construction project and the Ballard and West Seattle projects should be the first ones completed.</p>
<p>NORTH KING COUNTY</p>	<p>I live in downtown Seattle and work as an independent contractor throughout King County, and frequently outside of the county, from Olympia to Everett. I don't have a car so I rely on public transportation to get to jobs. I'm strongly in favor of expanding public transportation systems as much and as quickly as possible, as they make it possible for me to get places. I love the Link Light Rail system; I like how fast it is and how frequently it runs; and even if I had a car, I'd probably take the light rail to get to the airport, as it's faster and more convenient. Projects like this proposed expansion are the whole reason we have taxes, if you ask me.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I feel very strongly that 20 years is way too long to wait to add a stop at Graham Street along the existing line. The stop was supposed to be part of the previous plan. To continue to support the Rainier Valley's economically and culturally diverse residents to use the light rail, we need to add that stop sooner than later. It doesn't seem like it is that expensive in the big picture, and I don't understand why it can't be built at the same time as some of the other projects in the early segments of this plan.
NORTH KING COUNTY	The timetable for completion of the Ballard and West Seattle light rail lines should be moved up. I don't think it makes sense to link Tacoma and Seattle by light rail before Seattle's neighborhoods are connected. There's already an existing train line between the two cities.
NORTH KING COUNTY	The time line is ridiculously slow. The spine should be completed years faster than is planned. Adding bus lines shouldn't take 8 years. The train to West Seattle and Ballard shouldn't take 17 years either. The 25 year timeline is what is going to make this not pass. Maybe approving each line individually would get a quicker time frame? I propose hiring more than one company to work multiple lines at a time and get this done quicker. Start ST3 now do not wait for ST2 to finish.
NORTH KING COUNTY	I feel that some projects should be moved up if possible and giving priority to light rail to get around. It will be our "subway/metro" system. In addition being innovative in building "free" parking structures near transit hubs would greatly increase use of the system. Maybe build parking lots over the top of some transit stations.
NORTH KING COUNTY	The timeline and funding priorities of this plan are all out of whack. Inner city grade separated transit should be the timeline and funding priority with plans to extend those lines into an intra-city system in future. 20+ years to build a 5 mile line within the city is unacceptable and I can't and won't vote for this package as currently drawn up.
NORTH KING COUNTY	Seems like it shouldn't take 25 years..... Love the tunnels!!! We need to dramatically increase that! Just like all the other big cities..... Expansion of the tunnels would really change traffic and people more likely to go places when ordinarily they would avoid the standstill traffic. Going East/West in general is still a major issue... Great start though!!! Casey McMullin ( Native Seattleite!)
NORTH KING COUNTY	The timelines for project completions guarantees failure. The demand is far exceeding the timeline to address and these projects will fall short of providing relief in a time effective matter. Unless the timelines to implementation are accelerated drastically these projects will not provide the return on investment. Pie in the sky goals do not add value to the discussion and more buses on the roads really are not the answer. Rail must be built and it must be built faster. More use of elevated rail vs tunnel needs to be utilized.
NORTH KING COUNTY	South lake union is rapidly becoming a huge tech center, with more and more companies expanding into this area. Lightrail to South lake union through downtown should be a priority over other projects.
NORTH KING COUNTY	I'd love for light rail to Redmond/Bellevue to move faster. Same for light rail to Tacoma. Speed it up, please!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Rearrange project deadlines. Seattle area currently is poorly served by mass transit compared to the rest of the region. E.g. it is faster and easier to get to downtown from the east side than from Ballard. Seattle residents who work in Seattle would, IMO, be more likely to get out of their cars than persons commuting to Seattle from outside Seattle.
NORTH KING COUNTY	Build everything as quickly as possible.
NORTH KING COUNTY	Many of these projects should be undertaken simultaneously. In city transportation needs should not be delayed. Integration with Metro and the streetcar system is also important.
NORTH KING COUNTY	It all needs to happen sooner!!!!!!!!!! Great planning everyone and good luck!
NORTH KING COUNTY	Getting light rail to Ballard in 22 years seems like an eternity. You should prioritize dense areas like Ballard first to really remove cars off the road and make Seattle truly a walkable city. This would make Seattle residents actually consider not even owning a car like folks do in Boston, New York, Washington DC, etc. To prioritize Redmond, Lynnwood, and Federal Way seems really odd as folks will still continue to drive, especially if the Light rail in the city itself doesn't even go to places where they may need to go, like Ballard, Fremont, Wallingford, South lake union, West Seattle, etc.
NORTH KING COUNTY	We need these services much more quickly! For example, waiting 22 years for Ballard light rail service is completely unacceptable. We need to look for more funding to reduce the timeline. Seattle is already so congested that it's barely livable. In 22 years it will be so much worse.
NORTH KING COUNTY	This timeline is incredibly long. We need these services as soon as possible, especially in the N-S direction through Seattle. The boondoggle that is the viaduct tunnel will make the situation much worse by not allowing for a downtown exit.
NORTH KING COUNTY	The light rail expansion is needed now, not in 25 years.
NORTH KING COUNTY	The Ballard and West Seattle schedules need to be moved up by about a decade each. Ballard has a huge potential for ridership and West Seattle has the nasty bottleneck trying to get over that bridge. And funding for preliminary studies for the proposed extensions should be fully funded so that projects are shovel ready.
NORTH KING COUNTY	The entire plan takes far too long to complete!!!! We need this system YESTERDAY! How is it Translink's Canada Line can be completed in just 5 years, (tunnel and elevated) but you are taking close to 10 years to complete a segment? Reduce your time line. At your current snail's pace I may be dead before these projects are complete. Get projects like Graham St Station and Ballard to Downtown going immediately! Not having these projects is negatively affecting the neighborhoods.
NORTH KING COUNTY	I do not understand why Ballard is out 22 years. There are several young professionals moving into this neighborhood who would prefer to use light rail. I feel we should take care of our shorter intercity links first before focusing on connecting the suburbs. We'll use these links for more than just commuting to work. We'll ride into downtown for theater, dinner, music and all the other intercity culture downtown has to offer.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Just plain way,way too far out.
NORTH KING COUNTY	I want to light rail in Ballard first, please.
NORTH KING COUNTY	Overall I believe the timelines for link should be improved if at all possible. Reliable transit to / from Everett and Issaquah would significantly improve the options available for areas to live and work around Seattle without needing to add more cars to an already busy commute.
NORTH KING COUNTY	Know buildng will take time, but believe making light rail available sooner to Ballard and West Seattle would help with traffic coming into Seattle. Living on Beacon Hill we have found using the system has been a great benefit. The new link to Cap Hill and the U has opened up a new way of getting north much easier. Plus leaving our car home. Faster would be better for everyone!
NORTH KING COUNTY	The timeline is demoralizing. Anything that can be done to speed up delivery would be much appreciated.
NORTH KING COUNTY	Do it ASAP. No excuses.
NORTH KING COUNTY	Getting light rail all the way to Redmond as quickly as possible is my personal #1 priority—I'd love if it didn't take 12 years—but I also strongly support all the light rail spurs to dense in-city neighborhoods like Ballard and West Seattle. With the exception of Redmond, which is a major commuter draw from the city, those connections within the city are fundamentally more important than extending transit to far outlying areas like DuPont. Even if they get light rail, people in the suburbs are used to car culture, and are going to have a hard time switching over in a meaningful way—even if they take the train to work, everywhere else they go requires a car, so it'll remain their first thought when traveling. By contrast, if we can connect the much denser neighborhoods of the city, we can make it possible for far more people to stop relying on cars altogether. Right now, getting between neighborhoods like Ballard and Columbia City are the <i>*only*</i> reasons many of the people in my community haven't completely switched over to public transit. We can reach that tipping point with this plan.
NORTH KING COUNTY	This city is already bursting at the seams- one the primary issues is traffic and road congestion. We need to address these problems as quickly as possible, specifically building out transit in high density areas - these expansions cannot wait. Additionally, people need to be made aware that these additional costs to tax payers are well worth it. I am happy to pay higher property taxes to build out transit.
NORTH KING COUNTY	Would like light rail to Ballard sooner (but I don't live in Ballard, just that access to NW part of Seattle is difficult due to traffic).
NORTH KING COUNTY	The proposed timelines are very long. The region desperately needs improved transit sooner rather than later.
NORTH KING COUNTY	Why does it take so long to complete these projects?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Until transit can show that they will actually complete the projects promised, I will not vote again for transit. I've always voted for transit, however, all I have to show is traffic calming/loosing lanes and the bus that runs in front of my apartment removed. I would now have to take 3 buses to go 5mi to work (so I don't...it's unreasonable when I work 12hr shifts to tack on 2.5hrs transit time) and my husband cannot now rely on transit to get him to work in a timely manner. We are considering being a 2 car household for the first time, which is really disappointing. I want to use public transit but it keeps disappearing from where I live!!
NORTH KING COUNTY	Timelines are way too long and priorities don't necessarily make sense. BRT shouldn't take 8 years, and the Ballard and Everett lines need to be moved forward.
NORTH KING COUNTY	We need transit now! In 25 years the needs of the community will be different than they are currently. This is a joke.
NORTH KING COUNTY	There is no way this should take 25 years. It should be completed in 10.
NORTH KING COUNTY	Increase revenue sources to complete sooner. This should have been built 40 years ago.
NORTH KING COUNTY	I wish light rail could be completed sooner. Thanks for all your hard work! :)
NORTH KING COUNTY	22 years to get light rail to Ballard is a really long time. I would like to see that sped up.
NORTH KING COUNTY	The Puget Sound area has had a poor history of keeping up with the times and improving transit infrastructure. Population growth in the Seattle greater metro area is not going to be slowing anytime soon. These expansions need to happen before our already choked streets and highways become impossible to traverse.
NORTH KING COUNTY	Much faster timeline. I'd happily pay higher taxes.
NORTH KING COUNTY	Light rail is coming too late. We have to solve this in the next five years.
NORTH KING COUNTY	I believe the Ballard and West Seattle lines need to be prioritized. 22 years is way too long.
NORTH KING COUNTY	We need the Graham street station! There are a lot of commuters in this area and it doesn't make any sense to go so far between Columbia City and Othello without stopping. Please move up the timeline for completion on this project to within a couple of years. We can't wait!
NORTH KING COUNTY	Faster service between Ballard and downtown can't wait 22 years. It should NOT take an hour to go 7 miles. Light rail, not buses that are stuck with cars, bridge openings, and dangerous for bikes and pedestrians.
NORTH KING COUNTY	I am completely in support of all Light Rail expansions. I wish there were more Light Rails being put in instead of buses. I want this to happen quicker than 25 years and am not necessarily in support of the order of projects listed in 12.
NORTH KING COUNTY	This plan is good, but moving too slow. Puget Sound's population and commuting needs are growing at a much faster rate than the proposed plan would address.
NORTH KING COUNTY	project completion timelines are excessive and do not address the needed infrastructure now. plans developed in the next 25 years have little to no impact on current transportation difficulties, time frames need to be dramatically reduced into the 5-10 year range

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The Graham St station would add HUGE to the existing light rail. There population between Othello and Columbia City stations is very dense and this project should be relatively inexpensive as the rail is already there, it's just adding a few platforms, right? :)
NORTH KING COUNTY	Is there any way to speed up light rail to Ballard and West Seattle? Those are high population density areas that need better transit options!
NORTH KING COUNTY	Still not clear on why it will take so long to complete the projects. Is it funding related? Light rail/train projects needing time makes sense (though 22 years for light rail to Ballard??) but eight years to start bus service seems unreasonably slow, especially given the insane traffic on the 405 corridor (and what I thus see as an immediate need). I was also disappointed that so many of the proposed changes are still 'downtown Seattle'-centric. As someone who lives in Fremont, works in Bellevue, and uses transit daily I know the annoyance of transfers (sometimes I have to take 3 buses each way!) and hour+ commutes to go 11 miles. Even when 520 is backed up, I can still get home faster by driving. I have a car; the temptation is real. Light rail crossing 520 would be a very, very good thing.
NORTH KING COUNTY	The timeline for the Ballard extension is not fast enough. We paid lots of tax dollars for the monorail to be built out to Ballard and it was never done. Lots of money spent and nothing to show for it. Also, we tax payers never got a refund or ever found out how they spent the money we paid. Maybe the money collected for the monorail should be spent for the light rail. Oh wait it was spent for something else. I will not support paying more money for something I will not live to see. In 22 years I would be 100 years old and I really don't think I'll live that long. Sorry, but I do not want to see my tax dollars spent on this project unless light rail comes to Ballard in the next few years. All I've seen the majority of my tax dollars spent on the last few years is studies and more studies. Enough!
NORTH KING COUNTY	Speed it up, it's worth investing in moving quicker
NORTH KING COUNTY	The West Seattle light rail should be prioritized as the area is rapidly expanding, and bus transport is limited.
NORTH KING COUNTY	A light rail system that can only run 1 train every 6 minutes delivers too little, too late. It will be beyond capacity before the expanded service even starts. We can see that simply from the service as it is today, serving fewer stations and a smaller population. Wind forward 25 years from now. Do you really think it can service the needs of the greater metro region and the larger population living further and further out, still needing to work in downtown districts?
NORTH KING COUNTY	Light rail from Ballard to downtown should be completed within 12 years.
NORTH KING COUNTY	The timeline of completion makes this project almost irrelevant to me due to how long it takes. I might moved away from this crazy traffic just because it's taking too long to make anything better.
NORTH KING COUNTY	I'm pretty disappointed by this plan. I may end up reluctantly voting for it just because of the Seattle portion (even if the Ballard draw-bridge option seems very disappointing to me), but the suburban stations service less urbanized areas and require transfers to get to major job centers. I feel irresponsible voting for this...which sucks, because I'm also disillusioned by the length of the timeline, and don't want to extend it by voting "no."

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I'd be willing to bet if you proposed an additional plan after this one that would essentially act like a "booster", there would be mass interest. The main complaint I hear from people in regards to ST3 is that the timeline is not aggressive enough (decades to completion is not inspirational, even if it is the Seattle way). People are frustrated with their problems now, and I think floating the idea of seeking additional funding PURELY for the purpose of speeding up production would be popular - and what would be even more popular is if it was partially funded by development deals struck with corporations and other private entities that stand to benefit from the expansion of the light rail and the positioning of the stations, instead of placing the tax burden entirely on the citizenry.  Food for thought.
NORTH KING COUNTY	Just get light rail to Everett and Tacoma and Redmond with a couple stations at each end...then build more stations in between...that will get you the most ridership early on when it counts and get the most cars off the road from the start.
NORTH KING COUNTY	Would love to see this all happen faster, with more stations in the central Seattle area connecting more of the neighborhoods (Eastlake, Madison Valley, Fremont). The BRT plan is fine for now but think it would be better in the long term if tha was turned into a light rail system. Traffic congestion on 405 is horrendous and buses don't seem as appealing to both the work commuter but also the entertainment commuter (shopping/events). Plus taking more people off the road for the airport. Seattle is only getting bigger and the Eastside is growing.
NORTH KING COUNTY	I truly find it odd that the Ballard and West Seattle plans are so far down the timeline. As the density grows the transit options have lowered. As a daily commuter in Ballard the buses are always jammed tight and I keep seeing one single family home being demolished and replaced with a condo or a own house complex. The major city traffic needs to be on point before expanding to the north or south. Also more east west lines need to be included and fast tracked.
NORTH KING COUNTY	Would like to see light rail in and around ballard, west seattle more upfront in timeline than in 17yrs due to rapid population growth in these areas and building congestion
NORTH KING COUNTY	Hurry
NORTH KING COUNTY	Think bigger and faster! We need this transit sooner. any way to get more funding and start these projects sooner?
NORTH KING COUNTY	I am enthusiastic about these projects, and I'm concerned about the lengthy timeline. We need more, sooner! As a Seattle resident, I would be willing to pay more to have some of these projects done sooner.
NORTH KING COUNTY	Get it done based on ridership potential...not politics.
NORTH KING COUNTY	The Ballard project should be prioritized to be completed sooner. Especially with Expedia moving to Seattle, the traffic alone Elliott Way will be horrible.
NORTH KING COUNTY	The time line is just to long. You're asking a lot from Seattle residents with not many short term gains. Also very disappointed nothing planned for Central district / Madison Valley area.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Ballard and west Seattle projects should be top priority and completed as soon as possible. Seattle light rail should be below grade.
NORTH KING COUNTY	I think the light rail plans should be prioritized over buses.
NORTH KING COUNTY	Catch up! Moved here and can't believe the challenge of living here without a car. And driving a car here is a challenge of its own, not to mention the lack of street signs and parking. I don't understand why buses have to fight with cars in downtown Seattle for lane space. Why are the cars mixed in with the buses in the transportation corridor? Why do Sounder trains only run one-way and only during working commute hours? Why can't I travel on transit to Tacoma at regular intervals?
NORTH KING COUNTY	My "somewhat support" on question 12 is solely related to the timeline. 22 years is way too long for improvements in the Seattle core. Every possible avenue should be explored and plans modified to shorten that timeline by at least 5 years so that West Seattle comes on line in 15 years and Ballard in 17 years. By the time the system is scheduled to be finished, I will have helped pay for a system that I could never use to commute to work because I'll be retired.
NORTH KING COUNTY	FASTER FASTER FASTER!!!!!!! Great projects but can/should be built quicker. Also opposed to regressive sales tax as a source of funding.
NORTH KING COUNTY	Please make sure that the trains provide direct connections to the largest employers in the area. Plans that "almost" get to Boeing, for example, and rely on buses to finish the journey would be very short-sighted.
NORTH KING COUNTY	Please work on other tax and funding options to build this faster. 25 years is 30 years too late for Puget Sound to have comprehensive mass transit.
NORTH KING COUNTY	It seems strange that if we expect the growth to be significant in the aseattle metro area we are prioritizing the projects for those areas first. I rarely use the current system we have from Crown Hill to South Lake Union because of its unreliability, time it takes and overly crowded busses. 23 years for that to happen seems ridiculous, especially with the amount of growth projected just in the next 5 years. There is an immediate need to improvements the current bus system for the interim if any of the future projects are to be successful as we are already seeing gridlock with the amount of people we have in the city. How is the current and very near future issues going to be addressed. It is super important that we as a city are looking at the long term, but we also need plans for the interim.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>If are doing this to reduce traffic and to slow global warming and fossil fuel use, it seems like waiting 25 years for it to be done might be too little, too late. The proposed plan to fund ST3 with a slow trickle of tax money seems to be at the root of the lengthy timelines. Can we possibly move this forward at WWII/Manhattan Project/Google speed? Perhaps there's a way to get a large infusion of cash upfront to jumpstart these projects. Could we, for instance, issue bonds to fund it, or borrow the money from the Gates Foundation, and pay the money back later from taxes? There is a lot of financial know-how in the Seattle area; some folks who know these things may well help with this project as a donation.</p> <p>It also seems that getting it up and moving ASAP, will create more much-needed construction and blue-collar jobs for the region. I am willing to help with this. [name, address] South Seattle</p>
NORTH KING COUNTY	<p>22 years to get something done in Ballard? Great, I might still be alive when this train makes its first run.</p> <p>Please take a look at the boom going on in Ballard and re-think the order of the projects. I'm tired of paying for transit improvements that do nothing to help the area where I live. Seattle is fast becoming a city where, due to poor planning and way too many new condos and apartments slammed into a neighborhood, you simply cannot get from point A to point B unless it's either 10am on a weekday or first thing Sunday morning. AND the city just keeps approving the projects with NO CORRESPONDING improvements to infrastructure until YEARS after when they are needed. Stop growing Ballard until transit, infrastructure, policing presence are caught up to the population demand!</p>
NORTH KING COUNTY	<p>The timeline for ALL projects is TOO LONG! Ballard has seen tremendous growth in the past 5 years and is significantly underserved by transit. Light rail is needed RIGHT NOW! I will only support a plan that gets light rail to Ballard in 10 years. Any plan that has a timeline longer than 10 years will get a NO vote from me!</p>
NORTH KING COUNTY	<p>The time line should be re-ordered to include the Ballard and West Seattle extensions first. Deal with the inner city commuters first, and do not prioritize folks that live outside of the City. Currently, it takes longer to commute from Columbia City to Ballard than it does to commute from Everett to Ballard. We pay substantially more money to live in the City and transit packages should not encourage moving outside of the City and contributing to sprawl. Provide transit to support the fast-paced urban growth!</p>
NORTH KING COUNTY	<p>Ballard and west seattle light rail additions should be expedited to the shortest completion time frame. This gives as a fully functioning transit system within the city of Seattle allowing for increase in density that is happening / critical to the city's success.</p>
NORTH KING COUNTY	<p>The proposed timelines are extremely slow. Please investigate ways to reduce time to completion.</p>
NORTH KING COUNTY	<p>Given the rapid high density growth in Ballard it is ridiculous to wait that long for the Ballard line. Ridership would be high in this area.</p>
NORTH KING COUNTY	<p>I will not support any project where the funding comes from an increase to current sales tax.</p>
NORTH KING COUNTY	<p>Too little too late... Make Seattle world class in transit now! Then expand beyond Seattle</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I would like to see the timelines shortened for light rail to Tacoma , Everett, west Seattle ,and Ballard.
NORTH KING COUNTY	It is not clear to me why some of these projects take so long. I would like more information on that. My overall feeling is that we should be doing this a whole lot faster than we are. Is the length of time because of funding limitations? Because of land acquisition? Because of drilling tunnels?
NORTH KING COUNTY	This has to be completed much sooner, we are already decades behind where our mass transit should be. I strongly support a higher tax if it means the projects can be completed in a timely fashion.
NORTH KING COUNTY	I think these should be prioritized to relieve I5 congestion in particular.
NORTH KING COUNTY	<ol style="list-style-type: none"> <li>1. Address communities that actually use and will use public transportation FIRST. Take care of the city first and then move outward. Seattle residents pay higher taxes to live closer in and should not have worse commutes than someone who chooses to live in Everett.</li> <li>2. Look to major corporations for extra financial support considering it is they who are responsible for the drastic increase in traffic, such as Amazon.</li> <li>3. Offer major businesses "light rail stops" that are named after/themed after/advertise them in exchange for greater financial responsibility/support to make this plan come to fruition when we need it ...NOW. The traffic in 8-17 years from now will be horrific.</li> <li>4. Utilize waterways: more pedestrian ferries from a.) Ballard-Fremont-S. Lake Union. B.)shoreline-Ballard-downtown-west seattle</li> </ol>
NORTH KING COUNTY	22 years to connect Ballard to Downtown is waaay too long. Ridership will be huge compared to other lines and this should be completed more quickly.
NORTH KING COUNTY	Ballard Light rail would transport more riders per day than any other. It should be first. Completion timelines should reflect ridership.
NORTH KING COUNTY	Ballard needs to move way forward in your timeline. The northwest part of Seattle is consistently neglected by transit authorities in favor of the UW and south and east Seattle. The buses to/from Ballard and Fremont are a joke. Always packed in like sardines. Almost always late. Almost always stuck in traffic including trying to cross the ship canal. In other words, buses serving the northwest part of the city are extremely unreliable. Rapid buses are ridiculous. The "E" line was a waste of money. No different from the old "regular" metro ride. Light rail is the solution; not buses. I will not vote for this plan if it spends money on bus rapid transit (deceptive name) before building light rail to Ballard. Also, property taxes are way to high. You need to tap into businesses more than this plan sets forth, not the common homeowner who is struggling to keep up with our skyrocketing property taxes.
NORTH KING COUNTY	I believe an effort should be made to obtain additional federal resources to complete the ST3 plan sooner. It is needed urgently in the face on tremendous growth in the area.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Two things - 1) Include an efficiency study of CURRENT transit operations and financials. This would ensure operations are as efficient and cost effective as possible going forward BEFORE the system becomes larger and more complex. 2) The public should not be footing the entire bill here, nor need we be. Brainstorm AND ask for public input on creative funding ideas. For example, advertising on buses and trains and at stations, train cars named after big donors... I'm sure there are lots of fabulous, innovative ideas out there. This would actually increase public awareness and involvement!
NORTH KING COUNTY	the sooner the better, please lets get this done.
NORTH KING COUNTY	Meeting the last generation's needs a generation from now is unacceptably long. This needs to be sped up, particularly in Seattle. I would rather say no to something too slow and get a better plan next year than accept a multi-decade timeline.
NORTH KING COUNTY	Way too long to support at the ballot box. Unless the West Seattle Link project can be completed and ready for use in less than 10 years this is a NO vote. The time to develop is simply too long for the investment.
NORTH KING COUNTY	This is a ridiculously slow plan. We're gridlocked now. You can move a lot of people who are already bought into mass transit by giving them the opportunity. Focus on walking, biking, busing, then get going on the light rail. You don't have much with regard to supporting movement from west to east on the Seattle side. Seems impossible to get from Ballard to UW to get on the train. Seems impossible to get from Ballard to Renton.
NORTH KING COUNTY	Focus on Link Light rail reaching industrial commuter centers earlier than the proposed schedule. For example, reaching Redmond for Microsoft employees and Paine Field for Boeing employees.
NORTH KING COUNTY	This should not take 25 years especially for areas that are now hampered for rapid transit such as Ballard.
NORTH KING COUNTY	The project completion timelines are TOO LONG! We need to adjust the plan to expedite the implementation .....
NORTH KING COUNTY	Ballard , West Seattle and 130th should be first priority
NORTH KING COUNTY	20 years from now, when the population is already increased by 1 million, seems like a long time out for implementation. As a Ballard resident I can't imagine waiting 22 years for light rail.
NORTH KING COUNTY	I believe the West Seattle and Ballard Light Rail should come on line sooner than the proposed dates.
NORTH KING COUNTY	The timeline for Ballard is MUCH too long.
NORTH KING COUNTY	We should have started the light rail projects 20-30 years ago! We desperately need light rail in the area, and I am in support of any measure that takes pressure off our already jammed highways and gets us moving on the rails.
NORTH KING COUNTY	With continued demand for in-city living, light rail to West Seattle in 17 years and light rail to Ballard in 22 years is a ridiculously long timeline.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I'm concerned the current timeline doesn't account for increased population in the next 25 years. While these projects clearly take planning and time, it seems that the timeline should be accelerated or that the plan should be more comprehensive to account for those changes.
NORTH KING COUNTY	Ballard is exploding! Each condo probably reflects 2 cars. I don't know where those people work, but I suspect fast rail service to downtown and South Lake Union would be popular and successful TODAY, and way too late in 22 years!
NORTH KING COUNTY	Would prioritize parking at existing lightrail stops to maximize utilization as project expands.
NORTH KING COUNTY	As a Ballard resident it seems absolutely ridiculous to wait 22 years for light rail to reach my neighborhood. Paying \$200 per year extra for something that is so far in the future is not ideal. I would pay more per month in order to speed up the timeline. I have read that it is a money issue not a construction issue that is dictating the time line. If there was a way to raise the money more quickly I would be in support of that. That said even if the project timeline is not pushed up I will still vote for it because I think it is important for Seattle to improve mass transit and it is an investment for my future.
NORTH KING COUNTY	Let's complete the streetcar extension along Broadway and connect SLU with Broadway along First Ave. Outside of Ballard and West Seattle, what does the Sound project do for the rest of Seattle.
NORTH KING COUNTY	The wait is too long for light rail to Ballard. We need it now. I don't understand why projects can't be built concurrently and/or faster.
NORTH KING COUNTY	West Seattle light rail should be a very high priority with as short-as-possible completion date. West Seattle has been neglected and ever since Hwy 99 and the Viaduct replacement were started the time has more than doubled to get downtown. Light rail would help alleviate traffic congestion.
NORTH KING COUNTY	<p>I realize all this stuff takes time but there are things that could happen sooner rather than later. Any amendments to the existing service that could be implemented immediately should be pushed. (like shoulder bus lanes and enhanced scheduling) Living in Seattle without a car, as I do, requires a huge time investment just getting from point A to point B. With varying degrees of reliability and efficiency. A 30 minute doctor's appointment shouldn't be bookended by a 90 minute commute each way. While some corridors run pretty much on time a lot of the posted schedules are laughable (I'm talking to YOU #40) Overcrowding is a huge issue and late running buses exacerbate the problem. Having larger capacity buses on busy routes would help. I have often squeezed on to some already overcrowded bus because, while there may be another half empty one right behind it, there's no guarantee of that. I might just as easily end up standing on a street corner in the rain for another 30 minutes or more. I'm really tired of standing in the aisle clutching my groceries and hoping I don't fall on anyone while some teenage lout sits in a seat staring at his phone. (OK, I know there's nothing you can do about rudeness)</p> <p>I also think some alternative funding options need to be considered. As a homeowner, my property taxes keep going up and up and, while I don't begrudge having money spent on transit, Seattle has a huge population of renters who's contribution is filtered through their landlords and aren't paying anywhere near an equal share.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I will always vote for expanding regional transit. But I'm very concerned about the long timelines involved in this plan. It may be a difficult sell to convince people to pay a lot of money for something that they may die, retire, or move before they are able to use it. I would suggest being prepared to message why it will take so long to build these improvements, and to investigate any options that may allow timelines to be shortened.
NORTH KING COUNTY	The mayor of Seattle has targeted Ballard as a high density housing area (HALA plan). Every time a small, single family house is torn down, it is replaced with an apartment building that houses between 6 and 8 families. Ballard is already at capacity for street parking, and there are new projects are built everyday without parking. Yet residents of Ballard still need cars because bus service in Ballard does not have the capacity to support this increase ridership, nor is it convenient to reach anywhere outside of Ballard. Traveling to the airport is difficult, and even reaching relatively close destinations like UW campus or downtown can take twice as long by bus during rush hour. Areas like Wallingford and Ballard rely on 45th/Market St as a main thoroughfare and to reach major north-south routes like 15th and I-5, these roads will continue to be bottlenecks, even if conditions improve on major north-south routes, if riders first have to bus to another route (e.g. busing to the light rail). It is frustrating as a resident of Ballard, who will have to pay for my fair share of the ST3, that the only part of the project designed to relieve traffic in my area won't be built for another two decades. Traffic in Ballard is already bad, and the gridlock will intolerable by the time any projects that reach Ballard are built. While I am sure this cannot be the case, the ST3 plan seems to be designed without regard for the mayor's HALA plan.
NORTH KING COUNTY	Has a study ever been done on the use of the people outside of King County that use Sound Transit? Are their taxes going up as well? IT seems that most people I see are not from City of Seattle and King County and they use the Sound Transit and don't have the property taxes to help support Sound Transit. IF other counties contributed, our City of Seattle and King County taxes wouldn't be so high
NORTH KING COUNTY	The projects and funding should be broken down into individual or 2 - 3 projects. Asking me to support the number of projects and completion dates that are so far in the future will NOT gain my support or vote.  Projects MUST have a quicker and sooner completion schedule in order to gain my support and vote.
NORTH KING COUNTY	The light rail from West Seattle to Downtown Seattle and the light rail from Bellevue to Redmond/Overlake Transit Center should be prioritized and completed far before the 17 year project completion time currently proposed.
NORTH KING COUNTY	22 years to add the Ballard light rail? What's the point? Hopefully we'll be retired by then. Whatever.
NORTH KING COUNTY	I'm sure that I have no idea how much is involved in getting these projects completed, but 22 years seems a long time to wait for the light rail connection that is *closest* to downtown. I would more strongly support a plan that prioritizes Ballard over Redmond or Federal Way.
NORTH KING COUNTY	Light-rail within the city should be prioritized. Having a 17 year and 22 year time horizon for light rail coming to West Seattle and Ballard seems too long. The city is the epicenter of transit problems, and should be focused on first.
NORTH KING COUNTY	Please do this faster if at all possible.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Growth in areas surrounding Seattle is occurring very rapidly, as well as growth within the city. Traffic is gridlocked, and mass transit is not keeping up with density as it is increasing. Existing property taxes are already very high, and yet, to improve the situation only homeowners are asked to increase their taxes, why aren't corporations or others benefitting and contributing to the growth of the city helping with the expansion of the transit situation? Trolley's sharing the road with cars going about 1 mile like the SLUT and the one on First Hill don't seem practical. As a 21 year resident of Seattle, it is extremely disappointing to watch an unfettered growth with little preparation regarding transit. The growth is now, the timeline 25 years? Really? That's the best we can do?
NORTH KING COUNTY	I would strongly support spending *more* money to have these plans happen faster. Especially the light rail to Ballard. If you could cut the time in half by doubling the budget, I would vote Yes for sure. As it is, I'll nearly be retired by the time I could actually use this.
NORTH KING COUNTY	Projects within Seattle neighborhood should be completed sooner < 10 years
NORTH KING COUNTY	I am a senior of low income and rely on the busses for transportation all over the city. I am appreciative of improvements elsewhere in the city, but we who live in West Seattle do not understand how long and complex getting to and fro areas right in our community is!  We should not have to wait as long as we do, with the transfers we have to, to get for instance from the Fauntleroy area to Alki, or to the Admiral areas of our community. It is far quicker to bus downtown or Capitol Hill than it is for us to travel within our own community--those of us who are disabled seniors in particular have to forgo walks along Alki, shopping in Admiral, et cetera, because of the transfers and length of time to enjoy these areas. The C line now no longer goes to Ballard or to the Seattle Center for instance, areas we enjoyed bussing to on the C line. We wish after living so many years in this community that traveling within it was less of a hassle.
NORTH KING COUNTY	We cannot afford to wait 25 years. Ballard in 22 years? West Seattle in 17 years? That is ridiculous. Please speed it up considerably and GET IT DONE.
NORTH KING COUNTY	I think you have to speed this project way up!! 20 years until Ballard is online??!! You have to go faster. Northgate too. It seems to that you could put some people to work and get this thing done!
NORTH KING COUNTY	Get this done sooner so I can enjoy it before I'm an old, old man. In China, for example, it doesn't take so long to get these things done. There's too much red tape, environmental impact studies, permits, town hall meeting, approval processes, etc.
NORTH KING COUNTY	I think you should definitely prioritize further development of Sounder trains. Light rail is great, but from Tacoma-Seattle or Everett-Seattle, it would take forever. Sounder trains are way more efficient. And also, generally speaking, I hope that as the network expands, you consider putting express light rail lines into effect. Especially at some of the current southern stops, there aren't a lot of people getting on or off, and it would speed things up if the only every other train stopped there. Stadium and Sodo are usually pretty deserted.
NORTH KING COUNTY	We would love for the West Seattle area to be finished sooner. Traffic is getting worse with all the new buildings and people moving in. I would use public transit if we had rail.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Focus on getting around Seattle without cars, then on handling the perimeter areas.
NORTH KING COUNTY	25 years seems like too long a timeline. Sorry - but Dubai put up the world's tallest building in 3 years. It took us over a decade to rebuilt the World Trade Center site. We need larger investments in state and federal infrastructure now - so that this 25 yr project could be achieved in a decade. It's not impossible - just a matter of will and resources.
NORTH KING COUNTY	I like the overall plan and goals of ST3, however, I am concerned with the length of time it will take for these projects to be completed, especially the ones concerning West Seattle and Ballard. I live in West Seattle and take the bus to work in SODO. Even with the bus, the commute is made much longer due to tons of traffic on the West Seattle Bridge. West Seattle is continuing to build more and more dense apartments and housing, but there is seemingly no urgency to accommodate the increase in traffic to an already heavy traffic burdened area. Please consider shifting the focus of building light rail to West Seattle and Ballard before the projects to areas outside of Seattle. Thank you.
NORTH KING COUNTY	Like many people, I believe this plan is too late, and should have built starting in the 1970's. Something needs to be done (with imminent domain law exceptions, exemptions from environmental studies, etc) to speed this up. Property taxes need to have a tiered structure, and luxury car vehicles over \$40,000 should have a penalty tax, so that the rich pay even more to increase the ST3 available budget faster. It should not take 25 years to do this. 15 maybe, given the tunnels to some areas, but 25 is too slow.
NORTH KING COUNTY	This initiative is the right degree of proactivity at just about the right time. The reliance on automobiles is outrageous in metro Seattle and this draft plan presents many viable, sustainable and scaleable solutions for our future.  Please continue to keep pedestrian/cycling traffic within the scope of your work, many of us in my community ride/run to work or to downtown regularly!
NORTH KING COUNTY	Anything you can do to speed up service and speed up development of new transit projects would be great
NORTH KING COUNTY	Ballard light rail is needed in less than 22 years, preferably in less then 15 years.
NORTH KING COUNTY	Most would well like to have an expedited ST3 build out. There are structural limits to how quickly SDT3 can be built, but here's hoping ST will build on recent success and find ways to shorten the rollout of new service.
NORTH KING COUNTY	We need mass transit a lot faster than is indicated here. Vancouver, BC built a light rail line to Richmond in two years for the Olympics, including bridges over waterways and elevated stations. Why is this taking so long? We must do better.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>I think the Ballard line is the most important because of the increasing density there and challenges getting downtown or to I-5 area from there. West Seattle would be the second most important in my mind. I live in NE Seattle and already I'm feeling the positive impact of the new Husky Stadium station.</p> <p>I think one or both parts of the Kent/Des Moines sections could be removed to save money for other components, because heavy rail supports this area somewhat and with additional parking at light rail stations closer to the airport and Tacoma, people have options.</p>
NORTH KING COUNTY	<p>Light rail timeline is WAY too long. Needs to be all complete in 10 years, not 25!</p>
NORTH KING COUNTY	<p>The timelines are rather ridiculous. By the time the BRT comes online, I hope to have a job closer to home. This commute from Tukwila to Kirkland is getting to be too much, especially with the Toll lanes on 405. That just made things worse for those who can't afford the luxury of paying the toll.</p>
NORTH KING COUNTY	<p>All should be done faster!! Agressively adding housing to the inner core of the city, and adding transit options in 22 years is crazy--we voted repeatedly for transit (monorail) when it would have helped, we are so far behind now, we need to step it up!</p>
NORTH KING COUNTY	<p>I don't commute from outside the city, so I can't really comment on improving everyone's commute. However, if the city is going to keep encouraging large businesses to locate within the city, shouldn't they be responsible for helping pay for their commuters and all the problems they're causing (especially along the Mercer corridor)?</p> <p>I'm more interested in improving transportation within the city. A system that always has to route through downtown first doesn't make sense. We need more transportation between neighborhoods. There's not enough transportation (and it takes at least 3 times as long as by car), yet there are expensive parking meters everywhere, even in some of the smallest neighborhoods. It's killing the small businesses, and encouraging only chains (and way too many banks), which completely ruins the personality and the charm of these areas.</p> <p>Also, this timeline is useless, as it would take too long to get anyone moving, which we need now and within the next 5 years -- projecting out that long seems pointless. Things will be completely different by then. So it's not the price that I'm worried about; it's the plan which isn't adding transportation that improves the city.</p>
NORTH KING COUNTY	<p>Light rail or subways need to be in place much faster than the proposed timelines. Seattle alone is growing 1,000+ people monthly...there is no way plans that are 10-25 years away are going to help the problem right now, and the slow pace will keep roads gridlocked for longer and longer times during each day. Sound Transit also needs to start the process of Eminent Domain...government in Puget Sound is so worried about pissing people off, getting re-elected, and/or lawsuits, rather than forcing people to relocate and seizing their property for the better good...this has to be done once and for all. This is a big reason why no good mass transit train system is in place to this day, as government has no backbone and they let the citizens fight to the bitter end as they don't want it "in my backyard."</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Not sure why Ballard and west Seattle are last. They should be first.
NORTH KING COUNTY	I STRONGLY support the \$50 Billion investment. I STRONGLY support nearly all of the proposed routes. But I strongly OPPOSE the 25 year timeline. We needed this transit 30 years ago. We can't wait another 25 years to have this system. We need it in 10 years. TEN YEARS!!  Go big Sound Transit! Make it happen! Have a transformative vision! Don't settle for mediocre investment! With 1 million more people moving to Puget Sound in the next 25 years if we don't complete ST3 until then, it will be immediately overcapacity on opening day.  TEN YEARS! Complete ST3 FAST!
NORTH KING COUNTY	Ballard and West Seattle should be finished more quickly. Twenty two years until a train gets to Ballard? That's ridiculous. The whole plan is too slow with too much emphasis on bus service. Let's get a bit more aggressive with this.
NORTH KING COUNTY	The timelines are WAY TOO SLOW!! Traffic already is hideous, and the city council is packing into every neighborhood many more thousands of new residents. Without immediate improvements in public transportation, how in the hell are we supposed to get anywhere? How can we get to work? How can we go places for entertainment or shopping, or to see friends or play out doors? Wait for seven more years before any of the new transportation services are available at all?
NORTH KING COUNTY	needs to happen MUCH faster!!!
NORTH KING COUNTY	Extensions need to be completed much sooner. We can't wait decades for mass transit for Seattle below prioritizing extending beyond city limits.
NORTH KING COUNTY	Looking forward to using them
NORTH KING COUNTY	Taking 17 years to bring light rail stations to West Seattle is too long.
NORTH KING COUNTY	There should be somway to improve upon the deliverable timeline. Change the financing if necessary. Or lessen the number of projects. This measure is important but will lose at the ballot as written. I am a strong mass transit supporter leaning towards a no vote.
NORTH KING COUNTY	Should be done within 5 to 8 years and NOT 25 years. ST1 and 2 has taken TOO long to completed and should move quickly for ST3 with newer construction method, technology and management improvements to finish the project quicker than ST1 & ST2.
NORTH KING COUNTY	The masses that utilize Light rail are in Seattle. The congestion and Population growth in SEATTLE are making it nearly impossible to get around even in it's own communities of West Seattle and Ballard. I'd think that resolving these issues would be put on a plan in a timeframe to complete them sooner than 17 years out.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	traffic continues to be issues. not sure if it is holding good talent from moving into the city, but it should. this city should really lead the nation in clean and efficient mass transit, instead of all these folks just idling in their cars making smoke.
NORTH KING COUNTY	The timelines here are terrible. We can't afford to wait 8 years for better bus corridors nor 25 years for light rail completion. Other states/countries do these projects way faster--why can't we? It seems like too much is being committed to here due to trying to get larger regional support and spread the costs out, but instead we need to figure out ways to move quickly on the most substantial areas. Do less, and do it faster.
NORTH KING COUNTY	Projects affecting the intra-urban areas should be prioritized ahead of those affecting inter-urban routes. To do otherwise, when traffic is as bad in the Ballard-Downtown-West Seattle areas as it is, is ludicrous. I totally support doing something like this, but the priorities are upside-down. A disproportionate cost burden will be placed on Seattle residents, as appraised home values in the city are much higher than in Everett, Tacoma or Auburn, yet we have to wait 20+ years for light rail??? RIDICULOUS!! BTW, I noted that I only use mass transit a couple of times a year now - I used to use it regularly, until the only route that serves my neighborhood (28) got cut back to just a few hours a day & only on weekdays. Urban routes have been cut - other options should be offered to serve those areas before focusing on creating a new regional system.
NORTH KING COUNTY	The plans are too far out in the future for us to even consider. West Seattle is poorly served and Metro cut back on all bus service out here. To have to wait 17 years for some better options is worthless to us.
NORTH KING COUNTY	I'm not sure of the reasoning behind the timeline for the projects. The West Seattle Bridge will be a parking lot long before 17 years. The Eastside has far greater capacity on the roads at the moment than do West Seattle, Ballard, and other neighborhoods within the city. The Westside of the region, along the I-5 corridor, deserves just as much consideration as the Eastside, if not more. Therefore, prioritizing the Eastside projects above all others is not something I can wholly support. I cannot support a plan that puts everyone else second because the 405 project was so ill-conceived.
NORTH KING COUNTY	the Seattle light rail expansions need to happen sooner. Both Ballard and West Seattle are bottle necked and separated transit is needed to help relieve this pressure.
NORTH KING COUNTY	22 years is too long to wait for light rail to Ballard.
NORTH KING COUNTY	The projected completion plans of the various phases of the proposals are much too long. There is an urgent need NOW for improved transit around the entire Puget Sound area. I would be interested in how these time frames were determined, how the priorities of which areas to be completed first were determined, and whether these projected completion dates could be accelerated. (Dare I mention global warming? We all have to take the environmental impacts of continued auto traffic vs. mass transit seriously, for ourselves and future generations. Faster action is required.)

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Getting the projects completed sooner should be a focus. This region is ready for an expansion of mass transit. If we are to keep up with population and employment growth, mass transit projects have to come on line in a timely manner.
NORTH KING COUNTY	The timeline is ridiculously slow and misses the point entirely -- we need solutions NOW!!! Follow leaders in states like California who have had a comprehensive transportation plan and budget for years. Local officials along with Sound Transit have been complicit in hiding the facts -- the need and total cost for these critical transportation projects -- from ALL the stakeholders for decades. This is a good start, but the timeline needs to be dramatically reduced. In summary, the current ST3 Draft Plan is unacceptable to me with the timelines as they are currently proposed. This is why I am Strongly Opposed to Question 12 above.
NORTH KING COUNTY	Have two separate experts/entities submit project completion timelines with rationales focusing on factors that could interfere. Having only one timeline is too often way off the mark and I think voters simply don't trust outcome data. The outcome data that is more accurate could then be used during the next phase based on having demonstrated competence.
NORTH KING COUNTY	I wish it would happen faster. There is a problem now.
NORTH KING COUNTY	Every transit project that I am aware of is completed late and over budget. According to the Seattle Times the cost the public is given to vote on is deliberately low to increase the chances of approval.  So- how can you possibly determine a cost estimate and construction schedule that spans 20+ years? No one knows how much costs may increase over that time frame, or even if the materials etc needed will be available during that time period. I strongly expect that every year or so you will be coming to us for more money.  You have bitten off way more than you can chew. There also is no history of reliability. Therefore I will vote no. On a purely selfish note, none of this does anything for those of us living near Alki or in North Admiral. I have to walk, 1.5 miles to the C rapid ride bus. I can do that easily but it does add close to an hour (round trip) to my trip downtown.
NORTH KING COUNTY	We need options for west seattle now, not in 12 years. 12 years is a ridiculous amount of time for a project like this, sorry.
NORTH KING COUNTY	Would like to see focus on North corridor to Everett, being many Boeing employees are present, a long 20+ wait for that rail is absolutely preposterous, seems like priorities and planning are mixed up.
NORTH KING COUNTY	The light rail to the U-District needs to be completed ASAP, the UW Stadium is too far from everything and the busses run terribly in this area now.
NORTH KING COUNTY	While regional traffic is important, the timelines for in-Seattle transit are much too long. We must have Ballard and West Seattle online faster than the plan allows.
NORTH KING COUNTY	Please accelerate the plan. 20 years is too long to relieve existing congestion, even before considering the growth expected.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I'm in favor for anything other than expanded services to cyclists. THOSE FREELoading [explicit] don't pay for ANYTHING!!!!!!!!!!!!!!!!!!!!!! [explicit] THEM!@!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
NORTH KING COUNTY	Ballard line in 25yrs will be pointless to us as we will definitely not be living in our current location by then. This means we are paying taxes in those years and get nothing in return.
NORTH KING COUNTY	The light rail projects between capital hill and the u-district came in under budget and quicker than expected. If this was the case for future projects that sound transit does how would they insure that the people paying for these transit options get their \$\$ back? If there is a tax that goes into affect and lasts for 20+ years but these projects finish in 18 years how do I know I'm not getting screwed?
NORTH KING COUNTY	Light rail to West Seattle and Ballard in 17-22 years is a little hard to take. Is this really the earliest that can happen? I am not confident that the tunnel will be done by then (or ever) either.
NORTH KING COUNTY	I think most people recognize the need for better mass transit, and are eager for these projects to be completely more quickly and might be wondering why the light rail is going to one area vs another. As a layperson, it's not clear why this plan and timeline became the draft plan. More information about why certain areas were chosen for the light rail vs others would clarify this. I've seen a few people mention Renton missing out on the light rail. For the timelines, it would also be helpful to know what the limiting factor is on the times.
NORTH KING COUNTY	People are impatient; the projects should be sped up. I watched the Los Angeles light rail construction--it's taken 30 years, but it was worth it. So, I can support the current time goals, but I think the overall project would be more successful if it could be done faster.
NORTH KING COUNTY	I don't know how, but the timelines need to come down ... 22 years until light rail to Ballard .... The population growth will bring the city to a standstill long before that...
NORTH KING COUNTY	25 years is about three times too long for a reasonable timeline. By that date, traffic will already have killed our metro region and made it an unlivable place. How feasible is an eight or ten year plan that covers the same extensive infrastructure projects?
NORTH KING COUNTY	Priorities are reversed. The core Ballard and West Seattle (stops closer to downtown) should be completed first.
NORTH KING COUNTY	The timeline for accomplishing these improvements is too conservative. Please find ways to accelerate the schedule because we cannot wait 15-25 years for an improved mass transit system if the region keeps up its current growth rate.
NORTH KING COUNTY	Lightrail to Lynnwood should be a much higher priority and the timeframe for delivery shortened.
NORTH KING COUNTY	I believe the phases should be adjusted so that the Seattle projects are weighted with the highest priority and the timeline should be shortened. I also believe light rail should be weighted more heavily than bus service and will be a more effective, long-term transit solution.
NORTH KING COUNTY	It's all important because it all should have happened 50 years ago! We are continuously behind and having to play catch up instead of developing our transit system ahead of the population. By the time all of this comes online it will already be obsolete. But at least we are now trying. Thank you.

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Would be great to have this done sooner
NORTH KING COUNTY	All this should have been done 20 years ago. Get on with it.
NORTH KING COUNTY	Please, please find a way to shorten the timeline for these projects. We can't wait 17-22 years for light rail to Ballard and West Seattle. We need it now, or in five years at the latest. Please try to find a way to get this done ASAP. Maybe there's some creative way around this. I'm sure you've thought of this, but 20 years is too long to wait. Please!
NORTH KING COUNTY	Faster development
NORTH KING COUNTY	Light rail to Ballard in 25 years is crazy. I live 6 miles from my work and it takes 40 minutes by express bus to get there. Because of the re-zone of Ballard a decade ago for the monorail that never happened, density in this part of Seattle is extremely high. It will be nearly impossible to get anywhere from here soon.
NORTH KING COUNTY	How can it possibly take 22 years to build a line to Ballard?
NORTH KING COUNTY	I strongly support the expansion of all light rail projects within the I-5 corridor, but the projected timeline is not soon enough. Transportation in Seattle has become a crisis as a result of decades of neglect. A direct and continuous line from Tacoma to Everett needs to be an absolute priority over everything else.
NORTH KING COUNTY	Additional revenues should be researched to speed up these timelines and add additional services. The Puget Sound population is growing so rapidly that by the time these projects are completed, demand will far exceed what the system can provide. Our cities will be gridlocked if we do not provide adequate public transportation to meet future demands. That being said, I applaud everyone involved with the current proposals and look forward to seeing more improvements.
NORTH KING COUNTY	Project timelines are ridiculously slow. There is a well known axiom that for building projects that you cannot do things quickly, well and cheaply but you can pick 2 of these. ST3 seems to be picking 1 (doing it well). The combination of expense and slow speed is unacceptable. ST needs to get its finger out and do this in 10 years, not 25
NORTH KING COUNTY	With more people moving into the Greater Seattle Area every day, the projected completion timelines will not solve the transportation issue. By the time that we have finished these projects with the current timeline, we will have new and greater issues with population and transportation in the region. The drafted plans are the solutions that Seattle needs now, but it may not be the solution that an even more heavily populated area will need then.
NORTH KING COUNTY	Ballard and West Seattle are currently underserved by transit and in general it is difficult to move east-west around Seattle. Light rail to/from Ballard, West Seattle, and Bellvue/Redmond should be prioritized. At the rate Seattle is growing, completing light rail projects in 20+ years is too long - we need them now.
NORTH KING COUNTY	Ballard cannot wait 22 years for this plan!

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>The rate of implementation of light rail is pathetically slow. Light rail is the only important thing in the plan, particularly Ballard to downtown. 22 years to get this going is an eternity. That should be completed in less than 12--yes, 12--and the light rail to West Seattle? No one cares about West Seattle. No jobs are there; no one commutes there. That should be replaced by light rail from Ballard to UW, also implemented within 12 years.</p> <p>Seattle's geography lends itself to easier travel North-South, with I-5, highway 99, and a variety of main streets in the city acting as North-South thoroughfares. However, traffic bottlenecks going East-West, particularly Ballard to UW, where so many people both (1) live and (2) work. If we want transit to be MOST efficient, put it where it's most needed: Ballard to downtown and Ballard to UW. Don't throw toys at West Seattle and all these suburban communities just to try to get votes. Give Seattle what it needs and enough people here will vote for it. Also, it's important to get it done ASAP so that the people voting for it can actually look forward to it and reap the rewards. There's no way I'm voting for something that implements the most critical light rail projects within 20+ years. 12 years should be the max. Thus, I strongly oppose the current draft plan, but would love to be able to get behind a plan that takes efficiency and rate of implementation seriously.</p>
NORTH KING COUNTY	How can we speed up the implementation?
NORTH KING COUNTY	Do it all quicker.
NORTH KING COUNTY	Why is this taking so long? There seems to be no urgency to this timetable. It seems focused on providing Light Rail service to me least populated areas that wanted the least, and neglecting the densest areas at the core.
NORTH KING COUNTY	I know ST must serve all regions and not just Seattle, but in terms of density the Ballard and West Seattle light rail projects are the most critical and should be prioritized.
NORTH KING COUNTY	Light rail transit should be prioritized in Seattle, especially east/west travel. If I were to prioritize project completion timelines, I would build an east/west light rail corridor between Ballard and UW first. I'm must less interested in expanding transit service outside of Seattle city limits, and want to see more light rail that connects all Seattle neighborhoods.
NORTH KING COUNTY	If possible, it would be nice to have this built faster. Currently I live in Wallingford and I won't be able to take the light rail from Ballard until I'm 56. In my opinion that is too long to wait when we (my age group) has been wanting this for years.
NORTH KING COUNTY	I live in Ballard, so of course that's my priority. But the truth is that neighborhoods west of 99 and north of the canal are cut off from the rest of the city. There are a lot of competing priorities, but I don't understand why Ballard has to wait 22 years for light rail under this version of the plan. I may not even be alive by that point, so my support not as strong as it would otherwise be. The fact is that underground light rail should be the number one priority for all areas of the metro area. Plans involving more transit on the roads are bandaids (buses on the shoulder being the exception). The roads are clogged, and our lovely local geography places natural limits on how many roads cross bodies of water. Underground is the way to go. There's no reason to wait.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Prioritize Ballard-Downtown LRT and West Seattle-Downtown LRT, make UW-Ballard shovel-ready, prioritize Graham St. Station & 130th St. Station! Ideally, everything should be sped up, but Seattle needs to be especially prioritized for mobility and for votes.
NORTH KING COUNTY	It's outrageous that it should take this long to complete.
NORTH KING COUNTY	Projects in Seattle should come first. Seattle is by far the densest area of the Puget Sound region and has the most cars. Thus, the Seattle projects would have the biggest impact. Also due to its population and density, Seattle pays by far the most in tax revenues. I would support the ST3 draft plan more if the Seattle projects part of the plan were given overall priority.
NORTH KING COUNTY	Why does Ballard have to wait the longest? To me, it's the most urgently needed expansion. So many things can change, go wrong, increase in price in 22 years! By then, I will be an old lady, and my kids will have moved away!
NORTH KING COUNTY	The correlation between employment centers and cars on the road seems to have been missed in terms of timing. Lynnwood / Everett expansion needs to be much, much earlier on your proposed timeline. It seems all the south end projects come first, then the metro City and north. Please, please rethink this. Where there are jobs, there are cars. 20+ years is too far away.  Separately, focus, focus, focus on the light rail. Nothing will motivate me more to take public transportation than not having to sit in traffic. The fact that the light rail is a separate system is critically important. I have used it a couple of times to go to/from the airport. This is a spectacular service and I can't WAIT until you open Roosevelt and Northgate. More of this would be huge. Buses.... I'm still sitting in traffic and am slowed by the stops too. Not enough to get me out of my car.
NORTH KING COUNTY	17 years for light rail to West Seattle is a long time to wait! What can we do to move up the timeline?
NORTH KING COUNTY	As a resident of Queen Anne, I have biked to the University district in order to use light rail. I would strongly support moving the light rail expansion to Ballard up in the timeline.
NORTH KING COUNTY	The city is designated Ballard as a high growth area and that growth is adding thousands of new residents each year and massive construction is still underway. The traffic down 15th is so thick its diverting to other streets where possible. The current improvements of rapid ride, bike and pedestrian improvements are not keeping up. Given the bottle neck of bridges on 15th, Fremont,99.....the only possibility is some type of rail. I can currently bike to downtown just about as fast as car and faster than bus-door to door time. A second option is a dedicated bike trail/lane with no stops from ballard to downtown and ballard to fremont.
NORTH KING COUNTY	The timeline is just too long. I realize doing this faster means more taxes, which I am fine with. If we had a state income tax... but we don't. However, we do have a large new revenue source in the marijuana tax. We don't need to spend all that money convincing kids not to use it. We should change the revenue to add to the general fund so it can be allocated to all education, transit, and more important priorities.
NORTH KING COUNTY	Timelines to completion are too long.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>With the Seattle housing being impossible for normal people to afford (I'm an MA in a health center and I make 18/hr) people are moving much further north and south to be able to afford living without roommates. Seattle transit is unreliable, showing up some of the time and is always standing room only both to and from downtown. Expanding far north and south with adequate parking I feel is the most important part of the expansion project. With that being said any where that we can build it people will ride. This is not the Seattle of my childhood and there isn't enough road space for everyone anymore.</p> <p>*One more side note, Amazon, google and Facebook all have facilities in the SLU area. A lot of them use public transit and if its going to be 22 years before we are thinking of getting them a light rail I belive a rapid ride should be put in that area. Those buildings affect the SLU/freemont/ballard transit in the most awful way possible.</p>
NORTH KING COUNTY	<p>I appreciate the complexity and scope of ST3, but I am impatient. 22 years until the Ballard route is online? What obstacles keep us from pushing that to ten years, or less? I'm eager and will pay a premium for faster results. Thanks for all your work (and thanks too for creating such a user-friendly website).</p>
NORTH KING COUNTY	<p>22 years for the Ballard light rail sounds like a really long time, especially considering all the new apartment complexes, townhouses, apodments, and lack of parking.</p>
NORTH KING COUNTY	<p>Speed up the time line for building light rail and the parking garages. Build larger parking garages.</p>
NORTH KING COUNTY	<p>I think that any timeline for construction should include an assessment of the willingness/likelihood of the targeted population to use the service - I think the University Station has taught Sound Transit that if you build transit in an area where the populous wants to use it, then it will be used (unlike the experience at the southern end of the line thus far). The Ballard and West Seattle communities have already shown a longstanding yearning for mass transit (voting for a monorail repeatedly and filling up rapid ride buses to the brim). If Everett and Redmond current mass transit options look like this today, with added capacity like Ballard has experienced) then maybe they merit going early. But, if they are acting like most suburban residents and not doing so, then they should not be the priority. Additionally, most transit systems charge more for fares, the farther the distance from the destination - since the central Puget Sound is likely paying for this system disproportionately (due to higher gross sales and property values), it is only fair that Everett and Tacoma pay materially (not \$1) more for their fares to Seattle. Finally, if a community wishes to accelerate their planning timeline, then they should be able to tax themselves (property) to accelerate the funding mechanism (like a Metropolitan Improvement District) - and then towards the end of the bond period you can pay those MIDs back in property tax credits.</p>
NORTH KING COUNTY	<p>I know development takes a long time and we need to plan way into the future, but it's hard to get excited about something that doesn't promise more relief in the near future.</p>
NORTH KING COUNTY	<p>very sad that improvements to W. Seattle will come late- the density of this place has increased exponentially w/o transit keeping up. We are contemplating a move unfortunately- traffic impact to/from W. Seattle has become a quality of life issue. It's shameful that a city of this size/progressiveness is so lacking in transit/planning.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	West Seattle needs to move up on the priority list- its one of the commutes most highly impacted by the Viaduct/ Tunnel project. Serious consideration needs to be given to this, as 17 years is an unacceptable timeline for a community so close to downtown.
NORTH KING COUNTY	Move West Seattle light rail completion timeline to complete in 7 years.
NORTH KING COUNTY	Overall I highly support the need to expand rail service in the region, however the timeline is laughable. We are already 10 years behind the need for rail up the Downtown/Ballard corridor. With continued rapid growth to the north, Expedia moving to the old AmGen building space on 15th, and already terrible traffic congestion that link should be slated for completion as soon as possible - within 5 years at the most.
NORTH KING COUNTY	<p>I strongly support transit options. I don't have a car and use public transit every single day. I'm currently in my 30s and waiting until I'm in my 50s for these projects to be complete is way too long. We desperately need other sources of funding besides property taxes in order to get these projects done in a timely manner. Our regional area has way too many cars on the road, and traffic's only getting worse. In my opinion, businesses -- especially those like Amazon, Microsoft, Google, etc who bring in thousands more people to the city to work and live -- should be paying huge taxes going directly to transit for their impact on our environment.</p> <p>It's also ridiculous that there's no plan for lightrail East to West from Redmond to Ballard. Have you tried to commute from UW to Ballard recently? It's a nightmare and only getting worse. The huge neighborhoods of Wallingford, Phiney Ridge, Greenlake, Ballard, Crown Hill, etc. Each of those neighborhoods has over 12,000 people within half mile blocks, and without providing easy transit options, they will continue to drive their cars. Yesterday, I walked from Meridian in Wallingford to 9th in the U District and I beat the 44 on a Saturday early evening.</p> <p>Additionally, south Beacon Hill and Georgetown also are underserved.</p>
NORTH KING COUNTY	<p>Too much money has already been spent on Sounder (cost per rider is ridiculous)!</p> <p>Parking access to light rail is inadequate so it unusable especially by elderly, mothers with young children, handicapped etc. Poor planning.</p> <p>So much money spent on bike projects gives all transit projects a bad name (and justifiably so).</p> <p>No more money for poor planning.</p>
NORTH KING COUNTY	Sad that this plan will take decades to complete, but these decisions should have been made ten years ago, so might as well get started now.
NORTH KING COUNTY	The timelines are far too long. The need is urgent.
NORTH KING COUNTY	2033 is too long to wait for all transit projects to be completed. ST should prioritize getting light rail projects as soon as possible over spreading out the cost a bit.
NORTH KING COUNTY	The central core should be finished first. Traffic congestion and densification is rapidly occurring there. Property acquisition cost will increase faster in these active(densifying) areas.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Efforts should be made to accelerate the plan, amongst those I know there is strong support for the plan but the challenge in voting is the length of time til completion/utilization of the projects. Current Light Rail projects are ahead of schedule and under budget, shouldn't we estimate that ST projects will continue to be delivered improved timing?
NORTH KING COUNTY	I am in favor of a shorter timelines so that projects can be completed sooner.
NORTH KING COUNTY	We are nearing a crisis when it comes to the number of cars on the road. This timeline seems entirely too long.
NORTH KING COUNTY	<p>I strongly believe that the West Seattle and Ballard lines of light rail should be prioritized. Seattle is a city. Cities have light rail.</p> <p>While I support mass transit, generally, I DO NOT feel BRT is the solution. The C and D lines have not provided additional capacity. Rather, they have taken lanes of local traffic away in some of the fastest growing neighborhoods of Seattle.</p> <p>We need permanent light rail that has new, dedicated paths of travel that are separate from street traffic... and we need it yesterday!</p>
NORTH KING COUNTY	25 years is too long. I know we should have started all this about 40 years ago, but I'd be willing to pay higher taxes or consider other plans that would speed up the timeline. Mass transit won't be utilized by many of us until there's a option in place that will match or improve the time expense of our commute time by car - and even though traffic is terrible, I still don't see an option via mass transit to replace my commute from Crown Hill to Georgetown in less than 1 hour. As far as I can tell, only light rail will make mass transit a viable option for me, and at the current rate of construction I will be retired before I see this in place. By then, will the system even address the needs to our future city? When will be move beyond playing catch up?
NORTH KING COUNTY	The connections to West Seattle and Ballard should be moved up on the time line. Waiting 17 years is just not reasonable.
NORTH KING COUNTY	I wish I had more time to study this. I'm sure this has already been considered, but with the Bertha snafu and viaduct concerns, what impact will there be on not making light rail to West Seattle a higher priority? Maybe none, but I would like to have read more about some of those considerations.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I have not read through the entire draft yet but feel very strongly that adding parking to existing transit stations should be a huge priority that happens as quickly as possible. I'm working for a medium size company in SoDo that is relocating downtown to 5th and Pine. I split my commute between car/bus/bike, but the majority of our employees drive to work and now need to use transit, so there has been much discussion of how to make that transition. One of the biggest obstacles is not being able to get a parking spots at light rail stations. I think the population density is still low enough in the suburbs that we need to make sure there is enough parking at these stations, otherwise we're leaving out a huge segment of park and ride customers! I really feel that we should prioritize money for parking, so that customers who WOULD take light rail are not discouraged by the parking situation.
NORTH KING COUNTY	Timelines are too long. People love the Light Rail and it is finally getting people out of their cars. Cancel the tunnel and put the funds in to light rail.
NORTH KING COUNTY	Would like to see the Ballard and West Seattle Light Rail delivered more quickly. If Light Rail is not delivered for 22 years and 17 years respectively, then need to increase Express bus options to downtown and make rapid ride more rapid than regular bus routes. I'd like to know the Plan B to address commute time until light rail is in place.
NORTH KING COUNTY	Considering that I bought my Ballard home in 2002 with the anticipation that Seattle would be building the Monorail along 15th Ave NW by 2010, having to wait a total of 36 years to be served by any type of rail service is a pretty bitter pill to swallow. I live in the Ballard Urban Village that is seeing unprecedented population growth and residential construction with insufficient and unrealistic status quo zoning which does NOT provide the DENSITY necessary to address this growth. Having to wait 22 years for the transportation infrastructure catch up by near the end of my lifetime is disappointing, to say the least. I understand that ST is scrambling to play catch-up and that these are the consequences from previous generations of leaders/residents not supporting sufficient mass transportation. Given the community meetings that I have attended with my WA State legislators, my guess is that they are not going to be very sympathetic to the ST3 plan as it is currently constructed either. And as an opponent of the Alaskan Way Viaduct Replacement Project, it looks more and more like that is a loser that will do nothing but put a drag on the region's overall transportation strategy. Pulling the plug on that and rededicating its resources towards regional light rail and BRT would go a long ways in restoring my faith that local political leadership knows where to put our precious, limited resources.
NORTH KING COUNTY	The core development of Ballard means that we cannot afford to wait 20 years for light rail to nw Seattle/magnolia/north Queen Anne. Why are we not asking for more money from developers that are profiting enormously by adding density? Why can't employers like google amazon and Expedia who are drivin commutes to this same neighborhood being asked to help pay and speed up the timeline?
NORTH KING COUNTY	I wish it could happen sooner! I would love to take light rail around Seattle. The buses are ok, but they are often affected by traffic because they share the road with cars. 22 years until light rail service comes to Ballard!?! Oh my goodness. With all the development that is happening in this neighborhood, I'm surprised service to Ballard isn't a higher priority.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	"Urgent" projects should be completed within FIVE years, not eight. As in, #1 West Seattle to Downtown light rail . #2 Light Rail Downtown to Ballard, #3 Light Rail Downtown to Bellevue. And all urgent BRT should be completed within two years.
NORTH KING COUNTY	We need these things ASAP! The timeline is crazy slow. Getting anywhere in Seattle now is a [explicit]. I think that priority needs to be given to getting the urban mess under control before expanding suburban locations, even though that of course has to happen. Ballard, West Seattle, a station at 130th... those need to be the main priority. Again, ASAP.
NORTH KING COUNTY	25 years out is too long for many people. Is there any way to finance the project so that building can be completed much sooner, even if it's paid for over a long period of time?
NORTH KING COUNTY	I strongly support all transit development and have been supporting them for nearly a decade. WHY DO THEY TAKE SO LONG.
NORTH KING COUNTY	Not ambitious enough. Taking 22 years to get light rail to Ballard and West Seattle is absurd.  We should make the investment to get that accomplished in 5 years.
NORTH KING COUNTY	Branching out light rail service, especially to the east side, is a great idea. But, will proposed transit solutions for 17-25 years from now keep up with growth, development, and adaptation to future technological advances? Overall, the proposed plan looks like it is "too little too late" by the time it will all be finished. We will need a wider rail network that takes less time to get between the first and last stops on each line. For instance, I would not want to take the light rail from anywhere north of Northgate down to the airport because of all the stops it makes, except in peak rush hour.  Also, I strongly support any upgrades or increased service for the Sounder. If possible, please utilize Sounder trains throughout the day (and on weekends) instead of just during peak transit times.
NORTH KING COUNTY	Not enough background detail given to vote Yes for this. It's being rushed upon the voters with all type of cheerful, magical, hype. Can we go slower on this vote so people have a chance to try to make a logical choice about financing this plan. Why does it have to be on the ballot this Fall after we are already being loaded with extra property taxes generating levies.
NORTH KING COUNTY	There is no way I am going to vote for this with the present timeline. If the project is on time, and I am still alive, I will be 74 when it reaches West Seattle.
NORTH KING COUNTY	The timelines is much too slow. Why can't we hire some experts from Tokyo, Hong Kong, Shanghai, Singapore or other cities with highly efficient and complex public transportation systems, who have the skill set to get these projects done in the next 10 years?
NORTH KING COUNTY	BALLARD VIA QUEEN ANNE AND FREMONT ARE ESSENTIAL. These are huge residential neighborhoods with vibrant and dense urban destinations, large tourist attractions, and truly terrible traffic in the instance of games, concerts, rain, sun, sneezes, etc. Please prioritize these projects much sooner than 22 years. That's simply unacceptable.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	All of this is very exciting and very important. However, it needs to be better. 1) Find a way to finish these routes sooner; we already need them! 2) Find a way to pay for them that does make Washington's tax system an even more regressive tax system! It is very frustrating to want to support important transit but not want to make our taxes more regressive. 3) Please include a UW to Ballard light rail route - the 44 is awful.
NORTH KING COUNTY	Ballard needs this NOW. I won't even be around in 22 years. If I am, I'll be 90 and probably too old to care. Would love to see Ballard moved to the top of the list.
NORTH KING COUNTY	Ballard is on an extreme growth schedule and 22 years is way too long to wait for light rail.
NORTH KING COUNTY	ADD PARKING to rapid-ride bus stops. Also, the linkage to Interbay and Ballard are important to our family sooner than proposed.
NORTH KING COUNTY	22 year timeline to add light rail to Ballard is ridiculous. That is the most populous area and should have been included in the original plan to begin with. if i have to wait another 22 years, I am strongly against any added taxes for transit to much less populated areas such as Everett and south of Tacoma. All that does is promote urban spread - ie: Dallas, Houston, Detroit, etc. Serve the urban areas now.
NORTH KING COUNTY	I would order the priority of these projects this way  Under this plan, bus rapid transit (BRT) service on I-405 between Lynnwood, Bellevue and Renton would come online in eight years; light rail to West Seattle and Tacoma would be complete within 12 years, light rail to Lynnwood and Tukwila at Boeing access road in 17 years, and light rail to Everett and Issaquah in 20 light rail to Redmond and Federal Way would be complete within 22 years, light rail to Ballard 25 years
NORTH KING COUNTY	I strongly support public transit initiatives. I believe that expanding our light rail and bus system are very important initiatives. One additional initiative I'd like to see is the expansion of the bus system within Seattle, with the addition of more bus lines within the city. Many neighborhoods are underserved by the bus system because they have very few bus lines (if any). While it's great to be close to a transit hub, it can be even better to simply be a block or two away from a single bus stop.
NORTH KING COUNTY	Think about the current traffic conditions, the Pudget Sound Area is already at capacity and it's in desperate need of smart mass transit now. Consider the timelines and speed them up. The world will be a different place in 25 years!
NORTH KING COUNTY	I simply hope that those in charge of these projects are constantly searching for potential federal funding sources to speed up this development. We need these projects completed quickly
NORTH KING COUNTY	Prioritize core and low cost/ridership ratio.
NORTH KING COUNTY	This is one of the most urgent problems facing the Seattle metro area. As far as I'm concerned, we should be pouring money into finishing this project as soon as we can.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I strongly suggest that you speed up the completion date for the west seattle project and the balard project. I am almost 80 and thee two projects would not be completed in my life time. I own my home and the extra cost I would have to pay in taxes will not benefit me at all.
NORTH KING COUNTY	Rail is needed first and far sooner. We are already behind, way behind on this.
NORTH KING COUNTY	Without having data regarding population, population growth, commute times, and current usage of services such as the Sounder train, unfortunately, it is impossible to provide intelligent, informed answers to your questions. The fact that the mayor has allowed unchecked growth without a city planner or long term transportation plan is inexcusable as commutes are becoming worse daily. I commute West Seattle to Tacoma and am familiar with traffic patterns in the south sound and south end of Seattle. As the largest neighborhood in the city, I do think that prioritizing light rail to West Seattle would keep a lot of cars out of downtown, but it cannot be just the Alaska junction. Service needs to go south and connect to the airport. Anyone who has seen the development in Ballard would think the same of prioritizing Ballard service. The method of raising funds is of course key. I am all for light rail, but the whole region needs to pay for it. I am not going to vote to keep increasing my property tax and Seattle sales tax if Everett, Tacoma, Bellevue and any other area is not also contributing. Everyone needs to contribute, then I will vote for it. Same goes for businesses. I realize there is a chicken and egg issue, but Seattle is a desirable place to have a business and many of the businesses moving here can afford to pay a tax to support public transportation development and maintenance. Why hasn't that been mentioned? Also, I think there needs to be secure bike storage at all transit. And is it true there is no place for a car to drop off a passenger at Husky stadium to catch the light rail? If so, that is ridiculous. Who wouldn't take the train to the airport, but most people are going to want a ride to the station. We are not NY or DC. There aren't enough stations to think that everyone will walk or bike to the station yet. Please, be realistic. A one way, two lane drop off is needed at all stations. Well lighted parking. And it is all needed now. I have stopped going into Capitol Hill and downtown because traffic and parking are so bad. I'm willing to contribute, but I want to know that the whole region is contributing AND I don't want West Seattle to continue to be left out.
NORTH KING COUNTY	Prioritize expansion in areas of highest population density and growth: Ballard and West Seattle connections to downtown Seattle
NORTH KING COUNTY	Need this YESTERDAY. Would prefer more rail over buses, as long as they can stay out of traffic.
NORTH KING COUNTY	Need to find a way to compress the timeline.
NORTH KING COUNTY	Timelines don't address current needs soon enough. Several neighborhoods with reduced transit options or with pedestrian unfriendly hills not addressed by rail or bus routes (i.e. Eastlake)
NORTH KING COUNTY	They seem too long. 25 years is a long time.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Traffic congestion around Puget Sound has become markedly worse over the past 5 yrs. The region desperately needs improved public transit options on a faster time scale than the one proposed in ST3. Why will the proposed plan require decades to implement - this is not viable and will not be supported.
NORTH KING COUNTY	Light rail to West Seattle would not appear until 2017, and Ballard would not appear for 22 years. These timelines are unacceptably long. Adding light rail to Seattle is the single most important transit project that Seattle can undergo. The city is already clamoring for more reliable and grade-separated transit, and light rail is the only option in that direction. Please expedite these light rail projects as priorities 1 and 2 for Seattle.
NORTH KING COUNTY	As Ballard is an extremely hot neighborhood, it would be borderline insane to wait 22 years to put light rail there.
NORTH KING COUNTY	There must be a way to get these projects done faster. The commute to Ballard and surrounding neighborhoods, for example, is already too congested and more time-consuming than it should be, and with 22 more years of population growth and big businesses moving to/growing in Seattle before this light rail connection is finished, that congestion will be eventually be unbearable and detrimental to our city's quality of life. And if the light rail that is finished 22 years from now is NOT at a separate grade from the streets and subject to the raising and lowering of bridges over the Ship Canal, the outcome will be disappointing. To tie in with that, we need a better solution to the transit options in the Ballard-Fremont-Wallingford-UDistrict corridor. The fact that the next 25 years of Sound Transit funding only offers funding for studying future transit options (and not offering solutions) will likely turn off many voters.
NORTH KING COUNTY	Sooner is better. Every effort at simultaneous and complementary activity should be made. A plan with a shorter timeline would be an easier pill for the voting public to swallow.
NORTH KING COUNTY	Timeliness are out of order. Ballard and West Seattle need to be pushed ahead of some of the suburban plans given that most of the growth will happen within city limits and the current transit options are suboptimal for these areas.
NORTH KING COUNTY	The timelines are too long, making these great plans in danger of being "too little, too late". If population is growing as fast as predicted, this plan will likely not reduce congestion, and may not even keep up with growth.
NORTH KING COUNTY	Ballard is one of Seattle's fastest growing neighborhoods. At the same time bus routes to west Ballard have been cut in half. A reliable public transportation solution is needed now, not over 20 years from now.
NORTH KING COUNTY	I prefer that East side (Bellevue/Redmond) mobility should be completed secondary to mobility and projects on the west side of the lake.
NORTH KING COUNTY	Graham street must be completed in three years and this area must be a model for affordable transit oriented development. I cannot support this plan unless we added this major racial Equity issue on a timeframe that actually reflects that long delay already experienced by the community.
NORTH KING COUNTY	We need more light rail and transit options much more quickly than this plan offers. 22 years to a complete line to Ballard and the east side is crazy. We need these lines line in place as quickly as possible.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I think it is absolutely critical that we finish the West Seattle link in the shortest amount of time. The cost to construct is lower than Ballard and the time to finish is faster than Ballard. And this link has a large enough ridership to be contributing to the overall revenue very quickly. It just simply makes sense to have this link done first.
NORTH KING COUNTY	The faster the better!
NORTH KING COUNTY	Long overdue. Would like to see a faster timeline to complete this project.
NORTH KING COUNTY	This is too long to wait for the transit we need today. Tax us more and find additional funding or efficiencies.
NORTH KING COUNTY	The timeline for completion is too long. We need all of these improvements especially light rail expansion to come online much sooner. Every effort should be made to start all of the light rail projects as soon as possible. A 22 year plan is a little ridiculous. I'm 34 and I'll long retired before these projects are completed. This should be a 10 year plan.
NORTH KING COUNTY	Twenty two years to Ballard and West Seattle is a joke. Huge increases in population density are already taking place in Ballard, and providing those commuters with a rail option should be a top priority.
NORTH KING COUNTY	Ballard and West Seattle should be the priority when planning the future of the transit network. The timeline for completion should not be as far off and there is no reason the light rail to Ballard should include two stations in South Lake Union when each station costs roughly 300 million dollars. Further, I see no reason to include a Boeing station in Tukwila anticipating that commuters will use the light rail for access to an industrial facility, particularly as the company has been cutting jobs in recent years. This station may be less viable over time and should be reconsidered.
NORTH KING COUNTY	I've read every reason why this should take so long, and I still find the length of the timelines unacceptable. With the innovation that this region is known for there has to be a better way. I commute from Ballard to downtown daily, my wife commutes to the U District, I do not see how the roads along those routes, already clogged with buses and cars, can support a sustained level of growth. I support the costs involved, and the extensions to outlying communities that are not anywhere near where I am, but we all need it faster. The north sounder travels right through Ballard, a block from my house; add a station. And get the light rail done.
NORTH KING COUNTY	Curious to know what plans are available to go east/west from Ballard to UW. There are not many options.
NORTH KING COUNTY	We need this completed much sooner than 8 to 25 years (depending on the project).
NORTH KING COUNTY	stick with the proposed completion dates instead of working on it for years. look at other big metropolitan areas in the US and see how fast they can get their transit expansion completed, how inexpensive it is and most importantly how effective this is. Seattle is an extremely long way away from all of it, and making public transportation even more expensive for commuters is absolutely outrageous.
NORTH KING COUNTY	This completion timeline is way too slow. With ST2 we got Norhgate Link (tunnel) 13 years later, with Lynnwood, East Link, and South Link only 2 years after that. Now we are being asked to wait 25 years for the single most important line in the package? Inconceivable, figure out how to reorder project priority, financing, or whatever is necessary to cut that time significantly.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>I strongly support transit in Seattle but CANNOT vote for the plan in its current form. There is too little benefit within Seattle city limits, but worse, the timeline is far too long. I understand that a new tunnel will take significant time. However, you should build West Seattle to downtown much sooner. And Ballard to SLU should also happen much sooner. Trains can turn back at SLU before the need to enter a new tunnel. Suburban projects can wait. We need rail where we currently have density - not rail to continue encouraging sprawl.</p> <p>I plan to vote no on this plan and hope that something more beneficial to the city - both in terms of number of projects and timeline - can be created. As a homeowner, I would happily pay more for a better proposal.</p> <p>As Dow Constantine said - this is a once in a generation opportunity. I don't want to make the wrong choice and prevent us from doing something better for an entire generation.</p>
NORTH KING COUNTY	<p>I think that all of the projects need to be accelerated &amp; especially the light rail time frames are too long. I would more strongly support a 3-10 year plan for full implementation.</p>
NORTH KING COUNTY	<p>West Seattle and Ballard must happen first and soon. We need to prioritize the timeline. This is critical.</p>
NORTH KING COUNTY	<p>Projects in within the city should be prioritized, as those people will likely embrace them most. Fewer people have cars within the city. The transit system in this city keeps Seattle from really being a world-class city, and this plan doesn't do much to help that.</p>
NORTH KING COUNTY	<p>West Seattle timeline should be quicker</p>
NORTH KING COUNTY	<p>The timeline for these projects are really far away, everything should be done to make it faster.</p> <p>Project in the denser areas (e.g. West Seattle and Ballard) should start earlier to support growth in the densest areas.</p> <p>Instead of extending central link to Everett, Sounder service should be improved to provide rapid and reliable service between Seattle and Everett.</p>
NORTH KING COUNTY	<p>The timeline is far too long to complete the system. This is not a new or original comment, but I wanted one additional vote saying it was too long.</p> <p>The price tag of \$200/year is very reasonable for this much transit and I suspect, many people would be willing to pay more to have the projects completed sooner.</p> <p>In the pricing for the residential property tax, it appears that homeowners will pay more than renters, which should be amended so all residences must pay equal tax.</p>
NORTH KING COUNTY	<p>I know I'm biased, living in Ballard (without a car!) but it seems like prioritizing getting around the urban core should be a higher priority than encouraging people to live out in the suburbs.</p>
NORTH KING COUNTY	<p>Move ballard to the first phase!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Light rail for Ballard has to be done faster than 22 years. Nothing else comes close to being as important in the entire project. You will get more votes if you address the Ballard timeline issue. Do it in phases if you have to. Cut back on the West Seattle as much as politically possible and divert the resources to Ballard first. Swap the timelines if you can - Ballard in 17 years (or sooner), West Seattle in 22. You will get more votes for the package overall, and it will be far far better for the region.
NORTH KING COUNTY	I would be more supportive if this project could move faster. Current timelines for light rail do not address seriously clogged roads in a helpful manner. I am willing to support this project financially if it moves fast enough to help. Also I personally support the Boeing access rd and graham st stops because i would use them. I think the Ballard run could actually help the city be more livable.
NORTH KING COUNTY	The timeline in question 12 is way too far out. All plans should be completed within ten years max. 25 years out is way too late.
NORTH KING COUNTY	It would be very nice to speed up the timeline if at all possible.
NORTH KING COUNTY	Graham street station should be moved up; it was part of the original plan submitted to the taxpayers.
NORTH KING COUNTY	Some of these projects seem to take too long to build. I live in Ballard, and it is hard to get anywhere from this neighborhood using public transportation. The fact that it would take 22 years to build a light rail service to downtown seems outrageous. There should also be light rail service from Ballard to the U District that connects it to the other light rail station. It seems like by the time all of this is done, Seattle won't be as booming as it is now. While these proposals are a great start, they seem to not help anyone in the present day. The city should have known this ahead of time, and tried supporting public transportation a long time ago, instead of just helping car services.
NORTH KING COUNTY	25 years is too long of a timeline. This needs to be accomplished in 15 years.
NORTH KING COUNTY	The timeline should be moved up ESPECIALLY for Light Rail and the Graham Street Station. Light Rail is our future and we MUST seeking matching funds from the Federal Government to make this happen in half the time you propose.
NORTH KING COUNTY	Please please please add the Graham station as soon as possible. It will be extremely beneficial to many people in our area.
NORTH KING COUNTY	Please prioritize light rail expansion before bus expansion.
NORTH KING COUNTY	Please prioritize light rail to everett/paine field. Thousands of employee commuters could be removed from the roads if light rail was an option.
NORTH KING COUNTY	I would like to review additional options to increase the speed at which we complete these projects. With congestion and population rising so quickly, I am more inclined to support a higher increase in taxes to support relief of our overly taxed system.
NORTH KING COUNTY	While the ST3 project is greatly needed, the Seattle population growth is rapid, while light rail will take 17 years to build... That is quite a while to wait for the city to reduce traffic congestion.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	If not doing BRT first would increase the speed at which we get light rail, then would love to see that happen. Also, would love to see Ballard prioritized before the stop to Boeing road.
NORTH KING COUNTY	If possible, the timelines should be stepped up so that implementation takes place faster. Traffic and congestion are already enormous problems in Puget Sound and are getting worse by the day. Our world class city needs world class public transportation infrastructure NOW!
NORTH KING COUNTY	ST3 should be more aggressive
NORTH KING COUNTY	I don't get it. We vote, you issue bonds and start construction. Why the heck do we need to wait 25 years?
NORTH KING COUNTY	Should secure more funding to complete projects faster to accommodate rapid population growth
NORTH KING COUNTY	High populations with low income should be given public transportation services FIRST.
NORTH KING COUNTY	The timeline is ridiculously long. We need all this transit now. Fix it. Make it happen sooner. I won't vote for something that won't happen for 25 years. Also, all rail needs to be grade separated. Stop putting light rail in the way of street traffic and vice versa.
NORTH KING COUNTY	The timeline for completion needs to be speeded up. I would be willing to pay more for quicker completion.
NORTH KING COUNTY	Seattle should be serviced first. Traffic is a mess and the D line and Ballard is horrible because its so slow
NORTH KING COUNTY	The project timelines are FAR too slow. 22 years to build out rail to Ballard? Our family would support 5x the expense if the timeline could be moved up 3-5x faster... 22 years means that the Ballard community will harden around lack of functional, quality transit (I ride the #40 bus often to downtown, and it is just miserably slow). Please find ways to speed up the pace!
NORTH KING COUNTY	Why wouldn't Ballard be sooner?
NORTH KING COUNTY	the density of micro studios going up in Ballard is greater than that of other areas in the service area, and putting it at the end of the list would almost certainly be a mistake
NORTH KING COUNTY	I am more than happy to pay for more light rail, but this timeline is out there. It's tough for me to want to pay for something that won't exist for 30 years.
NORTH KING COUNTY	Faster faster faster!! I would gladly pay \$1000 / year to increase speed of development.
NORTH KING COUNTY	I understand that this must be an incredibly difficult process to get approved and designed. The only feedback I feel comfortable sharing without much more study of the plan is that there should be more of a push to complete light rail on the west side of the city. This should be a major priority in my opinion. Westlake, Queen Anne, Ballard, and Shoreline have no good transit options, as the busses are routinely delayed 15-30 minutes during peak hours. A light rail is the only way commuters can reliably count on getting places on time. I would strongly support higher taxes to get light rail expanded at a faster rate.
NORTH KING COUNTY	You should revise the plan to get the light rail routes implemented sooner that serve Seattle proper. The further out routes should be completed last.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	You should try to find a way to get these projects done faster. The main reason people like myself don't use the system, is because it is currently very inconvenient. It would take me over an hour to get to work from my home in Seattle using current public transportation and one 10-15 minutes using a car. I hope that light rail will help with that, but it's still four or five years away. I strongly support this effort, I just hope you can find a way to get it done faster. Good Luck!
NORTH KING COUNTY	West Seattle to Ballard needs to be sooner.
NORTH KING COUNTY	Do everything possible to move up the time lines for all LINK and Rapid Ride installations
NORTH KING COUNTY	It is taking too long. We need the transportation options added ASAP.
NORTH KING COUNTY	LRT should be prioritized and should be completed much sooner than proposed in the existing timeline.
NORTH KING COUNTY	Completion timeline seems so long. other countries can build such projects very quickly. Why are we talking 12-25 years timelines? Why can't these be knocked out in a decade?
NORTH KING COUNTY	Spend more, speed up.
NORTH KING COUNTY	The timeline today to add a station at Graham Street is mind-blowingly long. Why not expedite that, since the infrastructure involved is so minimal compared to the other new light rail lines that also will be added. That one new station would create access for many more south Seattlites to use rail. It seems extra important for those of us within Seattle city limits, the urban center of our region, to be able to navigate our city without cars. I would love to use light rail for my daily commute or any trip I take into downtown Seattle, but it's impractical without a closer station to my home. I also strongly advocate for improved parking at light rail stations so those of us who are still a few miles from a station can simply park at the station.
NORTH KING COUNTY	If there are no feasible options to accelerate the timelines to bring the light rail systems online, ST should develop and seek public feedback on even more ambitious regional light rail system that would truly connect the entire region, with several east-west lines in addition to the predominantly north-south lines proposed here, providing riders multiple light-rail travel options to traverse Seattle and the surrounding cities. The ST3 plan is a good start, but we need to see a plan that will work for the region a century from now, not just the one proposed, which will help, but which really should have been done decades ago.
NORTH KING COUNTY	Timeline is way too long. Reduce the number of projects to allow available funding to build fewer projects, but to build them more quickly.
NORTH KING COUNTY	Ballard to Downtown & SLU would cut in-city traffic so dramatically. It should definitely be moved up in timeline priority.
NORTH KING COUNTY	What are short term fixes for plans that won't be completed for 25 years? Hard to imagine that Seattle will be the same and that light rail, buses, etc. will still be the best transit modes at that time.
NORTH KING COUNTY	Prioritizing the West Seattle to downtown light rail is extremely urgent, as residents in this area are dependent upon the SOV car traffic-choked West Seattle bridge for commuting every weekday morning. Thank you for your work!
NORTH KING COUNTY	build it faster

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Ballard to downtown/SLU feels way too far out - as does west seattle. As somebody who has a neighborhood station coming in 7 years (Judkins park), I know these things take awhile, but those routes feel incredibly urgent.
NORTH KING COUNTY	Two comments: 1. Light rail expansion within the City of Seattle should be prioritized to continue encouraging smart development practices and reduce automobile dependency within the city. An effective regional rail system is only as good as the urban public transportation system it is feeding into. 2. Developing free parking facilities at suburban stations will be an inefficient use of funds and a clear catalyst for sprawl that will undermine the potential for transit oriented development in those communities. As a committed advocate for strong public transportation, I will have a difficult time supporting a ballot measure that so clearly prioritizes auto-oriented suburban environments.
NORTH KING COUNTY	17 years for light rail to West Seattle seems very long. and 22 years for Ballard? Most of the timelines are very long and waiting this long to provide a mass transit solution within Seattle seems excessive. Timelines should be shorter if possible (within the next 10 years at least).
NORTH KING COUNTY	Thank you for including the proposed light rail spur to West Seattle as a mid-term deliverable. But overall the timelines are quite long. It is important to find ways to speed up delivery of proposed projects because a difference of even a few years on the mid- and long-range projects can make a huge difference in people's perceptions of the plan. Please explore options for fast-tracking and crashing project elements that can reduce the time to completion. I believe there is political will in Seattle for the city to work with Sound Transit to help expedite in-city projects.
NORTH KING COUNTY	I struggled to answer question number 12. I find it frustrating that it's going to take Seattle and the Puget Sound region 20+ years to address transportation options that are common place in many large cities in the US. I support all of these activities 100% and more. I know there are cost constraints and as a home owner, I'm not in love with higher residential taxes... I just find it frustrating that these projects were not started 15 - 20 years ago when we knew then that traffic was a problem and it was only going to get worse.
NORTH KING COUNTY	Not sure what to put this under, but I do see lots of empty buses running around town. I'd rather see the bus lines modified and the extra dollars going toward getting the light rail up to speed quicker.
NORTH KING COUNTY	The timeline is far too long. ST must find a way to get the high-capacity and high-demand lines to West Seattle, Ballard and Redmond online as fast as possible. Light rail should not be reaching far into the suburbs, especially paralleling Sounder lines. Fund upgrades to Lynnwood, Edmonds, Federal Way, Kent and Everett Sounder stations over light rail extensions.
NORTH KING COUNTY	Please speed up the timeline! I fear current growth will pace this project within 8-25 years and Seattle will be in same shape.
NORTH KING COUNTY	The timeline needs to be accelerated. In particular, why does establishing a BRT route between Lynnwood & Renton takes 8 years? That seems absurd. I understand the light rail has a much longer build time, but 12-25 years still means years of climate damage & traffic. Any possible acceleration on those projects would improve quality of life.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Light rail to West Seattle and Tacoma would be completed sooner than 17 years.
NORTH KING COUNTY	Faster, faster, faster. Build it faster.
NORTH KING COUNTY	The current timeline is absurd, no one will vote for something they are likely to never use in their lifetime and we need mass transit NOW. Also, placement of new U-Link station is a joke, it is in the middle of no where on campus and there isn't even a Pronto stop at the station to make getting to the actual campus possible in less that 15 minutes from the station. Please don't locate future stops in locations that don't make getting around any easier for the majority of the population who might use them (like students). Even as a strong supporter of mass transit I might not vote for this because the timeline is crazy even though I am under 40 and might get some use out of it in my lifetime unlike most voters.
NORTH KING COUNTY	Sound transit has proven to be a very trustworthy, on-target organization, and massive expansion of transit is needed as Seattle scales. We can't just grow upward, we have to get fewer cars on the street in order to have vibrant cities.
NORTH KING COUNTY	I would like to see the Graham street station happen sooner than in the current plan. This station was in the original light rail plan and was removed for cost purposes, greatly limiting the accessibility of light rail specifically and transit generally for people who live in SE Seattle. (Because, bus service was cut based on the assumption that people could take light rail despite the fact that so many people still have to take a bus to rail; rail fares were initially more costly than bus, financially disadvantaging a community that is already disproportionately low-income; and, bus-rail transfers are still less simple than bus-to-bus). This has disproportionately impacted people of color and low-income people in our city. We've approved city funds to support this and it should be a high priority. Similarly, given the shift of low-income populations into south King county and the increased for those folks to commute into Seattle or Tacoma for work, I would prioritize south King/Pierce for transit investments. A new downtown tunnel sounds like a total nightmare (seriously, another tunnel??) so I would prioritize making bus service as efficient and available as possible for areas like West Seattle and Ballard. That seems like a better return on investment.
NORTH KING COUNTY	We needed ST3 10 years ago. Anything that can be done to shorten the timeline should be explored.
NORTH KING COUNTY	I would love to see us building more concurrently to get things up and running faster. Tax more, tax faster, leverage success on ST1 & 2 to get access to better debt, and build build build as fast as possible.
NORTH KING COUNTY	ST3 draft implementation time frames are to slow.. No urgency
NORTH KING COUNTY	Traveling between the U-District and Ballard seems to be worsening daily. Buses are full and streets are over capacity with vehicles. I strongly support light rail expansion, but the east-west issue needs to be addressed far sooner than proposed. Condense that timeline significantly and I'll happily vote for this.
NORTH KING COUNTY	This plan is good, but 8-25 years is WAY TOO LONG!!! Once you have the support of the people, please get on with it! We who have said yes, should get to enjoy it before we are grandparents!! Seriously, other countries get these huge capital projects completed in just a few years... 25 years is a joke!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I understand that projects this large take time, but waiting upwards of a decade or two for light rail expansion seems a little nuts. Traffic has gotten punitive in the Seattle area, and it won't ease up without rapid transit expansion. Adding a light rail station at Graham and expanding to the Eastside, West Seattle, and North Seattle from downtown and environs should be top priority to accommodate tens of thousands of commuters - we're moving south and north because the core of the city is too expensive, but many of us still work downtown and on the Eastside. Thanks for helping improve our daily lives and environmental impact!
NORTH KING COUNTY	This timeline is way, way too long, especially for extending the light rail within Seattle city limits (eg. the Ballard line).The number of people who are directly impacted by creating new stations within Seattle before those going outside of the city should be a deciding factor in the timeline of improvements. Please, please take whatever means necessary to shorten the timeline on this project
NORTH KING COUNTY	I'm worried that the long time horizons for light rail extension, especially around the Seattle city core, are too far out and could damage the proposal's chances with Seattle voters. 20-25 years is just too long to wait for crucial new connections, for one because it seems unrealistic that ST can maintain political support for such a long term project (the country is bound to go through another recession in that time period, for example).
NORTH KING COUNTY	Ridiculously slow timeline--especially for the Seattle projects which are urgently needed now. Why not prioritize what is needed now, and slow down on the far-suburban projects which won't be needed for a long time, anyway? I will probably vote against this proposal because of this.
NORTH KING COUNTY	The region needs to recognize and invest in the most congested and DENSE areas FIRST: Ballard to Downtown, West Seattle to Downtown, Federal Way to Tacoma, and Redmond and Issaquah (in that order).
NORTH KING COUNTY	Too expensive and too long of time to complete. Propose is smaller projects, then ask again after they have been successfully completed.
NORTH KING COUNTY	Build it faster
NORTH KING COUNTY	West Seattle to Downtown is a MAJOR bottleneck and has been for a long time. I think this should receive priority to Ballard. More people would move to West Seattle if it had easier public transit access (not buses) to Downtown. Right now Ballard is becoming too expensive for anyone to live in except people whose incomes are very high. It seems unfair to always prioritize high income areas.  In addition, PLEASE consider figuring out how to have the businesses who are creating these bottlenecks (Microsoft, Amazon, soon-to-be Expedia, Google, etc etc) pay for a larger portion. They are causing the growing pains - they need to assist with them more than they are. I'm tired of being on the short end of the stick.
NORTH KING COUNTY	We need these solutions far sooner than you are proposing.
NORTH KING COUNTY	The timeline is very concerning. I would like to see it a little shorter. 15 years maybe?
NORTH KING COUNTY	It should be done faster before it is too late.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The construction management plan and consultants need to be selected and reviewed to allow for 24/7 construction activity scheduling and accelerated completion dates. WE HAVE TO DO THIS IN A SHORTER TIME FRAME. We need municipal permitting help and concurrent design/construction activity starts. Having personally used their systems ,China does this sooo much quicker than us and the systems are state of the art. 25 years is WAY too long ,we need some creative thinking around schedules and design ,even if we are not living in a centrally controlled economy. The international contracting community should be able to move this project quicker,I hope ! ( Bertha notwithstanding ).
NORTH KING COUNTY	Faster!!!!
NORTH KING COUNTY	I think it should all be accelerated and done on much faster timelines.
NORTH KING COUNTY	Faster completion of light rail to West Seattle and Ballard lines. Crosstown Fremont line needs to be considered sooner.
NORTH KING COUNTY	timeline should be shorter for all projects
NORTH KING COUNTY	Connecting Tacoma and Seattle by light rail should be an accelerated priority.
NORTH KING COUNTY	This plan won't be completed in time to be useful to the majority of people who vote. Please speed up the timelines! Seattle is growing too fast not to have a viable subway system.
NORTH KING COUNTY	The GLACIAL PACE of light rail construction is a "no" vote for me. Get it done in a reasonable time frame! Buses don't work, and I will not vote for more bus service that sits in traffic with everyone else.
NORTH KING COUNTY	I strongly believe the Ballard line should be moved up the priority scale and done as soon as possible. Also would front-loading the tax rates to be higher in the near-term (and balance it with a lower rate later in the lifetime of the tax increase) allow more revenue to come in to allow for higher loans to help finance projects sooner rather than later?
NORTH KING COUNTY	If the cost is to be so great, why is all of this projected to take so long? I wouldn't mind paying for expansion if it would be in service before my retirement--17 years?! You have got to be joking.
NORTH KING COUNTY	ST should tighten up timelines. If I had to wait 25 years for transit improvements I would be less likely to vote yes. As it is I live on Cap Hill so I have my transit. I would be willing to pay more if that is what it takes to shorten the timelines.
NORTH KING COUNTY	The plan is too far-flung. Having a handful of stops in Seattle and 1 per town elsewhere is not enough, and will dilute its effectiveness, especially if people can't drive and park at the stations. I would prioritize West Seattle, Ballard, and Redmond-Bellevue-Seattle over places as far away as Fife. These are the places people live and work. Not nearly as many people commute from Everett to downtown Seattle.
NORTH KING COUNTY	Accelerate the timeline for implementation of this plan. A regional transportation system is integral to the economic and ecological success of the Puget Sound Region. Providing mass transit between neighborhoods and the greater region in a timeframe more aggressive than 25 years needs to be a top priority.
NORTH KING COUNTY	Locations within City of Seattle need better dedicated light rail transit, and sooner than proposed here. Twenty-two years for the Ballard connection to Downtown is ridiculously far away!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Highest priority is completing the light rail quicker than proposed, while looking at how to support more people using it (IE more bus lines through neighborhoods taking bus riders to light rail stations). Parking may be important too, but would rather those dollars go to more neighborhood bus service taking riders to the stations, rather than commuters parking at the stations.
NORTH KING COUNTY	17 years for West Seattle completion is so disappointing.
NORTH KING COUNTY	The connection between Ballard and Downtown Seattle should be included in the 8 years plan, not 22 years plan, given the rapid growth and currently miserable bus service between downtown and Ballard.
NORTH KING COUNTY	Timelines for Ballard and West Seattle are way to far out - we need to work to move these timelines forward as much as possible.
NORTH KING COUNTY	We must speed it up! Anything we can do to make this faster.
NORTH KING COUNTY	22 years to get to Ballard with track running mostly at grade level? That timeline is unacceptable.
NORTH KING COUNTY	20+ years to Ballard is NOT acceptable - this should be TOP priority. This will increase ridership and prove that the system works WE NEED MORE light rail in the city, and much FASTER - Ballard to Downtown, Downtown to West Seattle, Ballard to UW, etc.
NORTH KING COUNTY	Parking and pedestrian access are most important. Don't let us down again. FASTER IS BETTER. IT WILL IMPROVE OUR ECONOMY TOO!
NORTH KING COUNTY	25 years is too long to wait for critical infrastructure
NORTH KING COUNTY	Projects take too long to complete. Should be expedited - Express buses first as they are less expensive.
NORTH KING COUNTY	West Seattle and Ballard completion is too far out.
NORTH KING COUNTY	I would like to see priority given to projects with the highest projected ridership upon completion. This would seem to be an efficient use of time to reduce road congestion.I think projects like the Ballard line should therefore have higher priority than the current proposed timeline.
NORTH KING COUNTY	I am very disappointed about the timeline to connect Ballard and West Seattle to the light rail. Also, I am concerned at the affordability of light rail for low income riders.
NORTH KING COUNTY	go faster. Add the stations (Graham & 130th NOW). Bus Rapid Ride shouldn't take 8 years, 2 or 3 maybe! Make sure all the connections to the stations are efficient from parking to biking to buses....
NORTH KING COUNTY	Faster!
NORTH KING COUNTY	I would like to see ST find ways to shorten the timelines for transit projects in the region. Reliable and efficient transit options will be an important complement to affordable housing initiatives and a vital resource to help the region sustain its rapid growth. This is an urgent need now, and will only become more overwhelmingly so over the next 25 years.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Projects shown do not provide sufficient information as to current commuter times, etc. to determine whether or not the schedule provided is prioritized properly. Why provide a schedule and not provide the reasons those items are receiving priority. It is hard to believe for example that the commute can be much worse than West Seattle to downtown, yet it is given one of the lowest priorities in the offering.
NORTH KING COUNTY	It is disappointing that it takes so long to complete this plan. For example, BRT routes take 8 years to complete? I worry a plan with too long of a horizon will be hard for people to accept and will be rejected at the polls.
NORTH KING COUNTY	Get it done faster. Invest in a more equitable tax system to pay for it.
NORTH KING COUNTY	The timelines are absolutely ridiculous.
NORTH KING COUNTY	Ballard and West Seattle timelines should be pushed forward, they are more important than the suburb lines.
NORTH KING COUNTY	Most of these should be expedited. At Seattle's rate of growth, in 25 years when some of these finish they will be obsolete and old and unable to handle the quantity of people/changing landscape.
NORTH KING COUNTY	I don't understand why light rail in the suburbs would ever need to be completed ahead of light rail inside the city. People in Bellevue can get to downtown in 20 minutes already on express buses, but it takes an hour to get downtown from Ballard or Greenwood. Insane
NORTH KING COUNTY	Absolutely everything must be done to expedite the West Seattle and Ballard light rail - We need them today as it is.
NORTH KING COUNTY	It would be nicer if the train to Ballard finished earlier than 22 years. The link is so much nicer than the creepy buses. It would also be thoughtful to make a station near Seattle Children's hospital. There's a huge population in this city that works there and trying to get to work still isn't perfect.
NORTH KING COUNTY	25 years? So, you want me to pay for something that I can enjoy 25 years later? What? Is this like social security? If there is a shorter timeline, it may be enticing. But, 25 years? Hell no.
NORTH KING COUNTY	We are already far behind the eight ball in this region, in regards to mass transit. We are at gridlock nearly all day...the timelines need to be expedited and projects completed swiftly. I completely support (and have for the past 25+ years) a more robust mass transit plan for this region...it's past time.
NORTH KING COUNTY	the lengthy timelines for S. Graham st., West Seattle, and Ballard are an ridiculously long time out. Especially for Graham, most light rail infrastructure is there. Graham should be prioritized for quick impact. Due to a lack of parking at Othello or Columbia City stops, a light rail stop at Graham is extremely necessary. I never understood why it was passed up to begin with.
NORTH KING COUNTY	The timelines for project completion should be accelerated.
NORTH KING COUNTY	All timelines way too long.
NORTH KING COUNTY	Too long to complete and costs too great for property owners. Costs should be across the board for each person whether they own property or not.
NORTH KING COUNTY	I would support speeding up the timelines of the project where ever possible. The need for light rail and improved transit is so great in our region, and the need will continue to grow every year, that the idea of waiting nearly 30 years is just difficult to swallow.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Please speed up the timeline. Priority is reliable, frequent transportation. Can we get some of these BRT lines up quicker while we're waiting for lightrail?
NORTH KING COUNTY	Future plans need to be considered sooner, and projects fast tracked. In 8 years time your plan will be gravely outdated, and networks and infrastructure limited given the amount of growth expected. I am all for public transit, but to expect this 25 year plan to have a positive impact given the steady population growth is an unfortunate way to think about the future of our cities.
NORTH KING COUNTY	Please advance the Ballard to downtown underground/elevated plan sooner. Seattle property owners will be willing to pay more taxes sooner to make this happen. Surface focused bus solutions will not solve the problem with the growth we are receiving.
NORTH KING COUNTY	Why is this plan going to take so long? I'll be retired by the time it gets complete. Why can't this be done quicker? I'd support a more aggressive time line on link light rail expansion.
NORTH KING COUNTY	I'd like to see the city core light rail connections (West Seattle and Ballard) completed sooner. Get your core connected then build out to the north, northeast, southeast and south as you have planned. The outlying areas can be served sooner with more/better express bus connections. Overall I like the vision. This ought to exist already... so, let's finally get on with it. Poor transportation infrastructure will eventually hurt growth.
NORTH KING COUNTY	8 years to add a bus line!? I mean, that just sounds ridiculous.
NORTH KING COUNTY	This seems very far in the future
NORTH KING COUNTY	The time line is way too long. Twenty five years from now they will be a drop in the bucket. Our population is growing too quickly.
NORTH KING COUNTY	I think that we just need more independent public transportation, like the light rail... so the more the better!  Also, getting West Seattle to downtown should be more of a priority.
NORTH KING COUNTY	Need results sooner than 8-25 years!
NORTH KING COUNTY	We need to significantly advance the timeline for completion of the projects. With the current timelines the situation will be worse rather than better by the time the new lines are online. There should be significant incentives for building high density housing near major transit lines with penalties for building low density housing in those same areas.
NORTH KING COUNTY	Right now, the timeline seems long for these developments, but the Puget Sound has postponed public transit development for long enough. The longer we wait, the more expensive it will become. Even if I get to enjoy these services when I'm in my 50s or 60s, I think these improvements will be a net benefit for the community and for future generations.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>I believe the biggest factor in my hesitation to support is this transit package is the long timelines. 22 years to Ballard is a very long time. And even 8 years for Bus Rapid Transit is a long time. There is an urgency commuters feel to get relief to congestion as soon as possible. I am extremely positive towards light-rail additions and improving Seattle's transportation system, however, the 25-year timeline makes me hesitant to back the package since it will not provided relief very quickly. I understand the complexity of planning such a large project and pleasing so many stakeholders, as well as technical challenges (particularly with tunnels to Ballard) but I think there is a significant problem with congestion that needs solved sooner than later.</p> <p>I also believe that at-grade should be avoided more since traffic and other incidents can cause delays, even if light rail is technically "traffic-separated". Reliability is also a key consideration with transit.</p>
NORTH KING COUNTY	Build it faster!
NORTH KING COUNTY	I would prefer focus on light rail rather than rapid bus service and get the connection to west seattle sooner
NORTH KING COUNTY	Include optimistic timelines as well as potential opportunities to accelerate construction (such as federal funding, savings from early project completion, etc).
NORTH KING COUNTY	<p>My understanding is that the Light Rail extension to Lynnwood would be complete by 2023. Am I correct? The ST3 draft seems to indicate that it would be complete in 20 years, which would be 2037. That would be totally unacceptable.</p> <p>I'd also like to stress the importance of adding a 130th station to the Light Rail. If it is not possible to alter the "provisional" status due to the federal grant limitations, you should at least be committed to adding the station right after the Northgate extension is complete. Anything less than that would be, again, unacceptable.</p>
NORTH KING COUNTY	<p>I believe that it is working people who have the most to gain from improved public transportation. Thus, light rail and improved bus lines need to go to neighborhoods that have the lowest income working people living in them. Under the current plan, by the time light rail gets to West Seattle, for example, those working people living there NOW who would most benefit from improved transit, especially light rail . . . will not even be there, as costs of living will have driven them out of the neighborhood. If those folks are to have a shot at staying in the region, it is the transportation needs of low-income working people that need to be considered and provided for first.</p> <p>Secondly, I would like to know what efforts have been made to secure federal funding for this project, how much federal funding there is for the project, and why there isn't more...is there a way to obtain greater federal support and thus reduce the local/regional tax burden?</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	you can be more aggressive with these timelines to get light rail to serve areas that need it better. commit to several at once and make the jump now rather than later. 22 years to ballard? 17 to west seattle? these time frames are extremely too long to get the impact you need to see results in congestion is the region. dig in and get it done!!! people will be be more apt to spend on this if you give a quicker timeline than that.
NORTH KING COUNTY	Light rail to Ballard in 22 years is a joke. Your project list is an absolute joke and there will be no money for the projects at the end of the timeline. I am pro transit but will be voting against this measure due to the laughable timeline.
NORTH KING COUNTY	West Seattle cannot wait 17 years for light rail! West Seattle is the largest neighborhood in the city, with the tightest choke point (the bridge). Light rail must be extended to West Seattle sooner than the current project plan.
NORTH KING COUNTY	Light rail projects supporting the Seattle city corridor such as Ballard and West Seattle should be prioritized. This promotes more urban density and less sprawl.
NORTH KING COUNTY	I'm concerned about the total cost of this project.
NORTH KING COUNTY	Way. Too. Long. There's no way people will vote for something they will never see. They're too selfish. There must be a way to accelerate the high return projects.
NORTH KING COUNTY	It would be so great if the timelines could be sped up!
NORTH KING COUNTY	I support additional funding to accelerate the light rail development.
NORTH KING COUNTY	These projects need to come faster. We've needed better transit 5 years ago, not 25 years from now.
NORTH KING COUNTY	I think the length of time for these projects is absurd. How can it be that we can build skyscrapers and a floating bridge in a way shorter amount of time?! 22 years- it's laughable. And hard to want to invest in or imagine when I won't likely ever benefit from it.
NORTH KING COUNTY	Ballard light rail needs to be fast tracked. Once operational, daily ridership should equal the population of the entire east side. The 15th corridor is already a disaster. Once Expedia brings in an additional 3000 employees in 2018, the road will be nigh impassable. Please move up the timeline as much as possible.
NORTH KING COUNTY	Mass transit in this area is a joke. The planners have no clue what is going on, with all due respect, and flip around like almost dead fish. Car pools, then busses, then bikes, then rail, then back to bikes, then train transit along mudslide routes (or was that before the second episode of bikes? Can't recall).
NORTH KING COUNTY	Projected completion times of 15-25 years will barely be a drop in the bucket to help relieve the transit issues that Seattle faces today. The population is growing too rapidly, I fear that these measures, while great on paper, will be woefully inadequate by the time they're even completed.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	While I feel that transit expansion is important and I somewhat support this plan, the timeline makes me extremely indifferent towards it. I don't know where I will be living in 1 year, let alone 8 or 17, or 22. Unfortunately, the area of expansion that I feel is most important to me is not scheduled for completion for another 20 years. At that point, I don't really care. Maybe we'll be driving hover-crafts by then - who knows? I feel that an area of service that is severely lacking is Capitol Hill to Fremont/Ballard. This plan does little (if anything) to address that route. Because I do not feel that my needs are met by Sound Transit, I rarely utilize it. I desperately want to take the bus to work, but I'm unwilling to walk 20 minutes to get downtown to take a bus for another 20 minutes. At that point, it makes more sense for me to drive and spend \$10 on parking every day. I'm sorry, Sound Transit, but I don't feel that you're meeting my needs.
NORTH KING COUNTY	25 years seems too long to wait for transit which Seattle needs now. Furthermore that time line implies no other sound transit rail lines will be built in Seattle (beyond ST3) despite there being a desire for lines beyond this plan (e.g. Ballard-UW). As a seattle resident, I'd like to see the rail projects in seattle sooner (ideally without slowing down rail projects elsewhere) and I'd like to see aggressive planning to further address seattle's rail needs and possible a funding mechanism which allows building rail lines beyond ST3 sooner.
NORTH KING COUNTY	I'm concerned that this timeline is quite long for some areas close to/in Seattle that are desperate for better transit options (West Seattle, especially). I completely understand that these projects are very time-intensive, but it would be nice to see a more urgent timeline for some of these options.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>I have a disability that prevents me from driving, so access to transit is an incredibly significant issue in my life. That said, if Sound Transit places the current incarnation of the ST3 package on the ballot this November, I likely will vote against the measure for the following reasons:</p> <p>The completion deadline for Ballard is unacceptable. The Ballard to downtown line projects to have the highest ridership of any of the lines proposed in the ST3 package but is one of the last to be completed. It is insulting that Ballard gets light rail five years after West Seattle. Ballard has taken on more than its fair share of development in the last 10 years and deserves priority in getting light rail in exchange for this development. West Seattle, on the other hand, has fought development tooth and nail and been largely successful in doing so.</p> <p>It appears that the timing of when various light rail segments is inversely proportional to how likely a people in the neighborhood are to vote for ST3 and Sound Transit is taking Ballard voters for granted. This is a mistake.</p> <p>Also, the Ballard to downtown line should not run at-grade along Interbay. It should go to Fremont and then down to Lower Queen Anne. No one lives in Interbay, nor is it a neighborhood suited for significant development in the future.</p> <p>Finally, ST3 should include a Ballard to UW line. I understand that building a second downtown tunnel for the Ballard to Downtown line will take time, but it should not take nearly as long to build a Ballard to UW line, which riders can then transfer to the Central Link line (or the Ballard to UW trains could continue downtown). The 44 is one of the most overworked and slowest bus lines in the city (along with the 8) and there is no good way to increase its reliability, so a light rail line is crucial.</p>
NORTH KING COUNTY	Ballard needs light rail sooner - 22 years is almost my entire life so far! The 15 and D are already over capacity during rush hour. Can you start 20 years ago?
NORTH KING COUNTY	Increased priority/speed on light rail access to Ballard
NORTH KING COUNTY	Need to find ways to do this faster and for less cost
NORTH KING COUNTY	Ballard, west Seattle and Seattle to Bellevue/ Redmond rail should happen way way way before they are scheduled to. I strongly support most elements of the plan and would support speeding it all up, even if it cost more. Please reprioritize Ballard, west Seattle and Seattle to Bellevue / redmond rail lines. Thank you!
NORTH KING COUNTY	My interests are first Ballard/West Seattle. After that I would like to see Mercer Island/Issaquah, Tacoma, Everett.
NORTH KING COUNTY	I would love to see as much emphasis as possible on light rail projects. The ability to avoid traffic is huge. Plus buses have a certain stigma to them. Someone excited about taking a light rail or subway in Boston will not have the same enthusiasm taking a bus in Seattle.
NORTH KING COUNTY	25 years is ridiculously long... we and the local air. environment cannot afford to wait that long
NORTH KING COUNTY	We need this now, not 25 years from now!!! How can we build it faster??? I would support paying more.
NORTH KING COUNTY	Nobody is going tow ant to pay for this when we become san francisco 2. I'm all for speeding it up, but were 10 years behind here....

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	This plan is expensive for individual tax payers which I'd not be opposed to if it weren't for the 15+ year time table. That is just too long to wait. A better plan should be focussing on ways to streamline the infrastructure building and get it done quicker.
NORTH KING COUNTY	The timeline to do even bus rapid transit seems embarrassingly long. How long does it take to buy buses, train drivers, and install bus stops?
NORTH KING COUNTY	Completion schedule should be accelerated.
NORTH KING COUNTY	Ballard earlier please. Seattle will have the ridership for these lines and we need it now.
NORTH KING COUNTY	<p>I really would like to see Light Rail to West Seattle in my lifetime, but West Seattle is rapidly getting developed. The plan to get light rail to West Seattle is too slow! If it takes 17 years, there won't be any place to locate a station without destroying whole stretches of Neighborhood like in Capitol Hill. It also appears that all planning terminates at the Alaska Junction which is a major gridlock point in West Seattle already and will only get worse in 17 years. The Alaska Junction is a neighborhood center. It doesn't need all the noise, traffic, etc that comes with making it a transit center. It makes way more sense to route the future light rail on Fauntleroy which was designed originally for streetcars and doesn't have 90 degree turns. The junction is literally 3 blocks from Fauntleroy! The area currently being developed around Alaska and Fauntleroy already has more apartments than the Alaska Junction, so a station there would serve more people anyway.</p> <p>Commute times are already nearly an hour for me. I ride the Rapid ride every weekday for work and it is constantly getting stuck in traffic. The Rapid Ride C is almost always over capacity and delayed further from people struggling to get on or off the overcrowded busses. We really need an actual rapid ride like Light Rail that can bypass the West Seattle Bridge which is now so bad the traffic backs up into West Seattle.</p> <p>I will vote against this proposal as it currently stands. I don't see this proposal benefitting me. The priorities need to be reevaluated based on what's needed to make commuting fast and reliable where it's needed most, which is not what this plan currently does.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

<p>NORTH KING COUNTY</p>	<p>Comment #1: BRT should be implemented sooner, if possible. It will help alleviate highway congestion prior to the arrival of the light rail option. The option of providing redundancy to the system is important, especially once maintenance to light rail and bus transit routes becomes an issue in 20-30 years. BRT and light rail need to share park &amp; ride type facilities.</p> <p>Comment #2: Given the timeline of expansion, has there been any serious consideration for the intensive capital funding required to maintain the system once it is up and running? ST will be asking for maintenance funding and will end up diverting monies raised in ST3 long before the 12 year mark hits.</p> <p>Comment #3: While I fully support developing multi-modal transit along the I-5 / I-405 corridor, any sort of funding request OVER a ten year construction funding period is ridiculous. I don't want to pay for something 12 years out and I certainly don't want to give ST a blank check for funding for more than five years. To qualify my insight, I have \$66M to \$2B in constructing large infrastructure projects at the CM level, so the likelihood of overruns are guaranteed. Prove to me you can build more than one tunnel on budget and on-schedule. Prove to me you are going to be responsible with funding for the next five years. Let's keep our projections on real/actual construction realistic.</p>
<p>NORTH KING COUNTY</p>	<p>"Under this plan, bus rapid transit (BRT) service on I-405 between Lynnwood, Bellevue and Renton would come online in eight years; light rail to Redmond and Federal Way would be complete within 12 years, light rail to West Seattle and Tacoma would be complete within 17 years, light rail to Lynnwood and Tukwila at Boeing access road in 20 years, light rail to Ballard 22 years, and light rail to Everett and Issaquah in 25 years. " - This is all so slow! Maybe I can understand why light rail can take so long, but why would BRT on 405 take EIGHT years?</p>
<p>NORTH KING COUNTY</p>	<p>Projects should be expedited, especially bus projects that need less capital spend. For example 405 brt should launch before 85th and Renton stations are ready. Rail lines broken into smaller phases to allow sections to come online earlier. And consider ballard-UW for faster delivery, pushing 2nd DT tunnel until end of the package</p> <p>Also improve connections between BRT lines, esp 522 interfacing with 405, and improve bus-rail transfer. Subregions should be allowed to tax themselves additionally if it accelerates project timelines (and results in more projects being built in the long run)</p>
<p>NORTH KING COUNTY</p>	<p>It's crazy to me that these projects take so long. Planning 25 years out to build rail? I can't believe the process is that slow.</p>
<p>NORTH KING COUNTY</p>	<p>Would be willing to pay more in taxes to have project completion deadlines sooner.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The proposed timeline is far too lengthy - we need these transit infrastructure as soon as possible.  I also feel strongly that bike infrastructure be a key feature of these projects.
NORTH KING COUNTY	I know planning and development can take a long time. I think there could be voter support for increased costs in return for quicker construction. I am confident that with every extension to the rail you will find and reach new riders who will eagerly hop aboard.
NORTH KING COUNTY	The cost is way out of reality. I oppose this 19th century technology scheme. What cheaper alternative has been proposed? This with other tax increases proposed are past the the limit of our means. Stop with the continual excessive taxes!
NORTH KING COUNTY	Opening dates need to be much, much sooner. Light rail to Ballard and West Seattle needs to be completely grade-separated.
NORTH KING COUNTY	Unclear to me when the rail to SLU is planned (is it part of Ballard expansion?) If part of Ballard expansion, 22 years is much farther out than it should be; there's a clear need to be able to take rail to work in SLU that exceeds the long tail of commuters coming from outside Seattle (who can make do by bus'ing to rail; much of commute delay is spent bus'ing from the rail into work and from work back onto rail where the traffic is particularly thick. Improving rail access within Seattle will significantly reduce commute delay).
NORTH KING COUNTY	Light rail timelines are way too long. 22 years to Ballard is sort of ridiculous.
NORTH KING COUNTY	Grade separated rail to Ballard needs to be the first priority. I don't think I can vote for any plan that doesn't improve the timeline and ensure grade separation on this project  We also need more east -west transit in Seattle like Ballard to UW or a line that connects Downtown, SLU, Capitol Hill and Central District.
NORTH KING COUNTY	By the time we finish these projects, there will be so many ... it all seems like too little, WAY too late. Clearly there is money in Seattle for development, find a way to get the big corporations who are congesting our cities to fund it: Amazon, Google, Microsoft, Boeing, Expedia. Taxes on big corporations who are bringing a bunch of people into our cities. It benefits them, they should pay. We need these new transit options yesterday.
NORTH KING COUNTY	Ballard to Seattle needs to be completed MUCH sooner than in 22 years! Also, it really needs a separate right-of-way that isolates it from street traffic and drawbridges.
NORTH KING COUNTY	Having buses use shoulders on highways should be done much sooner than in 8 years! This would immediately make more people take transit since they would see that the buses don't get clogged up in traffic!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I wish the light rail expansion could happen in less than half the time. Double the cost if necessary; we need light rail now. Also, bike/pedestrian access is important. Charge for parking. The timeline is so long that most people paying for this won't be working (and needing reliable daily transit) by the time the project is finished. With a timeline that long, I'd rather my property taxes fund our woefully underfunded schools for a somewhat immediate benefit...
NORTH KING COUNTY	What is the cost difference in terms of expanding the light rail system at an accelerated pace. The time horizon for say Ballard is 22 years, which is an eternity relatively speaking.
NORTH KING COUNTY	over 20 years to complete? I don't think that's fast enough to keep up with Seattle's current growth.
NORTH KING COUNTY	Light rail should be completed much sooner
NORTH KING COUNTY	Awful timeline that is completely out of touch with the actual urgency needed, which explains my answer to #12. I am happy to see there is a plan, but we need to light a fire under our butts on this one and find a way to get it done FASTER, FASTER, FASTER while retaining the same quality. Apply whatever efficiencies and best practices learned from the Husky Stadium extension to deliver ahead of schedule and under budget. Ballard and West Seattle are booming parts of Seattle; these lines should be prioritized over absolutely everything else on this list. Rail to West Seattle is a no-brainer and I'm glad that there is some urgency given to this line as well. The rest of the system expansion is great and all, but I would really like to see the priorities put on the fastest-growing areas where the most people are expected to use the transit.  Also, a bit lower-priority and "backyard bias" since I live in between, but I am dissatisfied that Ballard to U-Dist light rail has not made the cut. Even with its frequency a ride on the 44 is a cramped miserable experience that takes forever because of the congestion on 45th (a street that cannot be widened or really improved in any way).
NORTH KING COUNTY	25 years seems way too long!
NORTH KING COUNTY	1-Completion of inner city lines (WS and Ballard) is far too late to keep pace with development that is planned to boost affordable housing. 2-I do not support this plan as currently funded. Motor vehicle excise should have a MUCH higher burden. Property tax needs relief. We need a state income tax in order to accomplish both this and education funding. But the overall cost of this plan should be pared down, as well.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>I live on the current Link light rail line and use it regularly. I don't have a lot of preference for where the expansions should be or in what priority because the current system largely already meets my personal needs. However, I do very much support the expansion of the system. I support more mass transit that encourages people to not drive as much as possible. Expansions should be prioritized in order of which projects will move the most number of people.</p> <p>In the interest of encouraging people to not drive, I encourage the ST3 plan to include robust methods for getting people to light rail stations or transit centers without driving. While some parking at stations could be helpful, ST3 should not include acres of free parking. If parking at stations is determined to be a necessary part of the plan, parking should require a fee. This helps encourage people to choose non-driving options and provides an additional revenue stream for ST3 projects.</p>
NORTH KING COUNTY	<p>I'd like to see extending light rail to Tacoma moved up on the timeline. While I acknowledge that big businesses on the east side contribute a lot of traffic, if we can link Tacoma in sooner, population expansion is served sooner which would open up opportunities south of Seattle for businesses and residents alike. Or at least offer more frequent rail service.</p>
NORTH KING COUNTY	<p>Get the high priority items done AS FAST AS POSSIBLE</p>
NORTH KING COUNTY	<p>This is an absurdly long timeline. We all know that these things take time, but Seattle is expanding way too rapidly to wait for more light rail for 25 years. Traffic is already a nightmare, and it's only going to get worse--potentially to the point of hurting us economically.</p>
NORTH KING COUNTY	<p>Enhancements to the core Seattle metro area cannot afford to wait 17-25 years. Gridlock is a common problem today that can only be solved by grade separated transit and this extended timeline will knee-cap growth in prosperity for far too long.</p>
NORTH KING COUNTY	<p>Timeline are too long. You need to issue bonds or something and get the money in to speed up development. This expansion should've already existed but is just starting now.</p>
NORTH KING COUNTY	<p>The light rail to Ballard and West Seattle should come earlier in the timeline because the inner neighborhoods of Seattle is becoming extremely dense very quickly.</p>
NORTH KING COUNTY	<p>The overall timeline is too slow for the current expansion levels of Seattle. Tax us higher and make it happen faster!</p>
NORTH KING COUNTY	<p>I will not be supportive of this plan unless the timeline for the Ballard line can be modified to bring it on line much sooner. For a neighborhood growing as fast as Ballard 22 years is unacceptable.</p>
NORTH KING COUNTY	<p>Increase the taxes for these projects and aim for a much more aggressive timeline. Expansion is occurring at a much faster rate than what our current transit system can support. These enhancements need to begin immediately.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I lived in Portland during college and got to take full advantage of a city that has an excellent transit system-- it was incredible. While there I watched transit expansions be approved, built, and implemented in a matter of years. Years, not decades. It is MIND BOGGLING that I could have a child tomorrow and they wouldn't be able to ride all of these transit options as an adult because they STILL wouldn't be finished yet. The fact that we have to measure our timeline in DECADES instead of years is ridiculous. As a product of the suburbs of Seattle I was shocked and thrilled when I arrived in Portland for college and was able to get everywhere I needed to go with absolute ease on their lightrail system. Moving back home after college I thought I would live in the city again, one of the main reasons being I wouldn't need to drive everywhere--how wrong I was. When you are behind on something you have to work faster than others to catch up, this timeline so slow it's painful. I would rather there be less projects and go faster. And while I know you must include suburban cities in order to actually get it passed by voters, Seattle is where these improvements would be most used, and as such those lines should be the top priority.
NORTH KING COUNTY	Order of when things come on line seems reverse to current needs, and the overall time seems way too long. It's hard to see how it can take 8 years for BRT on 405? Waiting 22 years for LRT to go to Ballard is too long. We'll be in self-driving cars by then. Fixed rail to Redmond and Issaquah does not seem to stack up (no density now, can't see it in 20 years unless massive zoning changes in both places occur).
NORTH KING COUNTY	Ballard and West Seattle are the highest priority areas for Light Rail development in my opinion and Sound Transit should do everything in their power to PRIORITIZE these projects to reduce their timeline. 22 years for Ballard is ridiculous. These areas are booming NOW, we needed this kind of transit there 2 years ago. The West Seattle bridge is a parking lot during commuting hours and a light rail station would be a HUGE improvement there over options currently available.  I'm also very skeptical about added bus routes. Traffic has become such an issue here that going on a bus on I-5 or I-405 is no better than a car, therefore there's not a great incentive, unlike light rail.
NORTH KING COUNTY	The central spine of the link light rail route along the I-5 corridor should be completed first. This will accommodate more commuters from across the Puget Sound region than if Seattle area neighborhoods are connected. If you really want to get cars off the road, provide access to reliable commute/transit options for people who have to travel the greatest distance.
NORTH KING COUNTY	The new stations to existing light rail should be included first timeframe. The stations do not need to be big and fancy like the existing and should be able to be done quickly and fairly cheap.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I'm assuming you've considered where growth is happening in the area and where the need is the greatest. West Seattle is growing in leaps and bounds; who knows what it'll look like in 17 years....are we sure this timeline is going to handle the population? Of course, if all of this had been planned 30 years ago..... And in response to the question on the next page about how many household members are frequent transit riders.....I used to ride daily to work downtown from West Seattle. Now, taking public transit to Rainier Valley takes an hour, no matter which route you take...through downtown or on the 50. Currently I use transit including water taxi for some events downtown but not generally beyond because no options are truly "rapid" and some are just plain inconvenient. Sad that the C no longer becomes the D; I used it exactly once to get to (north) Ballard and it was great. I think a better question would be "would you ride transit more frequently if it were more convenient and faster" because I would definitely say yes to that.
NORTH KING COUNTY	The only comment I have is how disappointing it is to see the projected timeline, in particular for Ballard. I have lived in Ballard for 5 years and since then, 5 (huge) apartment buildings have been built within a 6 block span of my apartment building. Ballard cannot keep up with the growth and is bursting at the seams for transportation support. There are just too many cars. I would love to get rid of my car completely, however due to obstacles with public transportation I don't feel I can do that yet.
NORTH KING COUNTY	The West Seattle and Ballard links should not take so long. These areas are booming and need light rail service as soon as possible. There should be a higher priority on these projects. Also, how about extending the existing electric street car lines for South Lk. Union and Capitol Hill to the University district and Ravenna. There is not any proposed plans for the electric street cars.
NORTH KING COUNTY	Wish it could be here sooner. Just thinking of myself, personally, I have internship opportunities in Everett and just south of Tacoma that are currently way too hard to get to by bus to make it possible. Having better rapid transit to these two cities in the next 3 - 5 years would have a huge impact on my education, and my career.
NORTH KING COUNTY	West Seattle and Ballard light rail should be top priority for getting city commuters off the streets allowing for outside the city commuters to have less traffic. West Seattle bridge meeting up with I5 is dangerous and always backed up. Getting from West Seattle to I5 then to I90 should be illegal. It's almost impossible to do without cutting off another driver. Getting the city dwellers off the roads will make commuters from outside the cities commute much less stressful and less time consuming.
NORTH KING COUNTY	West Seattle and Ballard plans should be completed much sooner.
NORTH KING COUNTY	Ballard to Seattle Light Rail should be priority because of expected ridership.
NORTH KING COUNTY	You really need to consider making the Ballard to West Seattle Link Light Rail happen first. This is going to be completed in the future. Things will be different than they are now. Everywhere where you think you need a train you needed one 5 years ago. Everywhere where you think you need a bus corridor you need a train today. Put trains in. With train stations. With local neighborhood shuttle bus routes feeding train stations.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>My neighborhood will not vote yes on this because of the delay in service. Most people will not vote for something that is regressive tax that they will not see in there life time. People that are stuck in traffic and bussiness should pay this. They are the ones helped most by improved transportation. No to sales tax. This is the most regressive tax that you can think up. It forces poor people to pay more than there fair share. TAX people making more than \$100,000.00. They move here to get out of paying for anything. They are the most able to pay. They think that they do not have to pay for any thing. Tim Inman and his lot are to blame for this. If we still had people will \$50.000 plus dollar cars paying there fair share we would of had most of this done by now. The plan is too little too late. The monorail was shot down because they were paying for it upfront with three to five year time frames. People in Olympia should have led us out of this problem a long time ago. I do not think that this plan has any chance of being passed by the public. Make it happen then get the public to pay for it. We have to see something happen first to have people buy in.</p>
NORTH KING COUNTY	<p>25 years is a long time. I'd focus on the major metro areas first. Think where the Tech Companies are. People need to get from Redmond/Bellevue to Seattle and back. That should be the priority. Not addressing the congestion now could cost the region jobs. With the exception of Boeing most Large companies in the region, and a bulk of the employees are in Redmond (Microsoft) Bellevue, or Seattle. Companies are moving from the suburbs to attract the best talent (Wyerhauser, Google, etc.). Make it easier to get around Seattle Bellevue and Redmond.</p>
NORTH KING COUNTY	<p>The lengthy implementation timetable is absurd, given the size and growth of Seattle and the surrounding areas. ABSURD. Double the charge on residents to \$400 per year and see what you can do with that. Seattle is getting more visibility nationally given business growth here and the need to support that workforce; additionally transplant residents are accustomed to cities with successful mass transit programs and are finding Seattle's lack of reliable mass transit laughable. How could it possibly be that there are no plans to connect MAJOR outlying housing areas for 17-22 YEARS???!!!!! Seattle is embarrassing itself with this timetable. Pathetic and embarrassing. Please reach out to more colleagues who have the knowledge and sense of urgency to get this done in a reasonable timeframe - something Seattle officials greatly lack. Even Bellevue moves quicker on projects than Seattle does. Get yourselves together. Ask for help. You look foolish. Incredibly foolish.</p>
NORTH KING COUNTY	<p>Q#12: West Seattle and Ballard lines should be higher priority with regard to the overall timeline.</p>
NORTH KING COUNTY	<p>Project timeline is too long to keep pace with Seattle's growth.</p>

<p>NORTH KING COUNTY</p>	<p>These are really long time lines and many land-use and traffic patterns may change in the 20-25 year length of this proposal. I have lived in the Roosevelt/Ravenna area of Seattle for over thirty years. While the original opening of a Roosevelt station light rail stop was to be in 2006, it was later modified to open around 2021. This is now the same time as the Northgate light rail, and very similar to the time the light rail across 1-90 to the east side through Bellevue. It appears that all additional funding is through increased property tax collection, higher sales tax, and higher car tab fees. These increases are in addition to all the fees and taxes currently collected for the first two phases of these projects. While building out to other areas, including near the Boeing plant in Everett could greatly increase the utility of the system, it is too far out. Who can say what the Boeing Everett plant employment numbers will be in 20-25 years to justify that investment? This is a very extensive and a very expensive plan. The taxes and fees will be collected with no end-date, including the ones already approved. Why so long to even implement Bus Rapid transit to some of these areas, as the routes can be changed if demand changes or mistakes are made in frequency of service, and so forth? I feel also that transparency in this process should show voters what taxes and fees are currently being assessed, and for what length of time, for the already approved projects. The UW stadium/Capital Hill link rail stations just opened, after many years of funding. In addition, as a Seattle tax payer, I am paying additional fees for mostly Seattle bus service. I would like to see a detailed accounting of how much the average household--not just the average individual--will be paying if ST3 is approved. The cost of ST3 is estimated to be \$50 billion dollars in new taxes/fees from things I have read elsewhere. For this kind of money, why is the timeline so long? Many current residents may well be retired before the have an opportunity to use most of these additions to transit. Right now jobs and development are booming in Seattle, King County, and other areas of our region. But that may not be the case in the many years ST3 would take to complete. Are there other sources of revenue or funding that could shorten this time line, and lead to less risk for the taxpayers in our region? While this project has many desirable benefits, I believe it could push out other types of projects that are funded from the same revenue streams, especially since the region would not see completion of ST3 projects for many years. Right now, although I think there are many good parts to this proposal, I think it is ultimately too expensive and too far into the future for what the benefits will be.</p>
<p>NORTH KING COUNTY</p>	<p>1) Ballard light rail needs to happen faster. MUCH MUCH faster. 2) The reason I've stopped riding Metro and instead carpool with my husband is because busses between Ballard and Downtown are unpredictable due to traffic, take too long, and are too crowded. Until I know I can show up to a stop without having to consult a schedule (i.e., BRT or rail comes every several minutes) and can know exactly how long my commute will be (light rail is best for this, BRT second best), I will continue to be another car adding to our ever-worsening traffic problem. 3) I, along with many of my friends, are willing to pay large sums to get light rail built faster, and are extremely frustrated with the slow process.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>Improving transportation options from north Seattle neighborhoods to downtown/South Lake Union will take 22 years? My husband and I need solutions in the next 1-3 years. I'm all for thinking ahead, but we'll be retired in 22 years! Transit from our North Ballard neighborhood is unreliable and inefficient, and the endless emphasis on adding bike lanes across neighborhoods and in the downtown core is infuriating. It ignores the reality that many people face -- commuting parents cannot ride a bike when they have children to drop off at school and/or daycare. Anyone with a variable work schedule outside peak commuter hours finds buses to and from our neighborhood a challenge.</p> <p>What I see missing from all the talk about transportation options is the reality that most people still drive and must drive due to work schedules or family commitments. Addresses this reality is a good first step. How about larger "park and ride" type lots at Northgate and along Westlake Ave. with frequent transit into the downtown/South Lake Union core? That would help immediately get cars off the downtown streets and get people using transit. It's an easier first step that could be implemented much sooner than two decades from now.</p>
NORTH KING COUNTY	Consider ways this could be done faster!
NORTH KING COUNTY	The Roosevelt station isn't supposed to be opened until 2021 and that construction project has already begun. A 25 year timeline seems to be too long.
NORTH KING COUNTY	The timetable needs to be cut in half
NORTH KING COUNTY	all projects are badly needed--I shouldn't think there are many people who disagree--and all need to be realized asap. Very hard to think of another 25 years considering the current traffic impasses! Full speed ahead is the word!
NORTH KING COUNTY	<p>Please figure out a way to build a more extensive transit network in _much_ less time than currently proposed.</p> <p>For example: Light rail to Tacoma in 17 years, to Lynnwood in 20 years, and to Everett in 25 years is utterly ridiculous.</p> <p>By the time these extensions are built as proposed, it will be too late to meet the demand of the likely development and population changes in the region, particularly in the north/south corridor.</p>
NORTH KING COUNTY	I strongly support this plan, but STRONGLY oppose the proposed timeline. There has got to be a way to shorten this. Sound transit has to move quicker.
NORTH KING COUNTY	I would support a higher tax if it meant a shorter timeline for these plans. 25 years seems like a long time with our current level of growth
NORTH KING COUNTY	Seattle / Eastside has to move quicker
NORTH KING COUNTY	The buses are packed running from Ballard to downtown. The demand for housing in the Ballard area is unmet and growing to feed into the Seattle employment centers. First priority should be to build out the highest density infrastructure in the City of Seattle where there is the greatest demand and then extend to other areas based on population density and viability of alternative transit options.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I would be willing to pay more, even as a renter who doesn't own property in the city, to have the Link completed IN SEATTLE (NORTHGATE, new G street station, etc) and would prioritize that over expanding to the region. We need city wide solutions now. Put major parking lots at the north and south end of the link rail for the rest of the region to be able to leave their cars out of the city. But, we have to solve Seattle's problem and it can't wait 25 years....
NORTH KING COUNTY	17 years seems like a long time to wait for light rail to come to West Seattle--please break that time frame down to: 1. how long to West Seattle 2. How long from WS to Tacoma. Ballard and West Seattle are two extensions that are obviously needed. I would like for Sound Transit to complete work within the city first before moving outward.
NORTH KING COUNTY	The lightrail service to Ballard and West Seattle should have higher priority given how difficult it is to get to those places when you are limited to the main bridges.
NORTH KING COUNTY	Speed up all the timelines as much as possible. All of this transit work is critical to the quality of life of the citizenry and the viability of businesses in the region.
NORTH KING COUNTY	accelerate the light rail corridor construction in the Ballard & West Seattle zones --- it's imperative!
NORTH KING COUNTY	I think we should focus on less things and get them done quicker so people can start benefiting sooner. For an adult in Seattle to wait this long-they will be retired before they see the benefits. Seattle needs something at the Seattle Center and Space Needle to transport people to different places. The only thing we have is the Monorail and that is mostly for tourists and goes to one place that is easily walkable. I wish the Monorail would extend to go further into downtown.
NORTH KING COUNTY	I understand there are a lot of moving parts to consider here, but 22 years for light rail to Ballard is not ideal - if there is any way to shorten the project timeline for the West Seattle and Ballard extensions, that would be much better for our already over-capacity city infrastructure.
NORTH KING COUNTY	With Ballard and West Seattle having some of the worst commutes, I think the focus should be on bringing the light rail to those areas. Making connections downtown makes the most sense since that is where the greatest concentration of traffic is. I also believe that linking Bellevue to downtown Seattle should be a priority.
NORTH KING COUNTY	Can this be done any faster??
NORTH KING COUNTY	The project costs way too much !!!!
NORTH KING COUNTY	I love everything suggested here! I just wish the improvements y'all're suggesting would come a bit sooner.
NORTH KING COUNTY	How can we build the Ballard and West Seattle lines faster?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	You need to figure out how to make this entire happen faster for the entire plan. In particular, if this passes, projects like Graham Street Station should be completed ASAP. That station should have been built when the initial Link line was built through the Rainier Valley. I don't see why it can't come on-line by the time the Northgate and East Link stations open in 2023 (if not before). The huge gap between the Othello and Columbia City stops needs to be filled. Tons of low income people live near Graham Street and would benefit from easier access to the light rail. The area around Graham Street is also ripe for more Transit Oriented Development within 2-5 minutes of the train. MLK should be ground zero for TOD density, and by extension, increased transit ridership--you know, the kind that helps support a transit system that can really replace cars for people. This should be one of the easiest parts of the plan to complete. Why on earth must it wait until 2036?
NORTH KING COUNTY	At the rate of accidents occurring in Seattle DAILY + the number of new residents coming into Seattle weekly, this timeline needs to be expedited considerably.
NORTH KING COUNTY	would be willing to "donate" to plan to speed up process. Would buy bonds for this project.
NORTH KING COUNTY	17-22 years is way too long to wait to connect West Seattle and Ballard to Downtown via light rail. Seattle's population is EXPLODING. As more and more people move here to work in the Downtown core, but commute from outlying neighborhoods, traffic is only going to get worse. (What happens when 99 finally comes down -- or a truck carrying frozen crab overturns on it? Total infrastructure shutdown.) BRT alone will not solve this constant state of gridlock. Only light rail and other solutions that don't share traffic with cars will make a difference. Stop waiting. Prioritize better public transportation for neighborhoods closest to the city center.
NORTH KING COUNTY	So, best case scenario is that light rail between Ballard and downtown is in 22 years?! :(
NORTH KING COUNTY	If you would like this plan to be taken seriously, I believe a timeline needs to be 10 years. I would be very hesitant to approve a project knowing the benefit would be up to 25 years away, when I would most likely never benefit from it. In 25 years, I may no longer live in Seattle, or may be retired and no longer in need of public transportation. Call me selfish, but I do not like the idea of paying for something I will not benefit from. Put people to work and get everything done at once!
NORTH KING COUNTY	Like, I assume, most people will say, we need a solution that moves faster. given the every growing size of this area, and the incoming large tech companies that will move into downtown Seattle, moving citizens around has reached critical levels.
NORTH KING COUNTY	I feel like Seattle pro
NORTH KING COUNTY	Find the money to make it happen sooner. Rob banks if you have to. We needed this 20 years ago.
NORTH KING COUNTY	Zoning changes in Ballard have radically increased density with little regard to transit and traffic. Light rail to Ballard should be a higher priority.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The transport improvements to Ballard seem much more urgent than the timeline suggests, who knows where the development of Ballard will be in 22 years. Ballard residents need better public transit now, the buses are already overflowing and it will only get worse over the next few years. I understand that light rail projects take a lot of time, but please give some consideration to speeding up the timeline for the ballard transit improvements.
NORTH KING COUNTY	I would not support measures that increase my already high cost of living if I am not to see any reward. 20 years is ridiculous.
NORTH KING COUNTY	I wish the center city projects (West Seattle and Ballard) would be prioritized and moved sooner.
NORTH KING COUNTY	Waaaaaaaaaaaaayyyyyy tooo loooooonnnnnngggggg here, Seattle. Get it together!
NORTH KING COUNTY	We desperately need to expand our light rail services in particular, and other projects in ST3 as soon as we can - I support the ST3 draft plan. The estimated completion times are difficult to hear, but we need to act now -- have a solid plan and present it voters ASAP. Take advantage of this 2016 election year with high voter turn out! Please present us voters with a solid plan to expand our HCT where we need it most for this region, give it the best tax structure possible and completion dates you can. We can't afford to put this off. Keep up the good work and I look forward to voting yes on a solid ST3 plan in November 2016.
NORTH KING COUNTY	You don't know how to get these projects done within budget or time so don't waste our money
NORTH KING COUNTY	The timelines for rail development in this proposal are frustratingly long. I can appreciate the challenges that building out light rail infrastructure will pose, especially in an area like Seattle. However, it will be a difficult sell to get people to sign up for a set of projects that on a best case scenario will be completed by 2050.
NORTH KING COUNTY	Light rail from Lynwood to Everett via the industrial area at Paine field and the section of light rail from Seattle to Tacoma pushed up in the timeline so as to relieve pressure on the I5 corridor as quickly as possible.
NORTH KING COUNTY	Ballard and West Seattle should be priorities first. Also, there should be an acceleration of the plan to 15 years or less.
NORTH KING COUNTY	I think the timeline for light rail to West Seattle should be improved. It is growing here at a fast rate and with only the bridge to get in or out we need mass transit desperately. Please move us up the priority list.
NORTH KING COUNTY	I think expanding the northbound all the way to Lynnwood is priority number one.
NORTH KING COUNTY	South Lake Union keeps getting denser and more expensive, and people will need reliable mass transit out of there to avoid a total traffic meltdown. I think the West Seattle line is the best bet at this, and should be moved earlier in the plan.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>Projects should be phased on their ability to reduce greenhouse gas emissions and address housing affordability by connecting dense residential areas with major employment areas. Given these criteria the Ballard to downtown project should be one of the top priorities for completion. Also this line should also be completely grade separated to increase travel speed and reliability. If there is an elevated rail option that can be completed faster than a new downtown tunnel, please consider this option. The aesthetic criticisms of elevated rail are moot if downtown is underwater.</p> <p>Also for stations in Seattle, ensure that space is allocated for bike share stations.</p>
NORTH KING COUNTY	Light rail needs to get to Boeing at Paine Field long before places like West Seattle that do not have large employers.
NORTH KING COUNTY	Everett and Issaquah should be higher priority than Ballard. Plus I hope this city will learn, and stop trying to build tunnels through downtown.
NORTH KING COUNTY	unbelievable that West Seattle is 17 years out with the rate of development that is happening right now! Also, the West Seattle Light Rail plan dumps that downtown workers at the Stadium or requires them to transfer to another light rail or bus. Seriously? West Seattle should be able to go straight to Midtown without transfers.
NORTH KING COUNTY	Light rail to Ballard should be completed sooner
NORTH KING COUNTY	<p>The Boeing Access Road infill station should be completed in the first phase of construction. It was voted on and approved as part of the first Sound TRansit light rail levy package and should have priority over other proposed projects in the new ST3 plan. Please build it as soon as possible! It is painful to live so close to the rail line and not be able to ride it.</p> <p>Thank you for keeping the BAR station on the list of projects.</p>
NORTH KING COUNTY	I was disappointed to see that the Ballard and West Seattle light rail projects are at the end of this 25 year plan. With city congestion so high, and parking getting so much more difficult, I would love to see the inner city light rail projects prioritized.
NORTH KING COUNTY	I don't have any information on why its more important to put light rail into Redmond or Tacoma before other areas - will light rail in those areas first provide significant congestion relief? Light rail is not coming to Ballard for 22 years and It's really hard to swallow another \$20 gone per month and probably not see any benefit probably in my lifetime here. The rate of development in Ballard has not been supported by transit improvements including recent bus levies in King County.
NORTH KING COUNTY	This needs to be completed MUCH faster than proposed. Additional sources of revenue must be found. Not knowing the details of the funding, it's hard for me to say how. However, this plan will definitely not keep up with the growth expected. This plan provides adequate service for CURRENT population levels, not future. It's frustrating.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I understand planning takes time, but when these projects are not scheduled to come online for 12-25 years, that seems like too little too late. It's difficult to believe the scope of what's planned will actually be filling the future needs of the city when the proposals would seem to only meet current needs. I also don't understand why there is no mention of lightrail on 520, when the new bridge was specifically built to have capacity for that future addition.
NORTH KING COUNTY	Accelerating some of the Seattle metro projects to distribute load across the system and remove additional vehicles from the roads.
NORTH KING COUNTY	your timelines have all citizens waiting patiently for mass transit & by this read those ppl will be retired ! Seattle was thought to be innovative; but my time here has shown the opposite where accommodating everyone fails to provide adequately for anyone. Seattle is how NOT to approach growth...& at what added expense to its tax payers who are being fleeced. What about Bertha? drop & run? what a mess this city is ..& what an embarrassment the city planners are to its population.
NORTH KING COUNTY	We all want improvements in our own neighborhoods, granted. But 17 years for West Seattle? We are choking!
NORTH KING COUNTY	A second tunnel through downtown will help to relieve potential mass transit bottlenecks, and provide flexibility for service options for Sound transit. Accelerating the build out to Ballard makes sense in this timeline.  The taxes approved to fund building will take several years to start accumulating, if there is a program that would allow Sound Transit to borrow some initial funding from the federal dept of transportation, and then pay back using approved tax revenue this might allow for several years to be shaved off of certain timelines
NORTH KING COUNTY	The timelines are ridiculous! I am a huge transit supporter, but as density grows, especially in Ballard, nothing will happen for 22 years. This is the definition of worst plan possible, I may not actually see light rail in Ballard because I could be dead. Most voters will see this and wonder why they should vote for this, the timelines will kill this proposal.
NORTH KING COUNTY	22 years for the Ballard line, which has higher ridership than about any line in any city anywhere (other than NY, DC, Boston and SF), is too long. This needs to be sped up.
NORTH KING COUNTY	speed up delivery of the final products and do not distract efforts and disruption with half measures (BRT, parking, etc)
NORTH KING COUNTY	Would love the West Seattle and Ballard link light rail to be completed more rapidly.
NORTH KING COUNTY	The light rail in the city needs to be completed much sooner than the timelines listed above. Ballard to downtown is a mess now and need attention ASAP!
NORTH KING COUNTY	Project takes way too long to complete. Why are we so embarrassingly behind cities like Portland and Vancouver?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The timelines are way too long and there needs to be additional sources of funding. The average citizen of Puget Sound can not shoulder the majority of the costs of transit expansion. Sources of additional income need to come from developer impact fees, federal government, bonds, etc. Why are there no capital improvement bonds even listed as a funding source? Mass transit is a decade long project so the source of income should be capitol improvement bonds.
NORTH KING COUNTY	Project is too Far Out--I would support if ALL COMPONENTS COULD BE COMPLETED IN 10 YEARS MAX.
NORTH KING COUNTY	Speed up the timeline substantially.
NORTH KING COUNTY	traffic is an issue now, 25 years is too long, we need ballard to downtown on-line now
NORTH KING COUNTY	I think the light rail projects closer to the downtown cores of Seattle and Bellevue should be completed before the outer projects to Tacoma/Everett/Federal Way. In the short term increase express bus service or heavy rail train to these outer areas.
NORTH KING COUNTY	Unclogging the major arteries should be an urgent priority. Getting people moving North-South & East-West in Seattle will be a huge improvement for the region as a whole, especially as housing prices increase and people seek more affordable urban neighborhoods. Adding shoulder bus service or other rapid bus service that doesn't have to jockey with traffic in the meantime while these projects are developed will go a long way to fostering support in the community for increased taxes and disruption associated with construction
NORTH KING COUNTY	BUILD TRAINS FASTER! HURRY!  Also Washington needs an income tax so we can have nice things like trains!
NORTH KING COUNTY	Why 25 years in phases, to complete these projects?! Sooner is better! and the jobs that it would create! Also, I don't like the busses using shoulders because the shoulders should be for disabled cars and allowing cars to pull over so emergency services can pass. Grew up on Boston w/the "wrong-way" busses on the interstate and they didn't last long. Busses should use carpool and have dedicated lanes which can merge into traffic where space is limited. Why busses and not rail. 15 Everett to Renton should have been a option putting -- rail down the center of the highway, not busses!
NORTH KING COUNTY	Time period to complete the above projects would be obsolete as technology is moving faster than light rail.
NORTH KING COUNTY	The proposed timeline is MUCH TOO SLOW. We already need many of these projects NOW, and to wait 20-25 years for completion means that many people voting in November will not be alive to see them finished, while the younger people may mostly have moved away. The last transportation levy passed with over 70% support. The proposed taxes should be doubled (for a shorter amount of time!), and the projects accelerated to be complete by 2030.
NORTH KING COUNTY	Expanding mass transit is phenomenal. It is about time for Seattle to develop robust transit systems on par with cities like Sydney, London, and Medellin. It will be a strong factor in elevating Seattle on the world stage.

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	How many years for the Graham St. Station!?!?!? Didn't the city just approve the station and designate \$10 million for it. Why not build it now?
NORTH KING COUNTY	Far too slow. I was really excited about this until I saw the completion timelines.
NORTH KING COUNTY	Can we use current right-a-ways along major corridors to speed up the extention of light rail to high population density areas.
NORTH KING COUNTY	make it faster
NORTH KING COUNTY	I put strongly oppose for #12 because I would love to see all of this happen before I die.
NORTH KING COUNTY	Advance Ballard and West Seattle Links to earlier completions. Also, it is vital that Sound Transit and any transit improvements closely coordinate with Seattle/King County infrastructure as adding rail and busses to already congested streets nets zero if not negative improvements. Thank you.
NORTH KING COUNTY	We need light rail to West Seattle/ Ballard much, much sooner than 20+ years.
NORTH KING COUNTY	I wish we could put these projects on a "fast track" -- I will be elderly by the time we have light rail to Ballard!  Also, the new light rail stop at Husky Stadium is great. But it's really unfortunate that it was designed without a safe place for transit users to be dropped off or picked up. Realistically, people who live a few miles away are not always going to be walking or biking to the station. The buses that "feed" the station are not frequent enough - or go to enough destinations frequently at "off times", or easy enough to walk to (in the dark, in the rain, with lots of baggage...) - to be completely relied on.  I am so excited, though, to finally see light rail coming to fruition, and can't wait for the system to be extended further. (I live right near the future Roosevelt station.)  Thank you!
NORTH KING COUNTY	It is unreasonable to ask people to support things that won't happen for 22 years. Don't start taxing people until two years before construction begins.
NORTH KING COUNTY	West Seattle cannot wait 17 years for light rail given the thousands of new apartments built and influx of residents wanting to move to West Seattle to be close to jobs and events downtown. If the timetable was moved up to start sooner and be completed sooner I would be willing to pay more than the proposed costs and imagine many other West Seattle residents would as well. We also need to take more of an environmental stance and charge trucks and other large polluters more for the roads they use to help fund such a project.
NORTH KING COUNTY	West Seattle is included in only one of the plans and the timeline is too long. Bus service is already over flowing and development continues at a rapid pace in West Seattle. Please provide light rail to West Seattle as soon as possible.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>It seems to me that one of the major considerations of the scheduling of this work should be scale of impact - both in terms of the population size, and the severity of traffic in the region. Based on that, I would prioritize the west Seattle and Ballard light rail lines over the Issaquah and Kent expansions.</p> <p>Additionally I am concerned about the reliance at grade light rail in the Ballard line - the current stretches of at grade rail seem to be the greatest source of system delays in the current lines, so avoiding additional at grade rail seems like it would be a priority.</p>
NORTH KING COUNTY	Focus on North / South lines (Ballard to West Seattle)
NORTH KING COUNTY	I think the timeline for West Seattle link extension needs to be reconsidered. The current Rapid C is extremely full and uncomfortable during peak times now. There are several new apartment buildings that have gone up in the Junction and several new ones currently being built. Some of these are micro housing, which means the residents may not have cars and will need to use the transit system to get to work and to the city. The population expansion in West Seattle will be huge and cannot be supported by the current bus system and with an already very congested West Seattle Bridge, it is going to be very hard for the residents to leave the area.
NORTH KING COUNTY	Find a way to design and construct the projects FASTER. 25 years is too long to wait stuck in traffic!
NORTH KING COUNTY	We should build all of this faster! We're already playing catch up as a major metro area with very little transit infrastructure-- it shouldn't take 20 years to build light rail to Ballard, we should be able to do that in 10!
NORTH KING COUNTY	<p>The Graham Street station needs to be completed sooner!!</p> <p>Please work to bring us all these awesome projects earlier!!</p>
NORTH KING COUNTY	I remember similar plans from about 25 years ago. Those didn't happen, and the city is suffering as a result. I don't want to see those same mistakes made again. I support building these resources ASAP.
NORTH KING COUNTY	The line to Ballard needs to be on a shorter timeline or most North Seattle voters won't even look twice.
NORTH KING COUNTY	Projects should be prioritized by immediate need & projected ridership. Ballard should happen much sooner than 22 years.
NORTH KING COUNTY	Faster, please
NORTH KING COUNTY	Light rail to Ballard and West Seattle NEED to be completed sooner than 22 years. How does using the existing downtown transit tunnel speed up this crucial connection between highly dense areas?
NORTH KING COUNTY	The timeline is not fast enough, maybe you ask for more money, add in more light rail through Seattle, you can work in the same amount of time but have more funds to complete more rail projects during the timeline.
NORTH KING COUNTY	The transcontinental railroad took 6 years to build from St. Louis to San Francisco. It is the theater of the absurd for you to propose getting a train out to Ballard in 22 years. To ask me to pay additional taxes for over 20 years before any benefit is seen in my neighborhood, which has experienced some of the fastest pace development and population increase is short sighted and stupid. Find some federal money and come up with a better proposal to build faster, or forget it.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The ballard and West Seattle lines should be prioritized! 25 years? Are you kidding?
NORTH KING COUNTY	West Seattle needs to be done yesterday. Everytime I go over the bridge it takes at least 15 minutes and that is not in rush hours. They are building a lot of apartments in West Seattle and the population is growing rapidly. Once Bertha and 99 get back on track, we will be stuck over here.
NORTH KING COUNTY	These projects need to be completed on a much quicker timeline than 25 years
NORTH KING COUNTY	I support Sound Transit, but the timing should be 5-10 years, not 20-30. If I could go from West Seattle to Ballard in 5-10 years I would be supportive of the project. The entire project as outlined should be done in 5-10 years.
NORTH KING COUNTY	Your project is another example of hijacking the taxpayers within insane tax increases. If one rents, is the landlord supposed to eat those hefty tax increases? I doubt it. The renter is going to have to suck it up. Sales tax at 10.4% That is insane. The people in Vancouver voted down a proposed massive increase to TransLink. It was voted down by 62% of the vote. Your proposal is insane, taxpayers get fleeced, and it will be another poorly managed slush fund for unqualified bureaucrats to manage. It belongs on the bottom of Elliot Bay.
NORTH KING COUNTY	Contractor bidding process should be open and public knowledge. Contractors should be subject to hard penalties for missed timelines and budget overruns, including potential personal liability -- if they cannot judge a project's scope and function well from the beginning they should not submit a bid for the work.  Construction should happen faster, allowing for disruption of traffic and including night work in order to not drag out project timelines. Instead of 25 years it should be 8. If Seattle wants to continue it's growth it's growth needs to happen now.
NORTH KING COUNTY	Given that our region is starting very late in developing a comprehensive light rail system, my feeling is that the North - South light rail lines be an absolute priority. Much attention has been given to south end travel. We need an extra push to bring the north King Co. and south Snohomish Co. to completion. Also, a way of getting from west Shoreline to downtown Bellevue/Kirkland is needed. Finally, I thought that there was going to be a light rail station on 185th Street in Shoreline, roughly where Shoreline Ctr. is. I do not see this on the map above. It is a critical stop that would serve north King and south Snohomish Co. residents.
NORTH KING COUNTY	17 years before we have a real mass transit option that doesn't also get snarled up in road traffic for connecting West Seattle to downtown Seattle? Very disappointing to see that timeline.
NORTH KING COUNTY	I don't know a lot about the data, and I can see how it might help to clear congestion by focusing on projects that clear congestion from commuters outside the city, but as a resident who lives in the city with no car intentionally, I find the delay in projects like Downtown-Ballard, Downtown-West Seattle to be concerning. I hope you can find a way to prioritize better transportation for residents who live in the city as well as the commuters who are causing traffic in it.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>Projects need to be completed sooner than the plan proposes. We are in traffic gridlock in our city because of all these new residents. I have spoken with many longtime residents of Seattle, and resentment is building amongst them.</p> <p>I am also concerned about the access to our neighborhoods that drug and alcohol addicted people would receive. We have seen many new problems in our neighborhood since the installation of the tent city in Ballard. We've had people living along the train tracks and using people's water hoses, yards, and hanging out in Carkeek Park. They gain this access to our neighborhood because the bus stops right behind QFC on Holman Road, and there is access to Carkeek Park just a few yards away. It's no longer safe to walk the trails in the park. People are smoking marijuana there and hanging around all day. It's so unfair for all of us who pay our taxes and are responsible citizens. I would like to know how the planning for the new transportation would limit potentially destructive and dangerous people from ruining the relative safety that citizens experience in neighborhoods of Seattle and cities such as Edmonds. Would more police presence be included in the plan?</p>
NORTH KING COUNTY	<p>This timeline is way too extended. With the brilliant people who live in this region, let's find a way to speed it up - ideally either a light rail line that travels the length of I-5 from Tacoma to Everett as the first priority with extra buses to supplement spurs from there. Also, you need to find a way to lower this cost for homeowners while still charging renters in this area - there are way too many of us who take advantage of public transportation that don't own a home -- ideally you could get more sooner while still charging each individual less. How can the big businesses who are booming our city help? Amazon in SLU, REI moving to Bellevue, Boeing and its Lake Stevens crew -- how can they help. Let's move quickly on at least one stretch of this and let all the people know that their money is being used quickly and efficiently!!</p>
NORTH KING COUNTY	<p>The time to get light to Ballard is way too far out. What can be done to accelerate that timetable?</p>
NORTH KING COUNTY	<p>The timeline is absurd! Ballard to downtown and Ballard to UW need to happen ASAP!</p>
NORTH KING COUNTY	<p>Everything needs to happen faster. It's ridiculous that Graham Street station doesn't come on line until 2036. That should be finished by the time Northgate and East Link open. It's a prime TOD opportunity and the longest gap on the existing south end light rail route. Ballard and West Seattle trains should happen faster too. The goal should be to finish all this by 2030. Let's bite the bullet and just get it done, even if it costs more. Otherwise, many of us will be dead by the time this stuff gets finished.</p>
NORTH KING COUNTY	<p>You will get a lot more support for ST3 if the timelines can be moved up for light rail. Many are saying that they will be retired before the rail is built. They are short-sighted, but they are voters.</p>
NORTH KING COUNTY	<p>Ballard should not be last on the list</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>Can't cry over what's already done, but this [explicit] should have been built 20 years ago.</p> <p>I absolutely hate the timeline. Hate it. My parents generation will be geriatric or dead by the time this is complete. I'll be an old man. That said, I don't plan to [explicit] over posterity by voting against it. That said, hurry it up. I don't care if I have to pay more for it. I'd rather pay more now and be able to use it later.</p>
NORTH KING COUNTY	<p>The way Ballard is growing and the number of people here using busses, and the traffic on 15th, it seems like Ballard should be sooner on the timeline.</p>
NORTH KING COUNTY	<p>I realize ST has to start somewhere... but it would be nice if you started with West Seattle. Although West Seattle is Seattle's largest neighborhood, it seems to be consistently overlooked or ignored. It's already a challenge getting off this peninsula and we won't have light rail for 17 more years? Bus service, while decent, ends up sitting in the same traffic jams and with the recent uptick in population, those jams will continue to become more problematic. Please consider moving West Seattle to the head of line. Thank you for your time.</p>
NORTH KING COUNTY	<p>I am SHOCKED that the proposed rail line to Everett would not arrive for 25 years! Many of my friends and family sit in traffic for 2-3 hours EACH WAY commuting from Snohomish into King County. With the rail lines along the water essentially not an option for many months of the year due to mudslides, we're left with one option: driving. From a cost, climate change, and cost of living point of view, please don't ignore Snohomish County!</p>
NORTH KING COUNTY	<p>This plan is flawed not only because there are too few lines and stops within Seattle (where many people do not drive, and whole neighborhoods are left out of these proposed lines), but also because it will take a ridiculous amount of time to implement. Light rail from Ballard to Downtown should not take 22 years. Furthermore, light rail lines from Ballard to the University District and through the Central District/South Seattle should also be included.</p>
NORTH KING COUNTY	<p>I love that we're investing in transit, but 22 years until we can connect Ballard to downtown!? I do believe that it's important to connect outlying neighborhoods and where people will be, but the focus of our investment needs to be on where people are at now.</p>
NORTH KING COUNTY	<p>I answered in the "strongly needed" categories on most questions. These rail and bus line improvements should have been done yesterday. I am totally in favor of going forward with all of these items, but as you noticed, I do not ride any of the transit services currently available...they do not go where I want to go, and even if they do, they take so long I find them very dysfunctional for making meetings, work, etc. I would gladly begin using services if additional lines were added.</p>
NORTH KING COUNTY	<p>Investigate methods to speed up the plan significantly.</p>
NORTH KING COUNTY	<p>Why does it take so long? The timing is ridiculous. We need to be able to reliably navigate the city NOW. 30 years is 60 years too late! Connecting Ballard to UW via rapid transit sooner rather than later would be a huge, much needed improvement.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Ballard should be a priority. There is so much density and new construction. The timeline is horrible. We needed this yesterday. Additionally, all of the rail should grade separated and not have to compete with traffic or what's the point? I've used rail in London, Paris, San Fran, Chicago--we need to do this right. It will never get any cheaper.
NORTH KING COUNTY	As a government contractor, I understand many of the seemingly arcane rules and regulations that impede the pace of progress. However, I firmly believe that the ST3 draft timelines are inconsistent with the reality of a growing metropolis. I respectfully suggest to imagine a scenario where the major infrastructure in the greater Seattle area was destroyed by an earthquake. How quickly would the city and county rebuild? I truly doubt it would take a quarter century to accomplish those tasks. There must be a faster, easier way to achieve these goals. By the way, does ST3 take into account our projected population growth, or will we constantly be building for the present and ignoring the future?  Ps On an unrelated note I firmly believe that Bertha was an absolute waste of time and money, and I implore you to ignore such boondoggles at all costs.
NORTH KING COUNTY	Its selfish to be sure - but focusing on Seattle's core before reaching outward seems smart to me... waiting 20+ years at current growth is a rough sell.
NORTH KING COUNTY	Build Ballard to Downtown as soon as possible. It has the best ridership and should be prioritized. 22 years is too long!
NORTH KING COUNTY	Graham St. station needs to be completed ASAP. Population density is in South Seattle. The distance between Columbia City and Othello stations are too far apart. Graham is a busy thoroughfare and links residents of Rainier Valley together.
NORTH KING COUNTY	I am curious if the light rail projects would be completed sooner if they were made a higher priority than the BRT. The success of BRT programs will always be limited by highway infrastructure and traffic, and my guess is that these limitations will get worse with time. The BRT may get running sooner, but it will also become constrained sooner. Not so with light rail. So it seems that focusing on getting light rail up and running ASAP would be a better long-term investment than devoting resources to the BRT first. Seattle is already many decades behind in its light rail development, the sooner we start catching up, the better.
NORTH KING COUNTY	With apologies to Paula Cole, I don't want to wait for our lives to be over before Ballard Link is available. We should have built it 30 years ago. (If I had been alive at the time, I would have done everything in my power to help Forward Thrust pass.)  I will certainly vote for ST3, pretty much no matter what. But it's really a shame that we can't borrow money and build faster, especially the line that is expected to have over 130,000 riders per day.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I would love to see two things. Construction on Seattle (West Seattle, Ballard) rail lines set as priority number 1, with construction at the same time as East Link. Second, I would love to see a real dedication to truly affordable below market-rate housing (no less than 50% permanent) at and near transit stations. Public transportation should positively affect all communities, but especially aid lower and middle income residents (people who rely on public transportation).
NORTH KING COUNTY	My support for this comes from dire need. Parts of the greater Seattle area are virtually inaccessible to me, like Des Moines (from North Seattle). But even Beacon Hill at random times of the day becomes inaccessible because of the traffic. These projects are sorely needed and so I think "meantime" solutions are ESSENTIAL--while people wait 8-25 years for projects, things like buses in the shoulder will be so necessary. I am from Seattle, I don't have a car, and the traffic alone makes me want to leave my hometown of 30 years. Please do something to ease transportation while we wait for the next project to be completed. Thank you for listening.
NORTH KING COUNTY	I think many people in higher income brackets would welcome an increased tax burden in exchange for speeding up these plans--traffic here is already one of the worst grids in the country, and it's going to get exponentially worse as density rapidly continues to rise. I am also curious as to why citizens (sales/use), drivers and households are all expected to contribute to the funding (meaning many people will be triple-taxed for it), while there is no provision for businesses etc. to contribute to the funding, even though they are ostensibly the primary cause of the population boom. Why are we making developers pay linkage fees in order to prevent an affordable housing crisis, but not asking businesses to pay into affordable transportation to avoid further traffic problems? Going back to the topic selected above, light rail to the airport taking 20 years is really not a tenable goal, since it's currently one of the fastest-growing in the world, and it's very expensive (in time and money) to get downtown from SEA. BRT is a much higher priority than I previously rated, in light of how long the projects are scheduled to run (maybe that information should come before people rate short-term solutions, rather than after?)
NORTH KING COUNTY	<p>&gt;Interested in seeing these projects completed sooner. Would like to see action by cities and counties to speed up permitting, public outreach, etc. so we can get this all online faster (Think China!! ;))</p> <p>&gt;Would have liked to see more capital projects associated with cities giving increasingly more ROW to transit. ST Express is the workhorse of Sound Transit and could be even better if it had more HOV lanes, light priority, and other ways to get advantage over cars and out of SOV traffic.</p>
NORTH KING COUNTY	Why don't you try something radical, and build as much as you can, as quickly as you can. Multiple projects going on at the same time. The region desperately needs this system, but waiting until 2023 or later for segments to be completed is ludicrous. Build it all at once, so that the impact on our roads, which affects transit as well as freight and passenger vehicles, is mitigated.
NORTH KING COUNTY	Speed up the timeline

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I really support this project, but the timeline is ridiculous. With all the people moving into the Seattle area, a 25 year plan to improve traffic is little better than no plan at all. What would it take to complete all projects in ten years? We need results that can be used within two-three years, yet the earliest completion date proposed is 8 years. Frankly, I'd be willing to pay double in taxes to get results in a timely manner.
NORTH KING COUNTY	Can we go faster?
NORTH KING COUNTY	These timelines are not acceptable. We need world-class transportation now. This country put a man on the moon in ten years and won World War II in four. Twenty-five years to complete these projects suggests appalling lack of creative thinking at the top of this organization.
NORTH KING COUNTY	Find ways to deliver faster. Put the emphasis on where the ridership is highest and demand is greatest. Ballard in 22 years? Have you visited there lately?
NORTH KING COUNTY	I recognize that project timelines are based on a wide range of factors including revenue streams, engineering work, and the environmental impact statement process. However, I would strongly urge Sound Transit to find ways to accelerate the delivery of critical light rail lines, particularly those serving Ballard, West Seattle, and Redmond.
NORTH KING COUNTY	The size of the package should be increased so that priority projects can be completed more quickly. People expect major transit projects to come online long before 2035 or 2042. We are willing to pay more taxes to bring these critical transportation assets to reality much faster.
NORTH KING COUNTY	I feel very strongly that we should focus on connecting all parts of our city before we expand out into the suburbs when it comes to the light rail. Ballard should be the first place we expand to, as well as West Seattle. It should not be tacked on as a last project 25 years from now. Right now, it's extremely difficult to get throughout the city with public transportation. My fiance travels less than 4 miles to work every day, but because of the way public transportation operates right now, he would have to take TWO buses to cover that short distance. Instead, he drives every day and gets very frustrated with traffic. We need to connect our city first!
NORTH KING COUNTY	Everything needs to be built FASTER. The people in this region are making up for time lost by our previous bad decisions of Forward Thrust and the original Sound Move plan. If ST3 passes, ST should be more aggressive in obtaining property rights, and building in the most time-sensitive manner. Furthermore, the size of the district should be increased to bring in more revenue and start planning for needed transit services and future expansions both across the Sound (Kitsap), the south (Thurston), and north (the rest of Snohomish County).
NORTH KING COUNTY	Get light rail to the NW part of Seattle first (e.g. Ballard). NW Seattle always gets the shaft. More buses are a waste of money. "Bus Rapid Transit" is a myth. It should not be a priority. I will definitely vote against any plan that puts buses ahead of light rail to NW Seattle.
NORTH KING COUNTY	I was reading that you may even be able to complete some of the projects faster than the proposed timeline given the increased use of the new light rail lines. I would like to see the completion times starting sooner than 8 eight years. I would hope you could find some projects that you could complete in 2-3 years given the increased revenue.
NORTH KING COUNTY	25 years is far too long, it should be reduced to 5 years!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Up to 17 years to get lightrail to/from West Seattle is TOO SLOW given the enormous amount of residential growth in the community.
NORTH KING COUNTY	This needs to be done far sooner than fifteen to twenty years. That's stupid to take so long.
NORTH KING COUNTY	I would like to see Light Rail come to West Seattle sooner than 17 years. We are isolated out here on this peninsula with a lot of people and very few ways to get to Downtown Seattle without using the already clogged West Seattle Bridge.
NORTH KING COUNTY	22 year for Ballard? Thats crazy! We need it now! Taxes: opposed to sales tax, it's a regressive tax. Fully suport property tax!
NORTH KING COUNTY	25 years is way too long. I'd much rather see a 5-10 year timeline.
NORTH KING COUNTY	I think Ballard needs to be figured out quicker than 22 years from now. It is already a horrible commute. There also should be better cross-town (east/west) solutions in place for north Seattle - Ballard to UW, Lake City to Northgate, etc. - implemented quickly to take better advantage of the existing light rail development.
NORTH KING COUNTY	Ballard needs more transit options to get to various parts of the city. To get anywhere other than Fremont, downtown and the north, it takes 2 buses and over an hour. Especially since it is so far from I-5, this is a travesty. Frankly I am outraged to hear that nothing is going to change as far as Ballard transit is concerned for at least the next 22 years.
NORTH KING COUNTY	I probably won't be around in 17 years, though the impact of a lightrail to West Seattle would be amazing. That would cut my commute time down from over an hour, which would be a vast improvement to the current system! But timelines on this just seem so crazy far away.
NORTH KING COUNTY	We are lagging other cities with mass transit options. The addition of the two Link Light rail had an immediate impact on my behavior and I have used it consistently when needed to get downtown. This is despite having to walk/bike 2 1/2 miles to the UW station (there are no viable bus options time/location).  I would see what we can do to accelerate the schedule so that we catch up at a minimum.
NORTH KING COUNTY	Focus on light rail before expanding the bus system. If the light rail is done properly, the additional bus system modifications may change again.
NORTH KING COUNTY	Light rail to Ballard sooner!
NORTH KING COUNTY	To be quite honest, I will NOT vote for ST3, and will mobilize against it in my community if the Graham St Station timeline is not pushed up. Please include Graham St Station as an early deliverable system access project. Graham St Station is critical to allow one of the region's most transit-dependent communities to have walkable access to the light rail system. A plan that spends \$1 billion on suburban parking lots and requires us to wait 20 years for an inexpensive project that would increase walking and biking does not reflect the values of Puget Sound. I and many in my community will not vote for the plan in its current form. We need Graham St Station NOW!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The completion timelines are ludicrous, we need public transit 10 years ago, not a quarter of a century from now. Whatever it costs to get it done faster is worth it, as it is costing the whole city money every day that our insane lack of infrastructure continues. Why not work on the whole system at once instead of building it in little pieces? Get the construction delays and troubles over with all at once, and be done with it. The payoff in the end is worth it. The only reason I currently do not use transit is because I work in the Central District and live in Ballard, and there is no way for me to get to work in less than ~90 minutes on the bus. This type of ineffective transit will eventually harm the whole region's growth.
NORTH KING COUNTY	I am disappointed in the length of the projected timelines -- I would love to see the West Seattle rail before my son (now 3) graduates high school.
NORTH KING COUNTY	<p>Light rail to Ballard needs to come first and far sooner, with West Seattle closely behind.</p> <p>Light rail from Ballard -&gt; UW needs to be fully included in ST3</p> <p>Focus should be on building out from the urban core to maximize return on investment.</p> <p>Light rail along Denny between LQA and Cap Hill/Madison Valley needs to be studied and shovel ready in ST3</p> <p>Light rail from UW - Eastside along 520 needs to be studied and shovel ready in ST3</p> <p>Construction of park and rides should be minimized and parking fees assessed.</p> <p>TOD needs to be scaled up around light rail stations - coordination with local jurisdictions for increase in zoning limits</p>
NORTH KING COUNTY	I support the prioritization but am not happy about the timelines. I understand SEPA takes time. Could planning be done more effectively in parallel? The all the alignments will not be known, but for those segments that are fixed will real estate be acquired, engineering started, etc? I know ST is doing everything they can to speed up the build-out, but I hope you are continuing to think creatively and aggressively.
NORTH KING COUNTY	Please hurry. We're all upset about our rapid growth and traffic. Thank you.
NORTH KING COUNTY	<p>Speaking as a Ballard resident, I must say that I am pretty dismayed that the light rail is slated so far out. Please consider prioritizing.</p> <p>Also, while I'm fine with most of the tax proposals, I am strongly against any increase in the sales tax, as studies show this tax disproportionately effects the poor. WA state already has the most regressive tax system in the country.</p>
NORTH KING COUNTY	It feels like this doesn't account for the increased density in Seattle, where roads are constantly being clogged.
NORTH KING COUNTY	The timelines need to be brought forward if any impact is to be made on the increasing transit issues in the city. Can alternative faster options also be presented to voters that may cost more money?
NORTH KING COUNTY	Move up completion of the Ballard to Downtown line. It is by far the most significant improvement in transit and will provide the highest return on investment to the tax payer.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Waiting and paying for light rail to and from West Seattle is ridiculous. I am 63 and waiting 17 years for light rail... really and you want me to pay for it now? If you want my support and you would have it hire more people to complete all of the projects in a timely manor so we can get the city moving. I also wonder if you really expect the people of West Seattle to live here 17 years while paying for no benefit. How many of those people do you expect to move in 17 years? Sorry but no support here.
NORTH KING COUNTY	We need non-street level transit asap! It'll help make the Sound affordable for those being priced out of the region.
NORTH KING COUNTY	Please be safe while doing it, but move ahead ASAP.
NORTH KING COUNTY	Light rail to Ballard in 22 years is untenable and deeply erodes my household's support for this package. Please find a way to move this project forward on the timeline.
NORTH KING COUNTY	I feel like the Ballard line should be prioritized. As 22 years is a very long time, and Ballard is a very popular spot with less and less accessible parking options.
NORTH KING COUNTY	West Seattle and Ballard should be the first projects that are addressed. The current timeline is unacceptable, especially if both stay on the current population growth track due to endless condo projects. I'm not alone in comments about this timeline when I speak with friends, co-workers and neighbors who commute to the downtown core. As a resident of West Seattle, commuting options need to change in the metro area WAY before they do in the suburbs. We have NO dedicated bus lanes, not enough buses (we are often passed by at bus stops by overloaded buses during commuting hours) and there is no way to get to/from downtown in a timely manner during commuting hours without significantly impacting our personal lives. Unless West Seattle and Ballard are moved to phase 1 of this schedule, I will vote against the entire project.
NORTH KING COUNTY	Should accelerate timelines. Would support paying more for a compressed timeline... We need to complete this sooner!
NORTH KING COUNTY	The fact that the zoning laws have changed in the Seattle city limits whereby developers aren't required to provide an equal number of parking spaces per units created is nutty planning. If the city is trying to promote less cars, it would seem that it would be a priority to encourage the use of mass transit. Until there is better light rail, it is going to be impossible to leave or get into West Seattle--it sometimes takes 45 minutes to get off that bridge. There are so many apartment buildings going in here and there is NO or very limited parking associated with each of these buildings. I have a car on the street and if it was easier and didn't take so long to get from one place to another, I would consider giving it up completely. Ballard is the same way.
NORTH KING COUNTY	These are incredibly long timelines. I'd like to see more short term plans or more aggressive negotiating to shorten the timelines on these plans. Also, more progressive revenue sources.
NORTH KING COUNTY	I think the West Seattle and Ballard light rails should be priority projects as it is difficult to get in and out of these neighborhoods.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Please bring the Bus Rapid Transit (BRT) on SR 522 and NE 145th Street in closer to the opening of the 145th light rail station. Also, the additional 300 stall parking structures along SR 522 - one in Bothell, one in Kenmore, and one in Lake Forest Park - to provide access to BRT is very important.
NORTH KING COUNTY	Construction is way to slow. I voted for light twenty years ago and it's just now being completed. Seattle needs better transit options, not in 25 years but as soon as possible. I was young when I voted in 1996 I might be dead by the time the next stage is finished. In 2008 I visited Shanghai, I bet between then and now they have built 50 times as much light rail as Sound Transit. Granted the political environment is way different but still, 50 times?!!! Come on Seattle isn't that backwards slow is it?  Sound transit should care more about getting stuff done then about political expediency and inclusiveness. Have a vision and make it succeed before we are all dead.
NORTH KING COUNTY	Projects are important and important to get right, but 25 years is an incredibly long time from now.
NORTH KING COUNTY	Build it quicker.
NORTH KING COUNTY	If sales tax increases by 1.0% (a large number, but with potentially wide support), could most initiatives be completed within 8 years?
NORTH KING COUNTY	It's a shame the completion timelines are so far out -- I would strongly support every aspect of this plan if there was a way to devote the money and human labor to make it happen faster. I don't even know if I will live in this area when these projects are complete. It's all very needed, however, and I'm glad there is a plan underway to increase public transit.
NORTH KING COUNTY	I wish this could all be done 10x faster.
NORTH KING COUNTY	I know it is difficult, but we really need these rail expansions like yesterday. Happy to pay more or live with the disruption of cut-and-cover to move this up by five or ten years.  I also strongly feel like cross-town Seattle rail routes are essential. Cross-town (east/west) travel in Seattle, especially along 45th or Mercer/Denny is unspeakable. Would truly love to see Ballard/UW, or a Metro 8 subway line - again, happy to pay more or live with the disruption of cut and cover for awhile. Horrifying to me to think these essential projects might be 40 years out!! This is so necessary.  Seattle is growing rapidly and we need to move quickly. I know Sound Transit is just keeping it real about the political realities of doing business in this town (and I appreciate the honesty), but anything we can do to speed this process is greatly appreciated.
NORTH KING COUNTY	Taking way too long. The transcontinental railroad was built in a fraction of the time. Sound Transit should look at a private-public partnership and get the work done faster. 40 years is too long to wait to relieve traffic congestion.
NORTH KING COUNTY	Focus on solving Seattle's traffic issues before expanding to surrounding suburbs.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I feel like Seattle is already behind in transit would support a faster timeline.
NORTH KING COUNTY	My experience is traveling from West Seattle to Ballard and back every day. I travel by car. I wish I could travel by bus or light rail, but the bus is too slow and uncomfortable (packed) and light rail doesn't exist on this route. 17 years! By the time it is done it may not be of any use!
NORTH KING COUNTY	More aggressive financing should be used to securitize future tax receipts, allowing project timelines to be accelerated. I'm sure the muni departments at a lot of big banks would love to talk to you. In addition, projects in areas with the highest forecasted population growth should be prioritized.
NORTH KING COUNTY	I understand that projects of this scale take time but light rail projects should be priority, seeing they add no congestion to any roadways. A faster timeline to light rail expansion is needed.
NORTH KING COUNTY	Focus should be more downtown areas and then expand to other surrounding areas. We needed to fix the infrastructure of Seattle first.
NORTH KING COUNTY	The project phasing plan represents Sound Transit's priorities -- which appear contrary focusing on higher ridership areas first. This is a peanut butter approach to extending light rail to the ends of the earth first and then going with denser more productive areas like light rail to Ballard and West Seattle near the end. I cannot in good conscience support this draft plan, as written. A revised system plan should prioritize at least one of the Seattle corridors to finish it in the late 2020's and work on the 2nd downtown Seattle tunnel should begin immediately after the successful vote. That will take time and effort for environmental considerations, engineering, etc. Lastly, I won't support a diversion of light rail to an industrial area like Paine Field or lots of excess publicly built parking. Parking should be accommodated as part of TOD-planning and private developers should provide parking as the market will bear. This will help save money to speed up the extension of light rail.
NORTH KING COUNTY	I sincerely wish that the West Seattle transit improvements would be on a shorter time line.
NORTH KING COUNTY	This is too many years away. Can we build it faster?
NORTH KING COUNTY	It seems like it only makes sense to prioritize the extension that would add the most new riders to the system first. The Ballard to Downtown line is such a vital piece of the system that it should be moved to the top of list of priorities with a much sooner completion date target.
NORTH KING COUNTY	Anything that you're saying take more than 15 years should be in a future proposal ST4...ST5...  GET IT ALL DONE IN 15 YEARS OR LESS...CHANGE A YOUR MINDSET TO 'POST NATURAL DISASTER REBUILD' AS APPOSE TO YOUR 'PLAY IT SAFE' OR 'SLOW AND STEADY' CONSERVATIVE APPROACH!!!
NORTH KING COUNTY	Complete the Seattle components far earlier. They are essential. Tax Seattle residents more if necessary to fund earlier completion.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Timeline is far too long - 22 years until Ballard? And the first line will be open in 8 years? The first 28 miles of BART began running 8 years after construction first started ( <a href="http://www.bart.gov/about/history/history3">http://www.bart.gov/about/history/history3</a> ). I support ST3, but you have to figure out how to reduce the timeline. Maybe 8 years is unreasonable, but under 20, at the very least.
NORTH KING COUNTY	When I originally saw the plan, I considered the project completion times to places like Ballard and Tacoma to be par for the course in terms of large infrastructural expansions. However, this article ( <a href="http://www.thetransportpolitic.com/2016/04/06/youve-got-50-billion-for-transit-now-how-should-you-spend-it/">http://www.thetransportpolitic.com/2016/04/06/youve-got-50-billion-for-transit-now-how-should-you-spend-it/</a> ) has changed my mind significantly. The plan's focus should be on expected ridership. In the long run, expansions within Seattle will have more riders, generate more revenue, and cost less for the tax payer. Though not immediately "fair" or "equitable" to suburban commuters, building rail in denser, more rider-prone areas is wiser prioritization. Leveraged in the way of the article I provided, a plan with more expedient light rail construction within Seattle and to Tacoma could surely pass in November.
NORTH KING COUNTY	We need to open Ballard to West Seattle LRT as soon as humanly possible. We need to speed up the timeline. This is THE most critical project in terms of ridership and cost effectiveness in the entire ST3 project, next to BRT improvements to the existing RapidRide C and D lines which are relatively cheap and very important.
NORTH KING COUNTY	Transit is terribly behind demand. Compare this city to Vancouver, BC where they have an automated metro system to efficiently carry people as well as an expansive above ground system. Link is nice, but lacks the convenience and efficiency of a true metro that the city deserves. I'm extremely supportive of public transit, but the programs you're embarking on now should have been completed decades ago.
NORTH KING COUNTY	The timeline is too long. We are a transit supporting household but are leaning towards voting no due to the timeline. The Ballard and West Seattle light rail lines need to be prioritize before the other light rail projects. I say this even though I do not live in these neighborhoods and am dependent on the overcrowded E Line for my transit needs.
NORTH KING COUNTY	Ballard service and center city light rail improvements are coming too late in your priorities list. 22 years is too long for Ballard given the potential for ridership. Should be a build out from the center approach.
NORTH KING COUNTY	This project must be completed in a faster time frame. There must be a way to expedite the process. Multi projects should be simultaneously being performed.
NORTH KING COUNTY	Must spend more to get it done faster. And Ballard should be 1st in timeline.
NORTH KING COUNTY	It would be nice to have it faster and cheaper. \$50B seems like a lot of money, but maybe it would help to see how that is broken down by station and extension of rail and how it compares to the cost of building the existing links.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>The timeline is way too long, and this is perhaps the biggest problem. Other cities larger than ours have completed comprehensive subway construction in half the time we're proposing to have a single line done. The timeline is unacceptable. For transit options that we need tomorrow, we can't wait until existing workers are retired or dead.</p> <p>Also, at-grade rail to Ballard with a drawbridge holdup is two steps back. Mass transit rail should avoid being at-grade wherever possible.</p>
NORTH KING COUNTY	<p>I would strongly support both the plan and the funding if priorities were changed. West Seattle and Ballard should be moved way up on the list. These neighborhoods have been hugely impacted by urban growth and largely bypassed in planning.</p>
NORTH KING COUNTY	<p>Link to North Seattle should be moved to the front of the projects list. More people live north and commute to downtown than live on the Eastside.</p>
NORTH KING COUNTY	<p>We need this yesterday not 17 years from now. Why is it going to take this long? By the time it gets built it will be outdated.</p>
NORTH KING COUNTY	<p>The timeline for completion is far too far out.</p>
NORTH KING COUNTY	<p>I am a homeowner and daily light rail user in Columbia City. So as a property tax payer, I'm all for this plan! Seattle is already a large major city and we need the infrastructure of a major city -- most importantly, light rail. Grade-separated transit is a necessity in any large city, but I'd argue it's even more important in Seattle, where there are so many geographical constraints that bottleneck traffic. I moved from Wallingford to Columbia City in large part so my commute didn't involve having to drive over bridges. I respect wanting to "build the spine" and get light rail to other places, but I think it needs to be prioritized *first* in Seattle's urban core. That's where you'll get the most riders and the most political support. It's a game changer to take light rail to work/school, as thousands of people in Capitol Hill and UW are now realizing. Expand on that! And I would love to be able to ride these lines before I'm deep into middle age.</p>
NORTH KING COUNTY	<p>The projects are definitely important, even at the current timeline, but the long lead times are dismaying. I plan to vote for ST3, but I think a lot more people would be a lot more enthusiastic if they believed some of these services would be available while they are still active commuters. An East-West line between Ballard and UW should definitely be added.</p>
NORTH KING COUNTY	<p>Why are the projected timelines so far out? Is this because of funding, or construction logistics?</p>
NORTH KING COUNTY	<p>22 years for the Ballard light rail is too long a time horizon</p>
NORTH KING COUNTY	<p>Shorter timeframe for light rail expansion</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	In my opinion ST3 will not pass unless the timeline for the Seattle light rail project is pushed up towards the front of the project. We desperately need improvements within the city of Seattle to ease congestion before looking to the suburbs. The city of Seattle has the greatest number of people who will come out to vote either for or against ST3, it is in my opinion that if you rearrange the timeline and put the Seattle improvements first ST3 will pass, and if you don't, it will likely fail.
NORTH KING COUNTY	I don't live in Ballard, and wouldn't use that line much, but I know from studies that the potential impact of that line in terms of ridership is massive. As a lifelong Seattle resident, my own interest is in spending out limited dollars where we'll get the highest regional impact, and that's starting with a GRADE-SEPARATED line to Ballard and new downtown tunnel. This project can not wait--to put a Redmond extension in line before something with this type of impact is nuts.  Additionally, the focus of stations absolutely needs to be transit-oriented development, supported by walkable, bikeable, and transit-linked neighborhoods. Parking is wasted \$!
NORTH KING COUNTY	An east / west connector in Seattle should be a HIGH priority (Ballard and West Seattle). With that, you have my full support. Without that, I will not be supporting this package.
NORTH KING COUNTY	I'm sure everyone is saying this, but I wish all of this could be completed sooner! Thanks.
NORTH KING COUNTY	Even though the time frame for completion is 25 years, I think it's important to keep these projects moving forward. If the population continues to grow as rapidly as it is now, making sure people can easily and affordable get around is paramount. Invest now.
NORTH KING COUNTY	It would be nice if these projects could be completed sooner.
NORTH KING COUNTY	I think the timelines are too long. I would like to see HUGE transparency and accountability for the money. The 520 bridge was a horrific waste of taxpayer money and now we're watching it again with the viaduct. After 30 years in Seattle, the money we have funded over and over again for projects is like watching it circle the drain and ultimately disappear. Those in charge are not paying attention and I am against giving folks anymore money to continue more projects they are not capable of completing on time and on budget. We all seem to have to manage our money for good use and I suggest the City/County/State start operating under the same intention.
NORTH KING COUNTY	With the huge increase in the number of people living and working in South Lake Union, I would urge that the light rail to Ballard be put at the top of the light rail schedule. I strongly support any and all increases in reliable, car-free transportation in Seattle and the surrounding areas.
NORTH KING COUNTY	I understand the Seattle light rail projects are expensive and will take a long time to build out, but I'd love it if the Graham Street infill station and the 130th street station could come on-line sooner than what is in the draft proposal. I also understand that folks in Snohomish County are down on the 25 year timeline in getting light rail to Everett and I'd be interested in floating a timeline that removed the routing through Paine Field as a trade off for a shorter timeline.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	It is a shame that it is projected to take decades to finish what seem to be small components of this plan. We need better mass transit now! Isn't there any way to make this move faster? Also, lack of parking at light rail stations limits their use.
NORTH KING COUNTY	Why wasn't this done sooner? I'll pay \$200 per month just to get this done faster.
NORTH KING COUNTY	The light rail to West Seattle should be the first priority and completed sooner. Just look at all the new condos and apartment buildings being built in West Seattle with no additional transit capacity added. C line buses are already packed to the gills during commute times. This is only going to get a lot worse. In not other region of West Seattle, other than South Lake Union, is so much additional housing being added. This implies that West Seattle should be the highest priority for light rail expansion.
NORTH KING COUNTY	8 years to add new bus lines? That seems like a very long time for something that doesn't require heavy amounts of new infrastructure.
NORTH KING COUNTY	With the amount of new construction of large residential complexes (apartments and condos) in Ballard, transit service will need to be improved on a quicker timeline.
NORTH KING COUNTY	Link to Ballard should get top priority and not take 22 years (!!!!).
NORTH KING COUNTY	A 25-year plan is difficult for many/most tax payers to comprehend. If there is a way to pay higher taxes earlier and get some key quick results, then reduce taxes over time to complete the later project items, that may be more tangible to the community. Paying higher taxes now and not seeing any of the improvements for eight years will probably generate a lot of resistance. I, personally, use public transit whenever possible and support public transportation initiatives - buses, trains, safety for pedestrians, etc. - consistently. However, I have the benefit of a reasonable living income to pay the taxes and transit fares, while many people are not so fortunate.
NORTH KING COUNTY	I would be willing to pay more in taxes if it meant transit projects, primarily light rail, could be completed sooner.
NORTH KING COUNTY	How would speeding up the timeline of the implementation impact the budget? Waiting 25 years for a full regional transportation system is too long, particularly for an area that is growing as rapidly as the greater Seattle/Tacoma area.
NORTH KING COUNTY	Too long of timelines. I'd gladly pay more in taxes to get this done sooner.
NORTH KING COUNTY	Currently the cities bus systems are not utilized all that much. By adding BRT there will be much benefit as far as reduced congestion and people are generally opposed to riding busses regardless. What really needs to be expedited is the building of the light rail. This will allow people to easily commute into downtown from the outer city limits. Additionally main arterial roads/bridges that can be easily & rapidly built will allow people driving to get through the city easier, especially since there are so many people that are forced to live outside of the city limits and commute downtown to work. Seattle's roads and transportation has been neglected long enough and it is important to gather the correct amount of data that actually support what should actually be completed first in order to reduce congestion.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	in addition to expressing approx how much the ST3 plan will cost the avg resident per year, why not also ask how I'd feel about higher costs in return for getting the ST3 plan done? What would it cost to get it all done in 10 years?
NORTH KING COUNTY	With the densification and population increase in Seattle, I believe that there is a higher demand for light rail expansion (Ballard, West Seattle, Downtown Tacoma) than the other projects mentioned, and I would personally like to see these given priority over regional bus lines, which do less to prepare the region to accommodate growth, and do little to encourage walkability and transit-centered development.
NORTH KING COUNTY	Is there any way to speed it up?
NORTH KING COUNTY	The sooner the better! And increase light rail times and size of the rail during peak hours currently- it is already incredibly crowded.
NORTH KING COUNTY	Project timeline is unacceptably long. Another 22 years for light rail to connect Ballard to downtown? 17 years for West Seattle? And the Ballard to UW line is merely a feasibility study? Not good enough. We've been waiting decades already. Now that Ballard been reclassified as an "urban village" with the commuter complexities that accompany increased density, we need a light rail solution within 5 years, not 22. The only reason the monorail wasn't constructed is because ST supposedly had a light rail plan at the ready and voters supported that idea. A 2038 completion date is not what voters were promised. Obtain the necessary funding via taxes or otherwise and start breaking ground on these critical projects ASAP.
NORTH KING COUNTY	More! Sooner! Faster!
NORTH KING COUNTY	The future investment study connecting west-east ballard to UW needs to happen and be incorporated. This is a major transportation bottleneck currently and would be well used.
NORTH KING COUNTY	Why would you even bother with the current timeline. Cars won't even exist by then. Children being born right now will never learn how to drive. What makes you think that by the time it is finished the transit plan will be even remotely effective?
NORTH KING COUNTY	I think the focus of ST3 should be on improving commute times from the suburbs and outlying areas that have been supporting Sound Transit for the past 20 years and will not get light rail until 2023 or later. Although I work and do most of my shopping, errands, etc. in Seattle, I believe that Ballard and West Seattle residents have much shorter commute times and more transportation options than people in Everett, Tacoma and the suburbs. BRT on I-405 should be the first priority and should happen in less than 8 years and extending light rail to Everett and Tacoma needs to happen in less than 17-25 years. Everett and Tacoma commuters often spend more than an hour commuting each way on a daily basis. This needs to change as soon as possible. Perhaps Sound Transit could open one station at a time along the routes to Tacoma and Everett as they are completed (similar to the Angle Lake extension now being completed), rather than taking a longer period of time and opening several stations at the same time (such as the Northgate extension, which includes the U. District, Roosevelt, and Northgate stations all opening by 2021).
NORTH KING COUNTY	MAKE ALL THE LIGHT RAIL HAPPEN FASTER PLEASE PLEASE PLEASE

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	So glad to see this plan. However, the projected timeline is so far out. I really wish these goals could be reached in at least half the time, if not sooner.
NORTH KING COUNTY	Shorten the timelines!
NORTH KING COUNTY	In 2016 there is no excuse for this proposal to take 25 years. Many of these projects were needed 25 years ago. Amp up the timeline, the full proposal should be achievable within 10 years. I would not be opposed to higher taxes to support this, but the current timeline is unacceptable.
NORTH KING COUNTY	Out of curiosity what makes these projects take so long?
NORTH KING COUNTY	how about bake sales dot rest stops auctions jerry lewis telefons,sound transit employees holding up begging signs people leaving sound transit in their wills so it will be paid by people that can't afford the 200 dollars a year tax can be included even if they are bums ,leaches,disabled unemployed foriegners,nonvoters outerspace aliens,give people work instead of outsourcing.YYYYYYYYYYYYYEEEEEEEEAAAAAHHHHHHHHHHH!!!!!!!!!!
NORTH KING COUNTY	You seem bound and determined to serve the east side and it seems to be at the expense of the north. Boeing. Have you even looked at the parking situation for those workers?
NORTH KING COUNTY	We need light rail connecting neighborhoods in downtown and commuter trains that connect outlying cities to downtown. We should not waste time and money on buses. Sure they are cheaper and quicker to set up, but they do nothing to alleviate the congestion problem and are unreliable and not much faster or nicer than driving.  There must be a way to complete light rail extensions to West Seattle and Ballard in 10 years or less. If it costs twice as much to finish it in half the time I am sure citizens would be all for it. Additionally, with the influx of capital from facebook, google, Uber, etc expansion this should be a reality.  European cities have built vast rail networks in a fraction of the time that we are proposing and many decades ago when construction technology was less advanced. How can we not do better?
NORTH KING COUNTY	They should hurry up. We needed this yesterday. No one can afford to live in Seattle anymore and its next to impossible to get into Seattle for work during peak hours.
NORTH KING COUNTY	The 20 year time frame for building the infill station at Graham Street (which was included in the initial plans of LINK going through the Rainier Valley) seems excessive. Shortening this time frame would allow many communities of color be able to easily access LINK including the temple at MLK and Graham as well as the Filipino Community Center just a few blocks north of Graham Street. Please, please, please shorten the time frame for this simple infill station.
NORTH KING COUNTY	I support these plans to expand non-road rapid transit - particularly below ground subway lines - in part because I wish Seattle had done it decades ago, so let's get it moving now!
NORTH KING COUNTY	I would like to see inter-city light rail (like to Ballard) and parking at stations prioritized.
NORTH KING COUNTY	Ballard to Downtown and West Seattle to downtown should be priority. Connect the neighborhoods and then expand outward.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Believe the Boeing Access Road should be scheduled earlier than 20 years. Really support any places where light rail, BRT, and train can all connect to help provide more access and more available transitions between modes of transportation.
NORTH KING COUNTY	Ballard and West Seattle....now!
NORTH KING COUNTY	I strongly support the Boeing Access Light Rail Station but can not support it in 25 years we need to do it now. It is relatively inexpensive and easier than many other projects in terms of time.
NORTH KING COUNTY	Anything expected more than 15 years out is just speculation as far as I'm concerned, not something I believe will happen.
NORTH KING COUNTY	Light rail to Ballard in TWENTY TWO YEARS?!?!?!?
NORTH KING COUNTY	I would love to see the Everett light rail completed in less than 25 years. I would use it daily to commute from Seattle.
NORTH KING COUNTY	This all has to be faster. By the time even this plan is built, I will be retired.
NORTH KING COUNTY	Let's get the Ballard light rail done by 2025. It'll be expensive upfront, but Seattle residents will be happier paying for it when they'll actually get to use it in their lifetimes.
NORTH KING COUNTY	I realize this all takes a while to pull off but some of these timelines are very long. Population is exploding and where will we be in 10, 15, 20 years? I believe light rail really needs to be prioritized from Everett to Tacoma and to the Eastside and get more people off the highways and freeways. That would help a lot.
NORTH KING COUNTY	Need to find ways to move faster - even if it means doing things in increments.
NORTH KING COUNTY	I wonder if there's any way to get the bus improvements done sooner to take some pressure off while the light rail projects are getting done. There are a lot of areas asked about in the survey/covered by the plan where I essentially never go, so don't know what their priority should be.
NORTH KING COUNTY	Some higher priority extensions should be completed sooner (Seattle to Bellevue / Redmond, etc.)
NORTH KING COUNTY	build the segments with the highest ridership and most cost effective first i.e. Ballard rail  don't waist money going to Paine field, run shuttle bus to Sr-99 alignment of Everett link
NORTH KING COUNTY	Timeline is too long!!!
NORTH KING COUNTY	speed up this process! We elect leaders to solve problems, not to have endless debates/studies/surveys.
NORTH KING COUNTY	Strongly support \$200 per year, though not forever. For how long? The 25 years to complete if?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>Whenever possible, distance and new legs should be focused on over having many stops. We need encompassing transit ASAP. That might make some stops more expensive to add later, but getting people in and out from various areas should trump having easily accessible stations in all of those areas as long as busing can cover the last mile in the meantime.</p> <p>Also, I don't know if the capability for having trains pass each other has been built into the system. It would be amazing to have some portion of trips be Express trains that only go to three or four places in the current system. For example, right now that might be University, Downtown, and Seatac, or possibly another around Othello. This would make for some amazing fast commuting for people that live on the opposite side of the line.</p>
NORTH KING COUNTY	<p>the timelines are way too long. I will be retired before there is light rail to my area and dead before there is light rail to Ballard but this needs to happen.</p>
NORTH KING COUNTY	<p>WAY too slow, you can't ask people to pay this much for something that many people will have moved away, died, or become elderly/less mobile by the time it's finished! 25 years is inexcusable!</p>
NORTH KING COUNTY	<p>Rail service will take time to work out, but 15+ year timeline is bonkers. We need more rail service now. We needed it 10 years ago. To get cars off the road we need rail. Not more buses. Do Anything you can do to speed up the timeline on rail service.</p>
NORTH KING COUNTY	<p>I really wish we were interested in INCREASING funding so that these projects could be completed FASTER (perhaps before I'm at retirement age). I'm particularly interested in being able to commute efficiently between West Seattle and Bellevue.</p>
NORTH KING COUNTY	<p>Projects like Ballard that have a potential for high ridership numbers should be completed in a more timely manner.</p> <p>Light rail should be expanding to lower income communities, more specifically to those communities listed on the map that are south of the proposed West Seattle station. Increased accessibility to downtown Seattle should, in theory, increase income levels in those areas. In my opinion, this is more important than continued expansion to communities in the Eastside.</p> <p>ALL light rail should be grade separated.</p>
NORTH KING COUNTY	<p>It is hard to understand why progress has to be so slow. 5 more years to get the system to Northgate seems hard to accept. Also I have found the trains too crowded after Capitol Hill and UW Stadium opened. While certainly supportive of improved transit, I would not give the agency an excellent grade. (And don't even mention the business with street cars.)</p>
NORTH KING COUNTY	<p>I only wish it were happening more quickly, waiting decades is painful, but I'm glad to see transit progress is happening.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I know ST is for the whole puget sound region, but if we want people to ditch their cars and take light rail, the train needs to get them close enough to their final destination. That's why I think it is important to shift immediate focus to projects connecting the system to more locations in Seattle; Belltown, Interbay, Ballard, Fremont, West Seattle. Capitol Hill and UW stations are an amazing start. And coming northgate and east side stations will give more people easy access to the light rail. But I think we need to focus on improving connections in Seattle before moving further outside.
NORTH KING COUNTY	Far too slow to respond to very urgent transportation needs!
NORTH KING COUNTY	Very disappointed in the West Seattle timeline being 17 years for light rail; disappointed in the entire timeline. We need solutions now!!
NORTH KING COUNTY	Priority should be given to projects that truly alleviate congestion and expand where people can work and live throughout the greater Seattle area.
NORTH KING COUNTY	I understand that a project of such large scope should take time to complete, but I don't understand why creating light rail connections between Ballard and West Seattle should take anywhere close to twenty years. At that point, it seems more prudent to draft a mass transit system that could accommodate the expected needs of the Puget Sound region twenty years from now.
NORTH KING COUNTY	You really need to accelerate the i90 corridor plans in Seattle. The majority of commuters are going in and out of Seattle/Bellevue. This should really be the priority. Next we don't need a second downtown Seattle tunnel. You can use the one we have and add extensions to the rail lines we have now.
NORTH KING COUNTY	This plan will take too long. Transit is needed now!!
NORTH KING COUNTY	For the major extensions of light rail, can partial extensions be brought into operation sooner than waiting until the whole line is completed.
NORTH KING COUNTY	I really think the Ballard connection's timeline should be moved up if at all possible.
NORTH KING COUNTY	Overall I like the plan. I just wish and hope the timeline can be accelerated. We need solutions like this as quickly as possible and can't afford to wait decades for completion.
NORTH KING COUNTY	Timelines are way too long to make a meaningful change for people to commit this much tax revenue now.
NORTH KING COUNTY	Build light rail to Ballard and West Seattle faster. 17 years is a ridiculously long time.
NORTH KING COUNTY	Why does it have to take so long? I could be dead by the time this is finished.
NORTH KING COUNTY	This needs to happen faster than the current timeline. We can't wait 17 years for West Seattle to be connected to downtown with the kind of explosive growth that we are seeing. The bridge cannot handle all the commuters being added by developers to the area.
NORTH KING COUNTY	Please figure out how to build it faster.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>We can't wait 25 years for this to be completed. Timelines should be stepped up.</p> <p>Parking at light rail stations in the outer areas need to be maximized ie parking structures vs parking lots. I live near the Tukwila light rail station. I would take the light rail into Seattle more often, but most of the time there is NO place to park. It's too far to walk and taking a bus for the two miles adds 30 mins to the trip. That means over an hour to get into downtown Seattle. I can drive in faster.</p> <p>Some of this money should be used to subsidize operational costs to lower fares for a set time period to build ridership. Make public transit so cheap it becomes the obvious choice. Once dependency is established, fares can gradually raised.</p>
NORTH KING COUNTY	20 years to get a light rail station at Boeing???? That's insane.
NORTH KING COUNTY	25 years?!Need to do these projects sooner than later.
NORTH KING COUNTY	It makes no sense for it to take 22 years to get light rail 5 miles from downtown to Ballard. Find a way to do it in 5 or less. We needed light rail 20 years ago. Stop pussyfooting around and build it. I would gladly pay more if it was delivered sooner. We built the transcontinental railroad in 6 years. Please find a way to deliver sooner.
NORTH KING COUNTY	Waiting 25 years for all of this will be unfortunate. The region needs this all now. The openings of University and Capital Hill are exciting and show the promise. Can any of this be done in parallel like Ballard and West Seattle? Can stations be started in parallel while tunnels are dug? The sooner we can get more cars off the road the better we will all be.
NORTH KING COUNTY	When I first saw light rail was coming to Ballard, I was excited to bring my kids to opening day. Unfortunately, after running the numbers, I discovered the 22 year timeline was such that I'll have time to get married, buy a house, have two kids, and and then have them both grow old enough that they don't want to hang out with me anymore. Please reconsider.
NORTH KING COUNTY	Something needs to happen to improve the increasingly worse traffic situation between the Ballard area and downtown. With the number of residential units planned for the area it is only going to get worse. Light rail in 22 years seems like a bandaid that will be much to small. I very much realize the region as a whole needs fixes, but Ballard seems to me to be the one which would benefit from light rail the most. There just doesn't seem to be space or infrastructure for improved bus options.
NORTH KING COUNTY	The timeline seems much too slow. If financing is holding it up, we should explore ways to borrow money, it's cheap right now! Let's make expanding our transit system our top priority and give it the urgency it truly requires. Past generations have let us down by failing to build transit systems. We need to do the right thing for future generations.
NORTH KING COUNTY	King county needs full light rail as soon as possible. I wish there was a way to speed up light rail. Buses are just a stop gap.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>You guys have got to figure out a way to speed the timelines of these projects up, or have multiple projects being undertaken at once. I didn't list the ballard tunnel as one of my top two priorities, but a 22 year wait for light rail service to that part of the city is insane and honestly, a bit inexcusable.</p> <p>If it's a matter of resources, I would have like to have seen what the cost would be for an accelerated project timeline compared against the one submitted in the draft plan. \$200 per year doesn't seem excessive, but if we had the option to compare it against \$350 per year to see service provided 20% faster, or \$500 per year for services to be provided 30% faster... that would have been helpful.</p> <p>I'm a strong supporter of the mass transit movement. Keep doing the good work.</p> <p>-Nick</p>
NORTH KING COUNTY	Please prioritize Link to Ballard and West Seattle
NORTH KING COUNTY	My concern is that projects slated to be completed in 12-25 years will be deprioritized as future issues or activities arise and that will alter the projects planned that far out or that initial projects could take too long and later projects would not have funding and be pushed out even further. With the tunnel and 99 viaduct projects already being started, I am concerned that the alternative options for the north/south traffic will be greatly impacted with limited options available in the next five years.
NORTH KING COUNTY	Density in central Ballard has been increasing extremely rapidly for several years--apartments, condos, and townhomes are springing up everywhere, often with zero off-street parking for their residents. We've been assured that these new residents will be using transit and many won't even own cars. You know, because that's how millennials roll! OK, let's say I believe that. So...where is the increased transit to keep pace with the increased density? And by transit, I mean light rail, not buses. Please prioritize Ballard. Given the population growth here, the 22-year projection is more than a bit insulting. Thanks.
NORTH KING COUNTY	Timelines for BRT should be accelerated with needed stations and parking built soon.
NORTH KING COUNTY	Light rail to Ballard should come much sooner, will have high ridership and generate revenue.
NORTH KING COUNTY	Needs to happen faster ... light rail in particular
NORTH KING COUNTY	Build the urban links sooner than twenty years hence. Ballard, in particular is becoming nothing but blocks of apartment clusters without parking provisions. Busses alone will not serve residents of this population adequately.
NORTH KING COUNTY	All the projects are urgent, and we hope that they can be expedited earlier than indicated.
NORTH KING COUNTY	All the rapid rides have come online in last 5yrs, so why is it going to take so long to extend/augment them in these plans? Those should be able to be put in place within a couple years with other extensions taking longer (due to stations/tunnels/tracks, etc.)

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The plan should focus close in before far away. It's more important to link up Seattle with Seattle before going out to Lynwood and Tacoma. Prioritize what would get the most cars off the road realistically. Parking for transit is more important than the priority that has been place on it in the past. If people don't have easy access and need to drive to take transit, they need a place to put their cars. Driving is a reality that thousands of people do daily and won't quit doing if transit is not easy for them.
NORTH KING COUNTY	The timelines seem too long; I would think that these projects could be completed in 60-70% of the timelines identified in question 12
NORTH KING COUNTY	Raise the more funds in the short term: to add more transit options, especially light rail in Seattle and to speed up the timeline. Raised funds should come more fromt he rich, such as extra tax on homes with a high value, or income tax on high earnings. Not a sales tax that hurts the poor and middle class more than the rich.
NORTH KING COUNTY	I support building the right transit services as opposed to building politically expedient projects and timelines. So the Ballard and West Seattle lines are more important from a transit perspective than the Issaquah line. Also an east/west line connecting Ballard and Wallingford and u-district is high priority.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

<p>NORTH KING COUNTY</p>	<p>The Ballard line is the single most important project. The West Seattle line and the Everett extension are far less important and better served by BRT and sounder rail, respectively. With that in mind, The Ballard Line should be promoted over the latter two in priority. I-405 brrt is absolutely necessary and should be completed before or coincidentally with the Lynwood extension to form a connected Lake Washington network.</p> <p>Get better signage for all below-grade stations! If you don't know exactly where to look for the downtown station entrances, they are hard to find!</p> <p>The West Seattle line should be built with a future extension to White Center/Burien/seatac in mind. The new downtown tunnel should run along 5th ave with the "midtown" station between Madison and Spring in order to connect with the developing Madison street BRT. Consider building the Ballard line with capacity for longer trains along with similar upgrades to the south line. Because West Seattle link will rely heavily on connecting buses, the Alaska Junction station should be coordinated with SDOT for a unified transit station accommodating area buses. Consider a pedestrian bridge between the stadium station and the stadiums.</p> <p>New link cars should have ample bike/baggage areas and specific stations should have plenty of covered bicycle parking, especially Alaska Junction, Federal Way, Ballard, Smith Cove, and South Lake Union, where potential is high for bike/train commuting.</p> <p>Graham street station is a low priority, but make sure to include heavy TOD to make the most use of it.</p> <p>The Paine field routing is really dumb. Very few employees live in transit-accessible neighborhoods, so they will not use this. Paine field only makes sense if it can serve both employees and future travelers of hypothetical commercial flights, but a single station could not very well serve both, so Paine field is really just an expensive, low-ridership detour. Please do not build to Paine Field! Consider not building the Everett extension at all, because everett is can be fully served by sounder, most people in the area will not use transit anyway because development is so spread out and car-oriented, and the funding of this line can be used for more important projects. Instead just improve sounder and implement BRT to Everett.</p> <p>If it may ever be a possibility to convert the Tacoma line to the same system as the rest of link, make sure that the TCC extension is as</p>
<p>NORTH KING COUNTY</p>	<p>It seems that this timeline will not be really solving the current issues and will leave up to 25 more years of current traffic levels. It seems to me that it would be a priority to get things rolling immediately and maybe put extra buses on or something to cover the future light rail areas/get the buses running in the shoulders or in their own lanes. As a taxpayer I would like to be able to use the transportation as soon as possible.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>The I-5 corridor is currently above capacity so the proven abilities of Sounder south should be immediately invested in. Any increase in route miles, train length, train frequency, or days of operation to entice more riders will help relieve congestion south of Seattle. The Sounder north is not an acceptable alternative route into to Seattle due to it's alignment along the coast away from the the highest housing density and also the threat of landslides. The expansion of the link light rail north to Lynnwood and Everett is the most pressing project in this plan due to it's grade separated nature. It seems imperative that this project be completed sooner than purposed.</p>
NORTH KING COUNTY	<p>Tax tax tax tax tax rich people, tax land, tax salary, tax everyone but the poor and middle class. Make this more ambitious and do it as soon as physically possible. Now. Right now. Do it.</p>
NORTH KING COUNTY	<p>I was completely onboard with the rail aspects (and supportive of the bus aspects, even though that's not what we should focus on) until I saw the timelines.</p> <p>The timelines are a complete joke. You have to be kidding right? 8 years to add more buses? Really? Buy some buses and put them on the road - it is not that hard. 22 years to build rail to Ballard? That's pathetic - my neighbors (98107) drive in to the city because it's much faster than the buses and they don't have to traipse through the rain and darkness, then wait an unknown amount of time for the bus. Since people have to have a car in this city (excluding primarily cap hill and belltown), as soon as they can afford it they'll abandon the bus.</p> <p>Transit in Seattle will continue be terrible (and getting worse every day - those 1MM people are going to need to get around and since things won't be done for two decades, they'll drive) until the powers that be prioritize a bold plan to actually make it possible to get around the city reliably with mass transit - sitting in traffic on a bus while I miss my kid's soccer game is only mildly less terrible than sitting in traffic in car. At least in my car I don't have to deal with offensive odors and questionable stains - I know where the stains came from ;)</p> <p>Seriously though. Go faster. At least TRY to go faster. If we want to be a first class city and not some podunk outpost of South Alaska, we need good transit and we need it now. The groundwork for this should have been built back in the 70s - I bet the federal govt would've paid for a big piece of that with the oil crisis - but without a time machine we can't make it happen. Alas, Seattle's destined to be a backwards looking town and will not realize it's potential with leaders presenting plans like this.</p>
NORTH KING COUNTY	<p>Would it be possible to use the rapid rail system expansion to create incentives for the public to use public transit more often, thus gain more funding for the rail projects? If it were easier to use the bus system for transportation, there may be more support.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Absolutely needs to be a more compressed time line. I support all of these proposed expansion, however, the extended timeline will be detrimental to ST3's passage. I understand the need for environmental/construction impact/planning surveys, but finding other large and immediate revenue sources (bulk federal money, increased bonding, etc.) will absolutely be necessary to complete these projects sooner in order to remotely impact the current terrible transit system/situation the region CURRENTLY has, let alone will have in 22+ years when these projects will come online. Funding has to be changed so the program isn't waiting for small tax revenue each year.
NORTH KING COUNTY	8 years just to get more efficient bus routes? Have you seen what a company like Amazon can build in 8 years? This plan addresses the population and transit problems of Seattle today but doesn't start to deliver solutions until much too late. By the time this plan launches its first major initiative, the problem will have moved well past it. We need more innovative mass transit thinking than this if we expect to keep Seattle a thriving and prosperous place where people want to live.
NORTH KING COUNTY	Way too slow to see improvements for Seattle! And we should be building density of transit in the urban core before all these peripheral suburb projects. Thanks.
NORTH KING COUNTY	Building Seattle's public transit infrastructure will be a gamechanger for the future of the city. I fully support the building of all of these projects, even though I don't know much about the specifics of the projects proposed.  I generally walk and bike to get around, only taking the bus when I'm going somewhere further. If more people could reduce their reliance on cars and personal vehicles, it could dramatically improve the landscape of the city.
NORTH KING COUNTY	Please make it faster.
NORTH KING COUNTY	I understand the sub-area equity requirements that require spending on a regional scale. That being said, please speed up the timeline for internal Seattle light rail. Given the growth within city limits, it is crucial that Ballard, SLU, West Seattle and an East-West line between Ballard and Roosevelt/the U-District come online sooner than 22+ years. If it is required to speed this process, I would be open to increased taxes for residents within city limits to fund these projects on an accelerated timeline.
NORTH KING COUNTY	22 years for light rail to Ballard is far, far, far too long. I really want light rail but it hardly feels worth supporting it if it's going to take that long.
NORTH KING COUNTY	Have to find a way to shorten the time frame. People won't vote for a tax increase to fund a project that won't help them for 15-25 years
NORTH KING COUNTY	I would be way more supportive if the light rail expansion could happen much more quickly! 25 years to totally complete the project is way too long!!
NORTH KING COUNTY	It is hard to believe it would take 25 years for such a modest plan.
NORTH KING COUNTY	I appreciate that the projects are complicated and take time AND that you want to offer realistic timetables. That said, the political will to do this needs to be upgraded to the political will to do this more quickly. It is worth the extra investment -- and risk -- to speed these timetables up!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Transit can't be built fast enough, so faster timelines please. Prioritize the more populated areas. Start with Ballard & West Seattle & East Side (Bellevue, Redmond) in first part of ST3. Then, Lynnwood & Everett & Tacoma later.
NORTH KING COUNTY	When I moved to the beautiful puget Sound region nearly thirty years ago I was APPALLED by the lack of wide scale vision and planning on mass transit and highways. Now here we are with some of the worse traffic in the nation - with no end in sight. And furthermore it looks as if you are playing catchup for problem that were foreseen many decades ago. The "ostrich with his head in the sand" approach is now bearing the bad fruit and now we need to clean it up. With that said, I voted a "7 - highly urgent" on all the proposals because all plans are need to thoroughly make a dent in the traffic congestion in the area. I don't care about the projects and/or cost - do it!! because the cost of not doing it is unacceptable. And to all the people that do not want to pay another dime for improvements I'd like to ask them the same question while stuck in I-405 traffic from Renton to Everett!!! I'd rather see overcapacity in mass transit than not enough... one citizens opinion's.
NORTH KING COUNTY	<p>The proposed BRT from Burien to Lynnwood occurs too far into the future to have any significant benefit for me. I currently spend time in the Alderwood Mall area, which means I have to drive myself. In eight years, i will be out of the workforce and maybe out of Puget Sound.</p> <p>I would love to use the light rail system, but I have never ridden it because the route only takes me to Sea-Tac Airport or downtown Seattle. To go downtown or the airport, I would need to take a bus to the light rail station. I have regular bus service that gets me downtown in 45 minutes or less, why would I take a bus to transfer to the light rail? A taxi ride to the airport is less than \$20 for me and I get door-to-door service. Why would I lug a suitcase onto a bus to transfer to the train?</p> <p>The proposed extensions don't really help as I still need to take a bus to reach a station. I understand that the service will only be cost effective if it runs through densely populated areas or to destinations (such as Southcenter Mall) and that Burien does not currently qualify by either criteria.</p>
NORTH KING COUNTY	Let's build more light rail even faster!
NORTH KING COUNTY	I wish Ballard could be finished a lot sooner
NORTH KING COUNTY	I've lived in both the King County suburbs and in urban Seattle, so I understand the urgency for more public transit for both groups. However, Sound Transit must prioritize the light rail routes that will serve the greatest number of residents, even if it means sacrificing some of its unattainable ideals for subarea equity. I have never lived in Ballard, for instance, but I completely understand and support that their light rail extension should take priority over the one that serves me, simply because of the larger population it would serve. I am skeptical about the regressive taxing structure that Sound Transit would use to fund these improvements, although I understand that this organization might not have complete control over how to raise taxes. Ideally, sales and use taxes would not be raised to fund these projects, but instead employer, land, and property taxes.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>This timeline is way too slow. All of the projects are great improvements but they need to all be done Now not over 2t years. Get off the Pot and get rhis done on a more faster time frame and I will give 100 percent support.</p> <p>Tax all the developers putting in high density housing in WS and Ballard (amongst other places) a fee per unit housing added to help speed upnthe timeline. It is these vast complexes that are causing a need for faster development of transit then they should helpnfund it.</p> <p>However it done it needs to be faster than 25 years. That is rediculously slow.</p>
NORTH KING COUNTY	<p>I think these projects need to be completed sooner than in 25 years. I cannot even imagine the traffic congestion in 25 years if it continues to grow at the rate it is right now. Its already too late to be starting these projects.</p>
NORTH KING COUNTY	<p>25 years is way too long. i'd be willing to pay double to have it completed in a decade.</p>
NORTH KING COUNTY	<p>Needs to happen faster, even if it's more expensive.</p>
NORTH KING COUNTY	<p>I know you must be getting tons of feedback about West Seattle and Ballard service deprioritization being unacceptable. Add me to the list.</p>
NORTH KING COUNTY	<p>Please consider the need to balance transit construction timelines with population density. With all of the new high density and mid density(town homes)buildings in Ballard, there needs to be the transit to match. Thank you.</p>
NORTH KING COUNTY	<p>The projected time line for Ballard seems to be surprisingly far in the future and I wonder if more can be done to attempt to expedite that part of this project.</p>
NORTH KING COUNTY	<p>8 years just to get BRT implemented? That money should be spent on getting rail projects off the ground faster. "Rapid Ride" is slower than the bus it replaced. It may work in less congested areas, but we need transit separated from traffic.</p>
NORTH KING COUNTY	<p>Light rail from West Seattle to Downtown Seattle and Ballard to Downtown Seattle should be the highest priority (and set to a quicker timeline) based on the current and future population density in these areas.</p> <p>An east-west light rail line through north Seattle (e.g. Ballard to Sandpoint) should be included.</p> <p>Connecting the light rail network to Seattle Children's Hospital should be a high priority. The children's hospital serves families from all over the Puget Sound and should be more accessible by transit, especially for low-income families that rely on public transportation.</p>
NORTH KING COUNTY	<p>Graham Street Station should be the top priority as there is an existing line.</p>
NORTH KING COUNTY	<p>I feel like sound transit is always about a decade behind on when projects are proposed and to completion. This isn't Sound Transit's fault, but the voters fault. I hope ST3 is funded and completed on task and on time!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	My opposition comes from the timeline. It simply takes too long to see the results. In particular, it is ridiculous that the light rail to Ballard will take 22 years. The estimated ridership is 145,000 per day! That is the largest number in your plan. Ballard and Crown Hill have enormous growth and are classified urban hubs. They need light rail immediately. It should also come further north, at least to 85th. And, be above or below grade. At grade just adds to congestion. Lastly, the bridge should be underground. A drawbridge will be slow and congested during the summer, when bridges are up all the time. Please rethink this plan. I am all for paying for a plan for transit, but it must make sense.
NORTH KING COUNTY	Cut the timeline in half by increasing funding through corporate and individual contributions.
NORTH KING COUNTY	I fear the public will say no way that's too much money for something so far away. I am a huge transit fan. Personally willing to pay for an expansive system (esp rail). BUT I am highly dubious about asking households to pay SUCH a great amount of money for something so far away in the future. Government should impose it (somehow, taxes, etc.), not ask people to decide whether to pony up. Government's job is to see the big picture and be leaders. Asking individuals to decide something so impactful, regional and far out in the future feels wrong-headed.
NORTH KING COUNTY	I would like you to prioritize bike lanes away from traffic and trams and trains. I'm not a strong rider and I find it terrifying to dodge cars, trains and potholes but I like to ride my bike.
NORTH KING COUNTY	Transit riders mainly live in downtown Seattle and Ballard. The Ballard line would be the most beneficial to complete first because it would be used. Those who live around 405 have made the choice to drive already and will be tougher to get out of their cars. The Ballard line will be very successful and if it is included in the first 8 years will help the follow-on projects gain support because of this success. Conversely if nobody rides the 405 light rail system, the project could be criticized and put the completion of the entire plan in jeopardy.
NORTH KING COUNTY	Ballard, SLU, and Uptown already taken lots of growth and need better transit ASAP. Other areas can better handle buses in interim. A bus ride to Ballard takes the same amount of time to Issaquah, while Ballard is so much closer
NORTH KING COUNTY	Ballard to Downtown needs to be first. Really, Ballard to UDistrict should be first. It's basically faster to walk than take the bus West/East in this city.
NORTH KING COUNTY	Light rail service within Seattle is by far my highest priority and I think it's disappointing that it's not prioritized more highly in this timeline.
NORTH KING COUNTY	A 25 year long timeline seems like too long to me. I strongly support light rail in the Seattle region but it seems we're going to come up short very quickly. Ballard needs to be connected much sooner than 22 years in the future.
NORTH KING COUNTY	The main two comments is that the timelines for light rail need to be pushed up and a connector between UW and Ballard ought to be considered.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>Traffic has gone from manageable to miserable in the last 5 years. 20-25 years for access to Ballard or other high density areas on the east side is too long, especially given the rate the building of densely-packed housing is taking place, much of which is apartment buildings with little to no available parking. Perhaps reassessing timelines to focus on one project at a time and pool resources to speed up production is an option?</p> <p>Also, I hope whatever is being built in the rail domain has some sort of earthquake-related safety features.</p>
NORTH KING COUNTY	<p>Link service to Ballard, West Seattle, and Issaquah needs to be prioritized. The Amazon boom needs to be fed with fast transit as soon as possible. 20 years is just too late to handle that growth.</p>
NORTH KING COUNTY	<p>25 years? Correct actual tax money and do this in less than five.</p>
NORTH KING COUNTY	<p>Seems it will take far too long to complete.</p>
NORTH KING COUNTY	<p>I live in Seattle and work in Everett. The timeline for light rail to Everett is far too long. Shouldn't this one take less time since it would probably be above ground? Also, I would like to see the return of the 510 bus all day. The 512 bus takes longer since it has to get off the freeway to the Lynnwood stations twice. I'm traveling opposite of the 510 when they do run so I never get to take it. The 510 was truly an "express" bus to me.</p>
NORTH KING COUNTY	<p>The timeline needs to be evaluated and accelerated. I strongly support the plan, but strongly oppose the timeline.</p>
NORTH KING COUNTY	<p>I would support a more ambitious timeline and would be prepared to make a higher investment to make it happen.</p>
NORTH KING COUNTY	<p>Prioritize Ballard and West Seattle light rail. The congestion during rush hour to both of these neighborhoods is terrible and will continue to get worse with all of the multi-units being developed</p>
NORTH KING COUNTY	<p>I think it's likely that the combination of Uber-like transportation and self-driving car capabilities will transform transportation remarkably over the next 5-25 years. I think your long time lines will be a solution for problems that will be obviated when people no longer need to buy and park cars, or at least far fewer. People will be able to get into smaller, self-driving vehicles that circle around and can be summoned and drop us off at a specific place at a cost cheaper than owning and operating and parking a car. We will be able to reclaim parking lanes, and cars able to communicate with each other will drive far more safely and efficiently on available road surfaces than highly error-prone, impatient testosterone-fueled humans. I'm not so pie in the sky to say this will happen in 5 years, but having a 25 year plan for current transportation woes may as well focus on planning how to better manage horses and buggies.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The project timeline seems overly long. Affordable housing is being pushed out of the core of Seattle at a rapid rate. Like a lot of residents, I am hanging onto housing in my neighborhood by my fingernails. After living and working in South King County for 10 years, I moved back into the city in 2000, in part, because transit was not an option for me. It took three buses and 90+ minutes at a time when the drive to my new job in town could usually be accomplished in 35 minutes, and about 40 minutes of that time was spent traveling the two miles from the transit hub to the stop three blocks from my home . Right now, it appears that the biggest transit investment are being made in the wealthier areas of the city. I would strongly push for at least speeding up the timeline for the express bus services and to also give thought to how people will be able to reach the outlying transit hubs. This will be especially critical for seniors, who are too healthy for Access service yet not strong enough to walk more than a quarter mile to a station.
NORTH KING COUNTY	Getting this started as early as possible is the best way to ensure that the traffic nightmare that is the Sno-King-Pierce area gets resolved.
NORTH KING COUNTY	As a traveler to other cities here & abroad, I am fully supportive of these plans. We needed them yesterday as we are far behind in our transportation systems. Better now than never.
NORTH KING COUNTY	Would be willing to pay more taxes to get it done faster.
NORTH KING COUNTY	Many people who live outside of Seattle (in places like Lynnwood, Burien, Woodinville, Tacoma, Renton, etc.) are some of the most dependent on public transportation to get to and from work in the Seattle area, and in my opinion are also financially constrained to use public transportation as their only way of getting around. I think the connections we are talking about in the ST3 plan should have been started 20 years ago, so I am more than on board to get critical service to outlying areas where commuting alone by car into the city should, ideally, be the least effective method of transportation to discourage its use.
NORTH KING COUNTY	It is critical for the projects to come online much more quickly than planned. Otherwise, the relatively uncontrolled growth in the area will outpace the system before it is completed.
NORTH KING COUNTY	I love where the plan is going, but the timelines overall, and specifically for Ballard to Downtown will make this a hard sell to the public. I know Sound Transit is limited with financial and environmental review/permitting efforts, but I would like to see the final plan have faster build times. Even if that means studying for ST4. I also think the Everett extension should not go to Paine field. Use buses for that spur, as it will be a lot cheaper. Thanks!
NORTH KING COUNTY	Timeline is too long. Expedia move to Seattle will make 15th corridor miserable. Not sure that the long timeline will keep up with the exploding growth in seattle.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The timeline needs to be 10 years. The 'bus stuff' is a waste. There is no way putting more busses on the roads will help anything. If they don't have dedicated routes, away from existing traffic (light rail anybody??) they will not run on time, which is the biggest reason they will fail. I live in Capitol Hill. I can walk downtown more predictability than I can take a bus. Bus running on time is the exception, not the norm. (this is 6:30 pm weekday time frame). I don't fault the bus...it has to drive the same grid-locked traffic system as the rest of traffic. I can take a light rail now..it will get me there when it says it will. The biggest problem with the bus is you need to invest over an hour of your time (each way) to take an earlier bus (which might accidentally be on time) stand there till it arrives (15-20 min late-which is now the later bus) and hopefully (but not certainly) get on. If you're going to a show (they don't let you in once it starts (Paramount, 5th Ave) you don't have the option to be late. So what you're forced into is trading your time hoping for a bus. No wonder people walk or drive. I'm lucky in the distance is short enough I can walk it.
NORTH KING COUNTY	Timeline is too slow. BRT should happen immediately. Light rail construction timelines are overwhelmingly too long.
NORTH KING COUNTY	Faster if at all possible.
NORTH KING COUNTY	I'd like to see the Ballard Light Rail prioritized to be delivered earlier. We have limited alternatives to north/south routes. Traffic continues to get worse with the density that is growing with the construction of apartments and condos. The new tunnel is not adding any additional lanes and 15th/Elliott took away an extra lane by dedicating it to the buses. I work south of downtown in the SODO area and can't find realistic bus options that would allow me to commute to work. Previously I lived and commuted from West Seattle. I feel we need to prioritize improving transportation options for those of us that live west of I5 and 99. Accidents on 99 pretty much puts all of us on side streets and downtown navigating to get north or south. Not ideal. waiting 20+ years for a solution to Ballard is not acceptable. I bought my house over 10 years ago excited to have the expanded monorail as an option to commute to work. I was sad to see that project killed and can't believe that the option for Ballard is so far away. (it takes me over 45 mins most days to commute to work which is less than 9 miles to work; and it is not consistent from day to day)
NORTH KING COUNTY	Light rail timeline should be shorter.
NORTH KING COUNTY	Ballard has been targeted for intensively increased density and has far exceeded its population growth targets, but residents are suffering from severe lack of proportional increase in public transit capacity. Please consider services to Ballard much sooner than what is stated in the draft plan. Thank you for considering us in Ballard.
NORTH KING COUNTY	This plan is great, but if you wait for 20 more more years to build it, you will be 20 years too late. This stuff needs to be done now, or you will always be chasing the dream of convenient mass transit.
NORTH KING COUNTY	The projected timeline of 25 years is too long. The light rail lines to west seattle, south king co and pierce co needed to be built in 5-10 years.
NORTH KING COUNTY	It would be even better if these projects could be completed faster!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I think the timing is too long. I think the region needs these improvement now. If we do not find a way to fund these important improvements in the short term, the region will not be able to provide for the transportation needs of our rapidly increasing population!
NORTH KING COUNTY	The order of which projects will be completed seems mismatched. The most immediate need is serving downtown Seattle/Ballard, but this will be one of the last projects completed. Is it possible to focus on this project first?
NORTH KING COUNTY	The timeline is utterly depressing. 22 years to get light rail from Ballard to downtown?! Omg. I would GLADLY pay 1000 dollars a year to get accessible (more stops) light rail quickly. Being able to take rail from the northgate station to somewhere near Mill Creek would change my life. That area is booming. Any chance of getting light rail out there? Or light rail to Lynnwood, then a RT bus to mill creek would be good too. But honestly, why not just ask us to cough up the cash and get this stuff DONE.
NORTH KING COUNTY	Please prioritize South Lake Union and Ballard.
NORTH KING COUNTY	I can't understand why close-in communities (West Seattle / Ballard) are not a prime priority.
NORTH KING COUNTY	Projects to link Ballard and West Seattle with Downtown should be moved earlier in the timing - these routes have been critically needed for years and would have immediate ridership.
NORTH KING COUNTY	20+ years to add Graham St station to existing rail line seems unnecessary - please push this project to be sooner. Would also like to see Ballard pushed sooner as well.
NORTH KING COUNTY	PLEASE prioritize the Ballard light rail. It shouldn't take us until my baby daughter is out of college to get a couple miles of light rail installed!  (And thank you for your work!)
NORTH KING COUNTY	The proposed additions look good but the timeline is too slow. 22 years is too long to wait.
NORTH KING COUNTY	22 years is too long of a time to wait for these projects to be completed. A quarter century from now our public transit needs will be greater than anything proposed here. Faster action is required to keep pace with the current population boom in the greater Seattle area.
NORTH KING COUNTY	Everything needs to be done faster. Even the under construction projects seem like they could be accelerate the northgate to UW tunnels are almost done lets get the trains running in those tunnels in 2 years instead of 5 years. I think voters will have a I hard time supporting light rail that won't be done for 25 years. Please look for ways to speed up these timelines.
NORTH KING COUNTY	The faster, the better. 25 years is an entire generation growing up in traffic fumes and congestion. We especially need better transit among different areas of Seattle.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>Timelines are too long, we need all this done yesterday. Okay, within 15 years or less. Do your demographic and population studies really support waiting 25 years to bring Everett online? Boeing is moving aggressively to a younger workforce, I would expect an Everett line serving them sooner rather than later. And the high traffic volumes on 405 and 90 illustrate the need for mass transit capacity on those corridors.</p> <p>Given that such a large portion of our state's greenhouse gas emissions come from transportation it's imperative that we reduce vehicle miles traveled.</p>
NORTH KING COUNTY	<p>25 years is too long. We cannot wait for this length of time to improve public transit. The plan is good but should be completed by 2015.</p>
NORTH KING COUNTY	<p>Any opportunities to make these changes faster, even if we have to pay more taxes? And how do we build light rail to focus on the most troublesome traffic spots?</p>
NORTH KING COUNTY	<p>None of us knows if we will be here in 8 much less 25 years, so the timelines are ridiculous.</p> <p>What about scrapping all new light rail in favor of bus rapid transit that has dedicated lanes?</p> <p>It is unclear how any of this fits in with King County Metro.</p>
NORTH KING COUNTY	<p>The timeline for completion of the projects seems to be excessively long.</p>
NORTH KING COUNTY	<p>We should be prioritizing investment in light rail in our densest areas and building out to less dense. This plan fails in this regard. It is hard to see the value received if light rail is 20 plus years away.</p>
NORTH KING COUNTY	<p>I don't think we can wait years for our traffic to improve in this city. We are about 20 years too late in addressing these issues.</p>
NORTH KING COUNTY	<p>The Ballard line has to be completed MUCH more quickly. 20+ years is simply ridiculous. Likewise, a Ballard -UW line needs to be added. And a 130Th St station.</p>
NORTH KING COUNTY	<p>Ballard is an incredibly high transit use area. The lack of high speed service is just bad planning and the fact that the expected deliverable is in 22 years is not going to work. With new development happening along Elliot Bay, the housing boom in Ballard and Fremont this plan doesn't make sense. People do not want to drive in these areas. We want transit and we need it as soon as possible. Thank you.</p>
NORTH KING COUNTY	<p>This project should be completed faster. West Seattle and Ballard should be more a priority</p>
NORTH KING COUNTY	<p>it's taking too long! I put "I don't know" for some because I don't take those routes 373 and 73 need more frequent service to UW Station!</p>
NORTH KING COUNTY	<p>Your proposed solutions take a long time to complete. Considering the growth of the city, what is Sound Transit preparing to do to be more aggressive in completing these projects?</p>
NORTH KING COUNTY	<p>More funding to drive sooner completion should be investigated.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>Frankly, I'm not nearly as interested in a regional spine (esp. for contrarian city governments like Kirkland) as I am in a strongly-connected heart of Seattle (read: Ballard and West Seattle). It's extremely disappointing to see the Ballard line (which has the most potential for ridership in the entire package) coming in so late, esp. so we can go and build a bunch of parking garages for Eastsiders first.</p> <p>Please consider reprioritizing the Ballard and West Seattle lines to come much earlier in the project. Please also consider Seattle Subway's proposal for a Ballard - UW line <a href="http://seattletransitblog.com/2016/03/01/ballard-uw-essential-st3/">http://seattletransitblog.com/2016/03/01/ballard-uw-essential-st3/</a>). The downtown - UW line clearly demonstrates the desire for transit in the city of Seattle; please don't gate our needs behind the ideal of a regional spine that seems bent to local interests at every turn.</p>
NORTH KING COUNTY	<p>I am concerned that by the time these projects are completed, even the early ones, our needs may have outgrown the scope of these projects.</p>
NORTH KING COUNTY	<p>I would rather see timelines accelerated. There is a lot of growth in the area and I'd like to see traffic and transportation issues resolved quicker.</p>
NORTH KING COUNTY	<p>I think the sooner these can be implemented the better. I think we would benefit from some sort of income tax such as was proposed on income over \$250k several years ago, and this infusion of income could speed up the implementation. It would also create additional construction jobs which would benefit the area (more projects happening simultaneously) and I think sound transit should support taking a new look at that type of funding option.</p> <p>I also think it would be worth approaching the big money in south lake union and various big development firms for contributions that could speed up implementation and contribute to building the infrastructure that will benefit these companies, including Amazon, Google, and the others. Perhaps they could build the south lake union stations themselves as a gesture to the city? They are benefiting from the lack of income tax and given the changes they are driving in the city and the displacements and rent increases that accompany them I think it would be a great public relations move that is in both their own self interest as well as a public good.</p>
NORTH KING COUNTY	<p>Ballard has been designated as an urban village for over 20 years and has seen one of the largest increases in density in the city. Those of us in Ballard support this density. But, we have lost transit. Further, people need to be able to park and/or have loading zones at major transit stops. I'd like to see some way to incentivize people to combine parking and transit by providing parking discounts for people who use transit (maybe based on a time stay, like a transfer works. You park your car and use transit for the day and get a \$1 off your transit or something). People with strollers, walkers, wheelchairs, kids, groceries, etc. need to be able to get to the transit stop. If it's more than .5 miles away, they will likely drive or be dropped off by someone. It is unrealistic to think that increased public transit will eliminate cars.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The project timeline appears to support development on the east side (Bellevue, Redmond, etc.) rather than equally distributed between the east and west side. Would like to see development on either sides of the lake completed in tandem.
NORTH KING COUNTY	We needed a true regional rail system 20 years ago. We can't build this fast enough -- and we should avoid trains that can get stuck in traffic.
NORTH KING COUNTY	Move up the dates even if it costs more money. We need transportations solutions faster.
NORTH KING COUNTY	By the time it's finished, you'll have to come up with a new plan. With the current mass transit system we have, driving in Seattle is a luxury and should be taxed as such. I know so many people with cars and have never been on a bus. A parking tax should be implemented in congested areas. Tolls on major roads should be added. Give people incentive to use public transit and create a more reliable system at the same time. Public transportation should be created with the mindset of creating a system that's easier to use than driving.
NORTH KING COUNTY	West Seattle should have light rail sooner than 17 years. There is only one way out of here and the building doesn't stop. While I believe everyone needs better transit and support the plan, having so few options out of W Seattle is a real frustration. Either give West Seattle a higher priority or stop the building.
NORTH KING COUNTY	We would like it all to be done sooner. Pleeeeeease add more/more frequent buses on very crowded routes. Think seriously about making some streets through Seattle bus only, or bus/bike only, while other streets would be car only.
NORTH KING COUNTY	Most of this should already exist.
NORTH KING COUNTY	I would be much more likely to vote for this levy if the Seattle projects (Ballard, West Seattle, Graham infill station) got completed more quickly.
NORTH KING COUNTY	I would support most of these projects more strongly if they were going to happen sooner--10 years instead of 25.
NORTH KING COUNTY	I am a strong transit advocate. I use transit every day. I'll pay any taxes, any time. I'll help spread the word and defend the project. But the current plan is not acceptable. It CANNOT take 17 years to bring light rail to West Seattle and 22 years to Ballard. These are URGENT projects that need to happen yesterday. I urge you to come up with creative solutions to significantly improve the timeline of the deliverables. Any transit project needs to start with the most densely populated core, political and sub-area equity issues aside. Also, please decrease the focus on parking, especially free parking. That's essentially a way to buy ridership at a high cost and it should not be Sound Transit's focus. Instead, develop feeder bus routes in collaboration with the local transit authorities.  With the success of University Link we have a unique opportunity to reshape the region. Please come up with a project that people will see in their lifetimes.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	In Seattle, need to build to ballard first, then west seattle. The everett/paine field diversion is incredibly wasteful.
NORTH KING COUNTY	Ballard's population density is increasing more and more by each day, today... Not in 22 years. To build a plan that doesn't affect Ballard for 22years is ridiculous and does not address the current level of building exploding in this neighborhood. I live in Ballard and work on Capitol Hill... both are prominent neighborhoods in Seattle, and yet my commute is 6 miles and takes 45minutes to drive and yet that is still faster than taking public transportation. This is stupid. Additionally, if I do decide to take the bus, my transfer puts me at 3rd and Pine at 8p which is uncomfortably sketchy. If you aren't going to put LightRail in to Ballard for 20 years, well after the current population is gone, then at least propose more alternatives for getting in and out of Ballard to the other neighborhoods, other than down town. Thank you.
NORTH KING COUNTY	The connection between West Seattle through White Center to Burien and down to Des Moines would be extremely important. In our regular travels we move up and down the peninsula frequently and both white center and burien are growing quickly. Can't wait until these are done, especially light rail to west Seattle. All the new development here makes the bridge a mess to cross during rush hour to get anywhere to the north or east.
NORTH KING COUNTY	the HCT Lake Washington study should be moved up in priority.
NORTH KING COUNTY	I would like to see the Everett and Ballard portions moved forward in the time line. My daily commute is between Everett Boeing and N 145th and transit between these two spots is poor. I would utilize light rail daily. The Ballard to downtown is also important to me.
NORTH KING COUNTY	Eight years as the fastest timeline for all of these projects (and Bus Rapid Transit, not even light rail) seems long; but the West Seattle/Ballard 17/22 year timeline seems far, far too long, partly b/c of the booming development in these neighborhoods now. Particularly in W. Seattle folks are fairly car-centric and 17 years is long enough for development to essentially get built around car culture rather than transit, and it's time enough to develop a new generation of residents who will also be car-focused--leaving Sound Transit to work around even more infrastructure that's already in place and a p.r. job of convincing people to get out of their cars onto the train. There is an opportunity now, with the current growth, to have transit be more integrated with a growing community, rather than separate from it.
NORTH KING COUNTY	timeline for light rail to Ballard is too slow.
NORTH KING COUNTY	The plan is diluted with too many projects. Resources and money need to be focused to deliver the top priority projects at a much quicker timeline - decades faster. Look at the success of the Link to Capitol Hill and UW. There has been a huge positive impact to Seattle. Please deliver Link to Ballard and West Seattle ASAP!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>Many of us have moved here over the years from large cities Back East and in Europe and were appalled to discover how far behind public transit is in Seattle. It is preposterous that the public should be asked to wait 15-25 years for new rail service, while the tunnel and rail construction projects are only operating at 1/3 capacity... They all work only one 8 hour shift! We could complete these projects three times faster with three times as many workers employed if we worked year projects in three shifts. The city and region desperately need extensive, frequent rail service to be implemented asap. Not 25 years from now. Please give this careful consideration. Nyc is a great example of a transit crew that works 24 hrs a day.</p>
NORTH KING COUNTY	<p>Low income residents (who may rely on public transit) and high-volume commutes (the largest employers/office hubs, colleges, etc.) need to be accommodated FIRST &amp; FASTEST. Routes and areas already served well by Rapid Ride or commuter/express buses do NOT need to be replaced (soon or at all) with other service (rail, etc).</p> <p>Low income (subsidized/tax credit) and low cost (studios/"apodments") housing and shopping/services built over or near transit hubs and light rail stations is paramount and should be incorporated into all plans, both for serving the most needy and for cost-efficiency (serving the most people in one place).</p> <p>If transit projects serve those who would otherwise be stuck in traffic (drivers who want a faster car commute or want to save money by riding the bus), they should bear the brunt of the cost: gas surcharge! (&amp;/or new car sales tax, tires tax, etc.) The poor can least afford sales tax hikes, even though they may be big beneficiaries of improved bus service. STOP giving steep discounts to employers, schools, and people without regard to income/need. START basing fares/passes and planning on need (income-based), not assumptions like age, student status, zip code, or even disability!</p>
NORTH KING COUNTY	<p>I really think Sound Transit should look at what the funding picture looks like for accelerated timelines on some of these projects. I think a HUGE number of people would vote for spending more money to get several projects done simultaneously. The light rail opening to UW and Capitol Hill has awakened this city to the effectiveness of mass transit.</p>
NORTH KING COUNTY	<p>We need this now, not 25 years from now. Better late than never, but demand then will far outpace expansion.</p>
NORTH KING COUNTY	<p>25 years?</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The city is choking with new people every year, traffic is getting worse, air quality is deteriorating, and housing costs are climbing so rapidly it's near impossible for those who do not work in tech to live near their jobs. A solid, efficient, convenient mass transit system is a key player in getting those in lower income brackets to their jobs, students to school, and traffic moving at a tolerable rate. Bus rapid transit extensions and improvements take eight years to complete and the first light rail extensions won't be live for 12 years. This is too long. 25 years is too long to pay additional out-of-pocket taxes in a housing market that is squeezing poor and lower-income families. I am in full support of the proposed transit plan; Seattle, Tacoma, Everett, and the Eastside need all of it. But it is too long until completion.
NORTH KING COUNTY	I support anything that can be done to speed up the timelines! Seems like taxing the tech companies that are bringing thousands of new employees to the region would be a good option.
NORTH KING COUNTY	Projects that will lead to high ridership should be completed faster, light rail needs to be prioritized asap.
NORTH KING COUNTY	25 years for the total completion of these projects is absurd. The population is rapidly growing and public transit needs to expand so that people can choose to live further away from city center and still take public transit.
NORTH KING COUNTY	West Seattle and Ballard should be top priorities.
NORTH KING COUNTY	Connecting Ballard, West Seattle and Bellevue to the light rail line, including providing parking at stations is the only thing that will have a real impact. Please change the timeline to reflect this, rather than pandering to other interests.
NORTH KING COUNTY	would happily pay much more for an accelerated timeline. 17 years is impossibly long!
NORTH KING COUNTY	The biggest problem I see is the time line. These are great programs, long overdue, that I think a lot of us are happy to pay for to see the improvements in traffic flow. I compare us to Shanghai. There they have built up an enormous metro system that works great and did it all in less than 10 years. We're talking about 20 some lines and probably over 200 miles of routes. We take 10 years to build one that goes 10 miles. At this rate, most of us will be dead before this system is developed. Great for future generations but it will be funded by people who are deceased and never enjoyed the benefit.
NORTH KING COUNTY	It's too bad that this is going to take so long. It should be completed much sooner if possible.
NORTH KING COUNTY	22 years for light rail service to Ballard is unacceptable. I could have a kid and send them to college in that time, so we're talking a full generation here. Zoning has already changed for higher density housing in Ballard, with little or no improvements to the road infrastructure. I would only fully support this plan if the Ballard and West Seattle projects were prioritized over things like a Dupont Sounder extension. Let's get the funding and resources aligned to a few projects that serve people closer to higher density living and employment areas. Worry about the suburbs, where less people will ride anyway, later.
NORTH KING COUNTY	I think light rail to Ballard should be moved up in the timeline.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	We have urgent transportation problems now, we can't wait so many years for a regional solution. Given how long the timeline is, it is way too expensive. Low income people already can't afford the newly opened light rail. I oppose a plan that doesn't solve our current problems, excludes the needs of low income residents and is so expensive. Improve the plan.
NORTH KING COUNTY	The proposed timeline is disappointingly conservative. Seeing a plan that is mapped out over 25 years, where the farthest reaches of the system won't see service until the end of this period, completion seems too far off. The streets/highways/freeways along the Everett/Seattle/Tacoma corridor are already in an overly congested state, how can we afford to wait 25 years? I believe we need to see quicker results, as in within the next 10 years. If this is not possible, please highlight to the public the parts of the process that are going to take such an incredible amount of time. Looking at the current Link Light Rail project to Northgate, where there is still has another 5 years until its completion, I am baffled. How is it not possible to finish this in the next three years? What takes so long on these projects versus other major projects? In the end, it will have taken London less than 10 years to complete the Crossrail line, which appears to be a much more complex (crossing multiple station, at a greater depth) than the Northgate extension (all new lines, shallower, and not crossing existing routes/lines).
NORTH KING COUNTY	I think the West Seattle and Ballard light rail should be moved up in schedule.
NORTH KING COUNTY	Prioritize light rail completion - complete in 10 years.
NORTH KING COUNTY	This is an excellent plan but I think the priorities are somewhat skewed: 1) Improvements to bus service, while far less expensive, hold little hope of real improvement. I've ridden the buses my whole life and the result of increasing service to heavily-congested routes has never amounted to much. Buses just get bogged down in traffic and can't meet their schedules regardless of funding. 2) First priority for Light Rail should be the Eastside-to-Seattle links and the Ballard-to-Downtown-Seattle link. I'm conflicted about the links connecting Sea-Tac and Tacoma; are these redundant with the Sounder train? Should the money for Federal Way-to-Tacoma be diverted into better Sounder service? Or is the opposite true? 3) Park-and-ride style parking at Light Rail stations is a critical need, especially at "outer" stations where land may be more affordable.
NORTH KING COUNTY	Ballard light rail needs to be more of a priority. Both Seattle Metro 17 and 18 routes to downtown were eliminated and replaced with a very slow 40 route. As Ballard keeps booming, light rail will help immensely to decrease congestion and prevent single-occupant vehicles. Ballard light rail cannot wait 22 years.
NORTH KING COUNTY	Is there any way to get this completed faster? 25 years is an awfully long time and the Seattle Metropolitan Area continues to keep growing. I feel as if the timeline could be improved upon even if it means having to pay a little more in taxes.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Most of these plans won't help my family in the time frame we'll need it, but will increase our high property tax. Based on the history of botched transportation improvements, the budget will probably run out long before all the projects are close to completion and tax payers will get stuck with the bill. I have no confidence the county or city will be able to deliver on transportation improvement promises and soon we'll be unable to afford to live in Seattle.
NORTH KING COUNTY	8 years is way too long. 22 years for a light rail to Ballard. Y'all high? You need these projects done now. 50,000 people were added to the city in the last five years. That number is only going to go up. You're delusional if you think eight years is urgent. Make it 3 years. Get it done. Tell Ed Murray to take out a loan from Comcast. They owe him a favor or two in the form of 1 billion dollars.
NORTH KING COUNTY	No more bus nonsense. It's just another car on the road that gets stuck in traffic and runs late. I'd rather use those resources to expand the light rail more quickly. Also 25 years is a ridiculous time frame. I would pay a lot more in taxes to cut that down to 10 years.
NORTH KING COUNTY	Timeline is too long--understand it is investment in future need, but 25 years to get to Everett is too long. All projects should be completed in 10 years, willing to pay double to make that happen.  Would like to see ST lobby harder for federal funding as well.
NORTH KING COUNTY	Regional projects being prioritized before Seattle projects make things unappealing. Better connection options to rail (or C Line) is really needed. Admiral area in W Seattle is cut off after peak commute hours.
NORTH KING COUNTY	The project timelines for the stations within the City of Seattle are <b>**TOO**</b> long. The city needs more high-speed transit options ASAP as more employers (Amazon, soon Expedia, etc) are moving into the areas around downtown. While Link service to Bellevue, Redmond, and Everett should also be a priority, the timeline for service within the city is just plain shameful. I understand that it is "Sound Transit" not "Seattle Transit," but I believe light rail should be prioritized within the city first, with BRT lines serving the outlying areas, with those to be eventually replaced by light rail later down the line.
NORTH KING COUNTY	22 years is too long
NORTH KING COUNTY	The timeline is too long. You will tax me out of my home before any of this is completed. In addition this will do nothing to ease congestion. You are selling a subway system in all of your promotion while you are building a highly subsidized heavy rail system that will never pay for itself operationally. How much will the ongoing tax be to support the operation of this white elephant?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>I do not support any projects that include parking. If parking is needed near stations it can be provided by local parking companies.</p> <p>It is not helpful to me to build light rail or BRT to areas with poor local transit, pedestrian, and cycling infrastructure. I do not want to ride light rail and then rent a car at my destination. I would be much more supportive of a plan that prioritizes Ballard and West Seattle, where I could continue my trip from the station via transit, bike, or on foot easily.</p>
NORTH KING COUNTY	<p>I personally feel that there is a greater need for light rail to ballard and west seattle right NOW (the rapid lines are always crowded!), yet you propose those projects taking the longest?! I would feel much better about your plan if you considered making those projects a priority (i.e. completion within eight years). I don't relish the thought of being in my 50s when there is finally light rail to Ballard...otherwise, I think your plan is great. Anything to expand seattle's public transportation and get fewer cars on the road is a step in the right direction! Thanks guys!</p>
NORTH KING COUNTY	<p>Ballard and West Seattle should be the highest priorities, and they need to be grade separated (NOT at the mercy of road and pedestrian traffic).</p>
NORTH KING COUNTY	<p>light rail is most important; would like to see ballard, west seattle, tacoma, and tacoma comm. coll. legs of the light rail system online sooner.</p>
NORTH KING COUNTY	<p>Due to the explosion of population in the Seattle downtown core and neighborhoods we need to move up the timelines to get light rail to Ballard. We also need more cross town extensions from U District to Ballard. I DON'T WANT TO BE 70 years old the first time I can take Light Rail to Ballard. THAT IS WAY TO LONG..BUILD IT WHERE THE PEOPLE THAT DON'T HAVE CARS OR DON'T WANT TO HAVE A CAR. 28 years is too long to wait...speed up the timelines.</p>
NORTH KING COUNTY	<p>I think the timelines are exponentially too long. Seattle area traffic has reached critical mass and the tipping point was years ago. Residents are unhappy and enraged by our transportation. I think that proposed completion times should, in no way, take a quarter of a century to implement. I believe in the power of ingenuity. Involve our local businesses- Amazon, Microsoft, Boeing- who have a vested interest in making their companies attractive to potential employees (traffic is a huge detractor for moving to our area), to push the timeline. Get it all done in 10 years, guys. You can do it. Partner with the business giants who are bring the most people to the region and make it happen</p>
NORTH KING COUNTY	<p>It would be great if they could prioritize the light rail expansions, including bigger trains. It is great that they are always full, but shouldn't this happen faster given the crazy amount of demand?</p>
NORTH KING COUNTY	<p>I strongly support additional light rail connections to the north end of Seattle. Connecting Northgate, Lynnwood, and Everett should be priorities.</p>
NORTH KING COUNTY	<p>22 years is way too long for Ballard light rail!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	This timeline is completely mental. There is no justification for dragging construction out this far with an upfront commitment to funding for 25 years. Funding should be committed on a 5–7 year basis, with a matching commitment to open specific additional rail stations inside of each window. It is impossible to predict this region's needs 25 years from now, and with the ST3 plan as proposed, it totally misses the extreme urgency of new transit entering service as soon as possible. I cannot support a plan that is both exceptionally expensive on a per-mile basis and also will only be useful after such an absurdly protracted timeline. The transcontinental railroad was built in 6 years. Let's not embarrass ourselves and set an example for practical transit innovation in this country. Stop settling for the lowest common denominator plan.
NORTH KING COUNTY	Link light rail stations to Ballard and west Seattle should be moved to the front of the line in terms of completion. Should be a goal to finish these in the next 5 years. Lines to Issaquah, Redmond and Bellevue should move to the back. The Ballard and West Seattle lines will have greatest impact on traffic within the city and would affect positively those who needed most and bare the largest economic burden for the construction of these projects due to larger assessed property values due to living within the city of Seattle.
NORTH KING COUNTY	I understand that to complete an EIS, and secure funding before starting the project is a priority, but a 20+ year timeline for this to happen is too much time. If there is a way to expedite or begin construction on these lines as soon as possible, even if it means a slight uptick in total monthly/yearly cost to each resident, I would be on board.
NORTH KING COUNTY	Ballard, Lower Queen Anne, and South Lake Union are all booming neighborhoods in desperate need of transit. By Sound Transit's own numbers, this project will have by far the biggest payoff in ridership of anything on the list - we need it now. We also need to do it well, with full grade separation and a Ballard station designed to connect to a future east-west line.
NORTH KING COUNTY	prioritize ballard to SLU light rail
NORTH KING COUNTY	Light rail to Ballard should be moved up the timeline considerably. It is a booming area and would do very well with light rail.  Additionally, there are no proposals that adequately address cross Seattle transport. Being able to go from Ballard to UW would be very helpful by light rail.
NORTH KING COUNTY	If Seattle property owners are paying through property taxes, then it should serve our neighborhoods first, i.e. Ballard and West Seattle.
NORTH KING COUNTY	Needs to be faster. We need this sooner. (Especially the Graham Street stop - you could do that in three months. The plans are already made, it just got skipped.)
NORTH KING COUNTY	Would like to see an improvement in the proposed timelines for 130th/145th light rail stations and light rail to Ballard.
NORTH KING COUNTY	I know it is difficult to do these projects, but Seattle needs more short term solutions. I will be 45 before this is complete, and yet I am already stuck wasting my life away in traffic.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>1. Ballard light rail <i>*must*</i> be grade separated, <i>*Must Not*</i> alter existing lane capacity on 15th, and <i>*Must*</i> go -under- the ship canal.</p> <p>2. Ballard Light Rail needs to be prioritized for earlier completion. SR99 and Mercer changes have negatively impacted reliability, functionality and predictability of driving in Uptown/ballard/queen anne. Prioritizing the Ballard line would mitigate this.</p> <p>3. There must be a station serving Uptown/SeattleCenter with frequent bus service up/down QA hill.</p>
NORTH KING COUNTY	Too long till completion
NORTH KING COUNTY	It needs to happen faster. This plan is designed for the Seattle of 1990 and won't go into effect until the Seattle of 2041 is here. The population using the system and the population the system is designed for are 50 years apart. We can't go back in time and start construction in 1990, but we can move faster. Raise the average cost, cut out Issaquah/Everett (access by commuter rail, not link light rail) and expand as quickly as possible.
NORTH KING COUNTY	I'd like to see Seattle rail projects moved ahead in the schedule.
NORTH KING COUNTY	I would like for these projects to be completed faster, if at all possible.
NORTH KING COUNTY	Considering Ballard and West Seattle are growing very quickly, I find the timeline for the Ballard and West Seattle rail lines completely unacceptable. 17 and 22 years? Seriously!?! If you actually want to do something to ease traffic, those two lines are where you should start. Beyond that, I feel this timeline is extremely long and feels unreasonable. There must be a way to accelerate the plans. It will be hard to garner support for a rail line that won't be available for over 20 years.
NORTH KING COUNTY	8 years to add rapid bus lines seems incredibly long. 25 years to finish some light rail projects is ludicrously long.
NORTH KING COUNTY	I'm not sure if gathering funding is what is making the project take so long (up to 25 years??), but is there a way to speed up the project? If Seattle continues to grow at the current rate, will the new system be outdated and insufficient by then? I know that I don't speak for all Seattle voters, but I would be willing to pay more in taxes to get this project off the ground (or underground, in some cases) sooner.
NORTH KING COUNTY	Overall I support this plan but would like to know why the Ballard light rail connection isn't going to be one of the first completed. It would serve the most riders by a huge margin (114k - 145k) which is about three times more ridership than any of the other closest projected riderships for other segments. On the opposite end, the Redmond light rail connection is going to be one of the first ones completed and it serves the least riders (7k - 9k) out of all of the proposed segments. It would be nice if there was some more documentation that explained why these decisions were made because on the surface they are baffling. It seems like the global plan of ST3 is sound but the priorities of the pieces are way off.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	8-25 years is WAY TOO LONG. This is ridiculous. We live in the richest country in the history of earth. We live in a state with some of the wealthiest people in the world. This should be done much faster. This is a shamefully UNAMBITIOUS TIMETABLE. I have lived in Seattle for 17 years and seen VERY LITTLE IMPROVEMENT. Speed this up people. Create Jobs! Develop infrastructure faster than this. Everything should be completed in less than 10 years.
NORTH KING COUNTY	Project timelines should be moved up, especially for West Seattle/Ballard, even at a higher total cost. The area needs this to be done as soon as possible.
NORTH KING COUNTY	can't believe how long it takes our state to build our infrastructure. to be asked to buy something you can't have for 25 years will be a hard sell.
NORTH KING COUNTY	Transit is good, sooner is better. 25 years is a long time to complete these projects.
NORTH KING COUNTY	<p>This proposal is pretty laughable. Getting from one part of Seattle to another is really difficult right now, and Ballard won't see a light rail station until after Tacoma, Lynnwood, and Redmond have them. Fremont, Wallingford, and other areas not already benefiting from downtown light rail is ignored in favor of expensive lines to suburbs. Where do you think you're going to get the big ridership numbers from? Everyone I know in Ballard/Fremont is itching to get off street level traffic, and everyone I know in Issaquah doesn't care about light rail.</p> <p>I voted for (and encouraged many others to vote for) the proposition last year due to the emphasis on improving transit for downtown Seattle, and almost all of that is either gone or deferred for a long time. Even rapid bus lines like the E (which is ALWAYS full) are ignored in favor of catering to the voters in the suburbs. Fix this plan to give downtown the slice of the funding that it deserves and helped fund, or I'm really unsure that I can continue supporting SoundTransit's initiatives.</p>
NORTH KING COUNTY	Can we make this faster? 25 years is A LONG way off!
NORTH KING COUNTY	I strongly support investment in regional transit and, as a business and property owner, have no problem paying additional taxes to improve our woeful transit infrastructure. I can not however support this plan as currently constructed. 23 years to build a long overdue rail line to Ballard is utterly unconscionable, especially when ST is prioritizing low ridership lines to far-flung low population suburbs. Ballard is one of the highest density areas in the state without reliable transit and it is the height of folly not to build this line first. While I understand the political and technical challenges in prioritizing this corridor I will unfortunately vote "no" unless something is done to deliver this line within a 10-15 year time frame.
NORTH KING COUNTY	I actually strongly support the goals set out in question 12, however the timeline is ridiculously long! Ballard and West Seattle cannot wait 17 and 22 years for light rail, the city will be in gridlock long before then. The roads and transit from those neighborhoods are already stressed. I want to be able to use transit, not my car, to get around the city within my working (and overall) lifetime! My friends and colleagues who live in those neighborhoods deserve the benefit of transit that I now experience as a Capitol Hill resident within a reasonable amount of time. I will not vote for the proposal as-is.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I PLAN TO VOTE "NO" UNLESS YOU SPEED UP LIGHT RAIL TO BALLARD. A 22 year plan is ridiculous. It doesn't help the huge influx of commuters in and out of Ballard to/from downtown, especially with the Expedia move to Interbay happening over the next 3 years. SPEED UP LIGHT RAIL TO BALLARD, OR LOSE MY VOTE.
NORTH KING COUNTY	This needs to be accelerated. It really must be built on a faster schedule.
NORTH KING COUNTY	It is urgent to get the most mass transit as soon as possible.
NORTH KING COUNTY	ballard and west seattle lines should be built FIRST
NORTH KING COUNTY	I care most about commuting from Seattle to the Eastside. Between the closures and accidents on I-90 and 520 and the frankly staggering traffic at these locations, the segment of the lightrail cross the water is most critical for me. That segment was not one I could vote as being most urgent in this survey. Further, I do not know what studies were done to prioritize one area over another, but it seems to me that some of the more populated areas and the areas that generate more commuter traffic will wait longest for the light rail, i.e. West Seattle and Ballard.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

<p>NORTH KING COUNTY</p>	<p>I want to clarify that I'm a huge transit advocate and am going to vote in favor of Sound Transit 3, essentially no matter what the final draft proposes. Our need for improved public transportation in this city and region is so dire that we must act as quickly as possible to right the ship, so to speak. That said, I have multiple comments regarding the current ST3 draft plan that I know have been brought before you before and should not be understated or overlooked.</p> <p>First, it's insane to me that the line that will get the most use and produce the most revenue for Sound Transit, Downtown Seattle to Ballard, will be built so late in the process and be at grade. It must be prioritized to improve upon what is already a severe traffic nightmare along Elliott Ave W and 15th Ave W. I grew up in the city, and my friends and I jokingly (but also sadly) refer to this route as the Ballard Freeway due to the current traffic conditions. Also, while speaking of this line, it seems strange to me that Belltown was not given direct access to light rail, as it's one of the densest neighborhoods in the city. I understand the need to get light rail to SLU, but at the very least, steps should be taken to improve access in Belltown to the existing and future light rail stations in its vicinity.</p> <p>Second, I'm somewhat shocked that only a study of the Ballard to UW line is being proposed in this plan. I would have figured that this line would have been one of the top priorities for inner city light rail service in ST3. Moving from East/West in Seattle anytime of day, but ESPECIALLY during rush hour is very difficult due to the many choke points created by Greenlake, I-5 and Aurora. This needs to be prioritized because the current situation is untenable. Along these lines, Seattle Subway's Central District line should also be studied for a future light rail line, as the urban core of the city will continue to need increased access to public transit as our city grows and density increases.</p> <p>Finally, I didn't include it on the list of my personal top two priorities of ST3, but I strongly believe that a station needs to be built at 130th St NE to provide some level of light rail access to the Lake City neighborhood, a dense, low income neighborhood that is in severe need of increased access to quality public transportation.</p> <p>Overall, I don't disagree with the need for any of the proposed lines in ST3, including the lines to more distant suburbs. I understand the positive impact that those lines will have on the region, and even the positive impact those of us in the city will see from more suburban commuters using public transportation to reach the city. I also understand that these tax payers will also want to see a</p>
<p>NORTH KING COUNTY</p>	<p>Light Rail needs to happen quicker!!</p>
<p>NORTH KING COUNTY</p>	<p>This project is something that the Seattle area needs badly. What is the cost of traffic? Way more than the cost of this project.</p> <p>This need do get done faster that 25 years but I still support it.</p>
<p>NORTH KING COUNTY</p>	<p>For the amount you propose to spend (of our tax dollars) you could purchase hundreds of buses, which are much more flexible and reliable than fixed-rail trains. I do not trust ST to make the best use of our tax dollars.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The faster the Seattle projects and the projects North along the I-5 corridor the better. Not to mention the projects linking up the Eastside with rail.
NORTH KING COUNTY	With the rate of growth in this region in my lifetime, has been insane. Those of us from the area, who didn't move for those fancy tech jobs, are the ones out in the suburbs, where we can afford it. Having commuted from Everett to Seattle, that route is hell. The Sounder runs on tracks that are closed half of winter, and I-5 loses a lane in Shoreline. Twenty-five years is too long. We needed it yesterday. The population increase in this region can't wait for transit to catch up. If Amazon and whoever else wants to bring in thousands of people, they need to be providing the funds to expedite this.
NORTH KING COUNTY	Though I live near the proposed 130th Station in North Seattle, it is more important to me that other communities receive their 1st station instead of spending the money on a station at 130th (which will be served by both the nearby Northgate and 145th stations). It would also be interesting to see what the cost difference would be between building parking at stations vs expanding bus service. I realize that many people who live in the suburbs would currently have to drive to a light rail station, but the cost of paying for parking garages is rough.
NORTH KING COUNTY	I understand there are financing, study, and planning issues but the length of time to completion of many of the light rail projects in already dense but rapidly growing areas is way too long. With the pressure to grow now, if we want to set the primer for transit oriented development and do our part to curb global warming, we need to add rail to Ballard, West Seattle, Bellevue, and Redmond right away. It is still faster to drive into Seattle from Lynnwood than it is to bus from these areas into downtown. If we want to be proactive and encourage people to live closer to work and build denser communities, rail must be extended to these areas as soon as possible. Extending to suburbs first, where people need to drive to the rail station, will only encourage more growth and destruction of land there out there. We can lead our growth and better protect our farm land, natural resources, and fight global warming, if we encourage that growth within the already established core. But, we have to find a way to do that faster than 17 or 25 years.
NORTH KING COUNTY	Despite the fact that I may not be alive to see the completion of some of the longest term projects, I believe we need to think long term. Short term increases in bus service is great, but the long term light rail is essential to move commuters and non-commuters quickly without using the already overcrowded highways.
NORTH KING COUNTY	Please do it faster :)
NORTH KING COUNTY	Ballard is becoming so congested as an urban high density area that all efforts to improve rapid transit between Ballard and downtown Seattle should be accelerated, not pushed out decades too late.
NORTH KING COUNTY	I strongly feel that completing a station to South Lake Union ahead of the current proposed schedule is more important than all other projects combined. That place is already a disaster with traffic. With Facebook and Google moving there within the next 3 years, combined with Amazon's growth, the place is going to be an absolute nightmare. At the very least it needs dedicated bus lanes and increased bus service to areas further out than downtown (including South Seattle).

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	quiro una tarjeta orca
NORTH KING COUNTY	We simply can't wait on the timeliness as drafted. Our region is already bursting at the seams
NORTH KING COUNTY	Graham street station would be such an inexpensive addition in comparison to other projects and would be a quick win to demonstrate Sound Transit's effectiveness in order to garner support for ST3- please move it up on the project timeline list
NORTH KING COUNTY	West Seattle and Ballard needs rail sooner than 17 years.
NORTH KING COUNTY	I'm a huge supporter of light rail expansion and will happily pay more in taxes to speed up the project timelines. Under the current timelines, I will be voting against the proposal.
NORTH KING COUNTY	22 years is an extremely long time to wait for light rail to connect Ballard, a fast-growing neighborhood, with downtown Seattle. I would certainly like to see a Ballard light rail connection sooner than that.
NORTH KING COUNTY	I just wish the Seattle items were completed first.
NORTH KING COUNTY	22 years to get light rail to Ballard is crazy. In 22 years I'll be taking a self driving Uber to Ballard, not a light rail filled with people. Especially when the light rail will be fighting traffic.
NORTH KING COUNTY	Glad you've included 522 in the plan
NORTH KING COUNTY	This time frame is unacceptable and won't address the worst of the cities traffic issues for at least two decades.  Additionally none of these plans do anything to address the traffic troubles going east west in north Seattle. Connecting Ballard to the Udistrict is a pivotal missing connection and would be so much more useful than connecting Ballard directly to downtown which is served well by the BRT.
NORTH KING COUNTY	Anything you can do to speed up this process would be both appreciated and important. Very urgent, Seattle's population density is only going to get more intense, we need a fast solution to traffic.
NORTH KING COUNTY	I strongly support finding a means to accelerate the timelines for projects that can be done in parallel. Particularly when costs can be paid for in long-term increases in cost of other transportation related fees. The investments in transit are worth practically any cost.
NORTH KING COUNTY	The timeline should be accelerated. 25 years is way too long to wait to benefit from this project. Each year of delay is another year that we can't enjoy the benefits. Bite the bullet and get most of it done in 10 years. There will be a mess, but then we can start to actually see the progress and use the system. i would gladly pay twice as much now to get this project completed in 10 years. I would pay 4 times as much if you could get the light rail parts done in 5 years. I consistently vote to fund every mass transit measure that appears. I will put my money where my mouth is. Paul Edmonson 200 NW 143rd Street, Seattle, 98177

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Thank You Sound Transit for listening and including the SR 522/523 corridor in the final plan! BRT opens up the promise of light rail access to the north Lake Washington communities. The parking garages are extremely important elements of access by our community to this transit corridor. The sidewalks will, for the first time, open up safe access to this transit corridor for our citizens. The early construction schedule is a win/win for the communities and Sound Transit, as it coincides with the opening of the North LINK light rail stations.
NORTH KING COUNTY	Sound transit should focus on the highest ridership areas first. Ballard should be a top priority. Everett should kick in extra \$ for their low ridership diversion to the airport. Tacoma link should be a priority. Also.. since this system is going all the way to Tacoma and Everett, research should be done to increase the train speeds so the trains can compete with driving speeds.
NORTH KING COUNTY	Get brt done first!
NORTH KING COUNTY	Decisions need to be made quickly and money put in place to finish sooner. If only we'd have done the monorail it'd be finished! We need a fix now! Not in 8-25 years!
NORTH KING COUNTY	Build more transit! Faster!
NORTH KING COUNTY	I do wish this could happen sooner but I also realize it is possibly unrealistic to get some of the work done sooner then projected. I would support whatever measure it would take for this to happen sooner.
NORTH KING COUNTY	The timeframe for implementation is too slow. We need this infrastructure now.
NORTH KING COUNTY	West Seattle buses are already overloaded and unreliable to take. With the growth in West Seattle, the plan to increase buses and light rail through the area should not wait 17 years. In 17 years, the plan will already be outdated and to little to late.
NORTH KING COUNTY	Would love to see lightrail going to Redmond as soon as possible OR an express bus coming to and from south Seattle to Remond.
NORTH KING COUNTY	The timeline for light rail in seattle is so long! I am super supportive of light rail and regional transit in general. I living in W Seattle I would be thrilled to have light rail here, but its pretty hard to get excited about a plan that spans a quarter century. I know these big projects take time, but big price tags need big returns in order for people to get excited about them, especially after the SR99 debacle
NORTH KING COUNTY	Why has Ballard been pushed down the priority list to 22 years from now!?!?! Sound Transit and City of Sesttle planning department need to get on the same page. If they are incentivizing development and population in hub urban villages like Ballard, Sount Teansit needs to respond with increased and prioritized transit! And charge development impact fees to the developers making so much money off these new projects that are clogging our streets with new cars since there is insufficient Transit to handle the huge growth!
NORTH KING COUNTY	The changes in population in Ballard have affected my life dramatically and are happening now. The changes in transportation will happen too late to make any difference to me. What can you do sooner than 22 years?
NORTH KING COUNTY	Why so long? Can we really wait 25 years?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I like the plans for all the ST3 services however, I think the priorities are off. I think it's more important to embed a functional transit plan within the city of Seattle before transit is expanded to the suburbs. I don't have a car, and it takes me an hour and a half to get from my home in Columbia City to my doctor's office in Fremont. It would take me the same amount of time to get there by bus coming from Sammamish.
NORTH KING COUNTY	This needs to happen way faster!! The number of cars we currently have on the road is hazardous to our health. Also the light rail needs to extend up beyond Ballard. It's really difficult to get north of there without a car
NORTH KING COUNTY	Must it really take 25 years? Let's get going already!
NORTH KING COUNTY	My husband and I chose to live in SLU because of the proximity to work. If transit in the city was better, we would be able to move further away to save money on rent. If the timeline could be moved up significantly, I would support this proposal. The cost savings for us would be worth the tax increase.
NORTH KING COUNTY	Way too slow. Expedite delivery of this entire plan. Otherwise by the time they are complete we'll be the bay area today but perhaps worse off
NORTH KING COUNTY	Way too slow. Need to accelerate development!
NORTH KING COUNTY	I feel Ballard and West Seattle light rail and bus should be priorities, since they are already high density--with Ballard expanding every month. Currently the bus system is filled to overflowing everyday.
NORTH KING COUNTY	The timelines are too long. East-west transit in the city is terrible. I support all of the projects, but I believe they should be completed in parallel and as quickly as budget allows.
NORTH KING COUNTY	WAY too slow....why???
NORTH KING COUNTY	Your timelines are too long. Why would I want to pay \$200.00 per year to see Ballard get connected to light rail when it's going to take 22 years? 22 years? Really? That's ludicrous.
NORTH KING COUNTY	While I recognize that procedural and environmental concerns need to be addressed, the timetable for this list of projects is too long. We need to find a way to expedite planning and construction and recognizing that people and businesses will necessarily be displaced. If necessary, laws should be modified to avoid the "Seattle process."
NORTH KING COUNTY	This is too slow of a timeline...we need transit now, not in 12 to 22 years. New York City seems to have the ability to add new subway lines in a period of a few years, why does it take Seattle 22 years? I am extremely supportive of increased light rail but I will not support the bond measure with these proposed timelines. We need more light rail or subway service in downtown Seattle and its neighborhoods in the next 5 years. Period. Why are you proposing additional service to places like DuPont when the massive congestion is in downtown Seattle? Amazon is building a massive new campus bringing thousands of additional people to downtown...not DuPont or Federal Way. Expedia is moving to Seattle. Ballard, West Seattle and a train across Lake Washington should be a top priority and should be built now.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The only reason that I am don't strongly support this plan is the timeline. 25 years is nonsense. There has to be a way to reduce the timeline to 20 years. Ideally, it would be awesome if everything was done in 12-15 years.  commuters.
NORTH KING COUNTY	These projects need to happen much faster or we will just fall further behind our needs by the time they are done.
NORTH KING COUNTY	I think increase support and in turn increase funding, we need to see a more immediate impact. Improving existing bus infrastructure and perhaps improving traffic controls, specifically traffic lights would have a broader appeal to those use and not use mass transit. To have an impact in 5 years would much easier to accept and support. Higher frequency of busses and coverage, especially the suburbs would awesome!
NORTH KING COUNTY	The faster the projects are completed the better. ST3 should aggressively pursue shorter timeframes. Adequate parking at rail stations and transit centers is essential.
NORTH KING COUNTY	Road congestion in Seattle should be the #1 priority for this plan. Traffic here is exponentially increasing, and this proposal only really helps in 22-25 years! Not acceptable. Seattle will grind to a halt well before then.
NORTH KING COUNTY	I strongly support expansion and investing in more public transportation but the timeline or timeframe seems way too long. The city (ies) could not afford eight years for the first/2nd phase to take shape. Could there be a more immediate possibility of implementing and executing the projects?
NORTH KING COUNTY	22 years to Ballard is way too long. I would oppose it if these are the timelines. The city is allowing apartments to be built with no parking today assuming these new people will take mass transit to work. Either get a train here soon or stop building apartments with no parking.
NORTH KING COUNTY	Two comments: 1) Remove the Sounder pieces; and, 2) move up the Ballard timeline -- there seems to be way too much "process" involved, need to consider cutting that down 5-10 years.
NORTH KING COUNTY	Build the Ballard and West Seattle lines SOONER. They are the most concentrated ridership corridors. Look at the boom in the Westlake / Cap Hill / UW ridership when opened. This is the right thing to do!!!
NORTH KING COUNTY	Light rail to Ballard not only helps Seattle (North King) but adds key destinations to users (Sounder, ST Express, Link) from all sub-areas. It helps the entire region in a way that light rail to Tacoma, Everett, Redmond, and Issaquah does not. It also expands ridership by an enormous amount, helping to build support for continued light rail expansion as well as requiring less subsidy per rider. For these reasons, PLEASE prioritize Ballard light rail as early as possible. Twenty two years is far too long to squander that potential ridership and benefit to the EVERY sub-area.
NORTH KING COUNTY	25 years is too long. Needs to be done sooner.
NORTH KING COUNTY	We need to bite the bullet and get this all done yesterday! We will have to pay the price of our inaction in the past but WE CANNOT WAIT any longer!!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	This timeline is extremely disappointing. I'll be 67 years old when this comes to Ballard. I'm in my 40s now and can enjoy what Ballard has to offer. I'll be on SSI and too poor to go anywhere. I only earn \$54k a year and I'd be more than willing to pay double the proposed cost if I could see light rail in Ballard in 11 years. BTW, I'm a Licton Springs resident, but I left Ballard in 2013 due to the inability to get around.
NORTH KING COUNTY	Why does everything take so long? All this money being spent and we can't make it happen any faster? Bertha haunts our area with a never ending sequence of delays, why aren't we working round the clock to get more service to Northgate? Who was the idiot who decided to stop light rail 6 blocks short of the airport? How difficult do you want to make it to use "rapid" transit? The last time I took transit to the airport it took three hours EACH way.
NORTH KING COUNTY	I strongly oppose waiting until 2038 to provide service to Ballard. The neighborhood's population, limited access to Seattle, and the location of major employment on 15th Ave will result in major travel delays into Seattle. It is inequitable to provide improvements that will serve smaller populations while stranding 30,000 people in Ballard. Moreover, I strongly oppose a second bridge over the Lake Washington Ship Canal. Sound Transit should replace the existing Ballard Bridge and provide both separate light rail capacity and pedestrian/bicycle capacity on that bridge.
NORTH KING COUNTY	Our region needs to support this expansion to happen as quickly as possible. 25 years feels desperately long.
NORTH KING COUNTY	I am 45 years old. When this is completed, I will be in my 70's, my children will be in their 40's, and they will have children of their own. This needed to be done 15 years ago. Take a moment and consider how you can make this move a bit faster. Basic reliable transit for our region shouldn't have a multigenerational timeline.
NORTH KING COUNTY	The timeline for light-rail transit to the east side should be modified. A 25 year wait for a light-rail connection between Seattle and the East Side is too long. We need a light-rail connection much sooner!!!
NORTH KING COUNTY	These are extremely long timelines for infrastructure development. Many other countries and/or municipalities work on tighter timelines. Light rail to Ballard in 22 years is unacceptable, which, anecdotally, is one of the reasons I find people to be opposed to these plans.
NORTH KING COUNTY	Concentrate on light rail improvements to the city infrastructure first. Areas like Ballard should not be waiting 22 years.
NORTH KING COUNTY	The light rail expansion seems needlessly long and shuttling people from outside the city into a city that you're unable to get around in seems backwards. It would make more sense to clear up the city's congestion (ie: projects to/from Ballard and West Seattle) before bringing more bodies in from the suburbs just to get blocked up once they finally hit the city.
NORTH KING COUNTY	As I am sure you are hearing, 22 years is unacceptable. Most voters cannot imagine making a long-term investment in transit if they have to wait until their retirement.
NORTH KING COUNTY	Priority should be given to aspects of the project that include downtown Seattle, West Seattle, and Ballard, since these metro areas are more prone to congestion, prior to working on improving transportation systems in more outlying areas.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Ballard to downtown should absolutely take priority in construction. Ridership will be WAY higher, and the residents in that area need a way to get more quickly downtown if we want to keep up with population growth. Construction of that line should be prioritized and moved to the top of the schedule.
NORTH KING COUNTY	Look at growth projections from the initial plan and prioritize transit to high density areas that will be paying the property tax to support the system. I live in Ballard. Our density requires better transit options. With a completion date of 2038 I think autonomous transit will be the solution that beats out light rail implementation.
NORTH KING COUNTY	West Seattle and Ballard light rail should be completed in the first phase. If this is not possible, then expand bus accessibility to these areas.
NORTH KING COUNTY	i think getting light rail to ballard (and ballard->UW) and west seattle is the most important priority and should be the first priority. these lines will have the biggest ridership and be able to sustain themselves best.  i also acknowledge the political reality that to get support from wider KC and pierce, the plans may have to prioritize less useful (or at least less well-ridden) lines and i support ST3 pretty much no matter what. we need more transit in this city.
NORTH KING COUNTY	West Seattle and Ballard need to be top priority. I'm not sure why those timelines are so delayed. These two neighborhoods are arguably the fastest growing already, with tons of townhomes under construction. With limited parking in both neighborhoods, public transportation improvements are a must. I recognize that I am somewhat biased towards West Seattle's situation, but it truly is a SIGNIFICANT issue and is getting noticeably worse on what seems like a quarterly basis.
NORTH KING COUNTY	West Seattle light rail should be the priority. The C line can barely accommodate riders and there is still a huge amount of new construction for housing so we can only expect bus lines to get more crowded and the ws bridge to become nearly impossible to use during commutes.
NORTH KING COUNTY	I realize there is a lot to do, but 25 years?! You're not building this for me. You're building it for the next generation...with my money. I support it all, but let's knock ten years off the schedule.
NORTH KING COUNTY	With the growth this city is experiencing Ballard and West Seattle should be higher priority and shortened timelines. Those two routes travel through some of the densest, most travelled areas of the city and getting those people off the road would make a world of difference. Bus everyone north and south to those points and Northgate/Tukwila if need be until the lines are expanded further, but I don't see how Ballard streets can handle sustained growth for 5 more years, forget 22 years. This is a problem now.
NORTH KING COUNTY	I am in STRONG Support of expanding our link light rail. But 25 years is ridiculous! I think the timeline should be half of that, and I would be willing to PAY MORE for an accelerated timeline.
NORTH KING COUNTY	We need better transit now not 25 years from now. By the time these projects are completed, we will need to expend again. We have to find a way to speed up the process. We need better public transportation now. The proposed transit map is a dream but the timeline is a nightmare.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Go way faster! Especially for Ballard
NORTH KING COUNTY	I consider the Ballard extension/tunnel to be the most important priority.
NORTH KING COUNTY	More Rail SOONER--ballard/downtown and West Seattle grade separated lines must be highest priority and "fast tracked" to complete within 5-7 years MAX
NORTH KING COUNTY	Timelines are very long, and 50 years past due. So...hard to get really excited. Why does Seattle have such terrible transit options? gaaa.
NORTH KING COUNTY	Everything needs to happen much sooner. Condense the timeline - I'll pay more.
NORTH KING COUNTY	Our progressive city is SO far behind, it's a bit embarrassing. I understand that money is an obstacle, but a city like ours should have these systems in place now. I am concerned that these very, very long term goals will be obsolete once they are completed. I at least hope that you are considering making things run on magnets, solar or some other renewable energy so at LEAST we will be ahead of other cities once this is completed? It would also be nice if you were to limit the number of people that can move into the city so it's not so packed. It's losing it's beauty with all these canyons of buildings and no natural light.
NORTH KING COUNTY	Do ballard sooner. It needs to me moved up in priority. I would pay more on taxes for this to happen. I feel like my neighborhood is being screwed. I will pay taxes on this from when I am 33 to 55. I will be about to retire when I finally get access to this transit, and I live in a major seattle neighborhood. Ballard in the next 10 years. Please.
NORTH KING COUNTY	8 to 25 years is a ridiculously long time to get a project of this scale done! Look at any other countries that can do this in half the time! Germany or Japan for example.
NORTH KING COUNTY	If ridership estimates are correct, Downtown to Ballard should he completed first.
NORTH KING COUNTY	I would like to see lite rail go from West Seattle to SeaTac
NORTH KING COUNTY	The core city of Seattle projects (Ballard, West Seattle and connections into the city) should be higher up on the completion timeline. The city of Seattle has the highest population versus other cities in the region, which inevitably brings more traffic to this city versus others in the region. Ideally I think Ballard should be top priority and then West Seattle to be built for ST3 and push back other extensions such as Redmond & Federal Way in order for Seattle expansions to be worked on first.
NORTH KING COUNTY	The phases are too far out. ST3 should look at ways to make the entire project within 10 years. I am very supportive of all the BRT and light rail options, but think 25 years to implement and connect downtown Seattle to Ballard, West Seattle, and other major hubs is unacceptable.
NORTH KING COUNTY	Speed up the time lines...we need all of this system NOW
NORTH KING COUNTY	I agree I-405 should have a place in early stages of funding since congestion there is so terrible. However, I think core areas of downtown Seattle should be next for funding instead of areas that are farther out in the suburbs. Density is growing exponentially while businesses are also moving in, increasing congestion and only getting worse in the future with no spare land in which to alleviate the burden - a consideration not as pressing in the outlying areas.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Please, please, please tax me more, or bond it out, and get this done sooner. This is where public transit should be NOW, not in 25 years from now. I really hope you consider a shorter completion timeline for this. The two most important lines (in my opinion) are the last to be completed. Robust public transit is crucial in continuing to attract those who have choices in where to live.
NORTH KING COUNTY	This needs to be done as quickly as possible. Pull the band-aid off quicker and people will deal with it initially, but will accept it much quicker and therefore actually use it. Who knows what the landscape will be in 25 years. People will be buying self-driving cars as their next vehicle purchase well within the next 10 years. If they have that then who cares how long they sit in traffic, when they can surf the web and work from inside their own car. If light rail is finished quicker and people use it then it will become a habit and the self driving obsession will look like a gimmick. The timeline for this seriously needs to be escalated or else people a) won't vote for it or b) they will be so fed up with the traffic (especially in the next 5 years) that they will have some serious hate towards ST3 and the WSDOT as a whole.
NORTH KING COUNTY	Light rail to Ballard (not at-grade) should be the first priority, by far.
NORTH KING COUNTY	The timelines for light rail should be brought forward. It is taking way too long to build the systems. Use the bond system to secure money earlier to build faster.
NORTH KING COUNTY	We need more transit options NOW. The congestion and travel times in our region are an absolute embarrassment and are holding us back. Why even bother with a plan that gets executed after 22 years? With major developments like driverless cars coming our way, who knows what transit will even look like at that point? Do fewer projects, do them sooner. Just please get something done to help people along the I5 corridor.
NORTH KING COUNTY	Light rail being the last priority (22 years????) is ridiculous. Saying that adding buses to this program is a high priority and by adding buses within 8 years is somehow a "success"... seriously? 8 years to buy and use buses, without adding the infrastructure to make those buses effective? Light rail is so desperately needed, yet it feels shoe horned into this project... I will be voting "NO" unless you find another way to fund this (INCOME TAX MAYBE???) and show a better outline for adding light rail in a realistic manner... it's depressing that this is the 'fix all' package being offered...
NORTH KING COUNTY	Need to find a way to make these projects happen sooner rather than later.
NORTH KING COUNTY	Can't you speed light rail construction up.
NORTH KING COUNTY	This plan is too slow, and should be accelerated even if it costs more. Also, I think that the vehicle tabs, and property tax, should bear the brunt of this cost not increased sales tax...that's too regressive. Maybe the B&O tax should be increased since the businesses in the area are driving the growth?
NORTH KING COUNTY	I'm shocked that 22 years to Ballard and 17 to West Seattle is acceptable
NORTH KING COUNTY	The completion timeline is way too slow. I need better mass transit now, not 22 years from now when I am 50. I would rather the projects were funded by more debt even if it meant paying higher taxes for my entire life to pay it off if it would get these projects finished faster.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I understand all the difficulties in building these transit improvements but the extremely long timeline will make it very difficult for some people to support this proposal. However, I would rather see long term and far-reaching improvements (such as light rail) than short term solutions (like buses). I just hope that I'm still in Seattle in 25 years to see this all come to fruition.
NORTH KING COUNTY	I realize these are massive projects that are extraordinarily expensive and I don't wish to see my taxes go up higher than they already are here in addition to the already high cost of living, but these projected time lines are incredibly slow far out for a city and region that essentially needs to have been starting this project 20 years ago. I think growing these more quickly if possible should be a priority.
NORTH KING COUNTY	BUILD IT SOONER! I'll be dead by the time this project is completed. Get 24-hour crews, tax corporations that are sheltering their money overseas (yes, Microsoft, Google, Amazon, Boeing, Starbucks) get the money AND BUILD IT SOONER. I want to enjoy transit in this life, not the next.
NORTH KING COUNTY	Light rail to Ballard and West Seattle along with rapid or express bus service across Seattle on an east-west axis should be given completion priority over other projects.
NORTH KING COUNTY	I can accept that Ballard - UW is dead in ST3, however I think it is imperative that full environmental and preliminary engineering studies be funded on the following corridors in ST3: 1) Ballard - UW, 2) "Metro 8" Subway, 3) Extension of West Seattle rail to White Center/Burien. These studies are comparatively cheap and can perhaps allow expedited construction/movement as more funding becomes available 10-15 years down the line.  My biggest complaint is the project completion timeline for Ballard (and to a lesser extent, West Seattle). It's what makes me "somewhat in opposition" to voting for ST3. I REALLY want to vote for ST3. I want rail (and grade-separated at that!) to inner city neighborhoods and major suburbs. However, by punting the project with the highest ridership and the most cost + complexity, the timeline for Ballard rail becomes untenable. Ballard should be one of the first projects (even if it comes at the expense of West Seattle rail). If Ballard can be done in a 12-14 year time frame (I know that's probably pushing reality) that would be perfect. In reality an improvement of 6-8 years instead is what I think would make me sold on ST3.
NORTH KING COUNTY	Light rail to West Seattle and Ballard in 17 and 25 years seems ridiculous. It's a timeframe that is super discouraging and leads people to disengage. Why would this take so long? This is past my remaining working years and into retirement. These timeframes will lead people to not support the plans because they are so long they aren't meaningful to people's present commuting challenges.
NORTH KING COUNTY	Please please please consider a faster timeline than 22 years for Ballard.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I completely support mass transit... I believe we should be moving quicker. I would like to see all of the projects listed as being done in 25 years to be done in 20 years. I think the sooner things get on line, the sooner people will appreciate them. Plus transit should be making travel better, not just keeping up. IF its online sooner people will see, and thus more support, it.
NORTH KING COUNTY	what the [explicit] is with 25 years!? [explicit]. Better than nothing, but that's literally it. Better than *nothing*.
NORTH KING COUNTY	This stuff should have been done 20 years ago
NORTH KING COUNTY	Prioritize more ST Express Bus service while building light rail lines.
NORTH KING COUNTY	Light rail needs to be fastracked. Busses are on the road and part of the problem.
NORTH KING COUNTY	Would be great to have "shovel-ready" work in case funding is found to speed up timeline. Would be nice to create mechanisms for corporate sponsors or other sponsors to enable faster projects, e.g. if the companies building in South Lake Union wanted to expedite the Ballard->downtown work.
NORTH KING COUNTY	My strongest concern about any of these proposals is the timeline. As the Puget Sound population is expected to grow enormously in the coming decades, and it's already taken decades to get the most basic service we have now. I want to see the most aggressive ST3 plan possible so there is at least opportunities in the coming decades to build faster what we've already planned for. On a separate topic: ST *must* include real parking - especially in the suburbs where ST3 will grow - if we are going to get more cars off highways & major transit corridors. Park and ride MUST be an option for people; we talk about multi modal transit without acknowledging cars will always have to be part of that mix. (This, coming from someone who never owned a car before I was 29 - and I'm no Millennial) There just aren't enough/ frequent stops on light rail to make car-centric lives easily adaptable to transit.
NORTH KING COUNTY	We need to make this happen faster. The city is growing rapidly, and there's no way our current infrastructure can keep up. Traffic is going to become much worse than it already is, and the sooner we complete these projects, the more functional the city will be.
NORTH KING COUNTY	Prioritize cost-effective bus and light rail projects in and between the core cities of Seattle, Everett, Bellevue, and Renton. Postpone all transit projects that are located peripheral to these cities. Support increased housing density of transit oriented developments in the major transit hubs of these core cities.
NORTH KING COUNTY	West Seattle to downtown to Ballard needs to be built first. New tunnel
NORTH KING COUNTY	Need to build light rail faster. 25 years for light rail to Everett and Issaquah?? Need a faster, stronger approach to timelines!
NORTH KING COUNTY	I would prioritize (if not already) 45th st light rail and stops closer to the ones already open! thanks!
NORTH KING COUNTY	Why can't we complete these project sooner?
NORTH KING COUNTY	Shorten the construction timeline for Ballard. I don't know what's realistic, but 22 years seems awfully long, especially with so much potential ridership eager to take light rail.
NORTH KING COUNTY	Do it faster. Much faster. This should have been done 30 years ago.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Transportation to West Seattle is needed now, we cannot wait 18 years.
NORTH KING COUNTY	Light rail needs to be built faster, otherwise people will vote against it
NORTH KING COUNTY	My neighborhood cannot wait another 20 years for Graham St Station--we needed it years ago, we need it today, and we will need it going forward as our city grows. Please reinstate Graham St Station with an early time line of 3 years. Our community is underserved by transit, in a neighborhood that relies heavily upon it. We do not value parking lots--we want walkable, bikeable, safe stations that reflect the values and demographics of our diverse and thriving community. We need Graham St. Station NOW!
NORTH KING COUNTY	I really really want to get behind this but the timelines are crazy! It's so far away it hardly seems relevant. I don't live there but 22 years to Ballard?!? It disappoints me that we are just now having this conversation in 2016. The wheels should have been turning (pardon the pun) long ago. I am not well off, in fact I struggle, and with the pace/prices of things I don't see myself being around here that long. It's bold, I generally like it, but its awfully late.
NORTH KING COUNTY	LIGHT RAIL NOW. Higher taxes, whatever. WE'RE WAY OVERDUE FOR REAL TRANSIT. Connecting Ballard and West Seattle in 25 years is WAY TOO LONG.
NORTH KING COUNTY	We need light rail to Ballard and West Seattle as quickly as possible, followed by connections to Everett and Tacoma as soon as possible after that.
NORTH KING COUNTY	We need these improvements ASAP!
NORTH KING COUNTY	Priority for projects need to be rethought. Lines should focus on connecting areas with highest densities first
NORTH KING COUNTY	I am very supportive of all transportation initiatives in the area and always have been. But this plan is so suburban focused. I can't get behind any plan that doesn't put the city center first. If Ballard and West Seattle take 22 years forget it.
NORTH KING COUNTY	It should all be sooner. Educate the public about how we can encourage the legislature to give the authority to complete and pay for these projects twice as fast. Even a decade is too slow. Look at how many people are using the new stations at UW and Capitol hill. I have yet to see them not busy.
NORTH KING COUNTY	Project in congested urban areas should have a much higher priority.
NORTH KING COUNTY	Ballard needs a rail sooner
NORTH KING COUNTY	17 years for light rail into west Seattle (and that serves only a fraction of the region) is entirely too long and insufficient. Would be willing to pay more for better access to light rail, or would expect more bus improvements for this region.
NORTH KING COUNTY	I know that projects take time--and I am always proud to vote for transit--but this time line seems especially slow. Please consider additional voter education to explain the decade+ waits for solutions we so desperately need now.
NORTH KING COUNTY	I wish the progress could be sped up, especially for neighborhoods that have had the most recent density changes like Ballard. Second, all projects should be grade separated so we are not regretting the decision 30 years from now.
NORTH KING COUNTY	Ballard and west seattle timelines should be moved up as both are increasing in density much faster than streets can handle - even with busses

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Why is the timeline pushed out so far? If you're adding rail at multiple points they should be able to be worked on simultaneously. Keep moving!
NORTH KING COUNTY	Timeline has to be condensed or I probably won't support the measure.
NORTH KING COUNTY	The work on any North - South pathways needs to be completed ASAP. Light Rail, Bus, Sound, etc
NORTH KING COUNTY	Please get started on the light rail extension plan ASAP. We all need it desperately!
NORTH KING COUNTY	With Expedia moving into the interbay neighborhood portions of the projects that ease congestion need to be prioritized. 22 yr time line for light rail to Ballard will be too little too late to help mitigate the cost of housing impacts and livability issues.
NORTH KING COUNTY	West Seattle needs a light rail ASAP. The amount of condos and apts that are being built every single day cannot continue to happen without a better transportation situation. Eastbound west Seattle bridge is a parking lot all morning long, most people just going downtown for work. We should have started this project years ago - before all of the housing developments started. It's unbelievable how little sunlight hits the streets anymore because of all of the new buildings. We need better ways out of west Seattle. 1 rapid ride is not even close to enough, people don't use the water taxi enough, and there continues to be a crazy amount of single drivers in cars every single day. West Seattle needs a plan right now!
NORTH KING COUNTY	Please open the 42nd/Brooklyn station near UW ASAP. The Husky Stadium station is too far from most off campus and from the University District. The link to UW REALLY showed the value of the light rail system: it is buy far the fastest way to get downtown or to Capitol Hill, even if you have a car. That station will make that shows practical for far more people, and make routes 71 and 73 far more efficient.
NORTH KING COUNTY	It's really unbelievable that this project will take so long. With Seattle's current growth, the traffic between now and completion will be a nightmare.
NORTH KING COUNTY	Overall, I'm pretty excited by the ST3 proposals (even the ones I don't use), but I'm a bit dismayed by the fact that it will take an entire generation to get this in place, especially from downtown to Ballard and West Seattle. Buses from those areas are already packed, and from Interbay, are always hung up on 3rd Ave. I hear tell from colleagues that live in West Seattle the story is much the same. I'd like to see some alternate timeline scenarios, especially those that can compress the timeline.
NORTH KING COUNTY	1) Traffic within Seattle is horrendous. Waiting for 25 years to add the Ballard line is far too long. Asking residents in Seattle to pay huge annual taxes to build projects that will not reach them for 25 years is unrealistic and will not receive voter support. 2) Putting the Ballard line on a busy street, and thus taking up two lanes of traffic, will only harm local residents and make traffic worse. The line should move west and underground where it will not increase current traffic levels and will be more reliable.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>As a West Seattle resident and homeowner, I strongly hope that this plan is revised to speed up light rail to West Seattle and Ballard. With more and more young people being attracted to urban areas, and our overall construction/growth boom in the city, Seattle voters need to get more out of the deal at a faster rate if we are expected to fork over hundreds of dollars so that the suburbs can get into the city. Please do a better job of prioritizing projects so there is a mix of regional transit investment AND projects that will move SEATTLE residents around SEATTLE.</p> <p>I'd love to get rid of my car, but it takes about 1.25 miles of walking, and at least two transfers to get from West Seattle to my job in the UW Tower (that's a commute of about 80 to 90 minutes. Please make this deal more enticing to Seattle, West Seattle and Ballard residents.</p>
NORTH KING COUNTY	Should try to get federal money to complete more quickly
NORTH KING COUNTY	I'm hopeful ST can find a way to complete the different phases well ahead of the decades-out timeline. That said, I'm just thrilled with the work ST has done and excited for the region.
NORTH KING COUNTY	It's great that you're thinking ahead, however most people will not care for the improvements if they are looking at 20+ years out. Most people that currently reside in area can't determine if they are going to be in the area in 20 years, so they may not provide the (economic) support needed, as they will not see/utilize the benefits of the investment. You need to consider moving them a bit closer to the present, even if that increases cost. Everyone will be happy to see an improved public transportation system sooner, even if it's more expensive.
NORTH KING COUNTY	If there is any way to speed up the projects, Seattle needs these services now. Who knows what traffic will be like in 25 years!?!
NORTH KING COUNTY	Frankly, 8 years to get bus service running and 22 years to be able to get to Ballard isn't going to cut it. We need transit immediately and as much as we can get, both to support a rapidly growing region and to get the cars off the road that make our city unsafe, overcrowded, and unpleasant. Let's stop wasting time and money building stupid projects like streetcars and get real transit moving now, whatever it costs.
NORTH KING COUNTY	I answered #12 as "Somewhat oppose" because the timelines need to be pulled up. The city can't afford to wait that long to have a comprehensive and functioning transportation system.
NORTH KING COUNTY	ST3 is very large and an all encompassing proposal, but they should be broken out into smaller parts so people see that things are happening sooner, and serving their areas more directly and in a shorter timeline. Also, need to add the fees to fund this via a gas or income tax, need to stop using property taxes as the main method. If they have to pay more to drive, then they will be more inclined to support these measures. If you keep taxing the properties, it will only drive people further and further out, thus forcing them to use their cars more frequently.
NORTH KING COUNTY	Do it all as fast as possible! Is there an opportunity to get federal funding to speed up the process and defray the costs to the average person?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Light rail build-out should be MUCH quicker in the city of Seattle, under 8 years. I'm not very supportive of increasing sprawl with further out lines beyond Lynwood/Issaquah/Burien.
NORTH KING COUNTY	1) We need to have a greater commitment to building out a comprehensive system for getting around our city and we need to do it much sooner. This is about political will more than anything. 2) The current plan appears to be focused on getting commuters in and out of the city but does not address the level of need for getting around the city when you are already in it. Transit oriented development is a must (the two story structures all along the MLK light rail route break my heart; it would be the ideal place to build tall and allow people to not own cars. 3) Seattle Subway has a vision far superior to the current ST3 plan. <a href="http://www.seattlesubway.org/about-us.html">http://www.seattlesubway.org/about-us.html</a> Check out their map on given link.
NORTH KING COUNTY	There is no possible way this will pass with such long construction timelines. ST needs to aim to build to Ballard and West Seattle by 2030.
NORTH KING COUNTY	We need these things done now. I know that's not realistic, but wow, the timelines are long.
NORTH KING COUNTY	Although addressing the need for bus transportation is an important temporary measure that can be taken to address our area's transportation issues, I would strongly support and recommend speeding up the timetables for installing light rail stations around and between the area's major cities.
NORTH KING COUNTY	The Ballard Light Rail needs to be completed on a more urgent need or the city needs to stop allowing continued high density building the area that transit cannot accommodate.
NORTH KING COUNTY	Please put higher priority on the West Seattle Transit!! 17 years completion is a very long time. The 1-5 / West Seattle Bridge junction in the morning is a catastrophe and going on the Viaduct needs to be eliminated. Also, West Seattle is expanding very rapidly and we don't have the necessary infrastructure in place to support this rapid growth.  Thank you!
NORTH KING COUNTY	Ask for more money over longer time and ensure all project can be completed AND done sooner. We NEED light rail expansion (tunneled or above-grade) yesterday, and 22 years is too long to wait.
NORTH KING COUNTY	The timeline is unacceptable. Bring completion down to 5-10 years for my support.
NORTH KING COUNTY	If you think you can predict the future out 25 years, you're deceiving yourself. Shorter timelines, fewer strategic projects, and more accountability to finishing what you started, would all make me happier about voting for your initiative.
NORTH KING COUNTY	Light rail should take priority over express bus. Main east-west corridor across I-90 is super high priority, along with Ballard-Downtown, and then West Seattle. Waiting 12 years for that is ridiculous, should move that phase up now.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	This needs to get completed faster in order to get traffic and pollution emissions under control. Traffic causes more pollution and an early completion of the difficult areas to get to like Ballard and West Seattle will help a lot.
NORTH KING COUNTY	cut the completion times in half-the business sector of seattle isn't going away, but they will have trouble hiring people. It seems ridiculous that we have to wait 25 years to get a light rail from downtown to west seattle. Get a move on!
NORTH KING COUNTY	It seems insane to me that Sound Transit projects take so long to build! If you want ST3 to get funded you need to break down your goals into 3 years increments so people can see progress being made. They need to see their money is working! Why can't you just open your check book and buy x-number of buses to every where? Heavy rail is in place because light rail is slow. When I lived in Everett and wanted to go to Seattle I preferred to take the express buses over the heavy rail. The advantages were that the buses were faster and came every 30 minutes! Time is money. You must move people quickly and frequently. Light rail costs too much and is too slow. If light rail from Everett to Sea-Tac takes 1.5 hour one way, the only people who will ride the train will be homeless people? Was a WBE DBE sub-consulting firm to Sound Transit. When many of my contracts were won and then taken away from my small business by big businesses, I told Sound Transit about it. Your agencies response was "oh well we can't tell big business what to do"?#! Your agency has a mandate from the federal government in the grant money you receive to include small business in the work! You have a responsibility as a 501c3 to speak up and have your values implemented. It has been my experience that your agency acts like a little girl not an adult man who tells people how to conduct business. The I-405 Lynnwood to Bellevue corridor at rush hour is nightmare. Fix the mess in three years buy buying x-amount of buses. JLM to Tacoma is always in a traffic jam. Add a commuter lane.
NORTH KING COUNTY	Although I always complete these surveys, I know Sound Transit is just going to do what is politically preferred - not what is preferred by the voters. But I have to say that ST is delusional if you think anyone is going to use Light Rail all the way to Tacoma when the light rail from downtown to the airport already takes 40 minutes (slower than any bus I ever took from downtown to the airport). The way to resolve traffic issues should be to focus on transit routes within the Seattle area to ease traffic in Ballard, UW, South Lake Union, to West Seattle, etc. Light rail to Ballard in 22 years? West Seattle in 17 years? Are you serious? At that point, just forget about it. We will have driverless cars and new transit options we don't even know about by then. What's sad is I think most people in Ballard and West Seattle would GLADLY pay a monthly fee or tax to get better transit to in city places. Why the focus on Tacoma and Everett? People who live there aren't likely to use transit anyway - especially if the ride to downtown takes 2 hours! I am extremely pro transit - but as long as ST keeps prioritizing ridiculous projects that won't help relieve the in city congestion, I am likely to vote down any taxes or additional funding projects. It's time you listen to the voters who are funding you!
NORTH KING COUNTY	Would be helpful to offer the public the option of better timelines for increased cost.
NORTH KING COUNTY	The Ballard/West Seattle light rail should be fast tracked - there is already too much traffic in Seattle, and it takes too long to get to these areas by bus.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	While I know rail takes longer to build. I think we should focus more on connecting neighborhoods in Seattle first before we begin connecting the suburbs. The Ballard/Seattle Center/SLU and West Seattle extensions should take precedence. 22 years is an absurd amount of time for this project to take.
NORTH KING COUNTY	What makes me want to oppose this measure is not only the timeline but the order. Too much time and priority is being given to corridors that don't have the projected ridership to back up the "first-in-line priority". The Ballard - downtown line should be the highest priority as it would increase ridership by the most of any line and in turn, bolster the overall leverage and power of ST the quickest.
NORTH KING COUNTY	I would happily pay more to get it done sooner!
NORTH KING COUNTY	Ballard is growing FAST and NOW. Waiting 22+ years for light rail seems like too much time. With all the high density living going up in Ballard, we need more options to get people around town without cars. I am also in strong support for increasing bike friendly access, especially going over the Ballard Bridge
NORTH KING COUNTY	Why does it seem to take so long to compete STM - 25 YEARS? Infrastructure projects in Asia and Europe have a much more rapid pace.
NORTH KING COUNTY	I wish the West Seattle light rail plan could be completed earlier. From a purely personal point-of-view, I would use any service within Seattle city limits much more than any outlying connections. But that is just my usage; I understand the priority of connecting Seattle to Bellevue and Federal Way, even though I never go there... Thank you! I LOVE THE TRAIN(s) and will ride them whenever I get the chance.
NORTH KING COUNTY	25 years is a long time. Our region continues to grow rapidly and the bottleneck in all of this is world-class transportation throughout the region. 10 years. We should be able to get nearly all of these done by the end of 2026. Otherwise, this generation of innovators could move elsewhere.
NORTH KING COUNTY	If those within Seattle are using light rail, better access will be available to those commuting into and out of the city (due to less city congestion). Having only part of the city on light rail renders it useless for many, including those who can access it in their neighborhood - but not at their destination. Start at the epicenter and move outward. As for taxes, the burden should be shared by all citizens - not overly weighted to the property and car owners. It is a benefit to all to be paid for by all.
NORTH KING COUNTY	I'm willing to pay more than \$200/year to get this done faster.
NORTH KING COUNTY	Proposed Light rail from Seattle to Bellevue please.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Projects of this scale take time to complete but due to the historically consistent record of our regional transportation projects being behind schedule and over-budget, I am very concerned that any of the time-lines for completion are going to be accurate in the end. This leads me to believe that by the time the projects are actually completed, the regions transportation issues will render it less effective than other alternatives. I believe this because a lack of regional planning led us to this "catch-up" attempt and after its completion, we will be looking for another multi-billion, multi-decade project to alleviate the congestion not appropriately addressed to date. In short, I don't believe the engineers and planners have made bad choices, instead, I have no real faith in our local agencies to deliver what they promise in the time-frame allocated.
NORTH KING COUNTY	The timeline is unacceptable for a region that is already paralyzed by congestion. The complete system should have been in place by now.
NORTH KING COUNTY	Given the growth of Ballard it seems like waiting 22 years is a bad plan.
NORTH KING COUNTY	Projects need to be done faster.
NORTH KING COUNTY	I think the City of Seattle should fund the West Seattle and Ballard routes to do those at the same (earlier) time as the first projects.
NORTH KING COUNTY	What would it take to speed delivery? Looking at 25 years out I hope to be retired and off the roads, has any look been made to see what a \$400/per year cost would allow us to do?
NORTH KING COUNTY	I will support transit improvements no matter what, but given the huge population increase in Ballard over the last decade, it seems to me ridiculous not to make that line a higher priority.
NORTH KING COUNTY	Way too long if a plan for Ballard and west Seattle. That needs to be a priority, I believe. 5 years max. Also the light rail needs to run later til 230 or 3 am
NORTH KING COUNTY	By your own projections, Ballard will be responsible for 2-3x as a many riders as Redmond, yet it's being completed 10 years later. This doesn't make any sense at all. Redmond, Lynwood, Tacoma and Federal Way can all be served just fine by BRT. Ballard needs grade separated mass transit more than any area of Puget Sound that isn't already served. At the pace Seattle is developing, Ballard will be a transit disaster in much less than 20 years.
NORTH KING COUNTY	Have we looked at any way to get things done quicker? 25 years is a really long lead time and I hope to be retired and off the roads before then. What if it was \$400/tax payer or \$600/tax payer? What would it cost to get the improvements done in 10 years? is that even remotely possible? How much of the price tag can we have the private employers pick up?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>Far too much time and money is being spent on small fixes that don't actually do anything to notably change how the people of King and Pierce county actually get around. Changes to the way some buses are routed and utilized seems nice now, but if we really care about the entirety of the future of transit in these major Puget Sound cities, we need to consider putting investment into rail ... and not just some lines, a fully comprehensive network.</p> <p>That being said, the proposed rail projects right now have an amazingly long lead time, and it's hard to even envision a situation in which I'll still be living in Seattle by the time any of it is finished. At this point, it's sad to see so much time and arguing being done in relation to a plan that will build something that won't be open for 25 or even 35 years. And looking back at the history of the way Seattle has been incompetent in its management of transit projects, it doesn't ease my worries.</p> <p>Even as a young person in Seattle with no car that completely relies on public transit, I'm having a hard time being convinced that the ST3 projects as proposed are actually a good thing. It's sad for me to be coming to the realization that if I want to live in a city with a great public transit network, I have to move. That's the reality of seeing the ST3 proposal.</p>
NORTH KING COUNTY	<p>Honestly, we can't wait ANOTHER twenty-five years. We should have done this back years ago, can't wait any more...gonna have to bite the bullet now. It will not get any cheaper or easier, rip off the band aid and git-er-done!!!</p>
NORTH KING COUNTY	<p>I really think the timelines should be considerably shorter, with meaningful progress made in 3 to 5 years!</p>
NORTH KING COUNTY	<p>My response regarding support of the plan is really about timeline. I think we need light rail service in west Seattle and Ballard much sooner than 17 years. I strongly support rail, am just concerned about the timeline for increased services in and around Seattle.</p>
NORTH KING COUNTY	<p>The route that will serve Ballard and South Lake Union is completely urgent. Growth is out of control and there are more condos every day, and not enough parking spaces. PLEASE get us a train so that we can rely less on cars and get where we need to go!</p>
NORTH KING COUNTY	<p>The timeline for Ballard and West Seattle are far too long down the road. These areas are getting less accessible on a daily basis and most people that live in these areas have to use public transport more frequently than folks outside of proper Seattle. The timeline should start from the center of downtown and work outward.</p>
NORTH KING COUNTY	<p>I'm retired and seldom use mass transit. I can't afford this level of funding. And, for that matter, why would I pay these taxes if I couldn't even use if for 15+ years (West Seattle).</p>
NORTH KING COUNTY	<p>22 years to build a route through to Ballard is absurd, especially considering it's the most cost effective of the proposed projects.</p>
NORTH KING COUNTY	<p>The project timeline is much too long, and higher capacity lines need to be prioritized first. Ballard and West Seattle should be prioritized above lower capacity lines, and there should be multiple tunnels dug simultaneously.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>Expedite and prioritize construction of light rail in Seattle, especially the Ballard to downtown line; and also including the West Seattle line. Given the projected ridership of this line it is clearly the best use of taxpayer money and the most needed, therefore should be prioritized.</p> <p>The Ballard to downtown line should also be fully grade separated and tunneled under the waterway rather than a movable bridge.</p> <p>Provide complete funding of an Environmental Impact Statement (EIS) for the extension from Ballard to UW, and add the line as a "provisional project" if additional funding becomes available.</p>
NORTH KING COUNTY	Timeframe to add Ballard is too long!
NORTH KING COUNTY	I would be willing to pay a higher tax to make this happen faster. We need this transit system yesterday....not in 25 years. Being able to access our communities is essential to building a successful metropolitan community
NORTH KING COUNTY	<p>Ballard to Downtown - It is amazing that the most productive line going to some of the densest and fastest growing areas on the region (now, not with some fuzzy PSRC target for Totem Lake), is scheduled to finish long after nonproductive lines into the suburban hinterland. SLU is already a second downtown rivaling anything that Everett, Tacoma and Bellevue have combined. There is no reason it can't be done in 15 years.</p> <p>Why no Ballard to UW? Faster completion, cheaper and still serves the city well.</p> <p>Prioritize Sounder, bus investments and bike/ped access. Light rail along a freeway will not "solve" congestion and will not change travel behavior.</p>
NORTH KING COUNTY	Ballard light rail is much more urgent than waiting for 22 years! This is an extremely high volume corridor and should be a higher priority.
NORTH KING COUNTY	Any plan should not impede or restrict non bus traffic. Non bus traffic capacity needs to be increased. Mass transportation is important but it needs to stop taking capacity away from non bus traffic.
NORTH KING COUNTY	I think the super long term nature of this project will turn a lot of people off from this plan, to be completely honest. I know it is best for Seattle, but I for example don't even know if I'll be living here in 5-10 years or if I am, which routes will effect me then.
NORTH KING COUNTY	Light rail within seattle should be prioritized as continued development and increasing density will further strain our already congested roadways.
NORTH KING COUNTY	faster completion is a must--unfortunately we should have done this 10 yrs ago--cheers Al

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I think the Ballard light rail should definitely have a quicker timeline than 22 years.
NORTH KING COUNTY	Maybe i just lack knowledge about how this type of construction usually works, but I though projects like this could be built more quickly. 22 years is a long time to wait to get to Ballard. I wonder if there would there be any option to accelerate any of the projects later on, or will the timeline be fixed when this is approved.
NORTH KING COUNTY	Move Ballard up in the timeline.
NORTH KING COUNTY	I would be willing to pay more taxes for closer project timelines, which seem very far out for projects like Ballard.
NORTH KING COUNTY	<p>I strongly oppose the idea that the average adult in the Salish Sea region should pay approx. \$200 per year. The cost should be highly subsidized by the Amazins, the Microsofts, the Expedias, the Googles, and other tech companies attracting so many people to the region.</p> <p>the cost of living continues to rise within Seattle, and the Salish Sea region. Many of us are being displaced from our homes and communities, and can't afford to give anymore than we already have--particularly as, but not limited to, low-income individuals. We need better transit, as many of us do not have access to cars, and our commute time increases as we are forced to love further from our job sites.</p> <p>Ranking these plans based on some arbitrary data set is also unfair. Transit should be improved in areas that displaced folks are being forced to--South King County, Eastside suburbs, and especially Tacoma after their transit service was slashed a few years ago.</p> <p>Sound Transit's responsibility is to provide affordable transit options for all its riders. Prioritizing low-income folks, people of colour, folks withndisabilities, immigrant communities, members of the LGBTQ community, among others, should be first in mind when thinking about how best to improve the transit situation in Seattle and the greater Salish Sea region.</p> <p>Thanks, and I look forward to seeing what creative solutions you all can come up with!</p>
NORTH KING COUNTY	Should be done faster with more monies taxed now and then refunded as needed when the system is built and self sustaining
NORTH KING COUNTY	The light rail line to Ballard should be prioritized and built first (on the 8 year time frame instead of 22 years). Ballard already has increased its density to the point that the current buses are over crowded. Light rail would immediately be utilized in this neighborhood because it already has the critical density needed for a transit oriented community. Furthermore, I thin the Ballard line should be extended north at least to 65th (Ballard High School), but ideally all the way to 85th to connect to the Crown Hill Urban Village at the north end of Ballard which is showing a large increase in density/development right now.
NORTH KING COUNTY	It's not fast enough. Twenty-two years until Ballard has light rail?? That's way too slow.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The area is waaaay behind the curve on light rail and other transit. I'd like to see all of these projects be much accelerated
NORTH KING COUNTY	I would love to see the Ballard light rail project happen sooner. The traffic along fifteenth street gets quite gnarly
NORTH KING COUNTY	Projects should finish sooner and the graham station should be added sooner rather than later :)
NORTH KING COUNTY	Invest in below or above grade transit (not on grade) early. The earlier we can get these forms of transit in the faster the city can grow.
NORTH KING COUNTY	I think the plan is very good and I support any and all public transportation expansions. I just feel that our city is woefully behind so I think that every effort to expedite this construction must be made. I am willing to pay more in taxes.
NORTH KING COUNTY	Ballard should be moved to the front of the timeline. It is a shorter project to complete and with substantial growth in the area is too hard to get in and out of. It would be a heavily used line. The line to Tacoma would take much longer to complete and in my opinion is not an attractive commute option at 2 hours.
NORTH KING COUNTY	25 years seems like a very long time to complete light rail extensions. Is it possible to prioritize these advancements?
NORTH KING COUNTY	If possible speed everything up
NORTH KING COUNTY	Traffic congestion is already critical today. Waiting 22 years for Ballard light rail is too long.
NORTH KING COUNTY	THERE NEEDS TO BE A PLAN IN PLACE TO ENSURE THAT ALL CONSTRUCTION PROJECTS 1) HIRE LOCALLY 2) IF THEY INTERFERE WITH BUSINESSES THERE IS A PLAN IN PLACE TO KEEP THOSE BUSINESSES ALIVE AND 3) THE PRICES OF THE HOMES AROUND THESE AREAS DON'T INCREASE, SEATTLE IS ALREADY HAS MASS GENTRIFICATION WE DO NOT NEED MORE
NORTH KING COUNTY	Try to accelerate completion of the urban projects - Bellevue, Seattle
NORTH KING COUNTY	Seattle is a city filled with tech companies. I don't know why the transit options are so bad. Can you get help to understand how we use buses and trains? Coming from west seattle in an rush hour if I miss my bus I have to wait :20min. That's crazy. The other day I had to uber because the bus options for me to get to sodo from west seattle are so limited. Meanwhile an half empty rapid ride C bus flew by every 5 minutes. I don't get it.  If you build it - we will come - - especially because we are already here and super frustrated.
NORTH KING COUNTY	Re: light rail, prioritize core-city projects (1. Ballard, 2A West Seattle, 2B Downtown Tacoma) and get them done sooner than suburb projects like Redmond, Federal Way, Everett and Issaquah; lowest priority should be adding stops on existing lines (like 130th NE and Graham--those are bonus goals)
NORTH KING COUNTY	You have to find a way, through partnerships, through shared funding or bonding with your partners, to shorten the delivery time for projects, particularly the Ballard/Downtown project. A more efficient environmental and permitting review period with the City of Seattle would help.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	How was it determined what the order of importance is/was for the projects? I do not recall it being put to a vote, but it's possible I missed it. Is it possible to increase the production times of various projects if voters were willing to pledge more money/taxes towards said projects?
NORTH KING COUNTY	In general, I support the opportunities for densifying the core downtown areas of the cities within the region. I would prioritize light rail projects that will bring people in/out of the Seattle/Tacoma area first, then go for projects that connect the downtown hubs to each other last.  It would seem to me that Redmond and Bellevue do not want any type of light rail system yet, but Tacoma and Seattle are embracing it. Let the car traffic problems build up in those areas and tout the car traffic reduction in the light rail areas so that you can get the support for those that want and understand light rail, and bring the others on board when the traffic is too much for them to deal with later.
NORTH KING COUNTY	The long time schedule is inexcusable. 10-15 years is acceptable, not 25. Build these lines simultaneously instead of piecemeal. I am sure more Federal/State funding will become available if timetable changes. Economic downturns are inevitable which will kill the projections and 25 years will become 30. These ST plans are great but they are being implemented too slow!
NORTH KING COUNTY	How long this will apparently take is really bothering me. I'm a transplant from NYC - you do not want this to turn into the 2nd ave subway travesty. What can we do to get this done faster?
NORTH KING COUNTY	I'd pay double or triple if it meant bringing the timeline in by a couple years. The current traffic situation is unsustainable and strikes at the viability of bus transit. This is especially true during commutes which coincide with major events (games, concerts, etc). On those occasions my commute doubles from ~45 minutes to 90 minutes or more. Decoupling transit from standard vehicle traffic is critical to making it a viable alternative to regular commuters, otherwise no advantage is to be had in choosing to add one more car to the mix.
NORTH KING COUNTY	Build more, sooner, especially Ballard and West Seattle. Even if that means streamlining approval processes, EIS comment periods, etc. Include transit-oriented development planning and incentives in lieu of massive parking garages at suburban stations - or, use TOD to help pay for the parking. Use pay parking to raise money to pay for parking garages.  Also, please include West Seattle to Burien as a project to be built if there is money available.
NORTH KING COUNTY	Ballard to downtown Seattle should be the priority - highest ridership numbers and biggest need! This section should be completed as early as possible in order to maximize investment  Ballard to downtown Seattle should be completely grade separated - no interaction with street traffic, no waiting for a bridge to open an close
NORTH KING COUNTY	You should focus on Seattle options first.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Timelines way too long. Taxes should be levied separately for each project. The huge geographic scope and 25-year timeline would deprive education levies of adequate funding for a whole generation. Long timeline also creates high likelihood of massive mismanagement and cost overruns. Bertha fiascos to the nth degree.
NORTH KING COUNTY	I think Ballard<->Downtown light rail should be prioritized above other projects. It appears to provide the greatest benefit.
NORTH KING COUNTY	Ballard and West Seattle should be phase 1
NORTH KING COUNTY	The timelines are far too long, especially for Ballard. The long timeline of the original bus tunnel and then light rail is the reason that Link bypasses SLU. That neighborhood got built up after the rail was scheduled to bypass it.  Ballard is too far down the road. It is one of the most disconnected neighborhoods in Seattle.  Free parking should be removed. In order to encourage transit-oriented development, driving to transit stations should be discouraged in favor of transit, bike, and pedestrian connections.
NORTH KING COUNTY	The timelines: I'm worried that the plan will fix the problems we have NOW without anticipating the problems we'll have in 20 years. I'd like to see more immediate solutions to our problems. The funding: instead of only property tax, I think there should be a tax on vehicles -- make it more expensive to have a vehicle to increase use of public transport.
NORTH KING COUNTY	Giving the east side who continuously oppose transit measures and build car centric developments the first light rail when Ballard is blowing up is absurd. Ballard to downtown in 8 years.
NORTH KING COUNTY	As a person with means and inside the Seattle region, I would love the benefit of using and accessing the lightrail more, but I think priority should go to people in true need of more convenient transportation options, and that could use these options to increase their ability to earn money.
NORTH KING COUNTY	I feel like 22 year timeline to add the greatly overdue light rail projects, that are within the city boundaries, is way too long. We are rapidly growing city and the streets closest to and within the city are heavily congested. I have seen my commutes double in the last 5 years. What will they look like in 22, even if other ST3 projects are completed? We need these projects completed just as much as the suburban, outlying areas need it. I feel if we wait so long, we are going to increase the economic divide within the city and make it uninhabitable for many. Lower income residents will have to look outside city limits to afford to live and travel. Please consider prioritizing these projects on a similar timeline as the suburban projects to fight against the gentrification, to improve the quality of Seattle residents commutes and lives, and to support urban growth. First-class cities have dedicated transit systems that facility increases in urban density and mobility.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>My biggest concern is leaving Ballard in a bad spot. It's growing rapidly and there's not many easy ways in or out right now and it is very residential, meaning there's already a lot of folks commuting to and from.</p> <p>However, it's hard for me to determine where things are most needed. Easier, faster, and cheaper options are needed in Seattle as a whole. Even in LA the bus is only \$1 for the most part. I'd hope Seattleites would take advantage more if transit was cheaper, and hopefully without compromising transit funding</p>
NORTH KING COUNTY	<p>Considering the explosive growth and population density of Seattle proper (and already extremely limited parking and packed buses), adding light rail to Ballard in 22 years is absolutely unacceptable as a timeline. In addition, the fact that no east-west line is even planned for north-northeast Seattle at this point is also unacceptable. It is short-sighted to think that these BRT expansions planned for 8 years from now (how is that considered agile?) and light rail expansions planned for 12-25 years from now could hope to keep up with the rapid growth of Seattle. Serving the densest areas first should be a priority. These are the people most likely to not own or use a car and take public transit in the first place. I feel less inclined to support this plan based on this outrageously slow timeline.</p>
NORTH KING COUNTY	<p>I would strongly support an accelerated completion timeline for light rail extension from downtown Seattle to Ballard and West Seattle. Considering the tremendous rate of growth in Ballard, 22 years is far too long to wait for a light rail connection. I would also like to see a cost projection for an option for a subway connection or elevated rail to bypass the Ballard bridge, as well as options to separate the downtown-Ballard line from surface street traffic to the greatest extent possible.</p>
NORTH KING COUNTY	<p>Taxpayers should not be asked to approve every part/phase of the plan nor all funding now. This should be done in segments with specific timelines and costs. The likelihood of delays and cost over-runs and mismanagement is very real, given the experience with the Viaduct tunnel project, and voters will be taken for a ride if they give carte blanche to the entire proposal this fall.</p>
NORTH KING COUNTY	<p>22 years to get Light Rail to Ballard? That's a joke, right? Don't know if you're aware, but Ballard is in Seattle. Bellevue will have Light Rail in 8 years though? Are you aware that Bellevue is a separate municipality? And that if you want state funds for that project, you have to convince the state legislature - most of whom don't give a sh*t about King Co mass transit - to vote in favor? This plan would be alright if you had started it 30 years ago. 22 years to get Light Rail to Ballard is the biggest joke I've ever heard. And if you haven't guessed, I own a home in Ballard. I will be voting against this plan b/c it treats Ballard as a non-factor. Way to go.</p>
NORTH KING COUNTY	<p>Ballard in 22 years is way too long!</p>
NORTH KING COUNTY	<p>Please bring light rail to West Seattle!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Timeline is ridiculously long. Goals are way too short-sighted. Need a study to speed things up. Need redundancy for emergencies and day to day effectiveness, not 1 main light rail line with a few offshoots. Need 2 east west 2 north south light rails through King County as a minimum. Ballard to Bellevue downtown without going through downtown Seattle is a desirable rail line that matches development. I live in Ballard, why go through a bottleneck in downtown Seattle to get to Bellevue downtown over I 90 on a train or a bus? should use 520. Highways need pullover areas for safety, how can a bus use shoulders without a safe pullover area for cars that are disabled? Need to spend more now to avoid more costs later. Are we encouraging developers to use every available piece of land in N Seattle & elsewhere so that building rail is prohibitively expensive? Are we waiting for an earthquake to level things so there is room to build more light rail? The Sounder has a very limited schedule and stations probably not a help to most commuters. I think parking lots are necessary so someone can drive a little then get something.
NORTH KING COUNTY	I think the Ballard to Downtown and West Seattle to Downtown timelines should be re-analyzed to shorten the projected timeline. In addition, the Ballard and West Seattle line should be presented as grade-separated only. It is short-term thinking to put any of this infrastructure at-grade and I would be much more supportive of an elevated line than a tunnel line. Elevated lines are more cost effective and fit well into an urban landscape- as we can see from New York, Chicago, Berlin, and many other cities.
NORTH KING COUNTY	This needs to be done much faster. We should be taxing corporations and individuals with higher incomes to make this happen, perhaps through property tax. We should be working with companies and countries that can do it quickly, such as the German Rail (Deutsche Bahn) or Japan Rail. I work at a big corporation and I'm a homeowner, so I'm asking you to raise my taxes and get Ballard, West Seattle, and others online in the next 5-8 years.
NORTH KING COUNTY	Too olong
NORTH KING COUNTY	DO EVERYTHING YESTERDAY.
NORTH KING COUNTY	The lines with the highest ridership and ROI in the urban core are done last. This is a transparent attempt to curry favor with the suburbs rather than basing priorities on need and return on investment. Seattle is better of rejecting this plan and building it's own system than locking our selves into a plan with little urban benefits for 22 years. I won't vote for this until the schedule and priorities align with return on investment, ridership projections (serving the highest ridership areas first).
NORTH KING COUNTY	We need better access sooner rather than later!
NORTH KING COUNTY	The Boeing Access Road station was approved by the voters on a previous ballot measure and should have building schedule priority. My neighborhood has no safe transit options. I don't think we can wait until 2034. What is driving this schedule?
NORTH KING COUNTY	Please prioritize the ballard link station - waiting 22 years is crazy when ballard is so close and it's such a highly populated area
NORTH KING COUNTY	Don't push out Ballard light rail station completion out 22 years!!! Finish this part of expansion sooner!
NORTH KING COUNTY	Needs to get done a lot faster! Would also like to see many more bicycle routes SEPARATE from car lanes/roads.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The priority should not be to cater to suburban needs. People move to the suburbs because car ownership and its environmental effects are artificially subsidized, making it cheaper to live far away from work/play. Mass transit won't remove their cars from the equation, especially if more free parking is built. The cores of Puget Sound's cities need to be densified and that takes immediate progress on the light rail network within Seattle, Tacoma and The Eastside. The Ballard and west Seattle populations will continue to grow rapidly and 17-22 years is far too long to wait for those light rail connections. Bus improvements should also be prioritized as a stop gap, but the phasing plan is too slow to keep pace with the changing region and changing technology. Self-driving cars will likely be a reality by then, we should be building for the future, not a snapshot in time. Electric car charging stations should be part of the network as well. Lastly, TOD should be the driver of station design and location, too close to highways, and they will not become thriving communities. Would also be beneficial to put money towards lidding parts of I-5 and other highways that cut through downtowns and cause health issues. Could be paired with/funded by private development of "land" atop lids.
NORTH KING COUNTY	Please find ways to finish the projects faster, and focus on moving large numbers of people in currently sense, urban centers. The broad stretch from Everett to Tacoma doesn't make much sense for Link (but it does for Sounder/heavy rail). Focus light rail in Seattle!
NORTH KING COUNTY	Build the Ballard to Downtown light rail quickly! This needs to have highest priority. If a reasonable timeframe can't be proposed the project seems like a waste. Do whatever necessary to get this done in the next couple of years. No rational reason why this needs to take 22 years. Fully grade separated rapid transit to Ballard is needed now. Also add a connection line travelling East/West between Ballard and UW to connect with existing light rail. Anything more than 5 years out is too long.
NORTH KING COUNTY	Seattle is clearly in a crisis situation where traffic is concerned! It worries me that we might not see improvements in some areas for another 25 years! I would support halving this timeline to bring quicker solutions and relief.
NORTH KING COUNTY	Complete projects faster. Willing to pay more for expedited construction.
NORTH KING COUNTY	West Seattle has been mightily screwed by the waterfront tunnel project and the blathering IDIOTS who wanted to tear down the viaduct and replace it with nothing. It needs dedicated-line rapid transit certainly way sooner than Eastside commuters who will never use and in some cases loudly oppose any transit project. The Cascade Bicycle Club has a ridiculous amount of power in local govt considering how few will actually be able to commute by bicycle in a rainy city made of hills, and continues to gobble up SDOT and WASDOT money with very little payoff for most of us. The city continues to wage a "War on Cars" along economic lines...if you're a Lexus-driving bigwig with paid parking at your workplace, drive away, but if your poor or middle class get off the road. And this state and city needs to stop financing every project that comes down the pike with regressive property taxes, which disproportionately hurt nearly everyone not in the Tech industry, and is driving many out of the City. Many of us simply can not take more property taxes!
NORTH KING COUNTY	25 years! Seriously?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Light rail. Faster!!!! Lake Washington loop. More big companies should pay for it to happen. They're making more money and paying us all the same to cram in here and get stuck in traffic. It sucks but \$400 (me and my wife) to at least try and help make getting to and from work each day better is worth it.
NORTH KING COUNTY	<p>First of all, plan is to grandiose. Break it into smaller chunks. Take care of Seattle proper FIRST i.e. Ballard &amp; West Seattle &amp; Burien. That could be ST3. ST4 then becomes cross lake traffic, Mukilteo, Everett &amp; Tacoma. ST5 could then be the rest.</p> <p>Time lines are outrageous. 22 years to get to Ballard - gimme a break. What you been smok'n???</p> <p>Cost: WOW. For \$50 billion we could put a colony on Mars.</p> <p>Parking: You have GOT to provide parking at Light Rail stations. If I can't get to the station, how am I going to ride? I suspect that probably half of the potential ridership is not within walking distance of a station, or walking distance of a bus route.</p>
NORTH KING COUNTY	timelines far from efficient compared to other cities that put real and direct emphasis and public transit
NORTH KING COUNTY	The light rail to Ballard needs to be completed in 9 years. The number of persons moving to Ballard dictates that this project receive the very highest priority
NORTH KING COUNTY	West Seattle needs light rail ASAP, not in 17 years -- the West Seattle Bridge is a traffic nightmare.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>I am a major supporter of transit and rail having lived in cities (eg Hong Kong) with extremely good transit. I was born and raised in Ballard. Thus, the Ballard Downtown link being 22 years out is an extreme downer. Most of this plan is not for me and would not benefit me. The two things that really matter to me (Ballard &lt;-&gt; Downtown and Ballard &lt;-&gt; U-district) either do not finish until I am nearing retirement or are not even specified.</p> <p>Furthermore, the focus on suburban expansion does not make sense unless paired heavily with a park&amp;ride system. I worry that we are building large amounts of rail to tap a populace where the city design is not conducive to accessing the rail itself.</p> <p>In short, the priorities seem backwards.</p> <p>Light rail is best suited to a dense cluster where we are moving lots of people. This is the Seattle core. Within this core, there are known major painpoints (eg, east-west travel). Yet, these projects seem to be the furthest out on the timescale.</p> <p>Instead, we seem to be building rail in areas that require more material investment while also picking up higher risk that the demand may not manifest itself to meet that investment.</p> <p>Perhaps this was engineered to try and appeal to a wider pool of voters? If so, I think this was a political mistake. Your base is urbanites in seattle and putting us lower on the priority is demotivating your base.</p> <p>Assuming no political motivation, then the plan really reads like the wrong risk/investment tradeoff.</p> <p>Change the plan so we prioritize solving the known transit problems where there is certain demand within a timescale that people can conceptualize ( ideally less than 10 years ). That will be much more compelling.</p>
NORTH KING COUNTY	Definitely needs to happen, but wish it could be faster! Our infrastructure needs to adjust faster to our growing population and major overcrowding.
NORTH KING COUNTY	Gosh, we have to move faster on light rail. 17 years to reach Ballard and West Seattle? Too long!
NORTH KING COUNTY	I wish it were faster. Maybe you should take the ridiculous sum you want to put into expanding the airport, which would accelerate climate change, and put it into public transportation, which would combat climate change.
NORTH KING COUNTY	BALLARD FASTER , build a new downtown tunnel such that a SLU, Fremont , Phinney ridge , greenwood line could be built later i.e st4 to replace the rapid ride E line as well as the 5 line
NORTH KING COUNTY	Make this happen faster

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Light rail to ballard needs to be prioritized far more highly. It should be at the top of the priority list, far above all of the projects in the hinterlands on the south end and far north. It should not be at the very end of the gajillion year timeline ffs.
NORTH KING COUNTY	The light rail to Ballard is urgent and I don't think it can wait 22 years.
NORTH KING COUNTY	Light rail should be the top priority everywhere in the PS region. Light rail should be the backbone of all other transit service. The timeline for completion of all light rail plans should be accelerated.
NORTH KING COUNTY	22 years for light rail to Ballard is ridiculous.
NORTH KING COUNTY	Is there any possibility to speed up the process ? It is better to start the plan now than later but I wish ST 3 will completes sooner.
NORTH KING COUNTY	speed it up! the future is rail, don't get sidetracked by rapid bus stop-gap measures that ultimately fail in heavy traffic and sit at traffic lights..  LIGHT RAIL!!!
NORTH KING COUNTY	Build Ballard first, fully grade separated.
NORTH KING COUNTY	I would pay double if it could be done sooner. Especially the Seattle light rail projects.
NORTH KING COUNTY	It is my understanding that part of the push for the ST3 draft plan is the increasing population in the Puget Sound area. Yet, many of these projects are decades out from being completed. If population continues to grow, by the time these projects are completed, they will already be obsolete. I think Sound Transit and other stakeholders need to review the draft plan with an eye for getting projects done sooner rather than later. To the extent possible, projects should be worked on at the same time rather than waiting for the completion of one project to begin another project.  Another issue is the lack of park and rides available within the City of Seattle. What is the incentive for people to use mass transit if there is no place for them to park their car during the day. I absolutely understand why neighborhoods do not want commuters parking in their neighborhoods during the day. Street parking is already at a minimum in many Seattle neighborhoods. It seems like this is an issue that Sound Transit has either overlooked or has not spent enough time evaluating. On a whole, mass transit in Seattle lags behind places like Portland and San Francisco. The lack of park and rides does not create an incentive for people to use mass transit. It would be great to see 3-4 multi-floor parking garages installed throughout the City in strategic locations.
NORTH KING COUNTY	This project should be completed a lot sooner than 8-25 years. This is an immediate need and a way needs to be found to fun this project and finish it a lot sooner!
NORTH KING COUNTY	I think the Ballard Light Rail extension should be prioritized. That area of the city is going quite rapidly.
NORTH KING COUNTY	Needs to get done much much faster

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Just do it we are long overdue for mass public transit that connects people to the Puget sound area. Let us look to NYC, Paris and London on how mass transit should be.
NORTH KING COUNTY	All the time lines should be moved up (shortened) as much as possible. Sustainable growth in the area will not be feasible until this happens. Do everything it takes to get people out of their cars and onto mass transit. In CA, employees using mass transit get up to \$200 in pre-tax dollars if they authorize loading \$\$ onto their transit pass (similar to an Orca card) from their paycheck. WA should consider this and other economic incentives as well.
NORTH KING COUNTY	Prioritize ballard and WEst Seattle
NORTH KING COUNTY	where there is the most density, the projects should be completed first. This means west seattle, Queen anne, and ballard lines should take first priority because they have the biggest impact in ridership and utilization.
NORTH KING COUNTY	I believe that the timelines should be strongly reconsidered and give priority to what needs priority. It is absurd that a person would need to wait 22 year to get to Ballard and 17 for West Seattle. ST3 should work from the inside out, form downtown to the closest neighborhoods (like Ballard and West Seattle). The faster you move people to the closest neighborhoods, the less traffic congestion you will have in the city.
NORTH KING COUNTY	This plan is ambitious and tough to complete. I understand that the capital, logistics, cooperation (public and private/citizenry and officials), and efficiency to pull this off is incredible, but 25 years is too long. The amount of people moving into the region is swelling and Seattle is a city that will ride out economic fluctuations better than most American cities well into the future. The Capitol Hill and UW light rail came in ahead of schedule and under budget. This was massive. I'm a younger Seattlite and people in my generation enjoy and support enthusiastically public transit. We would be the first group to enjoy the benefits of this system. In order to best serve our needs we should complete this project well ahead of schedule. I'm fine paying higher taxes and putting up with construction on my own street. This is for the betterment of our community. Right now we pay German prices for transit, but lack the German efficiency.
NORTH KING COUNTY	Get it done faster!
NORTH KING COUNTY	Timelines are clearly the hot issue right now, and I share those concerns. Light rail is best when it serves density, with a priority on current density. I get the sub-area equity hinders that mission, but still, Ballard complete in 22 years? That's a hard pill to swallow, especially considering that the Ballard project has by far the highest bang for buck. West Seattle is a little hard to take, but understandable given the equity issues and the chronic difficulty getting into or out of West Seattle during commute times. But I think ST3 ideally represents an opportunity to build for the growth we expect, and the current plan is doing too little of that. I'd feel a lot better about ST3 if I had some sense of what the next steps are after that. Seattle will if anything need much more rail when ST3 is fully delivered. How does ST3 address that, and how do future plans address what ST3 doesn't?
NORTH KING COUNTY	please find a way to shorten the time line on all projects.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The Ballard Link Light Rail addition should be prioritized so that it is completed in a time sooner than the proposed 22 years. Possibly increasing the tax per month slightly to expedite the building time of the entire project would be worth exploring.
NORTH KING COUNTY	This needs to be speeded up and make Seattle the central core of the system so that Seattle, because of density, becomes a place you can live and work without owning a car. 22 years until Ballard and West Seattle have light rail is not a reasonable time line, get it down within 5 years. Stop taxing good things like home ownership to pay for things. Tax carbon, fast food, put a tax on sugary drinks, megahome, the billionaires and millionaires. Tax companies who ship jobs overseas, tax single family homes without energy improvements, tax breakfast cereal whose main ingredient is sugar. Put a tax on corn syrup and tattoos, marijuana and tobacco and alcohol. Tax professional sports and the merchandise with the number 12 (people who care so much about a local sports team should want to help improve transportation to the games). Tax micro housing developers. Leave good things alone, such as work and home ownership, tax bad things.
NORTH KING COUNTY	Ways should be found to develop the system faster including planning for projects that could be done if unexpected funds become available. It will never be cheaper than right now and city is choking on auto traffic limiting opportunity and growth.
NORTH KING COUNTY	I'm eager for this plan to be implemented sooner than currently proposed, and would be happy to pay more in taxes to support that. Completing in 17 years means voting now for a plan which may not account well for the future shape of the city. Not knowing where I'll live or work seventeen years from today makes this difficult.
NORTH KING COUNTY	Spend more money to build it on a faster timeline.
NORTH KING COUNTY	Prioritize flow of physical commerce and workers (Tacoma 1-5 traffic problem from Exit 115 to Tacoma Dome) In conjunction with Tacoma priority, facilitate movement of tech workers and any industry that can bring more money to pay for these \$200/year/adult fees. Ballard doesn't cut it: it only benefits the few hundred workers in shipping and tugboat companies, etc, even though it facilitates commerce. More money per square feet in Redmond, Bellevue, etc.
NORTH KING COUNTY	Transit development is 50 years behind schedule in Puget Sound. The existing timelines are glacial compared to the transit needs, and leave too much time for political obstruction to mire, or reverse progress. Federal matching funds would be well-placed in accelerating these timetables, wherever possible. In particular, expansion of LINK Light Rail Service has been more popular than expected, as such, each additional station should have a cumulative effect on the popular support, particularly as new lines open. Therefore, a more aggressive development schedule, particularly to Ballard and West Seattle (each with key constituencies) could create a watershed moment, amplifying current support for unified regional transit development. Thanks for all the work you are doing!
NORTH KING COUNTY	I wish it was physically possible to complete this work sooner. Traffic is such that we cannot survive as a City without an effective mass transit system to get people out of their cars.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I feel that the Ballard and West Seattle work should have faster build out times rather than the current times if at all possible. Also, I would extend West Seattle out to include White Center area as well into Downtown and the airport.
NORTH KING COUNTY	Faster timeline. More specifics to voters about route options now.
NORTH KING COUNTY	Ballard should be higher on the list due to the amount of new housing in that area. Due to the location of Ballard the traffic going to Ballard impacts more of surrounding area between Ballard and I5
NORTH KING COUNTY	i don't understand why light rail had to take this long. please prioritize light rail along with parking. it is ridiculous there is no parking at the UW light rail station.
NORTH KING COUNTY	more important to include areas with no ability to get to light rail than areas where it would be more convenient to have a station. Light rail to Everett is more important than light rail to Ballard or West Seattle - but all 3 should be built; it is merely a matter of timing.
NORTH KING COUNTY	The Ballard lightrail line should be prioritized.
NORTH KING COUNTY	Just fix the traffic mess! Too bad it takes so long
NORTH KING COUNTY	The project should be completed faster. In other cities, for similar transportation projects, they have been able to receive outside financing (aside from taxes) to support the project. It is clear that this will be profitable, so why isn't Sound Transit pursuing outside financing to allow them to complete the project faster. 25 years just isn't a realistic time frame. We need solutions now and needed a functional light rail years ago.
NORTH KING COUNTY	Seattle needed the light rail yesterday. The completion dates for the project are simply unacceptable. Consider in 2040, personal vehicles will most likely be autonomous, making reliance on public transport less of a priority. Speed up the completion date and support will grow.
NORTH KING COUNTY	Faster, faster, faster. A happy 30th anniversary this year for Portland's MAX! Puget Sound is so desperately behind the schedules need to be more aggressive.
NORTH KING COUNTY	Strongly support light rail expansion, especially with right-of-way. I would seek a more aggressive time table for completion. 25 years is a long wait for many of these overdue projects. I would support higher taxes if this would accelerate the time table (Ballard and West Seattle lines should be looking at a 10-15 year time table).

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>Is there any possible way to speed up the timeline?</p> <p>It would be great if the connections within Seattle (Ballard/West Seattle) could be completed concurrently with the connections to the suburbs. I understand that ST3 works to connect the county to the city and needs suburban support to be approved but what about the urban population? Seattle is growing rapidly and its a disservice to the community to put the intra-city connection on hold while the suburbs get connected. The biggest hiccup with ST3 is its timeline and I'm afraid that will cause the proposal to fail when the city is in desperate need of a systematic, comprehensive rapid transit solution.</p> <p>On a different note, the light rail lines must be separated from traffic -- it loses all of its functionality when it is forced to travel and get stuck in traffic!</p>
NORTH KING COUNTY	You need to do it much faster!
NORTH KING COUNTY	The phases of the project are backwards of what will relieve traffic pressure in the region. More importance should be placed on light rail access to Boeing/Everett to reduce traffic on I-5 during commuting hours. Ballard should be a part of the next phase as the city is the most congested area needing light rail access and currently it's only beneficial for those living east of I-5. The entire west side should not have to wait 22 years to be hooked up. I love using the light rail and am extremely supportive of getting as much built as possible, but work from the inside of the city out. As our city is growing it will only get more and more frustrating living here without it.
NORTH KING COUNTY	25 years to completion of the project is too long.
NORTH KING COUNTY	Ballard should be more of a priority. If so, I would support more.
NORTH KING COUNTY	The timelines are too slow - e.g., 25 years to Ballard? I am willing to pay more to speed up these projects. The faster projects near to each other are built, also perhaps less long term disruption?
NORTH KING COUNTY	Timelines are too long, why add light rail to routes already served by the Sounder train.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>1. Speed up the timeline. Ballard can't wait 22 years. We need to be able to really commute, and really travel for fun, by mass transit SOONER and not LATER.</p> <p>2. More transit crossing Lake Washington! The lake is a choke-point because of limited roads over or around it. ONLY transit can alleviate the problem. Sooner is better.</p> <p>3. BRT needs designated bus-only road lanes. It's not R = rapid if it's stuck in traffic. Also consider adding express routes to BRT routes. Many of existing routes are slow because the bus stops at every single stop. If we could take an express BRT to a stop *near* where we're going, we could then fairly quickly transfer to a non-express BRT for the last stretch. Seems like that would still be faster than taking the milk run the whole way. Or highly mobile folks could be happy to walk a little farther. Or cyclists could certainly just pedal a bit more.</p> <p>4. Existing and future light rail station need proper grown-up bike storage options. Bike storage must be COVERED. (You may have noticed: it rains 9 months of the year. Cyclists commute in that. Don't make them park in it.) Bike storage must be SECURE. I have not yet seen any of the BikeLink lockers (for example). There seem to be NONE at the new UW station. There MUST be covered, on-demand bike lockers at all major transit stations.</p>
NORTH KING COUNTY	Projects should take no longer than 10 years total.
NORTH KING COUNTY	I understand that it's important to be realistic about how long it takes to complete projects (the last thing we need is another epic embarrassment and disaster a la Bertha). That said, I'd like to know why, specifically, it would take so long to get project done that we needed in place now, or rather years ago. Who knows what Seattle's population will be in decades or where people will live. Is it really necessary to take so long? Why? What would it take to speed things up? Other cities seem to have done these things much faster; what's up here? As a voter who is very supportive of mass transit and willing to pay taxes for it, I really need to hear more of a detailed story on these questions.
NORTH KING COUNTY	The Ballard and Everett extension plans do not support my anticipated employment timeline for using the service, so I am less supportive than I otherwise would be.
NORTH KING COUNTY	Transit within Seattle should be a priority so the other opinions have viable transportation once they come to Seattle.
NORTH KING COUNTY	We need this so much sooner!! Especially within the actual city, I think light rails connecting neighbouring cities are really important too but I think it's even more important to have a solid network of light rail in actual Seattle. There is no reason why anyone should have to drive in a city with the density of Seattle, everyone complains about traffic every day but until it is as fast or easy for people to get to work downtown from any neighborhood or get accross town via public transportation as it is for them to do it in a car, people will keep driving. And as long as people are driving in mass quantities, busses are going to be stuck in traffic and be an extremely slow option, I think light rail is the only viable option for a long term solution. And if it takes 25 years to build Seattle's population will already be too big for it by the time it's finished! Maybe the city could sell "light rail bonds" or something to fund it faster, like they did back in the day with the railroad West.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	not sure why it will take 22 years to finally bring Ballard into the system, there have been many discussions about adding it for years, one would think that it could be one a lot sooner as it will get a lot worse before then.
NORTH KING COUNTY	The timelines mentioned in Q12 are a joke. Seeing them makes me want to bite the bullet and buy a car.
NORTH KING COUNTY	I would love to see all of the link light rail projects happen however, I feel like the timeline is entirely too long. By the time that these projects are completed I will have no use for the services!
NORTH KING COUNTY	22 years before light rail comes to Ballard? I think I'll move.
NORTH KING COUNTY	22 years is way too long to wait for rail to Ballard. 22 years!! With the amount of construction, density, and workforce along the SLU, Queen Anne, Ballard corridor there's no reason this should be prioritized last. Perhaps it has to do with the amount of work to be done for that line, but we need it now. Something has to be done to help mobility WITHIN the city of Seattle. This plan seems too focused on the extremities - places with freeways and people who have cars. Something needs to be done to help those living within the urban core, those without cars, those that rely on transit as a daily necessity.
NORTH KING COUNTY	Ballard is being densely populated at a rapid rate, and Hwy 99 proposed to limit access to residents from Ballard, Magnolia, Queen Anne. I strongly oppose the plan to provide light rail to Interbay and Ballard in the 22 year timeline. We need light rail in Ballard and Interbay now.
NORTH KING COUNTY	must be built quicker.
NORTH KING COUNTY	Do it as fast as you can 25 years is too long. Request more money if that will speed it up.
NORTH KING COUNTY	Over the next 10-25 years, personal automobiles are likely to wane in importance. This is the system I wish we already had.
NORTH KING COUNTY	Much too long to start building light rail.
NORTH KING COUNTY	Light Rail MUST get to Everett sooner than on the current timeline. Linking light rail to Everett is part of the spine of the system that was originally proposed and is essential to get in place as soon as possible. It is unfair for Snohomish County taxpayers to have been paying into the system for so long without getting this link until 2041.
NORTH KING COUNTY	I would be even more supportive in taxes and construction if the light rail projects could be completed faster.
NORTH KING COUNTY	It is vital to accelerate the West Seattle to Downtown timeline given the closure of the viaduct.
NORTH KING COUNTY	Really want the light rail up to Paine field sooner than 25 years. There are large number of Boeing employees that commute and have been looking for ways to work with out having to drive.
NORTH KING COUNTY	25 years to deliver these capital projects is not an acceptable timeframe for a booming economic powerhouse like Seattle. Need to do better than that.
NORTH KING COUNTY	Plan is too slow!Seattle needs urgent public transit to relieve congestion and support sustainable population growth
NORTH KING COUNTY	the timeline is out of order. More service to unserved but highly dense areas in Seattle should be of higher priority than building long lines out to Issaquah and Federal Way, for example. The west side of Seattle needs service -- Metro can't keep up with the demand -- yet there aren't even any Sound Transit express buses in those neighborhoods.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The cost of this proposal is fine, but the timeline is atrocious. Not only is it impossible to build a transit plan 25 years in advance, delaying the projects that long will cost far more. More efforts need to be invested in getting authority to issue bonds for this work so that it can begin more rapidly.
NORTH KING COUNTY	Seattle needs more mass transit. If you want to be a world class city, we need this infrastructure. Every top city in the world has mass transit via trains except Seattle. We are so behind the curve. Commuting sucks in Seattle. People are not going to continue to live here if this doesn't get fixed.
NORTH KING COUNTY	Ballard should be moved up on the priority list. The commute from downtown Seattle needs to be improved. Radio Ride D line is just the old 18 local. Reduce the number of stops to speed up Rapid Ride.
NORTH KING COUNTY	The timelines are tooooooo long! Given the current and expected regional growth, major improvements to the entire rapid transit system (light rail, buses and Sounder rail) need to be prioritized and put on a fast track for completed. Timelines of 17 to 20 years are ridiculous!
NORTH KING COUNTY	I wish there were a way to get the projects done faster!
NORTH KING COUNTY	Ballard to downtown provides the greatest financial benefit most rapidly, thereby ensuring Sound Transit's ability to build the entire system. Do not build the suburbs first; there isn't as much density of population or fiduciary benefit to the system. Build Ballard Now!
NORTH KING COUNTY	I think Sound Transit needs to find a way to accomplish this plan in a more timely manner. 22 years for light rail to Ballard is WAY too long!
NORTH KING COUNTY	We need to find a way to get to Ballard more quickly. It's congested for transit now, and has the highest potential for ridership, in ways that projects like Lynnwood to Everett don't even compare to. I understand the complexities of digging a second tunnel under Downtown Seattle, and agree that grade separation is absolutely critical throughout the route, but have you considered other ways to achieve these more quickly (perhaps elevated options)? This could possibly save some Seattle tax revenues for other in-city projects, like crosstown lines in the Denny Way and 45th St corridors.  Basically, Seattle needed more high quality rail transit years ago, and needs it more every day!
NORTH KING COUNTY	It is absolutely insane that we have to wait 22 years for a reasonable rapid transit solution between Downtown & Ballard. Meanwhile, Interbay/SLU will have an explosion of traffic by 2019 due to major companies entering the area (Expedia, Google, to name a couple).  In the same vein, there needs to be a study to determine the feasibility of rapid transit along the Denny Way corridor.
NORTH KING COUNTY	Light rail serving Seattle should take priority in funds and schedule.
NORTH KING COUNTY	Timeline are way too slow, the need here is desperate.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	What makes no sense about the plan currently is why you're prioritizing suburban expansion that will never see that much ridership while dramatically delaying urban projects like Ballard that will have the largest ridership in the United States--and you're ignoring obvious projects like 130th that are "optional" in your plan but that make way more sense than stations to Sumner or DuPont. Also, why are you duplicating Sounder connections? People in Everett and Tacoma should have expanded Sounder connections to Seattle, and light rail should be focussing on urban areas/high density and duplicating Sounder connections.
NORTH KING COUNTY	The money that's being spent on the downtown tunnel which is not going to improve anything could had been used on public transport and a cheaper option should had been selected instead of the tunnel
NORTH KING COUNTY	This plan is awful. Instead of linking Seattle communities together and making a real city, it's encouraging ever-expanding suburbia.  Build the core first and expand out. And don't wait TWENTY FIVE years before planning for it.  This plan is like Long Island transit gets built before Manhattan gets subways. Where's the transit for Seattle in this?
NORTH KING COUNTY	It's too little, too late. And [explicit] do something about the Greenwood corridor and East-West transit, which is a [explicit] nightmare. I can literally walk faster than it takes the bus to go from Greenwood to Northgate. PS: [explicit] Amazon!
NORTH KING COUNTY	Project timelines are extremely dissatisfying. If the optimistic estimates are ranging from 8 to 25 years, considering the present track record of construction and highway projects in Seattle, one must assume that we're at least a decade away from any meaningful improvements.
NORTH KING COUNTY	This proposal will take way too long. Ballard is developing way too fast to wait 22 years for decent transit and the whole point of BRT is that it can be done quickly. I imagine that it should only take a year or two to make a bus route, eight years is how long it should take to make a light rail tunnel. Generally speaking, the entire time line needs to be roughly cut in half and Ballard needs to move up even more. In conclusion, I don't want to vote for this proposal until you start talking about how this is a starting point and the schedule will be moved up as you seek out and find more funding.
NORTH KING COUNTY	The faster these projects can get online the better.
NORTH KING COUNTY	This should be completed in half the time. It will take too long for us to use light rail if the present timeline is passed.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>Based on calculations, while the stated cost is an average of \$17 per year per taxpayer, calculations on my own home ownership, spending in Seattle/King County and assessed vehicle value would put my costs at \$330 annually. While I don't object to that level of spending, I do believe that priorities are out of line. Too much focus on bus, which has been a trend for many years. While I understand the additional cost and timing of rail, it shifts how transit occurs. Downtown Seattle is swarming with buses that are stacked up between lights, blocking intersections, running red lights and running over pedestrians crossing during the right of way, including personal friends.</p> <p>Failing to prioritize rail within Seattle until the 17 and 22 year mark when projections will show that a significant amount of the sales tax generation will come from King County core/Seattle is out of line. Adjust priorities. Outlying areas need to be connected, and overall, I expressed support for projects in areas I will never utilize. However, I have commuted from Seattle to Olympia daily for 10 years, and lived in SW Federal Way and commuted to Seattle for 6 years in the past. All projects are important, but look at where the dollars are coming from, connect the core as the same time as expansion outward.</p>
NORTH KING COUNTY	These projects need to be completed as quickly as possible.
NORTH KING COUNTY	<p>I would be willing to pay more to get it all done sooner! I'd like to see it in my lifetime</p> <p>I am a senior citizen (66) in Ballard, from where I live I have to walk 1/2 mile and ride one or two buses and light rail to get to the airport 1 1/2 hours, way too long.</p> <p>I don't understand why the non-electric buses that start their route at 32nd Ave NW and Market can't idle near Golden Gardens and pick up riders from Shilshole, Sunset West, Shilshole Point, Shilshole View, and Maris Condos and Rays?</p>
NORTH KING COUNTY	Ballard and West Seattle should be first
NORTH KING COUNTY	The ballard to downtown seattle needs to be completed since it takes more than 30 minutes to get to downtown, which is not a good time and it would take less time to complete the project considering the distance to ballard.
NORTH KING COUNTY	I think there is so much money already not spent for construction of roads or fixing of them that can be implemented in the actual construction of more transit, there is hardly any transit in shoreline by the post office or the library that i can not get anywhere, hardly any for seniors or those with disability, and those who do not have an orca card and are on disability stand no chance in getting around anywhere, this should not be, we need to actually start thinking of making things more accessible for those on disability who can not afford to get an orca card and speed up these timelines so everyone can have access to transit that need it for there jobs, the disabled to get to doctors to get to dhsh, to get even out, home bound people because of lack of funding and timelines are people just sitting at home like myself waiting to die and this is not fair!
NORTH KING COUNTY	Connecting Seattle via Light Rail seems like something that should be prioritized faster than 22 years >_>
NORTH KING COUNTY	Infill stations, especially in underserved areas, should come on sooner. I also believe in creating policy that will encourage density, not enable sprawl.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Priorities are backwards
NORTH KING COUNTY	I find it extremely hard to believe that it will take upwards of 25 years.
NORTH KING COUNTY	I will be so old when all of this is done!
NORTH KING COUNTY	ST3 needs to move up the transit between Ballard and downtown for 8 years, not 20+. This is an important and growing area and one of the best ways to eliminate the use of cars close to and in downtown is by adding light rail along this corridor.
NORTH KING COUNTY	The timelines for light rail are far too long.
NORTH KING COUNTY	There is a huge surge in the population in Ballard, Fremont, etc. You really, really need to consider light rail transportation sooner than later. Traffic is terrible, but there are really few alternatives. Additional buses will only get stuck in traffic, as they do now. If you want people to quit using their cars, you need to provide alternatives that are realistic.
NORTH KING COUNTY	More parallel construction and non-at grade light rail.
NORTH KING COUNTY	If only this could've been started 20 years ago... It feels like we're playing catch-up.
NORTH KING COUNTY	Ballard and west Seattle should be completed first.
NORTH KING COUNTY	The downtown to Ballard light rail line needs to be completed ASAP! It is by far the most important part of the proposed Sound Transit 3. It is disheartening to see it near the bottom of the priority list.  In addition, all light rail lines need to be grade separated! Please don't design any more dangerous at-grade crossings!
NORTH KING COUNTY	Seattle needs to tie its close in neighborhoods such as Ballard and West Seattle into the City first and then expand outward from there. The funding should not rely upon property taxes at all as that puts the burden on many folks who will never use or receive any benefit from the service. Why not tax motor vehicles and gasoline? If we are trying to cut down on traffic congestion, tax those that drive cars. Taxing property owners just makes in-city living less affordable forcing people to move further away since they cannot afford to live where there is currently good transportation.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>Link rail should be fast. Currently it takes too long to get from one place to another. Capitol Hill to mount baker itself takes 17 minutes! That is a lot for a distance of a couple miles. Especially from airport to downtown it takes an hour. I've heard this from a lot of people.</p> <p>Also, it slows down significantly in the pioneer square tunnel. That needs to improve significantly everywhere. Otherwise adoption will be less.</p> <p>Secondly, Judkin's park is in a very desolate area surrounded by a park area that hardly has much traffic. There needs be eyes on the ground so as to make the area safe in order to use.</p> <p>Thirdly, parking garages for commuters will help significantly in and around remote metro areas.</p>
NORTH KING COUNTY	Earlier deadline
NORTH KING COUNTY	I'd rather see less sales tax increase and a greater tax on motor vehicles and property.
NORTH KING COUNTY	I will not support any plan that doesn't get light rail to West Seattle AND Ballard within the next 10 years or less - it's embarrassing to think it will take 20+ years to make that happen, without that change I will not vote for ST3 plain and simple - everything else is great, but to support something that won't happen for 20 years is basically insane.
NORTH KING COUNTY	We needed this five years ago. The timeline needs to be accelerated for the in-city parts of the plan
NORTH KING COUNTY	The timeline proposed for these improvements is unacceptable. I strongly support transit but the first priority HAS to be for urban, dense neighborhoods that really NEED better transit. Ballard and West Seattle should be at the top of the list, not last on the list! By the time these proposed improvements will come on line for the neighborhood I live in, I'll be close to retirement and won't even benefit from them! I will not support or pay for transit in remote suburban neighborhoods. To even suggest lines out to Everett, Issaquah and Tacoma is ludicrous. Who is looking out for our urban center needs?!
NORTH KING COUNTY	The Boeing Access Road station was already approved by voters during Phase 1 of the regional transit project. It should remain on the final list in acknowledgement of prior voter approval. Since this station was deferred, and is long-overdue, as well as being the least expensive of all the proposed stations (est. \$.85 p/rider), it should also be moved up the priority list so that taxpayers can quickly see something tangible for their investment in this system.
NORTH KING COUNTY	<p>I'll start by saying I'll support and vote for ST3 no matter. Not voting for it will only waste time until a new viable proposal comes around and will dramatically compound the region's traffic and transportation issues.</p> <p>However, the timelines for key projects are far too long. If residents are paying an additional \$200 in taxes per year for transit alone, not to mention that there will undoubtedly be additional taxes levied or increased in the next two decades, we deserve rapid transit to arrive in 15 years, not 25. We deserve to get to use the Light Rail in the areas where we live while we still have the need to. I'd prefer to not be retired when the West Seattle and Ballard lines come online.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The in-city improvements need to be done ASAP, preferably first on the list. Rail from Ballard to W.Seattle should be done now, before additional development makes it difficult and out-of-date. Spend the money and get it done. Why wait?
NORTH KING COUNTY	Timeline seems very very slow for West Seattle & Ballard and I hope light rail within the city would be prioritized.
NORTH KING COUNTY	I would like to see the timeline for the Graham Street Station shortened. This is densely populated area, and the current stations on are sufficient. To add a station to an existing line seems like it would take less time and \$ investment, so it would be great to have this be in the 1st part of the plan. Many people were surprised why there was not a station at Graham to begin with.
NORTH KING COUNTY	I strongly support intracity rail in Seattle, and think commuter rail and BRT is necessary, but am frustrated with the snail's pace at which this all goes.
NORTH KING COUNTY	NW Seattle can't wait 22 years for its portion of the project.
NORTH KING COUNTY	I'm New to the system as I've only lived here for a year and half. This system is good but not great it is taking way to long to develop it shouldn't take 10,15 or 20 years to get this done. While we wait the traffic builds on our roads which give to more accidents and road rage. Plus all buses and light rails need to run 24 hours a day period
NORTH KING COUNTY	Freeway shoulders need to be kept clear for stalls and accidents. Buses should not be driving there.
NORTH KING COUNTY	This timeline is MUCH too long...do faster, before inflation, delay and bureaucracy make it longer and even more expensive. Make it so those of us who are paying for it now...will benefit for it before we die.
NORTH KING COUNTY	The completion timeline for Ballard is completely out of touch with the skyrocketing demand for transit in the Ballard neighborhood. Completion of that phase on the order of 5 years as opposed to 22 years would be MUCH more strategic and meet the realities of increased density and demand for good transit in Seattle proper. This is true for many neighborhoods in Seattle proper that are transitioning to much higher densities of population, and will need a non-linear increase in transit capacity.  While I realize that the timelines are due to a multitude of constraints, I do think that building in flexibility and making sure that the projected demand (not just the current demand) is taken into account will maximize the success ST3.
NORTH KING COUNTY	I would support paying more to speed up the completion of these projects. The timeline feels too slow to me.
NORTH KING COUNTY	I'm sure that this is a very common concern, but 22 years for Ballard is extremely disappointing. I think there is a tremendous desire right now for quality transit, especially for somewhere as popular and bustling as Ballard, and it would be nice to have that sooner than 22 years from now
NORTH KING COUNTY	Ballard light rail needs to be prioitized

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	25 years sounds like a really long time, especially considering the speed of projects in other cities and the fact that Seattle had the opportunity to start this project long ago with federal grants. I also believe the plan should focus on getting commuters in and out of Seattle and the surrounding areas that are mostly growing due to technology companies. We're only going to see more population growth in these areas and feel that the project should be accelerated to try to keep up with this population growth.
NORTH KING COUNTY	As you can see from my responses, I believe a comprehensive transit plan is very important for our area. I only somewhat support ST3 because the implementation of this plan isn't fast enough. Please expedite, and if you could ST2, too, that would also be great. It doesn't make sense that the tunnel for north of UW station is already dug but it won't be complete until 2021...
NORTH KING COUNTY	I think the most important part is getting a rail system in place that works well with the bus/bike/train/ferry systems. We've seen a dramatic increase in ridership on Link light rail now that it is accessible to UW and Capitol Hill. The next most important places to go are east to west: Ballard and to Bellevue. It's also critical to increase the bus-only lanes so they move more efficiently through the city than driving your personal car.
NORTH KING COUNTY	The project completion timelines are very disappointing given that a good portion of tax paying citizens will likely not be able to benefit from or utilize the new services. This, when similar projects in other parts of the country or the world are typically completed in half of the proposed timeline of 25 years. Please revisit the timelines, be creative and I am quite sure you will be able to come up with a plan to half the quarter of century horizon without causing the taxpayers additional monetary duress. With improved timelines, STS3 will win majority support hands down!
NORTH KING COUNTY	Ballard Light Rail sooner
NORTH KING COUNTY	West Seattle and Ballard link light rail should be moved up to completion in less than 10 years.
NORTH KING COUNTY	Fewer projects so it can be completed faster. It should not take 25 years. Focus more capital on targeted projects, finish in years not decades. Delivering solid high-benefit things quickly will build more excitement and voter confidence than a huge plodding process that takes three decades.
NORTH KING COUNTY	Get it done faster! 25 years is too long, we need light rail NOW.
NORTH KING COUNTY	None of this is fast enough!  I also extremely dislike the fact that the DOT planners and developers are creating a very car unfriendly town - we all still need to park our cars somewhere. Mass transit in Seattle need parking garages at outlying hubs at the light rail stations, and apartment and condo buildings need one parking spot for each unit. We are not yet at the NYC level - we all still own cars.
NORTH KING COUNTY	Please consider prioritizing Ballard light rail earlier :)
NORTH KING COUNTY	I believe the Ballard to Downtown and West Seattle to Downtown light rail projects should have higher priority. They are important to the State Growth Management plan and would speed incity development rather than sprawl

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I will be dead before any of this happens.
NORTH KING COUNTY	Given the increasing congestion within the Seattle core, the transit expansion should start with light rail that could be used in the city itself. South Seattle already has quite a bit of rail, but North Seattle does not. To not get Ballard online for more than two decades is unacceptable. I live in North Seattle and would be thrilled to take light rail to my office downtown, but it isn't an option.
NORTH KING COUNTY	The Ballard light rail needs to be moved up considerably. They need relief now!
NORTH KING COUNTY	Ballard is already overbuilt and has far surpassed other neighborhoods so 25 years is too long to wait. Crown Hill may become more dense too according to HALA plan but there is not enough transit to support the increase.
NORTH KING COUNTY	The timelines are too long for this type of project. There should be smaller projects done over a shorter period of time so the consumers can see the results. A 25 year timeline is too far out.
NORTH KING COUNTY	Anything that can be done to expedite an integrated light rail network (most or all of the ST3 routes) without sacrificing overall utility of the system should be explored. We would have had the monorail by now which could have potentially supported the Amazon influx and overall growth of the region. 20-25 years is way too long, what are the specific reasons for that timetable?
NORTH KING COUNTY	Please move faster! The lack of light rail transit is the biggest draw back to what is otherwise a great place to live. I had to answer to question 2 about how often I use transit as 1-2 times per year. I would love to use sound transit everyday if it was actually feasible to do so...today my commute to Everett would take 2.5 hours one way on transit, so I don't use it because it just isn't a feasible option.
NORTH KING COUNTY	It shouldn't take this long.
NORTH KING COUNTY	Complete light rail from downtown Seattle to Redmond as soon as possible.
NORTH KING COUNTY	17 years to West Seattle? 22 years to Ballard? These seem like ridiculous time frames. Why so long? Traffic is so terrible here it's hard to imagine waiting so long for relief. This should have started long ago like other major cities.
NORTH KING COUNTY	TAX FOCUS: please charge me to drive my car and not to own property in a region that is already becoming prohibitive for home owners. I worry that property tax will not be well received BUT the motor vehicle excise tax is incredibly reasonable and should be increased as the project continues. Vancouver BCs 20c per litre fuel tax is much steeper and has supported more environmentally friendly initiatives.
NORTH KING COUNTY	It makes no sense to have West Seattle receive rail services so LATE in the plan. The majority of property taxes will be coming from WS, but residents won't receive ANY benefit for years. If the time line does not change to place service to WS much sooner, I will vote against ANY further funding whatsoever, and will work hard to defeat any and all transit proposals.
NORTH KING COUNTY	Too slow.
NORTH KING COUNTY	West Seatte struggles with transit now. We desperately need light rail. It should come online sooner than Redmond. It should honestly be the top priority, at 8 years. I think you'll find others agree.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	If there are any strategies to move up the deliverables of this project, that would be fantastic news given the rate of growth of our area's population and the resulting impact on traffic and congestion.
NORTH KING COUNTY	I think the plan is taking too long. Why 25 years? Would be nice to get them faster especially to the outside the city, Everett specifically.
NORTH KING COUNTY	I would be more supportive of this plan if it prioritized Seattle-vicinity lines in the timeline. A 17-year timeline for West Seattle, and a 22-year timeline for a link to Ballard is so long from now that it seems hardly worth it to support. I'd happily pay significantly more annually in order to build these lines much faster.
NORTH KING COUNTY	Advance all Seattle projects to the front of the timeline. There is less demand for transit in suburban areas, and these suburban projects are less efficient on a per-capita basis.
NORTH KING COUNTY	I wish you could complete the Light Rain extensions faster!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

<p>NORTH KING COUNTY</p>	<p>I strongly support Seattle Subway's priorities for modifying the ST3 package. This will not pass without Seattle voters, and, personally, I feel like the current package prioritizes suburban giveaways over actual mobility improvements for people who actually use/need transit.</p> <p>1. Expedite the construction of light rail in Seattle. The biggest criticism of the proposed package that we've heard from Seattle voters and our supporters is the glacial pace of construction to Ballard and West Seattle. Sound Transit must do everything it can to expedite the construction of light rail in Seattle, including the elimination of projects that do not contribute the same benefits to mobility in Seattle. The line to Ballard is the single best project in the package, by every possible metric (Ridership per dollar? Check. Potential for Transit Oriented Development? Check. Potential for federal funding? Check.). Seattle voters will not support a package unless they will live to ride the rail.</p> <p>2. Make Ballard to Downtown fully grade separated. Once light rail is constructed at-grade, our city will be stuck with a flawed system, forever. Delays from our existing stretch of at-grade rail ripple throughout the system and limit the future capacity of rail through the Rainier Valley. All new light rail must be constructed with grade separation. This line, in particular, needs to be built to the highest quality possible. The high range ridership estimate for Ballard to downtown is 145,000 riders per day, which would mean: -Ballard to Downtown's daily ridership will be greater than the entire population of Bellevue. -Ballard to Downtown's daily ridership will be equivalent to the entire Portland MAX system.</p> <p>3. Provide complete funding of an Environmental Impact Statement (EIS) for the extensions from Ballard to UW and from West Seattle to Burien, and add both lines as "provisional projects" if additional funding becomes available. Completing the EIS for the extensions from Ballard to UW and from West Seattle to Burien will deliver those projects six years faster once funding becomes available. That makes the lines closer to "shovel ready," and creates the possibility that they can be built in ST3 if additional revenue becomes available through federal grants or cost savings on other projects. Just this year alone, Sound Transit is \$240M under budget on projects under construction, and the agency will also receive \$600M in unexpected federal grants. Seattle needs a plan that will leverage the benefits from Sound Transit's continued success.</p>
<p>NORTH KING COUNTY</p>	<p>Light rail within Seattle should be the top priority.</p>
<p>NORTH KING COUNTY</p>	<p>The timelines seem so far out- how will they be for the current situation in 22 years in some cases. We are making plans for decades out- are we projecting what Seattle will look like then and how we can meet the needs of the city?</p>
<p>NORTH KING COUNTY</p>	<p>Do the easy stuff first for maximal effect. Graham Hill station is easy with a huge impact on quality of life for area.</p>
<p>NORTH KING COUNTY</p>	<p>22 years to Ballard?!?</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Glad to see this being pushed.. I hope the top projects get done sooner than later: ) It might be worth looking into what it would take to get ready for the addition of self-driving vehicles that seems highly likely in the next decade. Having some of the proposed projects in ST3 take 25 years to complete might mean that they are obsolete transportation methods by the time they are usable with the rapid development of new technologies.
NORTH KING COUNTY	We need to focus on the areas we need people to live, work, and play: existing walkable dense urban areas, not existing suburbs like Lynnwood and Bellevue. We need to provide these dense walkable urban areas with safe, grade separated true rapid transit options, not waste time and money on noisy polluting buses that get stuck in traffic. Run buses to Bellevue and Lynnwood, not in the urban areas of Seattle Ballard should be top priority to receive this grade separated rapid transit within seven years, not 22. We need to link these areas with a safe bike network, and stop placing hazardous rail lines in on grade streets, essentially denying bicycles use of streets. No more Broadways! If we do need buses, they must be electric and the diesel buses retired.
NORTH KING COUNTY	The north side of the canal -- Ballard, Fremont, etc -- is undergoing extremely rapid growth right now. Traffic congestion has gotten much worse in just a few years. 22 years is an absurd timeline to address what must be some of -- if not the -- fastest growing neighborhoods in the Seattle metro area.
NORTH KING COUNTY	I think the Ballard/Downtown service should be prioritized. What with SLU, Expedia, Google moving in, this area is a chokehold in the very heart of the city. Also, this plan focuses mostly on North-South routes. When are we going to address the East-West conundrum?
NORTH KING COUNTY	Projects that connect dense and underserved communities, like West Seattle, should be higher priority.
NORTH KING COUNTY	Ballard rail timeline not aggressive enough.
NORTH KING COUNTY	Ballard to downtown should be a much higher priority for ST3. This route is staged and ready to be used by the most transit riders over the course of the timeline (this understanding comes from studies and articles I've read) and having the parts that will serve Seattle placed last alienates a very large portion of voters that will be needed to pass the ST3 in November. Even people as young as 30 would not support how much this will cost if they won't see any benefit of it until they are closing in on retirement.
NORTH KING COUNTY	Faster times to completion of the planned projects are needed. These projects are 10 to 20 years late. Also, people are interested in seeing their money put to use immediately, in a way that will affect them. 20 years into the future may be beyond the lifetime of many.
NORTH KING COUNTY	The most densely populated areas should be the first to get any transit improvements! There fares will help pay for the future development.
NORTH KING COUNTY	I'd be willing to pay double if it meant halving the time to completion of these projects.
NORTH KING COUNTY	Projects in the urban core (Seattle) should be priorities.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The state and counties should pay for a big chunk of this plan. It is not fair for a west seattle resident outside of the project zone and that does not commute to suburbs, to pay for this. Also, the west seattle timeline of 17 years is insulting. I will be close to retiring by the and would have been paying for 17 years for this project, and will continue to pay when I'm on a fixed income after retirement. The revenue source is regressive.
NORTH KING COUNTY	I love the proposed improvements but the timeline seems really long.
NORTH KING COUNTY	Speed them up
NORTH KING COUNTY	1. Please build it faster, 25 years is too long to wait. 2. Also, please build as much as possible, let's not wait so long to build out a fully functional system that we can never actually use it. 3. Raise the money now before the economy crashes... maximum support for this is now while people feel good about the world.
NORTH KING COUNTY	My support for the overall composition of the plan (aggregate of projects) is strong support, but my support of the 25 year timeline and the project order is tepid. Lightrail to ballard and west seattle as well as the additional stations of the existing lines (130th, Graham, and Boeing access) and the extension of the Tacoma street car should be priority 1!
NORTH KING COUNTY	Build the Ballard and West Seattle lines sooner. All new light rail lines should be fully grade-separated. Use subarea funds from all subareas to fund the new Downtown Seattle tunnel since it would serve the functionality and reliability of the whole system (not just the North King subarea). Include Ballard to UW line planning and EIS in ST3 so that it's shovel ready as soon as funds become available. West Seattle line should serve Delridge and Burien in ST3 to increase access for communities of color.
NORTH KING COUNTY	I will absolutely vote for this. Investing today so my kids can enjoy this benefit. But we're talking about a *generation* before we complete this project. I would gladly pay more to get this done more quickly.
NORTH KING COUNTY	Let's get this done sooner! Investments in infrastructure will undoubtedly improve our region
NORTH KING COUNTY	Twenty-five years? That's just way too long. I can't believe you can accurately plan that far out, since you have no idea what will happen in the next 25 years. Plus, why do we have to wait that long? Other cities manage to put in subway lines in much shorter timeframes (i.e., DC).

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

<p>NORTH KING COUNTY</p>	<p>I am really disappointed with several elements of the Sound Transit 3 Plan, but with the extremely poor design and construction timetable that has been allocated to Ballard light rail service. As has already been amply demonstrated by the (predictably) failed experiment of on-grade rail lines in the South Lake Union Streetcar, putting trains in the same lane as traffic compromises their speed and reliability, which is essentially everything that makes them attractive.</p> <p>Given the massive predicted ridership for the Ballard line it is inexcusable that ST3 would consider an on-grade rail system to be either an adequate or appropriate solution for light rail in this region. Ridership will suffer, badly. 15th avenue, which is already heavily used and congested for much of the day will simply become more gridlocked as the tech industry continues to expand near the waterfront and additional commuters are added.</p> <p>Bus rapid transit will not solve these problems. Indeed, bus rapid transit has provided disappointing and lackluster performance on the D-Line, which was supposed to be the "crown jewel" of the system. The busses are difficult to catch and take LONGER than the original 15-local line to reach downtown. While a number of optimizations and capital improvements were promised to make this "as fast as light rail" none have materialized. Busses are not given priority at lights, lights are not synchronized, and for much of the commute they sit in traffic trying to merge at the Ballard Bridge or behind SOVs that drive in the bus lane. Promising additional bus RT service is unappealing, and frankly a poor use of ST funding with so many better and more permanent solutions available.</p> <p>We have one chance to do this right, and I would rather vote against a poorly designed and poorly executed ST3 package (which I consider this to be) than than vote for a package with lots of promises for future improvement that never materialized. We need fast, reliable, high-quality light rail that is separated from traffic to Ballard, and West Seattle. Easing congestion at the heart of the city will promote greater traffic flow from outlying areas.</p> <p>And I'd like to ride the rail before I die, fix this timeline!</p>
<p>NORTH KING COUNTY</p>	<p>If I live that long, I will be 100 years old by the time someone can travel from Everett to Tacoma on light rail. That seem like a long time. I, along with hundreds if not thousands of Seattlites have been advocating for public transportation improvements since the 1980s or longer. We have waited patiently for decades while those who could do something about improving public transportation spent their time doing something other than action and then saw a light rail plan that seemed to be designed to maximise costs and minimise extent of travel. The I-5 freeway is already on the verge of gridlock for most of the daylight hours and is unlikely to get better in the next five years (let alone the next twenty five). The time to make long distance public transportation (not just commuter rail) a reality is NOW. The time for commuter rail to have its own dedicated, landslide-protected rails (not owned by BNSF) is NOW.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	22 years for Ballard is too long! That's my selfish comment. Build them all, the more the better!
NORTH KING COUNTY	I think the West Seattle and Ballard lines should be fast-tracked as much as possible. I would also like to see Light Rail across 520 enter the discussion more than just "we'll look into it" and the same goes for I-90. I also think that paying for these things using sales and MVE taxes makes no sense, but that's because we're stuck with a [explicit], regressive tax system, and I realize that fixing that is out of the scope of ST3.
NORTH KING COUNTY	timeline needs to be sooner, we need this now
NORTH KING COUNTY	The entire process is too slow! 25 years is far too long. There has got to be a way to speed things up. There needs to be a full analysis of what constraints, both fiscal and regulatory, are pushing the timeline so far out. Make a list and publish the list. Don't just say "It's expensive." I want to know, project by project, why it has to take so long.
NORTH KING COUNTY	My primary concern is getting better transit options to Ballard. While I can't comment on the project priorities and I realize these things take a lot of time, 22 years to get light rail service to Ballard is too long. In my opinion, shortening the timeline — even at greater cost — is necessary.
NORTH KING COUNTY	You really need to figure out a way to make this not take 22 years for a light rail to Ballard. The City needs something major to happen in the next 5-10 years or we will have the worst traffic in the country.
NORTH KING COUNTY	Timeline for in-city projects is far too long. The Ballard line in particular should be a top priority, and to have it be last is almost insulting.  In general, far too much money in this package is being spent building park and ride stations by freeways, rather than providing transit services to areas where people (could) live and work.
NORTH KING COUNTY	I wish that the timelines were more rapid. In thinking about my current commute times (I regularly do a bus/bike commute from Capitol Hill - Seattle to Bothell/Canyon Park), by the time the BRT up 522 and the Light Rail to Northgate and Lynnwood are completed, I may be retired - within 25 years. I'm 44 years old and wish that I could take advantage of these great commuting options before I do retire. Still - we must build for the future.  Please continue to build true Light Rail which is not constrained by traffic. Also, please do not build tram systems - as they are not put to good use in Seattle as long as they sit in traffic. Walking is faster than taking the tram on Capitol Hill.  Sound Transit has a great vision now. Keep up the good work.
NORTH KING COUNTY	Time line must be fixed, Ballard line should priority #1, then west Seattle, then Everett and Issaquah. Do close-in projects first and only Tax seattle residents until work begins on outlying projects, then expand tax base to those communities.
NORTH KING COUNTY	This is happening way too slowly to keep up with growth.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Areas such as West Seattle need much improved transit in the short-term. I'd have stronger support for the ST3 if it proposed more BRT options--faster and more reliable bus service--while we wait for rail service. AND, can ST3 be modified to get monetary support from the big employers/attractions that are adding to the traffic woes? Microsoft, Amazon, Sounders, Seahawks, Mariners, Google, etc. !!
NORTH KING COUNTY	I believe that the Ballard and West Seattle portions of this plan should be fast tracked and frontloaded into the timelines above. They cannot wait for 20+ years to be completed.
NORTH KING COUNTY	Timelines should be sped up. Ballard to UW should be added as a tunnel project. Also Ballard to downtown should be a tunnel as well.
NORTH KING COUNTY	Please expedite this process! 20 years is too long for a functioning city!
NORTH KING COUNTY	Population growth in Seattle is booming so transit options between Ballard and West Seattle to Downtown need to happen ASAP. 22 years is really unacceptable. Additionally, transit between Ballard and UW needs to be part of the plan now and not just studied. Ask anyone who rides the 44 daily.
NORTH KING COUNTY	Like everyone else, I would love for the timelines to be reduced. In addition, a cross (UW - Ballard) route would have very high ridership and should be included in such a massive transit plan.
NORTH KING COUNTY	Everett link should be moved up in schedule
NORTH KING COUNTY	Do west Seattle first!
NORTH KING COUNTY	While I selected "strongly support" to the plan outlined above, I would like to see completion schedule of the West Seattle and Ballard Links to downtown moved up in priority. We need faster resolution to the infrastructure to support all the workers coming into downtown Seattle for Amazon, Google, etc.
NORTH KING COUNTY	First off, thank you for all that you do to move our region in the right direction from a transportation standpoint. I'm a lifelong Seattleite and transit user. My only feedback would be to accelerate the timeline for rail in the city. I don't have all of the data on what is the fastest growing transit corridor, but assuming that it's Ballard / West Seattle / Downtown, then investment should happen here first. If it's JBLM, Kent, and Everett, then focus the energy and resources there. But assuming that the city is congested, try to provide relief there as quickly as possible.  Thanks again for your hard work! You've got a yes vote from me regardless of the plan!
NORTH KING COUNTY	I will be 78 years old when light rail comes to West Seattle and yet I support this plan. We MUST go forward; however, the timelines are very discouraging. I know thousands of people have urged you to move them forward, and I will have to add my sentiments to the list!
NORTH KING COUNTY	I believe our region is growing extremely faster than predicted, which is obvious through the ridership counts in the recent light rail opening to Capital Hill and UW. Given this, the timeline for light rail to at least Ballard and West Seattle / Burien should be a priority and accelerated to be complete much sooner than 17 years. If this is at a cost of removing other projects from this plan, then that should be done to allow people already living in these areas to commute better before expanding to the rest of the region.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Please speed up implementation. It is so frustrating how long it takes to complete capital infrastructure. We need to get people out of their cars and stop making the freeways wider.
NORTH KING COUNTY	My biggest worry is that everything proposed is generally not enough.
NORTH KING COUNTY	This survey is fundamentally flawed because of course the respondent will always rate projects directly benefiting them highest. For instance, I live in Ballard and thus have given my highest ratings to plans relating to Ballard. I am very disappointed that we will have to wait 22 years to get mass transit to Ballard, one of the fastest growing areas in Seattle. Among my friends it is an ongoing joke that the city sold the land that was to go for a monorail from Ballard to downtown and axed the project. Please give Ballard more priority in your plans. I am also extremely disappointed in all the attention and money given to bike routes. For a senior citizen like me, they are worthless. I am glad that Scott Kubley (sp?) is being investigated for ethics violations. He puts no priority on cars which we still have to drive to get places. Bikes in Seattle? With all our rain and hills? Really? I'm for bikes, but the attention given to them has gotten out of hand. The Pronto disaster should be a wake up call to the city and shame on them for voting so easily to bail them out. So, now you know my opinion. Signed, Jane, Ballard resident for 27 years.
NORTH KING COUNTY	The timelines for light rail to Ballard and West Seattle are way too far out.
NORTH KING COUNTY	Can't you get it done quicker? How about all of thee projects in 5 years?
NORTH KING COUNTY	FASTER completion times. Invest NOW.
NORTH KING COUNTY	17 years for West Seattle light rail is a long time! I mean, I would rather have it in 17 years than never, but would be willing to pay more if it meant sooner access.
NORTH KING COUNTY	The timelines for Ballard and West Seattle are ridiculous! We need it sooner!
NORTH KING COUNTY	I was a monorail supporter and was very disappointed that that project was subject to a level of scrutiny relative to budget and timeline that sound transit has not been subject to. I live in Ballard and likely by now would've had a monorail line to get me downtown by now or very soon. Water under the bridge, though. I'm a huge transit supporter even though I tend to ride my bike as much as I can--it's faster and more consistent time-wise than the D-line, which is ridiculously slow most of the time. Ballard is growing rapidly and it seems absurd to me that the line from downtown to Ballard won't be done until my daughter is into her twenties--she's 3 now. My husband is honestly ready to vote against ST3 because he feels like the priorities are out of whack. I understand the desire to address regional and suburban needs, but if we consider that likely Seattle residents are paying more in general and have far more population I simply don't understand why ST3 isn't fast-tracking the connections to Ballard and (to a lesser degree) West Seattle. And I'm not sure if anyone has waited on a week-day morning on 15th Ave NW and seen the rush of people to pile on the old 15 express bus while the D-line goes along with lots of seats available, but having taken both I can say that the D-line is anything but rapid. WAY WAY WAY too many stops. It should function as an express to get people downtown. Ballard is terrifically underserved as far as transit goes. I've never taken a bus home from downtown to Ballard that was not jam-packed, standing room only. What gives???

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	This is long overdue. All of these projects should be pursued immediately and as quickly as possible. Puget Sound desperately needs a transportation system other than cars on freeways. I suggest more immediate options like converting more roads and freeways to bus-only lanes and significantly increasing bus service and frequency.
NORTH KING COUNTY	Timelines are too long. We need relief now. In addition, Washington's current funding system needs to change. We can't keep increasing sales tax and gas tax as this is punitive to lower income individuals. Similarly increasing property tax is not the way forward. Washington needs an income tax.
NORTH KING COUNTY	Ballard line should be added ASAP with an east-west link to the U-District  The whole timeline is too long. Can't we make it happen more quickly?
NORTH KING COUNTY	Faster project delivery
NORTH KING COUNTY	West Seattle and Ballard timelines should be moved up.
NORTH KING COUNTY	With the possible exception of education, I am more willing to see my tax dollars go toward the expansion of quality mass transit throughout the region. I have been vying for better, faster public transit connections since i first saw a projected expansion plan when I was in eighth grade. I am now 36. I voted for the monorail. Twice. Please, please, please build us some world-class public transit. As it is, I've been waiting almost a quarter century, and this plan won't see it done for another quarter century. Onward.
NORTH KING COUNTY	Support building a full system, but 22 year project plan is insane.
NORTH KING COUNTY	Prioritize finishing work on the lines with highest projected ridership.  I do strongly support the development of lines to the farther out places, but the Ballard connection in particular needs to happen faster. I also strongly support making the Ballard route tunnel under the canal so it can operate on a reliable schedule rather than adding another drawbridge.  I also support an east-west line between Ballard and the University District.  These would all have higher ridership and would recoup costs faster. Our city is changing fast and we can't move fast enough to build better transit into our planning process that shapes other zoning and development decisions.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>I think that the proposed timeline is way too long. We need these transport services now and cannot wait up to 25 years for some of them.</p> <p>I am very happy for there to be tax increases to fund these projects. However, every effort should be made to place the majority of the tax burden on higher income residents and businesses (especially those that will benefit from improved transport). I do not support regressive tax increases that will disproportionately impact poorer residents (i.e. increase in sales tax or vehicle licensing fees, etc.).</p>
NORTH KING COUNTY	<p>Speed it up! The time frames are way too long. How do you expect people to support things that will take 25 years to design and build? I will pay more taxes to get it done faster.</p>
NORTH KING COUNTY	<p>I understand bonding limitations for funding the projects and that this influences the proposed build-out schedule. I believe it is in Sound Transit and the region's interest to explore additional funding mechanisms that could accelerate construction. Options to evaluate include public-private partnerships, local jurisdiction contributions and additional federal grants. It is likely legislative authorization would be needed for some new options. Communicating that Sound Transit will work with stakeholders to try to identify mechanisms for accelerating the build-out will be important to get support at the ballot box in November, especially for Seattle residence.</p>
NORTH KING COUNTY	<p>Unacceptably long timeline. Pass a bond and get this built NOW</p>
NORTH KING COUNTY	<p>Can we skip the BRT development and start developing the light rail sooner instead? We need it now and we should just bite the bullet and get it done as soon as possible, IMHO. BRT seems like an extra, unnecessary step, unless the projected timeline IS the best-case scenario. I'd like to hear more (be more educated) about why we're not starting the light rail development right now.</p>
NORTH KING COUNTY	<p>We need to extend the light rail faster and farther. the easier it is to get to/around the city, the better.</p>
NORTH KING COUNTY	<p>We're all sick of sitting in traffic - place priority on the projects affecting the highest commute congestion zones and you'll have much greater public support, which might mean the difference between quality transit sooner and with less complaint and bare-minimum transit with roadblocks at every step. Expansion into Seattle neighborhoods and greater distances such as Tacoma &lt; &gt; Seattle would be a good first step, if not Seattle &lt; &gt; Bellevue/Redmond. People appreciate what you're doing and the light rail is certainly getting a workout - keep up the good work!</p>
NORTH KING COUNTY	<p>I'd happily pay more to condense these timelines.</p>
NORTH KING COUNTY	<p>Your timelines are way too long. The project should be completed in three years maximum. You need to sell bonds to finance the project now while interest rates are low. You need to think completely differently about mega projects. The way to complete them is work 24/7/365. Two 12 hour shifts, straight time. Significant bonus for the workers if completed under budget and on time. You just cannot take 25 years for anything and have the voters pass it. Get the unions in line or do the project without union labor.</p>
NORTH KING COUNTY	<p>The time line for the light rail to Ballard and West Seattle is way too long. These are important areas of population growth, especially Ballard, and need to be priorities.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>This completion timeline seems ridiculous which is why I "somewhat oppose" question 12. Lynnwood to Everett won't be complete for 25 years? I understand the infrastructure problems, I really do. Urban planning surrounding this project must be a nightmare. But it is heinous to me that something we discussed when I was a teenager won't be complete until I am over 50.</p> <p>I just moved back to the metro after living in Denver, New York City, and Minneapolis, in that order for the past 8 years. This helped me truly understand Seattle's terrible transit system. I was present for the light rail connection of Minneapolis and St. Paul. This had a huge impact on the community, and I think we should be looking at connecting Tacoma, Seattle, and Everett in the same way and that this should be a priority project. 25 years? Unacceptable. This should have been addressed 15 years ago.</p>
NORTH KING COUNTY	<p>If the timelines to add light rail service to Ballard and West Seattle are not DRASTICALLY improved, I will vote no on this initiative.</p>
NORTH KING COUNTY	<p>I would have much more support for the plan if Ballard light rail were completed earlier. Ballard is growing rapidly, and needs more transit options.</p>
NORTH KING COUNTY	<p>LA fast-tracked their Measure R program with infrastructure bank and other approaches to deliver the program in under 10 years. I think even a smaller set of projects delivered on a faster timeline would be more understandable to the public.</p>
NORTH KING COUNTY	<p>Faster please!</p>
NORTH KING COUNTY	<p>Was there ever a proposal at any point to accomplish these transit goals in any shorter periods of time? Twenty-five years is a LONG time and I feel things need to progress faster. We're already way behind, from the perspective of a metropolitan city, on transit development!</p>
NORTH KING COUNTY	<p>The light rail expansions (new stops added), especially to North Seattle and Ballard shouldn't take in excess of 20 years. This can be completed faster. Asking Tax payers to pay more than \$4,000 over the course of 20 years for an investment or improvement they may never see seems out of place and would make many upset. Will that \$4,000 investment be worth it to them? If I live in, say Greenlake, and there are no new services coming that will help my commute, do you think I'll be happy paying that much money for a benefit I may never get to enjoy? (definitely won't get to enjoy \$4,000 worth of it). This issue should be taken into consideration. Tourists, travelers, and those who come to the city in 20 years will enjoy this benefit "free" at the cost of taxpayers who won't get nearly the utility out of it.</p>
NORTH KING COUNTY	<p>I'd be interested to know the ranking of which projects are most important, and why the timing seems to be so high (Ballard, 22 years!). It seems at an additional cost of \$200 per year, this is quite a long time and quite a large amount for results that will take 17-22 to be beneficial to my transit needs. I strongly support the extension of light rail and feel we are already lagging as it is; is there a better way to expedite an already high need that will only be rising in the next years?</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I would like to see the Ballard and West Seattle stations much sooner. Given the increased density in both neighborhoods, having these toward the end of the 25-year plan is unfortunate. I understand that because ST3 is voted on county-wide, that provisions must be included for the suburban areas to gain their support. However, I feel like prioritizing areas with the greatest density/ridership should be a stronger priority. On a selfish note, I also would love to see the infill station at 130th Street included and not provisional.
NORTH KING COUNTY	I would support an accelerated timeline that would get the bulk of this plan implemented in ten years or so rather than 25. I am very skeptical of the bus option in the 405 corridor unless this option is a prelude to a light rail in the existing 405 right of way. The Ballard line is way overdue and the city development strategy was predicated on some sort of light rail (monorail) this has resulted in a extended transportation bottle neck which the BRT has done little more than keep the problem at arms length. More development in that location would stress that system to the breaking point. West Seattle is also an embarrassment. This will be even more difficult when the Viaduct closes. There just isn't the system in place to accommodation that much traffic dumped into the I-5 corridor or downtown. Maybe BRT would help but only because the West Seattle residents will become desperate. The outlying areas are not as critical. Light rail may facilitate less density pressure on Seattle but with the proposed schedule my guess is that it is to little to late and the more urban areas should be developed as a priority.
NORTH KING COUNTY	Ballard and West Seattle timelines for light-rail are just too long. I believe ST has an excellent track record of being pragmatic in its expectations of projects (not promising what it cannot deliver, and delivering on time and on budget), but I think these two projects need to be front and center. Yes, it is a regional transit plan, but these two neighborhoods of Seattle would benefit IMMENSELY from true light rail access.  I personally also think that east-west access (Ballard to Fremont to UW) would be an incredibly beneficial addition.
NORTH KING COUNTY	I don't understand why Ballard has fallen to nearly the bottom of the list, given the rapid population growth there.
NORTH KING COUNTY	I would support paying more to accelerate the timelines for light rail. It would be so great for the region, I'm excited for all the planning that's been done and projects proposed so far!
NORTH KING COUNTY	I would gladly pay much more money per year to have the timeline shorter for the overall project. I live near the future Roosevelt Light Rail Station, and I would pay more money in taxes to shorten the timeline, not just for my extension, but for all of them. Faster, Faster, Faster!
NORTH KING COUNTY	I am very disappointed to see that light rail in Ballard is pushed out to 22 years from now. This is a neighborhood that is growing at a faster pace than anywhere else in the city and the transportation options do not keep up with this pace.
NORTH KING COUNTY	Project timeframe is too long. Ideal timeframe would be 3-5 years total.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>I am tired of paying taxes to support rural Washington when the roads in Seattle are falling apart, and I can't get light rail to Ballard and West Seattle, two of the most rapidly growing neighborhoods in the State for 22 years. I generally am a big supporter of mass transit and particularly light rail, but when I moved here in 1998 I was promised light rail to Cap hill in 10 years and here we are almost 20 years later and you finally get there...and then you are saying I'll be in my 60's when it reaches Ballard. Come up with a real plan and I will support it. You need to either really do bus rapid transit like in Brazil with its own dedicated lanes, and skip lower QA to speed things up or give up on it. The old 15X buses were faster and more reliable. Stop with the light rail to areas outside Seattle. You need something to move people efficiently around Seattle, out of traffic above(monorail duh!) or below grade and separate heavy commuter rail to get people to and from Everett, Tacoma and Bel-Red. Expand Sounder for the suburbs, use express buses with dedicated lanes but give us separate from traffic light rail in Seattle. We are paying for it and shouldn't have to wait 2+ decades to get it. Really, your inefficiency and talk it to death process is killing us. By the time it is completed it will be out of date and overwhelmed by the massive population growth. Unless you change the plan I won't vote for it.</p> <p>Disgruntled transit supported in Ballard.</p>
NORTH KING COUNTY	<p>Disappointing that it is going to take so long, but region desperately needs a broad transit solution. No more "kick the can."</p>
NORTH KING COUNTY	<p>The length of time to complete these light rail projects is hard to stomach. 17 (West Seattle) and 25 (Ballard) years out for two projects that I am very eager to see developed is disappointing. However, I strongly support the measure overall because I know we must make these investments ASAP and if 25 years is ASAP - that's better than never.</p>
NORTH KING COUNTY	<p>Light rail to Ballard and West Seattle is so important and literally can't come soon enough. I used to take mass transit to work everyday, but now that I live in West Seattle and work in Ballard, I have to drive. I would much rather take light rail and will ride every day once it's an option.</p>
NORTH KING COUNTY	<p>25 years is an extremely long horizon. Is this the right technology for then? It is slightly ridiculous, but what if there are personal hovercraft or something better. I would say the faster the better... if you are going to build light rail.</p>
NORTH KING COUNTY	<p>High ridership lines like Ballard-downtown with the biggest impact need to be prioritized over expanded regional transit.</p>
NORTH KING COUNTY	<p>Given the rapid population growth and increasing density of the Seattle area, the timelines proposed are insufficient. Making existing light rail lines as accessible as possible to local residents by adding stations and improving transit oriented development efforts should be the first priority, followed by RAPID expansion of the line. I believe the last projects should be completed much less time, closer to 15-20 years.</p>
NORTH KING COUNTY	<p>SPEED UP THE PROCESS; I will be dead before you get completed and I'd like to be able to use public transit in my waning years.</p>
NORTH KING COUNTY	<p>Ballard to Downtown route should be the top priority. High density areas all along this route would have greatest impact on moving the MOST people!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The plan is too big, and takes too long. It should be divided into ST 3 and a later program of projects for ST4. Specifically, I oppose using the property tax for transit. Transit relies on the sales tax and other fees, and has for 45 years since the 1972 Metro election. Schools and general purpose government DEPEND on the property tax.
NORTH KING COUNTY	This needs to happen faster!
NORTH KING COUNTY	Connecting Everett to the light rail line should be top priority for ST3. 25 years is too long a wait for commuters. An expediated timeline for that station in particular will help ease congestion on I-5 and ensure ST3 has the support to pass in November.
NORTH KING COUNTY	Timelines MUST be made shorter. Congestion on roadways is already severe. Buses use the same roadways, so if additional BRT takes 8 years to begin, they will just be sitting in even worse traffic. 25 years for light rail should be 10 years instead, and even that is going to seem an eternity.
NORTH KING COUNTY	<p>Apartments in Ballard and throughout Seattle continue to be built with NO parking provided - with the intent that residents will be able to get around the city adequately using mass transit options. Ballard and Seattle will not survive their own growth if it takes 22 YEARS to complete the Ballard-Downtown project.</p> <p>While there is a significant traffic problem on I-5, people living in the city itself are becoming stalled out by the lack of transit options. Busses and at-grade rails are subject to traffic - we NEED to revitalize transit within the city before adding to the number of people that place demand on the system by building arterials from the surrounding area. If you build additional connections into the city before it has the capacity to deal with additional riders, the system will be overwhelmed. Seattle first, then expand outward!</p>
NORTH KING COUNTY	Development of the light rail system has made a huge difference in speed and convenience in the Seattle area. Getting us all connected earlier than projected would be a tremendous benefit and get more cars off the road sooner. I would strongly support any additional means of funding to get the job done. Future development depends on how well we are connected.
NORTH KING COUNTY	a 25 year timeline seems outrageously long. I would definitely support allocating more tax dollars in order to speed up implementation. With the extreme housing growth in Ballard and West Seattle now, there's no way 25 years to completion makes sense. Buses are beholden to traffic in general and are trapped in gridlock. Sound Transit rail is disrupted several times each year with mud slides. Both are too vulnerable to existing infrastructure that does not work. We need a new system.
NORTH KING COUNTY	Build it as fast as possible. Sell a crap ton of bonds to raise money ASAP, and then build as fast as possible. Schedules that take ten to twenty years are way too slow. The people want the improved system in five years.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>Why does it take 20 years to get a line done? Why aren't there multiple boring machines completing multiple tunnels, placing infrastructure NOW into the ground rather than getting excited about two stations today, two more in 7 years, etc.</p> <p>Sound Transit's inability to ramp up speed-wise is maddening. No excuses. Build it all, at the same time, NOW.</p>
NORTH KING COUNTY	Faster development would be helpful.
NORTH KING COUNTY	I feel the 25 year timeline will make some people less likely to support it. Perhaps more aggressive funding measures that can make it happen sooner might be useful.
NORTH KING COUNTY	We need more faster. Tax me more so that we don't have to wait 20+ years for light rail to Ballard. Lets get this done in 5-10!
NORTH KING COUNTY	The timelines are insane, they are way too long considering Seattle's grow rate. Ballard in 22 years?!? Also, please, stop mixing light rail with road traffic at grade. Light rail needs its own, unobstructed pathway. I love sound transit, but sometimes I think you guys have never looked at mass transit implementation in Asia or Europe.
NORTH KING COUNTY	The light rail to Everett should be reached earlier in the timeline.
NORTH KING COUNTY	Ballard to University District should be added to plan. The Ballard to Downtown line should be prioritized and should not be built at-grade, as it has the highest projected ridership and the lowest cost per ride. The private sector can more than adequately supply parking near stations but if building parking ends up being part of the plan, it should not be free.
NORTH KING COUNTY	So far light rail has expanded service to neighborhoods that have excellent bus service. This has been coupled with service to other neighborhoods with already spotty coverage being reduced. The new plans you have seem to continue this disappointing trend. I live in the heart of West Seattle and I need to travel to the heart of Ballard frequently. These neighborhoods are still forgotten in your new plans. A little stub of a line going in to the richest part of West Seattle doesn't make sense, send the line down in to the part of West Seattle (even dare I say it, White Center) where the poor live.
NORTH KING COUNTY	I'd like to see Light Rail projects started sooner, so that the overall impact on infrastructure and the growth of the communities gaining service would be impacted the least (more growth = more effort to get transit into that area at a later date). Light Rail is the most difficult and expensive of the options to construct so we should get started on that ASAP.
NORTH KING COUNTY	ST does not use proven means of accelerating project time lines. Too much time is wasted on serial completion of pre-construction activities. Many of these activities can be done in parallel saving years of schedule time. See how SAFECO Field was completed in less than 4 years from the date the Public Facilities District was created.
NORTH KING COUNTY	More aggressive timeline please.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I don't think I'll be living here in 22 years when the light rail goes to ballard. This definitely impacts my support.
NORTH KING COUNTY	I know projects if this type take a long time, but 22 years to get to ballard seems ridiculous. I'll be retired by the time I can take advantage of it.
NORTH KING COUNTY	Seattle metro area will continue to grow for foreseeable future, we need mass transit asap!
NORTH KING COUNTY	20+ years to complete significant sections that will be essential for regional transit is overly cautious and is not going to garner the right level of support come election time. Build off of the good work done so far related to the UDistrict LINK extension and use the current level of enthusiasm to improve the plan to help focus and accelerate the completion timelines. It is abundantly clear that the region desperately needs to address its transit issues much sooner; too much time has been wasted already over the years, leading to the current state of gridlock. People are seeing the effect more clearly now and are far more receptive to do something about it than I've seen in the entire time that I've lived here. If we as a region are truly serious about attaining further economic standing in the work and maintaining it for our collective benefit, we need to be willing to invest in a world class system. As part of that, we need to see a lot more than just slow incremental improvement for our support.
NORTH KING COUNTY	I am extremely supportive of expansion of light rail, rapid bus transit and the sounder train, however I believe the timeline for some neighborhoods in Seattle needs to be adjusted -particularly for West Seattle and Ballard. These are neighborhoods that have seen extremely rapid growth in the past decade and have limited access because of their geography. Transit in these neighborhoods should be prioritized. Additionally while I am in support of rapid bus transit and I don't think it should be used in place of planning for light rail infrastructure - the rapid lines are an improvement but do not compare to the efficiency and ease of the light rail system.
NORTH KING COUNTY	Concerned that the Urban village concept that is occurring in West Seattle and Ballard significantly increases the number of transit users, but the Light Rail options to these areas are more than a decade in the future. I realize that there are different organizations at work, but some coordination to accommodate the increase in transit users will be desperately needed.
NORTH KING COUNTY	I live in Magnolia and the traffic along the Ballard-to-Seattle corridor is already at essentially full capacity. The timeline for your plan leaves this corridor with no improvements for another 22 years. I'm a strong supporter of public transit but I am somewhat opposed to the proposed plan because I get nothing out of it until long after I've retired and no longer have to care about getting into downtown Seattle every day. With the anticipated new arrival of about 3000 additional cars into the Interbay area for the new Expedia campus, traffic is going to become unbearable far sooner than 22 years from now along the roads that I actually have to travel on.
NORTH KING COUNTY	22 years for Ballard is a non-starter for me and I would not vote for that package. Why would I pay taxes now on something I can't use until 2038?
NORTH KING COUNTY	The timelines are too long. 17 years for West Seattle? You should be more aggressive. The transit is needed now. You should ask for more money to build faster. Portland builds lines in 3 years....The plan is strong, but it all needs to happen much, much faster. By the time this stuff is built, it will be too late !

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	While in general I support the plan, I am concerned about the time to achieve all the projects. Timelines need to be moved up significantly.
NORTH KING COUNTY	We should complete these projects sooner. They should have been done 10 years ago.
NORTH KING COUNTY	the projects need to be completed much faster!
NORTH KING COUNTY	I can live with the respective 12 and 22 year wait for the new rail within Seattle, provided that the C and D metro line improvements ACTUALLY IMPROVE THE SYSTEM. The improvements need to be big and bold on these routes, as those two corridors are only going to get worse.
NORTH KING COUNTY	Please focus on Seattle Projects first - especially Ballard and West Seattle lines!
NORTH KING COUNTY	Needs to sooner than 8- 25years. That is ridiculously long. There is no way Seattle traffic woes can continue for that much longer
NORTH KING COUNTY	Sound Transit is an unaccountable organization that has consistently proven that it is a bad steward of public money. It's a fine jobs program and wealth redistribution program but as a transit agency it is a complete failure.
NORTH KING COUNTY	The light rail projects should be moved up and prioritized. Don't focus on improving bus service -- bus service will never be good enough. You need the trains, and you need them NOW. Get rail up and running as quickly as possible, to as many places as possible, and don't worry about how good it is yet; that will come. The most important thing is simply that AS MANY PEOPLE AS POSSIBLE have a train station within easy walking distance of their home, and another within easy walking distance of anywhere else in the region that they might want to go.  -A New Yorker, who has seen how GOOD transit works.
NORTH KING COUNTY	I wish the improvements to Ballard, Everett and Lynnwood could happen faster and sooner.
NORTH KING COUNTY	I have no problem with any of the lines, but it is a no brainer that downtown to ballard and then downtown to west seattle should be the priority respectively. There is no way I am voting for this with those two coming on line in 25 years, OR one that doesn't include a 130th street station! I also think there should be a u-district to ballard and ballard to northgate line.
NORTH KING COUNTY	I know that "Ballard w/ new tunnel" is the most expensive and time consuming project but out of every proposed line it would move the most people daily. The most valuable Eastside connecting line should be the next priority. I'm only speaking in the context of light rail line priority here. I agree that it's important to serve the Eastside ASAP because they're the region that hasn't been served at all yet. However, Seattle is where the major problem is and also will be the greatest ridership supporter. Out of all the communities served in this new plan, Ballard appears to me as the one that is urbanizing (growing taller; car use down) at the greatest rate and would be enabled most by a light rail line.
NORTH KING COUNTY	Park and ride at Othello, baker, south end light rail ASAP Need rapid lines or express busses on Rainier or MLk in se seattle
NORTH KING COUNTY	Faster timelines.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Love plan, but needs to move faster. What will it take?
NORTH KING COUNTY	A Transit stop on NE 130th would be extremely helpful for my commutes. I currently use the metro bus daily to get to downtown, Northgate, Ballard, etc. A transit stop is helpful not only to me but my family and people in the neighborhood who currently do not own vehicles. Thank you for the opportunity to take the time and ask for the community's input.
NORTH KING COUNTY	As one of the most populated Seattle neighborhoods, West Seattle should be completed far sooner than planned. Very, very disappointing! So much so that I'd consider voting against ST3 despite my strong support for this area's light rail expansion.
NORTH KING COUNTY	A light rail connection from West Seattle to Downtown Seattle would be AWESOME! I imagine it would greatly decrease commute time (even when compared to buses) and would provide an easy and hassle-free way to commute to the airport for work and travel.
NORTH KING COUNTY	The timeline for the project is too long, 8 years before we will see the first results of the project is too long, we need these now. I support efforts to speed up the process. In 8 years, let alone 25, I think Sound area transit needs will shift dramatically.  I strongly support rail options first, over bus improvements. Though rail is likely more expensive, Seattle and King county area roads are already too congested and dedicated rail lines would ensure consistent and reliable commute times.
NORTH KING COUNTY	I just spent two weeks in Japan and our mass transit system is a joke in comparison. Anything we can do to relieve traffic would be wonderful. Thank you.
NORTH KING COUNTY	the whole package needs to have a much faster finish date
NORTH KING COUNTY	I am 63 and blind. Traffic is choking city. One million more by 2044. The service to West Seattle is too slow in coming. (17 years?!) Same with Ballard. Double the tax and half the build time. Build urban villages not for cars. Extend more services to Olympia.
NORTH KING COUNTY	As a longtime resident of Ballard who has watched the city promote rapid density projects, I cannot support the ST3 program as it currently is proposed with the Ballard light rail being placed on the back end. It just doesn't make sense that the city has encouraged thousands of new residents without providing rapid transit in and out of the neighborhood. I support density, but not unsupported density. Put Ballard at the front-end of the project and you'll have the support from me, my family and many others in the neighborhood who can't believe we've been left as an afterthought.
NORTH KING COUNTY	Sound Transit must find a way to complete this plan in a more timely manner. I STRONGLY support the plan, particularly in making the city of Seattle easier to navigate, but worry about the high tax required to fund projects that many may never enjoy the fruits of, will be a really tough sell. Cut the timelines in half & you'll get much broader support.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Should have already been done. The \$200 a year we will save in gas
NORTH KING COUNTY	My comment is more of a question. Why will it take so long to complete and implement these projects? Especially the bus improvements? Eight years seems like a long time. I use public transit and have always supported public transit ballot items. But it is a tough ask, asking voters to support and pay money toward services and improvements they may never get to use.
NORTH KING COUNTY	It is completely ridiculous that Ballard will have to wait more than 20 years for light rail! Our population has increased dramatically and we are served terribly by Metro. Speed up the city routes to alieve congestion in the city. I would love to commute by bus or bike, but Ballard is cut off from efficient choices. It takes me 35 minutes to drive 7 miles east to my job. If I took a bus, I'd have to transfer downtown and it would take over an hour, which is too long for families with small children. My husband can't take the bus because of his late hours and would have to walk home 22 blocks with cash tips after waiting on dangerous 3rd Avenue... Get light rail to Ballard sooner please! Also, the pedestrian access and bicycle parking is extremely important. When I lived in Japan, bicycle parking most often is next to the train stations, but much of it is private parking garages...
NORTH KING COUNTY	You need to focus from the core of Seattle (downtown) outward. Start with getting light rail to Ballard and West Seattle, expanding/improving bus service within King County. These are the areas that depend on public transit the most and most willing to not drive to work. After King County has solved it's traffic issues, you can properly expand into all outlying regions (that are the biggest supports of cars anyway). All the plans are great, but the timelines need to be completely reworked so the center of Seattle can still function a decade from now, it's getting scary out there transit wise...
NORTH KING COUNTY	10 years. NOT 25!!!
NORTH KING COUNTY	Ballard - Downtown - West Seattle line should be given greater priority and completed earlier than some of the other projects in the package. Also the line should extend from West Seattle down to Burien.  Supporting pedestrian and bicycle access is important as well as supporting development around transit stations. Also please include studies for a future Ballard to UW light rail line.
NORTH KING COUNTY	I know ST is beholden to regional interests; but you should do whatever possible to get transit in places that need it NOW (Ballard, West Seattle, Redmond, maybe Lynnwood), not build out to park and rides.
NORTH KING COUNTY	ST3 as proposed does not support transportation equity. Please look at benefit-cost metrics. Ballard should be prioritized and it should be grade separated. Remove projects as necessary, streamline city process, and do whatever it takes to move Ballard up. I no longer will take the bus from Ballard to my job downtown as it is standing room only and sometimes they turn you away. There have been several close calls where cars have pulled in front of the bus and the bus has to make quick stops. With people standing on the bus, this is really dangerous. Too many people, not any quality transit.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Light rail to Federal Way needs to be completed much sooner than in 12 years. That 1-1/2 hour one way daily commute on Metro or Sound Transit via I-5 could be mitigated for thousands of riders. Please consider this.
NORTH KING COUNTY	The West Seattle and Ballard links need to be made top priority as King County Metro cannot keep up with demand for transit in these areas. Thank you.
NORTH KING COUNTY	Seattle needs these improvements sooner.
NORTH KING COUNTY	The graham station would be a cheap and fast project to check off the list in a timely manner instead of waiting until the very end
NORTH KING COUNTY	Timeline for getting light rail to Ballard is WAY TOO LONG. 22 yrs? That's a joke! Right? Just look at the 'fun' caused by the Ballard Bridge snafu on 4/18/2016, then tell city residents that the timeline to make improvements makes sense. The backups from the Ballard Bridge shutdown went all the way to I-5 on Mercer.
NORTH KING COUNTY	Ballard and west Seattle are the most important and passenger heavy corridors, it's of utmost importance to complete them first
NORTH KING COUNTY	takes too long to get proposed projects completed. These projects are all long overdue.
NORTH KING COUNTY	22 years for light rail in Ballard? That's a joke. I'm pretty sure I'll be dead before any of this comes to fruition. I have voted for every single transit option for the last 20+ years. I'm shocked at how slow at progress this city is. I stopped even caring about the details. Monorail - fine! (Remember that ballot?) Light rail - fine! Just do SOMETHING other than busses that can't be relied on. London's bus system is like clockwork. Seattle - forget it. Especially if there are 2 buses involved in a route. I'll still continue to vote yes on whatever's put forth - whether it serves me or not - the round and round planning and ballots and such are the biggest waste.
NORTH KING COUNTY	The Ballard line being completed in 22 years is totally unacceptable. I realize there are environmental studies and what not to be done, but the Bertha project was originally supposed to be completed in 2 years (after initial construction). What makes this timeline so significantly longer?
NORTH KING COUNTY	BRT will still be at the mercy of traffic and I do not see it improving things very much. Light Rail on the other hand, with dedicated right of ways, will be much more successful in reducing traffic. I wish light rail were given top priority, then BRT. If the light rail works as is hoped, the need for BRT might be much less!  Please consider moving the timelines for expanded light rail to the top of the list!!!
NORTH KING COUNTY	the timeline to include neighborhoods close to Seattle to connect via link rail is somewhat ridiculous. The Ballard station should be completed way sooner. There should also be stations to Magnolia and Queen Anne.
NORTH KING COUNTY	Project timelines should be decreased to garner greater support. Timelines seem conservative and shorter timelines still seem feasible.
NORTH KING COUNTY	Light Rail to Ballard + West Seattle should be delivered within 15 years. Light rail to Tacoma could be extended to a delivery of 17 or 22 years as it is already served by Commuter Rail.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The current timeline for completion of the Graham Street Station is not acceptable. Our community lived through light rail construction and we have a train running through the middle of our neighborhood but many of us can't access it. If you are elderly, have small children, or any kind of physical disability, the mile walk in either direction puts this excellent transportation option out of reach. We have waited many, many years for a station of our own...another 20 years is too long. The current plan also wastes the \$10 million earmarked for the Graham Street Station in the City of Seattle's transportation package. Transportation projects are expensive; it is irresponsible for the Sound Transit Board to leave that money sitting on the table. Our community is ready to work hard to pass ST3 if we see that the Sound Transit Board is finally paying attention to our needs rather than kicking our project down the field for another 20 years.
NORTH KING COUNTY	Technology is experiencing generational improvements in 6 month timeframes. From that perspective, 25 years is a totally unreasonable timeframe for ST3, as technology will render most of this program obsolete, redundant, and too late to be truly helpful. This program should be refocused on a more realistic horizon, say 10 years.
NORTH KING COUNTY	The timeline is too long and everything should be on the table to speed it up...I'm 59 yo so talking about a project completion timeline of 25+ years is maddening....
NORTH KING COUNTY	We just cant wait that long. We have to figure out how to do this faster, even if that means costing more. \$200/year isn't even 4 tanks of gas. To get support this plan needs to do more, faster, especially within the city which is reaching gridlock.
NORTH KING COUNTY	We need light rail right now. Bus-only solutions will not take cars off the roads.
NORTH KING COUNTY	Too little too slow. Need to figure out a way to do it concurrently rather than staged. Global warming and growth mean we have to move faster on this. Priority should be on moving people between affordable housing (e.g. south) and jobs (e.g. Seattle). Priority should NOT be on parking, or be carpool/car2go parking only. Buses and bike lanes should connect housing with rail. "Transit-associated development" question is meaningless without context, could be anything from affordable housing to a gas station. The question should be thrown out and tall housing and neighborhood services such as grocery/restaurants union/small independent business interspersed with new parks should be built near transit. I support this first step strongly, but it really isn't sufficiently visionary. Whatever plan is adopted MUST allow changing the plan as needs change, but must NOT allow changing the plan to do less, spend more on studies that don't advance transit, etc.
NORTH KING COUNTY	The project list seems mostly good. The timeline is hard to stomach though. The work needs to happen, it's just a real drawback that we have serious traffic issues now, and relief in the form of alternative means of transportation and right-of-way for some of the most congested portions of the area won't be online for up to 25 years. There is also the question on whether some of the projects hit the mark for providing the most cost effective service; absence of a Ballard/UW connecting line; the incredibly long distance the "spine" will run at relatively low speeds relative to the distance traveled; and the use of light rail in parts of Snohomish County where low density housing and low concentration of employment exist (i.e. Paine Field).

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	If the project were to be completed faster, it would garner stronger support. It's hard to be supportive of something that you may not get to use.
NORTH KING COUNTY	We all know this is necessary and that people are going to complain about it no matter what. Just bite the bullet and do it as fast as possible without sacrificing quality. Do whatever you need to do to skip all the bureaucratic nonsense.
NORTH KING COUNTY	25 years is a RIDICULOUS timeline. Why can't something practical be done NOW to help us. By the time this gets done, it will be obsolete as there will be so many more people here. RIDICULOUS planning, just like the stupid TUNNEL project that should have never been approved. It seems Seattle cannot get anything right when it comes to alternate transport. We have enough transport to downtown Seattle, we need BEYOND that to the north and sound sound. Sounder is USELESS, and runs too infrequently. And \$10 tolls on 405 are excessive. I hate living in Seattle now, and am going to move.
NORTH KING COUNTY	First of all, completing these projects is of the utmost urgency. I understand that projects take time, from a permitting and environmental standpoint, but the population growth in our region is outpacing the capacity of our current system. Looking for ways to build these projects faster and most efficiently should be a top priority for Sound Transit. Secondly, access to transit is also extremely critical to making sure this system, as built, would work for a majority of the region's population. Ensuring transit oriented development, density near transit stations and hubs, and expanding access for other modes (walking, biking) is also critical to increasing ridership and transit use. Finally, Sound Transit must also ensure that traditionally underrepresented populations are not marginalized by future TOD, and must ensure that affordable housing be built near transit stations (as well as ensuring small businesses can afford to grow and thrive in these areas as well).
NORTH KING COUNTY	Project is way to slow for Seattle-Based projects. We need relief in our area now. Bus Rapid transit is not a solution unless you implement true rapid. Now if you take the Rapid bus from Interbay to Downtown it takes at least 30 minutes and is, at best, 5 mins faster than the old 15/18 buses. I would rather bike then suffer these buses. The plan is also based on an old style of commuter to downtown type of transit which is not what is happening in our area now with congested traffic everywhere.
NORTH KING COUNTY	12 to 25 years is much too long! Somehow, we need to telescope the schedule down to 5 to 12 years and get moving on simultaneous projects.
NORTH KING COUNTY	Please continue brainstorming and prioritizing stuff that pays off more quickly, such as bus on shoulders etc.  Thank you!
NORTH KING COUNTY	I think a priority needs to be placed on the expansion of the light rail within the city of Seattle to West Seattle and to Ballard. This investment will make the biggest impact for the most people. Investments are underway now in the suburbs north, east and south. It is time for ST focus to shift back to expanding the web within Seattle.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Ballard/West Seattle should move up on the time frame. 22 years later is ridiculous. I am more than happy to have taxes raised and pay for this but I would prefer that Ballard and West Seattle lines be put up first (and would go from being "somewhat opposed" to being "strongly support" on your survey). They will be used by more people and be beneficial for both residents of Seattle and tourists to the city.
NORTH KING COUNTY	As development pressure increases on the urban villages in Seattle, up-zoning and higher densities will be implemented long before the projected light rail and bus rapid transit can accommodate the increased population. With this in mind, it would seem preferable to prioritize light rail extension closer to the proposed areas of highest density like Ballard and West Seattle. Ballard has already seen massive increases in population so to have that portion of the project put near the end of the timeline seems counter intuitive.
NORTH KING COUNTY	Completion timeline is too long. Design/Build quicker
NORTH KING COUNTY	Implementation timelines are still too long, need to shorten up where possible
NORTH KING COUNTY	I strongly, strongly, strongly support the expanded public transportation outlined in this draft plan, however the timeline is laughable and is typical of the Puget Sound region. Ballard and West Seattle won't have light rail for 22 years? Is this an extended April Fools joke? Those areas needed Light rail 5 years ago, the traffic is already so bad, in 5 years it is going to be completely inadequate. This timeline falls grossly short of what this region needs. 8 years for rapid bus lines? We needed them yesterday.
NORTH KING COUNTY	Please, please, please build the light rail faster. A real subway system is the only way forward. Bus rapid transit is a half-hearted stopgap plan. Further, it's very important that we keep the light rail fully grade separated to keep it reliable and fast. Otherwise it will lose popular support. Thank you!
NORTH KING COUNTY	LIGHT RAIL FROM BALLARD MUST BE EXPEDITED!!!! If the Seattle city council really plans to bully through its density plans for lower Queen Anne, traffic is going to be EVEN WORSE than it is now. People from Ballard can barely commute as it is. PLEASE PRIORITIZE THIS PROJECT. IT MUST BE DONE SOONER. Traffic gets worse every day and is going to start really impacting our economy if we can't move in this city. 22 Years is simply NOT ACCEPTABLE.
NORTH KING COUNTY	Would like to see more light rail options within City of Seattle on faster timeline, especially Ballard and West Seattle. This city needs better east-west transit corridors. Ballard needs better options before 2038. Prefer tunnel under ship canal, stations at 15th/Market and perhaps 15th at 85th.
NORTH KING COUNTY	Connections to Tacoma, Everett and other outlying areas should be the priority. West Seattle should also be high on that list. Tunneling from Ballard to Lake Union and downtown is too risky, due to the geography, and too expensive. Also, it would be nice to know what the cost of operations and maintenance of each proposal would be.....
NORTH KING COUNTY	The Ballard line should be completed sooner. It has the best return on investment of any line. It should be grade separated for its entire route to ensure consistent service without delays.
NORTH KING COUNTY	This is much too slow... You need to do better. The population growth in West Seattle is astronomical and the existing infrastructure cant support it!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>Connecting West Seattle and Ballard to downtown should be priorities. Adding parking at South and North Light Rail, Sound Transit and other park and rides should be done immediately to increase capacity, feasibility and usability for riders.</p> <p>Disclosure, I live in Beacon Hill and work downtown and still feel these are the hugest complaints. Lack of P&amp;R parking and the time it takes to get to/from Ballard and West Seattle.</p> <p>Bellevue and Mercer island will continue to fight against mass transit, Ballard, West Seattle are begging for it and cities North/southeast of Seattle need more parking.</p>
NORTH KING COUNTY	<p>I would very much like the plans ACCELERATED, even if it meant higher capital costs. There would be real benefits to ease of commuting and travel in the region, and I believe increased ridership and reduced traffic would offset some of the increased cost, but would be justified.</p>
NORTH KING COUNTY	<p>Project completion timelines are grossly too far out and decades behind the need. Transportation in the Seattle area is already strangling the city. Construction of light rail is tragically slow and expensive and it will be too little, WAY too late. Unless light rail can be accelerated and done at less expense (use standard design for stations?), bus rapid transit is--unfortunately--the only viable option.</p>
NORTH KING COUNTY	<p>I would like to see these projects completed sooner. I would support all of the projects if there was a way to get them on board sooner.</p>
NORTH KING COUNTY	<p>Completing the Ballard and West Seattle light rail in 22 and 17 years from now - are you kidding me!!!! Ballard has taken many times the planned Urban Village density of development and South Lake Union has had millions of square feet of office space added in the last few years. We can expect even more growth in the next few years in the The Ballard - Interbay - South Lake Union corridors with the addition of Expedia and many other tech companies. Transit in these areas is already overloaded during peak hours. How can you possibly justify delaying light rail in this corridor for 22 years!!!!</p>
NORTH KING COUNTY	<p>I completely and strongly support the ST3 draft plan. However, the project duration is over a very protracted period of time. Folks realize the ST3 timeline is built upon financing schedules; nevertheless, it should not take 25 years to build this out. We needed this public transit yesterday. Businesses should pay their fair share, rather than continuing to rely on the usual regressive taxes, such as sales tax and MVET taxes, and continuing to hit property owners with more taxes. Again, realizing that some form of taxes are needed to build transit, why are we not proposing a tax on Puget Sound businesses? C'mon Sound Transit think outside of the box!</p>
NORTH KING COUNTY	<p>Please advance the Ballard to Downtown Seattle Light Rail line! It has great ridership numbers and is very popular among many residents, and there is great demand for higher-capacity and grade-separated transit between these two areas!</p>
NORTH KING COUNTY	<p>FASTER TIMELINE!!!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The time line to complete service to the lesser-served, Southern areas of King County should be dramatically accelerated: 5 years, not 17!!! Secure bicycle parking (cages and vaults) need to be dramatically expanded to encourage multi-modal access to existing light rail in the south end of King County.
NORTH KING COUNTY	It is my opinion ST3 will fail. Seattle residents will not support a tax for a 25 year build out of areas which are already gridlocked today. The timeline must be moved up to convince a homeowner to tax their residence/household so they see the benefit. I can not approve ST3 as written knowing I will retire before the light rail is even online.
NORTH KING COUNTY	It's understandable that there are several challenges to providing better transit services in the Puget Sound Area - but you really need to work on getting work done in Seattle proper ASAP. The current situation is a so far behind the times, not serving the city and the missteps in planning are obvious. Buses should be slowly phased out or reduced in the city and light rail should be put at the highest priority. Ballard NEEDS to be served and served ASAP. Connections must be improved so it doesn't take hours to get anywhere on transit otherwise you'll never get people out of their cars. Good luck. Stay visionary and plan for the future - not yesterday.
NORTH KING COUNTY	So you're saying it's going to take up to 25 years to complete work that we should have started 25 years ago? Better late than never I suppose. Is there any way we could potentially complete these projects sooner? We need these improvements right now! And Light Rail seems to be making phenomenal progress, finishing projects under budget and early. We should be allocating as much money as possible for them as long as they continue this trend.
NORTH KING COUNTY	I would strongly urge the prioritization of the Ballard route sooner than 22 years from now. It would make a huge difference not only to commuters to/from Ballard but to the overall support for the ST3 plan. I am happy and excited to pay for great transit improvements to this region. Delivering the Ballard corridor connection to downtown should be a top priority.
NORTH KING COUNTY	Ballard should not have to wait 22 years for light rail. That's ridiculous and way too far out to plan appropriately anyway. Why is the earliest thing on this plan starting in 8 years?
NORTH KING COUNTY	Sound Move in 1996 promised us 21 miles of light rail by 2006. We got 14.5 miles of it. The rest was finished in 2016 and then called early. Sound Transit 2 promised light rail 2 s272nd st. That was put off until ST3. So far the dates and times of what we vote for are not completed on time. Then you pay someone to lie and say it is early. [explicit]. What is my guarantee that all projects will get done on the dates you put forward? So far you are 0 for 2 no matter how the lawyer language justifies it for you. If you cannot be honest on these 2 things, I cannot trust you with my money. I support kass transit, but I don't support the lies coming out of Sound Transit employees. I am undecided whether I will vote for it due to Sound Transit not being honest and telling the public the truth.
NORTH KING COUNTY	How can Ballard be last to be completed? Someone's hitting the sauce if they think that's a good idea. Ballard first would be more like it after what the city has done to our community.
NORTH KING COUNTY	Timelines for these projects are absolutely insane. If Light Rail doesn't expand significantly in the next five years, the city is going to implode. Focus more on more transit options within Seattle to suburban areas rather than making it easier to travel from Renton to Bellevue.

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Honestly, we should come up with the money to accelerate the timeline. Seattle's population will continue to explode over the next few decades because it is relatively protected from macro economic downturns and climate change. Even with these new transit options, our system will be stressed.
NORTH KING COUNTY	This plan is ambitious and attainable. I commend you for that. However, 25 years is much too long if you hope to persuade voters to pay for it. You should consider cutting that time i two.
NORTH KING COUNTY	I no longer have any desire to help you fund these projects. I waited years for Seattle and surrounding regions to 'grow up' and have options that weren't horrible bus service. I salivated at the prospect. This never happened, and where it did eventually happen (the Central District) I didn't live there, so did not benefit. I've seen car tabs increases with no benefit (remember the Monorail?), and then new car tabs increases to fund the only thing you do seem to be able to figure out - busses. I don't plan on being interested in light rail in '25 years' especially considering Seattle cannot complete any major improvements on time. Consider me 100% opposed from a financial standpoint.
NORTH KING COUNTY	Traffic congestion will not be improved unless public transportation is outside of traffic (dedicated lanes, under/over ground, shoulders, etc). This must be a part of any plan.
NORTH KING COUNTY	Light rail should be expanded sooner -I do not object to the taxes but do object to the timeline. Completion should be in 20 years,Denver can do it why not here?
NORTH KING COUNTY	This is far to slow in comparison to what is needed, time table should be half of what is projected. Construction and planning need to be accelerated on all projects.
NORTH KING COUNTY	The light rail to Bellevue should be prioritized over increased bus service. Rail is cheeper in the long run, so should be brought on-line first to maximize savings. Also, a fuel tax makes more sense for funding than a general sales tax. Let's push drivers onto buses.
NORTH KING COUNTY	Given your track record of completing projects and over spending money I don't really have any faith that you'll deliver what is being promised
NORTH KING COUNTY	I think adding more light rail is necessary, but the timeline should be shortened where possible given the rapid growth of the region.
NORTH KING COUNTY	As a fourth generation native and 45 year resident of Seattle - It's About Time. That said, if there's anything that can be done to speed up completion of these projects, please get on that. Thank you for the opportunity to provide feedback.
NORTH KING COUNTY	The high-ridership lines - like Ballard - should really be completed with a shorter timeline, if at all possible. It would be useful to be clear and have a positive plan about how to save time and focus on the projects that will make the most difference for the largest population.
NORTH KING COUNTY	Would love to see a COMPLETE lightrail system connecting all along the corridors.
NORTH KING COUNTY	It is not okay to make Ballard wait that long for light rail. Ballard is growing at a breakneck pace and we simply can't handle the traffic increase without more transit options.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	It all looks great. I wish we could have more light rail lines. I also hope for Ballard light rail to come sooner than 22years! Ballard is growing insanely fast. We need light rail the soonest in 12 years not 22 years. Why is light rail to Redmond/Federal Way going to be done first?
NORTH KING COUNTY	Ballard and West Seattle need to happen first. Mass transit is most effective in the densest population areas. I support building as much as possible, but the order matters. Also, parking should be priced similar to the tolls on are highways, not free. Parking structures should not displace transit-oriented development. Cut and cover, a la Boston Common parking garage. Pay for the increased expense with the parking fees.
NORTH KING COUNTY	Every effort needs to be taken to make the light rail within Seattle, including the West Seattle-to-Downtown-to-Ballard segments, operational at a much faster time frame with years knocked off the schedule and not just a few months. Projected population growth and general growth within the city demand that these projects be completed sooner.
NORTH KING COUNTY	I understand that the busses are cheaper. But if they slow down the real solution of getting more people off the road. That does not seem worth it. It seems if we could add road or rails that would be great. But it sounds like we can't. So instead of adding more vehicles to the roads we should build transport that can navigate the city on a schedule that can avoid traffic and be competitive on travel times.  Sure the link is convient. But so is someone picking you up or using uber. And the link takes longer.
NORTH KING COUNTY	Please make it all happen sooner, rather than later (over 25 years)!!!
NORTH KING COUNTY	Traffic is already an extreme problem in Seattle and the surrounding areas, with the exponential population increase it is only going to continue to get worse. Twenty-five years before the light rail is finished is absurd concerning the traffic issues.
NORTH KING COUNTY	The city has allowed so many condos and apartments to be built in Ballard and yet we are one of the last projects to be completed. It seems that Ballard and its many new and existing residents really don't count in assessing the need for a better way to travel from Ballard. I have lived here for over 70 years and every time something is proposed, we always seem to be at the bottom of the list and something always happens that the money earmarked for this area is used for another project that has gone over budget. I cannot vote for these proposals.
NORTH KING COUNTY	should be pushed to happen much faster with several sections built in parallel
NORTH KING COUNTY	Light rail serving the denser parts of the metro area, Ballard and West Seattle, should absolutely be prioritized. The highest ridership and most benefit will come from these areas, which are closer in proximity, which means less rail miles to be built. These areas are also chronically congested. 17 years to West Seattle and 22 years for rail to Ballard is outrageous. People will not support such a large tax increase for service they will not be able to use for decades.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I do really support this plan, but it leaves some very important aspects on the table - not including a much needed line between Ballard and UW and leaving the most traffic-burdened corridors until very late in the plan. I know that everyone wants "their" line to be first, but to get voters onboard, they need to feel like they might see at least some of what they want within their active lifetimes. Believe me, I lament that this wasn't all voted for back in 1969/1970, but still, couldn't one or some Seattle-proper lines come online in closer to ten years rather than twenty? Within the city is where traffic is soul-crushing for the most people for the longest, and by the time even some of those lines come online, aren't we expected to have a million more people?
NORTH KING COUNTY	I am strongly in support of many of the ST3 projects, but I would like to see them come online more quickly, if possible. My household is willing to contribute more financially each year if it means being able to conveniently access more parts of Seattle and the region using public transit. We don't own a car, and we consider all tax contributions toward public transit to be worthwhile investments that support this lifestyle.
NORTH KING COUNTY	The Graham street infill station should be completed much earlier than proposed. There are no new tracks to build and this would provide an immediate benefit for the in-city residents who were promised this station many years ago. This is also a project that would benefit a largely minority population where other projects will not. It shouldn't take 20 years to build a new station.
NORTH KING COUNTY	I'd like to be able to use light rail before I retire...the time estimates are ridiculous.
NORTH KING COUNTY	The Ballard link and other timelines are outrageous. While initially on board with the idea of ST3 I no longer support it. I'll be in a home before I could enjoy it.
NORTH KING COUNTY	I think clarifying when taxes would increase would be good. Would they ramp up slowly over time, would they be implemented immediately? Thank you for your work.
NORTH KING COUNTY	We need to expand and move deadlines up to go online sooner than 15-20 years down the road. The Seattle population has exploded and we are now behind the explosion. Can't we move faster than this?
NORTH KING COUNTY	The timeline is disappointing and frustrating
NORTH KING COUNTY	This timeline is far too long. We need a much more rapid process to built a more robust transit system that can accommodate our population growth.
NORTH KING COUNTY	25 years is ridiculous. If the reason for the slow movement is funding then start lobbying or something. Jesus. 25 years? What a joke.  Putting a rail between Ballard and the U-district is extremely important. Lets make our city one that isn't a nightmare to live or get around in.  Dedicated railways is the most important thing for faster travel times. Having a rail share the road with cars is pointless. Traffic in this city is terrible. Why would I take public transportation here? It is never faster, cheaper, or more convenient than driving.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Please do everything you can to speed up construction of Ballard light rail and bus on shoulder opportunities. I'm a staunch transit supporter but if the Ballard schedule isn't brought forward and made a higher regional priority, I may not support ST3. It is probably the most important segment in the entire ST3 system as far as number of people in the region it will benefit.
NORTH KING COUNTY	This is far too slow. I know environmental impact studies and bridges and tunnels aren't things that can be completed overnight, but I'd be willing to pay substantially more to halve the timelines.
NORTH KING COUNTY	West Seattle Rail sooner would be better.
NORTH KING COUNTY	I generally support the plan, but we need these improvements much sooner. I also think automobile users should pay a larger share of the plan, instead of sales tax. Place tolls on the freeways that need congestion relief and have those users pay.
NORTH KING COUNTY	Complete the light rail sections FASTER. Duh.
NORTH KING COUNTY	Having lived in Pittsburgh, D.C., and NYC, and relied heavily on rail transportation in all three, I strongly support this plan. It should have been done decades ago, but I graciously support this plan to build it now
NORTH KING COUNTY	Light rail should be built much faster than this plan purposes! When I think about the Washington DC metro area and how quickly they add a whole new line/color to the metro system, I wonder why we can't do that here.
NORTH KING COUNTY	Light rail to Ballard and West Seattle should be completed sooner.
NORTH KING COUNTY	I realize construction takes time, but 20+ years feels completely intangible. By then, who knows what the economy, housing market, and accordingly, traffic, will look like then.
NORTH KING COUNTY	We have gridlock everywhere, we have especially bad gridlock getting out of Seattle neighborhoods to downtown. 17 - 22 years for lightrail to West Seattle and Ballard is too long
NORTH KING COUNTY	More priority should be given to projects within Seattle, such as building light rail to Ballard and West Seattle from downtown. Waiting 17-25 years for these routes is too long!
NORTH KING COUNTY	Ballard to Downtown needs to be sped up
NORTH KING COUNTY	Please prioritize investments in more buses in the near term. A lot of benefit can be added relatively quickly (especially compared to a lot of the timelines proposed in ST3) by increasing bus service.
NORTH KING COUNTY	As fast as possible. This is all VERY NECESSARY to Seattle's evolution as a happy and healthy home for humans & the environment.
NORTH KING COUNTY	22 years to get to Ballard? Absurd, get it done now.
NORTH KING COUNTY	Expensive project that will be another burden for the already high cost living in the city. Previous taxes already imposed on mostly home owners are being ignored and adding more taxes to over taxed homeowners seems unreasonable. The city and dot need a better management of the resources and fund available now to sustain our lifestyle. Not every election year has to be an avenue to ask for more taxes that only selected group of people mostly home and car owners have to pay for the good of all! Thank you.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Please try to speed up the Ballard line. This is an incredible opportunity for our city and there has to be a way to make this possible.
NORTH KING COUNTY	Seems expensive and the timeline is too long. I'm only 43 but by the time I see improvement in my neighborhood I'll be retired.
NORTH KING COUNTY	Ballard + West Seattle sooner
NORTH KING COUNTY	More incremental delivery of various stations and stops. This is all taking way too long.
NORTH KING COUNTY	Addressing transit region-wide is highly important however this timeline is painfully slow given how far behind we already are. Scope of plan should be reduced with priority to light rail and capital improvements to improve the speed of existing bus lines before adding new.
NORTH KING COUNTY	Needs to happen faster. Stop giving corporations tax breaks so that we can afford to do more sooner. This tax structure is THE MOST REGRESSIVE TAX STRUCTURE IN THE US. You're relying on sales an property tax? Jeff Bezos gets to move his operation downtown and we have to pay to support it? The jobs he creates are for people he's bringing to Seattle, not for citizens already here. This is madness.
NORTH KING COUNTY	25 years is a long time considering the amount of groth in the region. The timeline should be shortened.
NORTH KING COUNTY	Way too slow. A 25 year timeline is unacceptable. \$50 billion spent over a quarter century? I can hear the office drudges at ST now, "Hot damn! I get to diddle around in meetings for the rest of my career! Sweet!!" Hey maybe we should form a task force!  Oh, and stop building stuff for cars! Good grief.
NORTH KING COUNTY	The timelines are completely out of phase with reality. Either speed up the timelines or forget the plan. Most of the present potential riders will be dead before the projects are operating. Taxpayers alive today will be asked to pay for projects they will never use in their lifetime. People are too smart to pay for years for transit improvements they will never use.
NORTH KING COUNTY	25 years is too slow! Make it 10!!!
NORTH KING COUNTY	Projects need to move faster. Stop investing in lame street cars nobody rides.
NORTH KING COUNTY	The Ballard -> Downtown line has the highest expected rider counts and should be completed ASAP. Bolstering revenue early on can make larger projects more palatable to the public.
NORTH KING COUNTY	The sooner the better! I am particularly interested in the spur to West Seattle because we would like to be able to travel by mass transit to Capitol Hill and the University of Washington, not just downtown.  Also, I've marked "don't know" for many of these projects. That doesn't mean I'm opposed to them--just that I don't know enough about their transit conditions to make a good judgement. Overall I believe more mass transit for all areas of Puget Sound is better.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I think West Seattle needs to be more of a priority. There is so much growth/construction in the area and transportation is already really difficult during commuting hours and will just get much worse.
NORTH KING COUNTY	Everett light rail needs to be accelerated. In 25 years, will Boeing still be there?
NORTH KING COUNTY	Question 12 does not capture the range of possible answers because it is worded poorly to clearly determine what you are asking. I would strongly support the plan that would take 25 years IF THAT IS THE ONLY POSSIBLE PLAN. If there was an ALTERNATE plan that moved up those timelines, I would support THAT one more and ST3 less.
NORTH KING COUNTY	The connection to Ballard needs to happen sooner! I live downtown and rely on public transportation, Ballard is such an important part of the city that I wish I was able to spend more time in, but the time it takes for me to get there on the bus is unreasonable. I can't even imagine residing in the neighborhood and having to get to work in downtown Seattle everyday. But my biggest problem is that it's unfortunate for a part of the city that is a major cultural hub to be so hard to get to.
NORTH KING COUNTY	Focus on getting Ballard line done in 10 years. BE AGGRESSIVE about solving transportation in Puget Sound!  Also, add a Ballard to UW line into the plan. We need cross-town service ASAP.
NORTH KING COUNTY	I moved to Seattle in 2008 and appreciate the mass transit solutions that have been added since I've arrived. While I recognize that adding busses may be faster and easier, I'd love to see the timelines pulled in. Prior to living here, I've lived in many other areas and am a bit proponent of rail lines. Until the 1940s/ 50s, Seattle had an impressive network of rail, cable and other transit systems. Is there not a way to leverage any of those tracks? I'd love to see the timelines not just pulled in, but once agreed upon, executed property without the added time and expense of exhausted debate. In short, I'd love to see stronger civic planning here. Thank you to the ST3 team for pushing this initiative forward. If it could be broadened / accelerated, that would be awesome.
NORTH KING COUNTY	New lines should be added from the core out, that is, where there is the most demand and support: Ballard and West Seattle FIRST. I will not vote to support ST3 if those lines remain last in line.  Secondly, too much emphasis on property taxes. As a middle class voter, I am tapped out on levies, etc. that increase my property taxes.
NORTH KING COUNTY	As a Ballard resident I strongly feel Ballard Rail should be prioritized for several reasons: heavy ridership potential; upcoming negative impact of 99 work when the tunnel is put in place; major capital projects needed so should be started earlier, not later
NORTH KING COUNTY	Put Ballard first for the light rail. Come visit and look at the rapidly increasing density - and it is not going to stop. There are many old homes and buildings which are sold weekly and torn down and replaced by 3-6 units per lot. Often with no parking. Traffic is a nightmare. Also, get the people at Salmon Bay to let the Burke-Gilman continue down Shilshole. There is no better solution for the safety of the many bikes traveling that route every day.
NORTH KING COUNTY	a) speed up the Ballard line b) make it grade separated and not at the mercy of boat traffic in the ship canal c) Ballard-Fremont-UW light rail route should be funded

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The region needs massive investments in mass transit NOW. 22 years for light rail to reach Ballard and 25 years to reach Issaquah is too long given the current state and the rate of growth.
NORTH KING COUNTY	The amount of time you have laid out to complete these projects is absurd. By the time you complete a 1/4 of it, we are going to need a NEW plan to deal with continued growth of people moving here. You have GOT to get these projects completed sooner. I don't understand why you all don't understand that. It can be done.
NORTH KING COUNTY	Ballard timeline - too long of timeline - Ballard has waited and waited and waited - timeline is TOO LONG - I'll be dead and kids will be grown up and gone by the time it opens in Ballard. Please prioritize Ballard ahead of these others on the list.
NORTH KING COUNTY	This is WAY too slowly coming, speed this up make it happen!!! 25years, really???
NORTH KING COUNTY	Build Ballard-West Seattle LRT sooner. Surely Sound Transit could re-purpose the subsurface explorations, engineering, and planning that was done for the aborted Seattle Monorail Project to increase delivery speed? Or if cash flow is an issue, couldn't the most expensive and risky parts of the project (like the new downtown transit tunnel) be replaced with elevated or at-grade rail?
NORTH KING COUNTY	The Ballard to Seattle line should be a higher priority. With the rate that Amazon is growing, that is what is causing most of the traffic issues downtown. A comprehensive public transit option (other than just buses) needs to put in place urgently -not wait 22 years!!
NORTH KING COUNTY	All projects should be done in parallel, all regions pay taxes at the same time, so all regions should benefit at the same time as well. [name], West Seattle
NORTH KING COUNTY	Too damn long. 22 years to get to Ballard? Seriously?
NORTH KING COUNTY	The west seattle and Burien lines should be a higher priority, completed sooner and there should be additional line between the two.
NORTH KING COUNTY	Probably heard this before, and probably I'm preaching to the choir, but we need a stronger light rail system now.
NORTH KING COUNTY	So I reverse commute from South Seattle to Issaquah in my perspective train service to Issaquah seems a natural low hanging fruit so long as we are going to Bellevue/Redmond next off I-90  Then there are 1st and last mile considerations. I live a Mile from the Columbia City Station. But my commute has me parking at the Mercer Island Transit Center. Why is that? Buses from my home Metro 50 are not reliable enough and do not coincide with the train schedule and the 554 does not run out to Issaquah enough to allow for a missed train. Then when I get to Issaquah the 200 which was the last mile for me and all the other riders does not run till 9 am and stops at 3 PM I work for Costco Corp at the Microsoft Campus. There are Literally thousands of commuters who are poorly served by that transit center due to having to rely on poorly thought out schedules.
NORTH KING COUNTY	22 years to complete light rail for Ballard connection is unacceptably long.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Projects should be funded primarily through fare increases and fare enforcement. Each component of ST3 should be broken out and proposed as individual projects, rather than one giant project that will take 25 years to complete.
NORTH KING COUNTY	<p>Build things in the order that provides the most benefit to the most people. Use ridership as the primary selector for construction priority. Then, use the early revenue from these highly used lines to build other lines.</p> <p>Ballard to Downtown should have a grade separated crossing of the canal -- no drawbridge. Do not repeat the errors of the Rainier Valley Light Rail corridor, which runs at what feels like 5 MPH and frequently gets passed by cars in traffic. If the light rail train can't average 50 MPH+, it won't appeal to users in the same way.</p> <p>"The Spine" is important -- but so are the "vertebrae," to continue a terrible analogy. Build a line from the station in Ballard heading east to the upcoming station on Brooklyn in the U District. This connects further east to Husky Stadium. From there, build light rail going all the way across the new 520 bridge through northern Bellevue and on to Redmond. We already have two highways that go north-south. What we need is a way to go east-west anywhere north of Lake Union. Currently there's no good options -- all available streets are arterial at best.</p> <p>Connecting Seattle and the Bellevue via reliable, fast, comfortable light rail will transform the region. Do you honestly think connecting one suburb to another suburb is more important than connecting two downtown cores?</p>
NORTH KING COUNTY	You need to complete this project right now. If you wait 20 years to complete it, you will be meeting today's needs 20 years too late. It will be a total disaster if you delay completion that long. Additionally, consider options to remove buses from automotive roadways, those things just plug traffic and add to the congestion while providing little in the way of tangible benefits. Keep them on separate roads and paths if you must have them, but they should be pulled from the regular city streets. Also, please consider joint projects with WSDOT/King County to provide increased water taxi parking and services to West Seattle and Vashon. Maybe a bridge to Vashon would be the most cost effective solution in order to eliminate the need for four new ferries to service that place (since I am pretty sure the average age of the boat fleet is about 50 years old right now).
NORTH KING COUNTY	Make as many transit stations and lines as possible as quickly as possible. Dragging it out will cost more in the long run -- our roads cannot take any more traffic, it's getting dangerous (look at the number of accidents occurring every day) - it's bad for the mental health of residents in this city. Not having proper transit and sitting in some of the worst traffic in the country reduces productivity.
NORTH KING COUNTY	Should have been worked on a long time ago!
NORTH KING COUNTY	Cost should be pushed out to property tax and time frames of project should be shorten. We need light rail now!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Having lived in both West Seattle and Ballard and used transit serving both neighborhoods, I feel Ballard is in much greater need of effective, timely transit to downtown. Bus service from central West Seattle to downtown takes ~12 minutes, whereas from Ballard it takes anywhere from 25-50 minutes depending on time of day. And, West Seattle has direct, efficient access to I-5 and SR 99, whereas Ballard is more removed from both these corridors.
NORTH KING COUNTY	Build West Seattle light rail 1st.
NORTH KING COUNTY	Need light rail between Northgate and Boeing Everett site ASAP!!!! No viable bus service for daily commute on 1st or 2nd shifts
NORTH KING COUNTY	West Seattle has been largely ignored and our current and unbelievably robust construction of apts and condos will only make everything worse in this area. The C line helps, but we need relief before the 17 year timeline. We own a house and will be taxed but as we are retired, we will pay but won't benefit from these plans. Transport from west Seattle to downtown and the airport are crucial!
NORTH KING COUNTY	The plans for light rail to Ballard and West Seattle are critical and must not be delayed. These area are heavily developed, becoming very densely populated, and lack sufficient infrastructure. Internal transportation must be a high priority to lessen gridlock and make it possible for easy and fast transport within the city.
NORTH KING COUNTY	You need to provide a better explanation as to why it will take you this long to complete these projects and what drove your execution priority. There are cities in other countries (which we consider as developing) that build longer lines of heavy rail faster than it will take you to put in place new BRT routes.
NORTH KING COUNTY	The greater Seattle area is overdue for a mass transit rail system that connects critical parts of King County. The rail projects should be accelerated and completed as soon as possible to help relieve road congestion. We are already decades behind, especially with the growth this area is continuing to see. We can't wait 25 more years for these projects to be completed.
NORTH KING COUNTY	It can not take 17 and 22 years to connect west Seattle and Ballard. These need to be top priority. Bertha is not going to complete the 99 tunnel project anytime soon. You should get funding from that project and use it to connect the city in a way that really makes sense for our growing population.
NORTH KING COUNTY	Why in the world would it take 8 years to complete BRT? It won't even be helping my area.
NORTH KING COUNTY	1. I don't live in either Ballard or West Seattle, but I feel strongly that people who do live in those areas should NOT have to wait so long for improvements, ESPECIALLY since they are being robbed of the Alaskan Way viaduct that helped move traffic to and from those areas, and bus service has always been SO SLOW to Ballard, at least. 2. Parking at rail stations is ESSENTIAL. Many of us live in suburban neighborhoods and cannot conveniently walk to transit routes. If you want us to use public transit, you must provide parking at major stops. Also, stop making it so hard to use a car in this town. Projects such as taking away a downtown parking place and making it either restaurant space or a "parklet" are the DUMBEST ideas anyone on this earth has ever come up with.
NORTH KING COUNTY	Let's get all of these done in a faster timeline. Please share in the future how the timeline is estimated. Why does it take 17 years to build to Tacoma? Why does it take 22 years to get to Ballard? Thank you!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The time line is way to far out i cannot support it if it cannot all be finished in a ten year time table . The plan is amazing all i am against is how long it will take to finish.
NORTH KING COUNTY	Ballard needs it WAY faster than 22 years!! Public transit needs to get ahead in this neighborhood that will be busting at the seams.
NORTH KING COUNTY	Since most newcomers choose to live in Seattle, and no freeways serve them, the Ballard/West Seattle light rail should be the highest priority. Seattle residents should be given the opportunity to be taxed at a higher rate to see that this happens first.
NORTH KING COUNTY	The expansion needs to be done at a more rapid pace.
NORTH KING COUNTY	Since you are financially limited to how much you can take in, why not let people choose to pay more earlier to get a reduced rate over time. That way, if the residents of the region want to see it happen faster, they can do so by paying more upfront. you could even show at 3 different schedules and some possible breakdowns of how the 3 groups of residents in the region would split on the choices, how much sooner the timelines could be reached. 5 years sooner? 10? the topic has to be handled carefully, it could scare people, but as long as it is clearly opt-in, why would I care if other people choose to pay more.
NORTH KING COUNTY	My responses are generally based on where I'll be living in this upcoming year. But according to the timeline, it will take 22 years for the improvement to that location to be completed. It seems that it would be hard to get meaningful data given the scope of this timeline.
NORTH KING COUNTY	There is no reason this time line cannot be expedited. Otherwise cities add new lines each year; not over 20 years!!!
NORTH KING COUNTY	Seattle is already so far behind other cities; ironic, considering Seattle has a reputation for being a green, environmentally-aware city. Everyone I know here, however, travels mainly by private vehicle. I lived in Washington, DC for 8 years before moving here to attend med. school. I was 1 of only 2 people I knew who lived in the city who even owned a car. Some people I knew there had never owned a car in their lives. As soon as I graduate from med. school, I plan to move myself & my degree to a real city that has a robust, widespread pedestrian layout & public transportation system. If Seattle wants to retain young professionals who are going to pay high rents & keep a high degree of education, professionalism, culture, & expendable income in the region, it needs to complete these public transportation projects as soon as possible to catch up with the real definition of the word city. Also, no one cares about buses. Unless they have consistent, widely available bus-only lanes that can reliably bypass rush hour traffic, the bus is a joke. Rail surface can go under or around traffic jams. Buses can't. I'm not going to take the bus when it takes 2 hours to get to a destination that's not far away. Buses: Literally, ain't nobody got time for that. Thumbs down for buses. Thumbs up for rail.
NORTH KING COUNTY	Light rail to West Seattle and Tacoma should be higher priority than Redmond and Federal Way.
NORTH KING COUNTY	I wouldn't use "urgent" and "25 years" in the same sentence.
NORTH KING COUNTY	Light rail to Ballard 22 years is unacceptable. This needs to happen sooner. There also needs to be a Maple Leaf station.

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Waiting 22 years for light rail to Ballard is ridiculous. Why can't more projects be executed concurrently?
NORTH KING COUNTY	Ballard is bursting at the seams. 22 years is ridiculous! 5 years would be a long wait, but probably unavoidable. More than that and Ballard will have to adopt a car culture that could be avoided by faster action NOW.
NORTH KING COUNTY	I feel that completion of light rail to Ballard should be given a higher priority and an expedited timeline. 22 years is too long, the ridership estimates are very high for this proposed line, and I would urge you to adjust the timelines to build the Ballard link within 10-15 years instead.
NORTH KING COUNTY	22 years to deliver light rail is too slow
NORTH KING COUNTY	I think the West Seattle link should be prioritized; it's very needed
NORTH KING COUNTY	Please, quadruple the tax, but compress the timelines. 25 year development plan is outrageous. If necessary, find contractors, who can build a provably reliable service quickly. If necessary, get them abroad. Perhaps, international project competition would do best.
NORTH KING COUNTY	I would completely support the light rail to Ballard project, and am happy help pay for it; HOWEVER, if that project is prioritized at the end of the list and would take 22 years to complete, it would be of absolutely no benefit to me since at that time I would be retired and no longer have use for light rail for commuting. Please, please, please consider moving the Ballard project up in priority order. There is an insane amount of new apartment/condo construction with absolutely no consideration of how to move people in and out of the city.
NORTH KING COUNTY	To put both Ballard and West Seattle so far off in the future is a great disappointment in this plan. Why not get these smaller sections done sooner so our city traffic can flow more smoothly. So many huge apartments are being packed into these two areas, without proper thought being given to transportation for the occupants to their downtown Seattle jobs. In West Seattle, thousands of apartments are being built, the residents will all have to cross the West Seattle Bridge! No high tech jobs are in West Seattle, it's basically a bedroom community.
NORTH KING COUNTY	25 years is too far out, the rate of population growth is at its all time high now, not in 25 years. The city's economic growth rate is being crippled by the current transportation infrastructure. Time is of the essence, the rate of economic growth of the city and surrounding neighborhoods and surrounding cities are being directly impacted right now by how fast we can get this plan implemented. This is a wave of economic growth that the Sound could ride for decades to come and be as big as other major cities like New York, but 25 years might be a bit late - we don't want to miss this wave.

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I don't think it is fair to charge the residents of Seattle that significant of an amount each month for 25 years before they see any solution to their transportation woes. I think either a new timeline needs to be addressed, especially for the projects that are closest to the city right now. There is no reason why Ballard and West Seattle should take that long. If we eliminate the commuters in this area from taking their own cars by providing them reliable and efficient transportation, this will alleviate a significant portion of the traffic. It is my suggestion that West Seattle should be first on the list, since the Vashon ferry traffic as well as the traffic from all the new multifamily buildings has exponentially increased and will continue to do so over the next five years. Ballard should follow alongside, being that 15th is already gridlocked and a major company plans to move in whose employees do not live nearby since it was previously in Bellevue and will need to commute in to the area.
NORTH KING COUNTY	Projects should be prioritized by their reducing car traffic in highly congested areas.
NORTH KING COUNTY	This infrastructure should have been installed years ago. We must use whatever means necessary to expedite this process or the region's transportation system will be gridlocked and unbearable to contend with on a daily basis. Get moving already!
NORTH KING COUNTY	Traffic is horrendous in Seattle and getting worse by the day. It seems absurd that West Seattle would have to wait 17 years to get light rail - and I'm sure all other areas of the region have the same opinion. Start all the light rail projects now.
NORTH KING COUNTY	These plans are taking too long to build. We need to deliver within 10 years maximum and expand as we go. We also need to make sure that Sound Transit is developing pedestrian and bicycle access to the station areas and providing secure, covered (preferably supervised) bike storage at stations.
NORTH KING COUNTY	A 25-year timeline to complete light rail to Ballard is unacceptable, particularly considering the pace of residential development in that neighborhood.
NORTH KING COUNTY	New construction is happening all over the city, but especially in West Seattle. The West Seattle Bridge won't be able to handle the traffic during commute times - it is struggling now as it is. I really think that the West Seattle/Tacoma light rail expansion should happen sooner than 17 years from now.
NORTH KING COUNTY	Timeline far too long-needs to be completed asap
NORTH KING COUNTY	Coming from Chicago and an incredibly robust public transportation system, I was incredibly disappointed moving to Seattle. I immediately purchased a car when moving here and living inside the City limits and only 10 miles from work. It was necessary in order to be able to reliably get to work and move around the city. Prioritizing more transportation for those living in Seattle communities is important. Many individuals are trying to limit vehicle use on a daily basis, but the way in which transportation is set-up, it's not reliable and people with commutes less than 10 miles, are often stuck with an hour plus commute during evening rush hour--waiting for buses, inefficient routes, wrong size buses operating during rush hour times. People would rather pay to drive on a daily basis, often high garage or parking fees, in order to get home on more efficient and reliable timeline. I think solving this problem can be critical.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Light rail to Ballard!
NORTH KING COUNTY	All possible efforts should be made to make the completion dates significantly sooner. The traffic congestion in the I-5 corridor is out of control but people do not have good alternatives. Priority should be finishing the light rail line from Lynnwood to the airport because that stretch of I-5 is the worst. It's amazing that Seattle is so far behind other cities in mass transit.
NORTH KING COUNTY	Should do the seattle light rail expansion faster. People will pay.
NORTH KING COUNTY	I wish the lightrail to Ballard would be moved ahead in the timeline. I take the bus multiple times a day and it's usually quite crowded and takes a long time to get anywhere. It's a rapidly growing neighborhood with mostly commuting residents. It shouldn't take an hour to get between Ballard and Capital Hill!
NORTH KING COUNTY	400,000 people from Snhomish County commute to Seattle every day- focusing on the Everett line makes the most sense and then build out the feeder lines.
NORTH KING COUNTY	Friends in Ballard are complaining about how long it will take but it seems 1) they have options with improved Rapid Ride, 2) Ballard is almost self-contained with the volume and variety of amenities within walking distance, 3) reducing traffic overall means getting the suburbs better connected first
NORTH KING COUNTY	The sooner we get started on this the better!!
NORTH KING COUNTY	Any way to make ST3 happen faster would be strongly supported by me and most people I know, even if it makes it cost more.
NORTH KING COUNTY	ST3 should focus on bringing light rail to Ballard and West Seattle before the east side - the ridership numbers from just the U-Link extension show how much pent up demand there is within Seattle for light rail service within the city. ST3 should encourage mass transit that replaces the need to own a car, light rail service to the east side doesn't remove anyone's need to own a car if they live there.
NORTH KING COUNTY	I think you know that its ridiculous to wait for these initiatives to be done in 25 + years- the population will quickly make even these projects too small scale to deal with transportation needs.
NORTH KING COUNTY	If you moved up the timeline of creating a light rail from West Seattle to downtown and from Ballard to downtown and made these two projects the top priority, I would be willing to pay even more in taxes.
NORTH KING COUNTY	Costs of taking the ST should be reduced and have discounts for people who take the ST for transportation to school or to work.
NORTH KING COUNTY	move timelines up!!!!
NORTH KING COUNTY	Project development is TOO SLOW. I'd gladly double what you collect from me to \$400/year if you could cut your project horizons in half. We need mass transit NOW--too much growth, and transit is not a great option for many people. Why take a 45-50 minute bus ride from home when one can drive, park, and be in the office in less than 30 minutes? That rationale will still hold true if traffic increases from places like Ballard. Bus options will still be tied up in traffic, just like cars.
NORTH KING COUNTY	Seattle is the most congested. Please fix it first.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Is it possible to do Ballard light rail earlier? Otherwise, supportive of all.
NORTH KING COUNTY	The timeline is incredibly far out. 17 years to West Seattle? 22 years is too long for Ballard. Everett 25 years? I think that inner Seattle first and then up to Everett would be a better priority. Is it starting with Bellevue due to \$? What can be done to cut the timeline in less than half?
NORTH KING COUNTY	Connection to Ballard should be a higher priority.
NORTH KING COUNTY	25 years is just ridiculous - sell bonds and come on line in 10 years!
NORTH KING COUNTY	West Seattle is in dire need of something other than the bridge. One accident cripples the entire commute. We need something out here now.
NORTH KING COUNTY	Would it be possible to complete these projects sooner than 25 years?
NORTH KING COUNTY	The quicker you can get me from downtown Seattle to areas that have horses, the better.
NORTH KING COUNTY	The timelines for these projects are very long. Perhaps focusing on the most urgent 2-3 projects to be completed in the initial 8 years of the 25 year timeline would probably garner more community support and alleviate some of the congestion problems.
NORTH KING COUNTY	Ballard is growing rapidly and already has problems with traffic, overcrowded buses, and buses that are too full to pick up more passengers. I would strongly support any efforts to accelerate transit improvements for Ballard (particularly light rail connections to downtown).
NORTH KING COUNTY	This plans for this project are not quick enough. Traffic is getting worse and we absolutely need to accomplish the light rail plans quicker. There needs to be a better plan to get the money faster. I want this but with it taking so long, I recommend further reviewg the financing options to accomplish the overall project earlier than 20+ years from now.
NORTH KING COUNTY	If you stopped focusing on buses would you be able to get the light rails done sooner? Also, Boeing employees tried to get a service through the company from Seattle to Everett and we were told we couldn't do that because Boeing was working with the city bus system. All I know of is a 2 hour bus in the afternoon that stops way too many times to make it worth it for me to take.
NORTH KING COUNTY	Please get Ballard and West Seattlev served soon.
NORTH KING COUNTY	Get it done in less than 25 years.
NORTH KING COUNTY	Far too slow!
NORTH KING COUNTY	I would be more supportive if it was a shorter schedule for completion.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>Conceptually I support transit, even though I rarely use it myself. I believe it is very important for the overall health of our region. I would use it if it was easily accessible to me, but it sadly is not. However, I strongly feel that raising property taxes in Seattle (again) to support this program is unfair and not the right way to go. If you use Seattle property taxes to pay for a transit system which serves people from all over the region (many of them who will not be paying via their own property taxes), you are unfairly burdening the people who live and pay taxes in Seattle. Additionally, Seattle homeowners are being asked to fund several huge initiatives this year including transit, homelessness programs and schools. We simply cannot pay for everything. You must find another income source to help or these programs will be voted down even if they are good plans.</p>
NORTH KING COUNTY	<p>Light rail is the only true solution to provide reliable, fast transportation as it is completely separate from traffic. A 25 year project completion target is an extremely long time considering the current and projected population growth of the area. In this time, we will see congestion on existing roads increase even more, even if there are efforts to increase and improve bus service.</p> <p>I do agree that a long-term light rail plan with bus improvements in the short-term will likely be the best course of action, but light rail should be expedited in an effort to combat the inevitable extreme road congestion that will occur.</p>
NORTH KING COUNTY	<p>S Graham St Station should be built as soon as possible. The community has been waiting a long time already, and the City of Seattle will contribute \$10 million through the Move Seattle levy, which expires in 9 years. Sound Transit must initiate planning and break ground as soon as possible. Interruptions to service are worth the economic investment in a community that the light rail has skipped.</p>
NORTH KING COUNTY	<p>Obviously, 25 years is an absurdly long timeframe for something I would want to use. Most working people will be retired when those aspects of the plan come to fruition. I'd rather pay more for something I can use than pay a still considerable amount for some distant goal.</p> <p>Also, BRT is not done well or effectively in the Puget Sound region; the buses are less convenient but end up not much faster than ordinary buses. If there are actual improvements that make it faster and more useable, people will use it and make it worth building, but otherwise it should be only a fallback plan or a feeder to rail options.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>I think the projects the projects with the most ridership should be prioritized first: the Ballard, West Seattle and Lynnwood to Everett Light Rail. These projects will have the biggest impact on our system. These projects should come before a project like light rail to Redmond which hardly carries any people.</p> <p>In addition, it makes sense to fill in the Graham Street Station in the first wave of projects from an equity perspective. It would be a quick community win for Sound Transit that would have a large impact on lower income minority groups in Seattle.</p> <p>Finally, any BRT that is implemented must have its own lanes that are unobstructed by traffic along the entire length of the route. There appear to be bottlenecks that will keep some of the routes from being true BRT.</p>
NORTH KING COUNTY	<p>I strongly support aggressive expansion of rapid/mass transit in the Puget Sound but I am very disappointed in the timeline to expand light rail to West Seattle. It is Seattle's most populous neighborhood, likely to be impacted by SR 99 changes and yet will not see light rail for another 17 years at best. And even then, it does not look like it will get further south than the Alaska Junction leaving large portions of WS's population miles from the nearest station. I will literally be dead before I can take advantage of light rail and I'm not THAT old.</p>
NORTH KING COUNTY	<p>In 17 to 22 years, I think people in my income bracket will have long been priced out of housing here, and yet the jobs continue to be desirable in the core of Seattle. I think the timeline must be shortened significantly to have any real, positive impact on the people who will be helping to fund it with our tax dollars.</p>
NORTH KING COUNTY	<p>Ballard and West Seattle light rail or Rapid Transit to and from Downtown Seattle/SLU should be prioritized. Neither areas are currently connected through freeway and while distance-wise so much shorter than distance between Eastside and Downtown, it take just as long or longer to get to during peak hours.</p>
NORTH KING COUNTY	<p>Seattle is 10 years behind in public transit. This plan needs more forward thinking -- in 22 years we will most likely have self-driving ubers and amazon will own an even larger share of SLU. I am fine paying more money, but not for a transit system that will be outdated by the time it is built. We are an advanced city in so many ways- let's apply that to our transit.</p>
NORTH KING COUNTY	<p>I will support it because I want a comprehensive light rail system and I will ride it every day but, please don't make us wait so long. There has to be a faster way!!!! I live in west Seattle and work in Northgate and want to take rail now!!! Please keep trying to find a faster way.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Enormous number of apartments--many with no character and no parking are being built in West Seattle--one megaplex on CA Ave SW alone is over two blocks long. The new Whole Foods megaplex with apartments is going to impossibly choke West Seattle Junction since there will be no mass transit improvement or traffic solution revision when it opens in three months. How am I supposed to get enthusiastic about a rail line coming to relieve problems in 25 years when Council is allowing anything to go up with no design sense or design guidelines and no transit solution before the first tax checks come rolling into the City's coffers from the developers?
NORTH KING COUNTY	Ballard to downtown Seattle should be prioritized in the plan.
NORTH KING COUNTY	I live in Ballard and would like to live long enough to see rapid transit come here. 22 years is a long time...
NORTH KING COUNTY	Taking 17 years/ 22 years respectively for light rail to reach West Seattle/Ballard is preposterous. It is absolutely imperative those projects come online in a much timelier fashion.
NORTH KING COUNTY	New downtown tunnels to West Seattle & Ballard in 6-8 years! Suburban Sound Transit commuters benefit from service implantation faster than the larger urban Sound Transit tax base of Seattle.
NORTH KING COUNTY	The entire project needs to be complete in no less than 11yr. No one is approving 50 billion for a plan most of us will be dead if ever completed 520 bridge they work 7 hours a day, 5 days week. The tunnel.... please. Time to pretend to run a business and time is money. Wasting more time with this silly timelines. I'm voting no and campaigning others until plan is 100% complete with same scope by 2027. No excuses.
NORTH KING COUNTY	ST and the cities, neighborhoods, & counties need to find a way to accelerate the timelines. ST needs to figure out how to get projects started faster and build more simultaneously. While cities, neighborhoods & counties need to figure out how to accelerate the EIS and other issues. I would hope that eminent domain would be used in this clear instance of the inconvenience of a few to benefit the many.
NORTH KING COUNTY	This is a really long timeframe, like I'll be retired by the time light rail gets to Ballard. There are plans to build another 2000 (yes 2000) housing units within a 2 block radius of my house over the next year- most without parking or only limited parking. How do you propose getting all these people where they need to go in a timely fashion??
NORTH KING COUNTY	This need to be done ASAP. 17 years to expand to West Seattle is ridiculous when it is only a few miles from the existing lines!!
NORTH KING COUNTY	Ridership currently on light rail is very low and has taken riders mostly from buses. Add better bus service and slow down plans to invest in rail. Encourage car pooling and van pooling which decrease congestion when done well. The objective should be to reduce congestion rather than to get people out of their car or to invest in rail.
NORTH KING COUNTY	Do whatever possible to make this faster, I would pay more in taxes to speed up the timelines
NORTH KING COUNTY	More centralized areas such as Seattle and the rapid ride buses as well as improved and more frequent running on current routes should be prioritized. Light rail stops in areas that are already heavily serviced can be put on the backburner. The line extending to Ballard should be completed sooner (a higher priority) than some other projects to more outlying regions. Kent should have a rapid ride as well, not just Sounder train access.
NORTH KING COUNTY	We do not understand why it would take 22 years to complete a light rail line to Ballard. That is frustrating.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I would like to see the light rail in West Settle instead of more buses.
NORTH KING COUNTY	I would like to see light rail expansion happen faster to connect neighborhoods within Seattle and to better connect Seattle to the east side (Redmond, Bellevue, Kirkland). I think this is important to reduce traffic congestion and pollution, improve neighborhood development, and support small/local businesses.
NORTH KING COUNTY	Should bump up areas that are ahead of schedule and get stations built ahead of schedule
NORTH KING COUNTY	The timeline makes this plan unsupportable for me and for all the friends I have talked with. I am not going to vote to increase my already high property taxes for improvements to congestion that won't even begin for at least 8 years. 22 years to get light rail in Ballard? Seriously? I've never voted against any transit improvement plan, but I will vote against this one. I'm already frustrated about how long it's taking to get light rail to Northgate. You've got to figure out how to get the work done faster.
NORTH KING COUNTY	Obviously there is a lot to manage over such a long plan, but it seems like updating work (new buses, smaller quick fix work) could be done earlier in parallel with build out of infrastructure.  I also don't understand some of the costs involved, like why the Graham St station is going to cost \$70 million.
NORTH KING COUNTY	I'm happy to see that transit is finally becoming a priority in Seattle. In light of the rapidly growing population, we need to get this done as soon as possible.
NORTH KING COUNTY	Takes too long. Get light rail to west Seattle and Ballard
NORTH KING COUNTY	Please prioritize light rail and service within the city! Ballard and West Seattle need transit options badly to combat traffic.
NORTH KING COUNTY	The plan needs to happen faster 25 years is too long! We need this transit now.
NORTH KING COUNTY	I moved to my home in West Seattle because of availability of transit to my workplace. 25 years is too long a wait and I am not willing to finance entire Puget Sound development from my taxes to get a "maybe" in my part of the Sound
NORTH KING COUNTY	You'll get more support if you speed up the timelines drastically.
NORTH KING COUNTY	Speed of deployment is of utmost importance. Even if we have to pay more taxes per year, if you're able to shorten the timeline, people are more likely to support the plan in my opinion because benefits will be realized sooner! I would look into doing a survey that has annual tax cost - timeline to deployment and see what people would be most willing to do! I would be happy to help as well since I'm quite passionate about better transit, especially light rail.
NORTH KING COUNTY	All major metro systems around the world start from the center and then expand. Why have you chosen a plan that starts far then in 22 years begin with the areas that are extremely dense close to the center? There are people in support of a real metro rail system, but you have made a plan that seems to cater to those that have some inside connection than the actual demands of the densely populated.
NORTH KING COUNTY	Light rail to Ballard should be completed in the first phase.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Seattle lines need to be moved up in the priority list, especially service to West Seattle. Why does line need to go West Seattle to Downtown? Why not West Seattle to Mt. Baker Station or Beacon Hill Station? This seems more direct, and you could go downtown to Beacon to West Seattle. This is more direct than Mt. Baker to Downtown to W Seattle.
NORTH KING COUNTY	The project timelines should be faster.
NORTH KING COUNTY	I think the project timeline could be modified to push the light rail to Ballard to be one of the top priorities for ST3 rather than the second to last. I think it's important to get all of the link rails in Seattle proper before extending to Redmond / east side. Regardless, I ride the link every day and I'm very thankful for the public transit / link system.
NORTH KING COUNTY	We need improvements sooner.
NORTH KING COUNTY	25 years seems a VERY long time to get the light rail component of this project completed. Streamlining bus service isn't enough. People want light rail and they want it now. The UW station and Capital Hill stations are a perfect example of how important this is. 25 years is too long and it could keep me from voting yes on such an expensive package. Many of us won't be around to be able to use it, and we're the ones paying the assessments.
NORTH KING COUNTY	They can build transit systems in China in a few years why does it take so long here. You should consider an income tax and/or a development fee to help pay for the projects
NORTH KING COUNTY	Priorities and timelines with regards to Light Rail connections need to be re-evaluated as Light Rail will be the most beneficial projects. Bus improvements are fine but should not take precedence from Light Rail.
NORTH KING COUNTY	I strongly support expanded transit, but the amount of time it is going to take to complete means I will retire before it reaches my work place. If we could build a railroad across the United States in 5-6 years we should be able to improve the pace of our current expansions even with all the challenges of working in a modern urban environment. I am happy my significant other can now ride the light rail to her work with the UW expansion. One question, why doesn't ST compete the above ground section from Northgate to Lynwood during the construction of the UW to Northgate leg saving 2 years??? Thank-you
NORTH KING COUNTY	If possible, improved timeline on Ballard to Downtown Seattle light rail. It would not impact me personally, but seems like the greatest improvement for the greatest pain - buses simply can't compete with the traffic currently.  Also, aiming for exactly 10% sales tax would be nice.
NORTH KING COUNTY	You are way behind in completing these projects. Elimination of a lot of the bureaucratic [explicit] would go along way to get this project moving.
NORTH KING COUNTY	It's extremely important to expand the light rail. Shoreline and Seattle are 12 miles away and it takes me an hour to commute by bus. Oakland and San Francisco are 12 miles away and it takes me 15 min to catch the Bart from one to the other. We need the public transit to grow and change with our growing and changing city.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I would like to see the issaquah line completed much sooner than 25 years. This is a critical area of expansion for Seattle and is growing rapidly, and a light rail service here is going to be essential. I honestly would support a much much higher tax increase to see this completed sooner and I know of many others who share that opinion. Already can't wait for the Bellevue-downtown Seatte line!! Thank you for all you do for the emerald city.
NORTH KING COUNTY	We should do the West Seattle expansion sooner than 17 years.
NORTH KING COUNTY	Just get it done and don't dither about it for another ten years like all of the other much-needed public works projects around here.
NORTH KING COUNTY	Ballard has and will have more riders than other places being serviced first. Provide service to the areas with the most ridership first.  Do not spend money on parking. Let the private sector take care of parking, or people can change their habits and be dropped off or bike or walk to transit connections. Np parking is provided in Seattle. Why should they pay for it For suburban riders?
NORTH KING COUNTY	West Seattle is growing!! They continue to build more and more condos, apartments, etc. Traffic in and out of West Seattle is already getting worse by the minute, add in these new residents and we have a total mess! The commute from West Seattle to downtown without traffic takes 12 minutes. My typical commute takes an hour, sometimes more each way! We need a solution to this problem now, we can't wait 17 years. There should also be incentive for people to use public transportation, reducing the amount of cars on the road. Incentives such as more bus lanes or a route used only by buses. Reward those who take public transportation with less commuting time!
NORTH KING COUNTY	I can't understand how this could take up to 25 years. Seattle horrible traffic problems need to be address with urgency.
NORTH KING COUNTY	The timelines are way to long. Please speed up implementation. We can't wait 17 years for this. Make the developers building in South lake union, Ballard, etc. pitch in to speed this up. I am fine paying my share but companies/developers need to pay some of the freight.
NORTH KING COUNTY	Shouldn't take so long. I'd be more supportive if it went faster, even if it cost more.
NORTH KING COUNTY	25 years! Hurry the [explicit] up and get this work done in the next 5 years
NORTH KING COUNTY	Keep up the great work!
NORTH KING COUNTY	Personal bias would like Ballard to be in the sooner rather than later list (especially with the lack of parking), but I understand if others need transit more. Also, additional property tax makes rent go up, so i'm not for using that as funding. It does, however, need to be paid for somehow.
NORTH KING COUNTY	The Ballard-Downtown line offers the greatest return in the form of ridership and cost per rider. Everything possible should be done to expedite this element of the project.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Projects should be phased to support urban neighborhoods first, where more people will be served. I understand ST is a regional organization, but that doesn't mean it should serve the suburbs with greater priority. The construction cost per rider is lower in urban neighborhoods, and is a better use of taxpayer money.
NORTH KING COUNTY	This timeline is MUCH too slow. We are one of the only major cities without a modern transportation system and the timeline is inadequate. I don't want this to be for my grandchildren, I want to be able to use it, too!
NORTH KING COUNTY	I think the Ballard light rail should be completed in 8 years. I also think that more light rail should be proposed. In North Seattle multiple lines could be proposed; one on the east for lake city and Kenmore/Bothell. One on the west for Fremont, Finney, green lake, green wood etc. I also feel that trains in existing Streets don't add enough capacity to be with it (they are similar to buses but more expensive). Trains should be built above or below street level or should have some other new dedicated travel corridor. Seattle will continue growing and we need massive improvements in transit infrastructure. I believe they can also be justified cost/benefit wise; especially with the cumulative reduction in traffic congestion that is possible. I would also like to see more dedicated bike and pedestrian trails. I feel that they too can play a role in a transit plan.
NORTH KING COUNTY	Ballard line is needed *now*, not in 22 years. That timeline is ridiculous, especially given the overwhelming success of the recent Link extension.
NORTH KING COUNTY	Way too lengthy for final completion. We can't afford to wait 25 years for completion. Also, mechanisms should be explored to have businesses help fund these projects that will benefit them, rather than leaving it up to people such as myself who is not even on an existing or planned transit route to fund the project (I'm not opposed to contributing; I'm mad that the Amazons and Microsofts of the world are pushing their costs onto me. What, they aren't making enough money as is? They have to dip into my pockets too?)
NORTH KING COUNTY	Light Rail to Ballard should be built sooner, as well as light rail from Ballard to UW through Fremont and Wallingford.  Ballard has developed at an incredible pace, and it was all predicated on having the new Monorail built to deal with that increased development. It seems absurd that extending the light rail to Ballard would be pushed off to 25 years from now.  Make it right!
NORTH KING COUNTY	Ballard needs light rail connectivity sooner. 22 years makes it seem like a low priority.
NORTH KING COUNTY	22 Years is too long to wait for an improved system. Some deep auditing of programs needs to happen to cut expenditures and alleviate the cost . These projects need to be expedited. Third world countries like Chile completed an extended system in about 7 years. How is it possible that these projects take 22 years ?! It's outrageous.
NORTH KING COUNTY	Retiring before projects I really want are completed is completely unacceptable. Figure out how to multitask and get these done sooner. Other cities don't take 40 years to do a light rail system.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	We need the urban parts of this plan sooner, rather than later!!!
NORTH KING COUNTY	Please don't cut West Seattle off from downtown...with changes to the viaduct West Seattle needs better transit options before 17 years from now!
NORTH KING COUNTY	Please make this happen faster. Am willing to pay triple.
NORTH KING COUNTY	Ballard and West Seattle shouldn't have to wait that long for good public transportation. We are so behind Europe!!
NORTH KING COUNTY	<p>Sound Transit and regional leaders put ST's bond rating above the cost of having companies and workers be unable to complete important job/delivery/transport functions due to immobility. Absurd. Sound Transit should be embarrassed by the cost and timeline to get it done. Other cities are doing more in less time and for less money (see Montreal, Portland).</p> <p>Plus, this plan doesn't even include a West Side of Seattle to Lake WA line. You are SO hellbent on being a regional provider that it seems you really short the areas biggest economic engine: the central core and Seattle. Wake up, please. High Density neighborhoods will do the most with public Transport, not far flung suburbs. Any decent planner knows that.</p> <p>Other points:</p> <ul style="list-style-type: none"> <li>-Please, stop calling it 'Light Rail' -it's more than that!</li> <li>-Better signage/lighting -ST's way-finding is somewhere between mediocre and terrible -you must know this from the many customer feedback posts I've seen on this)</li> <li>-How about a naming contest that is highly publicized for the naming of our local trains? "Link" sucks. :-P</li> </ul> <p>Stop taking so long to build and plan everything! Are you serious? Why the absurdly long timeline?!!! Just. Build. It!</p>
NORTH KING COUNTY	I'd support a faster development plan
NORTH KING COUNTY	Provide alternate cost & taxation estimates for more assertive timelines (and what those more assertive timelines might be - might spur greater interest and support, even in light of what may be a greater short-term cost).
NORTH KING COUNTY	I understand the complexities of building especially light rail in with existing infrastructure but I'd love to see most of the major light rail lines added within 10 or so years. Blitz and get it all done sooner so current residents can actually benefit in the near term. My other concern is how the current timeline does or does not account for autonomous vehicles coming online soon possibly making some modes of public transit obsolete due to the ad hoc, just in time availability of car pickup and drop off services and how that will change congestion on our roads. If that future comes soon I will have a hard time justifying paying extra taxes for infrastructure we may not actually need.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	To maintain quality of life in the region, we need to accelerate the timeline. The population is growing so quickly that if we do it on the proposed 25 year timeline, the region will experience unbearable gridlock. As a resident of Alki in West Seattle who is in his 50's, light rail will not reach the West Seattle junction until I am 75 years old. Even then, it will be 1 1/2 miles away from me and the West Seattle Bridge will be way over capacity.
NORTH KING COUNTY	I think projects for Ballard and West Seattle should be higher priority based on the number of higher density residences being constructed without parking. Also, rail and city bus fees should be transferable, to make it affordable for riders, if riders are expected to reach final destinations using both bus and light rail. Paying twice is a hardship for poorer individuals who rely on transit.
NORTH KING COUNTY	Timeliness for Ballard and West Seattle light rail should be dramatically improved as this has the greatest near term impact and will garner the greatest amount of support with likely voters in King County. 17 years is too long for these to come to fruition.
NORTH KING COUNTY	That's really long before we see an affect. It seems the major impact that will happen are the inconvenience of construction. How will this project affect our current traffic situation. Will this create jobs for the city?
NORTH KING COUNTY	Is there ANY way to fast track these projects? The level of development in the city is making car commuting untenable, and yet, there are no reasonable transit options. This really should be the number one priority of our government.
NORTH KING COUNTY	I like the plan but the timeline is ridiculous! I want to be alive to use good public transportation.... All light rail timelines in the plan need to be accelerated by 50%. We should not be waiting 20 years for good transportation. Seattle needs it now.
NORTH KING COUNTY	The proposal is for what we need now. In 25 years, it will be insufficient. We need to either speed up the timeline significantly (completion of all phases within 15 years) or add to the comprehensive plan so that is designed to meet 2030 needs and beyond. We should increase motor vehicle excise tax by more to pay for a speedier and/or more comprehensive project
NORTH KING COUNTY	tax the billionaires
NORTH KING COUNTY	I commute from West Seattle to Interbay daily and think that generally the C and D line's are working fantastically, even if splitting them up was a slight inconvenience for me. As much as the West Seattle light rail being 17 years away is disappointing to me, the fact that I can get to downtown Seattle in under 15 minutes reliably makes it not too big of an issue. What does worry me, however, is the potential for the viaduct to be closed for a long term period of time without an actual solution ready anytime particularly soon. I quite enjoy my neighborhood currently, but I do worry I will have to consider moving away from the area due to increasingly longer commute times due to a lack of a timely solution to the viaduct. This could all be completely unfounded and not an issue, but that's just my current big transit worry.
NORTH KING COUNTY	take less time fam
NORTH KING COUNTY	This is taking too [explicit] long.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Seems a very long time to wait, 8 years just to add buses? About twenty years is too long for the wait.
NORTH KING COUNTY	Only wish it could happen sooner
NORTH KING COUNTY	Ballard & South Seattle can't be made to wait as the plan suggests, but if there is no other financial choice, here's an option: Work with other agencies to provide additional interim bus rapid transit to those area, including separate bus lanes on the entirety of all proposed rail routes. Then delay some of the work on the peripheries of the system to enable speeding up the Ballard and West Seattle rail lines.
NORTH KING COUNTY	Light rail additions to Ballard an West Seattlr should be a priority. Thousands of new residents have moved and are miving to these areas which have limited and unreliable service.
NORTH KING COUNTY	The timelines for completing these projects is absurdly long. Other cities are able to accomplish far more complicated projects is far less time. Given the rate of population increase in the area and the congestion on the highways that has been increasing at exceeding rates, we cannot wait 17 years for light rail to be completed. That is absurd. I have suffered having light rail under my house. I am living through inconveniences for future generations but it should not take so long. Look at Tokyo. Far more ambitious projects are completed in much less time.
NORTH KING COUNTY	This must happen sooner than this proposed timeline
NORTH KING COUNTY	How can you possibly say 17-25 years for some of your more populated areas? in 25 years these current estimates are going to be obsolete. People need better ways to move around then cars. We are taxed enough and better usage of money by our government needs to get better.
NORTH KING COUNTY	Quicker/Earlier the better!!!
NORTH KING COUNTY	Light rail needs to completed sooner. It also needs to have its own right of way. A colleague of mine with a PHD in transportation systems says there is increasing research/studies that indicate light rail that does not have its own is ineffective.  Finish light rail sooner and on its own track. The tax increases are worth it. I'm also a financial conservative and think the tax increases are smaller considering the potential benefit to a large rail network.
NORTH KING COUNTY	I think economic justice must be part of this plan and low-income users should be given special consideration in the timeline. I also think extensions to West Seattle and Ballard need to happen faster.
NORTH KING COUNTY	West Seattle needs to be faster! I know it's a complicated effort but that's the most urgent thing for me.
NORTH KING COUNTY	I absolutely support investing in mass transit. However, we need to see larger milestones faster! If I'm paying big taxes for these projects, I'd like to reap the rewards in my lifetime. I'm 40, just left my job in Redmond in large part due the lack of sustainability of commuting AND raising a family. In fact, I'd rather pay more taxes now to get projects that make transiting in seattle easier now. The inability to get anywhere in Seattle in less than an hour is frustrating and negatively impacts the Seattle experience. Help us!!!!!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I strongly support the plan, but not the timing. The link between downtown and Uptown is essential and should be completed much sooner. The population density and popularity of Seattle Center with tourists dictates making its completion much sooner a higher priority.
NORTH KING COUNTY	Ballard and West Seattle lines should be a priority. I will vote no on a plan that delays implementation of these critical urban lines. Provide greatly improved sounder commuter rail to Everett and Tacoma instead of light rail. Reduce the number of stops to save costs and increase speed.
NORTH KING COUNTY	17 years for better transit to West Seattle is way too long. We need options now that can keep up with the growth and traffic that is exploding, on much shorter timeframes. Multiple bus routes have been removed over the past few years and transit from my house continues to become more and more difficult.
NORTH KING COUNTY	Do it quicker, and do it cheaper!
NORTH KING COUNTY	Ballard needs quality, grade separated rail to Downtown Seattle sooner.
NORTH KING COUNTY	I have lived here since 2009, and previously have lived in Philadelphia, Boston, San Francisco, Richmond VA, and Austin TX. I can tell you that transportation in this town is far and above the worst. I would be embarrassed if any plan I ever put out would take over 5-7 years, let alone 25!!!? If the problem is money. Tax us already. This is insane. One of the things this city brings to the table is a superior livability, that is rapidly plummeting as we continue to dither away on the planning around this city's rapid expansion. Thank you for reading this and taking it into account when you make decisions.
NORTH KING COUNTY	The West Seattle light rail should be given a higher priority and completed faster, even if it means additional taxes and funding sources.
NORTH KING COUNTY	Light rail to West Seattle and Ballard should be completed earlier than 17 years from now.
NORTH KING COUNTY	Ballard is experiencing record growth, and the transit infrastructure is not keeping up with the population boom. Ballard projects should be completed sooner than in 22 YEARS from now. By that time the traffic congestion in the Ballard area will be phenomenal, in a bad way. Please consider moving the timeline up for Ballard.
NORTH KING COUNTY	We need the Ballard light rail extension desperately. 22 years is not fast enough. With South Lake Union growing rapidly, we need to commit resources to this ASAP.
NORTH KING COUNTY	Thanks for all you're doing to move this forward!  While I understand why the timelines for expanding light rail service are so long, this solution is desperately needed and any opportunity to shorten them should be taken. In my opinion, the delay will limit growth in the city and ultimately cost us more.
NORTH KING COUNTY	Do it all as fast as you can!
NORTH KING COUNTY	I am willing to pay the outlined costs, but would expect to see faster results. 17-22 years for light rail to West Seattle and Ballard feels ridiculously long, and I am a little stunned that it will take 8 years just to add bus service! I would much rather see Sound Transit spend more earlier to get these projects finished on a shorter timeline.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	We need light rail in West Seattle much sooner than 17 years!
NORTH KING COUNTY	Projects that would make the largest impact should be completed first. Areas with people who will actually use the service should be prioritized.
NORTH KING COUNTY	Ballard and West Seattle light rail lines should be a higher priority than rail lines to the suburbs. Both areas have seen considerable growth over the past few years and contain a higher percentage of people that use transit to reach downtown Seattle on a daily basis.
NORTH KING COUNTY	Right now capital project interest rates are as low as they have ever been. If the projects can be sped up by a marginal increase in cost, do it. 25 years is too long of a horizon to gain the support of those who will use the system the most. Build out the system starting where it is most wanted and will be most used first in order to demonstrate success and knock out the easy wins, at which point more reluctant areas will be excited about access to the system and more willing to expedite processes on their end in order to connect quicker.
NORTH KING COUNTY	West Seattle needs to be served faster and the timelines for the whole project need to be moved up! Prioritize light rail extensions and get it done. West Seattle and Ballard are so desperate for rail that they passed the monorail THREE times....yet still are waiting for light rail.....do it now, please!
NORTH KING COUNTY	Light rail is great. I will consider using it, once the Northgate station opens, as I live nearby in Greenwood. However, light rail cannot be the only transit solution, as even with all of the ST3 routes and stations completed, the majority of commuters will live too far from lines to benefit. You must continue to support infrastructure for speedy and frequent bus service into and out of Seattle and other major economic and business centers. I've already noticed cuts in bus spending, the elimination of routes and more crowded buses. Keep the buses, AND build the light rail.
NORTH KING COUNTY	Timeframe for completing the light rail lines are too long. They need to be sped up to keep up with the amount of people moving to the area. Faster transit allow more people to move quicker and will reduce amount of cars on the road
NORTH KING COUNTY	Unless downtown to Ballard and downtown to West Seattle are put in the front of the timeline, this project will get a NO vote from me, and I am a huge transit user/supporter. Seattle is facing a disaster if it does not get improved inner city transit ASAP.
NORTH KING COUNTY	<ol style="list-style-type: none"> <li>1. Build Ballard to Downtown light rail first, followed by West Seattle to Downtown. Then build the rest. Serve density and demand!</li> <li>2. Build Everett to Seattle on SR 99, or at least on I-5. Do not build a spur to Paine Field.</li> <li>3. Include other light rail projects: Ballard to UW and a route that follows the current Metro Route 8 bus.</li> <li>4. Build everything faster. Get all of the cities and counties to do their part to have ST3 built within 20 years.</li> </ol>
NORTH KING COUNTY	Ballard and west Seattle train services need to be implemented on a fast track schedule, and paid boy by those areas.
NORTH KING COUNTY	I don't think Ballard can wait 22 years to be connected to the Light Rail system - this timeline should be reduced.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The concentration of light rail expansion should first focus on Seattle. Riding buses during commute time is very stressful as they are all packed to a dangerous level with no seats. Also, adding additional brt service should not take that many years to get started. Let's get it going asap.
NORTH KING COUNTY	Please support broader light rail to West Seattle on a quicker timescale.
NORTH KING COUNTY	I realize this expansion project is extremely difficult to plan and execute with so many parts to consider. However, please consider connecting the local neighborhoods (i.e. West Seattle, Ballard, Central District, Fremont, Queen Anne) to Seattle before prioritizing the farther communities. Commuting via transit from U-District to West Seattle or Queen Anne is at least 45 minutes. I have to go through downtown Seattle every time. When there is an event happening or a friend I'm visiting, I default to driving because transit is not practical for these commutes. Bus routes and funding continually get cut that I have to drive or taxi now more than ever. And I live within 10-15 minutes from most of the Seattle neighborhoods and only 8 minutes to Downtown. Forty-five minutes to Downtown from U-District is hardly worth supporting a transit system. As of right now the use of Stadium station is not practical for my commutes. Make the system functional so that people will use transit over their car.
NORTH KING COUNTY	I think the main priority of ST3 should be light rail expansion, and figuring how to expand to West Seattle and Ballard in manner that would take MUCH less than 25 years.
NORTH KING COUNTY	Look at the Stockholm Subway and Light Rail network; it has taken 40 years to develop to its current standard. It is so good that people have given up cars, they rent a vehicle if they need to go somewhere. The cities are much more bike-friendly than any city in the US -- it's time to wake up! Seattle would be a wonderful city to live in with easy commuting if a similar network was built up. Trains, Subways & Light Rail is the way to move forward.

NORTH KING COUNTY	<p>With such incredibly long timelines on some of the projects, it's important that interim arrangements are made-- buses along routes to alleviate transportation stress and traffic in the 25-year interim period before lightrail is available. That sounds like such a depressingly long time to wait for good connected transit when commuting is such a nightmare every day.</p> <p>In addition, I urge ST to keep in mind the interconnectedness between housing and transportation, and work with other agencies to develop a solid and equitable affordable housing plan-- as home prices are driven up and up, it is so important to prioritize diverse and equitable access to transit areas. Excess property should be prioritized for affordable housing. The need for (affordable) homes near jobs, resources, and transit is too great.</p> <p>Lastly, it is my belief that it is critical to consider the long-term impact on the region. Ample or unlimited provision of free parking at transit stations *still encourages car ownership and solo driving, as well as sprawling development.* Sound Transit should be aiming to minimize these trends and incentives toward sprawl and personal automobiles in their draft plan. By making parking more scarce and/or charging for it, yes accessing transit now will be slightly less convenient. But with the right connections in place and high density near station areas, the incentives will result in higher-density, more compact cities and less reliance on cars. One of ST3's goals should be making car ownership less attractive! Bikes and alternative transportation are already being sidelined in favor of amenities for drivers in the region's current infrastructure development (e.g. prioritizing car access to new 520 bridge, when bikes and pedestrians must continue to wait).</p> <p>Thank you for soliciting input and for your hard work on this plan.</p>
-------------------	--

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

<p>NORTH KING COUNTY</p>	<p>Ballard is the FASTEST growing neighborhood in Seattle. We cannot wait 22 years for light rail. How are all the people who are flooding into the neighborhood going to get to work? They are going to join the gridlock that is 15th/Interbay. With the development and growth happening in the Ballard neighborhood -- it only makes sense that we should support transit options that support that growth. You can't tell us that Lynnwood and other prioritized neighborhoods are growing at this rate!</p> <p>Currently, it takes (even the express bus) more than 30 minutes to go the barely 5 miles from Downtown to Ballard after work. There is literally no time difference between driving and sitting in traffic in a commuter car or a bus at this point. With our area's touted commitment to sustainability, we have to do something to establish commuter choices in line with our environmental values and this explosive growth.</p> <p>In studies I've seen, the Ballard line would pay for itself in less time than any of the other projects due to huge commuter use and enthusiastic adoption. Ballard commuters would jump at the chance to hop on a train. The other lines would take many more years of ridership to recoup the investment. Why would you wait that long for ROI?</p> <p>Finally, If I chose to live in the suburbs, I would be accepting that drive into work or using the park and ride. Living in the city, I should be able to jump on a train and be at work in a few minutes without sitting in traffic. Please, Sound Transit, base your expansion on cost being recouped by ridership and actual adoption by users. It's clear from the popularity of the Capitol Hill station already that Downtown riders need other ways home beyond city buses, cars and bikes.</p> <p>Thank you.</p>
<p>NORTH KING COUNTY</p>	<p>The West Seattle Bridge is in gridlock almost every morning. IF this gets voted in, please consider completing the West Seattle line sooner. Additionally, please don't ask voters to pay this with property taxes. You are taxing us out of our homes. I'm not voting for anything anymore that has a property tax attached to it, no matter how much we need it.</p>
<p>NORTH KING COUNTY</p>	<p>Speed things up!</p>
<p>NORTH KING COUNTY</p>	<p>We need to get this up and running sooner, construction time to long.</p>
<p>NORTH KING COUNTY</p>	<p>I feel that the timeline of all of these things ESPECIALLY the light rail be pushed ahead as quickly as possible! We are WAY behind where we should be on rapid transit given the growth of the city the last 30 years. More transit not on surface streets is VITAL.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Light rail to/from West Seattle and to/from Ballard should be brought on-line in a shorter time frame.
NORTH KING COUNTY	Ballard and west seattle need rail much sooner than the timelines suggest. Make sure BRT serves ALL of 522. West of 125th is neglected during midday and ion weekends.
NORTH KING COUNTY	I may not be alive long enough to enjoy the fruits of the ST3 project but I hope my children and grandchildren lives are made better by these transit improvements.
NORTH KING COUNTY	17 years to build rail from Ballard and West Seattle. This seems insane. Why on earth would it take this long? A highway project could be completed in half the time, maybe less. This proposal seems like such a compromise. I am a VERY strong supporter of public transit, but this time line seems silly. I will only support projects that can work on a more aggressive time frame.
NORTH KING COUNTY	Shocked to see it will be 22 years before Ballard gets a direct line to downtown. Might not be living here in that long amount of time - maybe that information should be at the forefront of the survey before asking the questions, as most folks will assume projects will happen earlier (5-10 years) and comment on the projects that affect them now.
NORTH KING COUNTY	These timelines are OUTRAGEOUSLY long! They just expanded from downtown to Cap Hill and UW in just 2 or so years. Ballard is so land locked--traffic is insane getting in and out and is the #1 reason that I would never live there. Lightrail absolutely must be prioritized from Ballard to downtown, and frankly it really needs to route through Queen Anne, then Seattle Center, to downtown. The line cannot leave out Queen Anne.
NORTH KING COUNTY	Charge me more and give the light rail to me faster. I will be retired before I can use it in 20 years.
NORTH KING COUNTY	Can we have higher taxes to get it done faster?
NORTH KING COUNTY	DO IT FASTER!!!!
NORTH KING COUNTY	Given that growth is estimated to occur faster than these timelines, suggest that things will get worse before they get better. The plan needs to account for higher than anticipated growth in areas where growth can occur such as west seattle before transit to outlying areas occurs.
NORTH KING COUNTY	Please make this West Seattle light rail happen before 17 years. I've only lived here for 5 years and the increase in traffic in that time has been staggering. I shudder to think about what it looks like in 5, 10, 15 years.
NORTH KING COUNTY	25 years? Seriously? Get it together and come up with a quick effective plan that works. 25 years ago, we were running Windows 3.0. Get your suit together and get it done in 8 years. What the Hell is wrong with you? 25 years is a really long time. Your plan is crap. No wonder traffic sucks so bad here.
NORTH KING COUNTY	As Seattle grows, Ballard grows exponentially. Single family homes are replaced with multi-family units, and everyone moving in needs transportation. The geography of the neighborhood makes commuting even tougher, which is probably a contributing factor in the delay in the proposed plan to bring light rail to Ballard, but really we need it now. We need it tomorrow to get to work. Waiting 22 years is not an option and there has to be some way to fund this project sooner. As a Ballard resident I won't vote for the plan as it is.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	25 years, are you kidding me?! That is ridiculous! My 3 month old son could come up with a faster plan. The first phase describes taking 8 years to add a few extra buses; this is insanely slow. It can't take that long to buy some buses and hire a few drivers. Light rail needs to come faster so it can take cars off the road and there must be parking at the stations, that is the most critical part.
NORTH KING COUNTY	West Seattle will need transit improvements sooner than proposed in the plan, especially when the viaduct is closed.
NORTH KING COUNTY	<p>Currently, the City of Seattle is permitting projects in Ballard as if the light rail already exists resulting in high density in Ballard without commensurate transit service. I support both density and transit. I work day in and out for conservation efforts to restore salmon runs in Puget Sound. I get it. I'm on your side. However, the current policies assume that the transit planned for 20+ years out is here today. It is not. You are asking me to pay twice - once through dollars that I do not see a return on until I have nearly retired, and again through by dealing with non-stop development without the services to make that density functional. I invite you to ask what the city will even look like in 20+ years and will people have relocated work or home to different places because certain areas don't execute smart planning. Plan for a tech burst or two...</p> <p>Also, I invite you to envision a future where the transit in this city is not just used to get to and from work, but to and from non-work activities, outside recreation, and even simply running errands in town. The current (and proposed) system tailors primarily to the 9am-5pm office worker downtown. I'd like more diversity than that in my community and I would like to have transit be a feasible option (read: it does not take 6-10 times as long as driving a car) to get around during off-peak hours.</p> <p>Finally, my neighbors and I refer to the Rapid Ride as the Frequent Ride. It comes often but does not operate quickly to get from Ballard to downtown. Please consider another line that cuts out the time consuming Queen Anne stops (regardless of the timeline for light rail).</p> <p>Thank you for your efforts!</p>
NORTH KING COUNTY	I think the Graham Street station should be completed sooner than planned, and the Ballard Light Rail extension should be completed sooner.
NORTH KING COUNTY	I understand that these things take lots of time and money, but I'm worried that the long timelines for some of the light rail might turn off some voters.
NORTH KING COUNTY	The Ballard line should be built first. Density increases already exceed 2020 projections by over 300% . MAKE DEVELOPERS PAY!
NORTH KING COUNTY	West Search has voted and passed rail service several times in the past two decades but to no avail. I'm astonished at the lack of priority for West Seattle.
NORTH KING COUNTY	West Seattle timeline is too long.
NORTH KING COUNTY	Timeline to Ballard is way, WAY too long.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Do it like Tony Stark and do it faster, better, so that 50 years from now people will think about the foresight of Sound Transit.
NORTH KING COUNTY	If you want buy-in for this project (especially at this cost) then it would help if you could speed up the process. Waiting 17 years for West Seattle to get a working transit system is simply too long. That makes me less likely to be willing to spend \$200-550 a year, especially because it will be for a system that I likely won't be able to take advantage of in my lifetime.
NORTH KING COUNTY	Proposed project Timeline is way too long ! First project completed in 8 yrs and last major project in 25 yrs is very disappointing .. Paying \$200 per year for 25 years is \$5,000 per household -a lot of money to ride light rail .. Need to divide project to condense timeline and costs.
NORTH KING COUNTY	Proper transit options were needed 20 years ago. The proposed Ballard line will take 20 more. This is ridiculous. The city and state need to prioritize these projects or consider opening this up to a private developer that can actually get a functioning system built. The light rail currently in use was overpriced and very poorly implemented. Good luck, 20 years from now any real people from Seattle will have moved far from the city they once loved.
NORTH KING COUNTY	17 years for light rail to West Seattle is disappointing. There was rail to West Seattle A CENTURY AGO.
NORTH KING COUNTY	We're often maroooooned here in West Seattle because the "Rapid Ride" C bus gets stuck in traffic with the cars. Also, it is usually standing room only.
NORTH KING COUNTY	<p>Completion timelines must be accelerated, full stop. Any and all potential options must be considered. These include, but are not limited to:</p> <ul style="list-style-type: none"> <li>- City of Seattle designating light rail as "permitted use" before the vote</li> <li>- 24/7 construction of West Seattle line in Duwamish/Sodo industrial areas</li> <li>- Summary elimination of undesirable/unproductive alignment choices before EIS process, namely at-grade options in SODO and along 15 Ave W</li> <li>- Consideration of Lynnwood to Everett via I-5 immediately with future build-out provisions for Paine Field</li> <li>- Designate the new downtown tunnel as a "regional asset" -- there is no reasonable defense to consider it otherwise</li> </ul> <p>Other future planning efforts should be included as provisional to avoid lead time for additional EIS work or ballot efforts and to take advantage of ST's proven ability to create efficiencies:</p> <ul style="list-style-type: none"> <li>- Alaska Junction to Burien</li> <li>- Ballard to UW</li> </ul>
NORTH KING COUNTY	It takes too long and costs too much. Plus the average cost numbers are misleading. It would be helpful to show the real cost per assessed value. Cut the time in half, reduce the amount of roadwork, and focus on the rail- and reduce the cost.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The 25-year out investments should take into account current advances in tech, e.g. self-driving cars, and the impact that will have.
NORTH KING COUNTY	25 years is significantly too long for a public transit system in Seattle. Most of this plan will likely be obsolete and out dated by the time we achieve half the implementation being proposed. We need to consider ways to accelerate the addition of lines which will reduce commuter times on public transit in order to facilitate reductions in highway traffic.
NORTH KING COUNTY	As I live in West Seattle, I would like to see the rail be put in there sooner than 17 years. That seems like an absurd amount of time...
NORTH KING COUNTY	Work on the inner city first. Get rid of the grid lock you have created. Ballard and West Seattle. That should give everyone else some breathing room.
NORTH KING COUNTY	25 years is an unacceptably long timeline. I recognize it is capital driven and more money means more taxes, but if in 1990 someone had proposed building train cars so that in 2015 they would be useable, it would be archaic by the time it came to use. More likely is that we will put 100s of millions of dollars towards this project, as we should, but that in 25 years the project likely wont exist any longer and we will be doing something else and all the money will have been wasted. It is unacceptable for us to have to wait 25 years to figure out improved transportation for this city.
NORTH KING COUNTY	West Seattle light rail project completion earlier
NORTH KING COUNTY	Go for it! I'm so jazzed about the changes coming down the pike. Keep rocking!
NORTH KING COUNTY	Timelines need to be faster. Light rail to West Seattle and Ballard in 22 years is not fast enough to keep up with the rate of growth in this city. Mass transit needs to be more of a priority, even at a higher tax cost.
NORTH KING COUNTY	You guys seem to be professional planners, but not professional do-ers. It's time to get stuff done. We should have had light rail in the entire region in 1982.
NORTH KING COUNTY	The routes to Ballard and West Seattle need to be completed faster than the projects linking to the suburbs. We need to encourage urban density and not subsidize urban sprawl. The Ballard and west Seattle routes should be completed within ten years, not 22! Additionally, the Ballard line needs to be free to run without being impeded by car or boat traffic. And finally, please do not put parking at the various stations. They are immensely expensive and no matter how many times expanded, will always fill to capacity. Instead, invest the money that would be spent on these structures to improve bus, bike, and pedestrian access. Being able to use an orca card to ride the light rail and then use that same orca card to check out a pronto bike would revolutionize transportation in our region. Parking should cost a lot of money! Bike parking should be free!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The light rail to West Seattle and Tacoma should be prioritized higher. Target completion of 17 years is too distant.  Please include in this plan increasing bus frequency (or larger bus size) in populated neighborhoods in Seattle that light rail and BRT don't quite reach. An example bus that services neighborhoods that are not quite close enough to the Link or Rapid Ride is the 62. This bus is over capacity in the mornings, afternoons, and evenings.
NORTH KING COUNTY	The largest amount of funding capacity will come between the borders of King County, and more specifically Seattle. It stands to reason that for ST3 to succeed, a majority of Seattlelites must be on board. I doesn't take a rocket scientist to decipher that Ballard and West Seattle must be the first legs constructed.
NORTH KING COUNTY	22 years to get to Ballard is a joke if there are no interim solutions. Who knows if anyone will even still live in Ballard in 22 years.
NORTH KING COUNTY	Efforts should be made to decrease time to completion, with priority on service lines which have highest likelihood of decreasing vehicular congestion within Seattle downtown proper.
NORTH KING COUNTY	Densest areas first! Like 2 years, not 20.
NORTH KING COUNTY	My main complaint is the long, long timeline for these projects which are quite urgent to improved life and health in the Puget Sound.
NORTH KING COUNTY	We need to move faster. With Seattle's growth rate and 99s removal, light rail to/from West Seattle needs to be complete before 17 years out. I know the entire region is hurting, and we need to make MANY big investments now to protect our future.
NORTH KING COUNTY	22 years is an absurdly long time. With all the money here we should be able to build some rails and stations much more quickly.
NORTH KING COUNTY	I would rather pay more per month or year and have it done faster.
NORTH KING COUNTY	I would like to see project completed in order of # of riders impacted.
NORTH KING COUNTY	West Seattle and Ballard desperately need light rail to downtown and my understanding is that they were not included in the initial plan because they were once expected to be part of the (failed) monorail. We need to right this wrong and prioritize these two communities, which are two of the fastest growing neighborhoods in Seattle (in terms of density). They should be moved up to the top of the heap!
NORTH KING COUNTY	I would like to see the 25 year timeline shortened by at least 10 years. I would be willing to pay more taxes in order to get train/rapid transit services available throughout the King/Pierce/Snohomish county metro area.
NORTH KING COUNTY	Timelines should be driven by pop density and ridership projections.
NORTH KING COUNTY	22 years to implement in Ballard? That's going to be a very tough pill for voters to swallow.
NORTH KING COUNTY	While the overall ST3 plan looks as though it will do much to alleviate congestion, the timeline is disappointing in that it is too long. Given the rapid growth in the greater Seattle area and focus on urban density, transportation plans that do not include automobiles should be expedited.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I'm pretty upset about the Graham Hill Station timeline. This would make Link Light Rail a commute option for me -- but not in my working lifetime with the current schedule. Furthermore, the benefit to the underserved community is huge per your study -- 81% minority; 25% low-income as quoted here: <a href="http://www.soundtransit.org/sites/default/files/C-08_GrahamSt_FTemp.pdf">http://www.soundtransit.org/sites/default/files/C-08_GrahamSt_FTemp.pdf</a> . Please accelerate building this station!
NORTH KING COUNTY	Graham street should be prioritized because 1) equity and social justice principles dating back to the surface level decision in Rainier Valley and given low income demographics and 2) \$10m from city of Seattle will be lost if project isn't complete in 9 years.  Generally social / race/ equity principles should be used in all prioritization of projects. How can transit now address historic inequities, current opportunity challenges and built for a more just future?
NORTH KING COUNTY	The timelines are too far removed to build enthusiasm for the project. It is unfortunate that so many of the projects now underway have suffered from poor design planning, incompetent oversight and delayed completions. The unfunded transportation needs brought about by development without assessing the developers has increased mistrust by taxpayers of any plans. This ST3 idea needs to be promoted as worthwhile, ambitious, achievable by government agencies, beautiful in concept and design and accomplished in record time. Then you can ask property owners to pay \$400 or \$500 more, not \$200 for more disgusting performance.
NORTH KING COUNTY	17-22 years is too long to wait for expanded light rail service in Seattle.
NORTH KING COUNTY	There should be more focus on expansion of railways like link light and not bus transportation.
NORTH KING COUNTY	Employ more people, have more drastic accelerations on this. I am very supportive of the increasing light rail deployment, but I feel VERY strongly that this should be done in a MUCH quicker timetable!
NORTH KING COUNTY	25 year time line....How can you possibly foresee the actual needs 10, 15, 20, much less 25 years from now. Paying for something quite probably soon out of date seems to need private financing.
NORTH KING COUNTY	The completion time is truly [explicit] ABSURD. This state needs to charge an INCOME tax to fund issues like this. Seattle's mass transit is abysmal especially compared to smaller cities. The infrastructure is just disgusting.
NORTH KING COUNTY	We have to be off of fossil fuel much, much sooner than 25 years from now – the timeframe for ST3 is not nearly aggressive enough. It should aim for the same development in half the proposed time or less!
NORTH KING COUNTY	Too long for Ballard and West Seattle light rail. For best efficiency need separate grade for both these train lines.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>I understand why the completion dates are so far out, but please understand three things: (1) relying on sales and car excise taxes to finance the build out is regressive; (2) the State itself has need for revenue to meet obligations to provide education and the proposed sales tax increase sucks the blood out of the system for other needs; and (3) I will be dead before much of this is completed, even if "on time." I am having trouble justifying the expenditures in the circumstances. You will need to sell this hard.</p> <p>In addition, it is not clear to me that running transit up the I 5 corridor optimizes ridership.</p> <p>Finally, my wife used to take a bus to Childrens Hospital, but the bus was discontinued, so now she bike commutes (10+ miles each way). Nothing in this whole package really does anything for her, or us.</p>
NORTH KING COUNTY	The timeline seems outrageously long!
NORTH KING COUNTY	It is unacceptable to leave light rail to West Seattle and Ballard waiting so long. They need to be the initial priority and in the first phase of the project.
NORTH KING COUNTY	Considering how wretched traffic is in the Seattle area, the timelines are too long. Can't it be built more quickly?
NORTH KING COUNTY	<p>Ballard light rail timeline needs to be moved up. Development in this corridor is occurring increasing exponentially without expanding transportation. The Interim solutions provided by Metro is not reducing delays and gridlock to and from Ballard, because roads are already at capacity. Government leaders do not recognize the need to put a moratorium on commercial and multi-family until transportation capacity is increased.</p> <p>In meantime, expand direct express bus capacity along 15th Ave NW, 8th ave Nw and 24th Ave NW to and from Ballard to Downtown by passing Queen Anne Neighborhood business serviced already by the D line. Leverage new road capacity along waterfront for express bus lane.</p>
NORTH KING COUNTY	Construction timeline needs to be substantially compressed, and core Seattle light rail needs to be a priority. Tax burden is also problematic but likely unsolvable by ST3 given this state's broken revenue system.
NORTH KING COUNTY	Reduce the timeline. It will be necessary regardless, may as well plan for it early.
NORTH KING COUNTY	<p>I am more than willing to pay my fair share of the costs involved to expand light rail and express buses, but the current timetable as to when these proposed projects are estimated to be completed are ridiculous. To ask households to pay even more property taxes, car tab fees and increased sales tax fees but have to wait almost a decade, even to just get more express buses, is crazy and will do nothing to help with our current population explosion. After the major bus route cuts that just occurred, even more people are struggling to find a current mass transit option that will work for them. It is becoming even more difficult to afford to live in Seattle. It is getting harder and harder to get to and from work. The focus should be on providing more buses &amp; more bus routes, so that people can have a reliable choice when it comes to mass transit.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I am only opposed due to the time until project completion. We need advanced Light Rail much sooner, and if that means going without Rapid Ride in the meantime, I am in favor of that.
NORTH KING COUNTY	Not sure I can say something you aren't already hearing from multitudes of other people. The area is in dire need of transportation expansion, and it doesn't help to hear "NIMBY this" or "NIMBY that!"  The At-Grade Ballard drawbridge sounds pretty dumb, but a tunnel is probably not feasible to drill and not cheap. I don't envy your jobs...
NORTH KING COUNTY	Ballard is in need of better transit sooner than the proposed timeline.
NORTH KING COUNTY	The current lightrail projects have really helped those East of I-5, while the neighborhoods West of that (especially those that rely on Highway 99 as a main thoroughfare) are getting increasingly congested. Just a few short years ago, our door-to-door commute to work downtown Seattle was 15 minutes and it's now closer to 60 minutes. Please don't forget us on the West! Greenwood, Ballard, Crown Hill, Fremont, Phinney, Magnolia -- it's all HORRIBLE at this point and in desperate need of attention.
NORTH KING COUNTY	it is all taking FAR too long! Voters were against public transport improvement when I 1st came to Seattle in 1967, and I knew then, the longer it was put off the more the cost would escalate! I'm no expert, but I knew from my travels that any city worth it's salt had a good public transport system! Too bad it's taken so long, at great cost to us all! now I probably won't live long enough to reap the benefits, living in Lk city on the city limits-closest light rail in U District-6 miles away-not coming to Northgate for many years-4 miles away-when I take "Express" buses they are often bogged down in traffic.
NORTH KING COUNTY	This plan is going to take far too long to implement. I've watched cities and countries in Europe and Asia seemingly build systems overnight to accommodate rapid urbanization and population growth. I think other, creative, aggressive funding options should be explored so the entire plan can be accelerated. I'll be dead before some of these projects get built, including the ones that I think are most important such as downtown Seattle to Ballard and to West Seattle where density is increasing rapidly. Perhaps the City of Seattle needs to concurrently build its own subway/light rail system to complement the more regional focus of the plans shared in this survey. Speed the plan up people, increase capacity and the people will ride it! Traffic is becoming unbearable so the motivation is there for people to explore rapid urban transit.
NORTH KING COUNTY	West Seattle transit to downtown Seattle is inadequate. No mid-morning transit from Admiral district to downtown exists. Neither does afternoon Admiral District to downtown transit exist. Bus service was dropped. If parking existed near Avalon Rapid Ride stops, I could use it. For now, I must drive my car or use Uber from Admiral District. No parking provisions for West Seattle water taxi & poor bus service from ferry dock into downtown Seattle or SLU.
NORTH KING COUNTY	Please move expansion of light rail to West Seattle up in the plan. That neighborhood is only growing and the traffic is already ridiculous. 17 years is way too far out. Thank you for your time.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I support accelerated build out of rapid bus systems and light rail. I would also support increasing tax rate to pay for this; and/or "creative financing" to accelerate building of rapid transit.
NORTH KING COUNTY	Implementation schedule is too slow. 17 years to West Seattle?! 22 years to Ballard?! Build it already!!! Make ample provisions for bikes and bike storage. Bike infrastructure is a better deal than that needed for cars. Charge cars a nominal fee to park - at least as much as will be charged for any bike lockers. Be bold! We need this, and we need it yesterday!
NORTH KING COUNTY	Please consider moving West Seattle - Downtown link to the top of the list. We are experiencing a total bottleneck on the bridge each morning and it's only going to get worse as all of the new housing is completed and occupied! We need more West Seattle transit options - desperately!! Also - a westside to eastside connection that goes into Bellevue would be helpful for all the west to east commuters!
NORTH KING COUNTY	The ballard light rail station should be expedited above all other projects. The neighborhood is expanding at a rapid rate and traffic is only going to get worse.
NORTH KING COUNTY	My biggest concern is that this plan is scheduled to take way too long in my opinion.... if it could be a 10 or 15 year plan even that would be far better.
NORTH KING COUNTY	Like to see projects come on sooner. In general, I'd like to see transit that provides good connectivity and is quicker. Going from Magnolia to Tacoma, for example, requires connecting from Metro #24 to ST Bus on 2nd Ave. Connection time is short enough to be risky right now; at times in the past, it's been around 25 minutes, which is too long. Our systems aren't so simple, but North Vancouver's Sea Bus terminal provides worthy example: all buses connect reliably to and from the Sea Bus at the waterfront. Integration here in Seattle seems to occur only by accident.
NORTH KING COUNTY	Global warming is upon us. Seattle has seen some extreme heat in the spring of 2016, at times in the 80's. We need to curb the harmful effects of global warming in our beautiful region, and community transit is the key to do that. We need excellent public transportation for us and our children now.
NORTH KING COUNTY	Light rail from West Seattle will be completed as I get to retirement, therefore I would not vote for something I won't use. Don't plan to stay in Puget Sound by then either.
NORTH KING COUNTY	Ballard link service to downtown and rapid ride line from Ballard to Redmond must be high priority of this plan. Major expansion happening in these areas and you can't neglect east west movement.
NORTH KING COUNTY	Go faster!!
NORTH KING COUNTY	1. These need to be accelerated! 2. The plan must include RELIABLE access for bicyclists to solve the last mile problem. 3. Tax the bad, fund the good. Impose a carbon and/or vehicle miles traveled taxes to fund accelerated projects.
NORTH KING COUNTY	Sadly, I have to consider this plan a legacy for future generations - I don't expect to enjoy many benefits in my lifetime given the extraordinarily long timelines.
NORTH KING COUNTY	We would like to see the Ballard and West Seattle light rail in 3-5 years.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I believe the Ballard to Downtown Light Rail line should be expedited. The neighborhood is expanding quicker than housing can be built, I think it's fair to say that getting the new line in 22 years would be a bit too late. Citizens in Ballard would use the service daily and would support the plan publicly and financially. I believe in building Light Rail area-wide to make transportation available to everyone, but I see an urgent need in Ballard to help alleviate the traffic and crowded busses on the commute to Downtown and South Lake Union.
NORTH KING COUNTY	I am very supportive of more light rail, especially to connect neighborhoods in Seattle.
NORTH KING COUNTY	Ideally I would like to see improved transit within Seattle- connecting Ballard and West Seattle sooner than proposed.
NORTH KING COUNTY	Ballard - downtown should be priority with highest ridership and return on tax dollars. Failure to make this #1 will hurt chances of ST3 passing
NORTH KING COUNTY	As one of the most significant new rail lines in the country in terms of ridership, Ballard to downtown Seattle should be completed on a faster time schedule
NORTH KING COUNTY	we need high speed transit now needs to be planned and construction needs to be done 24 . needs to bve very easiy quick to transfer from train to bus or from bus to train at all the stations. needs to be sidewalks to get to the staitons. braille signs of direction north shouth east west. needs to be housing shops at at the stations. we do not need any mor parking at stations. "It is Sound Trains hours everyday so transit system will be built faster to open run.all transit needs to have its own lane trains need to be either underground or in the air transit needs to be grade sepotrated
NORTH KING COUNTY	We need to fund and complete all light rail and Sounder projects ASAP. The answer to our clogged roads is to get as much traffic off the roads as possible. I believe we have reached maximum use of bike lanes for the time being. Until they are utilized to their capacity, there is no need for to fund any additional changes or additions. The fact is we will continue to drive our children to school and other activities, to and from shopping, the elderly and very young do not ride bicycles as a means of transportation, and at present bike lanes are underutilized when compared to the use of traffic lanes.
NORTH KING COUNTY	The timeline is embarrassing. The rest of the world is so much further ahead than us. My only hope is that wthey they put together the final plan they're actually thinking far down the road, as it's obvious no city planner for Seattle has done that in the past.
NORTH KING COUNTY	Ballard and west Seattle should be #1 priority!! We in Seattle pay higher property taxes and the western side of Seattle has the worst mass transit. You can't promote Ballard as an urban village and neglect transit for 22 years- ridiculous!!!!
NORTH KING COUNTY	Any way to speed all these projects up?
NORTH KING COUNTY	Downtown, ballard and west Seattle projects should be moved up in timeliness.
NORTH KING COUNTY	Ballard
NORTH KING COUNTY	As Ballard continues to be one of the fastest growing neighborhoods in Seattle, there is a strong need for increased mass transportation. Please consider getting the light rail to Ballard sooner than 25 years!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I have lived in the Lynnwood/Seattle area my whole life and my family on both sides has been in the area for 5 generations. The traffic has gotten progressively worse even in the 21 years I've been driving. You can hit traffic at almost anytime of the day 7 days a week. We need to get clear guidelines and deadlines decided on the ST3 expansion plan and get our buns in gear. We need to start making a big dent in traffic flow ASAP! I'd ride the light rail if it was near me in a heartbeat! Taking a bus to get anywhere in my normal routine adds hours of wasted time and buses get stuck in our daily traffic. Some states do round the clock roadwork. Let's give that a go. I'd rather my commute be disrupted for a shorter period with a sooner positive end result than it taking forever to get light rail projects completed. Ask other countries and cities who have built successful transit systems what they did and copy what worked. NO more tunnels! We should have just rebuilt the Viaduct and kept breakdown big Bertha out of the ground. Thanks for reading! I'm happy we're working on trying to get solutions to our traffic problems going.
NORTH KING COUNTY	The timelines seem excessive. 22 years for ballard and 25 years for Everett seem so far out that by the time we get even halfway there, the traffic issues demanding these new developments will be so bad that it will have hurt our economy even further.
NORTH KING COUNTY	Timeline is much too long in completion. Also don't like the property tax part of the taxes to pay for plan. Property owners age and after paying off their homes the taxes get to be so heavy they can't afford to stay in their homes. Find a tax that is more proportional to the population.
NORTH KING COUNTY	I would strongly support this plan if you could include an option for completing the whole thing in, say, 15 years. Let us know how much that would cost and then let us choose which timeline we are willing to pay for.
NORTH KING COUNTY	Schedule should be changed so that all projects are completed within 10 year time frame. Region cannot afford to wait on needed transit service. Suburbs are last in line. Existing employment centers, education, medical centers needed transit 30 years ago. Don't drag it out now. Seattle traffic is gridlocked already. Get rail all over the City ASAP. Supplement with dedicated ROW streetcars so there's complete coverage. Get the job done. Change the financing scheme as necessary so the projects aren't dragged out over decades as they are now.
NORTH KING COUNTY	Why is Ballard being left behind. Our population is becoming more and more dense with condos going up like mushrooms, but the tranist system is totally inadequate. From where I live the only direct downtown bus is a commuter bus, useless for any other trips downtown. The nearest regular downtown service is a 15 minute brisk, hilly walk for the able bodied. Completely inaccessible for myself and many of my neighbors who would be happy to take a bus downtown. It also takes about two hours to get to the airport on public transport. It's faster / easier to get from the eastside to downtown. Don't leave us behind!
NORTH KING COUNTY	West Seattle and Ballard timelines should be moved up. Tax revenue should shift from sales tax to motor vehicle tax and businesses.
NORTH KING COUNTY	Emphasize Seattle neighborhoods first, then deal with the farther-flung areas. It's ridiculous to put Lynnwood, Federal Way and Tacoma ahead of West Seattle and Ballard! Serve the city first!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The time frames for this proposal are far too long. We already have nightmare traffic, and unreliable, crowded bus service, and our region's population continues to grow rapidly. I would encourage Sound Transit to consider moving up the timelines so that improvements can happen much sooner. This may mean accelerating the timeline for the cheaper projects (e.g., bus improvements, buses driving on shoulders), and/or reconsidering the funding structure for the larger capital investments so that more progress can be made sooner. I would also be comfortable with a higher tax rate, but I know not everyone would be.
NORTH KING COUNTY	the whole thing needs to be built as fast as possible. Raise car tabs to do so!
NORTH KING COUNTY	Graham Street Light Rail Station: Please highly prioritize an expedited completion date. Please don't waste the \$10,000,000 pledged by City of Seattle.
NORTH KING COUNTY	I understand the need for impact statements, further research, design considerations, and environmental concerns. That being said, these timelines need to be accelerated. Either reaching out for federal funds or increasing the ask from taxpayers is necessary to speed this process up. I also think it is important to use existing thoroughfares as much as possible (I-5 corridor for instance) rather than dealing with eminent domain issues that will continue to add to timelines.
NORTH KING COUNTY	West Seattle transit will save lives. We need transit to/from West Seattle now to get fewer people on the Viaduct, in case of an earthquake. This is extremely urgent, especially given delays in the tunnel. Climate change, affordable housing, and quality of life (less time spent in traffic, more time spent on transit) are all important and immediate needs solved by transit. Access to schools like Bellevue College are key, as well. Thank you!!
NORTH KING COUNTY	Twenty-five years is a long time to wait for light rail service to Ballard. Plus, the plan is trying to do too much, and the cost of \$17 per adult in Puget Sound will, unfortunately, impact lower-income people the most -- the very people who need the services the most.
NORTH KING COUNTY	For 20 years, I've commuted during rush our on three high-volume routes: I-5 Everett-Seattle, I 405 Lynnwood to Bellevue, and I-90 Bellevue to Seattle. I live in Ballard. By the far the worst commute has always been the south-bound morning commute Everett-Seattle and evening north-bound Seattle-Everett. A close second-worst commute is I-405. Especially given the on-going sprawl on the East side and Snohomish County, I would prioritize these two corridors over all others. Quick completion of these two corridors will yield the biggest POLITICAL support among the largest populations that are most skeptical of Sound Transit. This support would help fund and motivate support for later projects impacting smaller and/or less vocal political opponents.
NORTH KING COUNTY	Timeline is too long. Need to secure funding sooner.
NORTH KING COUNTY	more transparency on timelines will be critical. I will end up paying much more than the 200 and the services will not directly benefit where I live. However adding a station at Boeing Access Road would improve my commute and get me out of my car several times per week.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Speed up improvements on C rapid line to increase speed/reliability. Speed up delivery of a Link connection to West Seattle. And include conceptual engineering and environmental clearance for a Link extension south to White Center as part of ST3 to get it 'shovel-ready'.
NORTH KING COUNTY	Ballard should be a higher priority! It shouldn't take 30 years to get transit there.
NORTH KING COUNTY	It would be great to have the light rail to Issaquah completed sooner. I am a professor at Bellevue College and having more transit options for students, faculty, and staff to get to BC would be great. We have a large commuter population coming from all over the greater Seattle area with a real lack of serviceable transit options at the moment. For example, I live in central Seattle, and if I were to take public transit to work it would take me three buses and about an hour and a half to get to work. So I drive. Please consider connecting Bellevue College more broadly.
NORTH KING COUNTY	These timelines are absolutely bonkers, Minneapolis/St. Paul built similarly sized light rail projects. These projects went from approval to operation in under 4 years. I would be much more supportive of taking on additional costs, if these projects were going to benefit me during my working career. I'm 30 right now and will be 55 by the time the one project that would improve my commute is completed. I hope to be retired or dead by that point. So I would see ZERO ROI.
NORTH KING COUNTY	The timelines are ridiculous. We've been paying for this since 1996. Ballard is changing and growing rapidly and light rail needs to be here asap in order to help small businesses. We are paying incredibly high taxes, the new minimum wage, and now our customers have to pay for parking and this hurts our businesses. Bring light rail here so we can help grow our businesses.
NORTH KING COUNTY	Because of economic, environmental, and livability issues this timeline should be speeded up.
NORTH KING COUNTY	Look at neighborhood population projections. Ballard and West Seattle are bursting at the seams from a density standpoint compared to suburban development. These two areas of Seattle need priority in the project sequencing.
NORTH KING COUNTY	This whole project needs to be completed in 3-5 years. No one is going to vote for a project that is 8-25 years out, that is nuts! Sell bonds for the whole project, interest rates are at historic lows. Do the project 27/7/365, two 12 hour shifts, straight time with bonuses for on time/early completion and bonuses for under budget. Start to think outside the box and get some people in WADOT who know what the hell they are doing.
NORTH KING COUNTY	It is very important to me to see that the Ballard - Seattle light rail be completed within 15 years and that there will be a tunnel under Salmon Bay waterway to provide light rail that will not require a bridge to Ballard. Additionally there should be a light rail station in Interbay that will be large enough to provide access for Magnolia and West Queen Anne residents with local bus transportation to the Interbay light rail station.
NORTH KING COUNTY	Please try to bring light rail faster to eastside 25 years is too long!!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I wish these projects didn't take so long to complete. That can be frustrating as a commuter. It would help to have a good marketing campaign that regularly updates progress so that people can see the momentum and focus on the benefits of the end result, rather than the inconvenience of the construction process.
NORTH KING COUNTY	That the Puget Sound region is without a sophisticated rapid transit system is embarrassing and beggars belief. Any investment in BRT should be short-term, as a precursor to future light rail, but should IN NO WAY be considered a replacement for it. The alphabet lines are minuscule dent in the level of public transit we need in this region. All efforts should be made to complete the light rail lines earlier--kudos to completing the new stations early.  I am in favor of 130th St station in the neglected northern boundary of Seattle. It would likely go far to reinvigorate that neighborhood.
NORTH KING COUNTY	22 years is far too long for rail to Ballard. Also I believe Ballard to UW rail service should be considered earlier.
NORTH KING COUNTY	I would support earlier completion. Local neighborhood bus service should always be a priority and never cut as it is the sole transportation of many people in my S. Seattle neighborhood.
NORTH KING COUNTY	All of it just takes too much time !!!!
NORTH KING COUNTY	Speeding up the completion times is extremely important--of course safety and environmental needs and concerns must be integrated into the process, but the mass transit in and around Puget Sound needs to be moved up on the priority list. The well-being of the region depends on it.
NORTH KING COUNTY	22 years to get light rail to Ballard is much too long. While I agree it's important to bring rail options to farther communities which have little recourse but driving, Ballard-downtown is a huge population corridor, close enough and congested enough to have very high usage. Unless the existing bus rapid transit line is able to fully serve existing demand, leaving last-mile gaps in the urban core is a huge mistake and very costly in terms of congestion and numbers of cars on the road.
NORTH KING COUNTY	Light rail extension to Everett and Ballard should be given higher priority than currently planned, aiming for 15 years instead of 22 and 25 years respectively.
NORTH KING COUNTY	25 years is too long. We've been waiting too long as it is. We need better funding in order to speed these projects up!
NORTH KING COUNTY	The time frame for these projects is insane. I'll be dead or in a retirement home before it comes to Ballard. Technology will be outdated in 20 years and we still won't have light rail! This is building 20th century technology in a 21st century world. You have to figure out a way to do this faster and cheaper. Even rapid bus system is a better deal.

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>I urge faster completion of the Ballard to downtown segment. Ballard has seen rapid density increases without infrastructure improvements. I'm opposed to the bridge over the Ship Canal and ending the light rail on 15th. It would be less disruptive at 20th and more in the heart of Ballard.</p> <p>Can the environmental studies be completed more quickly? Asking people to pay taxes for 15 to 20 years before seeing major benefits will be a hard sale.</p>
NORTH KING COUNTY	<p>Ballard is the fastest growing community in Seattle, with the most potential for continued growth for business, residential and office use. Ballard needs to be made a priority.</p>
NORTH KING COUNTY	<p>The two projects I feel are most important are also the two projects farthest out in your schedule. Your priorities and mine differ.</p>
NORTH KING COUNTY	<p>The timeline is unacceptable, but the tax plan seems justifiable.</p>
NORTH KING COUNTY	<p>The timelines are far too long. Especially the Ballard project. The need is extremely high now and we cannot wait 22 years for service. Population density is far above projected levels now and commute times are out of control. I would be thrilled to ride light rail but I will likely not be around by the time this is complete. Willing to pay more to expedite. I am also not convinced that the Ballard area was given fair consideration during analysis of need.</p>
NORTH KING COUNTY	<p>I believe it was an oversight not making Graham Street Station in the first place and that should be addressed immediately as this area is mostly resided by immigrants and people of color whose voices may not have heard in the initial light rail plan discussions and it was not inclusive for all parties affected</p>
NORTH KING COUNTY	<p>The timelines are ridiculous. With all the developer projects the city has allowed in West Seattle WITHOUT any consideration for existing infrastructure, West Seattle needs better mass transit now. The fact that you're talking about this 17 years from now...and lumping it together with Tacoma is absurd.</p> <p>West Seattle should be online before Lynwood/Bellevue and Redmond. They already have numerous paths and freeways to get around. West Seattle only has the bridge.</p>
NORTH KING COUNTY	<p>The sooner these projects can be completed, the better! It's almost disheartening to think i have to wait 10+ years for some of these projects to happen...there must be some creative way to figure out a plan to speed up the process?</p>
NORTH KING COUNTY	<p>Too little too late</p>
NORTH KING COUNTY	<p>It is completely unacceptable that it takes a quarter of a century to build usable light rail. This is not new technology, why does it take 25 years to build light rail? This is a much more urgent problem. It took a decade to build up a nearly 100 mile system in Washington, D.C. Why is it that ours is going to take 2.5 times as long for less rail???? I just cannot fathom what beurocratic mess this must be if it takes 25 years to build some trains. What you need to do is ask for the amount of money it would take to complete this project in a resonance amount of time, instead of delaying it over 25 years.</p>

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I would be fine with paying \$500 per year or more if we could get these projects done much faster. Having to wait 22 years to get light rail to Ballard seems unreasonable.
NORTH KING COUNTY	I would prefer that some of these timeframes be accelerated
NORTH KING COUNTY	The timeline to reach places like Paine Field and Everett is what's going to kill this project. Simultaneous surface-level construction projects for Light Rail, so that service from SeaTac to Everett can begin in 10 years instead of 25, is the only way this project will get widespread regional support. Even though the tax hike will be steeper, it will also be shorter duration. Do it quick--like a band aid!
NORTH KING COUNTY	Dont add a station on 130th. Too many stops is bad for transit speeds. Northgate and 145th is good enough spacing.
NORTH KING COUNTY	West Seattle should be prioritized higher. Seventeen years is a generation and an unacceptable timeline.
NORTH KING COUNTY	Ballard and Everett should not be last in the list. There is so much traffic alleviation that can occur if you build these stations earlier. It is extremely important to have Boeing in Everett be accessible on the light rail and integration of Ballard into the line is important for city traffic and integration.
NORTH KING COUNTY	I hope that Ballard can be connected to Downtown sooner than 22 years from now. I understand that there are things that make this task difficult, but red tape should be bypassed whenever possible to expedite the process.  My wife and I used to live in Berlin, Germany. Seattle has a very long way to go before we can say that our public transportation is on par with where it needs to be, especially for a city that is growing as fast as Seattle.
NORTH KING COUNTY	It is ridiculous to leave Ballard so late in the plans. With all the new building in Ballard & new businesses buses are frequently at capacity. I'd take light rail downtown every day if I could. The first priority should be light rail within the city particularly the west side of town. There is nothing availalbe for us in Ballard.
NORTH KING COUNTY	Light rail is more important then buses, new mass transit should never be dependent on or effect traffic negatively. Build trains, then tweak buses to support. I would pay more for quicker timelines say 10 years. I.E. More projects being built by contractor teams simultaneously. May vote no based on current timeline more aggressive building is needed. Intrigued by the alternate routing planned by the Seattle subway project. Seems to service population cores more directly rather then needing transit to get to the transit.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Transportation is an emergency situation in the Puget Sound area. Your timelines are so far away that it gives me no hope at all that I will be able to get rid of my car and quit driving to work. I hate driving. I want to use transit but I live in South Park and we two routes that are at long intervals and give us little choices. They are also always late. I have walked from 1920 Dexter Ave N all they way to Lander St & 4th along the bus route 132 (before it was taken off of Dexter) without seeing one bus. That is how long the time periods between service combined with delays are. It is a ridiculous joke. I thought that the changes to the route would improve times but it is still always late. I don't know if I can vote yes for a plan that doesn't include any hope for my neighborhood and wouldn't have any usable progress for eight years and up to 25 years. I am pro tax and will happily pay a tax or taxes that will fund quicker more inclusive solutions. I have no problem with paying my share of taxes for our community, but our community needs to include my neighborhood!
NORTH KING COUNTY	25 years is absolutely ridiculous. Elon Musk will have built a colony on Mars by that time, and we can't build a light rail... It's insane. Pretty please, make this go faster.
NORTH KING COUNTY	The only project that personally affects me is the extension of light rail to Boeing in Everett. 25 years is a long time to wait. The pyramids were built in 20 years.
NORTH KING COUNTY	Expansion of light rail to Everett should be top priority. There is no easy way to commute from Seattle to Boeing by public transportation and the parking situation there is ridiculous. We need light rail NOW, not in 25 years. In fact, at the current rate they are cutting employment numbers its doubtful light rail would make much sense by then anyway.
NORTH KING COUNTY	Faster! People will not last in this city if we don't decrease the road congestion in the next 5-10 years.
NORTH KING COUNTY	It is unacceptable to wait 25 years for light rail to Everett. There are tens of thousands of Boeing employees that we could get off the road if that is finished sooner.
NORTH KING COUNTY	Light rail should have been done years ago. 25yrs from now may be too late
NORTH KING COUNTY	I feel like if you doubled the budget to \$100 billion but completed all or more (i.e. light rail on the Eastside from Burien to Renton to Bellevue, etc.) in a MUCH shorter timeline, like 18 years MAX, you may get this passed. But as it is now, I worry it won't pass. I would use it from Northgate to work in Boeing, but it won't be complete until I'm in my 50's and nearing retirement, so what's the point? What is in it for me? And I fully support light rail and commuter rail. Especially since I don't have a good option to use mass transit as is.
NORTH KING COUNTY	25 years before the system serves Everett... really? Boeing alone employes 30,000+ at their Everett facilities, and those facilities are losing more parking stalls each year, as mandated. And, how on earth are Marysville and the Arlington areas not included in the system? Pay attention dammit! Have you not noticed the lightning quick pace of the numbers of new.homes and businesses north of Everett? "No" you say? Well, just try to get from Boeing to Arlington on any weekday afternoon... hint: pack.a lunch, and be sure to use the restroom before you do.
NORTH KING COUNTY	Expedite the extension of light rail to West Seattle sooner than 17 years from now, West Seattle is the largest population in Seattle and is depended upon the capacity of the West Seattle bridge.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>"Light rail to West Seattle and Tacoma would be complete within 17 years, light rail to Ballard 22 years, and light rail to Everett and Issaquah in 25 years"</p> <p>I'll be dead. Ditch the BRT and get on with light rail. The population of this region will increase so as to make obsolete any plans formed now. Another tunnel?? Will you recycle Bertha?? Oh come on. Transit oriented development??? The problem is development that has no or little relationship to transit. Serve THAT and NOW. West Seattle and Ballard both have been overdeveloped based on TOD plans for Monorail and Light Rail, and there is NO SERVICE AVAILABLE FOR DECADES. Bloody hell.</p>
NORTH KING COUNTY	<p>In 15 years our transportation system will be revolutionized by self-driving vehicles, electric vehicles, and possibly even drones. While I've been hugely supportive of rail in the past, I believe the city needs to be looking towards the future of transportation and not over-invest in potentially outdated rail and bus technology.</p>
NORTH KING COUNTY	<p>I think it all sounds great, but the timeline is so long!</p>
NORTH KING COUNTY	<p>Please build the separate tunnel downtown earlier. Don't build additional stations on existing lines. Make Ballard line grade separated (tunnel or elevated, not street level) for reliability and speed. Existing line is really slow and takes longer in than a bus. Please prioritize travel time with the new lines. Consider a people mover (a moving walkway like in the airport) so people don't have to walk as far and can get to the rail faster). Thank you for your time and considering my comments.</p>
NORTH KING COUNTY	<p>Traffic and congestion in the downtown Seattle area should be improved before work starts on projects in Tacoma and Everett, not the other way around.</p>
NORTH KING COUNTY	<p>I live near the Othello station and I love light rail. But I don't think the east side should come before Ballard and West Seattle. The east side already has its Microsoft special busses and most of the people that live over there are well off and prefer driving anyway. We need transit focused in the south end and accommodating places where there is very little parking, encouraging people to take transit. This will boost local communities and give lower income folks access to more of seattles neighborhoods. I'm willing to pay for this plan, and pay much much more than you are proposing. I don't make much money, but this plan (modified to focus on south and on areas where commuters are heaviest) needs to be accelerated. How much would it take to cut all those timelines in half? Is it as simple as doubling the cost? Great, I'm willing to pay. This is what you should ask voters for- go big, bigger and see what they say. I know people will vote yes if it means we have this plan in 5-15 years versus 8-22. Thank you, btw, for being so awesome. Light rail is our beacon of hope.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>I strongly support robust investment in transit throughout the central Puget Sound region, with particular emphasis on serving urban centers that are walkable and bikeable. These are the most important investments our region--and Washington state generally--can make to our transportation system, improving mobility for people and goods, benefiting the environment and economy, connecting people to jobs, and giving people a choice about how they get to the places they want to go. So crucial are they that I cannot emphasize strongly enough how these transit investments could not be implemented a moment too soon. I also wish to voice my strong support for the use of ST3 funds to make non-motorized transit access improvements to any facility in the network that needs them--whether built by ST1, ST2, or ST3--so that more people can reach high-quality regional transit by walking and bicycling instead of driving.</p> <p>And so, while I strongly support the package of projects being proposed in this survey, I share the interest of many in the community (well-documented by a variety of media) to see these projects completed more quickly. I do not believe the timeline should detract from our region's support of this plan, but I do believe Sound Transit should do everything that the agency can to expedite the design and construction of these new light rail facilities. Quality takes time, I understand, but I also understand that the agency is being conservative in its estimates and financial management, and that more can be done to ensure delivery even just a few years sooner than indicated, which would make a world of difference for many voters. For that reason, I believe Sound Transit would do well to explain clearly to voters that it is possible for their local projects to be delivered more rapidly, but that it will require the cooperation and collaboration of their respective city councils, mayors, and staffs. This would demonstrate good will to the public, who we should be thankful are clamoring for better transit, and whose full support we need at the ballot box this November to ensure that our region does not repeat its mistakes of 1968 and 1970 that require our consideration of this package now nearly forty years later.</p> <p>Keep up the good work.</p>
NORTH KING COUNTY	These projects should be done faster.
NORTH KING COUNTY	I think the north/south projects and east/west projects should be given faster time lines and leave the West Seattle and Ballard projects for after the others are completed.
NORTH KING COUNTY	We should try to speed it up and do the projects more quickly if possible.
NORTH KING COUNTY	Why must Ballard connection take 22 years? We should prioritize to connect the city of Seattle and lower the timeline for that project.
NORTH KING COUNTY	I used transit daily. I am a huge transit advocate. But I can not support the current timeline. It MUST happen faster. There are ways to get it done much quicker.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	22 years to connect Ballard to downtown light rail? 25 years to completely connect the light rail route from Downtown Seattle to Eastgate (via Bellevue)? Honestly, it's really hard to get on board with the idea that what I see as very key connections are still over 20 years out. Is this really the best we can do?
NORTH KING COUNTY	The timeline seems a bit far in the future for those of us who are dealing with a constant problem right now. There is too much emphasis placed on reducing lanes for busses and bicycles as of now and it seems to be a focus of the ST3 plan. That is an asinine focus as busses are consistently late or just absent. The timeline needs to be improved to fit the growing demand of this city. We are already about 30 years behind where we should be and putting it off for many years to come only encourages less support and more frustration. Consider adjusting your timeline for construction without the unnecessary filler language/focus of reducing what we are already lacking.
NORTH KING COUNTY	Projects with more than a 10 year from today finish date should not be part of the funding package. Technology will change dramatically and there should not be planned taxes for such far out projects. The proposed plan looks like an attempt to get voters outside Seattle to vote for plan, while having Seattle residents pay for projects that will do little to reduce or even slow down congestion in Seattle.
NORTH KING COUNTY	I believe that of these projects, light rail expansion to West Seattle will be most influential. This being said, I think that you should consider moving west Seattle to the first or second stage of st3
NORTH KING COUNTY	The timeline should be 'moved up'.
NORTH KING COUNTY	How can Ballard be 22 years out??? Seems to me that the largest population centers should get light rail first, not last.
NORTH KING COUNTY	This is too little too late. I grew up in Seattle and am shocked that we are in a situation in which we have some of the worst traffic in the nation and such a poor plan. 25 years? Really? This is our leadership? Good luck keeping up the economic boom in this city.
NORTH KING COUNTY	The light rail to Ballard taking 22 years to complete is not realistic with how quickly Ballard is growing. Even 10 years would be too late. Can this not be placed as a higher priority? Watch what happens the next two weeks while 99 is shut down. This plan is not realistic with the current increase in population. Our roads won't be able to keep up either so public transit has to step up.
NORTH KING COUNTY	All studies should be done first and then Burien-West Seattle and Ballard-Kirkland-Bothel Light Rail lines should be built.
NORTH KING COUNTY	Two points: get the projects done faster. We should have had this infrastructure years ago, we can't wait 25+ years for completion. 2) make sure to include parking at stations. It's a nice concept that people will simply be able to walk to light rail, but not realistic or feasible.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	This plan, as currently proposed, is deeply flawed and a measure that I cannot support. Your continued use of regressive taxing in coordination with a completion schedule that puts the most important projects last in line make this a proposal I cannot support and one that I will actively campaign against. The Ballard & West Seattle projects should be completed in a MUCH shorter time-frame. If this proposal is not significantly modified, it will not pass.
NORTH KING COUNTY	Move all Seattle projects to the earliest timeline possible! You need dense urban neighborhoods to make transit most cost-effective.
NORTH KING COUNTY	I understand the complexities of funding and the scope of work, but ST would probably garner more support with a tighter timeline. Either way, I'm in!
NORTH KING COUNTY	Get it done sooner!
NORTH KING COUNTY	Build it all right now!
NORTH KING COUNTY	I fear the timeline is too long. The proposed system (particularly the light rail and the expansion of the Sounder) are critically needed improvements to infrastructure that honestly are needed now. In 25 years they dynamics of the greater Seattle Metro area will be changed significantly from where they are now. Furthermore, I think there is a great risk associated with expending this level of effort and funding knowing that they system designed today may not be sufficient to support the needed capacity that will exist when it's completed. My final concern is that while the bus system and access for pedestrians and bike are certainly part of the solution, there is too much of a focus on them. The Seattle Metro area needs a non-road based means of transportation such as the light rail and the Sounder. While this certainly is a massive capital investment it is critical and I believe stands the best possible chance of making meaningful and lasting impacts on the Seattle transit system. Overall, I am a huge supporter of improvements to the area's infrastructure and think that \$200 / year is a small price to pay. The key, is the system we're designing and implementing must be designed thinking ahead to the next 50+ years where I fear the system proposed is an excellent solution to today's problems arriving 25 years too late.
NORTH KING COUNTY	West Seattle is urgent.
NORTH KING COUNTY	I live the ambitious plan, but would strongly encourage everything possible is done to speed up the timeline.
NORTH KING COUNTY	Both increasing bus service to West Seattle and adding light rail as soon as possible are a priority to me. Buses as a means of reliable, frequent transportation to downtown. Light rail to increase speed and reduce traffic.  Thank you.
NORTH KING COUNTY	Ballard to downtown transit should be prioritized immediately in light of Expedia's moving into the area. Otherwise, we will have complete gridlock, which will affect other parts of the city both north and south.
NORTH KING COUNTY	West Seattle and Ballard are underserved and growing rapidly. With the change in 99/Viaduct, it's going to get worse quickly. We should accelerate these projects.
NORTH KING COUNTY	This is way too slow. The pace needs to be picked up even if it costs more. That the next extension north is not going to open until 2021 is very disappointing.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Please do this faster. Get crazy and cut the time line in half.
NORTH KING COUNTY	This project can't wait this long. It's already way behind the need and demand. Ways of accelerating the project timeline must be found to keep this region viable.
NORTH KING COUNTY	I've heard lots of folks in my neighborhood say they won't support (vote) because they'll be dead or retired by the time we get light rail in Ballard, which is growing insanely rapidly and without apparent additions in service (or parking, so presumably the city wants all these new residents to use transit). I myself will be retired by the time the Ballard light rail comes online. As someone who takes the bus to work daily, or commutes by bike, I don't see an incentive to spend my money on a project that will never improve my commute from one of the fastest (if not the fastest) growing neighborhoods in Seattle. The order is simply nuts.
NORTH KING COUNTY	Figure out a way to get light rail to Ballard FASTER. I can barely find a spot to park my car in front of my house because the City of Seattle is giving building permits to developers to put three homes on one lot with very little parking on the lot. This is in addition to allowing permits to build apodments/microhousing WITH NO PARKING. What the hell?
NORTH KING COUNTY	Light rail in Seattle need to be built faster!
NORTH KING COUNTY	The light rail portion needs to happen faster, especially the west Seattle, Ballard and Bellevue projects.
NORTH KING COUNTY	Let's move towards a modern subway as rapidly as possible!
NORTH KING COUNTY	increase funding to speed up timelines
NORTH KING COUNTY	I would have answered "strongly support" to all the questions above if the timetable for building the intra-Seattle elements of the light rail system wasn't so lengthy. Seattle needs reliable, frequent transit yesterday, not 22 years from now.
NORTH KING COUNTY	Although I am most interested personally in the Ballard, Downtown, West Seattle Light Link connections (which I noticed are the last to come on board). I am so supportive of any improvements. . . I would always vote for whatever package is presented. I do not know where the most ridership would be gained. . . east side Renton to Everett seems to be the biggest bottleneck (not mine) so I can understand why those projects are first. Sigh!
NORTH KING COUNTY	It is absolutely ridiculous that Ballard is being pushed back so far. There are tons of people moving here and there is no reasonable way to get all these people downtown or to the UW. It's shameful that this line is being delayed and deprioritized.
NORTH KING COUNTY	do it quick with simultaneous projects all over the region
NORTH KING COUNTY	The project takes far too long. Would be willing to pay more to see light rail come online faster.
NORTH KING COUNTY	While recognizing that large capital projects can take time, the 25 year timeline on some light rail elements is of grave concern to me. Other similar projects (link extension, for example), did not/will not take 25 years to complete. 25 years seems an unreasonable amount of time to stay stuck in traffic while a transit plan slowly inches forward.
NORTH KING COUNTY	I'd like to see transit options within Seattle city limits accelerated...other than that, bring it on! But faster, please...let's get the money to speed this up!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I am completely on board with the ST3 draft plan, however I am concerned that the timeline is too long. I know that funding is a major setback when it comes to how quickly something can be designed and constructed. The Seattle area is so congested and in 15-20 years will be completely overloaded. Bus Rapid Transit works best if the buses have their own lanes that cars cannot physically enter. Just see Amsterdam and Copenhagen. Their buses basically fly through town and it's because it is safer to put the bus in it's own curbed lane. Implementing that first would be a good step in attracting commuters to use public transit because the buses would be on time and would not sit in traffic like cars. That will alleviate major choke points in congestion which would hopefully get more people on board to pay more in taxes to fund the light rail. We desperately need the light rail as quick as possible. My best guess would be no longer than 10 years. The light rail is just the first step and should not be considered to be the end all be all for Seattle-Tacoma's mass transit of the future. I consider light rail a huge leap in the right direction, but I know it is a building block for what it will become in the next 100 years in Seattle.
NORTH KING COUNTY	Prioritize projects to expand light rail within Seattle. Bus transit makes sense outside the city for distance commuters, but West Seattle and Ballard will have the density in 10 years to make light rail very economical.
NORTH KING COUNTY	We need a faster solution to the traffic, waiting 17 yrs for a light rail so I can ride to work is unrealistic option.
NORTH KING COUNTY	Need downtown transit options (rail)
NORTH KING COUNTY	Too long to complete.
NORTH KING COUNTY	Way too slow! We want light rail in 5-8 years, not 17! I'll vote for whatever is necessary to lessen the time to get these projects done.
NORTH KING COUNTY	Ballard light rail should be completed much faster and given a higher priority in the plan. I also think that Sound Transit should consider the Seattle Subway "Metro 8" idea of running a light rail route under Denny Way to connect Lower Queen Anne and Capitol Hill, and also consider a route to connect the station at UW with the future station in Ballard.
NORTH KING COUNTY	The delivery dates make most of the investments obsolete before being in-use...technology will run this over. use small, nimble electric-only buses to interconnect development centers. The Federal Gov. should chip most of these costs as it is the beneficiary of the improvements.
NORTH KING COUNTY	Anywhere possible the timelines should be shortened. Too many years have been waster getting to this point. We need it much sooner that 12-25 years.
NORTH KING COUNTY	These timelines need to be accelerated. Seattle cannot wait 17 years and 22 years for light rail connections to West Seattle and Ballard, respectively.
NORTH KING COUNTY	TOD at transit stations should be a priority
NORTH KING COUNTY	There is NO reason why this project should take 25 years! State government should use ALL of its powers to expedite permitting and building, including eminent domain and taxation.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Maybe there isn't capacity in the tunnel, but why don't you do a Ballard to UW line? it would get people downtown a lot faster and more reliably than currently and connect them to Capitol Hill and UW. It avoids all the issues around passing through interlay and crossing the canal.
NORTH KING COUNTY	faster!
NORTH KING COUNTY	25 year completion time is too slow. Should be expedited. I'd rather see a larger investment up-front and on taxes to get ST3 completed within 15 years.
NORTH KING COUNTY	Man, we needed this like twenty-five years ago
NORTH KING COUNTY	You guys are on the verge of [explicit] this up. Build out the projects in the city first and then extend the spine. Ballard, West Seattle, 130th Street station, Graham Street station, Ballard to UW connection - all of these are way more important than extending the spine north and south. You have erred on the side of regional buy in for too long, at the expense of the city. If I had a child TODAY, s/he would already be in college before we could ever take light rail to Ballard. That's INSANE.
NORTH KING COUNTY	It's pretty frustrating how long this stuff is planning to take. Better late than never.. but wow 25 years?
NORTH KING COUNTY	25 years is too long to wait!! I and everyone I know would pay much more in taxes to build light rail now. Please, please, please: cut the time in half!!! Once Seattle gets a taste of light rail, they will pay for it!  Build an excellent light rail system in Seattle and people will move back to the city.  I will not get out of my car to ride a bus, but I will get out of my car, sell my house, and move my family to a new neighborhood to ride a train. Seriously. That's how much better light rail is than buses.
NORTH KING COUNTY	With this proposal, I will be 72 years old before light rail comes to West Seattle. Bus service in my neighborhood is very poor. Basically it serves morning and evening rush hour. The Junction is a few miles away, so taking the bus means driving to the Junction and parking. This discourages bus use. In addition, I am concerned that the funding has a huge negative impact on low and middle-income households.
NORTH KING COUNTY	25 years is stupid long. Rome wasn't built in a day, but there's just no reason it should take a quarter of a century to get these systems in place.
NORTH KING COUNTY	It needs to be done sooner. Waiting 25 years for Seattle to have a "meh" transit system is depressing.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

<p>NORTH KING COUNTY</p>	<p>I am dissatisfied with the delivery timelines for the proposed light rail projects, in particular the Ballard line. The Ballard area is expected to continue to grow rapidly and without major improvements to the RapidRide system -- read bus only lines along the entirety of 15th -- the residents will have no viable way to get downtown.</p> <p>Also, please buck the political pressure to route the Everett line to the Paine Field. The commuters heading there would be just as well served by rapid bus lines and the additional transit time from Everett south will harm the overall efficiency of the system. If significant air traffic eventually begins to use Paine Field, a spur line could be built to move those passengers.</p>
<p>NORTH KING COUNTY</p>	<p>I am extremely disappointed how the committee on ST3 has focused only on the areas with high incomes. I am someone that benefits from living in a less desired area with lower cost of living in comparison to the city (Seattle). I look at the area in Rainier and how that area has thrived due to the light rail that goes through the area. I am a resident of Delridge and I am extremely disappointed how we continue to neglect the area that has the most ridership in the area. I see ST3 as a waste of my tax paying money to help develop the areas that already have pretty great infrastructure on transit.</p> <p>Lastly, the plans to expand further South and further North is just ridiculous. The fact that Redmond is chosen first for the light rail and Federal Way is just ridiculous. What about the people that are having issues with the travels from Seattle to Bellevue? I am young but, 25 years for completion on a project that "we" the tax payers will pay until we are old and grey. Lets be real with the plan. Why, should "we the people" pay for something that we will not see until we are 60? Why, should we be funding the project now when "we" will be retired? If, we do not fix the transit problems in the next two years businesses will pull out of the city due to the traffic.</p>
<p>NORTH KING COUNTY</p>	<p>Where possible, increased application of BRT to fill the gaps while LINK is being completed would help alleviate some of the region's current pressures (I've no doubt that in 20ish years, our completed transit network will be a thing of beauty, but if the region crashes and burns due to gridlock in that time the ultimate ridership of the network will be underwhelming). While the plans thus far laid out in ST3 are the solution to our problems, it would be nice to have some more palliative measures while the solution is implemented.</p>
<p>NORTH KING COUNTY</p>	<p>It is imperative that West Seattle and Ballard, the two immediate and densely-pocketed bedroom communities to these two neighborhoods deserves to be first in line for light rail. They both sit adjacent to the city, and in the absence of light rail, both are first to clog the city with traffic. The overall project should start from the neighborhoods closest to the city's inner core and expand outwards. The current plans are too scattershot, and will be unfair to taxpayers surrounding Seattle who pay the highest real estate taxes to wait 17 and 22 years to get mass transit in the form of light rail. Fiscally unfair and logistically unsound. West Seattle and Ballard must be first on the list for all mass transit. I would sell my house and move otherwise. This plan will push people away from Seattle.</p>

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	17 years to build light rail between W. Seattle and Tacoma? How can I be sure this project isn't a money pit? [name], Seattle They're building skyscrapers in the middle of downtown in about a year+.
NORTH KING COUNTY	Make Ballard top priority! We need light rail from downtown to Ballard now, not in 22 years! Many reports have been created to make a strong argument that downtown to Ballard will have one of the highest ridership rates on the west coast. Thanks!
NORTH KING COUNTY	This region is growing at a alarming rate, new buildings are growing in every community, with that being said how is it that these projects will take upwards of 25 years to complete? There should be some urgency in moving all of these people who are currently crowding our roads.
NORTH KING COUNTY	Wish this would have happened 20 years ago
NORTH KING COUNTY	22 years to get to Ballard, one of the most rapidly growing areas that is experiencing some of the most strains of Seattle's recent expansion? You're joking... right?
NORTH KING COUNTY	I'm very disappointed in the timeline for adding light rail service to Ballard. I've lived in Seattle (Ballard) my whole adult life, and I've voted "yes" for every transit proposal on the ballot. After waiting my whole adult life, you're telling me I have to wait another 22 years??? I will be 66 years old when service starts, almost too old to walk to the station. Meanwhile, the anti-transit voting suburbs get service (which they largely don't want and won't use) before I do? This is seriously messed up, and frankly I'm not sure how I'll vote this time around.
NORTH KING COUNTY	Some people think the proposed timelines are too aggressive, while others think they need to be less so. While it is apparent that more transit is needed, there also needs to be a better way to fund it--using property or sales taxes is not only quite regressive in the eyes of many people, but the revenues from them are subject to economic conditions. However, they are the ONLY methods available at this time, thanks to various voter-approved initiatives and legislative policies. What is desperately needed is a total re-think on how revenue is generated in this state (in terms of tax structure) and how those revenues are distributed to the various needs expressed by the people living in this state.
NORTH KING COUNTY	I know that the timeline thing is hard, but I really would love to see Light rail be the most emphasized part of this plan! I am bummed that one never got put on 520. That should be pushed in future dates.
NORTH KING COUNTY	Improving timeline across the board will help ensure support.
NORTH KING COUNTY	The timeline is much too long. Ballard/North Seattle (like other areas in our city) have been upzoned for density for over a decade. Upzoning came with the promise of transit, on a model of transit-oriented development. However, with the exception of some limited investment in metro/rapid-ride we only received the density part of the equation. 22 years is much too long to wait, we are willing to pay for transit and there are opportunities to tax development for transit that do not seem to be on the table.

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	FASTER
NORTH KING COUNTY	8 years is too long a timeline for the first phase. How can this entire plan be sped up?
NORTH KING COUNTY	Even with experience working on light rail projects and knowing the commitment of time it takes, I am of the mind the Sound Transit should be able to leverage past experiences and optimize ways to deliver projects faster. 22 years for Ballard seems absurd given the annual cost we are being asked to consider. Inside of Seattle, I've heard property taxes will be more in the \$400 range annually. For that kind of money, I'd expect service sooner to be able to realize the value of committing to a yes vote. I very strongly support light rail and regional expansion, but I am having trouble convincing myself that this is a good package that deserves my vote.
NORTH KING COUNTY	Ballard to Downtown needs to be built ASAP and with complete grade separation. It has the highest ridership potential and lowest cost per rider of any proposed line. Additionally, you need to propose the Ballard-UW line, because currently it is nearly impossible to move east-west in Seattle. Additionally, the massive focus on building park-and-rides in the suburbs is a gigantic waste of money. Parking spaces costs hundreds-of-thousands of dollars per spot and serve only to enhance suburban sprawl, while taking money away from more needed projects serving the denser, more populated regions.
NORTH KING COUNTY	The timelines are way, WAY too long. If it is possible to pay more to expedite this I and I think others would support that.
NORTH KING COUNTY	Because of city zoning decisions made a decade ago, Ballard needs light rail yesterday. I cannot support a plan that doesn't accelerate that timeline.
NORTH KING COUNTY	Great plan on paper. Terrible timeline. Should bring the projects in under 20 years at the maximum and shoot for 15. Ballard to Downtown and West Seattle to Downtown must be grade separated! And pls. add \$\$ to study Ballard to UW and W. Seattle to Burien. The station at 130th should be strongly considered.
NORTH KING COUNTY	Link Light Rail should reach Everett by 2031, NOT 2041.
NORTH KING COUNTY	For the love of god please Fast track this. It is absurd to me that seattle is one of very few cities of its population density that has no reliable non-commuter mass transit throughout the metro area.
NORTH KING COUNTY	I am willing to pay MORE if the project could be expedited and the timeline shortened. Ballard should NOT have to wait 20+ years to use Link Light Rail.
NORTH KING COUNTY	I think it would be much better with the help of the International District/Chinatown TransitLink Station, I think that between Downtown Bellevue and Downtown Seattle would become the best connecting TransitLink service ever in the very near future.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>At \$50 billion and 25 years, is light rail on the right track?</p> <p>It's a great idea but at a great price of time and money too.</p> <p>If 4 years and 7 billion project from LA to Vegas is doable, imagine that with \$50 billion and 25 years, we probably can ride the Chinese Bullet Train from Beijing to USA, or at the minimum from CA to LA.</p>
NORTH KING COUNTY	Improvements/additions to bus rapid transit should be done ASAP.
NORTH KING COUNTY	<p>Takes too long, get development money form elsewhere, not just tax payers. Hey here's an idea, an income tax to pay for this!!!</p> <p>Also no one likes transferring. Why not have just one system on rails, so trains, link, and streetcars are all using the same equipment.</p>
NORTH KING COUNTY	If it all possible, this project needs to be sped up in order to benefit the people who live here now and not the people who will live here in 20 years. We are already 50 years behind other cities around the world when it comes to public transportation, and more emphasis needs to be put on changing that NOW as opposed to long term.
NORTH KING COUNTY	I would happily pay more to have the timeline of these projects accelerated. I think many of my neighbors feel the same way.
NORTH KING COUNTY	25 years to complete any part of this plan is unreasonable. PERIOD! Please make considerations for parallelizing the development - even if it increases the cost.
NORTH KING COUNTY	I'm surprised at how on-time the expansion to Capitol Hill and the U District were completed - it's remarkable.
NORTH KING COUNTY	I oppose the timeline for the Ballard light rail project. Ballard is extremely high density and is continuing to grow. Waiting 22 years for light rail is unconscionable. The timeline needs to be moved up significantly to garner my support.
NORTH KING COUNTY	Please get light rail to West Seattle sooner.
NORTH KING COUNTY	I have lived in Ballard for 15 years and have seen the last light rail rise and fail, and take out businesses on 15th and 65th in the process. It's appalling with the growth in the NW of Seattle that Ballard's timeline is 22 years. REALLY???????? So I get to pay for it for the next 20 years and maybe die before it's operating? This is crazy, especially when other cities pull these efforts off in a reasonable amount of time, MSP for example. What is wrong with Seattle??? Is it politics? Is it because we get stuck in PC talk and don't move? Is it money? (doesn't seem likely given we fund everything.....) IT'S MIND BOGGLING and unacceptable.
NORTH KING COUNTY	Are you being honest about the cost and timeline? The previous promises were way underestimated and over promised. How true is this scenario? We have seen the cost per person being much higher with all of the new taxes.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Why is Wa opposed to state income tax? Couldn't that more equally spread out the cost of these projects rather than just a flat charge per person? Folks who are making min wage get hit harder with these flat charges percentage wise than those making six figures. Mass transit will greatly benefit folks who can't afford to live in Seattle. I hope main focus on the working class and their getting to work over the more affluent who can afford cars, etc. I hope I can still afford to live here when the light rail opens in West Seattle. Thank you!
NORTH KING COUNTY	I support light rail expansions for Seattle metro area. Ballard/West Seattle should be on Sound Transit's top priorities because we need it really bad. These suburban cities are just nice to have but Sound Transit should focus on Seattle first to improve the access for everyone since Seattle is growing much faster than any suburban cities. Once Seattle get a decent light rail system that will be able to go anywhere within walk distance then Sound Transit can move on and focus on suburban cities for light rail expansions. Please change the timeline for both Ballard and West Seattle to much sooner so many people would be much happier and more supportive of this plan. Please consider that. Thanks!
NORTH KING COUNTY	Its ridiculous that West Seattle is always at the end of any project when this region's population is booming and transit is already, ALWAYS packed!
NORTH KING COUNTY	Please move West Seattle and Ballard extensions up in the timeline. Keep light rail regional to Seattle... expand bus and heavy rail for connecting Seattle to Everett, Eastside and Tacoma.
NORTH KING COUNTY	I am sure many have already said this, but it is way too slow. Any way to speed this up? I would be willing to pay more to make it go faster. I am 30 and will be 55 years old before you finish. I'll be close to retirement and I haven't even had kids yet! Feels like a lifetime.
NORTH KING COUNTY	Understand the capital cost the design process, but WE HAVE to find a way to cut the timeline. The amount of years forecasted is ridiculous
NORTH KING COUNTY	Speed up the timelines. The proposed timeline is way too slow.
NORTH KING COUNTY	Needs to happen faster due to the growth of the city

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>The Ballard to Downtown Seattle line would be a much better investment, in a dollar-per-rider calculation, than any of these other lines. It absolutely needs to be prioritized to be much sooner. Bus Rapid Transit works best over longer distances on highways, whereas light rail is optimized for in-city routes. I would be in favor of having bus rapid transit to Issaquah and Everett, if we could build light rail to Ballard much sooner.</p> <p>Suburban stations need to be sited near downtowns of these cities, not in the middle of vast park and rides. (Parking garages nearby is great!) Otherwise, there is no ability to travel from anywhere TO a suburban station without a car, and riders won't add to the economy of the region. It would only be built for commuters at specific times of day. This is a use case more appropriate for buses with dedicated lanes, whereas light rail should be used for all-day travel for a variety of reasons.</p> <p>Build Ballard sooner.</p>
NORTH KING COUNTY	Really? 25 years?
NORTH KING COUNTY	Light rail in the major urban areas taking 17+ years? That seems a bit too long-term for most people
NORTH KING COUNTY	I could not be more supportive of transit, and specifically grade separated light rail. However this timeline is ridiculous and asinine. I will vote against this in it's current form. Seattle projects are MUCH MORE urgent than the suburb projects, and should be prioritized, or at the very least follow the same timeline.
NORTH KING COUNTY	FASTER!!
NORTH KING COUNTY	Would sure like to see higher priority place on the link to Ballard since it has always been such a lower priority despite the huge growth in Ballard.
NORTH KING COUNTY	<p>8 years to implement BRT is unacceptable, so I strongly oppose the slow timelines...not the overall goals. But, your survey does not allow the distinction. I don't think BRT is the priority at all except south of Tacoma and north of the Paine Field area. The overwhelming priority in my view is light rail and mitigating the landslides that make the Edmonds-Seattle commuter rail totally unreliable in the winter. The real value of mass transit is not being in the same plane of travel as other modes, so I think buses are nothing more than a Band-Aid between Lynwood and Tacoma. Your statements don't even mention the most valuable aspect of light rail, which is that not only can the trains come more frequently, but you can have an 8 car train during weekday rush hour that transports 800 people at a time and comes every 6 minutes, while a three car train on Sunday morning that comes every 20 minutes will do. Scalability. You can't rely on any form of mass transit that is on the same plane as cars...even if in a dedicated lane. Rain is rain, snow is snow, and accidents move to the shoulder. I will oppose anything that does not move at maximum speed with light rail being the highest priority. Conversely, I will be very generous in support of any plan that places light rail and completion times within 10 years as the priority. It can be done.</p>
NORTH KING COUNTY	Timelines are too long. The timelines need to be shorter.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Ballard and West Seattle will be losing access to downtown Seattle with the new 99 tunnel and tear-down of the viaduct. That will happen in the next few years. Your plan does not offer any relief for 17 - 22 years. The traffic out of WS is already extremely difficult most day and impossible not infrequently. Your plans providing no relief for 17 years is not acceptable
NORTH KING COUNTY	<p>Traffic on arterial streets in Seattle has consistently worsened over time. I have recently returned to Seattle from the Bay Area where I commuted daily via Caltrain and BART. I am thrilled to be back because, honestly, I have missed the incredibly efficient bus system in Seattle. In particular, taking buses out of regular lanes is a brilliant way to encourage ridership. Buses ride on the freeway with every other commuter in the Bay Area and it makes them significantly less attractive.</p> <p>Light rail is vital to the city as it continues to grow. BART and Caltrain make much of the Bay Area accessible to commuters - this is especially important as housing costs have skyrocketed and people must commute further and further to work. Smart transit plans will make the difference between Seattle continuing to have a high quality of life or becoming increasingly unlivable.</p> <p>I think the timeline on the Ballard to Downtown portion of the line should be increased. Ballard has always been a vital part of the city and a neighborhood that is appealing. I am far more concerned about transit within the city limits than I am with transit in the suburbs and believe transit within the city should have priority.</p> <p>Additionally, the timeline for express buses via the shoulder shouldn't take 8 years and I would prioritize this for faster development than any of the light rail projects. A good transit plan needs to include all elements and making the buses faster and more convenient should mitigate some of the impact of longer timelines required for building out light rail. People will ride buses if they are faster than commuting via car, are convenient, and run often. Seattle's bus system has always been great and I'd love to see it built out even more - upgrades should go faster.</p>
NORTH KING COUNTY	I feel like we need to have some quicker wins to get people really excited about this. Ballard and West Seattle are two of the biggest needs we have, and they're so far out in the future that people will get discouraged
NORTH KING COUNTY	Build light rail to Ballard much sooner. The demand is here already and growing. 22 years is a very long time to wait for light rail to Ballard.
NORTH KING COUNTY	Speed it up, build more faster, increase the taxes. I think in this progressive area most people understand that we want to do all we can to avoid the mistakes of other major metropolitan areas by not building out mass transit and linking communities. I'm frustrated that this process won't be completed for quite a few years from now. We need to move quicker, build more. I'm happy to pay my share to see that happen.
NORTH KING COUNTY	The line to Ballard needs to be much sooner! There has been too much uncontrolled development there. Infrastructure needs to catch up.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The timelines for these projects are much too long!
NORTH KING COUNTY	I know there is a lot of work to be done but I strongly believe light rail service to West Seattle and Downtown as well as light rail service from Ballard (and area) to Downtown are extremely important as these areas are growing at a very rapid pace (especially West Seattle). So while I am glad they are in the plans, 17 years is highly disappointing.
NORTH KING COUNTY	Accelerate timeline for light rail
NORTH KING COUNTY	The most important section of this plan is the link between downtown Seattle and Ballard. That fact that it will take 22 years to complete is unacceptable. We voted for a monorail line to Ballard 4 times, the fact that this has not already been completed is a total condemnation of our existing political leadership. People should have gone to jail over this. The idea of "Bus Rapid Transit" is an oxymoron. When traffic comes to a standstill, buses come to a standstill. No more money needs to be spent painting lines on the street under the illusion that it will make buses go faster. Bike lanes that separate bicycles from traffic (like the missing link in Ballard) should be a high priority. Seattle is a bicycle city, or it could be with a fairly small investment to make bike paths safe and to direct them to and from the locations where people work (like downtown and Boeing field). Finally, we have been told time and time again that the sales tax is the most repressive form of taxation. Therefore any proposal that raises the sales tax rate is a non-starter.
NORTH KING COUNTY	Public transportation justice requires a faster timeline. Current timeline absolutely unacceptable.
NORTH KING COUNTY	I think we should do whatever we can do to minimize the construction time of the Ballard line and new downtown tunnel. 20+ years is so far away. Other cities, such as Paris, can build twice as much rail in half the time. What are we doing differently?  Also, I will not support any plan that has at-grade transit to Ballard. Please ensure this segment is fully grade-separated.
NORTH KING COUNTY	I can not understand taking 25 years to complete this. We've been talking about mass transit to Ballard (monorail and now light rail) for 20 years. The Ballard area has had development shoved down it's throat and has been designated an "Urban Village". Developers have not had to include adequate parking in many of the units with the idea that residents can/should rely on public transit, and yet we still have only a mediocre (at best) bus system. According to the King County bus planner, going from my house (in the Urban Village area) to Century Link Field has no identifiable connection because 1) There may be no service available for the day, time or area requested (12:30pm on a Thursday); 2) The point of origin or the destination may be more than 1 mile from the nearest transit stop; or 3) The trip may require an unreasonable number of transfers or is more than 3 hours.  And we're supposed to be okay with this for 22 years??
NORTH KING COUNTY	West Seattle needs to be moved up to the 8 years plan as the bridge is quickly becoming more and more crowded. nothing on the list should be pushed part the 15 year mark

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	A more aggressive schedule is needed
NORTH KING COUNTY	I'm disheartened that many of the earliest improvements are being made to help get people in to Seattle more efficiently, but not move people around the city more efficiently. This seems like it'll create more problems than it solves. How can we ignore light rail to SLU and Ballard until 22 years from now? Tens of thousands more folks are living and working in SLU than they did just 6-8 years ago. Bus service in SLU and downtown barely cuts it now (slow as molasses, unreliable timing, but still overcrowded nevertheless), never mind when Amazon hires 50 bazillion more people! I understand the need to spread projects regionally when drawing revenue regionally, but I think ST needs to also prioritize based on density of areas and not just spreading projects around the region geographically. Doesn't seem like that's happening.
NORTH KING COUNTY	Ballard should be prioritized ahead of other projects since there is a lack of infrastructure currently in place
NORTH KING COUNTY	I think it is important to find whatever reasonable ways possible to speed up the timeline for both the Ballard and West Seattle lines proposed. I also feel that the Ballard line should be fully grade-separated through Interbay. Lastly, while I understand the need for parking in some of the suburban areas, I hope that Sound Transit can focus their efforts mainly on non-car station access (bus, pedestrian, bike, etc) and Transit Oriented Development, as this will best create a path towards sustainability and improved ridership in the long run.
NORTH KING COUNTY	I really wish we could afford to start working on these improvements now and that we worked from both ends (i.e. from Everett South and Seattle North for the Everett section).
NORTH KING COUNTY	Ballard cannot wait. It is overwhelmed by its need for true mass transit. Please make it the top priority.
NORTH KING COUNTY	Best to concentrate on rapid completion of transit within Seattle population centers first to alleviate terrible congestion. Follow the big employers-watch out that Boeing is shrinking before adding too much excess service to their sites
NORTH KING COUNTY	political reality aside...yes, I know we need Snohomish and Pierce counties to vote yes.....get service to Ballard and West Seattle NOW!!!
NORTH KING COUNTY	The Graham Street Station MUST be completed sooner than anticipated in this plan. The lack of a station at Graham Street has hindered opportunities for TOD along MLK and this timeline is an insult to the diverse, low-income communities that are currently completely skipped by light rail. This was supposed to be in ST1 and the people of the Rainier Valley should not be pushed to the back of the bus again.
NORTH KING COUNTY	22 years to connect Ballard to Seattle via light rail is unacceptable. Ballard, and the surrounding neighborhoods, have been one of the fastest growing areas in Seattle in recent history. The growth has clogged streets to the point that an average 3 mile commute can take over an hour. Buses on this route are unreliable and capacity during peak travel times is often non-existent. This is a hindrance to the community continuing to grow and thrive.
NORTH KING COUNTY	The timeline for Ballard is way too long. I am a strong supporter of light rail expansion and attended the ST3 community meetings, but even I have trouble backing a plan that won't come online for more than two decades. I wonder if the U District connection, which seems to offer many advantages, could be completed sooner.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

<p>NORTH KING COUNTY</p>	<p>I have several comments regarding the draft plan:</p> <ul style="list-style-type: none"> <li>- The 2nd downtown tunnel is a necessity for the functionality of the overall system, and should not be funded from the Seattle subarea, but rather recognized for the regional benefit it adds. Share the costs of the tunnel between all subareas.</li> <li>- Improve the Ballard line! Don't give residents of that area a marginal at grade line with a draw bridge. Recognize the long term investment and build it right, even if it costs a bit more.</li> <li>- Please design the Ballard station with future expansion in mind, both north and east.</li> <li>- I'd really like to see "provisional" stations added both to the West Seattle line (continuing south) and the Ballard line (continuing north). The density and growth of these areas should make for very successful additional stops along these lines. If extra money becomes available through savings or economic boom raises more than projected, be ready to capitalize and expand on these higher performing lines.</li> <li>- Place the EIS of more future projects in ST3, so if money is saved over the course of ST3 build out we can get going on the lengthy EIS studies for the next phase of projects, instead of losing several years. This should include at least some of these future routes: UW-Ballard, Ballard-Northgate- Kenmore extension, West Seattle-Burien, Bellevue-Kirkland, Belltown-Capitol Hill.</li> <li>- Let cities and/or private sector build parking based on demand. This should not be such a priority in the ST3 budget. And if you are insistent on building parking, make drivers pay to park. Stop subsidizing their parking.</li> <li>- Make the Everett Boeing connection a future spur rather than divert the whole spine and adding 10 minutes to reach Everett.</li> <li>- Find a way to add the N 130th St station. It'd be an infill station, which keep the costs relatively low, and a logical spot for a station.</li> <li>- Unless Boeing Field has plans to start commercial service, I don't see any reason to add a station at Boeing Access Road. Prioritize the money somewhere else.</li> <li>- Maybe ST can't promise faster timeframes, but develop and share plans for how schedule could be accelerated.</li> <li>- Bus improvements don't get the attention or make people as excited as light rail, but are the best chance for short term traffic relief, so get those lines built fast!</li> </ul>
<p>NORTH KING COUNTY</p>	<p>These timelines NEED to be shortened. I realize its a matter of funding but get the fed to pay more, encourage the legislature to raise taxes on corporations in the state or stop giving subsidies to companies like Boeing so that money can rightfully go to Washingtonians rather than companies that keep firing thousands of employees. Do whatever you can to get these timelines down. I'm a huge supporter of ST and LR but these timelines are ridiculous. Los Angeles just created, funded and developed an extension of their metro in less than 4-5 years. Get light rail up and running MUCH SOONER! Or else the Puget Sound will miss this opportunity and the money, talent and jobs will go elsewhere while we're stuck building a system that is no longer needed.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Important to find a way to accelerate implementation. Strongly oppose building parking facilities; those resources could be better spent improving bus, bicycle and pedestrian access to the stations. Any existing parking at park & rides should be fee based.
NORTH KING COUNTY	I don't understand why it would take 25 years to get transit to Ballard. That is way too slow. With the rate of development in the area we need additional transit NOW.
NORTH KING COUNTY	It would make more sense to focus on extending light rail to West Seattle before Renton/Lynwood, or even de-prioritizing Tacoma to get West Seattle earlier, since these areas already have the option of using the Sounder train. West Seattle has no mass transit options (aside from buses) and is the most in need geographically due to our reliance on a few bridges to get in and out of downtown.
NORTH KING COUNTY	Way too long timeframe. Assess faster construction of different scenarios including in ROW train lines or bypassing downtown Seattle.
NORTH KING COUNTY	You want \$400 a year per household throughout the entire puget sound region for the next 25 years??
NORTH KING COUNTY	Priority #1 should be light rail expansion. Accelerate the time frame and expand the reach of light rail as this is this seems the quickest, most efficient way to transport people as our region's density increases.
NORTH KING COUNTY	It all needs to happen faster. The cap/maximum on tax collection needs to be removed so taxes can be collected faster to pay for faster completion and more effort is needed to get cities to cooperate as far as permitting etc goes.
NORTH KING COUNTY	The focus should be to finish the Ballard and West Seattle lines first. It should not take 20 or more years for these lines. North Seattle needs these lines. I would also add, that you should prioritize a line from Ballard to University because 45th ave is so hard to navigate to the freeway, downtown or to the east-side. If you connect this line, you would have all of the primary areas in Seattle. Ideally we should have the North Seattle within 10 to 13 years. South Seattle already has a rail, the north needs to have one. Also consider lines that would link to lake city, crown hill, shoreline, to even white center. These are areas if you connect them you would also help with more affordable housing, especially for local. This could help reduce homelessness in Seattle. It is nice to have Bellevue connected but realistically people who work in Seattle will want to live in Seattle not Bellevue or Redmond( which are almost more expensive than Seattle).
NORTH KING COUNTY	All the selections in the drop down menu above are truncated on my phone, but I think the selection I chose is "comments about project completion"? I just wanted to say I fully support this plan, but the reason I selected "somewhat support this plan" after the project timeline section further up the page is because the dates are so far out. We need these rail lines implemented much sooner to improve congestion around the city and to cut carbon emissions. So I would support any initiative to condense the timeline and get the rail lines implemented sooner.
NORTH KING COUNTY	When are ANY of the taxes collected be sunsetted?
NORTH KING COUNTY	Please speed up the timelines!! With companies like Expedia moving into Interbay, the West Seattle and Ballard lines, are extremely critical sooner than later.
NORTH KING COUNTY	Please do what you can to build this earlier than proposed.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The downtown through Queen Anne to Ballard link is essential, and already necessary. With the explosive growth in South Lake Union, Queen Anne and Ballard, traffic in this area (especially along Mercer Street) is quite literally at a standstill every day. There need to be more transportation options for residents and workers in this area that are *not* buses that are stuck on the same congested roads as the cars.
NORTH KING COUNTY	You need to do the Light Rail parts first, in particular the Ballard, Issaquah and West Seattle extensions. Sound Transit's primary focus should be on extending Link. You've seen the growth in ridership from the opening of U-Link, now bring Link *quickly* to the other parts of Seattle and the Eastside. This short-term futzing around with BRT and Sounder is the wrong direction -- focus on building as much Light Rail in the densest urban areas as quickly as possible. (I'm afraid Tacoma really isn't a priority either.) If we're going to fix Seattle chronic traffic and mobility issues, we need Link extended as fast as possible.
NORTH KING COUNTY	I know it's impractical to say the least, but it would be awesome if we could get an income tax in WA state that could help to speed up all projects.
NORTH KING COUNTY	I recommend building a time machine so you can complete ST1 in about 1980, ST2 in about 1990 and ST3 by about 2010
NORTH KING COUNTY	Do you think this plan reflect where the region will be in 25 years? I do not think it does.
NORTH KING COUNTY	Light rail from Downtown to Ballard should be the4 number one priority.
NORTH KING COUNTY	Inclusion of transit to Tacoma and areas south of Seattle should be postponed until the western parts of the City of Seattle are linked. Leaving this 17 years out seems foolhardy and creates more congestion on the north - south corridor. Those of us who live in the city limits should be a priority in the construction plan of light rail and transit.
NORTH KING COUNTY	We NEED light rail. Seattle needs to have rapid transit that can't get held up in traffic like buses. Currently, it would take longer AND cost me more to bus to and from work each day, so I drive (I have free parking). I would pay more to get to and from work faster without sitting in traffic, but I won't pay more for it to take longer. As Seattle's housing prices push more and more lower income people further out of the city, we need a fast and affordable way for those people to get to work at lower-paying jobs downtown and in high rent neighborhoods. The fact that we don't have a light rail all over the Seattle area like other big cities is ridiculous. Rapid, affordable mass transit is a social justice issue and an environmental issue.
NORTH KING COUNTY	Dates need to be sooner. Politics should be put aside and ridership figures should prevail when determining expansion priorities. BRT programs are never as fast as they are promised, light rail is.
NORTH KING COUNTY	I think the Ballard and West Seattle projects should be finished in less than 25 years. They are important areas that are growing extensively and should be accommodated as such. It's ridiculous to put a priority on smaller projects that most people in those areas won't use.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Timeline to go to Everett too long. I work at Boeing and I'll be retired by the time Light Rail comes to Everett. I say bypass Paine field and provide bus service from the light rail station. I would rather see Bus rapid transit down I-5 than wait 25 years for light rail. That's a long time. In fact, even today there should be service from sound transit stations (like Ash way or South Evt freeway station) to Paine field/Boeing but there is none.
NORTH KING COUNTY	Why does it take so long? We have needs for better transit right now. In 22 years, is this really going to meet the needs of riders?
NORTH KING COUNTY	Major infrastructure projects take time. We should have voted for a plan like this years ago. I'll be long retired and maybe not even alive to see the completion, but I still support the plan because I think it's crucial for our region and our planet (reducing single-occupancy rides). Someone else built and paid for the streets and highways I use now, so it's my turn to pay for the light rail for those to come.  Thank you for your work!
NORTH KING COUNTY	Build everything faster
NORTH KING COUNTY	ST3 doesn't strike a good balance between a long term plan and immediate needs. We need to proceed more slowly on tunneling projects, which take so much time, and fund bus and bus rapid transit improvements.  I am not confident that the funding level for ST3 will not lead to underfunding other needed transportation improvements. And, taking the local sales tax above 10% is not acceptable to me.
NORTH KING COUNTY	I recently attended meetings regarding timelines for project completions. While the proposal is great in terms of really thinking out the wheres and how tos I am not supportive of timelines. It would seem to me that Ballard and West Seattle transit plans should be the most urgent as the population density increases and driving from point a to b becomes more difficult and an increasing headache. The idea that both areas would take 22 plus years to complete as traffic becomes an increasing issue is not acceptable. In addition, wait time for busses due to overcrowding and no room is not acceptable either. I would be more receptive to this plan if it was not so long in the future and did not negatively impact the already stressed traffic in these two areas. P.s. there should be another way besides placing the burden on home owners to fund this project
NORTH KING COUNTY	I can't believe it is going to take this long to connect Ballard and West Seattle. This timeline moved me to feel neutral about the project or even oppose it. It is so unlikely I will live and work in the same locations to reap any benefits from my contribution.
NORTH KING COUNTY	Do it faster...
NORTH KING COUNTY	Too much money for so little in such a long time. Buses are more flexible with routes able to move as required. Let's get more bus and BRT everywhere.
NORTH KING COUNTY	Ballard & West Seattle rail need to be MUCH sooner. 22 years to Ballard, not cool. This is coming from someone that rarely leaves downtown, Capitol Hill/ Central areas.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I'd encourage Sound Transit to find ways to complete the West Seattle to Ballard line more quickly. Twenty-two years to Ballard is EXTREMELY long! I also wanted to say that I don't support funding an additional station at Graham Street. Let's build out the system before we pay for in-fill stations.
NORTH KING COUNTY	Light rail or bus rapid transit to Ballard needs to be completed sooner. Also, an east/west connection between Ballard and UW needs to be made.
NORTH KING COUNTY	The timeline for completion is way under my expectations. 25 years is not nearly aggressive enough to meet the needs currently experienced.
NORTH KING COUNTY	All projects need to be completed on a quicker timeline. Most importantly, the downtown projects need to be completed quicker. In addition, the Denny Way corridor needs massive improvements as it is often the biggest bottleneck in the entire city. The existing transit in the corridor is inadequate and often delayed.
NORTH KING COUNTY	The Empire State Building was built in 15 months. The Berlin Wall came down and the two Germanys were united in one year. 22 years to build light rail from Ballard to downtown is ridiculous. Why should I vote for something that will not be completed until after I am dead? Make it happen in 5 years and I'm a fan.
NORTH KING COUNTY	The Ballard to downtown timeline is ridiculous. A Ballard to downtown light rail could potentially be the most frequently used light rail extension out of the ST3 plan, and the fact that it isn't planned to be completed until 2038 is infuriating. Ballard is growing like mad and although Buses are decently full now, they are only going to get more full. Unless we have reliable transit that isn't affected by road traffic, I fear that the infrastructure won't be able to keep up with demand and our roads will only get worse.
NORTH KING COUNTY	I'm bias, but I would like to see Ballard to Downtown completed faster. 22 years completion time for one of the fast growing neighborhoods in Seattle seems a little long. I can only image what the congestion on Ballard will be like if it takes the stated time line to complete.
NORTH KING COUNTY	This needs to move more quickly! We are in a crisis right now. What's possible in the short term? You need to speed these timelines up by several years!
NORTH KING COUNTY	We need this so badly. Can it happen any faster?
NORTH KING COUNTY	The timeline for light rail between downtown Everett and Seattle needs to be sped up dramatically, meaning within the next 10 years. I don't need light rail to go directly to Boeing; it seems like that spur might be better served by BRT.
NORTH KING COUNTY	West Seattle and Ballard need to be connected to the light rail sooner than 17 years, that's ridiculous and I realize the amount of hoops that need to be jumped through to get this done at all, but people might be more supportive if they could actually use these additions within their own lifetime. At this rate there's no guarantee any of my FUTURE children may use it haha. I still support it, regardless but major population influx is happening in Seattle RIGHT NOW, we NEED THIS ASAP.
NORTH KING COUNTY	I'd rather have Ballard light rail MUCH sooner than other projects, as listed in Q12.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Everything about ST3 is very exciting, but the project completion timelines are UTTERLY UNACCEPTABLE. The timelines are pure lunacy; a slap in the face to transit advocates across the state; absolutely infuriating. Everything about Sound Transit's expansion plans must be dramatically accelerated.
NORTH KING COUNTY	Regardless of the routes chosen for build out, the most important factor is to speed up the timeline. Since we are already at least 20 years behind on our mass transit, waiting another 20 years for some aspects of the proposed plan is unacceptable. The current timelines for the current projects now underway are too slow. Priority should be given to speeding up the opening of the UW/Brooklyn station, and the Roosevelt and Northgate station. The opening of the UW station has shown that people will ride light rail. Getting it all online faster should be the major priority. The current timelines should be speeded up by at least 1/2.  Also, parking is needed at EVERY current and proposed station. More people would ride light rail if you could get to it more easily. Even in Seattle, bus transit is terrible unless you live in certain areas and are going downtown. It actually has gotten worse with the new routes. I know the idea is to try to serve the most people, but the compromises serve everyone equally bad rather than better. Particularly if you need to travel E/W.
NORTH KING COUNTY	TIMELINES ARE UNREASONABLY SLOW
NORTH KING COUNTY	This is needed sooner. It would be nice if these could be built at a faster pace. It is terrible that Seattle failed to plan for the future 20-30 years ago.
NORTH KING COUNTY	By the time this project is completed it will be outdated and woefully inadequate. Something efficient with easily accessible stations needs to be completed much sooner.
NORTH KING COUNTY	Ballard light rail should be completed sooner (but I understand that logistics gets in the way).
NORTH KING COUNTY	remove Overlake to Issaquah speed up timeframes; use taxing ability of Seattle and others under their current cap. support legislation to eliminate or reduce the Eyman initiative impacts
NORTH KING COUNTY	Why does it take 8 years to implement the BRT? It would seem that adding bus lines should take fewer years. Why couldn't the light rail system be built in 10 years?
NORTH KING COUNTY	Develop the Boeing Access Road stop and Graham St. ASAP....find the money to do it before this measure is passed....the Boeing Access Stop was in the original plan and this has disenfranchised businesses, schools, museums, and much more.
NORTH KING COUNTY	The completion of the Everett LightRail link should be a priority over any other projects in order to service Boeing and the Paine Field complexes as well as commuters from Arlington and Marysville to the Light Rail hub in Everett before any further expansion. The next project in priority should be the Ballard and west Seattle Light Rail Extensions thereby completing the central hub and North extensions before extending to points south and East already served by two bridges and the Sounder.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Seattle's transportation system, which relies almost exclusively on overcrowded, inefficient, and impossible roads, is already at a crisis level, and with the rising costs of living pushing lower and middle income families farther into the fringes, it's only going to get worse. A 25-year plan fails to address the urgency of the problem. Making more buses the first priority fails to address the problem. Buses are, no matter how hard you try, unreliable, because they're subject to the same problems that cars are: congestion and traffic. We need trains that operate on independent tracks, and we need them NOW, not when the Millennials are nearing retirement. If the problem is, as you've told the media, the slow wheels of bureaucracy and permitting, then fix that. Work on projects simultaneously. Begin in the core, where the traffic problems are most severe and the rail lines are shortest, and work out. Do whatever you need to, but please, make Seattle a major city, with the infrastructure to support it, within my lifetime.
NORTH KING COUNTY	Ballard congestion is horrible and the buses get caught up in the same traffic. I am disappointed that it will take 22 years for light rail to come to Ballard. The east-west solutions to and from Ballard, limited to buses, prevent our neighborhood from taking advantage of the rest of the system. We need a solution much sooner! If you were to accelerate I would be much more supportive of the costs.
NORTH KING COUNTY	LRT to Ballard and West Seattle needs to happen first and on a shorter timeline than current plans.
NORTH KING COUNTY	Faster!!!
NORTH KING COUNTY	Considering the mayor's current bait and switch with the Move Seattle bike infrastructure, the only way I will support this is if the ballard and west seattle lines are prioritized. Let's pay for it with a per-mile vehicle tax based on vehicle weight (i.e. road wear and tear), so there is double incentive to get out of your car. I'm tired of subsidizing all the car addicts out there.
NORTH KING COUNTY	Too much time to get these things moving. 8 years is too long and 25 years is difficult. Transportation may change even further by then and make this plan seem backwards. Not enough support with the fast addition of new large business in the main Seattle downtown and people forced to move further out. Buses on same roads as general traffic doesn't help unless they have their own dedicated lanes.
NORTH KING COUNTY	With a timeline so far out, focus needs to be on what is needed then, not on what is needed now. If robotics take out a net of 5 Million jobs in the US, by 2020 our needs will be dramatically different, and people's incomes will also change as well. Future planning on needs needs to be taken into account. The current plans are needed not and not so far in the future. If they can't be done done, we need new plans. Do some research.
NORTH KING COUNTY	It is an atrocity to make the Ballard community wait TWENTY-TWO YEARS for these transit improvements. This needs to be moved up. Ballard is a part of Seattle and it should have priority over projects in suburb communities and on the east side. There are huge mega apartment complexes all over Ballard and there is basically only one way south and one way east. Wake the [explicit] up King County Metro. Get your [explicit] Head out of Your [explicit] and put the Ballard Transit at the top of the list. You will have a [explicit] ton of really angry people coming for you if you don't

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Speed up the timeline to complete overall project sooner than 25 years.
NORTH KING COUNTY	<p>Takes too long. Modify plans to make them cheaper without losing reliability.</p> <p>All light rail should be grade separated.</p> <p>Please also prep projects not included (like Ballard to UW) in the event we get more federal money than expected or if cities find a way to contribute more.</p> <p>Also: If Pane Field must be built, make it a spur instead.</p>
NORTH KING COUNTY	I support accelerating these projects whenever possible.
NORTH KING COUNTY	<p>I think the timelines for the various projects are likely trying to be realistic. However, I don't think the Downtown to West Seattle and Downtown to Ballard lines are any less of a priority than the others. In my mind, moving people through the busiest parts of the King County who already do not have as much access to efficient transit to downtown, should be the highest priority. The Lynnwood, Bellevue, Federal Way, Redmond lines are less important in my opinion.</p> <p>Also - i'd like to see a connection from Ballard to Northgate as part of ST4.</p>
NORTH KING COUNTY	Way too long of a timeline
NORTH KING COUNTY	I think light rail to West Seattle and Tacoma is the most important priority, and would like to see that as the project to be completed first, within 8 years.
NORTH KING COUNTY	It's difficult for people to get behind a 25-year timeline!
NORTH KING COUNTY	Would be willing to pay more to see this done faster, or help advocate/add my voice to ensure this goes faster. I commute from Seattle to Bellevue College for work, and have done so for the past four years. I would love to be able to see Downtown cleared of traffic with options like transit to West Seattle and Ballard, which helps keep other options flowing like existent bus service to surrounding suburbs.
NORTH KING COUNTY	The timelines are too long. these projects need to be pulled in by at least 10 years. We need these solutions NOW. Shame on us for not insisting that a comprehensive plan with budgets be produced. California is a model for us.
NORTH KING COUNTY	Other cities, countries, and states do it faster and cheaper.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>I am a strong support of ST, and use your services frequently. I played an active role in supporting ST2. But I cannot support this plan as conceived - I think you can do much better. I have 3 issue: time, parking, and TOD.</p> <ol style="list-style-type: none"> <li>1. As you've heard from everyone and their dog, it takes too long. You must find ways to shorten the delivery timeline. You're planning transit for places with a time horizon that means you have no idea what they'll look like - or what they'll need - by the time you deliver it. That's bad planning.</li> <li>2. Too much parking. I'm not supporting a package that requires me to subsidize this much parking, especially given your time horizon! What will the parking demand be in Federal Way in 25 years? You have absolutely no idea. Terrible waste of money.</li> <li>3. I'm not inclined to support another ST extension until I see some indication that you're serious about leveraging your stations for transit-oriented development. The only station you have that isn't a waste of space is Cap Hill, and the community forced your hand. Transit should be located in current or future urban areas, with high demand, and integrated into the urban fabric. Your standalone stations add zero value to the surrounding community, which is criminal.</li> </ol> <p>(last, and a little out of your control, is that light rail is not the right technology to connect Everett, Seattle, and Tacoma. We need high speed rail for that. Bad enough it takes 45 minutes to get from DT to the airport. Travel times should be faster system-wide. But I know that's a complex issue, not just a ST decision.)</p>
NORTH KING COUNTY	Buses first
NORTH KING COUNTY	Graham Street Station is far too delayed. The \$10M on the table from Move Seattle for that project would expire well before construction began. Meanwhile, ST will spend close to \$1 billion on parking, real estate in around Graham Street will get more expensive, and the majority minority community will be left behind. Please make Graham Street an early deliverable.
NORTH KING COUNTY	Your timeline priorities are the exact opposite of what we most need.
NORTH KING COUNTY	Projects take way to long to complete and at way too high of a cost. Projects should be dropped (Bellevue to Issaquah, segment to paine field instead of straight to downtown Everett, ect) to help bring cost down under \$40 billion and speed up critical projects like light rail to west seattle and ballard and bus rapid transit along 405 and the eastside. More money should be put into bus rapid transit to make it more of a "light rail" on wheels including more dedicated on/off ramps, shoulder use or dedicated HOT lane, higher frequency, and nicer busses with amenities like Wi-Fi and smooth ride.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Too bad the people in charge of Seattle 40 some years ago didn't jump on the opportunity to put light rail in at that time. The federal government would have paid for a huge portion of it and the city wasn't nearly as built up back then. Big mistake. But now we move forward. I'm just disappointed that it's taking so long to get the light rail in place. Seattle is growing by leaps and bounds and we need a way to get people in and out of town without using the freeway. Are there any revenues available for the project other than taxpayer support? How about support from the major companies in Seattle who are adding to the growth? You could name the lines after a sponsor corporation - like Century Link Field.
NORTH KING COUNTY	Please move light rail service to Ballard up in the timeline to 10-15 years, not 22! We are in a pocket and growth has been rising quickly. With out more transit options we'll see grid lock traffic on our limited thorough fares.
NORTH KING COUNTY	The infill light Rail station at the Boeing Access Road according to your expert review panel is the least costly station per rider in the entire system of proposed stations. This means that this station is the most economically sustainable station in the proposed system. The employers in this area, the Museum of Flight and Aviation High School have committed to a public/ private partnership to provide a last mile shuttle which will greatly increase the number of riders using this station. Many of the residential areas near the Boeing Access Road have either no or little access to public transit services. This station will allow employees,employers, residents and visitors to have good access to light rail service. I urge you to include this station in the final plan to be voted on in the fall and to build it in five to ten years to provide a win for this community and wise investment for Sound Transit because it has the lowest cost per rider, the tracks are in place and the station will take a lot less time, and money to become operational, and this area really needs light rail service. In the future it is the only station south of Seattle that can be linked to the Commuter Rail system as well as rapid bus service. Please include adequate parking and drop off and pick up points for commuters. For many people cars are the only reasonable option to access transit.
NORTH KING COUNTY	I'm disappointed that Seattle didn't have the foresight decades ago to approve a strong public transit system. I wish that lightrail could be implemented at a much faster rate because it is already in great-demand given the commuting needs of people in the area. I also encourage you to be realistic about future needs for transportation. For example, should parking actually be emphasized if smart cars are anticipated to be in wide-use before completion of the plan? My family is relatively new to the area but plans to be here for the long-haul. We chose to move from Houston to Seattle because we disliked the poor planning of the city--sprawl and a lack of usable public transportation--and we love the Puget Sound's walkable neighborhoods and natural beauty. A lack of lightrail, however, limits where we can work and what neighborhoods we can live in because we don't want to spend a large chunk of our day sitting in cars or buses commuting just like many people in Houston do. We would never choose to live on the east side, and I left Microsoft when we were having a baby because I was spending 3+ hours a day commuting.
NORTH KING COUNTY	Way too long for time periods. Hoover Dam, English Channel Tunnel, all took much less time with more primitive equipment. Transcontinental Railroad took less time. The Cascade tunnel took less time.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Why do they projects have to be so spread out? Can't more of them be done at the same time, so they can be completed in less than 25 years?
NORTH KING COUNTY	Ballard and West Seattle LRT should be prioritized and completed much more quickly.
NORTH KING COUNTY	22 years to have light rail to Ballard is absurd! Creating better transportation within the city should be the first priority. It should not take me over an hour on public transportation to get from Capital Hill to Ballard. I understand the urgency of connecting Everett and Lynnwood to Seattle but I do not think we should be prioritizing that over services in the city. I do not think that connecting Tacoma should be anywhere on the priority list but last. I think building lightrail should be the top priority and buses second.
NORTH KING COUNTY	inner city needs to be faster. unsure about need for 2nd downtown tunnel, remove buses from tunnel
NORTH KING COUNTY	Ballard and West Seattle should be a stronger priority as you took our votes and money and left us without our promised monorail. We voted yes on that countless times. Give us our light rail now!
NORTH KING COUNTY	BRT should happen sooner than 8 years. ST has been a very expensive enterprise. Cost of projects must come down with increased efficiency, better negotiating of engineering and construction contracts; reduction in ST overhead - what ever it takes to reduce cost while getting these improvements on the ground sooner. Unless there is an independent performance audit and a plan for cost reduction, I will vote no even though I recognize the importance of transit investments.
NORTH KING COUNTY	We need more rail options in Seattle proper NOW.
NORTH KING COUNTY	Transit in Seattle is sadly behind the times. With over 1 million new residents expected in the next 5 years, and traffic times some of the worst in the nation, we need to improve the anticipated completion dates scheduled for light rail and start any low cost services and bus services immediately.
NORTH KING COUNTY	Finish it faster!!! and do it cheaper!!!!
NORTH KING COUNTY	ST3 should speed up completion by selecting only grade-separated track options for light rail, eliminating the time wasted to evaluate at-grade options.
NORTH KING COUNTY	I believe the light rail expansion needs to happen MUCH faster, like 15 years to build out what is proposed instead of 25 years.
NORTH KING COUNTY	These completion dates are way to far out
NORTH KING COUNTY	I know we need transit improvement to get people out of their cars but as an older person on a fixed income I don't want to be taxed out of my home.
NORTH KING COUNTY	It is taking way too long to finish all of this. The light rail completion needs to be a priority for tax allocations. The traffic is out of control. I don't understand why it's going to take a decade to complete a train that could have been completed faster in the early 1900s. Our city is an embarrassment to major US cities.
NORTH KING COUNTY	Pay more to just do it faster!!!
NORTH KING COUNTY	Residents of South King County need better access NOW, Whereas residents (like myself) of Magnolia, Ballard, etc already have several options for getting to key places

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Timelines need to be reduced...population is growing faster than transport plans
NORTH KING COUNTY	The time line should be halved
NORTH KING COUNTY	I think the timelines are far too long; we need more short term solutions until these new changes take place. Overall, it's a good plan though, and I support moving forward with it.
NORTH KING COUNTY	Needs to happen faster to sustain public support
NORTH KING COUNTY	The biggest estimated ridership and most congested areas are in Seattle. And yet the light rail lines in Seattle to Ballard and West Seattle will FINALLY get here at the end of this plan in 25 years. TWENTY FIVE YEARS. That's idiotic. We need light rail 25 years AGO! ST is spending a lot of time and effort promoting BRT and shoulder driving for buses... why not give those to the suburbs where they would be really useful in the short term and give Seattle light rail first? That's the plan I will donate money to pass on the ballot and volunteer to get passed. As it is now, I'll vote for this, but I sure won't push it on friends and family because I know that most of them will just say, "It doesn't help me get anywhere faster anytime soon. And since Seattle is getting so over-crowded and over-expensive, I'll leave long before this is done. So why should I pay for it?" And you know what? I can't argue with that. So come on, change the plan. Give the 'burbs something that will help them now, and give Seattle something that feels attainable. Otherwise, this fails. It's pretty clear.
NORTH KING COUNTY	infrastructure hasn't kept up w growth existing and in the short term, so the projects in the fastest densest neighborhoods should be prioritized over all over. The timeline is too long to be relevant...technology might be such that in 20 yrs, private cars are obsolete!
NORTH KING COUNTY	way too little way too late.....REFORM THE god damned regressive tax system in this god forsaken state. I am homeless and don't have anymore money to spend on these pipe dreams that should have been done 20 years ago!!
NORTH KING COUNTY	Given the rate of population growth and the population that's already (under)served by transit, the projected completion dates are deeply disappointing. ST needs to find a way to build the right thing faster. People are desperate for better transit options and I'm pretty sure they're willing to sacrifice some process and esthetics. We need this yesterday.
NORTH KING COUNTY	Increasing the annual property tax levy, if feasible and if it would still garner voter support, to speed up the time line would be welcomed if it shaved a few years off the plan.
NORTH KING COUNTY	25 years is an eternity.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<ul style="list-style-type: none"> <li>- aggressively implement paid parking - less subsidy for cars</li> <li>- permitting cooperation in Seattle is low-hanging fruit that will reap dividends in time and money - should be a slam dunk! negotiate early and vigorously</li> <li>- grade separation on 15th through to Ballard</li> <li>- 130th St Station enhances system performance, draws riders, encourages TOD and can interconnect with transit to connect low-income communities</li> <li>- Ballard-UW study - always think ahead - absolutely no question about demand and ridership</li> <li>- Lake City Extension HCT Corridor Study - ST Project P-09</li> <li>- downtown tunnel(s) are regional assets</li> </ul>
NORTH KING COUNTY	Our region is choking on congestion right now. I understand that there are many issues that cause timelines to be what they are, but there has to be a better wait than waiting until 2038 to connect downtown with some of the densest neighborhoods in the city.
NORTH KING COUNTY	Prioritize Ballard light rail to Downtown, this must be one of the first projects completed, not the last!
NORTH KING COUNTY	Please consider moving up the timeline of the Ballard light rail project. Ballard is adding A LOT of density right now and can not accommodate the cars, traffic, parking. 22 years seems more or less like an insane amount of time to wait. I am hoping that you can look at doing something more timely.
NORTH KING COUNTY	I don't understand how Ballard can wait 22 years for light rail and still thrive.
NORTH KING COUNTY	This is long overdue. Seattle has not kept us with the population growth and the time to make these decisions is now.
NORTH KING COUNTY	Timeline needs to be condensed. 25 years before completion is far too long. I'll be almost 85 years old & never get to use it although I'll be paying for it at a time when there is no extra income coming in. Although I know it is needed, it's difficult to support something that won't benefit me & my family.
NORTH KING COUNTY	We are already 20 years behind on this plan. By the time it is done it will already be outdated. It must move faster.
NORTH KING COUNTY	My god this is going to take so long!
NORTH KING COUNTY	i am concerned about the costs involved and the proposed timelines - i am aware that i may sound uninformed but to me, it seems like a lot of investment for not enough return in the immediate moment. aka why is it going to taking so long to build out some of these projects? (ie roosevelt, northgate light rail)
NORTH KING COUNTY	<p>Under this plan, in 25 years we'll have transit that only barely satisfies the needs of today. We need either much bigger scope of light rail, or much shorter timelines.</p> <p>Second, light rail MUST be fully grade-separated. The MLK segment of link is already a huge burden of delays and traffic accidents. Repeating this mistake at interlake is unacceptable.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Our region is in urgent need of better transit. Not in two decades, but NOW! The timeframes for these projects are embarrassing. I have seen light rail happen much faster in both Portland and Minneapolis. This needs to be prioritized much more urgently.
NORTH KING COUNTY	Graham Street station on light rail should be made more of a priority, i.e., built in the very near future. The infrastructure (and ridership) is already located there.
NORTH KING COUNTY	We need to move West Seattle UP on the timeline. Point blank. We are growing rapidly and are at the mercy of the WSBridge and limited other options for our travel on and off the peninsula.
NORTH KING COUNTY	25 Years? Give me a break! Vancouver, B.C. built the Canada Line in 5 years and that system is rapid rail transit! I'll be 97 by the time I can ride the entire system. You need to shorten the completion time by 35/40%!
NORTH KING COUNTY	Get it done as quickly as possible!
NORTH KING COUNTY	Ballard is booming and needs transit solutions now!
NORTH KING COUNTY	Build it sooner.  Idea: propose additional ballot measures authorizing higher taxes in exchange for more rapid completion. Do it by sub-area, make them conditional on the main measure passing. Instead of guessing with opinion polls put to a vote the question "are the taxpayers willing to pay higher taxes to get projects done within their lifetimes?"  Oh - and no more grade crossings. The selling point about rail being separated from traffic congestion is greatly diminished every time a train hits something (or somebody) and service is halted until the mess is cleared. I almost missed a flight to Europe due to one such incident and trusting that Link would reliably get me to SeaTac. Hah! NO MORE GRADE CROSSINGS! And as soon as possible, eliminate the ones that you have.  Thank you.
NORTH KING COUNTY	IT SHOULD TAKE SO LONG!
NORTH KING COUNTY	The implementation timeline is literally slower than a snail's pace and it's embarrassing to see that it's an actual proposal. For the cost, one would think the proposal is for an regional underground NYC style subway. Someone needs to hire a NYC subway planner to take on this project
NORTH KING COUNTY	Why so long to complete light rail connection to Ballard and West Seattle. This coulda shoulda been done already. 17 and 22 years is too long to wait for a connection to parts of Seattle that have seen so much growth already and remain difficult to reach from other parts of the city.
NORTH KING COUNTY	Do it all quicker if possible
NORTH KING COUNTY	Light rail to Ballard should be fully grade separated to ensure reliable, fast service. Sound Transit should aggressively consider all available options to expedite the construction schedule.
NORTH KING COUNTY	I would like West Seattle to be higher in the priority of tasks.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	We should pay more and finish this way faster.
NORTH KING COUNTY	Can this be accomplished in a shorter time span? Hope so-
NORTH KING COUNTY	We need light rail much sooner to all locations. your plans are much to far in the future when they are allready needed now. Do what you need to, to make this happen sooner. Its becoming unlivable here due to the traffic congestion.
NORTH KING COUNTY	King County transit needs help now. Our traffic discourages folks from coming downtown, it keeps them on the Eastside, and any steps we can take to make transit a more acceptable option to driving solo will help. We need more light rail connections, sooner rather than later.
NORTH KING COUNTY	Build it ASAP :)
NORTH KING COUNTY	Priority should be given to in-city projects. Ballard is rapidly developing and needs out-of-traffic transit much sooner. In a few more years, bus commutes Ballard to Downtown will approach an hour for 6 miles because of crushing traffic. Similar for west Seattle. I will have a hard time supporting this when Ballard is so far down the list. Run trains surface downtown (like Portland) until a second tunnel is built but get something separated from traffic over the ship canal!
NORTH KING COUNTY	It needs to happen faster; the viaduct has shut down for two weeks today and it's referred to as Via-geddon. There is a serious transportation/traffic problem in the Seattle metro area and it needs to be addressed with a sense of urgency.
NORTH KING COUNTY	The Transport Politic's Yonah Freemark did an excellent analysis of the ST3 package and found that the Ballard-to-Downtown is by far the strongest project on the list, with respect to highest ridership/revenue and lowest subsidized cost per rider, and deserves to be built first. I like to see my tax dollars spent wisely, where they make the most impact for the least amount of money.
NORTH KING COUNTY	The timeline is to long and the people paying for the project won't be the ones benefiting from it. Defer the cost until opening and then charge people for it. If it can't pay for itself it shouldn't be done.
NORTH KING COUNTY	Ballard should be earlier! This is partially due to my bias, but the sheer amount of new condos going in there, with no associated increase in roads or parking is already problematic. Simply adding more busses would be sufficient for me - so far the trend has been to reduce bus service.
NORTH KING COUNTY	I went to the local ST3 meeting and heard the options and barriers to expediting the timeline. Light Rail must be implemented much faster. I appreciate that the city has committed to expediting the permit process BUT the choke point appears to be the state's funding constraints. Spend the money to get it changed. Do what businesses do and pay for legislator influence so that more money comes sooner. Traffic out of West Seattle is already terrible. Homeowners in Seattle will pay much more in property tax for ST3 than outlying areas. And, as much as my family would be paying, I need to see it completed in my lifetime.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Collaboration to reduce timelines as much as possible is critical. Private and commercial partners stand to benefit from improved transit as much as individuals do. Because of this, it would be valuable to include big regional players in accelerating planning and funding for ST3 projects. I also believe that regional infrastructure should be funded regionally, drawing funding and support from corporations and individuals who will be most impacted by improvements.
NORTH KING COUNTY	Ballard should be first on the list. Then focus on areas outside of the city.
NORTH KING COUNTY	Capitol Hill and U District stations were game changers. Speed up the Ballard and West Seattle Line.
NORTH KING COUNTY	Cut all proposed timelines by 50%. It can be done.
NORTH KING COUNTY	If Seattle light rail is not prioritized I cannot vote for this plan in good conscience. Transit to Everett and Tacoma should be focused on expansion of heavy rail capabilities like Sounder, similar to the heavy rail corridors in the Northeast.
NORTH KING COUNTY	An accelerated plan would be preferred. Also I believe that corporate taxes should be added to support these essential projects rather than the entire load being placed on individuals. After all, these commuters are going to jobs created by the corporations.
NORTH KING COUNTY	It's great to improve transit to Seattle from outside the city, but who wants that if there's limited rail within the city? How will people get around in the city? Considering increasing interest in moving to the city, why wouldn't you improve within city transport first? Buses are not the answer. Look at NYC, DC, and other light rail systems. Connect neighborhoods first.
NORTH KING COUNTY	I think Ballard and West Seattle are higher priority projects. I think you need light rail that gets people from Seattle to Everett, as a lot of people in Seattle work in the Boeing corridor, and both the I-5 and 99 commutes can be brutal. Additionally, it would be nice to see Fremont included in the travel plans and not just Ballard. Why is there no light rail planned in Fremont/Greenwood/Phinney Ridge? It's a heavily populated and growing area.
NORTH KING COUNTY	In 25 years, I will be nearing retirement: it saddens me to think I may not be able to use much of this, all of which I strongly support. Build it as fast as possible, and please don't divert money into costly, damaging park and rides! They are worse than useless.
NORTH KING COUNTY	I might be more supportive if I better understood why the item most important to me (light rail to West Seattle) will take so much longer than than the same service to more distant neighborhoods like Kirkland and Federal Way. I know there is a river to cross but its not that big of a river. I worry that we will begin paying for a project that will never materialize because alot can go wrong in 17 years.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Light rail should be our highest priority. Adding buses to already crowded freeways, even on the shoulder, just increases traffic congestion. If the hope is to get people out of cars, there has to be a better option. I don't take the bus, ever because it's not easy or convenient or fast. If I could hop on a rail car and have a predictable, routine, easy commute that didn't involve printing maps and researching options and still being stuck in traffic on a bus, I would use it! I know I'm not alone in this. Seattle is already growing beyond capacity and we can't wait 17 years (ridiculous!) or 25 years (ABSOLUTELY Ridiculous!) to make it easy for people to live and work here. People can buy/rent affordable homes further away from the city, but they can't get to work in the city. 25 years from now is too long. We have to bite the bullet NOW. Thank you for your interest.
NORTH KING COUNTY	Sooner for Bellevue College access from Downtown Seattle and North Seattle-- please. Sooner for better access to Bastyr University area (Juanita) from North Seattle.
NORTH KING COUNTY	This ST3 plan is needed urgently, sooner than the lengthy timelines suggest. I think any way to get additional revenue to accelerate the process would be great, including putting up a ballot measure for passing a statewide income tax. We need more ways to raise revenue in Washington State. Also, affordable housing along all major transit corridors should be a priority.
NORTH KING COUNTY	While I am strongly supportive of the plan, and I understand the desire to phase it in - the region needs the plan NOW. The projects should ALL be accelerated and funding procured to pay for it over time. I support higher income earners paying more - or higher valued homes, not owned by senior citizens or disabled, paying more in order to speed up the timelines. Additionally, the Seattle area's most difficult commuting routes are East-West in order to access North-South primary corridors. Stronger consideration should be given to light rail routes that go east-west in addition to the primary north-south lines.
NORTH KING COUNTY	Property owners seem to pay for more of the costs associated with the proposals. A clearer message around the funding and perhaps increases in toll roads and additional gas taxes.....perhaps a state income tax must be considered.
NORTH KING COUNTY	I believe that the proposed projects especially the light rail and sounder should be fast tracked and a significant effort to improve our transit system. Which is abysmal. Noted: the ferry services www not a component of the plan. Especially use of passenger ferries.
NORTH KING COUNTY	Traffic is both a short term problem and a long term problem. Since some of the proposed projects won't be completed for one to two decades, the short term, interim solutions should receive a high priority. Although we need the full system to be completed as soon as possible, we need short term relieve NOW.
NORTH KING COUNTY	The completion time needs to be cut in half. By then, it's going to be too late and we will already be in a gridlocked nightmare. But you have to start NOW.
NORTH KING COUNTY	Connection to the eastside via light rail is a big priority.
NORTH KING COUNTY	I think light rail development in seattle should be prioritized to be finished sooner.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	First off, I live in West Seattle without a vehicle and rely heavily on transit to commute to and from work. I think that addressing neighborhoods (West Seattle & Ballard) closest to downtown via light rail should take priority over other neighborhoods involving lightrail projects. I think it is important to get commuters from the East Side to downtown as a former commuter from downtown to Renton. I think we currently have a good service provided for commuters heading north or south from the city via the sounder. I don't use these but they are probably the fastest method for commuters and traffic does not generally affect these commuters as it does for other neighborhoods.
NORTH KING COUNTY	The light rail expansion in Seattle should be completed much faster than 22 years. While there are a lot of commuters outside Seattle, traffic in Seattle is awful. An expedited timeline for the Seattle light rail system would greatly reduce traffic congestion on city streets and I5. This would also be a better solution than waiting on Bertha to finish the tunnel. There really needs to be easier access to the light rail, especially from Queen Anne and Ballard
NORTH KING COUNTY	Riding any bus to and from West Seattle junction has become a horrible mess. They are building in WSJ so fast and yet no transit options to get people to work and back. We are packed on like sardines, people push and shove just to get a space on the bus. I haven't sat on the bus during rush hours for months. Sometimes the buses don't show up for 10-15 minutes after they are supposed to which causes a bigger mass of people trying to get on an already full bus. 17 years is a long time for us to wait for a better option. Metro absolutely needs to be fixed to avoid this becoming a much bigger issue. Today I am going to take the 550Express to meet people for dinner in Bellevue and I am so grateful that I don't have to take the C Line. We have one car that is used to get my husband to work on the eastside. With rising costs for rent and taxes (and having to pay for a parking spot in our apartment garage)-it doesn't make sense for us to purchase another car which just compounds traffic issues.
NORTH KING COUNTY	I think the ballard link light rail should move up to be completed sooner than the current timeline
NORTH KING COUNTY	I think the time line is much too slow. A more aggressive timeline, especially on the light rail proposals should be expedited. Investing so much time and resources in the BRT program seems misplaced.
NORTH KING COUNTY	25 god damn years?! By that time, I'll have paid off my mortgage in Ballard. We need mass transit in the DENSE areas of Seattle within FIVE years, not 25! And not just North/South but also East/West. Do the projects in conjunction, not one at a time. This timeline is absolutely ridiculous.
NORTH KING COUNTY	My biggest concern is the timeline. So many of the projects, especially light rail expansion, seem so far out. It is difficult to vote for something knowing that you will be paying for something that you may never be able to take advantage of.
NORTH KING COUNTY	You should find a way to shorten the timelines.
NORTH KING COUNTY	Needs to be completed sooner
NORTH KING COUNTY	Would love to see Ballard completed LOTS earlier than planned
NORTH KING COUNTY	You need to understand that most of us who are retired and are over 65 won't be able to use the added projects before we are either dead or not very mobile. I think you should offer us some kind of tax discount to pay for these. I am a firm believer in public and rapid transit, but I am also on a fixed (but sufficient) income.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>1) The need to divert Light Rail to Paine Field is contingent on The Field getting approved for passenger service. Without it, Boeing can provide an employee buss to and froe the cheaper option.</p> <p>2) we need expanded Sounder service later into the days. It needs to transition from just a tiny number of commuters to something residents and tourists can take advantage of.</p>
NORTH KING COUNTY	<p>Ballard to Seattle Downtown commute needs to be solved much quicker than planned. 22years is too long. There are more and more traffic on Ballard bridge and Elliot every year. There are thousands of people moving into thoes condos and town homes in Ballard. Rapid buses are not enough. We are all in trouble already when Ballard bridge goes up, break down or become one lane for some reason. This needs to be figured out BEFORE Lynnwood, Renton, Woodinville or Redmond.</p> <p>Also Tacoma traffic is unbelievably bad, that needs to be fixed ASAP.</p>
NORTH KING COUNTY	<p>These projects need to be completed much sooner than 25 years to accommodate the current population within the region and it's projected population. This should have been done years ago.</p>
NORTH KING COUNTY	<p>Please add Graham station sooner than later!</p>
NORTH KING COUNTY	<p>Infill station at graham st. not to be completed for 25 years seems a bit long. Some money is allocated in the Move Seattle Levy. This project should be prioritized.</p>
NORTH KING COUNTY	<p>Please move up the construction of the Graham St station so that this underserved community has more access to better public transportation--especially since there are plans to cut the 9 express off peak hours. Not everyone has a 9 to 5 job so it's imperative people have multiple transit options throughout the day. I, for example, would start using the light rail all the time if it was a half of a me from my house and I know my neighbors feel the same. Thanks for your consideration.</p>
NORTH KING COUNTY	<p>It is ridiculous that it would take 22 years to get from Ballard to downtown</p> <p>With all the multi family development traffic is becoming untenable. These are people who would use transit if it was there. I would pay more if this was accomplished on a reasonable timeline. As it is, I have no interest in the plan</p>
NORTH KING COUNTY	<p>On question 12 I understood that it would take up to 25 years to get light rail out to Issaquah, now as a long time resident of the PNW I understand that light rail was introduced as an idea back in the 70's and it has taken over 40 years to get us the limited light rail that we have today. Why are we still discussing this as an option? I believe that it is time to act, the EIS reports have been done the money has been allocated and spent but there is no light rail please get on with what has been promised time and again.</p>
NORTH KING COUNTY	<p>22 YEARS to Ballard is ridiculous. I support paying more in taxes to build this much needed mass transit system sooner.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	There HAS to be a way to speed up the timeline. My toddler will be out of college before ST3 is complete. Also, although I understand why parking was never planned at most stations, I live in Rainier Beach and the reality is its not safe to walk to and from the station before sunrise or after dark. If I could park and ride I would use link substantially more during the winter months than I do now.
NORTH KING COUNTY	West Seattle and Ballard are critical. I'm sceptical of Bus Rapid Transit being truly effective. Light Rail, with no effects from auto traffic congestion, seems worth the investment. Unfortunate that permitting/red tape will slow these improvements so much.
NORTH KING COUNTY	Graham Street Station MUST be a priority! We consistently support ST measures that promise us our station and are consistently told to wait a little bit longer...now it's 20 years?!...unacceptable. This is a stop with 80% minority ridership and we are currently unserved by safe and reliable public transit. We just approved \$10 million that will be lost if Graham Street isn't completed MUCH faster than ST3 provides. That makes no sense and completely betrays our community. Please take surplus funds from the UW station and invest it in a community that desperately needs this station and, just as importantly, DESERVES it. I know ST can do this if it decides to make increasing access and prudent investments a priority. Thank you!
NORTH KING COUNTY	Grade separated rail to Ballard & new downtown tunnel should be expedited. Don't waste time studying alternatives that aren't grade separated. Get it done.
NORTH KING COUNTY	The region definitely needs transportation improvements, and I'm happy to pay taxes and fees to help fund such improvements. However, as a West Seattleite, I feel my section of Seattle is once again being left behind. Light rail wouldn't come until 2033, and, with all of the buildup at prime station locations, I find it hard to believe ST will even be able to locate available property at that time. I also do not relish being crammed onto overcrowded buses and standing to and from work each day on Rapid Ride buses. Most importantly, I don't like the idea of paying over \$200 a year for something that won't benefit me and my neighbors for another 17 years. Still burning from the monorail fiasco....
NORTH KING COUNTY	Takes too long
NORTH KING COUNTY	Adding an infill light rail station at Graham Street needs to be an early deliverable system access project. Graham Street was deferred from the original light rail plan, and 20 more years is too long to wait for transit equity. Build Graham Street now, and increase transit equity and access for the highly diverse neighborhoods of Hillman City and South Beacon Hill.
NORTH KING COUNTY	Like so many others, I believe the timelines are insufficiently ambitious. All of the light rail projects need to get done much faster. Also the light rail priorities need to be adjusted, with Ballard and West Seattle getting higher priority.
NORTH KING COUNTY	I worry about technology advances and that we are investing in the long term. How does the plan remain flexible and cutting edge to make the most of advances being made over 25 years? Otherwise, I'm all for it.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Rail to SLU and through to Fremont/Ballard would relieve terrible congestion in the area, I wish it could be done sooner.
NORTH KING COUNTY	The timeline is way too long. It's absurd to wait 22 years for light rail to Ballard and 17 years to West Seattle. Connecting the city should take priority over suburban connections.
NORTH KING COUNTY	<p>I think we need to have light rail to West Seattle and Ballard much sooner than in the proposed plan. 10 years would be a more reasonable goal.</p> <p>I am not convinced that BRT is as fast and convenient as proposed. After all, they use the same infra as cars. On highways and roads that allow separate bus lanes, they could work much better. In general however, buses are much slower. So slow, in fact, that we should get buses out of the downtown transit tunnel, as they cause frequent light rail delays during peak hours.</p>
NORTH KING COUNTY	25 years seems too long to wait but I understand these things take a long time to complete - just wish it could be sooner!
NORTH KING COUNTY	<p>The timeline for expansion to Ballard should be expedited, and the overall structural approach should be laid out to be as resilient and independent from street traffic as possible. Twenty-two years for Ballard is simply too long given the continued increase in population density downtown Seattle, Queen Anne, Fremont, and Ballard. These new residents do not have viable alternatives to transit besides cars, which overfill roads that are not being expanded. Additionally, bus systems are not reliable and depend largely on the same roads and lanes being overfilled by cars.</p> <p>Key points</p> <ul style="list-style-type: none"> <li>- The timeline should be optimized to increase speed by finding ways to collaborate to reduce unnecessary delays.</li> <li>- Areas with the highest projected usage and population growth should be prioritized</li> <li>- The system should be constructed to avoid impacts from existing street traffic. This would mean being separated from grade and city streets in as many cases as possible (especially in the Interbay area)</li> <li>- Analysis of further expansion should be done as soon as possible using any cost savings realized or additional funding accessed</li> </ul>
NORTH KING COUNTY	The projects should be complete sooner. ST should modify its policies to allow more borrowing earlier in the project phasing.
NORTH KING COUNTY	Ballard has exceeded it's growth projections for 2024 with no change to infrastructure and no slowing of development in sight. We need transit improvements now. Especially since the idiotic zoning laws allow builders to have limited to no parking for units! It is insane.
NORTH KING COUNTY	We have to get light rail to Ballard much sooner. Also, it concerns me that there's no east-west line in north Seattle, like the considered UW-Ballard line. There's already no quick way to cross town there. Let's do something about it!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>As a long time Ballard resident, I have accepted increased density in this part of town. If this plan is put in place, I will be nearly 90 years old before we see a plan to alleviate the traffic that has come with increased density. I have so many neighbors who have this same concern. Although I would like to offer dollars in taxes that alleviate this condition for future generations, I am disappointed that I probably won't see it in my lifetime.</p>
NORTH KING COUNTY	<p>ST should be prioritizing BALLARD and WEST SEATTLE lines. Those who live on the east side, chose to live on the east side. Give light rail to communities that actually want and need it. It makes sense why ST chose to build to the airport first, since its Seattle's gateway, but to prioritize the Tacoma/Everett and the Eastside over Seattle is beyond me.</p> <p>Lets focus on the greater population first.</p> <p>Lastly, ST really needs quit pimping out their stations. Why is ST trying to make their light rail stations so fancy? Quit hiring fancy architects and just build cookie-cutter stations with efficient canopy's, like the ones at King St. Station. Think wide-flange, wide-flange, expose concrete and exposed conduits. The station and art budgets are ridiculous. Like most cities, there should be one central station in downtown that looks fantastic, and the rest should be cookie-cutter. No cares about how elaborate the stations are, as long as they are serving their purpose. Has ST seen stations for the 'L' in Chicago? They construct their neighborhood platforms out of wood, even the new ones!</p> <p>Completely off topic: As seattle's population continues to expand, ST really needs to think about more efficient trains. Think "open-gangway" trains. Our stations will always be limited to 4-car trains and eventually those 4-car trains will be packed like sardines. The driver cab's are such a waste of space cost ST more money to maintain.</p>
NORTH KING COUNTY	I wish it would happen faster
NORTH KING COUNTY	Way too slow a time line!!! Also no plans at all for bicycle commuting to be integrated into this entire scheme, that is a BIG FAIL!!!!
NORTH KING COUNTY	Ballard station and lower Queen Ann area needs to have light rail sooner than 25 years. I suggest making this line a priority and including it in the first 8 years.
NORTH KING COUNTY	The thing melons is ridiculous. There must be a faster way to achieve these goals
NORTH KING COUNTY	We need to expedite this project, 22 years for Ballard to get light rail is too long, especially with all the commercial space/job growth in the greater downtown area.
NORTH KING COUNTY	Should do all studies for Burien, Lake City, Kirkland and Bothell first. Then plan West Seattle and UW - Ballard accordingly and build them next.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	If we are to garner support then the existing infrastructure needs to be reliable. Focusing on what we offer already, would help to build trust. Specifically route changes, which were immediately enacted with the light rail openings gave no time for bus commuters to accommodate their route, offering you no opportunity to determine the change to their use. Also, schedule dependency, which may vary up to 45min delays? This reality that I have experienced keeps me from relying on public transportation for my daily commute.
NORTH KING COUNTY	Ballard is growing rapidly and 22 years is not soon enough! Also, consider east-west light rail in the Ballard-to-U-dist route (better yet, continuing to U-village or across the lake to Kirkland) as this is currently a very difficult route either by driving or by public transit due to congestion.
NORTH KING COUNTY	The urban links (West Seattle to downtown, Ballard to downtown) need a more aggressive timeline. Twenty two years, while better than nothing, is much too long for the burgeoning communities.
NORTH KING COUNTY	Is there any possible way to speed up certain light rail projects' timelines?
NORTH KING COUNTY	The only reservation I have about these plans is the *22 year* horizon for cross-town light rail to Ballard. It seem crazy to extend the north/south links but leave some of the most congested int-town commuting unaddressed for two+ decades! That said, the new light rail to UW is wonderful - and its instant uptake by commuters (it's crowded every time I take it, and has been since it opened) makes clear how important, and how highly valued, these initiatives are!
NORTH KING COUNTY	What does Sounder rail cost per rider, per mile? What about the other choices? Including and excluding capital expenses. I'd like to support the method of transportation that provides a consistent, safe ride at the lowest operating cost.
NORTH KING COUNTY	The Graham street station was originally included in ST1 but fell out due to budget constraints. Completing this station should be a high priority before rail is extended to other communities. The Graham station is in one of the most diverse neighborhoods in Seattle at a major shopping center. Completing this station would significantly advance equitable transit in seattle by providing access for low-income and people of color to their shopping outlets, cultural centers, small businesses, and places of worship. As constructed the central link is more of a commuter line instead of community-serving transit. It connects the airport to downtown but fails to give the residents and small businesses in the community access to the services they use. This negatively impacts low-income and people of color who live in the community. We need equitable, community serving transit, which the Graham station would provide.
NORTH KING COUNTY	Please move up the completion date for the Graham Street station. It was supposed to be in the original light rail route through Rainier valley. 20 years is a ridiculous amount of time to wait for something that should have been done 7 years ago
NORTH KING COUNTY	Seattle needs real rapid transit NOW! 22 years to get a line to Ballard is ridiculous. Traffic is already unworkable on roads made for 2/3 fewer people. If we wait, we'll drive away investment and infuriate everyone.
NORTH KING COUNTY	The WS stations to should be profit used first. Especially with the continued struggles of the Bertha project.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The light rail to NE 185th should be completed MUCH sooner. The money is already allocated. What is the delay?
NORTH KING COUNTY	Timeline is way to slow. Traffic is at nearly a standstill on the north/south corridor, and moving east west is a total disaster and has been for years. We've been talking about some of these plans since the 1970s. Find a way to get them done sooner!!!
NORTH KING COUNTY	Too long and too expensive. BRT sooner and cheaper. But is a never ending project for the Sound Transit people.
NORTH KING COUNTY	<p>On the one hand the plan includes projects that are estimated to have high daily ridership (the greatest need), but these same projects are scheduled to come online last. Twenty-two years to Ballard (2038); and twenty-five years to Everett (2041) seems far to distant in the future for the need that exists today. I know Sound Transit has heard similar comments about compressing the project delivery timeline. Please figure out a way to speed up the delivery for ST3.</p> <p>Also, I'm a great supporter of expanded transit, but the projected cost of \$50 BILLION is really hard to come to terms with. This figure is larger than the GDP of some small countries, for example Costa Rica in 2014. The 2014 GDP for the Seattle-Tacoma-Bellevue metropolitan area was \$300 billion according to the Bureau of Economic Analysis. This proposed plan contains several projects that qualify on their own as "megaprojects" by most definitions of the term. It begs the question as to whether this proposal is affordable in its current form for our region along with our other ongoing commitments. If the average adult is expected to pay \$200 to support the plan for 25 years, that's \$5,000 for each adult in addition to ongoing tax revenue going to Sound Transit. I wish this package weren't so large.</p>
NORTH KING COUNTY	timelines are way too far out in the future; build it sooner!
NORTH KING COUNTY	I've lived in Boston, New York, and San Francisco. Part of getting ridership and buy-in for light rail is having a functional city core of lines and stations. The first priority for light rail should be getting Ballard and West Seattle connected-- 25 years is WAY TOO LONG to wait. Once that's complete, THEN hook in the East Side/ Everett/ Tukwila, etc. Without building out the stations in Seattle, you won't get the ridership levels you hoped for because people, coming from both within the city and from the East Side/ Everett/ Tukwila won't have a reasonable guarantee of being able to get where they need to go in a reasonable amount of time. No one wants to take a bus to a rail line to another bus (or more transfers than that) to get from where they are to where they need to be. I live in Wallingford and work on First Hill. As it stands, if I wanted to take public transport to work, I'd have to take a bus, light rail, and the Seattle Street Car to get there. Too many transfers, adding too much time to my relatively short commute. You aren't making it worth it to me to not drive my car. But imagine how much lighter the traffic going through Seattle on the I-5 corridor would be if you got the people who live and work in Seattle OFF of the freeways? Your current plan never actually gets to a point where my current commute is one I would do via public transportation. That needs to be fixed. We need a much more extensive rail system in Seattle.
NORTH KING COUNTY	Focus should be on getting light rail up as soon as possible. Not get sidetracked by expanding current broken system.

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I would like to see link light rail built to as many places as possible as fast as possible. I also think we need park and rides at light rail stations immediately. Until we have these improvements, cars are still required for most people and we could increase use of the rail system with more park and ride facilities. Further, I would like to see lower income neighborhoods served better. I think pockets such as South West Seattle are being served poorly by existing and planned changes and should be studied for expansion. Has a plan been studied that connects Ballard via the University District (through Wallingford or Greenlake)? This would greatly help students access the University.
NORTH KING COUNTY	Timeline of projects is unacceptable! The expansion is definitely needed but ST needs to rethink some of the projects themselves and of course the timeline! Alos, in this whole plan I see no discussion of ST Express seeing early improvements while projects get built, especially since I dont see the bus on shoulders idea getting implemented anytime soon. Priorities seem to be off with this ST3 plan.
NORTH KING COUNTY	Take care of Ballard and West Seattle first. Ensure that busses can actually travel the roadways here.
NORTH KING COUNTY	The glacial pace of light rail development is crazy. Please work on figuring out ways to get these dates sooner. If that means somehow taking shortcuts in rail station development that can be fixed at a later date, this seems like a good compromise to me. Seattle needs a better mode of transport sooner!  Seattle also has serious east-west issues. None of these projects change this in any meaningful way. That should definitely be added to this plan.  Thanks!
NORTH KING COUNTY	T5 in West Seattle is being looked at for super ships, which will significantly increase all traffic in and out of West Seattle. We need to leverage Port of Seattle Environmental Impact funds to speed up the light rail for West Seattle.
NORTH KING COUNTY	Ballard - downtown- West Seattle light rail needs to be done as soon as possible. It's the greatest service and rider potential
NORTH KING COUNTY	22 years for Ballard line is too long. Get it done sooner and you have my vote.
NORTH KING COUNTY	I wish it could happen sooner!
NORTH KING COUNTY	I believe that efforts to shorten the proposed timeline should be evaluated. By the time the first phase is complete, with projected increases in Puget Sound population, traffic congestion will be at unsustainable levels.
NORTH KING COUNTY	I think we should develop completely in Seattle before branching down to Tacoma.
NORTH KING COUNTY	This plan takes way too long to complete. Why can't it be done faster? Ballard to downtown light rail should happen before west seattle

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	It's astounding to see that it would take 25 years to build a light rail system in a wealthy and prosperous city such as Seattle. There's something fundamentally wrong with the people in charge of transit if this is the case. Why does it take a fraction of the time everywhere else in the world but here? Why does it take 22 years to build a light rail link from Seattle to Ballard? In 22 years, this city will grind to a halt and people will just go elsewhere. There must be a way to do this faster.
NORTH KING COUNTY	The projects should be accelerated, and I would pay higher taxes to make this happen.
NORTH KING COUNTY	A higher priority should be placed on delivering improved service to existing densely-populated areas more quickly. Eight years is an acceptable horizon; twenty-five years is not.
NORTH KING COUNTY	The most urgent transit need in Seattle is to relieve pressure on I-5, particularly in the I-5S section between Northgate and downtown which has been rated in the top 5 worst highways transits in the country. Anything that addresses that section should be top priority.  Transit time and easy access to transit stations (i.e., parking, bicycling) are incredibly important to success!
NORTH KING COUNTY	Work with the City of Seattle this year to pass legislation that would accelerate, even if by a few years, the Ballard light rail completion timeline. Even getting the timeline down to 18 years would make an enormous difference.
NORTH KING COUNTY	Ballard to downtown, and Redmond/Bellevue to downtown are the two most important lines. They should be completed soonest, as they'll have the highest impact (in terms of ridership and cars being taken off the roads).
NORTH KING COUNTY	We need more analysis of how this plan will work in the future, looking at the development of automated cars, in particular. For example, will light rail and rapid bus lines still be so critical? Parking spaces may not be needed. I think if we're looking 30-40 years out, we need to be smart about analyzing other probable changes in transportation systems.
NORTH KING COUNTY	The timeline is way off. It is quite urgent as traffic is crushing the city. I moved from NYC, eight years ago and am quite familiar and comfortable with public transit. The level of public transportation service in Seattle forces me to remain to take my car everywhere, especially work in Bellevue. Most folks including myself, don't have enough time in the day to be held hostage by buses.
NORTH KING COUNTY	It is ridiculous that Ballard is expected to wait 22 years. It is one of the most quickly growing parts of the city and needs transit improvements much more quickly than 22 years.
NORTH KING COUNTY	We have waited too long already and cannot wait any longer. We must now bite the bullet, and get the rest of the basic pieces done asap, everyone I know agrees and we are willing to put up with a little pain for the long term gain.
NORTH KING COUNTY	Just get on with it and stop wasting time. Seattle needs this now, not in 25 years.
NORTH KING COUNTY	What does it take to implement the ST3 plan faster, since we're already experiencing painful population growth?
NORTH KING COUNTY	To long to get implemented. Transit sharing lanes with cars just doesn't make sense, transit need priority.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	The plan has too long of a timeline. I recommend a smaller scoped plan with a much shorter timeline. Let's limit these projects to only those that can be completed within the next 10 years....lets get building QUICKLY on the most important projects rather than making slow progress on a lot of different projects.
NORTH KING COUNTY	Timeline is too long. Population growth much faster than this, meaning we need it sooner
NORTH KING COUNTY	Completion timelines are too long, especially for Everett, Tacoma, West Seattle and Ballard.
NORTH KING COUNTY	I have been very disappointed with how poorly Seattle's funding has been handled. Additional funding that was spent to help accelerate planning of Ballard transit appears to have been a complete waste. Options were discussed and now will see no significant work for years. Additional money to build the Graham Street station was voted for by the citizens of Seattle but won't be used by Sound Transit during the levy. Efforts to connect trains and buses have been poorly planned and require multiple fixes in order to support what should be one of the driving design constraints. It is hard to support an organization that is this bad at coordinating with its users.
NORTH KING COUNTY	Please speed up the process and streamline permitting.
NORTH KING COUNTY	I strongly support but not the timeline. We have the money and the resources it should not take 25 years. But whatever it takes it should get done.
NORTH KING COUNTY	Ballard and south lake Union are two of the fastest growing areas on seattle. Ballard has the additional problem of limited access due to geographical location. A 25 year plan is unacceptable for light rail. It needs to be much earlier. We are already overdue. The d line has provided little relief, particularly when other buses are so unreliable and traffic is still an issue. If there was a light rail solution for Ballard, I would no longer be driving my commute.
NORTH KING COUNTY	This timeline seems extremely long... It would be nice to know what variables would change and how they would change to make the timeline shorter.
NORTH KING COUNTY	Light rail to Paine Field needs to be the highest priority, not the lowest. Please try to reduce the length of time to implement all projects. Seattle is growing so fast that we'll still be at capacity if the improvements take 25 years to complete.
NORTH KING COUNTY	Given the volume of high density growth in Ballard, waiting 22 years for light rail service is absurd. BRT in and out of Ballard needs to be brought online quickly and the light rail timeline needs to be halved. I understand that in order to pass the measure, the committee has put projects in the outer corners of the county first but delaying the Ballard and West Seattle lines to gain those votes is a poor choice. I feel that the funding for ST3 should be split between greater King County and the City of Seattle proper. I can't speak for everyone but I feel that a majority of residents in West Seattle and Ballard would approve higher taxes than those proposed to see their neighborhoods served sooner.

Comment(s) about project completion timelines - North King County

<p>NORTH KING COUNTY</p>	<p>It's what you're hearing from everyone, I know, and I recognize that there are challenges in the way financing is structured and the design and building process, but we need all of this FASTER. Our communities are on board with the idea of light rail now, and our need is increasing exponentially. Light rail changes access to other parts of the region in ways that buses simply don't. Fast, reliable service is compelling enough to pull people out of their SOVs. I don't use cars at all - I bike, walk, and take transit everywhere. But there are trips I don't take right now because of the investment in time and bother: visiting friends in Ballard or West Seattle or Shoreline, for example. I'm excited about Link to Shoreline in 2023, and eager to have light rail to Ballard and West Seattle, as well as the Eastside and throughout the region. Light rail on Capitol Hill is already changing our lives here, and that will only continue with more stations and more destinations available. But we need to build faster!</p> <p>Also - the Ballard line needs to continue up to Crown Hill, at least to 85th. NW 85th is a major traffic corridor, and an important transit transfer point.</p>
<p>NORTH KING COUNTY</p>	<p>Light rail in the city is a far better use of money than to the suburbs. As seen in the Capitol Hill/Udist expansion, the service will be heavily used immediately and at all times of the day. Connecting Everett and Tacoma mainly helps commuters, which can more cheaply (and quickly) be done with Sounder improvements and BRT.</p>
<p>NORTH KING COUNTY</p>	<p>I fully support and want light rail and other public transportation projects in our region fast-tracked. I wish this was done decades ago. With that in mind, I find some of the project timelines rather slow, such as s West Seattle/Tacoma (17 yrs), Ballard (22 yrs) and Everett-Issaquah (25). I commute from North Seattle to Renton and while just a portion of the area covered in these proposals, a robust and comprehensive system would alleviate many of the daily traffic problems and congestion issues. I know Tacoma, Bellevue and Everett has their issues too. I would use the light rail to commute to work if there was a station nearby my home, parking and then a stop close to my work or a second bus option. I would also use light rail to travel into downtown Seattle, over to Bellevue, down to Tacoma or Southcenter, etc.. One of the last survey questions, asked which two projects were top priority but it was from a list of 20 or so? I would recommend broadening that list to 5 or 6 and rank them. This is very complex with multiple systems and multiple communities and cities affected so any further descriptions of the timeline through web site projections (like a game/simulation), posters, etc. would help promote this the correct way so that it can pass the vote. Why do homeowners keep footing a lot of the bill? I feel bombarded with levies left and right. I think some of the corporations building a large employee base here should help to pay. While the large companies provide a positive impact to the overall local economy, the majority of these workers commute one way or another. Users taxes work better in my opinion: increase excise tax, slowly increase sales tax, and I suppose a little more to the gas tax. Somehow taxing bicyclists, even a small amount, seems fair, but that would probably be a very, very tiny amount of revenue. They use the roads too. Raising revenue is the toughest part of this. The citizen have to be on board. It needs to be a collective effort to pay for and maintain these projects.</p>

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	Please reduce the delivery timeline as much as possible without sacrificing quality. Seattle is growing so quickly that we cannot wait 15 years to bring these projects online.
NORTH KING COUNTY	Light rail stations within the city of seattle should be priority. I should not have to pay additional taxes to fund transit and have to wait 22 years for a simple train station, especially considering you already plan on tolling the new 99 tunnel. I can't afford to pay increased taxes to fund transit, and every other whim of the voters and tills on my primary transit route and then wait 22 years to see any minor benefit.
NORTH KING COUNTY	Everything about ST3 is great, except its timeline. West Seattle and Ballard light rail in the 2030s?? Are you serious? I would totally support doubling or tripling the tax burden to take 10 years off this plan. I am a huge Light Rail supporter. But, frankly, I and many others I know are leaning towards voting against ST3 solely because of the timetable, to force ST to come back with a more aggressive plan. I honestly think ST3 might fail on the ballot for this very reason.
NORTH KING COUNTY	Do everything in your power to accelerate the time lines of the rail projects. 17 yrs to WS and 22 yrs to Ballard seems extremely long timelines.
NORTH KING COUNTY	I would be willing to pay more to have the projects done faster. If it's going to take this long to build more light rail, it seems essential to make huge improvements to bus service. The rapid ride buses are a good start, but even the E line (which I ride regularly) is not able to support demand or be reliable enough that I can take it to work without adding an extra bus or two's time for safety. When I visit Vancouver and Portland, I always wonder why we can get fast, efficient bus service almost anywhere in those cities, but not here. (Don't even get me started on the bike lanes in Vancouver, which are separated from traffic, making it possible to bike safely on the roads there. Sure wish we could do that in Seattle.) I hate using my car and love using public transit, and would like to see that become a practical option for more people.
NORTH KING COUNTY	Please explain why light rail projects can't be started and completed earlier? Is it a question of manpower? Is it a question of only having a fraction of the proposed \$50 billion available each year? If so, can bonds be issued to fund projects up front (costs will only escalate in the future and likely faster than the rate of return on bonds)?
NORTH KING COUNTY	More Priority on West Seattle Line!

Comment(s) about project completion timelines - North King County

<p>NORTH KING COUNTY</p>	<p>I understand the need for time to complete the W Seattle/SLU/Ballard rails. However, even with the increased density in Interbay, currently there is NO direct transportation route into SLU from W Queen Anne, SPU, and Magnolia. My wife works in SLU (not Amazon) and cannot take the bus because to get the last 1/2 mile she has to change buses on Denny from the 24 or the D to a bus up Denny. Then she has to walk several blocks to the center of SLU, and the 5 mile commute takes an hour. That is ridiculous with the number of people flowing into SLU every day. The current lack of sufficient capacity for reliable transportation into SLU neighborhood from Interbay and Ballard should make that line a nearly equal priority with W Seattle.</p> <p>Even so, bundling the tunnel with the line to Ballard instead of the line to W Seattle seems backward. At a minimum the second tunnel to SLU and Seattle Center should be completed with the W Seattle line since that also facilitates transportation through downtown, to the stadiums, other existing light rail, and Seattle Center.</p> <p>While we wait for rail to eventually make its way to Ballard, given the rapid increase in density in Ballard and Interbay, the accessibility, speed, and reliability of the 15th/Elliott corridor - including the D Rapid Ride - MUST be improved ASAP:</p> <ul style="list-style-type: none"> <li>- There is currently very limited parking near 15th and Dravus for Magnolia residents to access the D line. None of it is very good for ADA access.</li> <li>- Improved bicycle and pedestrian connections between the D-line (and eventual light rail) stops and the Ship Canal Bike Bath, Elliott Bay Trail, and any future additional bike/pedestrian bridge to Ballard. Bike racks at the Rapid Ride stops would be a good start.</li> <li>- There MUST be a change in the rules that eliminates Ballard Bridge openings during heavier commute times. This will only get worse and commute times longer as Interbay and Ballard continue grow as projected.</li> <li>- I support a bridge as a faster, cheaper alternative to another tunnel ONLY if it includes a change in the rules to eliminate bridge openings during the heaviest commute times.</li> </ul>
<p>NORTH KING COUNTY</p>	<p>Congestion within Seattle is increasing every year. It is my opinion that the light rail to Ballard and West Seattle should have their timetables moved up.</p>
<p>NORTH KING COUNTY</p>	<p>Twenty-five years to complete this expansion is 1) ridiculous and 2) will cost the average family of 4 \$16,000 to complete, most likely double, like all government projects. I cannot support public transit expansion that is not conducive to working families with young children. This state focuses heavily on public transit expansion but fails to consider what is most important in Western Washington and that is highway and street expansion - not for additional bike lanes, but for additional car lanes!</p>
<p>NORTH KING COUNTY</p>	<p>the timeline for the graham street station is way too slow. the city of seattle voted to set aside money for this project already so i don't understand why it's so late in the timeline. i live in this area (and walk to the othello station every day) and the neighborhoods are quickly growing and would definitely take advantage of a station.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	We need this as soon as possible! Seattle is rapidly becoming the worst city in the country for traffic. We are losing months of our lives stuck in bad traffic. 25 year time lines are unacceptable! Life is too short!!
NORTH KING COUNTY	I strongly support light rail. However, I live in Ballard. You are asking me to pay approximately \$200/year for a service I won't see come to fruition for 22 more years. Ballard is one of the fastest growing neighborhoods in the city. Expedia is going to be bringing thousands of employees to Interbay. 99 and the 15th/Elliott corridors are already jammed. Buses won't solve the problem b/c they're on the road. We need light rail much more quickly. If people w/in the city of Seattle can get to work more easily using light rail, then there are buses that can use surface streets to bring eastsiders to downtown.
NORTH KING COUNTY	Prioritization of project elements should be based upon ridership and demand. As proposed, ST3 targets a wide network of low ridership and low density non-urban areas. Whereas, inner city areas that are experiencing rapid growth and development would not receive meaningful improvements for 20 to 30 years, or more. This timeline is simply unacceptable to those who are funding the bulk of improvements and would not see benefits over realistic planning timelines. Focus on densely populated urban areas, then expand beyond.
NORTH KING COUNTY	West Seattle continues to have Major traffic issues...since we didn't get the promised monorail, we should be first priority for all transportation projects. The California ave configuration(currently) has cars stuck behind buses between Morgan and Alaska(no place for the buses to move out to pick up and discharge riders) and the reworking of 35th Ave SW between Morgan and Roxbury has made it EXTREMELY dangerous for bicycles(I bike commute and will no longer use that section due to the road rage drivers have exhibited(passing on the right because they don't want to wait on the single lane provided)
NORTH KING COUNTY	faster would be better
NORTH KING COUNTY	I think you should challenge west seattle to get consensus on exact alignment early, and try to cut years off the delivery date. Also, I think this alignment is relatively straightforward and not as technically complex as others, so should be 1st or 2nd, not 3rd priority.
NORTH KING COUNTY	I completely understand how much planning & project management goes into a project like this and I am thankfully we finally have an opportunity to change how people get around in the Puget Sound area. My concern is the timing of these projects; would you be able to provide information on what a commute is today (Lynnwood --> Bellevue, Lynnwood --> Seattle, Federal Way --> Seattle, Kent --> Bellevue, for example) versus what it will be in five (5) years? The reason I ask is that the earliest these projects will be complete is eight (8) years and at the rate of traffic in the area, that timing seems to be an issue.  [name and contact info]
NORTH KING COUNTY	Build out the core projects, which will benefit the most people first (Ballard and West Seattle) and where people are less likely to have personal vehicles. After that core is built, then expand further out in the suburbs where the culture is centered around transportation via personal vehicles.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>1. Adjust the schedule to move up opening of Everett, West Seattle and Ballard light rail. Make early agreements with cities and opponent groups to scope an expansive EIS process that will not require any SEIS. Include all potential alignment options and research all complaints of opponents, so the draft EIS can be expeditiously finalized after completion. Staff up Sound Transit to complete all EIS and PE processes simultaneously during 2017-2020. Begin construction on at least 2 light rail lines by 2022.</p> <p>2. Specific comments on West Seattle light rail:</p> <p>(a) An elevated station along SW Alaska St near California Av SW is not practical, due to the narrowness of the ROW, adjoining multi-story buildings, and the radius required for a future southward extension to White Center. I recommend either a tunneled station at Alaska/California, or an elevated station at Alaska/Fauntleroy, aligned for future extension of the line southwards along Fauntleroy.</p> <p>(b) Coordinate with King County Metro early in the process to maximize bus/rail transfer at all West Seattle stops. The utility of the line depends on bus transfer for a majority of the ridership. Station entrances must be aligned within 300 feet of planned bus stops.</p>
NORTH KING COUNTY	<p>The timeline is not fast enough, which is why I said Somewhat Oppose to #12. 17 and 22 years to build light rail out to W. Seattle and Ballard is a ridiculously long timeline. This should all be done in the next 10 to even get close to the pace of development here in Seattle. This entire project needs acceleration. Also, I support more of a tax on property and vehicles. Adding more to the sales tax is too regressive and could hurt low income people. The developers and businesses profiting from being in Seattle should primarily fund this.</p>
NORTH KING COUNTY	<p>I think the enormous length of time expected to finish these projects make them seem like pipe dreams instead of real projects. I think that the fact that this will take so long makes us angrier rather than enthusiastic about this proposal.</p>
NORTH KING COUNTY	<p>Light rail connections between Ballard, Downtown Seattle, and West Seattle should be completed first, not nearly last. I strongly oppose putting this connection toward the end of the plan. It must be completed first.</p>
NORTH KING COUNTY	<p>WAY TOO SLOW!!!!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	There must be some way of addressing Light Rail for Ballard and West Seattle in a more immediate way and garnering support of the voters of Seattle, while implementing the long term Light Rail plans for the 'spine' from Tacoma to Everett. Logically, the Tacoma to Everett Light Rail extensions are dependent on each part of the spine being built (ie, Northgate to Lynnwood has to be built before Lynnwood to Everett can be built, Bellevue to Redmond has to be built before the Issaquah connection can be made, etc). But Ballard and West Seattle are separate and independent of the 'spine' and could be designed and constructed concurrently with the design and construction of the remaining sections of the 'spine'. There is an assumption that Ballard and West Seattle will connect with the soon-to-be-existing Light Rail from UW to Northgate, and/or the existing Downtown to UW sections. Those sections of the Light Rail will already be there for those 'in-city' extensions to connect with. That is how the voters will see it. Must find a way to deliver on those 2 projects sooner to get voters support.
NORTH KING COUNTY	My proposal: First: Immediately (1 year) implement BRT to address commute times, quality of life, affordability and sprawl. Cut corners as needed but DEPLOY initial BRT on all lines. Second: Must find ways to build light rail faster. Get additional outside ideas. Build in medians. Use elevated tracks. We cannot wait 25 years. Third: Reduce the scope to shorter time and reduce cost 30%. Once ST3 is successful, then, you can come back to voters and ask for more. By then, there will be additional technology choices.
NORTH KING COUNTY	We are so overdue to get this in motion...
NORTH KING COUNTY	We don't need light rail in 22 years; we need solutions *now.* Gridlock is getting worse every day. I selected light rail projects as my highest priorities because I think long-term they will serve our community more reliably than buses can, but in the meanwhile it is essential that we develop workarounds that can be implemented this year. There are several such mentioned in this survey - improvements to the Rapid Ride C&D lines, finding ways for buses to use highway shoulders, etc - and people answering the survey were asked to choose one or the other. These projects are not mutually exclusive. We need improvements in Rapid Ride C&D lines (and additional Rapid Ride lines!) to get us through until the light rail can open in 22(!) years.
NORTH KING COUNTY	Get it done as soon as possible, please.
NORTH KING COUNTY	Please move faster!!
NORTH KING COUNTY	My only concern is that the timeline is so far behind. The impact of waiting 17 years to get light rail to our neighborhood is significant. We can't and shouldn't wait that long. We (collectively) should get the ball rolling sooner. And, in light of the mono rail proposals in 2004/2005, we've already paid a ton of taxes in. We lost time. Let's put that money to work to catch up and get going sooner, please.
NORTH KING COUNTY	Light rail has been enormously successful and should be accelerated, particularly to Ballard and West Seattle. If there is effective transit, Seattle can have dense development in these residential neighborhoods and avoid the endless sprawl and traffic of the Bay Area and LA.
NORTH KING COUNTY	Ballard to Downtown is the best dollar-per-rider use of resources in the whole package. You MUST find a way to get it done sooner!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	I know you have to start somewhere and that should be west Seattle light rail. There are 1000's of people who drive because unless you are going directly downtown - it's too hard to take transit. Light rail would be used HEAVILY in west Seattle so start here!
NORTH KING COUNTY	We need to be more efficient in our delivery of these projects. Our laws are obstructionist and more needs to be done to foster an environment where we can build transit faster and with less risk and fewer hoops to jump through. Go design build and get it done.
NORTH KING COUNTY	Given how behind the 99 tunnel project is in terms of cost and time (and how cranky the public is about the delays), these proposed timelines need to be shortened. The last thing we want to happen is for any major \$\$\$ project to get behind, lose public support and be cancelled. This would cause a major uproar about the sunk costs and further delays. While I know nothing about completing large scale projects like this, I am quite familiar with managing stakeholder expectations and involvement. Please either get this up/running/done as soon as possible, or be prepared for the wrath of a lot of angry taxpayers.
NORTH KING COUNTY	project timelines are so far out and yet they seem very small for the money, 17 years to barely connect west seattle seems short sighted on the scope (only going to Alaska Junction) and taking 17 years to get there. I would think the population demands in west seattle and ballard neighborhoods would receive further reaching light right service and on a much faster timeline. Light rail should be running from California/Admiral south to Burien transit center and then on to the airport, with a connection to the downtown spine from Alaska Junction.
NORTH KING COUNTY	<p>- While I am not familiar with the particulars for project completion timeline projections, I think the bar for project timelines need to be set higher to keep up with the population growth projected for the region. On a more personal level, it is hard to be excited about the ability to get to Ballard when I am nearly twice as old as I am today (50). I also cannot imagine many older, property-owning people being excited at the prospect of paying for ST3 when they won't be around to enjoy its crown jewel (i.e. frequent light rail) projects.</p> <p>- There needs to be an expedient, grade-separated east-west option in Seattle (ex. Ballard-UW, Denny Way, etc.). While ST3 provides great north-south options, the existing crosstown options cripple an otherwise forward-thinking plan and make the system incomplete.</p>
NORTH KING COUNTY	It is ridiculous that we have to wait for light rail to Ballard for so long.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - North King County

NORTH KING COUNTY	<p>The timeline must be improved. We are fortunate to have strong support for transit here, and we're happy to fund it, but we would actually like to use it in our lifetimes! Please explore every possible avenue for speeding up project completion. Be creative. This is a unique opportunity to go big, time to pull out all the stops and make it happen ASAP.</p> <p>Also, it is critical that all light rail MUST be grade-separated. I live near the Columbia City station, which is great, but it's crystal clear that running rail alongside cars is a recipe for disaster. There's simply no way to prevent the occasional collision, and not only is this an unnecessary risk to people's lives, but the ensuing delays effect the entire system. We only get one chance to build this system. Making it dependent in any way on vehicle traffic defeats the entire purpose of building a reliable, safe, and permanent transit network.</p> <p>Lastly, I support the quick completion of the Graham Street in-fill station. This is an long-delayed equity issue with a relatively painless solution, and will make a significant difference in this community.</p>
NORTH KING COUNTY	<p>Could strongly support plan if timelines are accelerated. Most of these projects were needed 5-10 years ago! While there's no time machine to make that possible, another 25 years to wait is much too long (and beyond my likely life expectancy.)</p>
NORTH KING COUNTY	<p>The completion time for light rail to Ballard is ridiculous. There is ever-increasing density in Ballard, SLU and surrounding neighborhoods so more money should be spent there faster. Also please add a light-rail line down 45th in Wallingford connecting east and west.</p>
NORTH KING COUNTY	<p>It's all simply too slow. We need the light rail timelines accelerated, especially for the Downtown Seattle to Ballard and to West Seattle light rail lines. Seattle is growing too fast for us to wait decades for these projects. We need to do everything we can to complete these projects faster.</p>
NORTH KING COUNTY	<p>Though I strongly support #12, I think it should be done much sooner.</p>

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - East King County

Subarea	Additional Feedback - Comment(s) about project completion timelines
EAST KING COUNTY	<p>I'm 34 now; I'll be nearly 60 when all of these projects get done. While I understand that projects take time, the phasing needs to be adjusted to focus on completing the highest-ridership and core parts of the system first, and have the outer lines done after that. It makes no sense to complete a stub line to West Seattle from SODO 5 years before the Ballard line including new downtown tunnel; that would make the West Seattle line of limited utility for 5 years. Ballard and the downtown tunnel should be first.</p> <p>There is far too much emphasis on building parking, with no apparent regard for how parking expansions drive need for additional capacity, likely on ST Express. ST Express is overloaded now and ST customer service continually indicates there is no money for more buses, despite overcrowding. If the "early wins" are causing delays in later, bigger projects, the early wins should be deleted.</p>
EAST KING COUNTY	<p>Timeline is far far too long. These changes need to happen in 10 years or less no matter the cost. The Puget Sound area can't wait 12 years before any real progress is made. Constant traffic congestion is doing irreparable damage to the people and businesses of the Puget Sound area.</p>
EAST KING COUNTY	<p>Mass transit is critical to the economy of the Puget Sound area. I support all of the proposals. However, the timeline is too long. Since we are doubling our transit time every few years, we cannot wait for 12 or 25 years for the full program to come online. If additional funding is needed, a graduated increase in taxes and vehicle fees over a span of years may be more acceptable to the voting public. We all benefit from transit, whether or not we use it ourselves.</p>
EAST KING COUNTY	<p>We should be given an opportunity to pay more than \$17 dollars a month to speed up the plan to less than 25 years. Well done on coming in early and under budget for the UofW station!</p>
EAST KING COUNTY	<p>I believe that there should be research done to attempt to expedite the implementation of the light rail extensions, especially. People will pay more for a transit system that grows with the population rather than 25 years behind it.</p>
EAST KING COUNTY	<p>I fear a 25 year plan is too long. People will not want to vote for a new tax when their piece of the pie is not delivered until 25 years later. ST2 was a 15 year plan and I felt that time line then was barely acceptable when voting for it. I think ST3 should be scoped down some to 15 years with less projects. And then in 7 years, when ST2 is just fully completed and there is more positive engery, we can vote on ST4.</p> <p>Also, there needs to be a tunnel to Ballard instead of a draw bridge. This will make the future Ballard-Fremont-UW tunnel easier to complete. Doing a draw bridge now to save money is short sighted.</p>
EAST KING COUNTY	<p>If possible, the timelines to add light rail service should be expedited even at extra cost. This light rail system should've been built 20 years ago (as with most other major cities in North America). We are years behind where we should be and we need to make up for a lot of lost time if our region is going to thrive without gridlock in the future.</p>
EAST KING COUNTY	<p>I think 12 years to get to Redmond is too long. If like to see that moved up in priority.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	This plan has so long a time span that I am skeptical it will be anywhere near completion in my lifetime. We need solutions and actions now!
EAST KING COUNTY	Funding could make or break this plan. Our sales tax is already high. There must be a sunset date on the funding or I won't vote for it.
EAST KING COUNTY	Ballard and West Seattle light rail needs to happen NOW, not in 22!) years. I would never support a plan that places that investment so far in the future
EAST KING COUNTY	Why is it taking so long to complete the light rail projects? Seems to me that it should not take 25 years to build a few miles of track. What are the opportunities to expedite the process? Currently, traveling around the Seattle area is almost unbearable.
EAST KING COUNTY	you can't reach to evry house hold, better build multi level parking lots, so that people can use existing transit system in a better accessible way
EAST KING COUNTY	The timeline is much too long for how urgent our traffic news is, and many of these projects are focused on outlying areas where the need isn't there (Issaquah???) rather than improving the worst areas sooner (Redmond!!!!). It takes over an hour each way to travel the short distance from Downtown Redmond to Downtown Seattle on route 545. Waiting 12 years for any relief from that terrible time suck is no improvement I'm willing to pay such big bucks for!!!!
EAST KING COUNTY	Go faster. At the proposed 2041 completion I will be 103 years ol
EAST KING COUNTY	Proposed timeline for extension to Everett is way, way, way, way too long. Why would I vote for this package when the benefit won't be seen until 25 years from now? Also, strongly support using the Eastside Rail Corridor for high capacity transportation. Right of way is one of the most expensive and time consuming elements of any transit project. The ECR has the alignment and the right of way (100 feet in most places). Accelerate the use of the ECR for high capacity transportation.
EAST KING COUNTY	I am stunned by the amount of time that Sound Transit says it will take to complete the system. Also, no rationalization has been given as to why certain projects are being given a higher priority. I still believe that additional money could be better spent enhancing the bus system. (Think about what could be done with tens of billions of dollars.) Any light rail system is far less flexible than a system of rapid and frequent bus service. Light rail also assumes that future growth patterns will continue as is and I don't think anyone can make that prediction more than a quarter century from now. As I said, bus service can adapt. As a percent of the total commuters, light rail will barely make a dent in the overall number of people who need to commute. Also, what makes anyone think that in an age of ever increasing technology more work can be done at home without having to commute to work five days a week. Given Sound Transit's record of projects on budget and on schedule, I am skeptical of both the cost and the timeline. And thanks to our state's regressive tax structure, the cost for implementing Sound Transit's plan falls disproportionately on those with the least ability to pay. A fairer tax structure would go a long way toward convincing me to vote for the necessary tax increases. Right now, I am leaning toward a "no" vote. I voted for these things during the "Forward Thrust" era but as time goes on, I am becoming ever more disenchanted.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	This schedule is way to long!
EAST KING COUNTY	I'm of the opinion that the timeline needs to be shorter - by the time the last of these proposed projects finish, I'll be old enough to retire. That said, I'll take what I can get and look forward to the results.
EAST KING COUNTY	25 years seems like a really long time. Couldn't some of these projects be build simultaneously? Is there a reason why the North/South corridor on the Eastside is BRT rather than Light Rail? Such as a SeaTac-Bellevue-Redmond-Bothell route?
EAST KING COUNTY	What % of population completing this survey will still be commuting when these changes are finally completed???
EAST KING COUNTY	I support the addition of light rail to the region. The timeline is too long in my opinion. We need this in the region. Let's get it done.
EAST KING COUNTY	You still are ignoring the Renton and the Renton Fairwood areas to downtown Seattle in these plans. The current buss routes are a disgrace. They run late are cancelled and over crowded most of the time. I am provided with a free buss pass and refuse to use it because of the above situation. I drive every day to downtown instead, but would prefer not to if the current transit system would just clean up its act.
EAST KING COUNTY	I will not vote Yes to wait 25+ years for light rail to Issaquah. Over that timespan I would have paid \$10,000 ADDITIONAL tax dollars to Sound Transit and have nothing to show for it. Speed up the timeline somehow.
EAST KING COUNTY	Faster. 22 years?! really? that's no way to keep up with the need of our growing community. Get the plan down to 5 years. Plus you've got to include the south east side in your light rail plans. I'd be happy to pay \$500 a year for a shorter timeline to completion and more rail lines.
EAST KING COUNTY	It takes too long. Perhaps we need to focus on rapid ride instead of light rail. Also, bus feeder service to rapid ride, light rail, and park and rides needs to improve. The worst part of my commute is the first and last 1.5 miles serviced by metro between me and the sound transit service. Metro needs to increase frequency to help get people on the sound transit.
EAST KING COUNTY	I would say the plan is great, and the current implementations and changes to the system effective since March 26 have been AMAZING. However, I do feel really strongly that there is an URGENT need for a sound transit link system that goes to Redmond, connecting it to Bellevue and other locales. Currently, I have never riden the LINK rails, and it is completely alien to the people of this community. As described in the survey's own effects of a rail going to Redmond, I would ask that it be added to the early 8-year part of the plan. Thanks.
EAST KING COUNTY	The plan is great but 25 years? It will most likely be outdated again by then. Interest rates are at historic levels. Let's accelerate this plan.
EAST KING COUNTY	I would be much more supportive of this plan if light rail completion In general, and especially to Redmond, could be significantly sped up. ULink is a good start, but waiting years for the next phase is too long - traffic is already a disaster

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Parking, parking, parking. I know you guys are tired of hearing it from me, but increased parking would lead to an IMMEDIATE increase in Sounder rail (and light rail) riders. Immediate -- not 8 years from now -- RIGHT NOW. You are clearly well aware that the population continues to grow, yet you built the Tukwila Sounder parking lot to barely accommodate the number of commuters you had three years ago. No surprise that it (and most of the park-and-rides along the entire Sounder route, as well as the Tukwila light rail station) is already over capacity. You turn away customers Every. Single. Day. and force people back into their cars and back onto the roads. You could run trains much more frequently -- and they would be full -- all the southline trains are standing room only all or most of the time. If you paid attention to your own population growth figures and provided sufficient parking, that Sounder train would be a license to print money.
EAST KING COUNTY	Millennials will use and support this system. Older generations are more car dependent. I think focusing on millennial support will be most effective- millennials are often motivated by cost savings, so data showing the cost effectiveness of transit would be a big help. Baby boomers seem to willing to sit in any amount of traffic, I don't think they will be as supportive.
EAST KING COUNTY	The project is drawn out far too long. By the time this plan as presented is finished, it will be obsolete, because we cannot predict in which direction businesses and population centers will grow most. We need more P&R lots, because even today parking often limits the usefulness and use of public transport. Popular shopping centers need to be included. It is ridiculous that light rail to the airport bypasses South Center so closely, just as one example. Also, a ring line is urgently needed. It is no good that all local travel needs to pass through the center of Seattle.
EAST KING COUNTY	I live in Issaquah. But I have to wait 25 years??? I will be retired by then...
EAST KING COUNTY	Too Long and too expensive. Ignores Renton & Kent.
EAST KING COUNTY	SPEED IT UP! 25 years?!? I'll be dead by then!
EAST KING COUNTY	The Redmond connection should be continued much sooner than in 12 years.
EAST KING COUNTY	25 years seems to be a long time to get all the projects finished. I understand that these projects will be done in phases, however, I feel that if the timeline was 5 to 10 years shorter than the proposed plan, many more voters would support the proposition. People in the Puget Sound area embrace transit and are waiting for major extensions of current transit systems. The faster these projects can be delivered the more support they will receive. Also, the light rail project from Ballard to Downtown Seattle should be a top priority and one of the first projects worked on as part of the program.
EAST KING COUNTY	Why is it taking so long to get light rail built? We need it yesterday!!!
EAST KING COUNTY	Light rail is crucial since people are not likely to take bus lines on the same crowded roads they already suffer through. We need to prioritize LESS vehicles on the roads not empty buses crowding existing crowded roadways.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	The rate of construction has been far too slow and does not come close to keeping up with the increasing transit needs. Sound Transit seems to want to do work on only one or two projects at a time. Construction should be occurring on more projects at the same time. Also, the public input phase seems to take several years which is excessive. Planning should move forward much faster.
EAST KING COUNTY	17 to 25 years for some of the projects is too long!! Let's find a way to make it happen sooner! We need solutions sooner rather than later!
EAST KING COUNTY	Microsoft employees in Redmond clog the roads and freeways making it impossible to traverse during their rush hours. Buses traveling between Redmond and the UW Seattle are crowded during the rush hours. Put on more buses on ST route 542 and get rail over 520 sooner. It's not evident in the plan that it's even a priority.
EAST KING COUNTY	One of the highest ridership lines is one of the last to be built. need to move the line to everett up earlier
EAST KING COUNTY	Timeline lines are atrocious and burden of paying for it is on the current generation who will never be alive to use it when it is finished in 25 years. Exemption should be made for our seniors
EAST KING COUNTY	We need the plan completed now and not 25 years from now. Keep more buses of the hiways and streets. Go light rail. In Kirkland, we have been promised light rail for years. From your plan it looks like you are by-passing the north east side of the lake. Why are you leaving us out?
EAST KING COUNTY	You're asking me to pay \$500/year for 20 years before seeing an impact - honestly I'm probably not going to be living here in 20 years, but I might have committed \$7000 in taxes. Thats an easy reason for me to vote no on something I actually want to see happen. You need to figure out better funding mechanisms to move up the timeline of projects and/or move out the payments so that they are spread over the lifespan of the project (50 years). You also need to drop free parking at the light rail. No where else in the city is parking free. Start charging people \$5/day to park and that will pay for the parking lots. Right now you're wasting \$1 billion dollars on parking when it could go towards the actual transit. Just on the face of it it doesn't make sense. The South Bellevue Park and Ride is supposedly going to have room for 1000 cars. On a network that is supposed to transport over 10000 people a day, 1000 parking spots is only a 10% improvement on ridership at a significant cost. I want to vote for this plan, but you've made choices that make it extremely hard to say yes. And I'm not the only one I've heard say that. And I'm pro mass transit.
EAST KING COUNTY	Completion timeline is far too long. A grade separated transit system is a necessity and is needed now, not in 25 years.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	My top complaint is the slow speed in which light rail is built. Very tall buildings go up downtown in one year, but it seems to take 3 years to build a two story light rail station. I believe it has taken 25 years?? from when we first voted for light rail to get light rail from the airport to UW. We voted for light rail to Bellevue six years ago and we have yet to break ground. I live on Mercer Island and look forward to taking light rail to work, yet I may be retired before that happens. I may be dead before light rail reaches Ballard. Anything that can be done to cut the red tape and get this stuff built faster would only increase my support.
EAST KING COUNTY	The timeline for light rail to Lynnwood and Everett seems really long. That project is long overdue.
EAST KING COUNTY	Please do this entire project faster - as fast as possible. We needed light rail back in 1992 when the movie "Singles" came out. Then, like now, there was a lot of short-sighted self-interested behavior. We're already 24 years behind - let's not take 25 years to complete the projects - let's do it now! Please!!
EAST KING COUNTY	This timeline is too long!!!!
EAST KING COUNTY	Sound Transit is a pig at the trough of public money that never produces anything of value, just makes more work for itself. It has repeatedly lied to the taxpayers by saying it is 'under budget and on time' - anybody with half a brain knows this. Sound Transit should be dissolved immediately.
EAST KING COUNTY	The 405 BRT needed to be done yesterday. 8 years is too long.
EAST KING COUNTY	25 years is absurd. Work in 3 8 hour shifts and get this thing done in 2/3 or even 1/2 the time. Another alternative is working on these simultaneously. There is no reason to not work on Ballard and Bellevue to Redmond at the same time. Most people who live here won't even see the benefit even though they are paying for it. We have to move faster because everything proposed above doesn't solve the problem where it is needed most - which is immediately. These projects should primarily focus on getting cars in and out of Seattle, then look at the surrounding areas. The longer this takes, the more people are inclined to drive and the louder people complain about how slow we move as a city, county and state. We are already 25 years behind transportation wise and if we want more people to flock to the city and be as green as we claim we are, then this plan needs to be cut down to 10 years. Max.
EAST KING COUNTY	We totally need ST3, but the schedule is way too slow. I cannot support something 2 decades away. Denver did it in 7 years.
EAST KING COUNTY	We really can't wait 25 years for these improvements. I'd support bus rapid transit or something similar to get us moving in the meantime. My commute has increased by 20 minutes in just the past 2-3 years, how long will it be in the 25 years before Issaquah and I-90 are better served!!! I also can't see what the point is of all of these new facilities without adequate parking for those of us that use the stations.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	25 Years for rail to Issaquah? That's insane! I will be 75 years old by that time and hopefully retired. Don't get me wrong I love rail and it's advantages over buses. I have visited and lived in places with great rail systems and would gladly leave my car in the garage if it went somewhere. The construction of a rail to Issaquah needs to happen sooner!!!!
EAST KING COUNTY	Many people voting on this will be dead before it is completed, please speed things up.
EAST KING COUNTY	25 years for better transportation from Issaquah is way too long. I will be dead by then!
EAST KING COUNTY	Timeline is too long, compare it to the transit timelines of non-American cities
EAST KING COUNTY	Push priority to Issaquah light rail. 25 years is woefully too late. Move the timelines up and priorities up.
EAST KING COUNTY	Please do it faster. 22 more years to connect Ballard and South Lake Union is an eternity! There has got to be more density to make light rail work: either focus on areas that are already dense or get areas around future rail stations growing earlier. It just doesn't work with suburban eastside neighborhoods, the walkshed has too few people.  I don't completely understand the value of rail lines that follow I5 or I90. If people drive along the freeway to a park and ride then BRT in dedicated lane is cheaper and arrives a decade earlier. The Issaquah line seems the least logical of the proposed rail, for that reason.
EAST KING COUNTY	I have rail bias. ST3 is exactly what this region needs, but your timelines are an absolute joke. What grade A moron green-lit the timing of this plan?  "I know - commutes and traffic are a major problem right now, so let's make sure we solve them by 2041 when who knows what new tech, population centers, and patterns have changed. Okay, great day, everyone!"  I was ready to give you hundreds of dollars per year forever, WITH NO SUNSET CLAUSE, but will now furiously campaign against this and vote NO.  The only way this gets my vote (and I'm sure you realize from your polling, the only way this passes) is if you finish the entire network by 2030, full stop. The line to West Seattle, Ballard, Everett, Redmond, Issaquah, and south to Tacoma. 15 years was enough time to send a man to the moon, win two world wars, and build the transcontinental railroad. It IS possible.
EAST KING COUNTY	Too slow!!!!!!!!!!!!!!  Build the entire system in 10-15 years rather than 25....then spend 50 years paying off rather than \$50 billion and 25 years. Progress should be noticeable and impactful EVERY year. More aggressive time frame or nothing. ST2 was a debacle approved nearly 20 years ago..  Do it right or not at all.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Decrease timeline and deliver full light rail service within 15-18 years. Many people voting on and potentially paying for this measure will be retired before the service is implemented. The need for this service exists today, waiting an additional 20-25 years will only add to the ridiculous commutes and frustrations of area residents.
EAST KING COUNTY	Really could use this stuff a LOT sooner. 25 years out, things like self-driving cars may have changed everything about transportation. But in the meantime, things are bad and getting worse. We DESPERATELY need a system that is complete and coordinated enough that most trips can be made by transit. Right now, there's no way for us to get to (or more often back from) most of the places we travel to.
EAST KING COUNTY	The timelines presented in the plan, especially when it comes to environmental studies, are completely unacceptable. I'll be voting no if the timelines are not accelerated.
EAST KING COUNTY	The project timelines are too long. We need this done yesterday and I feel like we should focus more on getting stuff done faster rather than do more.  Also, we should always do grade separated options. At grade is a short term solution but doesn't do as well in the long term.
EAST KING COUNTY	The timeline is absurdly long.
EAST KING COUNTY	Transit improvements need to be made in the densest parts of Seattle first. 20 years is too long to wait for critical infrastructure. I will likely vote no unless light rail within the city can be built sooner. Even though I live on the Eastside, I think Seattle projects should be completed before spending on expensive projects in the suburbs that will serve fewer people.
EAST KING COUNTY	20 years is too long to wait to alleviate north sound traffic. There is so much new construction and expansion in Lynnwood, you need to speed that portion of the plan up! We simply cannot wait.
EAST KING COUNTY	Ballard and Issaquah routes should be finished first not last.
EAST KING COUNTY	I believe investment in Seattle projects is more urgent and should be completed sooner than the broader suburban region due to Seattle's density and traffic beyond capacity of its roads. I also believe Ballard to UW via Fremont and Wallingford should be included in ST3, at least as BRT but ideally light rail. Current transit takes nearly an hour to travel this short but highly congested corridor.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	I really feel like the timeline should be shortened. Making Everett and Ballard wait so long for transit is unacceptable. If you want more support you need to make these things happen faster. Also, why are the infill stations taking so long to finish? Those should be built as fast as possible to increase support for this measure. For me to strongly support this measure and the high amounts of money that you are asking me to approve, I would like to see the benefits faster. Even though I am in college, I will be 44 by the time the build out is complete. Older people will not be able to utilize what they are paying increased taxes on to build. Shorten the timeline focus on expanding the light rail, not providing parking! Other agencies can make parking. The goal of Sound Transit is to create high quality reliable transit, not pay for people to park their cars. The spine needs to be completed faster and there needs to be faster completion times.
EAST KING COUNTY	We are decades behind what's needed! Why aren't we learning from others areas? Port lands rail system went in YEARS ago. In Massachusetts during rush hour the right side shoulders are used as a reduced speed lane for the exit ramp which frees up a lane for through traffic. Let's get this done ASAP. Tax me! Tax businesses! Get grants! Float bonds! Get it done already. These dates are ridiculous. I'll be long dead before this plan is implemented, AND by then, the plan will once again be decades behind in alleviating the traffic of 2020 and beyond.
EAST KING COUNTY	The timeline for all of these improvements, ST2 included, are far too slow. We need transit NOW, not 25 years from now.
EAST KING COUNTY	7 years is ridiculously long, 10+ years sounds pretty much like 'never' (or 'after I move out of here'). A lot of cities somehow manage to build sizable mass transit system expansions in 3-4 years, so tweaking designs and construction schedules to see something operational within that timeframe would greatly increase the likelihood that I would support these projects.
EAST KING COUNTY	<p>These and current projects are taking way too long, these routes need to be done quicker than 25 years. Our population is growing extremely fast, and what we should be doing is building according to the rate of population growth. Not this SLOW pace. Having lived in Taipei and Beijing, the transit systems over there open new lines or stations each year.</p> <p>In order to accommodate population growth, more right-of-way light rail routes are greatly needed. One in particular should be creating a light rail spine along I-405 to alleviate the currently way too congested road, which is only going to be worse going forward without doing anything. The BRT may be a solution, but it will eventually get stuck in traffic as well.</p>
EAST KING COUNTY	If there is any way possible to accelerate these projects, I would be 100% in favor. 25 years seems like such a long time when we are mired in congestion now. I know these are huge projects, but, our region is getting worse by the day. That's why I chose buses using the shoulder on freeways as one of my most important projects. When I actually think that any of the light rail projects outweigh any bus project in the long term.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Timeline needs to be significantly shortened. 24 years is too long to complete. Additionally, adding new routes, trains without adding SIGNIFICANTLY more parking is just stupid.
EAST KING COUNTY	The timeline for these projects is way too long, especially for the longer commutes from the bedroom communities: Stanwood south to Lynnwood, Lynnwood south to Seattle, Lynnwood south to Bellevue, Kirkland/Bellevue east to Redmond, Bellevue south to Renton, Renton east to Kent and Maple Valley, Renton south to Tukwila/Des Moines, Tukwila to SeaTac, Tukwila to Federal Way/Tacoma, Tacoma to JBLM, JBLM to Olympia, West Seattle to Downtown Seattle,
EAST KING COUNTY	Light rail to everett does deserve a priority, Community transit under-serves a low income population on the weekends, that Light rail can help bridge.
EAST KING COUNTY	ST has proven that they can deliver high quality projects but they can complete projects faster. ST should treat the mobility and accessibility issues in/around Seattle like a public health crisis and work as quickly as possible to remedy the problem. I believe that the vast majority of people in the Seattle area want new transit now and would be willing to give up some input in order to expedite projects--just like people would be willing to give their doctors a little more flexibility if we had a public health crisis on our hands.
EAST KING COUNTY	Taking way tooo long to build out
EAST KING COUNTY	The timeline for the end projects, including the one that will most benefit us (Issaquah) is insane. 25 years from now everyone in the household who's not a child will be close to retirement.  Also the Issaquah line doesn't provide direct access to downtown Seattle which is a bummer to say the least.  If you can increase the speed that things are done in that would be super important as we need all these proposed additions now, and not after we've suffered through 25 years of population growth and lost productivity and life sitting in traffic.
EAST KING COUNTY	I just wish this had happened sooner. I live in Redmond and it's a little frustrating to know that I'll be nearing retirement age before a commuter system is available to me that is viable. I've used transit when I can depending on my jobsite location, but often it just hasn't been a reasonable option. Now, I'm looking at paying for a system that I won't get the benefit from. But I suppose that's what every generation would have said, so with a grumble I'll do it because it should have been done already. It would be nice if the fee to ride was less (we'll be paying \$200/year, and then another \$1200 to actually ride it if you get 12 monthly passes??) or if there was a discount for those of us who will pay for it, but not benefit due to nearing retirement age by the time it's complete.
EAST KING COUNTY	The timeline is WAY too long.
EAST KING COUNTY	Link light rail will not be usable or practical for most residents until there is FREE PARKING within walking distance of each light rail station.
EAST KING COUNTY	Build the 130th station with parking

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Consider how to get light rail up the Eastside of Lake Washington eliminating the need to add buses on the already over crowded highways.
EAST KING COUNTY	Timelines are unrealistic for Seattle voters. There needs to be more of an urgency to have parking lots built at park and rides/ light rails that can accommodate patrons.
EAST KING COUNTY	Make it happen faster.
EAST KING COUNTY	Our potential growth rate could cause our traffic grid to collapse. We are at or above threshold on many freeways (I405, I5) and need to find ways to improve these areas much more rapidly than the current 8 year timeline for these. What would it take for these critical areas to get much more immediate relief, and can it even be done. Businesses are too decentralized on the East Side to make such systems practical to build and enticing to use.
EAST KING COUNTY	Please please try to make it happen faster. I know many who live in Kenmore/Bothell and take ST522 and 372 to downtown and UW respectively. I also know people who commute to UW via ST from Tacoma. Park and Rides fill up too fast! Light rail can't come fast enough. I know people who have been under contract for 6 months for a dilapidated foreclosure in Columbia city, just to have a 15 minute walk to the Columbia City Light Rail station.
EAST KING COUNTY	I am disappointed at the long timeframe to complete the projects. I would like to see it built much faster. Projects such as express bus service from NE 145th St to SR 522 to UW Bothell would have a high impact at relatively low cost and should be fast tracked. Also projects such as pedestrian and bicycle access are low cost high value that encourages transit use.
EAST KING COUNTY	I just wish you could do them all faster!! I know you can't but I wish you could!
EAST KING COUNTY	This project may seem ideal to get people to leave their cars at home, but one of the biggest flaws is that people just generally do not want to take public transportation in Seattle! The weather is often just too unpredictable with rain for people to take the chance of getting to work sopping wet from walking in between bus stops
EAST KING COUNTY	While i understand the need to complete the "Spine" and bring transit to every major urban center in the region, I believe it is in our best interest to target the dense urban centers first when it comes to light rail. Cities like Issaquah and Redmond would do well with light rail, but these are areas that have been designed to accommodate large volumes of vehicles. Ballard to the University of Washington, for example, should have a place on this plan. The focus should be on easing the commutes for West Seattle etc. Eliminating traffic congestion in the City Center should cause ripple effects, reducing traffic on the most congested areas of I-5. Backup in the city causes backup on the freeways.  Redmond and Issaquah would greatly benefit from light rail, but maybe push those back to 2030 and accelerate the inter-city transit.
EAST KING COUNTY	Speed Up the Process...the time line is WAY to long!
EAST KING COUNTY	I wish you could make it all happen faster, but understand the realities of construction time and funding for these projects.

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	25+ years is insane. Is there any way we can get this down to 10-15 years? I would like to have some usage of what I paid for before I retire.
EAST KING COUNTY	Everything takes too long with all the government red tapes and legal maneuverings. Trying to please everyone will just further delay all the projects. There should be different options that will present to the voters that an accelerated plan will get X vs Y - what are the tradeoffs?
EAST KING COUNTY	I would prefer to find possible solutions to speed up timelines
EAST KING COUNTY	It would be great if the projects are completed sooner.
EAST KING COUNTY	need these improvements in a shorter time. Parking at transit centers and train stations is vital. Most people live miles from these locations. Mass transit needs to be cheaper than using a single person car. Maybe increase parking fees downtown.
EAST KING COUNTY	Getting the light rail to connect to the East Side (e.g. over Mercer Island to Bellevue) is extremely valuable and should be prioritized.
EAST KING COUNTY	Complete everything by 2025 or sooner. Open stations one at a time instead of all at once.
EAST KING COUNTY	I think expanding light rail should be the highest priority. Focus should be on expanding light rail access to the east side, increasing operating hours, and prioritizing the Ballard extension (22 years is too long to wait).
EAST KING COUNTY	I wish it could all be done faster :(
EAST KING COUNTY	I have been a strong supporter and voter in favor of ST from early on. I may likely OPPOSE and VOTE AGAINST unless the timeline to complete all proposed projects is 2030. ST has an extremely poor record of making schedules as is. The public has NO CONFIDENCE in ST meeting its timeline obligations. Other like municipalities with similar terrain, engineering issues can build projects from start to finish in well less than a decade. ST needs (MUST) accelerate the planning, design, and construction processes significantly. I believe that a significant problem is working on the "hard stuff" first such as tunnels. Instead, ST should build out the easy stuff while the tunnels are under construction, not the other way around. Surface and elevated routes should be built immediately. This includes ST2 projects such as Northgate to Lynnwood light rail. I can't emphasize enough the frustration the citizen's (the electorate) has with ST's delays and slow build out process. For example, we can watch projects like Vancouver's SkyTrain have 12 to 20 miles of extension be built from ballot to service in timelines like 6 to 10 years.
EAST KING COUNTY	Your timelines are so underwhelming. We should have invested in this 40 years ago, don't make us wait another 25 years to get basic service!
EAST KING COUNTY	We should have the light rail completed (including issaquah extension) in 5 to 10 years not 30 years. 30 years is too far to complete light rail.
EAST KING COUNTY	These are solutions that would solve today's problems, but won't be ready until tomorrow's problems are already here.

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	We need to speed up all phases of this plan Don't agree with the 25 yr plan. All mass transit projects need to be done in 15yrs or less. Save the planet, our commute times and \$\$ GO FOR IT ITS TIME Thanks
EAST KING COUNTY	Living on the East side, I would like to see more changes quicker, even if it cost more than \$17 per months mentioned here.
EAST KING COUNTY	as always you ignore the number of people commuting out of issaquah/Sammamish/Highlands areas.. you know the areas with the most growth right now... houses and condos being build in piles no new roads... and you want to wait 25 years to put in a light rail? really? super smart of you...
EAST KING COUNTY	There are various articles/op-eds floating around online about how mass transit projects in the US a) take much longer and b) cost much more than similar projects in European countries. 25 years feels like a long time to finish the system, and the endless delays of Bertha are not going to make people feel good about a long construction time (regardless of whether any of the same people are involved). The proposal needs a good breakdown of exactly why it will take so long, and if there are any benefits that will be derived before things start to come online.  I don't know much about public transit within Seattle proper, but I know that getting into Seattle via public transit from the eastside (or vice versa) is awful, and even bus coverage on the eastside seems spotty and irregular enough that I can't use it, so a reliable frequent connection into the city should be a high priority.
EAST KING COUNTY	The quicker the better. I would love to become a one-car household.
EAST KING COUNTY	We built the transcontinental railroad in SIX years and you want 25 years to go from Ballard to West Seattle? You're becoming the poster child for what's wrong with America.
EAST KING COUNTY	20+ years is simply too long.
EAST KING COUNTY	- Ballard needs to come sooner than 2038 or the plan will not pass in November. Your key block of voters is in Seattle, and the two most important projects to them are Ballard and the new downtown tunnel.  - It's criminal that the gold-plated Paine Field vanity project is in the plan but it has nothing of any significance serving South King County, particularly Renton and Kent, which are transit-starved areas with many minority and low-income residents.
EAST KING COUNTY	You are asking for FAR too much money. That seems to be the never-ending theme. Build this with the funds you already have.  In addition, if more people are moving here, then your tax base increases automatically without raising any taxes, because there are now more tax payers. Please use that fact to pay for these improvements.
EAST KING COUNTY	Projects within Seattle itself should be prioritized over expanding rail North South and East.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Cars are a necessary fact of life in SEA, as is the fact that only 9% or less of commuters use the bus, light rail, and train system. Why does SDOT ignore these two facts and continuously move 60% of total funding to support and subsidize 9% of the working population that must get to work to pay our taxes to you and fund your salaries?
EAST KING COUNTY	We should push the light rail projects up before any other project. Especially because this project should have been started in the 90s (I blame the voters) You will be much more likely to get people like me out of their cars with light rail, than any other transit option.
EAST KING COUNTY	Extension of light rail to Boeing's Everett factory should be on the list of things to be completed in 8 years. That extension will drastically improve congestion on I-5 between Everett and Seattle. The most important aspect of transit funding to me is that it does not subtract from funds for road construction/repair. Do not punish people who drive cars. Do not "guilt trip" people who drive cars. It is important to me that the people who pay for the system are the same people who benefit; I don't think it's right for people in Enumclaw to have their property tax / car tabs / sales tax jump up to pay for a system that does not serve them.
EAST KING COUNTY	12 years is too long to complete the segment from Overlake to Redmond. We should focus on expediting those that are easier projects.
EAST KING COUNTY	You will probably have more support the quicker you promise the most congested commutes are covered, like Ballard -> SLU -> Downtown. The public may have a hard time supporting a \$200/yr tax because we already pay so much to commute over 520. Where did those funds go?

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	<p>I am not an urban planner, and I will fully admit that I do not have an informed enough opinion about how long it takes to build each project in this plan. However, I would like ST to know the following:</p> <ol style="list-style-type: none"> <li>1.) Thank you for deciding to "go big." I think the citizens of our region aspire to be a part of big positive changes, and this provides us with such an opportunity.</li> <li>2.) With all due respect to "subarea equity" and (what I'm sure is) your desire to create a package that is amenable to citizens of all three counties, prioritize West Seattle and Ballard. City dwelling people, almost by definition, have assumed a lifestyle that embraces public transportation. Do not make your most ardent supporters wait a lifetime to utilize what they will so willingly fight for.</li> <li>3.) The populations of Tacoma and Everett have not shown that they would readily adopt INTERcity travel with the same enthusiasm that those same populations show for INTRAcity light rail. While it is true that all Americans are trending towards being closer to cities, I am not sold that the old guard car commuters are going change with intercity light rail, whenever it may be built. The thought that old guard car commuters would eschew single vehicle transportation for BRT is flat crazy. Public transit is a necessity for poorer peoples, and it is the adopted choice of younger middle and upper middle class voters. I strongly believe that public transit supporters would be more willing to use intercity BRT and Heavy Rail if it meant the intracity system in seattle could be finished sooner. To the same end, I think a money-backed guarantee of light rail to complete the Everett-Tacoma spine will be enough to make Pierce and Snohomish County residence feel included. ST has really created a gold standard for public trust - don't be afraid to cash in your social capital to ensure that Pierce and Snohomish will get what they paid for in due time.</li> <li>4.) More community education about the prospect of federal funding in addition to this package should be brought to light. ST chose its new chief for a reason; you shouldn't be afraid to connect the dots for voters that there is at least the prospect of many more dollars for this package, and that those dollars could have an appreciable impact on the time it takes to complete the proposed projects.</li> </ol> <p>THANKS!!</p>
EAST KING COUNTY	Projects must be completed faster than this.
EAST KING COUNTY	This is far too slow. It shouldn't take that long to build to Everett. It's embarrassing to live in the Seattle region with timelines like this.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	<p>Too little too late. The region is suffering under the weight of its own growth and we cannot afford to wait 35 years for a proper mass transit system.</p> <p>Abandon the bus projects to Metro and Community Transit; they are a distraction for Sound Transit. Re-prioritize the light rail to deliver the proposed system by 2030, not 2050.</p> <p>Busses on the shoulder is extremely dangerous. Its a disgrace that it was even proposed. I would suggest removing mention of it from marketing material because it will polarize safety advocates and turn them into your opponents.</p> <p>What happened to the ERC proposal through North Bellevue, Kirkland and Woodinville? Sound Transit already has a right of way there, and it seems like that project would be a better ROI than others proposed.</p>
EAST KING COUNTY	<p>of course planning, manpower, availability of resources, weather and a number of factors impact the timeline, but considering there is a significant traffic problem right now, the longer it takes to complete these projects, the worse it's going to get as new residences and business are going up in the region. In the mean time while rail line travel is being installed, can bus routes be expanded to keep people on the routes they need to travel, but allow for an alternative for driving their personal car. All this said, I am very much in favor of the expansion plan and support the cost to the residents of the region.</p>
EAST KING COUNTY	<p>Is there any way to accelerate light rail construction?</p>
EAST KING COUNTY	<p>More light rail faster! I'm tired of using roads for the same exact trip every day.</p>
EAST KING COUNTY	<p>The biggest traffic problems are on I5 around downtown Seattle. Why then is light link construction focusing on areas East of lake Washington (aka Redmond)? Tacoma to Everett should be the priority. Knowing the costs of the projects and number of customers they could service would help rather than just totals.</p>
EAST KING COUNTY	<p>I know it's a big project, but the timeline is just so far out it's hard to support.</p>
EAST KING COUNTY	<p>Accelerate the BRT plan for SR522 and along the 405 corridor north of Kirkland</p>
EAST KING COUNTY	<p>tax us more get it done sooner, 25 years is too slow with the rate at which this problem is growing.</p>
EAST KING COUNTY	<p>This plan takes too long make any progress. I'm a big transit supporter but it'll be hard to vote yes on a plan with the completion of the main light rail projects so far away. I'd rather pay more now for quicker results. One of your arguments is that 800 cars are added to our roads every week. With those numbers and your timeline, there's no way ST3 will help our traffic problems. Paine Field is a waste of money. The timeline is way too long. This won't pass.</p>
EAST KING COUNTY	<p>Issaquah line should run to either Bellevue and Downtown Seattle and it should be happen immediately.</p>
EAST KING COUNTY	<p>This needs to be done in much less than 25 years. Consider adding some form of property tax hikes as well to cover the increased costs. Also, it should include more cycling support (bike lanes, bike transport, etc). Finally, think about the impact self-driving cars will have on transit in 5, 10, or 20 years and make sure the plan would still work/be needed with self-driving cars</p>

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Speed up this process. Traffic is terrible now, & by the time this plan is implemented it will be worse than ever. We are just trying to play catch-up with a problem that is growing faster than solutions proposed can be implemented. Nibbling around the edges of the problem does not have much of an impact.
EAST KING COUNTY	THIS PROCESS TAKES TOO LONG DO WHATEVER YOU HAVE TO DO TO GET IT DONE ASAP PLEASE
EAST KING COUNTY	In 25 years we have no idea what our needs as a community will be. We need a more immediate solution.
EAST KING COUNTY	Seattle already has light rail and bus lines. Eastside has only bus and it can take 2 hours to get from Issaquah to Seattle by bus. Build Issaquah/Redmond first.
EAST KING COUNTY	I'm concerned about the projected time period to complete these projects. With the rapid growth of the region, I feel like that by the time these proposals are finished, they will already be obsolete. Also, I'm a little unclear about the Bellevue to Issaquah light rail project. I wish all the separate links were color coded so I could understand exactly the routing. Will they all be somehow inter connected? Cities like San Diego and Salt Lake City have had light rail for years. It's high time we got caught up, because our freeways are a mess!
EAST KING COUNTY	This is really unacceptable. Lines to Ballard and West Seattle should be your number 1 priority. 22 years until there is rail to Ballard? That is embarrassing. People in the Seattle area are desperate for this to be built. We need it much sooner. If you don't reevaluate this plan, I can guarantee most people are going to vote NO.
EAST KING COUNTY	Have Sound transit 522 route go to the new Roosevelt station, instead of going to NE 145th future station. Speed up the time line on all project.
EAST KING COUNTY	Bring light rail to Issaquah sooner
EAST KING COUNTY	25 years to complete is ridiculous. A quick plan for completion is more likely to pass with voters. Growth in the area is at a fast pace and we need to keep up with it. We will lose all these jobs and growth if we don't take care of this ASAP!
EAST KING COUNTY	Light rail is awesome. The new link from downtown Seattle to Capitol Hill and to UW is tremendously useful. I travel from Issaquah to downtown Seattle everyday for work and this would greatly help improve the commute and keep the environment green.
EAST KING COUNTY	I support the project but not the timeline. A plan to complete work in 25 years shows no commitment to improve the transportation problems in our region. Sound Transit needs to go big and do it now. I would like to see a much more ambitious timeline. I'm willing to pay the taxes. Can we compress all of this work into the next 10 years? Can we get started on building out multiple transit lines at the same time instead of staggering them?
EAST KING COUNTY	The plan taking 25 years still leaves us way too far behind the times. Everything needs to be completed much faster, especially the light rail which will have the biggest impact.
EAST KING COUNTY	I-405 corridor needs serious help and sooner than 17-25 years from now! Also, Transit is currently not an option for me to commute from Renton to Seattle because it takes 2 buses and an hour to go in and 3 buses and 2 hours to get home (9am-7pm shift)!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Issaquah should not happen last. Waiting 22 years is ridiculous when it'd be so easy to complete! We're 50 years behind Portland by that time!
EAST KING COUNTY	This timeline is absurd, I would rather see this proposal spend more to speed up some of the projects already in the pipeline.
EAST KING COUNTY	We cannot wait 25 years to resolve Issaquah traffic congestion. Light rail to Issaquah should be a top priority.
EAST KING COUNTY	I understand helping the future generation but your timelines are absurd. I want to pay for something that might benefit me or my kids, not something for generations beyond that! By the time ST3 is done, we'll be zipping along using transporters and ST3 will be obsolete.
EAST KING COUNTY	I think that the Eastside (Issaquah, specifically) needs to get the link light rail much sooner than 25 years... EVERY SINGLE bus is filled to the brink with standing room only in the mornings and evenings, it is NOT pleasant and absolutely causes people to take their cars to work instead of riding the buses.
EAST KING COUNTY	The timeline on this plan makes me strongly oppose these projects. Why should anyone pay for something that will NEVER benefit them. Light rail to Issaquah in 25 years has no benefit to me. I will have retired and moved away. Light rail now benefits me. If a proposal for lightrail doesn't happen in next five years for Issaquah and Eastgate - I absolutely cannot support it. Increasing sales tax is a BAD idea. Property taxes should be levied from the areas benefiting within the next five years. And I'd pay huge fares to ride light rail from my community rather than drive.
EAST KING COUNTY	Light rail should travel to Issaquah and Renton as soon as possible.
EAST KING COUNTY	My biggest concern with the plan is the length of time for full implementation. We need as much of this, as quickly as possible. The situation is getting worse rapidly. With Amazon's growth, plus large companies like Google, Facebook, Apple, etc. adding large numbers of jobs to the downtown Seattle area, plus Google and Microsoft on the East side (although Microsoft's growth comes in spurts), a comprehensive light rail system is needed as soon as possible. Throw in Boeing's influence on the North and South, and we're rapidly heading into a transportation nightmare.
EAST KING COUNTY	Many working and tax paying voters will not see the fruits of their yes votes until near or after retirement. While there are limits to construction on this scale, it seems that even transit advocates have a tough time swallowing the time frame proposed.
EAST KING COUNTY	I fully support the plan, but would prefer that building new light rail stations and lines take priority over bus rapid transit. I'd be willing to pay twice the estimated cost to taxpayers if the light rail component could be completed within 10 years.
EAST KING COUNTY	RAnging from 8-25 years... I don't believe it will be done. I thing the span should be 3-7 years tops.
EAST KING COUNTY	Get it done sooner my baby girl who isn't even born yet won't get to ride the light rail until she can drink legally! Get more money or whatever more taxes! Get it done quicker! Otherwise I love the plan
EAST KING COUNTY	I definitely won't be around for any Issaquah light rail expansion, it better be good.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Issaquah/Sammamish are growing rapidly. Light rail to Issaquah project must be expedited to finish in ~5 year time frame to avoid serious congestion problem.
EAST KING COUNTY	I'll support the rail extension, but let's not pretend this isn't proceeding at a snail's pace. Vancouver finished the Canada line from downtown to the south end of Richmond in _two years_. These 25-year timelines are sad and make me sad.
EAST KING COUNTY	With the staggering increase in traffic, this plan takes too long! 8 years to build better bus service on 405? I'll gladly pay more for faster results.
EAST KING COUNTY	It's going to take too long. By the time the proposed improvements are made, they won't have the impact today's population would be voting for. And, I'd rather not pay taxes for routes that won't impact me.
EAST KING COUNTY	It all was looking good until the time frame. 25 years? It will be outdated by then. Something needs to be done now, eastside traffic is a nightmare.
EAST KING COUNTY	Rather than expanding light rail north to Redmond and south the Federal Way at the same time, wouldn't it make more sense to first expand southward to the Tacoma area, since the people in this area are more likely to need access to public transit? Based on the socioeconomics of the greater Tacoma area, people will be more likely to use public transit once installed, compared to the Redmond/Bothell area where most individuals have access to reliable transportation already.
EAST KING COUNTY	Identify a way to proportionately tax users of the congested corridors rather than increasing our already high sales tax. Work to incentivize early completion of projects. Figure out how to earn public support with shorter term wins. It's hard to get excited about paying for a service that won't be in use for a generation.
EAST KING COUNTY	Light rail to Redmond and Issaquah will be very useful and their timeline should be expedited.
EAST KING COUNTY	The Eastside has been zoned as high urban density. With the recent changes to toll structures all roads out of Issaquah, Redmond and Bellevue, either it is 405, I5 or anything else are beyond saturation. Yet the Eastside projects are on a 25 year timeline.  Given schedule changes and bureaucratic cost overruns, that number typically translates to 'never'.  We have a problem NOW. Not 25 years from now. Try harder.
EAST KING COUNTY	Would like to see projects completed sooner.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	<p>A 25 year completion timeline is ridiculously insufficient. Right now, I can't even drive the 3 miles from work to home in under twenty minutes most days (that's less than 9 miles an hour, which is why I walk most days). I would use the bus, but there is no convenient route.</p> <p>By the time light rail and BRT makes it out here (Issaquah), we will have been forced to find solutions to our traffic problems long before. Which means we won't be happy about having to pay for a solution that arrived too late, after we have already had to pay for alternatives. We need a 5 to 10 year solution, not a 25 year solution.</p> <p>I understand your dilemma. No one wants to pay for anything these days, and many cities are doing a miserable job of planning for growth (Issaquah is a serious transgressor in this area). But, for Issaquah, 25 years is far too late.</p>
EAST KING COUNTY	Now not when the current voters are 20 years older
EAST KING COUNTY	There has to be a way to connect Issaquah faster than 25 years! Look at your bus route 554/214 they are well ridden, Issaquah needs light rail sooner than my 60th birthday!
EAST KING COUNTY	<p>The timelines are just too long. Finalizing these rail systems needs to be a priority as the region grows.</p> <p>True BRT should be implemented in suburban areas with BRT only (truly only) lanes utilized.</p> <p>The idea of lightrail going from Everett to Tacoma in a single spine is silly. A single 63 mile spine! The time it would take to get from Tacoma to Seattle or Everett to Seattle or even Everett to Tacoma is way unrealistic as a means of travel.</p> <p>Heavy rail options should be encouraged on these paths and improvement of feeder lines in the way or LRT or BRT or just plain buses is sooo important. ST has not proven that metro and ST can work together to improve connections with the current line. So if you don't live near a station and work near a station you can't use this much anyways.</p>
EAST KING COUNTY	<p>The light rail line completion dates are too far out. The projects need to be built much faster. Waiting 12 years for the first light rail project is too long, and 25 years for the last lines is insane.</p> <p>Please provide a funding breakdown by subarea with projected use of bonds and grants for each project so we can properly evaluate the draft plan.</p>
EAST KING COUNTY	Please move up the Issaquah timeline! We already have far less frequent transit routes than the rest of the Eastside. We need it within the next 5 years - not 25!!
EAST KING COUNTY	lot of money to pay in Kirkland for a bus on overcrowd 405. too much money for so little ST started as a good idea now is paying too much for nothing for the eastside
EAST KING COUNTY	25 years is way to long! I'd like to see real regional light rail on MY lifetime

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Timing to add lines should be looked at. 25 years before the Issaquah line is operable is insane. Traffic volumes are increasing every week. The number of cars in 25 years is going to be astronomical. The problems are starting now, not in 25 years. Speed to market needs to be faster.
EAST KING COUNTY	These plans are great for the future, but our problems are now and we need to compress these timelines, something like Los Angeles is doing: "bonding against future revenues" this would allow these projects on the current list to be completed more quickly, in 10 years instead of 30. Don't be afraid to think "really big". We can't let our region fail due to congestion.
EAST KING COUNTY	If financial capacity is what is slowing down improvements to create a transit system in time to serve the people that are voting for the measures, then the list of projects needs to be trimmed, or ST needs to be willing to take more risks on delivery promises. You have got to get back to what most of us can see in our lifetimes, rather than having us tell our grandkids about what they may someday ride -- or what we will only get to use on a special trip from a nursing home.
EAST KING COUNTY	I live in Issaquah and I have two kids. My kids are 2 and 4 years old and it is hard to support a plan that will not even be ready before they are adults. I think it is asking a lot of voters to fund projects that their children won't be able to use. I guess my grandchildren would be able to ride light rail from Issaquah, but again that is a lot to ask a voter and I really hope this gets passed. My advice would be to have all project delivered by 2033.
EAST KING COUNTY	8 years for phase one is a LONG TIME to wait to see any improvement - if more funding could get faster results that would be WELL worth it
EAST KING COUNTY	I am in favor of completing all of the projects on ST3 but look to Sound Transit to complete projects that can be done the quickest and affect the most amount of people. I live in South Renton so most of my vote are for projects I will rarely use in my commute to Bellevue. However, I am willing to move to a location with light rail and I vote for the masses, not just me.
EAST KING COUNTY	I would be willing to pay higher taxes to expedite the process. 22 years to Ballard is outrageous. 10 years is too long but less infuriating than a 22 year plan. I live on the east side but have worked in many neighborhoods of Seattle. Mercer and South Lake Union really need light rail already. A greater sense of urgency in this plan is needed.
EAST KING COUNTY	FASTER! We are so far behind. Speed this timeline up.
EAST KING COUNTY	Issaquah to downtown Seattle light rail needs to happen sooner. Like many other residents I commute daily from Issaquah to downtown Seattle.
EAST KING COUNTY	Speed up the Issaquah line to 8 years or less please.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	<p>The timeline is a joke!! Half the people who will be taxed will be dead before this is finished and half the people who will benefit from this plan aren't here yet and will not have any "skin" in the game!!</p> <p>Renters typically don't feel that they have any direct costs for projects like these so they will vote for anything and the property owners then get to pay a dis-proportionate amount for this service.</p> <p>Your use of the "average" home will pay XX is also a joke. Just this year between this proposal and King county wanting to raise the 1% annual increase limit, the governor's proposed carbon tax, and the various school districts that say they need additional bonding authority I estimate my RE tax to go up a minimum \$500 this year in addition to the annual sewer and water increases, etc. My wife and I have retired a couple of years ago and these increased taxes make it more difficult to stay in my home and more difficult to sell my home because the required loan/payment ratios make the new loan payments very hard for new buyers to afford.</p> <p>If you think I believe that this will only cost me \$200 /yr you must think that I have forgotten how virtually every major project that any governmental unit in this state has exceeded the budget and missed the promised timeline which has always translated into additional costs to me.</p>
EAST KING COUNTY	<p>I really think Issaquah needs light rail, we feel so isolated way over here! And getting to Dr. appts would be so much easier and my husband to the Bellevue and Downtown VA offices.</p>
EAST KING COUNTY	<p>As someone who moved from Seattle to the Eastside, I think it's crucial to expand transit services across the water to make it easier for folks to get to and from Seattle. Traffic and parking are such a hassle, especially downtown, that most of the people I know from the Eastside only venture into Seattle when they really have to. If there were more open transit, it would open up opportunities to people to commute more efficiently and not have to contribute to traffic and air pollution. Not to mention the folks that can't afford to have their own cars would benefit greatly from expanded options and routes.</p>
EAST KING COUNTY	<p>The timelines are way too long. I like the idea of extending public transit but I cannot support one that is essentially planning to be far behind the projected demand.</p> <p>(1) How believable are cost estimates that stretch out 30 years</p> <p>(2) We need to get this done much sooner than planned to benefit today's citizens as well as future residents.</p> <p>(3) What's the plan after 2045 ?</p>
EAST KING COUNTY	<p>Need to complete the 1-90 corridor more quickly than 25 years and it should extend at a minimum to Snoqualmie, if not North Bend. That would help with travelers coming in from Eastern Washington as well.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Issaquah should be quicker than 25 years. Issaquah/Sammamish and Snoqualmie on the I-90 corridor are responsible for most of the increased traffic from the eastside to Seattle central for business AND for pleasure. It needs to be a transit center sooner! We would gladly go to Seattle much more often if there was less traffic, hassle and parking costs to get there. We would eat out more often, go to entertainment more often, and our spending would help with the additional sales tax revenues. Traffic makes us want to stay home and Issaquah will be complete gridlock in less than 5 years from now - - let alone 25 years!!!! We will probably move away from the Seattle area in the next 10 years when we retire since the traffic is too crazy and the things that make living here fun are getting harder to get to at all hours of the day!
EAST KING COUNTY	Light rail to Issaquah should be bumped to earlier in the timeline. Issaquah is like the end of a vacuum hose, pulling in traffic from North, South, and East of the City to ultimately clog I-90. With light rail, the City would still pull the traffic in but I believe a significant number of folks would park and jump on light rail.
EAST KING COUNTY	Timelines are too long. Light rail to the eastside should be given the highest priority. Light rail to Issaquah is needed now. Light rail from Issaquah to Redmond and Kirkland would be a good option for connecting eastside communities. The current East Sammamish (former rail trail) could be a multiple use right of way to include light rail.
EAST KING COUNTY	I have no confidence in any state government initiative ever 'saving' anything, especially when transportation is involved.
EAST KING COUNTY	Way to long, need better service sooner not later.
EAST KING COUNTY	The fact that it would take 8 years to add more bus service through Renton and the Eastside seems ridiculous. The whole timeline seems too long, which is a concern because it seems like over the course of the 25 years, so many things could go wrong, funding could be cut and projects abandoned, etc. It would be a terrible shame to invest millions of dollars in starting these projects only to fail to complete it. We need traffic relief now, not 8, 12, 25 years from now. It seems like it should be much easier to add more bus routes.
EAST KING COUNTY	This project time frame is way too slow.
EAST KING COUNTY	This timeline is not realistic. Those who conceived it most likely will be long retired before this project is completed. I'll be long dead before the light runs to Ballard! Most importantly, with the rate of population growth this timeline should be cut in half. The Seattle Metro area can't survive another 25 years given this impossible plan. I suggest you folks contact the RTA in Dubai, UAE. They can teach you how to to complete this project in a timely fashion. Look at their Metro and the time it took them to construct it. On the other hand, the City of Portland, OR could probably teach you a few things also.
EAST KING COUNTY	We are growing faster than what you can update & meet our transit needs. Find a way to make this happen faster!
EAST KING COUNTY	Need it faster
EAST KING COUNTY	Time lines are excessively long given the need
EAST KING COUNTY	Light rail needs timelines are too far out. Anything longer than 10 years isn't sustainable.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	I think Light Rail should be the highest priority. It would be a good idea to cut buses after light rail is finished (buses that run along the same route)
EAST KING COUNTY	Having moved from NYC a few years back I was so surprised by the lack of a developed transit system in the Seattle Metro area. The current timeline will take too long and I don't think we are planning far enough in advance. The region is growing at such a fast pace that if we don't make a more comprehensive plan, in 25 years we will be right back where we started.
EAST KING COUNTY	Move Bellevue to Issaquah plans to under 15 years.
EAST KING COUNTY	We just moved from Kirkland to Renton 6 months ago. I still work in Kirkland and my son is still attending school there as well. We were very upset to find that there is no convenient bus routes between Kirkland and Renton. We had figured there would be a simple transfer in Bellevue, but there is not. It appears that the new plan will address this problem and I certainly hope so. Housing prices are pushing many of us to move away from the Eastside, either North or South, and having convenient bus options is an absolute must!
EAST KING COUNTY	These projects need to be completed quicker if possible as the citizens funding these projects would like to be able to use the trains for commuting and exploring our diverse and amazing region as early as they can.
EAST KING COUNTY	If we're looking at 8-25 years to get this stuff done, then we really need to get it going ASAP. I'm tired of wasting my life in traffic or paying prohibitively high tolls. I would very much want to know if there's a way I can help get people out to vote for this. I'll try to make it to an open house to ask about that, but I hope you'll send information to people via email as well.
EAST KING COUNTY	Move Issaquah higher in the priority list. Issaquah is rapidly expanding and we could reduce car traffic significantly with Light Rail to Issaquah.
EAST KING COUNTY	Over twenty years to get to Ballard and Issaquah seems too long.
EAST KING COUNTY	Focus first on transit areas with the most traffic; Increase the flow of traffic onto freeways in downtown - like the ridiculous single-lane on-ramp to southbound I-5 at Mercer St.
EAST KING COUNTY	This is long overdue, it needs to happen faster, not over the next 25 years.
EAST KING COUNTY	BRT has such high value and seems to be the least in cost. This should be expedited. Might be good to break it out as its own project in order to expedite it.
EAST KING COUNTY	It is hard to understand why things like BRT that use existing infrastructure will take 8 years to come online. I also though the line extension to Redmond had been decided and committed to already an am disappointed at how far out that is.
EAST KING COUNTY	Light rail to Lynnwood and Everett needs to happen sooner. There is already a lot of public transit within Seattle, we need to connect cities before neighborhoods. The project as a whole needs to happen faster, within 15 years at the most rather than 25 so current taxpayers actually get the opportunity to benefit from our investment. We need to have alternative north-south travel from driving to provide an alternative to the congestion of I-5 ASAP.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Concerned that bus/train is expensive...and maybe UBER is a better use of money. I will be taxed for minimal use compared to those who will use the system daily. Is this viable as a privately funded and operated operation? If not, then you are asking how much priority I have to have the amenities. I don't see how this system helps those living a mile away from a bus route...same problem with food deserts who live more than a mile from a grocery store. \$200 plus a year is a lot of money for those who are not making much money to begin with. Is it the function of government to provide transportation or is it the need of a highly dense society to provide better movement from place to place? Maybe the solution is not mega-cities, but communities where walking and being with neighbors will solve many of the other issues of an urban society. Over the long term, I just see more expenses to update equipment and take care of system demands due to broken or out of service occurrences. It sounds like the ferry system which is great when it works and horrible if you come to rely upon it and there is a weather problem or a need for servicing. I don't see how in 25 years that this system will really help the Puget Sound area.
EAST KING COUNTY	These timelines are TOO slow. We are WAY behind other cities in this and we have to catch up. It is worth the cost, especially considering that traffic is literally getting worse every day. I do not currently use transit and I would change that in a heartbeat if I had the option to use it.
EAST KING COUNTY	Speed up the Boeing Access station with parking. Currently, there is zero reasonable access for Renton and SE county. Tukwilla parking is full before 7am, and it takes 30+ minutes to get there from the Highlands let alone Maple Valley. The neglect of South King by Sound Transit is horrendous especially considering the amount of growth the area has achieved over the past 10 years.
EAST KING COUNTY	You don't explain why the projects will take so long, or the costs of accelerating the work.
EAST KING COUNTY	Please build and open new stations incrementally. Building stations on Capitol Hill and UW, then opening them while building the rest of the North Link is a lot better than building East Link stations but not opening any of them until all stations are completed. The Mercer Island and two Bellevue stations should have been built and opened first while the rest of the East Link to Redmond is being constructed.
EAST KING COUNTY	We need affordable rapid transit to ease gridlock traffic on our main arterials. Drivers should be convinced to subsidize rapid transit to make transit cheaper for others to ride buses/trains. Making buses/trains cheaper is a great way to lessen gridlock.
EAST KING COUNTY	8 years is too long to implement the Bus Rapid Transit project. This should be accelerated. King County pays far too much already in taxes and we have been paying tax already for the rail line. The county should reallocate resources to pay for the bus line without needing to add an additional \$200 per household. Toll roads are another example of excessive tax for roads, and then coming back to the county asking for additional funds for expansion of critical bus and transit programs. I suspect that the county could find this money to reduce the cost of the bus project to a reasonable amount.
EAST KING COUNTY	Take much too long to complete. When I compare this kind of time schedule to what gets accomplished in Europe...

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	The Seattle area is growing so quickly - I think these projects are much needed, and strongly support them, but do not think the timeline is urgent enough. 25 years from now? Really? It's great to know that we're "thinking ahead" but these projects are needed already - they will be desperately overdue in two decades.
EAST KING COUNTY	Overlake to Redmond Light Rail should consider running at grade upon reaching the intersection of 520 and 202 (Redmond Way). The 520 bridges over Redmond Way were built extra wide and tall over the old BNSF railroad lines which Light Rail could use at grade between stations. It might be less expensive and look better to re-plan the two automobile 520 entrance and exit ramps instead of running Light Rail over the extra tall structure. Just a thought... Thanks.
EAST KING COUNTY	These projects should have happened a long time ago -- we have to get them going ASAP -- traffic is a nightmare already
EAST KING COUNTY	Since BRT are much cheaper and use existing infrastructure, any plans of implementing it faster so the immediate traffic needs could be addressed. Light rail projects are still 8-20 yrs away and in the mean time commute is getting worse. Any plans to increase P&R facilities in Bothell?
EAST KING COUNTY	I think the timeline needs to be moved up like what occurred in Denver. Seattle is in the top five for traffic and congestion and it's only going to get worse. A timeline that goes out 25 years for some of these projects is too long. Let's look at ways to move these transit projects up and shorten the timeline. I wish light rail could come through Kenmore. Also, additional parking needs to be provided at transit stations so people can drive there and park. I oppose the idea of not investing in additional parking. Many of the existing parking lots are full by 9 AM.
EAST KING COUNTY	IMHO, buses are not the way to go. Cancel the bus projects, put the money into light rail and get them done way faster.
EAST KING COUNTY	It may be advantageous to provide voters options on speeding up the timelines. If it is X more to have the projects done in half the time allowed, is that palatable to the population? Or, if there is a different way to order the projects so they could be done earlier... are there any options?
EAST KING COUNTY	we need the light rail in Issaquah now not in 25 years that unreasonable
EAST KING COUNTY	I'd prefer to see projects completed sooner if possible, even if some (say, 15% - 20%) additional cost would be necessary.
EAST KING COUNTY	Do it faster. Traffic is a joke.
EAST KING COUNTY	Timelines are WAY TOO LONG!!! Get the whole thing done in 10-12 years. I don't believe the BRT plan will work as well as you envision and would rather spend the money on more light rail.
EAST KING COUNTY	All of these improvements need to happen way faster than 25 years. So many other countries have highly sophisticated mass transit systems in place right now. How does it make sense for one of the best tech cities in the world to be a quarter of a century behind? It has got to happen sooner. Seattle has to find the resources to cut that deadline down significantly.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Not everything can be done first. Projects with the best benefit/cost for enhancing ridership should come first, before greasing the squeakiest wheels.
EAST KING COUNTY	<p>I hope it would be possible to roll out I-405 BRT in stages as opposed to waiting the whole 7+ years for it to be completely in its entirety.</p> <p>Also, I've noticed KC Metro has started testing electric buses -- is there any chance ST would adopt those as well in a near future?</p>
EAST KING COUNTY	<p>This plan is good, but it is woefully insufficient.</p> <p>More and more people are moving into the Seattle area every year and that is not going to stop. By 2040 (the target end date for this plan) the population of the Greater Seattle Metropolitan Area is expected to grow from it's current 3.7 million people to more than 5.4 million (a 54% increase!). The services proposed in this plan are inadequate for our current population so, the only logical conclusion to be drawn is that this plan is virtually guaranteed to be "too little too late".</p> <p>Even if each and every one of these projects is completed early, under budget, and results in a higher than expected average daily utilization (in other words, a near perfect execution), the entire endeavor will still be considered an utter failure simply because it fails to properly meet the needs of the people.</p> <p>Instead of 8 to 25 years, this plan should be greatly accelerated to complete in 5 to 10 years... and the next phase (which, given the timelines proposed here, I assume are planned for the next 50 to 100 years) should instead be completed in 15 to 20 years. It is imperative that we work aggressively to get ahead of the expected growth instead of constantly fighting to catch up (because, at this rate, we never will catch up and are destined to fall further and further behind).</p> <p>It's time to stop talking and start doing.</p>
EAST KING COUNTY	I realize that the plan places light rail services where ever practical, but please continue to emphasize bus rapid transit first as this will provide the biggest bang for the buck sooner. We have to get people out of their cars during peak times. I have commuted for 5.5 years on the bus with much less stress and more exercise as a result.
EAST KING COUNTY	8 years is too long to wait for any improvements. Looking at your regional growth projections it will become another too little too late effort.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	I am happy to pay the extra taxes and fees if the timeline can be brought in. I don't know where I'll be in 25 years. Mt Rainier may have exploded by then and Seattle will no longer exist. I'd like be to be able to use these additions to the light rail before this happens.
EAST KING COUNTY	I am nearly 84 yo. I strongly support this program because I have children, grandchildren and great grandchildren who will eventually benefit from the program. I have lived in cities that have good to great transit systems and I know the benefits.
EAST KING COUNTY	Too little too late. Retired people who own homes can not afford more taxes. Figure out a way to finance that doesn't force us out of our homes because of continual tax increases!!!!
EAST KING COUNTY	This all needs to be done sooner rather than later. 25 years is UNACCEPTABLE. By 5 years this all will be too late.
EAST KING COUNTY	25 years is a crazy long time. Do it faster.
EAST KING COUNTY	You lied about the completion of the Mont-lake light rail station. you were 10 years behind schedule and over a 1 Billion dollars over budget. ST1 stated that you would be to UW in 2006 not 2016. You are a bottomless pit, a black-hole in which we pour more and more money down to no good effect. we should be continuing to pour good money after bad money that has already been lost. No more!
EAST KING COUNTY	Because it will take until 2040...and, the Seattle Times says it will cost the average homeowner \$400 per year (not the \$200 you say above), if I live that long, I'd be paying \$10,000 extra in taxes for something that is not even convenient for me too use (I live in Totem Lake). So...I'd have to drive there and park my car...but there is no safe parking area...you need free, safe parking so people can take advantage of the transportation options. And cut the costs...
EAST KING COUNTY	It takes way too long. Get rid of the federal regulations and get the thing built. How did FDR get things built with the New Deal? Oh yeah, that's right, he didn't have all the regulations and federal departments that LBJ created. You should be able to finish all of this within three - five years. Take all the people living on welfare, give them a job and get it done. There is no way I am going to pay \$17 for something that doesn't even going where I want it to go (Woodinville P & R to LWIT). You really expect people to pay \$17 per month for something that is going to take 22 years to complete?
EAST KING COUNTY	We've needed mass transit in the greater Seattle area for over 50 years. It's disappointing to hear that it'll be another 25 years before all of the ST3 plans can be implemented, but it's better than doing nothing -- which seems to be the only other alternative.
EAST KING COUNTY	seattle is so far behind in the light rail process. I have travelled to London numerous times and can move very quickly by tube, bus or rail all on one pass and have never had to wait very long. this is where seattle needs to be with the heavy congestion in this area. on a bad day it can take almost an hour to get from Kenmore to Redmond

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	ST has been lying about costs and schedules ever since it was approved in 1998. I would be more inclined to agree and vote for ST if schedules and budgets we not "re-set" to look favorable to the general public and media. Take the light rail to UW as an example, it was sold to the public in 1998 to be completed in 10 years, it took an additional 6 years to complete yet the clock was reset and so now it is sold as being finished under budget and sooner than planned. That is a complete lie!
EAST KING COUNTY	We need traffic and congestion relief sooner. Puget Sound is behind and needs to play catch up.
EAST KING COUNTY	Everett Lynnwood corridor need to be completed earlier than projected completion. Seattle metro area is poised to grow beyond everett, what is the plan for that. I think potential of extending light rail to monroe, lake stevens and marysville need to be considered. I believe sound transit has not been proactive to address future need its only trying to be reactive, its time to be proactive.
EAST KING COUNTY	Multiple mass transit opportunities must exist in the area and I believe this plan is exciting and needed; however, I am disappointed with how long the projects will take to complete. If there is anyway to speed it up, do it. Regardless, I will always support multiple mass transit opportunities in the area.
EAST KING COUNTY	As an Issaquah resident, I would like to see a direct Issaquah-Seattle light rail line (or at least connect via S. Bellevue), otherwise I would not want to support light rail to Issaquah and would prefer the cheaper expansion of our existing express buses until we're ready to make an appropriate investment. I think in general the timelines and taxes are not aggressive enough - I'm 25 now and in 25 years, I'll be 50. I like to think of myself as a long-term planner and saver, but to me this just seems to be too extreme. I also used to commute through the traffic on 405 and I think similarly, 8 years to expand BRT there will not inspire people to act - the benefits aren't tangible enough, even if the stretched schedule does help spread out the cost. I believe that in general, if most of the project times were cut to a third of their current projections and taxes increased accordingly, support would increase. I think many other voters like me would be happy to pay more if the plan is more aspirational and if our communities can realize the benefits substantially sooner. I am worried that ST3 will not garner enough support without bolder plans and larger planned investments. Thanks for hearing me out, and thanks for all your hard work to build out our transit infrastructure.  [names]

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	<p>After living here and commuting on I-405 over the past 20 years I just can't understand what additional information the DOT and State of Washington need to get a lite rail system running up and down the full length of I-405. My commute time are over an hour each way and some days exceed 9- minutes each way. Note with no traffic I can drive the same route in 30 minutes. I have an idea. Let's get the politicians in Olympia to come drive the full length of I-405 during rush hour for a month. Maybe then they'll understand how bad it is. After a year in the SF bay area I quickly realized how the Puget Sound has completely missed the transit big picture. The back bone needs to be the lite rail and Sounder Train systems. Those train systems must connect with each other at a station. The buses then need to move people to/from these locations. P&amp;R should all be located at the same locations. Multi-story parking garage structures where anyone using lite rail, vanpool, carpool, or bus resources can park all day. And to say this will take 25 years to do is nuts. I don't understand how we can build facilities including all transportation infrastructure for a Worlds fair or the Olympic's in only a few years but we need 25 years to build this for ourselves. Get it done. A very concerned citizen.</p>
EAST KING COUNTY	<p>Focus more on light rail, and get the projects done sooner.</p>
EAST KING COUNTY	<p>I am dismayed that even bus service upgrades may well take as long as eight years to complete, since I think the traffic situation is more dire than that.</p>
EAST KING COUNTY	<p>It shouldn't take 8 years to get buses online and it really shouldn't take 25 years to complete everything proposed! Transit options were needed years ago and by the time this is all done it will be either outdated or not nearly enough. For the price you are asking everything should be done within 10 years. I will not support such a huge tax increase together with such a long timeline. If you want my vote to approve you must decrease the timeline to closer to 10 years.</p>
EAST KING COUNTY	<p>Would like a shorter timetable for full build out, to improve traffic as soon as possible,</p>
EAST KING COUNTY	<p>I would like the redmond line to be completed on a quicker timeline than "If I got pregnant now, my kid would probably be in college before it's done" but I understand it's difficult to make quicker progress than that.</p>
EAST KING COUNTY	<p>A transit plan that has an estimated completion date in 25 years is not a good plan. In 25 years the transportation industry and the ways people commute are going to be drastically different due to techonological innovations in electric and self-driving cars. A plan with an extended timeline like this, that does not take such inevitabilities into account, will ultimately be a failure and a waste of tax payer money.</p> <p>Instead, we should focus on either getting this transportation plan finished quickly (within 10 years, minimum) or ensure that it robust and adapatable enough that it can handle the changes in the transportation industry.</p> <p>Also: stop negelecting South King country. The Renton area could be a booming municipality if given the support other cities are given. Instead it languishes because of lack of investment from the surrounding goverments.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	I would support higher taxes if it meant light rail projects could be done in parallel and thereby significantly shorten the light rail deployment timeline
EAST KING COUNTY	Issaquah to Seattle is rapidly becoming more congested as the east side fills out. The light rail plans here are OK, but the timeline is very long. We will be gridlocked we'll before then. How can we work to ease that area sooner?
EAST KING COUNTY	Eastside residents and employers might be willing to pay more for a much quicker turnaround. Why does this all take so long? And with all the apartments being built on the eastside, why do home owners still have to foot so much of the bill? Please find a fairer way of getting the money for transportation projects. Tax gas more (a lot more), or get businesses to invest in the surrounding infrastructure.
EAST KING COUNTY	Since the BRT can be done faster and the 405 traffic is such a disaster I would personally find it extremely more useful if it would be prioritized before the rails. I both live and work at short distances from I405 exits and it is insane that a trip on the highway with my car is 20-25 mins during rush hour but it becomes 1 hour if I want to take the bus! I feel that the east side public transportation is terribly bad. Current bus routes are completely useless for me at this point and I hate it that I have to be adding to the traffic and pollution.
EAST KING COUNTY	These projects are taking too long to implement. Get businesses to support these projects financially by selling naming rights and offering prime locations in new station buildings. It may take a while to realize it, but these projects are adding great value to this region. ST should benefit from that increased value so it can continue to expand.
EAST KING COUNTY	I generally support rapid transit, and would hope to see the implementation schedule accelerated. Overall completion time of 25 years seems very long. For neighborhoods that do not have high population density it would be interesting to see satellite parking lots with a feeder bus to the transit stations during peak hours.
EAST KING COUNTY	Transit from Bellevue to SeaTac is my priority and it isn't listed (as such) in the choices you provided. Providing rail transit from major population centers to SeaTac will alleviate traffic and help the airport and commerce in the region.
EAST KING COUNTY	Light rail to Issaquah and Everett should come before Ballard/West Seattle because commute traffic from those areas are filling up their respective freeways.
EAST KING COUNTY	Q13 & 14 are unclear. I am strongly in favor of moving forward with mass transit. Do not necessarily agree with the priority of the timelines and project that can move faster should. We don't currently tend to use mass transit because it is so inflexible and inefficient but dream of a day when we don't need a car daily. Even though we live in Bothell, the downtown Seattle access desperately needs cleaning up.
EAST KING COUNTY	I am a huge supporter of rail projects in particular for this region and would like to see these project move along more quickly.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Sound Transit is extremely slow in all its projects, and ST3 continues that sluggish way of building. Putting rail to far flung communities is silly, and at the same time you ignore large population centers that can be very well served by rapid and express bus plans and designed bus lanes/busways. You choose the most expensive options-rail and tunnels-while shunting aside much cheaper alternatives that can be built much more quickly.
EAST KING COUNTY	Please, please, please continue leave the Cross-Kirkland Corridor as is. The trail is a huge asset to the community. I walk on the trail every weekend and I see more and more people using it. It is so nice to finally have a walking path where you don't have to worry about car traffic. I am so thrilled to see it not included in your plans for expansion, please keep it that way!!
EAST KING COUNTY	Ambitious. I like the ideas. Finally make Seattle a world-class city.  Slow! I don't want to wait 25 years.  I will send in my detailed comments via email.
EAST KING COUNTY	The completion timelines are TOO LONG across the board for this package. You cannot ask someone to vote for something that they will not see for 10 years (25 years in my case). I appreciate the big vision but you need to shrink these timelines down big time. The package should not extend more than 15 years at most.
EAST KING COUNTY	This proposal appears to propose taking money from users today while creating increasing traffic complications in the short run in an effort to pursue long-term transportation planning policy. Many of the residents of the taxing area today will not live here in 8, 12, 17, 20 and 22 years from now. Those that do live here 22 years from now will have dramatically different use patterns. There must a combination of short term benefits and long term investments in any plan put forth. The short term investments should focus on improving the use of the existing infrastructure and should consider how tools like what's been created by Uber can be used to better serve the 'last mile' problem of connecting transit users to their residences and places of work. A lot of this proposal reads as a request to fund large construction projects while operational improvements and user focused tools are scarcely considered.
EAST KING COUNTY	The planned timelines are too long. Considering the large amount of tax money being asked for, the residents paying the taxes should see results sooner. I think there should be more emphasis put on expanding Express Bus & Rapid Ride services in the near term.
EAST KING COUNTY	BRT on I-405 and SR-522 should be implemented sooner than 8 years. These projects are cost-effective and take less infrastructure than rail projects. SR-522 desperately needs congestion relief. Currently, buses on SR-522 experience terrible congestion delays every weekday. We need better, more continuous bus lanes on SR-522, signal prioritization for buses, and connectivity to Link on 145th in Shoreline.
EAST KING COUNTY	I wish it could all be completed sooner!
EAST KING COUNTY	This plan seems to be so far away for results to be implemented that it will probably be need to modified. Growth will outpace the implementation if things continue at the current and projected paces.

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Get going. Make a decision and go. You will never satisfy everyone and there is no question that we need to implement non-car infrastructure.
EAST KING COUNTY	Buses do not fix anything and are unreliable.  Needs to be 100% rail link which is not effected by road traffic.  Will not support anything which increases taxes and takes 25 years to build. I will be retired, will be of no benefit to myself in 25 years time.  This should and CAN be done 10 years!!!!
EAST KING COUNTY	We need lightrail service to all the major cities including eastside to downtown. It's crazy that we can't commute to the city w/o riding in cars. And it needs to happen now, and not in 25 years. Traffic has gotten this bad due to poor planning, constantly changing minds, and people who can't make decisions. Why can't we have a decent rail system like other metro cities?
EAST KING COUNTY	25 years is a long time to wait for these improvements. Difficult to commit so much money that some many never see the benefit of due to the long timelines.
EAST KING COUNTY	I would like to see light rail across the I-90 to connect to Bellevue and Issaquah sooner. These are rapidly growing areas already with local congestion and limited commercial growth. Easier access to Seattle downtown and Bellevue shopping where parking is difficult could relieve that pressure and give a lot more support to downtown Seattle. I'd go there often if there was a light rail running on a regular schedule I could depend on. Buses still get caught in street traffic... and I'm tired of spending so much time in my car... especially on Thursday's when getting across the region is incredibly frustrating.
EAST KING COUNTY	This all needs to happen MUCH QUICKER. I would be willing to pay an additional 25% on all the sources of funding to make it happen faster. I also support adding tolls to the existing roads that service each one of these projects in order to accelerate their timeline. I'm going to be stuck sitting on those roads anyway so at least if I'm paying a toll I know rapid transit will come to them sooner. Seriously, waiting 25 years is far too painful given how bad traffic already is today!!! keep up the good work guys - we really need this!
EAST KING COUNTY	I really want the light rail to go from Bellevue to downtown Seattle... I would ride every week, if not daily, if you could get that done as soon as possible!!!
EAST KING COUNTY	Wish that the light rail wouldn't take so long to reach the Issaquah area - I understand it takes time, but the whole development of the region could be different in that length of time. I worry that those projects with the furthest out deadline might be changed or delayed even further as other areas become more pressing.  I am hesitant to fund so much on my property taxes. They are already quite high.

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	8 years for better bus service? What a joke. All these projects are needed, but 25 years? There's got to be a better way. None of this helps the nasty commutes that are happening NOW.
EAST KING COUNTY	<p>Please bring light rail from Seattle to Redmond, across 520 bridge. This corridor is over burdened. Busses often leave riders behind, and then get stuck in normal traffic. Mass transit should 2 of 3 things; faster, cheaper, convenient. The current reliance on busses is only cheaper - it's still faster to drive into downtown from Redmond, than it is to catch a bus.</p> <p>Please connect Redmond to Seattle via light rail - both of these tech hubs continue to grow. Even at 7 years till completion, the last estimate I heard, that equals ~1200hrs in traffic PER PERSON that would be eliminated with light rail (currently takes 45 minutes via bus during peak hours - drive time is ~17minutes no traffic, so I split it at ~25 minutes on light rail).</p>
EAST KING COUNTY	This seems ridiculously too long and too expensive. It would be great to explain why it costs so much and takes so long.
EAST KING COUNTY	Focus first on creating more transit friendly options within the cities (Seattle, Bellevue) including development that encourages transit over cars. Use extra bus routes/frequencies for suburbs until light rail can be expanded out in later years
EAST KING COUNTY	Too expensive for a senior on a fixed income and project will not be completed in a timely manner. I am strongly opposed to more taxes as it seems that too much money is wasted....just look at the Seattle tunnel project! Over cost and behind schedule!!
EAST KING COUNTY	South lake union has exploded with growth and there remain limited public transportation options. Provide more bus routes at LEAST!
EAST KING COUNTY	It is not fast enough. We have problems that need to be addressed now and waiting 8 years is unacceptable. In my mind, I'll pay to solve the problem. But solve the problem quickly and efficiently. I WANT WANT WANT to take mass transit to work. But it's a 15 minute drive but over an hour by bus (in the morning) and that is IF the bus stops or shows up. I have no choice but to drive from Newcastle to Bellevue. My commute in the evening is horrible and is over an hour for 8 miles and is only getting worse. It is causing us to make choices about whether or not we stay in Seattle.
EAST KING COUNTY	Timelines are too long; need faster build schedules for light rail and immediate congestion relief in the greater Seattle are. Paying \$200/year and not getting any results for 10+ years makes me much less willing to pay. I'd pay more for faster timelines.
EAST KING COUNTY	Speed up the time tables, these projects are desperately needed.
EAST KING COUNTY	Too little, too late

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	<p>Too slow, this is too little too late. We need something in 1 to 2 years or less.</p> <p>What about banning semi trucks during commuter hours as an immediate improvement? Could someone run a simulation?</p> <p>I feel like a lot of this is a shotgun approach to the problem when the issue is predominately i5 and i405 and the lack of parking at commuter nodes people could commute to.</p> <p>What about the hyperloop? Tech could be available in 10 years. Why commit thus much money to an insufficient solution</p>
EAST KING COUNTY	A 25+ year time frame is unacceptable, I will gladly pay three times as much to get the full project done in 5 years.
EAST KING COUNTY	Time frame is timid. I am very supportive of transit plan, yet hesitate to support this proposal which will do little to reduce single occupancy auto use for the better part of 25 years . Cut the time line in half: it will save money in the long run, and reduce carbon emissions and traffic sooner. The additional funding can come from traffic tolls on single occupancy vehicles on Freeways and entering downtown and other select areas which are served by rapid transit
EAST KING COUNTY	This is just ridiculous that it takes 25 years to complete the project. Entire populations can change by then, and economies can shift. Issue bonds and speed up the project to finish within 10 years. Otherwise, the traffic problems will get exponentially bad and everyone suffers, and the area becomes unlivable, while ST3 just crawls along.
EAST KING COUNTY	Project completion timelines are too slow to be meaningful.
EAST KING COUNTY	My wife and I are 74 years old. I approve of the plan BUT it will not come on line in our area in our life time. So why pay for it!
EAST KING COUNTY	Please use these survey results and find what projects should be completed first. The timeline is so long that many of us who are paying for it are not going to be able to use it. I understand the importance of providing more for the next generation but all we get is construction and higher taxes. Is there any way to expedite this timeline?
EAST KING COUNTY	Light rail to Redmond sooner
EAST KING COUNTY	If you build ST3 to Issaquah with in 10 years, I would definitely support and would be willing to pay more in taxes to get it sooner, otherwise there is no point for me to vote yes on something that I will not likely be around to use. I need it now, not later. No point supporting bus service if it delays the best solution, light rail.
EAST KING COUNTY	Implement ST3 faster. 25 years is not acceptable. Also add more lines.
EAST KING COUNTY	I am 73 and probably won't be using any of the improvements, given this timeline. But get it started, and plan lots of parking near stations so people will use the system.
EAST KING COUNTY	The time lines for eastside light rail should be substantially moved forward in the time line.
EAST KING COUNTY	Light rail needs to be prioritized above more buses.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Of the most EXTREME urgency? CUT the timeframes to LESS than HALF! Make all these projects complete in TWELVE years, tops!
EAST KING COUNTY	Even though I reside in Issaquah and would love to see the 25-year timeframe bumped up to relieve I-90 traffic volumes, under current employment and regional destination projections, it makes sense to leave it. Relieving congestion in the I-405 and I-5 corridors must get the highest priority. For this reason, as well as the significance of Boeing to our regional economy and job base, I think the Everett light rail should be moved up. It doesn't make sense to have Everett and Issaquah on the same construction timeframes.
EAST KING COUNTY	I want these improvements but I don't need them 25 years from now, I need them NOW. I'm happy to pay to have nice things, but getting them 25 years from now is too far out to matter for most people.
EAST KING COUNTY	My concern with the time lines for project completion are that we do not actually know what we will need 20 years from now in terms of transit. We need these ideas now and very badly, but who is to say that we will 20 years from now. Are you considering options for modifying, expanding, or deleting certain phases of the plan, if they are no longer needed or need to look differently?
EAST KING COUNTY	The build out is TOO SLOW. 25 years is insane. Build it quicker.
EAST KING COUNTY	Timeliness for completion is way too long. It needs to be shortened to 10 years.
EAST KING COUNTY	Issaquah really needs to be connected to Seattle and Bellevue many tech workers live in Issaquah because they can't afford housing in Seattle and they really need smooth fast commute to be with their families.
EAST KING COUNTY	These timelines seem quite long compared with other major cities, especially internationally. We already have some of the worst traffic in the nation, so it seems unacceptable to wait 15-25 years for some of these light rail improvements (and 8 years for rapid bus service?). If that is the case, we need to invest now in short range solutions to bridge the gap. Thank you.
EAST KING COUNTY	Faster!
EAST KING COUNTY	The project timelines are so long (longer than the Apollo and Space Shuttle projects) that they may not be viable as technology like self-driving cars causes major disruptions to our collective transportation patterns and our cultural affection for driving in single-occupancy vehicles.
EAST KING COUNTY	Need the light rail to Eastgate sooner than 25 years, make getting to work in downtown Seattle SO much easier
EAST KING COUNTY	Issaquah is seeing a massive growth, judging from the morning lines at the transit center people are very interested in taking public transportation to work and there is a strong need to add additional options/expand availability. Wait 25 years for additional service seems completely out of alignment with current needs, so wondering if Issaquah could have a higher priority.  Also, how have you decided on priority for the different projects?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	THIS IS NOT FAST ENOUGH! Yes, the capital letters are for emphasis. We lose ground every year to the tune of 10% more people. Double the investment and get this done within 5 - 10 years and you'll have a real solution to problems. Then extend the lines out further so that we can eventually connect the entire state and reduce our freeway needs.
EAST KING COUNTY	Hurry up already!!! The need is here now, 25 years is way too long. Five years is a better time frame, and even that is too long.
EAST KING COUNTY	Even though I don't live near Seattle, I think Ballard and West Seattle should be prioritized. After Seattle is up and running, you should expand Eastward to Redmond and Issaquah. While easily accessible transit is a desire for everyone, the fact that Seattle is gridlock shows that it and its nearby areas need more options and quickly. And once some of I-5 traffic is taken care of, we need to address 405.
EAST KING COUNTY	<p>This is a 25 year plan...are you serious? I would support ALL of this but we need it started now and we need it completed in the next 5 years. Our region is growing too fast (and changing too rapidly) to commit to something now that won't be totally online within 25 years. Portland can do this. Vancouver BC, SF, and NYC. Why not us? ve</p> <p>Traffic is having a MAJOR impact on the quality of life here in W. Washington. You have my 100% support on all this if you can do it within the next 5 years but if it's going to take 25 years - forget about it! I personally am not going to stay here for another 25 years if the the traffic gets much worse. I'll move to LA and at least be in the sunshine. Clean, Reliable, efficient mass transit is our only option and we need it now.</p>
EAST KING COUNTY	<p>Light Rail to Redmond and Issaquah needs to be prioritized! 25 years is crazy. The 520 widening through Redmond was prioritized and completed years ahead, but light rail, which moves people at a guaranteed rate isn't? We've got our priorities wrong if we think that waiting a generation to complete these projects is OK.</p> <p>Madrid had this much light rail in the 1950s!!!!!!!!!!!!!! MADRID! Spain!!! after the war!!!!!!!!!! 2035? SEA might not even be relevant in 25 years.</p>
EAST KING COUNTY	The timeline is ridiculous. 25 years to get light rail to Everett and Issaquah? Leaving Renton out of the light rail map at all is also really disappointing.
EAST KING COUNTY	I think the service to Issaquah should be completed faster. The light rail from Eastside to Seattle (U district is extremley needed ASAP)
EAST KING COUNTY	<p>First of all, I would be first in line to use ST today if there was a good route from Issaquah to Renton. Why hasn't there ever been an Express on that route????? Put \$ toward that kind of stuff first.</p> <p>Secondly, it is ridiculous to have older people like me pay for something that most of us will NEVER use in 25 years. We will be gone because of MANY reasons (not the least of which is that we won't be able to afford to live here any longer).</p>

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	How long will it be to connect East Side to Seattle? Right now i see mention of it taking 12 years, that seems way too long, what can be done to advance the timeline. I think the biggest disconnect in this area and a large stresser is the connection from the east side to Seattle, if anything can be done, it should be brought into service faster if possible.
EAST KING COUNTY	The Ballard light rail is more urgent than the 22 year timeline provides. The light rail from Redmond to Seattle via the new 520 bridge is more urgent than the plan provides. It is shown as just a topic for future study. It is needed now.
EAST KING COUNTY	I have few transit options available to me now and don't see any improvement in my area in any of these plans. If there was to be something useful included, it wouldn't happen in my lifetime.
EAST KING COUNTY	the rapid transit bus lines could occur earlier, right? Why wait so long? I understand light rail will take time to build, but improving bus service seems easier and faster to solve problems in the short run.
EAST KING COUNTY	Funding. It is not desirable to use property taxes as a funding source. A very large portion of the people using the services on a regular basis are not property owners. Need to rethink this.
EAST KING COUNTY	I am strongly supporting of rail plans and not of traffic-bound BUS plans. More rail please!!!!
EAST KING COUNTY	I wish all of this could happen faster. Especially connecting the eastside to seattle with a light rail...
EAST KING COUNTY	Light rail to Redmond should be a priority
EAST KING COUNTY	The sooner, the better.
EAST KING COUNTY	Not aggressive enough. These plans need to be accelerated. The planners have long underestimated the growth of the Greater Seattle Metropolitan Area and we can no longer go on like this. Good plans, good ideas but get on with it. Execute, execute. And the tolls on I405 and 520 are making traffic worse. Stop with the real-time speed limit signs just south of the city on I-5N, that's a crock. Traffic is self regulating when it comes to speed; efficiency comes from good planning and implementation, not by Band-Aid solutions like telling drivers how fast to drive below the speed limit.
EAST KING COUNTY	DO THIS SOONER!!!!!!!
EAST KING COUNTY	25 year is too long to complete this project. It has to be done sooner to meet demand.
EAST KING COUNTY	The main light rail spine of Everett to Tacoma should be a priority to relieve congestion along the I-5 corridor prior to installation of side spurs to Ballard and West Seattle. Bus and other improvements along the I-405 corridor should also be a high priority.
EAST KING COUNTY	I strongly feel that the timelines be decreased. Commutes from all areas are already often times outrageous, and I fear that having some of these projects more than 20 years out would be outdated by the time of completion and create even more congestion for commuters in the meantime. In short, we need better, more reliable transportation more immediately.
EAST KING COUNTY	Modify the plan as needed and accelerate the timelines; traffic is horrible
EAST KING COUNTY	Hoping link rail to Redmond is still in 7 years, but I support anything that adds more transit options! Thank you!
EAST KING COUNTY	Should shorten the completion time for all ST3 projects from 25 years to 10 years.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Although I am happy that a lot of this is being pushed into people's awareness, I would hope that it would somehow be quicker to set up most of these projects. The money isn't so much of an issue but it's a long time to see the fruits of this effort.
EAST KING COUNTY	these timelines are WAY too slow. Look at other cities like Portland, Vancouver, even Guangzhou China who seemed to have built MUCH faster
EAST KING COUNTY	too little too late. We can't even get to enjoy the completion of the project in our lifetime. The main problem is with Metro. There's not enough local bus services in the East Renton Highland area to make any of the ST3 plans viable for me. And yet the East Renton Highland area keeps growing. With traffic pains of only 4 or 5 road to get on or off of the highland, there needs to be more Metro bus services here to even take advantage of any ST3 projects.
EAST KING COUNTY	Roads are extremely crowded now and population is increasing rapidly. These bus and rail services need to be completed sooner than 12 to 25 years. I understand completing research and construction for rail takes time, but why are the BRT areas not coming online for 8 years?
EAST KING COUNTY	I live in Redmond and see that the project bringing light rail to the Redmond area will be after I have reached retirement age. If Amazon started using shuttles as Microsoft does with their "Connector" shuttles, it would go a long way toward relieving traffic issues going between Redmond and Seattle, as well as minimizing overcrowding on the existing transit (particularly Route 545). The most frustrating aspect of commuting between Redmond and Seattle the overcrowding on the bus, most noticeably between the Overlake Transit Center and Stewart Street in Seattle!
EAST KING COUNTY	545 service from downtown Redmond to downtown Seattle is wonderful nine months of the year, then snarled in Olive Way traffic for three months (October through December/January). Getting light rail to downtown Redmond faster would eliminate this weird daylight savings time effect, which doubles my commute time and nearly made me quit my job last year. There's an insane amount of apartment construction in downtown Redmond, too -- don't stop in Overlake, do whatever you can to push right through to Redmond sooner! So appreciative of Sound Transit transforming transportation in King County and beyond over the years.
EAST KING COUNTY	These projects are long overdue and should be initiated at the earliest opportunity.
EAST KING COUNTY	Waiting 25 years for light rail to Issaquah is way, way too long!
EAST KING COUNTY	Need more shorter term mitigations than 8 years -- more one-seat options, or more frequent routes to make transfers feasible.
EAST KING COUNTY	\$200 a year for something that won't be built for 25 years is way too long and way too high.
EAST KING COUNTY	I would pay more to bring transit to the region sooner. We are decades behind already, why are we not moving faster? Need light rail service between the eastside and Seattle much more urgently than between eastside cities (Bellevue to Issaquah, Overlake to Redmond). When is service across I-90 going to happen?
EAST KING COUNTY	Why will it take 8 years to have rapid transit bus service on I-405? 405 is a chokepoint that needs attention, and adding more bus service doesn't sound like something that takes 8 years to do.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	The length of time especially for the light rail is just too long. 17 years for light rail to tacoma will not help me or my family much in foreseeable future. I support mass transit especially the light rail, but with such a glacial pace of change my enthusiasm is dampened.
EAST KING COUNTY	The faster you can get this done the better.
EAST KING COUNTY	Lynnwood Bellevue Renton line construction should be expedited earlier than 8 years. Within 4 years.
EAST KING COUNTY	Issaquah is an up and coming community with a lot of development going on. 25 years from now traffic will be too terrible, Issaquah would greatly benefit from an earlier timeline.
EAST KING COUNTY	Downtown light rail is a very urgent requirement ... 545 Buses operate at full capacity during peak times and commute via transit is very bad. Please bring the timeline down from 12 years
EAST KING COUNTY	Increased parking at light rail stations immediately! Would have used light rail for trips, couldn't find parking, and wound up driving into Seattle from Tukwila instead to make business meeting in time.
EAST KING COUNTY	First of all this project should have started 20 years ago. Clearly a lack of vision and leadership has put in a position of being one of the worst areas in the nation for gridlock. Being where we are now, I think the timeline is too long. The goal should be to all light rail and bus routes completed within 12 years. Light rail expansion, should be a State priority. Buses use the same roads as other vehicles and add to the congestion issue. More outlying bus routes should be out in place within 2-3 years, and light rail completely finished within 12 years.
EAST KING COUNTY	The projects need to be completed in a maximum of 10-15 years. Otherwise this package far to broad and overreaching. Realizing benefits 25 years in the future is far too long for most people, myself included.

EAST KING COUNTY	<p>We need as much light rail as possible, and we need it faster. 25 years is too long to wait. We need to start building multiple new light rail lines at the same time to speed up this whole process and create jobs. Having an expanded light rail and subway network will vastly improve our quality of life in the Seattle area.</p> <p>Additionally, I believe that light rail service should fully circle Lake Washington. Particularly around the southeast part of the lake, we will eventually need a section of light rail that will connect from Southcenter up through Renton and The Landing, to the Newport Hills Park and Ride, and on to Factoria and then to Eastgate and the rest of the light rail network, such as at South Bellevue Park and Ride.</p> <p>Also, we eventually will need a light rail station directly at Bellevue Square/Lincoln Square. Having a light rail station at the Bellevue Transit Center is useful, but it still does not get shoppers close enough to where they really want to go: Bellevue Square. We need a light rail station perhaps at the exact spot where the Bellevue Square parking garage is right now. This will get shoppers and movie-goers to their exact destination, with access to Downtown Bellevue Park and other businesses close to Bellevue Square and Lincoln Square. I believe the most logical routing for a Bellevue Square station line segment would be straight up Bellevue Way, from S Bellevue P&amp;R right up past Bellevue HS and into downtown Bellevue past Old Bellevue that way.</p> <p>I am extremely excited at the prospect of more light rail in the area, and I commend Sound Transit for its hard work thus far. Thank you, and keep up the good work!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	<p>ST has a terrible track record of completing promised/teased projects on time outside of wealthy areas. Poor areas are doomed to underservice and unfathomable delays into the far future. I am highly skeptical of any ST proposal because I know from experience as a former Federal Way resident that the south areas are [explicit] by the RTA and by ST. ST should focus on improving current service as well as finishing promised/teased projects. ST is not a regional network but actually a combination of five different regional networks that each only get served based on their EXISTING development and wealth, and not at all as a single solitary regional transit area. This is why ST spends money fighting wealthy Bellevue to put in light rail while ignoring poor Federal Way and postponing its date of service by ten years. This flies directly in the face of the benefit of transit to underserved and underdeveloped communities and causing lower class people to continue depending on cars and highways at a higher expense rather than more affordable and theoretically reliable transit service.</p> <p>In addition, BRT in this area is a joke and shameful. RapidRide is not rapid! It is miserably slow and for most purposes, entirely unusable for any practical purpose.</p> <p>Adding MORE stops to existing lines -- whether BRT or light rail -- only further contributes to slower service.</p> <p>Finally, "congestion-proof light rail" is got to be some kind of sick joke. The biggest bottleneck on Central Link is the street-level route through the Rainier Valley. Collisions with cars, subjection to traffic lights, and pedestrians and other issues slows Seattle-SeaTac service MARKEDLY.</p> <p>If we don't do transit right, we will be stuck with the bad decisions for decades and decades. It is important to do transit right, and thoroughly, and across the entire RTA, not just those parts that can afford to pay. And already ST/MT are making big mistakes in mass transit implementation.</p>
EAST KING COUNTY	<p>I think the most important part of the ST3 project is getting a Link Light Rail connection between the Eastside (Bellevue/Redmond) and Seattle. I would strongly support increased taxes to fund this project.</p>
EAST KING COUNTY	<p>Traffic is terrible as of now. I like the infrastructure of the plan but the it is going to take to many years until we start seeing some results. I would support any update on the plan that can short the completion time.</p>
EAST KING COUNTY	<p>The timelines always seem long but getting started as soon as possible is important. Seattle and the Puget Sound region needs much better light rail. It should not be delayed by the usual Seattle politics of inaction, where minority voices stall projects, ie SEA third runway, Alaskan Way improvements, Seattle end of 520 or waste money like the Capitol Hill light rail. I support politicians getting the region moving again.</p>
EAST KING COUNTY	<p>Timeline is way too long. Need to accelerate the plan as much as possible. Federal grants/Loans etc.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Now is the right time. 8 yrs / 12 yrs /22 years -- the problems will be much worse. What can be done sooner?
EAST KING COUNTY	I am in favor of light rail throughout the area. The Seattle area is about 50 years behind the times of most big cities regarding a light rail system, for example: New York, Chicago, Boston, St. Louis, and San Francisco, to name a few. We moved to Issaquah about 40 years ago, and instead of moving forward, surveys were done, money was spent, but no light rail was accomplished until the airport project was started. Such a waste of time and money. Thank you for now getting an action plan going, both short term and long term. Carol Homanics
EAST KING COUNTY	Faster timeline! I will be in my late 60's by the time I get the service that I am paying for now!!!
EAST KING COUNTY	Please finish the Downtown Redmond link light rail to Sea-Tac Airport as your top priority. Our family has to spend lots of money on airport parking or taxis to get to the airport, and the link light rail will help us greatly in getting to the airport on time and efficiently. Thank you.
EAST KING COUNTY	25 years!?!?! That's tone deaf. I'm extremely supportive of transit investments but will be voting and campaigning for a 'no' result because the timeline is way too long. When San Francisco burned, a new trolley system was installed in less than a year. I don't think the King County Commissioners or ST Board are hustling enough. A proposed 25 year horizon proves this. Break ground on the new transit stations tomorrow! Expedite the plan!! The proposal strikes me as tone deaf.
EAST KING COUNTY	8 years to complete bus rapid transit seems very slow.
EAST KING COUNTY	The quickest time to completion should drive priority. With self-driven cars in 20 years, a 25yr+ project would be working toward obsolescence
EAST KING COUNTY	Wish it could happen much more quickly!
EAST KING COUNTY	This plan is too slow and needs to be broken down and delivering clear results. Issaquah is going to become a disaster zone very soon without a more aggressive approach. Go bold, break it up.
EAST KING COUNTY	As a member of the Issaquah Transportation Task Force (which recently submitted its report and recommendations to the city council) I am extremely concerned about the long delay in seeing light rail extended to Issaquah. We're growing rapidly and, because of our geography, are struggling with both dramatic increases in through traffic and limitations on our ability to expand capacity and improve mobility. Twenty-five years is far too long to wait. I am sure that the timeline can be dramatically sped up, building the light rail to Issaquah at the same pace as to Bellevue.
EAST KING COUNTY	25 years is waaaaaaaaaaaaaaaaaaaaay too long
EAST KING COUNTY	Ballard is a large community that should be considered for completion before its current estimated timeline. Redmond/Overlake is packed with cars - this is an essential completion point.

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	25 years?! Are you kidding? Pick up the pace! You're asking people to pay a lot of money for a system most will never see the benefit of in their commuting careers. In short, you're asking voters to be selfless and pay into a system only future generations will enjoy. If we could actually see the benefit of this in 5-10 years, I would pay nearly ANYTHING. I need more time with my family.
EAST KING COUNTY	the time line is too far out. Needs to be speeded up.
EAST KING COUNTY	The plan looks very solid. It's about 10-15 years late, but we will take it!!!
EAST KING COUNTY	The 522 corridor through Bothell and Kenmore has become increasingly congested. Kenmore has lost one P&R due to development, and our main P&R (Kenmore P&R) is consistently over-capacity by 8am. We need more parking NOW, even if they are short-term solutions. A plan for accomodating users of the P&R during construction also needs to be developed.
EAST KING COUNTY	If we kick this can down the road yet again, so adequate public transportation won't be in place for another half century instead of a mere quarter (!) . . . well, nobody is going to be very happy about anything around here. Other major cities did these things decades ago . . . sad that we're so penny-wise, pound-foolish. I'm retired and no longer commute, but am still willing to fork over for these improvements.
EAST KING COUNTY	This is much too slow an implementation of this plan. It should be done in 10 years. Taxes should be higher.
EAST KING COUNTY	The timeline seems much too long! We need these transportation options now! Also, it difficult to use the light rail when you can't find a parking space in the lot. Specifically the Tukwila Station.
EAST KING COUNTY	It seems unrealistic to expect voters to approve, and begin paying for, a plan that won't be completed for 25 or more years. Most of us won't be alive to see it completed or benefit from it. I strongly suggest breaking it up into segments that can be planned, budgeted, paid for and constructed in manageable chunks of time. I strongly believe in transit but I'd vote NO for a 25-year plan.
EAST KING COUNTY	I will support this transit proposal but will not ever use the proposed expansions. Your mass transit plans never go where I need to go to get to work. I will be 81 years old by the time light rail comes to Issaquah. I strongly encourage the transit board to put in a light rail station at Lakemont!!
EAST KING COUNTY	Wish that the light rail to Redmond could be done sooner.
EAST KING COUNTY	12 years is too long to wait for rail to Redmond to be completed.
EAST KING COUNTY	Has there been thoughts about how the expansion can be done sooner? The benefit would not be seen for many many years, far beyond the useful working timeline for most in the workforce now.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Issaquah is an Urban Growth Center perfectly situated along an existing right-of-way to expand the light rail system. Charging taxpayers in Issaquah and nearby communities for 25 years without providing direct light rail access is absurd. The Eastside shouldn't be continuing to subsidize other regional transit while being forced to wait for its own benefits. Consider dividing up the tax package by subarea and look for other means of revenue. Additionally, keep in mind that cars are still the predominant form of transportation in the Puget Sound and people still usually need to drive from home to a light rail station - parking must be increased to accommodate the system's growth.
EAST KING COUNTY	WE NEED MASS TRANSIT NOW!!!
EAST KING COUNTY	Speed up timelines - would like to see everything done, especially on the eastside completed quicker.
EAST KING COUNTY	Transportation planning is extremely complicated and difficult for the average citizen to really study and understand. I really believe communications is key to developing and maintaining support for whatever plan is adopted. I would just urge planners to take whatever is budgeted for communications and double it and really spend a lot more time in all the communities explaining why these projects are needed and why you are phasing them in the order chosen. And ABOVE ALL, never lie about something that goes wrong. Doing so just ends up doubling the strength of the opposition to these projects.
EAST KING COUNTY	What takes soooo long?
EAST KING COUNTY	With the unprecedented growth we're experiencing, going a simple 6 miles can take 1 1/2 hours--this is beyond frustrating and puts the amenities of the city out of reach for a lot of us. More money should be spent on this issue and a 25 year timeframe for completion is absurd. The timeframe should be accelerated. I want to enjoy the amazing amenities of Seattle now--not in 25 years. Come on. This is imperative.
EAST KING COUNTY	WAY TOO SLOW!!! It will be too little too late for the expected growth in the region. Service areas that have residents that can afford rather than expecting us all to subsidize low income areas first. We should support low income groups but this becomes overall more expensive for everyone by continuous subsidies.
EAST KING COUNTY	Seems like these are all great projects but the need is now and not in 25 years for some of these projects. I understand the schedule/cost challenges but some of these projects need to be done sooner. Especially train/light rail in the north end to Seattle and connecting the Eastside to lightrail access. Traffic up here is terrible and it seems like commuting traffic hardly ever lets up.
EAST KING COUNTY	Voting to approve funding for improvements that are more than 15 or 20 years away is unappealing. The plan essentially only improves bus routes within a decade. Most of the proposed light rail could and should be opened within that time frame. The plan is better than no plan, but not very good.
EAST KING COUNTY	Do it faster!
EAST KING COUNTY	i just want to see whatever we decide to build get done faster! i get really discouraged by the timelines of the construction. all the ideas are great, and will be great value to the areas they support. lets get them all done and DONE AS QUICKLY AS POSSIBLE!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	While I support the expansion of the Light Rail system in the Seattle Metro areas this timeline is nonsense. I live in the north region and I wouldn't see any expansion until 2041 is the project began today. This makes me not care or want to put my tax dollars toward this plan. The amount of people moving to the region has overwhelmed the highway system in place today. This expansion plan is too little too late and unless the timeline is increased I will be and ardent protestor against this plan.
EAST KING COUNTY	WOW! These projects take forever, even the bus ones. We need transit solutions NOW, even if they cost more. Give us some options to fund more immediate transit improvements instead of ones that will come online when I'm old/dead.
EAST KING COUNTY	Get all the light rail lines in place as fast as possible. Skimp on spending for stations and surroundings, then go back to fix them up after. Laying the tracks is the most important part of the plan.
EAST KING COUNTY	After seeing voter initiatives ignored or dropped for the last 25 years, it's so disappointing that the timeline for this goes out so far. Critical areas we hear about every day include 405, both ways, throughout, Everett to Seattle and Bellevue, and 167 north into Tukwila through Bellevue. After hearing about the windfall of the 405 toll lanes, divert some of that money and move up the timeline to sooner rather than later. Global warming is occurring quicker than this plan!
EAST KING COUNTY	The I90 corridor should be considered sooner. Getting in and out of Bellevue is a nightmare!
EAST KING COUNTY	Ridiculous that the projects will take twenty five years to complete. Get it all done asap and I'll vote yes. I voted yes back in the '90s and early 2000s.  I'll vote no if light rail is not planned to Issaquah for 25 years. Everyone knows that there will be further delays and it will likely take 50 years. I'll be dead and have moved away in ten years.
EAST KING COUNTY	Lynnwood to Downtown Link Light Rail should be expedited.
EAST KING COUNTY	The timeline is too long and needs to address issues more quickly. In 8 to 25 years, your current planning will not be enough to handle the regional growth and could actually hamper further investment in the Puget Sound area. You need to be much more aggressive.
EAST KING COUNTY	I'll pay more to accelerate this plan
EAST KING COUNTY	Complete faster
EAST KING COUNTY	Sound transit is a wast of tax payer money it should not be expanded instead you should spend our money wisely on reducing the conjestion on our freeways
EAST KING COUNTY	All I can say is that it's about time the Seattle area did something about the abysmal lack of transit options.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	you all have a better handle on this and know how long it will take... however, why was everyone dicker around for years... we gotta move on this. It is RIDICULOUS out there as you know. Seattle is parking lot city. Also, you mention the \$ 200 fee but you did not mention for how many years we would have to pay this? We would be frequent transit users if there was transit to Renton. I am about to buy an electric bike thats how bad 405 is.
EAST KING COUNTY	Our population is exploding! I feel the timeline to complete these projects seems too long. I'm hoping that Environmental Impacts have been thoroughly studied, so we retain the beauty, natural habitat, and land stability safe! I'm disheartened by the constant closure of the Amtrak trains, due to mudslides. Please Don't disrupt hillsides!
EAST KING COUNTY	I'm supportive of plan to build better transit in Puget Sound area, but I think the priority and timeline don't make sense. The plan should target mass users first, which is the rails connecting Issaquah, Redmond, Bellevue, Bothel, Seattle and Tacoma. This brings the most impact within the cost of capital and time. Only then, improvements to other areas should be focused on next that bring less value to the majority of population commuting between these cities.
EAST KING COUNTY	You should figure out a way to finish the light rail faster!
EAST KING COUNTY	Timelines are way too long. Wa DOT and Seattle DOT make horrible decisions with no consequence. Bertha, worst idea ever! Its an unstable sea wall for crying out loud. Pioneer square is sinking! The light rail lines on the eastside should run along the old railroad tracks or down the center of the freeway. On 116th in Bellevue is a mess of abandoned car dealerships and parking lots that would make great park n ride station! Living in Renton, I would love to take the light rail from Tukwila into the city but when we tried to tske the train to the Sounders game there was no parking at the station!!! Why is there no multi level parking structure in Tukwila????? And this whole 'take a bus to a train' does not work for people with kids! We need to get off the train and get inthe car to go to baseball practice, or ballet class . Newsflash, most of us dont bike to work and cant bike to work. You cant fit 2 kids, backpacks, sports equipment and groceries on a bike or on a bus.
EAST KING COUNTY	The region cannot wait a quarter of Century for the implementation of these programs. At most it should take 5-10 years.
EAST KING COUNTY	Light rail needs to be built faster!
EAST KING COUNTY	I think it needs to happen faster. I think growth in this area is happening faster than the plan for Transit is happening
EAST KING COUNTY	If there is any way to speed up the timeline? Also, is it too late to have some areas of the project be a monorail rather than on surface streets?
EAST KING COUNTY	Do not use the green area or walking trails for any bus or light rail routes. These trails are great outlets for the people in pinger sound.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	You need STComplete, and you need to make it happen in 5 years. Buses are not subways. You are going to have buses on 405 in 8 years? That's not an accomplishment. Stop confusing the public by putting bus routes on a subway map.
EAST KING COUNTY	Timelines need to be shortened. 25 years until we get light rail to Issaquah is too long. Many people will reject this plan because they'll be retired before seeing any benefit. People don't want to pay for something they'll never benefit from. Even if the cost increases dramatically, I would rather see all timelines shortened to no more than 10 years for all projects.
EAST KING COUNTY	Way too slow for that cost. 20 years! There has to be another way to make key improvements that will reduce traffic and congestion in a shorter period of time. The need is immediate.
EAST KING COUNTY	It would seem that if we could as a region make these decisions faster, not only would the services come online faster, but they would be likely to cost much less. 25 years is a crazy long time - 8 years just for BRT is crazy - the traffic problems we have need to get solved sooner, and it's highly likely that the problems themselves will have evolved / changed in that time period, bringing in to question whether the plans now will even be addressing our transit / commute issues 25 years from now. We need to challenge ourselves to move more quickly, efficiently and decisively to solve these problems instead of being mired in process.
EAST KING COUNTY	why the deadlines are so far in the future, because of budget issues? Most people including myself would not feel excited to pay 200 a year for something that we wont see results for a loong time
EAST KING COUNTY	I understand the lead time for new light rail construction, but why 8 years for express bus service additions in I405 corridor? Seems like that could be delivered much sooner...
EAST KING COUNTY	Build it faster! 25 years is too long a wait. I personally would be OK paying a little more to complete the system sooner.
EAST KING COUNTY	The timelines are far too long and will not keep pace with population growth. If there is any way to get the high priority projects completed sooner rather than later, it would be for the best.
EAST KING COUNTY	Just please speed up the process so we can have these services timely fashion, we are way too behind on infrastructure on public transit already and it is shameful. I will vote support for any measures to fund this.
EAST KING COUNTY	Would be more compelling with a more compact delivery time line
EAST KING COUNTY	The timeline for completion is simply too long. We need this in 3-10 years, not a third of a lifetime. Even if the cost is more, the timeline needs to be significantly reduced. I am not opposed to this plan in general, but people need results that are reasonable and visible.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Having lived in this area my entire 60 plus years, I have yet to witness how continually added busses and more bus right of ways have been a solution to our growing congestion in Puget Sound. Sure it is the easiest and quickest of the proposals but it certainly is not the most effective in long term. There are so many other cities and high density regions across this country and in Europe that have demonstrated the long term benefit of building an extensive electric light rail system and yet decision makers in Puget Sound region in their short sightedness, still thinks the bus is still the first choice. Give it up please! and get on TRACK with the rest of the world!
EAST KING COUNTY	This needs to proceed at a much faster rate; that's the reason why I am somewhat supportive. The timelines are simply not ambitious enough.
EAST KING COUNTY	Far too little, and far too late. I have *no* interest in paying now for something that I can't use for another 20 years, when I'll be retired and living elsewhere. China can build thousands of miles of high speed rail in under 5 years, why can't we? Also does NOTHING to address the Issaquah to Seattle commute. This area does not have the development density to support rail transit.
EAST KING COUNTY	Why can't it be implemented faster. The timeline seems excessively long.
EAST KING COUNTY	We will probably be too old to use most of the services if the timelines are accurate. The fastest and cheapest solution would be to add more bus lines and more park and rides. I ride and catch the bus in Kenmore. I have to drive to Kenmore and there is nowhere to park after 7am. The Lynnwood and MLT transit centers are also full.
EAST KING COUNTY	Please act fast. Start with easy projects and bring them online.
EAST KING COUNTY	We need this NOW and not in 25 years. This project needs to be accelerated and completed ASAP.
EAST KING COUNTY	Based on the timeline, I see no realistic benefit in my lifetime. Since most of the plan does little to solve current problems and limits the areas that it serves, it is hard to justify the potential cost.
EAST KING COUNTY	Issaquah is needed far sooner than 25 years to make this worthwhile. I will have spent \$5,000 myself by then for no personal benefit.
EAST KING COUNTY	To the average person, a completion time of 25 years seems almost unreasonably long. Please include short term measures to improve commutes between now and then, such as BRT on routes where light rail is planned. Also, a more creative approach to traffic issues on 522 would be great to see.
EAST KING COUNTY	It's really sad that Portland has had a light rail system for several years and we are just getting started. Let's hurry it up!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	I love the ST3 plan and this would provide service that would actually be viable for me to use! I hate the ST3 timeline. At the cost of this plan (which KIRO Radio and others show will be far more than \$200/person/year), it should be done far sooner. Portland already commands Seattle when it comes to Light Rail transit, as does nearly every other major city larger than Seattle in the US that had the foresight to do this work years ago. The first light rail projects under this plan need to complete within 6 years and the last within 10 years to be even close to being viable to sustaining growth in the area. As a young professional in this area, I will be nearly at retirement age by the time a line that services we will be complete, which I simply cannot support. The government and ST need to make a radical and forceful plan to drive making ST3 a reality within the next 10 years.
EAST KING COUNTY	There needs to be more of an emphasis on helping the commute from the Eastside to Seattle and vice versa. This should be one of the main priorities.
EAST KING COUNTY	I'm not a transit engineer, but after living here for 20y, it seems to me that the planning timelines are extremely long.
EAST KING COUNTY	17 years to accomplish light rail from Redmond to Bellevue is too long.
EAST KING COUNTY	This work has to happen much faster. Figure out a way to bring lines up in a more efficient way. At a minimum they must be on time and under budget.
EAST KING COUNTY	It is super important that this is completed way faster, if possible. Eight years? No. The sooner this happens, the more support it will get. I realize it would cost more, but 12 years is too long. We need this sort of public transit yesterday.  We also need plans for what to do when the link isn't running at night.
EAST KING COUNTY	to long
EAST KING COUNTY	Taxing now for projects 25 years in the future seems like it is too far away to realize any of the benefits. If the buses and light rail face the same congestion issues or if there isn't a sufficient transit network to get to the ultimate destination quicker than they could in a car, it is unlikely that the project is worthwhile. I think another issue is to change the image of the public transit system being viewed as free transit for homeless & smelly folks, an issue that needs to be addressed.
EAST KING COUNTY	The timeline seems to be very long and our transportation needs might drastically be changed by the time the whole plan is finished
EAST KING COUNTY	It is ridiculous for it to take this long on certain projects (especially bus rapid transit - 8 years?) and 25 for light rail to be completed. It's also very clear that this would provide no benefit whatsoever for me where I live in Renton and I would still have to pay for it the same as everywhere else.
EAST KING COUNTY	Priority on having faster transit along the I-405 regions (Bothell, Woodinville, Kirkland, Bellevue) should be high

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	If possible, I would like to see the timeline for completion shortened. Regular driving lanes on 405 have been impaired enough by the toll system; I would not be in favor of restricting regular traffic more to facilitate BRT. BRT should use the existing HOV lanes. The cost of these improvements should be allocated more appropriately so that it is not an unfair burden on homeowners. Gas tax, a mileage-based tax, or even a state income tax (which is long overdue, in my opinion) seems more fair.
EAST KING COUNTY	Fund projects that you can start now. Do not fund projects that you cannot start now. Broken promises only frustrate people. A hybrid is ok, where you ask for a 25 year plan and start a set of projects now, but be clear when each project will start. Be clear when the taxes will end. ST3 is extending the ST2 taxes. Taxes should go to the construction of new transit. User fees need to cover the cost of running each leg. Do not build a leg if user fees can't cover the cost of running it. The plan makes very little mention of unifying the different types of transit. Users should be able to use the transit system without having to pay for every leg. The plan should protect user's privacy. All user data must be deleted within 30 days. Individuals may ask to keep there history longer. No user information should be provided to anyone but the user without a court order. The detailed transit documents list several forms of risk, but they do not mention risk due to changing car technology. How are ride sharing companies, such as zipcar, affecting transit now? How are they likely to affect transit? How will self driving cars affect transit?
EAST KING COUNTY	The timeline of these project to date of completion should be shortened. All of the proposed additions are critical to the current growth and movement within the region, and thus are critical and time sensitive to the stability of the growth of this region. As a result, the project completion dates should be expedited to ensure the stability of growth and movement throughout the greater Seattle area and Eastside.
EAST KING COUNTY	Is there any way to accelerate the completion? Light rail to Ballard in 22 years is a very long time to wait, particularly with the proposed growth of the Puget Sound population.
EAST KING COUNTY	The plan MUST be completed more quickly. Efforts MUST be made to accelerate scheduled completion. I believe we could garner support to complete in half the time; 13 years.
EAST KING COUNTY	Seattle to Everett should be on a quicker timeline. And plan for commuter parking; the UW Link station is great, but where do I park when using it?
EAST KING COUNTY	bus should be first as it is most flexible and not as expensive as other rail options
EAST KING COUNTY	For this huge price, the timeline is unacceptable and I will vote against any schedule that is this slow at implementation. 35 years is unacceptable.
EAST KING COUNTY	The Eastside is neglected. I live in the Issaquah Highlands and go to school at Lake Washington Technical College in Kirkland. I have an 116 minute commute EACH way. There are days I only have one class, and I commute 4 hours. This is ridiculous. Meanwhile the exists to Issaquah back up for miles and it is impossible to drive on Front Street from 3:30 to 6:30 every night.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	25 years??? Can in not come any sooner?
EAST KING COUNTY	too slow
EAST KING COUNTY	I think it can and should be completed sooner. With a faster timeline and more light rail expansion I would strongly support.
EAST KING COUNTY	I support the vast majority of these projects. Much needed and hoping the voters sees the need. But a quarter century?! That's ridiculous. That's almost a person's entire professional career.
EAST KING COUNTY	ST 3 is extremely expensive! Furthermore, I will be 90 years old, if I live to see the day ST 3 is completed. You have burdened the tax payer way too long for this! Additionally, unless your commute takes you to downtown Seattle, transit and rail in our community is awkward and inefficient. Walking a mile, or waiting to transfer will keep people in their cars. ST 3 does not address these problems.
EAST KING COUNTY	The time lines are extremely large. We need transit now! And more priority than other projects like the 99 tunnel...
EAST KING COUNTY	Who ever thought of running the tunnel machine in reverse from Northgate to Brooklyn station is an idiot! The goal should be now University station is open to get Brooklyn, then Roosevelt, then Northgate open. Bet Brooklyn could be open this time next year if a month of planning went into it now.
EAST KING COUNTY	This project takes entirely too long. Reduce the number of projects and focus on the near Seattle area first, beginning with West Seattle and then Ballard.
EAST KING COUNTY	Too little, too late. I will be moving just as these projects come to fruition. You should have done this instead of HOT
EAST KING COUNTY	I feel most strongly about getting light rail service to the East side communities and would love to see that accelerated. The east/west commute is heavily bottlenecked by the bridges and a light rail service could significantly ease congestion. Personally that's a much higher priority that simply more buses, and in general I think investing in light rail is a better long term plan than simply adding more buses.  The timeline for the rail expansion coming on line is incredibly long. If the schedule prioritized this more aggressively I'd be much more in favor of it. As it is, it feels like a large tax for little benefit
EAST KING COUNTY	We DESPERATELY need transit on the eastside. The buses are all standing room only, and we're still expanding. PLEASE TAKE OUR MONEY TO ADD BUSES FROM RENTON/KIRKLAND/REDMOND to SEATTLE.
EAST KING COUNTY	The primary benefit to Issaquah residents from this project will not come through until much later in the plan - Closer to 25 years. It does not make sense for Issaquah residents to fund this project at all. Most residents will not incur any direct benefit in their life span.
EAST KING COUNTY	I fully support this plan BUT the time frame is ludicrous. Not sure how and why this way too long a time frame was developed but there is no reason to wait this long to complete this plan. If this timeframe is made part of the plan, I will vote against it which is a shame as I am for the actual plan just not the timeframe.
EAST KING COUNTY	Within reason, so what is possible to speed up these timelines
EAST KING COUNTY	Needs to happen much faster. Should have been done 10+ years ago.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Timeframe is far too long to be to be of real value.
EAST KING COUNTY	Timelines seem very long under this plan. More support it needed but increasing the amount of transit options across the county is very important for growth in this area.
EAST KING COUNTY	light rail projects should be the highest priority; not okay with increasing property taxes.....small sales tax increase okay; sales tax on luxury items should be higher; increase motor vehicle tax okay; increase liquor taxes i.e. for Costco etc.
EAST KING COUNTY	I urge accelerating the schedule. We have spend way too much time dithering about mass transit in the last couple of decades. We are far behind the needs of our rapidly growing area.
EAST KING COUNTY	<p>The approximate timelines in Question 12 are outrageous. Yes, the first ST package took a while to become reality. The Second ST package was a little quicker. However, the Sound Transit board should dream establish an even quicker timeline than past packages. ST3 timelines should attempt to match our economy and job growth. We are very lucky to have a robust economy and diversity in business industries. As of April 11, 2016, AMAZON alone has 7,368 open positions they are seeking to fill in the Seattle area. Nevermind, the REI's, Google's, Facebook's, Zillow's, Redfin's, Boeing's, Costco's of the world who are also seeking employees.</p> <p>IF we are to believe the a small grain of truth from the RIGHT leaning Seattle Times (<a href="http://www.seattletimes.com/seattle-news/data/seattle-sees-biggest-jump-in-bus-riders-of-any-us-city">http://www.seattletimes.com/seattle-news/data/seattle-sees-biggest-jump-in-bus-riders-of-any-us-city</a>). Then, the people of the Puget Sound are craving, wanting and USING all the available transit. There is NO war in CARS because TRANSIT has already won the war. ITS OVER. Now, the ST board should use this public support to be equally bold.</p> <p>We also have influential political might (in Cantwell, Murray, Reichert, Larsen, etc) in Washington, DC that should help expedite funding allocation to the Puget Sound. EVEN if the worst case scenario of a TRUMP White House, our representatives will not be influenced by the GOP because \$\$ money talks. Our local economy cannot be ignored. Best case, a SANDERS White House should easily be able to fast track funds to the area that supported him (73% state-wide support) to a win.</p>
EAST KING COUNTY	The Puget Sound area is many, many years behind nearly every major metropolitan center in the US with implementation of rapid transit systems. With 1,000,000 more residents projected for King County by 2040, without an accelerated transit system implementation the area will become a nightmare resulting in businesses and residents moving elsewhere. Push forward with more bus rapid transit to get more movement capacity on line sooner while light rail is in design and construction. Seattle downtown is losing jobs, there is a great need for better connections to the eastside where jobs exist and are growing.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Wish it could be faster
EAST KING COUNTY	Every effort should be made to add rail reach and capacity as quickly as possible, even if that's done at the cost of bus service or increased project costs.
EAST KING COUNTY	This needs to happen FASTER!! 25 years to Bellevue/Issaquah. Come on!!  And please CONFIRM you're adding light rail across 90 or 520 (between Seattle and Bellevue). That is not clear.
EAST KING COUNTY	25 years???? Get serious. Buses could be on the streets in a few short years. Running two sets of tracks on both sides of 405? Why can't the trains use the same tracks to Issaquah? Has anyone looked at the ENTIRE picture or just piece by piece, so you can justify your existence in perpetuity?
EAST KING COUNTY	The timelines to bring light rail to Everett are too long. Congestion and long commute times impact business negatively and we simply have to address the problem much faster than this plan permits. I would recommend that the committee go back to the drawing board to find a faster solution to getting light rail in place.
EAST KING COUNTY	The faster the better.
EAST KING COUNTY	Placing any more effort on bus lines at this point is too little, too late. Focus needs to be entirely and exclusively on rail development, to build a strong foundation for a well-networked, dense, modern city. Until it is faster to take transit than to drive (which rail can provide) we won't see significant gains.
EAST KING COUNTY	I would STRONGLY support this (even campaign for it) if it didn't take 25 years.
EAST KING COUNTY	I would like to see completion on the light rail extensions to Redmond and Issaquah to be earlier than what ST3 proposes. I also feel the density of housing in the new Issaquah Highlands area would justify a light rail station there. People who choose to live in communities like that would also be likely to ride light rail to get to downtown Bellevue or Seattle.
EAST KING COUNTY	Go faster.
EAST KING COUNTY	The time frames are too far out to be meaningful. Improvements needed in the next 10 to 15 years, or public will become restless. Not wise to ask a 50 year old to contribute for 25 years before plan all kicks in.
EAST KING COUNTY	25 years is much too long to wait and 405 will be at a stand-still 24 hours a day.
EAST KING COUNTY	25 years is a long time to wait. A lot can change during that time. Either the planned capacity can become insufficient or turn out to be useless due to other changes like work from home gaining wider adoption. A faster timeline would be much more useful.
EAST KING COUNTY	There is already urgent need for this infrastructure, particularly as home prices within commuting distance of major Puget Sound employers continue to skyrocket. Any opportunities to expedite these projects should be explored. This may be ill-informed, but is there any way to have new employers adding commuter volume to the region chip in a bit more?
EAST KING COUNTY	needs to be done as fast as possible!!!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	<p>While I generally support most of the projects (except BRT on 405), I think the early deliverables in the package are quite weak, and out of scale with the size of the tax ask. I think most people are going to be evaluating this on a 5-15 year time scale, and they need to get something tangible for their tax dollars within that time. I would like to see more emphasis on early deliverables in preparation for the later light rail lines. For example, ST could dramatically invest in parking and access at Eastgate (over capacity now), Lakemont, and Issaquah within 10 years rather than asking those voters to wait 25 years.</p> <p>On the I-405 BRT, I'm not convinced the need is for travel from city-center to city-center. For people commuting to a city center, their trip probably doesn't originate in another city center. Also, having no stops between Downtown Bellevue and Renton is ridiculous (Link is adding stations, right?). I think the riders that use this are people likely to be airport flyers and other infrequent travelers rather than rush hour commuters.</p>
EAST KING COUNTY	Light rail expansion should be sped up.
EAST KING COUNTY	To keep pace with growth and to remain attractive to large employers we need to improve commute routes and times. I support finding money to start and finish these projects more quickly.
EAST KING COUNTY	Faster, faster, faster.
EAST KING COUNTY	Again. A plan without comprehension of the need to connect Eastside communities. You really need to study New York.. Transit goes north-south and east-west. People need to be brought easily in to rail lines.
EAST KING COUNTY	You can't build out the system fast enough. I would be willing to pay even higher tax burden to build out faster.
EAST KING COUNTY	We need rapid transit more rapidly. Find a way to speed up these timelines.
EAST KING COUNTY	<p>The schedule is absurd and the tax amounts add injury to the insulting schedule. The London Crosslink line, nearly any Portland Max line, and most other light rail schedules around the world including in developing nations should all embarrass Sound Transit and make it rethink this idea.</p> <p>All of us over 30 will live most of the rest of our working lives with this traffic under your plan. And if this passes, we will be made poor in the bargain.</p>
EAST KING COUNTY	Needs to be faster.
EAST KING COUNTY	Make this happen in 10 years. We are so behind. :(
EAST KING COUNTY	We need rail now!! Not in 12-20 years. That's crazy. Make me king and I'll put rail in ASAP.
EAST KING COUNTY	I know that it takes time to raise the funds for something this massive, but the timeline is killing me. Surely there's a realistic way to get everything online faster?
EAST KING COUNTY	This plan is too big. It needs to be phased. If it were an initiative I believe it would not pass the single subject test. Start with a 10 year plan. Get that on line and come back to us with another 10 year plan. Some of us are huge supporters of Sound Transit but still remember the train that almost went to the airport.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	These projects need to come online faster. In 25 years I will be in my 50's, traffic is already a deciding factor in me staying in this area, and these plans do not benefit me greatly.
EAST KING COUNTY	I know it will cost more, but accelerating the completion of the new Seattle tunnel and the related lines, keeping lines more grade separated, and prioritizing reliable service designs over less expensive options is what I would like to see. I think the Issaquah extension is off the backbone and not as important. Prioritize Seattle, LR to Redmond (which is developing a real downtown with density and people who will use transit), and the 405 corridor.
EAST KING COUNTY	Overburdened transportation needs relief soon, not in two decades.
EAST KING COUNTY	25 years is way too long for completion! we need all of these changes yesterday!
EAST KING COUNTY	The project timelines are too slow. We need to provide the Seattle metro area quickly with light rail so that we are not languishing in traffic for the next couple of decades. If speeding the process up means higher taxes, so be it. I will pay them because being able to get around and enjoy the amenities that our area offers will improve my quality of life. Another thing: I do not see much here about the need for additional parking at park and rides along route 522. As it is now, the park and ride in Kenmore fills up by 8:00 a.m. If we want more people to get on the bus, we will need to somehow accommodate the cars of people who will need to drive from their suburban neighborhoods to get to a bus stop. There are times when I can ride my bike from my home to the bus, but it is not always a reasonable choice. For years I was a hardcore bike commuter; however, I am older now, and biking up steep hills, or biking at all, is not always a pain-free option. Eventually we will wean ourselves from the automobile, but the humane-- and practical-- approach would include helping people make the transition from an auto-centered to a transit-centered lifestyle. If we want to get people on buses and trains, we'll need to help them get there.
EAST KING COUNTY	As American communities living in a modern society we ought to be ashamed of ourselves for not having already established and exiting mass transit rail networks many many years ago, that reach out into every major neighborhood in the entire metro area. I am an American white professional. I spend over half my year working and living in JAPAN, HONG KONG and BANGKOK.....I am ashamed at how many decades behind we are of our global peers. Ans yes....this includes Bangkok.....even Bangkok is further developed than great old Seattle.
EAST KING COUNTY	Timeline is not acceptable, more transit to Snohomish county
EAST KING COUNTY	Please speed up BRT alternatives, all of them.
EAST KING COUNTY	At the rate of growth the region is experiencing, any project you are projecting for completion of this plan today will be obsolete in 5 years let alone your 25 year plan to connect Issaquah to Bellevue and Seattle. Sound Transit needs to work with the state government and the federal government to accelerate the timeline for completion in 10 years. If not, there will never be any net gain and the regional economy will experience a severe negative impact due to lost productivity and businesses choosing to either not locate in the Seattle area or vacating the Seattle area.
EAST KING COUNTY	25 years to light rail in Issaquah? seriously? stop studying and start funding more execution.
EAST KING COUNTY	This timeline is absurdly long. A commitment to a 25 year timeline is impractical, does not address immediate problems of high traffic, and is likely to be made obsolete by newer technology.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Timeline is too drawn out. This work needed to be approved and completed already. 25 years is just too long. Get it done in 15 years.
EAST KING COUNTY	I think the Woodinville / Redmond corridor (202) is going to be completely overwhelmed with all the new construction we are seeing. It will be important to relieve that corridor very soon, as I405 is not an adequate alternative.
EAST KING COUNTY	Increased transit from Kirkland to Seattle (and back) would be greatly appreciated. Currently the only option is route 255 which is always packed. On that note, a more direct route from Kirkland to South Lake Union would also be great. With the 255, there is about a 1 mile walk each way to South Lake Union. During rush hour often time the buses are so full they don't have any room left by the time they get to my stop (convention place). I think the Kirkland residents would be greatly appreciative for swift action on this increased transit service to Seattle. Thank you!
EAST KING COUNTY	Timeframes to complete these projects are completely out of scale with the rate this area is developing/growing. We need solutions for traffic today, not a whole generation from now.
EAST KING COUNTY	Public transportation is absolutely critical. 25 years is an unacceptable timeline. Needs to be less than 10 total.
EAST KING COUNTY	Issaquah needs to be moved up in the timeline. The Eastside is growing beyond current capacity. 25 years will be WAY too late.
EAST KING COUNTY	The amount of time you are proposing to complete these projects is absurd. In the length of time you are proposing there is bound to be numerous cost overruns, delays, and more TAX increases. I don't understand why as a car driver I should have to subsidize a project that I more than likely would never use. If you want to put in mass transit, let the people that are going to use it pay for it.
EAST KING COUNTY	Light rail to downtown Redmond should be completed sooner. And light rail across the 520 bridge to UW should be added
EAST KING COUNTY	Project timelines are too long. BRT are not major construction like light rail is... implementations should only take months to implement, not a decade. Please accelerating delivery to improve support. (If you can accelerate light rail construction to create a integrated system, please do so (including parallel projects). North end sounder trains are a nice idea, but due to the frequent landslides, they cannot be counted out to connect an Everett light rail system with a Seattle ligh
EAST KING COUNTY	Obviously finding ways to move up timelines in this rapidly growing area should be a high priority.
EAST KING COUNTY	I think light rail extensions should be the highest priority of this project.
EAST KING COUNTY	25 years for Issaquah to get light rail????? My commute is over an hour today (at best) for Sammamish to Lynnwood one way. It is only getting worse. It would be nice to see rail service for that route begin before I die.....
EAST KING COUNTY	Try to get light rail to Lynnwood sooner.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Microsoft is the largest company in the region; we must support them in getting access to light rail in Redmond, Downtown Redmond, and Bellevue. I-405, even with recent changes, is not acceptable in transit times. Light rail is overdue and woefully behind the times. Please focus on the support for expediting light rail access to the Eastside Region. Even 8 years is too long and should be reduced.
EAST KING COUNTY	For me, the highest priority is getting some sort of Light Rail connection running between Seattle and Eastside. I hate driving across the I-90, and as a result very rarely go into Seattle, but being able to take the Light Rail into Seattle and back would open up a ton of option for me.
EAST KING COUNTY	Construction should start now
EAST KING COUNTY	The timelines are ridiculously long! 8 years to add BRT and 22 to 25 years to add light rail. I know the "Seattle process" makes things take longer, but Sound Transit does not seem to have any urgency to get things done. My opinion is the staff is comfortable for projects to take forever as it provides job security. These long timelines contribute to the very high costs which compounds the problem.
EAST KING COUNTY	Light rail will be a big bastion, but it requires significant investment. Even still the 12 year timetable is massive.
EAST KING COUNTY	It is absolutely ridiculous that such a plan should take 25 years.
EAST KING COUNTY	I voted for the large transit bill in the 80's ... voted down ... too costly they said ... I say get on with it ... what ... you think the traffic is going to get better ... mass transit in any form buses, light rail, Sounder train ... is the only way to go!!!
EAST KING COUNTY	What is the timeline for Issaquah? What about the items for Future Planning that were left at the bottom of the long list of 'areas for consideration'? Good planning is necessary for such a beautiful part of the United States.
EAST KING COUNTY	Please, for the benefit of our area - just do it. Get it built, build it as fast but as safe as possible. Pass pricing onto riders, we will pay. Homeowners don't need to be the only folks paying. \$0.25 per ticket versus \$0.25 per \$1000 in property taxes would generate more money and get less flack. Get the light rail extended to as many places as you can. Also, when you build parking garages PLEASE build multi-level ones. Learn from the Tukwila park & ride where you can't get a spot after 8am on a weekday. Our area is so behind the times as far as mass transit, it's embarrassing - and traffic is beyond frustrating. If we had mass transit that would actually connect me from home to work, I would use it.  Also, PLEASE extend the weekend hours in the city! Seattle, Tacoma, Bellevue at the least should run until 2-3am on Friday & Saturday nights to ensure everyone has time to get home. I have missed the last light rail in downtown Seattle before and had to wait quite a while for a bus to take us to Des Moines and it's scary on the streets with no where to go. There's no open coffee shops or anything at that hour for us to go take refuge.
EAST KING COUNTY	Too long all needs to happen more quickly-Too much growth!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Plans need to be accelerated for Rail. Building out rail infrastructure to East side in 25 years is ridiculous and a failure in planning. Accelerate Rail, focus on the long term solution and accept the fact that East side growth will continue.
EAST KING COUNTY	Do not put any High Capacity Transit on the CKC Trail <ul style="list-style-type: none"> <li>•Remove the environmental study between Bellevue and Bothell via the CKC Trail</li> <li>•Remove the proposal of mass transit from Bellevue to South Kirkland Park &amp; Ride</li> <li>•If all of these are not removed, I will actively work to defeat ST3 in November</li> </ul>
EAST KING COUNTY	The I 405 bus lines can be added now, not eight years from now. By that time, traffic will be twice as bad as today. Federal monies must be used for mass transit, not more local taxes.
EAST KING COUNTY	The faster the timelines the better. I would be willing to pay more taxes for faster completion of light rail projects (1/2 the proposed time)
EAST KING COUNTY	I believe that, if possible, the timelines should be sped up, as congestion is already bad, and will only get worse over the next 10-20 years.
EAST KING COUNTY	The sooner the better!
EAST KING COUNTY	Projects are way too far in the future.
EAST KING COUNTY	We need mass transit like YESTERDAY... really 50 years ago to be honest. This plan DOES NOT DO ENOUGH AT ALL, and certainly does not achieve anything fast enough, though it is better than the existing infrastructure. Seattle is doomed.
EAST KING COUNTY	Timelines are too long. This should be done asap.  Also, ride sharing companies such as Uber & Lyft are very much a part of transit. This should be accommodated in the plan especially considering the timelines.
EAST KING COUNTY	Time horizon is way too slow. These improvements were needed 10 years ago.
EAST KING COUNTY	Light rail is the future of Seattle metro area expansion and should take the highest priority. Rapid transit buses are helpful but don't solve the problem.. People will NOT change their commute mode from personal vehicle to mass transit unless the commute times will be comparable or faster. 10+ years before expansions of light link to Everett mean extremely bad traffic to continue or worsen for another decade??? It will drive people away from the area and slow down economical growth. EXPEDITE EXPEDITE EXPEDITE!
EAST KING COUNTY	Sound Transit should consider P3 or other alternative contracting methods to accelerate implementation of these projects.
EAST KING COUNTY	25 years feels like an incredibly long time. There's no way to make that faster?
EAST KING COUNTY	The current timeline is too long for support especially with including so many proposals within the draft plan.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Issaquah and Sammamish need help LONG before 25 years! It is exploding out there and no help in site. I would be strongly opposed to a plan that would not help this for 25 years so that it keeps open opportunity for revised plans to impact this need in a more timely and reasonable manner.
EAST KING COUNTY	Seems like a long time to wait. I'll be retired by the time this [explicit] gets finished
EAST KING COUNTY	The focus should be on implementing a train commuter system separate from the clogged highways; drop trying to bandaid things with busses and focus on light rail.
EAST KING COUNTY	Hurry!
EAST KING COUNTY	Issaquah light rail dates should be improved
EAST KING COUNTY	I think it is important to assess if some of these changes can be implemented on a more aggressive timeline. Especially when considering the expected growth rate of the Puget Sound area over the next decade.
EAST KING COUNTY	Time line should be moved up considerably.
EAST KING COUNTY	Light rail to Everett in 25 years is unacceptable, it should be advanced on the timelines by 10 years. The growth in the South Snohomish area warrants the need for this service as soon as possible. There are limited transportation options and all cause extreme traffic congestion.
EAST KING COUNTY	How can we implement faster? BRT seems like an option that could come online quickly if focused on.
EAST KING COUNTY	This seems like a very long time to complete these projects! Why can't they be completed faster. Denver is building light rail in half the time.
EAST KING COUNTY	These investments will pay dividends as soon as they are implemented. While it is a complex project we should be prioritizing these much higher than we currently are.
EAST KING COUNTY	Faster, faster, faster - please note that developers are already building apartments and condos in anticipation of light rail options - years before they will be available - thus creating even worse traffic problems.
EAST KING COUNTY	I live in Issaquah and would love to see the light rail come there in a sooner time frame than 25 years. I could take it to work in Bellevue and Redmond.  Meanwhile my husband walks to our Park & Ride every day and takes the bus to DT Seattle to work. It's perfect for him and the reason we moved here.
EAST KING COUNTY	It is important to think of areas like sammamish issaquah n snoqualmie that are seeing a rapod growth to connect with good transit options.
EAST KING COUNTY	This whole plan should have an 8 year completion target. We fought and won WW2 in four years. Why are we so timid about addressing this structural need? I am embarrassed when visitors from other cities and countries are dumbstruck at our dependence on cars as our primary form of transportation. It completely misses any foresight regarding North/South light rail on the Eastside. Add a route from Monroe to Tumwater on existing arterial routes through Woodinville, Redmond, Bellevue (148th) , Renton, Kent, Auburn, Puyallup, West of JBLM, etc.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Sooner completion is better. Ideally, the light rail would circle lake washington and extend north/south/east. Buses could then focus on getting travelers to/from the nearest light rail station.
EAST KING COUNTY	Takes way too long. We need this yesterday.
EAST KING COUNTY	The Ballard line must be the foremost priority followed by increased BRT. Both provide the greatest return on investment in relation to rider subsidies.  Users of park and ride lots should be charged, new funding for parking should be cut.  Sound Transit should pursue value capture mechanisms via leasing land adjacent to stations and charging for parking. Any additional funds for parking without implementing charging at current facilities is exceedingly wasteful.
EAST KING COUNTY	Projects directly connecting to downtown Seattle should be prioritized.
EAST KING COUNTY	This all should have been done 40 years ago. I'll be dead before this area has decent mass transit. Get it done now.
EAST KING COUNTY	Completion times are too long. The people need these transit services today.
EAST KING COUNTY	Completion times should be sped up as much as possible.
EAST KING COUNTY	The I-90 corridor is the fastest growing area of Seattle. Issaquah and Snoqualmie residents will overburden the public transportation currently available in just a few years. 25 years is too long to wait to add additional public transportation options to Issaquah and Snoqualmie.
EAST KING COUNTY	This needs to be done faster. The traffic here is embarrassing... The 405 is a nightmare. People crowd the 405 because they have no viable commuting options between Kirkland and Bellevue. 3+ HOV lanes is silly. In this day and age who is able to find 2 other people that want to leave for work and leave work at the same time and work/ live relatively close to you... People can't even carpool if they wanted to. Need more buses!!!
EAST KING COUNTY	It is positively ludicrous, given our traffics woes, that many of us will be retired before this is complete. Furthermore, the city of Seattle and the greater Puget Sound traffic managers that have drafted this are a laughing stock. Bus Rapid Transit.... Seriously. 25 years... Seriously? 8 yrs to get a weak service like "BRT" going and even longer to get small pieces of a system in place that San Fran, Portland, Etc have had in place for years. We are LAME. It's embarrassing as a city to have such a weak infrastructure.
EAST KING COUNTY	8-12 year timeframe is an eternity!!! Get on it now!!!
EAST KING COUNTY	Cost doesn't matter, the timeline is unacceptable and an absolute farce for a developed nation. Blank check, all done in under ten years. The economic development will really party for it in time.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	When I moved to the Puget Sound area in 1991, I attended a Sound Transit meeting to hear about the EastLink plan for light rail across the lake. Back then, the proposed service would have been completed by 2013. Since then, Microsoft has grown in size by a factor of 10, Bellevue has gone from a little town to an urban center that rivals Seattle in scope and density, and the plateau has grown in leaps and bounds – all with little/no infrastructure expansion to accommodate the increasing population. It is time for Puget Sound to grow up, to stop wasting money on HOT lanes, to stop cramming more buses onto crowded highways, and to make a REAL commitment to rapidly moving forward with a comprehensive light rail system.
EAST KING COUNTY	12 years to complete even the first phase is far too long to complete this project and highlights the inefficiencies and incompetence of ST. Also, you once again favor the Seattle area while the Eastside is neglected. Considering the lack of transit options on the eastside compared the the revenue generated here, you need to adjust your priorities or you will find that your funding cut off by the voters.
EAST KING COUNTY	Sooner is better! I'd like to see less people driving and more easy public transit in general.
EAST KING COUNTY	25 years is way too long. by then all of these solutions will feel like small fixes.
EAST KING COUNTY	I'd like to see Issaquah be a higher priority. Barring that, improving mass transit between Seattle & the Eastside should be the highest priority.
EAST KING COUNTY	Offering incentives to contractors to complete work early without sacrificing quality of work.
EAST KING COUNTY	Would like to see the timelines reduced for the plan roll out
EAST KING COUNTY	Timeline seems excessive. Growth in the region is projected to increase very fast and 25 years for 15 miles of light rail is not acceptable.
EAST KING COUNTY	Issaquah in 25 years is too far out to gain local engagement.
EAST KING COUNTY	Build the whole project ASAP, do it properly and do it once.
EAST KING COUNTY	Issaquah should receive a higher priority and shorter timeline to obtain the light rail due to the very fast booming population here and the very low frequency of buses we currently have, compared to places like Tacoma, Ballard and West Seattle.
EAST KING COUNTY	I would speed up the planned LRT service to Issaquah from 25 years to 10-15 years.
EAST KING COUNTY	This will take too long. We need this timeline to be moved-up and for these projects to be completed in less than 10 years.
EAST KING COUNTY	This is taking way too long! We need to expedite the project plan!
EAST KING COUNTY	We who live in south Snohomish are at the bottom of the list to receive light rail, if at all. I am tired of being taxed for services we may never receive. The Bothell area has horrible traffic with no improvement in sight. To use the toll lanes, we have to pay. Now ST3 wants to increase our taxes. Enough is enough!!
EAST KING COUNTY	The sooner the better for all of it! These improvements are the answer. Get people out of their cars!!
EAST KING COUNTY	We need light rails on the eastside/northend, not more buses!! LIGHT RAILS!! Think about the future. LIGHT RAILS!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	The project needs to be completed faster, 25 years is a joke. Everything should be completed within 10 years. 10 years from now we will have additional problems to worry about. More parking is needed asap at the Tukwila Sounder station. It is always 100% full and there is no overflow lot.
EAST KING COUNTY	I'd like to see the light rail to Redmond come in earlier, given that Towns growth rate and the fact its a major tech industry hub
EAST KING COUNTY	This needs to happen faster
EAST KING COUNTY	I am a huge supporter of transit projects. My biggest complaint is the extremely slow build outs of the Sound Transit projects. The University extension took way too long to build for those few short miles. Sound Transit and our community need to push harder to accomplish better transit sooner. The Puget Sound is way behind the curve.  I used to use public transit all the time, but service to Sammamish and the Eastside just sucks.
EAST KING COUNTY	The timelines are ridiculous. 30 years! We need this now. Sell bonds, pay for it, build it, pay off the bonds. If any organizations (unions, politicians, etc.) fights against speeding it up, to hell with them. Break the contracts and get the projects moving. We need this now! Not 30 years from now.
EAST KING COUNTY	Build it faster. Also, this survey is too long and too complicated for the average person. I'll bet you have a lot of "abandoned' suveys.
EAST KING COUNTY	In 25 years, companies could leave puget sound with chaotic being a big reason. The landscape of the area could change drastically in 25 years. We are currently on par with cities like St. Louis (which currently has a single rail line from the airport to downtown. We should be on par with cities like San Fransisco, Chicago, Boston, and New York. Right now, Dallas has more advanced rail systems. Texas!?! How embarrassing is it to be behind Texas in anything? Anyone who would propose 25 years for this project should be embarrassed and consider a career change.
EAST KING COUNTY	The timing is a joke. Why is everything costs twice as much and takes twice as slow to build in this country?
EAST KING COUNTY	The Plan takes too long to complete. How can we speed up the timeline?
EAST KING COUNTY	Project timelines are unacceptably timid. 22 years to get Link to Ballard (via an awful at-grade route) and West Seattle makes the entire package a sick joke. Junk BRT entirely. In just two weeks of operation, the Husky Stadium addition to Link has made an obvious and welcome impact on commutes all over the region. Grade-separated Link should be the solution EVERYWHERE, and it should be done FAR faster, even if it costs a lot more. Link to Ballard, West Seattle AND Golden Gardens-to-Sand Point in eight years, or bust. Go big or go home.
EAST KING COUNTY	The completion timeline is extremely long. Are we planning for the needs of today to be ready in 25 years? If so, perhaps we need to reconsider our targets.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	FASTER!! This all should have been done years ago. ST should investigate ways of completing projects sooner wherever possible. While I strongly support light rail and can't wait for the Mercer Island station to open, the reality is that we can probably move more people sooner with BRT. My personal preference is for more parking at light rail - currently I work right next to the Bellevue transit center but can't take the bus because the MI park & ride fills up too early. But my preference for the region is to build out all transit lines as quickly as possible, and MAKE SURE WE SERVE LOW-INCOME COMMUNITIES when doing so.
EAST KING COUNTY	Need to improve the deadline for these projects
EAST KING COUNTY	I feel that a 25 year completion is absolutely ridiculous. In 25 years the population in Seattle and its surrounding areas will be so large that these plans will be out of date and not be able to handle the influx. I completely understand that resources are limited to whatever the cities are given, but a 25 year completion is insane and should be cut in half if possible. I would fully support higher taxes to help finish the project in half the time or less. That would be my input on the completion.
EAST KING COUNTY	I realize that those of us who live and work in Maple Valley along State Route 169 may seem like we are not a priority and that we choose to live out here but that doesn't mean we should be forgotten. We have 1 major (if you can still call it major) east/west route into and out of Maple Valley. We are told there are improvements but not widening (not that there is space) and I see no plans to increase transit options. Also for those of us who work in the South end/Pierce county area and live in Maple Valley there are little to no transit options. With this plan that will change, hopefully before I retire, but that is a ways out with extending light rail to Federal Way and Tacoma but then again no time soon (10+ years out). My concern is that Maple Valley has a population explosion going on and it seems no one really cares. My wife works in downtown Bellevue. What should be a 30 to 40 minute drive for her is 2+ hours. I work in Milton and I have a commute that is almost 2 times the distance and I get to work before her leaving after her with a 40 minute commute. This is because of the lack of viable transit options coming and going from Maple Valley to downtown, the eastside, and points south. At somepoint we have to realize that the Eastside is not just Bellevue, Redmond, Issaquah and extends further south.
EAST KING COUNTY	More and faster, please. And I'm supportive of more funding via taxes and other methods. The population is growing faster than this plan can be implemented, more and faster please. Let's keep the PNW a fantastic and un-frustrating place to live.
EAST KING COUNTY	Start as soon as possible before traffic gets too bad and people move out of the area.
EAST KING COUNTY	Issaquah is growing like crazy with no road expansions. Having the light rail planned for 25 years is insane for this growing commuter corridor. We are rarely transit users but we would if there was a rail alternative
EAST KING COUNTY	I hope this project will finish in a timely manners with honesty and no corruption. All the people in this project ,as a taxpayer ,I'll just put my trust in them.
EAST KING COUNTY	Traffic and congestion is a large issue now. It would be fantastic to see if there are any other short-term solutions that can be implemented while these projects are completed.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	The 522 part of st3 plan needs to happen! Traffic is terrible to DT!
EAST KING COUNTY	These projects are long overdue.
EAST KING COUNTY	Faster completion of the light rail please. 25 years is a long time to wait for it to be done.
EAST KING COUNTY	Imperative to arrive at an accelerated plan. Timeline is too long. Also imperative to consider high speed rail for most congested areas -- buses are just too slow.
EAST KING COUNTY	This needs to be completed quickly. Traffic is not sustainable at the current level
EAST KING COUNTY	How can you have a regional plan and no rail service between Bellevue Renton Tukwila I 405 corridor? More bus service? I'm not going to get taxed for everybody else's rail service. Renton will not see rail service in my lifetime.
EAST KING COUNTY	I hope that transits for eastside of King county become priority since there are so many industries commuting to downtown Bellevue. The focus of the transit has been in Seattle and I hope eastside gets some attention.
EAST KING COUNTY	Issaquah light rail needs to be complete sooner
EAST KING COUNTY	8-25 years?! That's ridiculous, we need mass improvements to transit asap.
EAST KING COUNTY	The project timeline should be accelerated so that all phases are complete in 10 years. I would support whatever taxes are required to make a 10 year timeline .
EAST KING COUNTY	I think the long timeline of most of these projects seems like too little too late, but we have to start somewhere.
EAST KING COUNTY	Speed up the project deliverables. By the time the actual new rail lines are opened the population will have grown beyond current projections.
EAST KING COUNTY	You are moving way too slow! 8 years to complete the earliest stages is terrible...should be 8 years for the full project!
EAST KING COUNTY	Is there any way to cut the overall timeline in half?
EAST KING COUNTY	Why does it take so long to complete light-rail segments? I think more people would support this measure if the timelines are accelerated.
EAST KING COUNTY	If I am paying \$200 per year for the projects, I would like to know that they will be completed on time. I support the additions to Sound Transit and I think they are extremely important for the Puget Sound area. The sooner everything gets completed the better. It already seems like these projects are coming along too late for the growth of the area so I hope to see them come to fruition and be completed.
EAST KING COUNTY	I'm 69 years old, so I will be dead before any of this benefits me.
EAST KING COUNTY	Why are projects primarily going to "down town" when growth will be East and South of lake Washington ie: Kent valley, Bothell/Woodenville. What about East to North Bend?
EAST KING COUNTY	I am not comfortable with the timelines. We need mass transit now. Not in Issaquah in 25 years. That is too late. we need it now. It's not the money I have an issue with, it is the timeline. Also, the Lakemont stop on light rail should not be "provisional" it should be a commitment.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Completion is too slow. 25 years? Should be done in no more than 15 years!
EAST KING COUNTY	Taxes collected vs short term benefits. Fo instant why does it take so long for BRT routs to be implemented? Your bonding now for future build out. I understand it takes time for big projects. Reduce big projects, speed up time lines.
EAST KING COUNTY	Timeline should be accelerated for east side station in redmond
EAST KING COUNTY	Your current plan is far too long at 25 years. I feel you've wasted nearly 17 years from the first plan.
EAST KING COUNTY	These seems awfully expensive for something that is going to take so long to complete. This city is growing too quickly to wait 25 years to get a transit system in place that needs to be here now. People's opinions on these issues are nice, but where is the actual math that talks about the cost vs. impact of the proposed project - you should have numbers on how much each of these proposals will reduce traffic and these should be able to account for projected growth. It appears that the state forgot to do the math on the I-405 HOV lanes; but, please tell me that someone is out there doing the math on this one.
EAST KING COUNTY	Whatever can be done to add as many mass transit options as quickly as possible should be top priority for this region. Seattle is such an amazing place to live, but the quality of life for people living here is starting to already decrease, and will continue to do so if the population keeps growing as anticipated and we don't make plans immediately to have more transportation options.
EAST KING COUNTY	Considering traffic between Bellevue and Everett, it seems like those projects should be completed more quickly.
EAST KING COUNTY	Speed it up, finish the timelinea sooner, traffic is horrible and cannot commute easily.
EAST KING COUNTY	I would love to see faster completion of services between Bothell/Lynnwood/Edmonds and downtown Seattle. As more people move to the Seattle area, this northern community is growing at an exponential rate, so this is the place to expand and put down roots now, before all available land is taken up or becomes more expensive. It would also increase revenue in downtown Seattle, especially around sports games.
EAST KING COUNTY	I just wanted to say I think this is really great! I was without a car for about six months and had to take public transit and found it kind of clunky and difficult, but these expansions should definitely make things easier and faster!
EAST KING COUNTY	Funding from tax could be reconsidered to better target groups who drive single occupancy vehicles as opposed to mass transit, as opposed to targeting the community at large with increased property tax. For example, increasing tax on gasoline, introducing automated-tolling on I-90 where at least 90% of funds go to ST3 and transportation projects, and other funding options that seek to reduce SOV. If property tax is to still be considered, a progressive increase in property tax may be better for those less advantaged.
EAST KING COUNTY	Timeline is too slow to get public support.
EAST KING COUNTY	We need this faster than 8 years. I 405 is terrible

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Completion is extremely too long. projects need a 2 to 5 year completion timeline. We need transit today. not 25 years from now. A 25 minute drive from Renton to Kirkland that becomes an hour and 10 minutes is ridiculous, a transit ride to the same point that takes well over an hour, and costs \$5 each way, is even more ridiculous, Another idiotic move, is the continual scooping up of mud slides on the Sounder train tracks and carrying back to the top of the mud slide to have it slide back down again. Get rid of the mud, build a structural wall and shore up the area, prevent, plant growth that will strengthen the terrain and prevent mudslides.
EAST KING COUNTY	FAR too slow. The region is growing roof ast for this plan...
EAST KING COUNTY	Issaquah has minimal transit connections compared to any city. It should be prioritized. If not, atleast issaquah residents should not be taxed as much as residents in rest of king county.
EAST KING COUNTY	Do everything you can to get the projects done faster. Be innovative with your processes and contracts to incentivize these projects to get completed absolutely as quickly as humanly possible. Don't bend to NIMBY nay-sayers who complain about the noise or the inconvenience of construction. Set timelines that are completely unreasonable and then tell your consultant teams to step up to the challenge. Engineers love a good challenge. Give them a challenge and see what they can do.
EAST KING COUNTY	8 years is too long, we want it now :-)
EAST KING COUNTY	Build it as fast as you can
EAST KING COUNTY	An emphasis should be made on funding this through usage taxes
EAST KING COUNTY	The "Environmental Study" on the Cross Kirkland Corridor should be removed in it's entirety as this is an imprudent option. The cost of the ST3 proposal is already exorbitant and the CKC option drives the cost up and deliverable date out unnecessarily when a more cost and time-friendly option is available along I-405. Additionally, the negative environmental and safety impacts of creating mass transit through residential and wetland areas when an existing mass transit route (I-405) already exists would be asinine.
EAST KING COUNTY	Complete it all faster.
EAST KING COUNTY	ST has proven that they can't complete transit development projects for a reasonable budget and schedule. They should work with existing budget until they can prove that they deserve more of my hard earned money. Waiting 25 years (and they will be late) is ridiculous. Most people won't live or commute here by that time. Start with something small/cheap that can be expanded if it's proven successful
EAST KING COUNTY	Why does this take SOOOOOO long? The transcontinental railroad was built in less time.
EAST KING COUNTY	Why is the timeline so long for light rail service to the fastest growing neighborhoods? 25 years to get rapid transit to Issaquah?! I think the timeline should be greatly reduced 5-10 years.
EAST KING COUNTY	I wish it was quicker for some of these majorly important improvements :(
EAST KING COUNTY	This can be definitely improved. It is taking way too long for few sections of the light rail to be online that the tax payers will not be seeing or using the benefits they paid for in due course.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	<p>The light rail expansion is already way overdue. I don't see a point in supporting something to be completed in 20 years. Either get serious and build it now, area is growing fast and congestion is increasing exponentially.</p> <p>Sounder rail is not efficient and location-wise very inconvenient, it's better to phase it out and focus on light rail to connect urban areas to employment centers.</p> <p>Seattle has once in a lifetime opportunity to do the right investment into transit and turn the city into metropolis ready for the next 30 years.</p> <p>If that doesn't happen quickly, people and companies will start leaving the arcane transport options behind and move to modern cities.</p>
EAST KING COUNTY	<p>ANYthing that relieves the north / south congestion on I-5 and 405 is a high priority !! If the I-405 floating bridge could be completed ahead of schedule and under budget, why can't these other projects ?? I am used to riding the MARTA in Atlanta at least 20 years ago --- shame on Seattle for being so far behind in transportation provisions. Thank goodness I am retired now and don't have to fight the commute, but even getting to the grocery or to doctor appointments is getting traumatizing.</p> <p>Would use bus more but almost impossible to find parking spaces at the transit centers sometimes. Need more multi-level garages !!</p> <p>Why can't some of the mega-companies in the area pay a special assessment to help with all the traffic their construction and employment has created ??</p>
EAST KING COUNTY	<p>It should be faster, if at all possible. Can you do the EIS studies, land acquisition, and project construction for all the projects concurrently, instead of one after the other?</p>
EAST KING COUNTY	<p>Focus resources on Light Rail in densest areas first, then BRT in areas with worst congestion. Parking facilities should be low priority/eliminated in favor of bike, pedestrian, and TOD. Also look into partnerships w/UberX and Lyft line and charge for parking at oversubscribed P&amp;Rs. ST should be moving people, not storing cars at great expense</p>
EAST KING COUNTY	<p>This plan is so far behind the 8-ball in terms of area needs it's almost worthless. Vancouver, Canada makes the Seattle area look pathetic in terms of mass-transit. Basically all these changes need to happen within 8-12 years. A 25 year timeline is insane.</p>
EAST KING COUNTY	<p>The light rail needs to be moved up, and needs to include projects to relieve 405 congestion.</p> <p>The marginal costs need to be reduced.</p>
EAST KING COUNTY	<p>There isn't adequate parking for ST2 coming through Bellevue. To add another layer of this to Issaquah and further out to Redmond seems a poor use of funds when you need to manage capacity for BRT and light rail capacity to feed what you are building first. Do one well and then ask for money to continue.</p>
EAST KING COUNTY	<p>As soon as possible, especially considering our region's annual population growth rate at 30,000!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	If possible, these timelines should be decreased in regard to number of years allowing for utilization of rails and buses sooner.
EAST KING COUNTY	If Redmond had a ST light rail to Seattle there are many occasions I could leave my car.
EAST KING COUNTY	Only issue is the need to SPEED UP the whole process- 25 years too long a timeline!!
EAST KING COUNTY	Was in favor if most of plan until I saw cist and timeline. Just the fact that they say it will take 8 years to simply add express buses is ridiculous, and creates total lack if faith in STS ability to plan and manage this work
EAST KING COUNTY	Projects should be funded to be built simultaneously. The time period to build all of this is way too long. This region is already years behind due to the failure of the Forward Thrust ballot in the 70s. As a result delaying services coming on-line only means they cost more in the future. The more areas getting serviced the quicker the more likely people are to support it because they can see a tangible personal benefit. As a region very few people have benefited from the first light rail line. Due to its immediate popularity and impact, one can see how important it may have been to include UW and Captiol Hill for instance in the opening of the first line.
EAST KING COUNTY	If there's a way to complete any of this more quickly, especially as it affects the Eastside of Lake Washington, I would support those changes.
EAST KING COUNTY	I propose to have the light rail to Issaquah be established in 8 or 12 years. Issaquah is evolving at a fast rate due to a desired natural environment for families, workforce and close proximity to the I-90, Seattle, Bellevue and Redmond. Further, the neighboring communities of Sammamish, Fall City, Snoqualmie, North Bend, and Duvall will benefit greatly by having a light rail posted in Issaquah, due to the increase of population and the distance of these places to Seattle/Tacoma. A light rail in Issaquah would resolve the traffic congestion that is building up between Issaquah and Seattle, Bellevue and to Tacoma. I forsee, the neighboring communities of Issaquah utilizing the light rail on a frequent basis be it for work or pleasure to Seattle/Tacoma in order to avoid traffic between Issaquah and Seattle/Tacoma.
EAST KING COUNTY	The completion timeline that you're proposing is too long a time horizon. It's difficult to get behind a plan that won't be completed for over two decades. Understanding that this is a large project (understatement), how can we capitalize quicker wins that will have immediate impacts on traffic. E.g., Light rail to bellevue from Seattle to reduce east/west bridge traffic.
EAST KING COUNTY	Ridiculous you want to tax us for a project that for me would be useless for another 25 years.. hell no. You want those persons that live in the suburbs to pay for transit that they don't use?! really? I will pay taxes on the portions that affect me.. Issaquah, Bellevue, Redmond.. but, you cannot expect me to pay for transit in Tacoma or Lynnwood when I am never there and would never use that transit service.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	<p>I and my wife think the time line is WAY too long!! 8 years to just add express bus service! Too long! 12 years to build Light Rail to Redmond &amp; Federal Way!! Too long!! 17 years to add it to West Seattle &amp; Tacoma?? Too long!! And 22-25 years to add the last pieces?? Way too long!! If this plan is followed, you better get the Washington Legislature &amp; Seattle City Council to pass moratoriums against people moving to the Puget Sound area!!! 140,000 people came just recently, the area is strangled with grid lock NOW!! You need to convince people that this needs to be started immediately!! And finished a decade sooner!!</p> <p>In a related situation, my wife &amp; I live in South Renton, straight east from the Tukwila Sounder/Amtrak Station. I just retired from Boeing &amp; we wanted to go see an art exhibit at a museum near the downtown Tacoma Sounder Station. We wanted to go after the weekday morning rush, spend the day, have lunch in T-town &amp; return before the worst of the afternoon rush hit. There was NO way to do this!! There were NO Sounder Trains to take in those time frames! It floored us! We didn't just have to adjust our leave &amp; return times to match the Sounder schedule - there were NO trains at those times at all!! We were dumbfounded! Why is THAT? - [initials], Renton, WA</p>
EAST KING COUNTY	This should have been started 20 years ago. Speed it up.
EAST KING COUNTY	Do projects sooner. Like now.
EAST KING COUNTY	Sooner would be better than later - The greater Seattle area is long overdue for some serious investment in non-car based public transportation, building a solid solution would help cement Seattle's reputation among other enlightened global centers.
EAST KING COUNTY	<p>The lines to Ballard and West Seattle should be of utmost priority - this comes from a suburbanite. It would be an understatement to say that the timeline is extremely discouraging. Everett and Tacoma are currently served by Sounder commuter rail and the existing road traffic to Everett and Tacoma are encouraging workers to live closer to their jobs. While the Ballard and West Seattle underground rail lines are being dug, Sounder service must become hourly and run on weekends - this will be sufficient for workers trying to access downtown Seattle without a car if properly operated. Sound Transit should operate Sounder train at more hours, even if it means laying more track on the cheap, flat land adjacent to BNSF. Focus on underground rail for Seattle as soon as humanly possible (by year 2025), then work outwards.</p>
EAST KING COUNTY	should be completed faster
EAST KING COUNTY	<p>We need BRT on 522 NOW! not in 8 years. Also on I-405. NE King/South Snohomish counties are woefully underserved in previous and current ST planning. The tax should be an income tax or property tax. It should NOT be a sales tax increase because it's too regressive and poorer people who rely most on public transportation would pay a higher percentage of their income if they have to pay a higher sales tax rate on everyday necessities that they buy.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	<p>Would be nice to see West Seattle and/or Redmond timelines brought in by a few years each. If we had light rail or subway systems I would use nearly everyday. I do not like the bus system that has to sit in traffic.</p>
EAST KING COUNTY	<p>I don't think we can wait another 12-25yrs for light rail on the eastside, and my experience is that traffic is typically worse here than it is in some of the southern corridors that you plan to upgrade first. Another solution will be needed to solve the traffic problems that will exist before this system exists. Any long-term plan should include details on what the expected commute times will look like by the time this finishes, and will need to include additional transit needs in these corridors before the completion of the projects.</p>
EAST KING COUNTY	<p>Light rail to Bellevue and Issaquah should have a higher priority and not segmented for the end of the proposed plan timeline. The value and resulting income drivers for completing and east side light rail link would far out way other proposed transit projects.</p>
EAST KING COUNTY	<p>The timelines are quite long. During that time both demographics and technology will change substantially. For instance, the plan needs to anticipate the possibility of autonomous vehicle (AV) technology and how that will impact both demand for usage and capacity requirements. With AV technology, the general capacity of existing infrastructure can be used in a dramatically more efficient way, so simply increasing mass transit capacity based on current utilization patterns would prove wasteful. In other words, build flexibility in the plan - not all contingencies can be foreseen, but some possibilities are already clear; don't create a plan that over-commits and thereby ensures its own obsolescence 3 or 5 years into the future. Some ideas for doing that - have regular monitoring/measurement of commuting patterns and tie funding, scope, prioritization, and timelines to those metrics, build in financing phases for the plan so projects can be completed in components that will be partially operational and give the public the opportunity to authorize or adjust funding for continuing to additional phases, have routine technological reviews (perhaps every 2-3 years) to determine if there are more efficient methods of accommodating whatever requirements are specified in the plan. It's harder to create a plan like this, but it's chances of being successful in meeting the needs of the region more than justify the effort required to create it. On the other hand, it is outright foolishness to make a simple plan that virtually guarantees failure. The region is dynamic, it's needs change, and the various strategies for meeting those needs continue evolving; 25 years is a long time, create something robust with enough flexibility to make adjustments and ensure the ultimate success of the project.</p>
EAST KING COUNTY	<p>Light Rail in Eastside should be the highest priority.</p>
EAST KING COUNTY	<p>Traffic on 405 is so bad. Plans that get more people close to massive employment centers (like near Overlake in Redmond or downtown Bellevue) from northern commuter towns should be bumped up sooner. If the routes don't get people close to where they need to be, they won't get used as much as they could. Please consider where the stops are when making the I405 bus routes and please try to speed up their implementation!</p>
EAST KING COUNTY	<p>Sooner is better than later. If the timeline can be moved up please do so. Tough to choose the two most important as there are many critical projects equally deserving.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	We need the highest-priority light rail extensions much faster. And the 405 corridor RT also ASAP. If 25 years is the best we can get, sure I'll vote for it but IMO we should do it all a lot sooner. So I live on the Eastside and I figure this area will bear a lot of the brunt of increased taxation--I don't care; it justifies our existence. But better give us light rail to downtown Redmond a lot sooner--we were initially supposed to get it in the early 2020s, we pushed to get light rail across the new 520 bridge, and we aren't going to stop pushing. (We are not Kirkland.) We have a lot of young people, a lot of jobs and a lot of traffic and we need a way to move people between Redmond and other centers of density. Many people who work here can't afford to live here, and we all need these improvements.
EAST KING COUNTY	FASTER. :)
EAST KING COUNTY	I would gladly pay higher tax rates to get ALL the projects done sooner! We need this now, not 25 years from now!
EAST KING COUNTY	I would like to see increased taxes to move up completion dates.
EAST KING COUNTY	We have a major traffic congestion issue and not enough road for everyone. The traffic drive times are horrendous. But yet no one wants to pay more taxes to fix this major issue and I don't know why. I say tax us - and get it done ASAP! Not in 8 years, finishing in 25. We will shoot ourselves or each other from road rage way before then.
EAST KING COUNTY	This timeline is completely unacceptable. With just modest increases in the revenue plan via taxation, we could accomplish all of these items in less than half the time, and could provide employment to hundreds of skilled workers. Any modern city requires a full and operational mass transit system to be effective. Seattle has become a hub of trade, technology, business and recreation. These improvements need to ALL be made within 8 years, not 22.
EAST KING COUNTY	Way too long for the projects to be completed. With the exponential growth of Seattle and surrounding areas... timelines need to be accelerated.
EAST KING COUNTY	imho if the proposals for BRT are as far out as you propose, and they are on mature corridors such as 522, then it seems as if a rail alternative would be superior. If you can't produce BRT on 522 in three years, and it might take eight, then it makes a lot more sense to beef up existing ST522 service in preparation for LRT extension.
EAST KING COUNTY	I would like to see all of these projects completed in 10 years. I would be willing to pay quite a bit more in taxes in order to accomplish that goal. I would also like to see a plan to expand rail to the east side of the mountains to Spokane.
EAST KING COUNTY	I feel that the projected years are too long. If it takes 7+ years to implement some new busses or rails then the traffic will be horrible by then, and the commuters will suffer a lot. I was expecting these kind of projects to complete way sooner.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	<p>Beware. Rants follow.</p> <p>We already have a state Department of Transportation. "Sound Transit" is ... what? There's Metro, Pierce Transit, Community Transit, etc.</p> <p>Enough of the piecemeal organizations. Let one entity rule. Like the interstates. And then get it done. 25 years is nuts.</p> <p>Why is the existing rail corridor space between Renton and Bellevue not being utilized for mass transit? It already exists! Well, most of it still does.</p>
EAST KING COUNTY	<p>Projects sound great, but not having the ones I might use (the east side BRT and light rail to Issaquah) done for more than 20 years seems pretty lame. What's the use in funding a project with such a distant horizon? The region will probably look different in 25 years, so committing to a project that will take that long to complete, rather than one that could be done in 5-10 years, and then another project started that has adjusted to needs, does not seem wise.</p>
EAST KING COUNTY	<p>In 25 years I will probably be dead. I would like to see the timeline for Light Rail to Everett be moved up so that it can be completed sooner.</p>
EAST KING COUNTY	<p>Since folks commuting along the I405 corridor between Bellevue and Lynnwood are either already paying tolls or being impacted by the consequences of instituting those tolls, the improvements to this corridor should be given priority, particularly since there are no plans to extend light-rail to this area.</p>
EAST KING COUNTY	<p>When prioritizing light rail projects, it would be a better use of our tax dollars to make sure light rail projects that serve densely populated areas, such as Ballard are done before considering projects that serve less densely populated areas, such as Issaquah. It would also be beneficial to consider additional projects that better serve Lake City, Wallingford, and the Central District</p>
EAST KING COUNTY	<p>Why light rail to Ballard in 22 years? Seattle residents will be footing the bill just as much (if not more, given property values in the city) as everyone and see little to no benefit for 2 decades. Very disappointing.</p>
EAST KING COUNTY	<p>Light rail connections must be completed sooner.</p>
EAST KING COUNTY	<p>We need more bus service on I-405 NOW</p>
EAST KING COUNTY	<p>Regional mass transit option needs to be improved at soon as possible! Anything that would help alleviate I-405 northbound traffic from south King county in Renton to Bellevue would be extremely helpful.</p>
EAST KING COUNTY	<p>Build from the inside out and faster! Lessen city traffic by helping people move from the burbs into Seattle. Start with getting people from communities north and south of Seattle into Seattle faster, and those already in Seattle move around Seattle better, then work on getting those from Everett and Tacoma to the fringes where they can transfer.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Whew. That does sound expensive, but improving public transportation in this increasingly urban region is critical, and already feels too late.
EAST KING COUNTY	I'd love to see things come online sooner!
EAST KING COUNTY	22 yrs to improve access from downtown to Ballard is remarkably slow.
EAST KING COUNTY	We need more Light Rail faster!
EAST KING COUNTY	Completion of the projects in as much as 25 years is way too much time to take - figure out a way to make it happen in closer to ten years.
EAST KING COUNTY	Your plan takes to long and costs to much. I will not support it with my vote as it is.
EAST KING COUNTY	This seems nowhere near aggressive enough to me.
EAST KING COUNTY	It's too bad it will take so long -- it would be nice to see improvements in the next few years.
EAST KING COUNTY	Way too expensive. Dream on.
EAST KING COUNTY	East side currently has packed buses daily due to commuters. Eastside light rail should be sooner than 25 years. The demand will be so great by than that it may need more than a light rail
EAST KING COUNTY	I am totally against this project because first it is open ended and could go for ever and I am a senior on fixed income and can't afford the taxes that it will generate.
EAST KING COUNTY	considering the growth of the Snoqualmie Ridge area in addition to the ridiculous amount of building going on in Sammamish/Issaquah, it is discouraging to see that it would take freaking 25 years for the light rail to get just to Issaquah. I understand these things cost money and infrastructure, etc but I think you need to reevaluate the amount of time some of these projects will take to be completed. and once again, seattle fails to have the foresight to handle this problem in advance and is now playing catch up.
EAST KING COUNTY	Too little, too late. We need all of this infrastructure immediately - 25 years ago people in Seattle didn't know Issaquah existed, and look how much it has grown and changed in that time. As a region, we can't wait another 25 years to get light rail extended to Issaquah and other suburbs of commuters, and for transit-centered development. There simply are not options right now that are fast enough and reliable enough to get people out of cars and onto mass transit. And, no, tolling does not help if there are not alternatives they can count on that get them where they need to be.
EAST KING COUNTY	By the time Light Rail gets to Issaquah, I will be 100 years old. That is totally unacceptable. When was the last time you tried to get from Issaquah and points east to Seattle from 7 AM to 10 AM or the reverse from 3 PM to 7 PM? An hour or more for 20 miles of driving is ridiculous. This should have been done 30 years ago like they did in Portland, OR. SHAME ON YOU!!!
EAST KING COUNTY	My biggest reservation of the plan is that the build out of the light rail is taking too long and build schedule needs to be accelerated.
EAST KING COUNTY	the faster the better :)
EAST KING COUNTY	Please include high capacity transit on the CKC Trail!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	The improvements are badly needed, but the timeline is way to long and the cost very high for the average person. Recommend laws proposed to legislator to change the way these projects are funded.
EAST KING COUNTY	I think that mass transit projects would also gain more support if we could complete them more quickly. Barring sacrificing quality or safety, speed is the best tool for marketing to those on the fence; Both speed of service and speed of completing new services. The biggest arguments I get back from people when I talk about supporting mass transit improvements are the expense and that the benefits are too far in the future. The expense isn't that much but only you guys can accelerate the timeline to give us these services sooner. Light rail to Issaquah in 25 years is an incredibly difficult sell.
EAST KING COUNTY	I believe that simply adding more buses and bus routes is the first priority - as much as can be done without sacrificing the completion of long-term infrastructure goals. Cuts to buses impact the middle and lower class most dramatically, and while rails are nice, they do not serve the people forced to live far outside city limits. Buses seem to be the most impactful way to ensure everyone can participate in Seattle's thriving economy.
EAST KING COUNTY	The timelines are too long. In 5 years self-driving cars or better technology for telecommuting might make capital improvements superfluous.
EAST KING COUNTY	Does nothing for 98058
EAST KING COUNTY	I think light rail via link to the eastside is extremely vital. Even getting one spur from Seattle to Bellevue would help with bridge traffic immensely. If there were any way to move that forward, I would support that 110%. Also, commuter parking at light rail stations should be a bigger deal. I know the grand scheme is to get people to use buses to funnel into the stations, but that isn't convenient. Convenience trumps so many concerns for busy commuters. When I plan my commute if I know I will be transferring from bus to link (or link to bus) I automatically add 30 minutes to my time estimate. You simply cannot assume traffic on surface streets will be ok, and that buses will be running on time. The train is pretty much spot on, but I have always had trouble with buses due to traffic.
EAST KING COUNTY	25 years for completing light rail all the way to Everett is ridiculous. I used to live in Denver and they have been doing a major light rail expansion since 2001 and it is nearly complete even though thrh added jus as much or more mlles of new rail compared to this plan. We need to move faster on this in order to keep up with the population growth.  Also, light rail should really be included between Ash Way and UW Bothell. This stretch of 405 is always high-traffic during rush hour. To leave this section of the metro area out of light rail expansion seems like a bad idea.
EAST KING COUNTY	timeline is too long
EAST KING COUNTY	Taking far too long across the board. Have to find more money (local or Federal) to speed things up or select the most vital and move them faster
EAST KING COUNTY	Ballard should be prioritized in the plan--it's a growing population center and creates a lot of congestion. Tacoma-Seattle should also be a top priority.
EAST KING COUNTY	I'd simply like the plans to be accelerated.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	I applaud the Rapid Transit community effort to attempt to bring the greater Seattle/Tacoma/Everett region into a environmentally efficient time and further stimulating innovation and employment throughout the region and state. I would further wish to point out that: 1) Considering the significant amount of heavy traffic on I-90, extending the light rail line along the I-90 corridor should be extended with additional stations at Snoqualmie/I-90/Hwy 18 intersection and to a North Bend station. 2) The 25 year completion timelines for the Everett and Issaquah connections should be shortened to 12 to 15 years because the traffic currently is close to becoming gridlocked. Timeline projections do not appear to take into account that current region timelines are not considering increasing traffic due to increased residential and commercial building in those outer destination areas exacerbating the occurrences of accidents, lost time, stress, and air/water pollution. 3) Significant increase to achieve really rapid Rapid Transit is critical to effectively feeding A) light rail, B) Sounder Rail, and C) ST Express Bus routes. I have experienced catching a 4:20AM south bound bus from central Lake City to wait for an hour to take a 5:45 bus from the University District across the SR520 Bridge to the Bellevue Transit Center only to have to walk from the BTC at 6:00AM ( the time I was suppose to be at work) to NE 12th Street and 120th Avenue NE in Bellevue where I worked. Definitely NOT rapid transit. How much time to people have to wait with parcels, work, and children at stops and transit centers?
EAST KING COUNTY	go faster; we need it; find a way to serve Kirkland's residents more, not just move transit through the city of Kirkland
EAST KING COUNTY	With the serious traffic problems in the Puget Sound and the low commuter participation it seems ridiculous that any improvement is at least 8 years away. I live in Bothell and we seem to be the least serviced city in the region, but are still expected to pay the same as those who live along multiple bus routes and close to light rail.
EAST KING COUNTY	Too slow, too late, not on main traffic routes. Busses will not fix the traffic and will cause additional issues if shoulder pass would be considered.
EAST KING COUNTY	I think 25 years to get light rail to Everett is excessive. It should be brought to Everett by 2033.
EAST KING COUNTY	We need to find ways to complete the projects sooner than the proposed schedule. Projects also need to be prioritized based on those that benefit the most riders and would have the best payoff.  Ballard-UW should also be strongly considered as it would serve a critical need in Seattle for a very high traffic corridor.
EAST KING COUNTY	We need to go faster! Isaiah can't wait 25 years for rail service. Get it done in 15.
EAST KING COUNTY	I have noticed since opening light rail in UW district that this service eliviates congestion on many nearby roads. Any significant improvement again will have the same effect. I personally live in Kirkland and know the daily congestion on my neighborhood roads due to the 405 traffic. I strongly support any improvement to expedite bike/bus options between kirkland and the UW district to support my daily commuter.
EAST KING COUNTY	This all needs to happen much faster. All projects should be complete in 5 years

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	The plans takes WAY TOO LONG to even begin on getting the greater Seattle-Tacoma-Everett area under reasonable public transportation. The cost vs. the timeline (HOW MANY YEARS?) is ridiculous. Get twice as much done for the same price and then we have something to talk about. \$200 per person per year for buses that won't even come on line for 8 years or more? Get real.
EAST KING COUNTY	Accelerate time line
EAST KING COUNTY	Do all this, just faster!
EAST KING COUNTY	I would love to see improvement serving Issaquah undertaken and completed earlier than the proposed timeline.
EAST KING COUNTY	I would pay more taxes for more extensive / faster timelines for light rail service to the Eastside, specifically Redmond.
EAST KING COUNTY	The critical need to move people more efficiently throughout Puget Sound cannot wait 25 or more years. It is time to fund these projects radically. I dislike continuously paying more for a poorly run school district, constantly asking for more money. I will gladly pay more to get a public transportation system we should have built decades ago. The opportunities and lifestyle that attracts so many to this area is in serious jeopardy.
EAST KING COUNTY	We need this sooner! This timeline is WAY too drawn out! We need this thirty years ago! Please act faster. And don't let the haters stop you! You transit folks are doing meaningful work to serve and improve your communities. Thank you!
EAST KING COUNTY	Your timeline is ridiculous. The entire system of roads will be a continuous jam if you do not speed it up. Tax or charge riders more for service. Implement more tolls. Do something now.
EAST KING COUNTY	Wish this could all be completed sooner
EAST KING COUNTY	8-25 years!! That's an absolute joke to ask for \$50b and come back with these outlandish timelines.
EAST KING COUNTY	Light rail to Everett by 2041 is too long. Light rail expansion in city of Seattle is important, especially to garner support to pass ST#, however, the initial ballot in 1996 promised light rail to Everett and now it will not be completed until 45 years later. Most of the 18 year olds that voted for the first time in their lives in 1996 will have had careers and commuted from Snohomish county their entire career without the promised light rail and will have retired by the completion. Speed up the timeline!
EAST KING COUNTY	given the population growth. . IF adding more tax would shorten the timing for the completion of the projects. .. It's likely everyone who lives here is aware that we spend too much wasted time in our cars right now. . and taxing something over \$200/year - perhaps to \$300/yr (?). IF it reduces the time needed to complete the projects (and certainly everyone will be in favor of FASTER) - is something to consider - maybe that question should be added to this survey/the meetings - you may be surprised at people's willingness to pay to save time. .

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	The timelines seem excessively long. While I support the need for much better transportation solutions and have experienced first-hand how well it works in other major cities, I also get a bit disappointed to have to be paying for projects, some of which may not be finished in my lifetime. Yes, these are big projects but with the right resources, I feel highly confident they could be completed in much less than the current 25 year timeline which of course will more likely be 30 or more due to unexpected issues including lawsuits to try and stop/change the plan. In truth, I'd probably be willing to pay a little more in taxes if the timeline could be brought down to 15 years or less.
EAST KING COUNTY	Issaquah light rail should be more of a priority on plan
EAST KING COUNTY	Light rail completion North of Seattle needs to happen much faster than 25 years!
EAST KING COUNTY	The sooner the better
EAST KING COUNTY	12, 17 ... 25 years??? This should have been done already. Why no light rail along 405 from Renton to Bellevue to Everett? Parking fills up by 6a.m. If there's no parking then I have to add 2 - 2.5 hours per day to my commute, if I have to start from home instead of transit park n ride. Need parking and light rail along 405 corridor NOW not 25 YEARS down the road.
EAST KING COUNTY	With every day that passes, our planet is suffering and dying. It is up to us to be proactive and progressive to save her! \$200 a year is cheaper than having to move to Kansas since that will be the only place thats not under water.
EAST KING COUNTY	Stretching light rail to the east side should be of paramount importance. The population growth in these areas has been overwhelming. I currently have no good option to get from Sammamish to Renton via transit.
EAST KING COUNTY	Early project should include improvements to 522/145th, including parking. We are Snohomish County residents, but it's easier to get to 522 and then to light rail.
EAST KING COUNTY	Not sure I understand why it takes so long as well as why 522 does not take priority, have you seen 522, its absolutely ridiculous!!!
EAST KING COUNTY	I live in Issaquah and commute to Seattle. It would be great if I could see some benefit before 25 years from now. Can the plan include an express lane for buses from Issaquah toward Seattle? Thanks for working on this.
EAST KING COUNTY	I only somewhat support the proposed timeline because it is slated to take too darn long! Gotta modify the plan and get a move on.
EAST KING COUNTY	If this project is so important, which I think it is , then more effort should be made to complete it more quickly.
EAST KING COUNTY	do the math. you could provide uber for every single commuter for less cost than ST3. unconscionable burden on our families and future generations.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	<p>Frankly I am old enough that I may not see the benefit of any of this. The timelines are disappointingly distant. I particularly don't understand why some rapid bus transit would take so long. I presume there are decent reasons.</p> <p>Also, regarding the urgency questions in the previous sections I selected very urgent for everything, which isn't very realistic I know. The other option was to select very urgent for the 4 segments I have some personal knowledge about and select don't know for the rest. But I wanted to make it clear that I think all of this is extremely important an long past overdue!!!</p>
EAST KING COUNTY	Not fast enough. Would pay more to complete sooner.
EAST KING COUNTY	Light rail from Lynnwood to Everett should happen sooner than 25 years out.
EAST KING COUNTY	It would be great to be able to compress the timelines. There must be ways of doing it faster as the problems it aims to solve are immediate.
EAST KING COUNTY	I would strongly support a more aggressive plan with more funding to complete projects sooner.
EAST KING COUNTY	Need to get projects completed more quickly in order to keep support of transit supporters, especially those outside of Seattle who do not yet have service.
EAST KING COUNTY	As a naïve person, I'm surprised some projects will take so long. I hope ST gives the projects that can be completed on a relative short timeline (such as BRT on I-405 and existing station improvements such as more parking or improved access) the highest priority when it allocates resources.
EAST KING COUNTY	The project should be expedited. 25 years is too slow. the growth that will take place in 25 years will eclipse the capacity of this plan to resolve our current traffic problems.
EAST KING COUNTY	Faster
EAST KING COUNTY	<p>First of all, thank you for asking the public for their opinions of the plans.</p> <p>I am a strong support of using rail transit in our area and am willing to help in anyway I can to make it happen.</p> <p>The one major piece I see missing from the ST3 plan is rail on the Eastside. There is an existing rail line for most of the distance between Woodinville and Tukwila. Why can't we fix that rail and put a train on it? It could be done much faster that the excessive time frame of the proposed ST3 project.</p> <p>Granted there is some places where only one line can exist, but you can schedule trains to use spurs in the wider area for passing. Please add this to the plan as it could be done in 2+ years.</p>
EAST KING COUNTY	The SR522 and I405 corridors urgently need relief from congestion. Please expedite solutions for these areas, such as BRT, improved bus lanes on 522, and more parking capacity in Kenmore, lake forest park, Kirkland and Bothell.
EAST KING COUNTY	I would like to see access for Redmond Light Rail to move faster, 12 years is too long

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	This timeline is simply not fast enough. The level of congestion is going to far exceed reasonable road, highway, rail, and bus capacity well before the 25 yr mark. I believe these projects should be completed within 17 years at the longest. It also seems obvious that rail transit should be extended to Olympia within 25 years.
EAST KING COUNTY	I would like to see the BRT from Woodinville to 145th/I-5 happen sooner in the plan to reduce the gridlock getting around the north end of the lake during commute hours.
EAST KING COUNTY	the basis for these plans will probably change in 10 years, so it will mean a modification of said plans. 10 to 20 years is far too long.
EAST KING COUNTY	SLU was built on the premise that there would be great transport to the area. East side is poorly connected to SLU as a consequence a bulk of the traffic is driven by single occupancy cars. Can we please prioritize Rail service across the lake from overlake to Seattle? Also parking spots in Redmond Transit center are used and abused by local business. Regular riders dont find any parking in the area. I believe addressing this transport route would reduce carbon emissions by a lot!
EAST KING COUNTY	Please accelerate plans to come to Redmond
EAST KING COUNTY	Sound Transit should be ashamed of the money they have wasted and missed timelines. Based on how the projects have been managed thus far, no additional funding should be authorized until a full accounting of existing projects have been fully disclosed to taxpayer and new plans prepared that do not require additional taxes!
EAST KING COUNTY	It is ridiculous that it will take this long to complete all of this and at such a high cost to taxpayers.
EAST KING COUNTY	I would much, much rather have a higher spend now (eg. \$400 per year per adult in Puget Sound) to fast forward ST3. It's pretty miserable getting around the region now, let's see real alternatives ASAP. The long-term vision is important, but I'd rather see the BRT projects happening in 4 rather than 8 years, for example.
EAST KING COUNTY	What can you do to shorten the execution times? 25 years is too much
EAST KING COUNTY	Please review Portland and other projects of similar scale for examples of how to get light rail built faster.
EAST KING COUNTY	This plan take way too long to implement and is way too expensive. The project are all over the place. Cut the plan down to something that is affordable and doable within a 5-10 period. Think about putting better bus service, commuter rail or light rail where it is really needed to alleviate traffic. Don't waste money on a planning studies.
EAST KING COUNTY	Light Rail to Everett needs to be sooner!
EAST KING COUNTY	We can't wait 25 years!
EAST KING COUNTY	All projects should be completed within 10 years. It's ridiculous that it should take 22 years to complete a project.
EAST KING COUNTY	I would strongly support all projects if they had a shorter timeline. Expecting people to support a project that they may not ever see the benefits from is ridiculous. Having lived in other urban areas, the timeline to complete transit projects here is utterly ridiculous. As is the lack of public transportation.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Sound Transit is incompetent and duplicates Metro. Sound Transit is yet to deliver any projects on time or on budget. This area needs more roads and freeway lanes desperately, not expensive train projects. For Sound Transit to ask for more funding from TAXES ON OUR HOMES AND CARS is truly arrogant and beyond what most people in this area can afford! LIGHT RAIL IS NOT A "SETTLED ISSUE" as the self indulged CEO of Sound Transit has stated...(oh by the way YOU WORK FOR US!!)
EAST KING COUNTY	Why do these projects cost so much and take so long? Laying road and rails has been something we have been doing since we had slaves.. WE ARE WAY Better at it now. Why do skyscrapers go up so quickly? Those things are works of art. This seems so trivial to me...please get to work and do it faster.
EAST KING COUNTY	I'd love to see some sort of opportunity to build some of this sooner if current projects are able to be finished under budget and/or the community sees the need and requests a move-up in timeline.
EAST KING COUNTY	I would pay more in taxes to get the full plan built and implemented sooner.
EAST KING COUNTY	Priority for Issaquah to Bellevue and the Bellevue to Redmond lines. These neighborhoods are parking lots during commute hours. Voters living in or commuting thru traveling these corridors could use relief.
EAST KING COUNTY	find a way to do it sooner! Such explosive growth is not sustainable with our current highways & we dont' want more highways! Esp the I-90 & I-405 corridors... make it happen faster!
EAST KING COUNTY	The timelines were shockingly long...I get it, these are big projects. Also didn't feel like ANY item on the list was a big "ahhhhhh" of traffic relief.
EAST KING COUNTY	ALL of your Projects need to BE COMPLETED WAY AHEAD of your Schedule !! I'll be DEAD by your Timelines !!
EAST KING COUNTY	Let's do this faster!
EAST KING COUNTY	I support being realistic.
EAST KING COUNTY	Focus on light rail. I have been in cities with both and the bus always loses and eventually gets cut back
EAST KING COUNTY	A few years ago, I would have strongly supported doing it in less time. However, I now have a better understanding of how difficult it is to do something like this. So, I say, it is a good plan; let's get to it.
EAST KING COUNTY	We need to complete these projects as quickly as possible. I can afford to pay much more than the proposed annual cost per person. Tax me! Tax lots of other well paid people in this area. We need to provide efficient public transportation and we need to greatly reduce carbon emissions by all of our individual automobiles. Jeanne Large, Kirkland, WA
EAST KING COUNTY	yikes - what a long wait!
EAST KING COUNTY	I strongly support a much faster timeline. 12 years, 17 years and 25 years and 22 years are all far too long for these very needed transportation improvements! Please help us become less car dependent faster then this. Thank you!
EAST KING COUNTY	The current plan puts Ballard & West Seattle over a decade out, I completely support the plan, but the timeline seems too long to effectively help the region. Are there ways to bring in the timeline, or shift projects around to get high impact benefits sooner than later?
EAST KING COUNTY	Priority should be placed on completing light rail first. Buses using existing roads are unlikely to improve traffic.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Accelerate at higher cost, raise taxes as necessary. Build for the future, not for this moment. In 25 years what you are delivering here will be insufficient.
EAST KING COUNTY	Need light rail in Kirkland
EAST KING COUNTY	<p>Link lite rail should be the major initial focus all around! This would minimize the number of vehicle on roads (which is already heavily used and congested), then buses come next (which will take up more lane space on roads, but it will minimize the total number of vehicles on the road), and the sounder train expansions should have the least urgency/priority.</p> <p>As for Link Lite Rail timelines: expanding east-bound (Connecting Bellevue to both Redmond and Issaquah) should come first... then the main lines that would connect Seattle to both Tacoma and Everett should come next... finally, the smaller expansion-branches should be added last. Link Lite Rail is a marvelous mode of transportation, and although some parts of the city use it, there is so much more of the Seattle metro area that desire to use it to get around, but it just isn't convenient/close to them yet. Please expedite this process as soon as possible.</p>
EAST KING COUNTY	These rinelines are too far in the future to be helpful. We currently face crushing traffic on our highways and overcrowded buses. How can we alleviate this in the near term?
EAST KING COUNTY	Ballard and West Seattle extensions offer the best opportunity for accommodating population growth (via transit-oriented development) without adding to traffic congestion. Those extensions should therefore be built as quickly as feasible, which means that planning and design should begin immediately upon passage of the measure, so that construction can start the very moment that funds become available.
EAST KING COUNTY	Too slow. Issaquah is already in complete gridlock due to overbuilding and reliance on individual automobiles. Seattle traffic is a nightmare. No safe routes for bicycles. Inadequate public transit. This area is suffocating in its own fumes.
EAST KING COUNTY	I don't really know how feasible it is to "plan" for something 25 years out. Given the current state of transit overall seems to be the result of Planning With Blinders and reluctance to admit this entire area is bursting at its asphalt seams. Make sure you've got more people involved in any planning who are actually from areas that strongly believe in mass transit or else we'll just keep ending up with messes like 405 and the I-5 corridor around Seattle.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	<p>This plan is a joke. I am extremely supportive of light rail, but am not going to vote for more buses that have to fight for road space, and a piecemeal light rail system that I will be long dead before it ever comes on line...if it ever does.</p> <p>The Puget Sound Region needs a shovel ready light rail system that is similar to the Bay Area's BART system...which they have had running now for 45 years.</p> <p>Companies like Boeing, Microsoft, Starbucks, Amazon, Costco, and so on need to pay the lions share of the cost, because it is their employees and the little people that support them that are clogging our roads.</p> <p>I am in the Issaquah area, and we need light rail BEFORE they build more stack and pack housing...not after. This is all totally backwards, and plain stupid.</p> <p>Many of us have been waiting and paying RTA taxes and supportive of something since the late 1980's, but all you guys are saying is wait some more....25 or 40 years more. Yes, you have put some fast buses in, but many are in exactly in the spots that light rail stations could have and should have already gone...like Eastgate for example.</p> <p>I will not vote for this, or anything else you come up with again, until you present us with a complete shovel ready system. And a system that is NOT the most expensive per foot known to man....bet you can't do that either.</p>
EAST KING COUNTY	8 years for BRT seems awfully long.
EAST KING COUNTY	<p>Projects should be completed much faster. This 25 year plan is really 20 years late.</p> <p>Also, there needs to be parking at more light rail stations.</p>
EAST KING COUNTY	The timeline is unacceptably long, and I don't agree with increasing taxes on middle and low income families to pay for it. End the tax breaks for big businesses so that we can pay for these expansions without burdening the middle class, and use the additional funding to speed up development so that they are all 100% complete within 8 years. We cannot afford to wait up to 25 years.
EAST KING COUNTY	Every effort should be made to increase public transportation options as quickly as possible--especially connecting to the airport. Lack of investment in our infrastructure today will limit economic growth in the future.
EAST KING COUNTY	Having a light rail from Seattle the the eastside would be invaluable as soon as possible!
EAST KING COUNTY	It might costs more, but is it unrealistic to work on say, light rail in Everett, (for example) immediatly, and implement connecting of smaller systems to the larger grid at a late date? If it requires more help to do that, it would employee a lot of citizens.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Seems if you want to build a house a takes very little time but roads and infrastructure ...desperately needed take longer! I cannot believe how at Eastgate there is such a long winded way to get onto the I 90. Why can a BC college not have direct access to get students into and out of college faster. Major employers like Microsoft and Boeing are also close by causing traffic jams constantly...especially early and late peak times.
EAST KING COUNTY	Please bump up priority for light rail service to Bellevue/Eastgate/Bellevue College
EAST KING COUNTY	The timelines are too far out. The area needed light rail, etc. Yesterday!
EAST KING COUNTY	Need to shorten timeline. Eliminate bureaucracy and get thing moving. Do not let politicians micromanage the process. Fair & open bidding on the construction including holding contractors NOT taxpayers liable for delays & cost overruns.
EAST KING COUNTY	I would be much more willing to strongly support any initiative that places Issaquah receiving Lightrail within a shorter period of time. 25 years is a long time..
EAST KING COUNTY	I cannot support this timeline. These transit project would help address our CURRENT transit issues - but these aren't scheduled to be complete until 2040! Our transit needs in puget sound will be even bigger then - and this doesn't seem to grow with it. by 2040 we should be looking at light rail along the I-405 corridor, not simply buses that'll be stuck in the same horrendous traffic as the rest of the cars. and 2040, I'll be almost at retirement by then! what good is a train that arrives 25 years after i need it? We need an extremely accelerated plan. I would end up paying for the next 25 years to build a transit systems that I would never get to use. 8 years to get rapid buses? crazy! 25 years to finish out light rail? crazy! this is, in whole, an unambitious plan when you consider the 25 year timeline. I'd be happy to pay handsomely to get all this in 5 years, but i cannot support a plan this slow.
EAST KING COUNTY	Overall too many projects are being attempted and at too high a cost. The route to issaquah and redmond extension dont have high enough ridership numbers to justify their high cost. The projects that could really make a difference including west seattle, ballard, and i405 bus rapid transit take way too long to implement.
EAST KING COUNTY	25 years is too long! Seriously, do we even know what public transportation will look like in 10 or 15 years with driverless cars, etc.? In that time, trains might be obsolete. Give us a plan that works faster.
EAST KING COUNTY	Under no circumstances should BRT be implemented on the former Eastside Rail Corridor.
EAST KING COUNTY	It is obvious that mass transit is in much need, now. I grew up in Mexico City, i've lived in Seattle for 25 years now, and I can see that the only way to alleviate our current traffic is to make this proposal a reality. In Mexico City, like in any other big city, mass transit has been the greatest thing that have helped to move people to a city n crisis. The time line, though, to up to 25 years is surreal but the project must move on.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	It is so ridiculous that these projects have these long timeline. It's a joke really. So much time for feedback and planning, more time for design and getting the land and then more time to build. All time lines should be cut in half at a minimum. When I was 20 and moved to Bellevue I thought I would use great public transportation. That idea was quickly squashed when I found out there wasn't (and still isn't) a universal pass for the transit systems (ORCA is a purse and isn't the same thing). Also I found that it was almost impossible to get anywhere even if there was a pass. Now I'm in my 30's and the projects that were being discussed and planned from my 20's are still not built and these new plans will not be finished until I'm in my 50's when my son is in his 30's. Like I said it's a joke, what do any of our opinions from now matter if we can't benefit for 25 years. Make it a 5 year plan and then you'll have more support. And really you should be able to enact many of these things in 2 years if you knew how to run/build anything.
EAST KING COUNTY	If I could pay more now for completion sooner I would. Lightrail serving all of eastside in 25 years is a long and difficult wait.
EAST KING COUNTY	It would be great if some of these projects could come online sooner.
EAST KING COUNTY	Faster if possible. The region is exploding as are costs of living. Mass Transit allows for employees to move freely and inexpensively throughout the region. Please get this done quickly.
EAST KING COUNTY	I think that the project timeline is way too slow. Traffic and transportation are major issues in the Puget Sound region, taking 25 years to address them is only going to result in ever worsening gridlock. The projects need to be sped up.
EAST KING COUNTY	Wow you guys are really moving slow with light rail construction and your highways are clogged with traffic daily. I moved here from CA and I am shocked at the clogged traffic, lack of highway lanes and lack of reliable public transportation and parking. You need to get moving to improve King county
EAST KING COUNTY	The completion time of the Ballard and West Seattle lines is unacceptable.
EAST KING COUNTY	522 traffic in kenmore needs to be alleviated asap. It is unacceptable that traffic diverted from the 520 bridge due to tolls clogs our streets daily, with no benefit at all to our community.
EAST KING COUNTY	If it could be speeded up, that would be better.
EAST KING COUNTY	If we had done this in the 60s and 70s with federal money, we'd have been done long ago and cost us much less. Waiting more will just make it worse.
EAST KING COUNTY	Please accelerate timeline on expansion to Issaquah. Would this use the Issaquah Transit Center or a new station and parking lot?
EAST KING COUNTY	Move as quickly as possible. Front load the funding.
EAST KING COUNTY	Is there any way to get projects online faster? Puget Sound needs vastly improved transit NOW, not after a decades-long wait.
EAST KING COUNTY	Please do not use our pedestrian/bicycle corridor for transit development.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	I would pay additional taxes to speed up the timeline. I live in unincorporated King County, where the only transit available, a bus twice a day, was discontinued a decade ago. However, I feel strongly that the key to solving the traffic problems in King County effective mass transit. Additionally, if I had access to effective transit to and from Seattle, I would park in Redmond and use it.
EAST KING COUNTY	- I think it is ridiculous that Downtown Redmond Light rail will be completed in 12 years. Please consider expedited timeline - Please add a rapid bus line along 202 (Red-Woodinville Rd): Woodinville/124 corridor to Redmond Transit Center (202 traffic during office hours is unbearable)
EAST KING COUNTY	Sooner is better
EAST KING COUNTY	Please put pressure on the employers in the region to help. It's critical for employees to get to work on time reliably.
EAST KING COUNTY	22 years is crazy for completion of some of these! How about a proposal to get it done in ten years? I'd love to see light rail across the whole map. Personally out to Ballard and out to Issaquah & Redmond are the most interesting for me. 22 years is soooooo long to wait.
EAST KING COUNTY	The I-5 corridor and Seattle neighborhoods have been well served by transit. A higher priority should be focused on the I-90 and 520 corridors which are absorbing tremendous growth. Moving the eastside projects earlier in the program should happen before further extensions along the I-5 corridor or within Seattle.
EAST KING COUNTY	More park and ride facilities with more capacity and facilities like restrooms
EAST KING COUNTY	<p>This transit plan should have been in place 10 years ago. 25 years is a long time to wait. I recently finished my 35 year career at Boeing and always wanted to take the transit system. Nothing was available. This is really too late. Due to the poor transportation, Boeing and other large companies will continue to look to relocate elsewhere. As you know, much of the Engineering workforce is being relocated in part due to transportation. Over my career much of Boeing's manufacturing has also left. Years ago Alan Mullaly pleaded with the legislature to improve transit. Nothing was done. Disappointing. Now that I'm retired, I too am leaving. Just can't stand the traffic. Heading to a commuter friendly city, Portland.</p> <p>Things to ponder:</p> <ul style="list-style-type: none"> <li>- Will the plan be obsolete in 25 years?</li> <li>- How will electric cars affect transit parking?</li> <li>- Will self driving cars reduce the need for such a complex transportation plan?</li> <li>- Regional planning has a large effect on transit and it seems that the growth in our area (98058) has not been thought out well. Our walkability index is extremely low thus putting more cars on the road. We have turned into LA with urban sprawl everywhere. The plan does little to tie the high growth hot spots together. (Renton, Covington, Maple Valley, Kent, Bonnie Lake, etc)</li> </ul>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	None of the goals from the original sound transit project were on time and on budget, and many were never accomplished. I cannot support the system with such a lousy track record.
EAST KING COUNTY	in 25 years, driverless cars would have changed the way we get around. I don't see that accounted in the plan at all.
EAST KING COUNTY	25 Years is too long. The Greater Seattle Area is growing a lot faster than our existing freeways and roads can sustain. Traffic is horrible during rush hours, especially when one of the floating bridges is closed. ST3 needs to move a lot faster than the proposed timeline.
EAST KING COUNTY	This plan takes too long and costs too much. We should improve the bus transit system, the sounder rail system, and build more roads.
EAST KING COUNTY	We can do this faster. Why are we committing to such big delays?
EAST KING COUNTY	It should all have been done yesterday. This is a lot of great stuff, but we really need to expedite the timelines for EVERYTHING in the package.
EAST KING COUNTY	8-25 years is too far out. East side needs useful transit now. 30 minutes between buses plus no decent arrival time/delay info means potential riders have to drive instead. We won't get the rider numbers up until after the service has proven itself capable. People won't risk their jobs until they know it works. Rush hour buses Kirkland<->Bellevue are over full to the point of not feeling safe. Outside rush hour we have to drive instead because the waits are too long.
EAST KING COUNTY	For question 12, I would be considerably more supportive of this plan if the timeline for light rail projects was shorter. It seems absurd that these projects are measured in decades.
EAST KING COUNTY	I would be wholly supportive of all of these transit efforts if the time to completion could be extremely compressed to happen before I'm too old and frail to be making my way to a transit station. I can't remember all the times I've indicated my support for transit either by voting in elections or by voicing my opinion, only to have some group of politicians co-opt the taxes raised for building more roads. We've seen that projects can be completed quickly (well, not the one with Bertha), so please bring light rail to the Eastside in 3-4 years, tops.
EAST KING COUNTY	The project timeline is far too slow. Find a way to accelerate development and complete the entire transit plan in under 5 years.
EAST KING COUNTY	This type of construction isn't going to get cheaper going forward. If it's \$50 billion now, it will probably be \$75-\$100 billion 10-15 years from now. Since there's no way to keep more people from moving to this area, we have to figure out how to get more people in the same area to move from Point A to Point B faster. Traffic gridlock is a waste of time and money. Also, since we're not planning to pave over Lake Washington (as far as I know), more roads (such as building another level on I-405) are not an option. Kemper Freeman should have his head examined.
EAST KING COUNTY	I realize the difficulties of undertaking this number of projects, but the Seattle area is way behind in fixing our traffic mess. I would be in favor of anything that would speed up the completion of any/all of these projects.
EAST KING COUNTY	The 25 year completion of East side transit is going to cause a lot of problem for a rapid growing east side community in the near future. I hope the plan for the eastside expansion, i.e. to Issaquah can be prioritized further.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	<p>We've started and ended a war in 4 years (WWII) and put a man on the moon in less than one decade. Why is this taking so long?</p> <p>Under this plan, bus rapid transit (BRT) service on I-405 between Lynnwood, Bellevue and Renton would come online in eight years; light rail to Redmond and Federal Way would be complete within 12 years, light rail to West Seattle and Tacoma would be complete within 17 years, light rail to Ballard 22 years, and light rail to Everett and Issaquah in 25 years</p>
EAST KING COUNTY	<p>There must be an opportunity for the agency to move more quickly in these major construction phases, especially when the ST3 vote would be out of the way and the focus should be on the most rapid delivery of service rather than preserving political capital.</p>
EAST KING COUNTY	<p>This is taking much too long. This whole thing should be done in 10 years not 25.</p>
EAST KING COUNTY	<p>We need the light rail to the eastside communities much sooner than the plan provides. I would be in favor of accelerating the project schedule for the Redmond light rail connection to Bellevue.</p>
EAST KING COUNTY	<p>Why can't the timeline be compressed? 12 to 17 years seems like a very long time especially when we need rapid transit improvements NOW in order to maintain the economic development support of industry and corporations. The lack of a reliable transit system could hinder our region's competitiveness for business and impact quality of life for residents.</p>
EAST KING COUNTY	<p>The 522 corridor is a mess, this needs to be a priority for the transit system.</p>
EAST KING COUNTY	<p>Inevitably we will experience a recession. Sound transit should put work out aggressively during such times to maximize cost efficiency</p>
EAST KING COUNTY	<p>I would be willing to incur higher tax burden to shorten the timeline of this project, especially the light rail to Issaquah and rapid ride along I-405</p>
EAST KING COUNTY	<p>Redmond Light Rail Link timeline should be accelerated</p>
EAST KING COUNTY	<p>The magnitude and scope of this Proposal is somewhat overwhelming, especially when the answer that is staring everyone in the face is expanded bus service. This could be brought on virtually immediately and at a much, much lower cost. The customers would be happier sooner. \$50B is a lot of money and everyone knows it will be more than that and if history is any indicator, the target completion dates will not be met, so probably best to move those dates by ten years.</p>
EAST KING COUNTY	<p>Timelines should be shorter, and projects completed SOONER. Thank you.</p>
EAST KING COUNTY	<p>The timeline for The projects is too far away, they should be completed much sooner! I would gladly give \$1000.00 NOW, rather than paying slowly over the next 5years, if it would speed things up...even though at my age I might not last the 5years.</p>
EAST KING COUNTY	<p>This timeline is way too slow - find a way to speed it up.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	<p>In 25 years the problem will be twice as bad. Speed up the timeline. Hire more workers.</p> <p>I'm constantly disappointed that a south 405 light rail line from renton to burien via Tukwila station and south center is not considered important. This stretch of road has some of the WORST traffic in the state, and yet simple expansion of bus lines will solve this? To me, some of this program reeks of marginalization of poorer working class areas in favor of the wealthy (Bellevue and Issaquah). Why is the place in the state with some of the worst congestion in the state overlooked for light rail, while suburbs much farther away ( and with less issues of congestion) get a shiny new light rail station. This in and of itself is causing me to reconsider support for the entire bill.</p>
EAST KING COUNTY	<p>First, I apologize to the entire staff of personnel who have to bring this to the public. It's a shame this needs to go to a vote. Get it done, and get it done faster. Surveys, polls, and ballots waste hundreds of millions of dollars and precious years when considering transportation projects. The entire subway system in New York City went to a public vote and they voted it down. The government said screw it, built it anyway, and everyone loves it now. Forget what the public says, build as much as you can as fast as you can. And build twice as big as you think you'll ever need.</p>
EAST KING COUNTY	<p>I really wish there were a way to speed up the process, but at least the local transit agencies are working to get something done. Transit needs to be convenient in order for many people to use it instead of cars. For people who can't drive or don't have access to a car, mass transit is a necessity, but it shouldn't pose an unfair burden. It's important to clearly explain to the public why these projects take so long, including funding limitations, and what, if anything, they can do to speed up the process.</p>
EAST KING COUNTY	<p>The extended timelines (especially for the rail to the eastside projects) make the financial commitment harder to swallow. shortened timelines for these projects would help sell them. I would move from "somewhat supportive" to "strongly supportive"</p>
EAST KING COUNTY	<p>If you're going to provide the greater Seattle area with the public transportation that it so desperately needs, please stay on time and on budget. Every company has it's own deadlines and budgets and are held accountable when those aren't met. If you aren't going to abide by your own deadline and budget proposals then Sound Transit should be held accountable.</p> <p>Don't end up like the Seattle waterfront project and Bertha. It's unacceptable.</p>
EAST KING COUNTY	<p>Why does it take 25 years to build this? Why can't all of this be done within 10 years or less? I'm also disappointed that the eastside is not fully linked via light rail. In particular, I would've loved to have light rail come through Kirkland. I realize the City of Kirkland is against it, but perhaps there are alternatives to the existing proposal without settling on BRT.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	I support the overall plan, but not the overall timeline. The timeline for the project needs to be accelerated so that it does not take 25 years to complete. There needs to be multiple concurrent projects going on at the same time.
EAST KING COUNTY	I will not vote for the measure unless light rail comes to Everett in the next ten years where it is most needed. Snohomish County is the 2nd largest county and growing rapidly. We will have even more serious gridlock on our roads in ten years. Passenger flights are now being planned out of Paine field at the end of 2017, which will bring more cars on our roads to get to this airport. It will be easier, faster and less costly to build light rail from Evert south to Seattle. You can then take as much time as you need to build more light rail in Seattle with tunnels and above soft ground. In twenty-five years when light rail is currently planned in Everett, I will be dead or in assisted living. Meanwhile I will have paid for a system over several decades that I will never use. This is what I keep hearing from others in Snohomish County as well. It's not about Seattle now. We need mass transit, sidewalks and bike trails in Snohomish County - we have far, far less here than Seattle does. Thank you.
EAST KING COUNTY	I have a difficult time picturing that the money being raised will be enough in 25 years. How long will these taxes be assessed?
EAST KING COUNTY	Would like to see Bellevue/Issaquah/Redmond connected faster than 25 years....this seems like an extremely long timeframe
EAST KING COUNTY	The Eastgate light rail connection should be much before 2041. Please take Bellevue College into consideration, as the population here desperately needs more access to alternative transportation with over 34,000 students attending per year.
EAST KING COUNTY	These timelines need to be improved, light rail to Everett in 25 years is far too long, this needs to be expedited, 10-15years max.
EAST KING COUNTY	It is critical that mass transit be completed a quickly as possible. The timeframe seems too long given the congestion we experience.
EAST KING COUNTY	Please move up the completion of link light rail to Redmond. It is too far out to support the plan.
EAST KING COUNTY	DO IT ALL FASTER IF POSSIBLE!!!
EAST KING COUNTY	Build it all in 6 years or less!! No excuses.
EAST KING COUNTY	The timeline is stretched too long. If you are going to do this, go big and speed up the building.
EAST KING COUNTY	I've recently seen in the news media some alternative plans to speed up some of the timelines. Please take these ideas into consideration! I love the Seattle area, but will need to move out of the Puget Sound area if some reasonable solutions can't be reached soon. The quality of life is diminishing quickly with the never ending growth and development that has overwhelmed the transportation infrastructure.
EAST KING COUNTY	First and foremost, light rail NEEDS to be done across the lake. Either via I-90 or 520...why it wasn't included with the new 520 bridge project, I can't imagine. I feel the biggest gridlock that we have in the area is trying to get from the Eastside over to Seattle and back. As such, it should have the highest priority and be completed the soonest.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	Timelines are way too long. Get additional rail moving! Concentrate on trains, tracks and modest stations; stop building massive edifices as stations; simple platforms will suffice in most places.
EAST KING COUNTY	Can't this be done faster than 25 years?
EAST KING COUNTY	25 years is a really long time - most cities of the world would have moved on to more sophisticated modes of transit by then. I would appreciate it if the project was expedited.
EAST KING COUNTY	I'd recommend an additional option for voters to the ST3 Yes/No approval: If Yes, would you support paying an extra \$\$\$ to accelerate construction and reduce the timeline of ST3? Y/N? I love the plan, but would also be willing to pay more for an accelerated timeline for completion.
EAST KING COUNTY	Traffic is such a huge problem. I wish we'd voted in and acted on better public transit options much earlier. Any speeding up the process is a good thing!
EAST KING COUNTY	Much too long getting lite rail to Everett. That is a main transportation corridor and needs to be addressed sooner to help all traffic in the area.
EAST KING COUNTY	I would speed up capital improvements for light rail stations and lines. There seems to be too much focus on prioritizing projects that serve single employers or functions like Boeing and Sounders games...not fair unless those entities are ponying up much of the money for these projects or are the rationale for why they seem to be getting priority treatment.  I think Totem Lake in Kirkland should have been served by light rail not rapid bus.
EAST KING COUNTY	There is absolutely no reason why it should take 25 years to do anything. Not to mention, the additional 10 years of everyone's lives you have already wasted; 10 years spent on building transportation infrastructure that apparently only supports SEATTLE and very few non-SEATTLE buses. Why didn't "the plan" support ALL buses going through the tunnel? And so far, the newly opened Capitol Hill and Univ. of Washington stations seems to have made riding light rail in downtown unpleasant and severely overcrowded. Capacity planning (if any planning occurred) = GALACTIC FAIL!!
EAST KING COUNTY	The timetables for completion should be vastly shortened. it would make more sense to focus on some of the most pressing needs right now and just get them done. When I hear of light rail projects being finished in 20 years, I feel really irritated. Surely some of these projects could take less time! The improved transit will help so many people be able to buy houses and/or live a little farther from the main job centers.. It gives more opportunity to more people in terms of jobs, housing and schools.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	The timeline is too little, too late! The priority should be on Link Light Rail and Commuter Sounder Trains, period! These should be prioritized and completed within 5 years. Seattle has done this whole region a huge disservice by studying and planning for over 20 years with very little to show for instead of taking action. By the time the proposed plan you have is complete, it will be too small (not serve the new population needs), archaic (better and newer technology advances will have come along) and not long or far enough. For example, east of Redmond has been growing so much and yet, by the time you're done with two lousy stops in downtown Redmond, then all the new developments and people up Novelty Hill, Union Hill, Avondale, Red-Wood Road, 202 towards Fall City and even further into Carnation and Duvall are still without any light rail, still driving and worse plopping into Redmond, looking for parking to ride the light rail or just driving/commuting on through. You just caused a giant traffic bottleneck in Redmond with no real solution. GO TO WHERE THE PEOPLE ARE (extend it out 202, Avondale, Union Hill, Novelty Hill)! DELIVER SOONER! I won't support this plan and neither will all the people I communicate with unless the timeline is sooner!
EAST KING COUNTY	A lot of money for something that will take a long time. Ways need to be found to speed up the process without increasing cost perhaps by doing a better job of prioritizing projects. Better service to Kirkland and Bothell in 405 corridor. I have heard of higher estimates than the \$200 in question 14 and am skeptical about how bias these questions are.
EAST KING COUNTY	do it faster. 22 years is unacceptable.
EAST KING COUNTY	We need to pass this program. Move forward as quickly as possible to make this area appropriate in regional planning as other cities in our country are.
EAST KING COUNTY	Get it done sooner than later and under budget. Seattle and the pruguet sound area is desperate for public transportation
EAST KING COUNTY	Bring Issaquah-Bellevue online much sooner than 25 years. Eastside growth is too explosive to wait until 2041. It is hard to commit to tax obligations which will be too little, too late, for the tax payer.
EAST KING COUNTY	I will be retired in 8 years and will not be around the King County
EAST KING COUNTY	Hurry up. 12 years to Redmond and 22 years to Ballard? I'll be retired by then and I'm only 37! \$200/person per year is way too cheap. Employers like Microsoft should contribute.
EAST KING COUNTY	I can only provide informed input on the transit routes that I know well.  I would like to see light rail expansion done more quickly than 25 years. It is very important to have excellent (mass) transportation infrastructure to keep the region vital and to accommodate expected population growth. With all the wealth in the region, it is something we should invest in!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	The priority of the projects should be based on the demand of the services from the different region and the worse traffic area such as I-90, I-405 to ease the current situation and to streamline the projects to be done at the same time to shorten the timeline. Personally speaking, I may not have 25 years to live to see ST3 come to Issaquah. I will support more if the timeline is within 5 years instead of 25 years.
EAST KING COUNTY	I have lived in the Seattle area (Eastside) for more than 25 years, so I know how long these projects can take. And I realize that ST3 is a highly ambitious and expensive plan. However, I have strong concerns that by the time these projected timelines are completed it will be way too late to save our region from grinding to a halt. And that within 25 years, it will be way more expensive in real \$\$\$ than projected in the plan. I don't know if it is even possible, but I think that 25-year timeline needs to be cut in half. And I think them implementation of the Rapid Transit aspects need to be much sooner. That said, I think this plan is better than widening our highways any more (even if that was possible).
EAST KING COUNTY	I would much rather the timeline be shortened for the completion of all the projects.
EAST KING COUNTY	For the health and vitality of our region, these projects should have been put in place 20 years ago. That being said, it is such a relief that the planning and potential implementation are actually happening. Why, though, is it going to take 25 years??
EAST KING COUNTY	The plan is forward looking, but completion dates up to 25 years in the future become somewhat suspect in terms of actual requirements that far out. All transportation options will be evolving...
EAST KING COUNTY	We need solutions now. If I'm going to start paying that much in additional taxes now, promising me a solution in 18 years is not being prudent with my money. You squandered money on phase one by building a line along a corridor that didn't need it half as bad as 10 other types of transit projects. Why? There is currently a Sounder bus that comes every 7 to 10 minutes right now to 40th and hwy 520. In 5 years a train will come at the same frequency and take me into Seattle at a slower speed than the bus. But, the train costs billions more than the buses. I don't get why you are again pushing to spend money so unnecessarily.
EAST KING COUNTY	25 years is too long for expanding the rail service to Issaquah, etc.. I can't imagine why it would take so long, it would be better supported if it could make a difference earlier, as traffic and gridlock gets worse and worse.
EAST KING COUNTY	One of the biggest issues in South King County is parking, which is terribly inadequate to encourage people to take light rail or the Sounder. This is urgently needed given the bus cuts that have happened in the last seven years. I can't see myself strongly supporting this plan unless there is a serious effort to dramatically increase commuter parking in South King County through the construction of several multi-story parking garages and to either bring light rail to those locations or increase the frequency of the Sounder commuter rail to Seattle. There needs to be more immediate payoff in this plan so we're not waiting 25 years to see something that should have been completed 20 years ago.
EAST KING COUNTY	Complete all of the systems proposed (possibly without the BRT stuff) within 7 years.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	25 years for transit improvements to Everett is way too long. Why so long? This should be job #1 at the expense of all others due to ridiculous traffic volumes and travel delays during peak times.
EAST KING COUNTY	I don't understand why it would take eight years to implement BRT along I-405. It seems like you have the demand there. I could see it taking some years if you were to add an additional transit stations, however, those express buses would do a lot to ease conjection and gain support on this proposition - not to mention help with the additional population growth we're seeing in our area. Eight years seems like a long time to wait for BRT buses along 405.
EAST KING COUNTY	Please bring light rail to the Eastside sooner!
EAST KING COUNTY	It would be better to see a faster timeline.
EAST KING COUNTY	The Issaquah line should be completed in parallel with the line to Redmond. The project spanning a quarter century is cause for concern. The citizens of the eastside will thank you. With the current plan, I'll be an old man by the time light rail comes to my town ; - ;. Other then that, you guys are doing gods work out there. We should've voted yes in the '70s for forward thrust.
EAST KING COUNTY	I would be comfortable with higher taxes to accelerate completion of Redmond light rail. Need something to take pressure off SR 520 exits around Microsoft campus.
EAST KING COUNTY	It would be great to get better/additional service to the eastside sooner. I would love to take the light rail to work every day but can't wait 25 years for that to be an option.
EAST KING COUNTY	Faster! Traffic in Seattle itself is becoming impassable
EAST KING COUNTY	I will be in the strongly support category if timelines for light rail are accelerated. The highways are too congested for additional bus service to provide the reliability and safety necessary to meet demand. I drive 50% of the time because I cannot rely on timely commutes using the existing buses. Every effort should go into accelerating extension of the light rail system to alleviate the roadways and meet the growing population of the area.
EAST KING COUNTY	Please. Don't have it take that long. I don't drive; I rely on public transport exclusively. I am very anxious to see light rail in Bellevue and Issaquah!
EAST KING COUNTY	The completion of Issaquah rail in 25 years is unacceptable. The travel from Sammamish/Issaquah to Seattle is too long. In addition, it should lead to Seattle and not to Bellevue. We need a solution for Sammamish.
EAST KING COUNTY	I think that a shorter timeline for final completion would be beneficial as the growth in population in this area will increase the travel congestion on the highways long before the proposed timelines.
EAST KING COUNTY	Do it faster
EAST KING COUNTY	I couldn't quite tell from the ST3 plan in terms of timeline, but I think it would be important to complete the BRT project soon after the light rail station on 145th street in Lynnwood opens. This would greatly reduce my commute time, and I'm tentatively excited about all of these plans, though it sounds like I'll have to be patient for them!
EAST KING COUNTY	This plan takes too long to complete and does not include the communities that are paying a hefty portion of the costs--mainly Renton/Kent/Auburn.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - East King County

EAST KING COUNTY	25 years to Everett? ST3 is DOA!!
EAST KING COUNTY	Anything that can be done to get light rail to Lynnwood sooner would be appreciated.
EAST KING COUNTY	Light rail to Issaquah should be accomplished sooner than 25 years.
EAST KING COUNTY	Much too long to initiate the light rail projects. This needs to be sped up.
EAST KING COUNTY	12 years for light rail along 520 to Redmond is way too slow! 520 is already a parking lot. Please speed up the construction!
EAST KING COUNTY	I'm a strong supporter & feel the timeline is ridiculous. Should be completed in less than 10 years! I urge ST3 to find a way to magically surprise us with a new new time table.
EAST KING COUNTY	Would be great to keep communication going and adopting the changes in next 25 years
EAST KING COUNTY	Projects should be sped up to reduce overall costs.
EAST KING COUNTY	Light-Rail is clearly needed before any BRT, we do not need to replace existing bus routes with BRT. Seattle removed its trolley cars to west Seattle, they rejected Monorail to west Seattle, why would they want light-rail? or is this like the Waterfront-Streetcar. Zone/fare variance between ST and Metro should be eliminated, you have had 20 years (packed 545 to Overlake and empty 268 at the same time). A rail-stem is needed under ST-2 across NE 40th street in Redmond-Overlake to prepare for ST-3, to save money.
EAST KING COUNTY	Project time lines should be moved in. Taxes should be higher to get it done sooner.

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - South King County

Subarea	Additional Feedback - Comment(s) about project completion timelines
SOUTH KING COUNTY	need to speed up these projects...I'll be retired by then...
SOUTH KING COUNTY	We need all of this yesterday but there's only so much that can reasonably be done any quicker without legislative support.
SOUTH KING COUNTY	The projects connecting South King county to the rest of the region should be moved forward in the queue. Many of the residents in downtown Seattle and further north have more bus options than the southern half of the county. Residents in the Southern half of the county therefore, are subjected to long, complicated, transit journeys to get between work, home, and recreational activities. They also have smaller park-and-rides, or face long walks to get from the bus stop to their destinations. Moving up the timetable for the southern half of the county would relieve some of that burden.
SOUTH KING COUNTY	Please develop a plan that will be complete in less than 25 years. In 25 years, the technology used in your current plan will likely be outdated.
SOUTH KING COUNTY	It should be completed as fast as possible to serve the needs of the Puget Sound Region.
SOUTH KING COUNTY	I know building things takes time but 25 years is too long. We need this now.
SOUTH KING COUNTY	The timeliness of this project is not responsive to the growth rate of our neighborhoods. The projects in Seattle neighborhoods need to be fast tracked. 17 years until west seattle gets significant improvements is beyond unacceptable.
SOUTH KING COUNTY	Prioritize light rail from Federal Way to Ballard.
SOUTH KING COUNTY	Let's fastrack these projects!
SOUTH KING COUNTY	The timeline is too long. The schedule need to be moved to the right. MUCH FASTER IMPLEMENTATION!
SOUTH KING COUNTY	We need this completed much sooner. We need to figure out the financing so that we can move any shovel-ready projects up to the front of the line and get some wins earlier. 17-25 years for most of the light rail is way too long. I don't want to say ridiculous because I understand there are fiscal constraints. We need this so much sooner than the proposed timeline.
SOUTH KING COUNTY	More taxes, go faster! Finish everything within 5-7 years! Go, go, go.
SOUTH KING COUNTY	<p>The timeline needs to be much shorter for most of these projects especially the corridors where people are sitting in gridlock for their daily commute.</p> <p>25 years is far to long to build light rail to some of these areas. It does not make sense to even build light rail if it takes that long. I strongly support light rail if constructed in a reasonable timeframe.</p> <p>If it takes 22 years to get to Ballard just improve the existing rapid bus lines instead of building light rail. I lived in ballard for 3 years and it was not easy to get around without a car or walking or riding a bike...</p>
SOUTH KING COUNTY	Should be faster to catch up with other cities

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - South King County

SOUTH KING COUNTY	Not soon enough. Should have happened years ago. Can't turn back time so do it right!
SOUTH KING COUNTY	I think the station at Boeing Access in Tukwila that enables residents and tourists to easily visit the Museum of Flight should be much much sooner than 20 years. That has the potential of adding a lot of riders, increasing museum attendance - everybody wins.
SOUTH KING COUNTY	It would take too long and cost too much to complete the project. A lot of people will not be able to use the light rail system, because they don't live along the routes. Helping means you would use your own time and money, not using my money. That is called scamming.
SOUTH KING COUNTY	I think the funding can be found to complete these projects much sooner. People are more likely to support it if they can benefit from it now instead of 20 years from now when they're retired and don't necessarily need it very often.
SOUTH KING COUNTY	I would definitely support increasing the tax rates to speed up the timeline for light rail especially for the west seattle/Ballard lines. We should really try to get things done faster than 25 years.
SOUTH KING COUNTY	As a long time resident of the south end, I continue to see long lead times and lack of completion on projects while continuing to fund north end projects. I would like to see more funding to south end projects enhancing transit centers for additional parking capacity and additional small connector buses allowing folks to use transit while still facing limited parking at stations.
SOUTH KING COUNTY	It's going to be hard to get votes if the people voting are not going to 1) be able to use the system because they'll be retired already or 2) it never reaches their neighborhoods. I wish we could figure out a way to speed up development of these projects. Waiting 25 years for something to be completed seems like a lifetime. I'd rather spend the money on innovating ways to speed up development. I'm still going to vote for whatever package you put out so you got my vote, I'm just concerned about getting enough from other voters. Good luck, and Thank you.
SOUTH KING COUNTY	I support this package! I don't support the 25 years that it will take to make this happen. Is there any way to make this happen any quicker? This seems like too long. Traffic is bad now. It will only get worse. Thanks!
SOUTH KING COUNTY	why is Everett not getting light rail sooner, when they were originally supposed to get light rail around the time Lynnwood is now getting light rail. 25 years to complete what should take more like 15-20 years. come on Sound Transit get us moving faster sooner, then later.
SOUTH KING COUNTY	I know we are outnumbered but please follow through with keeping Federal Way / Tacoma toward the top of the priority list. I know all communities are important but we really felt like the rug was pulled out from under us with ST2. Excited for the future and impressed with transit finishing ahead of schedule and under budget for the Cap Hill / UW expansion.
SOUTH KING COUNTY	Many people think the timeline is too long. We need these improvements now. It would be helpful to see an explanation for the timing and what the costs would be to speed it up.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - South King County

SOUTH KING COUNTY	Centralized, off street transit only works if people can get to the system in order to use it. Please include as much parking as possible at BRT and light rail stops, in order to add ease and convenience to transit use. If riders are expected to park in an outlying area and take a bus to the train or BRT, this will eliminate a huge number of potential commuters.
SOUTH KING COUNTY	I would like to see light rail and sounder service prioritized more. 12 years for light rail to get to Federal Way, 17 years for light rail to get to Tacoma etc. is way too long.
SOUTH KING COUNTY	Ballard Light Rail is frustratingly late in the timeline.
SOUTH KING COUNTY	<p>1) I appreciate the scale of the project, but I think this went too big. The timelines are beyond the lifetimes of many potential users, and it turns into something that is too "pie in the sky" and not enough effect on our day to day lives. Specifically, I don't understand the timing of certain projects, like the bus on the shoulder plan. That is a great idea to encourage and reward bus ridership, but why will it not be completed until 2019-2024? That is too long. My suggestion is to front-load the "simple" projects to show near immediate benefits while continuing to build out the entire network.</p> <p>2) I think you should spend a lot more time and money on the South Sounder train. Its usage can continue to increase, but the limiting factor right now is parking, timing, and the last mile on both ends. Using my wife as an example, she does not want to park in the street and leave her car unprotected. Also, the train needs to have a later time. 6:20 is so early for a lot of people. My wife is a hard-working professional who cannot commit to leaving by 5:50. Lastly, the crush of people coming out at King Street is frustrating, slow, and dangerous when we are on the streets. Ideally, you could build a tunnel that connects King Street with the transit tunnel, but please do something for King Street station.</p>
SOUTH KING COUNTY	South Sounder is our only spinal connection in SE King Co. We need more frequent trains, not just commuter trains, and an equity-based fare. Otherwise you are locking-in a permanent disadvantage for quality of life and economic development in our area.
SOUTH KING COUNTY	Higher cost, faster deployment.
SOUTH KING COUNTY	Mass transit like this should have happened back in the 80's & 90's. This is overdue. I would also be interested in the economic impact if the plan was completed in 15 years.
SOUTH KING COUNTY	I think the Ballard to Downtown light rail should have greater priority. While BRT's a great idea, I don't see as great of a benefit as adding some of those shorter-distance light rail routes that service areas, such as Interbay, that have pretty poor bus service coming from downtown in the morning and going to downtown in the evening. Light rail should have priority over bus service improvements for short-distance travel, and train should be the priority for long-distance travel. I doubt many people are going to take the light rail between Everett and Seattle over the train. As for the current BRT priority, the biggest advantage I see for BRT is getting buses out of the HOV lanes, which are already pretty clogged. It would be great if this plan included bus-only exits, too.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - South King County

SOUTH KING COUNTY	<p>Federal Way Light Rail was to have been completed under ST2. Due to the budget shortfalls of the recession, this was not accomplished. Due to already being approved by voters, I feel Federal Way should be prioritized over other projects and expedited to be completed earlier than planned.</p> <p>In regards to shoulder driving: This is a safety risk that must be considered. The shoulders on the left are in many cases too narrow for disabled vehicles to park and therefore must park on the right. Busses using the right shoulder would have to veer in and out of traffic. I believe this might be dangerous and add undo hazard to the system.</p>
SOUTH KING COUNTY	<p>The proposed taxes are unnecessarily high for projects that should not cost the amounts projected. The communities want to develop mass transit but ST needs to do more with the money they have already asked voters for...</p>
SOUTH KING COUNTY	<p>In regards the light rail, I think it is ridiculously unrealistic the amount of time it will take to expand and complete this project. If you take into consideration the population growth and not enough roads to handle the current traffic, imagine how bad our roads will be in a couple more years.</p> <p>Adding more buses to our roads only adds more congestion, in that case we need more roads than buses on the streets.</p> <p>As an individual, reduce the time-to-completion to get my vote.</p>
SOUTH KING COUNTY	<p>I fully understand about bonding and receipt of tax revenues, but if you are going to plan for projects 20 years out, front load the planning so it is complete and not a 30%. Gain the means in which to do the design now.</p> <p>Structure contracts to encourage quicker work.</p> <p>Structure contracts to encourage or mandate 16 hours or more. Do more now - short-term pain in terms of delays from construction for long-term gain.</p> <p>Nothing is more maddening than to see construction sites where there is no work happening or one or two people walking around. Prioritize the work - and use all the hours in the day.</p>
SOUTH KING COUNTY	<p>Rail from Seatac to Federal Way has to be priority number 1. Do you want this thing to pass in Nov? I will work to energize people to vote no if the Seatac to Federal way project is not moved to a high priority.</p>
SOUTH KING COUNTY	<p>Tacoma has waited too long!! It appears that Seattle &amp; Bellevue get light-rail in a timely manner, where as Tacoma again, is the last to get light-rail to Seattle. Tacoma should at least get light-rail extended from Hill Top to TCC, in a timely manner, not 15 to 20 years. It did not take 10 years to complete seattle's First Hill Streetcar. Again it appears it is all about Seattle. Please complete Tacoma's light-rail sooner then later!</p> <p>Thank You!</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - South King County

SOUTH KING COUNTY	There has to be a way to speed things up, let us know what needs to happen to make the light rail projects on line 10-15 years, not 25.. Shoulder running sounds innovative. But what about simple 3+ passenger HOV on I-5? That will speed things up sooner while waiting to build shoulder space.
SOUTH KING COUNTY	Light rail timelines are too delayed. The plan needs an earlier success story.
SOUTH KING COUNTY	Accelerate the schedule, regional growth will likely out pace the proposed time line.
SOUTH KING COUNTY	25 years seems like a loooooooooooooooooooooooooooooooooong time away. I'll almost be retired by then and I'm only in my 30's. Can't this be done any faster? I'd be happy to pay a lot more in taxes to get it done more quickly. Seattle (and the region) needs true grade-seperated mass transit as soon as yesterday.
SOUTH KING COUNTY	<p>The proposed rate for these projects to be taken to completion is horrifying. Nearly twenty five years for the end of it. We need to find a way to do this faster. Or at least frame the project so that it doesn't seem like we'll have nothing for the next two and a half decades. Small improvements can make a world of difference without needing to change everything. Getting some dedicated transit (no cars in the lane, just transit) in the most congested areas needs to be priority one. And it needs to happen in the next decade. Whether it is rail, bus, or a skytram, we need to be able to move.</p> <p>At every step we need dedicated transit lanes. It'll hurt but it needs to happen, sooner rather than later. Areas like Portland have entire streets dedicated to transit only and it helps to make their system run faster. If we slow cars down by 10%, but speed up transit by 50% that's a win! Being able to go from West Seattle to Downtown in 40 minutes by car or 15 minutes by transit isn't a travesty, it's an incentive to use transit.</p>
SOUTH KING COUNTY	Build to W. Seattle and Ballard in 8 years!!!
SOUTH KING COUNTY	OHGOD PLEASE FINISH FEDERAL WAY. Since buses in downtown get stuck and are late too often (I can handle waiting, but one late bus makes you miss the last bus on the other line way too often) I've about given up on mass transit and am beginning to use my giant crappy old SUV for single-person commutes from Fed Way to Denny again. This is clearly awful behavior which I am ashamed of, please enable me to stop being a horrible jerk by letting me ride a train instead.
SOUTH KING COUNTY	Light rail is needed from Everett to Tacoma desperately looking at the time tables of 20 + years is depressing and is truly letting down the entire area. Traffic has become horrible around the whole region. But I believe the South Sound is being neglected by Sound Transit. Please put an emphasis on bringing light rail through Federal Way to Tacoma.
SOUTH KING COUNTY	Please speed up the timeline. We can't wait 25 years to put these measures in place. So much money is being lost from people sitting in their cars. If commute times were less, people could shop more, spend more, be in their communities more. Traffic is becoming prohibitive. It's awful. Just grueling and depressing. Greater Seattle offers so much. I don't understand why it must take so long to get anywhere. For the love of God, please fix this mess soon.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - South King County

SOUTH KING COUNTY	The projects I marked as most important to ME will be irrelevant in the timeline that you've chosen to build them, as I'll be retired by then! I don't know how many more people live in NE Burien and go to work in SE Lake Union?!
SOUTH KING COUNTY	Projects need to be completed faster and lines should have run times at least till 1:00 am
SOUTH KING COUNTY	I realize there are a lot of big projects outlined here, but the timetable for completion of at least some of the light-rail projects needs to be moved up. It should NOT take 22 more years to get light rail to Ballard or 17 to West Seattle or a better transit tunnel(s) downtown built.
SOUTH KING COUNTY	The plans should be completed in a much shorter time span than proposed, even if there is added cost.
SOUTH KING COUNTY	All of these projects need to be completed sooner rather than later
SOUTH KING COUNTY	We need it sooner!
SOUTH KING COUNTY	Ballard and west Seattle first.
SOUTH KING COUNTY	Currently Tacoma has access to the train, federal way does not have a rapid option
SOUTH KING COUNTY	After watching you fail at every project you put you're hands on, I firmly oppose any addition until you can prove you can finish this project under funded and on time. I also feel that you will blow the past the timelines and budget and will be back asking for more taxes to fund you're failed projects and leadership!
SOUTH KING COUNTY	Time period for the South end is way too long and the total cost for taxpayers is too expensive for most Senior Citizens to handle!
SOUTH KING COUNTY	<p>1) To build a plan spanning 25 years and to expect funding for these items is unrealistic - with that time frame transportation needs and options will have changed so significantly this plan will be obsolete and archaic.</p> <p>2) I strongly believe American's are so tied to their automobiles and the independence this affords them, that public transportation will never make a dent in the number of vehicles on the roads. I would like a better understanding of the volume of use today ..... how much congestion has been alleviated to date? I see the lite rail trails currently in use and see very !! few people on board, even during the rush hours. How can I support expansion of a service so lightly used today?</p> <p>3) As part of the expanding body of retired people in this area, I am now living on a fixed income base which is constantly being impacted by price increases in all areas - groceries, utilities, fuel etc..... I do not, by any means have a lavish life style, but I find I am continually giving up items I previously enjoyed and am always looking for ways to reduce my monthly expenses. I can not ! support yet another impact to my every shrinking income with the proposed \$200.00 taxation increase to support a mass transit expansion.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - South King County

SOUTH KING COUNTY	Will there be one contracted company building the rail system or will there be multiple companies working on different areas at the same time? Could you come up with an alternative payment plan aside from property taxes such as a special tax paid by all people that work in a given county (Snohomish, King, and Pierce) that is not an income tax?
SOUTH KING COUNTY	These are plans that should have been completed decades ago. Thank you for all the hard work that has gone into the projects so far.
SOUTH KING COUNTY	The Puget Sound area needs all these things NOW, not 20 years from now. We must speed things up and take some big leaps or we'll always be behind.
SOUTH KING COUNTY	I wish the light rail would be a priority as far as time. 12-25 years for completion is far too long.
SOUTH KING COUNTY	If we are going to meet our commitments to the rest of the planet we must speed up the plans proposed in Item 13. Furthermore based on our experiences with traffic snarls I would strongly urge providing a major extension to Portland, Oregon and Vancouver, BC using high-speed rail. I would like to know why you have not proposed a plan and costs to provide item 13 within the next 5, 7, and 10 years. You should put the light rail tracks overhead or underground everywhere and state the cost and timing effects if completed in the next 3 years. What are the plans to deal with major incidents such as an earthquake, volcanic activity, flooding, extreme weather events, power outages, etc.? Train do for strange reasons derail and how are you going to prevent this type of tragedy. A derailment could result in a high-speed train collision and a large number of casualties. While outside of your control a bus-truck collision by sideswiping is possible what are you going to do to prevent this kind of high casualty accident. You do not have any plan for dealing with such events based on my limited experiences where trains encounter cars.
SOUTH KING COUNTY	The most cost effective fix is to put more metro busses on the roads with more express routes and ample parking.
SOUTH KING COUNTY	Timeline is WAY too long!! These projects should be on a faster timeline to deal with the HUGE traffic problem in the Puget Sound. Taxpayers have been paying into getting expanded mass transit off the ground for YEARS!
SOUTH KING COUNTY	It seems like too little too late.
SOUTH KING COUNTY	This is urgent, as you know. Thank you.
SOUTH KING COUNTY	Due to my current age, I will not be alive to see most of these projects completed. Nevertheless, it is critical to actually start now. It will only get more expensive the longer mass transit improvements are put off and it's clear we will not all be able to drive our beloved cars everywhere forever.
SOUTH KING COUNTY	If I am going to be taxed to use something I am going to have to pay to use later anyways, how about not use tax money on homeless people and or use tax money on people who are not paying into the system to be able to use the things that those of us who work hard have to double pay for things? And don't use sales tax as an excuse. That is a cop out and not a real answer. I pay property tax income tax sales tax gas tax insurance tax luxury tax carbonation tax vehicle registration \ tax. Most of us would be better off without unreasonable taxing. We would be able to help others more if we weren't taxed so much.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - South King County

SOUTH KING COUNTY	West Seattle and Burien and Des Moines to Seattle are grossly underserved. There is NO ELEVATED RAIL due to the Rainier road level track. This makes light rail extremely inefficient. PLEASE BUMP UP THE TIMELINE FROM WEST SEATTLE. This is an extremely important project and highly desired by many.
SOUTH KING COUNTY	Please extend light rail from Des Moines to Tacoma Dome, Downtown Seattle to Ballard and West Seattle, North Seattle to Wverett, Bellevue over lake to Downtown Redmond Wa, and Bellevue to Issaquah. Also, please extend sounder service from Lakewood to Orting. I would prefer all projects to be completed much sooner than like 12-25 years of all possible to save money (if all possible). In all, we need light rail expansion in Seattle area resembling to places like in Portland, Or m, Vancouver, BC, and subway trains Like in New York City, San Francisco, and Chicago, please. Thank you.
SOUTH KING COUNTY	this area is way behind other cities when it comes to commuter transit options, these projects need to be completed sooner rather than later, its stupid that the current light rail does not service down town Renton. bus services are not the answer , because the highways are already crowded, and unless there are designated bus lanes on highways taking the bus is frustrating
SOUTH KING COUNTY	I really hope you can figure out how to bond for more money in order to get these projects going. I'm 34 years old and will be nearing retirement by the time these things are done. We need more light rail yesterday! Also, please extend the the West Seattle line to Burien. This area will continue to be economically depressed if regional transit continues to be inadequate here. The express buses downtown are okay but like any bus, they get stuck. Light rail is reliable and fast! Burien needs it!
SOUTH KING COUNTY	I think the state reps can help with this and I think it should hook up to Olympia to help get funding from the legislature. I think the main vein should go in first then add the side strings. The main vein should follow pac hwy and possibly military rd. A main vein on each side of I5. For a state wide plan to connect, Portland Vancouver and eastern wa. I spent two years in Germany and the lite rail has been there a long time and works well and is not expensive. This is most important for here. just don't blow it by out pricing our citizen's and plan to connect the rest of the state.
SOUTH KING COUNTY	Completion of the North to South routes for Light Rail should take priority. The traffic congestion through Seattle is not solvable with a road based approach. This route affects both statewide and intrastate transit and commerce.
SOUTH KING COUNTY	By the time these projects are completed we will have the number 1 worst traffic in US. I would pay more a year to speed the time line up. We need to implement these plans ASAP. These plans should have been in the works at least 5 years ago
SOUTH KING COUNTY	I believe it's important to expand transit service much faster than 25 years. I would gladly pay twice the taxes to have these plans completed in 12 years. People in Everett shouldn't have to wait 45 years after Sound Transit was conceived to finally get light rail service when they're retired. Additionally this region is growing extremely fast and a 25 year timeline is not fast enough to accommodate the new people who will be moving here in the next 25 years.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - South King County

SOUTH KING COUNTY	It is extremely important to extend the Link Light Rail, so that the network runs from Tacoma to Everett. This should be a top priority and one that should be completed sooner, rather than later.
SOUTH KING COUNTY	Voted for the last plan and it did not deliver. This one is too much pie in the sky and it will never be completed as planned/proposed. Poor oversight, insufficient planning and just a money grab from Peter to pay Paul.
SOUTH KING COUNTY	I would like to see additional stations to existing lines, be completed concurrently with adding new light rail lines. By doing so, this would increase ridership("buy-in") earlier and at a lower cost, than pushing these to the end of the proposed plan. In my opinion those that are closer to the downtown core (which ever downtown it is, Seattle, Tacoma, Everett, Bellevue, etc) are going to be most likely to use the system, and would therefore benefit the most by adding stations early. However getting infrastructure out to all of the tax base, (that is supporting this measure) early, has its benefits as well...
SOUTH KING COUNTY	The priority for extension should be completing the light rail from the Federal Way Transit Center to Seattle. I am a resident of Federal Way and many people here feel that we were already promised a station and paid for a project that was never even begun, and it has made them less confident in transit in general. It is also desperately needed, as I know more people commuting between Federal Way and Seattle on an everyday basis than anywhere else, the expected travel time is almost an hour and a half, and the buses are so full at peak that there are always people left at the station.
SOUTH KING COUNTY	It is difficult to comprehend timelines 20 to 25 years into the future. Shouldn't the project be broken down into more manageable phases?
SOUTH KING COUNTY	South sound communities need rail access to Tacoma/Seattle 7 days a week. Either put weekend trains on Sounder lines or complete southern light rail lines sooner than 12 years to federal way.
SOUTH KING COUNTY	I strongly support the development and addition to maximize mass transit in this region. However, I really want to know that my tax dollars are going to the project and being used responsibly, ethically and efficiently. I worry about the potential waste of dollars here and there that add up to greater sums, which will frustrate and dissuade voters from continuing to fund mass transit efforts. Please ensure that voters and tax payers are made aware of how our money is spent in an effort to complete projects on time and prudently. Thank you.
SOUTH KING COUNTY	Would like to see the completion times moved up in general, BUT especially for the Kent-Des Moines to Tacoma Light Rail extension (then to Tacoma Community College) and the Sounder extension to Dupont. The residents/families/students of South of King County are more in need of Transit and would use it more then the North or Eastside residents (examples, look at the increased ridership on both the Rapid Transit Bus Line A & increased ridership on the newest extension of Light Rail to the University of Washington - both exceeding projections). I can tell you I would park at the Federal Way Transit Center and use Light Rail & transit exclusively if the South King County & Tacoma/Pierce improvements were completed A.S.A.P.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - South King County

SOUTH KING COUNTY	There is no reason at all it should take up to 25 years for all of this to be completed. I will be dead by then. Also we should not have to pay for something we will not be using ever. It is cheaper and faster to drive my own vehicle than it is to wait on transit and it is less costly to drive given the fares you charge, especially when you go from zone to zone. If other cities can get there mass transit up and running within even 10 years there is absolutely no reason why the state of Washington should be taking up to 25. Let the people who want to use it pay for it, and stop getting everyone to pay.
SOUTH KING COUNTY	This timeline seems too slow... If it was a priority it should take less time to add some rapid bus service. Light rail takes more planning so should take longer but to take 8 years to get any additional bus service and 12 to add any light rail is a little ridiculous! That is a lot of taxes to ask me to pay when I will see no benefit to me(transportation options, not traffic reduction) for a whole 17 years!!!
SOUTH KING COUNTY	The plans look wonderful...should have happened twenty years ago as I will be to old to use any of it in 17/22 years. In the meantime I use the service often...keep moving forward.
SOUTH KING COUNTY	The plan is good, but the timelines are DEPLORABLE!! What horrible planning! I am appalled by the way S/T ripped us off to we in the South end after we have already voted to have L/R to the South End and then say that "the economy made us re-plan" or "e don't have the money". This is very poor unacceptable planning! S/T needs to get with the REAL program and get people in the offices that know what they are doing! I would give the existing board a big F! Failing to uphold the promises that they slapped us in the face with!!
SOUTH KING COUNTY	I understand that the these things take time, but 25 years seems very excessive to complete these improvements. In 25 years all the "improvements" will no longer be effective due to the changing demographics of areas and potential for population increases to areas that aren't currently experiencing population booms. I feel like the south sound frequently gets overlooked and discounted in these improvements. While there are some plans in this project, I don't know if it truly addresses the potential population boom that the south sound area is already starting too see. Additionally, I believe that parking at the sounder stations is a critical issue that need to really be considered. As of right now I simply cannot take public transit AT ALL! This is not through lack of trying and effort, but in order to take a 7:30am train to be at work on time I would have to be at the garage at 6:30 in the morning to get a parking spot. I can't take a bus because the closest bus stop to me (1/2 a mile away) leaves the stop at 6:45 and gets to the station minutes before the train. Any traffic issues and I miss my train (and have). The parking issues really need to be figured out.
SOUTH KING COUNTY	Projects will take too long and cost too much. By the time they are complete they will still not meet the needs of the area. I don't use transit as the schedule and routes don't meet my needs. What about bringing better service linking the East & West Hills of Kent out to Covington? Improve the areas where rail service is impacted by mud slides every year. Nothing was mentioned about the expected commute time it will take between each current & proposed area for light rail.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - South King County

SOUTH KING COUNTY	Focus on South Sound projects-Prioritize light rail to Federal Way since this was supposed to have been under way already.
SOUTH KING COUNTY	It is really stupid this project take so long. Use the government's eminent domain to condemn the property and get that stuff done. I'm going to be retired and moved away before this is ever finished.
SOUTH KING COUNTY	People need to get to work or make money, and unfortunately there are a lot of adolescents to adults that aren't allowed to drive for criminal reasons. That being said, what good is it going to do to restrict transportation, which is the main factor in one's life to moving forward and moving on. We have to work together as a community or don't be surprised when oppression , whatever form it may be, causes more problems within our community.
SOUTH KING COUNTY	What would it take to expedite the completion of this project? What would it take to expand the mass transit system to more outlying, but growing communities? Consider that including some of the outlying areas could increase their growth as well.
SOUTH KING COUNTY	25 years is ridiculously long. This needs to be expedited to support our growing population.
SOUTH KING COUNTY	I believe the 25 year time line for this plan is too long. I believe a 10 year time line is more realistic. Let's start with a more focused 10 year plan and then assess the results of that plan. If ST achieves the goals and is successful, then the voters will be more likely to move ahead in another 10 year time frame. I live in Kent, and I don't see alot of these costly improvements assisting the citizens of S King County. I see way more benefit to the Seattle folks and the East side population and yet we are paying the same. We have experienced a vacant parking lot at the corner of Smith and Railroad Ave that Sound Transit has refused to finish for over 5 years while ST spends millions of dollars on expansion to Bellevue. Ignoring the complaints and concerns of the citizens in the south end does not provide support for a new 25 year plan that does not provide an incentive for our citizens to support this plan. Let the Seattle, East Side and North end citizens who benefit the most from this plan pay for a greater portion of these improvements. In summary, shorten the time frame and allocate the cost to those who benefit most from these improvements. Thank You.
SOUTH KING COUNTY	You have a major timeline issue here. According to your proposed schedule I will be enjoying lightrail to my home in West Seattle when I'm 87. 17 years to build a rail line? are you joking? This city is so quick to let developers pack neighborhoods with too many people but you've had no plan to provide the infrastructure to support this. We've been screaming about this for years and only now are you proposing this major transit plan. My question to you is why should I invest in a project that I won't be using? Two things: 1 - Make the developers pay for this 2 - your timeline is WAY too conservative. We need this now, not in 17 years.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - South King County

SOUTH KING COUNTY	I believe the projects need to start and be completed much quicker than your plan is calling for. At the rate of growth the area is taking on, the situation will only get worse.
SOUTH KING COUNTY	I would strongly support if the timelines were within a reasonable completion time (>10years). If we are looking 25 years out to fix the problem that exists with current population there really isn't a point. The planned system will be too small for the population once it is completed leaving us in the same situation we are in now.
SOUTH KING COUNTY	Timelines are unrealistically LONG. Projects MUST be completed faster, or you will never convince majority of public to support. I ALREADY VOTED to extend light rail to Federal Way, just DO IT.
SOUTH KING COUNTY	Project completion times seem incredibly too long. To have to wait for funding for Federal Way, and quite honestly any other area to have light rail is way too long. Light rail should be a priority and the time of implementation should be accelerated to as soon as possible, like 5 years at the latest. We are not currently using public transportation, but would take the light rail if it was available.
SOUTH KING COUNTY	Voters in Federal Way were promised a link on the light rail system many years ago in Plan 1. Federal Way should be number one on the timeline. It should have been completed yesterday.
SOUTH KING COUNTY	It is difficult to keep support momentum going for something that takes 25 years. The support you get now will not even be working at that time. Beef up the timelines and costs to make it a reality and you will get more support. 25 years before any relief for commuters no one has that much patience.
SOUTH KING COUNTY	The number of King County Metro buses going to eastside (Bellevue, Redmond, etc.) have always been a higher priority than the north or south ends of King County. That is a socioeconomic issue. You have look at the people who are going into Seattle to work. Many of those people are in the north and south ends of King County. I think that the priority of the projects are askew and must be re-prioritized.
SOUTH KING COUNTY	There should be a) BRT service on 515 highway in kent, connecting Grady way (Renton) and 516 highway (Kent) b) BRT service on Martin luther way (same route as bus 101).  There are no direct buses from East hill Kent to Seattle/UW except route 157 (only morning & evenings). Going to Kent station for east hill kent residents takes too much time.  Project completion timelines are too long.
SOUTH KING COUNTY	As you have already heard, timelines are too far out...must be a way to make this happen faster.
SOUTH KING COUNTY	Timelines should be accelerated for Light Rail for Everett, Ballard, West Seattle and Redmond.
SOUTH KING COUNTY	I would be willing to pay more to see this done at a faster rate.

Comment(s) about project completion timelines - South King County

SOUTH KING COUNTY	It's unfortunate that we drug our feet for all these years and now that the region is booming with growth, a 25-year proposal is being voted on (Twenty-five Years!). If we think the congestion is bad now, I can only imagine how bad it will be if it takes 25 years to complete this plan, so I strongly believe the timeline should be revisited and reduced (even if it requires legislative action to allow greater funding options). Also, I'm surprised a light rail route is not being considered along the East corridor (i.e. Bellevue to Kent). Traffic maps clearly show this as the #1 worst commute in the entire region!
SOUTH KING COUNTY	Do Federal Way first!!!!
SOUTH KING COUNTY	get commuter rail and light rail to there farthest ends as soon as possible,north and south.
SOUTH KING COUNTY	Your plugging holes in the damn. Think outside the box and find a solution. Then I'll be happy to help pay for it!
SOUTH KING COUNTY	This timeline is too long to wait. By the time everything is online, the area will either be far bigger than projected or be less economically-vibrant than it is today (but still stuck paying the bill for this ambitious system). I want this region to be world-class, but I worry that our inability as a region to get things done in a timely manner will hamstring our economic growth for years to come.
SOUTH KING COUNTY	This will take too long. We must pay more and achieve this plan sooner.
SOUTH KING COUNTY	These projects needs to be completed sooner than 20 years in order to accommodate how quickly Seattle is growing(especially with the addition of Google employees).
SOUTH KING COUNTY	8 years is a VERY long time to wait for the first phase of this plan to be completed and 25 years is a lifetime when you are stuck in traffic. How about offering 2 versions of these plans? One with these long timelines and one with shorter timelines, but higher cost. You might find people are much more willing to pay for something when they can envision actually being able to enjoy the end result.
SOUTH KING COUNTY	Federal Way desperately needs Light Rail.
SOUTH KING COUNTY	25 years is a really long time. Is there anyway to make this happen faster? Didn't China build a rail network with hundreds of miles of elevated train tracks in less time than it took us to build the initial downtown to SeaTac phase. If the money is raised, why can't the Redmond,Federal Way, West Seattle and Ballard projects happen simultaneously. I understand that Federal Way must be reached before Tacoma can be reached, but couldn't rest happen simultaneously. At this rate the traffic traffic problem might be solved by a network of self driving cars before the trains are ready.
SOUTH KING COUNTY	25 years is too long. I understand that there are so many reviews and impact studies that need to take place, but making us wait 25 years will again give us a transit system that is inadequate for our needs at the time of delivery. We're too far behind right now to wait that long. We need solutions in the next 5 years if not sooner. Even 8 years for busses is not acceptable for our needs. But I love the ST mission and fully support new projects and even increased taxes. Please keep plugging for new options!!
SOUTH KING COUNTY	Seattle requires a fully functional system in place asap to help support the growing population the roads will never be able to handle. Public transit is a requirement for a healthy city. The sooner a full system is in place the better.

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - South King County

SOUTH KING COUNTY	Stop spending taxpayer money on something that serves SO few people!!!!
SOUTH KING COUNTY	would be willing to pay significantly more tax to move up the timeline by 10 to 15 years over current projections. these will be profoundly transformative changes that will permanently benefit our community... the sooner the better
SOUTH KING COUNTY	25 years to complete these projects is ludacris. Buses suck...you need to increase the number of sounder trains so the 167 corridor can get to the city and back all day not just 3 hours in the morning and afternoon. If you can't take a train to go see an event in the city what good are they? You pay \$20-50 to park and create traffic. Expand existing services so we can use them. And maple Valley need a light rail line. You have totally forgotten about South East king County. The people of South East king County would ride the train more than the folks of Issaquah. They are the blue collar people that make the cities run. Not the white collars of the plateau that won't get out of their cars.
SOUTH KING COUNTY	Must prioritize projects that most affect citizens who are less able to afford personal transit.
SOUTH KING COUNTY	Plan is too expensive in terms of cost per commuter. Buses are much more cost effective. The people of Puget Sound do not want to become "The West Coast New York City".
SOUTH KING COUNTY	Just once - Give the south end PRIORITY. Users in Federal Way have lost more bus routes while paying increasing fares. We continue to pay more for less and less service, especially in South Federal Way. Federal Way residents readily agreed to tax themselves in order to get light rail. Instead, the rail went further north and east. Even now, we are not considered first priority. Are you not aware how many people in the South end work downtown and pay taxes downtown and support downtown. It is increasingly harder to get reliable transit from the South end to anywhere, yet we pay taxes like everyone else.
SOUTH KING COUNTY	Light rail to Ballard and West Seattle should be prioritized, because we need to incentivize getting cars off the road.
SOUTH KING COUNTY	I think it all needs to be completed MUCH sooner. I would support double, and even triple, the cost to residents to shorten the completion time. I would tax the wealthiest residents at 3x the proposed rate because for those people, \$600/year is nothing, and they are the ones with 3 & 4 cars per family.
SOUTH KING COUNTY	Light rail to West Seattle in 17 years? That is unacceptable. Also, care should be taken to improve accessibility and speed of existing light rail and Sounder lines. I have tried to use Light Rail currently but live 5 miles away so i have to drive in and have never been able to find a spot. Limited to non existent parking is a disaster.  Also a 40 minute train ride from the airport to downtown is unacceptable. Stop trying to lengthen and worry about your core flow through for the light rail.
SOUTH KING COUNTY	Why is this taking so long? Build it now, not 20 years down the road.
SOUTH KING COUNTY	We're paying taxes on the light rail in federal way. I do support it and I'm okay with it taking time, but the sooner the light rail gets to federal way the better.
SOUTH KING COUNTY	I support finding more money and doing it all faster. Transit is worth the cost.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - South King County

SOUTH KING COUNTY	I-405 is such a mess, light rail and expedited bus to Bellevue is vital. I am part of REI moving to Bellevue in 2020 and you will have another 1500 people heading into Bellevue on a daily basis. I'm coming from Covington, it will be a nightmare.
SOUTH KING COUNTY	Speed it up.
SOUTH KING COUNTY	By the time this project is completed it will be time to start all over again. You are taking steps to make improvements for future residents but are doing nothing - but raise taxes - for those of us already here. Our property taxes were already raised to support transportation with no good results. West Seattle is a disaster. The city allowed too much new construction without any improvements. How are all these people supposed to get in and out of West Seattle? Why didn't you consider that before allowing all the new residents. You are a little late with this bad new transportation plan.
SOUTH KING COUNTY	There is NO density that would make this plan cost effective. It is not that I am opposed to mass transportation project but this area of the country that doesn't lend itself to cost effective mass transit. We are already subsidizing the train in Everett losing money EVERY DAY. This plan is idiotic and is in NO way sane or economic. Show me actual numbers proving this will Help and I will support. Past efforts in this state PROVE it will fail. Focus on fixing traffic congestion and quit this folly.
SOUTH KING COUNTY	The north end always seems to get preference. Originally Light Rail was supposed to get to 272nd-- now it's on the plans but not clear when. I strongly support public transportation but feel undermined and dismissed, as a South Sound resident. In your plans and, most importantly, in your implementation, please help the South Sound!
SOUTH KING COUNTY	Can't this be done sooner?
SOUTH KING COUNTY	In my mind, priorities should be to a) develop light rail network in the Seattle area, Tacoma area, and Bellevue area (to allow people to get into and out of the cities), including making commuter parking available in the outlying Seattle stops, and b) linking the Seattle/Tacoma light rail into one continuous system. Light rail/subway/metro lines are the future (or really, the present) of mass transit, while bus services are essentially a stopgap until a less traffic-dependent system (like, say, light rail) comes along. Commuter trains importance are directly proportional to how much demand there is for commuter trains, but I can't speak to their relative use.
SOUTH KING COUNTY	These plans should be integrated with comprehensive proposals to encourage active transport and discourage single passenger drivers.
SOUTH KING COUNTY	This should be a priority and use the money generated by tolls and over charging and surplus already in budget for transportation. We pay too much taxes and results take too long.
SOUTH KING COUNTY	25 Years is far too slow for completion. Not to mention if you are looking to alleviate traffic in and around Seattle, the east side projects should be completed long before the south end projects. A lot could be done if you would increase parking at every light rail station in the interim, add an extra car per train, and increase hours of operation. I shouldn't have to leave my house at 6AM every day to get a parking spot then sit in my car for an hour. It's infuriating, do better.

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - South King County

SOUTH KING COUNTY	Why do you always have to build it all at once,,,, build from station to station,,,and grow this as money comes in. You kill all projects because you only have big plans and not grow,,,this is what killed the monorail in Seattle,,,, add from SeaTac,,, to Tacoma dome,,,, then to everert
SOUTH KING COUNTY	25 years to get light rail to Everett is to long. The time line should be 5 to 10 years. use the HOV lanes up and down I5 to bring light rail sooner
SOUTH KING COUNTY	It is absolutely absurd that it should take so long to extend the LR. We should not have to wait up to 25 years to see the LR extended into Ballard and West Seattle. The northern suburbs should not have priority over the higher density areas that would benefit from LR greatly.
SOUTH KING COUNTY	I understand that these types of projects take time, but the time line seems long. I will be on Social Security by the time light rail makes it to Everett. That seems like a long time to me.
SOUTH KING COUNTY	It is embarrassing that the Puget Sound area be so far behind in its projects for mass transit. Additionally, it is a shame that the rail line up the East Side is not being used for train, which would have been a lifesaver for those traveling up and down I-405.
SOUTH KING COUNTY	Why would all this take 25 years? Im all for setting the next generation up with better transportation options, but 25 yers seems like a really long time to complete these projects.
SOUTH KING COUNTY	The timeline is unbelievably slow. My household would pay \$400 a year for services we would not benefit from for nearly 17 years. That's a nearly \$7000 investment before my household would see a benefit. This project is too important to wait that long. I support the ideas and goals of ST3, but unless this timeline can be shortened, I'm likely to vote "no."
SOUTH KING COUNTY	The cost for what is being delivered and the timeline is preposterous. This wil NEVER pass.
SOUTH KING COUNTY	I am sad that we were unwilling to see far enough in the future to create a usable transit system that would be complete during my lifetime. that is why, even though I won't be around to use most of it, I still stronly support going a head NOW. We have delayed way too long.
SOUTH KING COUNTY	Too long to complete.
SOUTH KING COUNTY	The South Sound has been paying all along for light rail and being neglected by Sound Transit. I now will probably not live long enough to see the taxes I've already paid in develop into light rail for the South Sound. I will not vote for another or cointinued taxes to support Sound Transit. Enough is enough.
SOUTH KING COUNTY	While I strongly support ST3, everything we can do to fast track completion times for the extention of light rail North to Everett and South to Tacoma should be made. Fast and reliable movement along the heavy traffic laden I-5 corridor, gives voters immediate feedback on the importance of these measures going forward.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - South King County

SOUTH KING COUNTY	Create bus pull outs for safety. Many buses have to stop on road. Make wider and safer sidewalks to encourage walking. Many sidewalks are getting narrower and right next to road with high traffic. Do not plant trees in the middle of sidewalks built for people. Not a good use of tax dollars and makes walking less safe as one has to step into road.
SOUTH KING COUNTY	Timelines need to be much more aggressive. 25 years is a joke.
SOUTH KING COUNTY	You MUST complete the north-south corridor before adding any more intra-Seattle lines or bus routes etc. Focus on enhancing Sounder Service (expanded schedule, more trains - look to cities like NYC and Toronto as examples) and light rail. Lets get the Puget Sound MOVING!
SOUTH KING COUNTY	Get it done faster!!!
SOUTH KING COUNTY	The timelines are too long. The people you are asking to pay for it now will most likely be dead before completion. I'd rather have another lane built for cars than support this plan. The plans always show parking, colleges and downtown locations and malls. What about relationships to hospitals?
SOUTH KING COUNTY	Focus on White Center, Burien and other lower income areas before north Seattle. They use transit because it's an option. We use transit because we have to. Our service is already bad and desperately needs improvement.
SOUTH KING COUNTY	The Boeing Access Road light rail station was part of the original plan. Instead we have a 7 mile gap between the Rainier and Tukwila stations. The BAR station should be build before any further light rail extensions.
SOUTH KING COUNTY	Why is this not being completed in a timelier fashion? 25 years seems excessive as does the proposed cost of \$200 dollars a year per person. The stat currently makes enough money off of its citizens and this is a problem that should have been addressed long long ago. In my opoinon this is 10 years too late.
SOUTH KING COUNTY	We need lightrail in Federal Way to be completed much earlier! Thank you.
SOUTH KING COUNTY	The sooner the better!
SOUTH KING COUNTY	I think the greatest emphasis should be placed on the light rail projects. Considering the population growth the the greater Seattle area is experiencing we need an effective underground or at least off road transportation method that's capable of traveling in highly urbanized areas (a subway) to really help alleviate the issue of traffic and help to reduce the carbon footprint
SOUTH KING COUNTY	Should have all this done by 2025
SOUTH KING COUNTY	I would like to see the projects completed on an accelerated schedule
SOUTH KING COUNTY	Parking at the current sounder stations is a huge issue, and a lot of the reason why many people choose not to take the train. This should definitely be considered extremely high priority, even paid parking would be more helpful than no parking.
SOUTH KING COUNTY	Priority should be given to constructing Ballard light rail access. The relative isolation of the area puts more cars on the road and leads to major congestion in and out. They need it more than Redmond or Federal Way. My "somewhat opposed" comment above is meant to reflect this.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - South King County

SOUTH KING COUNTY	There isn't a transportation project that has been completed on time, due to what I see as poor planning, poor management and execution. These projects are incredibly expensive and are a waste of money. Money that would be better spent fixing the roads and transportation problems we have now. The DOG'S in this state can't manage what they have going on now and don't they want more.
SOUTH KING COUNTY	Rather than planning for the worst when it comes to planning, permitting and system design, why not publish scenarios based on the cooperation of the partner cities. You could use that as leverage to convince cities to cooperate, because it would be clear that the projects are taking longer due to cities not being responsive enough with permitting, etc, rather than a poor project management by ST. I understand the need to publish a plan you can build, but being overly cautious will cost you votes. I fear you don't understand that as of right now this is probably a loser.
SOUTH KING COUNTY	The explosive growth in Ballard and West Seattle have made living and commuting in these areas increasingly difficult. We are continually asked to agree to more property taxes, but I am not sure what the upside is for us. This should be prioritized over the east side. West Seattle and Ballard are part of Seattle. I will be dead by the time light rail comes to my neighborhood.
SOUTH KING COUNTY	I think West Seattle access to downtown needs to be earlier in the timeline.
SOUTH KING COUNTY	Bi-directional rail service to Mukilteo/Everett is needed. AM = inbound to Seattle from Evterett/Tacoma and PM=outbound from Seattle is so extremely anemic that it makes me cry.
SOUTH KING COUNTY	This state has never done a project that comes in on budget or on time and there is ALWAYS cost over runs. Please do not saddle the people of this area with another project that will be out of control!!!
SOUTH KING COUNTY	The timeline is the weakest part of this plan. Seattle is growing so rapidly--waiting 17-20 years to connect Seattle's northern and southern neighborhoods to the city center is not workable IMO. It takes an hour to bus approximately 10 miles from White Center to downtown. That's 10mph. Not good.
SOUTH KING COUNTY	ST is a proven success. I don't want to wait until I'm retired and old before it comes to my neighborhood. The light rail buildout timelines are atrocious. I won't support it. 8 years tops.
SOUTH KING COUNTY	Light rail service to Federal Way was promised years ago in earlier transit plans, and has been neglected ever since. Taxpayers have been paying for something that was promised to be available very soon (2016-2018), but now isn't expected to be available until 2028-2030. Delivering services that were promised years ago for our tax dollars should be the top priority in the new ST3 plan. This is the only equitable solution for taxpayers in Federal Way having the rug pulled out from under them on past promises that were never kept.
SOUTH KING COUNTY	Bring the link light to Federal Way. It's clearly needed with the high ridership on the express buses.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - South King County

SOUTH KING COUNTY	<p>If more funding would help speed the timeline up, then I propose that you increase the light rail fee, while keeping the day pass the same. Turnstiles at certain locations would also help get the additional funding needed since there are several passengers who do not pay for their trip.</p> <p>Also, once the Angle Lake station is open, I propose you renovate the Tukwila parking lot to add tiers to the lot, since it is always packed between the hours of 6:00 - 18:00.</p> <p>Thank you for all that you're doing.</p>
SOUTH KING COUNTY	<p>Why is the time table for these projects so long, the Transcontinental Railroad took only 6 years to complete in the 1800s.</p>
SOUTH KING COUNTY	<p>The urban lines (Ballard to Downtown Seattle and the extension of the Tacoma Link) should be prioritized and completed earlier. The new spines (Link to Tacoma and Everett) also should be accelerated. The Sounder expansions also need to be prioritized. The sooner we have more mass transit the better!</p>
SOUTH KING COUNTY	<p>Wold strongly support if sound transit had a history of on time on budget completions. WaDot already soaking tons of tax dollars on failed transpotation projects.</p>
SOUTH KING COUNTY	<p>25 years to complete? Seems to be something wrong with that. I think you make it take a long time so you can keep taxing the people.</p>
SOUTH KING COUNTY	<p>I think they should move faster.</p>
SOUTH KING COUNTY	<p>Timelines should be amended to show a best case and design build time. Gives us transit users hope that we will see projects done early.</p>
SOUTH KING COUNTY	<p>Like most transportation in Western Washington, it's too little too late. We're in crisis now. By the time most of this is implemented, it probably won't support the then current needs.</p> <p>And for me personally, you'll never get me out of my car to take a bus. I like trains &amp; light rail due to no traffic. I took the bus from Kent Station to Seattle once. Never again! The Sounder's hours don't fit my lifestyle. Unless service is increased, I'll drive. And I'm opposed to paying for transit that I don't use.</p> <p>And don't increase my vehicle expense to pay for others to use transit!!!!!! That PISSES ME OFF and gets a no vote every time! If I gave up my car, the \$400 per month payment, tags, gas &amp; insurance, I could get by without using transit. Taxing cars is short-sighted. Transit needs to be paid for by ALL RESIDENTS in the counties it serves! Not just people who own cars.</p>
SOUTH KING COUNTY	<p>I think connecting south seattle to tacoma with the link light rail should be a priority. I believe that adding shoulder bus services is a great idea and would help out quite a bit. this should be a top priority because thats probably one of the easiest and fastest to complete.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - South King County

SOUTH KING COUNTY	The timeline seems reasonable.
SOUTH KING COUNTY	Please do it all faster than the referenced 25 year period; if at all possible! Thanks.
SOUTH KING COUNTY	Keep going. Be ambitious. Don't become NYC that doesn't have mass transit to major areas or to the major airports. Don't be Los Angeles which is running to catch up.  Be PARIS. Be BOSTON. Be LONDON. Cover as much as you can as quickly as you can.
SOUTH KING COUNTY	I live in Federal Way and I'm paying property taxes for light rail that was promised and now won't be delivered for AT LEAST another 12 years. This scam has changed the way I vote for new taxes. I am much more likely to vote no for things now, since I can't trust the government to actually use the money the way they said they would. Before the FW lightrail shell game, I was a staunch liberal when it came to financially supporting my community projects, especially mass transit. You have single-handedly changed that.
SOUTH KING COUNTY	The timeline is WAY too long. Find a way to speed up construction. We are already behind the curve, and this plan does not help that situation.  Also, more expansion in the city of Seattle. Growing the light rail spine is good, but coverage in the biggest city is very important also.
SOUTH KING COUNTY	I'd be dead by then. Paying for things I can't use is stupid.
SOUTH KING COUNTY	Need to expand into the south end to federal way area much faster as this is an area if lower income families who use bus and rail more than other communities like the east side. Bellevue families don't use buses like the south end people do so need to change the priorities in the plan to get service to the people that need and want it the most, than building it for communities that don't want or will not use it as much
SOUTH KING COUNTY	Why on God's green Earth does it take up to 25 years to build a transportation system? Without cutting into safety, all other processes should be expedited to allow for a more timely construction schedule. The folks in Olympia need to get on-board with cutting red tape, not fleecing the taxpayers for personal agendas.
SOUTH KING COUNTY	Kent to Tacoma Lakewood first to address the growth out side of Seattle. People can not afford the cost of housing in Seattle.
SOUTH KING COUNTY	What will be in olive to prevent cost over runs? And late delivery?
SOUTH KING COUNTY	Should get it done faster if you want real support.
SOUTH KING COUNTY	Have zero faith that you will deliver on anything you say, always overbudget and not on time. All one has to do is look at the UW district station 10 years behind schedule, even though you'll say it's on budget and on time (maybe even early) but that's with the 2nd vote and billions more in cost classic gov't overreach.
SOUTH KING COUNTY	It would be really nice to be able to complete it more quickly.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - South King County

SOUTH KING COUNTY	The first ballot measure for ST passed in 1996! It is now 2016 - two decades later and according to this survey, it will take another decade for ST to reach Federal Way. As a taxpayer, I am frustrated that it takes over three decades to establish this infrastructure for a region extending < 30 miles. This works out to 1 mile per year of development funding.
SOUTH KING COUNTY	As a resident of Federal Way, I am strongly supportive of building the light rail to the FW Transit Center. At the same time, I am very disappointed this project wasn't completed 30 years so that we don't have a system like San Francisco/Oakland has with BART as it is WAY OVERDUE. I am also very disappointed it will take 12 years to complete as that is way too long. It should be started immediately and completed ASAP!!!
SOUTH KING COUNTY	Sooner would be better.
SOUTH KING COUNTY	Link light rail from SeaTac to federal way needs to be advanced as fast as possible
SOUTH KING COUNTY	My problem is that you are taking entirely too long to finish the beginning stages. You are entirely ignoring Federal Way but you are looking to us to help fund transit to some of the wealthier communities. You are developing light rail along the I-5 corridor and ignoring Pacific Highway South/ route 99. Highline College is located close to route 99 as well as many communities who would benefit from light rail being along highway 99. You are kowtowing to various business interests rather than looking out for the people who will use this service. This short shortsightedness has been the Achilles' heel of so many projects in the Puget Sound.
SOUTH KING COUNTY	The Ballard line should be completed sooner. It's just a greatest good for the greatest number issue. It should also be on its own right-of-way, to avoid both surface congestion, and unreliable estimates of trip length.
SOUTH KING COUNTY	I'm very dubious and wary of your timeline for service to the Federal Way area. We were promised service from ST1 if we would support the tax increase then. As you well know, it never happened and of course, we were totally ignored in ST2. I'm afraid that most of us in this area are not at all hopeful that it will actually happen if we support this tax increase. There are a lot of retired and low income in the area along with those who can easily support this kind of increase.
SOUTH KING COUNTY	Would not be thrilled to pay \$34 per month (between my wife and I) for light rail that won't get to me in West Seattle for 17 years. I suggest ST3 should take priority over other improvements to existing transit in terms of a timeline. Perhaps raise money through municipal bonds prior to moving forward and pay it back later rather than paying massively for transit that will take years to get to some of us. That way it might to get everyone sooner. Taxpayers such as myself can often be impatient. Ha!
SOUTH KING COUNTY	Since Sound Transit is awful at both coming in on time and under budget I would warn against giving you lot any more money until you demonstrate the competence to do a job properly.
SOUTH KING COUNTY	How many missed deadlines, blown budgets, and incomplete route services are we supposed to endure and support. Increasing bus services is much cheaper, offers more route & operational flexibility, and is more manageable. Tired of seeing empty light rail going to the airport and more rail when bus service can be improved so much faster and cheaper.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - South King County

SOUTH KING COUNTY	It's always frustrating to me when a plan like this is put in place and property owners and automobile owners bear the brunt of the cost. If this is the way that Sound Transit wants to get money then it seems to me that homeowners should get a credit each month to ride their transit option of choice. Why isnt the cost of building the rails passed on to those who use it?
SOUTH KING COUNTY	8 years for implementing BRT is not aggressive enough to succeed. Traffic is quickly getting worse on I-405, I-5, and all the other major corridors; by the time BRT is finally deployed, it will not be a desirable option anymore.
SOUTH KING COUNTY	Light rail to West Seattle and Issaquah should have higher priority. Parking at existing light rail stations is also EXTREMELY important.
SOUTH KING COUNTY	Seattle is choking on road traffic. Improvements to rapid transit, light rail, etc. and local parking at stations are urgently needed!
SOUTH KING COUNTY	To my knowledge, the more affordable housing is south of Seattle in areas like Kent, Federal Way and Tacoma. 12 to 17 years to get the light rail connected to Tacoma is too long
SOUTH KING COUNTY	I feel the South end should be prioritized over the East side. Express bus service is already better on the East side, and there is more need for light rail to the South end. Federal Way residents are extremely frustrated by the delays to our area. Additionally, about 90% of the times that I've attempted to use light rail to get into Seattle, there has been no parking available at Tukwila and I've had to either pay to park at the airport, or drive to Seattle.
SOUTH KING COUNTY	It needs to be completed sooner. I am 40 years old and have lived in and loved this region all of my life. I cannot find the right words to describe how disappointed I am that we do not have this in place already. You need to tell the story better. You need to explain the impacts of what a truly world class system like this would do for the Puget Sound region. I will not enjoy the fruits of this, but my children will. This will transform the region. People need to understand that it will make all of our lives better, even if you don't use it.
SOUTH KING COUNTY	25 years is too long of a timeline. The earth will have burnt up from global warming by then. You need to work on the the South side more intensively and faster.
SOUTH KING COUNTY	As a driver and downtown Seattle employee, I'm very much for getting other people off the road.
SOUTH KING COUNTY	We need all of these plans right now, not 22 years from now!
SOUTH KING COUNTY	The timelines need to be moved up on the Sounder and light rail projects. I strongly believe that the region should be running light rail along I-5 and 405 and get the buses off the freeway. The rail systems should be the main artery with the bus systems running off the train stops into the cities.
SOUTH KING COUNTY	I feel that the West Seattle extension should be built much more quickly than planned! The recent developments made to roads and for buses in West Seattle has actually made matters worse! You have reduced two-lane roads to one lane ... and built out Rapid Ride loading platforms. This results in a very slow parade of cars behind buses. I have photographs and videos of this on my phone. Please fix these issues!!! Traffic is getting worse - not better - and more and more people are going to be moving into West Seattle as they build more high density buildings. You've made it worse ... now you are going to make us wait a long time for light rail. This is not acceptable!

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - South King County

SOUTH KING COUNTY	This region should have had light rail 25 years ago. We need to speed up the process and get more creative in funding this plan. We are heavily taxed in this area and would like to see a hotel car rental restaurant tax go toward funding. Thanks and let's get this done already.
SOUTH KING COUNTY	12 years is too long of a time frame for extending light rail to Federal Way. This section of the light rail was approved by voters on the last bill and never delivered. Not only are we being asked to pay taxes on this again, we're being asked to pay taxes for another 12 years before any services are delivered??
SOUTH KING COUNTY	25 years is a very long time.
SOUTH KING COUNTY	Time line is too far out. I know this all takes time but 25 years out? I would support a quicker timeline and get more creative financing besides taxing individuals. Do big businesses/corporations help pay? They should be paying a lot since their profits are dependent on employees getting to work.  Also, more parking is needed at the Tukwila Light Rail Station, it is impossible to find parking there during work hours. How about a garage? When I used Boston's rail service a few years ago, I paid \$1.00 to park in the garage, reasonable.
SOUTH KING COUNTY	The light rail down to federal way needs to be completed sooner due to the number of lower income individuals that live in this area that rely on public transportation to get to school and work
SOUTH KING COUNTY	Since the residents of southern south King County were asked, and agreed, to voluntarily pay an extra tax specifically for the light rail link to Federal Way. Then were denied the link as promised by this same organization. I think perhaps you, as an organization, should live up to your obligations BEFORE coming to us, again, begging for more money. Be good for your word. Then we'll talk more funding. Till then, I'll NEVER vote your organization more tax authority.
SOUTH KING COUNTY	Completion should not take so many years. Bureacracy is ridiculously slow!!!!
SOUTH KING COUNTY	Are we going to add more light rail station all over Washington State.
SOUTH KING COUNTY	The time frame is too long. By the time the phases are complete, the project will end up being a failure for the plan is meeting the needs of today, not what is to come. Also, the projects rely too much on sources of funding that are overly taxed already. Either start having businesses like Microsoft, Amazon and Boeing invest heavily or create a very specific tax for ST3.
SOUTH KING COUNTY	I can assume the reasons for the proposed plan yet I would like to see the light rail to West Seattle sooner than 22 years. Yet overall I would rather see a plan that will strike the interest of Seattle citizens in order for the light rail system become a robust network as proposed.
SOUTH KING COUNTY	25 years until light rail reaches Eastgate? Unfortunately I'll be retired by then. I will ride light rail more often if parking is added. Also, don't put any sections of light rail on surface streets as was done on MLK. It is at huge risk for colliding with vehicles & pedestrians and it slows existing traffic. Busses are slow, they pollute, break down, & get in the way. Invest in rail.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - South King County

SOUTH KING COUNTY	I would recommend that you do whatever you can to accomplish as much as you can in the quickest way. I know that's a pretty general statement. Just keep moving forward. I would support even more additional taxes or monies to accomplish what you are trying to do. I believe all drivers and vehicles should contribute to the costs of mass transit. Everyone benefits in one way or another.
SOUTH KING COUNTY	West Seattle is very badly in need of better transit options! I'm happy to see the proposed line, however, I'm very disappointed that the line only goes to the Alaska junction and I'm completely appalled at the proposed timeline. West Seattle is a very large area and we would have much higher ridership if the line extended all the way down to White Center. Also, 17 years is an extremely long time to wait, considering that we already have a great current need for better options. I feel very strongly that ST3 will NOT pass if the timelines are not improved drastically for light rail to West Seattle and Ballard. I think these two lines should be of the highest importance above all of the other projects proposed.
SOUTH KING COUNTY	Can any of the plans or sections have overlapped schedules?
SOUTH KING COUNTY	Can it happen faster? 22 years is too long.
SOUTH KING COUNTY	Please make sure you are prioritizing your work based on community need, not income. The South King County area often gets neglected when it comes to transit due to the low tax base as many parts are low-income. However, the low-income people often rely on the affordable, reliable transit options.
SOUTH KING COUNTY	Wish they could be completed much sooner.
SOUTH KING COUNTY	If anything can be done *faster*, I would support any any changes. With more and more growth in this area, we need to get cars off the road today, and definitely within the next 5 years. Transit needs to come more frequently during peak hours, and with more parking at park and rides (garages instead of surface lots could increase parking by multiple factors). Make the transit convenient for people to take it and they'll get off the roads!
SOUTH KING COUNTY	The timeline needs to really speed up, especially the light rail connecting Seattle through Federal Way to Tacoma. Thank you.
SOUTH KING COUNTY	Seems long time to complete
SOUTH KING COUNTY	Timelines for completion should be shortened for light rail going south from Kent Des Moines south to Federal Way and Federal Way thru to TCC, Sumner and Dupont SHOULD BE GREATLY SPEEDED UP! People in South King County and Tacoma/Pierce County need transit and would use it far more than West Seattle, East Side and Snohomish residents (e.g. look at use of the A line compared to initial projections and look at how early the Tukwila Transit Parking Lot fills up each morning).
SOUTH KING COUNTY	Please implement completions sooner. If you put these plans off say 20-30 years, future costs will be MUCH higher and taxpayers will end up paying much more in taxes because home prices are anticipated/expected to rise.
SOUTH KING COUNTY	Timeline should be shorter.
SOUTH KING COUNTY	The sooner it can reach tacoma the better! Love light rail!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - South King County

SOUTH KING COUNTY	Faster please! We need the construction to move along as quickly as possible to Federal Way, Tacoma and Bellevue! Thanks for all your hard work on this project.
SOUTH KING COUNTY	These are all great proposals, however, we simply cannot wait for 25 years to do this. We MUST find a way to get this done far sooner than that. There has to be other ways of pushing the timelines up much sooner. If it's done sooner, I, for one, would love to use mass-transit from here in SE King County (Covington/Maple Valley area) to downtown Seattle much more often. The major reason I'm not able to make it downtown nearly as often as I'd like is due to traffic and parking issues and the very high [personal] stress that goes along with them.
SOUTH KING COUNTY	Sounder train is barely listed as a project in this plan with no defined dates for completion listed in this survey. The parking situation and number of passengers on each train has overflowed and made it extremely hard to commute this way, something I do every day. I really think more emphasis needs to be placed on adding more parking options and more frequent sounder trains.
SOUTH KING COUNTY	Given the current population growth rate in the area. This proposal is going to be consistently underserving the mass transit needs of Puget Sound.
SOUTH KING COUNTY	I would love to be able to use the rail to Federal Way but would probably be too old to use it by the time it goes in.
SOUTH KING COUNTY	By the time this plan is complete, self driving vehicles will have dramatically changed the way transit works. ST3 needs to address these changes. In 25 years, the proposals in this plan will be obsolete.
SOUTH KING COUNTY	Totally unacceptable!! Let private contractors bid on job with a right to work clause and no minimum wage requirements.. We have a large Obama workforce available that can man shovels rather than hold cardboard signs at street corners. Obama and the Democrats have failed. What do you not understand!
SOUTH KING COUNTY	This is an extremely lengthy process. If possible it needs to be completed more quickly to enable people to travel more easily and with a less harmful impact on the environment of the Puget Sound region
SOUTH KING COUNTY	I hope to see mass transit improvements before I die. I am 63 years old. I somewhat oppose the timeline. Not the project.
SOUTH KING COUNTY	Given the current frenetic state of the surrounding and adjoining MSAs; the 25 year to completion timeline seems far too short of the need. Would increasing the tax rate decrease the time taken to complete the overall plan? Has that concept been tested. Frustration and a worsening condition that increases inconvenience often leads to increased support for more immediate solutions.
SOUTH KING COUNTY	Forego bus line work and double efforts on light rail. Increase cost now to build twice as fast in today's dollars, even if it costs us more in the short term. A 25 year timeframe is too long. Other places build bigger systems in less time - why can't we?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - South King County

SOUTH KING COUNTY	The timeline and schedule is too long and needs to be moved to the left, especially for the I-5 corridor. The I-5 corridor currently is a mess from Tacoma to Everett both North and South. Everything possible like study, funding, engineering design and build should be on a accelerated. I would strongly support a accelerated implementation schedule.
SOUTH KING COUNTY	The project timelines need to be reduced. We don't have time to wait on this.
SOUTH KING COUNTY	Get it done faster a 25 year timeline sounds ridiculous. The progress is sorely needed but hard to support if going to take forever to get done. I'd pay more to get it done way sooner.
SOUTH KING COUNTY	The Tacoma projects need to be completed earlier, at least by 2025. Tacoma has waited long enough, while Seattle and Bellevue gets the regional light-rail built to and in their cities. It is time for Tacoma to get regional light-rail we have waited long enough!!
SOUTH KING COUNTY	The south end has been promised light rail and this has been delayed so that the north end can be served. This appears to be related to the fact that there tends to be lower incomes in the south end and therefore the south end doesn't have as much of a voice. In the south end, more people rely on mass transit because that's their only way to get around. Please consider the needs of the south end quickly!
SOUTH KING COUNTY	Anything you can do to get this done faster is better. We are really behind the times compared to other major cities. The Seattle area is growing fast.
SOUTH KING COUNTY	I wish more focus would be paid to the south lines.
SOUTH KING COUNTY	Cut cost and time by concentrating on bus service improvements.
SOUTH KING COUNTY	<p>Development needs to happen WAY faster than what has been proposed. There is going to be a massive exodus from the bay area up here over the next 5 years and our population is only going to grow. Our transit right now is a joke compared to pretty much any other major metropolitan area in the country, much less the world.</p> <p>I would LOVE to take transit instead of driving, but I simply do not have reliable, if even usable, options. If we don't take transit seriously, our region's going to suffer dramatically. People are already spending hours every day in commutes that could easily be accommodated with transit lines and park-and-rides. The 405 corridor and Microsoft areas are great examples of areas that should have WAY better transit options than they currently do; the traffic is THAT BAD.</p> <p>And WSDOT just developed a perverse incentive with the 405 HOT lane: they have no reason to improve traffic or support improved traffic when they can charge \$10 per person per day. And this disproportionately affects families without the resources to afford that kind of toll.</p>
SOUTH KING COUNTY	Do Federal Way first
SOUTH KING COUNTY	I will be paying for this until I am dead. And I'll be dead before its built.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - South King County

SOUTH KING COUNTY	SOONER! The traffic is getting worse and if there was more availability of transit options that run on their own systems like the light rail, I would be riding every day.
SOUTH KING COUNTY	Need to complete projects faster
SOUTH KING COUNTY	Many people who would use the light rail services do not want to wait 30 years to use the services and new stops. That seems like a ridiculous timeline. And 50 billion dollars?! That seems outrageous!!
SOUTH KING COUNTY	Light rail to the Federal Way area is critical and should be prioritized higher in the plan. In the 12 years we have lived here my commute had more than doubled. The sounder train is an option if it ran more frequently with more robust schedule. Parking at all stations is near to impossible rendering it unusable for our family.
SOUTH KING COUNTY	Do light rail now ASAP. Let's become a real city and allow people to commute and travel via a real subway/rail system like other major cities across the globe. -- And decrease pollution and traffic from cars.
SOUTH KING COUNTY	Portland Metro constructed a for extensive system in much shorter time. I think the timelines in the plan are ridiculously inadequate to the area's needs.
SOUTH KING COUNTY	West Seattle has grown tremendously within the last 2 years with numerous Condos & apartment buildings. The traffic is horrendous, bus services have been cut, and many residents have to drive a mile to get to a bus stop. If the city actually does take down the viaduct, we will be isolated. We need both the tunnel and the viaduct. The city should do what is best for the majority of the people, instead of interest groups.
SOUTH KING COUNTY	Faster! 25 years is ridiculous.
SOUTH KING COUNTY	Needs to be done faster and parking for stations is already a problem and needs to be provided or else people won't be able to utilize these services.
SOUTH KING COUNTY	The idiot SR99 viaduct replacement tunnel has exactly zero role in sound transit planning. Just a bitter observation. I hope that TBM fails and remains buried beneath the viaduct.
SOUTH KING COUNTY	Projects serving the eastside should be given priority.
SOUTH KING COUNTY	Too slow
SOUTH KING COUNTY	Increasing the speed at which routes to the light rail system are added needs to be prioritized in order to gain support for this plan in the city of Seattle. At the very least the possibility that the timelines could be improved upon if the plan is approved by voters needs to be put out there or I'm afraid local support is going to fade.
SOUTH KING COUNTY	Move access to Federal Way higher up on the priority list. I have been commuting for 30 years and it's about time we had a light rail to Federal Way!
SOUTH KING COUNTY	Federal Way commuters have I-5 or Pacific Hwy as a means to get to Seattle. Only!!. This area deserves transit other than bus. Sounder commuter rail is not easily accessible and stations do not have adequate parking. Why is Federal Way ignored other than sometime in the future?

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - Pierce County

Subarea	Additional Feedback - Comment(s) about project completion timelines
PIERCE COUNTY	Accelerate delivery of South Sounder projects. This should be a 15-20-yr plan. People in Pierce County will not vote for it if it takes 25 years.
PIERCE COUNTY	The completion dates are so far off... I agree with the need to invest in the future, the ST3 future is a long ways off! ST needs to make bus improvements it can sooner - such as increasing the number of Seattle-Tacoma buses during rush hour, and the number of SeaTac - Tacoma buses during their busy times (such as when airport employees change shifts). Where are those options in your survey?
PIERCE COUNTY	Hurry
PIERCE COUNTY	I'd like to see the Tukwila light rail station get constructed faster! It's long overdue!
PIERCE COUNTY	Bring more light rail sooner to Tacoma
PIERCE COUNTY	I would like it if you can restructure the debt so you can finish these projects sooner. We need lthis now, not in 25 years!
PIERCE COUNTY	Parking at rail stations cannot wait. Parking lots are already full and there are no good transit options to get to park and rides other than by car. Adding light rail and new train service will only make the problem worse so parking is a prerequisite.
PIERCE COUNTY	Didn't see much about adding more train services. There should not be such a large gap between the last train arriving in Seattle in the AM, to the first train leaving a little after 3pm.
PIERCE COUNTY	More parking is absolutely necessary. I would love to use the light rail but there is no parking at all at some of the stations. Even the additional train station in Lakewood isngreat, but the parking garage is almost full on a daily basis. The tacoma dome parking garage is full, every day. Where am I supposed to park to take transit if the garages are full?
PIERCE COUNTY	The Tacoma link has been completed for years and we were told years ago that we'd be given a connection to Seattle. This timeline seems excessive and with the way the government is run, I think people (including myself) are dubious that you'll complete it in that timeline of at all and are concerned that you'll just use the money to fund things unapproved by citizens.
PIERCE COUNTY	I'd like to see the timeline for Central Link to Tacoma moved up by 50%. Would be happy to pay what it takes to achieve that. Also, I'd like to see more investment in Tacoma Link in ST3 -- connect the Tacoma Mall to downtown Tacoma. It's more important to connect the Mall to light rail than it is to make it all the way out to TCC. You could stop at Proctor instead.
PIERCE COUNTY	Way too long on project timelines. All this is saying is that you get it voted on and passed to take the taxes, and then the typical drag-out and failure with timelines; additional studies that drain the funds; and before you know it, you have the tax in place, need more, nothing is done, the prices are higher, more tax needs to be raised. Typical bureaucracy.
PIERCE COUNTY	You first need to coordiante bus, train & light rail so they compliment each other.you also need to get them to run on schedule. As long as mass transit fails to get you to where you need to go on time, you will never get people out of their cars, no matter how much you expand or spend. The easiest fix would cost nothing.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	Light rail service to Tacoma and Pierce County should be completed before BRT projects or done concurrently. The commute will only worsen in 17 years.
PIERCE COUNTY	It's hard to support projects that will cost me money now and years to come; yet, the projects that help me in Tacoma won't be completed for 2 decades. I'll be near retirement before I can use the mass transit services but will be paying for them the rest of my life anyway.
PIERCE COUNTY	I would be supportive of a higher tax and higher fares if it would increase the speed with which these projects will be finished. I am supportive of every single measure and think that we need to fund them, but a 25 year timeline for a system that should already be in place is unacceptable. The investment may be for the future, but the current generation should enjoy these projects as well. Find a way to speed these projects up!
PIERCE COUNTY	For too long the residents of the South Sound have been largely ignored. Expanding travel options for those commuting from Tacoma to Seattle should be a priority. There is a sever lack of transit options from Tacoma even to the Kent/Auburn area.
PIERCE COUNTY	My biggest complaint is that this should all be completed sooner - it is ridiculous that every other major city I've lived in has better public transport systems than the Seattle/Tacoma area. I live in Tacoma now and love that I live and work in Tacoma and don't need to commute by I5 because I can't imagine that... but regional transit from Everett to Tacoma would allow me to stop using my car for visits to family.
PIERCE COUNTY	The completion of extended Sounder rail platforms and extended trains along with longer and more frequent service in the south end is critical. I ride every day. And eight times out of ten I don't get a seat. Also- Better access to the surface streets in Seattle should be considered. A crossing to the Amtrak side?
PIERCE COUNTY	Pierce County projects need to be moved up in the prioritization process. We basically got left out of phase II for light rail. The Des Moines to Tacoma dome expansion should be completed in the first 8 years.
PIERCE COUNTY	Speed up timeline for Tacoma to Seattle light rail. Increase frequency of sounder commuter train to allow people going to Seattle for shopping/fun the convenience of rail travel so we can lessen traffic and parking constraints.
PIERCE COUNTY	I think it is more important to link Tacoma and Seattle sooner than later. The traffic to go to Seattle in a car makes me less likely to go there for much. I love the light rail from the airport to the Seahawks and Mariner games and to Westgate. The parking at Tukwila and the airport is great. Having light rail to Tacoma is long over due and should be accelerated so we can use it sooner than later. 17 years is way too long to wait for ease of travel to Seattle.
PIERCE COUNTY	Most of my responses refer to south end residents. I've never been happy with the amount of funds Pierce County has paid toward the light rail system in King County. I'll be retired before any light rail ever gets to Tacoma if at all. I feel the funds could've been better served in South King or Pierce Counties of which I would benefit from. Instead, only King County residents, visitors and students for the most part benefit. My only saving grace is I have the Sounder Train. I'm sure you have your own reasons why as do I which is why my interests are directed for those traveling form the south end.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	<p>The time line is stretched out waaaaay too long. Nearly two decades before I see light rail to Tacoma?! You'll be asking me to vote for ST4 *and* ST5 before that finishes. Give me a plan with a 10 year horizon. As it stands I'd vote 'no' to this plan not because I don't believe in the mission of Sound Transit, but because I don't like how long this plan will take.</p> <p>To be quite honest, I get the impression that you are just throwing a bunch of highly desirable big name projects into ST3 hoping for votes, rather than making hard decisions and giving us a reasonable package.</p>
PIERCE COUNTY	Pay now or pay later.
PIERCE COUNTY	<p>The timelines seem to be unreasonable. Something has to be done quickly. I am curious where my current RTA taxes go that I pay for...but are asked to give more money. Everyone should pay a transit related tax when they buy, oil, antifreeze, auto parts, automobiles, etc. Also, for those who do not have vehicles, they have to participate in the tax pool...not sure how. Maybe renter's tax, tax common products that everyone uses...milk, eggs, bread, soda pop, chips, candy - all of this contributes to the success of overall transit systems and to improve them.</p>
PIERCE COUNTY	I support faster timeline to provide light rail from Seattle through to Tacoma and Tacoma Community College
PIERCE COUNTY	<p>25 year timeline is just too long. The \$50 billion ask over that time will continue to increase as inevitable delays and overspending occur. 5 year plans need to be developed in each transit sub region. North Seattle. East side. Downtown. And South End. The spine from angle lake to UW is complete work on the arms and legs now, not in 25 years.</p>
PIERCE COUNTY	<p>I want more more more transit, and I want it SOON! 17 years to get light rail to tacoma?!? SEVENTEEN? dang. that seems way too long. why is it going to take that long? I'd happily pay twice as much as the proposed increase to get it done sooner. wouldn't working on more projects mean more jobs?</p>
PIERCE COUNTY	<p>This whole process is taking way too long. You are planning on fixing today's problems in 25 years. What you completed this year should have been done in 2000. You are 16 years behind. I am paying the tax and getting no services. (Bonney Lake) You are looking at mass transit into downtown Seattle. People work other places that downtown. What are the plans to get mass transit to Boeing Everett and Renton.</p> <p>I have retired so am able to travel in off peak hours, but that time is getting shorter every month.</p>
PIERCE COUNTY	<p>17 yr &amp; 25 yr timeframes seem doubtful. There is no guarantee that the postponed projects will ever be funded. The extension of the rail needs to be prioritized much higher.</p>
PIERCE COUNTY	<p>Federal way and Tacoma link expansions should be of the highest priority. The amount of people I know that are all for that(myself included obviously) is staggering.</p>
PIERCE COUNTY	<p>Parking is the biggest problem at sounder stations. When stations are built they need to be able to accommodate everyone one that wants to park there. The buses that route to and from the stations are not large enough, nor do they run often enough. In Puyallup, often times the evening bus isn't there when the train arrives, which it is supposed to be. It is often standing room only unless you are one of the patrons that do not swipe their orca cards prior to heading to the bus. Also, there needs to be more orca card scanners at king street station. With the amount of people trying to go up the stairs and catch further transportation, scanning the card becomes an afterthought.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	South King and Pierce always seem to get put on the back burner when times get tough, yet this is an area where rapid expansion is needed sooner rather than later. I'd encourage ST to give this area priority in the timing of their projects. They have everything to gain as far as increased ridership goes.
PIERCE COUNTY	You need to speed it up by 3 years. The project between Tacoma to Federal Way to SeaTac
PIERCE COUNTY	Frequency of connecting services needs to increase, we need to develop the feeder transit system so people are willing to park by there homes if they can catch a bus or train every 10 minutes or so. Parking needs to be strategic and available. It takes me 90 minutes today to commute 1 way, 35 miles, using my car to train, train to bus, and bus to office and a 7 minute walk. 3 hours a day.
PIERCE COUNTY	I believe we need to make change now! It's unbelievable to me there is no transportation to the rail systems from densely populated and growing areas such as east of Sumner and Puyallup! And there's no parking so increasing bus service is the fastest solution.
PIERCE COUNTY	1. Twenty-thirty years is ridiculous. 2. Once again, Tacoma / Pierce is getting getting the shaft. Even this survey stresses Seattle/King in the questions and number of options.
PIERCE COUNTY	If light rail to Tacoma is going to take so long, please add more frequent + evening/weekend Sounder trains and reconsider adding a link and/or rapid transit to East Tacoma to connect it to the rest of the world & create more opportunities for the poorest of residents
PIERCE COUNTY	Build it now Add service now Fire the guy who thought a 25 years wait was a good idea. We NEEDED IT YEDTURDAY!
PIERCE COUNTY	17 and 22 years for Seattle light rail! Really, those are the key voters who support this. Move these time frames up and move light rail to Paine Field back, seriously! Build the densest corridors first!
PIERCE COUNTY	Tacoma/Pierce county experiences the most trouble from traffic to our commutes, but we are last on the time line for improvement. Why are we continually underrepresented by sound transit, when upper middle class white people in Ballard and surrounding neighborhoods are seeing increased investment. We all pay taxes, and we all deserve an equal share of transit investment.
PIERCE COUNTY	You should prioritize the completion of projects toward Tacoma. We've been paying for everything in King County since the beginning and a lot of people are moving from Seattle to Tacoma because of house prices. You should move the light rail extension to Tacoma and the Sounder extension up on the list of priorities.
PIERCE COUNTY	Parking issue at sounder transit stations should be addressed immediately.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	I am NOT opposed to the plan, just the fact of the time for completing it. 17 years for the first portion of the projects that are in Pierce County, I NEED for the transit system to be FIXED NOW. I ride ALL forms of the transit systems for Pierce and King Counties, and the fact that I can NOT get home from work at nights because the last buses in my area of Pierce County stop running at 730pm , and I DON'T have a means to get home for another 8 1/2 hours is EXTREMELY frustrating and stressful for me. I solely rely on public transportation and it's been a huge disappointment for me the last few years.
PIERCE COUNTY	Need to find a way to go faster. People will not vote for this package if the timing feels outside the range of improving for them. Spend \$200 a year for 15 years before any return and they will vote no.
PIERCE COUNTY	I'm glad we're building a system my grandkids might someday use. ... how about being less of a joke and speeding up that time line? I realize the baby Boomers failed to pay anything forward, but is this really the best we can do?
PIERCE COUNTY	We should be ashamed in how long it's taken to get this proposal together. Should have been there decades ago.
PIERCE COUNTY	How about we finish ST2 projects first? How much more can we complain in Puyallup about the need for a garage. A garage was approved and yet no construction activity to date. Original dates to complete the garage have crept further and further out, while we Puyallup commuters continue to waste away 80 hours a year on the Mayor Commutesen anti-downtown-puyallup, anti-commuter bus-em-outta town plan. Instead of the 400 stall garage at the Eagle lot, your own data and research should clearly show you the 700 stall garage at the station is not only needed, but will fill to capacity almost immediately. And then ST3 will need to start construction on a second 700 stall garage. But a garage is needed, has been needed, is well beyond being needed. Properties are for sale all around the station, Mayor Commutesen is no more. Now is the time to blaze into action! Finish incomplete projects from ST2 before beginning ANY work on ST3.
PIERCE COUNTY	I just wish there was a way to complete all this faster. And that we hadn't voted things down in the past. People are so short sighted.
PIERCE COUNTY	It takes too long. I would pay a lot of taxes, and be dead before some of this comes on line.
PIERCE COUNTY	I am disappointed that the light rail projects are at the end of the 25 year timeline. In my 52 years of living in the Puget Sound area, transit has always been 10 to 20 years behind the need and demand. While light rail is the most costly of the project, it should be a higher priority to move people up and down the I-5 corridor.
PIERCE COUNTY	I don't understand why it has to take so many years to expand these systems. You should be able to do it faster. Also, I believe you have been short sighted with the Link Light Rail system in only building 2 tracks. You should have included a 3rd track for an express run that stops fewer times. Some people need to get from one point to the airport or from Seattle to Tacoma and don't want to stop at EVERY station.
PIERCE COUNTY	Most likely you are getting feedback wondering why it takes so long to develop and build these transit projects. I am a Sounder rider on the south line. I've been with you since the beginning. It is sad that I will most likely be dead by the time light rail makes it to TCC. The rail systems make so much sense although they are expensive. Is there a way to accelerate or dramatically expand Sounder?

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	My husband is stationed at JBLM. Because of his position we have to live as close to the base as possible. I work in public affairs and most of the jobs in my field are up in Seattle. However, driving all the way to Downtown every day is a nightmare. I fully support the expansion of the rail to Dupont. This would free up so much time for thousands of military spouses who have to commute to Seattle every day for employment. And when your spouse deploys overseas every 2 years, time is precious.
PIERCE COUNTY	I accept that light rail to Tacoma should take 17 years, but Tacoma Link to TCC is streetcar, and 4.4 miles of that. It should not take 25 years to build. Additionally, Sound Transit should look at providing some small amount of revenue to Pierce Transit for feeder service at regional transit stations like Tacoma Dome Station. I do not want more tax dollars going to parking, when low income and people of color need better access to the regional transit system by local bus.
PIERCE COUNTY	I feel like 17 years is an absurdly long time to wait for light rail expansion to Tacoma and West Seattle. It is so crucial that Seattle and Tacoma are linked by light rail, and it should happen much sooner than 17 years. This needs to be the #1 priority. The mass transit options between Seattle and Tacoma are currently lacking, and the area is going to grow so much in the next 17 years, it seems like a shame that the light rail will be so far behind the economic and population growth.
PIERCE COUNTY	The whole plan needs to speed up. Especially, in the south sound. Home building is going full speed ahead in pierce county. Someone also needs to address the Meridian, state highway 161, congestion problem in Puyallup!
PIERCE COUNTY	Too long. Way too long.
PIERCE COUNTY	17 years is too long, public transportation is in dire need of improvement and projects need to be prioritized and expedited. And what about bus or train/light rail service between Tacoma & Bellevue/Redmond? Also, in the case of Pierce transit - options for East Tacoma are appalling - we need more direct bus service between East Tacoma/McKinley area and the North End without having to change buses at 10th & Commerce. Sick and tired of East Tacoma being brushed under the rug!!
PIERCE COUNTY	The project completion timelines seem too long. This may cause voters to feel the improvements will not benefit them.
PIERCE COUNTY	Too Big a package, with too little accountability. It should be done in a series of packages each contingent on the success of the prior package.
PIERCE COUNTY	Would love to see the timeline improved for light rail services from Tacoma to Udistrict, and TCC to Tacoma Dome. They should be completed in the next 5-10 years, not 25! It makes me sad that my commute will like continue to get longer (right now I spend between 3-4 hours commuting to work every day), struggle to find parking at park n rides, and I will likely retire by the time these projects are finished.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	Tacoma-Pierce County has significant air quality issues ( <a href="http://www.ecy.wa.gov/programs/air/sips/designations/maintenance_areas.htm">http://www.ecy.wa.gov/programs/air/sips/designations/maintenance_areas.htm</a> ). I will not vote for funding for ST3 if the proposed project timeline will not improve transit access to regions that have greater health and environmental concerns than others. This is a matter of health equity. Prioritizing improving transit access to communities where residents have sustainable transportation choices is inequitable. I will not vote to support this initiative because I don't think it will lead to outcomes that will impact my community. I am in favor of affordable, sustainable transportation choices and travel to work primarily by bike and walking. I want to support the expansion of the regional transit system, but based on this draft plan, I do not see myself voting for it in November. It appears that this plan was developed with property values in mind rather than the livability of our region.
PIERCE COUNTY	TACOMA NEEDS MORE !
PIERCE COUNTY	My sole objection to the plan is the ridiculous cost to the consumer. Adding horrendous vehicle taxes/fees, as well as sales tax and property tax, is just unacceptable. And all that going on year after year, and probably not finishing until I am a very old man!
PIERCE COUNTY	The Sounder Train should have a connection to getting to the airport. Also, to add more trains or a half day train to allow workers access to get home if needed.
PIERCE COUNTY	The timeline on the light rail needs to be a priority over the bus system. I am all for light rail, and a sales tax increase, and maybe a car tax increase. BUT I AM NOT WILLING TO PAY MORE PROPERTY TAX'S. I all ready pay too much for the size home i live in.
PIERCE COUNTY	Perhaps it is because not all the details are present in this survey, but I cannot wrap my head around why it would take 17 years to see a light link rail go from Tacoma to Seattle. To put it plainly, do you think someone wants to wait 17 years, 22 years, or any other far out date in the future, to be able to use these types of transit systems? Rome wasn't built overnight, of course, but this seems like such a slow course of action to an obviously far faster exploding population growth in our neighborhoods.
PIERCE COUNTY	Federal Way to Tacoma light rail expansion is so far behind the time line in reducing traffic congestion. This I-5 corridor is a nightmare! Will Pierce County have to wait 17 years to address this nightmare? I did not see your draft plan offering solutions based on solving priority transit problems, just a general wish list for Pierce County. The plan appears more political than practical. This is why I plan to offer my support only if a critical need component and advanced time line for critical transit corridors is included. I will wait for the details of your proposal for Pierce County.
PIERCE COUNTY	I am not a supporter of buses. So expanding those does nothing to encourage me to support the plan. As for your schedule....the #1 complaint I hear, and that I have, about Sound Transit is the ridiculous amount of time it takes for you to build your projects. Waiting 25 years to get the last of the ST3 projects completed is not acceptable. Before coming to the public for that much money, more projects need to be "shovel ready" and just awaiting funding.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	Move Ballard and West Seattle light rail earlier in the timeline. If you want to pass this you need a huge victory in urban Seattle. 20+ years out for Ballard is poor incentive for voters who tend to be selfish. Build out in the city first, then the suburbs- not the other way around.
PIERCE COUNTY	These projects should not be spread across 25 years. They need to be completed sooner and they need to be completed on a shoestring budget. We have a lot of rural communities that house numerous commuters. Frequently those commuters do not use mass transit because the system is not convenient enough. Make parking readily available at transit centers (do not charge daily/monthly parking fees) and improve your on-time schedules. If you can make transit more easily accessible and keep it affordable, you will get more commuters to leave their cars behind. Also, take into consideration that transit needs to be available for people who work various hours, not just 9-5, Monday to Friday jobs. Everyone deserves equal access to affordable transit that will get them to and from work ON TIME.
PIERCE COUNTY	Need to do these changes sooner. In particular, commuting into Bellevue from Pierce County is awful. There should be busses every 10 minutes max during busier times, and yes on the shoulders where possible.
PIERCE COUNTY	The outer timelines of 22-27 years just sound ridiculous. I support all that SoundTransit does, but the public cannot truly fathom how much things cost and how long it takes to do things. Suggest a new round with shortened timelines with a large dollar structure.
PIERCE COUNTY	It's too slow, I would much more strongly support a plan even if it were more expensive that provided more services sooner. I'll be most of the way to retirement by the time this is done.
PIERCE COUNTY	Make Light Rail to Tacoma a higher priority. Get it finished faster.
PIERCE COUNTY	The time line is not aggressive enough. Ask for more money and complete key project much sooner. Run major projects in parallel. Be creative in financing this, e.g a toll ring around key city centers to finance this much faster. This worked very well in multiple European cities.
PIERCE COUNTY	The timelines are unrealistic. These projects need to advance much faster. By the time these projects are completed, congestion/growth will have outpaced the expansion. Work to shave 5-10 years off the major projects. Also, be more forward looking. Like when King Co. ripped out the eastside rail line between Renton-Bellevue for a highway project, they cut off a critical rail line that could have been used for commuter rail. Foolish thinking.
PIERCE COUNTY	This timeline is outrageous. In 25 years I will be 67 years old. Most of us who are commuting to work now need these things put in place now. I understand these things take time, but this timeline is ridiculous. We also need a mid day train to and from Tacoma to Seattle. We need better transportation in Pierce County, Bonney Lake and Sumner. We also need more parking at Sumner Station and more trains to run. And not in 17-25 years!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	I am not willing to pay an additional \$200 in taxes per year for 17+ years before the light rail between Tacoma and Seattle is finally complete. This timeline is WAY too long. I will be long dead from the stress of my 4-hour round-trip commute by then and never be able to enjoy the benefits of a light rail system that should have been built 20+ years ago. Portland did it decades ago, why is Seattle/Tacoma so late in getting this done? It's utterly shameful it's taken this long and we still don't have the transit system we need. Also, for the stops between Tacoma Community College and downtown Tacoma, where are all the people who'll be riding these trains supposed to park? There should be expansion of the TCC park & ride if the light rail is going to go there.
PIERCE COUNTY	Growth in the Seattle /Western Washington is insane. Granted we need to adjust but we should limit the number of people relocating to the region. Growth is not always good. We are loosing the our environment for the sake of the dollar. It's inevitable but I hate to see how growth is destroying Washington state. Proposed changes to the Sounder Station in Puyallup are also insane. Sound Transit already owns a lot big enough for TWO parking garages, why must it try to pull Immanent domain and force the Eagles out. Putting up a parking structure on the Eagles property will again ruin the area allowing more crime to come in.. Cut the current parking lot in half and build one garage at a time. That lot will have to be cannibalized for this purpose anyway, why not do it now.
PIERCE COUNTY	I believe that this expansion is essential to quality of life in our region. But this proposal does not go far enough and takes too long. We need to expand the system much faster than proposed. ST was formed in 1996, when I was 14 years old. It's time to stop studying and start building. Traffic is bad. We no longer have time to fight with NIMBYs over which alignment impacts the fewest residents. We need to just build this thing. If you want to live in a forest, go buy a few acres in the mountains. Those of us who need to get to work, send our kids to school, pick up groceries, participate in local government, pick up a library book, and occasionally enjoy eating out need a transportation network that actually works. We have a transportation system that has started to fail us, and we have a crisis related to affordable housing. Getting ST3 built NOW helps us solve both of these problems. Let's work hard to accelerate this timeline!
PIERCE COUNTY	Project takes too long. Project should be prioritized/focus on the railway from north to south
PIERCE COUNTY	I-405 is the worst congested roadway in my view, something needs to be done there immediately.
PIERCE COUNTY	Overall this plan takes too long and is too expensive to support. Long range projections of this nature regarding cost, economic conditions, projected ridership etc. are not likely to be very accurate. Thus it is likely that this plan will suffer from cost overruns failure to actually complete all projects etc. Remember how federal way paid for public transit expansion it never got? I have little confidence in the ability of Sound Transit to get the job done in a cost effective or efficient manner or to honor there agreements.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	<p>need Tacoma light rail to TCC to move up in priority. 2041 or is it 2034 is a long time away. It should be the feeder line to be completed first before expansion of the rail line from Fed Way to Tacoma Dome.</p> <p>Expansion of Sounder to DuPont should be lower priority, not a huge transit population down there.</p> <p>Also, I think Sounder should have more frequent trips, preferably all day. Build more heavy rail track, if necessary.</p> <p>So, in summary, here is my suggested priority list,</p> <ol style="list-style-type: none"> <li>1. TCC to Tacoma Dome</li> <li>2. more Sounder trips</li> <li>3. "spine" from Tacoma to SeaTac</li> <li>4. All of your other projects.</li> </ol> <p>Remember, this is regional. So make the cities outside of Seattle a higher priority now that you've got something going already inside of Seattle.</p>
PIERCE COUNTY	<p>For this price tag, you need to push up the timeline.</p>
PIERCE COUNTY	<p>It is WAY overdue for Tacoma area people to be able to get to the airport via Light Rail. It is time to stop always making Seattle the priority. More and more people are relocating to Tacoma/Puyallup for affordable housing. They want to use public transit to get to work and to the airport. Currently it is extremely hard to do so. SUPPORT the Tacoma area and make THEM a priority for once!</p>
PIERCE COUNTY	<p>First, residents of Pierce County have been paying into sound transit for 20 years with nothing to show for those tax dollars except the ridiculous tourist tram in Tacoma. That tram has no effect on the I5 commute. How about something substantial for this County ! King County seems to be getting all of the benefits. Pierce finally gets limited sounder rail service but for only 5 days a week. Next is an absolute NO TO ANY Property Tax increases for sound transit. That would be a extremely inequitable and unfair way to ask for more money. If anything a flat rate tax on license tabs would treat all the people the same. As a homeowner I cannot continue to shoulder property tax increases every year!</p>
PIERCE COUNTY	<p>I believe the planned timelines are WAY too relaxed. I would rather see BRT options eliminated in order to fast track (excuse the pun) the light rail and Sounder options. I also believe it is important to plan for the ability to transition between lines and services, so a commuter/traveler can use the entire system in a holistic manner.</p>
PIERCE COUNTY	<p>The most important lines based on ridership projections should be built out first or as fast as possible! Ask for more money to get a faster build out if necessary. Many of us would like to see this built before we retire or die.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	Is there any way to speed up the plan? I'm afraid that exhaust fumes from all the cars on SR167 will kill me before long! Also, everyone in my family would use public transportation much more frequently if it were more convenient for us--for instance, we attended the Mariners FanFest a few months ago and would have loved to ride the Sounder, and it would be wonderful if there was a way to get to SeaTac airport from Sumner via public transportation.
PIERCE COUNTY	Can't help but envy other parts of the world and nation that seem to be able to get projects like this done virtually overnight, compared to the quarter-century timelines we're talking about here (I'm thinking specifically of Utah, which--so I've heard--created a light-rail system in the few years between hearing it was hosting the Winter Olympics and the actual opening of the games). Something about this part of the world seems to attract NIMBYs beyond measure--and, of course, our miserably regressive tax system certainly doesn't help. So I sympathize with ST--but, as I enter my late 60's, I look a little wistfully at a system, large parts of which I'll undoubtedly never get to use. One thing I don't understand--why can't more service (especially weekend) be added immediately to existing Sounder commuter rail?
PIERCE COUNTY	There needs to be a plan to complete these expansions exponentially faster. 25 years is too little too late to accomodate the growth and needs of the region.
PIERCE COUNTY	The planned execution of light rail to extended communities Everett and Tacoma is way too far out to be meaningful. What I don't see here is an option to pay more to get more done sooner.
PIERCE COUNTY	I have lived in other cities (Vancouver BC, Toronto, Montreal) in all of which which major, high capacity subway lines have been completed much more quickly than in your timeline. We need these projects, especially light rail, as soon as possible. The 25 year timeline is ridiculous. I will die of old age before this is completed. We will be in total traffic paralysis waiting for it to get done, and by the time it is completed it will be inadequate. This protracted timeline is my greatest objection.
PIERCE COUNTY	The main reason I am not fully supportive of this plan is the time line. 17 years is too long to wait for light rail expansion to South King County and Tacoma. The Southern expansion must be fast tracked for this project to receive my full support.
PIERCE COUNTY	<p>Being a Weyerhaeuser employee who's corporate campus is moving from Federal Way to Pioneer square this year - I want the fastest method available for my commute from Tacoma to Seattle. I wish the Sounder could be faster, but understanding it connects with busy streets its not really an option.</p> <p>I look forward to the extension of the link. I believe it will be a faster option for Tacoma residents traveling to Seattle daily.</p>

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	I moved to Puget Sound region in 1994. Reliable, regular rail links from Tacoma to Seatac Airport and Seattle were promised then but STILL have not been built, and this plan promises another 17 years before we get them. That's an entire generation's worth of wasted time and fuel! This plan far too heavily prioritizes inner Seattle projects over providing a truly REGIONAL, "Sound" transit project. And the deadlines are ridiculous. It would be much cheaper in the long run to accelerate these deadlines - and to build out the farther reaches of the system - than to follow this Seattle-gets-it-all-first program. I am a very strong proponent of mass transit and have used it exclusively nearly everywhere else I've lived or traveled in the world, but even though we have yearly ORCA cards, our household is absolutely using our car most of the time because we simply can't get where we need to go without it. PLEASE rethink the scheduling in light of the multi-county needs (and funding) of Sound Transit!
PIERCE COUNTY	I will be paying for this for another 25 years before it will be completed in Tacoma. Why should I paid for Seattle and other northern cities to benefit on my dime. At my age I will never see or be able to use something that I have contributed \$s too. Maybe add a something to the plan that if southern residents that are 65 and older would be exempt from increased taxes.
PIERCE COUNTY	I don't really trust ST & it's plans. We were told Tacoma would get Light Rail in the original ST1. I think it will cost more & take longer & i am not sure it's worth the cost.
PIERCE COUNTY	It will be huge for Tacoma for light rail service to be extended to TCC; I think this project should be a priority. The neighborhoods it will serve are emerging and a light rail would really shape how this happens. As Hilltop changes, increased public transportation is a development which will actually benefit low income residents and people of color and not just displace residents as has happened in gentrified neighborhoods in Portland and Seattle.  Is expansion of the Sounder into Olympia off the table?
PIERCE COUNTY	Please, Please, Please speed up the timeline for bringing light rail from the SeaTac Airport south to at lease Federal Way ASAP!!! Thanks for the opportunity to provide input.
PIERCE COUNTY	I hate that Pierce County gets added to late in the projects, I am tired of paying higher fees for everything and only seeing King County and other North of Pierce get better transit.
PIERCE COUNTY	All good, but the timeline should be accelerated as much as possible so that residents can see the progress each year.
PIERCE COUNTY	The outlays seem incredibly far out. I think expanding at a more rapid pace would increase effectiveness. Living in Fife, 17 years is a big time investment to wait for my tax increases to positively and directly affect my commute.
PIERCE COUNTY	I realize the timelines for ST3 are long. However, our current commutes are no longer sustainable. I support ST3 and hope other citizens will understand how badly this region needs realistic commute options. ST3 is a tax increase but it is also a bold investment in addressing our serious transportation needs.
PIERCE COUNTY	We in Pierce county are tired of paying for King county to get everything first while wait and pay and pay and pay ad nauseum! Tacoma should have had light rail access to SeaTac long ago and it should be a much higher priority in this proposed action.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	I've worked in construction for 15 years on projects ranging from \$15M to \$700M. You guys have done great with schedule a projects. Beating both!! But under promising by wide margins borders on [explicit]. Sounder should start running from Everett to Olympia extremely soon. Also make Sounder true mass transit not just commuter rail. Also fix the landslide issue in everett. The biweekly two day closures having become punchlines. People are skeptical, \$50B, and three decades is a lot to swallow. \$50B is realistic! Three decades is under promising. Expanding sounder routes and service times will get people on board NOW and off your back!!
PIERCE COUNTY	I would like to see Tacoma projects prioritized a bit more highly--17 years is an awfully-long wait!
PIERCE COUNTY	Time line is to long. 10 year completion of system is preferable. I strongly believe that expansion of sounder commuter rail up the I-405 corridor along existing rail lines from Tukwila to woodinville/Everett and expansion to Olympia is most efficient. Also building more freeway lanes everywhere should be a priority. Thank you.
PIERCE COUNTY	Why does it take 12 to 25 years to implement these improvements? To help with unemployment (WPA type work/jobs) and encourage public transportation - to get cars off the freeways and reduce commuter congestion - would be a benefit to expedite this plan. We here in WA could become a show place to have a much more effective and efficient public transportation system liken to systems in cities on the East coast.
PIERCE COUNTY	Sound Transit has a proven record of over-spending, missed deadlines, graft, unfilled promises. Their actions and inactions and money grab will force many people to suffer a lower standard of living and actually be forced to leave the home they built over the years. It is criminal.
PIERCE COUNTY	I think the light rail extension to Tacoma should be moved up. We have already been paying for this for several years and are still a long way from seeing any help.
PIERCE COUNTY	The most important part of the plan is to make sure parking is adequate for light rail because the existing parking has made it unable for enough people to start using the light rail as a normal means because of the constant knowledge and comfort that they will have available parking when arriving.
PIERCE COUNTY	The sooner the better
PIERCE COUNTY	I feel the focus should be on taking lightrail south along the I-5 corridor before heading further north to Redmond, etc. The faster we are able to have better access to lightrail for Tacoma to Seattle traffic, the faster we will have reduced traffic issues in the south end. Seattle to Tacoma lightrail expansion should have been the focus long before expanding into Capitol Hill or the University of Washington. Additionally, I'd like to see expansion of the Sounder rail line to weekend trips. Many people I speak with would take the Sounder to go shopping or visiting in Seattle on the weekends, but the trains don't run on the weekend unless it's a game. Additionally, more train runs, or longer trains would be helpful for commuters to Seattle. Many people would use the train, but have jobs that aren't 9-5. Expansion of the rail service would give me more patience for lightrail expansion to the south.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	While planned ideas are good, we can't wait 20+ years for traffic relief - at that rate, mass transit will only barely meet need. Further, Sounder service needs to be expanded - why not effort to and service throughout the day?
PIERCE COUNTY	The 2041 completion date for light rail to Everett is far, far too long to wait. Other than the long timeline, I do like the plan. Although it is pretty expensive, it is worth it to help relieve the traffic around here.
PIERCE COUNTY	All of the above should have been completed 20 years ago and now that traffic is a mess, you need desperately to do all these projects immediately - not waste another 25 years on this. Please note that where I currently live in south Pierce County, I don't have available any of these services although my area is growing. I also don't have senior services or handicapped bus service - which I may need in the near future. I still work and travel to work in Renton every day and deal every day with horrible traffic but I don't have easy, efficient, other transportation options at this time.
PIERCE COUNTY	projects listed for Tacoma/Pierce County should be done faster, not in 17 years. They should be done at the same time as King County/Snoho County projects. Sounder trains are true mass transit and should be expanded in the south. The north line is not effective due to mud slides. The south Sounder should have longer trains (more cars), more frequent trips during peak hours, all trains should go all the way to Lakewood and beyond (not just starting with the 4:12 pm train), and have mid-day runs (once an hour each way).
PIERCE COUNTY	The only reason why I didn't click "Strongly Support" is because the Pierce County options will take too long. Waiting 17 years for these improvements is insane.
PIERCE COUNTY	We need additional transit options NOW! I would prefer to pay higher taxes and have these projects completed sooner. Given the projected growth for our region over the next 10 years, we can't afford to wait 25 years for a modern transit system that connects Everett to Tacoma. We're already behind most other large cities in the world - let's show them what Pacific Northwest innovation can do and get this accomplished NOW!!!
PIERCE COUNTY	Would like to see increased bus service to & from DuPont so that a person could board a bus in DuPont and go all the way to Seattle or visa versa. Also, the sooner you can get Sounder train service to & from DuPont the better.
PIERCE COUNTY	I would support this if Tacoma/Pierce County/South King County projects were placed ahead projects in places north. We are part of the region too and all we've gotten out of this is a short light rail from Tacoma Dome Station to downtown and a few Sounder trains and buses. Traffic is getting worse and worse because King County folks are moving to Tacoma. What should be a seven minute drive from Hwy 18 to exit 133 at the Tacoma Dome can take at least 30 minutes during the afternoon rush hour and there's no relief in our future. The bottleneck has just moved south. Sure, Federal Way people might be happy, but we sad step-children of Seattle (the area better known as Tacoma!), still get crap. This projects shows no improvement for Tacoma for at least 20 years! 20 years! What have we been paying for??? And now we have to wait another 20 years for any relief? Meanwhile, more and more people are moving here.
PIERCE COUNTY	Speed up timeline and get this done. Seriously. Now.
PIERCE COUNTY	My support practically vanishes upon hearing how long this is supposed to take. Don't ask me to pay for something now that I might get to use a decade later. Get it done in 5 to 7 years or don't bother.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	Seems like the completion times are very long.
PIERCE COUNTY	proposal takes too many years and dings the individual taxpayer too much
PIERCE COUNTY	These timelines are ridiculous. I'd love to vote for it, but not with these timelines.
PIERCE COUNTY	Project timelines are too far out and should be shortened, if possible.
PIERCE COUNTY	Accelerate projects favoring Tacoma and South Sound.
PIERCE COUNTY	These projects need to be completed with greater speed.
PIERCE COUNTY	build it all faster !!! prioritize rail and build it everywhere. Get people out of their cars by making mass transit so intrinsic that you'd be stupid not to use it. Ditch the buses on the shoulder idea - that's about as smart as the variable tolling on 405!
PIERCE COUNTY	It would be nice if the projects were completed more quickly. I would like to use public transit, especially light rail, but the routes do not really work for me. Light rail is the best because it is congestion-free.
PIERCE COUNTY	Faster light rail expansion!
PIERCE COUNTY	I believe the project should be completed faster.
PIERCE COUNTY	It's disappointing that it will take so long to complete the rail projects. ST should publicize a plan ahead of the election to improve operation of existing services (e.g., more frequent and later express buses from Pierce County) so voters at the outer edge of the district are not discouraged by how long it will take to see a return from higher taxes.
PIERCE COUNTY	it just needs to get DONE!!!!!! Its already taken too long. \$200 per year as an average cost is nothing. You should advertise it in terms of other items people would not choose to live without - like water, electricity - or Cable or cell phone cost or budget for shampoo or hair cuts. Show how its nominal and win people over. Show how home owners with big fancy mercer island homes will actually pay more (which is the actual intention of a tax on assessed real estate value) - so the little guy doesn't get [explicit]. Make it relevant and something no one would say no to. Its ridiculous that we have no actual rail system.
PIERCE COUNTY	Why not start doing what you already promised and taxed others for... like seatac to federal way... which you never did complete... and we all pay taxes on already...  i will not pay anymore taxes for wasted idea's and money that you suggest ...  Also i really want to understand why King County Metro & You.... both fail to Pay Taxes (Federal) on fuel's using Dyed Diesel in your Hi Way bound vehicles... you maybe exempt from state taxes and such but not on the federal level... and no other business or school district in the area does and gets away with the damage you do by not paying your share...
PIERCE COUNTY	We can't wait that long for projects - unacceptable that we can't bring stuff online sooner. This is a top priority!
PIERCE COUNTY	Increased parking at existing stations should be of the highest priority. In order to accommodate the ever increasing popularity of the Sounder system, there needs to be place for these people to park while the other adjustments are being made.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	All this is too little too late, in my opinion. We had light rail service between Tacoma and Seattle, but rather than expand on that service the people who were in charge of city planning opted to build roads instead. Tacoma had a great trolley system at one time and passenger only ferry service to Seattle. We could have been a major stopping place of the best of the best in mass transit but that was all taken away. Now it's going to cost more than ever to put something that into place. By the time the planned rail system is completed according to what is being proposed, I'll probably be in the next world, just ashes blowing in the wind.
PIERCE COUNTY	This plan and its timeline favor the East Side communities at the expense of the South Sound. Current ridership trends and volume show that the South Sound is your fastest growing group of riders. It's cheaper to live in the South so the new riders tend to travel South to North for work. The more affluent riders of the East side still choose to drive. Light rail (to Tacoma, Fed Way) and new Sounder Parking (Sumner, Puyallup) is a necessity to get workers North. Light Rail to Mercer, Bellevue, Issaquah is more of a "nice to have", icon of good city planning. Please review your priorities and booming residential areas and where they tie in to the quality jobs (up North).
PIERCE COUNTY	The south sound badly needs light rail. It should not have to wait 17 years. Traffic is gridlocked going North on weekdays as early as 5am
PIERCE COUNTY	I know funding availability is the primary "roadblock" here, but I would love to see the ST3 plan expedited (even if that means greater increase in taxes/revenue sources) in order to complete all of these goals more quickly. This is a very exciting project, and it has my full support.
PIERCE COUNTY	It is praiseworthy that this plan tries to solve our traffic gridlock, but it asks too much of taxpayers with too long of a wait time; most of those who will be paying the majority of taxes will be retired or dead by the time they can benefit from this. The plan puts tax dollars in competition with dollars spent on education and burdens the whole state with debt that never ends. With Bertha still grounded under Seattle and the overspending and expanding deadlines on other transit projects of late, the plan is "pie in the sky". If the area is going to continue to grow at the rates projected, set aside tax dollars of new residents as they come in and pay for transit as the funds are available. Several business owners that we know and other residents (including ourselves) are considering moving from the state or least from the Puget Sound Region because of the increasing costs of living and the costs of doing business. Don't throw away money and place tax burdens on future generations for something that has too many unknowns and will likely cost way more than projected. Thanks for considering my view.
PIERCE COUNTY	For this project to be beneficial, it has to be convenient and reasonably priced.
PIERCE COUNTY	I believe there is a much greater urgency than the timeline above indicates. Light rail in Tacoma in 17 years seems a very long time away given the current already existing need. I would urge a shorter timeline for the project. We need a more sophisticated and more efficient public transportation system much sooner!!! The only way to get people off the freeway is by providing a convenient and reliable system -- we need this urgently.

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	Timeline seems excessively prolonged. We need this problem fixed now. I have lived in the Pierce/King County area for over 25 years. Traffic is getting worse. I support tax increases. But please consider that the average person person will look at the timeline and tax increases, and be extremely reluctant to support these projects. Maybe consider what can be done to speed this project up for the sake of getting these plans voted on and passed.
PIERCE COUNTY	Any way to speed up the project timelines will be strongly supported. 25 years is a long time to wait for project completion.
PIERCE COUNTY	Tacomans had the light rail plan dangled in front of them before and voted in support of previous plans. Instead we have been supporting Seattle area projects for a number of years now. The money should prioritize Light Rail to Tacoma as the number one priority. Then the other projects should come
PIERCE COUNTY	Residents are overwhelmingly in favor of getting this done sooner. I'd bet that a higher property tax increase in exchange for shorter timelines and skipping BRT mitigation would go over well. Also, those of us in Tacoma who have been paying into this system for decades would like for the Hilltop extension to actually happen some time in our lives. Finally, LRT to Tacoma is asinine. I'd rather you build heavy rail, get off BNSF lines, and run Sounder all day with a LRT jumper between the Tukwila Sounder station and SeaTac airport. It would like at least 2 hours to take LRT to Seattle from Tacoma. No one will do that when the bus does it in 45 minutes. Heavy rail should connect Olympia all the way to Everett. Get on that please.
PIERCE COUNTY	Build it faster!
PIERCE COUNTY	17 years to travel from Tacoma to Seattle via light rail isn't worth the tax burden requested.
PIERCE COUNTY	I'm supporting this plan, I wish it could go faster because I'd love to have bus service here in orting, however, I know faster is more expensive, and I don't think that's the way to go. It will take time, but I think all the proposed improvements are needed.
PIERCE COUNTY	The majority of projects should be to connect the length of the system and then begin adding/improving the feeder lines.
PIERCE COUNTY	All of the projects listed are important. The biggest single criticism I have is the timeline. All of these projects need to be expedited. 17 years to get rail to Tacoma and 25 to get it to Everett is nuts! BART broke ground in 1964 and opened in 1972, with the entire original system opened by 1976. I am truly mystified why it will take as long as forecast to build this system out. I think Sound Transit risks losing a lot of support if it stands by this timeline. Build it NOW!
PIERCE COUNTY	I believe multiple increases of access to Tacoma dome and south and westward ( DuPont/ TCC ETC) are critical That area voted for the light rail yrs ago and were critical in getting it passed under the assumption that it included from sea tac to Tacoma dome..... And then Seattle got the whole thing. Time to be fair to area code 253!!
PIERCE COUNTY	Every step forward in public transit will improve all our lives. All speed ahead!
PIERCE COUNTY	SOUNDER station commuter parking in PUYALLUP should be 1st priority. VERY much needed. Pedestrian overpass also very high priority at this station.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	By the time these projects have completed, transit patterns and populations will have changed dramatically and they will likely be out of date and no longer serve useful needs. Additionally, this does not even address the reason why I don't use the transit from Tacoma currently. The trains do not run early enough to get me to Tukwila by 6am and the trains do not leave Tukwila until later than I want to start back home. Also, the schedule between Tukwila and Seattle is also too limited to be useful.
PIERCE COUNTY	projects should be prioritized to favor those that reduce green house gases the most.
PIERCE COUNTY	Knowing that the current Puyallup expansion project is already over budget, I am concerned that these timelines are already in danger.
PIERCE COUNTY	I believe that our state is so far behind in the development of and use of lite rail. I feel that 20 years is to long to complete the needed lite rail systems for this area. Our infrastructure for this area has grown so fast but our roads and lite rail transit systems lack to keep up. I also feel that more trails need to run more hours of the day before I feel comfortable not getting stuck somewhere because I can't get home. I would love to take the lite rail from Tacoma to Seattle on the weekend so I don't have to drive. I could stay all day and return when I want to be the rail is always going. LIKE: WA D.C. , San Francisco, New York.. I thought we were a modern state but we are lacking behind in our transit systems.
PIERCE COUNTY	the timeline needs to be shortened....build faster
PIERCE COUNTY	It would be great to get the Sounder extension to DuPont as soon as possible, since traffic on I-5 through that area is consistently awful which delays buses. Since the Sounder isn't running on the Highway like a bus it is an ideal transit option for an underserved area.
PIERCE COUNTY	25 years is to long!! This process needs to be completed sooner. Quit wasting time and get it done.
PIERCE COUNTY	ST3 timelines are completely ridiculous! TriMet in Portland, OR would have the light rail lines completed in 1/3 the time! If Sound Transit thinks 17 years is too fast to complete light rail along I-5, then it is going to more than double daily commute times! WASDOT expects I-5 traffic to more than double or triple by 2025! This dragging of agency "feet" is not why I uphold, rely on and defend public transit services. WE NEED LIGHT RAIL ALONG I-5 NOW!!!! Not in 2 decades! Get your head in the game and get a move on it already!!!!
PIERCE COUNTY	The projects for Seattle Light rail to Federal Way, Fife and Tacoma should be within 8 years not 12. The Traffic comes to a complete stop from Federal Way into Tacoma. The light rail to Bellevue Transit center and on into Redmond also comes to a complete stop daily. Rush hour is now a 4 hour block of stop and Go traffic. Work with the Puyallup Tribe of Indians to get rail service in Fife and Tacoma sooner than later. The employers in Bellevue and Redmond should be willing to help with the expenses as well.
PIERCE COUNTY	I live in Tacoma and I feel like we're seriously overlooked/undervalued in the south sound. King county seems to be the focus of most projects when many of us live in Pierce county and would love to take advantage of mass transit. My husband works at the airport and would use the light rail daily, assuming the hours of operation were long enough. Same with the Sounder. We go to Seattle a lot for doctor appointments but don't take the train because it doesn't run late enough. That's also why my husband doesn't utilize the bus system for work. Please make the south sound a priority!

Sound Transit 3 - Draft System Plan

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	Do it faster even if that means raising taxes
PIERCE COUNTY	I voted for light rail from Seattle to Tacoma and you keep putting more and more money into an inner city trolley in Tacoma. We don't need more surface road congestion in Tacoma. We need more rail and bus service to Seattle.
PIERCE COUNTY	I was very excited about the projects when I started this survey, but am disappointed in the timeline. Enough so that I am no longer supportive. The population will outgrow the projected timeline; this means we will continue to have congested roads, with the addition of construction delays. In the end, we will have a transit system that immediately needs expansion as soon as it's completed. As a taxpayer, I would be willing to pay double the proposed taxes to trim the timeline. As it stands now, I WANT to use transit more often but it is too limited.
PIERCE COUNTY	Approximately \$200 a resident in Puget Sound is high. Able to pursue additional funding options? Grants, sponsorships from local companies (incentivize workers to use the transit), etc?
PIERCE COUNTY	Focusing on extending service to people who will actually use ST will do two things : 1. Help relieve the horrendous traffic in the area - which will increase public support for ST projects 2. Generate profit for ST The current timeline is ridiculous. It is the only reason I don't wholeheartedly support ST3. This is coming from a person who is looking forward to the day that our transit system works effectively enough that I can sell my car and use it as my sole means of transportation. I suggest pushing back the projects that do little to increase ridership and maybe look to cities with functioning transit systems as a guide for how to proceed. You are not inventing transit. It does not need to take this long. Quite honestly, you're already at least 15 years late with implementing this infrastructure, and in twenty five years you will still need to make improvements and populations change and infrastructure deteriorates. The current plan shows a disappointing inability to prioritize, and while I'm happy that at least ST is trying now, you should really have someone working for you that can do this - a civil engineer perhaps.
PIERCE COUNTY	The project timeline is so out of bed as to what the needs are! Needs are great now so these projects need to be completed sooner than later. IN 25 years the need will quadruple and what is available will be insufficient and ST will be back asking for more money.
PIERCE COUNTY	We commute between Sumner and Seattle (Graham Street) every day. The extension of the light rail down to Tacoma and the addition of a station at Graham would turn us into daily transit users. We are strongly supportive of this plan and the costs involved. We only wish it could be done sooner!  Thanks!!
PIERCE COUNTY	Make this happen faster!!! I would love to see Tacoma Light rail extended down to Ruston Way. There are so many businesses that would benefit substantially from this project. Portland has done a great job with their public transit, let's do better!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	I support ALL rapid transit, Link and Sounder projects as they will ease current road congestion, but isn't there any way these projects can get done FASTER?
PIERCE COUNTY	As a South Sounder & cyclist commuter it would be imperative for the platforms to be altered for a longer train, parking lot issues to be remedied, etc before putting this plan in action. I take the first train in the morning and my car is close to capacity when I get on in Sumner; adding additional stops would only make this problem worse. Also, not having a bus option off the Bonney Lake hill when the train isn't running makes it impossible to come home early from work unless I drive to the Sumner station, if there's a way to add a route that would be awesome. Third problem for those of us at the Sumner station - if the train breaks down and we have to get off the train there aren't any alternate buses to take south - something has to change, there should be some sort of Sounder option that can be called on when something like this happens!
PIERCE COUNTY	I feel that with today's construction technology once funds are allocated and appropriated these projects should not take so long. What is the economic impact of each additional car on the road. There must be a corresponding negative economic impact for traffic congestion in terms of time value of money and one's overall happiness with family and lifestyle. So why does a project take 17 years?? We put a man on the moon in the 60's in 8 years. How about we take our medicine quickly get all of the projects going at once, OR build the lite rail lines from both ends and accelerate the progress?  Thanks, [name]
PIERCE COUNTY	You are already way behind. The timeline needs to be moved up.
PIERCE COUNTY	Why should I be required to pay for something that I have no way of using?
PIERCE COUNTY	The amount of growth in the Tacoma / Seattle areas over the past couple of years alone should prove the dire need for improvements to the transit system here. Completing these projects 25 years from now won't solve the issues that commuters face today, and furthermore, will turn away potential movers. I fully support expanding the transit system. I think it needs to be completed much quicker than your current timeline if at all possible. Additionally, in the meantime, already existing train service should be extended so that there are trains running between Tacoma and Seattle much later into the evenings. This will encourage more public transportation usage, relieve significant amounts of road traffic, and encourage more tourism between the two cities.
PIERCE COUNTY	Just improve the light rail and sounder as much as possible, reduce traffic and all associated pains and pollutants and make it a lot easier for the City to grow and function for business people, tourists, residents, students, and anyone.
PIERCE COUNTY	It would be nice if these projects could move more quickly. I understand that may be related to the amount of money raised over time, but if not, then it would be great if more could be built concurrently.
PIERCE COUNTY	Please do the most that you can as quickly as you can. To delay would be disastrous. With Google expanding in Seattle and other high-tech firms coming in we need mass transit. I know. I grew up in Brooklyn.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	the timelines need moved UP! 25 YEARS?? THAT IS RIDICULOUSLY TOO LONG GIVEN THE CURRENT CAR TRAFFIC IN THE PUGET SOUND
PIERCE COUNTY	17 years is too long to wait for it to reach Tacoma. This issue is more urgent. Speed up implementation. Thank you.
PIERCE COUNTY	I understand the benefits and the opportunity that is now available through this kind of plan. As a young adult who does not use the transit system currently, it is difficult for me to want to pay the \$17 a month for this plan. I somewhat wish there to be a greater burden on those who are using the transit but I understand that having free transportation within the city is worth having as well.
PIERCE COUNTY	Would like to see a much more rapid expansion and project completion timelines. These commuter improvements are needed NOW!
PIERCE COUNTY	\$17 a month for a transportation option I won't even be able to use for at best another ten years? Good luck with public buy in on that one. :(
PIERCE COUNTY	I understand that completion of this project would take a long time, however, given the situation of I-5 (and other highways) traffic, this project needs to happen sooner. I will support this plan strongly. It is embarrassing that it took Puget Sound this long to work on this project considering other developed countries have much better mass transit system for years.
PIERCE COUNTY	Actual use of an inclusive efficient rapid transit system must be up and in use SOONER or myself and spouse most likely will not support it with our vote. We are 59 y.o. (Live in Tacoma)... friends and family in Seattle and Lynwood. Fingers crossed.... or else the region will come to a crawl with no alternatives for massive travel congestion to & from home/work.
PIERCE COUNTY	I Belive that the light rail should be worked on more than the bus
PIERCE COUNTY	Extension of Sounder Rail to DuPont/JBLM should be moved up in priority of projects. Of the Sounder & LightLink rail projects, this one appears to have shovel-ready infrastructure already in place. First, the Dupont Station already exists for bus transit. Minor modifications, one building structure & platforms, would need to be made to develop the station for train use. Second, existing rail lines already run through the area: major construction would not be required to use the existing lines or to add rail lines from the Lakewood Station. There is an existing rail spur that runs parallel to the main BNSF line on the sound side of the intersection of Bridgeport/Pacific Hwy SW that can be extended to separate BNSF & Sounder trains, if required. As BNSF is in the process of improving terrain and tracks between Lakewood & Olympia, this project could take full advantage of the new terrain improvements to extend track without delay. With proper coordination and funding streams, extending Sounder Rail to Dupont could be completed in less than 5 years. Additional funding could be obtained through the federal government's funding of shovel-ready critical infrastructure projects. High prioritization of this project will result in a quick Return-on-Investment, increased public usage from South-Sound residents and positive public opinion of other critical aspects of the program. Scoring wins on these three fronts with this portion will enable support and funding for other major aspects of the ST-3 program.

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	I feel the timeline of 25 years is way too long. The region has been in gridlock for as long as I can recall and a solution is needed much sooner than that. I've lived many other places in the U.S. and the construction timelines here in the NW are always so long. Unless there are reasons beyond my comprehension, I don't understand why it takes so long. The SB 167 project is the fastest I've ever seen something come together. On the other hand the I-5 corridor through Tacoma has been in a constant state of construction for at least the past 15 years and traffic is still terrible in that area. All those millions upon millions spent and no change to the congestion. Please don't let this take that route. I have ridden the Link, ST Express buses, and the Sounder and I love the thought of being able to do so everyday. Yet I drive 37 miles from Graham to South Seattle because there are really no viable options besides taking the Sounder and then walking the 3 miles from the Tukwila station to my office.
PIERCE COUNTY	This package is WAY too expensive! You need to find a way to make it much more affordable. My son takes the train into Seattle daily WHEN his schedule is working day shift. But he often works a swing or night shift. I'd like to take the train into Seattle or Kent later in the day to shop or site see , but it doesn't run all day. There are a lot of people who work shift work in the greater Seattle area who would use light rail if it had expanded hours. Years ago I spent summers in the San Francisco Bay Area and BART ran all day and night. It made it so easy to get into the city for the day and people who worked any shift could use it to get to work and home. We need to expand the hours of the train/light rail. Also, we need parking available at the stations. As much as you people would like to get us out of our cars, that's unrealistic in rainy spread out WA. My son lives 12 miles from the nearest train station and no where near a bus line, I can assure you he will NOT be biking to the station at 4:30am. Go back to the drawing board on this. It's not a good use of our taxes as it stands. Most people who are working now and who will pay for it, will be retired in 25 years when it's all done and won't need it. Make changes that the people who are paying for it can use now, not in 25 years. Yes, a future plan is good, but this is just way too expensive even for liberal WA.
PIERCE COUNTY	My opposition comes from the fact that there is nothing in any of the proposals that help out me or my neighbors on South Hill. I just did some research and found the population base in that area is huge and there if very little if anything that Sound Transit does for these residents and taxpayers. Based on 2010 census reports the population of Graham area is 23k. The last jump was a 300% population increase from 2000 census. This figure is already six years old. Population of Graham area estimated now at close to 40k residents, South Hill where traffic is a nightmare is home to 55k residents as of 2010 census info. Then throw in Fredrickson area and we are about 100k residents that are really being left out. Yes the planning is looking at Orting but why? South Hill and into Graham would be much more impactful on mitigation of traffic and providing service to a large population of taxpayers. The population of Redmond and Woodinville is similar and less in ways to the Graham, South Hill, Fredrickson area. I will not support and urge my neighbors to oppose this planning until the residents of these area are included in the fare share of this project expansion.
PIERCE COUNTY	Tacoma north must be completed early in the plan, not last consideration. We in Tacoma, supported light rail when we knew Seattle would come first. Now we need the support of King County to bring modern transit to Pierce County!!

Sound Transit 3 - Draft System Plan

Responses to the open-ended survey question, "Do you have additional feedback about the draft plan that you'd like to share?"

Comment(s) about project completion timelines - Pierce County

PIERCE COUNTY	It has always annoyed me - really, made me angry - that my transit money and road taxes go FIRST to KING COUNTY, and always WAY down the list is Pierce County. So, I'll not vote for any money if light rail does not go from Tacoma to Federal Way, and the timeline to expand the Sounder in Pierce County is not moved up, AND, if bus and Sounder service in East Pierce County is not vastly improved. We in Pierce County are tired of being kept waiting for service from bus, train and roads.
PIERCE COUNTY	These project timelines are extremely long compared to the high need we have today for more public transit. Cities like San Francisco have had a system in place for years and make great use of it beyond commuter hours. We should take rapid action to catch up with other major cities in the US.
PIERCE COUNTY	Faster!
PIERCE COUNTY	Tacoma projects are too long into the future. The region is linear but the focus on development is across at the center. The east side has always fought anything other than roads. Why are they first for roads, bridges and transit?
PIERCE COUNTY	Get the expansions on current run/routes done 1st. Boeing access rd. Added parking and other things on current heavy rail. Before pushin on with brand new items
PIERCE COUNTY	The timelines are too long to make any real impact on the current traffic problem. A true solution would be one that would not be impacted at all by traffic/accidents on the road (light rail and trains, for example).
PIERCE COUNTY	The biggest impact will be from extending service to Tacoma/Lakewood area and specifically extending service times to facilitate commute to and from Boeing Sites as well as other major employers that start in the early morning. Heavy traffic starts as early as 4:30 am and so having transit that can get people into Seattle and Renton areas by 5 am would greatly impact the traffic in the morning. I and many other people I know would utilize the transit system if it allowed us to arrive at work on time. Either the transit doesn't arrive early enough for first shift or doesn't leave late enough for second shift.
